GUYANA, the former colony of British Guiana, which includes the Counties of Demerara, Essequibo and Berbice, is situated on the north-east coast of South America and has a total area of 83,000 square miles with a seaboard of about 270 miles. The population at December 31, 1968, was estimated at 692,780. There are about 31,460 aboriginal Indians. The territory is bounded on the south by Brazil, on the east by Surinam, on the west by Venezuela, and on the north and N.E. by the Atlantic. The coastland is very like the Netherlands, below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the Guyana-Venezuela-Brazil boundaries is Mt. Roraima, a flat topped mountain 9,000 feet above sea-level. There are many beautiful waterfalls in Guyana: on the Potaro River (a tributary of the Essequibo) is the *Kaieteur Fall*, with a clear drop of 741 feet and a total fall of 822 feet, and on the Essequibo, the *Horse Shoe Falls* (discovered in 1934); a fall, with a drop of some 500 feet, discovered in 1934 on the Ipobe River, a tributary of the Kuribrong, has been named the *Marina Fall*, and other falls were discovered in 1938 on the Kamarang River, 80 miles north-east of Mt. Roraima. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate on the coast is pleasant and healthy for the greater part of the year. In the Aug.-Oct. period it is hot. The mean temperature is 80.3°, its extremes during 86 years ranging between 68° and 96°, but these are very rare, the usual extremes being 70° and 90°. In the interior the mean temperature is higher—82.6°, its extremes ranging from 66° to 103°. The yearly rainfall is subject to marked variation, its mean on the coast lands averaging about 90 inches with an average of 58 inches on the savannahs. The daily average sunshine is nearly 7 hours and, except when rain is falling, dull and cloudy weather is rarely experienced.

**Government.**—Guyana, which became independent on May 26, 1966, is a sovereign democratic state with a Governor-General appointed by the Queen. The constitution makes provision for a Republican system to be adopted after January 1, 1969, if the majority of the National Assembly is in favour, and provides for citizenship and the safeguard of fundamental freedoms of the individual. It retains the electoral system of Proportional Representation or "single list" system, each voter casting his vote for a party list of candidates. The Prime Minister and Cabinet are responsible collectively to a National Assembly of 53 members elected by secret ballot; the voting age is 21. Amendments to important sections of the Constitution require the support of a majority of voters in a referendum, or in certain circumstances, a two-thirds majority of all members of the National Assembly.

An important feature of the Constitution is its provision for the appointment of an *Ombudsman*. The life of the existing Assembly, presided over by a Speaker, who may or may not be a Member of the Assembly is four years, but future Assemblies will continue for up to five years from the date of the first meeting after the dissolution of the previous Assembly. The Attorney-General and the Ministers of Information and Trade are members of the Cabinet but not elected members of the National Assembly.

**CAPITAL.**— $\Psi$  Georgetown. Estimated population, including environs, 176,100. Other towns are: Mackenzie (population, 20,000);  $\Psi$  New Amsterdam (population, 15,000).  
**Governor-General**, His Excellency Sir David James Gardiner Rose, G.C.M.G., C.V.O., M.B.E. (1968).

### CABINET

**Prime Minister**, L. F. S. Burnham, Q.C.  
**Minister of Finance and Deputy Prime Minister**, Dr. P. A. Reid.  
**Minister of Agriculture and Natural Resources**, R. J. Jordan.  
**Communications**, M. Kassim.  
**Education**, Mrs. S. Patterson.  
**Health**, Dr. S. Talbot.  
**Home Affairs**, H. D. Hoyte.  
**Housing and Reconstruction**, B. Ramsaroop.  
**Information**, M. Carter.  
**Labour and Social Security**, W. Carrington.  
**Trade**, N. J. Bissember.  
**Works and Hydraulics**, H. Green.  
**Attorney-General and Minister of State**, S. S. Ramphal, C.M.G., Q.C.

### GUYANA HIGH COMMISSION

28 Cockspur Street, S.W.1  
**High Commissioner**, His Excellency Sir Lionel A. Luckhoo, K.C.M.G., C.B.E., Q.C.

### BRITISH HIGH COMMISSION

44 Main Street (P.O. Box 625),  
Georgetown  
**High Commissioner**, His Excellency Kenneth Gordon Ritchie, C.M.G. (1967)..... £5,075  
**Deputy High Commissioner**, J. A. Sankey.

**British Council Representative**, R. B. Lodge, P.O. Box 365, 125 Carmichael Street, Georgetown.

### JUDICATURE

The Supreme Court of Judicature consists of a Court of Appeal and a High Court. There are also Courts of Summary Jurisdiction. The Court

of Appeal consists of the Chancellor, as President, the Chief Justice and such number of Justices of Appeal as may be prescribed by Parliament. This Court came into operation on June 30, 1966. **Chancellor and President of the Court of Appeal**, Hon. E. V. Luckhoo, Q.C.

**Chief Justice**, Hon. Sir Harold Bollers.  
**Justices of Appeal**, Hons. G. L. B. Pesaud; P. A. Cummings; V. E. Crane.

The High Court consists of the Chief Justice, as President, and nine Puisne Judges. It is a court with unlimited jurisdiction in civil matters and exercises exclusive jurisdiction in probate, divorce and admiralty, and certain other matters. It also sits as a Full Court of the High Court of the Supreme Court of Judicature comprising not less than 2 Puisne Judges and then its jurisdiction is almost entirely appellate.

**Chief Justice and President of the High Court**, Hon. Sir Harold Bollers.

**Puisne Judges**, Hons. Akbar Khan; A. Chung; G. A. S. Van Sertima; D. Jhappan; C. J. E. Fung-a-Fatt; H. L. Mitchell; F. Vieira; K. M. George; R. M. Morris.

**Production, etc.**—Much of the country is forest. The cultivated portion (about 600,000 acres, of which 98,000 are under sugar-cane and 311,000 in rice) is largely confined to the narrow coastal alluvial belt. There are extensive deposits of gold, diamonds, manganese, bauxite and mica.

**Communications.**—There were 12,815 telephones in use in 1968; the Georgetown Automatic Exchange had 5,672 direct extension lines involving 9,830 stations. 18 sub-automatic and 3 manual

exchanges provided an additional 1,431 lines with 2,985 telephone stations. 57 land-line telegraph stations are maintained at coastal post offices and telegraph stations in the interior, providing communications with the coast. In Georgetown a central radio station, operated by the Guyana Telecommunication Corporation, provides radio-telephone communication with 5 branch offices, 14 stations operated by other Government departments, and 35 private concerns. Overseas telephone, telex and telegraph services are provided by Cable and Wireless (W.I.) Ltd. At the end of 1968, there were 47 district post offices at which all classes of postal business were transacted including 81 postal agencies. There are two broadcasting stations, one operated on a commercial basis by private enterprise, the other by the Government. There are 95 miles of railway, and the Guyana Airways Corporation (Government) provides internal and coastal air-services.

**Education.**—In January, 1969, there were 381 primary schools with an enrolment of 188,615 pupils, 27 government secondary schools, 13 government-aided schools and about 50 private secondary schools—a total of 28,000 pupils in secondary schools. In January, 1968, the Government of Guyana published its Memorandum on Education Policy in which it proposed among several reforms: (i) new education legislation; (ii) the abolition of the All-Age School System; (iii) that primary school instruction should start at 5 years 9 months and end at 16; (iv) introduction of the multilateral type of secondary education; (v) full scale curriculum reforms; (vi) the establishment of a Teacher's Service Commission, a National Educational Council and a National Advisory Board on Technical Education.

There are three institutions for the training of teachers, the Government Teachers' Training

College for Pre-Service and In-Service Training Programme and the Multilateral Training Programme for secondary school teachers. A total of 202 teachers graduated from these institutions in 1968. There are two government vocational schools, the Government Technical Institute and the Carnegie School of Home Economics with an enrolment of 2,250 pupils. There are 5,421 teachers in the primary schools and 705 in the government and aided secondary schools. There are 579 students in the University of Guyana, to which a Faculty of Technical Studies will be added in September, making a total of 5 Faculties. In 1968, 43 students graduated. Of the total Primary School age children (5-14), 69.6 per cent. are in Government and Aided Primary Schools.

Current expenditure on Education amounted to 16.7 per cent. of Government total current expenditure while 9.03 per cent. of the total capital expenditure was allocated to education.

## FINANCE

	1967	1968
Public revenue.....	G\$92,864,000	G\$102,082,000
Public expenditure..	87,964,000	97,411,000

## INDIAN HIGH COMMISSION

India House, Aldwych, W.C.2.

High Commissioner, His Excellency Apa B. Pant.

## BRITISH HIGH COMMISSION

Chanakyapuri, New Delhi, 11.

High Commissioner, His Excellency Sir (John)

Morrice (Cairns) James, K.C.M.G., C.V.O., M.B.E. (1968).....£8,600

Ministers, D. L. Cole, C.M.G., M.C. (Political); J. A. Turpin, C.M.G. (Economic).

Deputy High Commissioners, M. H. G. Rogers (Bombay); J. McKenzie, M.B.E., Ph.D. (Calcutta); Y. C. Martin (Madras).

British Council Representative in India, F. H. Cawson, O.B.E., 21 Jor Bagh, New Delhi. Regional Centres at Bombay, Madras and Calcutta. There are British Council libraries at these four centres and at Bangalore, Bhopal, Lucknow, Patna, Poona, Ranchi and Trivandrum.

## CONSTITUTION

The Constitution of India came into force ■ January 26, 1950. The Constitution provides for a single and uniform citizenship for the whole of India, with the right of vote for every adult citizen.

## EXECUTIVE

The executive of the Indian Union consists of the President (Rashtrapati), the Vice-President and the Council of Ministers. The President is elected for five years by ■ electoral college consisting of all elected members of Parliament and of the various State Legislative Assemblies. The Vice-President is also elected for five years by members of the two Houses of Parliament. As head of the State the President exercises his functions with the aid and advice of the Council of Ministers headed by the Prime Minister. The Council is collectively responsible to the House of the People.

## LEGISLATURE

The Legislature of the Union is called Parliament. It consists of two Houses known as the Council of States (*Rajya Sabha*) and the House of the People (*Lok Sabha*). The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest are indirectly elected by the Legislative Assemblies of the various States. The Council is not subject to dissolution, one-third of its members retiring every two years. The House of the People consists of not more than 500 members directly elected from territorial constituencies in the States and on the basis of adult franchise and not more than 25 members to represent the Union Territories, chosen in such manner ■ Parliament provides. The House has a maximum duration of five years.

Subject to the provisions of the Constitution the Union Parliament can make laws for the whole of India and the State legislatures for their respective units. The distribution of legislative powers is governed by a system of three lists—the Union, the State and the Concurrent—under which all legislative activity has been mapped out. The Union Parliament has exclusive powers to legislate on 97 subjects of all-India importance, such as defence, foreign affairs, communications, railways, currency and banking, insurance, customs duties, etc. The State List contains 66 headings, e.g. public order and police, justice, education, public health, local government, agriculture, etc. The Concurrent List contains 47 subjects of common interest to the Union and the States.

## OFFICIAL LANGUAGE

The Constitution (Art. 343) provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English, which was originally to continue ■ the official language for ■ period of 15 years from the commencement of the Constitution (January 1950), will, under the Official Language Act, 1963, still be used after that time in addition to Hindi.

## THE JUDICATURE

The Supreme Court of India, consisting of ■ Chief Justice and not more than 13 associate judges, is the highest court in respect of constitutional matters. It is also the final Court of Appeal in the country.

Chief Justice, Mohammad Hidayatullah (1968)

Rs. 60,000

Judges, J. C. Shah; S. M. Sikri; R. S. Bachawat; V. Ramaswami; J. M. Shelat; V. Bhargava; G. K. Mitter; C. A. Vaidialingam; K. S. Hegde; A. N. Grover.....each Rs. 48,000

## DEFENCE

The supreme command of the armed forces is vested in the President. Administrative and operational control resides in the Army, Navy and Air Headquarters under the supervision of the Ministry of Defence.

The Army has 4 Commands, Southern, Eastern, Western and Central, with headquarters at Poona, Calcutta, Simla and Lucknow respectively. A Territorial Force was inaugurated in Oct. 1949. A National Cadet Corps, with senior, junior, and girls' divisions, has also been raised.

The *Indian Navy* consists of an aircraft-carrier, two cruisers and ■ number of destroyers, frigates, minesweepers and auxiliary vessels. A Naval aviation wing and a hydrographic office have also been set up.

The *Indian Air Force* is organised in five major formations, the Western, Eastern and Central Air Commands, and the Training and Maintenance Commands.

## EDUCATION

In 1967-68, there were 3,614 pre-primary schools, 396,121 primary schools, 30,039 High/Higher Secondary schools, 78,890 Middle schools and 976 Arts/Sciences/Commerce colleges. There were 76 universities at the end of 1969.

## PRODUCTION

About 70 per cent. of the inhabitants of India are dependent on agricultural pursuits. Most of the agricultural holdings are less than 5 acres. Food crops occupy four-fifths of the cultivated land. There are about 176,000,000 cattle, or about ■ quarter of the world's cattle population.

## Production of Principal Crops, 1967-68

Crop	Production (lakh tonnes)
Rice.....	378.6

**Banks and Banking.**—The number of scheduled banks was 73 and the number of offices of scheduled banks was 7,479 in Dec., 1968. Advances by scheduled banks totalled Rs. 306,880 lakhs at Dec. 31, 1968.

## COMMUNICATIONS

**Civil Aviation.**—India occupies an important place in civil aviation among the nations of the world. All air lines were nationalized in 1953 and two corporations formed, Indian Airlines Corporation and Air India International (now Air India). At the end of 1968, 85 aerodromes were maintained by the Civil Aviation Department of the Government.

**Railways.**—The railways are grouped into nine administrative zones, Southern, Central, Western,

Northern, North-Eastern, North-East Frontier, Eastern, South-Eastern and South-Central.

Gross Traffic Receipts (1968-69), Rs. lakhs 90,215. Working expenses, Rs. lakhs 74,515. Net railway revenues, Rs. lakhs 14,132.

**Ports.**—The chief seaports are  $\Psi$  Bombay, Calcutta, Madras, Mormugao,  $\Psi$  Cochin, Visakhapatnam, Kandla and Paradip. There are over 150 minor working ports with varying capacity.

## STATES AND ADMINISTRATIONS OF THE REPUBLIC OF INDIA

### ANDHRA PRADESH

*Governor*, Pattom A. Thanu Pillai.

The State of Andhra, consisting of the Telugu-speaking areas of the old Madras State, with Kurnool as capital, was inaugurated on Oct. 1, 1953. The Telangana area of Hyderabad State was added in 1956, when the enlarged State, comprising 20 districts, assumed the name of Andhra Pradesh.

Andhra Pradesh has an area of 106,286 sq. miles with  $\blacksquare$  population of 35,983,447.

The Legislature consists of two chambers, the Legislative Assembly and the Legislative Council. *Chief Minister*, K. Brahma-nanda Reddi.

**CHIEF CITY**, Hyderabad. Population 1,251,119.

### ASSAM

*Governor*, B. K. Nehru.

Assam, which has an area of 47,094 sq. miles (exclusive of the North-East Frontier area); pop. 11,872,722 (1961 census) first became  $\blacksquare$  British territory in 1826 and was constituted  $\blacksquare$  separate administration in 1874. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became  $\blacksquare$  separate administration in 1912. By the terms of the Indian Independence Act, 1947, the district of Sylhet (except  $\blacksquare$  portion of the Karimganj Sub-division of that district) was detached from Assam and amalgamated with East Bengal (Pakistan).

A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Silchar and Gauhati respectively. The people are mainly Hindus, Moslems and Tribals. The North-East Frontier railway serves the state. Tea, petroleum, coal, timber, jute and rice are the principal products.

**CAPITAL**.—Shillong.

### CABINET

B. P. Chaliha (*Chief Minister*); K. P. Tripathy; M. N. Hazarika; M. H. Choudhury; C. S. Teron; Abdul Motlib Mazumdar; Biswadeb Sarma; J. B. Hagjer; R. C. Barooah; L. P. Goswami.

### LEGISLATIVE ASSEMBLY.

*Speaker*, M. K. Das.

### HIGH COURT.

*Chief Justice*, S. K. Dutta.

*Judges*, K. C. Sen; P. K. Goswami; M. C. Pathak.

### BIHAR

*Governor*, K. Kanungo, appointed May 26, 1967.

This state has an area of 67,197 sq. miles and a population (1961 census) of 46,455,610. It comprises 4 administrative divisions, Patna, Bhagalpur, Tirhut and Chota-Nagpur. Bihar is notable for extreme temperatures and for high density of population—691 to the square mile in 1961. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. Rice, wheat, barley, jute, oilseeds, sugar cane and tobacco are cultivated. 84.7 per cent. of the people are Hindus. The majority of the population speak

*Shipping*.—On April 1, 1969, 254 ships totalling 21,42 lakh gross tons were on the Indian Register.

*Postal*.—In 1966-67 there were 97,060 post offices, 13,019 telegraph offices, and 933,000 telephones.

*Broadcasting*.—In 1968 there were 66 radio stations in India; receiver licences in force on Dec. 31, 1968, totalled 9,282,349.

Hindi, of which there are various dialects. The railway systems are the Eastern, North-Eastern, South-Eastern and North-East Frontier Railways.

**CHIEF CITY**, Patna. Population 364,594 (1961).

### CABINET.

*Chief Minister*, B. P. Shastri.

K. B. Sahay; D. N. Sinha; B. C. Patel; S. N. Sinha; M. P. Sinha; H. N. Mishra; A. Q. Ansari; R. L. Singh Yadar; J. Imam; M. Lal; S. K. Bage; Sumitra Devi.

### GUJARAT

*Governor of Gujarat*, Shri Shriman Narayan.

On May 1, 1960, the new state of Gujarat, consisting of the northern part of Bombay State, was set up with a temporary capital at Ahmedabad, the remainder of the former Bombay state adopting the name of Maharashtra (see pp. 750-1). Gujarat, consisting of the districts of Kutch, Banaskantha, Mehsana, Sabarkantha, Ahmedabad, Kaira, Panchmahals, Baroda, Broach, Surat, Rajkot, Surendranagar, Junagadh, Jamnagar, Bhavnagar, Amreli, Dangs, Bulsar and Gandhinagar has a total area of 72,226 square miles and  $\blacksquare$  population of 20,633,350 (1961 census).

*Chief Minister*, Shri Hitendra K. Desai.

### HARYANA

*Governor*, B. N. Chakravarty.

The most recent State of India to be created, Haryana was formed on a linguistic basis from part of the former State of Punjab on Nov. 1, 1966. Haryana has an area of 17,010 sq. miles and a population of 7,590,543.

12,721,000 acres of land under crops out of  $\blacksquare$  total of 30,300,000 acres in the former Punjab is included in the new State.

*Government*.—Ministries were formed by Mr. B. D. Sharma (Nov. 1966 and March 10, 1967), and by Mr. Rao Birendra Singh on March 24, 1967, the latter holding office as Chief Minister until the United Front majority was lost on Nov. 20, 1967. Following a short period of direct Presidential rule, elections were held in May, 1968, and Mr. Bansilal installed as Chief Minister on May 21, 1968. The four other Ministries are: *Finance*, Smt. Om Prabha Jain. *Irrigation and Power*, Shri Kanhi Lal Poswal. *Health*, Shri Kurshed Ahmed. *Agriculture*, Shri Ran Singh.

**CAPITAL**.—Chandigarh (also capital of Punjab State) (99,262).

### KERALA

*Governor*, V. Viswanathan, appointed April 27, 1967.

The State of Kerala, constituted in 1956, consists of most of the territories of Travancore-Cochin and the Malabar district of Madras. Bounded by Madras and Mysore, the State brings together the majority of the Malayalam speaking peoples. The State stretches along the Arabian

Sea for 360 miles. The North-Eastern part of Kerala is rich in plantations producing rubber, tea and pepper. Area, 15,002 sq. miles. Population, 16,903,715.

On March 6, 1967, the President's Rule in Kerala, which had been in force since 1964, was revoked and a popular Ministry headed by E. M. S. Namboodiripad assumed office.

CAPITAL,  $\Psi$  Trivandrum.

### MADHYA PRADESH

Governor, K. C. Reddy.

The State of Madhya Pradesh was formed on November 1, 1956. Madhya Pradesh has an area of 171,210 sq. miles and a population of 32,372,408. It is composed of the former Madhya Bharat, Vindhya Pradesh and Bhopal States together with 17 Hindi-speaking districts of former Madhya Pradesh and the Sironj sub-division of Kotah district of Rajasthan, excluding the Sunel enclave of Mandasaur district in former Madhya Bharat.

The chief crops are wheat, paddy, cotton, sugar cane, oilseeds, pulses, jwar and bajra. Nearly 31 per cent. of the State's area is covered by forests. Hindi is the chief language.

The State has extensive belts of mineral deposits, possessing coal, iron ore, manganese, bauxite, diamond, limestone, dolomite, fireclay, ochres, silica sand, marble, fluorspar and shale. It is also rich in forest and agricultural resources.

There are 28 cotton mills, 4 cement factories, 5 sugar mills, a newsprint mill, a steel plant, a heavy electrical equipment factory, 2 strawboard factories and several other large and small industries.

CAPITAL, Bhopal.

### MADRAS

Governor, H. H. Maharaja Jaya Chamaraja Wadiyar Bahadur.

Madras has an area of 50,331 sq. miles and population of 33,686,953. In spite of its long coast-line the state has no natural harbour. Madras has the only artificial harbour; a deep-sea harbour is now under construction at Tuticorin. The state is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil. Rice, millet, tobacco, tea, etc., are cultivated. The production of electricity has been greatly intensified. Madras is served by the Southern Railway. About 91 per cent. of the people are Hindus. The language principally spoken is Tamil, though Telugu, Malayalam, Kannada and Urdu are also spoken. Madurai (424,810) and Tiruchirappalli (249,862), famous for their Hindu temples, and Coimbatore (286,305), an important industrial centre, are the chief cities after the capital.

CAPITAL,  $\Psi$  Madras. Population, 1,729,141.

### MAHARASHTRA

Governor.—Dr. P. V. Chelran.

The State of Maharashtra was formed on May 1, 1960, as a result of the bifurcation of the former Bombay State into Gujarat and Maharashtra States.

It stretches on the west coast of India between 22°1' and 16°4' N. latitude and 72°6' and 80°9' E. longitude. The State is bounded by the Arabian Sea on the west, Gujarat in the north-west, Madhya Pradesh in the north, Andhra Pradesh in the south-east and Mysore and Goa in the south. The region is drained by a number of rivers, large and small, most of them forming tributaries of the Tapi, Godavari, Bhima, Krishna, Wardha and Wainganga. The relief of the land shows high plateaux with plains on the western coast and along the river basins. Maharashtra has a coastline of 720 kilometres with 49 minor ports and one major international port,  $\Psi$  Bombay.

*Area and Population.*—Maharashtra State contains 118,717 square miles, with a population of 39,553,718. It is a predominantly urban and industrial state. According to the 1961 Census, 28.2 per cent. of the population is urban. Marathi is the principal language.

According to the 1961 Census 69.91 per cent. of the population are engaged in agriculture, 2.16 per cent. in mining, forestry and quarrying, etc., 4.39 per cent. in household industry, 6.88 per cent. in manufacture other than household industry, 1.24 per cent. in construction, 4.52 per cent. in trade and commerce, 2.36 per cent. in transport, storage and communication and the remaining 8.54 per cent. in other services.

*Government.*—Maharashtra has four main administrative divisions containing the 26 districts into which the State is divided:

*Bombay Division.*—Greater Bombay, Thana, Kolaba, Ratnagiri, Nasik, Dhulia and Jalgaon.

*Poona Division.*—Ahmednagar, Poona, Satra, Sangli, Sholapur and Kolhapur.

*Aurangabad Division.*—Aurangabad, Parbhani, Nanded, Bhir, Osmanabad.

*Nagpur Division.*—Buldhana, Akola, Amravati, Yeotmal, Wardha Nagpur, Bhandara and Chanda.

*Chief Minister.*—Shri V. P. Naik.

*Communications.*—Bombay is an international airport used by all the main airlines. Poona, Aurangabad and Nagpur are used for local services. Three railways pass through Maharashtra. The Western and Central railways (whose headquarters are in Bombay) serve western, northern, north-eastern, central and southern parts of India. The Southern railway which starts from Poona runs to Bangalore in the southern part of India. Road transport in Maharashtra State has been nationalized. During 1968 the average number of passengers carried per day was 1,213,470. Motor vehicles in use on Jan. 1, 1968 numbered 229,794 compared with 89,127 in 1960.

*Public Health.*—In Maharashtra State there are 370 general hospitals (26,103 beds), 982 dispensaries and 4 mental hospitals (5,646 beds), 21 tuberculosis hospitals (5,616 beds) and 392 primary health centres (2,202 beds). The total number of doctors in Maharashtra is 15,982. There are 11 medical colleges (capacity, 1,400 students) and 2 dental colleges (210 students).

*Education.*—Literacy in the State of Maharashtra according to the 1961 population census, is 29.8 per cent. There are 6 universities with 311 affiliated colleges and 68 post-graduate departments with 237,607 students. There are plans for the opening of two agricultural universities. In 1966-67 there were 43,413 primary schools and 4,032 secondary schools.

*Production.*—Maharashtra is a highly industrialized State. On Dec. 31, 1965 there were 9,043 factories with an average daily employment of 879,341 persons, including 95 cotton textile mills with an installed capacity of 454,927 spindles and 78,351 looms. There are 17 woollen mills and 2 viscose filament yarn factories. Other important industries are sugar and the oil industry. The engineering industry is also expanding. Owing to the absence of consuming factories the mines are not being developed fully. Iron ore, coal, manganese, bauxite and salt are found.

*Electricity Production.*—Installed capacity was 651,181 kW in 1967-68 and consumption totalled 3,429,770,000 kWh, including 889,830,000 kWh by industry. In 1966-67 consumption totalled 2,720 million kWh, including 3,408 m. kWh by industry.

**CAPITAL.**— $\Psi$  Greater Bombay (4,152,056). Eleven other cities in the State had  $\blacksquare$  population of more than 100,000 at the 1961 Census: Poona (597,562), Nagpur (643,659), Sholapur (337,585), Kolhapur (187,442), Amravati (137,875), Nasik (131,103), Malegaon (121,408), Ahmednagar (119,010), Akola (115,760), Ulhasnagar (107,760) and Thana (101,107).

### MYSORE

*Governor, G. S. Pathak, appointed March 29, 1967.*

The Mysore State, formed in 1956, consists of territories of the former State of Mysore, Coorg and parts of the former Madras, Bombay and Hyderabad States. The State brings together the Kannada speaking people, previously distributed in five States. Its area is 74,210 sq. miles and population (1961 census) 23,586,732. The State consists largely of  $\blacksquare$  elevated table land. It is rich in hydro-electric power and fairly rich in minerals; it is the major gold producing State of the Republic of India.

**CAPITAL, Bangalore.**

### NAGALAND

The State of Nagaland, inaugurated on Dec. 1, 1963, has an area of 6,366 sq. miles and a population of 370,000. It has  $\blacksquare$  Legislative Assembly of 46 members, 40 of whom are popularly elected, and 6 elected by the Regional Council of Tuensang District. The Governor of Assam is also Governor of Nagaland.

**CAPITAL, Kohima.**

### ORISSA

Area, 60,136 sq. miles; pop. (1961) 17,548,846, constituted on April 1, 1936, comprises the Orissa Division, transferred from the Province of Bihar and Orissa and areas transferred from the Central Provinces and Madras. 24 States were merged with Orissa in 1948 and 1949. A large majority of the population is Hindu. It is  $\blacksquare$  agricultural State with few towns. The Hirakud dam across the Mahanadi river is now irrigating 3.80 lakh acres of land and generating about 100 mW. of power. Paradeep is being developed as  $\blacksquare$  port.

**CAPITAL, Bhubaneswar.**

*Governor, Dr. Ajudhia Nath Khosla.*

### PUNJAB

*Governor.—D. C. Pavate, appointed Aug. 26, 1967.*

On November 1, 1966, the former State of Punjab was divided into three on a linguistic basis. That part of the State retaining the name of Punjab has an area of 21,630 (out of the original 47,304) sq. miles and  $\blacksquare$  population of 11,135,069. A new State under the name of Haryana was formed and the remaining part of the undivided Punjab was added to the Union Territory of Himachal Pradesh.

The new Punjab retained some 11,320,000 acres of the total  $\blacksquare$  under crops in the former State (24,000,000 acres) and 75 per cent. of the former industrial capacity. Income per head of population in the Punjab greatly exceeds the all-India average.

**Government.**—After the General Elections of February, 1967,  $\blacksquare$  Ministry under Mr. S. G. Singh held office until Nov. 25, when its majority in the Punjab Assembly was lost through defections from the United Front Party. A new Ministry of 7 members took office, headed by Mr. L. S. Gill. The State was under direct rule of the President from Aug. 23, 1968 until Feb. 17, 1969, when a Ministry of five (*Akali Party*, 3; *Jan Singh Party*, 2) was formed by Mr. Sardar Gurnam Singh (*Akali*

*Party*). The Ministry was later expanded by a further 10 members, all of the *Akali Party*.

### CABINET

*Chief Minister, Gurnam Singh.*

*Ministers, Balam Dass Tandon, Sohan Singh Bassi, Atma Singh, Krishan Lal, Bhagat Singh, Balwant Singh, Parkash Singh Badal, Surjit Singh.*

*Ministers of State, Satnam Singh Bajwa, Mohan Singh Tur, Jagdev Singh, Ravel Singh, Randhir Singh, Jiwan Singh Umranagal.*

**CAPITAL.**—Chandigarh (90,000), the common capital of the States of Punjab and Haryana, was raised to the status of a Union Territory at the time of the reorganization of the Punjab in 1966.

### RAJASTHAN

*Governor, Sardar Hukam Singh, appointed March 29, 1967.*

The State of Rajasthan was formed between March 1948 and Nov. 1956 through the integration of 22 former princely States, including 3 Chiefships, the former state of Ajmer and parts of the former States of Bombay and Madhya Bharat. The State has an area of 132,147 sq. miles and a population of 20,155,602.

**CAPITAL, Jaipur.**

### UTTAR PRADESH

*Governor, Dr. B. Gopala Reddi.*

Uttar Pradesh, called the United Provinces until 1949 (formerly the United Provinces of Agra and Oudh) (area, 113,654 sq. miles; est. pop. (1961) 73,746,401), forms the upper part of the great Ganga plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. The Province is now  $\blacksquare$  State in which the former three princely States, Rampur, Tehri-Garhwal and Benares have been merged and certain areas of the Vindhya Pradesh and Rajasthan States have also been absorbed.

The State was under direct Presidential rule in 1968, the office of Chief Minister having been vacant since Feb. 25, 1968.

Agriculture employs 72 per cent. of the population, the chief products being wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 84.7 per cent. of the population are Hindus and 14.6 per cent. Muslims. Hindi is the chief language. The State is served by the Northern Railway and the North-Eastern Railway.

**CAPITAL.**—Lucknow (595,440). Other cities of importance are: Agra (462,020), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Varanasi (Benares) (471,258), the great manufacturing centre, Kanpur (Cawnpore) (881,177), Allahabad (411,955) and Bareilly (254,409).

### WEST BENGAL

*Governor, Shanti S. Dharwan, appointed 1969.*

West Bengal has an area of 33,829 sq. miles and  $\blacksquare$  population (1961 census) of 34,926,270; estimated, 1969, 40,000,000.

The State of West Bengal has sixteen districts including the Metropolitan City of Calcutta, which is considered  $\blacksquare$  separate administrative unit. The Metropolitan area around Calcutta covers about 400 sq. miles with an estimated population of about 7,300,000. It is one of the most densely populated  $\blacksquare$  in the world.

**Government.**—As a result of Mid-term Elections held on February 9, 1969, the United Front (a combination of 14 non-Congress political parties)

occupies 218 of the 280 seats in the West Bengal Legislative Assembly. The United Front Government formed on February 25, 1969, consists of the Chief Minister with a Cabinet of 27 other Ministers and 3 Ministers of State.

#### CABINET

*Chief Minister*, Ajoy Kumar Mukherji.

*Deputy Chief Minister*, Jyoti Basu.

*Ministers*, Harekrishna Konar; Niranjan Sengupta; Satya Priya Roy; Md. Abdullah Rasul; Provas Chandra Roy; Golam Yazdani; Krishna Chandra Halder; Charu Mihir Sarkar; Bhabatosh Soren; Sushil Kumar Dhara; Somnath Lahiri; Biswanath Mukherjee; Mrs. Renu Chakravarty; Abdur Rezzak Khan; Dr. Kanailal Bhattacharjee; Sambu Ghosh; Bhakti Bhusan Mondal; Krishnapada Ghosh; Jatin Chakravarty; Nani Bhattacharjee; Subodh Banerjee; Bibhuti Bhushan Dasgupta; Deo Prakash Rai; Jyoti Bhushan Bhattacharjee; Sudhin Kumar; Sudhir Chandra Das.

*Ministers of State*, Miss Prativa Mukherjee; Ram Chatterjee; Barada Mukutmani.

#### LEGISLATURE

The Legislature was previously bi-cameral, but the Upper House known as the West Bengal Legislative Council was abolished by a bill passed by the Indian Parliament in May, 1969.

In the Lower House, known as the West Bengal Legislative Assembly there are 280 members elected by adult franchise and 4 members nominated by the Governor from the Anglo-Indian Community.

#### HIGH COURT OF JUDICATURE, CALCUTTA

*Chief Justice*, P. N. Mukherjee (*acting*).

West Bengal is India's largest foreign exchange earner, having a monopoly in some products, e.g. jute. It produces the world-famous Darjeeling tea and very fine silk, as well as good quality coal in the Asanol area. The port of Calcutta, India's largest dry cargo port, exports iron-ore, oil seeds, jute goods, tea, coal, engineering goods, etc. Nearly one-third of India's imports from and exports to foreign countries pass through the port of Calcutta, which is the main port in Eastern India, and is connected by a good network of railways and airways with other parts of India.

**CHIEF CITY**  $\Psi$  Calcutta. Population (including Howrah) 3,439,887; Calcutta proper 2,927,289. The State Headquarters, and with Howrah on the West side of the River Hooghly, one of the biggest manufacturing centres in India.

#### TERRITORIES

**Delhi.**—The Union Territory of Delhi (area 573 sq. miles; pop. (census 1961) 2,658,612). Under the Delhi Administration Act, 1966, a 61-member Metropolitan Council (56 elected and 5 nominated), with legislative functions, has been set up. Four executive councillors, headed by a Chief, assist and advise the Lieut.-Governor in the exercise of his administrative functions.  
*Lieut.-Governor*, A. N. Jha.

**Andaman and Nicobar Islands.**—The Andamans are a group of 204 islands of various sizes, lying between the 6th and 14th parallels in the Bay of Bengal. The main part of the group is composed of five large islands, viz., North Andaman, Middle Andaman, South Andaman, Baratang and Rutland Islands, generally known as the Great Andamans. There are several good harbours—Port Blair, Port Cornwallis, Mayabunder and Port Elphinstone.

The Nicobar Islands, from Car Nicobar in the north to Great Nicobar in the south, lie between Little Andaman and Sumatra. The most important harbour in the area is Nancowrie.

The total area of the Territory is 3,215 sq. miles, with a population of 63,548.

The Andaman Islands are administered by the President acting through a Chief Commissioner. *Chief Commissioner*, Mahabir Singh.

**CHIEF CITY**,  $\Psi$  Port Blair. Population, 14,075.

**Chandigarh.**—A new Territory created in 1966 to serve as the capital area for the two States of Punjab and Haryana under their 1966 constitution. The Territory surrounds the city of Chandigarh to a distance of about 10 miles. The city was inaugurated in 1953 and built to the plans of Le Corbusier to replace the former capital, Lahore, now in Pakistan. An outstanding example of modern town-planning, it is still under construction. Population (1966), 89,000.

**Dadra and Nagar Haveli.**—A territory formed in 1961 from Portuguese territory, formerly administered as part of Damão. Area, 189 sq. miles. Population, 57,932. An Administrator appointed by the Government of India resides at Silvassa. *Administrator*, K. R. Damlee.

**Goa, Daman and Diu.**—Three widely separated areas on the west coast of India, formerly Portuguese enclaves since the 16th century, which were taken over by the Indian Government in December, 1961, and have since been centrally administered. Total area of the Territory, 1,431 sq. miles, of which Goa (1,394 sq. miles), with a coastline of 65 miles, forms the largest part. Population (1960), 634,584 (Goa, 595,569). Diu is an island with a small mainland area on the south-east coast of Gujarat. Daman (Damão) lies on the Gujarat coast, 70 miles north of Bombay.

**CAPITAL** (of the Territory).—Panjim (*Nova Goa*).

**Himachal Pradesh.**—Himachal Pradesh came into being in 1948. Its area is 10,879 sq. miles and population (1961 census) 1,351,144. The territory is divided into six administrative districts, Mahasu, Sirmur, Mandi, Chamba, Bilaspur and Kinnaur. *Lieut.-Governor*, Lt.-Gen. Bahadur Singh.

**CAPITAL**, Simla.

**Laccadive, Minicoy and Amindivi Islands.**—A group of small islands 100–200 miles off the south-west coast of India, formerly administered by the State of Madras. Total area, 11 sq. miles. Population, 24,000.

**CAPITAL.**—Kozhikode (*formerly Calicut*).

**Manipur.**—Manipur is an inland territory in the extreme east of India and having a common boundary with Burma. The former Princely State was taken over by the Government of India on Oct. 15, 1949, and since then has been centrally administered through a Chief Commissioner. There is a Legislative Assembly of 30 elected members.

**CAPITAL.**—Imphal.

*Chief Commissioner*, B. Prasad.

**Pondicherry.**—The former French establishments in India, Pondicherry, Karaikal, Yamam and Mabe, ceded to the Government of India in 1956 by treaty, having been administered by India since 1954. The Territory has a total area of 186 sq. miles; population, 369,000.

*Lt.-Governor*, S. L. Silam.

*Chief Minister*, V. Reddy.

**Tripura.**—A small territory north-east of the Ganges delta, Tripura has common boundaries with Assam on the east and with East Pakistan. An ancient Hindu Princely State, Tripura came under Indian Government administration on Oct.

15, 1947. Area, 4,000 sq. miles; population, 1,140,000. CAPITAL.—Agartala.  
 Administrator, U. N. Sharma.  
 Chief Minister, S. L. Singh.

### PROTECTORATE

**Sikkim.**—A small Himalayan State, Sikkim is bounded by Tibet on the north and east, by Bhutan on the south-east, by Assam on the south and by Nepal on the west. It has an area of 2,745 sq. miles and at the Census of India, 1961, had 161,080 inhabitants. Sikkim has internal autonomy and the Government of India is responsible for its external relations, defence and communications.

**Ruler of Sikkim,** H.H. the Maharaja of Sikkim, O.B.E., b. 1923; s. Dec. 2, 1963.  
 CAPITAL.—Gangtok.

**Jammu and Kashmir.**—A Himalayan State with an area of 86,000 sq. miles, having common boundaries with both India and West Pakistan on the south. The Maharajah of Jammu and Kashmir acceded to the Dominion of India in 1947, but in view of Pakistan claims, the matter of sovereignty is still in dispute, and has been under discussion by the United Nations since 1948. There is a cease-fire line between India and Pakistan forces in the state and the latter occupy some 31,250 sq. miles of Kashmir territory.

## Jamaica

Jamaica is situated in the Caribbean Sea south of the eastern extremity of Cuba and lies between latitudes 17° 43' and 18° 32' North, and longitude 76° 11' and 78° 21' West. The island was discovered by Columbus on May 4, 1494, and occupied by the Spanish from 1509 until 1655 when a British expedition, sent out by Oliver Cromwell, under Admiral Penn and General Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid. Jamaica became an independent state within the British Commonwealth on August 6, 1962.

**Area and Population.**—Jamaica is 4,411 square miles in area and is divided into three counties (Surrey, Middlesex and Cornwall) and 14 parishes. The surface of the island is extremely mountainous, the highest peak being 7,402 ft. above sea level. The greatest length from east to west (Morant Point to Negril Point) is 146 miles and the extreme breadth 51 miles. At the end of 1968, Jamaica's population was estimated to be 1,939,649. Jamaica, for climatic and other reasons is a popular tourist resort, attracting visitors mainly from the U.S.A. The total number of visitor arrivals in 1968 was 352,481. Tourist expenditure in 1968 was estimated at £36,600,000, compared with £28,900,000 in 1967.

**Physical Features.**—The topography consists mainly of coastal plains, divided by the Blue Mountain Range in the east, and the hills and limestone plateaus which occupy the central and western areas of the interior. The central chain of high peaks of the Blue Mountains is over 6,000 feet above sea level, and the Blue Mountain Peak, the highest of these, reaches an elevation of 7,402 feet. The rivers flow down from the central mountainous area. Most of the rivers are narrow and fast flowing, and some have rapids. In general those flowing south are longer and are fed by more tributaries than those flowing north. None is navigable except the Black River, and that only for small craft.

**CAPITAL.**—The seat of government is Kingston, the largest town and seaport (estimated population of the Corporate area of Kingston and St. Andrew in 1968, 542,432. Other towns are Montego Bay (28,000) and Spanish Town (17,000).

**NATIONAL DAY.**—First Monday in August (Independence Day).

### GOVERNMENT

The Legislature consists of a Senate of 21 nominated members and a House of Representatives consisting of 53 members elected by universal adult suffrage. The number of members cannot be fewer than 45 nor more than 60. The Senate has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives. The Constitution provides for a Leader of the Opposition.

**Governor-General,** His Excellency Sir Clifford Campbell, G.C.M.G., G.C.V.O.

### CABINET

**Prime Minister,** Rt. Hon. Hugh Shearer.  
**Minister of Finance and Planning,** Hon. E. Seaga.  
**Trade and Industry,** Hon. R. C. Lightbourne.  
**Education,** Hon. E. L. Allen.  
**Public Utilities and Housing,** Hon. W. O. Hill.  
**Development, Youth and Community,** Hon. A. M. W. Douglas.  
**Health,** Hon. Dr. H. W. Eldemire.  
**Labour and National Insurance,** Hon. L. G. Newland.  
**Agriculture and Fisheries,** Hon. J. P. Gyles.  
**Rural Land Development,** Hon. W. G. McLaren.  
**Home Affairs,** Hon. R. A. McNeill.  
**Communications and Works,** Hon. N. C. Lewis.  
**Local Government,** Hon. L. A. Lynch.  
**Minister of Legal Affairs and Attorney-General,** Hon. V. B. Grant, Q.C.  
**Minister without Portfolio,** Hon. Sir Neville Ashenheim, C.B.E.  
**Minister of State for Youth and Community Development,** Sen. Hon. H. Wynter.

### JAMAICA HIGH COMMISSION

48 Grosvenor Street, W.1  
**High Commissioner,** His Excellency Sir (Henry) Laurence Lindo, C.M.G.

### BRITISH HIGH COMMISSION

P.O. Box 628, 58 Duke Street, Kingston  
**High Commissioner,** His Excellency James Dalton Murray, C.M.G. (1965)..... £5,625  
**Deputy High Commissioner,** R. M. Blaikley.  
**Defence Adviser,** Lt.-Col. A. G. Way, M.C. (resident in Bermuda).  
**British Council Representative,** D. Hardwick.

### JUDICATURE

**Chief Justice and Keeper of Records,** Hon. Sir Herbert Duffus.  
**Judges of the Court of Appeal,** Hon. Sir Cyril Henriques, C.B.E. (President); Hon. Sir Joseph Luckhoo; G. E. Waddington; L. T. Moody; I. D. Eccleston; H. J. Shelley.  
**Puisne Judges,** Hons. A. M. Edun; U. N. Parnell; H. S. Grannum; L. Robinson; H. Graham-Perkins; R. M. Hercules; K. G. Smith; E. Zacca; K. C. Henry; V. L. Lopez; I. Rowe.

**Speaker, House of Representatives,** Hon. E. C. L. Parkinson.

## COMMUNICATIONS

There are several excellent harbours, Kingston being the principal port. The island is intersected by 2,682 miles of main road, of which 1,730 are asphalted. There are 241 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages.

There are two international airports capable of handling the largest civil jet aircraft, the Palisadoes Airport on the south coast serving Kingston, and the Montego Bay Airport on the north coast serving the major tourist areas. In addition there are licensed aerodromes at Port Antonio and Ocho Rios which are used by Jamaica Air Service on scheduled domestic flights. There are nearly 40 private airstrips.

Air Jamaica, the national airline formed by the Government of Jamaica in association with Air Canada, operates scheduled services between U.S.A. and Jamaica. Ten other international carriers provide air communication with Europe, North, Central and South America and the Caribbean islands. They are:—B.O.A.C., British West Indian Airways, Air Canada, Pan American World Airways, K.L.M., Delta, Lufthansa, Cayman Brac Airways, Mexicana Airlines and Air Caribbean Transport Ltd.

Scheduled internal routes are operated by Jamaica Air Services Ltd. There is also an air taxi service.

## PRODUCTION

Most of the staple products of tropical climates are grown. Sugar and rum are manufactured and exported (the latter is still counted the best in the world), and fine quality coffee is grown in certain areas of the Blue Mountains. Sugar production in 1968 amounted to 455,783 tons. There is trade in fruits, chiefly bananas, with U.K. Citrus, cocoa, coffee, pimento and ginger are important export crops. Jamaica has developed a breed of dairy cattle known as Jamaica Hope and as beef breed, the Jamaica Black. Jamaica is now the largest producer of bauxite in the world; output for 1968 was 8,279,242 tons. The bauxite deposits are worked by one Canadian and five U.S. companies; the

Canadian company and a consortium of the U.S. companies process bauxite into alumina. Further expansion of the industry is in progress. Gypsum is also mined, production in 1968 being 205,697 tons. Cement is manufactured locally, the output of the factory being 402,457 tons in 1968. The Esso Oil Refinery is designed to process 26,000 barrels of crude oil daily. The Jamaica Industrial Development Corporation is responsible for implementing the Government's industrial development programme. This Corporation administers incentive legislation which was enacted to stimulate the establishment of industries locally. In addition to undertaking promotional activities both locally and abroad, the Corporation maintains branch offices in Montego Bay, Jamaica, in the United States, Canada and the United Kingdom. In the last decade, manufacturing has grown from the processing of a few agricultural products into the production of a whole new range of commodities dependent on both local and foreign raw materials.

## FINANCE

	1968-69	1969-70*
Revenue.....	£73,919,923	£106,015,770
Expenditure.....	95,573,410	112,999,994
Public Debt (March 31, 1969).....		110,996,218

\* Estimated.

## TRADE

	1967	1968
Total Imports.....	£126,300,000	£159,683,594
Total Exports.....	81,800,000	89,605,806
Imports from U.K....	1967	1968
Exports to U.K....	£23,188,000	£28,054,000
	87,726,000	26,239,000

Chief exports (1968): Bauxite, £19,024,409; alumina, £25,416,965; sugar, £18,650,267; rum, £694,903; molasses, £1,486,219; bananas, £6,900,000; citrus and citrus products, £2,288,395; cocoa (beans), £374,493; cocoa (processed products), £141,127; coffee, £347,208; pimento, £1,514,750; ginger, £117,004; clothing, £3,353,322; mineral fuels and lubricants, £2,696,478.

## Kenya

Kenya is bisected by the equator and extends approximately from latitude 4° N. to latitude 4° S. and from longitude 34° E. to 41° E. From the coast of the Indian Ocean in the east, the borders of Kenya are with Somalia in the east and Ethiopia and Sudan in the north and north-west. To the west lie Uganda and Lake Victoria. On the south is Tanzania. The total area is 224,960 square miles (including 5,224 square miles of water). At the end of June, 1968, the population was estimated at 10,209,000, including small Asian, European and Arab minorities. The country is divided into 7 Provinces (Nyanza, Rift Valley, Central, Coast, Western, Eastern and North-Eastern).

**CAPITAL.**—Nairobi, situated at latitude 2° S. and longitude 36° 49' E. at 5,453 feet above sea level, covers an area of 266 sq. miles and has a population of about 450,000. It is 307 miles by road from Mombasa, the country's main port. Mombasa possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Eldoret, Kisumu, Nakuru and Nyeri.

Nairobi: transit from London about 16 days by sea; by air, 12 hrs.

**NATIONAL DAY.**—December 12.

## GOVERNMENT

Kenya became an independent state and a member of the British Commonwealth on December 12, 1963, after six months of internal self-government. The national assembly consists of a single House of Representatives. Kenya became a Republic on Dec. 12, 1964.

**President.** His Excellency Jomo Kenyatta (1964).

**Vice-President and Minister of Home Affairs.** D. T. Arap Moi.

## KENYA HIGH COMMISSION IN LONDON

45 Portland Place, W.1.

[01-636-2371]

High Commissioner, His Excellency Dr. J. N. Karanja.

## BRITISH HIGH COMMISSION

Shell-B.P. House, P.O. Box 30465

Harambee Avenue, Nairobi.

High Commissioner, His Excellency Sir Eric George Norris, K.C.M.G. (1968)..... £6,300

Deputy High Commissioner, R. W. Munro, C.M.G.

British Council Representative, R. A. Hack, P.O. Box 751, Kenya Cultural Centre, College Road, Nairobi. There are centres at *Kisumu* and *Mombasa*.

## JUDICATURE

Chief Justice, M. K. Mwendwa.

*Puisne Judges*, G. B. W. Rudd; B. R. Miles; A. D. Farrell; J. Wicks; C. Madan, Q.C.; P. N. Dalton; E. Trevelyan; Chanan Singh; C. H. E. Miller; L. G. E. Harris; L. R. Mosdell; A. H. Simpson; A. W. A. E. Kneller.

Registrar, G. Waddell.

*Production*.—Agriculture provides about 35 per cent. of the national income; the principal exports in 1968 were: coffee £K12,800,000; tea £K10,000,000; petroleum products £K6,100,000; maize, £K4,800,000; meat products, £K3,000,000; pyrethrum, £K3,000,000; and sisal, £K1,800,000. The great variation in altitude and ecology provide conditions under which a wide range of crops can be grown. These include wheat, barley, pyrethrum, coffee, tea, sisal, coconuts, cashew nuts, cotton, maize, and a wide variety of tropical and temperate fruits and vegetables. The total area of high potential land on which concentrated alternate husbandry can be practised, amounts to only 16,761 sq. miles, or 11.9 per cent. of the total land area. The remainder is arid or semi-arid country suitable for stock raising. In the areas of high potential, many of the old, large scale farms, formerly farmed by Europeans, have been bought by the Government for settlement of landless people and for transfer to African large-scale farmers.

In 1967 Kenya's forest area totalled 4,587,000 acres, of which 241,000 acres were under plantation.

Prospecting and mining are carried on in many parts of the country, the principal minerals produced being soda ash, salt and limestone. Small amounts of gold and silver are also mined. Value of all minerals produced in 1967 was £2,100,000.

Hydro-electric power has been developed, particularly on the Upper Tana and Mathioya Rivers. Owen Falls Dam scheme in Uganda is connected to Nairobi and electricity is available throughout the

country. The first stage of an important national hydro-electric project was inaugurated by the President in 1965—the Seven Forks Project, which is expected to produce 280 mW on completion within 12 years. Total cost of the project was estimated at £37,000,000.

There has been considerable industrial development over the last 15 years and Kenya has a wide variety of industries processing agricultural produce and manufacturing an increasing range of products from local and imported raw materials. New industries have recently come into being such as an oil refinery, textile mills, dehydrated vegetable processing and motor battery manufacture as well as many smaller schemes which have added to the country's already considerable consumer goods. The market served comprises all the East African territories and the volume of exports to adjoining African and Indian Ocean countries is increasing year by year. Industrial areas have been developed in all the principal towns and light industrial areas exist in many rural areas. The Kenya Government is actively encouraging investment in the industrial sector and has a Foreign Investments Protection Act to protect such investments.

The main imports are manufactured goods, classified chiefly ■ materials, machinery and transport equipment, mineral fuels, lubricants and related fuels, food and chemicals.

*Communications*.—The East African Railways and Harbours are a self-contained and self-financing service of the East African Community; the railway, which is metre gauge, has a total route mileage of open line of 3,670 miles (1,270 miles in Kenya). In addition the East African Railways operate ■ marine service on Lakes Victoria and Tanganyika, with a route mileage of 3,469 miles. There are also 2,367 miles of road services providing regular transport to the Southern Highlands of Tanzania, and beyond the railhead at Pakwach in Uganda. East African Harbours control the four seaports of Mombasa, Tanga, Dar-es-Salaam and Mtwara. Mombasa, Dar-es-Salaam and Mtwara have deep-water berths and Tanga is a lighterage port.

Scheduled trunk airline services are operated to and from Kenya, through Nairobi airport, by East African Airways, B.O.A.C., Air India, Air France, Central African Airways, Scandinavian Airlines System, British United Airways, Alitalia, Panam, K.L.M., Ethiopian Airlines and El Al Israel Airlines, while regional scheduled services were also run by East African Airways, Ethiopian Airlines, Aden Airways, Central African Airways, Air Congo, Air Malawi and Zambia Airways.

The country has approximately 26,000 miles of road including 3,850 miles of trunk roads and 6,200 miles of secondary roads. There is ■ total of 1,336 miles of bitumen-surfaced roads, apart from town streets, etc.

## FINANCE

	1967-68	1968-69*
Revenue.....	£K84,445,000	£K75,755,000
Expenditure.....	84,326,000	88,426,000
The total public debt at June 30, 1967 was £K118,596,000. Exchange Rate (1969) 17/1429 Ks. = £1.		

\* Estimated.

*Trade*.—A large part of Kenya's trade is with the United Kingdom which in 1968 took 26 per cent. of her exports and supplied 32 per cent. of Kenya's imports (both figures excluding trade with Uganda and Tanzania).

## Trade with U.K.

	1967	1968
Imports from U.K..	£47,398,000	£46,962,000
Exports to U.K....	19,781,000	25,307,000

## Lesotho

Lesotho (formerly Basutoland) is an enclave within the Republic of South Africa and is bounded north and west by the Orange Free State, east by Natal and East Griqualand, and south by the Cape Province, with an area of 11,716 square miles. The land, which is mountainous, rising to over 11,000 ft. in places, is held in trust for the Basotho by the King. The population of Lesotho was estimated at 885,000 in 1967. CAPITAL.—Maseru, population (1968), 14,000. Maseru is distant from London 7,668 miles. Transit via the Cape about 20 days; by air, 2 days.

**Government.**—Lesotho consists of nine districts each with its Principal Chief working in close co-operation with an Administrative Secretary. It is governed under parliamentary democracy and has two houses of Parliament, a Senate composed of 22 Principal and Ward Chiefs who are members by virtue of their position as Chiefs and 11 Nominees of the King; and a Legislative Assembly composed of 60 Elected Members and a Cabinet. The Parliament has power to legislate for all persons in Lesotho in respect of all matters. The Lesotho Courts of Law consists of: (a) The Court of Appeal, (b) The High Court, (c) The Subordinate Courts including the Courts of Judicial Commissioners and the Basotho Courts. Appeals lie to the Privy Council by leave of the Chief Justice of Lesotho.

**Head of State,** His Majesty King Moshoeshe II, acceded 1966.

### CABINET

**Prime Minister and Minister of External Affairs, Defence, Justice and Internal Security, Development and Planning,** Hon. Leabua Jonathan.

**Deputy Prime Minister and Minister of Interior,** Hon. Serhonyana Maseribane.

**Minister of Finance, Commerce, Industry and Labour,** Hon. Peete Peete.

**Health and Social Welfare,** Hon. Benedict M. Lesetell.

**Agriculture, Co-operatives and Marketing,** Hon. Matete Majara.

**Education and Cultural Affairs,** Hon. Anthony C. Manyeli.

**Works, Posts, Telecommunications, Communications and Civil Aviation,** Hon. Selbourne R. Letsie.

**Minister of State,** Hon. S. M. Letsie.

**Minister to the Prime Minister,** Hon. Patrick Mota.

### LESOTHO HIGH COMMISSION

16A St. James's Street (1st Floor), S.W.1

**High Commissioner,** His Excellency C. M. Molapo.

### BRITISH HIGH COMMISSION

P.O. Box 521, Maseru

**High Commissioner,** His Excellency Ian Buchanan Watt, C.M.G. (1966)..... £5,075

**British Council Representative,** G. P. Hall, P.O. Box 429, Hobson's Square, Maseru. (Also British Council representative for Botswana and Swaziland.)

**Education.**—In 1966 there were 1,111 primary schools and 24 secondary schools. The total enrolment at secondary schools in 1966 was 2,776. 220 Lesotho students entered university courses in 1966.

**Communications.**—There are no railways in Lesotho with the exception of 1 mile of the South African Railways which enters Lesotho at Maseru from the Orange Free State. A main road runs from Butha Buthe in Northern Lesotho to Quthing in the South. It connects all the Government Stations with the exception of Qacha's Nek and Mokhotlong. Qacha's Nek is accessible by road from Matatiele in East Griqualand and there is a jeep service up the Sani Pass to Mokhotlong. There are 28 air-strips in the Territory, of which 5 are used by a regular internal air service. One of the 5 in Maseru is now being used by a twice weekly external service between Maseru and Jan Smuts Airport. The service began on October 2, 1967. The internal air service carries mail and goods to and from otherwise inaccessible mountain regions and in addition there is a Flying Doctor service. The remaining air-strips are used mainly by traders and missions.

**Production, etc.**—The economy of Lesotho is mainly agrarian. At the last enumeration (1966) live stock numbers were: Cattle, 278,940; Sheep, 1,477,340; Goats, 817,257; and Horses, 80,000. 9,494,051 lb. of wool, valued at R1,996,861, and 2,351,443 lb. of mohair, valued at R942,904 were exported in 1965-66. There is no direct trade between the Territory and the U.K.

### FINANCE

Lesotho is a poor and unproductive country. The principal sources of revenue are customs and excise duty, taxes, and wool and mohair export duty.

Total budgetary expenditure for 1967-68 was R10,906,586. Local revenue amounted to R 5,260,446 and the difference was met by a U.K. grant.

## Malawi

MALAWI, formerly the Nyasaland Protectorate, comprises Lake Malawi (formerly Lake Nyasa) and its western shore, with the high table-land separating it from the basin of the Luangwa River, the watershed forming the western frontier with Zambia; south of the lake Malawi reaches almost to the Zambezi and is surrounded by Portuguese East Africa (Mozambique) the frontier lying on the west on the watershed of the Zambezi and Shire Rivers, and to the east on the Ruo, a tributary of the Shire, and Lakes Chiuta and Chilwa. This boundary reaches the eastern shore of Lake Malawi and extends up to the mid-point of the lake for about half its length where it returns to the eastern and northern shores to form a frontier with Tanzania.

Malawi has a total area of 45,411 sq. miles (land area, 36,145). The population of Malawi at the Census of August, 1966 was 4,039,583 (52 per cent. female) (Africans, 4,020,324, Asians, 11,299). Coloured are classified as Africans.

**CAPITAL.**—Zomba (population 19,666). The city of Blantyre, incorporating Blantyre and Limba, is the major commercial and industrial centre and headquarters of the Southern region. Other main centres are: Lilongwe, headquarters of the Central Region and the site chosen for the new capital of Malawi for which an initial loan of £4,700,000 has been promised by the South African Government; Mzuzu, headquarters of the Northern Region; Cholo, Mlanje, Fort Johnston, Mzimba and Nkhotakota.

**FLAG.**—Horizontal stripes of black, red and green, with rising sun in centre of the black stripe.

**Government.**—Malawi became a republic on July 6, 1966, having assumed internal self-government on February 1, 1963 and is a member of the Commonwealth. There is a Cabinet consisting of the President and 11 other Ministers. The National Assembly consists of 50 members, each elected by universal suffrage. Under the Constitution Act, 1966, the President exercises power to nominate in addition up to five members to represent special interests. Being a one-party State (the Malawi Congress Party), all elected members are required to be members of the Party. The Assembly, which usually meets three times a year, is presided over by a Speaker, who need not himself be a member of it.

*President, Minister of External Affairs, Defence, Justice, Works and Supplies, Dr. Hastings Kamuzu Banda.*

#### CABINET

*Minister of Trade and Industry, Hon. J. Z. U. Tembo.  
Transport, Communications and Labour, Hon. J. D. Msonthi.*

*Local Government and Education and Minister for the Southern Region, Hon. G. W. Kumbumani.  
Health and Community Development, Hon. A. M. Nyasulu.*

*Minister of State in the President's Office, Hon. A. A. Muwalo.*

*Agriculture, Hon. G. C. Chakuamba.*

*Finance, and Information and Tourism, Hon. A. K. Banda.*

*Natural Resources, Hon. R. B. Chideanja.*

*Ministers not in the Cabinet, Hon. M. Q. Y. Chibambo (Northern Region); Hon J. T. Kumbweza (Central Region).*

#### MALAWI HIGH COMMISSION

47 Great Cumberland Place, W.1

*High Commissioner, His Excellency R. W. Katenga-Kaunda.*

#### BRITISH HIGH COMMISSION

Mkulichi Road (Private Bag No. 10), Zomba

*High Commissioner, His Excellency Thomas Stuart Tull, C.B.E., D.S.O. (1967).....£5,625*

*Deputy High Commissioner, J. Bourn.*

*Defence Adviser, Lt.-Col. J. E. Tull.*

*British Council Representative, E. H. Semmens, P.O. Box 456, Glyn Jones Road, Blantyre. Libraries at Blantyre, Lilongwe and Zomba.*

**Education.**—Primary education is the responsibility of local authorities in both urban and rural areas. The Ministry is responsible for policy, school curricula, secondary education, teachers' and technical training. Religious bodies, with Government assistance, still play an important part in primary and secondary education and teacher training. Further training is pursued at the University of Malawi, opened in September 1965. In June, 1969, there were 308 students studying for degrees and 573 for diplomas at five constituent colleges.

**Communications.**—A single-track railway runs from the south-western area of Lake Malawi (itself

served by two passenger and a number of cargo boats) through Blantyre to the southern frontier into Mozambique, crossing the Zambesi River by a bridge 12,050 feet long, and connecting with the Mozambique port of Beira, which handles the bulk of the country's imports and exports. Work started in May, 1968, on a rail link with the Northern Mozambique port of Nacala which is planned to be complete by the end of 1970. A good-class earth road system covers the whole country and is already tarmacadamized from Manje through Blantyre and Zomba to Liwonde where the new Nacala rail link will cross the Shire River and run in an easterly direction, and also from Lilongwe to the lake-shore at Salima, northern terminus of the railway. Construction has already started on a double width bitumen road from Liwonde through Lilongwe.

#### FINANCE

	1968	1969*
Revenue.....	£17,450,000	£19,150,000
Expenditure.....	19,350,000	20,480,000

\* Estimates.

#### TRADE

	1967	1968
Imports.....	£25,531,000	£29,575,000
Exports.....	16,552,000	16,928,000
Re-exports.....	3,902,000	3,350,000

#### Trade with U.K.

	1967	1968
Imports from U.K. .	£5,977,000	£7,154,000
Exports to U.K.....	9,292,000	10,797,000

Agriculture is the country's mainstay, the principal exports being tea, tobacco, cotton and groundnuts. The value of exports of these crops in 1968 was: tea, £4,850,000; tobacco, £5,285,000; groundnuts, £2,308,000; maize, £1,653,000; cotton, £637,000; dried vegetables, £431,000. Other agricultural exports include tung oil, rice, sisal, casava and coffee. Sugar production started in the Lower Shire, Southern Region, in August, 1966. Imports are mainly clothing materials, vehicles, fuels and machinery.

## Malaysia

Malaysia, comprising Malaya, Sabah and Sarawak, forms a crescent well over 1,000 miles long between latitudes 1° and 7° North latitude and longitudes 100° and 119° East. It occupies two distinct regions—the Malay Peninsula which extends from the Isthmus of Kra to the Singapore Strait and the North-West Coastal area of the Island of Borneo. Each is separated from the other by 400 miles of the South China Sea. The total area is about 130,000 square miles of which about 75 per cent. is still forest and underdeveloped.

**Climate.**—The whole region is open to maritime influences and is subject to the interplay of wind systems which originate in the Indian Ocean and the South China Sea. The year is commonly divided into the Southwest and Northeast monsoon seasons. Rainfall averages about 100 inches throughout the year, though the annual fall varies from place to place and from year to year. The average daily temperature throughout Malaysia varies from 70° Fahrenheit to 90° Fahrenheit, though in higher areas temperatures are lower and vary widely.

**CAPITAL.**—Kuala Lumpur, also capital of Selangor (estimated population, 500,000). The chief town Sarawak is Kuching (51,403) and of Sabah is Kota Kinabalu (21,497).

**LANGUAGE.**—Malay is the national language. In Sabah and Sarawak English continues to be the official language until the State Legislatures decide otherwise. **RELIGION.**—Islam is the official religion of Malaysia, each Ruler being the head of religion in his State, though the Heads of State of Sabah and Sarawak are not

heads of the Muslim religion in their States. The Yang di-Pertuan Agong is the head of religion in Malacca and Penang. There is no State religion in Sabah or Sarawak and the Constitution guarantees religious freedom. NATIONAL DAY.—August 31 (*Hari Malaysia*).

FLAG.—Equal horizontal stripes of red (7) and white (7); 14 point yellow star and crescent in blue canton.

### GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, as a result of an agreement between H.M. the Queen and the Rulers of the Malay States, whereby Her Majesty relinquished all powers and jurisdiction over the Malay States and over the Settlements of Penang and Malacca which then became States of the Federation. After prolonged discussions in Kuala Lumpur and London, the Federation was enlarged on Sept. 16, 1963, by the accession of the further states of Singapore, Sabah (*formerly* British North Borneo) and Sarawak, and the name of MALAYSIA was adopted from that date. In view of strong opposition by Indonesia and the Philippines to Sabah and Sarawak joining Malaysia, its establishment was postponed briefly to allow the Borneo territories to be visited by United Nations' official observers who reported that the people of Sarawak and Sabah were in favour of joining Malaysia. On Aug. 9, 1965, Singapore seceded from the Federation.

The Constitution was designed to ensure the existence of a strong Federal Government and also a measure of autonomy for the State Governments. It provides for a constitutional Supreme Head of the Federation (His Majesty the Yang di-Pertuan Agong) to be elected for a term of 5 years by the Rulers from among their number, and for a Deputy Supreme Head (His Highness the *Timbalan Yang di-Pertuan Agong*) to be similarly elected. The Malay Rulers are either chosen or succeed to their position in accordance with the custom of the particular state. In other states of Malaysia choice of the Head of State is in the discretion of the Yang di-Pertuan Agong after consultation with the Chief Minister of the State. The first heads of state appointed for Sarawak, Sabah and Singapore jointly by H.M. the Queen and the Yang di-Pertuan Agong were the Governor of Sarawak, the Yang di-Pertua Negara (Sabah) and the Yang di-Pertuan Negara (Singapore). Save in certain instances provided in the Constitution, the Supreme Head acts in accordance with the advice of a Cabinet appointed by him from among the members of Parliament on the advice of the Prime Minister. The Supreme Head appoints as Prime Minister the person who in his judgment is likely to command the confidence of the majority of the members of the House of Representatives.

### SUPREME HEAD OF MALAYSIA

His Majesty Ismail Nasiruddin Shah (*Sultan of Trengganu*),  
Deputy Supreme Head, His Highness the Sultan of Kedah.

#### MINISTRY

Prime Minister and Minister of External Affairs, Tunku Abdul Rahman Putra al-Haj, C.H.

Deputy Prime Minister. Minister of Defence, National and Rural Development and Home Affairs, Tun Haji Abdul Razak bin Dato Hussein.

Finance, Tun Tan Siew Sin.

Works, Posts and Telecommunications, Tun V. T. Sambanthan.

Transport, Tun Sri Sardon bin Haji Jubir.

Agriculture and Co-operatives, Tuan Haji Mohamed Ghazali bin Haji Jawi.

Health, Tan Sri Haji Abdul Hamid Khan.

Education, Enche Mohamed Khir Johari.

Commerce and Industry, Tan Sri Dr. Lim Swee Aun.

Welfare Services, Dr. Ng Kam Poh.

Local Government and Housing, Enche Khaw Kai Boh.

Sabah Affairs, Dato Ganie Gilong.

Sarawak Affairs, Tan Sri Temenggong Juga Anak Barieng.

Labour, Enche V. Manickavasagam.

Information, Broadcasting, Culture, Youth and Sports, Enche Senu bin Abdul Rahman.

Lands and Mines, Dato Haji Abdul Rahman bin Ya'kub.

Justice, Enche Bahaman bin Shamsuddin.

Ministers without Portfolio, Tan Sri Ong Yoke Lin (Ambassador in U.S.A.); Abdul Khalid bin Awang Osman (Ambassador to W. Germany); Enche Ghafor Baba.

NOTE.—The words "Tunku", "Tun", "Tan Sri", and "Dato" are titles. The word "Tunku" is equivalent to "Prince". "Tun" denotes membership of a high Order of Malaysian Chivalry and "Tan Sri" and "Dato" ("Datu" in Sabah) are each the equivalent of a knighthood. The wife of a "Tun" is styled "Toh Puan", that

of a "Tan Sri" is styled "Puan Sri" and of a "Dato", "Datin". The honorific "Tuan" or "Enche" is equivalent to "Mr." and the honorific "Puan" is equivalent to "Mrs." The words "Al-Haj" or "Haji" indicate that the person so named has made the pilgrimage to Mecca.

#### MALAYSIAN HIGH COMMISSION

45 Belgrave Square, S.W.1

High Commissioner, His Excellency Tan Sri Jamil bin Abdul Rais (1967).

#### BRITISH HIGH COMMISSION

1 Suleiman Road, Kuala Lumpur.

High Commissioner, His Excellency Sir (Charles) Michael Walker, K.C.M.G. (1966) ..... £6,300  
Deputy High Commissioner, A. A. Duff, C.M.G., D.S.O.

British Council Representative, J. Goatly, O.B.E., Jalan Bluff, Kuala Lumpur. Regional centres at Penang, Kota Kinabalu (Sabah) and Kuching (Sarawak).

### LEGISLATURE

The Federal Parliament consists of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) consists of 58 members, under ■ President (*Yang di-Pertua Dewan Negara*), 26 elected by the Legislative Assemblies of the States (2 from each) and 32 appointed by the *Yang di-Pertuan Agong* from persons who have achieved distinction in major fields of activity or are representative of racial minorities, including the Aborigines. The House of Representatives (*Dewan Rakyat*), consists of 144 members (States of Malaya, 104; Sarawak, 24; and Sabah, 16). Members are elected on the principle of universal adult suffrage with a common electoral roll. Sabah had its first direct elections in 1967. The House of Representatives is presided over by a Speaker who is either ■ member of the House or is qualified to be elected as a member.

Speaker, C. M. Yusoff.

The Constitution provides that each State shall have a simplified version of the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the *Mentri Besar* or Chief Minister and a single chamber Legislative Assembly. Three *ex officio* members sit in the Executive Council besides these elected members. They are the State Secretary, the State Legal Adviser and the State Financial Officer. The State Constitutions provide for the Ruler or Governor to appoint as *Mentri Besar* or Chief Minister, to preside over the Executive Council, a member of the Legislative Assembly who in his judgment is likely to command the confidence of the majority of the members of the Assembly. The Legislative Assemblies are fully elected on the same basis as the Federal Parliament.

Legislative powers are divided into a Federal List, a State List and ■ Concurrent List, with residual powers vested in the State Legislatures. The Federal List comprises broadly, external affairs, defence, civil and criminal law and justice, the machinery of government, finance, commerce and industry, communications and transport, power, education, medicine and labour and social security. The State List includes land, agriculture and forestry, local government and services and the machinery of state government. In the Concurrent List are, *inter alia*, social welfare, wild-life, animal husbandry, town and country planning, public health and drainage and irrigation.

### JUDICATURE

The Judicial System consists of a Federal Court and two High Courts of co-ordinate jurisdiction and status, one in the States of Malaya and one in the Borneo States. The Federal Court is presided over by the Lord President. This Court has exclusive jurisdiction to determine appeals from decisions of a High Court. The High Court consists of ■ Chief Justice and other judges. Subordinate Courts consist of Sessions Courts, Magistrates' Courts and Local Courts called Penghulus Courts.

Lord President of the Federal Court, Tan Sri Azmi bin Haji Mohamed.

Chief Justice of the High Court of Malaya, Tan Sri H. T. Ong.

Chief Justice of the High Court in the Borneo States, (vacant).

### DEFENCE

The Malaysian Armed Forces consist of the Army, Navy and Air Force, together with volunteer and auxiliary forces for each arm. The responsibility for command, discipline and administration under the general authority of the Supreme Head of Malaysia, rests with the Armed Forces Council under the Chairmanship of the Minister of Defence. The Council is not responsible for the operational use of the Forces. The Chief of the Armed Forces Staff is the senior military member of the Council.

A Committee of the Cabinet known ■ the National Defence Council is responsible for policy connected with higher defence. This Council is under the chairmanship of the Prime Minister.

An agreement exists between the Government of the United Kingdom and the Government of Malaysia on external defence and mutual assistance under which the United Kingdom has the right to maintain in Malaysia such military forces, including a Commonwealth Strategic Reserve, as are agreed to be necessary to enable it to meet its obligations. The Australian and New Zealand Governments are associated with this agreement.

### FINANCE

	1968	1969†
Revenue.....	\$1,674,900,000	\$1,961,805,633
Expenditure.....	1,932,180,000	1,925,371,496
	† Estimates.	

### PRODUCTION AND TRADE

Malaysia is essentially an agricultural country. It is the world's leading producer and exporter of natural rubber, tin and palm oil. Other major export commodities are timber and timber products, canned pineapples, iron ore, copra, palm kernels, pepper, sago and crude petroleum. With the rapid expansion in the manufacturing sector, Malaysia is also increasing her export of manufactured and semi-manufactured products. Another commodity which is produced throughout Malaysia is rice, the staple food of Malaysians. In 1967 Malaysia produced about two-thirds of its domestic rice requirements with the remaining portion being imported, mainly from Thailand. To achieve self-sufficiency, various measures aimed at increasing output and productivity including wider use of improved seeds and fertilizers, expansion of double-cropping through the provision of more irrigation facilities and research programmes to improve rice yields, are being introduced.

Imports, on the other hand, consist mainly of foodstuffs, manufactured consumer goods, machinery, mineral fuels and lubricants, chemicals, textiles and tobacco—both for feeding her growing population and to accelerate the pace of her economic

growth and development. However, with increasing industrialization and fairly rapid industrial expansion, her imports of manufactured consumer goods are steadily declining.

#### Foreign Trade of Malaysia

Malaysia's total trade declined in value from \$7,224.5 million in 1966 to \$7,046.3 million in 1967—a direct result of the decline in the prices of her primary exports, in particular, rubber, tin, palm oil and iron ore. Imports also declined as a result of rapid expansion in industrialization, thereby increasing import substitution of consumer

goods. Both import and export levels recovered sharply during 1968.

	1967	1968
	\$M'000,000	\$M'000,000
Imports.....	3,324.9	3,547.8
Exports.....	3,721.4	4,110.3
Balance of trade..	+396.5	+562.5

#### Trade with U.K.

## Malta, G.C.

Malta lies in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94.9 square miles. Malta includes also the adjoining island of Gozo (area 25.9 sq. miles); Comino and minor islets. The estimated population on Dec. 31, 1968, was 318,158. Malta's climate, although not tropical, is hot in summer.

Malta was in turn held by the Phoenicians, Greeks, Carthaginians, Romans and Arabs. In 1090 it was conquered by the Norman Count Roger of Normandy. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grandmaster La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and the island was subsequently blockaded by the British fleet. The Maltese people freely requested the protection of the British Crown in 1802 on condition that their rights and privileges would be preserved and respected. The islands were finally annexed to the British Crown by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged. In recognition of the part played by the Maltese people, King George VI awarded the George Cross to the island.

**Government.**—Following the report of a Constitutional Commission under the chairmanship of Sir Hilary Blood, a new Constitution for Malta was introduced by the Malta (Constitution) Order in Council, 1961, under which the island became known as "the State of Malta". On Sept. 21, 1964, the Malta (Constitution) Order in Council, 1961, was revoked and replaced by the Malta Independence Order, 1964, by the terms of which Malta became an independent state within the Commonwealth. Elections under the Malta Independence Order, 1964 were held in March, 1966, for the 50 seats in the House of Representatives and they resulted as follows: Nationalist Party, 28 seats; Malta Labour Party, 22 seats. Maltese and English are the official languages of administration and Maltese is ordinarily the official language in all the courts of law and the language of general use in the islands.

**CAPITAL.**— $\Psi$  Valletta. Population (estimated, Dec., 1968), 15,401. Valletta Grand Harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call and ship repairing centre for vessels, being about half-way between Gibraltar and Port Said. Mdina (Notabile), the former capital of the island, now has only 997 inhabitants, but its suburb Rabat has a population of 12,313.

**Governor-General**, His Excellency Sir Maurice Dorman, G.C.M.G., G.C.V.O. (1964)..... £7,000

#### CABINET

**Prime Minister, Minister of Commonwealth and Foreign Affairs**, G. Borg Olivier, LL.D.

**Finance, Customs and Port**, G. Felice, LL.D.

**Public Building and Works**, C. Caruana Demajo, LL.D.

**Justice and Parliamentary Affairs**, T. Caruana Demajo, LL.D.

**Trade, Industry and Agriculture**, J. Spiteri, LL.D.

**Health**, A. Cachia Zammit, M.D.

**Education, Culture and Tourism**, P. Borg Olivier, M.D.

**Labour Employment, and Welfare**, V. Tabone, M.D.

#### MALTA HIGH COMMISSION

24 Haymarket, S.W.1

**High Commissioner**, His Excellency John F. Axisa, M.B.E.

#### BRITISH HIGH COMMISSION

7 St. Anne Street, Floriana, Malta, G.C.

**High Commissioner**, His Excellency Sir Geoffrey (William) Tory, K.C.M.G. (1967)..... £5,625

**Deputy High Commissioner**, A. J. Brown.

**1st Secretaries**, W. R. Bickford, M.B.E.; Miss N. M. Grace; J. M. Willson (Aid); G. S. Forrest (Labour); A. J. Saimon (Commercial); H. J. Ash (Information).

and Secretaries, J. Mason (Administration and Consular); E. R. Prior (Commercial).

British Council Representative, I. P. Allnut, Pjazza Indipendenza, Valletta.

#### THE JUDICATURE

Chief Justice and President of the Constitutional Court and of the Court of Appeal, His Honour Sir Anthony Mamo, O.B.E., LL.D. £2,527  
 Vice President of the Constitutional Court and of the Court of Appeal, Hon. Prof. J. J. Cremona, Q.C., LL.D., D.Litt., Ph.D. . . . . 2,246  
 Judges, Hons. J. Flores, LL.D.; Prof. J. Xuereb, LL.D.; A. P. Gauci Maistre, LL.D.; V. R. Sammut, LL.D.; M. Curuana Curran, LL.D., F.R.S.A.; E. Magri, LL.D. . . . . each 1,966

**Education.**—In 1968-69 there were 112 primary and infant schools with 44,379 pupils, 4 grammar schools for girls with 3,074 students, 2 lycéums (grammar schools for boys) with 1,607 students, 4 secondary technical schools (2,508 boys, 950 girls), 20 technical institutes (and 3 technical centres) with 1,417 students and 11 industrial training centres with 127 trainees, 1 College of Arts, Science and Technology with 1,156 students and two teacher training colleges with an enrolment of 130 men students and 259 women students respectively. During the same year, 574 students were registered with the Royal University of Malta. There were 74 private schools (with 7,817 boys and 7,445 girls), of which 26 were subsidized by the Government. Adult education classes had an attendance of 769 in 1967-68. English and Maltese are taught in all classes in Government primary schools. In religion the Maltese are Roman Catholics. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognized by the Crown, consisting of 11 families.

**Production, etc.**—The islands are intensively cultivated. The chief export crops are potatoes, onions and flowers. Wheat, barley, clover and tomatoes are extensively grown on dry lands, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and non-irrigated land. Agriculture and fishing are among the principal occupations of the inhabitants.

Every effort is being made to increase the pro-

ductive capacity of industry. The Aids to Industries Scheme which was launched in April, 1959, continues the process of industrialization. A fresh impetus to industrial growth was given in April, 1968, when the task of carrying out industrial development became the main responsibility of the Malta Development Corporation. During that year fifty-eight projects were approved and the work of factory construction was speeded up. There exist at the moment fifty-two factories on three fully-serviced industrial estates and a further fourteen units will be ready for occupation in the course of the current year. An additional 42 units on a new Industrial Estate will be ready for occupation in the second half of 1970. During the last two years employment in new industries rose from 3,900 to 5,550 making up 5.8 per cent. of the gainfully-occupied population while production of aided industries increased significantly by 46.3 per cent. to £11,400,000 and exports by 52.4 per cent. to £8,400,000. During recent years Malta participated in international trade fairs in Italy, Germany, Libya and Czechoslovakia and concluded bilateral agreements with Italy, Libya, West Germany, Switzerland, Yugoslavia and Japan.

#### FINANCE AND TRADE

	1966-67	1967-68
Public revenue . . . .	£17,702,139	£18,245,151
Ordinary expenditure	16,089,159	19,349,095
Capital expenditure .	5,023,897	6,134,105

Notes issued by the Commissioners of Currency are legal tender and British coins, including silver, cupro-nickel and bronze coins. By agreement with the IMF, par value of the £Malta was fixed at £M = \$U.S. 2.40.

**Trade.**—The principal imports for home consumption are foodstuffs—mainly wheat, meat and bullocks, milk and fruit—fodder, beverages and tobacco, fuels, chemicals, textiles and machinery (industrial, agricultural and transport). The chief domestic exports are scrap-metal, hides and skins, potatoes and onions, smoking requisites, gloves, hosiery, beer, mineral waters, edible oil, tallow and fresh flowers. To these may be added these exports effected by newly created industries, viz. fibres and yarns, rubber seals, flower cuttings, plastic goods, wine, mattresses and knitwear.

#### Trade with U.K.

	1967	1968
Imports from U.K. . .	£14,779,000	£19,130,000
Exports to U.K. . . .	3,418,000	4,593,000

## Mauritius

Mauritius is an island group lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and lat. 10° 58'–20° 33' S., and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1962 was; Mauritius, 681,619; Rodriguez, 18,335; Lesser Dependencies, 1,062, made up of Europeans (mainly of French extraction), Asiatic races and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1966) at: Mauritius 782,044; Rodriguez, 20,600.

Mauritius was discovered in 1511 by the Portuguese; the Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. From 1638 to 1710 it was held as a small Dutch colony and in 1715 the French took possession but did not settle it until 1721. Mauritius was taken by a British force in 1810. A British garrison remained on the island until its withdrawal in June 1960. The French language and French law have been preserved under British rule. English is the official language but French is the principal language of communication in the island.

**Climate.**—Mauritius enjoys a sub-tropical maritime climate, with sufficient difference between summer and winter to avoid monotony; further variation is introduced by the wide range of rainfall and temperature resulting from the mountainous nature of the island. Humidity is rather high throughout the year and rainfall is sufficient to maintain a green cover of vegetation, except for a brief period in the driest districts.

**CAPITAL.**—ψ Port Louis, population (1967), 136,200; other centres are Beau Bassin and Rose Hill (66,800); Curepipe (50,500); Vacoas and Phoenix (47,450) and Quatre Bornes (44,150). **FLAG.**—Red, blue, gold and green stripes.

**Government.**—A Crown Colony for 158 years, Mauritius became an independent state within the Commonwealth on March 12, 1968. The Constitution defined by Order in Council in 1964 was slightly altered in 1966 on the recommendation of the Banwell Commission, the effect being to increase the membership of the Legislative Assembly to 70, 62 elected by block voting in multi-member constituencies (including 2 members for Rodriguez) and 8 specially-elected members. Of the latter, 4 seats go to the "best losers" of whichever communities in the island are under-represented in the Assembly after the General Election and the four remaining seats are allocated on the basis of both party and community. The Constitution provides for the appointment of a Governor-General who acts on the advice of the Council of Ministers, collectively responsible to the Legislative Assembly. At the General Election held in August, 1967, the Independence Party led by Sir Seewoosagar Ramgoolam obtained 39 seats and the *Parti Mauricien* led by Mr. Gactan Duval, 23 seats. After appointment of the specially elected members the composition of the Legislative Assembly was: Independence Party, 43; *Parti Mauricien*, 27. Mauritius became the 124th member of the United Nations on April 24, 1968. **Governor-General**, His Excellency Sir Arthur Leonard Williams, G.C.M.G. (1968).

#### COUNCIL OF MINISTERS

**Premier and Minister for External Affairs, Defence, Information and Broadcasting, and Internal Security**, Dr. Hon. Sir Seewoosagar Ramgoolam.

**Finance**, Hon. V. Ringadoo.

**Housing, Lands and Town and Country Planning**, Hon. A. R. Mohamed.

**Agriculture and Natural Resources**, Hon. S. Boolell.

**Labour, Local Government and Co-operative Development**, Hon. H. E. Walter.

**Education, Cultural Affairs and Attorney-General**, Hon. R. Jomadar.

**Works and Communications**, Hon. A. N. M. Osman.

**Commerce and Industry**, Dr. Hon. B. Ghurburrin.

**Health**, Hon. K. Jagatsingh.

**Social Security**, Hon. P. G. R. Rault.

(The Premier receives remuneration of Rs. 48,000 and Ministers each Rs. 36,000.)

#### MAURITIUS HIGH COMMISSION

153 Grand Buildings,  
Trafalgar Square, W.C.2

**High Commissioner**, His Excellency Dr. L. Teelock, C.B.E. (1968).

**1st Secretary**, K. Abraham.

**2nd Secretary**, D. G. Facknath.

#### BRITISH HIGH COMMISSION

Cerne House, Chaussée Street,  
Port Louis

**High Commissioner**, His Excellency Arthur Wooller, C.B.E. (1968).....£5,075

**1st Secretaries**, H. Arthington-Davy, O.B.E. (Head of Chancery); E. G. Wickens (Commercial); K. A. F. Woolverton (Aid).

**British Council Representative**, D. H. Pritchard, Royal Road, Rose Hill.

#### JUDICIARY

**Chief Justice**, Sir Michael Rivalland, M.B.E.

**Puisne Judges**, J. G. H. Glover; M. J. G. Lalouette.

**Defence.**—A defence agreement signed between Britain and Mauritius on Mar. 12, 1968, provides for joint consultation on any request by the Government of Mauritius for assistance in the event of a threat to the island's internal security. The agreement runs for six years. It provides various rights and defence facilities in Mauritius for the United Kingdom, which agrees to help in training and equipping local police and security forces.

**Education.**—Regular classes are run up to University entrance level, but facilities are available for the preparation of University external degrees. Primary education is provided in 340 schools of which 168 are government and 55 aided. Secondary education is given in four government schools—one with a technical stream—13 aided and 127 private schools. There are also 3 senior primary

schools of which is co-educational, 5 vocational training centres, and a teacher training college. Education is not yet compulsory but over 89 per cent. of children in the primary age group go to primary school and more than 1 child in 4 in the secondary age group goes to secondary school. Recurrent expenditure on education in 1965-66 totalled Rs.26,882,866.

**Communications.**—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered in 1966 amounted to 1,847,628 tons, and the shipping cleared to 1,856,875 tons. There were 78 post-offices and postal agencies, 51 telegraph offices, 19 telephone-exchange offices and 14,399 telephone installations in the island. Mauritius is served by the international airport situated at Plaisance, in the south-east of the island, about 5 miles from Mahébourg. Scheduled services are operated by B.O.A.C., Air France, Qantas, South African Airways, Air Indian and East African Airways. There are 9 daily newspapers published, mostly in French with occasional articles in English, and 3 Chinese daily papers. The Mauritius Broadcasting Corporation has a monopoly of radio broadcasting in the country. Television was introduced in February, 1965.

**Production, etc.**—Of the total cultivable area of about 227,000 acres, in 1968 only 197,600 were under sugar, about 250 under aloe (regular plantations), 450 under maize, 7,100 under tea, 1,300 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1968 was 596,579 metric tons, 3.02 metric tons per acre.

**Finance.**—The main sources of revenue are income tax, customs and excise duties (mainly on imports) and there is an export tax on sugar.

	1965-66	1966-67*
Public revenue . . .	Rs.182,175,126	Rs.217,312,560
Public expenditure . . .	213,943,112	217,029,990
	*Estimated.	

The Public Debt, at June 30, 1966, was Rs.285,896,798.

Currency—Rs. = Rupee = 1s. 6d.

**Trade.**—The necessities of life have all to be imported from abroad. Apart from local consumption (about 26,500 metric tons), sugar produced is exported, mainly to Britain, Canada and U.S.A.

	1964	1965
Total imports . . . . .	Rs.367,278,798	Rs.333,220,509
Total exports . . . . .	306,467,092	330,622,316

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£5,447,000	£5,885,000
Exports to U.K. . . . .	20,256,000	24,509,000

## DEPENDENCIES ■ MAURITIUS

Rodrigues, 350 miles east-north-east of Mauritius, area, 40 square miles. Population (1966) 20,600. Cattle, salt fish, sheep, goats, pigs and onions are the principal exports. The island is under the administration of ■ Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Government of Mauritius. *Magistrate, P. Y. Espitalier-Noël.*

## Trade with Mauritius

	1965	1966
Total imports . . . . .	Rs. 5,096,462	Rs. 6,248,026
Total exports . . . . .	1,892,228	1,822,692

*Other Dependencies.*—Two of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coconut oil. The other islands, including Six Islands, Peros Banhos, Salomon, Diego Garcia and Trois Frères, are now known as British Indian Ocean Territories and are no longer dependencies.

## Republic of Nigeria

(For MAP, see p. 916).

*Area and Population.*—The Republic of Nigeria is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west and north by Dahomey and Niger and on the east by the Cameroon Republic. It has an area of 356,669 square miles with a population (estimated, 1967) of 61,450,000. The population is almost entirely African. There are some 28,000 Europeans, Americans, Lebanese and others engaged in Government posts, commerce and Missionary work.

A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is ■ zone 50–100 miles wide of tropical rain forest and oil-palms. North of this the country rises and the vegetation changes to open woodland and savannah. In the extreme north the country is almost desert. There are few mountains, but in Northern Nigeria the central plateau rises to ■ average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy season is from about April to October; rainfall varies from under 25 inches a year in the extreme north to 150 inches on the eastern coast line. During the dry season the *harmattan* wind blows from the desert; it is cool and laden with fine particles of dust.

*CAPITAL.*—LAGOS, estimated population, 700,000. Other important towns are Ibadan (1,000,000), Kano (295,432), Iwo (158,583), Ogbomoshos (319,881), Oyo (112,349), Oshogbo (208,966), Onitsha (163,032), Ife (130,050), Abeokuta (187,292), Ilesha (165,822), Enugu (138,457), Aba (131,003), Maiduguri (139,965), Katsina (90,538), Port Harcourt (179,563), Sokoto (89,817), Zaria (166,170). *FLAG.*—Three equal vertical bands, green, white and green. *NATIONAL DAY.*—October 1 (Republic Day).

### GOVERNMENT

Following the military take-over of January 16, 1966, the Federal and Regional Constitutions were suspended, in relation to the offices of President, Prime Minister, Regional Governors and Regional Premiers, and Parliament and the Regional Legislatures were dissolved. The country was divided into 12 new States by decree in May, 1967—six in the former Northern Region, three in the former Eastern Region, the former Mid-West Region remaining as before, the Colony Province of the former Western Region and Lagos forming a new Lagos State, and what remains of the former Western Region. A Federal Military Government, made up of a Supreme Military Council and ■ Federal Executive Council perform the functions of the former Federal Government and Council of Ministers, while a Military Governor administers each of the 12 States (except East Central State for which no appointment has been made) with ■ Executive Council comprising senior representatives of the Armed Forces and Police in each State and civilians appointed by the Military Governor in his discretion. See also EVENTS OF THE YEAR.

#### The President

The office of President ■ suspended in Jan. 1966.

#### SUPREME MILITARY COUNCIL

*Head of Federal Military Government and Commander-in-Chief,* Maj.-Gen. Yakubu Gowon.

*Chief of Staff,* Brig. Hassan Usman Katsina.

*Head of the Navy,* Cdre. J. E. A. Wey.

*Head of the Air Force,* Lt.-Col. S. A. Alao.

(and the State Military Governors)

*Inspector-Gen. of Police,* Kam Selem.

*Chief of Staff, Supreme Headquarters,* Brig. E. O. Ekpo.

*Military Secretary,* Col. I. D. Bissala.

#### FEDERAL EXECUTIVE COUNCIL

The *ex officio* members of the Federal Executive Council are the Head of the Federal Military Government, who is the Chairman of the Council, the Heads of the Services and the Chief of Staff, the Inspector-General of Police and Deputy Inspector-General of Police and the Attorney-General of the Federation. In addition there are ■ civilian members of the Council representing the 12 States, with Chief Obafemi Awolowo (West) as Vice-Chairman. Each civilian member is designated Commissioner

and is responsible for certain government departments.

#### NIGERIAN HIGH COMMISSION

Nigeria House, 9 Northumberland Avenue, W.C.2  
[01-839-1244]

*High Commissioner,* His Excellency Brig. B. O. Ogundipe.

#### BRITISH HIGH COMMISSION

Kajola House, 62–64 Campbell Street, Lagos.

*High Commissioner,* His Excellency Sir Leslie Charles Glass, K.C.M.G. (1969) . . . . . £6,300

*Deputy High Commissioner,* E. G. Willan (Minister);

M. S. Staveley, C.M.G., C.V.O., O.B.E. (acting)

(Kaduna); J. E. Smallwood (Ibadan); G. D'Ar-

naud-Taylor (Benin).

*Defence Adviser,* Col. R. E. Scott, M.B.E., M.C.

*British Council Representative in Nigeria,* R. A. F. Sherwood, 8–10 Yakubu Gowon Street, Lagos. Regional centres at Benin City, Ibadan, Kano and Kaduna with libraries at centres and at Enugu and Port Harcourt.

## JUDICATURE

Chief Justice, Federal Supreme Court, Rt. Hon. Sir Adetokunbo Ademola.

Chief Justice, High Court of Lagos, J. I. C. Taylor.  
President, Western States Appeal Court, Mr. Justice A. Kester.

Chief Justice, Western States High Court, Mr. Justice O. Somolu.

Chief Justice, Mid-West State, Mr. Justice Mason Begho.

[Chief Justices have been appointed for some of the States.]

**Education.**—The University of Ibadan became a fully independent university on Oct. 1, 1962 (2,687 full-time students in 1966). The University at Nsukka, E. Central State (1966) had 2,579 full-time students in 1966. The Universities of Lagos, Zaria and Ife were formally established in 1962. In 1965-66 the University of Lagos had 656 full-time students, Ife 923 and Zaria 956. Free and universal primary education for all children within the 6-12 year age group is now available in West and East Nigeria and in the Territory of Lagos.

**Railways.**—The Nigerian railway system, which is controlled by the Nigerian Railway Corporation, is the most extensive in Africa. There are 1,870 route miles of lines. There are two major bridges, one over the Niger at Jebba and one over the Benue at Makurdi. The latter is 2,624 ft. long, and it is believed to be the second longest in Africa. The North-western main line runs from Lagos to Kano (700 miles) through the important towns of Abeokuta, Ibadan, Ilorin, Jebba, Minna, Kaduna and Zaria. From Kano the line continues in a north-easterly direction to its terminus at Nguru. This line is also linked with Sokoto by a scheduled railway-road service from Gusau. The eastern line runs from Port Harcourt deep-water quay on the Bonny river through the thickly populated oil palm area to Enugu, where it serves the collieries. It then crosses the Benue and joins the north-western line at Kaduna, 569 miles from Port Harcourt. A branch line runs to Bauchi, Gombre and Maidugurie.

**Roads.**—There are 45,000 miles of motorable road. Most of the roads have gravelled or earth surfaces, but about 5,500 miles are tarred. An extensive programme of bituminous surfacing is now being carried out. A road bridge over the lower Niger between Onitsha and Asaba, providing a through trunk road between East and Mid-West Nigeria, was opened on Jan. 4, 1966.

**Civil Aviation.**—Trunk route services operated by Nigerian and the principal international airlines bring Nigeria within less than 12 hours of the Western European capitals and South Africa. There are also services to other parts of Africa and to the United States. A network of internal air services connects the main centres. Comprehensive radio navigational aids are installed at Kano and Lagos airports, and basic radio navigational facilities are provided at the twelve other

aerodromes in regular use. Several flying strips are also in use by light aircraft. There is a network of meteorological reporting stations.

**Production and Industry.**—Nigeria is mainly an agricultural country. Four of the country's main agricultural products, viz. palm-oil and palm kernels, cocoa, cotton and ground nuts are of importance in Nigeria's export trade. Mineral oil is however the principal source of export revenue followed by cocoa and ground-nuts. Other crops include beans, coffee, capsicums, cassava, coffee, copra, guinea-corn, gum arabic, kola-nuts, maize, millet, piassava, rice, rubber, tobacco and yams. There are important tin and coal-mining industries, at Jos and Enugu respectively. The coal is mainly used within the country. Nigeria is the principal source of supply of the world's requirements of columbite. Timber and hides and skins are other major exports. Some of the country's more important industrial installations include a steel rolling mill, a tin smelter, a petroleum refinery, a flour mill, a sugar factory, several cement plants and textile factories. Of growing importance is the local assembly of motor vehicles, bicycles, radio sets, fans and sewing machines. Other major manufactures include soap, cigarettes, beer, soft drinks, vegetable oils, canned food, confectionery, metal containers, plywood, footwear, tyres and tubes, paints, pharmaceuticals, plastic goods, glass containers, cement products, and roofing sheets.

**Trade.**—The principal imports are cotton piece goods, unmanufactured tobacco and cigarettes, jute bags and sacks, artificial silk piece-goods, motor-vehicles and spares, bicycles and spare parts, other machinery, cement, corrugated iron sheets, stock-fish, and petroleum products. The principal exports are cocoa, groundnuts, palm-kernels, palm oil, timber (sawn and logs), hides and skins, cotton, columbite, tin ore, rubber and crude oil.

	1967	1968
Total imports . . . . .	£223,550,000	£193,190,000
Total exports . . . . .	238,200,000	206,510,000
	* Provisional	

Exports to the U.K. include about one-third of the U.K.'s total cocoa imports, one-quarter of her tin imports, one-quarter of her dry hides, and 10 per cent. of her hardwoods.

## Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£58,450,000	£57,737,000
Exports to U.K. . . . .	78,913,000	70,217,000

**Finance.**—The Federal Government collects the major part of the national revenue, making the allocations shown below to the States:

	1968-69	1969-70
Revenue . . . . .	£147,710,050	£187,000,000
Expenditure . . . . .	146,408,510	186,800,000
(allotted to States) . . . . .	54,437,390	73,000,000

## Pakistan

**Area and Population.**—The Islamic Republic of Pakistan consists of two geographical units of West Pakistan and East Pakistan situated respectively to the north-west and north-east of the Republic of India and separated by about 1,200 miles of Indian territory. Pakistan has a total area of 365,529 sq. miles (W. Pakistan, 310,403 sq. miles; East Pakistan, 55,126 sq. miles). Total population of the Republic was estimated at 109,520,000 on June 30, 1968.

**Government.**—Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received the Royal Assent on July 18, 1947.

In terms of the Act the Dominion of Pakistan consisted of former territories of British India. The Punjab States of Bahawalpur and Khairpur, with a Muslim population of almost 80 per cent. and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of

Punjab (West Punjab) were defined by a Boundary Commission presided over by Sir Cyril Radcliffe, K.B.E., Q.C. (now Viscount Radcliffe). The following States also acceded to Pakistan: the Baluchistan State of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. The States of Junagadh and Manavadar which had acceded to Pakistan, were occupied by India on November 8, 1947.

Pakistan became a Republic on March 23, 1956, when the provisions of the Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law. General (now Field Marshal) Mohammed Ayub Khan, Commander-in-Chief of the Pakistan Army, was appointed the Chief Martial Law Administrator. On October 28, 1958, General Mohammed Ayub Khan also became President of Pakistan. Following a period of unrest in both East and West Pakistan, marked by rioting and mass strikes, President Ayub Khan on March 24, 1969, announced his resignation and handed over control of the country to the armed forces. The Commander-in-Chief, Gen. Yahya Khan, proclaimed martial law on March 25 and appointed military governors for East and West Pakistan. The Constitution was abrogated, National and Provincial Assemblies dissolved and Provincial Governors dismissed. Law and order were rapidly restored. On March 31, 1969, Gen Yahya Khan assumed the Presidency and formed a Council of Administration consisting of the 3 Martial Law Administrators (see below).

**CAPITAL.**—Rawalpindi (population 1961, 340,175). Pending construction of the proposed new federal capital (Islamabad), Rawalpindi is the seat of government. The National Assembly sits at Dacca. **FLAG.**—The National Flag of Pakistan is dark green, with white vertical stripe at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star. **NATIONAL DAY.**—March 23. **President,** General Agha Mohammad Yahya Khan, b. 1917, assumed office March 31, 1969.

#### COUNCIL OF ADMINISTRATION

*Chairman,* The President.

*Members,* Lieut-Gen. Abdul Hamid Khan (*Deputy Army Commander*); Vice-Adm. S. M. Ahsan, D.S.C. (*Commander of the Navy*); Air Marshal Nur Khan (*Commander of the Air Force*).

[A Council of 8 Ministers was appointed by the President on Aug. 4, 1969.]

#### PAKISTAN HIGH COMMISSION

35 Lowndes Square, S.W.1

*High Commissioner* (vacant).

#### BRITISH HIGH COMMISSION

Adll Chambers, Napier Road, Rawalpindi

*High Commissioner.* His Excellency Sir Cyril Pickard, K.C.M.G. (1966) ..... £6,300  
*Deputy High Commissioners.* H. A. Twist, C.M.G., O.B.E.; S. C. Stout (*Karachi*); P. R. Oliver (*Lahore*); R. Fox, O.B.E. (*Dacca*).

*Defence Adviser,* Brig. G. H. Hoerder, M.B.E.

*Counsellors,* R. J. Stratton (*Head of Chancery*); M. W. Errock (*Economic*); J. Borthwick (*Information*).

*British Council Representative,* D. A. Smith, O.B.E., P.O. Box 47, 56a Satellite Town, Rawalpindi. Regional centres at Dacca, Karachi, Lahore and Peshawar. Libraries at these centres and at Chittagong and Rajshahi.

#### THE JUDICATURE

There is a Supreme Court of Pakistan. In addition the High Court of West Pakistan sits at Lahore, Karachi and Peshawar, and the High Court of East Pakistan at Dacca.

*Chief Justice of the Supreme Court,* Mr. Justice S. A. Rahman.

**Defence.**—The Army has 8 Infantry Regiments, 6 Armoured Corps units, 8½ Artillery Regiments and 34 Engineer units. **Navy.**—The Navy consists of 1 cruiser, 5 destroyers, 5 frigates, 6 minesweepers, 1 survey ship, 1 salvage vessel, 1 harbour oiler and auxiliary vessels.

**Education.**—School education in Pakistan is organized into 4 stages: Primary stage (5-10); Middle or Lower Secondary stage (10-12); Secondary stage (12-14); Higher Secondary stage (14-16). Institutions of higher education include colleges and universities for general as well as professional and technical education.

Teacher Training institutions are of three levels, turning out teachers for each of the stages above. Examinations for the first two stages are conducted

by the Education Department for award of certificates. For the third stage examinations are conducted by the Universities and degrees are awarded upon successful completion of the courses. Funds for the maintenance of the Government institutions and for grants to non-government institutions and the universities are provided in the Provincial budgets. The Central Government annually makes development grants to provincial governments towards the implementation of their Five Year Plan.

There are about 61,000 primary and 9,000 secondary schools, 400 arts and science colleges, 18 medical colleges, 130 teachers' training institutions, 44 polytechnics and 12 universities, including 2 engineering and 1 agricultural universities.

**Production.**—Pakistan's economy is chiefly based on agriculture, which is the occupation of about 85 per cent. of the population. Production (in thousands) of principal crops in 1966-67 was: rice, 10,767 tons; wheat, 4,324 tons; sugar cane, 29,705 tons; cotton, 2,573 bales; jute, 6,409 bales; tobacco, 392 million lbs. and tea, 64.5 million lbs. Pakistan has one of the longest irrigation systems in the world. The total area irrigated is about 30.3 million acres.

**Other Products.** Pakistan also produces burlap, hides and skins, leather, wool, ammonium sulphate, natural gas, soda ash, paper, newsprint, cement, fish, sports goods, surgical appliances and engineering goods, including switchgear, transformers, cables and wires.

**Trade.**—Pakistan imported manufactured goods and raw materials to the value of Rs.5,192,252,000 in 1966-67 and exported mainly agricultural products valued at Rs.2,912,726,000. Principal imports are listed as: machinery, food grains, iron and steel manufactures, transport equipment, electrical goods, mineral oils, chemicals, drugs and medicines, and vegetable oils. Principal exports are raw jute and jute manufactures, raw cotton and yarn and piece goods, rice, leather and leather goods, and fish.

#### Trade with U.K.

	1967	1968
Imports.....	£50,771,000	£46,791,000
Exports.....	32,861,000	40,566,000

**Finance.**—The exchange rate of the Pakistan rupee is Rs.100=£8.835 (see also p. 83).

The State Bank has a capital of about Rs.30,000,000, 51 per cent. of which is held by the State. Total bank deposits in Pakistan on December 31, 1967, were Rs.1,001.87 crores.

The 1968-69 Budget showed income receipts of Rs. 688,930,000 and expenditure (including development expenditure) of Rs. 557,210,000.

**Communications.**—There are 13,021 post offices, 172,000 telephones, 12,500 miles of metalled roads, 13,300 miles of gravel roads, and over 100,000 miles of earth road, and about 5,000 miles of perennial and seasonable navigable channels in Pakistan. Railways have a total route mileage of 7,115. Roads in West Pakistan and waterways in East Pakistan, together with the railways, are the principal means of transportation.

Main seaports are Karachi (annual handling capacity 4,500,000 tons of cargo) serving West

Pakistan and Chittagong (annual handling capacity over 3,000,000 tons of cargo) serving East Pakistan. The Chalna Anchorage, established in East Pakistan in 1960, has a handling capacity of about 1,500,000 tons a year. The main airport at Karachi occupies an important position on international trunk routes and is equipped with modern facilities and equipment. Pakistan International Airlines (P.I.A.) operates air services between the principal cities within the country as well as abroad. It has recently started flights to the U.S.S.R., China, Nepal and the U.A.R.

Post and telegraph facilities are available to every country in the world.

## PROVINCES OF PAKISTAN

### PROVINCES OF THE ISLAMIC REPUBLIC OF PAKISTAN

#### 1. WEST PAKISTAN

The Establishment of West Pakistan Act, 1955, came into force on October 3, 1955, and incorporated: (1) the former Governors' Provinces of the Punjab, North-West Frontier and Sind; (2) the former Chief Commissioners' Provinces of Baluchistan and Karachi; (3) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (4) the Tribal Areas of Baluchistan, the Punjab and the North-West Frontier and the States of Amb, Chitral, Dir and Swat, into the Province of *West Pakistan* with effect from October 14, 1955.

At the 1961 Census the total population, excluding the Federal Territory of Karachi, was 42,947,835 (including 97,540 non-Pakistanis).

West Pakistan (including the Federal Territory), has an area of 310,403 square miles; 97.2 per cent. of the population are Muslim; 0.5 per cent. Caste Hindu; 1.0 per cent. Scheduled Caste Hindu and 1.4 per cent. Christian. Running through West Pakistan are five great rivers, the Indus, and its tributaries, Jhelum, Chenab, Ravi, and Sutlej. The upper reaches of these rivers are in Kashmir and their sources are in the lofty Himalayas.

West Pakistan is one of the richest wheat-producing areas populated by a hardy peasantry with great martial traditions. Of the other crops grown, cotton, rice, gram, jowar, oil-seeds, sugarcane and tobacco are the most important. There

are large deposits of rock salt, which with cotton forms the principal exports. The Province is served by the Pakistan Western Railway. The Pakistan International Airlines network covers practically the whole of the Province.

Chief City and Headquarters of West Pakistan: Lahore (population, 1961 census 1,296,477).

Karachi is the chief city and port, with a population of 1,026,000.

Military Governor, Air Marshal Nur Khan, appointed Aug. 4, 1969.

#### ■ EAST PAKISTAN

The Province of East Pakistan: area, 55,126 sq. miles, population (1961 census), 50,840,235 (of whom 80.4 per cent. are Muslim; 8.6 per cent. Caste Hindu; 9.8 per cent. Scheduled Caste Hindu; 0.7 per cent. Buddhist; 0.3 per cent. Christian and 0.1 per cent. others), comprises the Eastern territories of the partitioned province of Bengal and Sylhet, formerly a district of Assam (excluding certain thanas in the Karimganj sub-division).

East Pakistan is the principal producer of raw jute in the world. Other chief agricultural products are rice, tea, oilseeds, pulses, areca nuts and sugar cane. The chief industries are jute and cotton mills, paper, newsprint and chemical fertilizer.

CHIEF CITY (and Headquarters of East Pakistan): Dacca. Population 556,712 (1961 census).

Military Governor, Vice-Adm. S. M. Ahsan, D.S.C., appointed Aug. 4, 1969.

## Sierra Leone

**Area and Population, etc.**—The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The total area of Sierra Leone is about 27,925 sq. miles, and the total population (1963 Census provisional figures) is 2,183,000, of whom about 2,000 are Europeans, 3,000 Asiatics, 30,000 non-native Africans, and the remainder native Africans (estimated 1968, 2,475,000). For administrative purposes, the interior portion of Sierra Leone is divided into 3 Provinces covering 12 Districts, each administered by a Resident Minister. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the South.

**CAPITAL.**—Freetown (population 85,000). Freetown, which possesses the finest and most important harbour in West Africa, is 3,078 miles from Liverpool; transit 9 days by sea; 2 days by air; there are also air connections with most of the capital cities of the world, and an internal air service between Freetown and some of the more important towns in Sierra Leone. **FLAG.**—Three horizontal stripes of leaf green, white and cobalt blue. **NATIONAL DAY.**—April 27.

**Government.**—Sierra Leone became a fully independent state and a member of the British Commonwealth on April 27, 1961. Under the 1961 Constitution, Her Majesty the Queen's representative is the Governor-General, who is appointed on the advice of the Prime Minister. The House of Representatives consists of a Speaker and not fewer than 60 members, elected from constituencies established by an Electoral Commission. The House has full power to legislate. The Governor-General is advised by a Cabinet consisting of the Prime Minister and not less than 7 other ministers, who must be elected members of the House of Representatives. The Ministers are appointed by the Governor-General on the recommendation of the Prime Minister.

In March, 1967, general elections were held, but before the results had been announced the Chief of the Sierra Leone Army declared martial law and placed the Governor-General and the Prime Minister under house arrest. On March 23 a group of Army and police officers assumed power, dissolving the House of

Representatives and suspending the Constitution. This group subsequently formed the National Reformation Council, with Col. Andrew Juxon-Smith as Chairman. The Council constitutes the supreme authority, and has taken over the powers vested in the Governor-General.

It was announced that on April 26, 1968, Mr. Siaka Stevens, formerly Leader of the Opposition in the House of Representatives, had been sworn in as Prime Minister and had formed a new Cabinet. Governor-General, Mr. Justice Banja Tejan-Sie (*Acting*).

#### CABINET

Prime Minister and Minister of Defence, Hon. Siaka P. Stevens.

Finance, Hon. Dr. Mohammed Sorie Forna.

External Affairs, Hon. L. A. M. Brewah.

Interior, Hon. S. W. G. Capio.

Agriculture and Natural Resources, Hon. F. S. Anthony.

Lands, Mines and Labour, Hon. C. A. Camara-Taylor.

Trade and Industry, Hon. S. I. Koroma.

Communications, Hon. D. F. Shears.

Information and Broadcasting, Hon. J. Hadson-Taylor.

Development, Hon. S. A. J. Pratt.

Works (vacant).

Education, Hon. R. B. Kowa.

Health, Hon. J. Barthes-Wilson.

Social Welfare (vacant).

Housing and Country Planning, Hon. S. A. Fofana.

Ministers without Portfolio, Hons. P. C. Bai Koble

Pathbana, C.B.E.; P. C. Gibao Gaima; P. C. Jaia Kai Kai.

Deputy Ministers:

Prime Minister's Office, Hon. S. B. Kawusu-Konteh.

Social Welfare, Hon. George G. Lamin.

Interior, Hon. Banjali Mansarey.

Lands, Mines and Labour, Hon. F. B. Turay.

Education, Hon. Mannah M. Kpaka.

#### SIERRA LEONE HIGH COMMISSION

33 Portland Place, W.1.

[01-636-6483-6]

High Commissioner, His Excellency Victor S. Kanu (1969).

Counsellor (vacant).

#### BRITISH HIGH COMMISSION

Standard Bank of West Africa Building,  
Oxford Street, Freetown.

High Commissioner, His Excellency Stephen John Linley Oliver, C.M.G., M.B.E. (1969) . . . . . £5,625

Deputy High Commissioner, J. D. Massingham.

Defence Adviser, Lt.-Cdr. A. I. R. Shaw, M.B.E., R.N.

British Council, P.O. Box 124, Tower Hill, Freetown.

Representative (vacant).

#### JUDICATURE

President of the Supreme Court, Sir Samuel Bankole Jones.

Chief Justice, Hon. Banja Tejan-Sie, C.M.G.

Puisne Judges, R. B. Marke, C.B.E.; J. B. Marcus Jones; S. C. W. Betts, S. J. Forster, C.B.E. (*acting*).

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch line of 83 miles extends in a north-easterly direction from Bauya to Makeni. A mining company, the Sierra Leone Development Company, owns a railway which runs for 52½ miles from the iron ore deposits at Marampa to the shipping port of Pepel. There are about 4,250 miles of road in the country.

of which about 330 miles are bitumen-surfaced. There is a trunk line network of radio, and overhead telephone and telegraph routes of approximately 3,000 miles, linking the Western areas with the other provinces.

The Freetown international airport is situated at Lungi, across the Sierra Leone River from Freetown. The main port is Freetown, which has one of the largest natural harbours in the world, and where there is a deep water quay, capable of berthing two large or three small ships. There are smaller ports at Pepel and Bonthe. The Sierra Leone Broadcasting Service operates a direct service, and is responsible for the Freetown Transistor Radio Service. Broadcasts are made daily in several of the more important indigenous languages, in addition to English.

Education.—In 1963 primary education was provided in a total of 706 schools, of which all but 21 were assisted from public funds. The total enrolment was 105,800. Primary education is neither free nor compulsory, but the fees are small and equipment is provided free of charge. The percentage of children attending school varies considerably in different parts of the country. There are 44 secondary schools in the country, with an enrolment in 1963 of 10,283. One school provides a secondary technical education; the remainder are grammar schools. Technical education is provided in the two Government Technical Institutes, situated in Freetown and Kenema, in two Trade Centres and in the technical training establishments of the mining companies. Teacher training is carried out in two Government and four Church Mission training colleges in the Provinces, and in the Milton Margai Training College near Freetown. The University College (Fourah Bay College) was founded by the Church Missionary Society and is affiliated to the University of Durham. It has faculties of pure and applied science and of arts.

Trade.—In the Western area, farming is largely confined to the production of cassava and garden crops, such as maize and vegetables, for local consumption. In the Provincial areas, the principal agricultural product is rice, which is the staple food of the country, and export crops such as palm kernels, cocoa beans, coffee and ginger.

	1967	1968
Imports from U.K.	£8,244,000	£9,850,000
Exports to U.K. . . .	22,522,000	34,807,000

Finance.—In August, 1964, Sierra Leone adopted decimal currency. The basic unit is the *leone* (worth 10s.). It is divided into 100 cents.

	1967-68†	1968-69*
Revenue . . . . .	Le41,716,542 (£20,858,271)	Le41,705,057 (£20,852,528)
Expenditure . . . . .	Le41,701,151 (£20,850,576)	Le41,701,151 (£20,850,576)

† Revised Estimate. \* Estimate.

## Singapore

The Republic of Singapore consists of the island of Singapore and a number of smaller islands, covering a total area of 224.5 square miles. Singapore Island is 26 miles long and 14 miles in breadth and is situated just north of the Equator off the southern extremity of the Malay Peninsula, from which it is separated by the Straits of Johore. A causeway, carrying a road and railway, crosses the three-quarters of a mile to the mainland. The highest point of the island is 581 feet above sea level. Climate.—The climate is hot and

humid and there are no clearly defined seasons. Rainfall averages 95 inches a year and temperature ranges from 21°–34° C. (70°–93° F.). *Population*.—Estimated at 1,987,900 on June 30, 1968, the population is multi-racial with a preponderance of Chinese. The racial groups were estimated in 1968 to be divided as follows: Chinese—1,478,600; Malays—287,700; Indians and Pakistanis—161,200; Other (Europeans, Eurasians, etc.), 60,400. At least 8 Chinese dialects are used and Malay, Mandarin, Tamil and English are the official languages. **NATIONAL DAY**.—August 9.

*Government*.—Singapore, where Sir Stamford Raffles had first established a trading post under the East India Company in 1819, was incorporated with Penang and Malacca to form the Straits Settlements in 1826. The Straits Settlements became a Crown Colony in 1867. Singapore fell into Japanese hands in 1942 and civil government was not restored until 1946, when it became a separate colony. Internal self-government and the title "State of Singapore" were introduced in 1959. Singapore became a state of Malaysia when the Federation was enlarged in September, 1963, but left Malaysia and became an independent sovereign state within the Commonwealth on August 9, 1965. Singapore adopted a Republican constitution from that date, the Yang di-Pertuan Negara being re-styled President. There is a Cabinet collectively responsible to a fully-elected Parliament of 58 members.

#### HEAD OF STATE

*President*, Yusof bin Ishak, assumed office as President, Aug. 9, 1965.

#### CABINET

*Prime Minister*, Lee Kuan Yew.

*Minister for Science and Technology*, Dr. Toh Chih Chye.

*Finance*, Dr. Goh Keng Swee.

*Foreign Affairs and Labour*, S. Rajaratnam.

*Education*, Ong Pang Boon.

*Communications*, Yong Nyuk Lin.

*Interior and Defence*, Lim Kim San.

*Culture*, Jek Yeun Thong.

*Social Affairs*, Enche Othman bin Wok.

*Law and National Development*, E. W. Barker.

*Health*, Chua Sian Chin.

*Speaker of Parliament*, P. Coomaraswamy.

wireless and wired broadcasting services carrying commercial advertising. Television was introduced in 1963.

*Production, etc.*—Manufactures comprise a wide range of industries including the processing of rubber, pineapples, coconut oil, shipbuilding and repairing, saw-milling, steelrolling, motor assembly, printing and the manufacture of rubber foot-wear, soap, dry cell batteries, beer, soft drinks, tin containers, glassware, shoe polish, yarn, aluminium utensils, bricks, tiles and metal windows. The traditional concentration on the processing of primary products (rubber, tin, rattan), the provision of shipbuilding, docking and facilities, light engineering works and motor assembly plants have been supplemented in recent years by various industrial projects relating to chemical, mechanical, electrical, metal working, engineering, building materials and food industries.

Singapore's Second Development Plan, 1966–70, is in progress at a total estimated cost of \$1,500,000,000. Under the first Plan, 1961–65, 50,000 subsidized housing units were constructed and several industrial estates. The largest of these, at Jurong, forms the nucleus of a new town, with 3,000 acres zoned for light and heavy industries and its own deep water port under construction. Major projects of the 1966–70 Plan include an extension to the East Lagoon of the Singapore Harbour (\$50m.), the Johore River Water Supply Scheme (\$40m.) and a new electric power station at Jurong.

Singapore exchanges High Commissioners with Britain, Australia, New Zealand and Malaysia, and Canada, India and Pakistan are represented in Singapore.

#### SINGAPORE HIGH COMMISSION

*Judges*, Tan Ah Tah; F. A. Chua; M. Buttrose;

J. W. D. Ambrose; A. V. Winslow; T. Kulasekaram; Choor Singh.

*Communications*.—Singapore is one of the largest seaports in the world, with deep water wharves and ship repairing facilities. Ships also anchor in the roads, unloading into lighters. 36,000,000 tons of cargo were handled in 1968. Singapore Airport, 6½ miles from the centre of the city, has a runway 9,000 feet long. There are 24 miles of railway connected to the Malaysian rail system by the causeway across the Straits of Johore, and 966 miles of roads, 524 miles of which are metalled roads maintained by the Government. There are both

## Swaziland

Swaziland is the smallest of the former three High Commission Territories in Southern Africa. Geographically and climatically, it is divisible into four physiographic provinces; the broken mountainous Highveld of the west, adjacent to the Drakensburg, with altitudes averaging over 4,000 ft., the Middleveld which is mostly mixed farming country, about 2,000 ft. lower and the Lowveld, a hot woodland region, bounded on the east by the Lubombo mountains, with an average altitude of 1,500 ft. The Lubombo mountains form the fourth physiographic province. Four rivers, the Komati, Usutu, Mbuluzi and Ingwavuma, flow from west to east, cutting their way through the Lubombo mountains to the Indian Ocean. The exploitation of these rivers is particularly important to the agricultural development of the middle and bush veld, where irrigation projects are giving the scenery a different aspect. The total area is 6,704 sq. miles and the population in May, 1968, was 395,138.

**CAPITAL.**—Mbabane (population, 14,000), the headquarters of the Government, is situated on the hills at an altitude of 3,800 ft. There are townships in the districts of Manzini (population 16,000), Hlatikulu (1,000); Stegi (1,400), Geodzegun (1,700), Pigg's Peak (1,400), Havelock Mine (4,100), Big Bend (2,900) and Mhlume (2,200). **FLAG.**—One crimson, two blue, two yellow bands; black and white shield in centre.

**Government.**—The Kingdom of Swaziland came into being on April 25, 1967, under a new internal self-government constitution and became an independent kingdom in membership of the Commonwealth on September 6, 1968. Parliament consists of a Senate and House of Assembly. The House of Assembly has 24 elected members and six members who are nominated by the King. The Attorney-General is also a member but has no vote. The Senate has 12 members—six elected by the House of Assembly and six appointed by the King.

*King of Swaziland, His Majesty Sobhuza II, K.B.E.*

### CABINET

*Prime Minister and Minister of Foreign Affairs, Prince Makhosini Dlamini.*

*Deputy Prime Minister, M. Sukati, B.E.M.*

*Minister of Finance, L. Lovell.*

*Commerce, Industry and Mines, S. S. Nxumalo.*

*Local Administration, Prince Mfanasibili Dlamini.*

*Agriculture, A. K. Hope.*

*Education, The Rev. Dr. A. B. Gamedze.*

*Health, Dr. A. Nxumalo.*

*Works, Power and Communications, P. L. Dlamini, O.B.E.*

### SWAZILAND HIGH COMMISSION

58 Pont Street, S.W.1.

[01-589-5447]

*High Commissioner, His Excellency N. D. Ntiwane.*

### BRITISH HIGH COMMISSION

Mbabane

*High Commissioner, His Excellency Peter Gautrey.*

C.V.O. (1968)..... £5,975

**Education.**—In 1967 there were 380 schools, with 63,000 pupils of all races.

**Communications.**—Swaziland's first railway was completed in 1964. It is about 140 miles long, starting at Ngwenya, 13 miles north-west of Mbabane, and connecting at the Mozambique frontier with an extension to the existing line between Lourenço Marques and Goba. Principal export traffic on the railway is the iron ore mined

at Bomvu Ridge, near Ngwenya, by the Swaziland Iron Ore Development Company. A large part of the country's passenger and goods traffic is carried by privately-owned motor transport services. Besides these, the South African Railways Road Motor Services maintain regular goods and passenger services between Mbabane and Manzini and the main railheads in South Africa which serve Swaziland—Breyton, Piet Retief, Komatipoort, Hectorspruit and Golela. There are post offices, telegraph and telephone offices at all the chief centres.

**Production.**—Iron ore, which is sold to Japan, is the country's largest single export and in 1967 was worth R.11,320,800. Other major exports are sugar (R.9,547,100 in 1967), asbestos (R.5,858,000) and wood pulp and other forest products (R.6,880,200).

**Finance.**—Government revenue for 1968-69 was estimated at R.9,784,487 and expenditure at R.13,064,238 (1967-68, R.11,097,589). Swaziland received from the United Kingdom a grant-in-aid of R.3,291,750 (estimated) and development aid in the form of grants and loans of approximately R.1,800,000. Public debt amounted to R.29,270,000 on March 31, 1967.

### Trade with U.K.

	1967	1968
Imports from U.K....	£77,000	£245,000
Exports to U.K.....	£8,454,000	£7,661,000

## Tanzania

Tanganyika, the mainland part of the United Republic of Tanzania (Tanganyika and Zanzibar) occupies the east-central portion of the African continent, between 1°-11° 45' S. lat. and 29° 20'-40° 38' E. long. It is bounded on the N. by Kenya and Uganda; on the S.W. by Lake Nyasa, Malawi and Zambia; on the S. by Mozambique; on the W. it is bounded by Ruanda, Burundi and the Congolese Republic; on the E. the boundary is the Indian Ocean. Tanganyika has a coastline of about 500 miles and an area of 362,820 sq. miles (including 20,650 sq. miles of water). The greater part of the country is occupied by the Central African plateau from which rise, among others, Mt. Killimanjaro, the highest point on the continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Serengeti National Park, which covers an area of 6,000 sq. miles in the Arusha, Mwanza and Mara Regions, is famous for its variety and number of species of game.

The African population consists mostly of tribes of mixed Bantu race. The total population of Tanzania at the Census held in August, 1967, was 12,311,991 (estimated, July, 1968, 12,508,000); Africans form a very large majority, while the Europeans, the Asians, and other non-Africans form a small minority. Annual average population growth is 2.7 per cent. The total population of Zanzibar at the 1967 census was 354,915 (estimated, 1968, 361,000). Swahili is the national and official language. English is the second official language, both for educational and government purposes.

# Trinidad and Tobago

## AREA AND POPULATION

*Trinidad*, the most southerly of the West Indian Islands, lies close in the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between  $10^{\circ} 2' - 10^{\circ} 51' N.$  lat. and  $60^{\circ} 56' - 61^{\circ} 56' W.$  long., and is about 50 miles in length by 37 in breadth, with an area of 1,864 square miles, and a population (Census of 1960) of 827,957 (including Tobago). The racial groups at the 1960 census were: African 43 per cent., East Indian 36 per cent., Mixed or Coloured 16 per cent., European 3 per cent., Chinese 1 per cent. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range, lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., El Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from  $70^{\circ}$  to  $90^{\circ} F.$  and a rainfall ranging from 100 inches in the north-east to 50 inches in the west. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Tobago lies between  $11^{\circ} 8' - 11^{\circ} 21' N.$  lat. and between  $60^{\circ} 30' - 60^{\circ} 50' W.$  long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W. of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888. The island is 26 miles long, and  $7\frac{1}{2}$  broad, and has an area of 116 sq. miles, with a population (Census of 1960) of 33,333. It is one of the healthiest of the West Indies and a popular tourist resort. The main town is  $\Psi$  Scarborough.

*Other Islands.*—Corozal Point and Icacos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important.

*CAPITAL.*— $\Psi$  Port of Spain (population 93,954), one of the finest towns in the West Indies, with sewerage, electric lighting, omnibus and telephone services. Other towns of importance are  $\Psi$  San Fernando (population, 39,830), about 33 miles south of the capital, and Arima (population, 10,982).

*NATIONAL DAY.*—August 31 (Independence Day).

## GOVERNMENT

The Territory of Trinidad and Tobago became an independent state and a member of the British Commonwealth on August 31, 1962, under the Trinidad and Tobago Independence Act, 1962. There is a Parliament consisting of a Senate and a House of Representatives with an elected Speaker and 35 members. The Senate has 24 members of whom 13 are appointed on the advice of the Prime Minister, 4 on the advice of the Leader of the Opposition and 7 on the advice of the Prime Minister after consultation with religious, economic and social organizations.

*Governor-General*, His Excellency Sir Solomon Hochoy, G.C.M.G., G.C.V.O., O.B.E. (1962).

## CABINET

*Prime Minister and Minister of Finance, Planning and Development*, Rt. Hon. Eric Williams, C.H.

*External Affairs*, Hon. A. N. R. Robinson.

*Education and Culture*, Senator Hon. D. Pierre.

*Housing*, Hon. Mrs. I. Teshea.

*West Indian Affairs*, Hon. K. Mohammed.

*Industry, Commerce and Petroleum*, Hon. J. H. O'Halloran.

*Local Government and Social Welfare*, Hon. A. Thompson.

*Labour*, Hon. A. C. Alexis.

*Works*, Hon. V. L. Campbell.

*Attorney-General and Minister for Legal Affairs*, Senator Hon. G. A. Richards.

*Home Affairs and Personnel*, Hon. A. G. Montano.

*Agriculture, Lands and Fisheries*, Hon. L. M. Robinson.

*Health*, Dr. Hon. M. P. Awon.

*Minister and Special Adviser to the Prime Minister*, Senator Hon. W. J. Alexander.

*Ministers of State*, Hon. R. E. Wallace; Hon. B. B. Pitt; Hon. F. Prevatt.

*President of the Senate*, Hon. J. H. Maurice.

*Speaker of the House of Representatives*, Hon. C. A. Thomasos.

*Chief Justice*, Hon. Sir Arthur Hugh McShine.

## TRINIDAD AND TOBAGO HIGH COMMISSION

51 South Audley Street, W.1

*High Commissioner*, His Excellency Donald C. Granado.

## BRITISH HIGH COMMISSION

Port of Spain

*High Commissioner*, His Excellency Sir Peter Hampshire, K.C.M.G. (1966)..... £5,625

*Counsellor (Commercial)*, C. A. Thompson.

*1st Secretary (Head of Chancery)*, J. H. Fawcett.

*Education.*—The system of education has been reformed to co-ordinate more closely the interlocking levels—primary, post-primary/secondary and higher. The system provides for education of the pupils from 5 to 12 in primary schools and from 12 plus to 18 in Government and assisted secondary schools—grammar, modern and 2 technical schools. The Government Polytechnic Institute was established in 1959.

*Communications.*—There are some 2,500 miles of main and secondary roads. The only general cargo port is Port of Spain but there are specialized port facilities elsewhere for landing crude oil, loading refinery products and sugar and for landing, storing and trans-shipping bauxite. Regular shipping services call at Port of Spain, which is also a port for the many small inter-island craft. International scheduled airlines, including the national airline, B.W.I.A., use Piarco International Airport outside Port of Spain. At present air communication with Crown Point Airport in Tobago is only by B.W.I.A. from Piarco Airport.

There are two commercial broadcasting stations, one re-diffusion station and one commercial television station. There is an internal telephone system and good external telephone and telegraph connections.

*Production.*—Oil is extracted from land and sea wells for refining locally and large quantities of crude oil are also imported. The most important agricultural crop is sugar, but there is a growing diversification into other crops for local use and export. There is considerable industrialization,

which already includes the manufacture of cement, chemicals, tyres, clothing, soap, furniture and food-stuffs.

Total exports in 1968 amounted to TT\$932 million of which more than three-quarters was on account of exports of crude oil and petroleum products. The other principal exports were sugar and sugar preparations, ammonium compounds, tar oils, coffee and cocoa beans and fertilizer. Total imports in 1968 were TT\$840 million of which over half was accounted for by imports of crude oil.

The following statistics are from official Trinidad

and Tobago publications: figures in TT\$ millions (TT\$4.80 = £1).

## Uganda

Situated in Eastern Africa, Uganda is flanked by the Congolese Republic, the Sudan, Kenya and on the south by Tanganyika and Rwanda. Large parts of Lakes Victoria, Edward and Albert are within its boundaries, as are Lakes Kyoga and Salsbury and the course of the River Nile from its outlet from Lake Victoria to the Sudan frontier post at Nimule. Despite its tropical location, Uganda's climate is tempered by its situation some 3,000 ft. above sea level, and well over that altitude in the highlands of the Western and Eastern Regions. Temperatures seldom rise above 85° F. (29° C.) or fall below 60° F. (15° C.). The rainfall averages about 50 inches a year, which means that the country is covered in a lush green cloak for most of the year. Uganda has excellent tourist facilities, including three National Parks with a wide variety of wildlife and flora, good hotels, air and land communications to service these Parks, and a wide range of scenery. The revenue from tourism in 1968 was about £1,589,000 from 64,000 visitors.

*Area and Population.*—Uganda has an area of 91,000 square miles (water and swamp 16,400 square miles) and a population (estimated, 1967) of 7,934,000. The total includes some 9,000 Europeans and 93,000 Asians. The official language of Uganda is English. The main local vernaculars are of Bantu, Luo and Hamitic origins. Ki-Swahili is generally understood in trading centres. CAPITAL.—Kampala (population of Greater Kampala, 200,000). FLAG.—Six horizontal stripes of black, yellow and red (repeated) with a crested emblem on a white orb in the centre. NATIONAL DAY.—October 9 (Independence Day).

*Government.*—Uganda became an independent state and a member of the Commonwealth on October 9, 1962, after some 70 years of British rule. Parliament consists of the President and the National Assembly, composed of the Speaker, 82 elected members and 9 specially elected members. Uganda became a Republic on September 8, 1967. Under the 1967 Constitution, the executive authority of Uganda is vested in the President, who is assisted by a Cabinet of Ministers. Unlike the Presidential system in the United States and other countries, in Uganda the President is a Member of the National Assembly, and takes an active part in the Assembly's deliberations.

*President, Dr. A. Milton Obote. Vice-President, Hon. J. K. Babiha.*

### CABINET

*Minister of Agriculture and Forestry, J. B. T. Kakonge*  
*Animal Husbandry and Fisheries, J. K. Babiha.*  
*Commerce and Industry, W. W. Kalema.*

There are also 9 Deputy Ministers not in the Cabinet.

### UGANDA HIGH COMMISSION

Uganda House, Trafalgar Square, W.C.2  
 High Commissioner, His Excellency Paul O. Etiang  
 (1969).

### BRITISH HIGH COMMISSION

10-12 Obote Avenue (P.O. Box 7070),  
 Kampala

*High Commissioner, His Excellency David Aubrey*  
*Scott, C.M.G. (1967)..... £6,300*  
*Deputy High Commissioner, C. L. Booth.*  
*Defence Adviser, Lt.-Col. H. N. Crawford.*

*British Council Representative, A. G. Hamer, M.B.E.*  
 P.O. Box 7014, National Cultural Centre, Kampala. Regional centres at Fort Portal and Mbale.

*Education.*—Education is a joint undertaking by the Government, Local Authorities and, to some extent, Voluntary Agencies. The education system is divided into three distinct sectors—Primary, Secondary and Post-Secondary. The Primary course covers the first seven years of schooling. There were 434,995 pupils in grant-aided Primary Schools in 1962, which rose to 641,639 pupils in 1967. Education at secondary level falls into four categories—Secondary schools, which are of the Grammar type of school with a course extending over six years to Higher School Certificate; Technical Schools; Farm Schools; and Primary Teacher Training Colleges. Further education is provided at the Uganda Technical College, the National Teachers' College, the Uganda College of Commerce; and Agricultural Colleges. There is also in addition to these, several departmental training schools training staff for different departments. The Medical Department alone has eight such

schools training nurses, midwives, medical assistants, health inspectors, and other medical staff.

University level education is available at Makerere University College and the two other constituent colleges of the University of East Africa; the University College, Nairobi, in Kenya, and the University College, Dar es Salaam, in Tanzania. Uganda students also go to universities and colleges outside East Africa for higher education.

**Communications.**—There is a first-class international airport at Entebbe, with direct flights to many places in Africa, America, Asia and Europe. There are 10 other state airports in Uganda. There are 3,702 miles of all-weather and 11,230 miles of other roads. Nearly 45 per cent. of the trunk roads are metalled, the remainder and all feeder roads are gravel roads of good standard. A railway network joins the capital to the western, eastern and northern centres. Lake, marine, road and rail services are operated by the E. African Railways and Harbours Administration.

**Finance.**—Currency is the Uganda shilling (Ug. sh. 17:143 = £1 sterling). Total revenue in 1968-69

was Ug. sh. 1,010,400,000 and expenditure Ug. sh. 960,200,000. Development account revenue 1968-69 totalled Ug. sh. 196,147,000; expenditure Ug. sh. 320,000,000.

**Trade, etc.**—The value of the principal foreign export commodities in 1968 were: coffee, £35,714,000; cotton, £14,783,632; copper, £5,574,501; and tea, £3,712,916. Other crops grown include tobacco, sugar and groundnuts. Hydroelectric power is produced from the Owen Falls power station which has a capacity of 150,000 kWh. Plans are under way for the building of a second hydroelectric power station to produce 180,000 kWh.

	1967	1968
Imports.....	£41,327,740	£43,812,356
Exports.....	64,636,123	65,470,941

#### TRADE WITH U.K.

	1967	1968
Imports from U.K. .	£8,069,000	£8,315,000
Exports to U.K. ....	13,744,000	15,193,000

## Zambia

The Republic of Zambia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E and between the latitudes 8° 15' S. and 18° S. It has an area of 290,586 square miles within boundaries 3,515 miles in length and a population (estimated, 1968) of 4,100,000, including about 80,000 non-Africans.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers, and the Luano valley, the greater part of Zambia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 6,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring in chains which develop into areas of broken country.

Although Zambia lies within the tropics, and fairly centrally in the great land mass of the African continent its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

**Government.**—At the dissolution of the Federation of Rhodesia and Nyasaland, on December 31, 1963, Northern Rhodesia (as Zambia was then known) achieved internal self-government under a new constitution which contained provisions for the protection of fundamental rights, a Constitutional Council, the office of a Governor, a Legislature, a House of Chiefs, the Cabinet, the Judiciary, the Public Service and finance. Zambia became an independent republic within the Commonwealth on October 24, 1964—75 years after coming under British rule and nine months after achieving internal self-government. The country has a democratic constitution with a President as Head of State and Commander-in-Chief of the armed forces. He must be a citizen of Zambia and be at least 30 years old.

**Parliament.**—Parliament consists of the President and a National Assembly of 105 members elected for 5 years on a basis of universal suffrage by all citizens of 18 years of age and over. The President has the power to nominate up to five additional special members in order to enhance the representative character of the Assembly, or to obtain services of particular value. President Kaunda, under this section of the constitution, has nominated five members, two of whom have been made members of the Cabinet. The President is not a member of the National Assembly but may address it at any time. Since the General Election of December, 1968, there have been no reserved-roll (non-African) seats. The National Assembly is presided over by a Speaker, elected by the Members of the Assembly. The United National Independence Party has 81 of the 105 elected seats. There is also a House of Chiefs, representing 230 chiefs throughout Zambia, with advisory functions.

**CAPITAL.**—Lusaka, situated in the Central Province (estimated population, Dec. 1966, 151,400). Other centres are Livingstone, Kabwe (formerly Broken Hill), Chipata (formerly Fort Jameson), Mazabuka, Mbala (formerly Abercorn), Kasama, Solwezi, Mongu, Mansa, Ndola, Luanshya, Mufulira, Chingola, Chililabombwe (formerly Bancroft), Kailushu and Kitwe, the last six towns being the main centres on the Copperbelt).

President, Dr. Kenneth David Kaunda, assumed office October 24, 1964.

#### CABINET

The President (also Minister of Trade, Industry and Mines).

Vice-President and Minister of Development, Finance and Technical Education, Hon. S. M. Kapwepwe.

Minister of Foreign Affairs, Hon. E. H. Mudenda.

Home Affairs, Hon. A. G. Zulu.

Without Portfolio, Hon. M. M. Chona.

National Guidance, Hon. J. M. Chimba.

Co-operatives, Youth and Social Development, Hon.

H. D. Banda.

Agriculture, Hon. M. Sipalo.

Education, Hon. W. Nyirenda.

Local Government and Prisons, Hon. S. Wina.

Power, Transport and Works, Hon. P. Matoka.

Attorney-General, F. Chuula.

Rural Development, Hon. R. C. Kamanga.

Information, Broadcasting and Tourism, Hon. S. Wina.

Labour and Social Services, L. Changufu.

Besides Cabinet Ministers, the President appoints Ministers of State whose portfolios are Provincial Administration. Through them and their Resident Secretaries, Government policy is explained down to the village. They are stationed at the headquarters of each of the eight provinces:

## Ministers of State

Southern, Hon. A. K. Shapi.

Central, The President.

Western, H. D. Banda.

Eastern, Hon. S. Kalulu.

Barotse, Hon. H. Mulemba.

North-western, F. Chitambala.

Northern, Hon. A. J. Soko.

Luapula, Hon. F. Mulikita.

## ZAMBIA HIGH COMMISSION

7-11 Cavendish Place, W.1

High Commissioner, His Excellency Hosea Soko (1969).

## BRITISH HIGH COMMISSION

Waddington Road (P.O. Box R.W.50),

Lusaka

High Commissioner, His Excellency John Laurence

Pumphrey, C.M.G. (1967).....£5,625

Counsellor, C. E. Diggins (Commercial).

Defence Adviser, Col. A. R. Kettles.

1st Secretaries, W. R. McQuillan; A. C. M. De Vere; P. G. P. D. Fullerton (Economic and Commercial); T. E. F. Pooley; D. A. Dott, O.B.E. (Development).

British Council Representative, J. Lawrence. Regional centre at Ndola.

## JUDICATURE

There is a Chief Justice appointed by the President, all other judges being appointed on the recommendation of the Judicial Service Commission consisting of the Chief Justice, the chairman of the Public Service Commission, a senior Justice of Appeal and one Presidential nominee.

Chief Justice of Zambia, Hon. Brian Doyle.

Justice of Appeal (vacant).

Puisne Judges, T. Pickett; S. W. Magnus; M. Evans;

F. J. Whelan; J. J. Hughes.

**Education.**—In 1968 there were 608,893 pupils in primary schools and 42,388 in secondary schools. In 1969 the estimated Government expenditure on education, including both recurrent and capital fund expenditure, was K44,200,000.

**Production and Employment.**—The total value of marketed farm produce in 1965-66 was K31,000,000. Principal products were tobacco, maize, groundnuts, cotton, livestock and vegetables.

Mineral production was valued at K532,790,996 in 1968. The production of copper totalled 654,975 short tons. Ore reserves in the Copper-belt exceed 770,000,000 tons. On August 24, 1968, the first diesel fuel arrived by the new pipeline running 1,058 miles through Tanzania and Zambia to Ndola, the terminal.

In June, 1968, 354,730 persons were estimated to be in full employment. Included in this figure are: mining and quarrying, 55,090; agriculture, forestry and fishing, 37,100; construction, 70,120; commerce, 30,930; manufacturing, 35,270.

**Finance and Currency.**—Zambia adopted decimal currency on Jan. 16, 1968, the unit being the Kwacha, equivalent to 10s. of the former currency. Since devaluation of sterling the Kwacha = 11s. 8d. sterling.

	1968*	1969†
Revenue.....	K305,017,000	K288,693,000

## ASCENSION

(See ST. HELENA)

## COMMONWEALTH OF THE BAHAMAS

The Bahama Islands are an archipelago lying in the Atlantic Ocean between 20° 55'–27° 22' N. Lat; 72° 40'–79° 20' W. Long. They extend from the coast of Florida on the north-west almost to Haiti on the south-east. The group consists of 700 islands, of which 30 are inhabited, and 2,400 cays comprising an area of more than 5,380 square miles. The population, at the 1963 census, was 130,220 (estimated, Dec., 1968, 170,000). The principal islands include: Abaco, Acklins, Andros, Berry Islands, Bimini, Cat Cay, Cat Island, Crooked Island, Eleuthera, Exumas, Grand Bahama, Harbour Island, Inagua, Long Cay, Long Island, Mayaguana, New Providence (on which is located the capital, Nassau), Ragged Island, Rum Cay, San Salvador and Spanish Wells. San Salvador was the first landfall in the New World of Christopher Columbus on October 12, 1492.

The Bahamas were settled by British subjects when the islands were deserted. The ownership of the Bahamas was taken over in 1782 by the Spanish, but the Treaty of Versailles in 1783 restored them to the British.

Tourism is the economic mainstay of the Bahamas, whose salubrious climate and fine beaches attracted 1,072,213 visitors in 1968.

## GOVERNMENT

Internal self-government, with Cabinet responsibility, was introduced in Jan. 1964, and a constitutional conference held in London in Sep-

tember, 1968, approved changes giving the Bahamas a further measure of self-government. There are a Senate of 16 members and an elected House of Assembly of 38 members. The Governor retains reserved powers in the sphere of foreign relations, defence and internal security.

**Governor and Commander-in-Chief, His Excellency the Hon. Sir Francis Edward Hovell-Thurlow Cumming-Bruce,** K.C.M.G. (1968).....B\$27,122

Prime Minister, Hon. L. O. Pindling.

Deputy Premier and Minister of Home Affairs, Hon. A. D. Hanna.

Minister of Finance, Hon. C. E. Francis.

Transport, Hon. W. J. Levarity.

Education, Hon. C. V. Wallace-Whitfield.

Tourism and Communications, Hon. A. A. Foulkes.

Labour, Agriculture and Fisheries, Hon. M. B. Butler.

Health and Welfare, Dr. Hon. C. C. McMillan.

Development, Hon. J. M. Thompson.

Works, Hon. C. T. Maynard.

Without Portfolio, Hon. C. A. Bain; Senator Dr. Hon. D. L. Johnson.

Chief Secretary, W. H. Sweeting, C.M.G., C.B.E.

Chief Justice, Hon. Sir Ralph Campbell. B\$15,228

Puisne Judges, Hon. H. C. Smith; Hon.

J. A. Smith, C.B.E., T.D.....13,600

**Industries.**—A plant for the manufacture of cement and an oil refinery have been established in Freeport, Grand Bahama, where there are also a number of light industries. A rum distillery has commenced production in New Providence.

Other industries are those associated with the treatment of local agriculture (including sugar production) and marine produce, salt extraction and hand-work, and timber-felling for plywood.

**Education.**—Education is compulsory for the ages of 5 and 14. There are 317 state-maintained or aided schools with a total roll of 36,387; there are also 76 unaided schools with a total roll of 11,664.

**Civil Aviation.**—Facilities for external traffic are provided by Pan-American World Airways, B.O.A.C., Air Canada, Bahamas Airways Ltd., Eastern Air Lines, North-East Air Line and National and International Air Bahama, while Bahamas Airways, Bahamas Air Traders Island Flying Service and Colony Airlines provide internal schedule and charter flights to the outlying islands. There are 16 return flights between Nassau and Miami, several daily flights between Nassau—Palm Beach—Fort Lauderdale and Tampa, and a regular service between Nassau and Montego Bay, Jamaica, besides regular trunk communication with London, New York, Toronto, Montreal, Bermuda and Kingston.

**Communications.**—There is a General Post Office in Nassau, 3 branch offices in New Providence and 109 sub-offices in the Out Islands. In 1968 more than 26,000,000 letters and prints were handled. Wireless and telephone services are in operation to all parts of the world. There are 87 radio stations among the islands.

#### FINANCE AND TRADE

	1967	1968*
Public revenue. . . . .	B\$57,249,859	B\$66,245,363
Expenditure. . . . .	53,506,000	66,230,345
Public debt. . . . .	33,228,000	27,533,172
Total imports. . . . .	165,988,255	179,987,851
Total exports. . . . .	32,448,619	50,000,000
Imports from U.K. . . . .	£7,735,000	£10,624,000
Exports to U.K. . . . .	990,000	1,841,000

\* Estimated. B\$=8s. 2d.

The imports are chiefly foodstuffs, manufactured articles, building material, lumber and machinery. The chief exports in 1968 were pulpwood, cement, rum, crawfish and salt.

**CAPITAL.**— $\Psi$ Nassau. Estimated population (1968), 110,000. Nassau is distant from Liverpool 4,000 miles.

#### BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (about 20 only of which are inhabited) situated in the west of the Atlantic Ocean, in 32° 18' N. lat. and 64° 46' W. long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The total area is now approximately 20.59 sq. miles which includes 2.3 sq. miles leased to, and reclaimed by, the U.S. authorities between 1941 and 1957 under the terms of the 99 year lease. The civil population was estimated at 51,000 in 1968. The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1515, but no settlement was made until 1609 when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

Vegetation is prolific, the principal being the Bermuda cedar (juniper), formerly of great importance for shipbuilding, but since 1943 almost entirely destroyed by blight. At one time the islands enjoyed a flourishing export in onions, potatoes, and green vegetables, but the imposition of tariffs in U.S.A. and the growing shortage of arable land made further growing for export unprofitable. The lily bud trade with Canada and U.S.A. and locally manufactured concentrates and pharmaceuticals are now the Colony's leading exports. Little food is produced except vegetables and fish, other foodstuffs being imported.

The Colony's economic structure is based on its importance as a tourist resort and as an air and naval base and from these sources most of its revenue is derived. It is now within two hours' air travel from New York, and in 1967 a total of 281,167 visitors arrived in Bermuda. The airport is used by B.O.A.C., Pan-American Airways, Air-Canada, Eastern, North-east and Qantas air lines and most cruise ships dock at Hamilton.

Education is estimated to cost £2,606,127 in 1969. Free elementary education was introduced in May, 1949. Free secondary education was introduced in 1965 for those children in the aided and maintained schools who were below the upper limit of the statutory school age (16 from 1969 onwards). Estimated cost of health and welfare services in 1969 is £991,221.

There are 4 radio and 2 television stations, one daily and 3 weekly newspapers and overseas telephone and telegraph services are maintained.

#### GOVERNMENT

Internal self-government was introduced on June 8, 1968. There is a Legislative Council of 11 Members and an elected House of Assembly of 40 Members. The Governor retains responsibility for external affairs, defence, internal security and the police.

Voters must be British subjects of twenty-one years of age or older at the time of registration, and if they do not possess Bermudian status, they must have been ordinarily resident in Bermuda for the whole of the period of three years immediately before registration. Registration is held every year during the months of February and March. Candidates for election must qualify as electors and must possess Bermudian status.

**Governor and Commander-in-Chief, His Excellency The Lord Martonmere, P.C., K.C.M.G. (1964) (excluding allowances) . . . £11,880**

#### Executive Council

#### FINANCE

Budget estimates for the year 1969 were: revenue, £11,512,991; expenditure, £13,660,313.

	1967	1968
Public revenue. . . . .	£8,071,866	£10,691,565
Public expenditure. . . . .	8,647,615	9,944,788
Public debt. . . . .	387,000	305,000

## TRADE

	1967	1968
Imports.....	£24,697,462	£30,449,458
Exports.....	21,701,622	27,521,415
Imports from U.K....	5,696,000	7,216,000
Exports to U.K.....	6,989,000	9,810,000

As usual, the adverse balance of trade was offset by substantial compensating revenue from invisible exports such as the tourist trade.

CAPITAL, Ψ Hamilton, (Population (1966), 3,000). 2,970 nautical miles (3,420 statute miles); transit, 10 days.

## BRITISH HONDURAS

British Honduras, in Central America, lies within 18° 29' 50" to 15° 53' N. latitude and 89° 13' 28" to 87° 21' 30" W. longitude. Its extreme length and breadth are approximately 186 m. and 118 m. respectively; it is bounded on the north and north-west by Mexico, on the west and south by Guatemala; and on the east by the Caribbean Sea. The total area (including offshore islands) is about 8,867 sq. miles, with an estimated population (1966) of 114,255 (58,060 males and 56,195 females). The climate generally is damp and warm, but not unhealthy. The temperature ranges from 47° to 94° F. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes.

The greater part of the country is covered by forest, of which 59 per cent. is high rain forest, 15.5 pine forest and dry savannah, 5.5 wet savannah and mangrove forest, the remaining 20 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasturage for cattle. The north of the territory and the southern coastal plain (8 to 20 miles wide) is nearly flat, and near the sea is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 10 per cent. of the area of the territory is over 1,000 feet in elevation above mean sea-level.

The staple products are obtained from the forests, and include mahogany, cedar, and *dielz* (the basis of chewing-gum). Agricultural crops which grow readily include sugar cane, coconuts, citrus fruit, plantains, pineapples, mangoes, maize, cucumbers, rice, varieties of beans and peas. Bananas also grow well in certain localities. All varieties of citrus fruits flourish, and in particular grape-fruit, of which a very high grade is exported. Lobster tails and shrimps are also exported.

In 1967 there were 165 Government and grant-aided primary schools and 8 unaided private elementary schools in the country, the total enrolment being 30,000. There are also 16 secondary schools with a total enrolment of 2,400.

There are 37 post offices in the country. A new transmitting and receiving station at Ladyville has been completed. External telegraph and radio telephone services are operated by Cable and Wireless Ltd. Air services are scheduled twice weekly to and from the capitals of Panama, Honduras, Mexico, Salvador, Guatemala, Nicaragua, Costa Rica and Jamaica. There is a three times weekly service from and to New Orleans, a four times weekly service from and to Miami and a weekly service to Mexico City. A local scheduled air service links the six districts into which the country is divided.

CAPITAL, Ψ Belize City. Population (1960 Census) 32,867 (Belize District, estimated, Dec. 31, 1967, 42,000); Belize was badly damaged by a hurricane in October, 1961, and it was announced in 1965 that a new capital would be built, 50 miles inland; \$20,000,000 in grants and aid from U.K. will

be used. The project began in mid-1967. Other towns are Ψ Corozal (12,319), Cayo (16,484), Ψ Stann Creek (13,435), Orange Walk (13,266), Toledo (9,804).

## FINANCE AND TRADE

	1966	1967*
Revenue.....	\$11,967,899	\$18,700,653
Expenditure.....	14,595,481	18,628,942

\* Estimated

Public debt (Dec. 31, 1966), \$6,461,489.

## Trade with U.K.

	1967	1968
Imports from U.K. £	2,661,000	£2,797,000
Exports to U.K. . .	2,302,000	2,175,000

## GOVERNMENT

Under the Constitution introduced on Jan. 1, 1964, the Governor retains special responsibility for defence, external affairs, internal security and the safeguarding of the terms and conditions of service of public officers. For so long as the Government continues to receive grant-in-aid from the U.K. Government, the Governor also has special responsibility for maintaining or securing financial and economic stability and for ensuring that any condition attached to any financial grant or loan made by the U.K. Government is fulfilled. The Governor appoints as Premier the person who appears to him to be likely to command the support of a majority in the House of Representatives. Ministers are appointed by the Governor on the advice of the Premier.

The National Assembly comprises a House of Representatives and a Senate. The House of Representatives consists of 18 members elected by universal adult suffrage. The Speaker may be elected by the House from among its own members, or from outside; the Deputy Speaker is elected by the House from among its own members. The Senate consists of 8 members appointed by the Governor (5 on the advice of the Premier, 3 on the advice of the leader of the Opposition and 1 after consulting such persons as he considers appropriate).

Governor and Commander-in-Chief, His Excellency Sir John Warburton Paul, G.C.M.G., O.B.E., M.C. (1966).....	\$18,000
Chief Justice, Sir Clifford Inniss.....	10,400
Speaker of the House of Representatives, Hon. W. H. Courtenay, O.B.E.....	3,750
Premier and Minister of Finance and Economic Development, Hon. G. C. Price.....	7,600
Minister of Public Utilities and Communications, Hon. H. D. Silva.....	6,900
Minister of Natural Resources and Trade, Hon. A. A. Hunter.....	6,900
Minister of Labour, Hon. D. L. McKoy... ..	6,900

Minister of Education and Housing, Hon. Mrs. G. M. Lizarraga, M.B.E.....	6,900
Minister of Internal Affairs and Health, Hon. C. L. B. Rogers.....	6,900

Leader of the Opposition, Hon. P. S. W. Goldson.

British Council Representative, W. Snee, P.O. Box 331, 4 Albert Street, Belize City.

Belize is distant from London about 4,700 miles; transit, 17 days by sea, 4 to 4 days by air.

## THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 42, of which 11 are uninhabited, and have a total

area of about 59 square miles. The principal are Tortola, the largest (situate in 18° 27' N. lat. and 64° 40' W. long., area, 21 sq. miles), Virgin Gorda (8½ sq. miles), Anegada (15 sq. miles) and Jost Van Dyke (3½ sq. miles). Owing to continued net immigration the population rose rapidly to an estimated total of 11,050 in 1968 (Tortola (9,230); Virgin Gorda (1,100); Anegada (350); Jost Van Dyke (250); and other islands (120)). Apart from Anegada, which is a flat coral island, the British Virgin Islands are hilly, being an extension of the Puerto Rico and the U.S. Virgin Islands archipelago. The highest point is Sage Mountain on Tortola which rises to a height of 1,780 feet. The islands are very picturesque and form one of the finest sailing areas in the world on account of their sheltered waters. The sea is rich in gamefish and there are said to be over 400 wrecks off Anegada. Tourism is fast becoming the main industry, but there is some cattle raising and fishing. Rum is distilled on a small scale.

The islands lie within the Trade Wind belt and possess a pleasant and healthy sub-tropical climate. The average temperature varies from 71° to 82° F. in Winter and 78°-88° F. in summer. The summer heat is tempered by sea breezes and the temperature usually falls by about 10° at night. Average rainfall is 50 inches. Hurricanes are very rare—the last occurrence being in 1928.

The principal airport is on Beef Island, linked by bridge to Tortola, and an extended runway of 3,600 feet, opened in 1969, will enable larger aircraft to call. There is a second airfield on Virgin Gorda. There are direct shipping services to the United Kingdom and the United States and fast passenger services connect the main islands by hydrofoil.

FINANCE AND TRADE

	1968	1969
Revenue.....	\$U.S. 1,500,243	\$U.S. 2,174,521
Expenditure....	1,587,086	2,526,128
Imports.....	6,598,669	—
Exports.....	144,854	—

The only legal unit of currency is the U.S. dollar.

GOVERNMENT

The British Virgin Islands are internally self-governing, with a ministerial system. The Administrator, appointed by the Crown, remains responsible for defence and internal security, external affairs, the civil service, administration of the courts and finance, and acts in accordance with the advice of the Executive Council. The Executive Council consists of the Administrator as Chairman, two *ex-officio* members (the Attorney-General and the Financial Secretary), the Chief Minister and two other ministers. The Legislative Council consists of a Speaker chosen from outside the Council, two *ex-officio* members (the Attorney-General and Financial Secretary), one nominated member appointed by the Administrator after consultation with the Chief Minister and seven elected members returned from seven one-member electoral districts. The islands are proud of their tradition of stable government.

CAPITAL.—Ψ Road Town (on the south-east of Tortola). Population about 2,200.	

BRUNEI

Sultan, H. H. Hassanal Bolkiaah Mu'izzadin Wad-aulah, C.M.G., acceded 1967, crowned Aug. 1, 1968.

Brunei is a British Protected State on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (estimated, 1967), 83,877, of whom two-thirds are of Malay or other indigenous race and one-third Chinese. The chief town, Brunei, with its rural area, has a population of about 37,000. The country has a humid tropical climate.

On September 29, 1959, the Sultan of Brunei promulgated the first written Constitution, and entered into a new Agreement with H.M. The Queen. The Constitution (since amended) provides for a Privy Council, a Council of Ministers and a Legislative Council. Under the Agreement the British Government continues to be responsible for defence and external affairs, and a High Commissioner is appointed. The post of British Resident was abolished in 1959 and many of his functions were transferred to the Sultan in Council. A *Mentri Besar* (Chief Minister) is appointed by the Sultan, and is responsible to him for the exercise of executive authority. The Sultan presides over the Privy Council, and the Council of Ministers, and the Speaker over the Legislative Council.

H.M. HIGH COMMISSION

Jalan Residency, Brunei.

High Commissioner, His Excellency Arthur Robin Adair, C.V.O., M.B.E. (1967).  
1st Secretary, E. W. Bird.

FINANCE

	1967†	1968*
Revenue.....	B\$136,697,230	B\$157,973,720
Expenditure.....	155,461,000	223,017,521
* Estimate. † Revised estimate.		

Currency.—On June 12, 1967, Brunei started to issue its own currency, the *Brunei dollar* of 100 cents, which it was agreed would be fully interchangeable with the currencies of Malaysia and Singapore.

Imports from the U.K. in 1968 totalled £2,056,000 (1967, £2,083,000).

FALKLAND ISLANDS

These, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'-53° S. lat. and 57° 40'-62° W. long. They consist of East Falkland (area 2,610 sq. miles), West Falkland (2,090 sq. miles) and upwards of 100 small islands in the aggregate, the estimated population at Dec. 31, 1968, being 2,105. Mount Osborne, the loftiest peak, rises 2,312 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to a part at least of the group in 1771. The settlement was destroyed by the Americans in 1821. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. The climate is cool. At Stanley the

mean monthly temperature varies between 49°F. in January and 35.5°F in July. The air temperature has never been known to exceed 77°F. or to fall below 12°F.; it is notably windy. The islands are chiefly moorland. The population is almost totally British, and is principally engaged in sheep-farming to which practically all the land in the colony is devoted, 620,932 sheep being carried in 1968. Wool, hides and sheepskins are exported. The only town is Ψ Stanley on the coast of East Falkland.

#### GOVERNMENT

The Governor is assisted by a Legislative Council of 8 members, with the Governor as Chairman, 2 *ex officio* (Colonial Secretary and Colonial Treasurer), 3 non-official members (nominated by the Governor) and 4 representatives elected by the people.

*Governor and Commander-in-Chief, His Excellency Sir Cosmo Dugal Patrick Thomas Haskard, K.C.M.G., M.B.E. (1964)*  
(+ duty *allice*. £680) £3,000  
*Colonial Secretary, J. A. Jones, O.B.E.*  
(+ duty *allice*. £100) 2,430  
*Colonial Treasurer, L. C. Gleadell, O.B.E.* 2,080

#### FINANCE AND TRADE

Public revenue.....	£376,733	£339,958
Expenditure.....	409,640	468,502
	1966	1967
Total imports.....	£697,168	£711,335
Total exports.....	1,037,890	824,187
Trade with U.K., see below		

**CHIEF TOWN, Ψ Stanley.** Estimated population 1,052. Stanley is distant from England about 8,103 miles; transit by steamer *via* Montevideo. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Islands can be accomplished in 5 to 7 days travelling to Montevideo by air and thence by local steamer to the Falklands.

**DEPENDENCIES.**—*South Georgia*, an island 800 miles east-south-east of the Falkland group, with an area of 1,450 square miles. An Administrative Officer and other officials reside there. The *South Sandwich Islands* group, which is uninhabited and lies some 470 miles S.E. of *South Georgia*, is the only other dependency.

#### Falkland Islands and Dependencies Trade with U.K.

	1967	1968
Imports from U.K.....	£480,000	£451,000
Exports to U.K.....	991,000	877,000

#### FIJI

This is a group of 322 islands (of which only 106 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long, is 7,083 square miles. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanua Levu, Taveuni and Kandavu. The climate is oceanic. Shade temperatures seldom rise above 93°F. or fall below 60° except in the mountains. On the windward sides of the larger islands rainfall is copious and vegetation luxuriant; on the leeward (or dry) sides the vegetation is sparse and scattered. The chief products are sugar cane, coconuts, gold, rice, bananas, pineapples, yams, and dalo or taro (colocasia).

The population (census 1966) was 476,727 (240,960 Indians, 202,176 Fijians, 9,687 part Europeans, 6,590 Europeans, 12,165 other Pacific races, and 5,149 Chinese).

	FINANCE	
	1967	1968
Public Income.....	\$28,366,814	\$33,325,000
Public Expenditure..	29,065,388	30,731,000
Public Debt (Dec. 31)	28,280,818	32,179,000

#### TRADE

	1967	1968
Total Imports.....	\$56,296,778	\$68,402,000
Total Exports.....	42,661,110	49,118,000
Imports from U.K....	£3,506,000	£6,138,000
Exports to U.K.....	9,039,000	9,218,000

*Currency.*—Currency is the *Fiji dollar*. Exchange rate: \$209 = £100 sterling.

The principal exports are sugar, coconut oil, gold, oil seed cake and meal, lumber, bananas, molasses, manganese ore, copper ore, biscuits, fish and unmanufactured tobacco. The chief imports are machinery, electrical goods, foodstuffs, all types of fabrics, petroleum products, motor vehicles and manufactured household articles. The tourist trade continues to expand.

#### GOVERNMENT

Under the *Fiji (Constitution) Order, 1966*, there is a Governor and Commander-in-Chief appointed by the Queen, an executive Council of Ministers appointed by the Governor and a Legislative Assembly of not more than 4 official and 36 elected members. Of the latter 9 Fijians, 9 Indians and 7 General members are elected on three communal rolls (General members are Chinese, European and other races, except Indians). In addition, 2 *Fiji* members are elected by the Great Council of Chiefs. A further 9 members are elected under a system of cross voting, under which seats are reserved in equal proportions for members of the three main groups; these members are elected by all racial groups voting together. There are a Speaker and Deputy Speaker.

The Council of Ministers listed below includes four official Ministers, the Chief Secretary, Attorney-General, Minister of Finance, Minister for *Fiji* Affairs and Local Government and the Assistant Minister for Social Services.

*Governor and Commander-in-Chief, His Excellency Sir Robert Sidney Foster. K.C.M.G. (1968).*

#### COUNCIL OF MINISTERS

*Chief Minister, Hon. Ratu Sir Kamisese Mara, K.B.E.*  
*Chief Secretary, Hon. G. P. Lloyd, C.M.G.*  
*Attorney-General, Hon. J. Lewis, C.B.E., Q.C.*  
*Minister of Finance, Hon. H. P. Ritchie, C.M.G.*  
*Fiji Affairs and Local Government, Hon. Ratu P. K. Ganilau, C.M.G., D.S.O., O.B.E.*  
*Labour, Hon. Ratu E. T. T. Cakobau, C.B.E., M.C., E.D.*  
*Commerce, Industry and Co-operatives, Hon. Vijay R. Singh.*  
*Social Services, Hon. J. Mavo.*  
*Communications, Works and Tourism, Hon. C. A. Stinson, O.B.E.*  
*Natural Resources, Hon. D. W. Brown, M.B.E.*  
*Asst. Minister, Social Services, Hon. K. S. Reddy.*  
*Secretary to the Council, R. T. Sanders.*

*Speaker of the Legislative Assembly, R. G. Q. Kermod.*

A Deputy Speaker must be elected from among the members of the Legislative Council.

## JUDICIARY

Chief Justice of Fiji, Sir Clifford Hammett.. \$7,620  
 Puisne Judges, R. Knox-Mawer; M. Tikar-  
 (acting).....each 6,618

CAPITAL.—Ψ Suva, in the island of Viti Levu.  
 Population (1966 Census), 54,157.

Fiji is approximately 11,000 miles from the United Kingdom; transit time from London via Panama Canal about 28-30 days. Air connections are provided between the United Kingdom and Fiji via Canada, United States of America, Mexico and the Middle East through Australia, New Zealand, Singapore, Noumea and Port Moresby in New Guinea. The following trunk route operators provide services through Nadi Airport: Qantas, Pan American, British Overseas Airways, Air New Zealand, U.T.A., Air India and Canadian Pacific Airlines. Flights connecting with Fiji operate to Auckland, Sydney-Perth and Darwin and points beyond; Honolulu, San Francisco or Los Angeles or Vancouver and points beyond; Tahiti and points beyond; Pago Pago; Noumea and points beyond. Fiji is one of the main aerial cross-roads in the Pacific.

Fiji Airways Ltd. are based at Nausori Airport near Suva and operate HE.748, DC.3 and Heron aircraft. Fiji Airways operate scheduled domestic services within the Fiji islands and from Suva provide connection to Nadi, Labasa, Savusavu and Matel. On Regional services Fiji Airways scheduled flights operate to Tonga, Western Samoa, New Guinea (Port Moresby) via the New Hebrides (Vila and Santo); the Solomon Islands (Honiara) and the Republic of Nauru via Funafuti and Tarawa in the Gilbert and Ellice Islands and the newly independent island of Nauru. Air Pacific Ltd. operates Charter flights within the Fiji group of islands and provides services to the island of Ovalau and to Ba and Korolevu on Viti Levu.

## GIBRALTAR,

■ rocky promontory, 3½ miles in length, ¾ of ■ mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. The population at the ■■■■■ of Oct. 1961 was 24,502 (estimated, 1967), 25,281.

Ψ Gibraltar is a naval base of vital strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 11 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit, perfumery, coffee, fuel oil, motor vehicles, radios, cameras and cinematograph projectors, mechanical lighters, razor blades, watches and clocks. Import duties are low and Gibraltar is a popular shopping centre. The gradual change from ■ fortress city to an attractive holiday centre has led to ■ flourishing tourist trade.

The Department of Education runs 9 secondary schools and 12 primary schools. There are also 3 private infant schools. Teacher training and University Scholarships are provided, 4,431 pupils are

at present in Government schools, and the Government expenditure on education in 1968 was £265,432.

## FINANCE AND TRADE

	1967	1968
Revenue.....	£3,087,591	£2,908,703
Expenditure.....	2,973,019	2,822,881
Imports from U.K....	3,744,000	4,517,000
Exports to U.K.....	605,000	663,000

## GOVERNMENT

The Constitution promulgated in 1964 changed the name of the former Executive Council to Gibraltar Council and increased the number of elected members on the Council to 5. Changes were also made in the composition of the Legislative Council, which now consists of an independent Speaker, 11 elected members and the Attorney-General and Financial Secretary. [Changes agreed in 1969 substitute a House of Assembly for the Legislative Council and increase the number of elected members to 15].

Governor and Commander-in-Chief, His Excellency Admiral of the Fleet Sir Varyl Begg, G.C.B., D.S.O., D.S.C. (1968) (including £750 entertainment allowance and £500 from Army funds)..... £6,800  
 Flag Officer, Gibraltar, and Admiral Supt., H.M. Dockyard, Gibraltar, Rear Admiral A. R. B. Studee, D.S.C.

Chief Minister, Maj. R. Peliza (1969).  
 Chief Justice, Sir Edgar Unsworth, C.M.G. £3,120  
 Speaker, W. Thomson, O.B.E.

Permanent Secretary, T. Oates, C.M.G., O.B.E. 3,120  
 Financial Secretary, E. H. Davis, C.M.G.,

O.B.E..... 2,640  
 Attorney-General, C. B. O'Beirne, C.B.E.... 2,640

Distance, 1,209 miles; transit, 3½ days. B.E.A. and B.U.A. operate regular direct air services to the U.K. (Some services are via Madrid.) Transit times average 3 hours.

## HONG KONG

The Crown Colony of Hong Kong, consisting of ■ number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52'-114° 30' E. long.

The capital city, Victoria, situated on the island of Hong Kong, is about 81 miles S.E. of Canton and 40 miles E. of the Portuguese colony of Macau at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland; the harbour (23 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equalling that of Victoria. The total area of the Colony is 398½ sq. miles with a population which has varied considerably during recent years owing to unsettled conditions in China. In July, 1967, it was estimated at 3,878,000.

The island of Hong Kong is about 11 miles long and from 2 to 5 miles broad, with a total area of 29 square miles; at the eastern entrance to the harbour it is separated from the mainland by a narrow strait (Lei Yue Min), 500-900 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is

1,805 feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3,140 ft.

**Climate.**—Although Hong Kong lies within the tropics it enjoys unusually varied weather for a tropical area. The mean monthly temperature ranges from 15° C. in February to 28° C. in July. Spring is cloudy and humid, often with spells of fog and drizzle. Summer days are hot with temperatures exceeding 33° C. several times in most years. The average annual rainfall is 2,168.8 mm., of which nearly 80 per cent. falls between May and September. Tropical cyclones passing at various distances from Hong Kong sometimes cause high winds and heavy rain particularly in July, August and September. Autumn and early winter are the most pleasant seasons with sunny, dry and mild weather. In late winter there is more cloud and strong northerly winds can cause temperatures to drop below 10° C. and frost is not uncommon.

**Communications.**—Hong Kong, one of the world's finest natural harbours, possesses excellent wharves at which vessels up to 800 ft. in length and 36 ft. draught can be berthed. An ocean terminal pier with an overall length of 1,250 ft. has been constructed. Excellent dockyard facilities are available and the dry docks are capable of taking all classes of vessels up to 35,000 dead weight tons in the case of bulk oil tankers, or 750 ft. in length and 88 ft. beam in the case of passenger liners and large dry cargo vessels. The net tonnage of ocean-going shipping which entered the port in the year ending March, 1967, amounted to 21,627,092.

Hong Kong Airport, Kai Tak, situated on the north shore of Kowloon Bay, is some 3 miles from the centre of Kowloon, and is regularly used by 23 airlines and many charter airlines, which provide frequent services to Europe, America and neighbouring territories, China excepted. The Colony, with its modern runway of 8,350 ft., is an important link on the main air routes of the Far East. B.O.A.C. operates 14 services per week to London, 9 direct and 5 *via* U.S.A. Full night flying facilities, precision approach radar, and an instrument landing system are available at the airport.

**Education.**—In March, 1969, there were 2,632 schools with 1,138,134 pupils. 51 per cent. of the pupils are financed wholly or in part by the Government. The University of Hong Kong has a full-time residential student strength of 2,159 (including 865 women) in Faculties of Arts, Science, Medicine, and Engineering and Architecture. There is also a Centre of Asian Studies and a Department of Extra-Mural Studies. The Chinese University of Hong Kong, inaugurated in Oct., 1963, has a full-time enrolment of 2,749 students (of whom 771 are women) in Faculties of Art, Science, and Commerce and Social Science. There is also a Department of Extra-Mural Studies.

#### FINANCE

	1967-68	1968-69
Public revenue . . .	\$1,899,527,499	\$2,081,118,425
Public expenditure.	1,766,022,040	1,872,974,955

£ = Hong Kong Dollar = 1s. 4½d.

#### TRADE

Hong Kong is now established as an industrial territory with an economy based on exports rather than the domestic market. Domestic industry, producing mainly light manufactures, has grown rapidly in recent years and now provides the bulk of goods for the export trade; the Colony's traditional role as an *entrepôt*, while still considerable, has become less important, and the value of the re-export trade is less than 21 per cent. of total exports.

Hong Kong produces a wide range of articles,

including cotton piece-goods, cotton yarn, silk and rayon brocades, garments of all types, woollen knitwear, footwear, household enamel and aluminium ware, plastic articles (including household ware, toys and artificial flowers), rattan and hardwood furniture, iron and steel bars, transistor radios, photographic equipment, foodstuffs and beverages, cigarettes, jade, jewellery and ivory, and an extensive range of metal products.

Diversification of manufacture continues to be a major feature of recent industrial developments, and are industrial partnerships with foreign companies in a wide and varied field of manufactures. New products include wigs, automatic telephone dialling equipment, electric household appliances such as rice cookers and toasters, T.V. receiving sets and T.V. tuners, high grade semi-conductors, electronic modules and other electronic components, steel pipes, rigid P.V.C. tubes and corrugated sheeting, P.V.C. covered fabrics, mixed cotton-synthetic fabrics, extruded aluminium sections and watches and clocks. Modern manufacturing processes have also been introduced to local industry; these include the permanent crease process for ready-made garments, soil release processing for garments and the manufacture of polyester fabrics. The marked improvement in both quality and output of items for which precision engineering is required, has continued.

The adverse balance on visible trade is offset by a favourable balance on invisible account—remittances from overseas Chinese, investments, exchange, shipping and insurance profits, and the spending of tourists, etc. In 1968 Hong Kong's principal customers for its domestic products, in order of value of trade, were U.S.A., the United Kingdom, the Federal Republic of Germany, Canada, Australia, Japan, Singapore, Sweden and the Netherlands. Japan became the Colony's principal supplier, followed by China, U.S.A., the United Kingdom, Formosa, the Federal Republic of Germany, Australia and Pakistan.

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude. It includes 13 large and some 70 small islands, including the Banks and Torres Islands in the North, and has a total land area of about 6,050 square miles. The principal islands are Vanua Lava and Gaua (Banks), Espiritu Santo, Maewo, Pentecost, Aoba, Malekula, Ambrym, Epi, Efate, Erromango, Tanna and Anceityum.

The Territory is administered by a unique British-French Condominium Government. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have staffs of national officers to assist them in general administrative work and the running of social services (health and education) financed from national funds. In addition they control the "joint" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The Resident Commissioners are advised regarding policy and legislation by the Advisory Council, a composite body of New Hebrideans, French and British Nationals, some appointed and some elected, which meets twice a year.

The 1967 Census showed a population of 77,988 of which 72,243 were New Hebrideans. There were 3,841 French Nationals and 1,629 British Nationals but only 1,773 of these were of European ethnic origin. The estimated rate of population increase is 2½ per cent. per annum giving a 1970 population of 83,984.

Principal products are copra, coffee, cocoa, kauri timber, frozen fish, frozen and canned meat,

sandalwood and shell. Imports for 1968 totalled £4,237,390 and exports £4,868,019. Condominium Budget, 1969, £1,329,815; British National Service Budget £1,057,774; French National Service Budget £1,557,747. Two currencies are valid in the Territory; 100 New Hebrides Francs = 1 Australian Dollar.

Seat of New Hebrides Administration—Ψ Vila, Efate, population (estimated, 1968), 3,300. British High Commissioner, Sir Michael Gass (see below).

French High Commissioner, M. J. Risterucci. British Resident Commissioner, C. H. Allen, C.M.G. French Resident Commissioner, J. Mouradian.

PACIFIC ISLANDS

Chief Secretary, L. M. Davies, C.M.G., O.B.E.....		6,592
Attorney General, D. R. Davis.....		5,952
Financial Secretary, T. Russell, O.B.E.....		5,952
Secretary for Protectorate Affairs, R. Davies, O.B.E.....		5,712

† Certain allowances are paid in addition under the Overseas Service Aid Scheme.

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony, including the Central and Southern Line Islands; (2) The British Solomon Islands Protectorate; (3) The New Hebrides (British Service). The headquarters of the High Commissioner are at Honiara in the British Solomon Islands Protectorate.

The Gilbert and Ellice Islands Colony, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was annexed to the Empire in November, 1915. The total land area of the Colony is about 360 sq. miles. The population of the Colony at December 5, 1968, was 55,184. Expressed in Australian currency, the estimated revenue of the Colony in 1969 was \$A4,329,580; expenditure, \$A4,237,118.

The Government maintains one boys' and girls' boarding school and 33 primary schools—27 of which are Island Council Schools. The enrolment of the Government King George V and Elaine Bernacchi Secondary School was 288 in 1968. There are two Roman Catholic and one Protestant mission "high" schools of sub-secondary level with a total enrolment of 310. The total enrolment in 1968 in primary schools was 13,292 (Government and Local Government Primary Schools, 2,920; Mission Primary Schools, 4,265; Village Schools, 6,107).

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakei, Abaiang, Tarawa (Headquarters of the Colony), Malana, Abemama, Kuria, Arunaka, Nonouti, Tabiteuea, Beru, Nikunau, Onotua, Tamana and Arorae. The area of the group is 1124 sq. miles. The Ellice Group of 9 islands (Nanumea, Nanumanga, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaeae and Niulakita) lies between lat. 5° 30' and 12° S.E. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated 1965) 5,800. Ocean Island (or Banaba), in lat. 0° 52' S. and long. 169° 35' E. was proclaimed British in 1900. The Line Islands between lat. 4° 40' and 2° N. and long. 160° 20' and

157° W. include Fanning, Washington and Christmas Islands. Fanning and Washington Islands were included in the Colony in 1916, Christmas Island in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the Phoenix Islands (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phoenix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under an agreement made on April 6, 1939. Canton Island has been abandoned both by the Americans and by the Colony Government personnel, which together with the Americans jointly administered the island under the 1939 agreement. It is now completely uninhabited except for a large number of sea-gulls which constituted a menace to planes when the island was used as an international airport. The Colony personnel left the island on February 12, 1968, whereas the Americans left a little earlier on December 22, 1967.

In each island of the Gilbert and Ellice Groups (except Niulakita) there is a local Government with an Island Council employing officials for the general administration of the community. The Colony is administered by the High Commissioner through a Resident Commissioner.

*Resident Commissioner, Gilbert and Ellice Islands, D. G. Cudmore (acting) . . . . . \$A6,59a*

The *British Solomon Islands Protectorate*, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Isabel, the Shortland Group, Vella Lavella, Kolombangara, Ranongga, Gizo, the New Georgia Group, the Florida Group, Guadalcanal, the Russell Islands, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikolo, Tikopia, Swallow (or Reef Islands) and Duff Groups, the Stewart Islands and the Ontong Java Atoll.

The Protectorate is situated between 5°-13° S. lat. and 155°-170° 20' E. long. It has a total land area of about 11,500 sq. miles. The latest estimated population figures are: Melanesians, 138,720; Polynesian, 5,420; Micronesian, 2,000; European, 1,640; Chinese, 660; Others, 360. Total, 148,800.

*Finance and Trade.*—Estimated revenue (1969), \$A6,707,270 (including Colonial Development and Welfare Funds (\$A2,937,930) and grant-in-aid from the United Kingdom (\$A2,331,584)); estimated expenditure (1969), \$A9,038,854. The main imports are foodstuffs, consumer goods, machinery and building materials. Principal exports are copra, timber and trochus shell. Exports of cocoa, though modest in quantity, are increasing annually, and tourism is developing.

*Government.*—In 1960 an Advisory Council was replaced by a nominated Legislative Council and Executive Council. In 1964 provision was made for a new constitution and the first general elections were held in 1965. In 1967 a general election was held to elect 14 members of the Legislative Council instead of the previous 8. The present Council comprises three *ex officio* members, up to 12 public service members and 14 elected members, and can have up to two additional nominated members, although none has been appointed. The Executive Council consists of eight members, drawn from members of the Legislative Council and appointed by the High Commissioner, who presides over both Councils.

Interim proposals for further constitutional development were published at the end of 1968 based on a departure from the Westminster model and the

formation of a single Council supported by executive committees. The Council would have a majority of elected members. It was expected that these proposals will be implemented in early 1970 before the next general election.

The High Court of the Western Pacific constituted by the Western Pacific (Courts) Order in Council, 1961, consists of a Chief Justice, one Puisne Judge and one Senior Magistrate. The Court is a Superior Court of Record and possesses all the jurisdiction which is vested in Her Majesty's High Court of Justice in England.

## PITCAIRN ISLANDS

Pitcairn, a small volcanic island of less than two square miles in area, is the chief of a group of Islands situated about midway between New Zealand and Panama in the South Pacific Ocean at longitude 130° 06' W. and latitude 25° 04' S. The island rises in cliffs to a height of 1,100 feet and access from the sea is possible only at Bounty Bay, a small rocky cove, and then only by whaleboats. Mean monthly temperatures vary between 66° F. in August and 75° F. in February and the average annual rainfall is 80 inches. Moderate easterly and north-easterly winds predominate but short easterly and south-easterly gales occasionally occur from April to September. With an equable climate, the island is very fertile and produces both tropical and sub-tropical trees and crops. The small community, descendants of the Bounty mutineers and their Tahitian companions, numbers about 80. The Islanders live by subsistence farming and fishing, and their limited monetary needs are satisfied by the manufacture of wood carvings and other handicrafts which are sold to passing ships and to a few overseas customers. Other than small fees charged for gun and driving licences there are no taxes and Government revenue is derived almost solely from the sale of postage stamps. Communication with the outside world is maintained by cargo vessels travelling between New Zealand and Panama which call at irregular intervals in each direction; and by means of a telegraphic link with Fiji.

The other three islands of the group (Henderson lying 105 miles E.N.E. of Pitcairn, Oeno lying 75 miles N.W. and Ducie lying 203 miles E.) are all uninhabited. Henderson island is occasionally visited by the Pitcairn Islanders to obtain supplies of "miro" wood which is used for their carvings. Oeno is visited for excursions of about a week's duration every two years or so.

Under a scheme of co-operation, New Zealand supplies Pitcairn with a teacher for the one-teacher primary school on the Island. Education is compulsory between the ages of five and fifteen. Secondary education in Fiji and New Zealand is encouraged by the Administration which provides scholarships and bursaries for the purpose. Medical care is provided by a registered nurse and additional help is obtained when required from the surgeons of passing ships. Since 1887 the islanders have all been adherents of the Seventh Day Adventist Church.

Pitcairn became a British Settlement under the British Settlements Act, 1887, and has been administered by the Governor of Fiji since 1952. The local Government Ordinance of 1964 provides for a Council of ten members of whom four are elected.

*Commissioner, K. R. Bain (South Pacific Office, Suva, Fiji).*  
*Island Magistrate and Chairman of Island Council, P. Young.*  
*Education Officer and Government Adviser, R. S. Henry.*

## RHODESIA

Rhodesia, comprising Matabeleland, Mashonaland and Manicaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Zambia and Portuguese East Africa on the N.; the Transvaal and Botswana on the S. and W.; and Portuguese East Africa on the E. Rhodesia has a total area of 150,820 square miles and a population (estimated, Dec., 1968) of 4,740,000 (Europeans, 241,000; Africans, 4,480,000; Asians and Coloured, 23,790).

The majority of Africans of Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the territory are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its

Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the territory's 96,600,000 acres, 40,125,600 have been allocated to Tribal Trust Lands and 4,276,500 to African Purchase Areas. 35,673,900 acres (including African townships where they fall in European areas) are put aside for the Europeans. 5,880,000 acres are unreserved and may be inhabited by either race and 10,560,500 acres are set aside as Forest area and National land (all races).

## FINANCE AND TRADE

	1966-67	1967-68
Revenue.....	£78,326,850	£82,606,000
Expenditure from revenue funds...	61,985,688	66,939,093
Expenditure from loan funds.....	19,961,643	21,579,651
Revenue for 1968-69 was estimated at		£89,750,000.

## TRADE WITH U.K.

	1967	1968
Imports from U.K....	£1,041,000	£809,000
Exports to U.K.....	147,000	90,000

## EDUCATION

African education comes under the Minister of Education in the Rhodesian Government. The last estimate of annual expenditure is £8,250,000. There are 3,271 primary schools, 90 senior secondary schools and 5 junior secondary schools, 6 special schools for physically handicapped, 101 aided farm schools, 11 homecraft schools, 71 part-time evening schools, 135 study groups and 42 teacher training schools. The total enrolment of African pupils in 1968 was 713,170. In 1968 there were 17,479 African teachers and 602 European teachers for African schools. Full secondary schools provide education up to the Cambridge Schools Certificate level, and junior secondary schools give a vocational schooling up to Junior Certificate level. Five secondary schools offer the Higher School Certificate. Other educational institutes are the Domboshawa School of Social Service and Chibero Agricultural College. At the University College in Salisbury, of the total enrolment of 857 full-time students for 1969, there were 309 Africans and 144 part-time students. At present ■ per cent. of

African children between the ages of ■ to 16 years receive ■ minimum of 5 years' primary education and over half of this number receive ■ full 8 years' primary education.

## GOVERNMENT

Rhodesia (then *Southern Rhodesia*) obtained self-government in 1923 and has a legislative Assembly of 65 members and a Cabinet of 15 members.

Municipal self-government has been established in the city of Salisbury, the city of Bulawayo, and ■ the towns of Umtali, Gwelo, Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged and at the end of 1968 there were 68 Native Councils.

## MINISTRY

The Parliament of Rhodesia, elected on May 7, 1965, consists of 49 Rhodesian Front, 10 United Peoples' Party, 2 Democratic Party and 4 Independents.

Prime Minister, Hon. I. D. Smith.  
Deputy Prime Minister and Minister of Finance and Posts, Hon. J. J. Wrathall.  
Minister of External Affairs, Defence and Public Service, Hon. J. H. Howman.  
Justice and Law and Order, Hon. D. W. Lardner-Burke.  
Local Government and Housing, Hon M. H. H. Partridge.  
Agriculture, Hon. D. C. Smith.  
Internal Affairs, Hon. L. B. Smith.  
Health, Labour and Social Welfare, Hon. I. F. McLean.  
Transport, Power, Roads and Road Traffic, Brigadier Hon. A. Dunlop, D.S.O.  
Information, Immigration, and Tourism, Hon. P. ■ ■ ■ der Byl.  
Education, Hon. A. P. Smith.  
Lands and Water Development, Hon. P. van Heerden.  
Mines, Hon. I. B. Dillon.  
Commerce and Industry, Hon. B. H. Mussett.  
Minister without Portfolio, Hon. G. W. Rudland.

## JUDICIARY

The High Court of Southern Rhodesia consists of ■ Chief Justice, a Judge President of the Appellate Division, a Judge of Appeal and six puisne Judges. Chief Justice, Rt. Hon. Sir Hugh Beadle, C.M.G., O.B.E.  
Judge President, Appellate Division, Hon. Sir Vincent Quenet.  
Judge of Appeal, Hon. H. N. Macdonald.  
Puisne Judges, Hons. J. V. R. Lewis; E. W. G. Jarvis, C.M.G.; H. E. Davies; B. Goldin; T. M. Greenfield, C.M.G.; J. B. Macaulay.

CAPITAL.—SALISBURY, situated on the Mashonaland plateau, altitude 4,850 ft., population (Dec., 1968), 390,000, including 99,000 Europeans and 7,800 Asians and Coloureds. BULAWAYO, the largest town in Matabeleland, altitude 4,450 ft., population (Dec. 1968), 280,000, including 55,000 Europeans and 7,400 Asians and Coloureds. Other centres are Umtali, Gwelo, Gatooma, Que Que, Fort Victoria and Wankie.

Salisbury is 5,600 miles from London (air route) transit 12 hours; by sea, *via* Cape Town, 17 days (approx.).

FLAG.—Vertical stripes of green, white, green; Rhodesian coat of arms in centre of white stripe.

## ST. HELENA

Probably the best known of all the solitary islands in the world, St. Helena is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with ■ estimated population at June, 1968, of 4,722.

St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A lacemaking industry has been established. Ψ St. James's Bay, on the north-west of the Island, possesses a good anchorage.

## GOVERNMENT

The government of St. Helena is administered by ■ Governor, with the aid of a Legislative Council, consisting of the Governor, two *ex-officio* members (Government Secretary and Treasurer) and twelve elected members. Five committees of the Legislative Council are responsible for general oversight of the activities of Government Departments and have in addition a wide range of statutory and administrative functions. The Governor is also assisted by an Executive Council of the two *ex-officio* members and the Chairmen of the Council committees.

Governor, His Excellency Sir Dermot Art Murphy, C.M.G., O.B.E. (1968).....	£3,250
Government Secretary, I. C. Rose, T.D. ..... (+ <i>allice.</i> )	1,872

CAPITAL, Ψ Jamestown. Population (1966), 1,475.

## ASCENSION

The small island of Ascension lies in the South Atlantic (7° 56' S., 14° 22' W.) some 700 miles north-west of the island of St. Helena. It is said to

have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. It was uninhabited until the arrival of Napoleon in St. Helena in 1815 when ■ small British naval garrison was stationed on the island. The population at December 31, 1968, was 1,527 of whom 773 were St. Helenian. The island remained under the supervision of the Board of Admiralty, until 1922, when it was made ■ dependency of St. Helena by Royal Letters Patent and came under control of the Secretary of State for the Colonies.

Ascension is a rocky peak of purely volcanic origin, the highest point (Green Mountain) some 2,817 ft. is covered with lush vegetation, which with each rainy season is slowly creeping down to the lower areas. Cable & Wireless Ltd., maintains ■ farm of some 10 acres on the mountain, permitting the production of vegetables and livestock. The island is famous for Turtles, which land on the beaches from January to May to lay their eggs. It is also a breeding area for the sooty tern, or wide-awake, large numbers of which settle on the south-western coastal section every eighth month to hatch their eggs. Other wild life on the island includes feral donkeys and cats, rabbits and francolin partridge. All wild life except rabbits and cats is protected by law. The ocean surrounding the island abounds with shark, barracuda, tuna, bonito and many other fish.

Cable & Wireless Ltd., owns and operates a cable station which connects the Dependency with St. Helena, Sierra Leone, St. Vincent, Rio de Janeiro and Buenos Aires. A B.B.C. relay station was opened on the island in 1966.

Administrator, Brig. H. W. D. McDonald, D.S.O.

## TRISTAN DA CUNHA

Tristan da Cunha is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817, William Glass, ■ corporal of artillery (died 1853), remaining at his own request, with his wife and two children. This party, with five others, formed a settlement. In 1827 five coloured women from St. Helena, and afterwards, others from Cape Colony, joined the party.

In 1961 the population numbered 280 persons, the islands being administered by the Colonial Office through ■ resident Administrator, with headquarters at the settlement of Edinburgh. There is an elected Island Council of 16 members, with universal suffrage at 18.

In October, 1961, a volcano, believed to have been extinct for thousands of years, erupted and mounds of earth were thrown up in some cases to a height of 35 feet. In view of the danger of further volcanic activity, the inhabitants were evacuated and reached the United Kingdom on Nov. 23, 1961, where they remained for nearly two years. An advance party returned to Tristan da Cunha in the spring of 1963, and the main body of the islanders has now returned to the island. Some went back

to England in 1966, but most returned in August, 1967.

A boat harbour was completed in 1967. The first freezing factory was re-established in 1966. There are no taxes on Tristan, income being derived from royalties paid by the fishing company and from the sale of stamps.

Administrator, B. Watkins.

Chaplain, Rev. A. A. Welsh.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937, but has been abandoned.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and  $\frac{1}{2}$  mile wide, and rises in two peaks, 960 and 1,105 ft. above sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 11 miles long and 4 miles broad, with a total area of 40 square miles, and has been in British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

### SEYCHELLES

The Colony of Seychelles, in the Indian Ocean, consists of two distinct collections of islands—the Mahé group, 32 islands in all, granitic with high hills and mountains (highest point 2,971 feet) and the out-lying islands, the Coralline group, numbering 57 more and, for the most part, only a little above sea-level. Proclaimed as French territory in 1756, the Mahé group began to be settled as a dependency of Mauritius from 1770, was captured by a British ship in 1794 and was finally assigned to Great Britain in 1810. By Letters Patent of September, 1903, these islands, together with the Coralline group, were erected into a separate Colony.

The total area of the Granitic group is 100 square miles, of which Mahé, the largest island and the seat of Government, claims 55. The next largest island is Praslin, home of the unique double coconut, *Coco de Mer*. Islands of the Coralline group lie at distances from Mahé varying between 60 and 612 miles and, exclusive of the Aldabra lagoon (50 sq. miles), have a total area of approximately 13 sq. miles. Aldabra is famous for its gigantic land tortoises. These islands have no permanent population and, where worked, are supplied by contract labour from the Granitic group. The population in June, 1968, was 49,981. Although only 4° S. of the Equator, the islands are healthy; the death- and birth rates in 1968 were 10.8 and 34.8 per 1,000 respectively. There are 33 primary schools, 10 secondary schools and a teachers' training college.

The new Constitution which was introduced in late 1967 created a single Council with both executive and legislative functions and an unofficial majority. The General Election held under the Constitution in December, 1967, was also significant in that for the first time it was contested on the basis of universal adult suffrage. The Governing Council consists of three *ex-officio* members, eight elected members and up to four nominated members of whom at least two are not public officers, with the Governor as President.

### FINANCE

### TONGA

The Tongan or Friendly Islands form a self-governing State under the protection of Great Britain, in accordance with the terms of the revised Treaty of Friendship signed at Nuku'alofa on May, 30, 1968. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (1967) of 79,000. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nuku'alofa, on the island of Tongatapu, is the seat of government. The present King Taufa'ahau Tupou IV, K.C.M.G., K.B.E., succeeded his mother, the late Queen Salote Tupou III, on December 16, 1965. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 21 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of Island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. In 1960, women were allowed to vote for the first time. Soil generally is fertile, the principal exports are copra and bananas. Revenue 1966-67, T\$2,125,751; expenditure, T\$1,798,064. There is no debt. Total imports (1967), T\$5,729,561; total exports T\$3,566,321. The total shipping cleared in 1967 was 253,719 tons. Tongan currency is at parity with Australian currency in relation to sterling.

British Commissioner and Consul, A. C. Reid, C.M.G. (1965).....£3,550

VIRGIN ISLANDS, see BRITISH

## THE WEST INDIES

The West Indies are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which are entirely British; III. LESSER ANTILLES, which are variously divided; the British islands in the Lesser Antilles are the Leeward and Windward Islands. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are Independent, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

The West India Islands that lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds blowing generally from the eastern point in the area.

## COMMISSION FOR THE EAST CARIBBEAN GOVERNMENTS

10 Haymarket, S.W.1.

Commissioner, N. G. F. Taylor.

The British West Indies were governed under a series of federal arrangements, the last of which, a federation of the Leeward and Windward Islands with Barbados, was abandoned in 1966. It was announced in Jan., 1967 that the islands of Antigua, Dominica, Grenada, St. Kitts-Nevis-Anguilla and St. Lucia were to become States in association with Britain. Britain's powers and responsibilities are limited to defence and external affairs.

## West Indies Associated States

The Associated States are described individually in the following sections. The Office of the British Government Representative is at George Gordon Building (P.O. Box 227), Castries, St. Lucia.

British Government Representative, C. S. Roberts (1967)..... £5,075

Deputy do., D. M. Kerr.

Development Adviser, W. L. Bell, M.B.E. (Resident at Bridgetown, Barbados).

and Secretary, R. L. Brooks.

## Supreme Court

Established by Order in Council (1967), which gives the Court additional jurisdiction in Montserrat and the British Virgin Islands. There are two constituents, a Court of Appeal and a High Court. The Chief Justice is appointed by Her Majesty and pulse judges by the Judicial and Legal Services Commission. Expenses of the Supreme Court, after allowing for contributions from Montserrat and the Virgin Islands, are met by the States in equal shares.

Chief Justice, Hon. Sir Allen Lewis, Q.C.

Justices of Appeal, K. L. Gordon; P. C. Lewis.

Puisne Judges, E. L. St. Bernard (Grenada); N. Beridge (Dominica and Montserrat); E. H. A. Bishop (St. Lucia); E. F. Glasgow (St. Kitts and Brit. Virgin Isds.); A. F. L. Louisy (Antigua); N. Peterkin (St. Vincent).

## ANTIGUA

Antigua lies in 17° 6' N. lat. and 61° 45' W. long., and is nearly 108 square miles in area with a coastline of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. Population at the Census of 1960 totalled 54,304. It is much less

hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which one central sugar factory has been erected. Cotton is now planted on a large scale and the island also exports molasses and rum. The population, with Barbuda, is estimated at 62,000. The Island has begun to take advantage of its many fine beaches, and tourism is becoming an important new industry.

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 42' W. Area, 62 square miles. Population, 1,000. The island is flat and mostly stony, producing cotton, corn and ground-nuts. Wild deer are found, and there is good tarpon and other fishing. Warden, E. Cregue (and quarters), £980 to £1,350. Redonda is uninhabited.

CAPITAL  $\Psi$  St. John's. Population 25,000.

## THE CAYMAN ISLANDS

The Cayman Islands, between 79° 44' and 81° 26' W. and 19° 15' and 19° 46' N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (estimated, 1966), 9,000. The constitution provides for an Administrator, Legislative Assembly and Executive Council. The Legislative Assembly consists of the Administrator, not fewer than two nor more than three nominated members, not fewer than two nor more than three official members and elected members. The Executive Council consists of the Administrator and two official members appointed from among the official members of the Assembly, one nominated member appointed from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years. Supervisory powers over the government of the Islands exercised by the Government of Jamaica came to an end in August, 1962.

The principal town is  $\Psi$  George Town, in Grand Cayman, population (1960 census) 2,558.

## MONTSERAT

Situated in 16° 45' N. lat. and 61° 15' W. long., 27 miles S.W. of Antigua, the island is about 11 miles long and 7 wide, with an area of 39 square miles; population (estimated, 1967), 14,468. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs,

while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest capable of cultivation. The chief exports are sea island cotton, tomatoes and other fruits and vegetables. Exports of fruit and vegetables are expanding and in recent years markets were found in Bermuda and the United Kingdom for the island's production of mangoes and hot peppers. Since 1963 real estate development and tourism have done much to add the island's economy. Revenue (1968), \$3,630,010; Expenditure \$3,738,746.

Cabinet government was introduced in Montserrat in 1960. The Executive Council is composed of 4 unofficial members (the Chief, 3 other Ministers and 1 Member without Portfolio) and two official members (the Attorney-General and the Financial Secretary). The 3 Ministers appointed from the elected members of the Legislative Council. The present composition of the Legislative Council is the Administrator, who presides, two official members, one nominated unofficial member and 7 elected members.

Administrator, His Hon. Dennis Raleigh Gibbs, C.M.G., C.V.O., D.S.O. (1964) (+ allowances of £550 and £208 and quarters)..... £2,750

EXECUTIVE COUNCIL

President, The Administrator.  
 Chief Minister, Minister of Finance, Trade and Production, Hon. W. H. Bramble.  
 Minister of Social Services, Hon. B. W. Edwards.  
 Communications and Works, Hon. P. A. Bramble.  
 Attorney-General, Hon. D. M. Lambert.  
 Financial Secretary, Hon. J. Taylor, C.M.G.  
 Without Portfolio, Hon. J. Howe.

Secretary to the Executive Council, G. C. H. Thomas, O.B.E.

CHIEF TOWN.—Plymouth (3,500).

ST. KITTS-NEVIS-ANGUILLA

Governor, His Excellency Milton Pentonville Allen, O.B.E. (1969).

The islands of St. Kitts, Nevis, and Anguilla are united to form one Territory, and taken together they have a population (1960) of 56,693, and a total area of about 136 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88° F.

St. Kitts (population 1960, 38,113), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18' N. and long. 62° 48' W., and has an area of 65 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green sugar estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,792 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Basseterre, is port of registry.

Nevis (population 1960, 12,770) is separated from St. Kitts by a strait 3 miles wide and has an area of 36 sq. miles. Cotton is exported and coconuts are also now exported, mainly to Barbados. The raising of livestock and cultivation of vegetables are also important features of the island's economy. Its greatest elevation is 3,596 feet. The chief town, Charlestown, is a port of entry.

Anguilla (population 1960, 5,810) is about 70 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised. H.M. Commissioner for Anguilla, W. H. Thompson.

CAPITAL, Basseterre (St. Kitts). Population (1960), 15,579.

TURKS AND CAICOS ISLANDS

These West Indian islands geographically form part of the Bahamas group, from which Government they were separated in 1848. From 1873 until 1962 they were annexed to Jamaica, from which they are distant about 450 miles, reverting to U.K. administration on August 6, 1962, upon Jamaica's attainment of independence. On November 5, 1965, the Governor of the Bahamas became also the Governor of the Turks and Caicos. The two Colonies share a Common Bench for their Courts of Appeal. They have an area of about 166 square miles, and a population estimated, June, 30, 1967, of 6,000. Grand Turk is an important cable station. A tourist industry is rapidly developing as the climate, beaches and sea sports generally are amongst the finest in the world. Trade in salt, for which the island used to be celebrated, has greatly diminished in recent years. Other exports are crawfish and conches. A considerable number of men are employed overseas in the Bahamas. There is a U.S. Air Force missile tracking station and a Naval facility at Grand Turk, and a government-owned airstrip at South Caicos, at which refuelling and other facilities provided.

The Constitution provides for a Administrator, and a State Council. The State Council consists of a Speaker, three official members, not less than two nor more than three nominated members and nine elected members. The normal life of the State Council is five years.

Administrator, His Hon. R. E. Wainwright, C.M.G., O.B.E. (1968) (+ duty allee. £300). £2,450

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada, St. Vincent, St. Lucia and Dominica with their dependencies; the Grenadines being divided between Grenada and St. Vincent. The total area is 821 square miles. Since March, 1967, with the attainment of the status of Associated Statehood, there has been a Governor in Grenada, St. Lucia and Dominica. A similar change is to take place in St. Vincent. Each island has its own elected Parliament and Senate and a Premier. The ministerial form of government was introduced in 1956.

GRENADA AND THE GRENADINES

Grenada is situated between the parallels of 12° 13'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 133 square miles: estimated population (including some of the Grenadines), 102,214. The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, bananas, sugar cane, cotton, coconuts, limes and fruit are grown. The imports are chiefly dry goods, wheat, flour, dried fish, feedstuffs, hardware and rice.

ψ St. George's (population 8,400) on the south-west coast, is the chief town, and possesses a good harbour.

#### Government

Grenada became a Associated State in association with Great Britain on March 3, 1967. The Legislature became bicameral consisting of Her Majesty, a Senate and a House of Representatives. There is a Premier, with four other Ministers. The Principal Law Officer is *ex officio* a member of the Senate.

Governor, Dame Hilda Louisa Bynoe, D.B.E. (1968) (+*allice*. £1,925)..... £2,750  
Premier, Eric M. Gairy.

The Grenadines are a chain of small islands lying between Grenada and St. Vincent, within which Governments they are included. The largest island is Carriacou, attached to the Government of Grenada, with area of 13 sq. miles and population of 8,177.

#### ST. LUCIA.

the second largest and the most picturesque of the Windward group, situated in 13° 54' N. lat. and 60° 50' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with an estimated population (1965) of 106,663. About 56,000 acres are devoted to agriculture. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are bananas, copra, coconuts, cocoa, edible oil. Over 6,000,000 stems of bananas, valued at \$9,443,134, were exported to the U.K. in 1966. The chief imports are flour, machinery, cotton piece goods, sacks and bags.

CAPITAL.—ψ Castries, (estimated population, 40,000) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. In 1966, 1,708 vessels with a total gross tonnage of 2,011,650 called at Castries.

#### ST. VINCENT.

an island about 95 miles west of Barbados, situated in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (estimated 1967) of 90,000. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1783 it was secured to Great Britain.

The chief products are bananas, arrowroot, cotton, copra, coconuts, cassava, cocoa, ground provisions, and spices. Its chief imports are foodstuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 58 primary schools with 26,992 pupils in 1967, and a Government secondary schools with an attendance of 724. In addition, there are 7 grant-aided secondary schools with an attendance of 1,742 and 2 unaided secondary schools with 172 pupils.

CAPITAL.—ψ Kingstown, population (1967), 21,432.

#### DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between 15° 20' and 15° 45' N. lat. and 61° 13' and 61° 30' W.

long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad comprising an area of 290 sq. miles, of which about 37,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°F. The climate is healthy, and during the winter months very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra and vanilla. Population (estimated, 1968, 70,177). The principal towns are  $\Psi$ Roseau, on the south-west coast, population, 11,924 and Portsmouth, population, 2,566.

**Education.**—There are 53 elementary schools, of which 50 are Government and 3 assisted. Of the 4 secondary schools, 3 receive a grant-in-aid and one is maintained by the Government.

#### Government

On March 1, 1967, Dominica received a new Constitution and became an Associated State of the United Kingdom. The Queen's Representative was renamed the Governor.

The new House of Assembly now comprises 11 elected and 3 nominated members, one nominated on the advice of the Leader of the Opposition. The Cabinet (Executive) presided over by the Premier, consists of 4 other Government Ministers and the Attorney General (Official Member). The Premier is appointed by the Governor from the elected members of the House of Assembly. The other Ministers are appointed by the Governor on the advice of the Premier. The Speaker is elected from among the members of the House or from outside.

**Governor,** His Excellency Sir Louis Cools-Lartigue,

O.B.E. (1967).

**Premier,** Hon. E. O. Leblanc.

### WESTERN SAMOA

different denominations. A census held on Sept. 25, 1961, showed a total population of 114,427, of whom 101,288 were Samoans and 11,813 part-Samoans, 522 other Pacific Islanders and 668 Europeans.

The chief exports are copra, cocoa and bananas. In 1965, the total trade was valued at: exports £2,030,000 (copra £839,100, cocoa £454,400 and bananas £609,900); imports £3,290,030.

### SOUTH-EAST ASIA TREATY ORGANIZATION

**Headquarters:** Bangkok, Thailand.

A *South-East Asia Collective Defence Treaty* was signed on Sept. 8, 1954, by representatives of Australia, New Zealand, Pakistan, the Philippines, Thailand, France, the United Kingdom and the United States. The Treaty consists of eleven Articles. The parties undertake mutual defence responsibilities in the area of the Treaty. Other articles deal with mutual economic assistance, including technical assistance, designed to promote economic progress and social well-being; the rights and obligations of the parties under the Charter of the United Nations; accession of further states; and define the area to which the Treaty applies. Member Countries are represented on a Council which provides for consultation with regard to military and other planning. The United States executed the Treaty with the understanding that its recognition of the effect of aggression and armed attack apply only to Communist aggression, but agreed to consult with the other signatories in the event of any other armed attack.

In a declaration of principles, *The Pacific Charter*, the Treaty powers uphold the principle of equal rights and self-determination of peoples. They will earnestly strive by every peaceful means to

promote self-government and to secure the independence of all countries whose peoples desire it and are able to undertake its responsibilities. They will continue to co-operate in the economic, social and cultural fields in order to promote higher living standards, economic progress and social well-being in the region. They are determined to prevent or counter by appropriate means any attempt in the Treaty area to subvert their freedom or destroy their sovereignty or territorial integrity.

### CENTRAL TREATY ORGANIZATION

**Headquarters:** Ankara, Turkey

A mutual security and defence treaty was concluded between Turkey and Iraq at Baghdad on Feb. 24, 1955. Three further states, the United Kingdom, Iran, and Pakistan signed the *Baghdad Pact* later in the same year. The United States, although not a full member of the Council, participates in an observer capacity, is a member of all major committees, and contributes an equal share to the international staff and budget, as well as a large share of economic and military assistance. Iraq formally withdrew from the Pact on March 24, 1959, and the title Central Treaty Organization (CENTO) was adopted on Aug. 21, 1959.

**Secretary-General,** Turgut Menemcioglu (1968).

## Ireland

See also Northern Ireland, pp. 688-91; Republic of Ireland, pp. 794-796.

**Position and Extent.**—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between 51° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Anagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Isles, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of Allen, Bodeg, Forbes, Ree and Derg, and the Erne Chain of Gowma, Oughter, Lower Erne, and Erne; Melvin, Gill, Gara and Conn in the north-west; and Corrib and Mask (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

**Primitive Man.**—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* iron Age have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scotti*, who afterwards established themselves in Scotland.

**History.**—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardiri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

*Hibernia* was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaid-tír, Laigintír, Mumans-tír and Kunnak-tír). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill

king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmid MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII, Sir Edward Poyning, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poyning's Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

**Christianity.**—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

# Republic of Ireland

*Area and Population.*—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Laoighis, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the Census held on April 17, 1966, was 2,884,002 (males, 1,449,032; females, 1,434,970), a density of 108 persons per sq. mile. Provisional figures showed 60,875 births, 18,792 marriages and 32,800 deaths in the year 1968.

## THE PRESIDENT

*Uachtarán na hÉireann (President), Éamon de Valéra, born 1882, assumed office June 25, 1959; re-elected for a second term, June 25, 1966.*

### MEMBERS OF THE GOVERNMENT

*Taoiseach, Seán Ó Loinsigh (John Lynch).. £5,500*  
*Tánaiste and Minister for Health, Erskine H.*

*Childrens..... 3,500*  
*Minister for Agriculture and Fisheries, Niall Bléine*  
*(Neill T. Blaney).*

*Local Government and Social Welfare, Caoimhghín*  
*Beoláin (Keyin Boland).*

*Justice, Micheál Ó Móráin (Michael Moran).*

*External Affairs, An Dr. Pádraig Ó hIgríhile (Dr.*  
*Patrick J. Hillery).*

*Finance, Cathal Ó hEochaidh (Charles J. Haughey).*  
*Transport and Power, Brian Ó Luineacháin (Brian*  
*Joseph Lenihan).*

*Labour, Seosamh Ó Braonáin (Joseph Brennan).*

*Industry and Commerce and Minister for the Gaeltacht,*  
*Seoirse Ó Colla (George Colley).*

*Health, Seán Ó Flannagáin (Seán Flanagan).*

*Education, Pádraig Ó Faobna (Patrick Faulkner).*

*Defence, Seamús Mac Giobúin (James Gibbons).*

*Posts and Telegraphs, Pádraig Ó Leathlobhair*  
*(Patrick Joseph Lalor).*

*Ministers, each £3,500.*

## GOVERNMENT

*The Constitution.*—The Constitution approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as second official language.

*The President.*—The President—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves *Dáil Éireann* on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

*The Legislature.*—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—

### Seanad Éireann.

*Dáil Éireann* is composed of 144 members elected by adult suffrage on a basis of proportional representation.

*Seanad Éireann* is composed of 60 members, of whom 11 are nominated by the *Taoiseach* and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

Members of *Dáil Éireann* are paid an allowance of £2,500 per annum (and members of *Seanad Éireann* £1,500); are allowed free travelling facilities between Dublin and their constituencies and are, subject to certain restrictions, granted free telephone and postal facilities from Leinster House and allowances for overnight stays in Dublin.

*The Executive.*—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to *Dáil Éireann*, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The *Taoiseach* is appointed by the President on the nomination of *Dáil Éireann*. The other members of the Government are appointed by the President on the nomination of the *Taoiseach* with the previous approval of *Dáil Éireann*. The *Taoiseach* appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the *Taoiseach* in the event of the death, permanent incapacitation, or temporary absence of the *Taoiseach*. The *Taoiseach*, the *Tánaiste* and the Minister for Finance must be members of *Dáil Éireann*. The other members of the Government must be members of *Dáil Éireann* or *Seanad Éireann*, but not more than two may be members of *Seanad Éireann*.

## THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). *Dáil Éireann* has 144 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. Each *Dáil* may continue for a period not exceeding five years from the date of election. The present (19th) *Dáil* was elected on June 18, 1969, and met on July 2, 1969.

Strengths of the parties in the *Dáil* on July 2, 1969 were:

*Fianna Fáil, 75; Fine Gael, 50; Labour, 18; Independent, 1.* Total membership including the *Ceann Comhairle* (Speaker), 144.

### Parliamentary Secretaries

*Parliamentary Secretary to the Taoiseach and to the Minister for Defence, Deasáin Ó Máille (Des O'Malley).*

*Do. to the Minister for Local Government, Pádraig Braonáin (Paudge Brennan).*

*Do. to the Minister for Social Welfare, Seán Mac Eochagáin (John Geoghegan).*

*Parliamentary Secretary to the Minister for Finance*,  
Noel Lemass (Noel T. Lemass).  
*Do. to the Minister for Agriculture and Fisheries*, Diarmaid Ó Cróinín (Jerry Cronin).  
*Do. to the Minister for Education*, Ríobárd Ó Maoilídhia (Robert Molloy).  
*Do. to the Minister for Industry and Commerce*, Gearóid Ó Coileáin (Gerard Collins).

*Attorney-General*, Colm Condún, s.c. (Colm Condon, s.c.).

*Secretary to the Government*, Níoclás Ó Nualláin, Ph.D. (Nicholas G. Nolan).

*Assistant Secretary to the Government*, Donal Ó Súilleabháin (Donald O'Sullivan).

#### British Embassy

39 Merrion Square, Dublin

*His Excellency Sir Andrew Graham Gilchrist*, K.C.M.G. (1967)..... £5,625

*Counsellor*, R. W. Piper.

*First Secretaries*, B. G. Collins; G. Miles (Commercial).

*Military Attaché*, Brig. F. G. Macmullen.

#### Ambassadors Abroad

*The Holy See*, J. F. Shields.

*Argentina*, M. L. Skentelberg.

*Australia & New Zealand*, F. Coffey.

*Austria & Switzerland*, F. Biggar.

*Belgium and Luxembourg*, G. Woods.

*Canada*, W. Warnock.

*Denmark and Netherlands*, E. MacWhite.

*France*, T. V. Commins.

*Federal Republic of Germany*, E. L. Kennedy.

*Great Britain*, J. G. Molloy, 17 Grosvenor Place, London, S.W.1.

*India*, V. Iremonger.

*Italy and Turkey*, D. R. McDonald.

*Nigeria*, P. J. G. Keating.

*Portugal*, D. B. O'Sullivan (Chargé d'Affaires).

*Spain*, J. W. Lennon.

*Sweden, Norway and Finland*, T. J. Horan.

*U.S.A.*, W. P. Fay.

*United Nations Mission (New York)*, C. C. Cremin;

(Geneva), S. P. Kennan (Minister).

*European Communities*, S. Morrissey.

#### THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include ■ High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine ■ matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with ■ right of appeal ■ determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

*Chief Justice*, Hon. Cearbhall Ó Dalaigh (Daly)..... £6,360

*President of the High Court*, Hon. Andreas Ó Caoimh (O'Keefe)..... 4,950

*Judges, Supreme Court*, Hon. Kevin Haugh; Hon. Brian Walsh; Hon. F. G. Budd; Hon. W. O'B. Fitzgerald..... 4,950

*Judges, High Court*, Hon. R. McLoughlin, Hon. George Murnaghan; Hon. Thomas Teevan; Hon. Seán Kenny; Hon. Seamus Henchy; Hon. Barra O'Brien (*ex officio*); Hon. Sean Butler..... each 4,400

*Master of High Court*, John O. Leary, s.c.

#### DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. There is an advisory Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1970, provide for approximately 24,200 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. The Naval Service has three corvettes and two tenders. The Defence Estimates for the year ending March 31, 1970, provide for an expenditure of £12,852,000.

#### FINANCE

	1968-69 (Actual)	1969-70 (Estimated)
Revenue.....	£345,480,000	£393,220,000
Expenditure.....	353,850,000	393,220,000

In addition to the Expenditure figures shown above there were certain services of a capital nature regarded ■ proper to be met from borrowing. Issues for these services in 1968-69 amounted to £106,670,000, and for 1969-70 are estimated at £106,220,000.

The estimated Revenue for 1969-70 includes Customs, £82,120,000; Excise, £82,990,000; Estate etc. Duties, £7,190,000; Income Tax, including Surtax, £90,480,000; Corporation Profits Tax, £13,500,000; Motor Vehicle Duties, £13,100,000; Stamp Duties, £5,700,000; Post Office Services, £27,100,000; Turnover Tax, £19,720,000; Wholesale Tax, £19,520,000.

The principal items of estimated current Expenditure for 1969-70 are Debt Service, £88,940,000; Agriculture, etc., £68,200,000; Defence, £12,850,000; Police and Justice, £10,650,000; Education, £49,070,000; Social Welfare, £59,380,000; Health Services, £30,830,000; Postal Services, £17,840,000; Superannuation, £12,200,000.

The Gross Debt (*provisional*) on March 31, 1969, was £1,004,100,000 with assets £522,300,000, leaving the net total of the debt at £481,800,000.

#### RELIGION

(Census of 1961)

Catholic.....	2,673,473
Church of Ireland.....	104,016
Presbyterians.....	18,953
Methodists.....	6,676
Others.....	15,223
Total.....	2,818,341

#### EDUCATION

Primary education is directed by the State. (There are 4,797 primary schools with an enrolment of 506,225 and average daily attendance ■ per cent.) Secondary education is in private hands and is largely conducted by Religious Orders (585 recognized schools with 98,667 pupils 12-20 years of age). Vocational (continuation and technical) education is conducted by 38 local Committees in 342 permanent schools (excluding 14 residential schools of domestic training and ■ day trades preparatory school) and ■ large number of temporary centres (37,520 full-time day students and 68,222 other students). The foregoing figures are for school year 1965-66.

The estimated State expenditure on education in 1968-69, excluding administration and inspection,

is Primary £20,857,000; Secondary £14,487,000; Vocational £5,790,000; Science and Art £705,047. The vote for Universities and Colleges for 1968-69 amounts to £6,013,000 while in addition grants of £785,984 are provided in respect of the Faculties of General Agriculture and Dairy Science.

\* There are two Universities in Dublin, of which the National University has 3 constituent colleges (Dublin, Cork and Galway) with 1,032 Professors, etc., and 13,669 students; and Trinity College, Dublin, with 259 Professors, etc., and 3,546 students in the academic year 1966-67.

### PRODUCTION AND INDUSTRY

*Agriculture and Livestock.*—In 1968 there were 704,400 acres under corn crops, 393,600 under root and green crops, 7,900 under fruit and 2,095,300 under hay, a total of 3,401,200 acres. The principal produce in 1968 was: oats 281,000 tons; wheat 405,800 tons; barley, 740,500 tons; turnips, 2,408,700 tons; potatoes, 1,598,600 tons; sugar beet, 1,075,800 tons; and hay, 4,823,300 tons. The live stock included, 5,571,800 cattle, 4,077,200 sheep, 1,063,300 pigs and 133,600 horses and ponies.

*Minerals.*—900 persons were employed in the coal mines in 1968 and 169,000 tons of coal won.

*Sea Fisheries.*—5,376 persons were employed in the fisheries in 1967, the total value of all fish (excluding salmon) landed being £2,153,000.

### COMMUNICATIONS

*Railways.*—In the year ended March 31, 1968, there were 1,334 miles of railway all of standard (5 ft. 3 in.) gauge; 8,889,565 passengers and 2,861,236 tons of merchandise were conveyed; the receipts were £10,194,542 and expenditure £12,379,879. These figures are in respect of railway working by *Coras Iompair Éireann*, the national transport undertaking which is now the only concern operating a rail service in the State.

*Road Motor Services.*—In 1968 road motor (omnibus) vehicles carried 293,840,376 passengers, the gross receipts being £10,765,916.

*Shipping.*—In 1967 the number of ships with cargoes and ballast in the foreign trade which arrived at Irish ports was 12,389 (12,975,738 net registered tons; of these 1,961 (1,480,873 net registered tons) were of Irish nationality.

### CIVIL AVIATION

*Shannon Airport*, 15 miles W. of Limerick, is on the main transatlantic air route. In 1968 the airport handled 718,737 passengers, 29,095 tons of cargo and 1,301 tons of mail.

*Dublin Airport*, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline *Aer Lingus* and other airlines. During 1968 the airport handled 1,573,889 passengers, 33,434 tons of cargo and 2,022 tons of mail.

*Cork Airport*, 5 miles S. of Cork, serves the cross-channel and European services operated by *Aer Lingus* and other airlines. During 1968 the airport handled 163,048 passengers, 726 tons of cargo and 2,734 tons of mail.

Licensed private aerodromes are: *Ballyfree* (5 miles west-south-west of Wicklow Town); *Castlebar* (1 mile east of Castlebar); *Coonagh* (2 miles west of Limerick); *Dundalk* (5 miles south of Dundalk);

*Dunmore East* (10 miles south-east of Waterford); *Headfort* (2 miles east-north-east of Kells); *Killarney Race Course* (1 mile south of Killarney); *Orranmore* (5 miles east of Galway); *The Commons (Thurles)* (1 mile south-west of Thurles); *Weston* (9 miles west of Dublin).

### OVERSEAS TRADE

Year	Imports	Exports	Trade Balance
	£	£	£
1963	307,683,542	196,048,758	- 111,634,784
1964	349,318,409	222,003,941	- 127,314,468
1965	371,846,473	220,811,486	- 151,034,987
1966	372,566,792	243,323,022	- 128,243,770
1967	392,259,635	285,086,014	- 107,173,621
1968	489,516,663	332,473,295	- 157,043,368

#### Trade With U.K.

	1967	1968
Imports.....	£186,489,000	£260,528,000
Exports.....	223,644,000	267,922,000

#### PRINCIPAL ARTICLES

##### Imports (1969)

The principal groups were: live animals, £15,143,409; food, drink and tobacco, £66,686,481; petroleum and petroleum products, £32,186,756; chemicals, £47,957,384; machinery (non-electric), £60,139,386; electrical machinery, £24,725,091; transport equipment, £34,195,858; metal and manufactures, £42,015,408; textiles and clothing, £49,829,125; paper, paperboard and manufactures, £13,596,630.

##### Domestic Exports (1968)

Principally live animals, £57,977,641; meat and meat preparations, £59,012,867; other food, drink, and tobacco, £58,839,251; machinery and transport equipment, £19,474,861; clothing, headgear and footwear, £16,451,186; textiles, £21,251,425; metal ores and scrap, £10,956,622; metals and manufactures, £9,073,919; non-metallic mineral manufactures, £6,334,129; chemicals £12,568,275.

**CAPITAL.**—Dublin (*Baile Atha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1966, its population was 568,772. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns, with populations at the Census of 1966 are: Ψ Cork (122,146); Ψ Limerick (55,912); Ψ Dun Laoghaire (51,772); Ψ Waterford (29,842); Ψ Galway (24,597); Ψ Dundalk (20,002); Ψ Drogheda (17,908); Sligo (13,424); Bray (12,699); Wexford (11,542); Tralee (11,213); Clonmel (11,031); Kilkenny (10,052); Athlone (9,623).

**FLAG.**—Equal vertical stripes of green, white and orange.

**NATIONAL DAY.**—March 17 (St. Patrick's Day).

# The United States of America

## Area and Population

Population, 1969.—The total resident population of the United States on May 1, 1969, was estimated at 201,593,000, excluding Armed Forces stationed abroad. Civilian resident population at the same date was estimated at 199,360,000. Including Armed Forces stationed abroad (May 1, 1969), 202,882,000.

1968*	3,490,000	17.4	1,923,000	9.6

Births based on 50 per cent. sample. \*Provisional.

Note.—Figures tabulated are for the United States, including (from 1959) Alaska and (from 1960) Hawaii. Deaths exclude fetal deaths. Except for 1960, birth and death rates are based on the population as estimated on July 1. Figures for 1960 are based on the Census taken on April 1.

## IMMIGRATION AND NATURALIZATION

From 1820 to 1968 44,430,733 immigrants were admitted to the United States. Of the 454,448 admitted in 1968, 28,586 were born in the United Kingdom; 23,593 in Italy; 15,920 in Germany; 13,047 in Greece; 12,212 in Portugal; 16,731 in the Philippines; 12,738 in China and Taiwan; 43,563 in Mexico; 27,662 in Canada; 17,470 in Jamaica; 9,250 in the Dominican Republic and

21,976 in South America. Also included in the total were 91,520 Cuban refugees already in the United States who were granted immigrant status. During 1968, 102,726 alien residents of the United States became naturalized citizens and 33,379 persons acquired citizenship status at birth abroad or after birth by naturalization, marriage or other reasons.

## MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolution.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1960	1,523,000	8.5	393,000	2.2
1961	1,548,000	8.5	414,000	2.3
1962	1,677,000	8.5	413,000	2.2
1963	1,654,000	8.8	428,000	2.3
1964	1,725,000	9.0	450,000	2.4
1965	1,800,000	9.3	479,000	2.5
1966	1,857,000	9.5	499,000	2.5
1967*	1,913,000	9.7	523,000	2.6
1968*	2,059,000	10.3	582,000	2.9

\* Provisional.

Note.—Figures include Alaska (from 1959) and Hawaii (from 1960). Rates are based on population as estimated on July 1, except for the Census year of 1960.

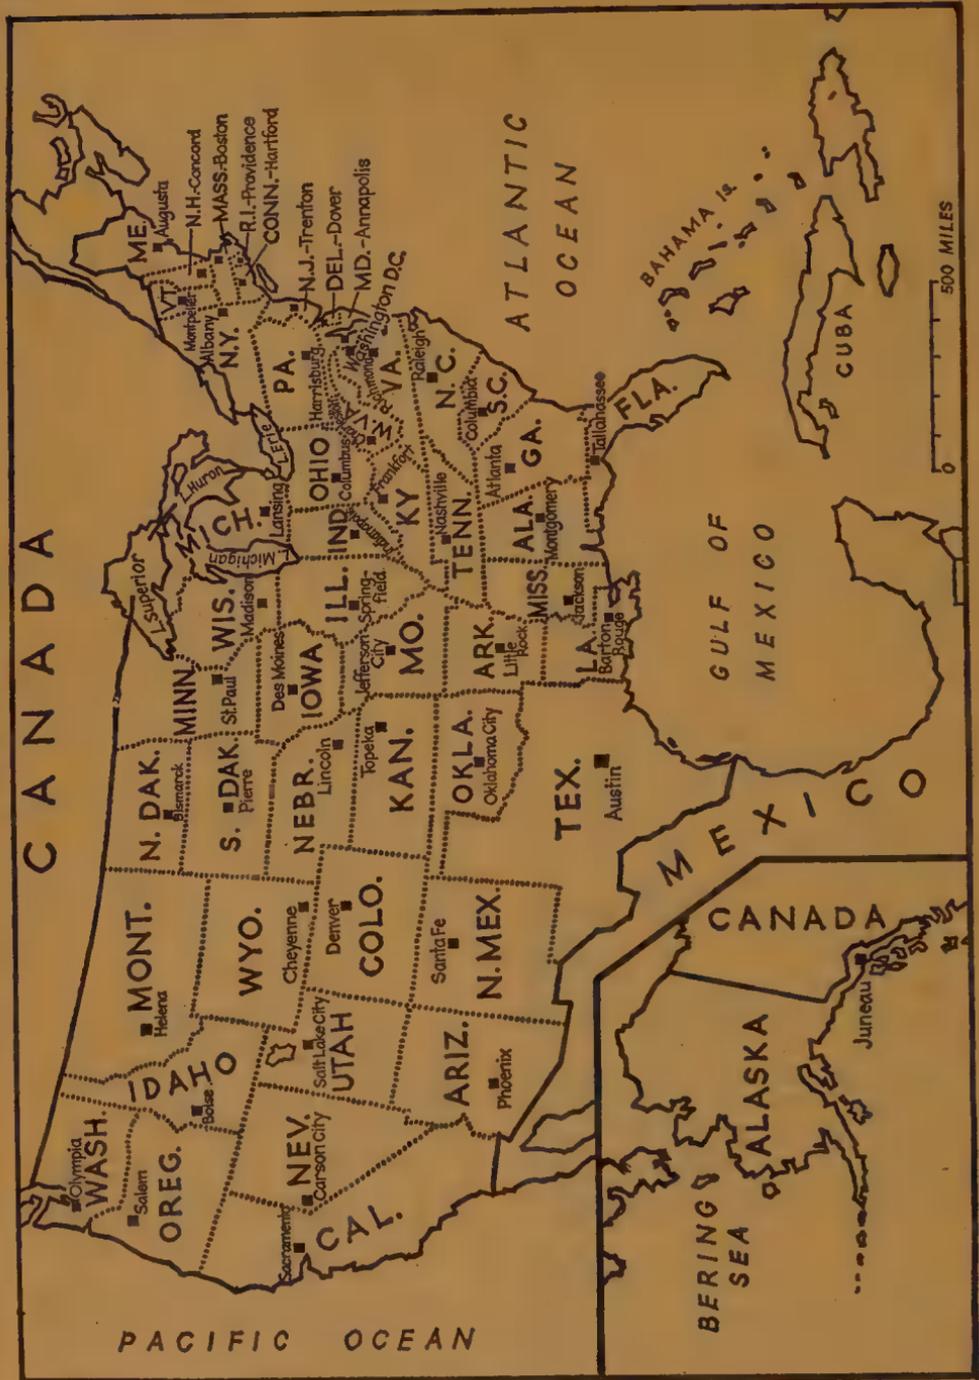

## Increase of the People.

Year of Census	Total Population				Increase over preceding census	Inter-Censal Immigrants*
	White	Negro	Other Races	Total		
1920	94,820,915	10,463,131	426,574	105,710,620	13,738,354	5,735,811

## PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude  $25^{\circ} 07' - 49^{\circ} 23'$  North and longitude  $66^{\circ} 57' - 124^{\circ} 44'$  West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of  $71^{\circ} 23' N.$ , at Point Barrow (2,502 miles from the U.S. geographic centre).

The general coastline of the 50 States has a length of about 2,069 miles on the Atlantic, 7,623 miles on the Pacific, 1,066 miles on the Arctic, and 1,631 miles on the Gulf of Mexico.

The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of 3,710 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals, gold and silver, have been mined chiefly in Arizona, Colorado, California, Montana, Utah, Idaho and South Dakota. The highest point is Mount McKinley (Alaska), 20,320 ft. above sea level and the lowest point of dry land is in Death Valley (Inyo, California), 282 ft. below sea-level. The mean elevation of the United States is approximately 2,500 ft.

## THE PRESIDENTS OF THE UNITED STATES OF AMERICA

Name (with Native State)	Party	Born	Inaug.	Died	Age

† Died in office.

§ Assassinated.

(a) Elected as Vice-President.

† Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

## GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of 1 organized Territory. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternately. July 4 (Independence Day) is observed as the National Day.

**THE CONSTITUTION.**—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-fifth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951, March 29, 1961, Jan. 23, 1964 and Feb. 10, 1967), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

## THE EXECUTIVE

The Executive power is vested in a President, who is elected every four years, and is eligible for re-election for one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of \$200,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance of not exceeding \$40,000. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein. (2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials. (3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked. (4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress. (5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

President of the United States, RICHARD MILHOUS NIXON, born Jan. 9, 1913, elected President, Nov. 6, 1968. Republican.

Vice-President, Spiro Theodore Agnew, born Nov. 9, 1918, elected Vice-President, Nov. 6, 1968.

## THE CABINET (Each \$60,000)

Secretary of State, William P. Rogers, of New York (born June 23, 1913), appointed Dec. 11, 1968.

Secretary of the Treasury, David M. Kennedy, of Utah (born 1905), appointed Dec. 11, 1968.

Secretary of Defence, Melvin R. Laird, of Nebraska (born 1922), appointed Dec. 11, 1968.

Attorney-General, John N. Mitchell, of Michigan (born 1913), appointed Dec. 11, 1968.

Postmaster-General, Winton M. Blount, of Alabama (born 1922), appointed Dec. 11, 1968.

Secretary of Interior, Walter J. Hickel, of Kansas (born Aug. 18, 1919), appointed Dec. 11, 1968.

Secretary of Agriculture, Clifford M. Hardin, of Indiana (born 1915), appointed Dec. 11, 1968.

Secretary of Commerce, Maurice H. Stans, of Minnesota (born 1908), appointed Dec. 11, 1968.

Secretary of Labour, George P. Shultz, of New York (born Dec. 13, 1920), appointed Dec. 11, 1968.

Secretary of Health, Education and Welfare, Robert H. Finch, of Arizona (born 1925), appointed Dec. 11, 1968.

Secretary of Housing and Urban Development, George W. Romney, of Michigan (born 1907), appointed Dec. 11, 1968.

Secretary of Transportation, John A. Volpe, of Massachusetts (born 1908), appointed Dec. 11, 1968. [1968]

## UNITED STATES EMBASSY

Grosvenor Square, W.1

[01-499-9000]

Ambassador Extraordinary and Plenipotentiary in London, His Excellency Walter H. Annenberg (1969).

Minister, Hon. Thomas L. Hughes.

Air Attaché, Col. John M. Cutler, U.S.A.F.

Army Attaché, Col. Thomas C. Finneran, U.S.A.

1st Secretaries, Leroy F. Percival, Jr.; Irvin S. Lippe; John J. Ingersoll; Wayne W. Fisher (Consular); Julius W. Walker; Richard W. Finch; Gordon D. King (Politico-Military Affairs); Sanford Menter (Administration); William M. Owen (Economic); Thomas M. Gaffney (Administration);

John B. McGrath (*Economic*); John P. Mulligan; Allan R. Turner (*Consular*); Harry L. Heikenen (*Commercial*); William J. Ford (*Economic*). and Secretaries, Mrs. Marcia L. Martin; Gerald G. Oplinger.

Attaches, David L. Hume (*Agriculture*); James A. Griffin (*Finance*); John T. Minnich (*Legal*); Bronson Tweedy; William L. R. Rice (*Atomic Energy*); R. Montgomery Scott; R. J. Murray (*Politico-Military Affairs*); Henry T. Snowdon (*Civil Air*); David D. Whipple; John R. Heidemmann; James T. Pettus (*Public Affairs*); William J. Miller (*Public Affairs*); Gordon R. Firth (*Consular*); Dr. Robert C. Goodell (*Public Affairs*); Dr. Alan G. Mencher (*Scientific*); Sheldon J. Krys; Edward J. Donnelly (*Administration*).

CAPITAL OF THE UNITED STATES

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 69.245 square miles, with a population at the Census of 1960 of 763,956.

The District of Columbia is ruled by a Commissioner and assistant and a 9-member City Council, all appointed by the President.

The City of Washington is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 416,235. The Senate consists of 100 members. The salary of a Senator is \$42,500 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 Representatives and a resident commissioner from Puerto Rico. The salary of a Representative is \$42,500 per annum, with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On Nov. 1, 1966, there were 114,377,000 persons of voting age, excluding members of the armed forces overseas.

THE NINETY-FIRST CONGRESS

Noon of Jan. 4, 1969, to Noon of Jan. 3, 1971. President of the Senate, Spiro T. Agnew (Vice-President).

Speaker of the House of Representatives, John W. McCormack, Mass. \$43,000 Secretary of the Senate, Francis R. Valeo, District of Columbia.

Clerk of the House of Representatives, William P. Jennings, Va.

Members of the 91st Congress were elected on Nov. 5, 1968.

The 91st Congress is constituted as follows: Senate.—Democrats, 57; Republicans, 43. Total, 100. House of Representatives.—Democrats, 245; Republicans, 188; (2 vacancies). Total 435.

THE JUDICATURE

The Federal judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, etc., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The United States Courts of Appeals, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit Judges within the circuit. (3) The 93 District Courts served by 340 District Court Judges.

THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.) Chief Justice, Warren E. Burger, Minn., born Sept. 17, 1907, appointed June 23, 1969. \$62,500

Table with columns: Name, Born, Apptd. Associate Justices (each \$60,000). Includes Hugo L. Black, Ala., Wm. O. Douglas, Conn., John M. Harlan, N.Y., William J. Brennan, Jr., N.J., Potter Stewart, Ohio, Byron R. White, Colo., Thurgood Marshall, Md.

Clerk of the Supreme Court, John F. Davis.

CRIMINAL STATISTICS, U.S.

Table with columns: Crime, 1967, 1968. Includes Murder, Rape, Robbery, Aggravated Assault, Burglary, Larceny (\$50 and over), Thefts of Automobiles, Total.

DEFENCE

Department of Defence.

Secretary of Defence (in the Cabinet), Melvin R. Laird Secretary of the Army, Stanley R. Resor. Secretary of the Navy, John H. Chafee. Secretary of the Air Force, Robert C. Seamans, jr. Chairman, Joint Chiefs of Staff, Gen. Earle G. Wheeler, U.S. Army (July 3, 1964).

The Department of Defence includes the Secretary of Defence as its head, the Deputy Secretary of Defence, the Defence staff offices, the Joint Chiefs of Staff and the Joint Staff, the three military departments and the military services within those departments, the unified and specified commands, and other Department of Defence agencies as the Secretary of Defence establishes to meet specific requirements. The Defence staff offices and the Joint Chiefs of Staff, although separately organized, function in full coordination and cooperation. They include the offices of the Director of Defence Research and Engineering, the seven Assistant Secretaries of Defence, the General Counsel of the Department of Defence and such other staff offices as the Secretary of Defence may establish. The Joint Chiefs of Staff, as a group, are directly responsible to the Secretary of Defence for the functions assigned to them. Each member of the

Joint Chiefs of Staff, other than the Chairman, is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary and functions under the direction, authority and control of the Secretary of Defence.

The Department of Defence maintains and employs armed forces: (1) to support and defend the Constitution of the United States against all enemies, foreign and domestic; (2) to insure, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; (3) to uphold and advance the national policies and interest of the United States; and (4) to safeguard the internal security of the United States. All functions in the Department of Defence and its component agencies are performed under the direction, authority and control of the Secretary of Defence.

Commanders of unified and specified commands are responsible to the President and the Secretary of Defence for the accomplishment of military missions assigned to them.

### Unified Defence Commands

#### Commanders-in-Chief

*U.S. European Command, Brussels.*—Gen. Andrew J. Goodpaster (concurrently *NATO Supreme Allied Commander*).

*U.S. Southern Command, Quarry Heights, Panama Canal Zone.*—Gen. George R. Mather (*U.S. Army*).

*Atlantic, Norfolk, Virginia.*—Adm. Ephraim P. Holmes (*U.S. Navy*) (concurrently *NATO Supreme Allied Commander, Atlantic*).

*Pacific, Hawaii.*—Adm. John S. McCain, Jr. (*U.S. Navy*).

*U.S. Naval Forces, Europe, London.*—Adm. Waldemar F. A. Went (*U.S. Navy*).

*N. American Air Defence Command, Colorado Springs.*—Gen. Seth J. McKee (*U.S.A.F.*).

*Strategic Air Command, Omaha.*—Gen. Bruce K. Holloway (*U.S.A.F.*).

*Alaskan Command, Anchorage, Alaska.*—Lt.-Gen. Robert G. Ruegg (*U.S.A.F.*).

*U.S. Strike Command, MacDill, Florida.*—Gen. Theodore J. Conway (*U.S. Army*).

*Army.*—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30 1959, to 501,700 (excluding Air Corps). The strength in June, 1969, was approximately 1,534,200. Stationed in Europe were five divisions and other large combat elements of less than division size. There were two divisions in Korea. Strong combat units were on duty in the Caribbean area and in Alaska and other combat units were in Italy as part of the NATO force. On June 22, 1968, some 358,000 troops were serving in South Vietnam. *Chief of Staff of the Army, Gen. William C. Westmoreland* (July 3, 1968).

*Navy.*—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,880,205. The strength in May, 1969, was 760,800. Strength of the Marine Corps, 297,000.

The U.S. Navy had in service in May, 1969, some 940 vessels, including 15 attack carriers, 7 anti-submarine carriers, 13 cruiser types, 230 destroyer types, 102 submarines (including 40 nuclear, 41 *Polaris*-carrying), 72 minecraft, 157 amphibious craft and more than 200 other active fleet ships. The exact figures are classified.

*Air.*—The United States Air Force was established as a separate organization on September 18, 1947. In May 1969, there were more than 1½ million people in the Air Force. About 875,000 officers and airmen are on active duty, with more than 340,000 civilian employees and some 495,000 members of the Air Force Reserve and Air National Guard.

There are approximately 14,000 aircraft in the Air Force inventory. To deter aggression the Air Force has 646 strategic bombers maintaining constant alert as well as 1,054 inter-continental ballistic missiles in hardened silos. In addition, the Air Force maintains the capability to carry out limited war and special air warfare operations. In March, 1961, the Air Force was assigned primary responsibility for the Department of Defence space development programmes and projects. By Dec. 1968, the United States had placed 544 spacecraft in orbit round the earth and sent 35 others to the moon and other distant planets. These included Air Force, Army and N.A.S.A. shots.

*Chief of Staff of the U.S. Air Force, Gen. John D. Ryan* (Aug. 1, 1969).

## RACES AND RELIGIONS

### National Origins of the Population

In 1960, of the total white population of 158,837,671, 5.9 per cent. were foreign born; of the total non-white population of 20,488,000, 2.2 per cent. were foreign born. 34,050,406 persons in the United States were of foreign stock, the countries of origin of largest groups being:

### PUBLIC DEBT

On June 30, 1969, the total *Federal Debt* of the United States stood at \$367,152,000,000; the level at the end of the fiscal year 1968 was \$369,769,000,000.

### COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical workers—single persons and families—in 50 cities representative of all cities in the United States) showed a monthly average during the calendar year 1968 of 121.2 (the basic figure of 100 being the 1957-59 average). The average of consumer prices for the first five months of 1969 was: January, 124.1; February, 124.6; March, 125.6; April, 126.4, and May, 126.8.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) rose from 116.3 to 121.2 in the calendar year 1968. In the year to May, 1969, food prices rose from 118.8 to 123.7; all other commodities—112.5 to 117.5; rent—114.6 to 118.1; all other services—137.1 to 148.1.

The wholesale price index of all commodities showed a monthly average during 1968 of 108.7 (the average for the years 1957-59 is 100). The preliminary index in June, 1969, was 113.2. Wholesale prices for farm products rose from 99.7 in 1967 to 102.2 in 1968. (The preliminary index for June 1969, was 111.2.) Industrial prices averaged 109.0 in 1968, increasing to 112.2 (prelim.) in June, 1969.

### PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$538.9 billion in 1965 to \$586.8 billion in 1966 and further to \$628.8 billion in 1967. In the year 1967

labour income rose by \$31.3 billion, business and professional income by \$1.5 billion and personal interest income by \$3.7 billion. Dividend income rose by \$1.2 billion to \$22.9 billion. Personal incomes from all sources other than agriculture rose by \$42 billion. Preliminary estimates for July, 1968 (seasonally adjusted annual rate) showed personal income at \$689.2 billion, an increase of \$60.4 billion over the 1967 level. Labour income rose from \$446.7 billion in 1967 to \$492.0 in June, 1968, an increase of \$45.3 billion. Business and professional incomes rose from \$46.3 billion in 1967 to \$48.0 billion in July, 1968, and personal interest income rose from \$46.8 billion in 1967 to \$52.6 billion in July, 1968.

*Disposition of personal incomes.*—Of the total of \$628.8 billion gross personal income in 1967, \$82.5 billion was taken by personal taxes and \$506.2 billion was consumed on: Durable goods (\$72.6 billion); non-durable goods (\$215.8 billion); and services (\$203.8 billion), showing personal saving totalling \$40.2 billion out of \$546.3 disposable personal income. At current prices the latter showed an average of \$2,744 per head. Savings amounted to 7.4 per cent. of disposable personal income, as against 6.4 per cent. in 1966.

*Private domestic investment.*—The total gross private domestic investment rose from \$67.8 billion in 1957 to \$114.3 billion in 1967. Fixed investment in new residential construction (excluding farm investment) rose to \$24.6 billion (1957, \$20.2 billion) and other non-farm construction to \$24.0 billion (1957, \$19.5 billion). Investment in producers' durable equipment (excluding farm equipment) rose from \$25.9 billion in 1957 to \$51.0 billion in 1967.

\* Held by U.S. Treasury only. † Totals include value of early issue notes in process of withdrawal, not separately shown. Value June, 1968, \$84·9 m. From 1967, totals include silver bullion in excess of amount needed to secure silver certificates. Silver certificates have not been redeemable in silver since June 24, 1968.

## AGRICULTURE AND LIVESTOCK

**Agriculture.**—The total land surface, including Hawaii and Alaska, is 2,280,864,000 acres of which about 50 per cent. is in farms. The total number of farms in 1969 was 3,926,310. The cash income from crops in 1967 was \$18,401,000,000, and in 1968, \$18,847,000,000. Cash income from livestock and livestock products in 1967 was \$24,292,000,000 and in 1968, \$25,539,000,000.

Combined production of all crops in 1968 was about 2 per cent. more than in 1967, due largely to increases in food grains, oilseeds, and cotton, offset in part by decreases in feed grains and tobacco. The record output was produced on a per cent. fewer acres, as yields per acre averaged 4 per cent. above 1967. Yields per acre were at or record highs for wheat, rice, soybeans, sugarcane, hay, and potatoes. Wheat, rice and soybeans set new records in production, as did vegetables and peanuts. Farm output of livestock and livestock products was up slightly in 1968 as declines in poultry and dairy products nearly offset an advance in meat animal production.

## MINERALS

The value of mineral production in the United States in 1968 totalled an estimated \$25.0 billion compared with \$23.9 billion in 1967 and \$23.0 billion in 1966. Domestic mine production of gold fell from the 1966 figures, but copper, silver and lead production increased. Zinc and iron production were down from the previous year. Uranium ore output, mine production of mercury, and primary magnesium production showed significant increases in 1968 from 1967.

Nearly 11 per cent. of the mineral production of the United States (in value) consists of fuels. In 1968, U.S. production of crude petroleum amounted to 3,340 billion barrels, valued at \$9.8 billion. Total demand (domestic plus exports) averaged 13.3 million barrels daily, an increase of 6.0 per cent. over 1967.

In the three principal oil-producing states in 1968 daily average production increased as follows: Louisiana, 117,000 barrels (total average daily production, 2,233,000 barrels); Texas, 137,000 barrels (total average daily production 3,097,000 barrels); and California, 44,000 barrels (total average daily production 1,026,000 barrels).

Production of anthracite again decreased in 1968, reflecting continued declines in major markets at home and abroad. Pennsylvania anthracite production fell 5 per cent. below the 1967 figure, which was itself a 5 per cent. drop from 1966. Anthracite exports to Canada fell 11 per cent. below the 1967 tonnage. The quantity shipped to western Europe was 5 per cent. above the 1967 level. The continued loss in the domestic market was due to competition from other fuels, principally oil and gas.

Bituminous coal and lignite produced in 1968 totalled 545 million tons, a decrease of 1.4 per cent. over 1967. Exports remained at the same relative level of 5,250,000 tons. The average value at the mine was estimated at \$4.72 a ton in 1968, 25 cents below the 1967 value. The mine prices and production total value of \$2.6 billion remained the same in 1967.

## LABOUR

**Organized Labour.**—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formally established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership in 1966 was 16,200,000 (including 1,241,000 members in Canada). There are also 3,000,000 members of unions not affiliated to the AFL-CIO.

Approximately 28.0 per cent. of the non-agricultural labour force of the United States is estimated to be organized.

**Work Stoppages.**—There were 4,950 stoppages recorded in 1968. There were 47,300,000 man-days of idleness, representing 0.27 per cent. of estimated working time of all workers.

**Employment and Unemployment.**—The civilian labour force (working population) was 79,563,000 in May, 1969. This includes self-employed, wage and salary-earners, and unpaid family workers, employed and unemployed. Unemployment was estimated at 2,299,000 in May 1969 (2.9 per cent.).

**Wages.**—In May, 1969, gross average weekly earnings by industry ranged from \$197.22 per week in electrical work to \$54.55 in variety stores (20.5 hours and \$1.85 average hourly earnings). The average for all manufacturing was \$129.34, an increase of over 447 per cent. since 1939, but in terms of 1957-59 purchasing power the increase was 83 per cent.

	Wages May, 1969	Average Weekly Earnings	Hours per Week	Average Hourly Earnings

On Feb. 1, 1967, the minimum wage set by federal law became \$1.40 an hour for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities closely related and directly essential to such production. The law requires at least time and a half of an employee's regular rate of pay for all hours over 40 a week. From Feb. 1, 1968, the minimum wage for these employees became \$1.60 an hour.

Other employees employed in certain large enterprises having some employees engaged in commerce or the production of goods for commerce, on Feb. 1, 1967, became entitled to a minimum wage of \$1.00 an hour increasing by 15 cents each year until it reaches \$1.60 after Feb. 1, 1971. Overtime premium—44 hours in a week after Feb. 1, 1967—is reduced to 42 hours one year later and to 40 hours after Feb. 1, 1969.

There are certain exemptions from these monetary requirements in specific occupations and industries.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health funds financed by the employer or by employer and employees jointly.

## ROADS

In 1967 there were 3,704,914 miles of roads and streets in the United States, of which 3,183,711 miles were in rural areas and 521,203 miles were in municipal areas. Surfaced roads and streets account for 2,827,303 miles of the total; 877,611 miles were unimproved and graded and drained. State primary roads, including extensions in municipal areas, total 477,869 miles (473,869 surfaced). Other roads and streets under State control total 289,349 miles (257,594 surfaced), 2,773,442 miles are under local control (2,049,288 surfaced); and 164,254 miles (46,522 surfaced) are under Federal control (in national forests and parks).

An estimated total of \$16,305,000,000 was spent in 1968 for roads and streets in the United States. Of this total \$11,417,000,000 was spent for State highways, \$2,233,000,000 was spent for county and local rural roads, \$2,297,000,000 was spent for city streets and \$358,000,000 was spent on roads in Federal areas. Capital outlay accounts for 61.9 per cent. of the total expenditures; 23.6 per cent. was spent for maintenance; and 5.7 per cent. for administration; 5.0 per cent. for highway police and safety; and 3.8 per cent. for interest on highway bonds.

*Motor Vehicles and Taxation.*—The number of motor vehicles registered in 1968 in the United States was 101,048,450, an increase of 4.2 per cent. over the 1967 total of 96,930,949. The State governments received \$1,468,554,000 in 1941 and \$8,034,411,000 in 1968, respectively, from motor-fuel, motor-vehicle, and motor-carrier taxes. In 1967 the Federal Government received \$6,210,497,000 from excise taxes ■■■ motor vehicles and parts, tyres and tubes, gasoline, diesel and special fuels and lubricating oils.

*Accidents.*—In 1968 there were 55,500 deaths

caused by motor vehicle accidents. The death rate per 100,000,000 vehicle miles of travel was 5.5 in both 1967 and 1968.

## SHIPPING

The active ocean-going Merchant Marine of the U.S. on June 1, 1969, consisted of 1,072 vessels of 1,000 gross tons and over, of which 900 were privately owned and 172 were government-owned ships under charter or general agency agreement for operation by private companies, primarily for the carriage of supplies for the Military Sea Transportation Service. Of the active vessels, 794 were dry cargo ships, 21 were combination passenger and cargo, and 257 were tankers. There were 880 ships in the National Defense Reserve Fleet of inactive government-owned vessels, of which 345 were to be sold for scrap.

## AIR TRANSPORT

United States domestic and international scheduled airlines in 1968 were estimated to have carried 150,170,000 passengers over 113,958,321,000 passenger miles, 95 per cent. of which were flown in jets. The freight flown by the scheduled airliners during 1968 totalled 2,804,797,000 ton miles and express 105,135,000 ton miles. In addition, the airliners flew 1,256,944,000 ton miles of mail, an increase of 28.9 per cent. over 1967.

Total operating revenues of all U.S. scheduled airlines reached the record figure of \$7,773,328,000 in 1968, an increase of 13.2 per cent. over 1967. Similarly, total operating expenses rose to a record high total of \$7,248,450,000 last year, or 17.7 per cent. more than the previous year. The net operating income (i.e., before deduction of taxes, interest, etc.) was \$524,878,000, a decrease of 25.9 per cent. from the previous year, resulting in a profit of \$216,108,000 compared with a profit of \$415,411,000 in 1967.

Ten principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (11); (b) Domestic Local Service Line Carriers, operating routes of lesser traffic density between the smaller traffic centres and between small and large centres (9); (c) The International and Territorial Carriers, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, other than Canada, and over international waters; also between foreign countries and into Mexico, the Caribbean and to Alaska and Hawaii (14); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Intra-Alaskan Carriers, providing service within Alaska (4); (f) All Cargo Carriers (3); (g) Helicopter Carriers (4); (h) Supplemental Air Carriers (14); (i) Air Freight Forwarding Companies (18) and Air Taxi operators; and (j) Intra-State Carriers, with operations limited to State boundaries.

In 1968, 300,451 persons were employed by the domestic and international airlines, 8.8 per cent. more than in 1967.

U.S. SCHEDULED AIRLINE INDUSTRY STATISTICS, 1968 (Thousands)

## EDUCATION

### State School Systems

Almost every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In the autumn of 1968 the total number of children in the United States of 5 to 17 years of age was 52,288,000, of whom 44,962,000 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was estimated at 41,157,000 for the 1968-69 school year, the average length of school term was estimated at 179 days, and the average number of days attended by each pupil enrolled at 165. In 1968, 1,943,000 teachers were employed. The estimated average annual salary of all teachers was \$7,900.

The 1967-68 total revenue receipts for school purposes, excluding balances on hand, were about \$29,464,000,000. Of this amount, about \$2,272,000,000 were received from Federal sources, \$11,884,000,000 from State sources and \$15,308,000,000 from county and local sources. For 1968-69 current expenditures are estimated at \$29,842,000,000. It is estimated that \$4,654,000,000 were expended for sites, buildings, furniture and equipment, and \$1,015,000,000 for interest.

### Institutions of Higher Education

In the autumn of 1968 enrolment in institutions of higher education numbered 7,571,600.

Institutions of higher education include universities, colleges, professional schools, and junior colleges. The 1968 survey of enrolments covered 2,491 institutions classified as follows: 1,625 universities, colleges and professional schools enrolling 5,775,200 students; and 866 junior colleges enrolling 1,796,400 students. Publicly controlled institutions of higher education enrolled 72 per cent. (5,469,500) of the students and privately controlled 28 per cent. (2,102,100).

During the school year 1967-68, 671,591 bachelor's and first professional degrees were conferred, 392,830 to men and 278,761 to women; 177,150 master's degrees, 113,749 to men and 63,401 to women; and 23,091 doctorates, 20,185 to men and 2,906 to women. Education, Social Sciences, and Business and Commerce were, in that order, the fields in which most students received first-level degrees. There were 135,848 bachelor's and first professional degrees in Education, 121,643 in Social Sciences, and 80,440 in Business and Commerce. The three leading fields of study for the master's degree were Education (63,664), Social Sciences (20,426) and Business and Commerce (17,868). The most popular fields of study on the doctorate level were Education (4,029), Physical Sciences (3,593) and Engineering (2,932).

Particulars of some of the Universities are: *Harvard* (19,641 students, including 5,805 women in 1967), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; *Yale* (8,549 students, including 1,007 women, in 1968), founded at New Haven, Connecticut, in 1701; *Bowdoin*, Brunswick, Me. (founded 1794; 956 men); *Brown*, Providence, R.I. (founded 1764; 5,164 students, including 1,427 women, in 1968); *Columbia*, New York, N.Y. (founded 1754; 24,922 students, including 10,759 women, in 1968); *Cornell* (founded at Ithaca, N.Y., 1865; 20,722

students, including 5,709 women, in 1968); *Dartmouth*, Hanover, N.H. (founded 1769; 3,740 students, including 74 women, in 1968); *Georgetown*, Washington, D.C. (founded 1789; 7,734 students, including 1,475 women, in 1968); *North Carolina*, Chapel Hill, N.C. (founded in 1789; 16,338 students, including 4,988 women, in 1968); *Pennsylvania*, Philadelphia, Pa. (founded 1740; 19,276 students, including 5,558 women, in 1968); *Pittsburgh*, Pittsburgh, Pa. (founded 1787; 27,816 students, including 10,986 women, in 1968); *Princeton*, Princeton, N.J. (founded 1746; 4,654 men and 139 women in 1968); *Tennessee*, Knoxville, Tenn. (founded 1794; 31,016 students, including 10,558 women, in 1968); *William and Mary*, Williamsburg, Va. (founded 1693; 8,957 students, including 3,847 women, in 1968); *New York University*, founded in 1831 at New York, had 33,707 students, including 12,311 women, in 1968.

### Private Schools

In the autumn of 1968 it was estimated that there were about 4,400,000 pupils in private kindergarten and elementary schools, and 1,400,000 pupils in private high schools and academies. Enrolment figures for private elementary and secondary schools include about 70,000 pupils enrolled in privately controlled schools for exceptional children and sub-collegiate departments of private institutions of higher education.

## SOCIAL WELFARE EXPENDITURE

The total value of government expenditure on social welfare (federal, state and local government) in 1967 was \$100,239,000,000, compared with \$52,293,000,000 in 1960 and \$23,508,000,000 in 1950. 54 per cent. of the 1967 total was Federal expenditure. In 1967 expenditure per person (of the total population of U.S.A.) was \$497—social insurance, \$185; education, \$177; public aid, \$44; health and medical services, \$40; veterans' welfare, \$34; other services, \$14 per person. Total expenditure by programmes was:

	1950	1960	1967
	million		
Social insurance.....	4,946	19,307	37,377

<b>TOTAL.....</b>	<b>32,560</b>	<b>57,719</b>	<b>100,239</b>

## WEIGHTS AND MEASURES

The *Weights and Measures* in the United States in common use are of British origin and in the case of weights and linear units correspond in large part with those now employed in Great Britain. The short ton of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the long ton of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0.9689 British bushel, and 1 U.S. gallon = 0.83267 British gallon. The U.S. liquid quart is divided into 32 fluid ounces.

The metric system was made lawful in the United States by Congress in 1866. It is used almost universally in scientific work and by the pharmaceutical industry in U.S.A. A decimal inch is regularly used in the automotive and other large industries and a decimal pound is also in use in industry and increasingly so in retail food stores.

## TERRITORIES, ETC. OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of over 94,100 in 1968. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

## CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

Canton Island was successively used for aviation support activities and as a missile tracking station by the U.S. National Aeronautics and Space Administration. These activities have been terminated and the island is now uninhabited. Enderbury has been uninhabited since World War II.

## GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 209 square miles, with an estimated Guamanian population (1967) of 83,000.

The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed by the President. From the elections of November, 1970, the Governor will be popularly

elected. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, Carlos Comacho.  
Secretary, Kurt Moylan.

CAPITAL, Agaña. Port of entry, Ψ Apra.

## WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese, Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945. Population (1960), 1,097.

Midway Islands, with a total area of 28 sq. miles and a population (1960) of 2,356, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

## PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat. and 65° 30'–67° 15' W. long., with a total area of 3,435 square miles and a population estimated (1968) of 2,739,000. The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 100 miles from west to east, and 35 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. About 7,550 miles of paved roads were in use in 1968. There are good harbours at San Juan, Mayaguez and Ponce. The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local government. Legislative functions are vested in the Legislative Assembly, which consists of 31 elected houses; the Senate of 27 members (2 from each of 13 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 9 members is appointed by the Governor, with the advice and consent of the Senate. There are 10 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all judges. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress, industrialization and welfare of the island during the last two decades. A programme of tax exemption has raised income from industry to a level higher than that from agriculture. Public schools are established throughout—enrolment in 1967 was 729,473.

CAPITAL.— $\Psi$  San Juan, population 477,000; Metropolitan Area (1967), 783,100. Other major towns are:  $\Psi$  Ponce (161,300); Bayamón (115,800);  $\Psi$  Mayaguez (92,500);  $\Psi$  Arecibo (80,100); and Caguas (75,700).

## FINANCE

	1966-67	1967-68
Revenue.....	\$430,000,000	\$490,800,000
Expenditure.....	681,800,000	776,000,000

## TRADE

	1966-67	1967-68
Total Imports....	\$1,784,000,000	\$1,969,000,000
Total Exports.....	1,320,000,000	1,449,000,000

## Trade with U.K.

	1967	1968
Imports from U.K..	£3,355,000	£6,101,000
Exports to U.K....	3,341,000	4,246,000

Governor, Luis A. Ferré, elected 1968.  
Resident Commissioner, Jorge L. Córdova.

## AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 30,800 in 1968.

Tutuila, the largest of the group, has an area of 52 square miles and contains a magnificent harbour.  $\Psi$  Pago Pago (pop. 1960, 1,251), the capital and seat of government. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces. Governor, John M. Haydon.

## TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1968 was estimated at 95,800. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary considerably among island groups and even more among islands and atolls in the same geographic area. Nine different languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947, administration being under the general jurisdiction of the Secretary of the Interior.

For administrative purposes, the territory is divided into six districts: The Marianas, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, Edward E. Johnston.  
Deputy High Commissioner, Peter T. Coleman.

CAPITAL (Provisional).—Saipan, Mariana Islands.

## VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 133 sq. miles, with an estimated population (1968)

of 58,500. *St. Thomas* (28 sq. miles) had an estimated population of 30,000; *St. Croix* (84 sq. miles) had an estimated population of 27,000; *St. John* (20 sq. miles) had an estimated population of 1,500.

CAPITAL,  $\Psi$  Charlotte Amalie contains one of the finest harbours in the West Indies. The government of the Virgin Islands is organized under the provisions of the Revised Organic Act of the Virgin Islands, enacted by the Congress of the United States on July 22, 1954. Legislative power is vested in the Legislature of the Virgin Islands, a unicameral body composed of 15 senators popularly elected for two-year terms. Virgin Islanders are citizens of the United States. A Governor is appointed by the President. From the elections of December, 1970, the Governor will be popularly elected. The Virgin Islands are now a favourite tourist area in the Caribbean. The climate of the Islands is delightful at all times, and particularly so during the winter months. Imports from the United Kingdom in 1968 totalled £1,282,000; Exports to U.K., £5,134,000.  
Governor, Melvin H. Evans.

## THE PANAMA CANAL

The Panama Canal, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed July 1, 1915, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General W. P. Leber, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

The Canal Zone has an area of 647 sq. miles (about 1 per cent. of the total area of Panama) (land area, 372 sq. miles) and a population in 1968 of 50,405, of whom 41,002 (including military) are U.S. citizens.

Chief Town.—Balboa Heights (Population, including Balboa and Ancon, 3,665).

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 10 fiscal years is shown below. In 1968 a record number of vessels used the canal carrying the highest tonnage so far recorded.

Fiscal Year	No. of Transits	Canal Net Tons	Cargo Tons
1959	9,718	52,216,061	51,153,096
1960	10,795	58,301,926	59,258,219
1961	10,866	61,826,002	63,669,738
1962	11,149	65,378,845	67,524,552
1963	11,017	64,438,115	62,247,094
1964	11,808	69,707,102	70,550,090
1965	11,835	74,853,264	76,573,071
1966	11,926	78,918,013	81,712,940
1967	12,413	88,266,343	86,193,430
1968	13,199	96,487,843	96,550,165

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, a step at Pedro Miguel and a at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea takes on average 13 to 15 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging.

The Panama Canal Company is engaged in a Canal improvement programme which will result in a minimum channel width of 500 feet in the Cut. The final phase of the \$50 million programme began in the fiscal year 1967. The maximum draft allowable for ships using the Panama Canal ■

determined by the level of Lake Gatun, which is an average of 85 feet above sea level. During dry season, from December to April, the lake level drops, imposing draft restrictions. The all-time high maximum tropical fresh water draft was 40 feet for certain types of vessels in 1967.

### BRITISH EMBASSY

3100 Massachusetts Avenue, N.W.  
Washington, D.C. 20008

*Ambassador Extraordinary and Plenipotentiary, His Excellency the Rt. Hon. John Freeman, M.B.E. (1969).....£8,600*

*Minister, Sir Edward Tomkins, K.C.M.G., C.V.O.*

*Minister (Economic), D. J. Mitchell, C.B., C.V.O.*

*Minister (Commercial), E. A. Midgley, C.M.G., M.B.E. Minister (Defence Research and Development), W. H. Stephens, C.B.*

*Head of British Defence Staff and Defence Attaché, Lt.-Gen. Sir George Lea, K.C.B., D.S.O., M.B.E.*

*Naval Attaché, Rear Admiral C. C. H. Dunlop, C.B.E.*

*Military Attaché, Brigadier D. J. St. M. Tabor, M.C. Air Attaché, Air Vice-Marshal D. Crowley-Milling, C.B.E., D.S.O., D.F.C.*

*Counsellors, T. A. K. Elliott, C.M.G.; C. M. Rose, C.M.G.; E. Bolland; A. J. Williams; P. W. J. Buxton (Information); J. D. Taylor, C.M.G., O.B.E.; G. F. Goodall; W. M. Drower, M.B.E.; B. Russell Jones; P. W. Ridley, C.B.E. (Commercial); A. H. S. Hermann (Hong Kong Commercial Affairs); M. P. J. Lynch (Financial); W. R. Lythgo, O.B.E.*

*(Administration and H.M. Consul-General); P. G. Hudson (Civil Aviation); J. R. Steele (Shipping); R. H. Willmott (Petroleum); Dr. J. M. Lock (Scientific); J. J. Watson (Labour); J. F. Gough (Defence Research and Development); R. Anderson (Defence Supply); H. S. Weeks (Defence).*

*1st Secretaries, C. K. Curwen; A. B. Urwick; A. R. Thomas; I. M. H. Smart; P. R. Spendlove; H. T. C. Parkin; M. J. E. Fretwell (Commercial); H. O'Brien (Commercial); A. J. Clift (Financial); T. R. Webb (Economic); C. F. Hill (Information); B. L. Crowe (Information); Miss J. F. Veasey, M.B.E. (H.M. Consul); H. V. Richardson, O.B.E. (Administration); Miss M. I. Rothwell; A. M. Wood; M. K. Molloy.*

*2nd Secretaries, Miss A. Sykes; W. H. Ewens; R. J. Hannaford; G. C. Fedrick; J. Ling (Ambassador's Private Secretary); B. Atwell (Commercial); G. B. Brennan; Miss S. F. Stewart, M.B.E.*

*Attachés, D. S. Blaikie, M.B.E.; J. S. V. Andrews (Atomic Energy); Capt. R. J. D. Glendinning, R.N. (ret.) (Defence Supply); Miss J. Mitchell (Social Secretary).*

## The United Nations

### CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design ■ discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York. October 24 has been designated "United Nations Day".

The following 126 states are members of the United Nations:—

Afghanistan, Albania, Algeria, Argentina, Australia, Austria, Barbados, Belgium, Bolivia, Botswana, Brazil, Bulgaria, Burma, Burundi, Byelorussian Soviet Socialist Republic, Cambodia, Cameroon, Canada, Central African Republic, Ceylon, Chad, Chile, China, Colombia, Congo (Brazzaville), Congolese Republic, Costa Rica, Cuba, Cyprus, Czechoslovakia, Dahomey, Denmark, Dominican Republic, Ecuador, Equatorial Guinea, Ethiopia, Finland, France, Gaboon, Gambia, Ghana, Greece, Guatemala, Guinea, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Republic of Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Kenya, Kuwait, Laos, Lebanon, Lesotho, Liberia, Libya, Luxembourg, Madagascar, Malawi, Malaysia, Maldives Islands, Mali, Malta, Mauritania, Mauritius, Mexico, Mongolia, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Runda, Rumania, Salvador, Saudi Arabia, Senegal, Sierra Leone, Singapore, Somalia,

South Africa, Southern Yemen, Spain, Sudan, Sweden, Switzerland, Syria, Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, Uganda, Ukrainian Soviet Socialist Republic, Union of Soviet Socialist Republics, United Arab Republic, United Kingdom, United States of America, Upper Volta, Uruguay, Venezuela, Yemen, Yugoslavia, Zambia.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

#### 1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year ■ regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided among seven Main Committees, on each of which every Member has the right to be represented:—(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories);

(5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—  
■ General Committee and a Credentials Committee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission. In 1964 the General Assembly set up the United Nations Conference on Trade and Development (UNCTAD) as a permanent body.

The United Nations Industrial Development Organization (UNIDO) was set up on Jan. 1, 1967, to promote industrialization and co-ordinate United Nations activities in this field.

## 2. The Security Council

The Security Council consists of fifteen Members, each of which has one representative and one vote. There are five permanent Members (China, France, U.K., U.S.A., U.S.S.R.) and ten non-permanent Members elected for ■ two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of nine Members must include the concurring votes of the permanent Members, and it is this clause which makes the *Veto* possible. The only exception to this rule is that with regard to measures for peaceful settlement a party to a dispute may refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State ■■ bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A Committee on the Admission of New Members was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of ■ representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

## 3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Far East, Latin America and Africa. The Council also supervises and co-ordinates the work of fourteen related agencies.

United Nations Children's Fund (UNICEF), London Office, 14-15 Stratford Place, W.1.—UNICEF embraces all aspects of child welfare and assists the

governments of the developing countries in developing maternal and child health services, the prevention and treatment of disease, nutrition and the preparation of children for adult life. It is financed by voluntary contributions from Governments and from the public and its work is carried out in co-operation with the Specialized Agencies of the United Nations.

## 4. Trusteeship Council

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and one other country elected by the General Assembly for ■ three-year term.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

## 5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is ■ integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

## THE SECRETARIAT

Secretary-General (1966-71), U Thant (Burma).

### Under-Secretaries-General

Conference Services, C. V. Narasimhan (India).

Special Political Affairs, Ralph J. Bunche (U.S.A.);

J. Rolz-Bennett (Guatemala).

Conference Services, Jiri Nosek (Czechoslovakia)

Economic and Social Affairs, P. de Seynes (France).

Trusteeship and Information from Non-Self-Governing Territories, I. S. Djermakoye (Niger).

Political and Security Council Affairs, L. Kutakov (U.S.S.R.).

Director-General, U.N. Office, Geneva, V. W. Guicciardino (Italy).

Office for Administration and Management, A. A. Stark (U.K.).

Legal Counsel, C. A. Stavropoulos (Greece).

Executive Director, U.N. Industrial Development Organization, I. H. Abdel-Rahman (U.A.R.).

U.N. Information Centre, 14-15, Stratford Place, W.1.

## BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. For the year 1969, the gross appropriation was \$140,520,210. The scale of assessments on 1968-70 budget for the British Commonwealth countries was: Australia, 1.52 per cent.; Canada, 3.02 per cent.; Ghana, 0.08 per cent.; India, 1.74 per cent.; Malaysia, 0.11 per cent.; New Zealand, 0.36 per cent.; Pakistan, 0.37 per cent.; United Kingdom, 6.62 per cent. The United States contribution was 31.57 per cent.; U.S.S.R. was 14.61 per cent.; France was 6.0 per cent.; Italy was 3.24 per cent.; Japan was 3.78 per cent.; and China was 4.00 p.c.

## UNITED KINGDOM REPRESENTATIVES

845 Third Avenue, New York

Permanent Representative to the United Nations and Representative on the Security Council, The Lord Caradon, P.C., G.C.M.G., K.C.V.O., O.B.E. (Minister of State for Foreign Affairs)..... £5,625

Deputy Permanent Representative, F. A. Warner C.M.G.

Ministers, M. E. Allen, C.M.G., C.V.O. (*Economic and Social Affairs*); D. H. T. Hildyard, C.M.G., D.F.C.; J. I. McK. Rhodes (*Treasury Adviser*).

Counsellors, A. D. Parsons, C.M.G., M.V.O., M.C. (*Head of Chancery*); J. D. B. Shaw, M.V.O. (*Trusteeship Affairs*); R. G. Tracy, O.B.E. (*Admin.*); H. G. Darwin (*Legal Adviser*).

Military Adviser, Col. C. H. Toye, O.B.E.

1st Secretaries, Mrs. M. B. Chitty; D. N. Lane; R. A. C. Byatt; S. L. Egerton; R. N. Posnett, O.B.E.; D. F. Milton; T. N. Haining; Miss S. E. Harden, M.B.E.; Miss E. C. Wallis, M.B.E.; N. M. Fenn; P. C. Petrie.

2nd Secretary, Miss S. Darling.

Attaché, P. A. McDermott.

## INTERNATIONAL ATOMIC ENERGY AGENCY

Kärntnering 11-13, Vienna

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it or under its supervision is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and some of the specialized agencies. In June, 1969, 102 states were members.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (25 members) carries out the functions of the Agency and meets usually four times a year. The Budget in 1969 amounted to \$13,763,000.

Director-General, Sigvard Eklund (Sweden).

## INTERNATIONAL AGENCIES

Fourteen other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organisation (ILO) Geneva (London Branch Office, Sackville House, 40 Piccadilly, W.1.)—Established in 1919 as an autonomous institution connected with the League of Nations, in 1946 it became the first specialized agency associated with the United Nations. The ILO exists to contribute to the establishment of lasting peace by promoting social justice and by international action to improve labour conditions and living standards, and to promote economic and social stability. In June 1968, the Organisation had 128 member States.

The *International Labour Conference*, composed of national delegations of two government delegates, one delegate representing management and a fourth representing labour, meets annually and formulates international labour standards.

A 48-member *Governing Body*, composed of 24 Governments, 12 worker members and 12 employer members supervises the work of the *International Labour Office* and acts as the Organisation executive council. Ten Governments hold seats on the *Governing Body* because of their industrial importance. These are Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The *International Labour Office*, the Secretariat of the Organisation, collects and distributes information, assists governments upon request in drafting legislation on the basis of decisions of the

Conference, directs technical co-operation activities and issues publications.

Director-General, David A. Morse (U.S.A.).

Food and Agriculture Organization of the United Nations (FAO), Viale delle Terme di Caracalla, Rome.—Established on October 16, 1945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy. Among its many activities the Organization promotes the global exchange of new types of plants, combats epidemics of animal diseases in many countries and provides technical assistance in such fields as nutrition and food management, soil erosion control, re-afforestation, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. As well as its work as an intergovernmental agency the Organization also mobilizes the efforts of private individuals and associations through the worldwide *Freedom from Hunger Campaign*. Jointly with the United Nations it administers a \$300,000,000 World Food Programme using food capital backing for development programmes in developing countries. The 1967 session of the governing Conference approved a budget of \$59,861,000 for the years 1966-69. In addition, FAO is carrying out field programmes involving expenditure of more than \$400,000,000 under the U.N. Development Programme. Through its co-operative programme with the World Bank it is helping to increase international investment in agriculture and allied fields.

The policy of the Organization is directed by a two-yearly Conference of the 117 member countries. A council (34 members) acts for the Conference between its sessions.

Director-General, Dr. A. H. Boerma (Netherlands).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris, 7ème.—Unesco was established on Nov. 4, 1946, to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, ... to give fresh impulse to popular education and to the spread of culture, ... to maintain, increase and diffuse knowledge.

The three main bodies of the Organization are: a *General Conference* which meets every two years to approve the programme and budget, an *Executive Board* of 34 members and the *Secretariat*. In addition, National Commissions are set up in Member States to serve as a link with Unesco and carry out the programme of the Organization.

This programme is essentially designed to stimulate and expand international co-operation and national efforts in the fields of education, natural sciences, social sciences, cultural activities, mass communication and exchange of persons for study and educational travel abroad. Current activities of the Organization focus on development of international co-operation among specialists and non-governmental organizations, the collection and dissemination of information, direct action to promote education and science in under-developed countries and the preparation of international agree-

ments related to Unesco's interests. Member States in June 1968, 125.

*Director-General, René Maheu (France).*

**World Health Organization (WHO), 1211 Geneva 27.** Established on April 7, 1948, the aim of the World Health Organization is the attainment by all peoples of the highest possible level of health. Its services are of two kinds—advisory, to spread knowledge, help to train personnel and assist countries on such subjects as malaria, tuberculosis, venereal diseases and other communicable diseases, maternal and child health, nutrition, and environmental health—and technical services of world-wide interest such as biological standardization and unification of pharmacopoeias, collection and dissemination of epidemiological intelligence, medical research and publication of technical and scientific works. Proposed budget for 1970, \$67,393,000. Membership (June, 1969), 131.

**Organs** ■ ■ *World Health Assembly* meeting annually to frame policy, an *Executive Board* (24 members), meeting at least twice a year, and a *Secretariat*.

*Director-General, Dr. M. G. Candau (Brazil).*

**International Bank for Reconstruction and Development (The World Bank), 1818 H Street, Washington, D.C.—**Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of member countries by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources. The 636 loans made by the Bank since its inception to June 30, 1969, totalled \$12,622,390,000 to 86 countries. Subscribed capital, July 1, 1969, \$23,046,400,000.

The *Board of Governors* consists of one Governor and one alternate appointed by each of the 110 member countries.

Twenty *Executive Directors* exercise all powers of the Bank except those reserved to the Board of Governors. The *President*, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff.

*President, Robert S. McNamara (U.S.A.).*

**International Development Association (IDA), 1818 H Street, Washington D.C.—**An affiliate of the World Bank established in September 1960. Its purposes are to promote economic development, increase productivity and thus raise standards of living in the less developed areas of the world included within the Association's membership, in particular by providing finance to meet their important developmental requirements on terms which are more flexible and bear less heavily on the balance of payments than those of conventional loans, thereby furthering the objectives of the World Bank and supplementing its activities. IDA's Board of Governors and Executive Directors are the same as those holding equivalent positions in the World Bank, serving *ex officio* in IDA. By June 30, 1969, IDA had extended 165 development credits totalling \$2,170,330,000 in 49 countries for improved transportation, agriculture, electric power facilities, industry, education and municipal water supplies. The credits were for terms of 50 years, free of interest.

**International Finance Corporation (IFC), 1813 H Street, Washington, D.C.—**The IFC was established in 1956 as an affiliate of the World Bank

to assist less developed member countries by promoting the growth of the private sector of their economies. IFC's share capital of \$106,540,000 at June 30, 1969, had been subscribed by 92 countries. In addition, IFC is empowered to borrow up to approximately \$400,000,000 from the World Bank. At the end of June, 1969, IFC had made commitments totalling more than \$364,700,000 in 39 countries.

*President, Robert S. McNamara (U.S.A.).*

**International Monetary Fund, 19th and H Streets, N.W., Washington D.C.—**Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. 111 countries were in membership of the Fund in April, 1969, their total quota subscriptions being \$22,000,000,000. The Fund has an additional arrangement enabling it to borrow up to \$6,000,000,000 from ten industrial members.

The \$22,000,000,000 which the Fund holds in gold and currencies provides a reserve on which members may draw, with its agreement, to meet foreign obligations during periods of deficit in their international balance of payments. This use of the Fund's resources is linked to its efforts to reduce exchange restrictions and discrimination, and establish currency convertibility.

The Fund's financial assistance takes the form of a foreign exchange transaction. The member pays to the Fund an amount of its own money equivalent, at the par value agreed with the Fund, to the amount of foreign currency it wishes to draw. The member is expected to "repurchase" its own currency from the Fund within three, or at the outside five years, with a payment of gold or dollars or convertible currency acceptable to the Fund. These arrangements are subject to certain charges which rise in proportion to the amount of foreign exchange involved, and the length of time it is held.

Currencies drawn from the Fund may be used in a flexible way to relieve the member's payments difficulty, but its assets are not intended to be used for military purposes, or for programmes of economic development. Countries that are pursuing national development programmes may use the Fund if they experience temporary payments difficulties such as would ordinarily entitle a member to Fund assistance.

Each member of the Fund is assigned a quota which approximately determines its voting power and the amount of foreign exchange that it may draw from the Fund. The subscription of each member is equal to its quota, and is payable partly in gold and partly in the member's own currency. On May 31, 1969, the Fund's assets included \$3,375,540,000 in gold, \$767,100,000 in subscriptions receivable and \$18,718,300,000 in various national currencies. Total drawings from the Fund up to April 30, 1969, amounted to \$17,377,000,000.

*Managing Director, Pierre-Paul Schweitzer (France).*

**International Civil Aviation Organization (ICAO), 1080 University Street, Montreal, 3.—**In existence since April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations or operation, and simpler procedures at international airports. It

promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 116 states are now members of ICAO.

An Assembly of delegates from member states meets at least once every three years. A Council of 27 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

*President of Council, Walter Binaghi (Argentina).*

*Secretary-General, B. T. Twigt (Netherlands).*

Universal Postal Union (UPU), Schosshaldenstrasse 46, 3000 Berne.—Established on October 9, 1874, by the postal Convention of Berne and in operation from July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union includes almost all the countries of the world. Budget, 1969, \$2,025,000. A *Universal Postal Congress* meets at five-yearly intervals, the last Congress was held at Tokyo in 1969.

*Director-General, Dr. Michel Rahi (U.A.R.).*

International Telecommunication Union (ITU), Place des Nations, Geneva.—Founded at Paris in 1865 as the International Telegraph Union, ITU became a U.N. Specialized Agency in 1947 and since 1967 has been governed by the Convention adopted by the Montreux Conference held in 1965. ITU exists to set up international regulations for telegraph, telephone and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, collects and publishes information on telecommunication matters, including space radio communications. The budget for 1970 is 33,593,620 Swiss francs.

*Secretary-General, M. Mili (Tunisia) (acting).*

World Meteorological Organization (WMO), Geneva.—Established on March 23, 1950, WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology, and to promote the establishment and maintenance of centres providing meteorological services; to promote the establish-

ment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, agriculture, and other human activities; to encourage research and training in meteorology and to coordinate their international aspects. Budget (1968-71), \$U.S.11,817,000.

A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (24 members), meeting at least annually carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), eight technical commissions and a Secretariat.

*Secretary-General, D. A. Davies (U.K.).*

Inter-Governmental Maritime Consultative Organisation (IMCO), Berners Street, W.1.—A United Nations Specialized Agency established on March 17, 1958, to provide means for co-operation and exchange of information among governments on technical matters related to international shipping, especially with regard to safety at sea. IMCO is responsible for calling maritime conferences and drafting maritime agreements, e.g. *Convention on Facilitation of International Maritime Traffic 1965*, *Load Line Convention 1966*. It has produced *International Maritime Dangerous Goods Code*; *Code of Safe Practice for Bulk Cargoes*; revised *International Code of Signals*; fire safety measures for ships; and tonnage measurement recommendations. In June 1969, 69 nations were in membership. Budget, 1968-69, \$2,102,241.

*Secretary-General, C. Goad (U.K.).*

*International Trade, General Agreement on Tariffs and Trade.*—A draft charter for an international trade organization was completed in 1948, but as it became clear that it was not acceptable to leading trading powers the attempt to bring it into operation was abandoned.

An international treaty to which some 76 countries are parties came into operation in 1948, with the object of lowering and stabilizing tariffs, expanding international trade and promoting economic development. Six important tariff conferences have been held through which members have reduced or frozen their tariffs on thousands of items. The sixth negotiating conference, the Kennedy Round, completed in June, 1967, resulted in unprecedented tariff reductions, a cereals agreement and an anti-dumping code. In recent years an increasing amount of GATT's work has been concerned with the trade and development problems of developing countries. In 1964 an International Trade Centre was created to assist developing countries in export promotion, by means of market research, training courses and advisory services; it is operated jointly by GATT and UNCTAD.

*Director-General, O. Long (Switzerland), Villa Le Bocage, Palais des Nations, Geneva 10, Switzerland.*

## Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Capitals, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

### Salaries and Allowances.

The Salaries of Officers of H.M. Diplomatic Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to officers serving abroad:—

Grade I—	£9,800.
Grade II—	£7,100.
Grade III—	£6,125.
Grade IVA—	£4,170 to £5,325.
Grade VA—	£2,724 to £3,721.
Grade VE—	£3,128 to £3,995.
Grade VI—	£2,456 to £2,981.
Grade VIIA—	£2,146 to £2,616.
Grade VIIE—	£1,952 to £2,330.
Grade VIIE—	£1,196 to £1,952.
Grade IX—	£808 to £1,816.
Grade X—	£545 to £1,280.

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

### ABYSSINIA. See Ethiopia.

### AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, Nadir Shah); married Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue five sons and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, b. 1941; H.R.H. Prince Shah Mahmud, b. 1946; H.R.H. Prince Daud, b. 1949; H.R.H. Prince Mir Wais, b. 1957; and H.R.H. Princess Bilqis, b. 1931; H.R.H. Princess Maryam, b. 1936.

#### CABINET

Prime Minister and Minister of Foreign Affairs, Nur Ahmed Etemadi.

1st Deputy Prime Minister, Dr. Ali Ahmad Popal.

2nd Deputy Prime Minister, Abdullah Yaftali.

Defence, Gen. Khan Mohamad.

Interior, M. Omar Wardak.

Justice, Mohamad Asghar.

Finance, Mohamad Anwar Ziyale.

Commerce, Dr. Nur All.

Public Works, Mohamad Hossein Messa.

Culture and Information, Dr. Mohamad Anas.

Communications, Mohamad Azim Gran.

Health, Miss Kubrah Noorzai.

Education, Dr. Mohammad Akram. [(acting).]

Mines and Industries, Dr. Abdul Wahid Sorabi

Agriculture, Mohamad Akbar Reza.

Planning, Dr. Abdul Samad Hamid.

Minister without Portfolio, Dr. Abdul Wahid Sorabi.

President of Tribal Affairs, Sayed Mohamad Masud Pohanya.

#### EMBASSY IN LONDON

31 Princes Gate, S.W.7.

[01-589-8801]

Ambassador in London, His Excellency Dr. Abdul Majid (1967).

1st Secretary, Abdul Ali Sulaiman.

2nd Secretary, Abdul Qayum Afzal.

Attaché, Halfizullah Anwar.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population (estimated, 1968) 16,113,000. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durranis, from whom the Royal family springs, and the Ghilzais. Then come the Tajiks, Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomans in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashs, who belong to the Shia sect.

Afghanistan is bounded on the W. by Iran (boundary fixed 1857 and 1904), on the S. by Baluchistan (now W. Pakistan) (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (now W. Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Iran frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Mary and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. An Afghan-Chinese border treaty was signed in 1963 and the border demarcated in 1964. The Indo-Afghan frontier was settled by the Durand agreement of 1893.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into 28 provinces each under a Governor.

Government.—Afghanistan is a constitutional monarchy. By the new constitution which came into effect in October, 1965, sovereign power is vested in the National Assembly of 216 elected members. There is also an Upper House or Senate. Executive Government is carried out by a Cabinet consisting of a Prime Minister and 16 Ministers. Elections were held during 1965 for a new Parliament, consisting of an elected Lower House and a partly-elected Upper House. The Prime Minister is chosen by the King. Ministers may be appointed from among members of the Parliament or outside it but they must cease to be members of the Parliament on appointment. Mr. Nur Ahmed Etemadi was appointed Prime Minister by the King on Nov. 1, 1967, and formed a new Cabinet (see column 1).

By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Judiciary.—Hitherto Afghanistan has been ruled on the basis of Shariat or Islamic law. The new Constitution, however, introduced in 1965, provides for

the creation of a legal code, and for a new structure of courts, consisting of a lower court in each *wuluswal* (sub province), and a court of appeal in each province, with a Supreme Court in Kabul. This system marks the complete separation of executive and judiciary for the first time.

*Defence.*—The Army has been reorganized and is recruited by twice-yearly calls. Service is for one year for officers and 2 years for other ranks. The peace strength is about 80,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern.

*Production.*—Agriculture and sheep raising are the principal industries. There is generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakull, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (a) Internal: Kabul—Kandahar (320 miles); Kandahar—Herat (350 miles); Herat—Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif—Kabul (380 miles). Also Kabul—Khanabad—Faizabad (450 miles); Kabul—Gardez (80 miles); Kabul—Bamian (140 miles). The road from Kabul to the North has now been shortened by the completion in 1964 of the Salang pass. (b) Roads to the frontiers: Kabul—Khyber (175 miles); Kandahar—Chaman (70 miles) and roads from Herat to the Russian and Persian borders. The Kabul—Kandahar, the Kandahar—Herat—Kushk roads and the road from Herat to the Iranian Border at Islam Qala have been built by U.S. and Soviet Aid. The Kabul—Khyber, Kandahar—Spin Baldak and Kabul—Kunduz—Qizil Qala roads are also surfaced. Work on the metalling of the Pul-i-Kumhri—Shiberghan road is nearing completion. Otherwise roads are unmetalled. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Motor transport has taken the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles). Internal air services between the main towns are well developed.

*Language and Literature.*—The languages of the country are Persian and Pushtu, and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pushtu. The Government is encouraging the spread of Pushtu, the language of the Pathans. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

The annual revenue, of some 2,000,000,000 *Afghanis*, consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have become eligible for income-tax.

#### Trade with U.K.

	1967	1968
Imports from U.K.	£957,000	£1,029,000
Exports to U.K.	3,016,000	5,396,000

Exports are mainly Persian lambskins (Karakull),

fruits, cotton, raw wool, carpets and spices, while the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

*CAPITAL.* Kabul (about 450,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000).

*FLAG.*—Vertical stripes of black, red and green, with white device in centre.

*NATIONAL DAY.*—May 27.

#### BRITISH EMBASSY

(Kabul)

*Ambassador Extraordinary and Plenipotentiary, His Excellency Peers Lee Carter, C.M.G. (1968) £5,625*

*1st Secretary, M. K. Ewans.*

*Oriental Secretary, C. J. S. Rundle.*

*2nd Secretaries, Miss E. A. Urquhart (Consul); A. B. N. Morey (Commercial).*

*British Council Representative.*—K. L. Pearson, P.O. Box 453, 352 Zargunah Maidan, Kabul.

Kabul is distant 5,000 miles from London, transit days; by air 20–24 hours.

#### ALBANIA

*Head of State, Hadji Lechi, assumed office, July 24, 1953.*

*Chairman, Council of Ministers, Mehmet Shehu.*

*Labour (= Communist) Party*

*Politbureau of the central committee, R. Alia; B. Baluku; A. Carcani; Enver Hoxha; H. Kapo; S. Koleka; R. Marko; M. Myftiu; G. Nushi; M. Shehu; H. Toska (full members); P. Dume; K. Hazbiu; A. Kellezi; P. Peristeri; K. Theodosi (alternate members).*

*Secretariat of the Central Committee, Enver Hoxha. (1st Secretary); R. Alia; H. Kapo; X. Spahiu.*

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (estimated, 1967) of 1,965,000.

On Nov. 20, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hoxha as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945, on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A. It was admitted in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize.

*CAPITAL, Tirana (pop. 50,000).*

*FLAG.*—Black two-headed eagle surmounted by yellow outline star, all on a red field.

#### ALGERIA

(Republic of Algeria)

*President of the Council of Revolution, Col. Houari Boumedienne.*

**Religious Affairs**, Larbi Saadouni.

## ALGERIAN EMBASSY IN LONDON

■ Hyde Park Gate, S.W.7

[01-584-9502-5]

**Ambassador** (vacant).

**Counsellor** (*Chargé d'Affaires*), Abdelaziz Yadi.

**Attachés**, Djilali Laribia; Salem Irbah; Omar Ramoul.

Algeria lies between 8° 45' W. to 12° E. longitude, 37° 6' N. to ■ southern limit about 19° N. Area, 855,900 sq. miles (estimated). The population is estimated at 12,943,000 (1968), of which 30 per cent. are urban dwellers.

**Government.**—Algiers surrendered to ■ French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. Between 1955 and 1960 these were re-organized to form 13 departments: Algiers, Tizi-Ouzou, Orleansville, (now El-Asnam) Médéa, Constantine, Bône (now Annaba), Setif, Batna, Oran, Tlemcen, Mostaganem, Saida and Tiaret. The Southern Territories of the Sahara, formerly a separate colony, became an integral part of Algeria on the attainment of independence, forming the two additional departments of the Saoura and the Oasis. An armed rebellion led by the Moslem *Front de Libération Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. French control of Algeria came to an end when President de Gaulle declared Algeria independent on July 3, 1962; by October, 1963, all agricultural land held by foreigners had been expropriated and by 1965 more than 80 per cent. of the French population had left Algeria. More have left since.

Ben Bella was elected President of the Republic in Sept., 1963, but was deposed and ■ Council of the Revolution presided over by Col. Boumedienne assumed power on June 19, 1965. A new Government was formed on July 10.

Considerable amounts in aid to sustain the Alger-

ian economy are still being provided by the French Government which agreed in 1965 to provide Frs. 1,000 million over a five-year period for the execution of jointly-approved industrialization and other development projects. By the end of 1968 little of this money had been utilized. However, early in 1968 the Algerian Government had begun to implement a 3-year industrialization plan, using oil revenue as the main source of finance, supported by supplier credits. Production starting in 1969 at ■ annual rate of 350,000 tons was expected at ■ new steel plant near Annaba and an ammonia plant was nearing completion at Arzew with a planned capacity of 1,000 tons per day. A second ammonia plant was planned for Skikda, ■ pulp and paper mill for Mostaganem, fertilizer manufacture at Annaba and agricultural machinery production at Constantine.

## Trade with U.K.

	1967	1968
Imports from U.K. ....	£3,002,000	£4,549,000
Exports to U.K. ....	15,556,000	21,174,000

Exports are mainly crude petroleum and methane (liquefied natural gas), wine, barley and other cereals, skins, olives, citrus fruits, iron and zinc ores, phosphate rock, corkwood, esparto grass and manufactured tobacco. Methane exports to U.K. in 1968 totalled 797,574 tons. The principal imports from the United Kingdom are tractors and agricultural machinery, engines, machine tools, rubber and metal manufactures. Natural gas from the Sahara is supplied to a gas liquefaction plant at Arzew and is then exported in specially-designed tankers. A second liquefaction plant is planned for Skikda.

The Algerian State Railways (2,450 miles) in 1967 carried 5,607,268 passengers and 4,199,566 tons of freight. In 1968 the number of ships in foreign trade entering Algerian ports was 7,446. 25,934 civilian aircraft carrying 1,005,727 passengers used the 18 principal Algerian airports in 1968. There are 12,250 miles of national highway, including 2,000 km. of asphalt roads in the Sahara.

Oil, natural gas and iron ore are found in quantity in the Saharan regions. Substantial oil and gas deposits are now being worked. Production of crude oil in 1968 totalled 43m. tons, compared with 39m. tons in 1967. Total production of natural gas in 1968 was 2,478,278,000 cu. metres.

In pursuit of the Government's policy of Algerianization about 80 per cent. of all industrial enterprises are now under state control. State organizations have recently been granted the import monopoly for all mechanical products, paper products and raw material for making paper, pharmaceutical products, medical instruments, sanitary ware and other builders' accessories.

**CAPITAL.**— $\Psi$  Algiers, population (census of 1966), 943,000. The large numbers of French inhabitants who left the country have largely been replaced by an influx of Algerians to the city. Other towns include  $\Psi$  Oran (328,000); Constantine (254,000);  $\Psi$  Annaba (formerly Bône) (168,000); Blida (99,000); Setif (98,000); Sidi-Bel-Abbes (91,000); Tlemcen (87,000); Mostaganem (75,000);  $\Psi$  Skikda (formerly Philippeville) (72,000); El Asnam (formerly Orleansville) (70,000) and Tizi Ouzou (53,000).

**FLAG.**—Red crescent and star on a divided green and white background.

**NATIONAL DAY.**—November 1.

## BRITISH EMBASSY

Résidence Cassiopee, 7 Chemin de Glycines, Algiers.

**Ambassador Extraordinary and Plenipotentiary**, His Excellency Charles Martin Le Quesne, C.M.G. (1968) . . . . . £5,625

1st Secretaries, J. R. Johnson (*Head of Chancery*); S. Relton (*Commercial*).  
*Cultural Attaché, British Council Representative*, E. Evans, M.B.E., 6 Avenue Othmane Merabet, Algiers.

### ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France, with an approximate area of 180 square miles and population of about 17,000, one-third of whom are native Andorrans. It is surrounded by mountains of 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes, each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-four (Heads of families only may vote). The nominal heads of the state are the Bishop of Urgel, Spain, and the President of the French Republic. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. Each co-prince nominates his own representative and has a Permanent Delegation and a Supreme Tribune for the hearing of civil causes. These two Tribunes together form the Supreme Courts.

The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted currency. A good road crossing the Valleys from Spain to France is open most of the year. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 2,000,000 tourists visit the Valleys during the year.

There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

Imports from the United Kingdom, £37,000 in 1967, were increasing by 1969.

CAPITAL: Andorra la Vella (population 2,500).

FLAG.—Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.

H.M. Consul-General, D. H. Clibborn, C.M.G. (*Resident at Barcelona*).

### ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 20,000,000.

*Language and Literature*.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in U.A.R. and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

See also.—BAHRAIN; KUWAIT; MUSCAT AND OMAN; QATAR; SAUDI ARABIA; SOUTHERN YEMEN; TRUCIAL STATES; YEMEN.

### ARGENTINE REPUBLIC

(República Argentina)

President, Lt.-Gen. Juan Carlos Onganía, assumed office June 29, 1966.

#### Ministers

*Economy and Labour*, Dr. José María Dagnino Pastore.

*Interior*, Brig.-Gen. Francisco A. Imaz.

*Foreign Affairs and Worship*, Juan Benedito Martin.

*Social Welfare*, Dr. Carlos Alberto Consigli.

*Defence*, Dr. José Rafael Caceres Monie.

#### Secretaries of State

*Education*, Dr. Dardo Perez Guilhou.

*Communications*, General Julio A. Teglia.

*Justice*, Dr. Conrado Etchebarne.

*Agriculture*, Dr. Lorenzo Adolfo Raggio.

*Labour*, Sr. Rubens Guillermo San Sebastian.

*Finance*, Dr. Luis Bernardo Mey.

*Industry and Commerce*, Raúl Jorge E. Peyceré.

*Energy and Mining*, Ing. Luis María Gotelli.

*Overseas Trade*, Elbio Baldinelli.

*Public Works and Transport*, Ing. Armando Silvio Ressaia.

*Social Security*, Sr. Alfredo Manuel Cousido.

*Public Health*, Dr. Ezequiel A. Dago Holmberg.

*Housing*, Ing. Esteban Guaia.

*President of Central Bank*, Dr. Egidio Iannella.

*Commanders-in-Chief*, Lt.-Gen. Alejandro Augustin Lanusse (Army); Admiral Pedro Alberto José Gnavi (Navy); Brig.-Gen. Jorge Miguel Martínez Zaviria (Air Force).

#### EMBASSY IN LONDON.

9 Wilton Crescent, S.W.1.

[01-235-3717]

*Ambassador*, His Excellency Brig. Eduardo Francisco McLoughlin (1966).

*Minister Plenipotentiary*, Roberto H. Tiscornia.

*Counsellors*, Juan Manuel Figuerero Antequeda;

Enrique J. Ros; Rafael A. Gonzalez; Alfonso

A. S. von der Becke.

*Naval Attaché*, Rear Adm. Luis M. Iriart.

*Military and Air Attaché*, Commodore Roberto D. Bortot.

*Economic Minister*, Leonardo A. Vartalitis.

*Financial Counsellor*, Carlos A. Montagne.

*Asst. Naval Attachés*, Cdr. Eduardo René Fracassi;

Cdr. Juan Carlos Martínez.

*Asst. Air Attachés*, Vice-Cdre. Rodolfo Alberto

Aymonina; Vice-Cdre. Fernando Rodriguez;

Vice-Cdre. Ignacio Venturo Rodriguez.

2nd Secretary, Dr. Carlos A. Castilla.

3rd Secretary, Eduardo M. Airaldi.

Attaché, Eduardo Alberto Coteló.

Consulate-General, 53 Hans Place, S.W.1 (01-584-1701).

Minister Plenipotentiary, José A. del Carril.

1st Secretary, Esteban R. Osorio.

There is also a Consulate in Liverpool.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia

to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, and on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries; on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Córdoba by the San Luis and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; and the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some

300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 22 provinces, one territory (Tierra del Fuego) and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with a population (estimated, 1968) of 23,617,000.

**Government.**—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán. A revolt in September, 1955, overthrew the Government under the presidency of General Juan D. Perón and an interim Provisional Government was formed by the late General Eduardo Lonardi. This Provisional presidency passed to General Pedro Aramburu in November, 1955.

A Constituent Assembly, elected on July 28, 1957, decided that the country should revert to the 1853 Constitution. General Elections were held in February, 1958, and Dr. Arturo Frondizi was elected President. Following Peronist victories in the partial elections of March, 1962, the armed forces took over the Government and appointed the Chairman of the Senate, Dr. Guido, President. He held office until 1963. After general elections of July 7, Dr. Arturo Illia was elected President in July, 1963, and took office in October, 1963, for a period of six years. But after the bloodless revolution by the Armed Services of June 27-28, 1966, the Presidency was offered to and accepted by General Onganía. Congress was dissolved and the President now rules by decree. For the most part his Cabinet comprises civilians, expert in their particular fields.

**Agriculture.**—Of a total land area of approximately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export trade in many others. Pastoral and agricultural products provide more than 90 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Ríos, Córdoba and La Pampa.

The following table shows the yield of the more important crops:

	1967-68 Tons
Wheat .....	7,320,000
Maize .....	6,560,000
Linseed .....	385,000
Oats .....	690,000
Barley .....	588,000
Rye .....	352,000
Rice .....	282,900
Bird seed .....	25,800

Cotton (gross bulk production).....	1967-68 Tons
Sugar cane.....	232,000
Millet.....	9,470,000
Tobacco.....	228,700
	59,400

*Livestock.*—Livestock population in 1968 was: cattle, 51,227,000; sheep, 49,100,000; and pigs, 3,200,000. Meat exports to U.K. fell from 168,818 tons in 1966 to 156,577 tons in 1967 and further to 74,253 tons (provisional figure) in 1968. 12,660,000 cattle were slaughtered in 1968.

*Mineral Production.*—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquen), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also a natural gas pipeline from the same source to the outskirts of Buenos Aires. The production of oil is of first importance to Argentina's rapidly expanding industries and, to some extent, to her economic and financial development. Total petroleum output for 1967 was 18,231,700 cubic metres compared with 16,638,400 cubic metres in 1966.

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold and silver. Coal production in 1966 was 365,500 tons, compared with 373,800 tons in 1965; this is produced at the Río Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural resources.

*Industries.*—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile, plastic and machine tool industries and in engineering, especially in the production of motor vehicles and steel manufactures.

*Communications.*—There are 27,290 miles of railways of which 15,604 miles are broad gauge (5' 6"), 1,940 miles standard (4' 8½"), 9,080 miles of 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. Plans are in hand for complete re-organization of the railways which is expected to bring a substantial reduction in the lengths of lines operated. The combined national and provincial road network totals approximately 132,659 miles of which 16,449 miles are surfaced. There are air services between Argentina and all the neighbouring republics, Europe, Canada and the U.S.A. Total tonnage entering Argentine ports in 1967 was 12,292,400.

There are 14 short-wave broadcasting stations, 95 medium wave (of which 65 are official). In addition there are 20 closed circuit television stations in the Provinces, all privately owned. About 2½ million television receivers were in use in December, 1968.

*Defence.*—The Army is organized in four corps in which are combined four infantry divisions, one motorized infantry division and one motorized infantry brigade, one mounted infantry division, one armoured division and one cavalry division and numbers about 5,000 officers, 15,000 N.C.O.s and 65-70,000 men on a peace footing.

The Navy consists of 5 cruisers, 1 aircraft carrier, 9 destroyers, 4 frigates/corvettes, 2 submarines, 4 minesweepers, 1 minehunter and ancillary craft.

The Air Force consists of 5 brigades and a training force, with a strength of 1,600 officers, 15,000 other ranks and 20,000 civilians. Aircraft total 321, including Meteor IV's, Skyhawk A.4 BS1, Lockheed C130, Fokker F27 and HS.748.

*Education.*—Primary Education is free and compulsory for seven years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahía Blanca and private universities run by the Church.

*Language and Literature.*—Spanish is the language of the Republic and the literature of Spain is accepted as inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the 1955 revolution the traditional freedoms have been restored. About 200 daily newspapers are published in Argentina, including 50 in the city of Buenos Aires. The English language newspaper is the *Buenos Aires Herald* (daily). There are numerous other foreign language newspapers.

AUSTRIAN EMBASSY IN LONDON  
18 Belgrave Square, S.W.1.

[Belgravia: 3731]

Ambassador in London, His Excellency Dr. Josef A. Schoener, G.C.V.O. (1966).

Counsellor, Dr. Erich Hochleitner.

2nd Secretary, Dr. Alfred Missong.

3rd Secretary, Dr. Albert Rohan.

Defence Attaché, Lt.-Col. Hans Buttler-Elberberg, C.V.O.

Attachés, Dr. Ingo W. Mussi, M.V.O. (Press); Dr. Karl Schanda, M.B.E. (Consular Affairs); Viktor Hauer, M.V.O. (Administration).

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population (estimated Dec. 1967), 7,338,000.

**Government.**—The Austrian Federal Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German *Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional

government, a freely-elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. In the elections of March, 1966, the conservative People's Party won a small overall majority, the first time any party had done so since 1945. The subsequent People's Party government brought to an end the conservative-socialist coalition which

had characterized Austrian politics since the war. The present state of the parties is:

People's Party .....	85
Socialist Party .....	74
Freedom Party (right wing) .....	6

**Religion and Education.**—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 15 and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz, Innsbruck, Salzburg and Linz.

**Language and Literature.**—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are ■ daily papers in Vienna and 24 in the provinces, as well as numerous weeklies and monthlies.

**Communications.**—Internal communications in Austria are partly restricted because of the mountainous nature of the country, and road and rail routes must, of necessity, follow the river valleys. The railways in Austria are state-owned and have 5,951,934 km. of track of which 2,386,035 km. had been electrified by the end of 1964. While road surfaces in many cases are not up to British standards, the main roads linking the major towns are generally good and relatively fast. An autobahn, completed in 1967, links Munich, Salzburg, Linz and Vienna. An internal air service between the major towns of Austria was inaugurated in May, 1963.

**Production and industry.**—Agriculture is an important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth with about 38 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hardwood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1966 include (in thousands of metric tons): pig iron 2,195, steel 3,193, rolled products 2,346. Raw magnesite, nitrogenous fertilizers, paper and chemical pulp are produced ■ quantity. In addition, motor cycles and motor-cars, scooters, tractors and motor lorries are produced.

Hydro-electric power offers great possibilities in Austria. Much has already been done to develop it, and ■ long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1966 was 23,815 million kWh.

**Minerals.**—There are iron ore deposits and, in Eastern Austria, oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.	1968
Budget	(Schillings)

Ordinary Budget:	
Expenditure .....	82,737,000,000
Revenue .....	77,787,000,000
Extraordinary Budget:	
Expenditure .....	4,296,000,000

Trade with U.K.	1967	1968
-----------------	------	------

Imports from U.K. ..	£38,605,000	£50,961,000
Exports to U.K. ....	41,681,000	58,456,000

**Currency.**—The unit of currency is the *Schilling* of 100 *Groschen*, reintroduced in December, 1945. The official rate of exchange (fixed in Nov. 1967) is 62.40 Austrian *schillings* = £1, at par.

**CAPITAL,** Vienna, on the Danube, population 1,636,600. Other towns are Graz (252,200), Linz (204,900), Innsbruck (108,699), Salzburg (117,383), and Klagenfurt (70,832).

**FLAG.**—Horizontal stripes of red, white, red, with eagle crest on white stripe.

#### BRITISH EMBASSY

Vienna.

**Ambassador Extraordinary and Plenipotentiary,** His Excellency Sir Horace Anthony Claude Rumbold, Bt., K.C.M.G., K.C.V.O., C.B. (1967). £6,300  
**Counsellor (Commercial) and Consul-General,** P. H. Scott.

**1st Secretary,** Hon. E. H. B. Gibbs (*Head of Chancery*). There are British Consular Offices at Vienna and Innsbruck.

**British Council Representative,** A. C. Hawkins, O.B.E., Freyung 1, A1010 Vienna.

#### BAHRAIN

**Ruler,** H. H. Shaikh Isa bin Sulman Al Khalifah, K.C.M.G., born 1932; *acceded* Dec. 16, 1961.

Bahrain consists of a group of low-lying islands situated halfway down the Persian Gulf some 20 miles off the east coast of Arabia. The largest of these, Bahrain Island itself, is about 30 miles long and 10 miles wide at its broadest. The two most important towns are Manama (61,726) and Muharraq (34,430). The latter is situated on ■ separate island of the same name which is connected with Bahrain Island by a causeway 1½ miles long. The population of the islands at the Census held in 1965 was 182,203, of whom about half belong to the Shia Sect, the remainder, including the ruling family being Sunnis. There are 3,135 Europeans and Americans and 35,259 non-Bahrainis of whom about half are Iranians, Indians and Pakistanis. It was estimated that the population had risen to 193,000 by July, 1967. The standard of living is high among the large and influential merchant class and steadily rising among the lower social groups.

Bahrain enjoys ■ typical Persian Gulf climate with long, mild winters and ■ annual rainfall of about 3". Summer extends from May to October, with temperatures between 100° F and 115° F and humidity often approaching 100 per cent. The surrounding sea abounds in ■ variety of fish, and some of the best prawns in the world inhabit the warm sheltered waters.

The ruling family (Al Khalifah) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The state is administered under the Ruler by a number of departmental heads whose activities are co-ordinated by the Secretariat. A small Administration Council consisting of certain members of the ruling family and some heads of departments has been created by the Ruler to consider and advise on general matters; Health, Education, Port, Agriculture and Water Councils exist to advise the respective departments. Local government is the responsibility of six municipalities and the Rural Affairs Department which cares for the villages. Half of the members of four of the municipal councils (Manama, Muharraq, Rifaa and Hidd) are elected by the public and half nominated by the Government; all the members of the other two, which were created later (Sitra and Jidhafs) are nominated by the Government. In addition to the Department of Rural Affairs, there are ■ Department of Social Affairs, ■ Labour Department, a Lands Department and a Public Works Department. There is free primary and secondary

education and free medical treatment. The new town of Madinat Isa, planned to rehouse nearly 28 per cent. of the population, housed about 1,000 families on Nov. 13, 1968, when it was formally opened by the Ruler.

In earlier days the only industry was the pearl trade, of which Bahrain was an important centre, but this has declined since the advent of the cultured pearl and petroleum dominates the scene. Oil was discovered in 1932 and The Bahrain Petroleum Company, Limited (BAPCO), has its headquarters in Awali, some eleven miles from Manama. The company also operates a refinery and about 80 per cent. of the oil refined is piped from Saudi Arabia.

The second source of revenue is that of Bahrain's traditional *entrepôt* trade. The island is conveniently situated to handle goods in transit to the mainland and it is estimated that not less than 70 per cent. of the imports unloaded at Bahrain were, up to a few years ago, destined for onward movement. A decline in this *entrepôt* trade has, however, occurred as there is a growing tendency for eastern Saudi Arabia, Qatar and other places in the Gulf to import direct. This trend was reversed in 1966 when Bahrain re-exported 30 per cent. of its imports compared to the 27.2 per cent. in 1965 and by 1968 re-exports had risen to 35.5 per cent. To encourage the *entrepôt* trade, free transit facilities were introduced in the port of Bahrain on January 1, 1958, and a new harbour, named the Mina Sulman after the late Ruler, was opened in May, 1962.

The principal imports and re-exports are household goods, foodstuffs, piece-goods, timber and building materials (especially cement), wearing apparel, vehicles and machinery.

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£8,403,000	£10,657,000
Exports to U.K. ....	2,868,000	1,914,000

Manama, the capital and commercial centre, extends for two miles along the northern shore of Bahrain Island and is a regular port of call for thirty steamship lines. Bahrain is also a port of call for B.O.A.C. and other international airlines, with a modern air terminal and facilities for jet airlines. Banking services are provided by the Bank of Bahrain and by branches of the Eastern Bank, the British Bank of the Middle East, the Arab Bank, the Habib Bank and the United Bank. There is a radio-telephone service to the United Kingdom and many other parts of the world. Electricity and water supply is available in all towns and most villages.

FLAG: Red, with vertical straight or serrated white bar next to staff.

CAPITAL,  $\Psi$  Manama; population, 61,726.  
Secretary to the Government, G. W. R. Smith, M.B.E.  
H.M. Political Agent, A. J. D. Stirling (1969).

Bahrain is the headquarters of H.M. Political Resident in the Persian Gulf, Sir Stewart Crawford, K.C.M.G., C.V.O (1966) ..... £6,300

British Council Representative, J. G. Hanson, 1 Government Road, Manama. There is a Council office at Dubai and the Representative at Bahrain is responsible for Council work in Qatar, Trucial States, Muscat and Oman.

## BELGIUM

(Royaume de Belgique.)

King of the Belgians, H.M. King Baudouin, K.G., born Sept. 7, 1930; succeeded July 17, 1951, on the abdication of his father, King Leopold III, after having acted as Head of the State since August 11, 1950; married Dec. 15, 1960, Doña Fabiola de Mora y Aragón.

Heir Presumptive, H.R.H. Prince Albert, born June 6, 1934, brother of the King; married July 2, 1959, Donna Paola Ruffo di Calabria, and has issue Prince Philippe Leopold Louis Marie, b. April 15, 1960; Princess Astrid Josephine-Charlotte Fabrizia Elisabeth Paola Marie, b. June 5, 1962; Prince Laurent, b. Oct. 20, 1963.

#### BELGIAN EMBASSY IN LONDON.

Chancery and Passport Office, 103 Eaton Square, S.W.1.

[01-235-5422]

Ambassador Extraordinary and Plenipotentiary, His Excellency Baron J. van den Bosch (1965).

Minister Counsellor, M. S. Frey.  
Counsellors, M. Pierre Van Coppenolle (Economic Affairs); M. Georges Van der Eept.  
Naval, Military and Air Attaché, Col. R. C. Close.  
1st Secretary, M. P. H. L. Berghs.

Agricultural Attaché, M. Maurice Cammaerts.  
Attachés, Baron A. Guillaume; M. R. A. P. van Speybroeck; Mlle. F. van Haelewyck.

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, (estimated Dec., 1967) of 9,606,000. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 859 miles, and a sea-board of 41 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest

hill, Baraque Michel, rises to a height of 2,230 feet at the Signal de Botranges, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an

increase in the Flemish population of almost 517,000 and in the Walloon population of about 100,000. Nearly all the inhabitants are Roman Catholics.

**Government.**—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 4, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 175 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of March 31, 1968, returned to the Chamber of Deputies 69 Social Christians (Catholics), 59 Socialists, 47 *Parti de la Liberté et du Progrès* (Liberals), 20 *Volksumie*, 12 *Front Démocratique des Bruxellois Francophones* and *Rassemblement Wallon*,

and 5 Communists, total 212. The Senate of 179 Members (plus H.R.H. Prince Albert) includes 53 Socialists, 37 *Parti de la Liberté et du Progrès* (Liberals), 14 *Volksumie*, 8 *Front Démocratique des Bruxellois Francophones* and *Rassemblement Wallon*, and 11 Communists.

**Production.**—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly averaged some 30,000,000 tons but which dropped to 14,800,000 tons in 1968 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1967 was 9,425,000 metric tons.

**Education.**—Schools are maintained by communal taxation, with provincial and state grants; many are under ecclesiastical control, Roman Catholic largely predominating. 642 secondary schools, offering a general education, are maintained by the State, 47 by local government authorities, while 687 are controlled by independent bodies (largely Roman Catholic) but are mainly eligible for state subsidies. Of primary schools, 457 are controlled by the State, 4,691 by local governments and 3,819 by independent authorities. The Universities of Ghent and Liège are state institutions; the Free University of Brussels and the Catholic University of Louvain are independent though largely subsidized by the State.

**Language and Literature.**—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxemburg, Liège and the southern half of Brabant. Legislation enacted on Feb. 15, 1962, provided for a fixed linguistic border between the Flemish-speaking and French-speaking areas of Belgium. Flemish is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. The City of Brussels is bilingual. The linguistic border runs from a point south of Ypres and on the French frontier, to a point south of Brussels, then to a point north of Liège and east to the German frontier south of Aachen.

The literature of France and the Netherlands is supplemented by an indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Emile Verhaeren (1855-1916) was a poet of international standing. Of contemporary Belgian writers, perhaps the most celebrated is Georges Simenon (born at Liège in 1903). There are 72 daily newspapers (French, Flemish and some German) in Belgium.

#### FINANCE 1968

Revenue (Ordinary Budget estimate).....	B.Fr. 240,602,000,000
Expenditure (Ordinary Budget estimate).....	240,748,000,000
Budget Estimate Extraordinary:	
Revenue.....	587,000,000
Expenditure.....	31,186,200,000

The unit of currency is the Belgian franc. On Sept. 11, 1969, the Bank of England official rate of exchange was 120 francs = £1. (See also p. 83.)

## TRADE

	1967	1968
	('000 Francs)	('000 Francs)
Total Imports.....	358,795,000	416,670,000
Total Exports.....	351,621,000	408,200,000

## Trade with U.K.

	1967	1968
Imports from U.K. £177,553,000	£233,854,000	
Exports to U.K. . . . .	143,081,000	169,598,000

COMMUNICATIONS.—On Dec. 31, 1967, there were 4,336 kilometres of normal gauge railways operated by the Belgian National Railways, of which 1,078 kilometres were electrified; the length of light railways operated in 1965 was 582 kilometres (of which 558 were electrified). Belgian National Railways also operate 6,863 kilometres of regular bus routes. Other operators run 13,224 km. of bus routes. On Dec. 31, 1968, there were 1,250,000 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825-27) which permits the passage to Ghent of ships up to 66,000 tons; *Roupeil* (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The *Albert Canal* (79 miles), which figured prominently in the fighting (Sept. 1944) for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. The modernization of the port of Antwerp begun in 1956 is now well advanced. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal is being widened or deepened to take barges up to 1,350 tons. These improvements were expected to involve a total cost of £78,500,000.

There are 10,443 kilometres of State roads of which 318 km. are motorways, 1,241 kilometres of provincial roads and 11,925 km. of roads which are the responsibility of the communes. Most of the maritime trade of Belgium is carried in foreign shipping, the mercantile marine consisting (1968) of 92 vessels (885,708 tons), in addition to which there are 354 fishing boats (29,884 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, ■ well as overseas services to the United States, the Congo and the U.S.S.R. A passenger and mail-carrying helicopter service the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

## CITIES AND TOWNS.

The Capital, BRUSSELS, had a population (Dec. 31, 1967) of 1,079,181 (with suburbs). Other towns are ψ Antwerp, the chief port (657,485); ψ Ghent (232,915), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (452,713), the centre of the iron industry, and Charleroi (283,426), the important coal-mining and metallurgical centre; ψ Bruges (105,715); ψ Ostend (57,359); Malines (65,474). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, ■ hr.

NATIONAL FLAG.—Three vertical bands, black, yellow, red.

NATIONAL DAY.—July 21 (Accession of King Leopold I, 1831).

British Council Representative to Belgium and Luxembourg, Miss A. C. Hayter, 266 Avenue Louise, Brussels 5 (Council library at Brussels).

BRITISH CHAMBER OF COMMERCE, 30 Rue Joseph II, Brussels.

## BHUTAN

King of Bhutan, Jigme Dorji Wangchuk, born 1929; succeeded his father, March, 1952.

Bhutan, with an area of about 18,000 sq. miles and a population (estimated, 1967), of 770,000, mainly Buddhists, is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now ■ Protectorate of the Republic of India (for MAP see p. 746). In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 ■ compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. A motor road runs 107 miles from Paro, the winter capital, to Phunthsholigen in W. Bengal. Three other roads linking Bhutan with India ■ under construction or projected. The Prime Minister of Bhutan, Lhendup Dorji, succeeded his brother on July 25, 1964. The Government of India has ■ diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

CAPITAL, Punakha.

## BOLIVIA

(República de Bolivia)

President, Dr. Luis Adolfo Siles Salinas, succeeded April 27, 1969 (from Vice-Presidency).

BOLIVIAN EMBASSY IN LONDON

106 Eaton Square, S.W. 1.

[01-235-4248]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Roberto Querejazu Calvo (1966).

Consulate, 106 Eccleston Mews, S.W. 1.

Minister-Counsellor, Sr. Carlos Hanhart (Commer-

cial and Secretary, Sr. Gonzalo Bilbao La Vieja.

There are Bolivian Consular Offices in Liverpool, Birmingham, Hull, Cardiff and Glasgow.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W. It has an area estimated at 415,000 square miles with an estimated population (estimated, 1968) of 3,852,000. (For MAP, see p. 829.) The Republic derives its name from its liberator, Simon Bolívar (born 1783, died 1830).

Bolivia came under military rule in November, 1964, when a Junta took over by force from the National Revolutionary Movement which had been in power for twelve years. The National Congress was suspended and Dr. Victor Paz Estensoro who had been three times President went into exile in Lima. The former Commander-in-Chief of the Air Force, General Barrientos, who had been Vice-President during Dr. Paz's third term of office, became President with a Cabinet consisting entirely of service officers. General Ovando, until then Commander-in-Chief of the Armed Forces, joined Barrientos as Co-President on May 26, 1965, with General Barrientos taking over joint responsibility at the same time for the Armed Forces. The present régime has abolished the 1961 Constitution which was promulgated by the N.R.M. and returned to that of 1947. In January, 1966, General Barrientos resigned as Co-President in order to stand as a constitutional Presidential candidate and won a substantial victory in the elections which were held on July 3. President Barrientos was killed in a helicopter accident on April 27, 1969, and in accordance with the Constitution was succeeded by the Vice-President (see above).

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenez, Beni, Mamore and Madre de Dios.

Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosí are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaya, the largest in the world, 28,852 tons being produced in 1968; copper, antimony, lead, zinc, asbestos, wolfram, bismuth, salt and sulphur are found, and petroleum is also produced.

The Republic has been self-supporting in most petroleum products since January, 1954. Production of crude oil in 1968 totalled 16,219,835 barrels (of 42 U.S. gallons), of which 9,010,239 barrels were exported. Its agricultural produce consists chiefly of rice, barley, oats, wheat, sugarcane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, etc. Manufactures are developing.

There are 2,200 miles of railways in operation including the lines from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312 miles). There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Río Mulato to Potosí, and from Potosí to Sucre, the legal capital. The Antofagasta (Chile) and Bolivia Railroad was formerly an all-British concern, but the Bolivian sector has now been nationalized. Com-

munication with Peru is effected by rail to Guaquí and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial aviation in Bolivia is conducted by Braniff International Airways (American), Lufthansa, Iberia, Apsa (Peruvian), Aerolíneas Argentinas, and Lloyd Aéreo Boliviano (Bolivian), the five former providing international connections with U.S.A., West coast South American countries, Canal Zone, Europe and Argentina; Lloyd Aéreo Boliviano, maintaining a service to Lima and São Paulo and attending to local flights, links with La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, etc. and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1884.

*Language and Literature.*—The official language of the country is Spanish, but many of the Indian inhabitants (about two-thirds of the population) speak Quechua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion was disestablished in 1961 but relations between it and the State are good. Elementary education is compulsory and free and there are secondary schools in urban centres. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are six other universities, the largest being the University of San Andrés at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are twelve principal daily newspapers in Bolivia, with an estimated daily circulation of 150,000.

#### FINANCE

The Budget for 1969 showed estimated revenue of \$4,941,509,978; estimated expenditure, \$4,967,972,709; deficit \$26,462,731.

On December 15, 1956, the *Boliviano* was made freely convertible for all purposes without restriction and from Jan. 1, 1963, the *Boliviano* is replaced by the *Peso Boliviano* at the rate of Bs. 1,000 = *Peso* 1 (\$1.). Exchange rate (1968): \$28.45 = *£*1. (See also p. 83.)

#### Trade with U.K.

	1967	1968
Imports from U.K. . .	£1,684,000	£2,223,000
Exports to U.K. . . . .	23,795,000	26,454,000

The principal exports are tin (most of which is exported to the U.K.), lead and antimony ores, silver, copper, wolfram, zinc, gold, nuts, hides and skins, vicuña wool and coffee. The chief imports are wheat and flour, sugar, iron and steel products, machinery, vehicles and textiles.

SEAT OF GOVERNMENT, La Paz. Population (estimated 1967) 482,367. Other large centres are Cochabamba (138,078), Oruro (91,911), Santa Cruz (99,000), Potosí (73,923). Sucre, the legal capital and seat of the judiciary (58,000) and Tarija (26,787).

FLAG: Three horizontal bands; Red, yellow, green.

NATIONAL DAY.—August 6 (Independence Day).

*President*, Marshal Arthur da Costa e Silva, *assumed office* March 15, 1967.  
*Vice-President*, Dr. Pedro Aleixo.

#### CABINET

*Minister of Foreign Affairs*, Deputy José de Magalhães Pinto.  
*Finance*, Dr. Antonio Delfim Netto.  
*Planning and Economic Coordination*, Dr. Hélio Penna Beltrão.  
*Industry and Commerce*, Gen. Edmundo de Macedo Soares e Silva.  
*Army*, Gen. Aurélio de Lyra Tavares.  
*Navy*, Admiral Augusto Hamann Rademaker Grunewald.  
*Air* Air Marshal Márcio de Souza e Mello.  
*Justice*, Sr. Luiz Antonio Gama e Silva.  
*Labour and Social Welfare*, Col. Jarbas Gonçalves Passarinho.  
*Education and Culture*, Dr. Tarso de Moraes Dutra.  
*Transport and Public Works*, Col. Mario David Andreazza.  
*Mines and Energy*, Dr. Antonio Dias Leite.  
*Agriculture*, Sr. Ivo Arzua Pereira.  
*Health*, Dr. Leonel Tavares Miranda de Albuquerque Lima.  
*Communications*, Dr. Carlos Furtado Simas.  
*Interior*, Col. José Costa Cavalcanti.

#### BRAZILIAN EMBASSY IN LONDON

32 Green Street, W.1.

[01-629-0155-58]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sérgio Corrêa Affonso da Costa G.C.V.O. (1968).  
*Minister-Counsellor*, F. de Assis Grieco.  
*Minister*, O. de Andrade Mello (*Consular Affairs*).  
*Counsellor*, R. Costa (*Economic Affairs*).  
*Air Attaché*, Col. R. A. Carrão de Andrade.  
*Naval and Military Attaché*, Capt. F. E. C. Ribeiro.  
*1st Secretaries*, F. Baptista de Faria (*Consular*); J. O. Rache de Almeida; H. Tavares Pires; O. R. da Silva Neves (*Economic*); P. Pires do Rio.  
*2nd Secretaries*, J. Ferreira Lopes; G. C. Paranhos Velloso; R. A. Barbosa, M.V.O.; C. L. Nunes Amorim (*Consular*); C. M. H. do Couto Lyra.  
*Cultural Attaché*, A. Olineto.  
*Attachés*, Sr. S. de Azevedo Lima; Prof. J. L. da Silva; A. B. de Medonça Lima (*Commercial*).  
*Consular Section*, 6 Deanery Street, W.1 (01-499-7441).  
 There are also a Brazilian Consulate-General at Liverpool and Consular offices at Newcastle upon Tyne, Cardiff and Glasgow.

#### POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to

east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,430 square miles with a population (estimated 1968), 88,209,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra da Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolúmi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paranaí*, between Goiás and Minas Gerais, the *Serra dos Aimorés*, which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia*, *Branca* and *Arapeí*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingú* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from the Plateau of Mato Grosso and the mountains of Goiás to the Gulf of Pará. The *Parnaíba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguaçu* or *Iguassú*, which unites with the Upper Paraná at the Brazil-Argentine-Paraguay boundary, are the majestic Falls of the *Iguassu* (200 ft.), and on the *São Francisco* are the no less famous falls of *Paulo Afonso* (260 ft.).

*Government*.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King Joao VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getúlio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 29, 1934. By a *coup d'état* of Nov. 10, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 18, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1960, elections took place in which Sr. Jânio Quadros was elected President to succeed Dr. Kubitschek. Sr. Quadros resigned in August, 1961, and was succeeded by the Vice-President, Sr. Goulart.

As a result of a referendum held on Jan. 6, 1963, the *Ato Adicional* instituting the office of Prime Minister was revoked. President Goulart after an indecisive period of government, during which he frequently changed his ministers, was deposed on April 1, 1964, by a revolt which originated in the States of Minas Gerais and São Paulo. Sr. Ranieri Mazzilli, President of the Chamber of Deputies, became President of the Republic in accordance with the Constitution. Shortly afterwards, Congress elected Marshal Humberto Castelo Branco to the Presidency. He assumed office on April 15, 1967.

President Castelo Branco appointed a non-party cabinet of ministers most of whom possessed some experience in their respective fields.

By stringent measures this government sought, with some success, to restore the economy, political stability and administrative discipline. Marshal Arthur da Costa Silva assumed the Presidency on March 15, 1967, with a new team of ministers.

Following the 1964 Revolution new legislation was decreed giving the executive extensive powers and in March, 1967, a new Constitution, replacing that of 1946, came into effect. This incorporated much of the legislation of the Revolutionary Government. The system of indirect Presidential elections was maintained, while the President's powers were increased at the expense of Congress and those of the Federal Government at the expense of the States. On Dec. 13, 1968, on the grounds that there was a movement in Congress to overthrow the Revolutionary régime, the President placed Congress in recess and issued Institutional Act No. 5 which strengthened the powers of the Executive yet further.

**Production.**—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious

stones are also found. The mineral wealth is still exploited to a limited extent only. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. Production estimates for the year 1968 included: iron ore, 22,297,562 metric tons; oil, 12,256,777 cubic metres; coal, 4,104,120 metric tons; steel ingots, 4,435,747 metric tons; refined petroleum products, 9,509,971 cubic metres.

Licences for new foreign investments amounting to U.S. \$20,226,000 were issued in 1967-8, bringing the total since 1955 to U.S. \$559,782,000.

In 1968 the Brazilian automobile industry produced 4,261 heavy lorries and buses; 62,442 passenger and cargo trucks; 42,777 light lorries; 8,087 utility vehicles; 3,075 light, 1,659 medium and 4,892 heavy tractors.

The main exports of agricultural produce in 1968 were:

	Metric Tons	Value \$U.S.
Coffee .....	1,107,000	774,000,000
Cotton .....	248,000	131,000,000
Cocoa beans.....	76,000	46,000,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

**Defence.**—The peace-time strength of the Army is 150,000 of which some 80 to 100,000 are doing

military service, with an immediate reserve of 250,000. The Navy consists of 1 Aircraft Carrier, 2 Cruisers, 18 Destroyers and Escorts, 2 Submarines, 4 Minesweepers, 6 Survey Vessels, 10 Corvettes (tugs) and 4 naval transports. The strength of the Navy is 55,000 including marines. The Marine Corps strength is over 10,000. The Air Force, with a strength of 35,000, including approximately 1,500 pilots and aircrew, has 600 aircraft and is the largest in South America.

**Education.**—Primary education is compulsory and is the responsibility of State governments and municipalities. At this level approximately 12 per cent. attend private schools. In 1967 12,080,000 children were enrolled in primary schools of all types.

Secondary education is largely the responsibility of the State and Municipal Governments, although a small number of very old foundations (the Pedro II Schools) remain under direct Federal control. Over 50 per cent. of all pupils at this level attend Private Schools.

In 1965 a total of 2,154,530 pupils were enrolled in all types of Secondary School—1,645,320 following the basic 4 year course and 509,110 the 3 year superior course leading to university entrance standard. Of this grand total 1,553,699 were in Academic Secondary Schools, 288,351 in Commercial Schools; 79,230 in Technical Schools; 12,878 in Agricultural Schools; and 220,272 in Normal Schools (for Primary Teacher Training). The total Secondary enrolment figure for 1967 is 2,707,000 but no breakdown into individual types of school is yet available.

In 1967 a total of 174,604 students enrolled for courses in 37 Federal and State Universities and other establishments offering courses at university level. In 1965 there were a total of 1,280 Faculties half of which were within universities, the remainder being independent. Of this grand total, 604 were privately run.

**Language and Literature.**—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers.

**Communications.**—In 1967 there were about 32,182 kilometres of railways in service, largely of 1 metre gauge, but including 3,880 kilometres of other gauges. Traffic carried in 1967 was—Passengers, 345,309,000; Freight, 54,301,000 metric tons; livestock, 917,000 metric tons. During 1967 the ports of Rio de Janeiro and Santos were used by 6,426 vessels representing 31,767,000 registered tons.

Varig of Brazil and nine foreign airlines operate services between Brazil and Europe, 3 between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country. During 1968, 2,564,975 passengers passed through Brazilian airports; 29,912 tons of cargo were transported and 3,141 tons of mail. The airports of Rio de Janeiro and São Paulo alone recorded 49,287 aircraft arrivals and departures in 1968.

Postal facilities in Brazil include approximately 5,750 post offices and 50,000 miles of telegraph. In 1967, 1,451,039 telephones were in use, of which a large proportion are dial operated.

	FINANCE	
	1967	1968
	New Cruzeiros '000	New Cruzeiros '000
Revenue.....	6,683,844	10,275,400
Expenditure.....	6,943,198	11,502,100

The total internal debt of the Federative Republic at the end of 1968 amounted to NCr\$ 3,300,000,000; the States' debt was NCr\$ 1,200,000,000. From August, 1968, to June, 1969, the dollar exchange rate rose from NCr\$3:63 to NCr\$4.025 or NCr\$9:6105 = 1.

TRADE (1968)	
Total Imports.....	\$U.S. 1,855,118,672
Total Exports.....	\$U.S. 1,881,344,296

Trade with U.K.		
	1967	1968
Imports from U.K. .	£19,624,000	£44,058,000
Exports to U.K. ....	26,553,000	37,892,000

The principal imports are: petroleum products, wheat, copper, tractors, machinery, aeroplanes, newsprint, raw materials, chemicals. The principal exports are: Coffee, cotton, iron ore, and other mineral products, sugar, timber, maize, cocoa, fruits, fibre, meat, wax, hides and skins.

**CAPITAL.**—Brasília (inaugurated on April 21, 1960). Population (estimated 1968), 300,000. Other important centres are São Paulo 5,000,000; the former capital  $\Psi$ Rio de Janeiro, with a population (est. 1968) of 4,000,000;  $\Psi$ Belo Horizonte (Minas Gerais) 1,000,000;  $\Psi$ Recife (Pernambuco) 1,000,000;  $\Psi$ Salvador (Bahia) 700,000;  $\Psi$ Porto Alegre (Rio Grande do Sul) 800,000;  $\Psi$ Fortaleza (Ceará) 514,000; Curitiba (Paraná) 362,000;  $\Psi$ Niterói (Rio de Janeiro) 245,000.

**FLAG.**—Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

**NATIONAL DAY.**—September 7 (Independence Day).

**BRITISH EMBASSY.**  
Rio de Janeiro; and Avenida das Nações, lote 8, Brasília, D.F.  
*Residence*, Rua São Clemente 360.  
*Chancery*, Praia do Flamengo 284, 2º andar.  
*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir David Wathen Stather Hunt, K.C.M.G., O.B.E. (1969).....£6,300  
*Minister (Commercial)*, J. C. Petersen, C.M.G.  
*Counsellors*, A. Brooke-Turner; E. H. van Maurik, O.B.E.  
*1st Secretaries*, N. A. I. French, M.V.O. (*Head of Chancery*); E. J. Kerly, M.V.O., O.B.E. (*Consular*); R. A. Wellington, D.S.O., D.F.C. (*Information*); M. F. Daly (*Commercial*); T. Spence (*Labour*); R. G. Tallboys (*Brasília*).  
*2nd Secretaries*, K. J. Lyonette; O. E. Goddard (*Commercial*); E. G. Rogers (*Consular*); R. G. Goodban, M.C.  
*Defence and Military Attaché*, Col. P. B. Winstanley, M.C.  
*Naval and Air Attaché*, Capt. J. C. Brandt, R.N.  
*Attachés*, P. H. Gay; R. Friend; P. J. McCormick; R. Oaten; C. A. Gregg (*Brasília*).

**BRITISH CONSULAR OFFICES.**  
There are British Consular Offices at Rio de Janeiro, São Paulo, Belém (Para), Belo Horizonte,

Vitória, Salvador (Bahia), Manaus, Fortaleza, Pôrto Alegre, Rio Grande, Curitiba, Santos and Recife.

**BRITISH COUNCIL.**—Representative in Brazil, R. Cavallero, Avenida Portugal 360, Rio de Janeiro. Regional offices in Brasília, Curitiba and São Paulo. Book supply to libraries of Sociedade Brasileira de Cultura Inglesa at Rio de Janeiro and São Paulo.

**BRITISH AND COMMONWEALTH CHAMBER OF COMMERCE IN SÃO PAULO,** Rua Barão de Itapetinga 275, Caixa Postal 1621, São Paulo. (Correspondents at Santos and Porto Alegre).

Rio de Janeiro, 5,750 miles distant from London: transit, 15 days.

## BULGARIA

(Bulgariya)

*President of the Presidium of the National Assembly,* Georgi Traikov, elected April 23, 1964.

### COUNCIL OF MINISTERS

*Chairman,* Todor Zhivkov.

*First Deputy Chairman,* Zhivko Zhivkov.

*Deputy Chairmen,* Luchezar Avramov; Ivan Mihailov; Petur Tanchev; Tano Tzolov; Pencho Kuda-binski.

*Minister of National Education,* Prof. Stefan Vassilev.

*National Defence,* Dobri Dzhurov (Army General).

*Internal Trade,* Peko Takov.

*Foreign Trade,* Luchezar Avramov.

*Transport,* Marin Vachkov.

*Foreign Affairs,* Ivan Bashev.

*Interior and State Security,* Gen. Angel Solakov.

*Communications,* Stoyan Tonchev.

*Agriculture and Food Industry,* Vulkan Shopov.

*Supply and State Reserves,* Apostol Pashev.

*Public Health,* Dr. Kiril Ignatov.

*Finance,* Dimiter Popov.

*Justice,* Svetla Daskalova.

*Labour and Social Welfare,* Misho Mishev.

*Chairmen of Committee,* Tsano Tzolov (State Planning); Ninko Stefanov (Party and State Control); Prof. Ivan Popov (Science and Technical Progress); Pavel Matev (Art and Culture); Georgi Pavlov (Chemistry and Metallurgy); Zhivko Zhivkov (Economic Co-ordination).

*Building and Architecture,* Pencho Koubadinski.

### THE COMMUNIST PARTY

*The Politbureau of the Central Committee,* B. Balgaranov; Ts. Dragoycheva; P. Kubadinski; I. Mihailov; T. Pavlov; I. Popov; S. Todorov; B. Velchev; T. Zhivkov; Zh. Zhivkov; T. Zolov (full members); I. Abadzhiev; L. Avramov; K. Gyaurov; P. Takov; K. Trichkov; A. Zanev (alternate members).

*The Secretariat of the Central Committee,* Todor Zhivkov (1st); S. Todorov; B. Balgaranov; V. Bonev; V. Kozhev; I. Pramov; B. Velchev; Mme. R. Koritarova; G. Bokov.

**BULGARIAN EMBASSY AND CONSULATE IN LONDON**  
12 Queen's Gate Gardens, S.W.7.

[01-584-9400]

*Ambassador Extraordinary and Plenipotentiary;* His Excellency Dr. Peter Voutov (1966).  
*Counsellors,* Lubomir Zhelyaskov; Maurice Assa (Commercial).

*Military, Naval and Air Attaché,* Col. Ivan G. Kochovskii.

*1st Secretary,* Vladimir Pchelarov (Economic).  
*2nd Secretary,* Tchavdar Damianov (Cultural Affairs).  
*3rd Secretaries,* Zhivko Popov (Consular); Vladimir Velchev (Press).

*Commercial Attaché,* Boris A. Lagadinov.

The Republic of Bulgaria is bounded on the north by Rumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by

Greece and Turkey. The total area is approximately 43,000 square miles, with a population in December, 1967, of 8,335,000. The largest religion of the Bulgarians is the Bulgarian Orthodox Church. For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the Treaty of Neuilly, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The

Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 11. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a coup d'état gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

**Government.**—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a

Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make ■ constitution) was held; the Opposition won 101 seats out of 465. According to the present Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 20,000 inhabitants for ■ maximum term of four years. The Opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence ■ its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 22, 1948.

**Production.**—Bulgaria is predominantly ■ agricultural country, but is engaged upon an elaborate programme of industrialization. About 90 per cent. of the country's agriculture has been turned over to co-operatives, and a smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The live-stock includes cattle, sheep, goats, pigs, horses, asses, mules and water buffaloes.

There is now ■ substantial engineering industry producing *inter alia* machine tools, electric trucks of all kinds, agricultural machinery, cranes, electric motors and electronic components, which accounts for about ■ third of Bulgaria's exports; and considerable production of lead, zinc and copper (1965, 93,421 tons; 65,764 tons and 49,100 tons respectively). Also in 1965 a production of 10,244,000,000 kw. of electricity, 588,000 tons of steel, 26,300,000 tons of coal (of which, however, 24,000,000 tons is soft coal) was claimed.

There are mineral deposits of varying importance. Bulgaria's heavy industry includes the Kremikovtsi Metallurgical Plant near Sofia, whose first blast furnace, with an annual output of 560,000 tons, was put into operation in 1963, the petrochemical plant at Burgas with an annual capacity of a million tons of processed oil, a nitrogenous fertilizer plant, and other chemical and metallurgical works.

**Defence.**—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 120,000 strong.

**Education.**—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1965-66 there were 1,612 elementary schools, 87 secondary schools, 3,073 combined elementary and secondary schools, 131 grammar schools (gymnasias), 157 schools for all levels and 329 vocational training schools; there were 1,630,741 pupils and 79,077 teachers.

There ■ 26 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1965-66 there were stated to be 84,467 students at higher educational establishments.

**Language and Literature.**—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is ■ modern literature, chiefly educational and popular. The alphabet is Cyrillic. In 1967 there were ■ daily newspapers in Sofia.

**Finance.**—Budget revenue in 1967 was estimated at *leva* 4,078,000,000; expenditure *leva*

4,063,000,000. Currency of Bulgaria is the *lev*. For 1968 rate of exchange, see p. 83.

#### TRADE.

The principal imports are industrial and agricultural machinery, industrial raw materials, machine tools, chemicals, dyestuffs, drugs, rubber, paper. The principal exports are cereals, tobacco, fruit, vegetables, livestock, oil seeds, oils, fats, textiles, eggs, chemicals, essential oils including attar of roses, hardwoods, non-ferrous metals, electric trucks and motors, pumps, ships, accumulators and simple machine tools. In 1964, 80 per cent. of Bulgaria's foreign trade was with the Soviet bloc, including 53 per cent. with the Soviet Union.

#### Trade with U.K.

	1967	1968
Imports from U.K. ...	£6,137,000	£4,012,000
Exports to U.K. ...	6,294,000	7,473,000

**CAPITAL.**—Sofia, Pop. (1967), 858,876, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of Ψ Varna (119,769) and 125 miles from Lom (23,015), on the Danube; Ψ Burgas (72,795) is also a Black Sea Port, those on the Danube being Ψ Rusè (83,472), Ψ Svishtov (18,537), Ψ Vidin (23,984). Other important trading and industrial centres ■ Plovdiv (162,518) and Pleven (57,758).

FLAG.—3 horizontal bands, white, green, red; national emblem on white stripe near hoist.

NATIONAL DAY.—Sept. 9 (Day of Freedom).

#### BRITISH EMBASSY

(Republic of the Union of Burma)

*Revolutionary Government*

*Chairman and Member for Defence*, General Ne Win.

#### BURMESE EMBASSY AND CONSULATE

19A Charles St., Berkeley Square, W.1.

[01-499-8841]

*Ambassador*, His Excellency U Ba Saw (1968).

**Area and Population.**—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 9' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west and a frontier with Pakistan along the Naaf River, defined in 1964 by a Memorandum of Agreements, and India to the north-west defined in 1967; in the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and has since been demarcated; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming ■ frontier with Thailand to the east. (For MAP, see p. 746). The total area of the Union is about 262,000 square miles, with an officially estimated population of 26,980,000 in 1969—about 100 persons to the square mile.

**Political Divisions.**—The Union of Burma comprises Burma proper (at about 145,000 sq. miles by far the largest unit), administered direct by the Central Government, and also the Shan State (60,155 sq. miles), Kachin State (34,379 sq. miles), Kawthoole (formerly Karen) State (11,731 sq. miles) and Kayah State (4,529 sq. miles) each with its own State Government. There is also the Special Division of the Chins (13,907 sq. miles).

**Physical Features.**—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

**Races, Language and Religions.**—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Thai groups. The three important non-indigenous elements are Indians, Chinese and Pakistanis. Numbers of resident foreigners have shown a sharp decline in recent years. Burmese is the official language, but minority languages include Shan, Karen Chin and the various Kachin dialects. English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

**Government.**—Burma became an independent republic outside the British Commonwealth on January 4, 1948. It was a bicameral parliamentary democracy with ■ elected Head of State. For the first ten years of independence the ruling party was the Anti-Fascist People's Freedom League under the Leadership of U Nu. After a split in the A.F.P.F.L. in 1958, General Ne Win and his Caretaker Government were invited to take office. General Elections in February, 1960, resulted in a victory for U Nu's new party, the Union Party (161 out of 250 seats).

On March 2, 1962, the army staged ■ *coup d'état*, abolished parliament, suspended the Constitution and imprisoned most of the Cabinet. The Revolutionary Council of senior officers under General Ne Win have since taken a number of measures to establish state socialism in Burma in line with the policy statement "The Burmese Way to Socialism". A new political party, the Burma Socialist Programme Party, is being established to take over the government under ■ one-party system. The problem of insurgency (minority and Communist groups) remains an important one for the country.

**Education.**—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade.

Under the University Education Law of 1964, the Government reorganized the higher education system to encourage the expansion of medical and technical studies. The four existing Universities (Rangoon, Mandalay, Moulmein and Bassein) have been decentralized and the faculties of Medicine (at present there are ■ Medical Institutes in Rangoon and one in Mandalay), Economics, Engineering, Agriculture, Veterinary Science and Education have

been reconstituted as independent Institutes. The remaining faculties are grouped together ■ the Arts & Science University of the city concerned.

There ■ teachers' training colleges in Rangoon, Moulmein and Mandalay which train junior assistant teachers and 9 State Teachers Training Institutes for primary assistant teachers. The Institute of Education in Rangoon trains senior assistant teachers and awards degrees. There are three Government technical institutes at Insein (near Rangoon), Mandalay and Kalaw. There are 5 technical high schools, 2 in Rangoon, 1 in Mandalay ■ in Maymo and 1 in Taunggyi. Under the Colombo Plan, New Zealand has financed the construction of a school at Taunggyi at ■ cost of £100,000 sterling and Britain has provided the school with equipment valued at £45,000. There is an industrial trade school in Aungmyemyo.

**Finance.**—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1968-69 were: Revenue, K.8,116,294,000; Expenditure, K.8,415,904,000.

**Production, Industry and Commerce.**—Three-quarters of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat and grain. Rice is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being derived from 12,000,000 acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3,000,000 tons, but has declined in recent years and exports in 1966-67 amounted to 590,794 tons, including by-products. The net area sown to all crops in 1966-67 was 21,404,209 acres and reserved forests covered 22,308,880 acres. The principal export after rice is teak, of which some 200,000 tons were exported annually before the war. The 1966-67 figure was 100,000 tons. Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum products are the most important. Production of crude oil in 1966-67 totalled 15,300,000 gallons. There is a refinery at the main oilfield, Chauk, and another at Syriam near Rangoon. Their combined output of petroleum products is sufficient for most of Burma's needs. The production and distribution of petroleum and the importation of oil products is ■ monopoly of the People's Oil Industry (formerly Burma Oil Company (1954), Ltd.) which is now fully owned by the Government of Burma.

Under the Government's development plan, a cement plant, a brick and tile factory, a steel rolling mill, a jute bag and twine mill, two cotton spinning and weaving mills, a pharmaceutical plant, a large hydro-electric scheme and three sugar factories are in production. A paper factory and a textile mill are being constructed with the loan of £30,000,000 from China and a glass factory and ■ fertilizer factory are being constructed with a West German loan of £3,150,000. Under ■ agreement of January, 1964, Japan will make available to Burma £50,000,000 over 12 years, commencing in 1965. Commercial loans totalling £10,700,000 will be offered over 6 years at 6 per cent. interest.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£6,375,000	£7,720,000
Exports to U.K. . . . .	3,234,000	3,829,000

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member

countries and through the specialized agencies of the United Nations.

**Communications.**—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein. Transit from London to Rangoon: by sea, 26–35 days; by air, 18 hours.

The Burma Railways network covers 1,952 route miles, extending to Myitkyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and 5 further 50 French and West German diesel-electric locomotives have been purchased with a recent World Bank loan. There are about 9,000 miles of all-weather roads and a total of some 15,000 miles of roads. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles international traffic.

**CAPITAL.**—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1968), 1,703,002.

Mandalay, the chief city of Upper Burma, had 8 population of 316,796 in 1966. Moulmein of 156,968 and Bassein of 90,006. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

**FLAG.**—The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars.

**NATIONAL DAY.**—January 4.

#### BRITISH EMBASSY.

(80 Strand Road, Rangoon.)

*Ambassador Extraordinary and Plenipotentiary, His Excellency Trafford Smith, C.M.G. (1967).* £5,625 1st Secretaries, A. B. P. Smart (*Head of Chancery*); R. J. Dowie; D. R. Gallwey; W. B. J. Dobbs (*Commercial*).

2nd Secretaries, R. J. Chase (*Information and Colombo Plan*); Miss G. A. Robertson (*Consular*).

### BURUNDI

(Republic of Burundi)

*President, Col. Micombero Michel, assumed office, Nov. 28, 1966.*

Formerly a Belgian trusteeship under the United Nations, Burundi was proclaimed an independent State on July 1, 1962. Situated on the east side of Lake Tanganyika, the State has an area of 10,747 sq. miles and a population (estimated, 1967) of 3,340,000. There are some 2,500 Europeans and 1,500 Asians. The population is mainly of the Bahutu and Batutsi tribes.

Burundi became independent as a Constitutional monarchy, but this was overthrown on November 28, 1966. The Constitution and Parliament were also abolished. The President rules through a Cabinet of Ministers and the UPRONA party apparatus. All the Governors of the eight Provinces are Army officers. Burundi is a one-Party State.

The chief crop is coffee, much of which is exported to the United States, and cotton is also grown. Hides and skins exports are also important. Joint economic arrangements of Burundi with Ruanda ended in 1964 and each country now has its own national bank, coffee organization, etc.

The currency is the Burundi franc. The rate of exchange is Fr. Bu. 210 = £1. Government expenditure in 1967 amounted to Fr. Bu. 1,650,000,000 and revenue Fr. Bu. 1,550,000,000.

In 1968 Burundi exported goods worth Fr. Bu. 1,455,600,000 and imported goods worth Fr. Bu. 1,496,700,000 in the same period. Burundi imported British goods to the value of £340,000 in 1968 and exported goods valued at £1,996,000 to the United Kingdom.

**CAPITAL.**—Bujumbura (*formerly Usumbura*), with about 70,000 inhabitants. Gitega (7,000 inhabitants) is the only other sizeable town. Official languages are Kirundi, 3 Bantu language, and French. Kiswahili is also used.

**FLAG.**—White diagonal cross on green and red quarters, with 3 circular white panel in the centre.

**NATIONAL DAY.**—July 1.

*British Ambassador, His Excellency Paul Hervé Giraud Wright, C.M.G., O.B.E. (1969) (resident at Kinshasa, Congolese Republic).*

*Hon. British Consul, J. Hussey, P.O. Box 1750, Bujumbura.*

### CAMBODIA

(Kampuchea)

*Queen-Dowager (symbol of the Throne), Her Majesty Kossamak Nearirat, widow of King Norodom Suramarit (died April, 1960).*

*Head of State, Prince Norodom Sihanouk (June, 1960).*

A Government headed by Samdech Penn Nouth took office on May 1, 1968. Gen. Lon Nol agreed on Aug. 8, 1969, to form a new Government.

#### CAMBODIAN EMBASSY

26 Townshend Road, N.W.8

[01-722-8011]

*Ambassador, His Excellency Samreth Soth, 1st Secretary, Nguon Pytoravuth.*

**Area and Population.**—A kingdom with an area of some 70,000 square miles and a population of 7,000,000 (1969), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam. (*For MAP, see p. 971*).

**History.**—Once 3 powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated 3 constitution providing for parliamentary government. Full independence was proclaimed on November 9, 1953. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. All governments since then have been drawn from the Popular Socialist Community (*Sangkum Reastr Nyum*), a movement formed by Prince Norodom Sihanouk who abdicated in March, 1955, in favour of his parents, King Norodom Suramarit and Queen Kossamak.

The Community holds all 82 seats in the National Assembly as a result of the last general elections which were held in September, 1966. Following the death of King Norodom Suramarit in April, 1960, 3 Council of Regency was in being until June, when Prince Norodom Sihanouk assumed office as Head of State. In November, 1963, Prince Sihanouk announced the ending of U.S. aid and the nationalization of foreign trade and banking. Diplomatic and consular relations between Cambodia and U.S.A. were broken off in May, 1965.

**Geography, Economy and Communications.**—Cambodia has an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber are the main exports. Fifty per cent. of the total land area is forest or jungle abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has over 5,000 kilometres of roads, of which nearly half are hard-surfaced and passable in the rainy season. There are two railways. One runs from Phnom-Penh to the Thai border; the other, from Phnom-Penh to Kampot, is being extended to Sihanoukville. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. The main installations of a deep water port at Sihanoukville on the Gulf of Thailand have been completed and can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway. There is as yet no large-scale industry, but textile mills and plywood, cement and paper factories have been constructed with Chinese aid and a sugar factory financed by Czechoslovakia has started production. Jute, bottle and tyre factories, a lorry and tractor assembly plant, an oil refinery and a brewery have been set up. Cambodia receives foreign aid from China, France, the Soviet Union, and members of the Colombo Plan. Since 1956, Cambodia has sought to increase her foreign trade by the conclusion of trade exchange and payments agreements with several countries, including China, Poland, Czechoslovakia, Rumania, North Vietnam, Yugoslavia, the United Arab Republic, Laos and Japan.

The Cambodian airline, Royal Air Cambodge, operates services to Saigon, Singapore, Canton, Hanoi and Hong Kong, also to Siemreap where the famous ruins of Angkor are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

**Religion and Education.**—The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese (400,000) and Vietnamese (500,000) minorities. The national language is Cambodian (*Khmer*), although French is widely spoken and is still largely the official language of government and commerce. Considerable efforts are now being devoted to the development of education and new schools, colleges and technical institutes have been established. A Buddhist University has been inaugurated in Phnom-Penh, where there are also Faculties of Arts, Medicine and Law, and a Technological Institute. Several residential teachers' training colleges are now in operation.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£1,494,000	£1,471,000
Exports to U.K. . . . .	692,000	657,000
CAPITAL, Phnom Penh. Population (estimated, 1969), 600,000.		

**FLAG.**—Horizontal stripes of blue, wide red stripe bearing emblem (Temple of Angkor Wat in white), and blue. **NATIONAL DAY.**—November 9.

#### BRITISH EMBASSY.

96 Boulevard Préah Bat Norodom, Phnom-Penh. Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Harold Arthur Neville Brown, C.M.G., C.V.O. (1966) . . . . £5,075. Defence and Military Attaché, Lt.-Col. I. A. C. Bruce, R.E.

1st Secretaries, M. J. T. McCann; A. J. Johnstone (Commercial and Consul).

### CAMEROON REPUBLIC

(Federal Republic of Cameroon)

President, Ahmadou Ahidjo, elected for 5 years, May 5, 1960; re-elected for 5 years, May 7, 1965.  
Vice-President, John Ngu Foncha.

#### CAMEROON EMBASSY

84 Holland Park, W.11.

[01-727-0771]

Ambassador Extraordinary and Plenipotentiary, His Excellency Lucas Zaa Nkweta (1965).  
Counsellors, P. T. Biloa; J. B. Etame (Commercial); V. Ndiha (Cultural).

The Federal Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west, Chad and the Central African Republic to the east and Congo and Gaboon to the south. (For MAP, see p. 836). It has an area of approximately 183,381 sq. miles (432,000 sq. km.) and a population estimated (1967) at 5,493,000. Principal products of East Cameroon are cocoa, coffee, bananas, cotton, timber, groundnuts and aluminium; of West Cameroon, bananas, rubber, timber, cocoa and palm products. There is an aluminium smelting plant at Edéa in East Cameroon with an annual capacity of 50,000 tons. Annual trade of the Federal Republic is approximately, Exports, £54,000,000; Imports, £55,000,000.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£2,000,000	£3,191,000
Exports to U.K. . . . .	1,477,000	2,448,000

The whole territory was administered by Germany from 1884 to 1916. From 1916 to 1959, present-day East Cameroon was administered by France as a League of Nations (later U.N.) trusteeship. On Jan. 1, 1962 it became independent as the Republic of Cameroon. The Republic was joined on October 1, 1961, by the former British administered trust territory of the Southern Cameroons (now West Cameroon), after a plebiscite held under United Nations auspices. The Federal government consists of President, Vice-President and 9 Federal Ministers. There are separate East and West Cameroon state governments.

**CAPITAL.**—Yaoundé (120,000).  $\Psi$  Douala 200,000, is an important commercial centre.

**FLAG.**—Vertical stripes of green, red and yellow with two five-pointed stars in upper half of green band.

**NATIONAL DAY.**—January 1 (Independence Day).

#### BRITISH EMBASSY

Yaoundé.

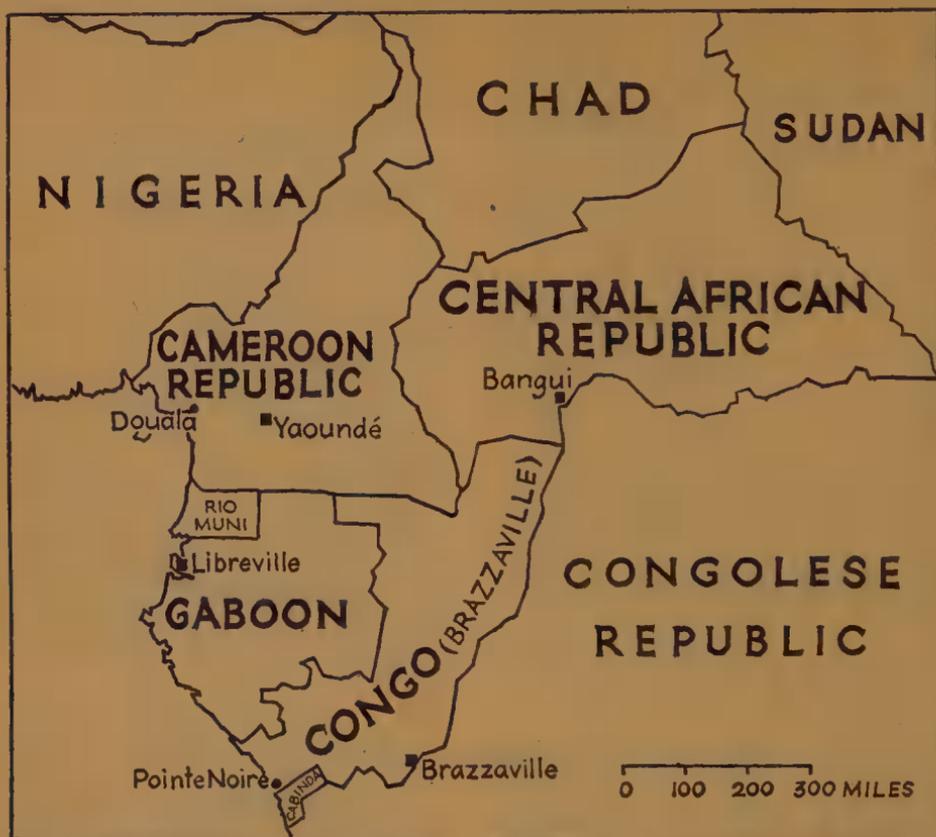

Ambassador Extraordinary and Plenipotentiary, His Excellency Alan John Edden, C.M.G. (1966) £5,625

1st Secretary, A. B. Moore, M.B.E.  
2nd Secretary, R. G. Hyde (Commercial).  
3rd Secretaries, R. Westbrook; R. H. Brown; I. Paddington.

### CENTRAL AFRICAN REPUBLIC

President, Colonel Bedel Bokassa, assumed office, Jan. 1, 1966.

Formerly the French colony of Ubanghi Shari, the Republic lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has a common boundary with the Republic of Chad in the north and with the Congolese Republic in the south. The Republic has

area of about 234,000 sq. miles and a population estimated (1968) at 1,488,000. On December 1, 1958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960. The first President of the Central African Republic, M. David Dacko, held office from 1960 until Jan. 1, 1966, when he was replaced by Col. Bokassa after a *coup d'état*. Imports from U.K., 1968, £287,000; Exports to U.K., £318,000.

**CAPITAL.**—Bangui, near the border with the Congolese Republic (238,000).

**FLAG.**—Four horizontal stripes, blue, white, yellow, green, crossed by central vertical red stripe; a yellow star in centre of blue half-stripe next staff.

*British Ambassador, His Excellency Alan John Edden, C.M.G. (1966) (Resident at Yaoundé, Cameroon).*

*1st Secretary and Consul, A. B. Moore (resident at Yaoundé).*

### CHAD REPUBLIC

*President, François Tombalbaye, elected August 11, 1960, re-elected June, 1969.*

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by the Kingdom of Libya in the north, by the Sudan on the east and by the Central African Republic on the south. (*For MAP, see p. 916*). It has an area of 487,920 sq. miles and a population (estimated, 1967) at 3,410,000.

Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960. On April 14, 1962, a new Constitution was adopted involving a presidential-type régime. Mr. Tombalbaye accepting the formal title of President on April 23, 1962.

Imports from U.K. in 1967 were valued at £157,000.

**CAPITAL.**—Fort Lamy, south of Lake Chad (45,600).

**FLAG.**—Vertical stripes, blue, yellow and red. *British Ambassador, His Excellency Alan John Edden, C.M.G. (1966) (Resident at Yaoundé, Cameroon).*

### CHILE

(República de Chile)

*President (1964–70), Eduardo Frei, G.C.B., born 1911, elected Sept. 6, 1964; assumed office Nov. 4, 1964.*

**CABINET.**

*Minister of the Interior, Patricio Rojas.*  
*Foreign Affairs, Gabriel Valdés Subercaseaux.*  
*Finance, Andres Zaldívar.*  
*Education, Maximo Pacheco.*  
*Health, Dr. Ramón Valdivieso Delauney.*  
*Public Works, Sergio Ossa Pretot.*  
*Agriculture, Hugo Trivelli Fransolini.*  
*Labour, Eduardo Leon.*  
*Economy, Enrique Krauss.*  
*Mines, Alejandro Hales Jamarine.*  
*Defence, Gen. Tulio Marambio.*  
*Justice, Gustavo Lagos Matus.*  
*Housing, Andres Donoso.*  
*Lands and Colonization, Victor Gonzales Martens.*

## EMBASSY AND CONSULATE IN LONDON

3 Hamilton Place, W.1.

[01-838a]

*Ambassador in London*, His Excellency Sr. Don Victor Santa Cruz, G.C.V.O. (1959), 92 Eaton Place, S.W.1.

*Minister-Counsellors*, Sr. don Alejandro Jara; Sr. don Sergio Figueroa; Sr. don Pedro Buttazzoni. *Naval Attaché*, Capt. Carlos Chubretovich (Naval Attaché's Office: 01-629-838a).

*Air Attaché*, Lt.-Col. (Air) Eduardo Fornet.

*1st Secretaries*, Sr. Gonzalo Guerra; Sr. Don Raul Schmidt (Consular).

*3rd Secretary*, Sr. don Enrique Aguirre.

*Asst. Naval Attachés*, Cdr. Roberto Saldivia; Cdr. Federico Thomas; Cdr. Francisco Johow.

*Civil Attachés*, Rear-Adm. Don Calixto Rogers; Sr. Ignacio Cox.

*Cultural Attaché*, Sr. Don Fernando Debesa.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid. (For MAP, see p. 820.)

Among the island possessions of Chile are the *Juan Fernandez group* (3 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* (27° 8' S. and 100° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with a population (estimated, 1968) of 9,351,000. Two of these provinces, Arica and Antofagasta, were annexed from Peru and Bolivia respectively after the War of the Pacific (1879-84). The province of Tacna was also annexed but under a treaty signed in 1929 was returned to Peru which at the same time received payment of £1,200,000 for Arica. The Chilean population has four main sources: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants. Only the few remaining indigenous Indians and some originally Bolivian Indians in the north are racially separate. Following extensive inter-marriage there is no effective distinction among the remainder.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war culminating in the *Battle of Maipo* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all

Chilean citizens who have the right to vote. The National Congress consists of a Senate of 50 members, and of a Chamber of 150 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

At a general election held on Sept. 5, 1964, the first Christian Democrat President, Señor Eduardo Frei, was elected by a large majority.

PRODUCTION, &c.—About 25 per cent. of the working population is engaged in agriculture which however contributes only 8 per cent. of the country's gross domestic product. Manufacturing and mining, with about 21 and 4½ per cent. respectively of the active population, provide 25 and 11 per cent. of the G.D.P. Wheat, maize, barley, oats, beans, peas, rice, lentils, wines, tobacco, hemp, chili-pepper, potatoes, sugar beet, onions and melons are grown extensively and livestock accounts for some 40 per cent. of agricultural production. The vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Good wines are produced and exported and are becoming more widely known in world markets. Sheep farming predominates in the extreme south (Province of Magallanes). There are large timber tracts in the central and southern zones of Chile, some types of which are exported to Europe and the Argentine, but the high production costs have caused serious difficulties to this export trade. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. Copper production in 1967 totalled 660,000 metric tons and extensive investments are being made to raise production to over 1,000,000 tons per annum. Copper provides 70 per cent. of Chile's export earnings, the remainder of which are derived mainly from other minerals, wool, fruit, fish and forestry derivatives. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural resources in the world. Production in 1967 (including potassium nitrate) was 871,250 metric tons. Chile also produces iodine, manganese ore, coal, mercury, molybdenum, zinc, lead, and a small quantity of gold. 1,400,000 metric tons of coal, and 12,783,000 metric tons of iron ores were produced in 1967. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities. Annual production is between 25,000 and 50,000 metric tons. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and the industry is now self-supporting. Production in 1967 was nearly 2,000,000 cubic metres of crude oil and 7,000,000,000 cu. metres of natural gas—all in the Magallanes area. This total production and some imported crude oil is refined at Concon and San Vicente in the central part of the country. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepción. In 1967 the output of steel ingots from Huachipato totalled 630,000 metric tons.

Most consumer goods are manufactured locally—steel and oil derivatives, pulp and paper, cement and other building materials, tobacco, cutlery, food products and beverages, sugar refining, textiles, clothing and footwear, plastic products, household equipment, tyres and other rubber products, radio and television sets, chemicals, soaps, detergents and cosmetics. New classes of manufacture being developed are in the fields of motor-vehicle

assembly, petrochemicals, cellulose, metallurgy and some electrical and mechanical equipment.

**COMMUNICATIONS.**—Most of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage, though, with the improvement of the roads, an increasing share of internal transportation is moving to road and rail. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *via* the Panama Canal to Europe or *via* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine numbers about 60 vessels (of over 100 tons gross) with ■ total gross tonnage of about 400,000. Under ■ law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,575 miles of track, of which 5,360 miles are State owned. A metre-gauge line (the *Longitudinal*) runs from La Calera, just north of Santiago, to Iquique. The wide gauge railway (1·676 metres) runs from Valparaiso through La Calera, 60 miles inland, and after passing through Santiago ends at Puerto Montt.

With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaiso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft.

Chile is served by 15 international airlines. The domestic traffic is carried almost exclusively by the State-owned *Linea Aerea Nacional*, which also operates internationally. Chile has ■ extensive system of airports which are being modernized with U.S. financial assistance.

Chile's road system is about 65,000 kilometres in length, but only an estimated 6,000 kilometres are first-class paved highways. At the end of 1967 there were registered 115,500 cars and taxis, 106,000 goods vehicles and 11,300 buses and coaches.

**DEFENCE.**—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. In 1966 the Army had 6 infantry divisions, ■ cavalry division and one armoured division with a total strength of 1,900 officers, 11,000 regular other ranks plus 18,000 conscripts. In addition there is ■ police force of "Carabineros" of 22,500 officers and men. The Air Force had 600 officers and 6,180 other ranks with a strength of 200 aircraft. The Navy consisted of 2 cruisers, 4 destroyers, 2 destroyer escorts, ■ submarines and 4 motor torpedo boats, all operational. There is a support force of transports, tankers, ■ submarine depot ship and ancillary small craft. The strength of the Navy is 1,002 officers and 11,500 men, plus ■ Marine Force for coastal defence of 87 officers and 2,200 men.

EDUCATION is free, elementary education being compulsory since 1920. There are 8 Universities (3 in Santiago, 2 in Valparaiso, 1 in Antofagasta, 1 in Concepción and 1 in Valdivia). The religion is Roman Catholic.

**LANGUAGE AND LITERATURE.**—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral,

for Chilean verse and prose. There are over 100 newspapers and ■ large number of periodicals, including some devoted to professional, scientific and social subjects.

**FINANCE.**—The 1968 budget balanced at *Escudos* 8,385,000,000. Foreign debt at Dec. 31, 1967, was calculated at \$U.S. 2,260,000,000.

The official rate of exchange, Aug. 4, 1969, was about £° 22·50 = £1 (brokers' rate) and £° 25·11 = £1 (brokers' rate).

#### EXTERNAL TRADE.

	1968
Total imports .....	\$U.S. 908,000,000
Total exports .....	915,000,000

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£13,174,000	£14,670,000
Exports to U.K. ....	46,454,000	56,527,000

The principal exports are metallic and non-metallic minerals (refined copper, ingots and bars, iron ore, etc.), cereals, vegetables, fruit and wool. The principal imports are industrial oils, raw cotton, chemicals, wheat, meat, machinery, tools, electrical and transport equipment and sugar.

**CAPITAL**, Santiago (December, 1964) 2,100,000 (Greater Santiago). Other large towns are:—*Ψ* Valparaiso (261,684), *Ψ* Concepción (158,941), Temuco (109,141), Viña del Mar (107,563), Chillán (79,461), Talca (75,354), *Ψ* Antofagasta (74,050), *Ψ* Valdivia (72,988), *Ψ* Talcahuano (75,643), *Ψ* Iquique (47,906), *Ψ* Punta Arenas (44,597). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

**FLAG.**—2 horizontal bands, white, red; in top sixth a white star on blue square, next staff.

**NATIONAL DAY.**—September 18 (National Anniversary).

#### BRITISH EMBASSY.

Calle Bandera 227, Piso 3° Santiago (Casilla 72D). Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Frederick Cecil Mason, K.C.V.O., C.M.G. (1966)..... £5,625  
1st Secretaries, J. B. Ure, M.V.O. (Commercial); A. S. Dyer, O.B.E.; L. Borax, M.B.E. (Consul); F. E. Sharples (Labour, resident at Buenos Aires).  
Defence Attaché, Capt. F. G. Thatcher, R.N.  
2nd Secretaries, J. B. Noss (Commercial); J. D. Edgerton (Information); H. McQuade.  
3rd Secretary (Information), Miss I. M. Munro.

#### BRITISH CONSULAR OFFICES.

There are British Consular Offices at Santiago, Antofagasta, Arica, Iquique, Valparaiso, Concepción, Coquimbo, and Punta Arenas.

#### BRITISH CONSUL

Representative in Chile, C. H. Whistler, O.B.E., Calle Santa Lucia 124, Santiago.

The Council supplies books to the libraries of the Instituto Chileno-Británico in Santiago and in Vina del Mar/Valparaiso.

**BRITISH CHAMBER OF COMMERCE IN THE REPUBLIC OF CHILE**, Calle Bandera 227 (Piso 4°) Casilla 536, Santiago.

Valparaiso is distant from London 9,000 miles *via* Panama and 11,000 *via* the Strait; transit ■ to 45 days; by air, 22 hrs.

#### CHINA

(Zhonghua Renmin Gongheguo—The People's Republic of China.)

Chairman of the People's Republic of China (vacant)  
Vice-Chairman, Sung Ch'ing-ling (Mme. Sun Yat-sen) Tung Pi-wu.

Chairman of the Standing Committee of the and National People's Congress, Chu Teh.  
 Prime Minister, Chou En-Lai.  
 Vice-Premier and Minister of Foreign Affairs, Ch'en Yi.  
 Vice-Premier and Minister of Defence, Lin Piao.  
 Chairman of the Chinese Communist Party, Mao Tse-tung.

THE COMMUNIST PARTY

The Standing Committee of the Politbureau of the Central Committee (elected at the IXth Party Congress in April, 1969), Mao Tse-tung; Lin Piao; Chen Po-ta; Kang-Sheng; Chou En-lai.  
 The Politbureau, Madame Lin Piao (Yeh Chun); Liu Po-cheng; Chu Te; Li Hsien-nien; Wu Fashien; Chiu Hui-tso; Yao Wen-yuan; Huang Yung-sheng; Hsieh Fu-chih; Yeh Chien-ying; Madame Mao (Chiang Ching); Hsu Shih-yu; Chen Hsi-lien; Li Tso-peng; Chang Chun-chiao; Tung Pi-wu (full members); Chi Teng-kuai; Li Te-sheng; Li Hsueh-feng; Wang Tung-hsing (alternate members).

LONDON OFFICE  
 49 Portland Place, W.1.

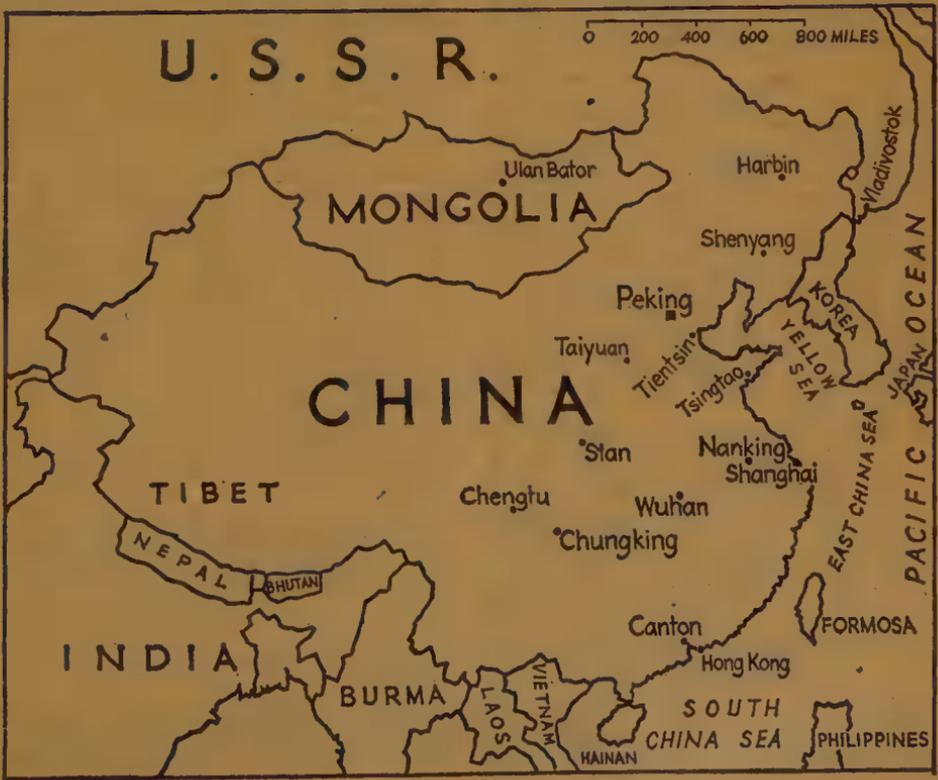

Chargé d'Affaires, Ma Chia-chun.  
 Counsellor, Chang Tsien-hua (Commercial).  
 AREA AND POPULATION.—The area of China is about 4,300,000 square miles. Estimates of the present population vary considerably, but a figure of more than 700,000,000 is generally accepted. According to figures published in 1957 by the National Bureau of Statistics, the total population of China was 656,630,000, not including Chinese living in Hong Kong, Macao or abroad. Recent estimates (based on announcements made by the Chinese Revolutionary Committees) show a

figure of 732,000,000 for mainland China. A birth-rate of 34 per 1,000 and death rate of 11 per 1,000 are quoted for 1957. In 1953 the percentage distribution of the population was as follows:  
 Han, 94.13; Mongolian, 0.26; Tibetan, 0.48; Manchu, 0.41; Tribal, 3.57; Others, 1.15. There is no reason to suppose that the proportions have significantly changed.

THE PROVINCES OF CHINA.

According to the National Bureau of Statistics the populations of the Chinese provinces at the end of 1957 were as follows:

Anhui	33,560,000
Chekiang	25,280,000
Chinghai	2,050,000
Fukien	24,650,000
Heilungkiang	14,860,000
Honan	48,670,000
Hopei	44,720,000
Hunan	36,220,000
Hupei	30,790,000
Kansu	12,800,000
Kiangsi	18,610,000
Kiangsu	45,230,000
Kirin	12,550,000
Kwangsi Chuang	
Autonomous Region	19,390,000
Kwangtung	37,960,000
Kweichow	16,890,000
Liaoning	24,090,000
Inner Mongolian	
Autonomous Region	9,200,000
Ningsia Autonomous	
Region	1,810,000
Shansi	15,960,000

Shantung.....	54,030,000
Shensi.....	18,130,000
Sinkiang Uighur Autonomous Region.....	6,640,000
Szechuan.....	72,160,000
Tibet.....	1,270,000
(Taiwan.....)	10,100,000
Yunnan.....	19,100,000

Sinkiang is the largest region or province in area (about 1/6th of the whole area of the country) and Szechuan the most populous.

**Government.**—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang. Events leading up to the end of the war with Japan are briefly described in earlier issues of WHITAKER'S ALMANACK.

On September 30, 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C.) met in Peking and appointed the National People's Government Council under the Chairmanship of Mao Tse-tung. On October 1, Mao proclaimed the inauguration of the Chinese People's Republic. The Soviet Union broke off relations with the Nationalists and established relations with the new régime on October 2. The régime was recognized by all the Communist bloc countries in quick succession, and soon after by the Asian countries of the Commonwealth, the United Kingdom and by a number of other countries. France recognized the Chinese People's Republic on January 27, 1964. Canada, Italy and Belgium made moves towards recognition during 1969. The United States and certain other countries continue to recognize the Nationalist régime in Formosa.

The C.P.P.C.C. continued to be the supreme legislative body of the new state until September 20, 1954, when a new constitution was adopted. It was then replaced as the highest organ of state power by the National People's Congress, which exercises legislative power. The Congress can amend the constitution and supervises its enforcement, enacts laws and decides on questions of war and peace. It approves the state budget and adopts the national economic plan. It elects and may remove from office the Chairman and Vice-Chairmen of the Republic. The National People's Congress is supposed to meet only once a year; between sessions its functions are exercised by its Standing Committee, a body made up of a Chairman, 13 Vice-Chairmen, the Secretary-General and more than 100 ordinary members.

With the adoption of the Constitution, the National People's Government Council was replaced by the State Council, composed of the Premier, 16 Vice-Premiers and the heads of ministries and commissions. This body is the supreme administrative body, responsible for the day-to-day running of the country.

Under the Constitution a complicated interlocking hierarchy exists from the bottom to the top. The National People's Congress is not directly elected, but is the peak of a pyramid. Direct elections occur only in rural districts, urban districts and small towns. Local Congresses have two main functions: (1) to appoint as their administrative arm a People's Council; and (2) to elect the next higher level congress, in this case county congresses or large town congresses. The County congresses have a similar twin function: to appoint County People's Councils and to elect the Provincial Congresses. The Provincial Congresses appoint Provincial People's Councils and elect the National People's Congress. The administrative organs, the People's Councils, are controlled by the next higher administrative organ. (e.g. a County People's Council obeys the orders of the Provincial Council

immediately above it). Complications are caused by the existence of Autonomous Regions and Counties set aside for particular national minorities and by the fact that large cities such as Peking, Shanghai and Tientsin are under the Central Government and other towns under provincial governments. Since Congresses meet only rarely and the Councils are responsible for arranging elections of the next Congress, the line of control running down from the State Council through the hierarchy of local Councils is much stronger than the expression of the public will rising up from the basic level Congresses to the National People's Congress.

China is a Communist state but the position of the Communist party is not reflected in the constitution. Its complete dominance over the Government, which includes "united-front" figures from lesser parties, is achieved by ensuring that all the really important positions at whatever level are filled by Party members. During the Cultural Revolution both Party and State organs were largely superseded by so-called Revolutionary Committees which were set up in all Provinces and in most municipalities and smaller units. It is not yet clear what the relative positions of the old and new organs will be. Until April, 1959, Mao Tse-tung was Chairman both of the Republic and of the Communist Party. When he stood down from his position as Head of State, Liu Shao-ch'i, then first Vice-Chairman of the Party, became Head of State but the Communist Party Central Committee resolved in October, 1968, to strip him of his functions. (No new Head of State had been elected at the time of going to press.)

**Armed Forces.**—All three military arms in China are parts of the People's Liberation Army (P.L.A.) The size of this body has not been formally given, but it is estimated that China has between 2½ and 3 million men under arms, with a further 12 million (or perhaps many more) reserves who take part in militia activities. Until 1955 the P.L.A. did not have a rank structure, but one was introduced in that year similar to that of the Russian Army. In the same year compulsory military service was introduced for all men between the ages of 18 and 40. This service was on a selective basis. In January, 1965, the length of service for those conscripted was increased by one year, to four years for the Army, five years for the Air Force and six years for the Navy; and with effect from June 1, 1965, the rank structure was abolished, together with all marks of distinction of branch of service (although members of the services may still be distinguished from one another by the colour of their uniforms). This means a reversion to the previous system by which members of the armed forces are known only by their appointment.

China exploded her first experimental nuclear device on October 16, 1964 and made further tests in 1965 and in May, October and December, 1966. China's first hydrogen-bomb was tested in June, 1967, and further tests up to December, 1968, were detected.

**Religion.**—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. There are also Chinese Moslems and Christians. Since 1949, the practice of all religions has been severely curtailed, although not actually prohibited.

**Education.**—Although primary education was compulsory under the Nationalists, mass education did not become a fact until after the Communists had taken over. However, since June, 1966, all the major educational establishments have closed down

for the "Great Proletarian Cultural Revolution". The Chinese Government announced that the entire education system will be reformed, including the school curriculum. Schools have, however, continued to function on a reduced scale, although institutes of higher education have not accepted new students since 1966.

**Language and Literature.**—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu (Shanghai), and, most important, Mandarin. Mandarin is the basis of the Common Speech (*Putonghua*) and is founded mainly on the Peking dialects. The Communists, when they came into power, continued the Kuomintang policy of promoting it as the national language and made much more intensive efforts to propagate it throughout the country. Since the most important aspect of this policy is the use of the spoken language in writing, the old literary style of writing has fallen into disuse.

Chinese writing is ideographic and not phonetic. The number of sounds in *Putonghua* is strictly limited; each sound may have a large number of different characters and meanings. Whereas originally the language was monosyllabic and confusion was avoided by the use of different characters, thus producing texts which were visually clear but ambiguous to the ear, with the increasing use of the spoken language for writing people are increasingly making use of polysyllabic compounds both in speech and writing in order to avoid confusion. In 1956, after some 4 years of study, the Government decided to introduce 230 simplified characters with a view to making reading and writing easier. The list was enlarged; there are now about 1,000 simplified characters in use. In January, 1956, all Chinese newspapers and most books began to appear with the characters printed horizontally from left to right, instead of vertically reading from right to left, as previously.

In November 1957, after some experimentation, the Government introduced a system of Romanization, using 25 of the letters of the Latin alphabet (not v). This has been used within the country largely for assisting school children and others to learn the pronunciation of characters in *Putonghua*. It has been announced that there is no intention of using the alphabet to replace characters.

Chinese literature is one of the richest in the world. Paper has been employed for writing and printing for nearly 2,000 years. The Confucian classics which formed the basis of the traditional Chinese culture date from the Warring States period (4th–3rd centuries B.C.) as do the earliest texts of the rival tradition, Taoism. Histories, philosophical and scientific works, poetry, literary and art criticism, novels and romances survive from most periods. Many have been translated into English. In the past all this considerable literature was available only to a very small class of *literati*, but with the spread of literacy in the 20th century, a process which has received enormous impetus since the Communists took over in 1950, the old traditional literature has been largely superseded by modern works of a popular kind and by the classics of Marxism and modern developments from them.

Three daily (and one bi-weekly) newspapers were published in Peking in 1969, of which the most important is the *People's Daily*, the organ of the Chinese Communist Party.

**Currency and Exchange.**—The *yuan* was revalued with effect from March 1, 1955, on the basis of 10,000 old *yuan* for one new *yuan*. (See also p. 83.)

5.878 *yuan* = £1; 2.46 *yuan* = \$1.

**Production and Industry.**—China is essentially an communications system. By the end of 1958 the

agricultural and pastoral country; peasants constitute about 80 per cent. of the population. After the establishment of the Chinese People's Government at which time land for the most part was privately owned, there occurred several stages of land reform culminating in the formation of the people's communes in 1958. With the exception of a few State farms, the communes embrace the whole rural population. In all there are 74,000 communes and each is sub-divided into production brigades and teams. Work is assigned on a collective basis and the production team (of about 45 families) is the normal unit of accounting and labour. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities. The mineral wealth of the country is very great. Coal of excellent quality is produced. Iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundant. Oil is produced in Kansu, Sinkiang, Sining and at a new major oilfield of unspecified location. No reliable figures for industrial production have been published since 1959. The figures given below for 1958 levels are accepted as generally accurate:

Steel, 8,000,000 tons; Pig Iron, 9,530,000 tons; Coal, 270,000,000 tons; Electric Power, 27,530,000,000 kWh.; Crude Petroleum, 2,264,000 tons; Cement, 9,300,000 tons; Timber, 35,000,000 cubic metres; Sulphuric Acid, 740,000 tons; Chemical Fertilizers, 811,000 tons; Machine Tools, 50,000; Motor Vehicles 16,000; Paper, 1,630,000 tons; and Cotton Cloth 5,700,000,000 metres

Following the Great Leap Forward in 1958 and during three subsequent years of difficult conditions for agriculture, there was a cut back in both agricultural and industrial production which then recovered to its pre-1958 level. During the Cultural Revolution there was another cut back and a full recovery had not been made by the summer of 1969. Industrial policy is governed by the need to build up agriculture, and some branches of industry, especially those such as machine tools and chemical fertilizers which have a direct relevance to agriculture have gone ahead more quickly. China is now virtually self-sufficient in petrol and oil.

A new (Third) Five Year Plan began in 1966 but no details of the plan were published.

The principal articles of export are animal and animal products; oils; textiles; ores, metals and tea. The principal imports are raw cotton, cotton yarn and thread; motor vehicles; machinery; chemical fertilizer plants; wheat; aircraft; books, paper and paper-making materials; chemicals; metals and ores; and dyes

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£37,976,000	£28,500,000
Exports to U.K. . . . .	29,626,000	34,274,000

**Communications.**—Of the total area of China about half consists of tableland and mountainous areas where communications and travel are generally difficult. By 1949, the communications system, as a result of years of neglect and civil war, was more or less completely paralysed. In any case such roads and railways as did exist were largely confined to the eastern plains. After the Communists achieved complete control they devoted much attention to restoring and improving the total length of railways was 19,000 miles (42 p.c.

more than 1949), the total length of roads was 250,000 miles (about 5 times as much as in 1949) and of inland waterways about 100,000 miles (twice as much as in 1949). In addition, internal civil aviation has been developed; routes total more than 20,000 miles. As a result the communications network now covers most of the country. In the past where roads did not exist the principal means of communications east to west was provided by the rivers, the most important of which are the Yangtze (3,400 miles long), the Yellow River (2,600 miles long) and the West River (1,650 miles). These, together with the network of canals connecting them, are still much used, but their overall importance is less than it was. In the past 10 years great progress has been made in developing postal and telecommunications. It is now claimed that 95 p.c. of all rural communes are on the telephone and that postal routes reach practically every production brigade headquarters.

### SPECIAL TERRITORY

**Tibet.** ■ plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population (estimated, 1957) of 1,270,000.

From 1911 to 1950, Tibet was virtually an independent country but its status was never officially so defined. In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby the Chinese army was allowed entry into Tibet. A Communist military and administrative headquarters was set up. In 1954 the Government of India recognized that Tibet was an integral part of China, in return for the right to maintain trade and consular representation there.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government and setting up a 16-member Preparatory Committee for the Tibetan Autonomous Region, with the Panchen Lama as Acting Chairman and including 4 Chinese officials. Elections were held to choose local People's Congresses in Tibet, thus indicating that the government organization there no longer differed significantly from that of any ordinary province in China. The Dalai Lama, now exiled in India, announced a "new constitution" in March, 1963.

The Dalai Lama, although absent, had been nominated as Chairman of the Preparatory Committee, but in December, 1964, he was declared to be a traitor, and both he and the Panchen Lama were dismissed. The position of Acting Chairman of the Preparatory Committee was assumed by Rigpe, who had long been the most prominent secular figure in Tibet. This move marked the end of the period of co-operation by the Chinese Government with the traditional religious authorities, and the eclipse of the latter. The Preparatory Committee completed its work with the setting up of Tibet as an Autonomous Region of China on Sept. 9, 1965.

**CAPITAL.**—Peking, population (estimated, 1957), 4,010,000. The population of the other principal

towns in 1957 was estimated as: Ψ Shanghai, 6,900,000; Tientsin, 3,220,000; Shenyang (Mukden), 2,411,000; Wuhan (formerly Hankow, Hanyang and Wuchang), 2,146,000; Chungking, 2,121,000; Ψ Canton, 1,840,000; Harbin, 1,552,000; Ψ Port Arthur (Lushun)/Dairen, 1,508,000; Nanking, 1,409,000; Sian, 1,310,000; Ψ Tsingtao, 1,121,000; Chengtu, 1,107,000; Taiyuan, 1,020,000.

**NATIONAL DAY.**—October 1 (Founding of People's Republic).

**OFFICE OF THE BRITISH CHARGÉ D'AFFAIRES**  
5 Kuang Hua Lu,  
Chien Kuo Men Wai, Peking.

### FORMOSA

(Taiwan)

**President,** General Chiang Kai-shek, born 1887, assumed office 1948.

**Prime Minister,** Dr. C. K. Yen (Dec. 16, 1963).

**Deputy Prime Minister,** Gen. Chiang Ching-kuo.

An island of some 13,800 sq. miles in the China Sea, Formosa lies 90 miles east of the Chinese mainland in latitude 23° 45' N.—25° 38' N. The population, principally Chinese, was 13,687,160 in 1968. The territory of Formosa includes the Pescadores Islands (50 sq. miles), some 35 miles west of Formosa, as well as Quemoy (68 sq. miles) and Matsu (11 sq. miles) which are only a few miles from the mainland. Settled for centuries by the Chinese, the island has been known as Ryukyu and Taiwan. It has been colonized in part by Dutch and Spanish expeditions and latterly by Japan. Japanese administration lasted from 1894 to 1945. General Chiang Kai-shek withdrew to Formosa in 1949, towards the end of the war against the Communist régime accompanied by 500,000 Nationalist troops since when the territory has continued under his presidency. American forces have intervened on several occasions to maintain the *status quo*, the United States recognizing the Formosa régime as the "Government of the Republic of China". A mutual defence treaty was signed in 1954.

The eastern part of the main island is mountainous and forest covered. Mt. Morrison (Yu Shan) (13,035 ft.) and Mt. Sylvia (Tzu'ukaoshan) (12,972 ft.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, tea, bananas, pineapples and tobacco. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports Ψ Keelung (305,545) and Ψ Kaohsiung (724,222) are situated in the northern and southern sections of the island.

### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£2,225,000	£3,561,000
Exports to U.K. . . . .	1,964,000	3,042,000

**CAPITAL.**—Taipei (population 1968, 1,608,213). Other towns are: Ψ Kaohsiung (724,222); Tainan (442,673); Taichung (391,518); and Ψ Keelung (305,545).

**FLAG.**—Red, with blue quarter at top next staff, bearing a twelve-point white sun.

Tamsui, R. J. Bray (Consul); J. A. Featherstone (Deputy Consul).  
Taipei Branch Office, K. W. Canterbury (Vice-Consul).

## COLOMBIA

(República de Colombia)

President (1966-70), Dr. Carlos Lleras Restrepo,  
elected May 1, 1966; assumed office August 7, 1966.

[01-589-9177]

EMBASSY AND CONSULATE

3 Hans Crescent, S.W.1

[01-589-9177]

Ambassador Extraordinary and Plenipotentiary, His  
Excellency Dr. Victor Mosquera-Chaux.

Counsellor, Señor Alfonso Uribe.

1st Secretary, Sra. Luz Valencia de Uruburu.

Consul-General (vacant).

There is a Colombian Consular Office at Liver-  
pool.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 4° 13' S. to 12° 30' N. lat. and 68° to 79° W. long., with an approximate area of 440,000 square miles, and a population (estimated 1968) of 19,829,000.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and became a separate Republic.

Following a period of dictatorship and government by decree from 1953, a military junta established on May 10, 1957, prepared the way for a return to democratic government. Congressional elections were held on March 16, 1958, which yielded a Liberal majority of votes. A plebiscite voted on December 1, 1957, had made constitutional changes by which the office of president would during the next sixteen years alternate between candidates of the Liberal and Conservative parties who would hold office for terms of four years, while the two parties would have equal representation in Congress and in the national and departmental governments. On May 1, 1966, presidential elections returned Dr. Carlos Lleras Restrepo (Liberal).

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the most important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patía. The Patía flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Río Bogotá is the great *Fall of Tequendama*, 482 ft. in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1968 some 94

million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee (which accounts for 60 per cent. of total exports by value) cotton, bananas, rice, cocoa, sugar, tobacco, maize, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel. Successive foreign exchange crises have led to the encouragement by the Government of the rapid development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery.

The Navy consists of 4 destroyers, 3 frigates, some gunboats and some other small craft, with personnel about 5,000, including one battalion of marines; a battalion of the Colombian army served with the United Nations forces in Korea. The first railway was opened in 1855, about 1,014 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Marta, was opened in July, 1961. There are about 2,200 miles of rail in use at present. The total road network (1964) consists of 35,000 km. of roads of all types, of which 7,000 km. are classified as main trunk and transversal roads. A programme of road improvement and construction is under way, financed by a new tax on petrol. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. Less traffic than hitherto is carried on the River Magdalena, which is navigable for 900 miles. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, and services to London daily via New York, via Paris and once a week by B.O.A.C. via Trinidad to London. Air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellín, Cali and Tunja.

Roman Catholicism is the established religion.

*Language and Literature.*—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University with headquarters at Bogotá there are 26 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

*Finance.*—For rate of exchange, see p. 83.

#### BRITISH CONSULAR OFFICES

There are British Consular Offices at Bogotá, Barranquilla, Medellín and Cali.

BRITISH COUNCIL.—Representative, P. B. Gotch, Carrera 10, 19-65, Bogotá.

## CONGO

National Council of the Revolution: M. Ngouabi (President); Major Alfred Raoul (Prime Minister); M. Pierre Nze (Education, Press and Propaganda); M. Auge Pongoung (Economic and Social Affairs and Finance); M. Justin Lekounzou (Organization); Minister of Foreign Affairs, M. Charles Assemeking.

The Republic lies on the Equator between Gaboon on the west and the Congolese Republic on the east, the River Congo and its tributary the Ubanghi forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. Area of the Republic of Congo is 129,960 sq. miles, with a population (estimated, 1967) of 860,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

M. Fulbert Youlou held office as President of the Republic from Aug. 7, 1960. Growing discontent with the regime culminated in riots in Brazzaville and led to the President's resignation on Aug. 15, 1963, and the dissolution by the Army of the National Assembly. A provisional Government led by M. Alphonse Massemba-Débat took office on Aug. 16, and a new constitution, giving the provisional Government full powers, came into operation in December, 1963.

On Jan. 12, 1968, the President dismissed the Prime Minister, M. Noumazalay, with three other members of his Cabinet and himself assumed office as Prime Minister with a reformed Ministry. He was himself arrested after heavy fighting during the last few days of August and resigned on Sept. 4, 1968. Conduct of affairs was assumed by a National Council of Army officers. A new Directorate of the National Council reduced in size to 5 members took office on June 21, 1969 (see above).

#### CONGOLESE EMBASSY

26, Chesham Place, S.W. 1

[01-235-6137]

Ambassador, His Excellency Gervais Bahizi.

1st Secretary (vacant).

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the Congolese Republic comprises an area of 905,582 sq. miles, with a population estimated (1967) at 16,354,000. The State was divided into 21 provinces by July 1963, the number being reduced to 8 in 1966 (see below).

Government.—On June 30, 1960, the Belgian Congo became an independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the *Loi Fondamentale*, drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the independence of the State of Katanga and although he failed to obtain international recognition he continued to act in an independent manner with the creation of a visa system, a Katanga franc, etc. Katanga did

not come under the Government at Leopoldville until January 14, 1963.

The constitutional and political situation remained unsettled, the United Nations having mixed forces in the country until 1964. By the middle of 1965, the Congolesse Government formed by M. Tshombe in July, 1964, had succeeded in gaining control of all the towns from the rebels and depriving them of military aid from outside the Congo. At elections held in the spring of 1965 the Government party won an overall majority of 86, but the elections in three provinces were annulled on the grounds that they had been irregularly conducted. Following fresh elections held in these provinces in August, 1965, M. Tshombe's Government was dismissed by the President. A new Cabinet was formed by M. Evariste Kimba on October 19 and held office until the deposition on Nov. 25 of the President.

General Joseph Desiré Mobutu, Commander-in-Chief of the Congolesse National Army, announced on November 25, 1965, that he had assumed the Presidency and issued a 13-point proclamation appointing a Prime Minister with the task of forming a 21-member Cabinet, one member being drawn from each Province. After re-organizations in Dec., 1966 and Oct. 5, 1967, a new Cabinet, with the President again as Prime Minister, took office on Mar. 5, 1969.

**Climate.**—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. There has been some increase in sleeping-sickness since independence. Malaria, formerly under control in Leopoldville (now Kinshasa) and Matadi, has also begun to creep back as the former daily spraying ceased.

Extensive forest covers the central districts.

**Provinces.**—On Dec. 24, 1966, the provinces of the Republic were re-organized, the total number being reduced to 8. Previously various towns whose names were of European origin had been renamed, notably Leopoldville—now Kinshasa. Following are the eight provinces with names of capitals: Central Congo (Matadi), Bandundu (Bandundu, formerly Banningville); Equateur (Mbandaka, formerly Coquilhatville); Orientale (Kisangani, formerly Stanleyville); Kivu (Bukavu); Katanga (Lubumbashi, formerly Elisabethville); East Kasai (Mbuji-Mayi, formerly Port Franquai); and West Kasai (Luluabourg). The city of Kinshasa is an administrative unit by itself.

**Production.**—The cultivation of oil palms is widespread, palm oil being the most important agricultural cash product. Rubber, coffee and timber are the next most important agricultural exports. The production of tea rose in 1962, but cotton, pyrethrum, copal and fibres production continues to be severely reduced. The country is rich in minerals, particularly Katanga province. Production of diamonds in Kasai province for 1963 was 14,763,863 carats. By 1964 there was still no legal production of gem stones at the Tshikapa concession. Extensive radium deposits exist near Lubumbashi and reef-gold exists in the north-east of the country.

There is a wide variety of small but flourishing secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint and sugar. There are very large reserves of hydro-electric power.

The chief exports are copper, palm-oil and palm-kernels, coffee, diamonds, rubber, cobalt and cassiterite.

**Currency.**—In November, 1963, the Congolesse

Franc was devalued from 180 C.F. = £1 to 420 C.F. = £1, for persons selling foreign exchange to obtain Congolesse francs and 504 to the £ for persons buying foreign exchange with Congolesse francs. In June, 1967, a new currency was introduced, the unit of which, the Zaire, replaced 1,000 old francs. At the same time the currency was revalued at £1 = Z1.2. (See also p. 83.)

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£6,963,000	£7,943,000
Exports to U.K. . . . .	11,566,000	17,714,000

**Language, Religion and Education.**—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, and Lingala along the river. It is estimated there are 5,000,000 African Christians in the Republic (Roman Catholic 4,200,000, Protestant 800,000).

**CAPITAL, Kinshasa (formerly Leopoldville)** (population, estimated 1964: 1,000,000—1,200,000. Principal towns, Lubumbashi (formerly Elisabethville) (182,638); Kisangani (formerly Stanleyville) (79,941); Jadotville (74,478); Luluabourg (59,935); ψ Matadi (59,184); Kolwezi (47,712); Mbandaka (formerly Coquilhatville) (37,587); and ψ Boma (31,598).

**FLAG.**—Blue with diagonal red band flanked by narrow yellow stripes; 5-point star on blue next staff. **NATIONAL DAY.**—June 30.

There is a British Consulate at Lubumbashi.

#### COSTA RICA

(República de Costa Rica)

**President (1966-70)** Señor José Joaquín Trejos Fernández, elected February 6, 1966; assumed office May 8, 1966.

**COSTA RICAN EMBASSY AND CONSULATE**  
3 Zetland House, Marlborough Road, W.8.  
[01-937-7883]

**Ambassador (vacant).**

**Minister-Counsellor (Chargé d'Affaires), His Excellency Manuel Escalante Durán.**

The Republic of Costa Rica, in Central America, extends across the isthmus between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of 19,653 English sq. miles, and a population (estimated, 1968) of 1,631,000. The population is basically of European stock, in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824 to 1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys

■ temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific by rail.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Increasing attention is being paid to cattle raising.

The chief ports are Ψ Limón, on the Atlantic coast, through which passes most of the coffee exported, and Ψ Puntarenas on the Pacific Coast. Bananas are exported from Golfito, on the Pacific Coast, by the United Fruit Co., and from Limón by the Standard Fruit Co. In 1966, 1,124 ships of a gross tonnage of 4,772,218 entered at Costa Rican ports. About 500 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, LACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

W.8.

Cuba (the largest of the "West India" Islands) lies between  $74^{\circ}$  and  $85^{\circ}$  W. long., and  $19^{\circ}$  and  $23^{\circ}$  N. lat., with a total area of 44,178 sq. miles and a population (June, 1968) of 8,238,000.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, where in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new

Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office.

A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years. Dr. Castro has since proclaimed the revolution to be Socialist and himself to be a Marxist-Leninist.

In October, 1965, the Communist Party of Cuba was formed to succeed the United Party of the Socialist Revolution. It is the only authorized political party. Elections are no longer to be held. A new Socialist constitution has also been promised, but no date has been set for its introduction.

The Revolutionary Government has carried out programmes of land and urban reform and of nationalization of the means of production and distribution. By June, 1963, 90 per cent. of industrial production, all foreign trade and about 50 per cent. of small commercial companies were in state hands. In March, 1968, virtually all remaining private commercial enterprises were nationalized. About 70 per cent. of the cultivated land is in state farms or co-operatives. Private smallholders, who own the remainder, also come under a measure of Government control.

Sugar remains the major item in the economy and accounts for 80 per cent. of Cuban exports. A poor harvest in 1968 was followed by an even worse one in 1969, with production falling short of 5,000,000 tons, compared with an original target of 9,000,000 tons. Substantial credits from the Soviet Union have enabled the economy to survive these two poor years. Tobacco provides 5 per cent. of exports. Sweet potatoes, bananas, rice, coffee, cocoa, maize, cotton and tropical fruits also flourish. There are large herds of cattle.

11,915 miles of railway are open (public service 4,880; sugar plantations and mining areas 7,035) and about 12,000 miles of telegraph line. There are about 8,291 miles of road. At present scheduled international air services run only to Mexico City, Moscow, Prague and Madrid.

*Language and Literature.*—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728, but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. There are universities at Santiago de Cuba and Santa Clara. Public libraries have been established. The daily press, which has a fairly wide circulation, and broadcasting and television are under the control of the Government.

*Finance.*—The public revenue rose from an estimated \$365,247,946 in 1958 to \$2,399,006,000 for 1964, including profits from State trading concerns, etc. No up-to-date figures are available for the public debt—at the end of 1958 this stood at \$760,300,000.

Nominally \$=U.S.\$r. U.S. currency ceased to be legal tender in Cuba on June 30, 1951 (see also p. 83).

*Trade.*—Exports in 1965 were valued at \$685,500,000, compared with \$713,800,000 in 1964; imports, 1965, \$866,000,000 (1964, \$1,018,814,000). No statistics are available for subsequent years.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£8,369,000	£12,232,000
Exports to U.K. . . . .	4,676,000	6,875,000

The exports are principally molasses and tobacco; the imports are mainly machinery.

**CAPITAL**,  $\Psi$  Havana (pop., Census 1953), 783,162; other towns are  $\Psi$  Santiago (166,565), Holguín (226,644), Camagüey (204,254), Santa Clara (144,630), and  $\Psi$  Cienfuegos (100,000).

**FLAG**.—Five horizontal bands, blue and white (blue at top and bottom) with red triangle, close to staff, charged with 5-point white star.

**NATIONAL DAY**.—January 1 (Day of Liberation).

#### BRITISH EMBASSY

(Chancery: Edif. Bolívar, Capdevila No. 101, 2nd Floor. Postal address: Apartado 1069, Havana.)  
*Ambassador Extraordinary and Plenipotentiary*, His Excellency Richard Mercer Keene Slater, C.M.G. (1966).....£5,625

*Counsellor*, E. A. W. Bullock.

*1st Secretaries*, D. F. Ballentyne (Commercial); S. R. Airey (Consul).

*2nd Secretary*, C. W. T. Skeate.

*3rd Secretary*, S. Wright.

*Defence Attaché*, Lt.-Col. R. J. Shackleton, M.B.E. (Resident at Mexico City).

#### BRITISH CONSULAR OFFICES.

There are British Consular Offices at Havana, Camagüey and Santiago de Cuba.

### CZECHOSLOVAKIA

(Československá Socialistická Republika)

*President*, Ludvig Svoboda, born Nov. 25, 1895, elected March 30, 1968.

#### CABINET

*Prime Minister*, Ing. Oldřich Černík.

*Deputy Prime Ministers*, František Hamouz; Dr. Samuel Faltan; Dr. Karol Laco; Ing. Václav Vales.

*Federal Committee for Agriculture and Food*, Dr. Koloman Boda.

*National Defence*, Col. Gen. Martin Dzúr.

*Federal Committee for Press and Information*, Dr. Jaroslav Havelka.

*Federal Committee for Technology*, Ing. Miloslav Hruškovič.

*Federal Committee for Industry*, Ing. Josef Krejčí.

*Ministers*, Dr. Bohuslav Kučera; Jan Pauly.

*Foreign Affairs*, Ing. Jan Marko.

*Interior*, Jan Pelnář.

*Federal Committee for Transport*, Dr. František Reháč.

*Federal Committee for Posts and Telecommunications*, Ing. Milan Smolka.

*Finance*, Ing. Bohumil Sucharda.  
*Labour and Social Affairs*, Nichal Štancel'.  
*Foreign Trade*, Ing. Jan Tabaček.  
*Federal Committee for Prices*, Ing. Jiří Typolt.  
*Planning*, Dr. František Vlasák.

*Prime Minister of the Czech Social Republic*, Ing. Stanislav Rázl.

*Prime Minister of the Slovak Social Republic*, Dr. Peter Colotka.

#### CZECHOSLOVAK COMMUNIST PARTY

*Præsidium of the Central Committee*: Vasil Bilák; Peter Colotka; Oldřich Černík; Alexander Dubček; Evžen Erban; Gustáv Husák (*First Secretary*); Jan Piller; Stefan Šádovský; Ludvík Svoboda; Lubomír Strougal; Karel Poláček.

#### CZECHOSLOVAK EMBASSY AND CONSULATE

25 Kensington Palace Gardens, W.8.

[01-229-1255.]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Miloslav Růžek (1966).

*Counsellors*, Jan Pátek; Lubomír Šilhavy (Commercial).

*Military and Air Attaché*, Col. B. Švejnoha.  
*Commercial Attachés*, Josef Chvalovský; Ottol Kykal.

*Assistant Military and Air Attaché*, Col. Boris Neoral  
*1st Secretaries*, Dr. Karel Pravec; Josef Kalina; Dr. F. Hruza; Milan Glozar.

*2nd Secretaries*, Dr. Jaromír Sedlák; Dr. M. Had.

*3rd Secretaries*, Josef Jandura; Miroslav Fresl; Václav Šatra; Dr. M. Hubáček.

*Attachés*, František Zajíček; Stanislav Melichar; J. Balšinec; Jaromír Vylupek; Jiří Pelc; Josef Procházka; Miss V. Basetliková.

*Area and Population*.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory affected having an area of 53,700 square miles, reduced, by the cession of Ruthenia to U.S.S.R. in 1945, to 49,700 square miles. The population of Czechoslovakia is estimated (Dec. 31, 1967) at 14,362,000.

*Government*.—The Communist Party, with the aid of Action Committees, seized power in Czechoslovakia in February, 1948, and Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have com-

pleted the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

Two national five-year plans were carried on between 1949 and 1960 with emphasis on heavy engineering. Production doubled in the first Plan and industrial production increased by two-thirds in the Second. Fuel and power development and agriculture did not, however, meet their targets. The third 5-Year Plan was abandoned in 1962 because the targets were too high and the economy was run on a year to year basis for the next three years. During that time economic performance remained below expectation and although there was some improvement in 1964 and 1965 imbalances remained. A major economic reorganization was approved by the Central Committee of the Czechoslovak Communist Party in January, 1965. The main features of this new system were—a reduction in central planning and a greater devolution of responsibility to individual enterprises and factories; increased emphasis on profitability and competition; recognition of the value of the market, coupled with a more flexible price policy and greater participation by all production units in foreign trade. During 1965 and 1966, some rationalization of industry took place and minor elements of the new economic system were introduced experimentally. In June, 1966, the XIIIth Congress of the Party determined that the new system as such should be introduced from 1967. The fourth 5-Year Plan, 1966–70, and the annual plan for 1966 were drawn up on the basis of the old system and modifications will be undertaken from time to time. A start on applying the new system was made on January 1, 1967, by a revision of the structure of wholesale prices.

Following Novotný's removal from the post of First Secretary in January, 1968, there developed a wave of pressure for legal and political reform. During the ensuing months Novotný's supporters were removed from leading positions, and the programme of reform was embodied in a Party Action Programme adopted in April. Shortly afterwards the National Assembly began work on new legislation. The reforms envisaged the democratization of the country's political life, greater guarantees of fundamental liberties and the establishment of a federal system.

By the summer of 1968 it was evident that the more liberal policies of the Czechoslovak Government did not meet with Soviet approval. The Government and party leaders of U.S.S.R., Poland, Hungary and Eastern Germany met at Warsaw on July 14 and 15 and warned Czechoslovakia in a joint letter against the activities of "anti-socialist and revisionist forces" in Czechoslovakia. Meetings of the Czechoslovak Presidium with the Soviet Politburo at Cerna and with representatives of the Warsaw powers at Bratislava on August 3 followed, and the Czechoslovak and Rumanian Governments signed a 20-year treaty of friendship and mutual assistance during the Rumanian President's visit to Prague on August 15–16. At the same time fresh accusations of the stepping-up of subversive activities in Czechoslovakia appeared in the Soviet press. On the night of August 20, Czechoslovakia was invaded by Soviet, Polish, East German, Hungarian and Bulgarian troops, the capital and all major towns and cities being occupied.

Dubček, Svoboda, and the other leaders were immediately taken to Moscow. President Svoboda stoutly resisted Soviet attempts to impose a quisling government and the Russians were forced to

negotiate with Dubček. On August 26 the Moscow Agreements were signed; the Czechoslovak side agreed to the continued presence of Soviet forces in Czechoslovakia and to modify their policies. The majority of the troops were soon withdrawn. In the following months Dubček failed to control the internal situation in Czechoslovakia. On March 28, 1969 a major anti-Soviet demonstration took place in Prague following an ice-hockey victory over the Russians, and on April 15 Dubček was replaced by the authoritarian Gustav Husák as First Secretary.

*Language and Literature.*—Czech and Slovak are the official languages, each having its own literature. The Reformation gave a wide-spread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415 as a religious and social reformer) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the 17th century when Jan Amos Komenský or Comenius (1592–1670) was expelled from the country. He is still recognized as an outstanding educationist and a thinker of first magnitude. Under Austrian repression and with the persistent pursuit of Germanization, there was a period of stagnation until the national revival in the first half of the 19th century. Modern prose, drama and fiction, penned between the Wars, are represented by several authors of international reputation, notably K. M. Capek-Chod (1860–1927), Viktor Dyk (1877–1931), Jaroslav Hašek (1883–1923), Karel Capek (1890–1938), Vladimír Vančura (1891–1942), and Ivan Olbracht (1882–1952). Liberty of the press ceased with the loss of independence and the Nazi occupation in 1939. It was temporarily restored on the liberation of the country. After the Communist take-over of February 1948, however, freedom of the press was curtailed. All papers and periodicals were forced to follow the Party line and a number of publications were banned. Following the thaw of 1956 and after the relapse into dogmatism after the Hungarian Revolution, the new wave of freedom started in 1962–1963 and led to increased recognition of Czech and Slovak literature in the world. Greater international recognition is hampered by translation difficulties. In 1966 nearly 250 Czech and Slovak books were published abroad, including roughly one-third in non-Socialist countries. The prominent writers include František Hrubín (b. 1910) Bohumil Hrabal (b. 1914), Václav Havel (b. 1936), Ladislav Mňačko (b. 1919), Ladislav Novomeský (b. 1904), Arnošt Lustig (b. 1926), Jiří Mucha (b. 1915), and others. Poetic writing ranges from traditional lyric (Jaroslav Seifert) to "concrete" and typographic modernism (Jiří Kolář, Josef Híršal).

*Education.*—The number of pupils in basic nine-year schools is 2,164,000 (Dec. 31, 1966). There are 108,000 students in the secondary grammar schools and the number given for technical schools of all kinds is 284,000. Education is compulsory and free for all children from the ages of 6 to 15. There are five universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno, Olomouc and Košice. In addition there are a considerable number of other institutions of university standing, technical colleges, agricultural colleges, etc. On Dec. 31, 1966, there were 139,000 full-time students in centres of higher education and 46,000 adults part-time.

*Finance.*—The Czechoslovak currency is the Czechoslovak Koruna (Kčs = Czechoslovak crown) of 100 heller. The present Czechoslovak rate of exchange is Kčs. 17.22 = £1 with a bonus of Kčs. 20 for non-commercial travellers (see also p. 83).

## Trade with U.K.

	1967	1968
Imports from U.K. ....	£13,943,000	£17,391,000
Exports to U.K. ....	20,501,000	23,127,000

CAPITAL, Prague (Praha), on the Vltava (Moldau), the former capital of Bohemia with a population (1966) of 1,030,330. Other towns are Brno (Brünn), capital of Moravia (333,004), Bratislava (Pressburg), capital of Slovakia (276,519), Ostrava (269,642) and Plzen (Pilsen) (142,694).

FLAG.—Two equal horizontal stripes, white (above) and red; a blue triangle next to staff.

H.M. Consul, A. White.

Cultural Attaché, F. D. Hughes, Jungmannova 30, Prague 1.

Archivist, M. T. Murray.

## DAHOMÉY

(Republic of Dahomey)

President, Dr. Emile Derlin Zinsou, assumed office, July 17, 1968.

A republic situated in West Africa, between 2° and 3° W and 6° and 12° N., Dahomey has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by Upper Volta and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population estimated (Dec., 1968) at 2,530,000. Although poor in resources, Dahomey is one of the most thickly populated areas in West Africa, with a high level of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of intercommunicating lagoons, a clay belt and a sandy plateau in the north.

The first treaty with France was signed by one of the kings of Abomey in 1851 but the country was not placed under French administration until 1892. Dahomey became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. In October, 1963, a popular revolution led to the fall of the government of the first President of Dahomey, Hubert Maga. The Army held power until Sourou-Migan Apithy was elected President and Justin Ahomadegbé Chief of Government in January, 1964, after a new constitution had been agreed. This government was overthrown in November, 1965, following a long-standing disagreement between Maga and Apithy. It was replaced by President Tahirou Congacou, who was in turn dismissed in December of the same year by the Army. Christophe Soglo then assumed control and dismissed the Assembly. Soglo was in his turn overthrown by an Army coup d'état on December 17, 1967. Seven months later Dr. Zinsou was installed, with the support of the Army, as President, an appointment which was confirmed by a national referendum on July 28, 1968.

Dahomey is a member of the Conseil de l'Entente, Organisation Commune Africaine et Malgache

(OCAM) and the Organisation of African Unity (O.A.U.). The official language is French.

Finance.—The currency of Dahomey is the Franc CFA (Francs CFA 50=1 French Franc) (Francs CFA 50=1 Fr.).

Trade.—The principal exports are palm products (80 per cent.) followed by ground nuts, shea-nuts and coffee. Small deposits of gold, iron and chrome have been found. Imports from U.K., 1968, £709,000.

CAPITAL.—Porto Novo (85,000). Principal commercial town and port, Cotonou (120,000).

FLAG.—Three stripes, one vertical, green, two horizontal yellow and red.

NATIONAL DAY.—August 1.

British Embassy (see Togo).

## DENMARK

(Kongeriget Danmark)

King, Frederik IX, K.G., elder son of King Christian X, born March 11, 1899; suc. April 20, 1947; married May 24, 1935, Princess Ingrid (born March 28, 1910), daughter of H.M. King Gustav VI Adolf, King of Sweden; and has issue Princess Margrethe, born April 16, 1940 (Heir Presumptive), married June 10, 1967, Count Henri de Monpezat (Prince Henrik of Denmark) and has issue, 2 sons; Princess Benedikte, born April 29, 1944, married Feb. 3, 1968, Prince Richard of Sayn-Wittgenstein-Berleburg; and Princess Anne-Marie, born Aug. 30, 1946, married Sept. 18, 1964, Constantine XIII, King of the Hellenes.

## CABINET

Prime Minister, Hilmar Baunsgaard.

Minister of Foreign Affairs, Poul Hartling.

Finance, Poul Møller.

Fisheries and Greenland, A. C. Normann.

Vice-Consul, Niels Kristensen.

Fisheries Attaché, J. C. Bogstad.

Scientific Attaché, K. Kristiansen.

**Area and Population.**—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'–57° 45' N. lat., and 8° 5'–15° 12' E. long., with an area of 17,000 square miles, and a population estimated (July, 1967), of 4,839,000. In 1966 there were 88,322 births, 49,839 deaths and 41,424 marriages.

**Government.**—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Faröes and 2 for Greenland. In the 1968 elections the Social Democrats obtained 62 seats, Conservatives 37, Venstre, 34, Radicals 27, Socialist People's Party 11, Left-Socialists 4, Faröes 2, Greenland 2. At a referendum held on June 24, 1969, a proposal, approved by the *Folketing*, to reduce the voting age to 18 was rejected by 63 per cent. of the electorate who took part in the poll. Voting age has been 21 since May, 1961.

**Education** is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are 3 Universities at Copenhagen (founded in 1478), Aarhus (1933), and Odense (1966).

**Language and Literature.**—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Sören Kierkegaard (1813–1855) and Georg Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1944. Some 61 newspapers are published in Denmark; 10 daily papers are published in Copenhagen.

**Production and Industry.**—Nine per cent. of the population lives exclusively by agriculture, and about 52 per cent. by manufactures and trade. The chief products are pigs, cattle, dairy products, poultry and eggs, seeds, cereals and sugar beet; manufactures are mostly based on imported raw

material but there are also considerable imports of finished goods.

**COMMUNICATIONS.**—Mercantile marine (ships above 100 gross tonnage) (January, 1968 1,244 ships, with a gross tonnage of 2,980,000. On March 31, 1967, there were 2,354 kilometres of railway and 3,252,234 kilometres of telegraph and telephone lines.

	FINANCE	1968–69
Revenue (Budget estimate) . . . . .	Kr. 20,068,700,000	
Expenditure (Budget estimate) . . . . .	26,167,600,000	
Government Debt (March 31, 1967):—		
Internal . . . . .	4,185,000,000	
External . . . . .	1,920,000,000	
Rate of Exchange—Kr. 17.90=£1 (see also p. 83).		

	TRADE	1967	1968
Total Imports	Kr. 21,855,000,000	Kr. 24,099,300,000	
Total Exports	17,257,000,000	19,367,400,000	
Trade with U.K.			
	1967	1968	
Imports from U.K.	£143,650,000	£160,940,000	
Exports to U.K. . . . .	217,438,000	239,251,000	

The principal imports are machinery, liquid and solid fuels, base metals, vehicles, textile products, chemicals, fertilizers, cereals, feeding stuffs and wood and cork. The chief exports are agricultural produce, fish products, butter, bacon, eggs, meat and livestock ships, machinery, pharmaceuticals and ready made clothing.

**CAPITAL.**—Copenhagen. Population (1969), 835,246; Greater Copenhagen, 1,199,010. Other centres are: Aarhus 112,750; Odense 204,174; Aalborg, 83,519; Esbjerg, 57,309; Randers, 41,809; Roskilde, 39,751; Kolding, 36,995; Horsens, 36,123; Fredericia, 34,078; Vejle, 32,171.

**FLAG.**—Red, with white cross  
**NATIONAL DAY.**—June 5 (Constitution Day).  
 Copenhagen, distant from London 728 miles; transit 36 hours by sea.

**BRITISH EMBASSY.**  
 Offices, Kastelsvej 38–40 and Møntergade 1, Copenhagen.  
 Residence, Bredgade 26, Copenhagen.

**Ambassador Extraordinary and Plenipotentiary,** His Excellency Crawford Murray Maclehoose, C.M.G., M.B.E. (1969). . . . . £5,625  
**Counsellor,** K. R. C. Pridham.  
**Counsellor for Scientific Questions,** P. Bakke (resident in Stockholm).

**1st Secretaries,** G. W. Hayward; C. J. Hanbury (Consular); L. P. Hamilton (Agriculture and Food Attaché); G. E. Cossar (Labour Attaché, Resident in Helsinki); Miss M. W. Lloyd (Information); G. C. Tout, M.B.E. (Commercial).  
**2nd Secretaries,** Miss V. E. Beckett; D. Mellor (Commercial); R. V. Rollitt (Commercial); R. C. Tutt.

**Defence Attaché,** Cdr. C. B. Armstrong, R.N.  
**Assistant Military Attaché,** Maj. M. Mackay-Forbes.  
**Assistant Air Attaché,** Sqn.-Ldr. I. J. S. Corderoy (resident in Stockholm).  
**Attaché,** J. L. Katzaros.  
**Chaplain,** Rev. H. Picton.

There are Consulates at Aabenraa, Aalborg, Esbjerg, Aarhus, Odense, Thorshavn and Klaksvig (Faröes).

**British Council Representative,** E. A. S. Butterworth (Cultural Attaché), Møntergade 1, Copenhagen.

**Outlying Parts of the Kingdom**  
 The outlying parts of Denmark have about 81,000 inhabitants. The FARÖES, or Sheep Islands

(540 sq. m.; pop. (1968) 37,122), capital, Thorshavn, are governed by a *Lagting* of 26 members. ■ *Landsstyri* of 4 members which deals with special Farøes affairs, and send 2 representatives to the *Folketing* at Copenhagen. On Sept. 14, 1946, the *Lagting*, with the consent of the Danish Government, for its own guidance held a plebiscite on the Farøes. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the *Lagting* a great majority voted in favour of remaining part of the Kingdom of Denmark with ■ certain measure of home rule and in 1948 the Farøes received this. Trade with U.K. in 1968 totalled: Imports, £1,315,000; Exports, £1,382,000. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, 1965, 48,792), is divided into 3 provinces (West, North and East). Greenland (capital, Godthaab) has ■ *Landsraad* of 17 members and sends 2 representatives to the *Folketing* at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Greenland exported goods to the value of £118,000 to the United Kingdom in 1968 (1967, £203,000). The United States of America has acquired certain rights to maintain air bases in Greenland.

**DOMINICAN REPUBLIC**

(República Dominicana)

President, Joaquín Balaguer, born Sept. 1, 1907; elected June 1, 1966; assumed office July 1, 1966.

**EMBASSY AND CONSULATE.**

4 Braemar Mansions, Cornwall Gardens, S.W.7

[01-937-1921; 7116 (Consulate)]

Ambassador Extraordinary and Plenipotentiary, His Excellency Lic. Porfirio Herrera Baez.

There are also Consular Offices at Liverpool, Birmingham, Manchester, Nottingham, Grimsby, Southampton, Plymouth, Cardiff, Edinburgh, Glasgow and Belfast.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America. The western part of the island forms the Republic of Haiti. (For Map, see p. 873.)

The island lies between Cuba on the west and Puerto Rico on the east and covers an area of about 19,322 square miles, with ■ population (estimated, July, 1968) of 4,029,000. The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes.

Government.—Santo Domingo was discovered by Christopher Columbus in December, 1492, and remained ■ Spanish Colony until 1821. In 1822 it was subjugated by the neighbouring Haitians who remained in control until 1844 when the Dominican Republic was proclaimed. The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. In July, 1924, a properly elected Constitutional Government was installed. From 1930 until May 30, 1961 (when he was assassinated) Generalissimo Rafael Trujillo ruled the country.

A Council of State headed by Rafael F. Bonnelly was set up in 1962, and Professor Juan Bosch, elected President in December 1962, held office until September, 1963, when he was deposed by a military junta. A revolt in favour of ex-President Bosch in April, 1965, developed into civil war lasting until September the same year when a provisional President was elected. At a further election on June 1, 1966, Dr. Joaquín Balaguer was elected President.

Communications.—According to local classification there are 2,443 miles of first class and 2,102 miles of second class and inter-communal roads in the Republic. There is a direct road from Santo Domingo to Port-au-Prince, the capital of Haiti, but that part of it in the border area has fallen into disuse and it is no longer possible to travel direct between the two capitals except by air. The frontier has been closed since Sept., 1967. A telephone system connects practically all the principal towns of the republic and there is ■ telegraph service with all parts of the world. There are more than 90 commercial broadcasting stations and there is a television station operated by Radiotelevisión Dominicana, which with the help of relay stations provides receptions of its programmes in the major cities. A second television station in Santo Domingo-Rahintel transmits to the local area.

Spanish is the language of the Republic.

The Republic is served by five airlines, and ■ international airport 18 miles to the east of the capital is in operation.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, timber, cattle, iron ore, sisal products, honey and chocolate. There are several light industries producing beer, tinned foodstuffs, glass products, cotton textiles, shoes, paper, rum, matches, peanut oil and other products.

	FINANCE	
	1967	1968
Revenue.....	RD\$178,200,000	RD\$215,625,000
Expenditure..	225,900,000	211,271,000

One Dominican Peso = \$1.00 U.S.

	TRADE	
	1967	1968
Imports.....	RD\$160,000,000	RD\$180,000,000
Exports.....	137,500,000	165,000,000

**Trade with U.K.**

	1967	1968
Imports from U.K.....	£2,168,000	£2,626,000
Exports to U.K.....	784,000	59,000

The chief imports are machinery, foodstuffs, iron and steel, cotton textiles and yarns, mineral oils (including petrol), cars and other motor vehicles, chemical and pharmaceutical products, electrical equipment and accessories, construction material, paper and paper products, and rubber and rubber products; the chief exports are sugar, coffee, cocoa, tobacco, chocolate, molasses and bauxite.

The principal export to U.K. over a number of years has been sugar and sugar preparations.

CAPITAL.—Santo Domingo (formerly called Ciudad Trujillo), population of the Capital District (Census, 1964), 529,396. Other centres, with populations (estimated) 1967: Santiago de los Caballeros (205,635); La Vega (143,205); San Francisco de Macoris (128,657); San Juan (114,232); and San Cristóbal (112,996).

FLAG.—Red and blue, with white cross bearing an emblem at centre.

NATIONAL DAY.—February 27 (Independence Day, 1844).

**BRITISH EMBASSY**

(Avenida Independencia 84, Santo Domingo.)  
Ambassador Extraordinary and Plenipotentiary, His Excellency Leslie Boas, O.B.E. (1969)..... £5,075  
1st Secretary, G. Cheesman (Consul).

**BRITISH CONSULAR OFFICES**

There are British Consular Offices at Santo Domingo, Puerto Plata and San Pedro de Macoris.

## ECUADOR

(República del Ecuador)

President, Dr. José María Velasco (Ibarra), elected June 2, 1968; assumed office Sept. 1, 1968.

## EMBASSY AND CONSULATE.

Flat 3B, 3 Hans Crescent, S.W.1

[01-584-1367]

Ambassador Extraordinary and Plenipotentiary, His

Excellency Dr. Antonio Parra-Velasco (1969).

1st Secretary, Señor Lic. Don Patricio Maldonado.

2nd Secretary, Señor Diego Paredes.

Counsellor (Commercial), Señor Catulo Palau-Velasco.

There are consulates at Liverpool, Birmingham and Glasgow.

**Area and Population.**—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 20' and 81° W. long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles. (For MAP, see P. 921.)

The Republic of Ecuador is divided into 19 provinces and one territory. It has a population estimated (1968) at 5,695,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Carihuairazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.) and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The Galápagos (Tortoise) Islands forming the territory of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 11 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1966) of 3,300. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The islands export guano, orchilla moss and cattle. There is an increasing amount of fishing, mainly for the North American market.

**Government.**—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish-Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). The constitution of 1946 was suspended in 1963, when Dr. Carlos Arosemena, President of Ecuador from Nov. 8, 1961, was deposed by the Armed Forces on July 11, 1963. His powers were taken over by a junta of officers who stayed in power until March 29, 1966, when a caretaker government took office. A new Government was formed in November, 1966, after elections for a constituent assembly. A new constitution came into force on May 19, 1967. At elections held on June 2, 1968, Dr. José María Velasco (Ibarra) was

elected President and assumed office on Sept. 1, 1968.

**Production and Industry.**—The chief products are bananas, cocoa, coffee, sugar, rice, petroleum, straw hats, pyrethrum, vegetable ivory and balsa wood. The petroleum is insufficient to meet the whole of Ecuador's needs, but the recent discovery of oil in commercial quantities in the eastern part of Ecuador may lead eventually to the country having an exportable surplus, when the problem of transporting the oil across the Andes has been solved. In the highlands the principal crops are maize, wheat, potatoes and other temperate products. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found. There is little industry, the textile industry being the most important.

**Communications.**—There are 11,380 miles of permanent roads and 617 miles of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. Nine commercial airlines operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, Paris, Frankfurt, etc. There are internal services between all important towns.

**Defence.**—The standing Army has a strength of about 15,000. There is an Air Force of some 40 aircraft of various kinds and a small Navy. All are being advised by U.S. missions.

**Language and Literature.**—Spanish is the language of the country. The electorate is confined to adult male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 4 at Guayaquil. Elementary education is free and compulsory. In 1966-67 there were 840,457 pupils at the 6,785 primary schools and 130,093 pupils at the 507 High Schools. The 7 Universities (at Quito (2), Guayaquil (2), Cuenca, Loja and Portoviejo) and the Polytechnic Schools at Quito and Guayaquil had 15,745 students in the same year.

	FINANCE	1969
Revenue (Budget Estimates) . . .	Sucres	5,147,197,000
Expenditure (Budget Estimates) . . .		5,147,197,000
Internal Debt (Sept. 30, 1967) . . .		4,516,570,000
External Debt, Dec. 31, 1967 . . .	\$U.S.	163,700,000

The official rate of Exchange: Sucres 43'63 = £1, is used for most legal imports and exports. The free rate of exchange on June 25, 1969, was Sucres 52'32 = £1 (average rate). See also p. 83.

## TRADE

Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

	1967	1968
Imports* . . . . .	\$U.S. 165,165,000	\$U.S. 103,417,000
Exports* . . . . .	166,035,000	176,804,000

\*Permits cleared

## Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£3,407,000	£4,434,000
Exports to U.K. . . . .	240,000	447,000

The chief exports are bananas, cocoa, coffee and sugar. Other exports are rice, balsa wood, castor-oil seeds, hats, pharmaceuticals, fish, ivory nuts and pyrethrum. Manufactured goods and machinery ■ the main imports.

**CAPITAL.**—Quito. Population (estimated 1968), 483,847; ψ Guayaquil (716,617) is the chief port; other centres are Cuenca (73,407); Ambato (69,766); Riobamba (50,710); Esmeraldas (51,573); and Manta (42,750). The foregoing figures of urban populations have been revised by the Census and Statistics Office to exclude from 1968 figures

for rural areas of the cities (i.e. areas not supplied by city fuel or water services).

FLAG.—Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others); emblem in centre.

NATIONAL DAY.—August 10 (*Día de la Independencia*).

#### BRITISH EMBASSY

There is a British Consular Office at *Guayaquil*.

### EGYPT. See United Arab Republic

#### EQUATORIAL GUINEA

*President*, Francisco Macías (Nguema), *assumed office* October 12, 1968.

Formerly the territory of "Spanish Guinea", Equatorial Guinea consists of the island of Fernando Póo, an island in the Bight of Biafra about 20 miles from the west coast of Africa, Annobon Island in the Gulf of Guinea, the Corisco Islands (Corisco, Elobey Grande and Elobey Chico) and Río Muni, a coastal settlement lying between Cameroon and the Congo and extending about 125 miles inland. It has a total area of about 11,000 sq. miles and a population (estimated, 1968) of 281,000.

*Fernando Poo* is a mountainous island with forests of oil palm, ebony, mahogany and oak, and sugarcane, cotton and indigo. Cocoa, coffee, sugar, tobacco, vanilla nut and kola nut are cultivated and large quantities of cocoa and other products are exported.

*Government*.—Former colonies of Spain, the territories now forming the Republic of Equatorial Guinea were from April 1, 1960, constituted as two provinces of Metropolitan Spain, the inhabitants having the same rights as Spanish citizens. As a result of a plebiscite held on Dec. 15, 1963, an autonomous régime was instituted on June 2, 1964 with the approval of the Spanish Government. Equatorial Guinea became fully independent on October 12, 1968, after a referendum on the new constitution held in August, 1968, and presidential elections on Sept. 22, 1968. The latter were supervised by a U.N. Mission. The first President, Señor Francisco Macías, assumed office on independence day, having two days earlier formed a coalition ministry. The President took the Defence portfolio and appointed Ministers of Commerce and Foreign Affairs.

Severe disorders occurred during February and March, 1969, following incidents at the town of Bata (in Río Muni). Spanish residents were leaving Equatorial Guinea in large numbers during March, having had to seek the protection of residual Spanish forces while awaiting evacuation to Spain. In a statement to the United Nations Security Council on April 4, the Secretary-General reported that all Spanish troops had left Equatorial Guinea by March 28, together with all civilians who wished to leave. Some 600 Spanish civilians elected to remain in Fernando Póo and about 80 in Río Muni.

CAPITAL.— $\Psi$  Santa Isabel, on the island of Fernando Póo (population, 9,000).  $\Psi$  Bata is the principal town and port of Río Muni.

The British Ambassador to the Cameroon Republic is accredited to Equatorial Guinea (resident at *Yaoundé*, Cameroon).

#### ETHIOPIA

(*Ya Ityopia Nigusa Nagast Mangist—The Imperial Ethiopian Government*)

*Emperor of Ethiopia*, His Imperial Majesty Haile Selassie I. K.C., G.C.B., G.C.M.G., G.C.V.O., LL.D., son of the late Ras Makonnen, Governor of Harar; born July 23, 1892; married in July, 1911, Woizero (*Lady*) Menan, (who died February, 1962) daughter of Jantrar Asfaw of Ambassal and Woizero (*Lady*) Sehin Mikael, daughter of King Mikael of Wollo; crowned as *Nigus*, Oct., 1928; proclaimed *Emperor*, April 2, 1930; crowned as *Emperor*, Nov. 2, 1930; in exile, 1936–1940; led his patriot army, 1940–41; returned to his capital, May 5, 1941.

*Crown Prince*, H.L.H. Prince Asfa Wossen, G.C.V.O., G.B.E., eldest son of the Emperor, born July 27, 1916; married May 9, 1932, Walatta Israel daughter of Ras Seyoum, whom he divorced in 1945, when he married Woizero Medferias Worq, daughter of Major-General Ababa Damtaw. *Prime Minister*, Aklillou Habte-Wold.

#### EMBASSY IN LONDON

17 Princes Gate, S.W.7

[01-589-7212]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Ato Gabre-Mascal Kelegzi (1966).

*Counsellor*, Assefaw Legesse.

*1st Secretary*, Ato Amare Guga.

*2nd Secretary*, Ato Teferra Gabre-Christos.

*3rd Secretary*, Ato Zelleke Bellete.

*Position and Extent*.—The Empire of Ethiopia, with which Eritrea was federated from 1952 to 1962 when it was incorporated as a province, is in North-Eastern Africa, bounded on the north west by the Sudan; on the south by Kenya; on the east by Afars and Issas Territory and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles, with a population estimated (1968) at 23,667,400, of whom about one-third are of the ruling race of Semitic origin (Amharas and Tigres) and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. Eritrea consists of a mountainous hogsback range up to 10,000 ft., interposed between the

Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. On the high plateaux there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

Those of Semitic origin (Amharas and Tigres), who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous; the Patriarch ranks immediately after the Alexandrian Patriarch. Moslems predominate in some areas, notably northern Eritrea, Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

#### GOVERNMENT

*Ethiopia.*—The Empire is governed by a Council of Ministers, responsible to the Emperor, and a Parliament consisting of a Senate and a Chamber of Deputies, in accordance with the constitution promulgated in 1955. Elections, on a basis of universal suffrage, were held in 1957, and the Chamber of Deputies met for the first time at the end of that year. General elections have since been held in 1961, 1965 and 1969. The Chamber enjoys greater fiscal control than the previous Assembly and there is a limited degree of ministerial responsibility to Parliament. The Senate continues to be nominated by the Emperor.

*Eritrea.*—Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown, becoming a province of Ethiopia in 1962.

*Production and Industry.*—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 56 per cent. of the country's total exports by value in 1967. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, beer and cement. Hydroelectric power production and telecommunications are expanding rapidly, however, mainly with loans from the World Bank.

*Communications.*—A railway links Addis Ababa, the capital, *via* Dire-Dawa, with Jibouti, 486 miles away. It carried 459,000 passengers and 374,000 tons of freight in 1967. In Eritrea a narrow gauge line runs from Massawa to Asmara and on to Agordat. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with a branch from Dessie to Assab on the Red Sea Coast. Addis Ababa and Asmara are now linked also by a road running through Gondar and along Lake Tana. Others run from Addis Ababa west to Lekempti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and

in the East to Dire Dawa, Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to most of the provincial towns. External services are operated to Athens, Frankfurt, Madrid, Rome, Beirut, Aden, Jibouti, Taiz, Cairo, Khartoum, Nairobi, Dar-es-Salaam, Entebbe, Lagos, Accra, New Delhi and Karachi.

*Defence.*—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army, including the Imperial Bodyguard, the Imperial Air Force and the Imperial Navy. The Army consists of armour, infantry, artillery, engineers, signals, ordnance and supply services and a parachute battalion, in all, four divisions plus army troops. The Army is trained by Americans and Israelis. There is a military academy at Harar and a military training centre at Holleta with a specialist training wing. The Imperial Air Force comprises a transport squadron, a bomber squadron, three fighter squadrons, a training squadron, a jet conversion squadron, a reconnaissance unit and an elementary training unit. The Imperial Air Force Headquarters is situated at Debre Zeit. The aircraft are mostly of American manufacture but also include Canberras.

The Imperial Navy has a small headquarters in Addis Ababa with bases at Massawa and Assab. The principal units are an ex-U.S. seaplane tender (*Ethiopia*) and a patrol craft squadron of 5.

*Education.*—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools, and cadet-schools for the Army, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. In 1961 the Hailé Selassié I University was founded to co-ordinate the existing institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.) and to provide a framework for future development. Amharic is the official language of instruction, with English the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

*Finance.*—Total revenue for 1969-70 was estimated at £100 m., while expenditure was expected to reach £105 m., 9 per cent. more than in 1968-69. The Ethiopian dollar has a value of 5.52 grains of fine gold and is divided into 100 cents. At Dec. 31, 1968, the combined note and coin issue amounted to £48,600,000. Foreign exchange and gold reserves of the National Bank and Commercial Banks amounted to £28,500,000 at the same date. Eth. \$6 = £1. (See also p. 83.)

*Trade.*—The chief imports by value are machinery and transport equipment, manufactured goods, chemicals, beverages and tobacco (from U.K.); the principal exports by value being coffee, oilseeds, hides and skins, and pulses.

#### TRADE

Total Imports (1968) .....	£72,060,000
Total Exports (1968) .....	44,337,000

*Attachés*, M. Seppo Appelqvist; M. Johannes Backström.

**Area and Population**.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,165 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (October 1968), 4,694,000. In 1967 the birth rate was 16.6, death rate 9.4 per 1,000. The infant mortality rate was 14.8 per 1,000 live births. 92.6 per cent. of the people are Lutherans, 1.3 per cent. Greek Orthodox and 6.1 per cent. others.

The Åland Archipelago (Åhvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia,

covers about 572 square miles, with a population (1967) of 21,532 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

**Government**.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, composed of members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

Following the presidential elections in February, 1968, a new coalition government was formed by Mr. Koivisto from representatives of the Social Democrat Party, the Centre Party, the People's Democrat Party, the Swedish People's Party and the Social Democrat Opposition Party.

**Defence**.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,400. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8-11 months. None of the defence forces has the full complement permitted.

**Education**.—Primary education is compulsory and free for all children from 7 to 16 years, and in 1966-67 there were 523,493 in attendance at primary schools, with 282,147 in secondary schools; and 91,718 in colleges for vocational training. In 1966-67 there were 11 Higher Schools with 9,066 students, and 6 universities; the State University of Helsinki (20,578 students); 1 at Turku (one Swedish-speaking); and new universities at Oulu, Jyväskylä and Tampere. Combined enrolment at Higher Schools and Universities was 45,251.

**Language and Literature**.—Most Finns are bilingual. 92.4 per cent. speak Finnish as their first language, 7.4 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living in

nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1917 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 70 daily newspapers in Finland which appear on 4 or more days per week (60 Finnish language, and 10 Swedish).

**Production and Industry.**—Finland has a greater area covered in forest than any other European country except the Soviet Union. Consequently the national economy is based on the timber, pulp and paper industries. These industries employ a large proportion of the working population and accounted in 1968 for 61 per cent. of Finland's foreign exchange earnings. The metal and engineering industries, producing 23 per cent. of Finland's export income in 1968, form the second important group. Exports of agricultural and dairy products amounted to 5 per cent. of total exports in 1968. The remaining export revenue came from the glass, ceramics and furniture industries. To a large extent domestic requirements in the textile, rubber, plastics, chemical and pharmaceutical, footwear and foodstuff trades, are met by local factories.

**Communications.**—There are 5,556 miles of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R., passenger boat connection with Sweden, Denmark and West Germany. Vessels on the London to Leningrad route call at Helsinki. There are also passenger/cargo boat connections with most countries in the world. External civil air services are maintained by BEA, Aero Oy (Finnish Airlines), Kar Air, Scandinavian Airlines Malev and Czech Airlines. Finnair and Aeroflot each maintain services to Moscow and to Leningrad. The merchant fleet (Dec, 1968) consists of 78 steamships (108,960 tons gross), 414 motor vessels (971,930 tons gross), and 14 sailing ships with auxiliary engine (1,776 tons gross).

**Finance.**—On Jan. 1, 1963, all values expressed in *Finnmarks* were divided by 100, in a reform of the currency. *Finnmark* figures below are expressed in terms of the New *Finnmark*.

*Finnmarks* 10:00 = £1 (see also p. 83).

	1968 <i>Finnmarks</i>	1969 <i>Finnmarks</i>
Revenue (Budget) . . . . .	9,276,000,000	9,222,000,000
Expenditure (do.) . . . . .	9,275,000,000	9,221,000,000
Debt (Dec., 1968) . . . . .	4,431,000,000	4,995,000,000

	1967 <i>Finnmarks</i>	1968 <i>Finnmarks</i>
Total Imports . . . . .	5,794,694,000	6,710,886,000
Total Exports . . . . .	5,230,295,000	6,874,237,000

	1967	1968
Imports from U.K. . . . .	£71,310,000	£78,653,000
Exports to U.K. . . . .	129,767,000	160,717,000

The principal imports are raw materials, foodstuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

**CAPITAL.**— $\Psi$  Helsinki (Helsingfors). Population (Dec., 1967), 526,896; other towns are Tampere (Tammerfors), 150,065;  $\Psi$  Turku (Åbo), 148,399; Lahti, 85,515;  $\Psi$  Oulu (Uleaborg) 83,378;  $\Psi$  Pori (Björneborg) 71,010; Jyväskylä, 55,440; Kuopio,

55,183; Lappeenranta, 50,049; and  $\Psi$  Vaasa (Vasa) 48,660.

**NATIONAL DAY.**—December 6 (Day of Independence).

**FLAG.**—White with blue cross.  
BRITISH EMBASSY  
Helsinki

British Ambassador's Residence, It. Kaivopuisto 8B, Chancery Offices, Uudenmaankatu 16-20.

Ambassador Extraordinary and Plenipotentiary, His Excellency William Bernard John Ledwidge, C.M.G. (1969) . . . . . £5,625  
Counsellor (Commercial), A. H. Reed (and Consul-General).

1st Secretaries, A. C. Stuart; D. A. Marston (Information); G. T. Burgess (Commercial); P. H. Towers-Picton, O.B.E.

Defence and Military Attaché, Col. C. A. Humphreys. Naval Attaché, Capt. S. R. Sandford, R.N.

2nd Secretaries, A. H. Banks (Consul); A. B. Gundersen; H. O. Spannig; T. H. Moran, M.B.E.  
3rd Secretaries, P. Lever; Miss L. J. Corston (Vice-Consul); B. J. McDowell.

There are British Consular offices at Helsinki, Tampere, Turku, Pori, Kotka, Oulu, Hamina and Vaasa.

British Council Representative, P. J. Seccombe, E. Esplanadikatu 22, Helsinki 13.

## FRANCE

(La République Française)

President of the French Republic, Georges Jean Raymond Pompidou, born July 5, 1911, elected June 15, 1969, assumed office, June 20, 1969.

Secretary-General of the President's Office, M. Michel Jobert.

Secretary-General of the French Community, M. Jacques Foccart.

President of the Senate, M. Alain Poher.

President of the National Assembly, M. Achille Peretti.  
CABINET

Prime Minister, M. Jacques Chaban Delmas.

Ministers of State:—

Defence, M. Michel Debré.

Cultural Affairs, M. Edmond Michelet.

Relations with Parliament, M. Roger Frey.

Justice, M. René Pleven.

Foreign Affairs, M. Maurice Schumann.

Interior, M. Raymond Marcellin.

Economy and Finance, M. Valéry Giscard d'Estaing.

Planning and Regional Development, M. André Bettencourt.

Overseas Departments and Territories, M. Henri Rey. Industrial Development and Scientific Research, M. François Xavier Ortoli.

Equipment and Housing, M. Albin Chalandon.

Post and Telecommunications, M. Robert Galley.

Agriculture, M. Jacques Duhamel.

Transport, M. Raymond Mondon.

Labour, Employment and Population, M. Joseph Fontanet.

Health and Social Security, M. Robert Boulin.

Veterans, M. Henri Duvillard.

Secretaries of State (Prime Minister's Office), M. Léo Hamon (Government Spokesman); M. Joseph Comiti (Youth and Sport); M. Philippe Malaud (Civil Service); M. Jacques Baumel (Public Relations).

Other Secretaries of State, M. André Fanton (Defence); M. Jean-Louis Tinaud (Relations with Parliament—Senate); M. Jacques Limouzy (Relations with Parliament—National Assembly); M. Yvon Bourges (Foreign Affairs); M. Jean de Lipkowski (Foreign Affairs); M. André Bord (Interior); M. Jacques Chirac (Economy and Finance); M. Jean-Marie Bailly (Commerce); M. Pierre Billecocq (Education); M. Gabriel Kaspereit (Arts and

*Crafts*); M. Bernard Lafay (*Industrial Development and Scientific Research*); M. Marcel Anthonioz (*Tourism*); M. Robert-André Vivien (*Housing*); M. Bernard Pons (*Agriculture*); M. Philippe Dechartre (*Labour, Employment and Population*); Mlle. Marie-Madeleine Dienesch (*Health and Social Security*).

[01-229-9411]

Chancery: 58 Knightsbridge, S.W. 1. [01-235-8080]. Consulate-General: 51 Bedford Square, W.C.1. [01-636-1206].

Ambassador Extraordinary and Plenipotentiary, His Excellency Monsieur Geoffroy de Courcel, G.C.V.O., M.C. (1962).

Minister-Counsellor, M. Jean-Paul Anglès.

1st Counsellor, M. René Ziller.

2nd Counsellors, M. Victor Garès (*Press Affairs*); M. André Jouanin.

1st Secretaries, M. Jean-Louis Lucet; M. Gilles Nicol de la Belleissue.

2nd Secretaries, M. Jean-Pierre Angremy; M. Jean-Bernard Mérimée; M. François Soulé-Susbielles.

3rd Secretary, M. Jean-François Lionnet.

Consul-Attaché, M. Charles Nupied, M.B.E.

Attachés, Mme. Geneviève Rocheteau; M. Jean-François Massoni.

Naval Attaché, Contre Amiral J. Brasseur-Kermadec. Assistant Naval Attaché, Capitaine de Corvette Jean-Hugues de Laforcade.

Military Attaché, Col. Pierre Bonnafont.

Assistant Military Attaché, Cdt. Joel Nicol.

Air Attaché, Général de Brigade André Thoulouze. Assistant Air Attaché, Cdt. Christian Sapin.

Attaché, M. Paul Blondel.

Minister Financial Counsellor, M. Jacques Dulière.

Financial Attaché, M. Henri Baquialat.

Minister Commercial Counsellor (*Head of Dept.*), M. Jean Wahl.

Commercial Counsellor (*Asst. Head*), M. Raymond Lemaréchal.

Commercial Counsellor, M. Jean Gantier.

Commercial Attachés, M. Francis Lohéac; M. Pierre Theau; M. Jean-Pierre Dutet.

Assistant Commercial Attaché, M. René Tranchand.

Cultural Counsellor, M. Pierre de Boisdeffre.

Cultural Attachés, M. Paul Moudolouig; M. André Zavriew; Mme. Oudiette-Marger.

Shipping Counsellor, M. Eugène Taillart.

Scientific Counsellor, M. François Miquel.

Counsellor, Paymaster and Financial Comptroller, M. Jean Lescène.

Consul-General, M. Robert Fabre, 51 Bedford Square, W.C.1.

*Area and Population.*—The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1939) at 212,895 square miles divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The population of France (estimated by the National Institute of Statistical and Economic Studies) at the end of December, 1968, was 50,991,000. During 1968 there were 833,600 live births, 550,100 deaths and 357,200 marriages. Principal groups of foreigners living in France are: (approximate numbers at the end of 1968) Italians 630,000; Spaniards 616,000; Algerians 550,000; Portuguese 367,000.

Sept. 4, 1870, the Emperor Napoleon III (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the legislative power in a Chamber of Deputies and a Senate. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress.

On Sept. 1, 1939, Germany invaded Poland thus precipitating war with France and Great Britain, which had (March 31, 1939) given an open pledge to support Poland against aggression.

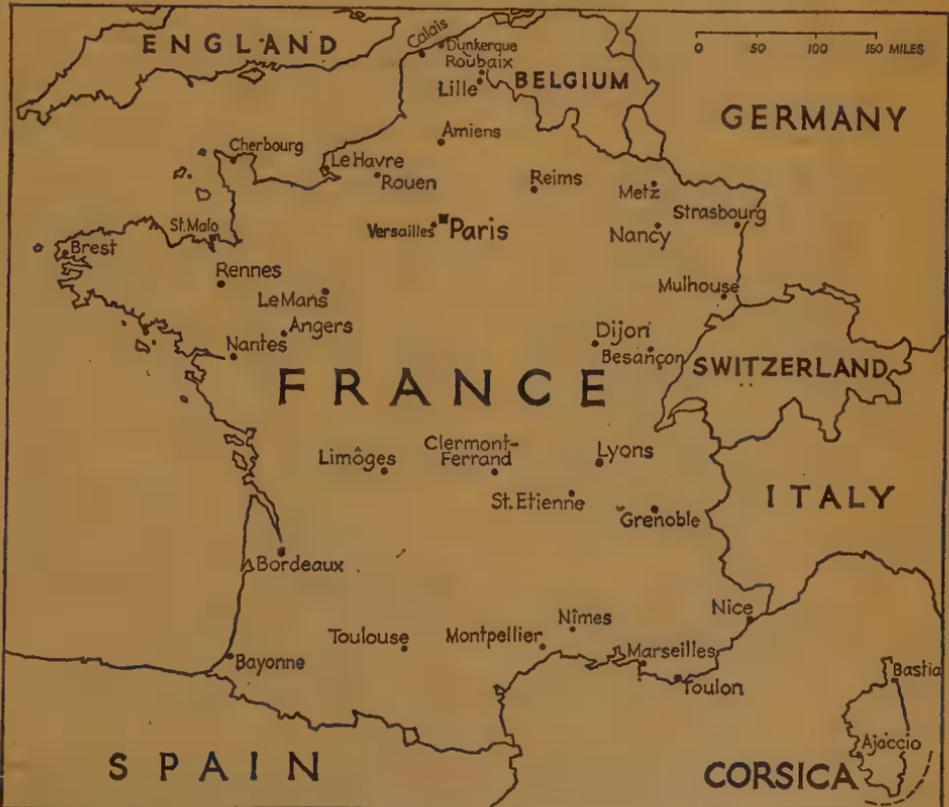

On June 17, 1940, the late Maréchal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General Charles de Gaulle announced the formation of a Provisional National Committee "to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader."

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the allied nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the allied nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France

**Government.**—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the *First Republic* lasted until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the *First Empire* in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 29, 1815), until the *Second Republic* of 1848, which became the *Second Empire* on Nov. 22, 1852. On

was liberated. The enlarged Consultative Assembly met in the Luxembourg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following a national referendum on Oct. 27, 1945, a Constituent Assembly was elected with the task of drafting a new constitution. This was duly drawn up and adopted at a further referendum on Oct. 13, 1946. A National Assembly and Council of the Republic, elected on a territorial basis, were set up. With amendments made in 1954, the Constitution of the Fourth Republic was in force from 1946 until Oct. 5, 1958. From the liberation of Paris in 1944 until the Fourth Republic came to an end in 1958, 26 Cabinets were formed with an average life of 5½ months. The Government of M. Mollet for 16 months in 1956-57 was the longest in office, that of M. Queuille in 1950 the shortest, being in office for only three days.

Insurrections took place in Algeria and in the Metropolitan Department of Corsica in May, 1958, and, faced by a threat of imminent insurrection among the armed forces at home, President Coty warned the nation that it was on the brink of civil war and invited General de Gaulle to form a Government. M. Pflimlin formally resigned the office of Prime Minister on May 31. On June 1, by 329 votes to 224, Gen. de Gaulle was invested in the National Assembly as Prime Minister, with power to govern by decree for a period of six months during which time proposals for constitutional reform would be submitted to a national referendum.

*The Fifth Republic.*—The Constitution of the Fifth Republic, embodying important changes, was adopted by an overwhelming majority at a referendum held on Sept. 28 in Metropolitan France and all overseas departments and territories.

The President was elected for a term of 7 years by an electoral college consisting of both Houses of Parliament, the departmental general councils, overseas assemblies and elected representatives of the municipal councils. As the result of a referendum in October, 1962, future Presidents are to be elected by direct universal suffrage. Presidents are eligible for re-election. The President appoints the Prime Minister. He may dissolve the National Assembly after consultation with the Prime Minister and Presidents of both Houses, but may not do so more than once in twelve months. He may submit disputed legislation to a national referendum at the request of the Government or of both Houses of Parliament. The President may assume special powers in an emergency. At the presidential elections held on Dec. 21, 1958, General de Gaulle was elected President by an overwhelming majority and took office on Jan. 8, 1959, as first President of the Fifth French Republic. He was re-elected in December, 1965, for a second presidential term. In May, 1968, a major internal crisis was precipitated by a student rebellion, which led to a generalized strike and the virtual collapse of the Government. General de Gaulle then held parliamentary elections at which the Gaullists won the largest majority in living history. The General remained President until April 28, 1969, when a referendum on regional and Senate reform on which he had staked his personal future as President, was lost. Alain Poher (*Centrists and President of the Senate*) became interim President and stood for election against MM. Pompidou (*Gaullist*), Duclos (*Communist*), Defferre (*Socialist*) and three other candidates. On the second round M. Pompidou was elected with 58 per cent. of the vote and assumed office as President on June 20, 1969.

Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the

National Assembly. The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The Prime Minister and the Cabinet are responsible only to Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session. Ministers relinquish Parliamentary seats on joining the Cabinet.

A Constitutional Council is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the Economic and Social Council gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

*Production.*—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1968 was:—

	(Quintals)
Wheat.....	147,416,100
Oats.....	25,059,900
Barley.....	90,618,800
Rye.....	3,325,000
Maize.....	51,738,200

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1968 was 65,120,200 hectolitres. Cider-making is also an important industry. The live stock (1968) included 21,918,400 cattle, 9,598,500 sheep and lambs, 10,583,800 pigs, 781,500 horses and 914,200 goats. The mineral resources include coal, natural gas, pig iron, bauxite, lead, silver, antimony and salt. In 1968 coal production amounted to 45,132,000 tons. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

*Language and Literature.*—French is the universal language of France and of a large proportion of the people of Belgium, Luxemburg, Switzerland, Italy, Tunisia, Algeria, Mauritius, Haiti and the Province of Quebec, Canada, to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 10 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952), Albert Camus (1957) and St. John Perse (Alexis Léger) (1960).

*Defence.*—The personnel of the Defence Forces at the end of 1968 totalled: ARMY 337,200; AIR FORCE, 107,206; NAVY, 68,945; Common Services,

73,856 (including GENDARMERIE of 63,671). The Army has a variety of new French-made equipment coming into service, including medium tanks, field and air defence guns, trucks and radio sets. A tactical nuclear weapon is promised for the 1970's. The Air Force is equipped with *Mirage IV* nuclear bombers, KC 135 tanker/transport, *Mirage III* fighters and *Transall* transports, supported by a large number of older operational aircraft. The Navy includes 2 cruisers, 3 aircraft carriers, 18 fleet escorts, 18 fast escorts, 19 submarines, 15 ocean minesweepers, 1 helicopter carrier, 1 GW destroyers, 8 tropical duty frigates, 2 LSD, 7 LST, 82 coastal and inshore minesweepers, 4 logistic support ships and 8 oilers.

**Education.**—The educational system is highly developed and centralized. It is administered by the Ministry of National Education, comprising (a) the *Direction de l'Administration Générale*, the *Direction de l'Enseignement Supérieur*, and the *Direction Générale de l'Organisation et des Programmes Scolaires*, the three principal administrative services; (b) the Superior Council of National Education (consultative); and (c) other organizations and services concerned with libraries, research, external relations whose heads are directly responsible to the Minister; and (d) the Inspectorate. The former High Commissariat for Youth and Sports of the Ministry of National Education has now become a separate Ministry. *Local Administration* comprises 23 Territorial Academies, with inspecting staff for all grades, and (b) Departmental Councils presided over by the *Préfet*, and charged especially with primary education.

Primary and secondary education are compulsory, free and secular, the school age being from 6 to 16. Schools are for boys, for girls, or mixed. (i) *Primary* education is given in *écoles maternelles* (nursery schools), *écoles primaires élémentaires* (primary schools) and *collèges d'enseignement général* (4-year secondary modern course); (ii) *Secondary* education in *collèges d'enseignement technique*, *collèges d'enseignement secondaire* and *lycées* (7-year course leading to one of the five *baccalauréats*). *Baccalauréat A* consists largely of philosophy and languages with a little mathematics, and provides entry into the faculties of Letters and Law. *Baccalauréat B* groups languages, mathematics and economics with philosophy classes oriented towards psychology and sociology. It provides entry to the faculties of Letters for the social sciences and to the faculty of Law for economics. *Baccalauréat C*, consisting of mathematics and physics with some languages, provides entry to the faculty of Sciences for those studying for a degree in mathematics and physics. *Baccalauréat D* has the same language component as *Baccalauréat C*, but its main feature is the natural sciences. It provides entry to the faculty of Sciences for natural science degrees, and also to the Medicine and Pharmacy Faculties. *Baccalauréat E* is largely scientific and technical with a language element, and provides entry to engineering schools and the Faculty of Science. (iii) *Special schools* are numerous. (iv) There are 19 universities (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Besançon (1485), Bordeaux (1441), Caen (1432), Clermont-Ferrand (1808), Dijon (1772), Grenoble (1339), Lille (1530), Lyons (1808), Montpellier (1125), Nancy (1572), Nantes (re-created 1961), Paris (1150), Poitiers (1431), Reims (1961), Rennes (1735), Strasbourg (1567) and Toulouse (1230). Three new universities were created during 1964, at Orléans, Reims and Rouen. (v) There are numerous *Grandes Ecoles* in France which award diplomas in many subjects not taught at university,

especially applied science and engineering. Most of them are State institutions but have a competitive system of entry, unlike the universities.

After the national crisis of May, 1968, sweeping reforms of higher education were introduced by Act of Parliament. They aim to decentralize the administration of higher education and give a greater degree of autonomy to the universities and individual educational establishments, and also to encourage greater staff/student participation in decisions affecting those institutions. The various faculties and institutions are at present being re-grouped into local, corporate bodies, which will then become the new universities of France. The *Grandes Ecoles* are not affected by these changes, but the universities listed above have for the time being been dis-established, although, *de facto*, they continue to function. It is too soon to assess the results of these reforms, which may take some years to accomplish.

**Archæology, etc.**—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cæsar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgæ from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIth century châteaux survived the French Revolution.

**Roads.**—The length of the *Routes Nationales* at the end of 1968 was 80,861 km. and of motorways 1,100 km. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use in 1968 were: canals, 4,440 km.; navigable rivers, 3,121 km.

**Railways.**—The system of railroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic in 1968 was 37,400 km., of which 8,810 km. were electrified. Traffic in 1968 totalled 35,860,000,000 passenger-km. and 62,920,000,000 ton-km.

**Shipping.**—The French mercantile marine consisted on Jan. 1, 1968, of 625 ships of 5,286,824 tons gross, of which 47 were passenger vessels (432,400 tons), 150 tankers (2,614,315 tons gross) and 424 cargo vessels (2,240,009 tons gross).

## FINANCE

	1967	1968
	F. millions	
Total revenue ( <i>Budget</i> ).....	120,830	129,780
Ordinary expenditure ( <i>do.</i> )...	125,628	136,188

The *Public Debt* on Dec. 31, 1968, was F.97,360,000,000 of which the external debt amounted to F.6,928,000,000.

**Currency.**—The unit of currency is the *franc* of 100 *centimes*, which was devalued on Aug. 10, 1969. Bank notes in 10, 50 and 100 new franc denominations and coins in 5 new francs are issued.

EXCHANGE RATE (from 10/8/69).—F.13.33=£1 (see also p. 83).

## COMMERCE

The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

## FRENCH FOREIGN TRADE

	1967 Francs	1968 Francs
Imports ....	61,200,000,000	69,163,000,000
Exports ....	56,000,000,000	62,813,000,000

## Trade with U.K.

	1967	1968
Imports from U.K.	£204,395,000	£234,424,000
Exports to U.K. ..	255,021,000	312,332,000

## OVERSEAS DEPARTMENTS

With effect from Jan. 1, 1947, the colonies of Guayane (French Guiana), Martinique, Guadeloupe and La Réunion with its dependencies have been theoretically administered in exactly the same way as the Metropolitan Departments, but in practice somewhat greater discretion is allowed to the Prefects and the locally elected bodies.

*La Réunion.*—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (estimated, 1968), 405,000. Capital, St. Denis (65,614). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations (1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land in the Antarctic Continent are also dependencies of Réunion. Imports from U.K., 1968, £357,000.

*Martinique.*—An island situated in the Windward Islands group of the West Indies, between the British colonies of Dominica in the north and St. Lucia in the south. Population (estimated, 1967), 333,000. Capital,  $\Psi$ Fort de France (60,600). Other towns are  $\Psi$ Trinité (39,173) and  $\Psi$ Marin (31,369).

*Guadeloupe.*—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Population (estimated, 1967), 320,000. Capital,  $\Psi$ Pointe à Pitre (39,000). Other towns are  $\Psi$ Basse Terre (16,000) in Guadeloupe and  $\Psi$ Grand Bourg (12,827) in Marie Galante.

*French Guiana.*—Area, 35,000 sq. miles. Population (estimated, 1967), 40,000. Capital,  $\Psi$ Cayenne (20,000). Situated on the north-eastern coast of South America, French Guiana is flanked by Netherlands Guiana on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royal and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894 to 1899.

## CAPITAL OF FRANCE. Paris, on the Seine.

Population (estimated, 1968), 2,607,625.

*District of Paris.*—Created by legislation promulgated on August 2, 1961, the District covers the areas of the Seine Departments (see list of Departments, p. 858).

Improvements and development of the Paris region is the responsibility of a Council of Administration consisting of 28 members, half elected by the Government from among local members of Parliament, and the other half by local councils. The

Council, which has its own budget and revenue, co-ordinates the development works of existing authorities and has power to initiate its own schemes. A Delegate-General appointed by the Government is the Council's executive officer.

At the Census of 1968 nineteen towns had a population of over 150,000 inhabitants:—Paris (2,607,625);  $\Psi$ Marseilles (893,771);  $\Psi$ Lyons (535,000); Toulouse (380,340);  $\Psi$ Nice (325,400);  $\Psi$ Bordeaux (270,996);  $\Psi$ Nantes (265,009); Strasbourg (254,038); Saint-Etienne (216,020);  $\Psi$ Le Havre (200,940); Lille (194,948); Rennes (188,515);  $\Psi$ Toulon (178,489); Montpellier (167,211); Grenoble (165,902);  $\Psi$ Brest (159,857); Reims (158,634); Clermont-Ferrand (154,110); Dijon (150,791). 37 towns in France have a population of over 100,000.

The chief towns of Corsica are  $\Psi$ Ajaccio (42,282) and  $\Psi$ Bastia (50,881).

Paris is distant from London 267 miles; transit by air, 1 hr.

FLAG.—The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

NATIONAL DAY.—July 14.

## BRITISH EMBASSY

(35 rue du Faubourg St. Honoré, Paris 8e)

*Ambassador Extraordinary and Plenipotentiary, His Excellency the Rt. Hon. Arthur Christopher John Soames, C.B.E. (1968)*..... £8,600  
*Minister, A. M. Palliser, C.M.G.*  
*Minister (Economic), J. S. Rooke, C.M.G., O.B.E.*  
*Counsellor and Consul-General, E. E. Young.*

*Counsellors, P. H. R. Marshall; H. S. Colchester, C.M.G., O.B.E.; L. M. Minford (Commercial); D. A. Logan, C.M.G. (Press); C. C. Clemens, M.C. (Administration); A. G. Wallis, D.F.C. (Labour); J. E. Galsworthy, C.M.G. (Economic); R. Hibbert (Defence Supply and Civil Air); J. Anson (Financial).*

*1st Secretaries, M. K. O. Simpson-Orlebar; C. C. T. Tickell, M.V.O.; L. Fielding; C. P. H. T. Isolani, M.V.O., O.B.E.; M. St. E. Burton (Information); R. J. Carrick (Economic); G. E. Howe; P. Goodman (Scientific); C. B. Shakespeare (Economic); B. H. Wilcox, M.B.E. (Commercial); J. F. Taylor (Consular); J. White (Defence Supply).*

*2nd Secretaries, J. A. Fortescue; D. L. Stephens; E. G. Markee (Visa); A. R. Clark (Economic); J. A. Graham (Commercial); R. O. Barnes (Commercial); B. J. Stenning, M.B.E. (Commercial); K. Grant; H. S. Jamieson (Civil Aviation); W. J. A. Buckley (Administration).*

*3rd Secretary, Miss G. S. Butler.*  
*Defence and Air Attaché, Air Cdre. I. N. MacDougall, C.B.E., D.F.C.*

*Naval Attaché, Capt. P. A. Bence-Trower, R.N.*  
*Military Attaché, Brig. I. M. Christie.*  
*Asst. Naval Attaché, Cdr. G. A. G. Edleston, O.B.E., R.N.*

*Asst. Military Attaché, Maj. J. K. Chater, R.E.*  
*Asst. Air Attaché, Wing Cdr. R. J. Garlick.*  
*Chaplain of the British Embassy Church, Rev. R. J. W. Morris, O.B.E.*

## BRITISH CONSULAR OFFICES

There are British Consular Offices in Metropolitan France at Paris, Bordeaux, Boulogne, Calais, Cherbourg, Dieppe, Dunkirk, Le Havre, Lille, Lyons, Marseilles, Nice and Strasbourg.

## BRITISH CHAMBER OF COMMERCE

6 Rue Halévy, Paris 9

*President, P. T. Simpson-Jones.*

*Vice-Presidents, H. Start, C.B.E.; D. H. Goodchild.*

## BRITISH COUNCIL

Representative in Paris, E. W. F. Tomlin, C.B.E.,  
rue des Ecoles 36, Paris V.

There are a Regional Centre at Toulouse and  
British Council libraries at Paris, Bordeaux, Lille,  
Lyons and Strasbourg.

## THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 1958, envisaged the establishment of a French Community of States closely linked with common institutions. A number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally members of the French Community. The Community Institutions in fact never operated as envisaged. Nevertheless, with the exception of Guinea, which opted out of the Community in the 1958 referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements.

## Francophone Countries.

In the following countries French is either the official or national language or the language of instruction; where there is another national language the name of it is shown after the name of the country:—Algeria (*Arabic*); Belgium (*Flemish*); Burundi (*Kirundi*); Cambodia (*Khmer*); Cameroon (*English*); parts of Canada (in Quebec, parts of Ontario and New Brunswick) (*English*); Central African Republic (*Sangho*); Chad; Congo (Brazzaville); Congolese Republic; Dahomey; France; Gaboon; Guinea; Haiti (*Creole*); Ivory Coast; Laos (*Laotian*); Lebanon (*Arabic*); Luxembourg (*German and Letzeburgesch*); Madagascar (*Malagasy*); Mali; Morocco (*Arabic*); Mauritania (*Arabic*); Niger; Rwanda (*Kinyarwanda*); Senegal; Switzerland (1,000,000 French speaking); Togo; Tunisia (*Arabic*); Upper Volta; Vietnam (*Vietnamese*). French is also spoken in the Overseas Departments (see above).

Madagascar (République malgache).—See separate article.

## OTHER TERRITORIES

French Territory of the Afars and Issas.—Situating on the north-east coast of Africa, the Territory has an area of 9,000 sq. miles with a population (estimated, 1968) of about 110,000.

Formerly French Somaliland, the Territory was renamed on July 6, 1967, to emphasize the existence of the two main ethnic groups in the population. A renamed Chamber of Deputies succeeded the former territorial assembly to which a governing council is responsible for the administration of the territory. The French High Commissioner retains responsibility for foreign policy, defence, currency, credit, citizenship and law, other than traditional civil law. Capital,  $\Psi$  Jibouti (62,000).

Imports from the United Kingdom in 1968 were valued at £2,112,000; Exports to U.K., £207,000.

New Caledonia.—Area, 7,200 sq. miles. Population (1965), 92,000. Capital,  $\Psi$  Noumea (12,000) A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc.), the Huon Islands and Alofis). New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement. It is the world's third largest producer of nickel, after Canada and U.S.S.R.

Wallis and Futuna Islands.—Following a request from local kings and chiefs, it was decided by

referendum (Dec. 27, 1959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 9,500, mostly Polynesians.

French Polynesia.—Area, 2,500 sq. miles. Population (1967), 98,000. Capital,  $\Psi$  Papeete (15,220) in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-oo, etc., 500 sq. miles, population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raiavae, Rimatara and Rapa Island; and Maiao Island).

Comoro Archipelago.—Area, 800 sq. miles. Population (1968), 244,000. Capital, Dzaoudzi. Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean.

St. Pierre and Miquelon.—Area, 93 sq. miles. Population (1967), 5,000. Two small groups of Islands off the coast of Newfoundland.

## GABOON

(Republic of Gaboon)

(For MAP, see p. 836).

President, Albert-Bernard Bongo, assumed office December, 1967.

Gaboon lies on the Atlantic coast of Africa at the Equator and is flanked to the north by the Spanish territory of Rio Muni and the Cameroon Republic and on the east and south by the Republic of Congo. It has an area of 101,400 sq. miles and a population (estimated, 1967) of 473,000. Gaboon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

## Trade with U.K.

	1967	1968
Imports from U.K.....	£691,000	£781,000
Exports to U.K.....	2,641,000	2,502,000

CAPITAL.—Libreville (31,000).

FLAG.—Horizontal bands, green, yellow and blue.

NATIONAL DAY.—August 17.

British Ambassador, His Excellency Alan John Edden, C.M.G. (Resident at Yaoundé, Cameroon).

## GERMANY

■ Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863-1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the

\* Nazi historians referred to the National Socialist régime as *Drittes Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

**GERMANY BETWEEN THE TWO WARS.**—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to the National Assembly the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or Nazis) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Chancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934),

and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

**THE WAR OF 1939-1945.**—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating a war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark and Norway (April, 1940), Belgium, the Netherlands, Luxembourg and France (May, 1940). Norway capitulated on June 9, France sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Luftwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Germany joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxemburg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the

invader back almost to the Polish frontier, and the Western Allies after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

In 1962 the Federal Statistical Office reported that during the course of the war from 1939 to 1945, 593,000 persons were killed during allied air attacks on Germany and 403,000 dwellings were destroyed. 537,000 civilians were killed, some 15 per cent. children under 14, and 56,000 foreign civilians, members of the police and armed forces. In the area now covered by the Federal Republic persons injured numbered 486,000, including 16,000 foreigners and prisoners of war.

**THE POST WAR PERIOD.**—After the surrender of the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in March, 1948.

#### Federal Republic of Germany

President, Dr. Gustav W. Heinemann, born July 23, 1899, elected July 1, 1969, for five years.

#### CABINET

Federal Chancellor, Dr. Kurt Georg Kiesinger (C.D.U.).  
 Foreign Minister and Vice-Chancellor, Willy Brandt (S.P.D.).  
 Interior, Ernst Benda (C.D.U.).

 Counsellors, Dr. Thomas Knatz (Legal and Consular); Hans-Werner Graf Finck von Finkenstein (Press); Frau Dr. Brigitte Lohmeyer (Cultural).

NOTE.—Except where otherwise indicated statistical data on the Federal Republic of Germany include Berlin (West).

**Area and Population.**—The area of the Federal Republic is approximately 95,967 sq. miles. Total population of the Federal Republic on Dec. 31, 1968, was 58,322,000, excluding Western Berlin, compared with 43,008,300 in 1939. Distribution of the population among the Länder on Dec. 31, 1968, was:

Schleswig-Holstein .....	2,529,000
Hamburg .....	1,823,000
Lower Saxony .....	7,039,000
Bremen .....	754,000
North Rhine Westphalia .....	16,951,000
Hessen .....	5,333,000
Rhineland Palatinate .....	3,645,000

Berlin.—Klaus Schütz (Governing Mayor).  
 Bremen.—Hans Koschnick (Mayor).  
 Hamburg.—Prof. Dr. Herbert Weichmann (Mayor).  
 Hesse.—Dr. E. Georg-August Zinn.  
 Lower Saxony.—Dr. Georg Diederichs.  
 North Rhine-Westphalia.—Heinz Kühn.  
 Rhineland-Palatinate.—Dr. Helmut Kohl.  
 Saarland.—Dr. Franz-Josef Röder.  
 Schleswig-Holstein.—Dr. Helmut Lemke.

*Economic position.*—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1968 was estimated at DM. 528·8 milliard, an increase of DM. 43·7 milliard or 9·0 per cent. over 1967.

*Agriculture.*—In 1968 total area of farmland was 13,870,600 hectares of which 7,577,900 hectares were arable land. Forest areas cover 7,183,900 hectares. The 1968 harvest yielded 9,545,500 metric tons of bread grains, 9,236,000 metric tons of feeding grains and 19,195,700 metric tons of potatoes. The livestock population at the end of 1968 included 14,061,180 cattle, 263,588 horses, 829,810 sheep, 18,731,829 pigs and 91,865,764 fowl.

*Industrial Production.*—The index of industrial net production adjusted for irregularities of the calendar (1962=100) has developed in the Federal Republic, including Berlin, as follows:

	1966	1967	1968
Mining.....	95·8	90·0	93·4
Manufacturing industry.....	121·2	118·5	133·3
(i) Basic materials.....	129·2	132·7	151·6
(ii) Capital goods.....	117·3	109·1	122·7
(iii) Consumer goods.....	118·4	113·2	129·5
(iv) Foodstuffs.....	118·8	121·4	128·2
Power (electricity and gas)...	131·6	137·3	153·4
Building Industry.....	123·7	115·0	121·8

Total industry..... 120·3 117·4 131·2  
 Productivity of labour in industry (excluding electricity, gas and building industries) per man-hour: 1966, 127·9; 1967, 138·2, 1968, 150·1 per cent.

Some production figures are shown below (monthly averages):

	1967	1968
Passenger cars.....	170,236	211,286
Commercial vehicles.....	14,294	18,787

	Tons	
Sulphuric acid (SO <sub>3</sub> ).....	257,002	286,368
Chlorine.....	114,126	122,176
Artificial plastic material.....	219,054	271,292
Man-made fibres.....	41,295	51,857
Cotton yarn.....	20,915	21,215
Woollen yarn.....	5,871	6,577

58,652 new dwellings were completed in 1968 in the Federal Republic (1967, 572,400).

*Labour.*—Of 26,342,000 employed in 1968, 16,957,000 were men. The average number of unemployed was 323,480, of whom 235,149 were men (1967=459,489 and 335,102). In 1968, an average number of 1,018,858 foreign workers was employed in the Federal Republic. An average of 7,899,339 (1967=7,842,662) were employed in industry (establishments employing 10 and more persons)

*Vital Statistics.*—There were 16·1 live births per 1,000 inhabitants in the Federal Republic in 1968, compared with 19·5 per 1,000 for the same area in 1938. There was an excess of live births over deaths in 1968 of 3·9 per 1,000 and in 1938 of 8·0.

*Government.*—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948-49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 23, 1949. It provides for a President, elected for a five-year term, a Lower House, with a four-year term of office, elected by direct universal suffrage, and an Upper House composed of delegates of the Länder, without a fixed term of office.

The results of the elections held for the lower House (Bundestag) on September 19, 1965, were as follows:

Party	Numbers
Christian Democratic and Christian Social Unions.....	245
Social Democrats.....	202
Free Democrats.....	49

Total..... 496  
 with an additional 22 representatives of Berlin elected by the Berlin Chamber of Deputies (Christian Democrats, 6; Social Democrats, 15; Free Democrats, 1). The Christian Democratic and Christian Social Unions, having no absolute majority, form a coalition with the Social Democrats. The Free Democrats are the Parliamentary Opposition.

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the Länder governments in June, 1968, were:—

#### Ministers-President

Baden-Württemberg.—Dr. Hans Filbinger.  
 Bavaria.—Dr. Alfons Goppel.

	1967	1968
Coal mining.....	336,003	299,887
Iron and steel production...	327,331	322,223
Mechanical engineering.....	1,524,068	1,599,201
Chemicals.....	533,593	535,094
Textiles and clothing.....	860,699	855,625

*Finance.*—Under the Constitution of the Federal Republic of Germany, the Federal Government and the *Länder* are jointly entitled to the income and corporation tax. In 1968, 37 per cent. of the yield accrued to the Federal Government and 63 per cent. to the *Länder*. Customs and excise duties, other than the beer tax, and also the turnover tax accrue to the Federal Government, all other taxes (with the exception of local taxes, i.e. particularly taxes on land and buildings as well as the trade tax) to the *Länder*.

Preliminary figures of budgetary expenditure in 1969 are: Total expenditure DM.83,340,000,000 (1968, 76,072,000,000); Defence DM.19,347,000,000 (1968, 17,511,000,000); Social expenditure DM.24,473,000,000 (1968, 23,794,000,000); (about 29 per cent.); Agriculture and food, DM. 6,904,000,000 (1968, 6,154,000,000) (about 8 per cent.); Transport, DM. 6,184,000,000 (1968, 5,620,000,000).

*Currency.*—The currency of the Federal Republic is the *Deutsche Mark* of 100 *Pfennig*, the rate of exchange with sterling being DM. 9.60 = £1. Limited exchange fluctuations are permitted. (See also p. 83.)

*Foreign Trade.*—In 1968, imports were valued at DM. 81,179,199,000 (1968, 70,183,000,000); and exports at DM. 99,551,359,000; 21 per cent. of imports consisted of foodstuffs and 16.8 per cent. of industrial raw materials; 41.2 per cent. came from the Common Market countries; 15.6 per cent. from the E.F.T.A.\* and 12.3 per cent. from the United States and Canada. The Common Market countries took 37.5 per cent. of all exports, the E.F.T.A. 22.7 per cent. and the United States and Canada 12 per cent.

#### Trade with U.K.

	1967	1968
Imports from U.K....	£246,700,000	£323,303,000
Exports to U.K.....	338,921,000	436,936,000

*Communications.*—The state-owned railways of the Federal Republic measured 30,162 miles of which 7,269 miles were electrified, and the privately owned railways 4,152 miles, a total of 34,314 miles. In 1968 the railways handled 319,442,000 tons of goods and the inland waterways 214,438,465 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1968, 2,523 steam locomotives, 2,122 electric locomotives, 2,211 diesel locomotives, 18,671 passenger coaches, 868 rail buses and 275,689 goods waggons. Classified roads measure 161,181 miles. On Jan. 1, 1969, there were registered 12,045,700 cars, 1,068,100 commercial vehicles (incl. buses) and 1,372,700 tractors. Ocean-going shipping under the German flag in Dec., 1968, amounted to 6,545,000 tons gross (2,693 ships). Civil aircraft in service at the same date totalled 130 aircraft.

*Social Welfare.*—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the second and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a decent standard of living.

*Law and Justice.*—Judicial authority is exercised

† Common Market: W. Germany, Belgium and Luxemburg, France, Italy, Netherlands.

\* E.F.T.A. (European Free Trade Association): Austria, Denmark, Norway, Portugal, Sweden, Switzerland, U.K.

by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

*Language and Literature.*—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1800–1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). In 1968 there were 1,308 daily papers.

*Education.*—School attendance is compulsory for all children between the ages of 6 and 14 (or 15). Preliminary figures showed that in May, 1967, there were in the Federal Republic 26,913 primary schools (*Volkschulen*) with 160,332 teachers and 5,412,668 pupils. Intermediate schools (*Realschulen*) numbered 1,590 with 24,806 teachers and 656,904 pupils. The number of secondary schools (*Hohere Schulen*) was 1,894 with 52,545 teachers and 1,113,933 pupils. The number of unified schools combining primary and secondary education (*Schulen mit neuorganisierten Schulaufbau*) in Hamburg, Bremen and Berlin (West) was 926 with 18,400 teachers and 445,743 pupils; the number of *Freie Waldorff-Schulen* was 25, with 763 teachers and 13,271 pupils.

There were also 1,834 special schools (*Sonderschulen*) for retarded, physically and mentally handicapped and socially maladjusted children in the Federal Republic with 12,650 teachers and 228,200 pupils.

The secondary school leaving examination (*Abitur*) entitles the holder to a place of study at a university or another institution of higher education. The number of examinations passed in 1967 was 63,202.

Children below the age of 18 who are not attending an intermediate or secondary school are obliged to take a three-year course (part-time) at a vocational school. In November, 1967, there were 1,807 part-time vocational schools (*Berufsschulen*) with 24,819 teachers and 1,780,205 pupils, 2,364 full-time vocational schools (*Berufsfachschulen*) with 8,586 teachers and 197,356 pupils and 3,143 advanced vocational schools (*Fachschulen*), including 147 engineering schools (*Ingenieurschulen*), with 11,834 teachers and 221,430 students. [State expenditure for primary schools per annum amounted to DM 1,092 per pupil, for intermediate schools DM 1,508, and for grammar schools, DM 2,366. State expenditure per pupil for part-time vocational, full-time vocational and advanced vocational schools per annum amounted to DM. 966.] In the summer term 1968 there were 22 universities (230,058 students; 11,039 on leave), 9 technical universities (*Technische Hochschulen*) (54,525 students; 2,069 on leave), 21 other scientific colleges (7,312 students; 170 on leave), 27 colleges of fine arts and music (*Kunst- und Musikhochschulen*) (8,558 students; 245 on leave), 1 college for physical education (*Sporthochschule*) (733 students; 10 on leave); a total of 277,254 German and 23,932 foreign students. In the winter term 1967–68 there were also 118 teachers' training colleges (*Padagogische Hochschulen und entsprechende*

*Einrichtungen*) (54,794 students). The largest universities are in Munich, Cologne, Hamburg, West Berlin, Munster (Westf.), Frankfurt, Bonn, Freiburg and Heidelberg. There were 1,242 adult education centres. The attendance figure for 1968 was 4,159,400.

**Religion.**—In 1966 there were 29,079,000 Protestants in the Republic, 27,816,000 Roman Catholics and (Dec., 1967), 26,241 Jews.

**CAPITAL, Bonn**, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 137,986 (Dec. 31, 1968).

**FLAG.**—Horizontal bars of black, red and gold.

#### BRITISH EMBASSY

Friedrich-Ebert Allee 77, Bonn

*Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Roger William Jackling, K.C.M.G.* (1968).....£8,600

*Ministers, F. B. Richards, C.M.G., D.S.C.; S. L. Edwards, C.M.G.*

*Counsellors, R. Hanbury-Tenison (Head of Chancery); D. W. Hennessy, O.B.E. (Administration); P. J. E. Male, C.M.G., M.C. (Information); H. T. A. Overton (Economic and Agricultural); J. L. Taylor (Economic and Commercial); A. L. Pope, C.V.O., O.B.E.; W. Steedman, C.B.E.; J. H. McEnery (Defence Supply); E. C. M. Cullingford, C.M.G. (Labour); W. F. G. Drury (Scientific).*

Cumberbeach (Defence Supply); J. O. S. Wilde (Defence Supply); Dr. K. C. Wright (Economic).*

*2nd Secretaries, Miss D. A. Garton, M.B.E. (Information); W. H. Hill (Commercial); M. S. M. Shea; Miss R. Barnes (Information); Miss P. Stewart-Bam; B. E. White (Defence Supply).*

*3rd Secretaries, A. Ford; Miss S. J. Lambert. Defence and Military Attaché, Brig. M. J. P. O'Cock, M.C.*

*Asst. Defence Attaché, Major L. G. Swan, R.A.*

*Naval Attaché, Capt. J. M. H. Cox, R.N.*

*Asst. Naval Attaché, M. B. Lanyon, O.B.E., R.N.*

*Air Attaché, Air Cdr. I. R. Campbell, C.B.E., A.F.C.*

*Head of Visa Section (Düsseldorf), A. E. Higgs.*

*Chaplain, Rev. P. Durnford.*

*Accountant, A. W. H. Rumsey, M.B.E.*

There are British Consulates-General at Berlin, Hamburg, Hanover, Düsseldorf, Frankfurt, Munich and Stuttgart; and a British Vice-Consulate at Bremen.

#### BRITISH COUNCIL

*Representative J. McDonough, O.B.E., Hahnenstrasse 6, Cologne. There are Regional Centres at Berlin, Hamburg, Frankfurt and Munich and British Council libraries at Berlin, Cologne, Frankfurt and Munich.*

#### BERLIN

*G.O.C. British Sector, Maj.-Gen. F. J. C. Bowes-Lyon, O.B.E., M.C.*

*Deputy Commandant (Minister), R. G. A. Etherington-Smith, C.M.G.*

*Counsellor, P. H. Laurence, M.C. (Political Adviser.)*

#### EASTERN GERMANY

(For MAP, see p. 864)

**Area and Population.**—The territory of East Germany, an area 41,380 sq. miles in extent, is that of the five former German *länder* of Brandenburg, Mecklenburg, Saxony, Saxony-Anhalt and Thuringia and includes Eastern Berlin, the walled-off

former Russian zone of the city. The population of Eastern Germany was officially estimated at 16,001,000 in June, 1967. The former *länder* were abolished in July, 1952, and divided into the 14 *Bezirke* (regions) of Potsdam, Cottbus and Frankfurt (formerly Brandenburg); Rostock, Schwerin and Neubrandenburg (formerly Mecklenburg); Karlmarxstadt, Dresden and Leipzig (formerly Saxony); Halle and Magdeburg (formerly Saxony-Anhalt); Erfurt, Gera and Guhl (formerly Thuringia).

**Government.**—The Constitution of the "German Democratic Republic" in force from Oct. 7, 1949, came to an end with the approval of a new "socialist draft constitution" by the East German *Volkskammer* (People's Chamber) on March 26, 1968. The supreme organ of State power is the *Volkskammer*, which has power to elect and dismiss the State Council, the Council of Ministers, the Chairman of the National Defence Council, the Supreme Court and the Procurator-General. The State Council is, between sessions, responsible to the *Volkskammer* for the execution of all its laws and decisions and must convene the Chamber on the demand of one-third of the Deputies. Decrees and decisions of the State Council confirmed by the Chamber have the force of law. The executive, with collective responsibility, is the *Council of Ministers*. Among items of the 1949 Constitution omitted from that of 1968 were the former rights of the trade unions to strike, of citizens to emigrate, and of newspapers to publish without censorship.

The German Democratic Republic is not recognized by the governments of Western countries.

The present *Volkskammer* is that elected on July 2, 1967. The office of President having been abolished on Sept. 12, 1960, presidential powers are exercised by the Council of State.

#### Council of State

*Chairman, Herr Walter Ulbricht.*

*Deputy Chairmen, Herr Willi Stoph; Prof. Johannes Dieckmann; Herr Gerald Götting; Dr. Heinrich Homann; Dr. Manfred Gerlach; Herr Hans Rietz.*

*Members, Prof. E. Correns; Herr F. Ebert; Herr E. Grütznier; Frau B. Hanke; Prof. Lieslott Herfurth; Herr F. Kind; Frau Else Merke; Dr. G. Mittag; Frau A. Neumann; Herr K. Rieke; Prof. H. Rodenberg; Herr H.-H. Simon; Herr K. Sorgenicht; Frau M. Schneider; Herr H. Schumann; Herr P. Strauss.*

#### Council of Ministers

*Prime Minister, Herr Willi Stoph.*

*1st Deputy Prime Minister, Herr Alfred Neumann.*  
Total membership of the Council is 38, including 10 other Deputy Prime Ministers, 13 holding principal portfolios and 13 holding portfolios of a mainly technical nature.

**GERMAN SOCIALIST UNITY (= Communist) PARTY**  
*Politbureau of the Central Committee, F. Ebert; P. Fröhlich; G. Grüneberg; K. Hager; E. Honecker; H. Matern; G. Mittag; E. Mückenberger; A. Neumann; A. Norden; H. Sindermann; W. Stoph; W. Ulbricht; P. Verner; H. Warnke (full members); H. Axen; G. Ewald; W. Halbritter; W. Jarowinsky; G. Kleiber; M. Müller (alternate members).*

*Secretariat of the Central Committee, Walter Ulbricht (1st); H. Axen; G. Grüneberg; K. Hager; E. Honecker; W. Jarowinsky; W. Lamberg; G. Mittag; A. Norden; P. Verner.*

**Economic Position.**—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore.

Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The U.S.S.R. claimed reparations from Germany to a value of \$ (1938) 10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone paid reparations from current production to the U.S.S.R. until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large steel plants have been erected at Füssenberg/Oder and at Calbe, and crude steel production is now greater than before the war.

The East German Government announced on April 14, 1960, that collectivization of agriculture in East Germany had been completed, the only exceptions being a few small areas unsuitable for large-scale farming.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£13,587,000	£11,682,000
Exports to U.K. . . . .	12,088,000	17,605,000

Principal cities and towns: Dresden (467,966); Leipzig (607,655); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862), and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

### GREECE

(Hellas)

King of the Hellenes, Constantine XIII, born June 2, 1940; *acceded* (on the death of his father King Paul), March 6, 1964; *married* Sept. 18, 1964, H.R.H. Princess Anne-Marie of Denmark (born Aug. 30, 1946); and has issue:—  
Crown Prince Paul, born May 20, 1967; H.R.H. Princess Alexia, born July 10, 1965.

#### CABINET

Prime Minister and Minister of Defence and of Education, George Papadopoulos.

1st Deputy Prime Minister and Minister of the Interior, Stylianos Patakos.

2nd Deputy Prime Minister, Demetrios Patilis.

Co-ordination, Nikolaos Makarezos.

Education and Religion, Theofylaktos Papaconstantinou.

Finance, Adamandios Androutopoulos.

Commerce, Epaminondas Tsellos.

Industry, Constantine Kypriaios.

Public Works, Constantine Papadimitriou.

Communications, George Vallis.

Agriculture, Ioannis Papavlahopoulos.

Social Services, Prof. Loukas Patras.

Merchant Marine, Prof. Ioannis Holevas.

Justice, Prof. Elias Kyriakopoulos.

Labour, Apostolos Voyadzis.

Public Order, Panayotis Tzevelakos.

Northern Greece, Alexandros Matthaiou.

Deputy Ministers, Ioannis Agathangelou (Prime Minister's Office); Emmanuel Phtenakis (Co-ordination).

#### ROYAL GREEK EMBASSY IN LONDON

51 Upper Brook Street, W.1

[01-629-0694]

Ambassador Extraordinary and Plenipotentiary, His Excellency Lt.-Gen. John Sorokos (1969).

Minister-Counsellor, M. Eustace Lagacos.

Counsellors, E. A. Antonopoulos (Consular); D.

Manolatos; E. Bacarinos (Commercial); C.

Roussen (Press and Information).

Naval, Military and Air Attaché, Capt. N. Stathakis.

2nd Secretary, E. Stoforopoulos.

3rd Secretary, P. Apostolides (Consular).

Shipping Attaché, Capt. Eleftherios Photiadis.

Asst. Shipping Attaché, Cdr. T. Tsalas.

Attachés (Press and Information), A. Kovatsis; G.

Assimacopoulos; C. Tsikos.

Attachés, C. Lambropoulos; J. Villiotis, M.V.O.;

Mme. H. Koutsomitopoulou.

Asst. Commercial Attaché (Agriculture), C. Kon-

doyiannis.

Commercial Secretary, P. Karoussos.

Consulate General, Department of Information and

Commercial Department, 49 Upper Brook Street,

W.1.

There are Honorary Consulates at Birmingham,

Bradford, Bristol, Falmouth, Hull, Immingham,

Leeds, Liverpool, Newcastle, Plymouth, Portsmouth,

Southampton, Cardiff, Swansea, Edinburgh and Glas-

gow, and at Belfast.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian and Mediterranean seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. A census held throughout the country on March 19, 1961, recorded a population of 8,388,553; (estimated, Dec., 1967), 8,778,000.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos and the island of Thasos), Thrace (including the island of Samothrace), Epirus, Thessaly, Continental Greece (which includes the island of Euboea and the Sporades, or "scattered islands," of which the largest is Skyros), the Peloponnese (or Morea), the Dodecanese or Southern Sporades (12 islands occupied by Italy in 1912 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the Cyclades (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the Ionian Islands

(Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the *Aegean Islands* (Chios, Lesbos, Limnos and Samos). In Crete there was for over 1,500 years (3000 to 1400 B.C.) ■ flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

**Government.**—Four successive Governments of the National Radical Union Party under M. Karamanlis held office from October, 1955, to June, 1963, when M. Karamanlis resigned after King Paul had refused to accept his advice that the state visit to Britain should be postponed in view of incidents in London. A Government of the Centre Union Party under M. Papandreou was returned at the elections of November, 1963, but did not have an overall majority in Parliament. At the elections of February 16, 1964, the Centre Union was returned to power with ■ comfortable majority. After ■ disagreement with the King, however, M. Papandreou resigned in July, 1965. A Cabinet formed in September, 1965, by M. Stephanopoulos consisted of Centre Union deputies who had broken with M. Papandreou and was dependent for its majority on the tolerance of the National Radical Union.

In December, 1966, a caretaker government was appointed and the way seemed clear for elections to be held in May, 1967. A military *coup* on April 21, 1967, however, suspended parliamentary government and, following an unsuccessful royal counter *coup* on December 13, 1967, the King went into voluntary exile. He now lives in Rome. The Government has partially applied a new constitution approved in a national referendum in Sept., 1968, ■ ■ first step towards ■ return to parliamentary rule. Martial law was still in force in the autumn of 1969 and no date for parliamentary elections had then been set.

**Defence.**—The Navy has 65 major war vessels, almost all of U.S. origin, and is mainly ■ fleet of landing ships supported by destroyers and other escort vessels. The strength of the Army is 116,000. The Air Force consists of 28,000 men, eleven offensive squadrons, two transport squadrons and one helicopter, together with the necessary support, training and maintenance organizations.

**Communications.**—The 2,650 kilometres of Greek railways are State owned with the exception of the Athens-Piraeus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Greek roads total somewhat over 50,000 kilometres, of which about 30 per cent. are classified as national highways and 30,000 km. are classified as provincial roads.

In March, 1968, the Greek mercantile fleet numbered 1,872 ships with a total tonnage of 8,185,864 tons gross. No exact figures are available for Greek-owned ships registered under foreign flags but there has been a significant increase over the 1966 figures of 1,012 ships (12,039,867 tons gross). Athens has direct airline links with most countries in Europe and the Middle East.

**Religion.**—Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Œcumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy

Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Œcumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Œcumenical Patriarch.

**Education** is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are three Universities, Athens, Salonika (which also has departments of Philosophy and Mathematics at Ioannina) and Patras. There are several other institutes of higher learning, mostly in Athens.

**Language and Literature.**—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevousa*, ■ conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748-1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854-1929). The poets Solomos, Palamas, Cavafis, Sikelianos and Seferis have won a European reputation.

**Production.**—Though there has in recent years been a substantial measure of industrialization, Greece is still predominantly an agricultural country. Agriculture employs about half the working population, the most important product and export being tobacco, which still accounts for about one-third of the value of total visible exports from Greece. Since the war the production of wheat, cotton and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, almond, pomegranate and currant-vine, and considerable efforts have lately been made to develop exports of Greek fresh fruit and vegetables as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are bauxite, iron ore, iron pyrites, manganese, magnesite, chrome, lead, zinc and emery, and prospecting for petroleum is being carried on. Oil refineries are in operation near Athens and at Salonika, where there is also ■ petro-chemical plant. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. In recent years new factories have been opened for the production of aluminium, nickel, iron and steel products, tyres, chemicals fertilizers and sugar (from locally-grown beet). Food processing and ancillary industries have also grown up throughout the country. The development of the country's electric power resources, irrigation and land reclamation schemes, and the exploitation of Greece's lignite resources for fuel and industrial purposes are also being carried out, and a television network is planned for the near future. Efforts are also being made to develop tourism more rapidly. Greece continues to receive limited aid from the United States mainly in the form of military equipment and foodstuffs. She also receives grants from NATO countries to assist her defence programme and loans from member countries of the O.E.C.D. consortium.

**Currency.**—The Greek *drachma* has an official exchange rate of 72 = £1 sterling and 30 = U.S. 1\$.

(See also p. 83.)

## TRADE

	1967	1968
Total imports....	£409,000,000	£380,000,000
Total exports....	161,000,000	195,000,000

## Trade with U.K.

	1967	1968
Imports from U.K....	£33,154,000	£39,890,000
Exports to U.K.....	12,653,000	12,653,000

**CAPITAL**, Athens. Population (including  $\Psi$  Piræus and suburbs), 1,852,709 (1961 Census). Other large towns are: Salonika (373,635);  $\Psi$  Patras (95,364),  $\Psi$  Volos (67,424); Larissa (55,391); and  $\Psi$  Cavalla (44,517); in Crete— $\Psi$  Heraklion or Candia (63,458),  $\Psi$  Cauea (38,467), and  $\Psi$  Rethymon (14,999); in the Ionian Islands— $\Psi$  Corfu (26,991); in the Dodecanese— $\Psi$  Rhodes (27,393); in the Cyclades— $\Psi$  Syros Hermoupolis (14,402); in Lesbos— $\Psi$  Mitylene (25,758); in Chios— $\Psi$  Chios (24,053).

**FLAG**.—9 horizontal bands, alternately blue and white, with white cross, on blue ground, in corner.

**NATIONAL DAY**: March 25 (Independence Day).

## BRITISH EMBASSY

(Ploutarchou 1, Athens)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Michael (Norman Francis) Stewart, K.C.M.G., O.B.E. (1967)..... £6,300  
Counsellors, D. S. L. Dodson, C.M.G., M.C. (Consul-General); S. Y. Dawbarn (Commercial).

1st Secretaries, P. L. O'Keefe; J. D. M. Blyth; R. J. Langridge (Information); R. Burns (Labour).

and Secretaries, A. G. R. Butler (Consul); A. M. Goodenough; C. O. Quinn (Admin.)

3rd Secretary, A. P. Dow (Commercial).

Naval and Air A.taché. Capt L. C. Darling, O.B.E., R.N.

Defence and Military Attaché, Brig. P. J. Kent, O.B.E.  
Attaches, D. W. Fitzwilliam; E. C. Duckworth (M.B.E. (Commercial)); E. Tragoutsis, M.B.E.; H. Byatt (Press).

Embassy Chaplain, Rev. Canon C. S. Crowson.

Hon. Attaché, P. M. Fraser, M.C., F.B.A. (Director, British School of Archaeology).

## BRITISH CONSULAR OFFICES

There are British Consular Offices at Athens, Salonika, Piræus, Corfu and Samos.

## BRITISH COUNCIL

Representative, W. I. Ball, M.B.E., 36 Vassilis Paulau, 17 Kolonaki Square, Athens 138 (Cultural Attaché). There is a Regional Centre at Salonika and British Council libraries at both centres.

## GUATEMALA

(República de Guatemala)

President, Dr. Julio Cesar Mendez Montenegro, elected for 4 years March 6, 1966; assumed office, July 1, 1966.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long. from 88° 12' 49' to 91° 13' 43', and has an area of 42,042 square miles, and a population (estimated, 1968) of 4,864,000 (for MAP, see p. 875). The constitutionally elected president, Gen. Miguel Ydigoras Fuentes, who had taken office on March 3, 1958, was overthrown on March 31, 1963, by the Army, which handed executive and legislative powers to the Minister of Defence, Col. Enrique Peralta Azurdia. Important changes were included in a new constitution promulgated on Sept. 15, 1965, including the reduction of the presidential term from 6 to 4 years and the establishment of a Council of State under the chairmanship of a Vice-President. Elections for a new Congress and

for President and Vice-President took place on March 6, 1966. Dr. Mendez failed to obtain an absolute majority under the Constitution but was duly chosen as President at the first meeting of the new Congress on May 5.

The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec. 1917. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief  $\Psi$  seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Matias de Gálvez (formerly Santo Tomás) and Puerto Barrios on the Atlantic side.

**Language and Literature**.—Spanish is the language of the country, and since the establishment of the University in the capital, education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

**Finance**.—Revenue and expenditure balanced at Quetzales 178,000,000 in 1968, compared with Quetzales 190,600,000 in 1967.

At par a Quetzal = \$1 U.S. (See also p. 83.)

## TRADE

	1965	1966
	Quetzales	Quetzales
Imports (c.i.f.).....	229,300,000	207,000,000
Exports (f.o.b.).....	185,800,000	226,000,000

## Trade with U.K.

	1967	1968
Imports from U.K....	£3,045,000	£4,022,000
Exports to U.K.....	762,000	1,047,000

The principal export is coffee, other articles being bananas, cotton, *chicle* (chewing gum), essential oils, zinc and lead. The chief imports are textiles, petroleum, vehicles, machinery and foodstuffs.

**CAPITAL**, Guatemala. Pop. (1964), 572,900. Quezaltenango (second city of the Republic), has a pop. of 38,400. Other towns are  $\Psi$  Puerto Barrios (32,100), Mazatenango (32,400), and Antigua (22,000).

**FLAG**.—Three vertical bands, blue, white, blue; coat of arms on white stripe.

## BRITISH EMBASSY

(Diplomatic relations suspended, July 31, 1963.)

## GUINEA

(Republic of Guinea)

President, Ahmed Sékou Touré, elected for a term of 7 years, January, 1961; re-elected, 1968.  
President of National Assembly, Léon Maka.

## CABINET

Minister of External Affairs, El Hadj Diallo Saifoulaye.

Economic Affairs, Dr. Louis Lansana Beavogui.

Interior, Gen. Diane Lansana.

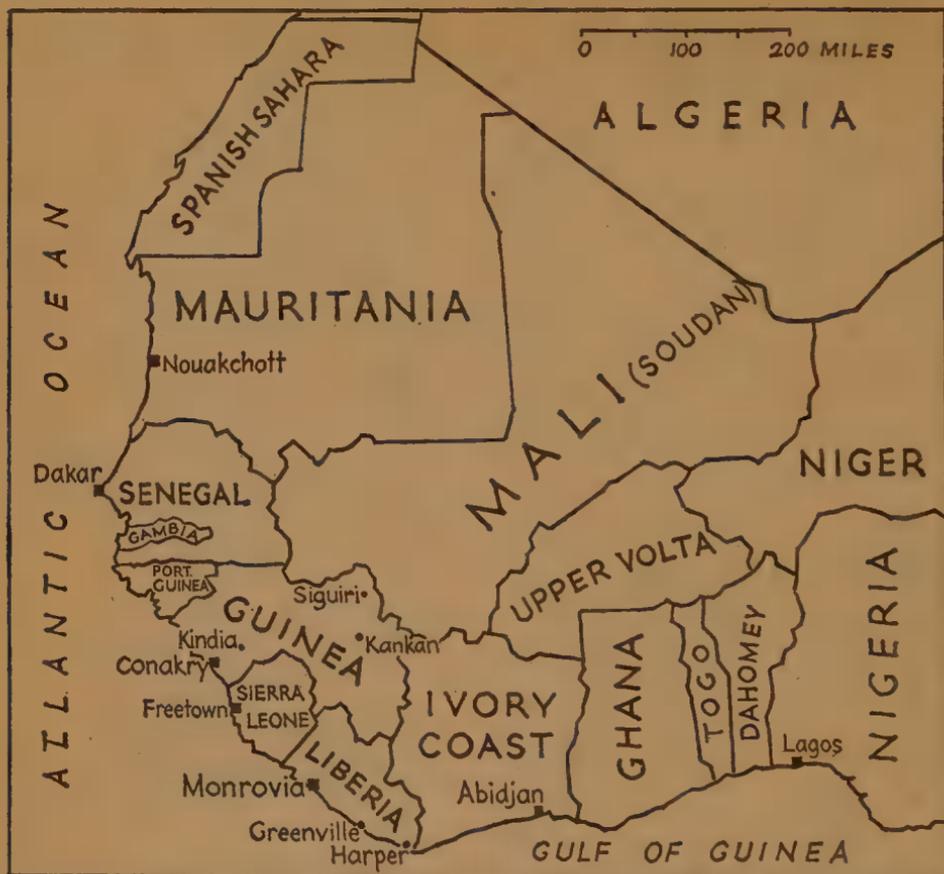

Finance, Ismael Touré.

Trade Exchanges, Dr. Touré Mamouna.

Social Affairs, Kéita N'Famara.

15 Secretaries of State and 4 Ministers-Delegate for the regions (Forestral, Upper, Middle and Maritime Guinea) were also appointed in January, 1968.

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Portuguese Guinea and Sierra Leone and in the interior is adjacent to Senegal, Mali, Ivory Coast, Liberia and Sierra Leone (see below). Area, 96,865 sq. miles. The population was estimated in July,

1967 at 3,702,000, mostly the Fullah, Malinké and Soussou tribes. It is estimated that there are about 2,000 Europeans in the country.

**Government.**—Guinea was separated from Senegal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. M. Sékou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, 1961 and re-elected in 1968. General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the *Guinea franc* (at par with the *franc C.F.A.*). This led to the rupture of commercial relations with France, hitherto her most important supplier and purchaser. Guinea is in receipt of economic aid and technical assistance from a number of countries, including the United States, Federal Republic of Germany, Yugoslavia, the Soviet Union and China. The Government's foreign policy is one of "positive neutralism" and non-alignment. In May, 1963, Guinea signed agreements with France covering *inter alia* the settlement of Governmental claims and technical co-operation. Diplomatic relations with U.K., suspended in December, 1965, were resumed on Feb. 20, 1968.

**Production, etc.**—The principal products of Guinea are alumina, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. In the mountains in the hinterland of Guinea (Fouta Djalon, 4,970 feet), where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) are worked and alumina is produced for export. Bauxite has been worked and exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on.

There are ■ British-built cotton mill and ■ Chinese-built cigarette and match factory.

**CAPITAL.**— $\Psi$  Conakry (120,000). Other towns are Kankan (29,000), which is connected with Conakry by a railway, Kindia (25,000), N'Zérékoré, Mamou, Siguirri and Labé.

**FLAG.**—Three vertical stripes of red, yellow and green.

**NATIONAL DAY.**—October 2 (Anniversary of Proclamation of Independence).

**BRITISH EMBASSY**  
Conakry.

**HAITI**

(Républiqué d'Haiti)

*President, Dr. François Duvalier, installed Oct. 22, 1957; re-installed for life, June 22, 1964.*

**EMBASSY AND CONSULATE**

*Office: ■■ Hans Road, S.W.3.; Residence: 69 Cadogan Square, S.W.1.*

[01-589-4443/4]

*Chargé d'Affaires, Delorme Méhu.*

The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic, including off-shore islands, is about 10,700 sq. miles with a population (estimated, 1968) of 4,674,000. The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood. About 250 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Domingue from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also ■ former negro slave, who, on January 1, 1804, declared the former French colony to be ■ independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following ■ period of political upheaval, the country ■ occupied by

a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The six-year term of General Magloire having ended in December 1956, he attempted to stay in power for a further period but was forced to resign and go into exile. A period of political upheaval followed and for many months there was no effective government. A military junta took over in June, 1957, and elections were held in September, following which Dr. Duvalier was installed ■ the new President of the Republic. He began a second term in 1961 and in May, 1964, a new constitution granting absolute power to the President was adopted by the National Assembly. Dr. Duvalier was re-elected as life President on June 15, 1964, following organized demonstrations and a "national referendum".

**Production, Industry, etc.**—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of productivity. The main project is ■ scheme for the irrigation of more than 70,000 acres of the Artibonite valley.

The principal products are coffee, sisal, sugar, essential oils, bananas, cocoa and cotton. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite began in 1957 and production of copper in the Terre Neuve area started in 1960. Industry is still on ■ small scale. The tourist trade expanded until 1956, since when it has fallen off owing to political upheavals. With the establishment of ■ National Tourist Office, in July, 1964, fresh efforts are being made to re-activate tourism which could make ■ important contribution to revenue. The country is one of the most beautiful in the Caribbean.

**Communications.**—There are very few asphalted roads and internal communications are very bad. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army. The principal towns and villages are connected by telephone and/or telegraph. Much of the internal telephone and telegraph system is permanently out of order. The reinstallation which was being carried out by ■ British firm was stopped in 1957 and has not been resumed. External telegraph, telephone and postal services are normal. There are several commercial radio stations and ■ television station at Port-au-Prince.

Air services by Pan-American World Airways and Air France are operated 3 times weekly, and there are passenger sailings every 10 days (approx.) for New York by the Grace Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. (Air mail U.K./Port-au-Prince, 4-7 days.)

**Climate.**—The climate is tropical with comparatively little difference in the temperatures between the summer (March-Oct.) and the winter (Nov.-Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

**Language and Literature.**—French is the language of the government and the press, but it is only understood by the educated minority. The usual language of the people is Creole. Education ■ free but estimates of illiteracy are as high as 90 per cent. There are 3 French daily newspapers

and several weekly papers including ■ in English. The total circulation is very small.

*Finance.*—The International Monetary Fund has granted Haiti a stand-by credit of \$U.S.4,000,000 renewable annually.

	1963-64*	1964-65*
	\$U.S.	\$U.S.

(Republica de Honduras)

*President*, General de Brigada Don Oswaldo Lopez Arellano; assumed office June 6, 1965.

#### HONDURAS EMBASSY AND CONSULATE

104 Great Portland Street, W.1.  
[01-580-6103]

*Ambassador* (vacant).

*1st Secretary* (Chargé d'Affaires), Señor Lic. Carlos Lopez Contreras.

*2nd Secretary*, Sr. Ramon Humberto España Nini. *Consulate*, 48 George Street, W.1 [01-486-4880].

There is a Consular Office at Birmingham.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' west, with ■ seaboard of about 400 miles on the Caribbean Sea and ■ outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains ■ total area of approximately 43,278 square miles and a population of 1,884,765 (Census of 1961); estimated, 1969, 2,535,000 of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras. Most of the soil is poor and acid, except for a few areas along the North coast and in the interior. Rainfall is seasonal, May to October being wet and November to April dry. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

On October 3, 1963, the Armed Forces overthrew the constitutional Government and established a Military Government with the Commander-in-Chief as its head. Elections for a constituent assembly took place in February, 1965, resulting in ■ victory for the Nationalist Party who elected the Head of Government as Constitutional President.

The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, tobacco, beans, maize, rice, cotton, sugar cane, cement and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is also ■ timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but only a small portion is at present exploited owing to transport difficulties.

There are about 730 miles of railway in operation, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 2,260, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 33 unpretentious airports and two international airports in use in Honduras. A new international airport suitable for jet aircraft has been built near San Pedro Sula. There are numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and 3 domestic air services (SAHSA, Aero Servicios and LANSA). There are 1,646 miles of telephone lines, 5,324 miles of telegraph lines and 488 post-offices.

ψ The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated ■ Tiger Island in the Gulf of Fonseca, on the Pacific side.

*Language and Literature.*—The language of the country is Spanish. Primary and secondary education is free, primary education being compulsory, and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

Asst. Military and Air Attaché, Major Janos G. Tóth. Commercial Attaché, M. István Mohácsi, 46 Eaton Place, S.W.1 [01-235-8767].

Area and Population.—The area of Hungary may be stated as approximately 36,000 sq. miles with a population (Jan. 1, 1968) of 10,273,000.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939-45 War on the side of Germany in 1941. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

For the first four years after the liberation, Hungary was governed by a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties. During this time land reform was carried out, the great landowners being dispossessed and their estates partitioned among peasants; mines, heavy industry, banks and schools were nationalized. By 1949 the Communists, under the leadership of Mr. Rákosi, having compelled the Social Democrat Party to merge with them, and having disrupted the peasant parties, had succeeded in gaining a monopoly of power. Elections in that year, in which candidates for the National Assembly were drawn from a single list, resulted in 95.6 per cent. of the votes cast being obtained by the Communist-dominated People's Front. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been "socialized."

In mid-1953 Mr. Imre Nagy replaced Mr. Rákosi as Prime Minister, though the latter continued to hold his post as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry; but in April, 1955, Mr. Rákosi succeeded in turning the tables on his rival who was removed from his position as Prime Minister and subsequently expelled from the Party. But after the 20th Congress of the Soviet Communist Party, opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerő, who

had been one of his closest associates. The period from July to the outbreak of the national revolution on Oct. 23, 1956, was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerő's successor as First Secretary of the Party, was announced. The trial and execution of Imre Nagy and three of his associates was announced on June 17, 1958. Dr. Ferenc Münnich succeeded as President of the Council of Ministers on Jan. 27, 1958, and held office until Sept. 13, 1961, being replaced by Mr. Kádár. Several other Ministers were replaced at the same time. Mr. Kádár relinquished the post of President of the Council of Ministers in June, 1965, and was succeeded by Mr. Kállai. In April, 1967, Mr. Fock replaced Mr. Kállai as Prime Minister and two new Deputy Prime Ministers were appointed. Mr. Kádár continues as First Secretary of the Hungarian Socialist Workers' Party.

Production, Industry, etc.—Though industrialization has made considerable progress in the last decade, agriculture still occupies an important place in the Hungarian economy and 58 per cent. of the total area of the country is arable land. 14.2 per cent. of this arable land is owned by state farms and 80.3 per cent. by co-operative farms. Production of the most important crops in 1966 was as follows (1,000 tons): Wheat, 2,192; rye, 242; barley, 916; maize, 3,907; rice, 31; oats, 72; potatoes, 2,433; sugar beet, 3,570; sunflower seed, 102; green maize, 1,333; silage maize, 3,429; lucerne, 1,368.

Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, considerable deposits of natural gas (some not yet under full exploitation), some iron ore and oil. Output figures in 1966: coal, 30,348 tons; bauxite, 1,429,000 tons; steel, 2,649,000 tons; crude oil, 1,706,000 tons; cement, 2,610 tons. Natural gas production reached 1,900,000,000 cu. metres in 1967.

The output of raw materials and general industrial production were sharply reduced by the revolution of Oct., 1956, but all the ground then lost has since been made up and industrial production rose by 9 per cent. in 1967. This increase exceeded the planned rise in all fields except agriculture. A new system of economic management was introduced on Jan. 1, 1968, which provides for greater decentralization, profitability and profit-sharing.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18).

In the academic year 1966-67 there were 89,544 students at institutions of higher learning, 37,734 at secondary schools and 1,380,286 at general schools.

**Language and Literature.**—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800-1855), Sándor Petöfi (1823-1849), János Arany (1817-1882), Endre Ady (1877-1918), Attila József (1905-1937), Mihály Babits (1883-1941) and Dezsö Kosztolányi (1885-1936).

**Finance.**—The budget estimates for the year 1968-69 were: Revenue, Forints 135,600,000,000; Expenditure, Forints 137,000,000,000. The Forint (of 100 Filler) has an official exchange value of 28.18 Forints = £1. The tourist exchange rate is 71.93 Forints = £1.

**Foreign Affairs,** Emil Jónsson (1965).

## EMBASSY IN LONDON

1 Eaton Terrace, S.W.1

[01-730-5131-2]

**Ambassador Extraordinary and Plenipotentiary,** His Excellency Gudmundur Gudmundsson, K.B.E. (1965)

**Counsellor,** M. Eiríkur Benediktz.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with ■ estimated area of 40,500 square miles, or about one-sixth greater than that of Ireland. The population was 201,975 on Jan. 1, 1969.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries ■ form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During

the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to ■ decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of seven Ministers, responsible to the *Althing*, a Parliamentary assembly of 60 members. The present government, elected in June, 1967, is ■ coalition of Conservatives and Social Democrats, with the Progressive and Communist parties forming the Opposition.

Iceland lives very largely by her catching and export of fish, and this is held to justify an extension of exclusive fishery limits round her coast to ■ greater extent than that hitherto sanctioned by international law. The extended Icelandic limits were in dispute between 1952 and 1961, Iceland claiming the right to a 12-mile fishery limit. After lengthy negotiation between the Icelandic and British Governments, the dispute was settled by an Exchange of Notes on March 11, 1961, by which the United Kingdom Government agreed that it would no longer object to a 12 mile fishery zone around Iceland and the Icelandic Government agreed that United Kingdom fishing vessels could fish within certain specified zones between 6 and ■ miles for a period of 3 years.

The principal products of the island are fish, fish oils, whales, mutton, wool and ponies. The principal exports are fish, fish meals and oils, whale oil and meat, and sheepskins; the imports consist of almost all the necessities of life, the chief items being petroleum, transportation equipment, textiles, machinery, base metals, wood and cork, and cereals.

At January 1, 1969, the mercantile marine consisted of 550 vessels of under 100 gross tons and 292 ships of 100 gross tons and over; ■ total of 842 vessels (144,621 gross tons). Principal types were: Fishing vessels, under 100 gross tons, 529 (17,996 gross tons); 100 and over, 204 (43,101 gross tons); Trawlers 100 tons and over, 28 (20,104 gross tons); Pullers and dry cargo ships, 36 (46,561 gross tons); Inspection ships, 5 (2,421 gross tons); and Oil Tankers, 7 (8,361 gross tons). There is a regular shipping service between Reykjavik, Leith

and Copenhagen, fortnightly in summer and every three weeks in winter. Frequent but irregular services run between Reykjavik and Hull, and the Continent. One Icelandic cargo line has recently established a fortnightly service between Reykjavik and Hull *via* the Continent.

A regular thrice-weekly air service (daily in summer) is maintained between Glasgow and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A., Germany and Luxemburg.

Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres are well surfaced. The State highways and side roads are non-metalled (gravel and lava dust). The climate and terrain make first-class surfaces for highways out of the question. Iceland changed to right-hand driving on May 26, 1968, at an estimated cost of Kr.58,000,000 (£410,000). Total number of vehicles licensed is 43,000 (private cars, 36,000).

*Language and Literature.*—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and is spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

Attachés, Capt. Achmad Rasjid; M. Mazhar Abdullah.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of Java and Madura, the island of Sumatra, the Riouw-Lingga Archipelago (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of Bangka and Billiton, part of the island of Borneo, Celebes Island, the Molucca Islands (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiani, Obi, Kei, Aru, Babar, Leti and Wetar), part of Timor Island, the islands of Bali and Lombok and the western half of the island of New Guinea (*West Irian*), with a total area of 735,000 sq. miles, and a population (estimated, 1969) of 118,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War 1939-45, during which the Archipelago was occupied by the Japanese, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands of all the former Dutch East Indies except W. New Guinea took place on December 27, 1949.

Dr. Sukarno was elected President of Indonesia and held office until his deposition in 1967.

Following the establishment of Malaysia (including Sabah and Sarawak) in 1963, President Sukarno pursued a policy of "confrontation" against it, involving border incursions in both West and East Malaysia. Commonwealth forces assisted Malaysian resistance. Western New Guinea became part of Indonesia in 1963 under the name West Irian.

On Sept. 30, 1965, an attempted *coup d'état* assisted by the Palace Guard resulted in the murder of six generals. The Indonesian Communist Party was charged with plotting to destroy the power of the Army and to set up a Peking-oriented regime, nominally under President Sukarno. The coup was swiftly crushed and a widespread massacre of Communists and their supporters followed. Sukarno remained in office but his Foreign Minister, Dr. Subandrio, among others, was arrested and later sentenced to death. The sentence had not been carried out by the summer of 1969.

Following a three-week period of unrest and violent student demonstrations the Minister of the Army, General Soeharto, took over effective political power in March, 1966, and announced the banning in Indonesia of the Communist Party. The new regime concluded an agreement ending the "confrontation" with Malaysia on Aug. 11, 1966, and Indonesia resumed membership of the United Nations Organization which it had left in 1965. General Soeharto was made Acting President with full powers, on March 12, 1967.

Using his powers as Acting President, General Soeharto revised the membership of the two Houses of Parliament, and on March 28, 1968, the MPRS (Provisional People's Consultative Congress), the highest constitutional body, appointed him full President for a period of five years, and instructed him to arrange for general elections to be held not later than July 5, 1971; the last general elections were held in 1955. In accordance with another instruction General Soeharto on June 6 replaced the Ampera Cabinet with the Development Cabinet, i.e. one which was intended to reflect the emphasis to be placed henceforward on the development of the country, economic affairs, efficiency and expertise in general, and to reduce the direct influence of the military in the Government.

**Finance.**—Following new measures introduced by the Government in October, 1966, inflation declined from the rate of 600 per cent. in 1966 to about 110 per cent. for 1967 and 85 per cent. for 1968. Bank notes in circulation rose from *rupiahs* 16,635,000,000 at the beginning of 1967 to 83,000,000,000 in May, 1968. Following the agreement on the re-scheduling of Indonesia's debts in 1966, Western creditor nations agreed to make available aid amounting to \$200 million as balance of payments support and in 1969 undertook further commitments totalling \$36,500,000 in respect of non-food aid. The new measures adopted by the Government in October, 1966, included the abolition of State controls and the introduction of a free market policy with more realistic exchange rates geared to a floating rate for the purchase of foreign exchange in the form of bonus export certificates for essential imports. The rate had risen to a peak of *Rps.*480= \$1 by mid-1968, but fell to *Rps.*412= \$1 by the end of the year and continued to fall until the summer of 1969. Following a crisis caused by a shortage of rice and foreign exchange at the end of the year the rate rose sharply and stood at just under 300 by the end of the year. Tourists and foreign residents in Indonesia are able to change currency at a rate near to, but slightly higher than the bonus export rate.

**Production.**—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and pepper cloves are produced, mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estates. Rubber, tea, coffee and tobacco are also produced by both in large quantities. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers, but production is insufficient to meet home demands and substantial imports of rice are necessary.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits.

On Dec. 30, 1968, a five-year development programme was inaugurated, concentrating particularly in agriculture and communications.

## Trade with U.K.

There was a progressive decline in British exports to Indonesia after 1960. This became more marked during Indonesia's policy of "confrontation" against Malaysia which resulted in a disruption of normal commercial relations and stringent import controls due to lack of foreign currency, but exports improved in 1967 following the restoration of normal commercial relations. Indonesia's exports to U.K. rose substantially in 1968.

	1967	1968
Imports from U.K.....	£5,744,000	£5,952,000
Exports to U.K.....	4,981,000	7,666,000

Principal exports to the United Kingdom are rubber, tea, coffee, spices and sugar. Imports from the United Kingdom are mainly of machinery, chemicals, electrical equipment, motor vehicles, cycles, lubricating and heavy oils, and metal goods.

*Transport.*—In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including a line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago are maintained by the State-run shipping companies Djakarta-Lloyd (ocean-going) and Pelni (coastal and inter-island) and other smaller concerns. In 1962 there were 13 ocean-going and 276 inter-island vessels in use by Indonesia. Transport by small craft on the rivers of the larger islands plays an important part in trade. Air services in Indonesia are operated by Garuda Indonesian Airways and Djakarta is served by various international services. There are approximately 49,000 miles of roads.

*CAPITAL.*— $\Psi$  Djakarta, formerly Batavia (population 4,500,000). Other important centres are: (Java) Surabaya,  $\Psi$  Semarang, Bandung,  $\Psi$  Tjeribon,  $\Psi$  Surakarta and Djogjakarta; (1961 populations) (Madura) Pamekasan (180,000); (Sumatra) Palembang (500,000), Medan (500,000) and  $\Psi$  Padang; (Celebes)  $\Psi$  Macassar (450,000) and  $\Psi$  Menado; (Borneo) Banjarmasin,  $\Psi$  Balikpapan and  $\Psi$  Pontianak; (Moluccas) Ternate (9,000); (Bali) Denpasar and Singardja (120,000); (W. Timor) Kupang (10,000); (W. Irian) Sukarnapura.

*NATIONAL DAY.*—August 17 (Anniversary of Proclamation of Independence).

*FLAG.*—Equal bands of red over white.

*Area and Population.*—Iran has an area of 628,000 sq. miles, with a population of 25,781,090 (Census of 1966); estimated May 31, 1968, 26,810,000. It is mostly an arid table-land, encircled, except in the east, by mountains, the highest in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert.

The Iranians are mostly Shi'ah Moslems but among them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

*Government.*—Iran was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffar-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Iranian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan,

who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlevi.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R., in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Reza Shah abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammed Reza Shah Pahlevi.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On February 26, 1963, the Shah announced his six point "White Revolution". The six points are: 1. A land reform designed to redistribute land and place it in the hands of the peasants. 2. Nationalization of all forest land. 3. The sale of government shares in factories and industrial enterprises to raise money for the implementation of the land reform. 4. The distribution of factory profits among the factory employees. 5. The granting of the vote to women. 6. The creation of a Literacy Corps to bring basic education to the rural areas. Six additional points have since been added.

For the purposes of local government the country is divided into 13 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

**Defence.**—The Ground Forces, which have a strength of about 60,000 regulars and 100,000 conscripts, made up of 5 infantry and 2 armoured divisions grouped under three Army Headquarters. Their equipment is modern and includes the latest American tanks and some Russian vehicles. The Air Force has a strength of about 14,000. It is equipped with some 140 American aircraft including 100 jets. The Navy consists of a small fleet of frigates, minesweepers and patrol boats in the Persian Gulf, and some small craft in the Caspian Sea. The personnel of the Navy amounts to about 6,000 all ranks. The Gendarmerie is an all regular,

para-military force of about 32,000 men which provides frontier guards and mans small posts throughout the country.

**Education.**—Since 1943 primary education has been compulsory and free. The establishment in 1963 of the Literacy Corps (a body of National Servicemen who are seconded to the Ministry of Education to work as Primary School teachers in rural districts) has brought schooling to hitherto deprived villages and is making a valuable contribution in increasing educational opportunities for country people. During the academic year 1964-65 there were a total of 2,470,755 children attending 13,620 schools. A little over 2 million of these were at Primary School. There are in Iran seven universities (Tehran (3), Tabriz, Meshed, Isfahan, Shiraz and Ahwaz) and attending these and other institutes of higher education there are just over 24,000 students.

**Language and Literature.**—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, or Firdausi (A.D. 939-1020), Omar Khayyám, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389).

**Press.**—In Iran about 140 newspapers and magazines are published, over half of them in Tehran. Three papers in the capital have the status of national dailies. Two English and one French daily are also published in Tehran. Provincial publications have very small circulations.

**Finance.**—The budget for the Iranian year beginning March 21, 1969, including development expenditure, balanced at Rls. 330,300,000,000 an increase of 16 per cent. over 1968-69. The development budget showed an increase of 11 per cent. and defence expenditure increased by 9 per cent.

Following the devaluation of sterling in November, 1967, the rate of exchange was fixed at *Rials* 122 = £1.

**Production and Industry.**—While petroleum is the principal product and by far the greatest export, Iran, except for its desert areas, is essentially an agricultural country and three-quarters of the inhabitants depend for their living on the land. Wheat is the principal crop, using about half the area under cultivation. Other important crops are barley, rice, cotton, sugar beet, fruits and vegetables. Wool is also produced—sheep, as well as goats, being numerous. There are extensive forests in the north and west, the conservation of which is an urgent problem. Rapid progress has been made in the development of industry. Apart from oil, the principal industrial products are carpets, textiles (mainly cotton), sugar, cement and other construction materials, ginned cotton, vegetable oil and other food products, leather and shoes, metal manufactures, pharmaceuticals, automobiles, fertilizers, plastics, matches and cigarettes. A steel mill is under construction at Isfahan.

The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946. Production had risen to a total of 35,000,000 metric tons in 1950, the last full year before nationalization. Oil shipments ceased in 1951 and were not resumed until Oct. 30, 1954.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Iran were taken over in initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Iran £25,000,000 cash in the 10 years

from Jan. 1, 1957, in compensation for its oil assets in Northern Iran and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20-25 years. The consortium is responsible for the production, refining and sale of Iranian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Recent oil production figures are (in long tons): 1964, 81,100,000; 1965, 91,600,000; 1966, 99,800,000; 1967, 129,300,000; 1968, 133,000,000.

**Communications.**—The principal roads are from the frontier of Iraq at Khosravi to Tehran; from Tehran *viâ* Saveh and Hamadan to Ahwaz and Khorramshahr; from Tehran *viâ* Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elbruz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, *viâ* Yazd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Iranian roads are not asphalted but gravel-surfaced, although the asphalted of main trunk routes is progressing steadily. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kasha is now in operation as is one from Bandar Shah to Gorgan.

**Civil Aviation.**—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. The *Iranian National Airlines Corporation* was formed from the former *Iranian Airways* and *Persian Air Services* in February, 1962. The Company is 51 per cent. Government-owned and operates internal and international routes. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, B.O.A.C., Qantas, P.I.A., Aeroflot, Alitalia, Aryana Airways and El Al operate services to Tehran.

## TRADE

1967-68 1968-69

Imports..Rials 90,451,151,515 Rials 106,723,875,715  
Exports.. 13,632,635,309 16,268,001,537

These figures are calculated at the commercial rate of exchange and exclude oil exports. Total exports, including oil exports for 1968-69, Rials 151,777,034,730.

## Trade with U.K.

1967 1968

Imports from U.K.....£42,765,000 £60,185,000  
Exports to U.K..... 136,668,000 91,308,000

Imports into Iran consist mainly of industrial and agricultural machinery, iron and steel (including manufactures), electrical machinery and goods, sugar, chemicals and pharmaceuticals, motor vehicles and certain textile fabrics and yarns. The principal exports, apart from oil, are cotton,

carpets, dried fruits and nuts, hides and skins, mineral ores, wool, gums, caviare, cummin seed and animal casings. West Germany, the U.S.A. and the U.K. are Iran's three leading suppliers. West Germany, the U.S.S.R., the U.K. and the U.S.A. are the main customers for non-oil exports.

**CAPITAL:** Tehran, population (1964), 2,317,000. Other large towns are Tabriz (388,000), Isfahan (340,000), Meshed (312,000), Shiraz (206,000), Resht (119,000), Kerman (73,000), Hamadan (115,000), Yazd (74,000), Kermanshah (152,000),  $\Psi$  Abadan (273,000), Ahwaz (145,000).

**FLAG.**—Equal horizontal bands of green, white and red; with arms (lion and sun) in centre.

**NATIONAL DAY.**—October 26 (Anniversary of Birthday of the Shahanshah).

## IRAQ EMBASSY

21-22 Queen's Gate, S.W.7

[01-584-7141]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Kadhim M. Khalaf (1968)*

*Area, etc.*—Traversed by the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E. and from Iran on E. to Syria and Arabian Desert on W., the approximate position being between  $37^{\circ}$  to  $48^{\circ}$  E. long., and from  $37^{\circ}$  to  $30^{\circ}$  N. lat. (see MAP, p. 881). The area of Iraq is officially estimated at 168,000 sq. miles of which 37 per cent. is desert land. About 35 to 40 per cent of the remainder is potentially cultivable either by rainfall or by irrigation.

*Population.*—At the Census of 1965 Iraq had a total population of 8,261,527. Official estimates of the population in 1967 by Liwa (Iraqi units of administration) are:

Liwa	Population of the Liwa		
	Male	Female	Total
Mosul.....	508,717	482,407	991,124
Sulaimaniya.....	215,229	202,117	417,346
Arbil.....	190,630	175,586	366,216
Kirkuk.....	246,625	231,473	478,098
Diala.....	214,252	202,838	417,090
Ramadi.....	173,387	161,133	334,520
Baghdad.....	1,169,656	1,100,983	2,270,639
Kut.....	167,902	173,519	341,421
Hilla.....	231,680	227,985	459,665
Kerbela.....	173,842	176,533	350,375
Diwaniya.....	275,900	281,012	556,912
Amara.....	177,925	173,953	351,878
Nasiriya.....	248,382	256,080	504,462
Basrah.....	358,101	349,302	707,403
Iraqis abroad...	24,179	16,639	40,818

Total..... 4,376,407 4,211,560 8,587,967

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzerum in the Dumlul Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

*Antiquities.*—In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C. Excavations in 1948 at Tel Abu Shahrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world. Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel). Mosul *Liwa* covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the *Garden of Eden*. The "*Tree of Knowledge*," which had stood there "from time immemorial," withered and died in December, 1946. It has been replaced by a shoot said to be from the original tree.

*Government.*—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal was elected King of Iraq. The country was a monarchy until July, 1958, when King Faisal II was assassinated. From 1958 until 1968 Iraq has been under Presidential rule with a succession of republican Cabinets: President Kassem

(Qasim), 1958-63 (executed); President Abdul Salam Arif, 1963-66 (killed in an air accident); President Abdul Rahman Arif, 1966-68 (overthrown and exiled, July 17, 1968).

President Arif's régime ended in a bloodless military *coup d'état* on July 17, 1968, when Maj.-Gen. Ahmed Hassan al-Bakr was elected President by the Revolutionary Command Council. The Prime Minister, Gen. Yahya, was arrested. A Cabinet formed by Col. Abdul Razzaq al Nayef on July 19 held office until July 30 when the Prime Minister was arrested and deported to Morocco. A further new Cabinet was formed by the President himself on July 31, retaining 12 of the Nayef Ministers (see p. 882).

Diplomatic relations with the United Kingdom which were broken off by Iraq after the war of June, 1967, were resumed in May, 1968.

*Language.*—The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts.

*Education.*—In 1966-67 Iraq had 114 infant schools, with 528 teachers and 15,222 pupils; 4,773 primary schools, with 42,478 teachers and 977,582 pupils; and 212 intermediate and preparatory secondary schools, with 6,935 teachers and 241,064 full-time students. There were 5 universities and 10 other institutes of higher education, with 1,619 teachers and lecturers and 34,926 students. 8,229 teachers in training were attending 28 training colleges. In 1966-67 there were 9 agricultural, secondary schools, 7 industrial, 4 commercial and 16 domestic science schools, a total of 36 vocational schools.

*Communications and Trade.*—New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. Under the terms of the Permanent Economic Plan, 1961-66, 51 per cent. of all oil royalties is allocated for development projects. A minimum of £25,000,000 per annum is guaranteed, but oil revenues by 1962 had reached £95,137,356 for the year. The Permanent Economic Plan provides for a total expenditure of £556,000,000 on industry, communications, agriculture and building construction. The industrial projects include 13 factories being supplied under the Iraq/Soviet agreement. Contracts for 9 of these were signed in 1961.

The port of Basrah is well equipped and able to handle expeditiously all seaborne traffic. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has been dredged. The desert route between Baghdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent *via* Basrah.

Airports for the use of international air traffic have been provided at Baghdad and Basrah (Maqil). BOAC provides a thrice-weekly service between London and Baghdad, which is also served by Iraqi Airways and airlines of Iran, the Lebanon, the Netherlands, Italy, West Germany, Switzerland, Czechoslovakia and Pakistan. Iraqi Airways operates a daily service to Basrah and services from Baghdad to Mosul, Kirkuk, the Persian Gulf, Amman, Beirut, Cairo, Damascus, Tehran, Athens, Istanbul, Rome, Zürich, Prague, Vienna, Frankfurt, London, Karachi and Bombay.

Iraqi Republican Railways provide a regular passenger and goods service between Baghdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanaqin, Kirkuk and Arbil. The railway line from Baghdad to Mosul, linking up through Syria and Turkey

with the Mediterranean and the Bosphorus, is standard gauge. 2,018,309 passengers and 2,828,000 tons of goods were carried in 1965-66.

**Production and Industry.**—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. Production of crude oil in Iraq totalled 962,609 long tons in 1935, rising to 4,162,939 long tons in 1938. Revised production figures for the years 1954-1967 are:

1954....	29,615,569	1961....	45,851,135
1955....	32,716,227	1962....	48,214,537
1956....	30,606,282	1963....	53,256,530
1957....	21,361,979	1964....	60,348,000
1958....	34,931,461	1965....	64,664,000
1959....	40,897,676	1966....	63,150,000
1960....	46,534,398	1967....	58,939,000

Iraq Government records show the sterling value of total oil production as rising from £400,000 in 1931 to £2,222,212 in 1939; £3,119,117 in 1949; £86,649,749 in 1959 and to £140,781,785 in 1966.

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government action. An economic and technical co-operation agreement was signed with the Soviet Union in 1960, providing for the setting up of specified industries. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel fabrications including furniture, tanning, textiles, footwear and vegetable oils. In 1966 there were 1,326 industrial establishments employing an average number of 87,513 persons annually. Turnover of these establishments was ID 139,641,000.

#### FINANCE

	1965-66	1966-67
Total revenue....	ID143,110,000	ID169,595,000
Total expenditure....	141,620,000	180,304,000

The Iraqi *Dinar* of 1,000 *Fils* = £1 sterling.

#### TRADE

(Excluding oil)

	1966	1967
Total imports....	ID176,092,000	ID151,243,000
Total exports....	23,238,000	20,664,000

#### Trade with U.K.

	1967	1968
Imports from U.K....	£16,686,000	£15,615,000
Exports to U.K....	24,068,000	25,757,000

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, dates, cement, raw wool, raw hides and skins and raw cotton.

**CAPITAL.**—Baghdad. Population of the *Liwa* (estimated, 1967), 2,270,639; urban population about 1,200,000. Other towns of importance are  $\Psi$  Basrah (422,879) and Mosul (388,211).

**FLAG.**—Horizontal stripes of red, white and black, with three green stars on the white stripe.

#### BRITISH EMBASSY

Sharia Salah Ud-Din,

Karkh, Baghdad

Ambassador Extraordinary and Plenipotentiary, His Excellency Hugh Glencairn Balfour-Paul, C.M.G. (1969).....£5,625

Counsellor (Commercial), D. F. Hawley, M.B.E. (Commercial); P. McKeearney (Head of Chancery and Consul General).

Defence and Military Attaché, Col. J. R. D. Sharpe.

Air Attaché, Wing-Cdr. H. Harrison, A.F.C.

Asst. Military Attaché, Maj. O. Crocombe, R.A.

1st Secretaries, E. A. McNaught; J. Symonds; J. D. Perris.

2nd Secretaries, R. K. Hamilton (Commercial); R. C. Harrison (Consul); B. Hannaby (Commercial); D. J. F. Barwell.

3rd Secretaries, M. K. Jenner; A. Arnold (Commercial); A. Minassian, M.B.E. (Vice Consul).

In 1969 there were no British Consular Offices outside Baghdad.

British Council Representative, J. F. C. Springford, 7/2/9 Waziriya, Baghdad.

## ISRAEL

(Yisrael)

President of the Republic, Zalman Shazar, born 1889, elected President of Israel, May 22, 1963.

#### CABINET

Prime Minister, Mrs. Golda Meir.

Deputy Prime Minister and Minister for Absorption, Yigal Allon.

Foreign Affairs, Abba Eban.

Agriculture, Haim Gvati.

Labour, Joseph Almogi.

Defence, Moshe Dayan.

Education and Culture, Zalman Aranne.

Justice, Yaakov Shapiro.

Police, Eliahu Sasson.

Interior, Moshe Shapiro (N.R.P.).

Health, Israel Barzilai.

Finance, Commerce and Industry, Zeev Sharef.

Transport and Communications, Moshe Carmel.

Housing, Mordechai Bentov (Mapam).

Posts, Sharabi Yeshayahu.

Development and Tourism, Moshe Kol (Ind. Liberal).

Social Welfare, Josef Burg (N.R.P.).

Religious Affairs, Dr. Zerach Warhaftig (N.R.P.).

Without Portfolio, Israel Galili; Menahem Beigin (Herut); Joseph Saphir (Liberal).

Apart from Ministers marked otherwise, members of the Cabinet belong to the Israel Labour Party, a merger (Jan. 21, 1968) of the former *Mapai*, *Ahdut Avodah* and *Rafi* parties. N.R.P. = National Religious Party; *Mapam* = Unified Workers Party.

#### EMBASSY IN LONDON

■ Palace Green, Kensington, W.8

[01-937-8091]

Ambassador Extraordinary and Plenipotentiary, His Excellency Aharon Remez (1965).

Consular Section, 2A Palace Green, W.8.

Consul-General, Raanan M. Sivan.

**Area and Population.**—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30' - 33° 15' N. and long. 34° 15' - 35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 7,992 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Israel since the Six Day War in June, 1967, together with the Sinai Peninsula and the Golan Heights in Syria). The population was estimated in 1969 at 2,771,000. Jewish immigration has made rapid progress since the establishment of the State. In 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048. During the up-

heavals of 1948-49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries. Since 1948 the population of Israel has more than trebled.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on currency and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

**Physical Features.**—Israel comprises four main regions: (a) the hill country of Galilee and Judæa and Samaria, rising in places to heights of nearly 4,000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheeba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other

principal rivers are the Yarkon and Qishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51.5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 feet above sea-level, near Safad, Upper Galilee.

**Climate.**—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

**Antiquities.**—The following are among the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the Cœnaculum on Mount Zion; Ein Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Atlit Megiddo and Hazor. Other anti-

quities in the West Bank of Jordan, Sinai or the Golan Heights at present occupied by Israel can now be visited from Israel.

**Government.**—There are ■ Cabinet and a single-chamber Parliament (*Knesset Israel*) of 120 members. On November 2, 1965, twelve political parties returned members to the *Knesset*, including The Alignment (*Mapai* and *Ahdut Avoda*) (45), *Herut-Liberal* (*Gahal*) (26), *National Religious Front* (11), *Israel Labour List* (*Rafal*) (10), *Mapam* (8). A new coalition took office in January, 1966 comprising *Mapai*, *Ahdut Avoda*, the *National Religious Front*, *Mapam* and *Independent Liberals*. *Gahal* and *Rafi* joined the coalition in June, 1967, to form ■ Government of National Unity. At the beginning of 1969 *Mapai*, *Ahdut Avoda* and *Rafi* amalgamated to form the *Israel Labour Party*. Mrs. Golda Meir succeeded Mr. Eshkol as Prime Minister on the latter's death in February, 1969, but made no changes in the Government.

**Immigration.**—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* ■ July 5, 1950, provides that ■ immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. From the establishment of the State until 1969, 1,316,327 immigrants had entered Israel from over 100 different countries.

**Education.**—Elementary education for all children from 5 to 14 years (15 in 1970) is compulsory. The Law also provides for working youth, age 14-17 (15-18 in 1970) who, for some reason, have not completed their primary education, to be exempted from work by their employers in order to do so.

In the 1967-68 school year the number of pupils in elementary and secondary schools was approximately 774,399. Of these 82,677 were non-Jews, the majority of Arabs attending separate Arab schools. There were 102,638 in kindergartens (under 6), 462,087 in primary schools (up to 14), 126,069 in secondary schools and 47,267 at other institutions, private schools, evening schools, etc., which are not under the supervision of the Ministry of Education.

The Hebrew University had a student body of 12,500, the Tel Aviv University a student body of approximately 9,500 and the Bar-Ilan University in Ramat Gan had 3,800 students. In addition, 3,000 students were studying at the University Institute in Haifa and 1,200 at the Institute of Higher Education in Beersheba. The Israel Institute of Technology (*Technion*) at Haifa provided courses in engineering, architecture, aeronautics and other technical subjects for 4,240 undergraduates and 1,700 post-graduates, while at the Weizmann Institute of Science, where there is no undergraduate teaching, 1,100 scientists are engaged in pure and applied research. In addition there were 7,818 students at teacher training colleges.

**Finance.**—Government expenditure for the fiscal year 1966-67 totalled I.L.4,855,500,000, with revenue at I.L.4,471,500,000.

The unit of account is the Israel pound of 100 *agorot*. Exchange rate, see p. 84.

#### COMMUNICATIONS

**Railways and Roads.**—Israel State Railway started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lod, Nahariya, Beersheba, Dimona, Ashdod and intermediate stations. In December, 1967, the total railway network amounted to 760 km. There were approximately 8,707 km. of paved road and 209,800 licensed vehicles.

**Shipping.**—Israel's merchant marine had reached a total tonnage of 1,360,513 by December, 1967.

The chief ports are Haifa, ■ modern harbour, with ■ depth of 30 ft. alongside the main quay; the new harbour on the Red Sea at Eilat, inaugurated in September, 1965, has a capacity of 10,000 tons a day; Acre has ■ anchorage for small vessels; the deep-water port at Ashdod, 20 miles south of Tel Aviv, which started operations at the end of 1965, was designed to handle 1,000,000 tons of cargo in the first year, 2.5 m. annually until 1970, and 4 m. tons later, after deepening.

**Civil Aviation.**—El Al in 1966-67 carried 315,719 passengers. The increase in its traffic has been in the order of 14.7 per cent. per annum. El Al operates Boeing jets exclusively and is buying two Boeing 747's. Arkia, the internal airline, has had a steep increase in traffic since the Six Day War and in 1967 carried 175,946 passengers. Arkia uses five Heralds and two Dakotas.

#### PRODUCTION AND INDUSTRY

**Agriculture.**—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to sub-tropical crops such as sorghum, millet and mangoes. The famous "jaffa" orange is produced in large quantities mostly in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1967-68 season was 1,300,000 tons. Of this total, 758,000 tons were exported, of which 213,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 22,550 tons in 1968. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production. The area under irrigation has increased more than five-fold (from 75,000 to 410,000) since 1948 through several national water schemes. The largest of these is the Kinneret-Negev Project. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately ■ quarter of ■ acre).

**Industry.**—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

	TRADE	
	1967	1968
Imports....	\$U.S.768,486,000	\$U.S.1,081,000,000
Exports....	554,453,000	640,000,000
	Trade with U.K.	
	1967	1968
Imports from U.K.....	£49,205,000	£86,713,000
Exports to U.K.....	32,309,000	44,197,000

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

**CAPITAL.**—Most of the Government departments are in Jerusalem (population, estimated 1967, 266,300). A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950. It is not, however, recognized as the capital by the United Nations. Other principal towns are  $\Psi$ Tel Aviv-Jaffa (388,000);  $\Psi$ Haifa and district (210,800); Ramat Gan (106,000) and Beersheba (70,000).

**FLAG.**—White, with two horizontal blue stripes, the Shield of David in the centre.

#### JERUSALEM

Until 1967 Jerusalem was divided between Israel and Jordan, two of the 36 recognized Christian Holy Places (in the New City) being under Jewish administration, the remainder under Arab administration in the Old City. At the conclusion of hostilities between Israel and the surrounding Arab countries in 1967 the entire city was under Israeli control.

*Consul General, Signor Mario Tonarelli.*

*Consul, Signor Sergio Berlinguer.*

Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies noted below). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area is about 324,000 sq. kilometres (123,000 sq. miles).

The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are *Monte Rosa* (15,217 feet), *Matterhorn* (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (405 miles), which flows through Piedmont, Lombardy and Veneto and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Cæsar did in 49 B.C., thus "invading" Italy in arms) is used to indicate definite commitment to some course of action.

**Population.**—Italy has a resident population estimated at 54,030,000 in March, 1969, about 186 persons per sq. mile—twice the European average. Live births in 1968 totalled 948,626, deaths, 530,223 and marriages 375,074.

**Government.**—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (1805-72), Garibaldi (1807-82) and Cavour (1810-61) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as **Duce** (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum

sulted in 12,717,923 votes for ■ Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

*Constitution.*—On Dec. 22, 1947, the Constituent Assembly approved the Constitution, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

Since the General Election of 1948, governments have been formed by Signor de Gasperi (1948-53, coalition); Signor Pella (1953-54, *Christian Democrat*); Signor Scelba (1954-55, coalition); Signor Segni (July, 1955-May, 1957, coalition); Signor Zoli (June, 1957-May, 1958, *Christian Democrat*); Signor Fanfani (May, 1958-Feb., 1959, coalition); S. Segni (Feb., 1959-Feb., 1960, *Christian Democrat*, with *Liberal* support). Signor Tambroni (March 25-July 1960, *Christian Democrat*, with Neo-Fascist support); Signor Fanfani (July 27, 1960-Feb., 1962, *Christian Democrat*); Signor Fanfani (Feb. 1962-June, 1963, coalition); Signor Leone (June-Nov., 1963, *Christian Democrat*); Signor Moro (coalitions formed, Nov., 1963; July, 1964; Feb., 1966); Sen. Leone (May, 1968-December, 1968, *Christian Democrat*); Sig. Rumor (December, 1968-June, 1969, Centre Left coalition); Sig. Rumor (second Government) (August, 1969) (*Christian Democrat*).

Signor Moro took office in November, 1963, at the head of ■ coalition consisting of the four parties

of the centre-left, i.e., the *Christian Democrats*, the *Republicans*, the *Socialist and Social Democrat Parties* (united in October, 1966, to form the *United Socialist Party*). This coalition remained in being until the General Election of May 19, 1968, at which the *Communists* and their left-wing allies gained votes at the expense of the *United Socialists*. The latter therefore refused to rejoin the coalition after the elections until they could decide on a new political line at their Congress in the autumn of 1968. Meanwhile the country was run by a caretaker government led by Senator Leone.

The shares of the total vote and the number of seats in the Chamber of Deputies won by each party in the May, 1968 elections were as follows:—

	Percent- age of Votes	Seats
PCI ( <i>Communist</i> ).....	26.9	177
PSIUP ( <i>Proletarian Unity</i> ).....	4.5	23
PSI } <i>PSU (Socialist)</i> .....	14.5	91
PRI ( <i>Republican</i> ).....	2.0	9
DC ( <i>Christian Democrat</i> ).....	39.1	266
PLI ( <i>Liberal</i> ).....	5.8	31
MSI ( <i>ex-Fascist</i> ).....	4.5	24
Monarchist.....	1.3	6
Other.....	—	3
Total.....	100	630

On December 12 a new centre-left government including Christian Democrats, Socialists and Republicans was formed with Sig. Rumor as President of the Council of Ministers. This came to an end in June 1969, when the Socialist Party split once again into two parties, the PSI with Sig. Nenni as its leader, and the PSU (formerly *Social Democrats*). A minority Christian Democrat Government, promised support in Parliament from both Socialist parties, was formed on August 5, 1969.

**Defence.**—The period of conscription is 15 months for the Army and Air Force and 24 months for the Navy. The Army consists of 250,000 men and includes two armoured divisions, five infantry divisions, five Alpine brigades, one independent armoured brigade, one missile brigade and one parachute brigade. There is also a para-military force, the *Carabinieri*, about 80,000 strong. The Navy consists of 4 cruisers, 45 escorts including 2 G.W. destroyers, 9 submarines, 60 minesweepers and also coastal craft and fleet auxiliaries. Approximate strength: officers, 3,700; men, 36,000. The Air Force consists of 500 aircraft; approximate strength: officers, 6,800; men, 57,000, with some 1,500 under training.

#### REGIONS OF ITALY

**Rome and Central Italy.**—Rome was founded, according to legend, by Romulus in the year now known as 753 B.C. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire and became the capital of Italy when the Kingdom was established in 1871. With a population of 2,500,000, Rome has been recreating herself as a major capital in the 100 years since Italy's reunification. The capital is concerned mainly with tourism and government, but due partly to the fact that the power of the Central Government is increasingly felt by industry, and that the headquarters of the giant State and parastatal companies are located there, Rome's importance as a business centre, although far from rivaling that of Milan, is steadily increasing.

**Lombardy and Milan.**—In the small area around Milan, which has a population of 1,672,000, are to be found some 22 per cent. of Italy's commercial and banking services and some 30 per cent. of her industry. Here too, a market for consumer goods greatly exceeds that of any other comparable area in Italy. Lombardy's population of some 8 million is growing fast, both naturally and by immigration, and enjoys a *per capita* income some 40 per cent. above the national average. The whole range of Italian industry is there. Most important are the steel, machine tool and motor car factories.

**Turin and Piedmont.**—Turin between 1861 and 1865 was Italy's first capital as the home of the Piedmontese Royal Family. Now with a population of 1,108,000 it is famous as the headquarters of Europe's largest manufacturer of motor cars, produces 75 per cent. of Italy's motor vehicles and over 80 per cent. of its roller bearings. Turin is also Italy's second largest steel producing city. Piedmont is the centre of the Italian textile industry, based mainly on Biella.

**Genoa and the Ligurian Riviera.**—Genoa, with a population of 848,000, is Europe's fourth largest port and handles one-third of Italy's foreign trade. About 80 per cent. of the goods handled are imports. Anglo-Genoese trade goes back to the 13th century and 20 per cent. of Genoa's imports still come from Britain. Genoa is Italy's third most important industrial city.

**Venice and the North-East.**—Venice, with a population of 363,000 is primarily a tourist attraction of unique beauty. It was founded in the middle of the

5th century by refugees from the mainland fleeing from Barbarian attacks. At the beginning of the 16th century it was one of the strongest and richest states of Europe, dominating Eastern Mediterranean trade. It lost its independence in 1797 when Napoleon handed it over to Austria. Industry is now developing in the Venice area, particularly on the autostrada linking Venice with her historical and now developing rivals Verona, Vicenza, Padua and in the areas around Pordenone. Padua is known for mechanical equipment, Verona for paper and stationery, Treviso for consumer goods, and Valdagno for its woollen industry. An important electrical appliance industry is based near Treviso and at Pordenone. Near Trieste which has a population of 281,000, is the modern Monfalcone shipyard. Present-day Trieste itself consists of Zone A, the area which was administered by the Allied Military Government from June 12, 1945, to October 26, 1954, when it was handed over to the Italian authorities. The remainder of the area of Trieste was administered by Yugoslavia after the War and handed over to that country in 1954 after the free territory of Trieste, an arrangement agreed in the Italian Peace Treaty of 1947, had proved to be unworkable.

**Tuscany, Emilia and Romagna.**—In 1940-45 this area was the agricultural centre of Italy and there was little industry. Now there are large industrial centres at Bologna (population 483,000), Florence (population 455,000), Modena, Pistoia and Ravenna. Most of the new firms are small or medium-sized. In Prato there are about 1,000 textile firms. The footwear industry is based on Florence, reproduction furniture at Cascina and Poggibonsi, ceramics at Sassuolo, and glass and pottery at Empoli and Montelupo. Bologna is an important centre for the food industry. Florence, the capital of Tuscany, was one of the greatest and most creative cities in Europe from the 11th to the 16th centuries. Under the Medici family in the 15th century flourished many of the greatest names in Italian art, including Filippo Lippi, Boticelli, Donatello and Brunelleschi. In the 16th century the tide turned to Rome where great Florentine artists like Michelangelo and Leonardo da Vinci flourished.

**Naples and the Toe of Italy.**—Naples (population 1,240,000), formerly the capital and administrative centre of the Kingdom of Naples and Sicily, remains the dominant city in the area, but it is beset with great problems of unemployment and the need for modernization. Around it, however, helped by Government incentives, industry is slowly developing, northwards to Caserta, southwards to Salerno and eastwards to Benevento. The most important industrial decision was taken in 1967, when the Government announced that a large new car factory would be built on the outskirts of Naples.

**Puglia.**—Bari (population, 340,000) has always been a commercial centre. Fairly rapid industrial development is now taking place in the areas of Taranto, Bari, Brindisi and Foggia. At Taranto there is a highly-mechanized steel-works and a modern oil refinery. The Bari industrial zone has recently welcomed new factories producing electronic and pneumatic valves, specialized vehicle bodies and tyres, etc. The main industry of Brindisi is a petro-chemical plant. At Foggia there is a new textile factory.

**Sicily.**—Sicily is an autonomous region with a considerable measure of self-government. The main source of income is agriculture, particularly citrus fruits, almonds and tomatoes, but this faces severe competition. Oil and oil products have recently supplanted citrus fruits as Sicily's main exports. The island is the scene of intense activity in

the fields of oil, natural gas and petro-chemicals. Small and medium-sized industries, benefiting from the Government incentives, are developing. Of the island's 279 factories, some 90 are in the Catania area and 60 around Palermo (population, 630,000), the capital of the island. Tourism is bringing an increasing amount of revenue to Sicily.

**Sardinia.**—Sardinia is another autonomous region, with its capital at Cagliari (population, 205,000). Six main industrial development areas have been officially designated; they are at Cagliari, Porto Vesme, Oristano, Sassari, Olbia and Arbatax. Lead and zinc mining are important. At Porto Vesme, a large smelting plant is being constructed. In the same area, a company plans to invest some £60 million in an aluminium plant. There is a flourishing tourist industry.

#### THE ECONOMY

Italian total net national income was estimated in 1966 as the equivalent of £17,523 million, which works out as an average per head for the year of £337. This compares with £32,321 m. in the same year for Germany (£542 per head) and £30,824 m. (£560 per head) for the United Kingdom in 1967. The economy has, however, been developing very fast since the 1950's with an average real annual increase in the gross national output of about 7 per cent. Italian industry is strongly competitive abroad and exports have consistently been more buoyant than the home market. 1968 saw a slight slow-down in the rate of Italian economic growth, but this has picked up in 1969.

**Currency.**—The market rate of exchange on Sept. 12, 1969, stood at lire 1,501 = £1.

**Industry.**—The general index of industrial production (1958=100) stood at 216 in 1967 (compared with 157 for Germany, 155 for France and 133 for the United Kingdom). Some of the faster-growing sectors of industry are machine tools up 27 per cent. between 1966-67, industrial vehicles (up 24 per cent.), motor vehicles (up 13 per cent.). The State-owned sector of Italian industry is important, dominated by the holding companies IRI (mechanical, steel, airlines), ENI (petro-chemicals) and ENEL (electricity).

**Mineral Production.**—Italy is generally poor in mineral resources but since the war deposits of natural methane gas and smaller deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Sulphur production, in Sicily and Calabria, is important although declining in volume. Other minerals produced in significant quantities include iron ores and pyrites, mercury (over one-quarter of the world production), lead, zinc and aluminium. Marble is a traditional product of the Massa Carrara district. Salt and tobacco are Government monopolies.

**Agriculture.**—Agriculture accounted for 13.4 per cent. of gross domestic product in 1965 (in Britain it was 3.4 per cent.), but about a quarter of the active population was employed in it. Some three-quarters of the 4,300,000 farms and small holdings are privately owned and operated. Considerable structural improvement is required to increase the efficiency of Italian agriculture; the Plano Verde law of 1966 set aside £140,000,000 a year for this purpose, particularly by means of 5 per cent. loans for investment in new plant and machinery. In spite of the protection afforded by the EEC, Italian agricultural output increased by only 10 per cent. from 1958 to 1966 compared with 35 per cent. in France. In the period 1964-66 Italy was a net exporter of rice, vegetables, fresh fruit and wine, but a net importer of nearly all other agricultural products.

**Tourist Traffic.**—28,584,000 visitors entered

Italy in 1968, compared with 27,744,600 in 1967, and they spent Lire 922 billion.

**Communications.**—The main railway system is State-run by the *Ferrovie dello Stato*. A network of motorways (*autostrade*) covers the country, built and operated mainly by the IRI State-holding company and ANAS the State highway authority. *Alitalia*, the principal international and domestic airline, is also State-Controlled by the IRI group. Other smaller companies, including ATI (an Alitalia subsidiary) and Itavia operate on domestic routes. The Italian mercantile marine total of 5,945,000 tons in January, 1967, compared with 3,500,000 tons before the War.

#### FOREIGN TRADE

Total Italian imports in 1968 were 5.815 milliard *Lire* and exports were 5.790 milliard *Lire*. The main markets for Italian exports were West Germany, France and the United States, and the main commodities exported were machinery, textiles and clothing, motor vehicles, chemicals and fruit and vegetables. The main commodities imported were petroleum products, machinery, chemicals, iron and steel, meat, cereals, copper, wool and cotton. The main sources of imports in 1968 were West Germany (17.82 per cent.), U.S.A. (11.64 per cent.), France (11.33 per cent.), U.K. (4.23 per cent.). The tendency in recent years has been for Italy's EEC partners to provide a larger share of Italy's imports. Between 1953 and 1967 the EEC's share increased from 22.1 per cent. to 34.9 per cent., while the United Kingdom's share, for example, has decreased from 6.1 per cent. in 1963 to 4.23 per cent. in 1968.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£140,268,000	£160,297,000
Exports to U.K. . . . .	195,070,000	236,271,000

**Language and Literature.**—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785-1873), Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1965, there were 85 daily newspapers published in Italy, of which 16 were published in Rome and 9 in Milan.

**Education.**—Education is free and compulsory between the ages of 6 and 14; this comprises five years at primary school and three in the "middle school", of which there are about 3,000. Pupils who obtain the middle school certificate may seek admission to any "senior secondary school", which is roughly equivalent to a U.K. grammar school but may be a lyceum with classical or scientific or artistic bias, or may be an institute or school for teacher training, or may be an institute directed at technology (of which there are eight different types) or trade or industry (including vocational schools). Courses at the lycées and technical institutes usually last for five years and

success in the final examination qualifies for admission to university. There are 32 State and 17 private universities, some of ancient foundation; those at Bologna, Genoa, Macerata, Naples, Padua and Perugia were started in the thirteenth century. University education is not free, but entrants with higher qualifications are charged reduced fees according to a sliding scale. In general, schools, lycéums and universities are financed by local taxation and central government grants.

**CAPITAL, Rome.** Population (estimated, Dec., 1968), 2,500,000.

Recent estimates of the population of the principal cities and towns are Milan, 1,672,000;  $\Psi$  Naples, 1,240,000; Turin, 1,108,000;  $\Psi$  Genoa, 848,000; Bologna, 483,000; Florence, 455,000;  $\Psi$  Venice, 357,951;  $\Psi$  Bari, 340,000;  $\Psi$  Trieste, 281,000; Verona, 236,700; Padua, 209,547;  $\Psi$  Taranto, 202,495; Brescia, 187,786;  $\Psi$  Leghorn, 166,966; Ferrara, 157,323;  $\Psi$  Reggio Calabria, 156,359; Parma, 158,930; Modena, 151,543;  $\Psi$  La Spezia, 127,833;  $\Psi$  Salerno, 128,362; Reggio Emilia, 121,786;  $\Psi$  Ravenna, 123,360; Bergamo, 119,431; in Sicily:  $\Psi$  Palermo, 630,000;  $\Psi$  Catania, 383,739;  $\Psi$  Messina, 260,802; in Sardinia:  $\Psi$  Cagliari, 205,000.

**ISLANDS.**—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,306. The *Pelagian Islands* (Lampedusa, Linosa and Lampona) are part of the Province of Agrigento and have an area of 11 sq. miles, pop. 4,458. The Tuscan Archipelago (including Elba), area 293 sq. km., pop. 31,850; Pontine Archipelago (including Ponza, area 10 sq. km., pop. 2,530); Flegrean Islands (including Ischia, area 60 sq. km., pop. 49,953); Capri; Eolian Islands (including Lipari, area 116 sq. km., pop. 17,697); Tremiti Islands (area 3 sq. km., pop., 401).

**FLAG.**—Vertical stripes of green, white and red.

**NATIONAL DAY.**—June, 2.

#### BRITISH EMBASSY

Villa Wolkonsky, Via Conte Rosso 25, Rome.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Patrick Francis Hancock, K.C.M.G. (1969)..... £8,600

Minister, R. W. Selby, C.M.G.

Defence and Military Attaché, Col. G. D. Gill, M.B.E.

Asst. Defence Attaché, Sqn.-Ldr. B. E. Hogan.

Naval Attaché, Cdr. S. A. Hammick, D.S.C.

Air Attaché, Group-Capt. R. G. Churcher, D.S.O., M.V.O., D.F.C.

Counsellors, A. A. Golds, M.V.O. (Head of Chancery);

J. A. Ford, C.M.G., M.C. (Commercial); K. Kenney,

O.B.E. (Labour); I. C. L. Alexander, O.B.E. (Information).

1st Secretaries, T. C. Wood; M. W. Ponsonby,

C.B.E.; G. F. Fitz-Herbert; J. S. Dixon, O.B.E. (Administration); Miss M. B. Lewis (Head of Consular

Section); D. McAlindon (Economic); A. A. C.

Nash, O.B.E. (Commercial).

2nd Secretaries, J. A. Shorten; P. S. Fairweather;

W. Marsden; L. W. A. Harley (Administration);

E. G. Markee (Head of Visa Section).

Chaplain, Rev. D. J. N. Wanstall, C.B.E.

#### BRITISH CONSULAR OFFICES

There are British Consular Offices at Milan (from which all official trade promotion work in Italy is controlled), Rome, Naples, Genoa, Florence, Palermo, Turin, Venice, Trieste, Messina, Bari and Cagliari (Sardinia).

British Council Representative, D. A. A. Traversi, O.B.E., Palazzo del Drago, Via Quattro Fontane 20, Rome.

There are British Council Institutes at Milan and Naples, and an office at Bologna, each with a library.

#### IVORY COAST

(Republic of the Ivory Coast)

President and Minister of Foreign Affairs, Félix Houphouët-Boigny, elected for five years on

November 27, 1960; re-elected November 7, 1965.

President of National Assembly, Philippe Yacé.

President of Economic and Social Council, Mamadou Coulibaly.

President of Supreme Court, Alphonse Boni.

Minister of State, Auguste Denise.

Minister for Foreign Affairs, Arsène Usher Assouan.

#### IVORY COAST EMBASSY IN LONDON

2 Upper Belgrave Street, S.W.1

Ambassador Extraordinary and Plenipotentiary, His

Excellency Honoré Polneau (1969).

Counsellor, M. Collet Vieira.

1st Secretary, M. Daba Daniel Agoussi.

Attachés, M. Alloh Blaise Mobio (Financial); M.

Seydou Diarra (Commercial).

The Ivory Coast is situated on the Gulf of Guinea between 5° and 10° N and 3° and 8° W and is flanked on the West by Guinea and Liberia, on the North by Mali and Upper Volta and on the East by Ghana. It has an area of about 189,029 square miles—tropical rain forest in the southern half and savannah in the northern—and a population estimated in 1967 at 4,010,000 divided into a large number of ethnic and tribal groups. (For MAP, see p. 872).

Although official French contact was made in the first half of the 19th century, the Ivory Coast became a Colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The Ivory Coast was a founder member of the *Conseil de l'Entente*, established May 29, 1959, a loose union embracing also, without abrogation of sovereignty, Dahomey, Niger and Upper Volta. Togo also adhered in June, 1966. The Ivory Coast is also an Associated State of E.E.C. and a member of the *Organisation Commune Africaine et Malgache* (O.C.A.M.) and of the Organization of African Unity (O.A.U.). The official language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 85 members was elected on November 7, 1965, for five years. The defence of the Constitution, which was promulgated Nov. 3, 1960, is vested in a Supreme Court.

**Finance.**—The currency of the Ivory Coast is the Franc CFA (Francs CFA 50 = 1 French franc; Francs CFA 593 = £1). In 1968, the Ivory Coast budget balanced at Francs CFA 43,200,000,000.

**Trade.**—The principal exports are coffee, cocoa, timber and bananas. The United Kingdom imports Ivory Coast timber and a small quantity of her coffee. Diamonds and manganese are exported. There are a few deposits of minerals including manganese. Trade in 1967 was valued at: Imports, Francs CFA 77,634,304,720; Exports, Francs CFA 104,424,438,881.

#### Trade with U.K.

	1967	1968
Imports from U.K.....	£1,491,000	£2,876,000
Exports to U.K.....	4,517,000	7,684,000

CAPITAL,  $\Psi$  Abidjan (population, 400,000) which is also the main port.

FLAG.—3 vertical stripes, orange, white and green.  
NATIONAL DAY.—August 7 (Proclamation of Independence).

#### BRITISH EMBASSY

Transport, Ken Harada.  
Posts and Telecommunications, Toshio Komoto.  
Labour, Kensaburo Hara.  
Construction, Shinzo Tsubokawa.  
Home Affairs, Takeo Noda.

#### Ministers of State

Chief Cabinet Secretary, Shigeru Hori.  
Director, Prime Minister's Office, Tokuji Tokonami.  
Director, Administrative Management Agency, Masuo Araki.  
Director, Science and Technology Agency, Shiro Kiuchi.  
Director, Defence Agency, Kiichi Arita.  
Director, Economic Planning Agency, Wataro Kanno

#### JAPANESE EMBASSY AND CONSULATE

46 Grosvenor Street, W.1.

Information Section: 9 Grosvenor Square, W.1  
[01-493-6030]

Ambassador Extraordinary and Plenipotentiary, His Excellency Morio Yukawa (1968).  
Minister Plenipotentiary, Tsutomu Wada.  
Minister, Ichiro Miyoda (Financial).  
Minister and Consul-General, Shinsuke Hori.  
Counsellors, Toshihiko Nishiwaki (Commercial); Hirotsuke Dan (Financial).

1st Secretaries, Tetsuo Yoshida (Administration); Capt. Goro Yoshimura (Defence Attaché); Keiichi Kawasaki; Yoshiaki Takasu (Agriculture); Teruyoshi Iwata (Labour); Kenichi Yanagi; Naomichi Tsukahara (Commercial); Hideaki Sagara (Transport); Yoshio Ide (Scientific); Yutaka Furuya (Agriculture); Koji Saka (Home); Hiroshi Kawasaki (Commercial); Masao Honma (Consular); Talzo Watanabe (Information).

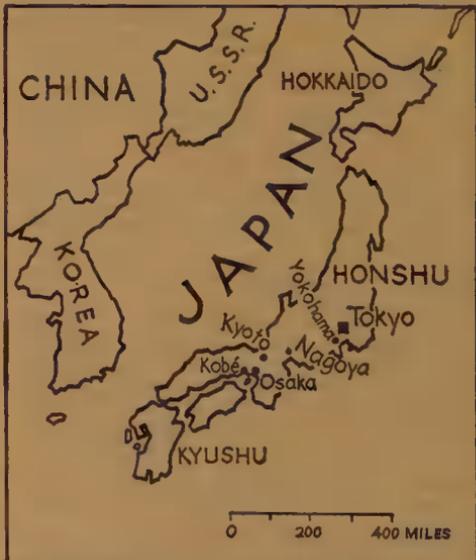

2nd Secretaries, Mamoru Funakoshi (Information); Tetsuo Endo (Economic); Tatsuo Arima; Tadashi Ogawa (Finance); Akimasa Kuwagata.

3rd Secretaries, Masaki Orita; Saburo Tanaka; Sadaaki Numata.

Area and Population.—Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 128° 6' East and 145° 49' East and between latitude 26° 59' and 45° 31' N., with a total area of 142,812 square miles and a population (estimated, Jan., 1969) of 101,604,000.

Japan Proper consists of Honshū (or Mainland), 230,448 sq. k. (88,839 sq. m.), Shikoku, 18,757 sq. k. (7,231 sq. m.), Kyūshū, 42,079 sq. k. (16,170 sq. m.), Hokkaido, 78,508 sq. k. (30,265 sq. m.). Formosa and the Kwantung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the Allied Nations (Aug. 14, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

British participation in the occupation of Japan was virtually over by May, 1950. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces, from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure. On July 1, 1956, the base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of 1957.

Under the terms of the Japan-U.S.A. Security Treaty of Sept. 8, 1951, United States forces remained to assist in the defence of Japan. However, as Japan's own Self Defence Forces have been built up, U.S. ground troops have been withdrawn. A revised version of the security treaty, which went into effect on June 23, 1960, was the subject of considerable controversy in the summer of that year.

**Vital Statistics.**—The birth rate in 1968 was 18.4 per 1,000 (1947, 34 per 1,000; 1967, 19.7 per 1,000). It has been stated that a considerable part in reducing the birth rate to its present level was played by drastic methods, induced abortion and sterilization, the legal grounds for which had been extended by the Eugenic Law, 1948, to include economic and social hardship. The improving standard of living has also played an important part in keeping the birthrate down.

The death rate in 1967 was 6.8 per 1,000, compared with 17 per 1,000 in pre-war years, natural increase of the population being 1,185,050 in 1968.

**Physiography.**—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical in the south to cool temperate in the north. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

**Government.**—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "Meiji Constitution" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

A general election was held on January 29, 1967, in which the Liberal Democratic Party was once more returned to power. The strength of the parties in the House of Representatives on July 22, 1969, was: Liberal Democratic Party, 275; Socialist Party, 135; Democratic Socialist Party, 31; *Komeito*, 25; Communist Party, 4; Independents, 2; vacancies, 14. Strengths of the parties in the House of Councillors were: Liberal Democratic Party, 138; Socialist Party, 64; *Komeito*, 24; Democratic Socialist Party, 10; Communist Party, 7; Niin Club, 4; Independents, 1; (2 vacancies).

**Ryūkyū Islands.**—Since World War II the appointment of a Chief Executive, chosen by the local legislature, has been subject to the approval of the United States High Commissioner. On Nov. 10, 1968, elections were held in Okinawa and the other Ryūkyū Islands and Mr. Chobuyu Yara (*Socialist*) was elected Chief Executive. Control of the legislature remained with the Democratic Party which won 17 of the 32 seats in 1968.

**Agriculture and Livestock.**—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in April, 1967 25,206,000 hectares of forest, which include the *Cryptomeria japonica*, *Pinus*

*massoniana*, *Zelkova keaki*, and *Pawlonia imperialis* in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In October, 1968, there were 5,897,000 hectares under cereals (rice, 3,435,000 hectares). The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated: rice is the staple food of the people, about 14,449,000 metric tons being produced in 1968. The floral kingdom is rich, beautiful, and varied. Fruit is abundant, including the mandarin, persimmon, loquat and peach; European fruits such as apples, strawberries, pears, grapes and figs are also produced. Mulberry trees are now cultivated on only 160,700 hectares (1968) compared with 577,525 in 1935.

**Minerals.**—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

**Industry.**—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1968, was 50,180,000, of which only 570,000 were unemployed. Of the total labour force, 40,900,000 were engaged in non-agricultural industries, 9,280,000 in agriculture, forestry and fisheries.

**Communications.**—There were 27,374 kilometres of Government and private railroad (steam and electric) in March, 1968. The merchant fleet (ocean-going ships over 3,000 tons gross) consisted of 990 vessels totalling 10,630,896 tons gross in March, 1969.

**Armed Forces.**—After the unconditional surrender of August, 1945, the Imperial Army and Navy were disarmed and disbanded and all aircraft confiscated by the occupying forces.

Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being in August, 1950, and a Maritime Safety Force was established in April, 1952. In August, 1952, these Forces were renamed the National Safety Force and the Coastal Safety Force and were placed under a National Safety Agency. In July, 1954, the Agency was renamed the Defence Agency, the Forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force, was created. At the same time the mission of the forces was extended to include the defence of Japan against direct and indirect aggression.

A Treaty of Mutual Co-operation and Security between Japan and the U.S.A. was signed in January, 1960, replacing an earlier Security Treaty signed in 1951 at the same time as the Peace Treaty. By this Treaty each country recognized that an armed attack against either in the territories under the administration of Japan would be dangerous to its own safety and declared that it would act to meet the counter danger.

By 1969 the authorized uniformed strength of the three Self Defence Forces was 179,000 in the G.S.D.F., 37,813 in the M.S.D.F. and 41,183 in the A.S.D.F. The Combined Defence Agency vote for 1969-70 was Yen 483,810,000,000.

At the end of March, 1969, the GSDF was organized as five armies totalling 12 infantry divisions, one airborne brigade, one artillery brigade and two

Hawk (SAM) battalions. 7 of the infantry divisions have an authorized strength of about 9,000 (4 combat teams) and 5 have a strength of about 7,000 (3 combat teams). Major equipment includes about 800 tanks, 4,500 artillery pieces and over 300 aircraft. Equipment is now largely of Japanese manufacture.

The MSDF has about 210 warships totalling 126,000 tons and including one TARTAR-armed GMD, 39 other escort ships, 10 submarines, 40 minesweepers and 50 patrol craft. Principal AS weapons include ASROC and DASH. The MSDF has a total of 230 aircraft including 150 AS aircraft. All are land-based.

The ASDF has about 980 aircraft made up of 490 fighters, 50 search and reconnaissance, 50 transport, 360 trainers and 30 helicopters. The principal fighter is the F.104S. There are also 11 battalions of Nike-Ajax missiles (70 launchers).

**Religion.**—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 1 Cardinal, 1 archbishop and 14 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 11 Japanese bishops (1968) and is an autonomous branch of the Anglican communion. There is also a United Protestant Church.

**Education.**—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In May, 1968, the total number of these junior colleges and universities was 845, of which 98 were established and maintained by the State, while 78 were established and maintained by prefectures and cities, and 669 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaidō (Sapporo), Kyūshū (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

**Language and Literature.**—Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Japanese who have received school education (99.8 per cent. of the population) can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In April, 1968, there were 826 libraries open to the public (The National Diet Library and 825 public libraries) with 30,164,000 volumes. In addition there were 780 University libraries with 35,624,766 volumes. There were 101 daily newspapers in Japan of which 25 were published in Tokyo, 12 at Osaka and 5 in the Nagoya region (all editions included). Japan's total newspaper circulation was estimated at 33,792,078 copies and 1.25 per household in October, 1968.

#### FINANCE

The Budget for the financial year 1969-70, ending March 31, is estimated to balance at Yen 6,739,574,000,000 for revenue and expenditure on the general account, an increase of 15.8 per cent. over the preceding financial year.

The official rate of exchange with Sterling on Sept. 12, 1969, was Yen 855 = £1. (See also p. 83.)

#### PRODUCTION AND TRADE

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports consist of raw materials (cotton, wool, mineral oils, rubber, iron ore, coking coal, salt, wood pulp, hides), foodstuffs (wheat, barley, soya beans, sugar), petroleum, chemicals and specialized machinery. Principal exports consist of cotton and rayon textiles, machinery, ships, metals and products, canned fish, chemicals and a wide variety of manufactured goods, including chinaware, toys, bicycles, sewing machines, cameras and transistor radios.

#### FOREIGN TRADE

	1967	1968

## JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age.  
Crown Prince, Prince Hassan, third son of King Talal of Jordan, born 1948, appointed Crown Prince, April 1, 1965.

## CABINET

Prime Minister, Sayid Abdul Mon'im Al Rifai.  
Deputy Prime Minister, Minister of Defence and Foreign Affairs, Sayid Ahmad Tuqan.  
Deputy Prime Minister and Interior, Sayid Akef al Fayez.

The Cabinet consists of the above and a further 12 members.

JORDANIAN EMBASSY AND CONSULATE  
6 Upper Phillimore Gardens, W.8

[01-937-3685]

Ambassador Extraordinary and Plenipotentiary, His Excellency Saad Jumaa (1969)  
Military, Naval and Air Attaché, Brig. Mahmoud Kurdi.

1st Secretary, Nabih N. Nimr.  
3rd Secretaries, Kasim Ghazzawi; Miss Zein Rifai.  
Finance Officer, Lieut. H. Hamarneh.  
Service Attaché's Office, 18 Upper Phillimore Gardens, W.8 [01-937-9611].

Area and Population.—The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the State. Total population in December, 1967, was estimated at 2,145,000. (For MAP, see p. 885.)

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (30 persons nominated by the King) and a House of Representatives, consisting of 60 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 1,095,227 tons were exported in 1968.

Communications.—There is an excellent trunk road system. The Hejaz Railway is now being rebuilt and an extension to Saudi Arabia is planned. ALIA (Royal Jordanian Airlines) operate air services from Amman to nearby countries and to Athens, Rome, Paris and London.

## FINANCE

3rd Secretary, J. McDougall (Administration).

## BRITISH COUNCIL

Representative, E. H. T. Fitzsimmons, M.B.E., P.O. Box 634, Jebel Amman, Amman.

## KOREA

(Hankuk)

Korea is situated between 124° 11' and 130° 57' E. long., and between 33° 7' and 43° 1' N. lat. It has an area of 85,256 sq. miles with an estimated population of about 42,484,000, of whom about 30,000,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart).

Agriculture.—The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and sericulture are also practised. Gingseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (now in North Korean hands) but also in parts of South Korea. It forms a rich source of revenue.

Minerals.—Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country but are more abundant in the north.

In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Political necessity in recent years has led to some industrialization south of the demarcation line, but the southern portion of the peninsula remains predominantly agricultural.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South

Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korean forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Incheon which was quickly followed by a breakout from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier, when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not accepted by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 15, 1954, but failed to agree on measures for reunifying the country.

#### Republic of Korea

President, Gen. Park Chung Hee, assumed office, March 22, 1962; re-elected for four years 1963 and 1967 (May 3).

Prime Minister, Chung Il-kwon (May 8, 1964).

#### KOREAN EMBASSY

36 Cadogan Square, S.W.1

[01-589-0690; 8025]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ei Whan Pai (1967).  
Ministers, Rear-Adm. Sihak Hyun; Keun Park.  
Counsellors, Sang Doo Park; Keun Sup Chang.  
Naval, Military and Air Attaché, Col. Sang Sup Rim.  
2nd Secretary, Kwang Yoon Kim.  
3rd Secretaries, Hyung Ky Min (Vice-Consul); Suk Hyun Kim (Vice-Consul).  
Communications Attaché, Ki Won Choi.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 38,022 sq. miles and a population of 29,207,856 (Census of 1966); estimated, 1967, 29,784,000.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected the late Dr. Syngman Rhee as the first President of the Republic of Korea, an office which he held until 1960. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end.

President Syngman Rhee succeeded President by Dr. John M. Chang whose Government was, however, overthrown by a revolution led by army officers. On March 22, 1962, General Park Chung Hee took over as acting President, retaining his post as Chairman of the Supreme Council. Elections were originally promised for May and August, 1963, respectively, but when political activities were allowed to start again at the beginning of that year there was considerable confusion, so that the military government decided to retain power until December, 1963. Elections were then held in which General Park Chung Hee was elected and the Democratic Republican Party secured a majority. At further elections held on May 3, 1967, Gen. Park Chung Hee was returned by a comfortable majority for a new four-year term and on June 8, 1967, his Democratic Republican Party secured additional seats in the National Assembly.

The Republic of Korea has an army of about 550,000 men, a small navy mainly for coast protection duties, a small air force and a Marine Corps which includes one division trained in amphibious operations.

Finance.—The Budget for the year ending December 31, 1967, totalled *Won* 141,628,956. Expenditure on National Defence is estimated at *Won* 40,534,521.

The unit of Korean currency is the *Won*. On March 24, 1965, a unitary fluctuating rate of exchange was introduced and since devaluation of sterling the rate has been about *Won* 660 = £1.

Trade.—The Republic of Korea's main exports are tungsten and iron ores, graphite, anthracite, fish and fish products, agar-agar, seaweed, raw silk, textile yarns and fabric. Her main customer is Japan. Imports greatly exceed exports. In 1966 exports totalled \$U.S.250,334,000; imports amounted to \$U.S.716,441,000.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£2,325,000	£6,074,000
Exports to U.K. . . . .	2,645,000	2,656,000

CAPITAL.—Seoul, population (1966), 3,794,959. Other main centres are  $\Psi$ Pusan (pop. 1,425,703), Taegu (pop. 845,073) and  $\Psi$ Inchon (pop. 525,072). Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Seoul, the main

ports but the development of Incheon is hampered by ■ tide variation of 28–30 feet.

**NATIONAL DAY.**—August 15 (Independence Day).

### KUWAIT

(The State of Kuwait)

*Amir, H.H. Shaikh Sabah as-Salem as-Sabah, born 1915; acceded Nov. 24, 1965.*

*Crown Prince and Prime Minister, (Dec., 1965), H.H. Shaikh Jabir al-Ahmed as-Sabah; appointed Crown Prince, May 31, 1966.*

#### KUWAIT EMBASSY IN LONDON

40 Devonshire Street, W.1

[01-580-8471]

*Ambassador, His Excellency Shaikh Salem al-Sabah al-Salem (1965).*

**Area and Population.**—Kuwait extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population (Census, 1965) of 468,000; estimated 1967, 520,000. It is estimated that just over one-third of this total are Kuwaitis, the remainder being large numbers of other Arab peoples, Persians, Indians and Pakistanis. The total European and American population is about 4,600. Kuwait has a hot, dry climate with ■ summer season extending from April to September. During the coldest month (January) the temperatures can fall below freezing, but normally range between 50° to 60°F. Shade temperatures are about 85°F.; and can reach 125°F.; 180°F. has been recorded in the sun. Humidity rarely exceeds 60 per cent. except in July and August.

**Government.**—Although Kuwait had been independent for some years, the "exclusive agreement" of 1899 between the Shaikh of Kuwait and the British Government was formally abrogated by an exchange of letters dated June 19, 1967. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait and, in accordance with the terms of the exchange, the Amir requested British military assistance to help him maintain his sovereignty and independence, which was immediately supplied. British troops were withdrawn in October, 1967, and replaced by the Arab League Security Force composed of contingents from various Arab States. The withdrawal of this Force was completed in January, 1963. On May 7, 1963, Kuwait ■ admitted to the United Nations and on

Oct. 4, 1963, Iraq recognized Kuwait's independence. On May 13, 1968, an exchange of Notes was signed giving notice that the 1961 defence agreement with the United Kingdom would end on May 31, 1971.

Elections were held in December, 1962, for a Constituent Assembly, which held its first meeting in January, 1962. A council of Ministers including non-members of the ruling family was formed in January, 1962, to replace the former Supreme and Joint Councils. Under the Constitution drafted by the Constituent Assembly, the first 50-member National Assembly was elected in January, 1963. The present National Assembly was elected for four years in January, 1967. The Constitution provides that the Assembly must pass all laws and approve the Heir Apparent nominated by the Amir. The Prime Minister is appointed by the Amir and can appoint his Ministers from the members of the Assembly or from outside. The Assembly has the right to pass a vote of no confidence in any Minister except the Prime Minister.

**Education, etc.**—As a result of the very considerable oil revenues, the Kuwait Government embarked on ■ large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. Kuwait University was opened in 1966. In 1967 there were 58,702 boys and 43,026 girls in 172 government schools.

**Public Utilities.**—Kuwait has a domestic water supply from water distillation plants which operate on waste natural gas from the oil fields. These plants can produce over 25,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. There is also a 7,500,000 gallon reservoir at Shuaiba attached to the power station there and a 10,000,000 gallon storage reservoir at Hawalli.

In 1961 a natural source of fresh water was discovered at Raudhatain in the north of the State. This has been developed to produce 5,000,000 gallons per day for at least 20 years and a pipeline has been built to carry the water to Kuwait town. Kuwait signed an agreement with Iraq on Feb. 12, 1964, allowing her to draw up to 220,000,000 gallons of sweet water a day from the Shatt-al-Arab, but this has yet to be implemented. Two power stations are now in operation at Kuwait (output, 160,000 kW. per day) and at Shuaiba (210,000 kW.). The town is now served by ■ network of dual carriageway roads and more are under construction. Expenditure on roads in 1968–69 was estimated at £5,600,000.

**Communications.**—Ships of British, Dutch, Kuwaiti and other lines make regular calls at Kuwait. B.O.A.C., Kuwait Airways, K.L.M., Lufthansa and several international and Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications, telephone and postal services are conducted by the Kuwait Government, which is also building ■ earth satellite station.

**Finance.**—Banking is carried out by the British Bank of the Middle East, the National Bank of Kuwait, the Commercial Bank, the Gulf Bank and the Ahli Bank. The banking system is controlled by the Central Bank of Kuwait. The Kuwait *dinar* = 23s. 6d sterling.

National revenue is expected to reach KD 918,000,000 (= £1,071,000,000) by 1972. It is estimated that Kuwait's Five Year Plan will cost KD 700,000,000. It includes the following allocations: housing and public buildings, KF177,000,000; transport and communications, KD152,000,000; municipal and public services, KD46,000,000;

education, KD50,000,000; public health KD33,000,000; oil and gas, KD99,000,000; and other industry, KD119,000,000.

**Production and Trade.**—The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina-al-Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1968 totalled 120,162,473 tons. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. It has about 5,123 employees, including British, Americans, Indians, Pakistanis, Kuwaitis and Arabs from neighbouring territories. In May, 1962, the Company relinquished about half of its original concession area. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. Concessions for this area are held by the American Independent Oil Co. (Aminoil) from Kuwait and the Getty Oil Company from Saudi Arabia. Aminoil's production for 1968 (*i.e.*, Kuwait's share from the Neutral Zone) was 2,171,833 tons.

The Arabian Oil Company, of Japan, having been awarded in 1958 the oil concession for the Neutral Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 1960. The first shipment of crude oil was made in March, 1961. Kuwait's share of Arabian oil production in 1968 was 7,640,603 tons. A concession covering the off-shore area of Kuwait proper was awarded to the Shell Company in November, 1960, and the concession agreement in the name of The Kuwait Shell Petroleum Development Co. was signed in Kuwait on January 15, 1961. Exploratory drilling began in 1962 but was suspended in the autumn of 1963. The establishment of a Kuwait company, The Kuwait National Petroleum Co., was authorized by an Amiri Decree on October 5, 1960. This company took over the distribution of petroleum products in Kuwait from the Kuwait Oil Co., on June 1, 1961, and was, in partnership with the Spanish Company Hispanoil, awarded the concession to exploit the area relinquished by the K.O.C. Ltd. in 1962.

In addition to petroleum products, skins and wool are also exported. Trade in 1968, amounted to: Imports: £254,712,800; Exports (including re-exports), £19,514,397, excluding oil.

#### Trade with U.K.

*Prime Minister, Prince Souvanna Phouma (June 23, 1962).*

#### EMBASSY IN LONDON 5 Palace Green, W.8

*Ambassador Extraordinary and Plenipotentiary, H.R.H. Prince Khammao (1967).*

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of Champassac, united under King Sisavang Vong of the House of Luang Prabang, father of the present ruler. The country has an estimated area of 90,000 square miles and an estimated population of 3,000,000. The independence of the kingdom was recognized by France in July, 1949. In the Indo-China war the rebel *Pathet Lao* forces led by Prince Souphannouvong collaborated with the *Viet Minh*. The 1954 Geneva Agreements provided for the integration of the *Pathet Lao* forces and the re-unification of the country. Agreement was reached on these points in November, 1957 but the agreement broke down and in 1958 a more right-wing government was formed and in 1960 elections brought an openly anti-Communist ministry to power.

The government was overthrown on August 3, 1960, by a *coup d'état* led by Captain Kong Le. The new government of Prince Souvanna Phouma was opposed by one half of the army led by General Phoumi Nosavan who retook Vientiane in December, 1960, and, Souvanna Phouma's government having fled, a government under Prince Bou Oum was approved by the National Assembly in January, 1961. Captain Kong Le and Prince Souvanna Phouma retired to Xieng Khouang where, in collaboration with the pro-communist *Pathet Lao* forces and with material support from communist countries, they were able to counter-attack successfully and compel the Government forces to agree to a cease-fire. A 14-nation conference met in Geneva in May, 1961 to work out an international framework for Laotian neutrality. Agreement was held up by internal rivalries in Laos, but in June, 1962, the "three Princes" finally agreed on a coalition government under Prince Souvanna Phouma, and a new Geneva agreement to safeguard Laotian neutrality was signed on July 23.

Since then no progress has been made towards the unification and pacification of the country. The two senior *Pathet Lao* ministers left Vientiane in April, 1963, and remained in *Pathet Lao*-occupied territory in the north of Laos. Attempts were made to persuade them to return and to re-assemble the Government of National Union outside Vientiane but without success. The other two *Pathet Lao* ministers left in 1964, leaving behind only a junior representative.

In April, 1964, a military *coup d'état* led by rightist General Kou Prasith Abhay and Police General Siho attempted to overthrow Prince Souvanna Phouma but the King insisted on his remaining in office at the head of the same Government of National Union. The *Pathet Lao* responded promptly to the *coup d'état* and fighting broke out on and around the Plain of Jars during which their troops, with North Vietnamese support, forced the withdrawal of Kong Le's neutralist forces from the Plain of Jars. Consultations between representatives of six of the signatory powers of the 1962 Geneva Declaration and the Royal Government of Laos took place in Vientiane in June, 1964, in response to the Prime Minister's

call for talks under article IV of the Geneva Agreement, in order to consider measures necessary to restore the situation and to ensure the observance of the Geneva Agreement.

In February, 1965, fighting took place in Vientiane between troops loyal to the Government and those supporting the right-wing Vice-Premier, Gen. Phoumi, and Police General Siho. The latter were beaten and the two leaders fled to Thailand. They were stripped of all appointments. Gen. Siho returned to Laos where he gave himself up in June, 1966. He was later shot dead while allegedly trying to escape from prison. Phoumi now lives in Thailand and faces a thirty-year prison sentence should he return to Laos.

Elections on the basis of a limited suffrage took place in the Government-held areas in July, 1965. These were boycotted by the *Pathet Lao*. In September, 1966, the National Assembly was however dissolved following its rejection of the Government's budget proposals. Fresh elections were held in January, 1967, but these were again boycotted by the *Pathet Lao*. Backed by the Army and influential politicians, Prince Souvanna Phouma and his supporters gained considerable ground.

During the latter part of 1966, the Army Command brought under its immediate control both the Neutralist Army, whose leader Kong Le left Laos and finally went to France in June 1967, and the Air Force, whose leader General Thao Ma, after bombing Army H.Q. in Vientiane, fled to Thailand and sought political asylum there.

Laos is now in effect divided into two halves between which a civil war is being fought. The Communists (*Pathet Lao*) control the Northern and Eastern half and are assisted by approximately 40,000 North Vietnamese troops, whose main interests are the safeguarding of communications between North and South Vietnam along the Ho Chi Minh trail and the maintenance of the *Pathet Lao* ■ ■ credible alternative to the present Vientiane Government.

During 1968 and 1969 the Communist forces made substantial gains as ■ result of which they now have control of most of the territory they had occupied in 1962.

Laos imported goods to the value of £607,000 from the United Kingdom in 1968 (1967, £454,000).

**CAPITAL.**—Vientiane, population (estimated, 1962), 162,297.

**FLAG.**—Three-headed white elephant on 5 steps, surmounted by parasol, all on a red ground.

**NATIONAL DAY.**—May 11 (Independence Day).

#### LEBANESE EMBASSY IN LONDON

(21 Kensington Palace Gardens, W.8)

[01-229-7265]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Nadim Dimechkie (1966).

1st Secretaries, Zafer El-Hassan; Samir El-Khoury (*Consular*).

*Military, Naval and Air Attaché*, Col. Nicolas Samaha.

*Consular Section*, 15 Palace Gardens Mews, W.8 (01-229-8485).

*Area and Population.*—Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Israel frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have ■ Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses. The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 2,600,000 in 1968. (*For MAP, see p. 885*).

*Production.*—Fruits are the most important products and include citrus fruit, apples, bananas and olives. Industry is on ■ small scale, the most important industries being those connected with food and drinks (sugar refining, flour milling, confectionery, wines and beer, etc.), building materials, furniture and the textile industry. There is little remaining of the famous cedars of Lebanon.

*Railways.*—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with ■ branch of the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotcheq. A standard gauge railway also runs up the coast from Beirut to Tripoli.

*Civil Aviation.*—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local services connect with all Middle Eastern capitals except Tel Aviv. Lebanon has two international airlines of its own, Middle East Airlines/Air Liban, primarily a passenger carrier, and Trans Mediterranean Airways, specializing in freight.

*Archæology, etc.*—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of first to third century Roman temples and Jubal (Biblos), one of the

oldest continuously inhabited towns in the world, and ancient Tyre which is in course of excavation.

**Language and Literature.**—Arabic is the principal language (see Arabia), and French is also widely used. The use of English is increasing. About 40 daily papers are published, including 3 in French, 2 in English and 4 in Armenian; and 11 further 30 periodicals.

**Education.**—There are four universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University and the Arab University which are recent foundations in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are 11 great number of private schools.

**Finance.**—Revenue and Expenditure, 1967 (Estimated) £L631,681,000. The monetary unit is the Lebanese £(L); official rate £L7.58 = £1. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about £L7.00 = £1. (See also p. 84).

**Principal Imports.**—Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, wood, pharmaceuticals, raw hides, sugar, motor-vehicles, live-stock, wheat, flour, machinery, crude oil, chemicals and domestic electric appliances, and paper.

**Principal Exports.**—Gold and precious metals, citrus fruits, onions, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap, butter, cereals, oil-seed, cement products, wooden and steel furniture, tobacco and wines.

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£13,080,000	£20,220,000
Exports to U.K. ....	3,125,000	4,233,000

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at the end of each pipeline which can fulfil Lebanon's needs.

**CAPITAL.**—Ψ Beirut (population about 600,000) Other towns are Ψ Tripoli (150,000), Zahlé (40,000), Ψ Sidon (36,000), Ψ Tyre (12,000).

**FLAG.**—Horizontal bands of red, white and red with 11 green cedar of Lebanon in the centre of the white band.

**NATIONAL DAY.**—November 22.

**Counsellor (Consular Section),** C. Birch.

An independent republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', 11 distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. The population at the Census of 1962 was 1,000,000 (estimated 1967, 1,098,000). (For MAP, see p. 872).

The executive power is vested in a President elected for 4 years (8 years in the first instance) assisted by 11 Cabinet; there are two houses of Legislature, the Senate and the House of Representatives. The Senate is composed of eighteen members elected from each of the nine Counties. They hold office for a period of six years. The House of Representatives is composed of fifty-two members, each member holding office for four years. The Army of Liberia consists of one division of 11 brigades of militia, three regular infantry battalions, one engineer battalion and a small coast-guard. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S.A.I.D. (successor to I.C.A.), particularly in the field of education, and technicians have been sent from U.S.A. to advise on various projects. Technical assistance is also being provided by several other countries, including the United Kingdom. UNESCO, WHO and FAO have missions in the country providing technical assistance. The U.S.A. has also made loans for the improvement of power and water supplies, roads and hospitals.

#### FINANCE

## LIBYA

[King Idris I was deposed in his absence from the country on Sept. 1, 1969, by a group of army officers who formed a Revolutionary Command Council and declared the country a republic. All the legislative institutions in Libya were stated to be abolished. A Cabinet of eight was formed on Sept. 9, 1969, including the following:

*Prime Minister*, Dr. Mahmoud Soliman al Maghrabi.  
*Minister of Foreign Affairs and Unity*, Saleh Bousseir.]

## LIBYAN EMBASSY IN LONDON

58 Princes Gate, S.W.7

[01-589-5235]

*Ambassador*, (vacant).

*Counsellor*, Salem Kuka.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three former provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population (estimated, 1967), of 1,802,000. The people of Libya are principally Arab with some Berbers in the West and aboriginal tribes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal

Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Jagabub, Gadames, Jofra, Sebha, Murzuch, Brach, Gat, Jalo and the Kufra group in the South-East. Exports from Libya include crude oil, wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. Including the nineteen new concessions which were awarded in the spring of 1966, there are now forty-five oil companies prospecting in the country, of which seven (Esso, Oasis, Mobil, Amoseas, Phillips, B.P. and Occidental) are already producing oil in commercial quantities from 18 fields. In addition to the Esso main pipeline from Zelten to the terminal at Mersa Bregha, and the U.S. Oasis Company's pipe-line from Dahra to Ras-es-Sidre, Mobil's new 176 mile pipe-line from Amal to Ras Lanuf went into operation in early 1966, the B.P. line from Serir to Tobruk in February, 1967, and the Occidental line from the Idris field to Zveitina in April, 1968. A new gas liquefaction plant is to be opened at Mersa Bregha. Production of crude oil in 1968 was running at an average of 2,600,000 barrels per day, 49.3 per cent. above the 1967 production rate.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. Recently an Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 5,000 years old. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area, where a motor road (now under reconstruction to international standards) runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, in the Fezzan, was completed in October, 1962. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. There are airports near Tripoli (Idris

el Awal) and Benghazi (Benina), Tobruk (El Adem), Marsa Brega, Sebha, Ghadames and Beida regularly used by commercial airlines and military airfields at El Adem and Wheelus Field (Mellaha) (near Tripoli).

**Government.**—Libya occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations. A *coup d'état* took place in Libya during printing of this edition (see EVENTS OF THE YEAR).

**Local Government.**—Until the amendment of the Constitution in 1963, Libya was a Federal State, each of the three Provinces, Tripolitania, Cyrenaica and Fezzan, being administered by a Governor assisted by Executive and Legislative Councils. In April, 1963, however, comprehensive unity was proclaimed and the Federal system (together with the Governors and the Executive and Legislative Councils) abolished. The country is now divided into ten divisions, each administered by a Commissioner (*Muhafidh*).

**Currency.**—The £ Libyan is equal to £1 3s. 4d. Sterling and is divided into 1,000 millîmes. There are five denominations of notes (£10, 5, 1, ½, and ¼) and six denominations of coins (1, 5, 10, 20, 50 and 100 millîme pieces). (See also p. 83).

Technical assistance is being provided by the United Nations, the United States and the United Kingdom to foster Libya's economic development.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953. Libya makes military facilities available to British troops (including the R.A.F.) which are stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States-Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic development during the period of this Agreement which runs until Dec. 24, 1970.

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£22,514,000	£34,156,000
Exports to U.K. ....	66,389,000	157,865,000

**CAPITAL.**—Tripoli and Benghazi are the joint capitals of Libya. A new capital is under construction at Beida in Cyrenaica, to which some Ministries have now officially moved.

The principal towns with the latest available estimates of populations are: Tripoli (231,955); Misurata (70,015); Benghazi (107,657); Khoms-Cussabat (66,559); Derna (21,432); Barce (10,645); Tobruk (15,867); Sebha (9,804).

**FLAG.**—The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre. **NATIONAL DAY.**—December 24 (Independence Day).

### LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., b. Aug. 16, 1906; *suc.* Aug. 25, 1938; married March 7, 1943, Countess Gina von Wilczek. *Heir.* Crown Prince Hans Adam, b. Feb. 14, 1945; married July 30, 1967, Countess Maria Kinsky.

Liechtenstein is represented in diplomatic and consular matters in the United Kingdom by the Swiss Embassy, 4.v.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 65 square miles and a population (census, Dec. 31, 1968) of 21,200. The main industries are metal goods, cotton spinning and weaving, calculating machines, cameras, measuring instruments, coating of lenses, manufacture of vacuum apparatus, ceramics, artificial teeth and sausage casings, textiles, various apparatus, foodstuffs, leatherware and woodwork. The chief products are cotton yarn, cotton material, screws, bolts and bolt-shooting apparatus, needles, knitting machinery, ceramics, artificial teeth, precision measuring instruments, vacuum pumps, coated lenses, shoes, leather gloves, calculating machines, cameras, bed springs, conveyor belts, cooking ovens, boilers, preserves, damask cloth, socks and stockings, and furniture. Revenue (1968), *Swiss francs* 51,501,733. Expenditure (1968) *Swiss francs* 46,867,083.

#### Trade with U.K.

Imports from U.K. ....	£81,000	£281,000
Exports to U.K. ....	1,102,000	1,520,000

The language of the Principality is German.

**FLAG:** Blue and red (blue at the top, red at the bottom, with a gold crown in the blue part).

**CAPITAL, Vaduz.** Pop. (1968), 4,070.

British Consul-General, A. C. Maby, C.B.E. (office at Dufourstrasse 56, 8008 Zürich, Switzerland). Consul (Commercial), H. Gilmartin.

### LUXEMBURG

(Grand-Duché de Luxembourg)

Grand Duke, H.R.H. Jean, born Jan 5, 1921, married, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, 3 sons and 2 daughters; succeeded (on the abdication of his mother) Nov., 1964. *Heir Apparent*, Prince Henri, born April 16, 1955.

Prime Minister and Minister of the Treasury, M. Pierre Werner.

Deputy Prime Minister, Minister of the Interior, Justice and Armed Forces, M. Eugène Schaus.

Minister of Foreign Affairs, Physical Education and Sport, M. Gaston Thorn.

Agriculture and Viticulture, and Public Works, M. Jean-Pierre Buchler.

Education, Labour and Social Security, M. Jean Dupong.

Family, Youth, Health, Culture, Religion, Mme. Madeleine Frieden-Kinnen.

Economic Affairs, Middle Classes, Tourism and Transport, M. Marcel Mart.

EMBASSY AND CONSULATE  
27 Wilton Crescent, S.W.1  
[01-235-6961]

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency André J. Clasen, G.C.V.O. (1955).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the German Confederation, 1815-66, and was included in the German "Zollverein". In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (B.L.E.U.). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also member of the European Economic Community.

Besides B.L.E.U., Luxemburg is also a member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux). The Court of the European Community has its seat in Luxemburg, as does the Secretariat of the European Parliament and the European Investment Bank.

The area is 1,000 square miles; the population (1968) 336,500, nearly all Roman Catholics. There is a Chamber of 56 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses important iron and steel industry with an annual productive capacity approaching 5,000,000 tons (1968, 4,834,101 tons). The revenue for 1969 was estimated at L.F.11,003,535,000, expenditure L.F. 11,099,962,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy. Exchange Rate, 120 Francs = £1. There are 212 miles of railway.

Trade with U.K.

	1967	1968
Imports from U.K. ....	£1,104,000	£1,732,000
Exports to U.K. ....	3,237,000	5,352,000

The capital, Luxemburg, pop. (1964), 77,254, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; all speak German and many English.

FLAG.—Three horizontal bands, red, white and blue. NATIONAL DAY.—June 23.

MADAGASCAR

(Ny Repoblika Malagasy)

President and Head of Government, M. Philibert Tsiranana, elected, 1959; re-elected, 1965.  
Vice-President of the Government, M. Calvin Tsibo.  
Minister of Foreign Affairs, M. Jacques Rabemananara.

MALAGASY EMBASSY IN LONDON  
33 Thurloe Square, S.W.7.  
[01-584-3714]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Césaire Rabenoro (1967).

Counsellors, H. Razafindratovo (1st Counsellor); G. Andrianasolo (Commercial); R. Rambahiniarison (Economic); Mme. G. Rabenoro (Cultural).

Area 228,000 sq. miles. Population (1968), 7,032,882. Madagascar is 240 miles distant from the S.E. coast of Africa and is the fifth largest island in the world. It became a French protectorate in 1895. In 1896 the Hova dynasty was suppressed and the administration entrusted to a Governor-General. Constitutional reforms were introduced in 1957, giving the island internal autonomy and Madagascar adopted republican status on Oct. 14, 1958, while remaining within the French Community. Complete independence was proclaimed on June 26, 1960, and immediately thereafter, the President of the Republic, M. Philibert Tsiranana, signed formal agreements with the French Government confirming Madagascar's continued membership of the French Community and establishing co-operation with the French Republic in defence, monetary, judicial and educational matters, etc.

The island's economy is still mainly agricultural. A first development plan (1964-68) was put into operation in 1965, with emphasis on increased agricultural production and creation of small industries. A second development plan was expected to start in 1970. The principal exports in 1968 in order of value were: coffee (31 per cent. of total), vanilla (8 per cent.), rice, cloves, sugar, meat and meat products, petroleum products, sisal, clove oil, raffia, tobacco and cigarettes, pepper, butter beans, graphite, hides and skins, mica, groundnuts, bran and oilcakes, fish and shell-fish, cattle, tapioca and bananas. Cattle raising is an important activity and scientific breeding has been started. A livestock development project is being financed by a World Bank loan. Minerals mined and exported, which until recently comprised mainly graphite and mica, now include chromium ore. Total exports in 1968 were FMG28,607,900 compared with FMG25,711,308 in 1967. The main imports in 1968, totalling FMG42,024,100 (1967, FMG 35,885,300) were transport equipment, textiles, chemicals and semi-chemical goods, metal products, food products, machinery, crude and other petroleum products, electrical equipment, paper and paper products.

Trade with U.K.

	1967	1968
Imports from U.K. ....	£582,000	£1,047,000
Exports to U.K. ....	700,000	1,431,000

The average rate of exchange is Malagasy francs (FMG) 590 = £1. (See also p. 84.)

CAPITAL.—Antananarivo (361,870). Other towns with 1968 populations are: Ψ Tamatave (53,173).

the chief port; Ψ Majunga (47,654); Fianarantsoa (45,790); Diego-Suarez (43,992); Tuléar (33,842); Antsirabe (29,914).

The former dependencies of Madagascar in the Mozambique Channel, Juan de Nova, Europa Island and Bassas da India (uninhabited), are integral parts of the French Republic and, as such, are administered by the Ministry of Overseas Territories and Departments of the French Government. The Island of Saint-Marie, off the east coast of Madagascar is recognized as a dependency of the Malagasy Republic but its inhabitants enjoy dual (French/Malagasy) nationality.

FLAG.—Equal horizontal bands of red (above) and green, with vertical white band by staff.

NATIONAL DAY.—October 14 (Proclamation of Republic).

#### BRITISH EMBASSY

2nd Secretary, D. S. Gale.

*Commercial Attaché and Vice-Consul, M. Pitchen.*

There is an Honorary British Vice-Consul ■  
*Tamatave.*

### THE MALDIVES

*President, His Excellency Amir Ibrahim Nasir.*

*Area, etc.*—The Maldives are ■ chain of coral atolls, some 400 miles to the south-west of Ceylon, stretching from just south of the equator for about 600 miles to the north. There are 12 clearly defined atolls, separated from each other by deep channels, through which the currents run strongly. The total number of islands is over 1,067, some being very small; about 210 of them are inhabited. The population of the islands according to the 1967 census figures is 103,801. The people are Muslims and the Maldivian language is akin to Elu or old Sinhalese. They are highly civilized and are great navigators and traders.

*Government.*—The Maldives form a Republic which is elective. There is a Parliament (the *Majlis*) with representatives elected from all the atolls. The life of the *Majlis* is 5 years. The Government consists of the President and the Cabinet, who are responsible to the *Majlis*. By the agreement signed with the British Government in 1965, the Maldives form a composite sovereign and fully independent state, free to conduct their own external relations with other countries.

With the agreement of the Maldivian Government, an R.A.F. staging post has been constructed on Gan Island, in Addu Atoll, the most southerly atoll, lying just south of the equator.

*Production, etc.*—The islands are thickly covered with coconut palms, and coir and ropes are exported. The principal industry is fishing and considerable quantities of dried fish are exported to Ceylon, where it is in great demand.

CAPITAL.—Malé (population about 11,760). Communications are by steam or sailing ship, and an air strip has been constructed on Hulule Island about 1 mile from Malé.

#### BRITISH REPRESENTATION

*Ambassador Extraordinary and Plenipotentiary, His Excellency A. M. MacKintosh, C.M.G. (1969)*  
(concurrently British High Commissioner in Ceylon).

### MALI

(Republic of Mali)

*Chairman, National Liberation Committee, Lt. Moussa Traore, born 1937, assumed office Nov. 20, 1968.*  
*Prime Minister, Capt. Yoro Diakité, appointed Nov. 23, 1969.*

The Republic of Mali, an inland state in north-west Africa has an area of 465,000 square miles and the population was estimated at 4,787,000 in 1968.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 11 by the secession of Senegal. The title of the Republic of Mali was adopted on Sept. 22, 1960. The Republic is no longer a member of the French Community. On July 1, 1962, a Mali franc equal in value to the Franc CFA was introduced and ■ new State bank set up.

The régime of Modibo Keita was overthrown on Nov. 19, 1968, and the President arrested by a group of Army officers, who formed a National Liberation Committee and appointed ■ Prime Minister. A new constitution for Mali was promised for 1969 and Lieut. Traore assumed the functions of Head of State pending the outcome of a constitutional referendum.

Mali's principal exports are groundnuts (raw and processed), cotton fibres, meat and dried fish. The principal rivers are the Niger and the Senegal. Goods to the value of £75,000 were imported from the United Kingdom in 1968 (1967, £294,000).

CAPITAL.—Bamako (150,000). Other towns are Gao, Kayes, Mopti, Sikasso and Segou (all regional capitals), and Timbuktu.

FLAG.—Vertical stripes of green (by staff), yellow and red. NATIONAL DAY.—September 22.

#### BRITISH EMBASSY

*Ambassador Extraordinary and Plenipotentiary, His Excellency John Gabriel Tahourdin, C.M.G. (1969) (resident at Dakar).*

### MAURITANIA

(Islamic Republic of Mauritania)

*President and Prime Minister, Moktar Ould Daddah, assumed office Nov. 28, 1958.*

Mauritania lies on the north-west coast of Africa between Spanish Sahara and the Republic of Senegal.

gal. It is bounded on the east and south by the Republic of Mali. Area 419,000 sq. miles. The population of Mauritania was estimated at 1,100,000 in 1968. (For MAP, see p. 872.) The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic. It became fully independent on Nov. 28, 1960. Mauritania's main source of potential wealth lies in rich deposits of iron ore around Fort Gouraud, in the north of the country. These are being exploited by an international company, the Société de Mines de Fer de Mauritanie, with the aid of a loan from the I.B.R.D. Exports began in June, 1963, by a new railway built to link the mine with the Mauritanian coast at Nouadhibou. A company has been set up to exploit copper deposits at Akjouit, starting in 1970.

#### MEXICAN EMBASSY IN LONDON

48 Belgrave Square, S.W.1

[01-235-6393]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Lic. Don Eduardo Suárez (1965).  
Minister, Señor Don Antonio Gonzalez de Leon.  
Counsellors (Cultural Affairs), Señor Lic. Don Hugo Gutiérrez Vega; Señor José Manuel Orozco Uruchartu.  
Counsellor, Señora doña Francisca Celis (Information).  
and Secretary, Señor Don Luis Wybo Alfaro (Consular Affairs).  
Commercial Attaché, Señor Lic. Don Román Millán Morales.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 14° 33' to 32° 43' N. lat. and 86° 46' to 117° 08' W. long., and comprising one of the most varied zones in the world. It contains 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles. Results of the Mexican General Census taken on June 8, 1960, showed a total population of 34,923,129; estimated (June, 1969), 48,933,000.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to the convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the Sierra Madre, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. The low-lying lands of the coasts form the Tierra Caliente, or tropical regions (below 3,000 ft), the higher levels form the Tierra Templada, or temperate region (from 3,000 to 6,000 ft.), and the summit of the plateau with its peaks is known as Tierra Fria, or cold region (above 6,000 ft.). The only considerable rivers are the Rio Grande del Norte which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the Rio Grande de Santiago, the Rio Balsas and Rio Papaloapan. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas". The largest fresh-water lakes are Chapala (70 miles long and 20 miles wide), and Pátzcuaro. In the north-west are saline lakes amid bare and dry regions. The climate varies according to altitude, the rainy season lasting from June to October.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flourished in the periods from 500 to 1100 A.D. and 1300 to 1500 A.D. and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive

archaeological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in Yucatan and Chiapas (Maya); Teotihuacán, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacáno); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Vera Cruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to the war of 1845-48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency resulted in invasion by French forces which installed Maximilian as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Díaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

**Government.**—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of a Senate of 60 members, elected for six years, and of a Chamber of Deputies, at present numbering 210, elected for three years. Presidents, who wield full executive powers, are elected for six years: they cannot be re-elected.

There are four political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the government party.

**Communications.**—Veracruz, Tampico and Coatzacoalcos are the chief ports on the Atlantic, and Guaymas, Mazatlán, Acapulco and Salina Cruz on the Pacific. The total tonnage of registered merchant marine at the end of 1967 was 573,805 tons. There were 23,826 kilometres of railway track open in Mexico in 1967. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system; help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States.

The total length of road at the end of 1968 was 58,298 kilometres, of which 55,359 kilometres were usable in all weathers. Mexico City may be reached by at least three excellent roads from the United States, and work is complete on roads southward from Mexico City to Yucatan and the Guatemalan border. The toll road from Mexico City to Córdoba is nearing completion.

At the end of 1963 the national telegraph system's lines were 191,653 kilometres in length. International telegraph services to the United States frontier are provided by the Government-owned Mexican Telegraph Company and then through the United States to Canada and Europe.

Telephone communications are similar, with 3,529,263 km. of lines in 1963.

There is a good national and international network of air services. Distance covered in 1966 totalled 133,000,000 kilometres. Registered civil aircraft numbered 1,692 in August, 1966.

**Production.**—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 34,000,000 acres are under cultivation and great efforts are being made to increase this area. Grazing land is estimated at 80,000,000 acres (plains) and 125,000,000 acres (highlands) and about 46,000,000 acres are covered by exploitable forests. The principal agricultural crops are maize, beans, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, rice, chick-peas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus yields several fermented drinks, mezcál and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries, over 80 per cent. of all consumer goods now being made in Mexico. Most of the remaining 20 per cent. is in fact made up of bulk imports of industrial equipment and motor vehicles for assembly, so that the true figure for local manufacture of consumer goods is nearer to 95 per cent. The steel industry has expanded rapidly and produced 2,887,478 tons of steel in 1966. The mineral wealth is great, but in recent years the low world market prices have caused a slump in the mining industry. The principal minerals are gold, silver, copper, lead, zinc, quick-silver, iron and sulphur. Substantial reserves of uranium have been found. Production in 1967 amounted to Gold, 5,701 kilograms; Silver, 1,122 tons; Copper, 62,621 tons; Lead, 167,695 tons; and Zinc, 213,726 tons.

The total petroleum reserves were said to be 5,078 m. U.S. barrels in 1965. Total production of petroleum and natural gasoline reached 132,141,000 barrels and 14,000 million cubic metres respectively in 1965.

Woollen and cotton spinning and weaving, the making of footwear and clothing and of domestic appliances of all kinds have made such progress in recent years that all these industries are protected by high import duties and import licence restrictions.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 4,423 million kWh in 1950 to 20,959 million kWh in 1967.

**Defence.**—The regular army has a strength of fifty infantry battalions, one infantry brigade and a Presidential Guard of three battalions, 21 cavalry regiments, a parachute battalion and a small number of artillery and engineer units. There is also a conscript army of about 250,000 organized into National Service divisions, each 6,000-7,000 strong. The Navy has some 50 ships of all kinds and the Air Force some 180 aircraft.

**Language and Literature.**—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish as well. Of those speaking indigenous languages only, about 30 per cent. speak Nahuatl, 9 per cent. Maya, 1 per cent. Zapotec, 7 per cent. Otomi and 1 per cent. Mixtec, the

remainder speaking other varieties of the minor linguistic families. The National Library in the capital contains about 570,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

**Education.**—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1967 there were 40,424 primary schools with 7,494,515 pupils, 2,026 secondary schools with 600,558 pupils, and 1,335 technical and commercial secondary schools with 321,886 pupils. The National University of Mexico was founded in 1533 and reorganized in 1910. Apart from State technology institutes, there are 39 other Universities including one exclusively for women. The prevailing religion is Roman Catholic. In 1965, only 24 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

	1967	1968
Imports from U.K. . . . .	£26,406,000	£31,711,000
Exports to U.K. . . . .	„11,495,000	„18,036,000

The imports (mainly from U.S.A.) consist largely of machinery and implements for industry, mining and agriculture, and raw materials for industry. Principal exports are cotton, coffee, sisal (henequen), sugar, tomatoes and shrimps, lead, silver, zinc and other metals, tobacco, sulphur and heavy fuel oil.

**CAPITAL.**—Mexico City, population (estimated 1969), 7,425,000. Other towns (with estimated populations) are: Guadalajara (1,100,000), Monterrey (1,000,000), Ciudad Suarez (800,000), León (700,000), Puebla (285,284), Ψ Mérida (177,405), San Luis Potosí (173,886), Mexicali (171,648) and Chihuahua (144,653).

**FLAG.**—Three vertical bands, green, white, red, with shield of Mexico in centre. **NATIONAL DAY.**—September 16 (Proclamation of Independence).

**Transit from London to Mexico City.**—By air, 13 hours; By sea, U.K.—New York, 5 to 10 days; New York—Mexico City, by rail, 3 days; by air, 6 hours. There is a direct freight service from Liverpool to ports on both the Mexican Gulf and the Pacific Coast.

## MONACO

(Principauté de Monaco)

**Sovereign Prince, H.S.H. Rainier III-Louis-Henri-Maxence Bertrand, born May 31, 1923, succeeded his grandfather (H.S.H. Prince Louis II). May 9, 1949; married April 19, 1956, Miss Grace Patricia Kelly and has issue Prince Albert Alexandre Louis Pierre, born March 14, 1958, Princess Caroline Louise Marguerite, born January 23, 1957; and Princess Stephanie Marie Elisabeth, born Feb. 1, 1965.**

**Secretary of State, M. Pierre Blanchy.**

**President of the National Council, M. Francols Didier Gregh (Minister of State), appointed 1969.**

#### CONSULATE-GENERAL IN LONDON

4 Audley Square, W.1.

[01-629-0734]

**Consul-General, I. S. Ivanović.**

**Consul, A. J. Hucker, 3 Gray's Inn Square, W.C.1**

[01-242-5323].

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long and half-a-mile broad (area approx. 360 acres), with (1967) 24,000 inhabitants and a yearly average of over 650,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay) and the import duties are the same as in France. The National Council consists of 18 members and the Council of Government of the Minister of State and three State Counsellors. There is a local police force of 160 men.

A new constitution was promulgated by Prince Rainier on Dec. 17, 1962, which is subject to modification only with the approval of the elected National Council. It maintains the traditional hereditary monarchy and gives guarantees for the right of association, trade union freedom and the right to strike.

**CAPITAL.**—Monaco-ville (2,422).

**FLAG.**—Red and white

**British Consul-General, G. M. E. Paulson, C.B., C.M.G., O.B.E. (Resident at Nice).**

## (OUTER) MONGOLIA

(Mongolian People's Republic—

Bugd Nairamdakh Mongol Ard Uls)

**Prime Minister, Yu Tsedenbal (May, 1952).**

**Mongolian People's Revolutionary**

(= Communist) Party

**Politbureau of the Central Committee, Ts. Dugersuren; S. Luvsan; D. Maidar; D. Molomzhants; Zh. Sambu; Yu. Tsedenbal; N. Zhagvaral (full mem-**

bers); B. Lkhamsuren; N. Luvsanravdan (alternate members).

(Secretary of the Central Committee, Yu. Tsendenbal (1st); Ts. Dugersuren; B. Lkhamsuren; D. Molomzhants; N. Zhagvaral.

**Area and Population.**—The Mongolian People's Republic (Outer Mongolia) is a large and sparsely populated country to the North of China. Its area is over 600,000 square miles. Its population, was estimated at 1,200,000 in 1969. However, this total constitutes only part of the Mongolians of Asia, the greater number of whom are to be found in China and in the neighbouring regions of the Soviet Union (especially the Mongolian Buryat Autonomous Region). This country, which is almost nowhere below 1,000 feet above sea level, forms part of the Central Asiatic Plateau and rises towards the west in the high mountains of the Mongolian Altai and Khanggai Ranges. The Khental Mountain Range, situated to the north-east of the capital Ulan Bator, is less high. The Gobi region covers the southern half of the country. It contains some sand deserts, but between these less hospitable areas there is steppe land which provides pasture for great numbers of cattle, sheep, goats, camels and horses (the latter is still the characteristic means of transport for the population). There are several long rivers and many lakes, but good water is scarce since much of the water is salty. The climate is hard, with a short mild summer giving way to a long winter when temperatures can drop as low as minus 50° Centigrade.

**History.**—Mongolia, under Genghis Khan the conqueror of China and much of Asia, was for many years a buffer state between Tsarist Russia and China, although it was under general Chinese suzerainty. The outbreak of the Chinese Revolution in 1911 was the signal for a declaration of independence which was confirmed by the Sino-Russian Treaty of Kiakhta (1915), but cancelled by a unilateral Chinese declaration in 1919. Later the country became a battleground of the Russian Civil War, and Soviet and Mongolian troops occupied Ulan Bator in 1921: this was followed by another declaration of independence. However, in 1924 the Soviet Union in a Treaty with China again recognized the latter's sovereignty over Mongolia: but this was never properly exercised because of China's pre-occupation with internal affairs, and later by the anti-Japanese war. The Mongolian People's Republic was formally established in 1924. Under the Yalta Agreement, Chiang Kai-shek agreed to a plebiscite, held in 1945, in which the Mongolians declared their desire for autonomy; this was granted. The country entered the United Nations in 1961. The heroes of Mongolian history during the earlier part of the century were Sukhehator, who died in 1923, and the Communist Choibalsang (died 1952), who did much to turn the country into the Communist state it is today, and carried out a systematic destruction of the power of the Lamas, and the old princely houses which had previously been the dominant force in both the economy and the government.

**Production, etc.**—The total of Mongolia's live-stock is about 24,000,000 (14,000,000 sheep, 5,000,000 goats, 2,000,000 horned cattle, over 2,000,000 horses, under 1,000,000 camels). Traditionally the Mongolian is a herdsman, tending his flocks of sheep, goats and horses, cows and camels and leading a totally nomadic life. With the coming of the Communist régime (under the Mongolian People's Revolutionary Party) and especially since 1952, great efforts have been made to settle the population, but 80 per cent. more

still live in the traditional yurt (circular tent). The pastoral population was collectivized at the end of the 1950's into huge *negdels* (co-operatives) which have hastened the process of settlement, but within a *negdel* or state farm the herdsmen and their families still move with their yurts from pasture to pasture as the seasons change. The country, except for the capital, is today divided into 18 *aimaks* (provinces) and beneath these into more than 300 *somons* (counties), and these form the basis of the State organization of the country, parallel with which runs the apparatus of the Revolutionary Party.

Membership of the Communist bloc has brought Mongolia considerable quantities of aid from other Socialist countries, especially the Soviet Union and China, the last of which has supplied many thousands of workers to help with various construction projects. Mongolia's support of the Soviet Union in the Sino-Soviet dispute resulted in the cessation of Chinese aid and a halt in the supply of Chinese workers. Mongolia is now relying much less on Chinese and more on eastern European, especially Czech, Polish and East German aid to supplement the massive assistance received from the Soviet Union. Soviet and Bloc aid is hastening the process of industrialization; for although the economy remains based on the herds of animals, and the principal exports of the country are still animal by-products (especially wool, hides and furs) and cattle, factories serving the needs of the country have been started up and the coal and electricity industries have been developed to provide an industrial base.

Ulan Bator, which contains a quarter of the country's population, is the main seat of industry. Under the third 5-year plan, a new industrial centre has been founded at Darkhan, north of the capital near the Soviet frontier. This is being continued in the fourth 5-year plan (1966-70), and a start has been made with the development of Choibalsan in the east as a third industrial town (mostly for the processing of animal and agricultural products). There are mineral resources which are beginning to be exploited. Agriculture, formerly little practised, is now being extended. Communication is still difficult in the country as there are virtually no roads. The trans-Mongolian railway, following the line of the old north-south trade route, was opened in 1955 and links Mongolia with both China and Russia. Mongolia's fundamental difficulty is its very small population and labour force.

Foreign trade is dominated by the Soviet Union, with the eastern European countries taking most of what is left. The Government hopes to build up some trade with western countries, but this is developing very slowly.

**CAPITAL.**—Ulan Bator (195,300).

**FLAG.**—Vertical tri-colour red, blue, red and in the hoist the traditional Soyombo symbol in gold.

**NATIONAL DAY.**—July 11 (Anniversary of the Mongolian People's Republic).

#### Diplomatic Representation

The United Kingdom and Mongolia agreed to exchange envoys in 1963. The Mongolian Ambassador to Bulgaria, resident in Sofia, is simultaneously accredited to the Court of St. James's.

#### BRITISH EMBASSY Ulan Bator

Ambassador Extraordinary and Plenipotentiary, His Excellency Roland Carter (1969)  
3rd Secretary, M. F. Sullivan.  
Attaché, J. L. Hutchings.

**MOROCCO**

(Kingdom of Morocco)

King, H.M. King Hassan II, born July 9, 1929; acceded February 26, 1961, on the death of his father, King Mohammed V. Heir, Crown Prince Sidi Muhammad, b. 1963.

**CABINET**

*Prime Minister and Minister of Economic Affairs*, Dr. Mohamed Benhima.  
*Minister of Foreign Affairs*, Dr. Ahmed Laraki.  
*Tourism and Handicrafts*, Ahmed el Alaoui.  
*Defence*, General Mohamed Mezzian.  
*Agriculture, Agrarian Reform and National Development*, Mohamed Bargach.  
*Posts and Telegraphs*, Badreddine Senoussi.  
*Mauritanian and Saharan Affairs*, Prince Hassan Ben Driss el Alaoui.  
*Justice*, Abdelhafid Boutaleb.  
*Interior and Town Planning*, General Mohamed Oufkir.  
*Administrative Affairs*, Haj M'Hamed Bahni (Secretary-General of the Government).  
*Minister of State*, Abdelhadi Boutaleb.  
*Public Works and Communications*, Mohamed Imani.  
*Finance*, Mamoun Tahiri.  
*Public Health*, Dr. Larbi Chraïbi.  
*Arts and Islamic Affairs*, Haj Ahmed Bargach.  
*Labour and Employment*, Mehdi Benbouchta.  
*Information*, Ahmed Snoussi.  
*Minister of State for Planning*, Ahmed Réda Guédira.  
*Youth, Sport and Social Affairs*, Dr. Omar Boucetta.  
*Education*, Abdellatif Filali (Higher Education); Kacem Zhiri (Secondary and Technical); Mohamed Haddou Chiguer (Primary); Mohamed el Fassi (Cultural Affairs and Traditional Education, Minister of State).  
*Commerce, Industry and Mines*, Jawad Benbrahim.  
*Minister in the Royal Cabinet*, Ahmed Majid Benjelloun; Abdeslam Benaïssa; Dey Ould Sidi Baba.  
*Minister at Court*, Ahmed Ben Messaoud.  
 (There are also four Under Secretaries of State.)

**ROYAL MOROCCAN EMBASSY AND CONSULATE**

49 Queen's Gate Gardens, S.W.7

[01-584-8827]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Mohamed Laghzaoui (1969).  
*Counsellor*, Kallil Haddaoui.  
*and Secretary*, Miss Rita Bennis (Press and Protocol).  
*Attachés*, Mohamed Fenzar (Commercial); Maj. Farid Chraïbi (Military); Mohammed Smires Bannani (Administration).

*Area and Population.*—Morocco is situated in the north-western corner of the African continent between latitude 27° 40'–36° N. and longitude 2°–11° W. with an area estimated at approximately, 180,000 sq. miles, and a population (estimated 1968) of 14,580,000. It is traversed in the north by the Rif Mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the *Pillars of Hercules*, the western gateway of the Mediterranean.

*Climate.*—The climate of Morocco is generally good and healthy, especially on the Atlantic coast,

(where a high degree of humidity is, however, prevalent) the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 82° F. and 45° F.; for Marrakesh 102° F. and 40° F. respectively.

*Government.*—Under the terms of the Treaty of Fez (1912) Morocco was a French Protectorate until 1956. A Spanish "sphere of influence" extended over the northern part of the country with the exception of the Tangier Zone. The latter territory, under international administration, enjoyed a special régime involving a free monetary system and free trade, until its final integration with Morocco on April 19, 1960.

Ceuta and Melilla (see under Spain) are Spanish "State Territories". Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century, and Melilla, further east on a rocky promontory of the Rif coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhuma, Penon de Velez and the Zaffarin Islands are Spanish possessions. The Treaty of Fez (1969), provided for the return to Morocco of the Spanish enclave of Ifni on the western seaboard.

Morocco became an independent sovereign state in 1956, following joint declarations made with France on March 2, 1956, and with Spain on April 7, 1956. The Sultan of Morocco, Sidi Mohammed ben Youssef, adopted the title of King Mohammed V.

A constitution was adopted by referendum on December 7, 1962, and came into force on December 14, 1962. Based on the French model, it provided for a bi-cameral elected legislature with limited legislative powers and a considerable degree of overall control of affairs by the monarch. It represented none the less a considerable advance towards parliamentary democracy.

The series of elections necessary for the establishment of parliamentary institutions, provided for by the constitution, began on May 17, 1963, with an election for the Chamber of Representatives (the lower house with 144 members) which gave the F.D.C.I. 74 seats, the Istiqlal party 47 seats, the U.N.F.P. 28 seats and one independent.

A new government was formed on November 13, 1963, the majority of portfolios being entrusted to members of the F.D.C.I. On November 18, 1963, the first session of the Moroccan parliament was officially opened by King Hassan II.

Following serious disturbances in Casablanca in March 1965, attempts were made by King Hassan, in consultation with all political parties, to form a government of national union. These efforts were unsuccessful and on June 7, 1965, the King proclaimed "state of exception" and suspended Parliament. Assuming himself the office of Prime Minister, he announced the formation of a new government and indicated that constitutional changes were to follow. Several partial government reconstructions have taken place since, but in 1969 the "state of exception" still continued.

**Defence.**—The Moroccan army, formed in 1956, is about 50,000 strong. A Moroccan air force was also formed in 1959 and a navy in 1960. The armed forces possess quantities of French, Soviet and American equipment, including aircraft.

**Production and Trade.**—Morocco's main sources of wealth are agricultural and mineral. The current Five Year Plan (1968-72) for economic development places particular emphasis on agricultural development. Other priority sectors are education and training and tourism.

Agriculture employs some 70 per cent. of the working population and accounts for about 45 per cent. of Morocco's exports. The main agricultural products are cereals, citrus fruits, olives, grapes, tomatoes and vegetables. Dates and figs are also grown and exported. Cork is the most important commercial forest product. Esparto grass is also produced. There is a fishing industry and substantial quantities of canned fish, mainly sardines, are exported. Livestock in 1967 included about 11,000,000 sheep, 6,500,000 goats, 2,900,000 horned cattle and smaller numbers of donkeys, camels, horses and pigs.

Morocco's mineral exports are phosphates, anthracite, manganese, iron ore, lead and zinc, while the following are also produced: petroleum, cobalt, graphite, copper molybdenum, tin, antimony, ochre and gypsum. Production of phosphates totalled 10,511,700 tons in 1968, of which 10,016,118 tons were exported. There is an oil refinery at Mohammedia, near Casablanca with an annual capacity of 1,250,000 tons and a smaller one at Sidi Kacem (300,000 tons). Production of crude oil in 1968 amounted to 88,638 tons.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France and the *franc* area, the U.S.A., Germany, the United Kingdom and Italy, was valued in 1968 at Imports, DH 2,790,000,000; Exports, DH 2,278,000,000.

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£6,855,000	£9,386,000
Exports to U.K. ....	12,297,000	13,777,000

There is a British Chamber of Commerce at Casablanca (c/o B.B.M.E., 80 Avenue Lalla Yacout).

**Finance and Currency.**—The unit of currency is the *dirham*. Exchange rate (1968): DH 12.10 = £ (see also p. 84).

The 1969 Ordinary Budget amounted to DH 2,497,348,848, and the Development Budget to DH 1,164,366,102.

**Communications.**—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due south from Oujda skirts the Morocco-

Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,250 miles and traction is electric or diesel. An extensive network of well-surfaced roads covers all the main towns in the kingdom.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea. Royal-Air-Maroc operates services between Casablanca and London. There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-France and Royal-Air-Maroc operate internal services and many between Morocco and towns in France and Spain. There are also regular services to other European and North African countries and to Senegal and the Canaries.

**Language.**—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The foreign population is estimated at 170,000 (1968). The national daily press consists of 3 Arabic, 4 French and one Spanish newspapers.

**Education.**—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a secular university at Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

**CAPITAL.**—Rabat (population 261,450). On Jan. 2, 1962, it was decreed that Tangier (166,000) would be the summer capital of Morocco, the King and the Government residing there for two months each year from 1962. Tangier was on the same date declared "free zone" primarily for commercial purposes. The other chief towns are: Casablanca (1,177,000); Marrakesh (264,300); Fez (249,450); Meknes (205,000); Oujda (149,300); Tetuan (117,000). Kenitra (99,380). The towns of Fez, Marrakesh and Meknes were capitals at various times in Morocco's history.

**FLAG.**—Red, with green pentagram (the Seal of Solomon). **NATIONAL DAY.**—March 3 (Anniversary of the Throne).

#### BRITISH EMBASSY

#### BRITISH CONSULAR OFFICES

There are British Consular Offices at Tangier, Fez and Casablanca and an Honorary Consul at Larache.

British Council Representative, E. R. Lloyd, P.O. Box 427, 6 Avenue Moulay Youssef, Rabat.

#### MUSCAT & OMAN

(The Sultanate of Muscat and Oman)

Sultan, Said bin Taimur, born Aug. 13, 1910, succeeded his father (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

#### CONSULATE IN LONDON

7, Albert Court, Kensington Gore, S.W.7  
Consul, Capt. C. E. Kendall (1962).

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from

Tibet on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast of the peninsula which belongs to the Trucial Shaikhdom of Sharjah. Ras Darbat Ali marks the boundary between the Sultanate and the territory of Southern Yemen. The Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called.

Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation.

North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province, which is the only part of the Arabian peninsula to receive the benefit of the monsoon. Frankincense is also exported. Its principal town is Salalah on the coast, while  $\Psi$ Murba't is the port.  $\Psi$ Gwadur, situated on the Baluchistan coast, formerly belonged to the Sultanate, but was transferred to Pakistan on September 8, 1958.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman, although the Sultan himself has stayed in Salalah since 1958. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khaburah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population at 565,000 (1966). The Kuria Muria Islands have 78 inhabitants. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The inhabitants of the towns of Muscat (pop. 6,208) and Matrah (pop. 14,119) are mostly of Baluchi and Negro stock. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. A Development Secretary was appointed in 1958, and under his control much progress has been made in agriculture, public health, education and roads. The inland tribes breed large numbers of camel, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is  $\Psi$ Muscat (one of the ports on the mail route between Bombay and Basra). Frequency of the mail service

between Muscat and Basra is three or four times a month, once monthly from Basra to Muscat. 197 vessels of all nationalities, including 86 British, with a total tonnage of 644,800, entered the port in 1968. In addition 19 tankers with a tonnage of 368,800 tons called in for medical attention to members of the crew. 190 tankers called at the oil company port of Mina-al-Fahl in 1968 and carried to various destinations just over 89,000,000 barrels of crude oil.

Cable and Wireless, Ltd., operates the telegraph office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. The towns of Muscat and Matrah and the airfield at Bait-al-Falaj are linked by a concrete road. Outside the towns of Muscat and Matrah and the airfield there are only tracks ranging from good ones which have been cleared and graded to ravines containing large boulders or stretches of soft sand. Land-Rovers and similar types of truck are the only vehicles which can be relied on. The Sultanate Development Department has completed over 500 miles of motorable tracks so far.

*Finance.*—The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee note (but not coin) circulates and is the official currency of the Sultanate, although not generally in use in the interior. There are also four denominations of copper coins, twenty, ten, five and three, called "baizas". The Sultan planned to introduce in 1970 his own currency, the basic unit of which is the *Riyal Saidi*, equal to £1 sterling. The official rate of exchange is 320 baizas = 1 M.T. dollar = Rs. 5 (approx.). The weights in use are one *kiyas* = the weight of six dollars or 5.9375 oz.; 24 *kiyas* = one Muscat maund; 10 maunds = one *Farasala*; 200 maunds = 1 *Bahar*. Rice is sold by the bag, other cereals by the following measurement: 40 *Palis* = one *Farrah*; 20 *Farrahs* = one *Khandi*.

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£2,313,000	£2,782,000
Exports to U.K. ....	1,075,000	11,086,000

*Commerce and Trade.*—Trade is mainly with India, Pakistan, the Persian Gulf States, Australia, the United Kingdom, the Netherlands and Japan. Imports for the year 1968 amounted to £4,044,761 (excluding duty-free imports); the average annual value of exports (other than oil and some minor items) is about £300,000. Chief imports in 1968 were: rice, about £670,000; wheat and wheat flour, £250,000. Pumping equipment, vehicle spare parts, cigarettes, tobacco and toilet requisites imported from U.K. were valued at £272,000.

Petroleum Development (Oman) Ltd., a subsidiary of Shell began exporting oil on Aug. 1, 1967. Exports are currently at a rate of 300,000 barrels a day. A German company, Wintershall A.-G. has an off-shore concession in the Gulf of Oman and is drilling in the region of Sohar.

*Development.*—For many years the Sultanate was a poor country with a total annual income of less than £1,000,000. The advent of oil revenues since 1967 has enabled the Sultan to commission a comprehensive development plan for the region of Muscat and Matrah. Its cost is likely to be several million pounds and it will be carried out in phases over a number of years. Public buildings, housing, schools, hospitals, recreation centres, electric supply and water are among the priority items. The new power station has begun generating electricity and the new fresh water supply to be piped a distance of 33 miles was expected to be in use by late 1969 or early 1970. Government offices, staff flats and a

girls' school are being built in Muscat and plans are well advanced for 3 out of a planned 10 hospitals and for a £10m. harbour at Matrah.

**CAPITAL.**—ψ Muscat, population (estimated), 6,208.

Muscat—British Consul-General, D. G. Crawford.

## NAURU

(Republic of Nauru)

**President, Hammer DeRoburt, born 1922, elected May 19, 1968.**

The Republic of Nauru is an island of some 8 sq. miles in size, situated in 166° 55' E. longitude and 32° S. of the Equator. It had a population of 6,056 at the Census of June 30, 1966, of whom 3,101 were Nauruans and 2,955 non-indigenous, including other Pacific Islanders, Chinese and Europeans.

Nauru was discovered by Capt Fearn, R.N. in 1798, and was annexed by Germany in 1888. It surrendered to H.M.A.S. *Melbourne* in November, 1914. Until 1968 Nauru was administered by Australia under an international trusteeship agreement which on Nov. 1, 1947, superseded a former League of Nations Mandate.

**Government.**—Under Australian administration a Legislative Council of nine elected and five official members was established in 1966 and a four-member Executive Council. After negotiations at Canberra during 1967 between Mr. DeRoburt, then Head Chief of Nauru, and representatives of the Trusteeship powers Australia, New Zealand and the United Kingdom, and with the concurrence of the U.N. Trusteeship Council, Nauru became an independent State from February 1, 1968. It was announced in November, 1968, that a limited form of membership of the Commonwealth had been devised for Nauru at the request of its Government.

**Judiciary.**—The Nauruan judiciary consists of a District Court, a Central Court and a Court of Appeal.

**Education and Welfare.**—Nauru has a hospital service and other medical and dental services. There is also a maternity and child welfare service. Education is available in schools on the island up to fourth year secondary school standard, beyond which overseas scholarships and public service cadetships are available.

**Production, etc.**—There are valuable deposits of phosphates on the island which were purchased from the Pacific Phosphate Company in 1919 by the Governments of Australia, New Zealand and the United Kingdom for £3,500,000 and vested in the British Phosphate Commissioners. Royalities on phosphate exports (about £5,000,000 annually) have been paid partly to the Nauruans and partly into a trust fund which used income from investments abroad to pay for Nauru's administrative and social services. Under the 1967 agreement, ownership of the phosphates (which are expected to be exhausted within about 30 years) were to pass to the Nauruan Government by 1970. Phosphates will continue to be supplied exclusively to Britain, Australia and New Zealand.

### Trade with U.K.

	1967	1968
Imports from U.K. ....	£20,000	£37,000
Exports to U.K. ....	855,000	782,000

**FLAG.**—Twelve-point star (representing the 12 original Nauruan tribes) below a gold bar (representing the Equator), all on a blue ground.

**NEJD.** See Saudi Arabia

## NEPAL

**Sovereign, King Mahendra Bir Bikram Shah Deva; succeeded, March 13, 1955.**

### COUNCIL OF MINISTERS

**Prime Minister, Minister of Palace Affairs, Finance and General Administration, Surya Bahadur Thapa.**

**Deputy Prime Minister and Minister of Foreign Affairs, Kirtinidhi Bista.**

**Defence, Giri Prasad Budathoki.**

**Land Reform, Food and Agriculture, Rajeswar Devkota.**

**Law, Justice, Commerce and Industry, Surendra Bahadur Basnet.**

**Home Affairs, Panchayat, Information and Broadcasting, Gehendra Bahadur Rajbhandari.**

There are also 6 assistant ministers, of whom 3 are concerned with Home and Panchayat Affairs, one with Land Reform, one with Food and Agriculture and one with General Administration.

**Ministers of State, Daya Nidhi Sharma (Forest); Gyanendra Bahadur Karki (Education and Health); Rudra Prasad Giri (Transport, Communication, Power and Water).**

### ROYAL NEPALESE EMBASSY IN LONDON

12A, Kensington Palace Gardens, W.8.

[01-229-6231]

**Ambassador Extraordinary and Plenipotentiary, His Excellency Upendra Bahadur Basnyat (1969).**

**1st Secretary, Ishwari Raj Pandey.**

**Military Attache, Lt.-Col. S. B. Thapa.**

Nepal lies between India and Tibet on the slopes of the Himalayas, and includes Mt. Everest (29,028 ft.). It has a total area of 54,362 sq. miles and a population (estimated, 1967) of 10,500,000. Amid the mountains lie many fertile valleys. The lower hills and Terai Plains are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. (For MAP, see p. 746.) Katmandu, the capital, is connected with India by a road, the mountain section of which was built by India under the Colombo Plan, and to Tibet by a road from Katmandu to Kodari on the border, which was built by the Chinese and opened on May 26, 1967. The Indian-aided Sunauli Pokhara road (128 miles) was expected to be completed in mid-1970 and construction by the Chinese of a road between Katmandu and Pokhara has been started.

Nepal exports rice and other grains, hides, oil-seeds, ghi, cattle, jute, large quantities of timber, etc., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, etc. Nepalese imports from U.K. were valued at £453,000 in 1968 and £364,000 in 1967; exports to U.K., £499,000 (1967, £101,000). Total Nepalese imports in 1966 were valued at £32,394,000.

**Finance.**—Revenue for the fiscal year 1968-69, mainly from land rent and taxes, was estimated at Rs. 365,000,000, compared with a revised figure of Rs. 306,800,000 in 1967-68. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. The exchange rate is NRs 24.20 = £1. There are 3 commercial banks with branches throughout Nepal.

The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Hinduism and Buddhism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha, whose ruler founded the present Nepalese dynasty, became predominant in 1768. During the 1914-18 and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary

movement in 1950 and 1951 achieved the aim of breaking the hereditary power of the Ranas and of restoring to the monarchy the powers which it had lost 104 years before. After ten years, during which various parties and individuals tried their hand at government, King Mahendra resumed direct powers on December 16, 1960, with the object of leading a united country to basic democracy.

The state of emergency ended on April 13, 1963, the King appointing a Cabinet consisting of a Prime Minister and seven other ministers, all of whom have seats in the indirectly elected *Rashtriya Panchayat* (Parliament). A State Council (*Raj Sabha*) of 69 members, to advise the King on state affairs, constitutional matters and on the choice of the heir to the throne was also appointed on April 2, 1963. An Act was passed at the same time maintaining the existing ban on political parties.

A new constitution, based on the Panchayat system, was introduced on December 16, 1962.

**CAPITAL.**—Katmandu, population (1961) 224,867. Other towns of importance are Biratnagar (325,645), Lalitpur (145,301) and Bhaktapur (89,822). These population figures include some adjacent rural areas.

**FLAG.**—Double pennant of crimson with blue border on peaks; white moon with rays in centre of top peak; white quarter sun, recumbent in centre of bottom peak. **NATIONAL DAY.**—February 18.

*Consul-General*, Jhr. H. A. Teixeira de Mattos.

*1st Secretary (Consular)*, Jhr. R. de Beaufort.

*2nd Secretary*, Jhr. C. C. C. M. van Nispen tot Sevenaer.

**Area and Population.**—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces plus the North-East Polder and Eastern and Southern Flevoland (reclaimed parts of the Zuider Zee) and containing a total area of 13,500 sq. miles (34,830 sq. km.). The population in March, 1969 was 12,810,000. The live birth rate in 1967 was 19.6 per 1,000 of the population, and the death-rate was 8.5.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, Yssel and Scheldt.

The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, both mechanical and electrical, electronics, nuclear energy, petrochemicals and plastics, aircraftmotors and ship-building, steel, textiles of all types, leather goods,

electrical appliances, metal ware, furniture, paper, cigars, sugar, liquors, beer, clothing, rubber products, etc.

Production of coal (1968) was 6,663,000 metric tons; oil, 2,147,000 metric tons; steel, 3,707,000 metric tons and natural gas, 14,606,000,000 cu. metres. Diamond-cutting, though still an important industry, has declined considerably in importance, employing about 540 hands at the end of 1967.

**Government.**—In 1815 the Netherlands became a constitutional Kingdom under King William I, a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 21 years and upwards. Members of the *Tweede Kamer* are paid.

General elections were held on January 15, 1967, for the Second Chamber of the States-General. Party representation is: Catholic People's Party, 42; Labour Party, 37; Liberal, 17; Anti-Revolutionary, 15; Christian Historical Union, 12; Democrats '66, 7; Farmers' Party, 7; Communists, 5; Pacifist Socialists, 4; Political Reformed, 3; Reformed Political Union, 1.

The Upper House of the States General was elected by the Provincial Councils half in 1969 and half in 1966. Party representation is: Catholic People's Party, 25; Labour Party, 22; Liberal Party, 8; Anti-Revolutionary Party 7; Christian Historical Union, 7; Pacifist Socialist Party, 3; Farmers' Party 2; Communist, 1.

**Defence.**—The army is a component part of the North Atlantic Treaty Organization. The Royal Netherlands Navy is being built up to a modern force of a cruisers, 18 modern escorts, 6 submarines, a fleet supply ship and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force", has been reconstituted since the war, and now forms an integral part of the air defence of N.A.T.O. After a period of reorganization and expansion it has now

attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. The latter is integrated into the N.A.T.O. tactical air force.

**Language and Literature.**—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are ten national papers, four of which are morning papers, and there are many regional daily papers.

**Education.**—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools are numerous, well equipped and well attended. The principal Universities are at Leiden, Utrecht, Groningen, Amsterdam (2), Nijmegen (R.C.), and there are technical Universities at Delft (polytechnic); Eindhoven (polytechnic), Enschede (polytechnic) and Rotterdam (economics), Wageningen (agriculture), Tilburg (R.C., economics) and a medical faculty in Rotterdam.

**Communications.**—The total extent of navigable rivers is 6,044 km. and of roads approximately 71,418 km. On January 1, 1967, the total length of the railway system amounted to 3,232 km., of which 1,641 km. were electrified. The mercantile marine on Jan. 1, 1968, consisted of 1,297 ships of total 4,545,000 gross registered tons, excluding tugs and contractors' equipment. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the course of 1968 was 253,000 miles.

#### FINANCE Estimates, 1968

Foreign Debt.....	345,000,000

The official rate of exchange permits of fluctuation between 8-55 and 8-82½ florins = £1.

See also p. 83.

#### TRADE

The Dutch are traditionally a trading nation. *Entrepôt* trade, banking and shipping are of particular importance in their economy. The geographical position of the Netherlands, at the mouths of the Rhine, Meuse and Scheldt, brings a large volume of transit trade to and from the interior of Europe to Dutch ports.

Principal trading partners are the Federal Republic of Germany and Belgium/Luxemburg. Britain supplied 5.7 per cent. of Netherlands imports in 1968 (Fls. 1,844,000,000) and took 8.8 per cent. of Netherlands exports (Fls. 2,580,000,000).

In common with other members of the European Economic Community, the Netherlands on July 1, 1968, removed remaining duties on imports from EEC countries and brought down duties on imports from other countries into line with the Common External Tariff of the EEC.

The index of industrial production in the Netherlands (1963=100) rose from 123 in 1966 to 129 in

1967 and the index of industrial production per worker (1958=100) rose from 120 in 1961 to 157 in 1966.

In 1968 Dutch imports amounted to Fl.33,638,221,000 and exports to Fl.30,194,569,000.

#### Trade with U.K.

Amsterdam, Herengracht 460.—Consul-General, R. T. Landale.

Rotterdam, Parklaan 18.—Consul-General, Miss F. M. Young, O.B.E.

There is an Honorary British Consul at Curaçao, Netherlands Antilles.

British Council Representative, N. S. Whitworth, Keizersgracht 343, Amsterdam.

#### OVERSEAS TERRITORIES

The Netherlands West Indies comprise Surinam (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands Antilles (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population (estimated, 1967) of 363,000; area of Netherlands Antilles, 394.1 sq. miles, with a population of 213,000 at December 31, 1967. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam.

#### Governors

The administrative capital of Surinam is  $\Psi$  Paramaribo (population, 1962, 120,000); the capital of Curaçao is  $\Psi$  Willemstad (pop. 45,000), of Aruba,  $\Psi$  Oranjestad; of Bonaire,  $\Psi$  Kralendijk; of St. Martin, Philipsburg; of Statius (St. Eustatius), Oranjestad; and of Saba, Bottom.

## NICARAGUA

(República de Nicaragua)

President, Gen. Anastasio Somoza Debayle, assumed office, May 1, 1967.

Foreign Affairs, Dr. Lorenzo Guerrero.

NICARAGUAN EMBASSY AND CONSULATE GENERAL

■ Gloucester Road, S.W.7

[01-584-3231]

Ambassador Extraordinary and Plenipotentiary His Excellency Señor Don Marcel J. Ulvert-Portocarrero (1967).

2nd Secretary, Señor Lic. B. M. Abaúnza.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between  $0^{\circ} 45' 15''$  N. lat. and  $83^{\circ} 40' 8'' 38''$  W. long., containing an area of 57,145 English square miles (see MAP, p. 875). It has a population (estimated, 1968) of 1,848,000, of whom about threequarters are of mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage. Congress comprises a Senate of 16 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 54 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are cotton, coffee, sugar, sesame and bananas. Beans, rice, maize and ipecacuanha are also important. Livestock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 252 miles of railway, all on the Pacific side, 4,218 miles of telegraph and 4,485 miles of telephone lines and 14,943 telephones. There are several powerful wireless stations and two television stations at Managua. An automatic telephone system has been installed in the capital and extended to the provincial towns of León, Granada, Matagalpa and Chinandega. Transport except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras border in the north to the Costa Rican border in the south; the interoceanic highway runs from Corinto on the Pacific coast via Managua to Rama, where there is a natural waterway to Bluefields on the Atlantic.

Language and Literature.—The official language of the country is Spanish. In 1969 there were 2 daily newspapers published at Managua, apart from the official Gazette (*La Gaceta*) and 4 in the provinces. Education is backward, about 50 to 60 per cent of the population being illiterate. There are universities at León and Managua.

## Trade with U.K.

	1967	1968
Imports from U.K.....	£2,895,000	£2,127,000
Exports to U.K.....	697,000	1,216,000

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. The chief exports are cotton, coffee, beef, gold, sugar, cottonseed, bananas, meat, copper and soluble coffee.

**CAPITAL**, Managua, population (1967), 300,000; León, 62,019; Granada, 40,104; Masaya, 34,158; Chinandega, 36,885;  $\Psi$  Bluefields, 17,706; Matagalpa, 61,520; Jinotepe, 15,957.  $\Psi$  Corinto (9,650), on the Pacific, is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Cabezas on the E. coast are mainly concerned in the fish, banana and timber trade to the United States.

**FLAG**.—Three horizontal bands, blue, white, blue (the arms of the Republic on the white band, displaying five volcanoes surmounted by a cap of liberty under a rainbow).

## BRITISH EMBASSY

Managua

*Ambassador Extraordinary and Plenipotentiary and Consul-General*, His Excellency George Michael Warr, C.B.E. (1967).....£5,075

*Defence Attaché*, Wing Cdr. P. D. Thompson, D.F.C., D.F.M. (resident at Caracas, Venezuela).

*1st Secretary*, F. B. Sedgwick-Jell (Head of Chancery and Consul).

*1st Secretary (Labour)*, M. Cochran (resident at Mexico City).

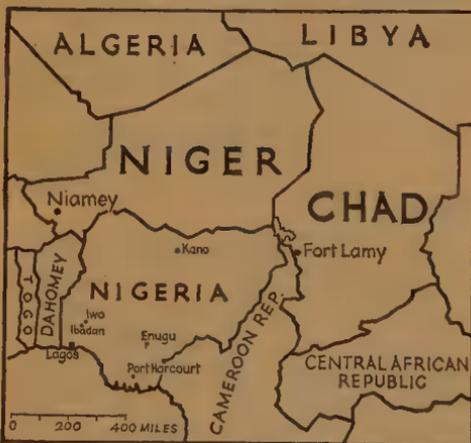

## NIGER

(Republic of Niger)

*President and Minister for Foreign Affairs*, Diouri Hamani, G.C.M.G. elected for five years, November 9, 1960; re-elected Sept. 30, 1965.

*President, National Assembly*, Boubou Hama.

*President, Supreme Court*, Diallo Ousmane Bassarou

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad, Nigeria, Dahomey, Mali and Upper Volta. It has an area of about 484,000 square miles with a population estimated in 1968 at 3,643,000. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djer-mas in the south-west and the nomadic Touaregs in the north.

The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961.

The constitution of Niger, adopted on November 8, 1960, provides for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly. The present Assembly of 50 members was elected on October 21, 1965. Niger is a member of the United Nations, the *Conseil de l'Entente* and of the Organization for African Unity (O.A.U.) (see Ivory Coast). The official language is French.

**Finance**.—The currency of Niger is the *franc CFA* (*Francs CFA* 50=1 French Franc). In 1968 the operating budget amounted to *Francs CFA* 9,570,100,000 and the development budget to *Francs CFA* 858,800,000.

**Trade**.—The cultivation of ground nuts and the production of livestock are the main industries and provide the two main exports. A company has been formed by the Government, the French Atomic Energy Authority and private interests to exploit uranium deposits. There are indications of other mineral deposits but only tin is being mined at present. Total value of trade in 1967 was: Imports, *francs CFA* 11,352,364,000; Exports, *francs CFA* 6,301,028,000 of which ground-nuts and ground-nut oil accounted for 50 per cent. and live-stock 35 per cent.

**CAPITAL**.—Niamey (60,000).

**FLAG**.—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe. **NATIONAL DAY**.—December 18. *British Ambassador*, His Excellency Dudley John Cheke, C.M.G. (resident at Abidjan).

## NORWAY

(Norge)

*King*, Olav V, K.G., K.T., G.C.B., G.C.V.O., b. July 2, 1903; succeeded, Sept. 21, 1957, on death of his father King Haakon VII; married March 21, 1929, Princess Märtha of Sweden (born March 29, 1901; died April 5, 1954); having issue, Harald (see below) and two daughters.

*Heir-Apparent*, H.R.H. Prince Harald, G.C.V.O., b. Feb. 21, 1937; m. Aug. 29, 1968, Sonja Haraldsen.

## CABINET

*Prime Minister*, Per Borten (C.P.).

*Foreign Affairs*, John Lyng (Cons.).

*Finance*, Ole Myrvoll (Lib.).

*Church and Education*, Kjell Bondevik (P.P.C.).

*Agriculture*, Bjarne Lyngstad (Lib.).

*Communications*, Håkon Kyllingmark (Cons.).

*Prices and Incomes*, Dagfinn Vårvik (C.P.).

*Trade and Marine Affairs*, Kåre Willoch (Cons.).

*Justice*, Mme. Ragnhild E. S. Selmer (Cons.).

*Industry*, Sverre Walter Rostoft (Cons.).

*Social Affairs*, Egil Aarvik (P.P.C.).

*Fisheries*, Einar Moxnes (C.P.).

*Local Affairs*, Helge Seip (Lib.).

*Family and Consumer Affairs*, Mme. Elsa Skjervén (P.P.C.).

*Defence*, Otto Grieg Tidemand (Cons.).

C.P.=Centre Party; Cons.=Conservative Party; Lib.=Liberal Party; P.P.C.=People's Christian Party.

[A Coalition Ministry was expected to continue in office after the General Election held on Sept. 7-8, 1969].

## ROYAL NORWEGIAN EMBASSY IN LONDON

Offices: 25 Belgrave Square, S.W.1

[01-235-7151]

Ambassador Extraordinary and Plenipotentiary, His Excellency Paul Gruda Koht (1968).  
 Counsellors, Tore Bøgh (Economic and Financial);  
 Torleiv Anda (Press and Information); Kåre Dæhlen;  
 Semund Remøy (Fisheries).

1st Secretaries, John E. Grieg (Press and Information);  
 Helge Vindenes.

Defence Attaché, Capt. O. A. Aslaksrud.

Asst. Defence Attaché, Maj. Erling Hornslien.

Cultural Attaché, Hans Anestad.

and Secretary, Jens D. Breivik.

Commercial Counsellor, Per Smith-Kjelland, 20 Pall Mall, S.W.1.

2nd Secretary (Commercial), Ole F. Knudsen.

Consulate, 42 Lancaster Gate, W.2.

Consul-General, Aage F. Bothner.

Consular Attachés, Dag Mork Ullnes; Thor Torvik.

and Secretary (Consular), Kjell Nordang.

**Area and Population.**—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into counties (*fylker*) and comprises an area of 324,219 sq. km. (125,181 sq. miles) with a population (estimated, May, 1968) of 3,813,000. In 1967 there were for every 1,000 inhabitants: 17.6 live births; 9.5 deaths; 14.8 deaths during first year of age (per 1,000 live births); 7.7 marriages.

The Norwegian coastline is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

**Production.**—The cultivated area is about one-fourth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. On April 30, 1969, 362,038 persons were employed in Norwegian industry. Manufactures are aided by great resources of water power, estimated at 11,870 mW. Actual production in 1968 amounted to 60.2 GW\*. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1968 the total catch

amounted to 2,590,590 metric tons. In 1967 fish oil production amounted to 327,364 metric tons and fish liver ("tran") production to 20,064 metric tons.

**Government.**—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which dissolved June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

**Defence.**—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. It was expected that the period of compulsory national service would be reduced to 15 months (without refresher training) in the Navy, and 12 months (with later refresher training) in the Army and Air Force. Previously the period of national service was 18 and 16 months respectively.

**Education** is compulsory and free between the ages of 7 and 16, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 14,000 students and the University of Bergen (opened in 1948) by 4,100 students in 1968. Plans for new universities were announced on March 28, 1968, by the *Storting*—at Tromsø (for 2,200 students) in faculties of medicine, science, political science and the humanities; and at Trondheim (for 7,000 students) by merger of the State

\* Gigawatt = 1,000 million watts.

Institute of Technology (3,365 students in 1968), the State College for Teachers and the Museum of the Royal Norwegian Society of Science. The latter university is expected to have facilities in engineering, architecture, the sciences, medicine, the humanities and political sciences by 1975.

**Language and Literature.**—Norwegian is one of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludwig Holberg (1684–1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and the writings of Wergeland (1805–1845). Some of the famous names are Henrik Ibsen (1828–1906) the dramatist, Bjørnstjerne Bjørnson (1832–1910) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833–1908) novelist. Knut Hamsun (1859–1952) novelist and Nobel Prize-winner in 1920, and Sigrid Undset (1882–1949), champion of Norwegian womanhood and herself a Nobel Prize-winner in 1928. In 1968 there were 81 daily newspapers in the country with a total circulation of 1,445,712, and 75 newspapers published 5 to 5 times a week with a total circulation of 303,319.

**Communications.**—The total length of railways open at the end of 1968 was 4,242 km., excluding private lines. The extension of the main line from Fauske to Bodø, 60 miles north of the Arctic Circle, was completed in 1962 and opened on June 7 by King Olav. The number of telephones in 1968 was 1,000,000, which is about 4 inhabitants per telephone. There are 69,600 km. of public roads in Norway (including urban streets). At the end of 1968, 619,039 road motor vehicles were registered, equivalent to 6.2 inhabitants per passenger car.

**Civil Aviation.**—Scheduled airlines are operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartsselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerøes Flyveselskap A.S.

**Mercantile Marine.**—The Mercantile Marine, December 31, 1966, consisted of 2,281 vessels of 19,047,000 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

#### FINANCE 1968

Revenue (Budget) . . . . .	Kr. 13,583,000,000
Expenditure (do.) . . . . .	15,355,000,000
National Debt . . . . .	12,142,900,000
Rate of Exchange (Sept, 1968)	Kr. 17.07 = £1

See also p. 83.

#### TRADE

	1967	1968
	Kroner	Kroner
Total imports . . . . .	19,616,594,000	19,325,063,000
Total exports . . . . .	12,402,514,000	13,839,762,000

#### Trade with U.K.

	1967	1969
Imports from U.K. . . . .	£126,954,000	£124,559,000
Exports to U.K. . . . .	127,357,000	162,445,000

The chief imports are raw materials, motor spirit, fuel and other oils; coal, ships and machinery; together with cereals, fruits and manufactures of silk, cotton and wool. The exports consist chiefly of fish and products of fish (as canned fish, whale oils), pulp, paper, iron ore and pyrites, nitrate of lime, stone, calcium carbide, aluminium, ferro-alloys, zinc, nickel, cyanamide, etc.

**CAPITAL.**— $\Psi$  Oslo (incl. Aker). Pop. (Jan 1, 1969) 487,600. #### SVALBARD

(Spitsbergen and Bear Island)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantling of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. Annual production of coal, the chief mineral of the archipelago, is 390,000 tons.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour 2½ to 3 days; from Aberdeen 5 to 6 days.

**JAN MAYEN**, an island in the Arctic Ocean (70° 49'–71° 9' N. lat. and 7° 53'–9° 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

## Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER ■■■ FIRST ISLAND (68° 50' S. lat. and 90° 35' W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

## PANAMA

(República de Panama)

President of the Provisional Government Junta, Col. José M. Pinilla.

Member of the Junta, Col. Bolívar Urrutia.

## PANAMANIAN EMBASSY AND CONSULATE

16 The Boltons, S.W. 10

[01-373-2198]

Consulate-General, 23-25 Billiter Street, E.C.3.

Ambassador Extraordinary and Plenipotentiary, His Excellency Alfredo T. Boyd (1969).

3rd Secretary, Señor Lic. Don Victor Bocanegra.

Attaché, Señorita Ines V. Zarak.

There are Consular Offices of the Republic at Glasgow and Liverpool.

Panama lies on the isthmus of that name which connects N. and S. America (see MAP, p. 846). After a revolt (Nov. 3, 1903) it declared its independence from Colombia and established a separate Government. The constitution provides for a single chamber legislature of 42 members elected every four years. In October, 1968, however, a military coup resulted in the deposition of the President, Dr. Arnulfo Arias, who had been in office only 11 days, and the suspension of the National Assembly. The provisional government set up consists of a two-man military junta with a civilian cabinet. Elections for a new government were expected to be held in 1970. The area of the Republic is 31,890 sq. m., the population (estimated, 1969), 1,417,100. The birth rate in 1967 was 38.4 and the death rate 6.6 per thousand. The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. In 1967 there were 1,552 official primary schools and 68 private primary schools; 42 official secondary and 115 private secondary schools. Primary students numbered 218,475 in 1967; secondary students, 64,373. The average number of students at Panama University is about 11,600 and at the Catholic University (Universidad Santa Maria La Antigua) about 700.

Language and Literature.—The official language is Spanish. There are 5 daily newspapers published in the capital, 2 of which print editions in English. There is an English newspaper and one Spanish weekly newspaper.

## FINANCE

1969

Estimated Budget Revenue . . . Balboas 130,000,000

Estimated Budget Expenditure . . . 130,000,000

The monetary unit is the Balboa (= \$1 U.S.); ■■■ Panamanian paper currency is issued, and U.S. dollar bills of all values are in circulation in the Republic and in the Canal Zone.

## TRADE

	1967	1968*
	Balboas	Balboas
Imports.....	229,365,817	243,459,715
Exports.....	84,716,824	93,290,526

\* Preliminary figures.

## Trade with U.K. †

	1967	1968
Imports from U.K.....	£6,544,000	£5,997,000
Exports to U.K.....	2,070,000	2,451,000

† Including Canal Zone.

The imports are mostly manufactured goods and foodstuffs; the exports ■■■ bananas, cacao, fresh shrimps, mahogany and cement.

CAPITAL, Ψ Panama City. Population, 273,440 (Census, 1960); estimated 1969, 389,000.

FLAG.—Opposing quarters of red and blue; a quarters of white bearing blue star (next staff above) and red star. NATIONAL DAY.—November 3.

Dependencies of Panama.—The Republic has a penal settlement at Ψ Guardia on the island of Coiba (or Quibo) in the Pacific and stations on the island of Taboga. Coiba has an area of about 19 sq. miles and Taboga of about 4 sq. miles.

## BRITISH EMBASSY

(120 Via España, Panama)

Ambassador Extraordinary and Plenipotentiary, His Excellency Ronald Stratford Scrivener, C.M.G. (1969) ..... £5,075  
1st Secretary and Consul, G. C. O. Key, O.B.E., D.F.C. and Secretary and Vice-Consul, Miss Y. J. E. Veale.

## BRITISH CONSULAR OFFICES

There ■■■ Consular Offices at Panama City and Colon.

Panama, 4,650 miles; transit from Liverpool, 15 to 19 days; from Southampton 15 days; via N.Y., 14 days.

## PARAGUAY

(República del Paraguay)

President, General Alfredo Stroessner, inaugurated Aug. 15, 1954, re-elected 1958, 1963 and 1968.

Foreign Affairs, Dr. Raúl Sapena Pastor.

Finance, General César Barrientos.

Interior, Dr. Sabino A. Montanaro.

Defence, General Leodegar Cabello.

Justice and Labour, Dr. Saul González.

Education and Worship, Dr. Raúl Peña.

Public Health and Social Welfare, Dr. Dionisio González Torres.

Public Works and Communications, General Marcial Samaniego.

Agriculture and Livestock, Eng. Hernan do Bertoni.

Industry and Commerce, Sr. José Antonio Moreno González.

Without Portfolio, Arch. Tomás Romero Pereira.

President of Central Bank, Dr. César Romero Acosta.

## PARAGUAYAN EMBASSY IN LONDON

Braemar Lodge, Cornwall Gardens, S.W.7

[01-937-1253]

Ambassador (vacant).

Chargé d'Affaires, Capt. Ignacio A. Pane (Consul-General).

1st Secretary, Dr. Pedro D. S. Patino.

2nd Secretary, Mrs. G. S. de Jauregui.

Consulate-General, 29 Kensington Court, W.8.

Consular Official, Mrs. T. Castill.

There is also a Paraguayan Consulate in Liverpool.

Area and Population.—Paraguay is ■■■ inland sub-tropical State of South America, situated between Argentina, Bolivia and Brazil (see MAP, p. 829). The ■■■ is computed at 157,000 square miles, with a population (estimated, 1968) of 2,350,000.

Eastern Paraguay consists of a series of plains, intersected by abrupt ranges of hills, none of which exceeds 2,300 feet above sea level. The Paraguay and Alto Paraná rivers normally navigable for vessels of 6 to 7 feet draught. Some of the tributary streams are also navigable. The Pilcomayo river is navigable for small craft for 180 miles from Asunción. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence extensive marshes, one of which, known as "Ñembucú," or "endless," is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is a flat plain, rising uniformly towards its western boundary to a height of 1,140 feet; it suffers much from floods and still more from drought.

**Government.**—In 1535 Paraguay was settled a Spanish possession. In 1811 it declared its independence of Spain.

The 1967 constitution provides for a two-chamber parliament consisting of a 30-member Senate and a 60-member Chamber of Deputies. Two-thirds of the seats in each chamber allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18.

The President is elected for 5 years and may be re-elected for a further term. He appoints the Cabinet, which exercises all the functions of government. During parliamentary recess it can govern by decree through the Council of State, the members of which are representative of the Government, the armed forces and various other bodies.

The first elections under the new constitution were held on Feb. 11, 1968.

**Production.**—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned and frozen meat, timber, quebracho extract, cotton, hides, yerba maté, tobacco, sugar, citrus fruits, and petit grain essence (which are the principal exports), manioc, maize, rice and edible oils are also produced for home consumption. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and few of the best known hardwoods find a market abroad.

**Communications.**—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). There are direct shipping services between Hamburg, Antwerp, Amsterdam and Asunción; New York, Philadelphia, Baltimore and Asunción; and Liverpool, London and Asunción. Nine airlines operate services from Asunción.

There are 420 miles of asphalted roads in Paraguay, connecting Asunción with São Paulo (26 hrs.) *viâ* the Bridge of Friendship and Foz de Yguazú and with Buenos Aires (24 hrs.) *viâ* Pilcomayo, and about 3,750 miles of earth roads in fairly good condition, but liable to be closed or to become impassable in wet weather. Bus services

connect the principal towns and there are services to Buenos Aires, São Paulo and Paranáguá, a port on the Brazilian coast.

**Defence.**—There is a permanent military force of about 20,000 all ranks. Three gunboats and a number of small armed launches patrol inland waters.

**Language and Literature.**—Spanish is the official language of the country but outside the larger towns *Guarani*, the language of the largest single unit of original Indian inhabitants, is widely spoken. Four morning and one evening daily, one bi-weekly and four weekly newspapers are published in Asunción.

**Education.**—Primary education is free and compulsory. In 1968 there were over 2,600 primary schools with about 380,000 pupils, 244 secondary schools with 47,000 pupils, a national university and a Catholic university in Asunción and three other Catholic universities in provincial cities. There are about 5,500 university students.

#### FINANCE

	1967	1968
	Guaranies	Guaranies
Revenue.....	5,741,800,000	6,893,400,000
Expenditure.....	5,943,900,000	7,023,600,000

**Currency.**—A free exchange system was introduced in August, 1957. The rate of exchange in 1968 was Gs.299.02 = £1. (See also p. 84.)

**Trade.**—The imports are chiefly articles of food and drink, consumer goods, textiles, vehicles and machinery. Main exports in 1968: Meat and by-products, tobacco, seeds, yerba maté, maize, fruit (lemons, grapefruit, oranges), coffee, cotton fibre, essential oils, vegetable oil, castor seed oil, skins, pelts, and timber.

#### Trade with U.K.

	1967	1968
Imports from U.K. ...	£1,259,000	£2,028,000
Exports to U.K. ....	2,287,000	2,722,000

**CAPITAL.**  $\Psi$  Asunción, about 1,000 miles up the River Paraguay from Buenos Aires. Pop. (estimated, 1962), 300,000; other centres being  $\Psi$  Encarnación 33,664; Concepción, 28,357; and Villarica 26,000.

**FLAG.**—Three horizontal bands, red, white, blue with the National seal on the obverse white band and the Treasury seal on the reverse white band.

**NATIONAL DAY.**—May 14.

PERUVIAN EMBASSY AND CONSULATE  
52, Sloane Street, S.W.1

[01-235-1917/2545]; Consulate [01-235-6867]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Don Adhemar Montagne (1969).

Counsellor, Señor Don Ricardo Walter Stubbs.

Air and Military Attaché, Maj.-Gen. Pedro Sala.

and Secretary, Señor Don Gerardo Balbuena.

3rd Secretaries, Señor Don Richardo Luna; Señorita Iris Valverde.

Commercial Attaché, Señor Don Jack Gubbins.

Naval Attaché, Capt. R. Arróspide.

Consul-General, Liverpool (24 Sir Thomas Street),

Señor Don Miguel Iribaren; Vice-Consul, Señor

Don Hector Cabada.

There are Consulates at Hull and Glasgow.

**Area and Population.**—Peru is a maritime Republic of South America, situated between  $0^{\circ} 00' 48''$  and  $18^{\circ} 21' 00''$  S. latitude and between  $68^{\circ} 39' 27''$  and  $81^{\circ} 20' 13''$  W. longitude. The area of the Republic including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles with a total population (estimated, 1968) of 12,772,000.

**Physical Features.**—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being Huascarán (22,211 feet), Huandoy (20,855 feet), Ausangate (20,235 feet), Misti volcano (18,364 feet), Hualcan (20,000 feet), Chachani (19,037 feet), Antajasha (18,020 feet), Pichupichu (17,724 feet), and Mount Meiggs (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population.

In the mountains, where most of the Indians live, are to be found minerals in great richness and

variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

**Government.**—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quechua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821-1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women between the ages of 18 and 21 who are legally released from parental tutelage.

Presidential and Congressional elections on a basis of proportional representation were held on June 9, 1963, and a new President, Sr. Belaúnde Terry, took office on July 28, Peru's day of independence. In the summer of 1968, 58 seats in the Chamber of Deputies were held by Sr. Haya de la Torre's APRA party, 11 by the *Union Nacional Odrista* (led by former President Gen. Odría), 37 by *Acción Popular*, 9 by Christian Democrats and 25 by others.

President Belaúnde Terry was deposed by a revolutionary junta on Oct. 3, 1968, and sent out of the country. A new Cabinet, sworn in on the same day, proclaimed itself the Government and Maj.-Gen. Alvarado assumed office as President.

**Production.**—Agriculture, mining and fishing are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat, barley, grapes and coffee. Minerals produced in 1962 were valued at soles 5,915,009,565 and included lead, zinc, copper, iron ore, petroleum, silver, gold, tungsten, bismuth, antimony and vanadium. The islands off the Pacific coast provided guano amounting to 206,097 metric tons in 1962.

Peru is today the largest exporter of fish meal and the volume of the fish catch now exceeds that of Japan. Exports of fish products during the past decade have risen from 30,000 tons valued at £3,100,000 to 1,248,133 tons valued at £44,000,000 in 1962.

**Communications.**—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, via Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo María, to Pucallpa, the river port on the Ucayali, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and asphalted throughout.

The first railway opened in 1850 and of the 2,494 miles of railways now operating, Government lines account for 578 miles, the Peruvian Corporation 1,180 miles and private enterprises about 726 miles. There is also steam navigation on the eastern rivers such as the Ucayali (see Andean Highway, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

**Defence.**—The Army is recruited by voluntary enlistment, supplemented by conscription (2 years), and numbers about 30,000 of all ranks. Armoured units are equipped with American and French vehicles. Engineer units are employed on the reconstruction of roadways in North Eastern Peru using American equipment. **Navy.**—The Navy consists of 11 cruisers; 5 destroyers; 3 frigates; 4 submarines completed in the United States of America in 1954–57; 4 LST's; 7 river gunboats; 4 fleet oilers; 4 fleet auxiliaries; 11 river transports; 4 patrol boats; 4 launches; 1 floating dock; 3 tugs. There is 1 naval cadet school at La Punta and 1 submarine base at Callao. **Air Force.**—The Air Force is equipped with British Hunter and Canberra aircraft; American fighter, bomber, transport and training aircraft; French helicopters (*Alouette*) for training and rescue purposes. There are military aerodromes at Talara, Chiclayo, Las Palmas (near Lima) and Piura, and a seaplane base at Iquitos.

**Education.**—Elementary education is compulsory and free for both sexes between the ages of 7 and 14. In 1961 there were 1,495,047 pupils undergoing primary education, 184,849 attending ordinary secondary schools and 42,978 attending technical secondary schools. There were 13,510 state primary schools with 36,503 teachers and 450 state secondary schools with 10,900 teachers (of which 191 schools and 4,200 teachers provided technical education). In addition there were 1,350 private schools providing primary education, with 7,050 teachers, and 420 private secondary schools (of which 70 technical) with 7,490 teachers (990 technical); and 306 schools conducted by religious orders. The State provides rural agricultural schools for Indians, and mining schools and polytechnics in the more populated centres. There are now 23 state and seven private universities in Peru. The University of San Marcos at Lima, founded in 1551 has about 14,000 students.

**Language and Literature.**—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quechua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes 1 national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879–1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1960 there were 7 main morning papers, including the Government newspaper *El Peruano*, and four afternoon papers daily; 48 provincial papers have a small and purely local circulation. A chair of English was established in 1938 at the *Universidad Mayor de San Marcos* in Lima.

## FINANCE

	1964	1965
	Soles	Soles
Public revenue...	14,602,000,000	17,313,000,000
Public expenditure	16,802,000,000	17,313,000,000
Peru's balance of payments deficit amounted to U.S. \$160,000,000 in 1966.		

**Trade.**—Import trade of Peru in 1964 totalled approximately Soles 15,500,000,000; Exports, Soles 17,800,000,000.

## Trade with U.K.

	1967	1968
Imports from U.K. . .	£12,356,000	£11,543,000
Exports to U.K. . . .	7,697,000	13,649,000

The principal imports are machinery and vehicles, foodstuffs, metal and manufactured metal goods, chemicals, and pharmaceutical products. The chief exports are fishmeal, sugar, cotton, coffee and minerals (copper, silver, iron ore, zinc and lead).

**CAPITAL Lima.** Population (Census 1961, preliminary), 1,715,971; other large towns are Ψ Callao (161,286), Arequipa (156,657), Ψ Iquitos (55,695), Ψ Chiclayo (86,904).

**FLAG.**—Three vertical bands, red, white, red; coat of arms on white band. **NATIONAL DAY.**—July 28 (Anniversary of Independence).

[In addition the Cabinet includes eleven other members, such as the Chairmen of public councils and commissions, presidential assistants, etc.]

PHILIPPINE EMBASSY  
9a Palace Green, W. 8  
101-937-3646]

Ambassador Extraordinary and Plenipotentiary, His Excellency Narciso G. Reyes.

*Area and Population.*—The Philippines are situated between 21° 20'–4° 30' N. lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,929 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon	40,422	Mindoro	3,759
Mindanao	36,538	Leyte	2,786
Samar	5,050	Cebu	1,703
Negros	4,906	Bohol	1,492
Palawan	4,550	Masbate	1,262
Panay	4,446		

Other groups in the Republic are the Sulu islands (Capital, Jolo), Babuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines was estimated in July, 1967 at 37,158,000.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Moslem Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish, American and Indian.

The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas", after the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After

the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

*Language and Literature.*—The official languages are Filipino, English and Spanish. Filipino, the national language, is based on Tagalog, one of the Malay-Polynesian languages which according to the 1960 census is spoken by 44 per cent. of the population. English, which is the language of government and of instruction in secondary and university education, is spoken by at least 40 per cent. of the population, while Spanish, which is on the decline, is now spoken by only 73 per cent. of the population are literate. There is a National Library in the capital with branches in other urban centres and a flourishing press. Education accounts for about 30 per cent. of total expenditure in the national budget. Secondary and higher education is extensive and there are 33 private universities recognized by the Government, including the Dominican University of Santo Thomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there are also 6 State-supported universities including the University of the Philippines, founded 1908. It is estimated that students at private universities number 232,797; State universities, 23,357.

*Roads and Railways.*—Communications suffered serious damage during the War of 1941–45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system is undergoing rehabilitation and extension and, including all types of services, covered 60,526 kilometres in June, 1968. In 1967 there were 436,149 road vehicles registered. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 642 miles are still operated. The Manila railway, on Luzon island, has been converted to diesel traction.

*Shipping.*—There are over 30 ports of entry in the Philippines and 3,551 vessels of various types, totalling 732,231 tons, are engaged in inter-island traffic. There are 108 ocean-going vessels registered in the Philippines, totalling 725,123 gross tons.

*Civil Aviation.*—Air transport plays a key part in inter-island travel and an important one in communications overseas. Philippine Air Lines have regular flights to Hong Kong, Taipei, Sydney, Singapore, Saigon, Bali, and Tokyo and operate four trans-Pacific flights a week to San Francisco, in addition to inter-island services. Air Manila (Inc.)

and Filipinas Orient Airways (Inc.) also operate internal air services.

## FINANCE

## Trade with U.K.

	1967	1968
Imports from U.K. . .	£19,353,000	£22,344,000
Exports to U.K. . . . .	5,113,000	3,700,000

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber. There is, however, an increasing number of manufacturing industries and it is the policy of the Government to diversify its economy.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

**CAPITAL.**—Ψ Manila, in the island of Luzon: population (1969): City area, 1,550,000; Manila with suburbs (incl. Quezon City, Pasay City, Caloocan City, Makati, Parañaque, San Juan Mandaluyong and Navotas), 2,989,300. Quezon City has been designated as the future capital of the Philippines, but pending completion of government building projects, the Executive, Legislative and Judicial departments of the government are still located in Manila. The next largest cities are Ψ Cebu (343,900), Davao (298,300), Ψ Iloilo (201,000), Ψ Zamboanga (183,800), and Bacolod (162,200).

**FLAG.**—Equal horizontal bands of blue (above) and red; gold sun with three stars on a white triangle next staff. **NATIONAL DAY.**—June 12 (Independence Day).

*Consulate-General in London, 19 Weymouth Street, W.1. [01-580-4324]*

**Area and Population.**—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very

great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles; on Dec. 31, 1968, it was estimated at 32,426,000. Roman Catholicism is the religion of the vast majority of the inhabitants.

**Government.**—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed in Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznań and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17, 1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952. It changed the title of the country to the Polish People's Republic

(*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion were recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński. Dissatisfaction with the régime and conditions of life led to riots in Poznań in June, 1956, and subsequently M. Władysław Gomułka, who had been expelled from the Party in 1949, was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszyński was allowed to resume his functions. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government, still led by M. Cyrankiewicz, took office. Elections to the *Sejm* have been held in 1961, 1965 and 1969. M. Cyrankiewicz remained Prime Minister, with the composition of the Government almost unchanged though subsequent reconstructions have taken place. The 1969 Cabinet is listed above.

**Education.**—Elementary education is compulsory and free. There are universities at Kraków, Warsaw, Poznań, Łódź, Wrocław, Lublin and Toruń and a considerable number of other towns.

**Language and Literature.**—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being used. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prize-winner for Literature in 1905, Bolesław Prus (1847-1912), and Stanisław Reymont (1868-1925), Nobel Prize-winner in 1924. There are now 42 daily papers published in Poland, 11 of them in Warsaw.

**Production and Industry.**—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 90 per cent. of Polish industry is stated to be "socialized", but 84.6 per cent. of agricultural land is privately farmed.

#### FINANCE

	1967 '000 Zloty	1968 '000 Zloty
Revenue†.....	326,700,000	320,700,000

*Consulate-General, 47 Wilton Crescent, S.W.1 (01-235-6216).*

*Area and Population.*—Continental Portugal occupies the western part of the Iberian Peninsula (for MAP, see p. 939). It contains an area of 34,500 square miles, with a population (including the Azores and Madeira) (estimated, 1968) of 9,505,000. It lies between 36° 58'–42° 9' 12" N. lat. and 6° 11' 48"–9° 29' 45" W. long., being 302 miles in length

from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira Islands in North Atlantic are treated as parts of continental Portugal for administrative purposes.

*Government.*—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II and the Royal family into exile, and the National Assembly of Aug. 27, 1911, sanctioned a Republican form of government. The President is elected for seven years by indirect vote of the electors, who vote for members of a electoral college to select the President. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. During the serious illness of Dr. Salazar, Prime Minister since 1932, Prof. Marcello Caetano was appointed Prime Minister on Sept. 26, 1968.

The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporate Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decrees-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

The annual *per capita* income in Portugal is about £150. It is still essentially an agricultural country and over 40 per cent. of the working population is engaged in agriculture, forestry and animal husbandry.

*Defence.*—Military service is compulsory for all men who are physically fit and very few are exempted. The present strength of the Army is about 120,000 of which a large proportion is serving in Portuguese Africa. Much of the Army's old British equipment is now being replaced by French, German and American material. The Navy consists of 1,280 officers and 13,200 men manning a total of over 130 craft. The serving strength of the Air Force is about 1,000 officers and 12,500 other ranks (including some 2,500 parachutists) and about 500 aircraft of all types.

*Education* is free and compulsory for four years from the age of 7 and is being extended to six years. Secondary education is mainly conducted in State lycées, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

*Language and Literature.*—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil.

Portuguese language and literature reached the culminating point of their development in the *Lusitadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

*Civil aviation* is controlled by the Ministry of Communications. There is an international airport at Portela, about 11 miles from Lisbon, and the

airport of Pedras Rubras near Oporto is also used for some international services. A new airfield at Faro in the Algarve now takes direct flights from London. There is a civil airline, an inter-island service and services in Portuguese Africa. British European Airways and Transportes Aereos Portugueses operate a daily service between London and Lisbon by agreement between them which calls at Oporto twice weekly in both directions. There are altogether 19 airlines operating a total of about 400 services a month through Lisbon airport.

**Agriculture.**—The chief agricultural products are cork, maize, wheat, rye, oats, barley, potatoes, beans, onions, olives, oranges, lemons, figs, almonds, tomatoes, timber, port wine and table wines. There are extensive forests of pine, cork, eucalyptus and chestnut covering about 20 per cent. of the total area of the country.

**Industry.**—The country is so far only moderately industrialized, but is fairly rapidly extending its industries. The principal manufactures, most of which are still protected by high tariffs, are textiles (cotton, woollen and rayon), furniture, pottery, glassware, cork goods, leather, paper pulp, tomato concentrates, canned fish, cement, fertilizers, chemicals and hardware. There is a modern steelworks; several British and foreign motor-car manufacturers assemble their vehicles in Portugal and lately the tourist industry has become an important earner of foreign exchange. There are several hydro-electric power stations and a new thermal power station. **Minerals.**—The principal mineral products are pyrites, wolfram, tin, iron ores and some copper.

**Finance.**—Portugal is a member of the European Monetary Agreement, the World Bank, the International Monetary Fund and the International Finance Corporation. The country has large gold and foreign exchange reserves, which amounted to Escudos 24,317,488,067 in April, 1969. The 1969 State budget showed a surplus of Escudos 1,900,000. Total revenue, Escudos 25,327,100,000; expenditure Escudos 25,325,200,000.

**Currency.**—Escudo (of 100 Centavos). Conto consists of 1,000 escudos. Since devaluation of the £ sterling in 1967 the rate of exchange has fluctuated around the level Escudos 68.50 = £1 (see also p. 83).

**Trade.**—Total trade of Portugal in the first nine months of 1968 showed a deficit of Escudos 7,759,000,000, representing a decline of 24,000,000 Escudos or 34 per cent. less than in the corresponding period of 1967. Value of total exports was 67.6 per cent. of total imports.

Portugal is a member of E.F.T.A., G.A.T.T. and O.E.C.D. The principal imports are raw and semi-manufactured iron and steel of the types that are not produced by the national steel-works, industrial machinery, chemicals, crude oil, motor vehicles, wool and dried cod fish.

The principal exports in 1968 (Jan.—Sept.), were textiles (20 per cent. by value), foodstuffs (20 per cent.), timber, cork and respective manufactures (12 per cent.), chemicals (6 per cent.), electrical and other machinery (5 per cent.) and metal manufactures (5 per cent.).

There are British Consular Offices at Lisbon, Oporto, Portimao and Vila Real de Santo Antonio, Figuera da Foz (Portugal), St. Vincent (Cape Verde Islands), Funchal (Madeira), Lowrenço Marques and Beira (Portuguese East Africa), Luanda (Portuguese West Africa) and Macau.

#### BRITISH COUNCIL

Representative, A. M. Welsh, O.B.E., The British Institute, Rua de Luis Fernandes 3, Lisbon 2.

There is a British Institute at Coimbra (Rua Alexandre Herculano 34) and the Council has libraries at Lisbon, Coimbra and Oporto.

ROYAL BRITISH CLUB, Rua da Estrela 8, Lisbon.

BRITISH-PORTUGUESE CHAMBER OF COMMERCE, Rua da Estrela 8, Lisbon (Branch at Rua de Sá da Bandeira, 784 2º EF, Oporto).

ANGLO-PORTUGUESE ASSOCIATION, Rua de Breyner 79, Oporto.

#### MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of metropolitan Portugal.

The Madeiras are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles, with a population of 269,769. ΨFunchal in Madeira, the largest island (270 square miles), is the capital, with a population of 43,301; Machico (4,734). Trade with U.K., 1968: Imports from U.K., £741,000; Exports, £285,000.

The Azores are a group of 9 islands (Flores, Corvo, Terceira, São Jorge, Pico, Fayal, Graciosa, São Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 318,558. ΨPonta Delgada the capital of the group, has a population of 22,448. Other ports are ΨAngra, in Terceira, (13,501) and ΨHorta (7,109). Trade with U.K., 1968: Imports from U.K., £412,000; Exports, £189,000.

#### PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antao, São Vicente, Santa Luzia, São Nicolao, Boa Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 square miles and a population (estimated, 1967) of 232,000. Revenue (1964), Escudos 135,411,000. Capital, ΨPraia (6,000). Vessels take coal and oil at ΨMindelo, São Vicente (pop. 20,000).

SÃO TOMÉ and PRÍNCÍPE ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1967), 60,000). Capital ΨSão Tomé (3,187).

PORTUGUESE GUINEA, area 14,000 sq. miles, population (estimated, 1967), 528,000; (capital ΨBissau, population 6,000). Revenue (1964), Escudos 202,012,000.

ANGOLA has an area of 488,000 sq. miles, population (estimated, 1967), 5,293,000, with present capital ΨSt. Paul de Luanda (pop. 346,763), and capital designate Nova Lisboa, and includes also Kabinda and Portuguese Zaire (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Revenue (1964), Contos 4,642,891.

## Angola's Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£7,303,000	£11,043,000
Exports to U.K. . . . .	579,000	1,816,000

A transcontinental railway from *Benguela* (Lobito Bay) in Angola, which traverses the Katanga mineral district of the Congo and then runs southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

**PORTUGUESE EAST AFRICA, OR MOZAMBIQUE.** Lourenço Marques, Inhambane, Quelimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population (estimated, 1967) of 7,124,000. Capital  $\Psi$  Lourenço Marques (441,363). Revenue (1964), *Contos* 5,122,386.

## Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£9,332,000	£11,012,000
Exports to U.K. . . . .	3,961,000	5,190,000

$\Psi$  **MACAU**, in China, on the Canton River, has an area of 5 square miles and a population (1965) of 280,290.

**PORTUGUESE TIMOR** (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (estimated, 1967), 566,000. Capital,  $\Psi$  Dili, pop. 7,000.

## QATAR

*Ruler of Qatar*, Shaikh Ahmad bin Ali bin Abdullah Al Thani; *succeeded* Oct. 24, 1960.

*Deputy Ruler and Minister of Finance*, Shaikh Khalifa bin Hamad Al Thani.

*Minister of Education*, Shaikh Jasim bin Hamad Al Thani.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 4,000 sq. miles, with a population estimated at about 80,000 (July, 1968).

Oil deposits on land are being exploited by the Qatar Petroleum Company, a subsidiary of I.P.C., under a concession granted by the Ruler, and the first oil shipment was made on December 31, 1949. The Company is following an agreed policy of levelling off annual production at about 9,000,000 long tons. Considerable development has resulted from this source of income.

The great majority of the population is concentrated in the urban district of the capital, Doha. Only a small minority still pursue the traditional life of the semi-nomadic tribesmen and fisher-folk. There are townships on the coast at Khor and Wakra, but much of the interior is uninhabited. There are, however, gardens near Doha and to the north, and encouragement is being given to the development of agriculture. Doha is an expanding town with a new airport built to international standards, and has good shopping facilities and public services. Further development projects include a cement factory, which was inaugurated in May 1969, a factory for processing and freezing prawns, which began operations in 1968, a broadcasting station transmitting on medium and short wave bands, and a £15,000,000 fertilizer project, on which work has recently been started. Ocean-going vessels have hitherto used the Oil Company's anchorage with off-loading facilities by barge at Umm Said on the east coast, but the dredging of a

deep water channel into Doha harbour has enabled ships to unload there on to lighters from the middle of 1966. Plans are in hand to make Doha a fully-fledged port with 4-5 deep-water berths and these should be realized before June, 1970. An offshore concession is held by the Shell Company of Qatar, which is exporting oil from its terminal on Halul Island, at a rate of about 7,000,000 long tons per annum. Following the withdrawal of the Continental Oil Company of Qatar from the country, part of its offshore concession area has been awarded to a new company, to be known as the Qatar Japan Oil Company. Its exploration in the area had not started by the summer of 1969. Extension of the Doha water distillation plant had raised its total capacity to nearly 4 million gallons daily by 1969.

Regular air services connect Qatar with the other Persian Gulf Shaikhdoms (Bahrain and the Trucial States), Kuwait, Muscat, Iran, Saudi Arabia, the Indian sub-continent, the Lebanon and Europe. The Ruler has an international staff of technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. On May 24, 1963, the Qatar Government took over the management of its postal services from the British G.P.O. The Indian external rupee was withdrawn in June, 1966, and replaced temporarily by the Saudi riyal. In September the new Qatar/Dubai currency was introduced, one riyal being equivalent to the devaluation rate of the Indian external rupee = 1s. 6d. sterling—since sterling devaluation in 1967 the Qatar-Dubai riyal has been equivalent to 1s. 9d.

## Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£3,688,000	£7,148,000
Exports to U.K. . . . .	4,253,000	24,708,000

**CAPITAL.**—Doha. Population (estimated) 50,000.

**FLAG.**—White and maroon, white portion nearer the mast; vertical indented line comprising 17 angles divides the colours.

#### RUMANIAN EMBASSY IN LONDON

4 Palace Green, W.8  
 [Western: 9666]

Ambassador Extraordinary and Plenipotentiary, His  
 Excellency Vasile Pungan (1966).  
 Counsellors, G. Anghelescu; Aurel Ionciță (Com-  
 mercial).

**Area and Population.**—Rumania is a republic of  
 South-Eastern Europe, formerly the classical *Dacia*  
 and *Scythia Pontica*, having its origin in the union  
 of the Danubian principalities of *Wallachia* and  
*Moldavia* under the *Treaty of Paris* (April, 1856).  
 The area in October, 1945, was estimated at  
 91,600 sq. miles; with a population (estimated,  
 July 1, 1967) of 19,285,000.

**Government.**—The principalities remained separ-  
 ate entities under Turkish suzerainty until 1859,  
 when Prince Alexandru Ion Cuza was elected  
 Prince of both, still under the suzerainty of Turkey.  
 Prince Cuza abdicated in 1866 and was succeeded

by Prince Charles of Hohenzollern-Sigmaringen, in  
 whose successors the crown was vested. By the  
*Treaty of Berlin* (July 13, 1878) the Principality  
 was recognized as an independent State, and part  
 of the *Dobruja* (which had been occupied by the  
 Rumanians) was incorporated. On March 27,  
 1881, it was recognized as a Kingdom.

The outcome of the War of 1914-18 added  
 Bessarabia, the Bukovina, Transylvania, The Banat  
 and Crisana—Maramures, these additions of territory  
 being confirmed in the Treaty of St. Germain, 1919,  
 and the Treaty of Petit Trianon, 1920.

On June 27, 1940, in compliance with an ulti-  
 matum from U.S.S.R., Bessarabia and Northern  
 Bukovina were ceded to the Soviet Government,  
 the area affected being about 20,000 sq. miles, with  
 a population of about 4,000,000.

In August, 1940, Rumania ceded to Bulgaria  
 the portion of Southern Dobruja (about 3,000  
 sq. miles) taken from Bulgaria in 1913. Rumania  
 became "The Rumanian People's Republic" in  
 December, 1947, on the abdication of King  
 Michael.

A new Constitution, modelled on the Soviet  
 Constitution of 1936, was adopted unanimously on  
 September 24, 1952, by the Grand National  
 Assembly. The Assembly was later dissolved and  
 elections were held for a new Grand National  
 Assembly on November 30, 1952; in each con-  
 stituency there was only one candidate for election,  
 representing the People's Democratic Front.  
 Further elections on similar lines were held in  
 February, 1957; in March, 1962 and in March, 1965.  
 A new Constitution was approved by the Grand  
 National Assembly in 1965 when the name of the  
 state was changed to The Socialist Republic of  
 Rumania. The Constitution states (Art. 3) that the  
 leading political force of the whole of society is the  
 Rumanian Communist Party.

**Agriculture.**—The soil of Wallachia and Moldavia  
 is among the richest in Europe producing wheat,  
 maize, millet, oats, barley, rye, beans, peas and  
 other vegetables. Grape vines and fruits are abun-  
 dant. The fertile plain of Transylvania yields large  
 crops of maize, wheat, rye, oats, flax and hemp.  
 Agriculture and sheep and cattle raising are the  
 principal industries of Rumania, but the climate  
 of this part of South-Eastern Europe is of the  
 Continental character, and the intense winter cold  
 and summer heat, and fierce summer drought some-  
 times defeat these principal industries. The forests  
 of the mountainous regions are extensive (17,851,401  
 acres), and the timber industry is important. The  
 total arable land under cultivation in 1967 was  
 9,799,800 hectares.

Socialization of agriculture was completed when  
 plans for collectivization were fulfilled in the spring  
 of 1962, some three years ahead of the planned date.

**Natural Resources and Industry.**—Before the war  
 petroleum and agriculture were the backbone of the  
 Rumanian economy. Though the production of  
 both industries has increased, they no longer hold  
 the same dominant position. Rumania's oil re-  
 sources now enable her to produce about 13,000,000  
 tons of crude oil a year and there are plentiful  
 supplies of natural gas, together with various  
 mineral deposits including coal, iron ore, bauxite,  
 lead, zinc, copper and uranium in quantities which  
 allow a substantial part of the requirements of  
 industry to be met from local resources. Since  
 1948 industrialization has proceeded rapidly and the  
 State is well on the way to establishing a mixed  
 industrial economy. Heavy investments have been  
 made in electric power, the chemical industry, the  
 metallurgical industry and the engineering industry  
 and growing attention is being paid to light in-  
 dustry. The economy is centrally organized on the

basis of Five-Year Plans which cover all branches of national activity including investment and production. The current Five-Year Plan (1966 to 1970) calls for an average annual increase of 11 per cent. in industrial output, a figure which has been exceeded in the first two of the five years.

1967 production figures were: crude oil, 13,206,000 tons; coal, 15,019,000 tons; electric power, 24,769 million kWh; natural gas, 16,036 million cubic metres; steel, 4,088,000 tons; pig iron, 2,456,000 tons; wheat, 5,819,600 tons; maize, 6,857,900 tons; sunflower seed, 719,800 tons; sugar beet, 3,829,800 tons.

**Language and Literature.**—Rumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the State Committee for Culture and Art, which has the status of a Ministry. In 1968 53 daily newspapers were published. The leading religion is that of the Rumanian Orthodox Church; the Roman Catholics and some Protestant denominations are of importance numerically. The Jewish community has declined through emigration.

**Education** is free and nominally compulsory, with 3,902,347 in attendance in 1967-68, including 141,589 in higher education. There are 5 Universities, at Bucharest, Iasi, Cluj, Timisoara and Craiova. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galatz and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

**Communications.**—In 1967 there were 11,023 miles of railway open for traffic. The mercantile marine, as a result of war losses, seizure and reparations, was reduced to a few moderate-sized sea-going steamers and a number of coastal and river craft, but is being steadily built up. The principal ports are Constantza (on the Black Sea), Sulina (on the Danube Estuary), Galati, the most important, Braïla, Giurgiu and Turnu Severin. Rumania is a member of the Danube Commission whose seat is at Budapest.

## FINANCE

	1966	1967
	Lei	Lei
Revenue....	108,867,000,000	129,307,000,000
Expenditure..	105,372,000,000	124,322,000,000

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Rumanian *Leu* (of 100 Bani) had been revalued three times since the war by Feb. 1, 1954. With a 100 per cent. premium on all "capitalist" currencies for non-commercial transactions, the effective exchange rate after devaluation of sterling in Nov., 1967, was Lei 28·80 = £1 and Lei 12 = \$U.S.1. A special tourist rate is available to all tourists. (See also p. 84.)

## TRADE

	1966	1967
	Lei	Lei
Imports.....	7,279,300,000	9,276,500,000
Exports.....	7,116,900,000	8,372,100,000

No complete figures for foreign trade have been

published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., although relatively small has increased notably since the signature of an Anglo-Rumanian trade arrangement in 1960.

## Trade with U.K.

	1967	1968
Imports from U.K. . .	£9,891,000	£31,055,000
Exports to U.K. ....	25,657,000	25,873,000

About 65 per cent. of Rumania's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Rumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance".

**CAPITAL.** Bucharest, on the Dimbovita, population (1966), 1,511,388. Other towns with a population of over 100,000 in 1966 are: Brasov (263,201); Cluj (222,652); Constantza (199,356); Iasi (194,835); Timisoara (193,039); Ploiesti (190,687); Craiova (173,315); Galati (151,349); Braïla (144,341); Arad (136,912); Oradea (134,939); Resita (121,458); Sibiu (109,546); Baia Mare (108,709); Tirgu-Mures (104,922); and Hunedoara (100,953).

**FLAG.**—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band. **NATIONAL DAY.**—August 23 (Liberation Day, 1944).

## BRITISH EMBASSY

24 Strada Jules Michelet, Bucharest ■  
 Ambassador Extraordinary and Plenipotentiary, His  
 Excellency Denis Seward Laskey, C.M.G., C.V.O.  
 (1968).....£5,625  
 1st Secretaries, H. M. S. Reid (Head of Chancery);  
 J. S. N. Drew; J. H. Walsh (Commercial); W. A.  
 Mann (Cultural).

2nd Secretary, H. M. Paterson (Consul).

## RWANDA

(Republic of Rwanda)

President, Grégoire Kayibanda, born 1905; elected  
 Oct. 26, 1961; assumed office, July 1, 1962; re-  
 elected, Oct. 3, 1965.

Rwanda became an independent republic on July 1, 1962. Formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, it has an area of 10,169 sq. miles and a population (estimated, 1965) of 3,306,000, mainly of the Bahutu tribe, with Batutsi and Batwa minorities. Coffee and cotton are grown and there is some mineral production. Hides, extract of quinine and pyrethrum flowers are also exported.

The currency is the *Rwanda franc*. In 1968 total imports were valued at \$U.S. 17,200,000; imports from U.K., £315,000; total exports, \$U.S. 16,100,000; exports to U.K., £274,000. Revenue in 1968 totalled: *Rw.Fr.* 1,313,000,000; Expenditure *Rw.Fr.* 1,505,000,000.

At a referendum held in September, 1961, under supervision of the United Nations, a large majority voted against the retention of the monarchy which was accordingly abolished on Oct. 2, 1961. Elections for a new Legislative Assembly were also held in September, 1961, and the Assembly elected M. Kayibanda as President of the National Council, to hold office as Head of State and Head of the Government (Mr. Kayibanda was seeking re-election in 1969). Admission of Rwanda to membership of the United Nations was approved on July 26, 1962.

**CAPITAL.**—Kigali (4,273).

**FLAG.**—Three vertical bands, red, yellow and green with letter R on yellow band.

British Ambassador, His Excellency David Aubrey Scott, C.M.G. (1967) (resident) ■ Kampala, Uganda.

## SALVADOR

(República de El Salvador)

President, Fidel Sanchez Hernandez; elected March 5, 1967; assumed office July 1, 1967, for a five-year term.

Vice-President, Humberto Guillermo Cuestas.

Minister of Foreign Affairs, Dr. Francisco José Guerrero.

## SALVADOREAN EMBASSY AND CONSULATE

98 Portland Place, W.1.

[01-636-9563]

Ambassador, His Excellency Don Rafael Alfonso Quiñonez-Meza (1968).

Secretary and Consul, Señor Manuel Monterrosa.

Attaché, Don René A. Machon-Rivera.

**Area and Population.**—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an area of 7,722 square miles, with a population (estimated, 1967) of 3,151,000. El Salvador is therefore a densely populated country with some 409 persons per square mile. It is divided into 14 Departments. (For MAP, see p. 875.)

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 3, 1965, when considerable damage was done to San Salvador.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

**Government.**—Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. Under a new Constitution adopted in 1950, the President is elected for six years and the Legislature for two. New legislative elections under proportional representation held in March, 1968, resulted in a chamber composed of 27 deputies of the official party and 25 opposition deputies. Presidential elections were again held on March 5, 1967, and the candidate of the Government Party, Colonel Fidel Sanchez Hernandez, won by 54.4 per cent. of the votes against three opposition candidates.

**Production and Industry.**—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes, and cotton, which is cultivated on the coastal plains; cane sugar is also produced, as well as maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

**Education.**—The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

**Language and Literature.**—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

**Communications.**—The Salvador Railway, nearly 100 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Union (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The roads are paved and in good condition. There is a good motor road between Acajutla, the principal port, and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways, TACA, TAB, LANICA, SAHSA and LACSA connect El Salvador with the rest of the world. The Ilopango international airport can receive jet aircraft.

There are post and telegraph offices throughout the country. There are many broadcasting stations and two television stations.

## FINANCE

	1967 Colones	1968 Colones
Revenue (Budget) . . .	234,236,000	234,233,000
Expenditure (do.) . . .	240,320,000	250,744,000
Public Debt (Dec. 31, 1967):		Colones
External Debt . . . . .		213,710,000
Internal Debt		
Direct Governmental . . . . .		20,087,000
Guaranteed by Government . . . . .		47,640,000

## TRADE

	1966 Colones	1967 Colones
Imports . . . . .	550,000,000	559,800,000
Exports . . . . .	472,300,000	518,100,000

## Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£2,993,000	£1,853,000
Exports to U.K. . . . .	219,000	243,000
Par of Exchange 2.50 Colones = \$1 (U.S.) (see also p. 84).		

Coffee accounted for 47 per cent. of the exports in 1967 and cotton for 12 per cent. The others are sisal (in the form of the bags used for exporting coffee, sugar, etc.), gold, sugar, indigo, sesame, balsam, hides and skins. The chief imports are cotton textiles, iron and steel goods, motor cars, fertilizers, chemical products and petrol.

**CAPITAL.**—San Salvador. Population (Census of 1968), 340,000. Other towns are Santa Ana (73,864); San Miguel (38,330), La Union (Cutoco), La Libertad and Acajutla.

**FLAG.**—Three horizontal bands light blue, white, light blue; coat of arms on white band. **NATIONAL DAY.**—September 15.

## BRITISH EMBASSY

13A Avenida Norte (Continuación), Colonia

Dueñas, (Apartado 601), San Salvador

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Michael Alfred Wenner (1967) . . . . . £5,075

1st Secretary, R. G. Farrar (Consul).

San Salvador is 5,700 miles from London.

## SAN MARINO

(Repubblica di San Marino)

Regents, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON

Saxone House, 74A Regent Street, W.2

Consul General, C. Forte.

Vice-Consul, R. E. Rudge.

A small Republic in the hills near Rimini on the Adriatic, founded, it is stated, by pious stonecutter of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity is respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Captains-Regent. The Great and General Council, a legislative body of 60 members is elected by universal suffrage for a term of 5 years. A Council of Twelve forms in certain cases a Supreme Court of Justice. The area is approximately 23 square miles, the population on Dec. 31, 1968, was 18,470. There is a ceremonial guard of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cattle, ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

FLAG.—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

## SAUDI ARABIA

(a) Mamlaka al Arabiya as-Sa'udiya.)

King of Saudi Arabia, H.M. King Faisal bin Abdul Aziz, G.B.E., born 1904, ascended the throne, Nov. 2, 1964.

Crown Prince, H.R.H. Amir Khalid bin Abdul Aziz, born 1922.

## COUNCIL OF MINISTERS

President of the Council and Foreign Minister, H.M. King Faisal bin Abdul Aziz.

Deputy President, H.R.H. Amir Khalid bin Abdul Aziz.

2nd Deputy President and Minister of Interior, H.R.H. Amir Fahd bin Abdul Aziz.

Defence and Aviation, H.R.H. Amir Sultan bin Abdul Aziz.

Finance and National Economy, H.R.H. Amir Musa'id bin Abdul Rahman.

Agriculture, Shaikh Hassan al Mishari.

Education and (acting) Health, Shaikh Hassan Al al-Shaikh.

Trade and Industry, Shaikh Abid Shaikh.

Communications, Shaikh Mohammad Oman Tawfiq.

Petroleum and Mineral Resources, Shaikh Ahmad Zaki Yamani.

Labour and Social Affairs, Shaikh Abdul Rahman Aba Khail.

Information, Shaikh Jamil al-Hujailan.

Pilgrimage and Trusts, Dr. Omar Tawfiq (acting).

Foreign Affairs, Shaikh Umar Saqqaf (Minister of State).

## SAUDI ARABIAN EMBASSY

27 Eaton Place, S.W.1

[01-235-8431]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sheikh Abdul Rahman Al Helaisi, G.C.V.O. (1966).

Counsellors, Mohamed Nouri Ibrahim, C.V.O.; Saleh Azzam, C.V.O.

1st Secretary, A. Zaki Saleh, M.V.O.

2nd Secretary, Saleh Al-Fouzan.

3rd Secretary, Hassan M. Attar.

Defence Attaché, Col. Abdulla I. Al-Saheal.

Commercial Counsellor, Ibrahim Malaika, C.V.O.

Cultural Counsellor, Abdulaziz Mansour Al-Turki.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with a population (estimated June, 1967) of 6,990,000.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at about 3,500,000, the majority being Moslems of the Wahhabi persuasion. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Khari, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by mid-1968 total production of crude oil for the whole country, including off-shore concessions, was running at a rate of some 3,000,000 barrels per day. Exports other than oil are negligible. The capital is Riyadh (300,000), and the principal trading centres are Hofuf (the chief town of the Hasa province) (100,000), Al Khobar and Dammam on the Persian Gulf littoral, Anaiza, Buraida, Hail (20,000), and Jauf. The old ports (Persian Gulf) were Qatif, Uqair and Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ras Tannura, and a civil deep-water port, with a pier seven miles long, was brought into

use at  $\Psi$  Dammam in 1950. A railway is in operation from Dammam through Hofuf to Riyadh.

The Hejaz ("The Boundary")—between Nejd and Tihama) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejh, Yanbu', Rabegh and Gizan. Jedda contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hejaz Railway which is under reconstruction. The Oasis of Khaibar, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (al Madinah al Munawwarah, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birth-place of the Prophet, is 45 miles east of the seaport of Jedda, by road, and about 200 miles south of Medina, and has a population estimated at 200,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham", placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim.  $\Psi$ Jedda (250,000) is the principal port and commercial centre of Saudi Arabia. A new deep-water port is under construction, for completion in 1971.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered a part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha.

**Finance and Trade.**—Oil is the main source of the country's wealth, though customs revenues and other taxes, as well as the foreign exchange accruing from the annual Pilgrimage to Mecca, also bring in a significant income. In the fiscal year 1968-69 the budget was balanced at SR.5,535,000,000 (£517,000,000) of which 80 per cent. was derived from oil. 43 per cent. of total Government expenditure is allocated to development projects (£250,000,000). The rate of exchange is about SR.10.70 = £1. (See also p. 84.) The currency is strong, and backed by gold and foreign exchange reserves of over £315,000,000. With few exceptions, such as the ban on alcohol, there are no restrictions on trade or payments. There is no public debt. Imports in 1967 were about £267,000,000, compared with an annual rate of £2,500,000 before 1939. The United States of America is the leading supplier, followed (in 1968) by the United Kingdom, Japan and W. Germany.

## Trade with U.K.

	1967	1968
Imports from U.K....	£15,856,000	£46,657,000
Exports to U.K.....	62,542,000	68,791,000

**Communications.**—The railway from the port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. Metalled roads connect Mecca with its Port of Jedda (45 miles), and with Riyadh and Dhahran. A 7,658 km. (4,760 miles) programme of new road construction is now under way. This will provide the first stage of a country-wide network. The Saudi Arabian Government employs Transworld Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Convaix, Boeing 720 and Douglas DC9 aircraft. Scheduled services are flown to all the main towns of the country. There are first-class airports at Dhahran, where a new airport was opened in 1962, and at Jedda. A new airfield for Jedda is being designed. Riyadh Airport is to be brought up to international standards and 13 other internal airfields are to be constructed. Saudi Arabian airlines have an extensive overseas operation including a weekly direct flight to London. A large and increasing number of international airlines operate into Jedda and Dhahran.

**Education.**—There are 1,419 Government schools, mostly primary or intermediate, but including 30 secondary schools. There is an Islamic University at Medina, a college of Islamic law at Mecca and universities at Riyadh and Jedda. Government education is free. With three exceptions all schools are maintained by the Government. Education at all levels is free.

CAPITAL, Riyadh, population about 300,000.

**SAUDI ARABIAN FLAG.**—Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

## SENEGAL

(Republique du Senegal)

President and Head of Government, Léopold Senghor,  
elected President, Sept. 5, 1960.  
Ambassador in London, His Excellency M. Henri-  
Louis Valantin (1968). 10 Gloucester Place, W.1.  
[01-935-0313].

Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea in the south. (For MAP, see p. 87a.) It has an area of 77,814 sq. miles and a population (estimated, 1968) of 3,800,000.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. Foundation of a Federation of Mali, to consist of the State of Senegal, (French) Soudan, Dahomey and Upper

Volta, was announced in January, 1959, and the Federation came into existence on April 4, consisting of Senegal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20, 1960. However, these arrangements proved short-lived as on August 22, 1960, the Senegal Legislative Assembly formally approved measures to secede from the Federation and continue as an independent state. In March, 1963 (after an attempted *coup d'état* by the then Prime Minister in the previous December) a new constitution was approved giving executive powers to the President, on the lines of the present French constitution. Senegal's principal exports are groundnuts (raw and processed) and phosphates.

*Trade*.—Total trade of Senegal in 1968 amounted to: Imports *Francs CFA.* 44,680,498,111; Exports, *Francs CFA.* 37,358,288,515.

#### Trade with U.K.

	1967	1968

## SOMALIA

(Somali Republic)

President, Dr. Abdirashid Ali Shermarke, elected June 20, 1967, for a term of six years.

Prime Minister and Minister of Foreign Affairs, Mohammed Ibrahim Egal.

#### EMBASSY

60 Portland Place, W.1.

[01-580-7148]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Jama Abdilleh (1968).

Counsellor, Ibrahim Haji Mussa.

1st Secretary, Mohamad Haji Nur.

and Secretary, Mohamed Hussein Abby.

Attaché, Mohamad Osman Osmer.

The Somali Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Cape Guardafui (12° N.); and on the Gulf of Aden to the boundary with the Territory of the Afars and Issas. (For MAP, see p. 854.) Somalia is bounded on the west by the Territory of the Afars and Issas, Ethiopia and Kenya and covers an area of approximately 246,000 sq. miles. The population, of which a large proportion is nomadic, is estimated (June, 1967) at 2,660,000. Livestock raising is the main occupation in Somalia and there is a modest export trade in livestock on the hoof, skins and hides. Italy imports the bulk of the banana crop, the second biggest export, under agreement with the Somali Government.

*Government*.—The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July 1, 1960. British rule in Somaliland lasted from 1887 until June 26, 1960, with the exception of a short period in 1940-41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 1941 until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to

an end on July 1, 1960, when Somalia became independent and united with the former British Somaliland Protectorate under the title of the Somali Republic. Aden Abdulle Osman was returned to office as the first substantive President of the Republic in 1961, after a year as provisional President. Following national elections on June 20, 1967, Dr. Shermarke succeeded to the Presidency and on July 6 appointed Mr. Egal as Prime Minister. Elections for a new National Assembly were held on March 26, 1969. Mr. Egal formed a new Cabinet on May 23.

Somalia imported British goods to the value of £999,000 in 1968 (1967, £697,000).

CAPITAL.—ΨMogadishu (Mogadiscio), population (estimated 1969), 200,000. Other towns are Hargeisa (50,000), Kisimayu (18,000), ΨBerbera (19,000) and Burao (10,000).

FLAG.—Five-pointed white star on blue ground.

 Agricultural Counsellors, Dr. J. P. Botha (Scientific); N. Saviez (Economics).  
 Counsellor (Scientific), C. G. Hide.  
 Minerals Attaché, E. Batten.

*Area and Population.*—The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Molopo and Orange Rivers ( $34^{\circ} 50' 22''$  South latitude) to the Cape of Good Hope, with the exception of Lesotho, Botswana and Swaziland, and part of Mozambique. It has a total area of 472,359 square miles, and a total population (census of 1960) of 16,002,797 (White, 3,088,492; African, 10,927,922; Coloured, 1,509,258; and Asian, 477,125). Populations of the Provinces at the 1960 census (preliminary figures) were: Cape Province (278,465 sq. miles), 5,342,720; Natal (33,578 sq. miles), 2,979,920; Transvaal (110,450 sq. miles), 6,273,477; Orange Free State (49,866 sq. miles), 1,386,547. The total population was estimated to have risen to 18,733,000 by July, 1967.

Zululana, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the districts of Babanango, Vryheid and Ngotshe and by Swaziland. In 1951, the appointment of confirmed of Cyprian Bekuzulu, grandson of Dinizulu and great-grandson of Cetewayo, as Paramount Chief of the Zulus in Natal.

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Table Mountain (3,582 feet), while the Great Swartberg and Langeberg run in parallel lines from west to east of the Cape Province. Between these two ranges and the Roggeveld and Nieuwveld ranges to the north is the Great Karroo Plateau, which is bounded on the east by the Sneeuwberg, containing the highest summit in the province (Kompasberg, 7,800 feet). In the east  $\blacksquare$  ranges which join the Drakensberg (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents  $\blacksquare$  succession of undulating grassy plains with good pasture-land,

at  $\blacksquare$  general elevation of some 3,600 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the Magaliesberg and Waterberg ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Bankenveld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces. The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between the Territory of South West Africa and the Cape Province. The Limpopo, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

*Government.*—The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united  $\blacksquare$  May 31, 1910, under the South Africa Act, 1909, in a legislative union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as  $\blacksquare$  member of the British Commonwealth until 1961. A referendum held among white voters on October 5, 1960, decided by a narrow majority in favour of Republican status. 1,633,772 votes were cast—a poll of 90.73 per cent.—with 52.05 per cent. in favour. The Union of South Africa became a republic on May 31, 1961, and withdrew from the Commonwealth. Mr. C. R. Swart was elected the first President of the Republic on May  $\blacksquare$  and assumed office on May 31, 1961. He retired on May 31, 1967, a year before his term of office was due to expire. The former Minister of Finance, Dr. T. E. Dönges, was elected to the Presidency but fell seriously ill before his inauguration. The Leader of the Senate Senator J. F. T. Naudé was Acting President during 1967 and until the inauguration of Mr. Fouché on April 10, 1968.

The Senate as reconstituted by the Senate Act, 1960, consists of 54 members, appointed or elected for a term of five years. Eleven are appointed by the Government (8 for the Republic,  $\blacksquare$  for South West Africa and a Coloured representative). Forty-three are elected (Transvaal, 14; Cape Province, 11; Natal and Orange Free State, each 8; and South West Africa, 2). The Act of 1960 reintroduced proportional representation at elections to the Senate and excluded Native representation.

The House of Assembly consists of 170 elected members, 54 of whom represent the Cape of Good Hope, 18 Natal, 73 Transvaal, 15 the Orange Free State, and 6 South West Africa. There are also 3 members elected under the Separate Representation of Voters Act, 1951, to represent the electoral divisions for the coloured voters  $\blacksquare$  the Cape Province. Members of both Houses must be South African citizens of white descent. White female franchise was introduced under the provision of Act No. 18 of 1930. Cape Bantu voters ceased to be entitled to elect 3 members in Nov. 1959.

After the General Election on March 30, 1966, the party representation in the House of Assembly was as follows: Nationalist Party, 126; United Party, 39; National Union, 1; Progressive Party, 1; Representatives of Coloured Voters, 4. Total 170.

*Defence.*—The South Africa Defence Act, 1957, became law on Nov. 1, 1958. This Act, as

amended in 1961, provides that every citizen between the ages of 17 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of peace training with the Citizen Force or Commandos spread over a period of four consecutive years. Thereafter citizens are required to serve with the Reserve for a prescribed period of time.

**Education.**—The Provinces have been relieved of all vocational education (technical and industrial), and the Departments of Cultural Affairs and Higher Education under the Minister are concerned with 9 Universities, 11 technical colleges, schools of industries, reformatories and State technical, house-craft and commercial high schools, State-aided vocational schools and State and State-aided special schools for the physically handicapped. There are two non-white university colleges and three Bantu university colleges, students of these taking the examinations of the University of South Africa.

**Communications.**—The total open mileage of Government-owned railway lines at the end of March, 1967, was 13,701 miles, of which 4,774 miles were electrified. Working expenditure (excluding depreciation) amounted to R.676,246,000 (railways, harbours, airways and pipelines). Internal air services are operated between all the major centres in South and South West Africa. Regional air services are operated between Johannesburg and Rhodesia, East Africa, Central Africa and Portuguese East Africa. The "Springbok Service" is operated jointly by South African Airways and the British Overseas Airways Corporation, using modern aircraft and providing a regular service between Johannesburg and London.

**Production and Trade.**—Final figures for the principal crops produced in 1966-67 (1,000 bags of 200 lb. each) were wheat, 6,634; maize 55,733 (1967-68, 106,240); Kaffir corn, 3,170; barley, 255,000 bags of 150 lb. each; oats, 349,000 bags of 150 lb. each. The estimated production of groundnuts in 1967 was 146,370 short tons. Sales of wool during the 1967-68 season amounted to 309,122,260 lb. (1966-67, 298,809,730 lb.).

Mineral production is of the greatest importance in the South African economy, value of production in 1967 being (R.1,000): gold, 763.3; diamonds, 57.4; coal, 85.9; copper concentrate, 3,168 tons; metallic tin 737 tons; silver, 3,536; asbestos, 26.5. Exports of uranium oxide amounted to R.58,069,000 in 1964 (figures no longer declared).

Value of trade in 1967 (with 1966 figures in *italic type*) was: R.1,912,600,000 (R.1,590,600,000); Exports R.1,341,700,000 (R.1,125,300,000).

Trade with U.K.\*

	1967	1969
Imports from U.K.	£257,640,000	£260,729,000
Exports to U.K. . . . .	219,567,000	271,429,000

\*Excluding gold bullion and specie.

**Currency.**—The South African £ reached parity with the £ sterling in 1946. A new decimal currency the Rand (R.) was introduced in South Africa on Feb. 14, 1961, with a par value of 10s. Sterling. Since devaluation of the £ sterling in Nov., 1967, the rate of exchange has been R.1.72 = £1 (see also p. 83). Coins are one silver coin, the Rand (10s.); four nickel coins, 50 cents (5s.); 20 cents (2s.); 10 cents (1s.), 5 cents (6d.); two bronze coins, 2 cents (2d.) and 1 cent (1d.). In addition the yellow bronze  $\frac{1}{2}$  cent, though no longer minted, will remain in circulation for an unspecified period.

**Finance.**—Total revenue for the year ended December 31, 1968 was R.1,549,900,000 (1967, R.1,368,100,000). The gross Public Debt of the Republic on March 31, 1968 was R.4,218,000,000 (1967, R.3,770,000,000).

**CAPITAL.**—The administrative seat of the Government is PRETORIA, Transvaal; population (census of 1960), 422,590; the seat of the Legislature is ψ CAPE TOWN, population (1961), 807,211. Cape Town is 5,979 miles from Southampton; transit by mail steamship 11 days, and by air mail two days. There is a modern and well-equipped aerodrome seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance. Other large towns are Johannesburg, Transvaal (1,110,905); ψ Durban, Natal, the largest seaport (659,934); ψ Port Elizabeth, Cape (274,180); Germiston, Transvaal (213,642); BLOEMFONTEIN, capital of Orange Free State (145,273); Springs, Transvaal (137,253); Benoni, Transvaal (136,476); ψ East London, Cape (115,677); Welkom, O.F.S. (67,614); and PIETERMARITZBURG, capital of Natal (96,236).

**FLAG.**—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full. The national flag was adopted by the Union in 1927 and was flown side by side with the Union Jack. This practice was expected to be continued in Natal.

NATIONAL DAY.—May 31.

#### BRITISH EMBASSY Hill Street, Pretoria

There are British Consular Offices at Cape Town, Johannesburg, Durban and Port Elizabeth.

#### South West Africa

Administrator, W. C. du Plessis.

South West Africa stretches from the southern border of Angola (lat. 17°23' S.) to part of the northern (Orange River) and north-western borders of the Cape Province of the Republic of South Africa; and from the Atlantic Ocean in the west to Botswana in the east.

The territory has an area of 318,261 sq. miles, including the area of Walvis Bay (434 sq. miles) which, although part of the Republic of South Africa, is for convenience administered as part of South West Africa. The population was estimated at 610,100 in 1966 and the main population groups are: Ovambo (270,900), Whites (96,000), Damara (50,200), Herero (40,000), Nama (39,400), Okavango (31,500), East Caprivians (17,900) Coloureds (15,400), Basters (13,700), Bushmen (13,300),

Kaokovelders (10,500), Tswana and others (11,300).

**Government.**—A German protectorate from 1880 to 1915, South West Africa was administered until the end of 1920 by the Union of South Africa. In terms of the Treaty of Versailles the Territory was declared a "C" Mandate and entrusted to South Africa with full powers of administration and legislation over the Territory. After the dissolution of the League of Nations and in the absence of a trusteeship agreement, South Africa informed the United Nations that she would continue to administer South West Africa in the spirit of the Mandate. Since the establishment of the United Nations, South West Africa has been the subject of dispute.

The South African Government announced on Oct. 2, 1968, the formation of a Legislative Council of 42 members for Ovamboland, six members nominated by each of the seven tribal authorities in the territory and a nominated Executive Council of seven members, with a Chief Councillor elected by the Legislative Council. Certain administrative powers held in South West Africa were in February, 1969, transferred to the South African Government.

**Production and Communications.**—Mining, agriculture and fisheries are important. In 1965, animal husbandry accounted for 99 per cent. of the total gross output of commercial agriculture which was estimated at £22.2 million. The average rainfall over 70 per cent. of the Territory is below 400 mm. per annum. 1,453 miles of railway line have been laid; 810 miles of road have been tarred; 41,526 motor vehicles were registered in 1966; air links exist between Windhoek and major cities of the Republic. Lüderitz is the only harbour in the Territory proper. 118 telephone exchanges serve the 16,491 telephone subscribers in the Territory. In 1966 the school attendance for the indigenous groups was 62 per cent.; in 1960 there were 37 Native pupils to one teacher and it was estimated that 56 per cent. of the adult indigenous population was literate.

**Trade.**—Exports in 1966 totalled £104,650,000. Agricultural products, £16,320,000; Fishery products, £24,450,000; Mineral products, £63,880,000.

Nearly half the Territory's total exports are disposed of in the South African market and about 90 per cent. of the Territory's imports are obtained from the Republic of South Africa.

**Development.**—Under the current five-year plan of the Department of Bantu Administration and Development £30 million will be spent on the indigenous groups (£11.065 million for community centres, schools, offices and other buildings; £6.595 million for water and electricity supplies; £2.28 million for internal roads; £2.46 million for residential housing; £1.675 million for the control of animal diseases and stock improvements).

#### Trade with U.K.

	1967	1968
Imports from U.K. ....	£2,129,000	£1,383,000
Exports to U.K. ....	21,344,000	24,494,000

**CAPITAL.**—Windhoek (estimated population, 60,000). The ports are Ψ Walvis Bay and Ψ Lüderitz.

### SOUTHERN YEMEN

(People's Republic of South Yemen)

**Presidential Council,** Salem Rubayyi (*Chairman*); Mohammed Ali Aulaqi; Abdul Fattah Ismail; Ali Ahmed Antar; Mohammed Ali Haithem; *assumed office June 22, 1969.*

**Prime Minister,** Mohammed Ali Haithem.

**Foreign Affairs,** Ali Salem al Beidh.

**Minister of Defence,** Muhammad Aulqi.

### SOUTH YEMEN EMBASSY

95 Park Lane, W.1.

[01-499-2536]

**Ambassador (vacant).**

**Minister Plenipotentiary (Cultural),** Abdullah Ahmed Muheirez.

**2nd Secretary,** M. S. M. Al-Absi.

**3rd Secretary,** Saed Ali Khubara.

**Area and Population.**—Southern Yemen lies at the southern end of the Arabian peninsula, having a frontier with the Yemen, and a coastline extending 400 miles from the Red Sea eastwards along the Gulf of Aden. The area is largely composed of mountains and desert. Rainfall is generally scarce and unpredictable. The population outside Aden lives on a tribal basis and is concentrated in the fertile districts. In the more extensive desert and near-desert areas nomadic communities depend on their livestock for a livelihood.

Included in Southern Yemen are the offshore islands of Perim (in the Bab-el-Mandeb Straits), Kamaran (area, 70 sq. miles) in the Red Sea, and Socotra, formerly part of the sultanate of Qishn and Socotra, now merged in the People's Republic. Estimated area of Southern Yemen is 117,000 sq. miles, with a population estimated at 1,250,000 in 1969. The population of Aden (75 sq. miles) was unofficially estimated at about 150,000; it is formed by the twin volcanic peninsulas of Aden and Little Aden linked by a sandy strip of coastline and comprises the towns of Tawahi, Crater, Maalla (built on land reclaimed from the sea), Khormaksar and Sheikh Othman and the villages of Imad and Hiswa.

**Government.**—The People's Republic of South Yemen was set up on Nov. 30, 1967, bringing to an end 129 years of British rule in Aden and its hinterland. Territory of the Republic is that of the former Federation of South Arabia and the Eastern Aden Protectorate, consisting of the State of Aden and some 17 sultanates and emirates in which effective power had passed to the National Liberation Front during August and September, 1967. By Nov. 8, 1967, the N.L.F. claimed to be exercising sovereignty outside British-manned enclaves. Negotiations held between the British Government and representatives of the N.L.F. at Geneva from Nov. 21-29, 1967, ended in agreement on financial aid to South Yemen for civil and military purposes for a period of six months from the date of independence. Evacuation of British military forces which had begun in April, 1967, was completed on Nov. 29, covered by strong naval forces, a few hours before the territory was proclaimed a republic.

During the period of the emergency in Aden which began at the end of 1963, 53 British servicemen were killed and 669 wounded in anti-terrorist operations, mainly in the State of Aden. A further 76 British servicemen were killed and 235 wounded in other parts of the Federation during the period.

The Secretary-General of the National Liberation Front, Mr. Qahtan as-Shaabi, who had been appointed President from Nov. 30, 1967, held office until June 22, 1969, when he was deposed in a bloodless *coup d'état*. A ten-member Cabinet was formed on June 24, 1969, headed by Mr. Mohammed Ali Haithem.

**Kuria Muria Islands.**—The Kuria Muria Islands, which had been administered by Gt. Britain from Aden although 200 miles distant from Yemen territory, were ceded to the Sultanate of Muscat and Oman on Nov. 30, 1967.

**Production.**—Agriculture is the main occupation of the inhabitants of the 60,000 square miles of the Republic, outside Aden State. This is largely of a subsistence nature, sorghum, sesame and

millet being the chief crops, and wheat and barley widely grown at the higher elevations. Of increasing importance, however, are the cash crops which have been developed since the Second World War, by far the most important of which is the Abyan long-staple cotton, which is now the country's major export, and revenue from which averages about £2,000,000 annually.

Owing to lack of rainfall, cultivation is largely confined to fertile valleys and flood plains on silt built up and irrigated in the traditional manner. Of recent years, however, these traditional methods have been augmented and replaced by the use of modern earth-moving machinery and pumps. Irrigation schemes, designed to replace some of the more important traditional structures with permanent installations, are now being undertaken. Nearly all the fruit and vegetables grown in the Republic are marketed in Aden, through which passes annually some 30,000 tons of locally produced fruit and vegetables worth up to £600,000. The trade of Aden is mainly transhipment and *entrepôt*, the port serving as a centre of distribution to and from neighbouring territories. Transit trade is mainly in textiles, gums and resins; grains and flour; coffee; tea; hides and skins; raw cotton and cotton-seed and cheap consumer goods.

#### Trade with U.K.

	1967	1968
Imports from U.K....	£9,347,000	£8,166,000
Exports to U.K....	10,611,000	6,812,000

Before the closure of the Suez Canal, because of its favourable geographical position and its efficient service to ships, Aden was one of the busiest oil bunkering ports in the world, handling some 500 ships a month. The closing of the Canal has reduced this to about 120 ships a month. The British Petroleum refinery exports about 3,700,000 tons of petroleum products annually. In the main harbour, cargo handling for larger vessels is by lighter, but wharves at Maalla can accommodate alongside vessels up to 300 feet in length and 18 feet in draught. Aden has 140 miles of roads, 127 miles of which are asphalted.

**Finance and Currency.**—In the financial year 1968-69 revenue was estimated at about £11,000,000 and expenditure £18,000,000. Currency is the South Arabian *dinar*, the total circulation of which is about £22,000,000.

**Communications.**—There are no railways in the Republic. A system of undeveloped but motorable roads link the towns and villages outside Aden. There is an international airport at Aden (Khor-maksar) and eight international airlines operate into South Yemen.

**CAPITAL.**—Aden (population, 150,000).

**FLAG.**—A tricolour, red, white and black horizontal bands, with a triangle of light blue at the hoist pointing towards the fly and charged with a five pointed star red.

**NATIONAL DAYS.**—Independence Day, Nov. 30; Revolution Day, Oct. 14.

**Area and Population.**—A National State in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirtieths of the Iberian peninsula, the remaining portion forming the

Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 square miles, with an estimated population (Jan., 1969) of 33,111,000. Returns for 1968 gave 659,510 births, 277,652 deaths and 231,696 marriages. Infant mortality (under one year) was 17.563.

**Physical Features.**—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro and the Minho.

**Government.**—In April, 1931, the last monarch of Spain, Alfonso XIII, left the country; a Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the *Azafia* (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (*Leader of the Empire and Chief of the State*). In the Civil War of 1936–39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstatement of the *Cortes de España*. This was reorganized by an Organic Law of 1967 and is composed of approximately 564 members—ministers,

19; members of the National Council of the Movement, 109; Presidents of various State bodies, 5; representatives of the national syndicates, 150; 100 members elected by heads of families and married women; university rectors, 12; representatives of professional, academic and scientific bodies, 28; representatives of local administration, 116; and 25 members directly appointed by the Head of State.

On July 22, 1969, General Franco nominated Prince Juan Carlos of Bourbon to succeed him as head of state at his death or retirement. The nomination was approved in the *Cortes* by a large majority.

A referendum held in 1967 approved an Organic Law of the State introducing a number of changes in state institutions. The offices of Head of State and Head of Government were separated, but General Franco still holds both offices.

**Defence.**—**Army:** There are in Spain one armoured, one mechanized, one motorized, two mountain and one parachute divisions; two independent cavalry brigades; one artillery brigade and nine territorial brigades. The *Guardia Civil* also forms part of the Army though it operates as a gendarmerie in the rural areas under the control of the Ministry of the Interior.

The active Spanish *Navy* consists of 1 cruiser, 1 helicopter carrier, 11 destroyers, 24 frigates and corvettes, 11 attack transports, 4 minelayers, 25 minesweepers, 4 submarines, 4 midget submarines, 3 landing ships, 4 squadrons of helicopters, a large number of auxiliary and small craft. A further destroyer is being completely rebuilt and a building programme of 5 large destroyers and 2 submarines is being started.

The *Air Force* is divided geographically into 3 Regions covering Spain plus an Air Zone for the Canaries. There are also separate functional Air Defence, Tactical and Transport Commands. The Air Force consists of 4 Fighter Squadrons, 3 Fighter Bomber Squadrons, 1 Light Bomber Group (of 1 Squadron and 1 Squadron in the Canaries), and 2 transport groups with 5 Squadrons. There is also a variety of training and miscellaneous aircraft and some helicopters. Strength in front-line aircraft, about 300 planes.

**Education.**—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. There are 12 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragossa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid (1590), Murcia (1915). The Catholic University of Pamplona (1953) is the only University in Spain not subject to government control. A small new university is being formed in Madrid.

**Language and Literature.**—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provençal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547–1616), Lope Felix de Vega Carpio (1562–1635) and Pedro Calderón de la Barca (1600–1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Eche-

garay (1904), J. Benavente (1922) and Juan Ramón Jiménez (1956).

## FINANCE

	1967	1968
	million	million
	Pesetas	Pesetas
Estimated Revenue...	204,291	237,800
Estimated Expenditure...	204,291	237,800

Public Debt (Dec. 31, 1964) excluding parastatal organizations and State-guaranteed issues: *Pesetas* 186,928,600,000.

The rate of exchange for the *peseta* in Sept., 1969 was 166 *pesetas* = £1 sterling (see also p. 83).

**Production and Industry.**—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—olives, oranges, lemons, almonds, pomegranates, bananas, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. The orange crop is exported mainly to Germany, France and the United Kingdom. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced.

Spain's mineral resources of coal, iron, wolfram, copper, zinc, lead and iron ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1968 the coal output amounted to 15,030,000 metric tons, 2,779,000 metric tons of iron and 4,940,000 metric tons of steel were produced in 1968. Other production figures included ('000 metric tons): pyrites, 2,400; cement, 12,470; sulphuric acid, 2,100; paper, 1,705; cotton yarn, 94.5 and wool yarn, 31.4. Production of electric power was 45,900 million kWh. The fishing industry is important.

The principal manufactures are textile goods of all kinds, footwear and other leather goods, ceramics, sewing machines, bicycles, chemical products and light engineering manufactures. 19,000,000 tourists visited Spain in 1968 and spent £450,000,000. The Gross National Product was approximately £10,000,000,000.

**Communications.**—In 1968 there were 13,400 km. of railways in service and 133,320 km. of paved roads. The sea-going mercantile marine in 1968 (excluding fishing boats) registered a total of 2,653,000 gross tons. Civil aviation is under the control of the Air Ministry; there are several inland and international services in operation.

	TRADE

## BRITISH CONSULAR OFFICES

There are Consular Offices at *Barcelona, Palma de Mallorca, Tarragona, Valencia, Cartagena, Granada, Seville, Cadiz, Ibiza, Jerez, Algeiras, La Linea, Gijon, Vigo, Bilbao, San Sebastian, Malagas, Tenerife, Las Palmas, Orotava (Canary Islands), Ceuta (Morocco) and Madrid.*

*British Council Representative*, N. N. Tett, O.B.E., Calle Almagro 5, Madrid, 4.

There is a British Institute at *Barcelona*.

**BRITISH CHAMBER OF COMMERCE OF SPAIN.**  
 Marqués de Valdeiglesias 3, Madrid; Paseo de Gracia 11 (Segundo), Barcelona; Pascual y Genis 22, Valencia.

The **BALEARIC ISLES** form an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviza and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 441,842. The archipelago forms a province of Spain, the capital being ψPalma in Majorca, pop. 149,921; ψMahon (Minorca), pop. 16,547.

The **CANARY ISLANDS** are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 908,718. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote (38,500), Fuerteventura (19,500) and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at ψLas Palmas (pop. 177,746) in Gran Canaria, where major oil companies have installations for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma (76,000), Gomera (31,829), and Hierro (10,000)), with seat of administration at ψSanta Cruz in Tenerife, pop. 140,000.

## Trade with U.K.

	1967	1968
Imports from U.K....	£12,108,000	£16,348,000
Exports to U.K....	17,843,000	18,611,000

ISLA ■ LOS FAISANES is an uninhabited Franco-Spanish condominium, at the mouth of the Bidassoa in La Higuera bay.

ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with ■ population (estimated, 1968) of 80,000.

ψ MELILLA is a town on ■ rocky promontory of the Rif coast, connected with the mainland by ■ narrow isthmus. Melilla has been in Spanish possession since 1492. Population (estimated, 1968) 77,000. Ceuta and Melilla are parts of Metropolitan Spain.

#### OVERSEAS TERRITORIES

The former provinces of Spanish Guinea, Fernando Póo and Río Muni achieved independence on October 12, 1968, under the title of Equatorial Guinea.

Ifni, the former enclave in Morocco, was incorporated in the latter state by treaty, on June 30, 1969.

**SPANISH SAHARA.**—The province of Spanish Sahara extends from 27° 40' N. lat. in the north to La Agüera (Cape Blanco) in the south, though the main southern boundary runs along latitude 21° 20'. The land area is approximately 125,000 square miles. Spanish Sahara is divided into two regions separated by latitude 26° which passes south of Cape Bojador. The northern region is the Següia el Hamra (Río Rojo) of which the capital is Aaiun. It extends eastward to approximately 8° 40' W. long. The southern region is the Río de Oro, of which the capital is Villa Cisneros. Its eastern boundary is approximately 12° W. long. Total population was estimated in 1967 at 48,000. There are rich deposits of potash.

Spain has accepted, but not implemented, ■ series of United Nations resolutions enjoining her to determine the wishes of the inhabitants as to their future. Both Morocco and Mauritania have claims on the territory.

**SPANISH MOROCCO.**—In addition to Ceuta and Melilla, Spain exercised until 1956 ■ protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

*Alhucemas*, the bay of that ■■■ includes six islands: population 366.

*Peñon de la Gomera* (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay: population 450.

*The Chaffarinas* (or *Zaffarines*) ■■■ group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua: population 610.

### SUDAN

(Republic of the Sudan)

Chairman of Revolutionary Council, Col. Jaafar Mohammed al Nemeiry, assumed office May 25, 1969.

Prime Minister and Minister of Foreign Affairs, Babikr Awadalla.

#### SUDANESE EMBASSY IN LONDON

■ Cleveland Row, S.W.1.

[01-839-8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Jamal Mohamed Ahmed (1969).

Minister, Sayed Eisa Mustafa.

Counsellor, Sayed Omer Gorani.

1st Secretary, Sayed Ali A. Abu-Sinn.

2nd Secretary, Sayed Omer Yousif Birido.

Military, Naval and Air Attaché, Col. El Tayib El Mardi.

Asst. do., Lt.-Col. Yousif Ahmed Youssif.

Cultural Attaché, Sayed Ahmed Mohamed Saad.  
Commercial Attaché, Sayed Tawfik El Tigiabi Abu-Groon.

**Area and Population.**—The Sudan extends from the southern boundary of U.A.R. 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from the Republic of Chad about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Ethiopia in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea and Ethiopia; on the south lie Kenya, Uganda and the Congolese Republic; and on the west the Central African Republic, Chad and Libya.

The *White Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the *White Nile* at Khartoum. The next confluence of importance

■ at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*.

The estimated area is about 976,750 sq. miles, with ■ population (estimated, 1968) of 14,770,000, partly Arabs, partly Negroes, and partly of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and other Northern peoples are all Moslems. The Nilotics of the Bahr el Ghazal and Upper Nile Valleys are generally pagans, but some have been converted to Christianity and others are beginning to go over to Islam.

**Government.**—The Anglo-Egyptian Condominium over the Sudan which had been established in 1899 ended when the Sudan House of Representatives on Dec. 19, 1966, voted unanimously ■ declaration that the Sudan was ■ fully independent sovereign state. A Republic was proclaimed on Jan. 1, 1956, and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. The Sudan was under military rule from Nov., 1958, until 1964 when a new civilian Cabinet was appointed. Following a

crisis in the coalition Cabinet of Mr. Mahgoub, the Prime Minister resigned on April 23, 1969, and was unable to form a new coalition. Government of the country was taken over on May 25, 1969, by a ten-man revolutionary council headed by Col. Jaafar Mohammed al Nemery. Mr. Babikr Awadalla formed a Cabinet of 21 members on the same day.

**Education.**—Government education is heavily subsidized or free according to means beginning at the age of seven and passing through elementary, intermediate and secondary stages, each of four years. University degree courses vary from 4 to 6 years. Arabic is the normal language of instruction in schools throughout the Sudan, although English is the main language of instruction in higher education. English is taught in intermediate and secondary schools as the first foreign language.

In 1968-69 the University of Khartoum had over 3,500 students of whom 400 graduated in 1968 in nine faculties. There were about 700 students at the Khartoum Technical Institute, which is divided in eight vocational schools and about 300 at the Senior Trade School. The Higher Teacher Training Institute at Omdurman had about 500 students. B.Ed. degrees will be awarded from 1971 after affiliation with the University of Khartoum. Non-governmental higher education was offered by Cairo University, Khartoum Branch (three faculties with about 1,600 students), and at the newly established Islamic University of Omdurman (600 students).

There were two training colleges for intermediate teachers with 200 men and 50 women, and 14 training colleges for elementary school teachers with 1,400 students. 42 academic secondary schools, with a total first year entry of 114 streams with 40 pupils each (90 for boys and 24 for girls), had a total of 14,000 boys and 4,000 girls. There was one secondary technical school with 4 class entry and 11 post-intermediate two-year technical schools with 4 class entry, making a total of 1,642 boys. 7 Government religious secondary schools also had about 1,200 boys. There were 228 streams in academic intermediate schools, making a total of 37,800 boy pupils and 12,200 girls, an increase of about 10 per cent. over 1967-68.

In 1967-68 there were 455,000 pupils receiving elementary education. In addition, 107,600 were enrolled in private schools at all levels, an increase of nearly two-thirds in a single year. The percentage of the age-group enrolled in all schools is: elementary, 31 per cent; intermediate, 4.5 per cent.; secondary, 2.2 per cent.

**Production.**—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (mainly Egyptian type) cotton of which the Sudan is a major producer, but increasing quantities of short and medium staple (American) type cotton are being grown. Production in 1965-66 totalled 790,180, an increase over the figure of 541,963 for 1963-64, but less than the 1961-62 level of 1,142,392 bales. Much of the high quality, long-staple cotton is provided by the Sudan Gezira Scheme (a Government-controlled project irrigated from the Sennar Dam on the Blue Nile) and its extension, the Managil Scheme. The Sudan also produces the bulk of the world's supply of gum arabic. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South. A new dam at Khashm el Girba began to store

water in May, 1964, and will eventually provide irrigation to about 500,000 acres, most of which is being used to resettle the population of the Wadi Halfa area which is being flooded by the reservoir of the Egyptian High Dam. Another dam at Roseires on the Blue Nile will enable new or increased irrigation on a further 3,000,000 acres as well as providing hydro-electric power.

**Communications.**—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branches out southwards to Wau from the Sennar/Nyala western line. Regular rail and Nile steamer services connect Khartoum with Juba in Equatoria Province which in turn is connected by a bus service with Nimule on the Uganda border. The river service between Wadi Halfa and Shellal in the U.A.R. was withdrawn in 1964 and it has not yet been decided finally what form of transport, if any, will replace it. Port Sudan is a well-equipped modern seaport. Sudan Airways fly regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, the United Kingdom, Ethiopia, Uganda and W. Germany and are equipped with a Comet 4C and 4 Fokker F27 aircraft as well as some smaller machines.

## FINANCE

	1966-67
Revenue.....	£87,867,961
Expenditure.....	83,267,506
£S = Sudanese Pound of 100 Piastres.	

Exchange Rate 83.23 Piastres = £1 sterling (see also p. 84).

## TRADE

	1965
Total imports.....	£72,288,651
Exports.....	67,956,234

## Trade with U.K.

	1967	1968
Imports from U.K.....	£17,373,000	£19,239,000
Exports to U.K.....	6,552,000	7,538,000

The principal exports are cotton and cotton seed, groundnuts and gum arabic. The chief imports are cotton piece goods, base metals, vehicles and transport equipment, machinery, petroleum products, sugar, tea, coffee, chemicals and pharmaceuticals.

**CAPITAL, Khartoum.** The town contains many mosques, an Anglican Cathedral, and the University, with extensive Government buildings. Estimated population, 124,000. Khartoum North and Omdurman have estimated populations of 53,000 and 154,000 respectively.

**FLAG.**—3 horizontal stripes of blue, yellow and green. **NATIONAL DAY.**—January 1 (Independence Day).

*Ministers without Portfolio*, Sven-Eric Nilsson; Lennart Geijer (with special responsibility for the drafting of legislation); Alva Myrdal (with special responsibility for disarmament); Camilla Odhnoff (with special responsibility for family affairs); Sven Moberg (with special responsibility for education); Bertil Löfberg (with special responsibility for Civil service wages and salaries).

## SWEDISH EMBASSY ■ LONDON

29 Portland Place. W.1

[01-580-2080]

(from Jan. 1, 1970: 23 North Row, Park Lane, W.1) *Ambassador Extraordinary and Plenipotentiary*, His Excellency Leif Belfrage, G.B.E. (1967).

*Counsellors*, G. Fagrell; A. Fälthman (*Economic and Financial*); O. Ternström (*Press Affairs*).

*1st Secretary*, G. Ekholm.

*2nd Secretaries*, J. Kronholm; P. Landelius.

*Naval Attaché*, Cdre. S. L. Åhrén.

*Military Attaché*, Col. Å. Hultin.

*Air Attaché*, Lt.-Col. L. H. Sonesson.

*Press Attaché*, K. Holm.

*Cultural Attaché*, N.-G. Hildeman.

*Labour Attaché*, B. Carlsson.

*Attaché*, B. Petraeus (*Administration*).

*Chaplain*, Rev. S. Evander.

*Consulate-General*, 14 Trinity Square, E.C.3

(01-484-1901) (after Jan. 1, 1970, as for Embassy).

*Consul-General*, Baron G. F. von Otter.

*Consuls*, A. Lundqvist; G. Luthman.

*Area and Population*.—Sweden occupies the eastern area of the Scandinavian peninsula in N.W. Europe and comprises 24 local government districts, "Län," with a combined area of 173,436 sq. miles, and a population, Jan. 1, 1968 of 7,893,704. In 1967 there were 121,000 births (15.5 per 1,000 inhabitants); death rate was 10.2 per 1,000 inhabitants and infant mortality rate (under 1 year of age) 14.5 per cent. of all live births.

*Government*.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte. Jean-Baptiste Jules Bernadotte, Prince of Ponte Corvo, a Marshal of France, was invited to accept the title of Crown Prince, with succession to the throne. He landed at Hälsingborg on Oct. 20, 1810, and succeeded Charles XIV in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 151 members, elected for 3 years; and *Andra Kammaren* of 233 members, elected for 4 years. The Diet will be reconstituted as a single chamber from 1971. The Council of Ministers (*Statsråd*) is responsible to the *Riksdag*.

*Production and Industry*.—Since the end of the First World War Sweden has become one of the leading industrial nations of Europe. Agriculture is still one of the main activities, but its relative importance is declining and in 1967 less than 15 per cent. of the working population was engaged in farming and forestry. The country's rising industrial prosperity is based on an abundance of natural resources in the form of forests, mineral deposits and water power. The forests are very extensive, covering about half the total land surface, and sustain flourishing timber, pulp and paper milling industries. The mineral resources include iron ore of excellent quality, lead, zinc, sulphur, granite and marble. There are also extensive deposits of low grade uranium ore. Important industries based on mining include iron and steel, aluminium, and copper. The engineering industry has expanded largely on the basis of products invented or developed by Swedish engineers. Sweden has now one of the most important shipbuilding industries in the world. Motor car manufacturing is becoming a major industry. The recent establishment of a petro-chemicals industry has led to a rapid expansion in the output of chemicals and plastics.

*Communications*.—Railroads totalling 8,600 miles in length (of which 7,900 are the property of the State) were open on January 1, 1967. At the beginning of 1968 there were 499 telephones for every 1,000 of the population, 373 per 1,000 had obtained wireless licences and in January, 1967, the number of television licences issued had reached 2,160,000. On Sept. 3, 1967, right-hand traffic rules were introduced on the roads in Sweden. The number of private cars in use on January 1, 1968, was 1,966,600 (250 per 1,000 population).

The Mercantile Marine (Dec., 1968) consisted of 838 vessels of 100 tons gross and over with a total tonnage of 4,565,871. The Board of Civil Aviation under the control of the Ministry of Communications handles civil aviation matters.

Regular domestic air traffic is maintained by the Scandinavian Airlines System and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained by the Scandinavian Airlines System.

**Defence.**—Service in the Defence Forces is universal and compulsory, an average of 45,000 reservists being trained annually; strength of the Army is about 49,000, with some 500,000 trained reserves, equipped with modern weapons and largely mechanized. The Navy consists of 1 cruiser, 8 destroyers, 9 frigates, 41 F.P.B.'s, 21 submarines and a large number of minor craft and auxiliaries. The Air Force is equipped with modern jet aircraft of Swedish manufacture, many of which are supersonic. There are 1 Fighter, 4 Attack and 2 Reconnaissance wings.

**Religion.**—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

**Language and Literature.**—As one of the Scandinavian languages, Swedish is closely allied to Norwegian, Danish and Icelandic. Swedish literature dates back to King Magnus Eriksson, who codified the old Swedish provincial laws in 1350. With his translation of the Bible, Olaus Petri (1493-1552) formed the basis for the modern Swedish language. In 1643 Georg Stiernhielm wrote his first poem, dedicated to Queen Christina, the first in a series of works which earned him the title of "The father of Swedish poetry". Literature flourished during the reign of Gustavus III, who founded the Swedish Academy in 1786, and Swedish drama was born. 19th century Swedish literature was studied by names such as Atterbom, Almquist, Levertin, Rydberg, and was enriched by Finnish writers such as Topelius and Runeberg. At the culmination of this tradition came Strindberg and Lagerlöf. The modern tone was set by the so-called Proletarian School, the most famous authors of which were Ivar Lo-Johansson and Martinsson. There followed a proliferation of young writers among whom Moberg, Lagerquist, Dagerman and Frans G. Bengtsson have won international repute. The Swedish scientist Alfred Nobel (1833-96) founded the Nobel Prizes for Literature, Science and Peace. In 1967 there were 152 daily newspapers with a total circulation of 4,293,400 copies, 4 major papers being published at Stockholm, 3 at Göteborg and 4 at Malmö.

**Education.**—Well developed and recently re-organized to provide (i) 9 years' compulsory schooling from the age of 7 to 16 in the *Grundskolan*; (ii) further education from 16 to 18/19 in the *Gymnasia*, which offer a number of courses preparing for entry to the universities, other centres of higher education, the professions, etc.; (iii) Vocational and continuation schools following upon the *Grundskolan* and offering both practical and theoretical courses. These may be said to stand between the *Grundskolan* and the *Gymnasia*. (iv) the universities. There are five State universities—Uppsala (founded 1477); Lund (founded 1668); Stockholm (founded 1878); Göteborg (founded 1887); Umeå (founded 1963). Tuition within the State system, which is maintained by the State and by local taxation, is free.

## FINANCE

SWISS EMBASSY IN LONDON

77 Gloucester Place, W.1.

[01-723-0701]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency René Keller (1968).

*Counsellor*, Jürg Iselin.

*Defence Attaché*, Col. Helmut von Frisching.

*Secretaries*, Charles Bruggman; Richard Gächter;

Carlo Jagmetti; Franz Muhlem; Paul Stauffer.

*Asst. Defence Attaché*, Capt. Friedrich Lanz.

*Consular Section*, ■ Montagu Place, W.1.

*Consul and Head of Chancery*, Fritz Adams.

There is a Swiss Consulate in Manchester.

*Area and Population*.—The Helvetia of the Romans, ■ Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of ■ Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under ■ Constitution dated May 29, 1847, and comprises a total area of 15,950 square miles, with ■ population (estimated 1968) of 6,115,000. In 1968 there were 105,130 live births, 57,374 deaths and 45,711 marriages. The infant mortality rate was 16 per 1,000 live births. In 1960, out of a total of 5,492,061, 52.6 per cent. of the population was Protestant, 45.6 per cent. Roman Catholic and 0.4 per cent. Jewish.

*Physical Features*.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering ■ area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty

and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz. There ■ also many artificial lakes.

*Production and Industry*.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

*Government*.—The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of ■ members, and a Council of States (*Ständerat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is ■ tradition that Italian and French-speaking areas should between them be represented on the Federal Council by ■ least two members.

*Defence*.—All Swiss males must undertake military service in the Army. *Elite* (ages ■ to 32) initial training, 118 days. Subsequently 8 training periods of 21 days; then *Landwehr* (33–42) and *Landsturm* (43 to 50). Flying personnel of the Air Force, which is part of the Army (ages 20–36). Initial training ■ year, totalling 200 hours of flying. ■ weeks with squadron each year and completion of 70 hours of flying. After 36 revert to ground duties with Air Force or Army. Swiss Army equipment includes many British items, notably Centurion tanks, Bloodhound missiles, and Venom, Vampire and Hunter aircraft.

*Communications*.—By the end of 1968 there were 3,135 miles of railway tracks (Swiss Federal Railways 1,823 miles, Swiss privately owned railways 1,312 miles); the whole system is electrified. At the end of 1968, there were 49,000 miles of telegraph and telephone lines. By December 1968, the number of telephone subscribers amounted to 1,736,398 and the network was fully automatic throughout the country. There were 1,751,869 licensed radio receivers and 1,011,165 television receivers. At the end of 1965, the total length of first-class roads was 35,976 miles. The San Bernardino road tunnel connecting Zurich with Lugano and Milan was opened on Dec. 1, 1967.

The number of motor vehicles licensed at the end of 1967 was 1,747,425 (1,081,386 private cars, 547,574 motor cycles, motor scooters and bicycles with auxiliary motor, 4,483 motor buses, 91,438 motor lorries, 22,544 special vehicles and tractors).

A merchant marine, established in 1940, consisted in 1968 of 31 vessels with a total displacement of 198,373 tons (gross). In addition 476 vessels with ■ total tonnage of 460,680 were engaged in Rhine shipping. In 1968, goods handled at the Basle Rhine Port amounted to 7,808,613 tons. ■ lake

vessels transported 9,889,000 passengers and 401,709 tons of freight in 1967.

The national airline, Swissair, has a network covering 106,087,914 miles and in 1968 carried a total of 3,009,275 passengers. Its aircraft fleet comprises three DC8-62, two DC8-53, one DC8-62F, eight Convair Coronados, sixteen DC9-32 and four Caravelles. In 1968 the net profit was 37,070 million francs. It flies to and from the Swiss airports at Zurich, Geneva and Basle.

**Education.**—Control by cantonal and communal authorities. No central organization. Illiteracy practically unknown. (i.) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary*: Age 12-15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

**Language and Literature.**—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons.

Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845-1924) and Hermann Hesse (1877-1962) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

#### FINANCE

	Budget 1968	Budget 1969
	Swiss Francs	Swiss Francs
Revenue.....	6,310,000,000	6,728,000,000
Expenditure..	6,504,000,000	6,844,000,000
Federal Public Debt (Dec. 31, 1967): Internal consolidated....		5,917,600,000

Since devaluation of sterling in November, 1967, the rate of exchange has fluctuated between Swiss Francs 10.50 and 10.22 = £1 sterling for transactions through normal financial channels. The rate of exchange for sterling notes has fluctuated between Swiss Francs 10.40 and 10.25 = £1 (see also p. 83).

#### TRADE

[Following the outbreak of hostilities between Israel and the surrounding Arab States, Syria broke off diplomatic and consular relations with the United Kingdom on June 6, 1967.]

**Area and Population.**—Syria is in the Levant, covering a portion of the former Ottoman Empire, with ■ estimated area of 70,800 sq. miles and ■ population (estimated 1967) of 5,570,000, Arabic speaking

and mainly Moslems. (For MAP. see p. 885.) The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

*Archaeology, etc.*—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the oldest continuously inhabited city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyad Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix. 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the *tell* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the 12th and 13th centuries has been restored as a museum.

Hittite cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

*Government.*—Syria, which had been under French mandate since the 1914-18 war, became an independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic. It seceded from the United Arab Republic on Sept. 28, 1961.

In May, 1969, a new Constitution was promulgated, declaring that "the Syrian Arab Region will constitute a democratic, popular and socialist republic" in which the only political party would be the *Baath*. Supreme power in the State would lie with the People's Assembly which would elect the Chief of State and ratify laws. The Constitution provides for a planned socialist economy, with safeguards for private property. On May 29, President Atassi formed the Cabinet listed above.

*Production and Industry.*—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebleh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil, glass, soap, sugar, plastics and copper and brass utensils are locally produced. There are also some light assembly plants. Mineral wealth is small but oil has been found at Karachuk in the north-eastern corner of the country and drilling is continuing. A pipeline is to be built to the Mediterranean port of Tartous, *via* Homs. An oil refinery is in production at Homs and revenue is derived from the Kirkuk-Banias oil pipeline and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline). Syria also has deposits of phosphate and rock salt.

*Language and Literature.*—Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 2 daily newspapers and several periodicals in Arabic published in Damascus and one daily newspaper in Aleppo.

*Education.*—Education in Syria is under State control and, although a few of the schools are privately owned, they all follow a common

system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts, commerce, agriculture, divinity, fine arts, and a Higher Teachers' Training College. The number of students has risen from a few hundred in 1943 to about 20,000. There are also over 4,500 students at Aleppo University (founded 1961). Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

*Communications.*—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Beirut and Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. From Damascus the Hejaz railway runs southwards to Jordan. Railway lines are under construction to link the ports of Lattakia and Tartous with Aleppo and Qamishli. All the principal towns in the country are connected by roads of varying quality. An internal air service operates between Damascus and Aleppo, and between Aleppo and Qamishli. There are also flights from Damascus to Palmyra and Deir-*ez*-Zor. Damascus is also on international air routes.

*Currency.*—The monetary unit is the Syrian paper pound (£*Syr.*). Exchange rate, see p. 84.

#### TRADE

*Principal Imports.*—Foodstuffs (fruit, vegetables, cereals, meat and dairy products, tea, coffee and sugar), mineral and petroleum products, yarn and textiles, iron and steel manufactures, machinery, chemicals, pharmaceuticals, fertilizers and timber.

*Principal Exports.*—Raw cotton, cereals, fruit, livestock and dairy products, other foodstuffs, textiles and raw wool.

The value of Syria's foreign trade was:—

	1965	1966
Imports . . .	£ <i>Syr.</i> 812,000,000	£ <i>Syr.</i> 1,119,200,000
Exports . . .	644,000,000	645,600,000

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£5,237,000	£4,992,000
Exports to U.K. . . . .	479,000	494,000

*CHIEF TOWNS.*—Damascus (population (1965), 599,000) is the capital of Syria, other important towns being Aleppo (population 562,000), Homs (189,000) and Hama (135,000), and the principal port is  $\Psi$  Lattakia (82,000).

*FLAG.*—Red over white over black horizontal bands, with three green stars on central white band. *NATIONAL DAY.*—April 17.

#### BRITISH EMBASSY

[Diplomatic relations suspended, June 6, 1967.]

#### THAILAND (Siam)

*King*, His Majesty Bhumibol Adulyadej, born 1927; succeeded his brother, June 9, 1946; married Princess Sirikit Kitiyakara, April 28, 1950; crowned May 5, 1950; daughter born, April 6, 1951; son and heir born, July 28, 1952; second daughter born April 2, 1955; third daughter born July 4, 1957.

*Prime Minister*, Field Marshal Thanom Kittikachorn.  
*Foreign Minister*, Nai Thanat Khoman.

## ROYAL THAI EMBASSY IN LONDON

30 Queen's Gate, S.W.7

[01-589-0173]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Sunthorn Hongladarom (1968).*

*Area and Population.*—The Kingdom of Thailand, or Muang Thai, formerly known as Siam, has ■■■■ of 198,247 sq. miles with a population (estimated 1968) of 33,693,000. For position, see MAP, p. 971. It has a common boundary with Malaysia in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is separated from the Thai northern border only by ■ narrow stretch of Burmese and Laotian territory.

The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms ■ boundary with Burma for 200 miles), the Menam Chao Phya with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

*Government.*—Thailand is ■ sovereign independent state. Under the interim constitution promulgated in February, 1959, following on the bloodless revolution of October, 1958, the King exercises legislative power by and with the advice and consent of a Constituent Assembly, executive power through the Council of Ministers and judicial power through the courts established by law. He is advised by ■ Privy Council appointed by himself. The 240 members of the Constituent Assembly, who were appointed in February, 1959, under the terms of the interim constitution, as well as acting for the time being as the national legislature, have drafted a permanent constitution for Thailand.

*Language, Religion and Education.*—Thai is basically a monosyllabic, tonal language, ■ branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering 24,563,523 in 1964, with 1,025,569 Moslems and 150,953 Christians. The 2,500th anniversary of the Buddhist Era was celebrated in Bangkok in 1957, with religious and public ceremonies. Primary education is compulsory and free and secondary education in Government Schools is free. In 1964 there were 28,264 schools of all kinds, with 5,007,430 pupils and 158,920 teachers. There are 7 Universities attended by 45,000 students, 34 training colleges and 196 vocational schools (all types). New universities were opened at Chiangmai and Khon Kaen in 1966 and another in the southern part of the country was planned.

*Production and Industry.*—The country's most important products are agricultural or forest; rice (about 10,000,000 tons a year), rubber (about 210,000 tons a year) and timber (about 2,000,000 cubic metres a year of which only 161,000 are of teak, traditionally the important timber product). Other crops of some importance are sugar cane, tapioca, kenaf, groundnuts, tobacco, maize, soya beans, cotton and coconuts.

As regards mineral wealth, tin ore (production in 1965, 26,419 tons) is important, and small amounts of wolfram, iron and lead are mined, and over 125,000 tons of lignite. Most of the output of tin concentrates is now processed in a smelter in South Thailand which began operation in 1965. Exports of iron ore in 1965 were 700,000 tons (approx.), largely to Japan. Upwards of 200,000 tons a year of salt is produced by sea-water evaporation.

Before the war industry was mainly confined to the basic processing industries—sawmilling, rice-milling, etc. After the war the Government set up a number of factories, run by the Civil Service or the Armed Forces. The Government still has a sizeable stake in industry—notably the tobacco monopoly and factories for the manufacture of cement, glass, paper, jute, textiles, sugar and beer and spirits.

The present Revolutionary Government in 1958 instituted a policy of encouraging the private sector to invest in industry, by means of tax reliefs and other incentives. This policy is beginning to produce results although the Government has interests, directly or indirectly, in some of the largest current ventures—e.g. two refineries and a paper mill. The private sector industries are almost entirely of ■ secondary nature; soap products, gunny bags, textiles, car assembly, pharmaceutical preparations and packaging, dry batteries, etc. Nevertheless, more advanced organizations have recently started, such as a tyre factory, an aluminium rolling mill, a third glass factory, food processing plants and the manufacture of asbestos cement products. A fertilizer plant and a kraft paper factory have also been established.

*Communications.*—About 2,250 miles of State-owned railways were open to traffic in 1966. The track is metre gauge. Main lines run from Bangkok to Aranya Pradet, linking up with the Cambodian state railway at this border town (160 miles E.); *via* Korat to Ubol (about 352 miles E.) and to Nongkhai (415 miles N.E.) the ferry terminal on the River Mekhong opposite Vientiane, capital of Laos; to Chiangmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malay Peninsula, *via* Sungai Golok and Penang respectively, to Singapore.

Thailand has about 9,200 kilometres of highways, of which about 45 per cent. are paved. An additional 1,500 kms. of highway is under construction or planned. The development of roads is being given top priority in the Government's development plans and substantial extensions and improvements are being financed mainly by World Bank funds.

Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, Japan and Australasia, as well ■ other parts of S.E. Asia. Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. Domestic routes are operated by Thai Airways Corporation. There are about 14,500 miles of telegraph lines and parts of ■ countrywide micro-wave communications system are coming into operation. The harbour at Bangkok, which can take vessels up to 10,000 tons dead weight, is becoming congested, but an expansion programme is under study.

FINANCE 1964 1965  
millions of Baht

Total revenue.....	10,470	12,160
Total expenditure.....	12,336	14,355

Since 1950 Thailand has received amounts in excess of U.S.\$380,000,000 in external loans for rehabilitation and development of railways, the port of Bangkok, irrigation, hydro-electric and other projects.

Thailand receives economic and technical assistance from many sources. The largest civil sector contribution is that of the United States which amounts to approximately U.S.\$31,000,000 annually. Substantial military aid is also received from U.S. sources.

The exchange rate for the Baht was officially fixed at Baht 20-8 = \$1 U.S. (See also p. 84.)

## TRADE

	1964	1965
	millions of Baht	
Total imports.....	14,253	15,219
Total exports.....	12,339	13,049

## Trade with U.K.

	1967	1968
Imports from U.K.....	£22,060,000	£28,068,000
Exports to U.K.....	5,363,000	5,895,000

The main exports are rice and rubber which normally account for about 50 per cent. of the total. Principal exports in 1965 (millions of Baht) were: Rice, 4,376; Rubber, 1,999; Tin, 766; Maize, 980. Other exports, whose levels vary more are jute and kenaf, teak, and tapioca products. The main imports are machinery, petroleum products, iron and steel, cotton fabrics and vehicles.

**CAPITAL.** Ψ Bangkok (population, 1966, 1,577,003); in the delta of the Manam Chao Phya. Other centres are Chiangmai, Nakorn Sawan and Korat, but ■ other town approaches Bangkok in size or importance.

**FLAG.**—Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others). **NATIONAL DAY.**—December 5 (King's Birthday).

BRITISH EMBASSY  
(Bangkok)

*Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Neil Pritchard, K.C.M.G., (1967)*

£6,300

*Counsellor, G. S. Littlejohn-Cook (Consul-General).  
Defence and Military Attaché, Col. P. R. Body.*

## CONSULAR OFFICES

There are Consular Offices at Bangkok and Chiangmai.

## BRITISH COUNCIL

*Representative, M. H. Cardiff, O.B.E., 122 Chakrapetr Road, Bangkok.*

## TOGO

## (Republic of Togo)

*President and Minister of Defence, Gen. Etienne Eyadéma, born 1937, assumed office as Head of State, April 14, 1967.*

*Minister for Foreign Affairs, M. Joachim Hunlédé.*

The Republic is situated in West Africa between 0°–2°W. and 6°–11°N., with a coastline only 35 miles long on the Gulf of Guinea, and extends northward inland for 350 miles. It is flanked on the west by Ghana, on the north by Upper Volta and in the east by Dahomey (see MAP, p. 957). It has an area of 21,000 sq. miles and a population (estimated 1968) of 1,760,000, including people of several African races.

The first President of Togo, Sylvanus Olympio, assassinated on January 13, 1963, was succeeded by Nicolas Grunitzky, who was himself overthrown by ■ army *coup d'état* on January 13, 1967. On April 14, 1967, the Commander-in-Chief of the Togolese army, Lt. Colonel (later promoted General) Etienne Eyadéma named himself President. Togo is a member of the *Conseil de l'Entente*, the *Organisation Commune Africaine et Malgache* (O.C.A.M.), and the *Organisation of African Unity* (O.A.U.). The official language is French.

**Finance.**—The currency of Togo is the *Franc C.F.A.* (Francs C.F.A. 50=1 French Franc) (Francs C.F.A. 592=£1).

**Production and Trade.**—The economy of Togo is largely agricultural, the main exports being coffee, cocoa, palm kernels, copra, cotton and manioc. Production of phosphates by a Franco-American consortium begun in 1955 contributed 38.4 per cent. of Togo's export revenue in 1967.

## Trade with U.K.

	1967	1968
Imports from U.K.....	£1,179,000	£1,544,000
Exports to U.K.....	305,000	917,000

**CAPITAL.**—Ψ Lomé, population (1968), 100,000. **FLAG.**—Five alternating green and yellow horizontal stripes; a quarter in red at top next staff bearing a white star. **NATIONAL DAY.**—April 27 (Independence Day).

## BRITISH EMBASSY

*Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Ronald Fraser McKeever (1968)..... £4,625*  
*3rd Secretary, I. S. Danson (Vice-Consul).*

## TRUCIAL STATES

Seven independent Arab Shaikhdoms, known collectively as the Trucial States, have treaty relations with the British Government originating in treaties to prevent slavery and the piracy which formerly gave the name of "The Pirate Coast" to this area, and to maintain ■ perpetual maritime truce. The earliest treaty dates from 1820.

The British Government, by virtue of ■ treaty made in 1892, is responsible for the external affairs of the states through the British Political Resident in the Persian Gulf and the British Political Agents in the Trucial States. Six of the states lie on the coast of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West and one, Fujairah, lies on the Gulf of Oman.

**Area and Population.**—The approximate combined area of the states is 32,000 square miles and the population (estimated, 1968) is about 180,000. Security in the area is maintained by the Trucial Arab Scouts, the force having headquarters at Sharjah, and in Abu Dhabi by the Abu Dhabi Defence Force. There are police forces in all seven states.

Revenue is chiefly derived from customs dues on imports and oil concession payments. The export of dried fish is also ■ significant source of revenue and some pearling is still carried on. In Abu Dhabi, the onshore concession is held by Abu Dhabi Petroleum Co., Ltd. and the offshore concessions by Abu Dhabi Marine Areas Ltd.; in Dubai, the onshore concession is held by Dubai Petroleum Company and the offshore concession by Dubai Marine Areas. In Sharjah the west coast onshore concession is held by Shell and the east coast onshore and offshore concession is held by Shell and Bomin. In Ras al-Khaimah Union Oil has the offshore and Shell the onshore concession. In Umm al Qaiwain the onshore concession is held by Shell and in Fujairah Shell and Bomin hold the concession. The offshore concessions in Sharjah (West Coast) and in Umm al Qaiwain and the concession for Ajman are not let at present.

From 1956 to 1965 the British Government financed ■ Trucial States Development Scheme to contribute to the material welfare of the people, including an Agricultural Trials Station in the Shaikhdom of Ras al-Khaimah. Trade Schools in Sharjah and Dubai, a hospital in Ras al-Khaimah and a number of dispensaries in the smaller towns and villages. In 1965 this scheme was amalgamated with the Trucial States Council's Development Office, which was founded to manage ■ fund for development, established with contributions from Britain, Qatar, Bahrain and Abu Dhabi. The Kuwait Government has also given aid in the form of schools, clinics and mosques. It has carried out numerous development projects: roads, jetties, piped water and electricity supplies, flood and sea protection, soil, water and mineral surveys, a trade

school at Ras al Khaimah, and clinics and dispensaries.

Kuwait, U.A.R., Bahrain and Qatar contribute educational assistance to the states. There are hospitals in Dubai and Ras al-Khaimah. Her Majesty's Government has jurisdiction over certain categories of foreigners. The Rulers of all the states meet together in the Trucial States Council to discuss matters of mutual interest three or four times a year. The currency in Abu Dhabi is the Bahraini *dinar*; in the other Trucial States, the Qatar and Dubai *riyal*, which equals an Indian *rupee*.

Abu Dhabi is the largest of the Trucial States in area, stretching from the Khor el Odaid in the West to the borders with Dubai in the region of Jebel Ali. It includes six villages of the Buraimi oasis and a number of settlements in the series of oases known as the Liwa. Two oil companies are operating in Abu Dhabi territory, Abu Dhabi Petroleum Co. Ltd. on land and Abu Dhabi Marine Areas Ltd. in the Abu Dhabi off-shore concession area. Oil has been discovered off Das Island, where Abu Dhabi Marine Areas has its headquarters and production started in 1962. Production from the on-shore Murban oil field commenced in December, 1963. There are airfields at Abu Dhabi and at Das Island and an air strip at Buraimi. Work has started on a substantial development plan for the town of Abu Dhabi and the first stage has been completed.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£6,755,000	£9,546,000
Exports to U.K. . . . .	5,905,000	14,487,000

ψ Dubai is by far the largest town in the Trucial States and has a population estimated at about 60,000. It is the main port for the import of goods into the Trucial States and the interior of Oman, and there is also a lively *entrepôt* trade. The value of imports in the year 1967 was over £35,000,000 and in 1968 over £66,000,000. It has a good natural harbour, improvements to which have been carried out since 1959. The airport has been enlarged to take jet airliners. New airport terminal facilities are being built. There are regular B.O.A.C. and other international and local airline services. The Dubai Telephone Company, formed in May, 1959, started generation and distribution in August, 1961. The main source of revenue is from customs. Wireless communications are managed by Cable and Wireless Ltd. and the Post Office was handed over to the Dubai Government by the British G.P.O. in 1963. Oil was struck off-shore in July 1966, and was declared to be in commercial quantities in May, 1967. Exports were expected to start in 1969.

Sharjah has a port, much silted up, but a new jetty to replace it is under construction. It has an airport served by Gulf Aviation and Syrian Arab Airlines. Sharjah has dependencies on the Batnah coast at Khorfakkhan, which forms a good natural harbour, Kalba and Dibba. The headquarters of the Trucial Oman Scouts is near Sharjah. Units of the Royal Air Force and a battalion of the British Army are based at Sharjah.

Ajman is the smallest state, having a population of only about 5,000. It has inland enclaves at Manama and Masfut. *Umm el Qatwain* does a small trade in dried fish. It has an oasis at Falaj al Mu'alla where palms and some fruit are grown. Ras al Khaimah has a population of about 25,000, of whom about half live in the town. It is an ancient seaport near which some remains of archaeological interest have been found. Dates, vegetables, fruit and tobacco are grown. The seat of government has now moved from its present exposed position on the shore to the inland side of the Creek. *Fujai-*

*rah* was recognized as one of the Trucial States in 1952. The inhabitants are hill people in the mountains of the Musandam peninsula, with a few cultivators around Fujairah itself, which is on the fertile plain of the Batnah coast. The most important export is tobacco.

#### Trucial States Trade with U.K.

(excluding Abu Dhabi, see above)

	1967	1968
Imports from U.K. . . . .	£5,282,000	£9,013,000
Exports to U.K. . . . .	6,600,000	36,974,000

British Political Agent, Trucial States, J. L. Bullard  
(resident at Dubai).

British Political Agent, Abu Dhabi, C. J. Treadwell.

## TUNISIA

(Tunisian Republic)

President, Habib Bourguiba, elected July 25, 1957;  
re-elected 1959 and 1964.

#### TUNISIAN EMBASSY IN LONDON

29 Princes Gate, S.W.7

[01-584-5167]

Ambassador, His Excellency M'hamed Essaafi (1964).  
3rd Secretaries, Ahmed Badra; Mustapha Mizouini.  
Attaché, Mustafa Zardi (1967).

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles and a population (estimated, 1967) of 4,560,000.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956.

Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. A few days later the Government was reconstructed on the "presidential" model, the Ministers becoming Secretaries of State. On June 1, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 12 regions each administered by a Governor.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and

oats are grown. The vine and olive are extensively cultivated.

The chief exports are olive oil, phosphates, cereals and, normally, wine but the French market has been virtually closed to Tunisian wine since the end of 1964 and exports of wine have declined sharply. The chief imports are machinery, foodstuffs, iron and steel, textiles and crude petroleum, etc. Some oil has been discovered in Tunisia and production is running at about 2,000,000 tons a year. In 1968 Tunisia's imports totalled in value 110,484,000 *dinars* and exports 82,831,000 *dinars*. The volume of Tunisia's trade with France is diminishing but France still remains Tunisia's main trading partner. In 1968 France supplied 34 per cent. of Tunisia's total imports and she bought 23 per cent. of Tunisia's total exports.

#### Trade with U.K.

	1966	1967
Imports from U.K.....	£1,720,000	£2,693,000
Exports to U.K.....	2,334,000	3,744,000

**Currency.**—The Tunisian *dinar* was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. Although Tunisia remains in the Franc Zone the *dinar* is not tied to the French franc. The current rate of exchange is *dinars* 1.25 = £1.

So far as trade is concerned Tunisia was effectively part of metropolitan France until September, 1959, when she abrogated the Customs Union with the latter and a new trade and payments agreement was negotiated. This reduced or eliminated the tariff advantages enjoyed by certain French goods. Under commercial agreements concluded in November, 1962, and February, 1964, import quotas were established for certain French goods. In June, 1964, however, following Tunisian measures regarding the take-over of foreign-owned lands in Tunisia, France gave notice that she would not renew the 1959 Trade Agreement, due to expire on Sept. 30, 1964. In May, 1966, France opened import quotas for a wide range of Tunisian goods (but excluding wine). Within these quota limits these goods can be admitted into France customs-free. In 1966 a policy of severe import restriction was adopted in order to reduce the country's chronic imbalance of trade.

**CAPITAL.** Ψ Tunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 784,787 at the Census of 1966.

The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are Ψ Sfax (249,991); Bizerta (95,023); Ψ Sousse (82,666); Kairouan (82,299).

**FLAG.**—Red crescent and star in a white orb, all on a red ground. **NATIONAL DAY.**—June 1.

#### BRITISH EMBASSY

Place de la Victoire, Tunis

*Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Sir Edward Redston Warner, K.C.M.G., O.B.E. (1967) £5,625. 1st Secretaries, J. B. Wright (Consul and Commercial); A. C. Wells (Labour). 1st Vice-Consul, G. Cardona, M.B.E. 2nd Secretary, I. H. Macrae (Information). Commercial Attaché, F. J. Clough. Asst. Cultural Attaché, K. McGuinness. Vice-Consul, E. J. Hazou. Attaché, Rev. I. Dunbar.*

*British Council Representative, T. W. Morray, O.B.E.*

#### TURKEY

*President of the Republic, General Cevdet Sunay G.C.B., born 1900; elected President, March 28, 1966.*

#### COUNCIL OF MINISTERS

(Names as spelt in Turkish characters)

*Prime Minister, Süleyman Demirel. Ministers of State, Seyfi Öztürk; Hüsamettin Atabeyli; Sadik Tekin Müftüoğlu. Minister of Justice, Hasan Dinçer. National Defence, Ahmet Topaloğlu. Interior, Faruk Sükan. Foreign Affairs, İhsan Sabri Çağlayangil. Finance, Cihat Bilgehan. National Education, İhram Ertem. Public Works, Orhan Alp. Commerce, Ahmet Türköl. Health, Vedat Ali Özkan. Customs and Monopolies, Nâhit Mentese. Agriculture, Bahri Dağdas. Communications, Sadettin Bilgiç. Labour, Turgut Toker. Industries, Mehmet Turgut. Energy and Natural Resources, Refet Sezgin. Tourism, Nihat Kürsat. Construction and Resettlement, Haldûn Menteseoğlu. Villages and Communal Development, Selahattin Kiliç.*

## TURKISH EMBASSY IN LONDON

Chancery: 43 Belgrave Square, S.W.1

[01-235-5252]

Ambassador (vacant).

Counsellors, Sadi Akarcalioğlu; Ecmel Barutçu, M.V.O.; Ekrem Geris (Commercial); Turhan Energen (Financial).

1st Secretaries, Yalçın Tuğ; Tugay Özçeri.

Armed Forces Attaché, Brig-Gen. Recai Engin, C.V.O.

Military Attaché, Col. Adnan Sarper.

Air Attaché, Col. Sami Unel.

Naval Attaché, Captain Orhan Karabulut.

Cultural Attaché, Kamil Günel.

Consulate-General: 46 Rutland Gate, S.W.7.

Consul-General, Celadet Kiyasi.

Consul, Aydın Tosun.

**Area and Population.**—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Iran. (For MAP, see p. 951).

Turkey extends from Edirne (Adrianople) to Transcaucasia and Iran, and from the Black Sea to the Mediterranean, Syria and Iraq. Total population at the Census of October, 1966, was 39,391,421; estimated Aug., 1968, 34,400,000.

Turkey in Europe consists of Eastern Thrace, including the cities of Istanbul and Edirne, and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west. Population (estimated, 1967), 2,790,000.

Turkey in Asia comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Ægean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. Population (estimated, 1967), 29,920,000.

**Government.**—On October 29, 1923, the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. Following the introduction of a multi-party régime in 1945, the Democratic Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, a body of military officers. The committee ruled from January to November, 1961, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly.

In October, 1961, general elections were held for a new Senate (150 Senators) and National Assembly (450 Deputies), which together constitute the Grand National Assembly. From 1961 until October, 1965, Turkey was governed by four coalition Governments. Further General Elections were held in October, 1965 in which the Justice Party obtained 240 seats and formed a unitary Government under Süleyman Demirel. The next largest party, the People's Republican Party, with 134 seats in 1965, split in April, 1967, 32 members forming the Reliance Party.

Turkey is divided for administrative purposes into 67 *vilayet* with subdivisions into *kaza* and *nahiye*. Each *vilayet* has a governor (*vali*) and elective council.

**Religion and Education.**—98.99 per cent. of the population are Moslems. The main religious minorities, which are concentrated in Istanbul and the Syrian frontier, are: Orthodox, 107,000; Armenian Apostolic, 71,000; Catholic, 25,000; Protestant, 17,000; others, 10,000 (Total Christians, 230,000); Jewish, 44,000. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1966-7 there were 26,000 primary schools, with 4,233 pupils. There are two universities at Istanbul (one being a Technical University), three at Ankara (including the new Hacettepe University), one each at Izmir, Erzurum and Trabzon. The expenditure allocated to education in the 2nd Five Year Plan (1968-72) is TL 7,500,000,000.

**Language and Literature.**—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the number of Turks who can read and write is rising steadily (although the proportion is constant at about 40 per cent.). Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects, but few trade or commercial publications.

**Agricultural Production.**—In 1968, agriculture has accounted for about 33 per cent. of gross domestic income, while exports of agricultural commodities have represented nearly 80 per cent. of total exports. About 10,000,000, 77.6 per cent. of the working population, is in the rural sector, but agriculture is still primitive and agricultural productivity is low. Production figures for the principal crops in 1968 were ('000 tons): Cereals, 15,882; Sugar beet, 4,714; Cotton, 435; Tobacco, 161; Olives, 800; Hazel nuts, 125; Figs, 42; Tea, 25; Sultanas, 100. With the important exception of wheat, which is mostly grown on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred around Izmir, where substantial quantities of cotton are also grown. The main cotton area is in the Çukurova Plain around Adana. In 1967 it was estimated that there were 75,000,000 head of livestock, including sheep, 36,000,000; goats, 21,000,000; and cattle, 14,000,000. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

**Industry.**—After agriculture, Turkey's second most important industry is based on her considerable mineral wealth which is, however, as yet comparatively unexploited. The most important de-

velopments are in coal, of which over 10,100,000 metric tons are produced annually (over 53 per cent. of the production is lignite) for domestic needs. The main export mineral is chromite. Production of iron ore in 1968 was 1,936,000 tons; chrome ore, 476,000 tons; manganese, 18,000 tons; sulphur, 24,000 tons; blister copper, 24,000 tons and boracite, 65,883 tons. The research and exploitation of the principal mineral deposits are mainly in the hands of the Mineral Research and Exploration Institute of Turkey and the State-owned Etibank respectively. The latter controls directly, on behalf of the Government, all the copper, sulphur and pyrite output of Turkey, as well as much of the colemanite and chrome production. Since State-sponsored industrialization began in 1935, industry has played ■ increasing part in the Turkish economy. Here, also, as in the case of minerals, much of the industry of the country is controlled by the Government.

The progress made in the manufacture of sugar, cotton, woollen and silk textiles, and cement, has been such that the bulk of the country's requirements can now be produced locally, while other industries contributing substantially to local needs include paper, glass and glassware, iron and steel, leather and leather goods, sulphur refining, canning and rubber goods, soaps and cosmetics, pharmaceutical products, prepared foodstuffs and a host of minor industries. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to promote the exploitation of Turkey's petroleum resources by foreign countries. Local production of crude petroleum in 1968 totalled 3,104,000 tons.

*General Economic Factors.*—Turkey's balance of payments continues to be burdened with the servicing of her large external debts (the total of public and private external debts repayable in foreign currencies totalled TL13,832,100,000 on Nov. 30, 1968, and the difficulty of increasing exports, which are mainly agricultural products, and minor raw materials for which world markets are rather weak. At the same time, Turkey's population is growing at an estimated rate of 2·6 per cent. per annum. Since the Second World War the United States Government has given Turkey financial aid totalling 5 billion dollars, half of which has been for military and half for economic purposes. The other main official sources of foreign aid have been the O.E.C.D. and the I.M.F., which have made medium term loans for balance of payment support. The United Kingdom has pledged nearly £40,000,000 of aid to Turkey since 1963.

The second of Turkey's three Five-Year Development Plans, for the years 1968–72, began in January, 1968. The basic economic objective of the second plan is to achieve ■ aggregate growth rate of around 40·3 per cent. in the gross national product.

### COMMUNICATIONS

*Railways.*—The complete network became the property of the State Railways Administration in 1948. The total length of lines in operation at the end of 1968 was 8,008 kilometres (4,976 miles). In 1968, the railways carried 74,388,000 passengers, 9,100,000 metric tons of freight and 1,885,000 head of livestock.

*Roads.*—At the end of 1967, there were 34,500 km. of national roads (15,100 of which were hard-surfaced. All-weather roads accounted for 31,000 km. The number of motor vehicles in use at the end of 1968 was 128,873 passenger cars, 105,931 trucks, 33,431 buses and 74,982 tractors.

*Posts.*—On Dec. 31, 1968, the number of telephone subscribers in Turkey was 288,000. There

is a considerable shortage of telephone lines in some of Turkey's major cities.

*Shipping.*—At the end of 1968, the Turkish Merchant Navy consisted of 2,235 dry cargo ships of 300 tons gross and over totalling 489,492 tons, 154 passenger ships of a gross tonnage of 116,105 tons and 75 tankers with ■ gross tonnage of 140,247 tons.

*Civil Aviation.*—The State Airlines (T.H.Y.) operate all internal services and have services to Athens, Beirut, Brussels, Cologne, Amsterdam, Zurich, Bucharest, Geneva, Frankfurt, Munich, Rome, Nicosia, Tel Aviv and Vienna. Most of the leading foreign airlines operate services to Istanbul and some also to Ankara, including British European Airways. The T.H.Y. fleet is composed of Vickers Viscounts, D.C.9's and Fokker Friendships.

### FINANCE

(Financial year, March 1 to February 28)

	1968-69	1969-70
	TL'000,000	
Estimated Expenditure...	21,612	25,696
Estimated Revenue.....	20,712	24,497
The estimated deficit for 1969-70 of TL 1,199,000,000 will be covered by domestic borrowing of TL600,000,000 and by Government staff economies.		

*Currency.*—The Turkish Lira (TL) is divided into 100 Kurus. The official rate of exchange TL21·60 = £1 and TL9·0 = U.S.\$1. A special tourist rate of exchange was introduced in 1968 of TL28·80 = £1 and TL12 = U.S.\$1. (See also p. 84.)

### TRADE

	1967	1968
Total imports....	\$684,669,000	\$763,663,000
Total exports.....	522,667,000	496,360,000

All imports are subject to licence and the issue of licences is limited to goods considered necessary for the country's economy. Lists of permitted imports are published bi-annually at the beginning of January and at the beginning of July. The main imports are machinery, crude oil and petroleum products, iron and steel, vehicles, medicines and dyes, fabrics and yarns. The principal exports are cotton, tobacco, fruits, minerals, livestock, cereals and oil seeds.

### Trade with U.K.

	1967	1968
Imports from U.K. . . .	£29,240,000	£34,056,000
Exports to U.K. . . . .	13,545,000	16,934,000

**CAPITAL OF TURKEY, ANKARA (Angora),** ■ inland town of Asia Minor, about 275 miles E.S.E. of Istanbul, with a population (1965 census), of 902,000. Ankara (or Ankyra) was the capital of the Roman Province of *Galatia Prima*, and ■ marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancryanum*, inscribed with a record of the reign of Augustus Caesar. A new city has been laid out on modern lines, with parks, statues and avenues. **Ψ ISTANBUL**, the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; estimated population, 1,750,000. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are Ψ Izmir, 417,000; Adana, 290,000; Bursa, 212,000; Eskisehir, 174,000; Gaziantep, 158,000; Konya, 157,000; Kayseri, 126,000; and Erzurum, 106,000.

**FLAG.**—Red, with white crescent and star. **NATIONAL DAY.**—October 29 (Republic Day).

**BRITISH EMBASSY**  
(Ankara)

*Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Roderick Francis Gisbert Sarell, K.C.M.G. (1969)..... £6,300*  
*Minister, A. D. F. Pemberton-Pigott, C.M.G.*  
*Counsellors, R. P. Pinsent (Commercial); J. C. Edmonds.*

*1st Secretaries, R. A. R. Barltrop; R. S. Edlin; R. M. Hunt; J. Dodds; B. V. White; A. P. Fablan.*

*2nd Secretary, Miss J. M. Murdoch.*

*3rd Secretary, R. G. Short.*

*2nd Secretaries, Shawkat Fahmy Yanny (Commercial); Abdel Meguid Abdel Fattah Hassan (Commercial).*

*3rd Secretaries, Fouad Cherif; Mohamed A. Abdel Wahab; Ibrahim Abd El Fattah (Commercial).*

**AREA AND POPULATION.**—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population (estimated Dec., 1968), of 32,028,000.

There are three distinct elements in the native population. The largest, or "Egyptian" element, is the Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellah*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa of mixed Arab and negro blood. The *Bedouin* and *Nubians* are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St.

John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the coast 20 kilometres N.W. of Sollüm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddans* (12,432 square miles) and the area of lakes at 641,000 *feddans* (1,039 square miles), a total of 8,308,000 *feddans* (13,470 square miles).

*Physical Features.*—The Nile valley varies in width from less than half a mile in the southern granitic region to over 20 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country.

The Nile has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river formerly had a regular yearly rise and fall of about 13 feet at Cairo, but since the commencement of storage in the reservoir of the High Dam in 1965, there has been no flood downstream of the Dam and the water level remains almost constant throughout the year. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia and Siwa.

On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaus of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

*Religions.*—The predominant religion is Islam but there are about 2,000,000 Christians (mainly Copts). By 1968 nearly all the Jews had left the country. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti al Gumhuriya al Arabiya al Mutahida*.

*Government.*—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from the Mamelukes, or bodyguard. Mohammed

Ali, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and eventually made hereditary governor of Egypt and the Sudan by a firman from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arâbi *Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

A British Protectorate over Egypt declared on Dec. 18, 1914, lasted until Feb. 28, 1922, when Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.—Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'état*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

A union with Syria was effected in 1958 and lasted until September, 1961, when Syria seceded after a *coup d'état*. The title and flag of the United Arab Republic were, however, retained for Egypt.

Zaharia Mohiedin resigned as Prime Minister in September, 1966, and was replaced by the former Minister for the High Dam, Sidqi Suliman. After the defeat of the Egyptian forces in the war with Israel, President Nasser resigned on June 9, 1967, but withdrew his resignation after large demonstrations in his favour. On June 19, President Nasser also assumed the office of Prime Minister, forming a new government at the same time. Further Cabinet changes were made in 1968 and on April 25, 1969 (see list, p. 954).

*Agriculture.*—For the first time in history the Nile Flood was arrested in 1965. The flow of the river can now be regulated throughout the year by the High Dam, according to the needs of agriculture. The new pattern of cultivation which this will make possible has not yet fully emerged and it will take time to change traditional planting habits. The principal crops grown during *Saifi* (summer) were cotton, rice, sugar cane and sorgho (maize). *Nili* (flood) part of *Saifi*, had the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reached its highest level in September—it generally began in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, bersin (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

*Railways.*—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and

southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to a new port being constructed upstream of the High Dam. At this point a steamer connection runs to New Halfa, connecting the Egyptian Republic with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollüm, thus joining Tripoli to Egypt. The gauge is standard (4 ft. 8½ in.).

**Roads and Caravan Routes.**—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollüm and thence to connect with the coast road in Libya. A bitumen road leads to Kharga and Dakhla, from the former of which there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir, a metalled road, being probably the most frequently used.

**Shipping.**—A part from the three great seaports of Alexandria, Port Said and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollüm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

**Currency.**—£E (Egyptian pound of 100 piastres) = 19s. 2d. sterling. Official Rate of Exchange—(Buying) £E1·04347 = £1; (Selling) £E1·04973 = £1. (See also p. 84).

#### Trade with U.K.

1967 1968

Imports from U.K. . . . . £10,926,000 £12,183,000

Exports to U.K. . . . . 7,341,000 10,345,000

The principal imports are metals, and manufactures thereof, chemicals and pharmaceuticals, machinery and transport equipment, foodstuffs, beverages and textile fibres. The exports are principally raw cotton, textile yarns, petroleum products and a growing list of secondary exports, many of them manufactured goods.

**CAPITAL.**—Cairo (population, estimated 1966, 4,219,853), stands on the E. bank of the Nile, about 24 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century and containing in its walls the Mosque of Mohamed Ali built in the 19th century.

ψ ALEXANDRIA (estimated population, 1,801,056), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great pharos (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Other towns are: Ismailia; ψ Port Said; Mansura (102,709); Asyût (284,000); Faiyûm (162,000); Tanta (139,965); Mahalla el Kubra (115,509); ψ Suez; ψ Damietta (97,000). Ismailia, Port Said and Suez had been almost totally evacuated by the summer of 1969.

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days; *via* Marseilles, 6 days.

**FLAG.**—Horizontal bands of red, white and black, with two 5-point green stars in white band.

**NATIONAL DAY.**—July 23 (Anniversary of Revolution in 1952).

#### BRITISH EMBASSY

Kasr el Doubara, Garden City, Cairo

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Richard Ashton Beaumont, K.C.M.G., O.B.E. (1968) . . . . . £5,625

Counsellors, D. L. L. Stewart, C.M.G.; G. L. Simmons, M.V.O. (Commercial); W. F. Morris (Consul-General).

1st Secretaries, P. R. H. Wright (Head of Chancery); P. J. L. Popplewell (Information); R. L. Morris, O.B.E. (Labour); M. W. Marshall (Admin.); P. J. Monk (Claims); A. J. C. E. Rellie (Commercial).

2nd Secretaries, J. Greaves (Commercial); V. E. Crowe (Vice-Consul).

3rd Secretary, P. M. Nixon.

Junior Attachés, H. G. de Jong (Vice-Consul); M. H. Connor (Claims); Miss B. R. Griffiths (Vice-Consul).

Cultural Attaché, R. A. Simcox, M.B.E.

Assistant Cultural Attachés, R. G. Logan-Reid; J. S. Acton.

There is a British Consulate-General in Alexandria.

## UPPER VOLTA

(République de Haute Volta)

(See MAP, p. 957.)

Head of State (provisional Government) and Minister of Foreign Affairs, Lt.-Col. Sangoulé Lamizana, assumed power January 3, 1966

Upper Volta is an inland, savannah state in West Africa, situated between 9° and 15°N and 2°E and 5°W with an area of about 100,000 square miles and a population estimated in 1968 at 5,155,000. It has common boundaries with Mali on the west, Niger and Dahomey on the east and Togo, Ghana and the Ivory Coast on the south. The largest tribe is the Mossi whose king, the Moro Naba, still wields a certain moral influence.

Upper Volta was annexed by France in 1896 and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, etc., were signed in Paris on April 24, 1961. Upper Volta is a member of the *Conseil de l'Entente*, OCAM, the Organization of African Unity, etc. The official language is French. The constitution, adopted by referendum on November 27, 1960, provides for a presidential form of government with a single chamber National Assembly, but the Constitution was suspended and the National Assembly dissolved in January, 1966, when the Army assumed power after popular demonstrations in Ouagadougou against the régime of the former President Yaméogo.

**Finance and Trade.**—The currency of the Republic is the *Franc CFA* (Francs CFA 50 = 1 French Franc) (Francs CFA 593 = £1). The 1968 Budget totalled Francs CFA 8,563,610,000.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea-nuts and cotton. Small deposits of gold, manganese, copper, bauxite and graphite have been found. Value of trade in 1967 amounted to: Imports, francs CFA 8,970,316,000; Exports, francs CFA 4,429,256,000.

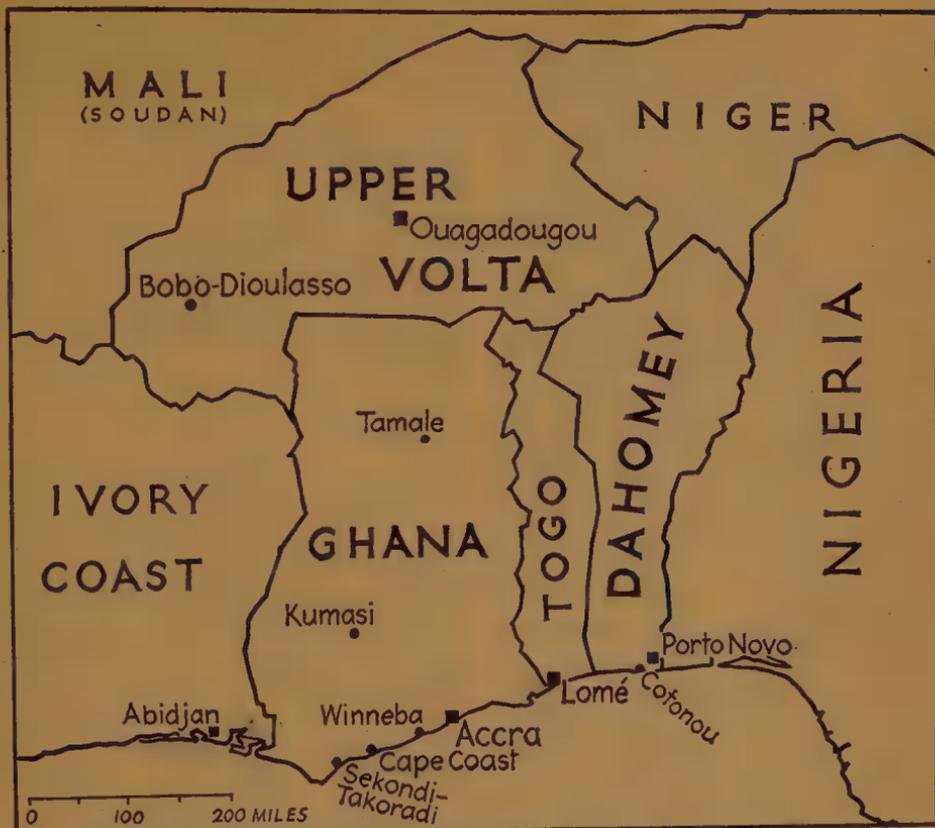

**CAPITAL.**—Ouagadougou (110,000). Other principal town: Bobo-Dioulasso (68,000).

**FLAG.**—Three horizontal stripes, black (above) white and red.

**NATIONAL DAY.**—December 11.

#### BRITISH REPRESENTATION

Ambassador Extraordinary and Plenipotentiary, His Excellency Dudley John Cheke, C.M.G. (resident at Abidjan).

## URUGUAY

(República Oriental del Uruguay)

President, Jorge Pacheco Areco, born 1920, succeeded to the Presidency on the death of President Gestido, Dec. 6, 1967.

Vice-President, Dr. Alberto Abdala.

Minister of Interior, Dr. Eduardo Jiménez de Arechaga.

Foreign Affairs, Venancio Flores.

National Defence, Gen. Antonio Francesc.

Finance, Dr. Cesar Charlone.

Public Works, Walter Pintos Risso.

Public Health, Dr. Walter Ravenna.

Industry and Commerce, Dr. Jorge Peirano Facio.

Livestock and Agriculture, Dr. Carlos Frick Davie.

Transport, Communications and Tourism, Ing. José Serrato.

Culture, Dr. Federico García Capurro.

Labour and Social Security, Dr. Julio César Espinola.

Director of Planning and Budget, Dr. Aquiles Lanza.

### URUGUAYAN EMBASSY AND CONSULATE

Chancery: 48 Lennox Gardens, S.W.1

[01-589-8835; Consulate 01-589-8735]

Ambassador (vacant).

Minister-Counsellor (Chargé d'Affaires), Señor Don Carlos A. Ghiringhelli.

1st Secretary, Señor Don Guy P. Nery.

3rd Secretary, Señor Don Juan José de Arteaga.

Consul-General, Señor Don Pedro Pablo Lerena.

Adjoint Consul, Señora Doña Diva Batello Meneses.

2 H\*

*Area and Population.*—The smallest Republic in South America, on the east coast of the Río de la Plata, situated in lat.  $30^{\circ}$ — $35^{\circ}$  S. and long.  $53^{\circ}$   $25'$ — $57^{\circ}$   $42'$  W., with an area of 72,172 square miles, and a population (estimated, 1968) of 2,818,000 almost entirely white and predominantly of Spanish and Italian descent. Many Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

*Physical Features.*—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet.

The principal river is the Río Negro (with its tributary the Yí), flowing from north-east to south-west into the Río Uruguay. The boundary river Uruguay is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucía, Queguay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin.

The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall ■ regular

throughout the year, but there are occasional droughts.

**Government.**—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726 to 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

Elections were held on Nov. 27, 1966, together with a referendum which decided in favour of Uruguay's return to a presidential system. The election gave the Colorado Party a narrow majority.

The President appoints a council of 11 ministers and the Vice-President presides over Congress. The legislature consists of a Chamber of 99 deputies and a Senate of 30 members (plus the Vice-President), elected for five years by a system of proportional representation. Voting is obligatory and extends to all citizens of good repute and certain long standing residents who are not citizens, from the age of 18.

President Jorge Pacheco Areco succeeded Gen. Gestido, who died on Dec. 6, 1967.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

**Production and Industry.**—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The last livestock census showed figures of 8,792,428 cattle, 21,737,862 sheep, 498,097 horses, 383,357 hogs, and 10,461 goats. In addition to the meat packing industry, other foodstuffs, wine, beer and textiles are of importance.

The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, plastics, household consumer goods, edible oils and the refining of petroleum and petroleum products. There are mineral deposits of importance.

**Communications.**—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

There are about 1,873 miles of standard gauge railway in use in Uruguay. A State Autonomous Entity was formed to administer the railway systems purchased by the Government from four British companies in 1948.

An internal airline, PLUNA, which is now owned by the State, runs a daily passenger service and limited freight service to the principal capitals of the interior, and also runs services to Southern Brazil, Paraguay and Argentina. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

**Education and Social Services.**—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 270,980 pupils in 2,362 state schools and technical and trade schools and evening courses for adult education. In 1964 there were 77,175 pupils in secondary schools including 11,000 in the 11 State *liceos* of the capital. The University at Montevideo (founded in 1849) had, in 1964, 16,200 students enrolled in its ten faculties.

**Language and Literature.**—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. 10 daily newspapers are published in Montevideo with an estimated total circulation of 200,000. Most of them are distributed throughout the country.

#### FINANCE

Estimated revenue and expenditure for the years 1967 and 1968 were as follows:—

	1967	1968
Revenue..	\$Ur.18,700,000,000	\$Ur.46,100,000,000
Expenditure	24,500,000,000	56,400,000,000

The public debt at June 30, 1967, amounted to \$Ur.6,847,316,706.

The monetary unit is the *peso*. In May 1963 the gold content of the *peso* was fixed at 0.059245 grammes of pure gold. After several devaluations the *peso* stood in May, 1968, at \$Ur.250 = \$U.S.1 in the official markets. Quotations in the parallel markets fluctuate, within 10 per cent. of the official rate. Sterling exchange, see p. 84.

#### TRADE

	1966	1967
Total imports	\$U.S.162,242,000	\$U.S.171,410,000
Total exports	185,835,000	158,673,000

#### Trade with U.K.

	1967	1968
Imports from U.K. ...	£3,347,000	£3,248,000
Exports to U.K. ....	13,687,000	17,512,000

The exports are principally animal and agricultural products, and include chilled, frozen and canned meat, wool, hides and oleaginous products; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber and foodstuffs.

The principal imports from the U.K. are vehicles (including omnibus chassis, tractors and spares and accessories), iron sheets, timplate, raw materials, industrial machinery spare parts, paper money, road-making machinery, chemical products and tea.

**CAPITAL.**  $\Psi$  Montevideo, Pop. (1963), 1,173,114. Other centres are  $\Psi$  Salto (60,000),  $\Psi$  Paysandú (60,000),  $\Psi$  Mercedes (34,000), Minas (34,000), Melo (30,000), and Rivera (22,000).

**FLAG.**—Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff. **NATIONAL DAY.**—August 25 (Declaration of Independence, 1825).

Time of transit from London to Montevideo, by air, 20–22 hours.

#### BRITISH EMBASSY

Chancery, Calle Cerrito, 420, Montevideo. *Ambassador Extraordinary and Plenipotentiary*, His Excellency Geoffrey Holt Seymour Jackson, C.M.G. (1969).....£5,625  
1st Secretaries, K. F. X. Burns (*Head of Chancery*); I. Ross-Bell (*Commercial*); F. Sharples (*Labour*; resident at Buenos Aires).  
and Secretary, C. J. Sharkey (*Information*).

*Naval Attaché*, Capt. G. D. van Someren, R.N. (resident at Buenos Aires).  
*Defence and Military Attaché*, Col. G. W. Croker, M.B.E., M.C. (resident at Buenos Aires).  
*Air Attaché*, Group-Capt. J. F. C. Melrose., D.F.C. (resident at Buenos Aires).

## BRITISH CONSULAR OFFICES

There are British Consular Offices at *Montevideo* and *Fray Bentos*.

**BRITISH COUNCIL.**—*Representative*, R. A. Martin, San José 1426, Montevideo. The Council supplies books to the:

ANGLO-URUGUAYAN CULTURAL INSTITUTE, San José 1426, Montevideo.

There are branch Institutes at Salto, Paysandú, Fray Bentos, Rivera, Las Piedras, Melo, Mercedes, Trinidad and Treinta y Tres.

BRITISH CHAMBER OF COMMERCE IN URUGUAY, Edificio Banco de Londres, Calle Cerrito, 420, Montevideo.

## U.S.S.R.

(Soyuz Sovetskikh Sotsialisticheskikh Respublik = Union of Soviet Socialist Republics)

## THE COMMUNIST PARTY OF THE SOVIET UNION

(K.P.S.S. = Kommunisticheskaya Partiya Sovetskogo Soyuza)

Constitutionally, the highest executive organ of the C.P.S.U. is its *Central Committee*, as elected by the *Party Congress*. The present *Central Committee* (elected at the XXIIIrd Party Congress in April, 1966) consists of 195 members; there are also 165 "candidates for membership" with a consultative voice and 79 members of the *Central Auditing Commission*. The real power in the Party is vested, however, in the *Politbureau* and the *Secretariat* of the *Central Committee*:

*Politbureau*, L. I. Brezhnev; A. P. Kirilenko; A. N. Kosygin; K. T. Mazurov; A. J. Pelše; N. V. Podgorny; D. S. Polyansky; A. N. Shelepin; P. Ye. Shelest; M. A. Suslov; G. I. Voronov (*full members*).  
*Yu. P. Andropov*; P. N. Demichev; V. V. Grishin; D. A. Kunayev; P. M. Masherov; V. P. Mzhavanadze; Sh. R. Rashidov; V. V. Scherbitsky; D. F. Ustinov (*candidates for membership*).

*Secretariat*, Leonid Ilyich Brezhnev (*General Secretary*) (since October 14, 1964); P. N. Demichev; I. V. Kapitonov; K. F. Katushev; A. P. Kirilenko; F. D. Kulakov; B. N. Ponomarev; M. S. Solomentshev; M. A. Suslov; D. F. Ustinov.

*Committee of Party Control*, A. J. Pelše (*Chairman*).  
*Komsomol* (*Young Communist League*), Ye. M. Tyazhelnikov (*1st Secretary*).

## GOVERNMENT OF THE U.S.S.R.

The *Presidium of the Supreme Soviet of the U.S.S.R.*

*Chairman* (=President of the U.S.S.R.), Nikolay Viktorovich Podgorny (*elected*, December 9, 1965).

*Secretary*, M. P. Georgadze.

The *Supreme Soviet* (=Parliament) consists of two chambers.

*Chairman* (=Speaker) of the *Council of the Union*, I. V. Spiridonov.

*Chairman* (=Speaker) of the *Council of Nationalities*, J. I. Paleckis.

The *Council of Ministers of the U.S.S.R.*

*Chairman* (=Prime Minister), Alexei Nikolayevich Kosygin (since October 14, 1964).

*1st Vice-Chairmen*, K. T. Mazurov; D. S. Polyansky.

*Vice-Chairmen*, N. K. Baybakov; V. E. Dymshits; V. A. Kirillin; M. A. Lesechko; I. T. Novikov; V. N. Novikov; L. V. Smirnov; N. A. Tikhonov; M. T. Yefremov.

*Ministries.*—There are three groups of departmental ministries, with a total of 70 ministers—25 All Union Ministries, i.e. federal ministries, 37 Union Republican Ministries (co-ordinating ministries of individual republics) and 14 Chairmen of State committees, etc., ranking 11 Ministers. The Prime Ministers of the 15 constituent republics belong to the Council *ex officio*.

EMBASSY OF THE U.S.S.R. IN LONDON  
 13 Kensington Palace Gardens, W.8.

[01-229-2666; 3628; 6412.]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Mikhail N. Smirnovsky (1966).

*Minister-Counsellor*, V. M. Vassev.

*Counsellors*, A. P. Chuev; I. D. Biryukov; N. I. Efimov; I. A. Gavva; B. D. Piadyshev; Y. N. Voronin; Y. F. Sepelev; B. G. Kolodyazhny; I. B. Puchkov; V. G. Filatov; V. V. Karyagin.

*1st Secretaries*, I. F. Kovalenko; G. V. Shevchenko; E. F. Rogov; I. A. Shishkin; N. A. Makarov;

I. P. Azarov; L. N. Sherstnev; Y. E. Chernetsov; L. A. Rogov; Y. I. Pavlov; Y. V. Skoptsov.

*Military Attaché*, Maj.-Gen. L. D. Nemtchenko.

*Naval Attaché*, Rear-Adm. B. D. Yashin.

*Air Attaché*, Col. V. P. Konobeev.

*Trade Representative*, Boris S. Gordeev.

*Deputy Trade Representatives*, G. I. Sakulin; K. D. Tikhomirov.

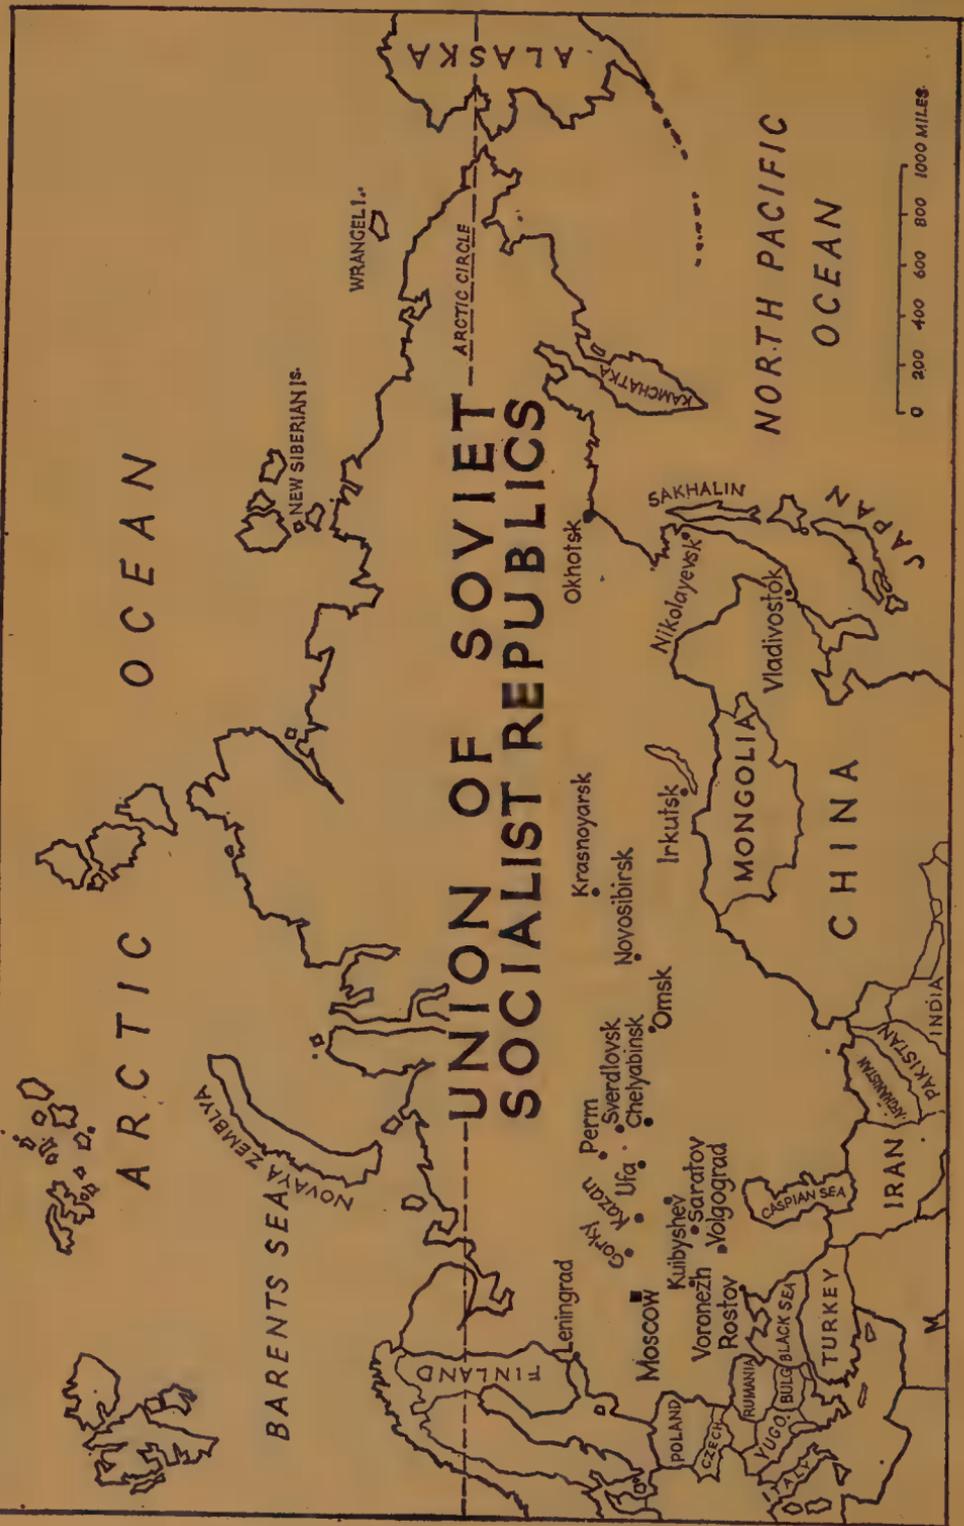

*Consulate*, 5 Kensington Palace Gardens, W.8.  
 [01-229-3215]

## AREA AND POPULATION

The U.S.S.R. is composed of 15 Union Republics (see below). Before the outbreak of the war of 1939-45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmen, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Rumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. ■ the 13th Soviet Republic, while a smaller part of *Bessarabia*, including the Danube estuary port of Iuzmal, and *Northern Bukovina*, also ceded by Rumania, became part of the Ukraine. The new Soviet-Rumanian frontier was confirmed by the 1947 Peace Treaty with Rumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel*

(Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939-45 a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* and, in 1961, the Autonomous Republic of *Tuva*, within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (*Karelian*) Republic within the R.S.F.S.R.

Area and population (estimate, January 1, 1968) of the constituent Republics of the U.S.S.R. with their capitals:—

Republic (Capital)	Sq. miles	Population
I. R.S.F.S.R.		
(Moscow) . . . . .	6,593,391	127,911,000
II. Ukraine (Kiev) . . . . .	232,046	46,381,000
III. Belorussia (Minsk) . . . . .	20,154	8,820,000
IV. Uzbekistan (Tashkent) . . . . .	158,069	11,266,000
V. Kazakhstan (Alma-Ata) . . . . .	1,064,092	12,678,000
VI. Georgia (Tbilisi) . . . . .	26,911	4,659,000
VII. Azerbaidjan (Baku) . . . . .	33,436	4,917,000
VIII. Lithuania (Vilnius) . . . . .	26,173	3,064,000
IX. Moldavia (Kishinev) . . . . .	13,012	3,484,000
X. Latvia (Riga) . . . . .	24,695	2,298,000
XI. Kirghizia (Frunze) . . . . .	76,642	2,836,000
XII. Tadjikistan (Dushanbe) . . . . .	54,019	2,736,000
XIII. Armenia (Erevan) . . . . .	11,306	2,306,000
XIV. Turkmenistan (Ashkhabad) . . . . .	188,417	2,029,000
XV. Estonia (Tallin) . . . . .	17,413	1,304,000
Total . . . . .	8,599,806	236,689,000

A striking demographic feature is the growing urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total, in 1967 it reached 55 per cent., owing to migration into towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 33 towns with over 500,000 (11 in 1939).

The proportion of women to men is 54.2 to 45.8 per cent. The birth-rate is 17.4, the mortality rate 7.6; the natural increase, 9.8 per 1,000.

More than three-quarters of the people were born after the 1917 Revolution.

#### Main Nationalities (1965 Estimate)

The most numerous nationality groups of U.S.S.R. are Russian, 122m. and Ukrainian, 40 m. There are between 5 and 9 million Belorussians, Uzbeks and Tartars respectively. Kazaks, Azerbaidjanis, Armenians and Georgians number between 3 and 5 million each group. There are some 2.5 million Lithuanians, Jews and Moldavians respectively. In each of the remaining nationality groups the population numbers between 1.05 and 1.8 million: Germans, Tadjiks, Chuvashes, Latvians, Poles, Mordovians, Turkmens, Kirghizians, Bashkirs and Estonians.

#### CONSTITUTION

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is

based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

The U.S.S.R. is a federal state, "formed on the basis of voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33-35). The *Supreme Soviet* which, as a rule, meets 4 to 5 times a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the *Supreme Soviet* (§ 70) and is accountable to it, or, in the intervals between the sessions, to its *Presidium* (§ 65).

The *Supreme Court* of the U.S.S.R. and the *Special Courts* of the U.S.S.R. are elected by the *Supreme Soviet* for a term of five years (§ 104). Similarly, the *Prosecutor-General*, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 123), is appointed by the *Supreme Soviet* for a term of 5 years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118-121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations

of the working people, both public and state." The new Party programme, adopted in November, 1961, envisages a great increase of the economic capacity of the country and promises the transition to "full Communism" some time after 1980.

A special committee was set up in November, 1961, to draft a new constitution, but has been in abeyance ever since.

**Local Government.**—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§ 94), elected by the working people of the respective administrative units for a term of two years (§ 95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§ 99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57-63 and 79-88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries and/or the *Gosplan*. The Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization or, rather, "de-concentration".

**Religion.**—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939-1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943, to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests, many churches, mosques and synagogues and several big monasteries were reopened.

The proselytizing successes of the religious communities have become of great concern to the authorities; there has been a great increase of anti-religious articles in the press since 1959, and a

number of religious institutions were once again closed or banned.

**Education.**—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists. *President, M. V. Keldysh.*

**Chronological System.**—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

### LANGUAGE, LITERATURE AND ARTS

**Language and Literature.**—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). The 20th century produced great poets like Alexander Blok (1880-1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890-1960), Vladimir Mayakovsky (1893-1930) and Anna Akhmatova (1888-1966). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekhov (1860-1904), Maxim Gorky (1868-1936) and Ivan Bunin (1870-1953).

Great names in music include Glinka (1804-1857), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikovsky (1840-1893), Rakhmaninov (1873-1943), Scriabin (1872-1915), Prokofiev (1891-1953), Stravinsky (b. 1882) and Shostakovich (b. 1906).

### FINANCE

A new, "heavy" Rouble was introduced on January 1, 1961. Prices and wages have been changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The official exchange rate is now £1 = R. 2.16. It bears little relation to the actual purchasing power of the two currencies. Banknotes in circulation are those valuing R. 1, 3, 4, 25, 50 and 100. There are also new coins valuing Kopecks 1, 2, 3, 5, 10, 20, and 50 and R. 1. Old Kopeck coins are also current at the same value as new ones.

### DEFENCE

No official returns concerning the services are made in the U.S.S.R. It may be said, however, that the general trend over the last years has con-

sisted in a growing emphasis on nuclear missiles and in a steady reduction of conventional arms.

The basic military service is two years in the Army and four years in the Air Force and the Navy. Defence Budget, 1967: 14,500m Roubles. This total represents the defence vote, and almost certainly does not include space research costs or the research and development budget for advanced weapons systems. At the official exchange rate, this figure would be approximately £6,700m. At a more realistic exchange rate, total Soviet military expenditure, including elements not in the official budget, is probably nearer the equivalent of £16,000m. ■ year.

The total size of the Soviet regular forces is now estimated to be about 3,150,000 men.

Operational ICBM's now total around 270, ■ increase of about 40 per cent. on the 1964 figure. The number of MRBM's and IRBM's launchers still appears to be between 700 and 750. The operational personnel of the Strategic Rocket Forces totals about 180,000.

The Air Forces comprise about 20,500 operational aircraft. The total strength of the Air Forces, excluding the Naval Air Force, is about 510,000 men. The total personnel of the separate Air Defence Command is estimated at 250,000 men.

The total size of the Soviet Army is estimated at 2,000,000 men. It is thought to be organized in 140 divisions, distributed ■ follows: 75 divisions in European U.S.S.R., 22 in Central U.S.S.R., 17 in the Far East, 26 in Eastern Europe.

The total strength of the Soviet Navy and Naval Air Force is 450,000 men. In total tonnage, it is the second largest navy in the world, and its main strength still lies in the submarine fleet. There are now 370 conventionally-powered and 40 nuclear-powered submarines. At least 40 can fire ballistic missiles and carry an average of three each. Over 300 are ocean-going.

There are no aircraft-carriers in the Soviet Navy. The land-based Naval Air Force comprises about 400 bombers and 400 other aircraft. The surface ships comprise 20 cruisers and 80 destroyers.

The security and border troops number some 230,000. There ■ also about 1½ million DOSAAF members who participate in such activities ■ shooting, athletics and parachuting.

Minister of Defence, Marshal A. A. Grechko.  
Chief of General Staff, Marshal M. V. Zakharov.  
Chief, Political Administration, Soviet Armed Forces, Army Gen. A. A. Yepishev.

On May 14, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European associates (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Rumania and Czechoslovakia) to serve ■ counter-poise to NATO. A unified military command was set up in Moscow (Secretary-General, N. P. Firiyubin; C.-in-C., Marshal I. I. Yakubovskiy).

#### Industry and Agriculture

One of the most remarkable aspects of Soviet economy has been the transformation of an essentially agricultural country into the second-strongest industrial power in the world. The 1967 output amounted to 74,800,000\* tons of pig-iron, 102,200,000\* tons of steel, 81,700,000\* tons of rolled metal, 595,000,000\* tons of coal, 288,000,000\* tons of crude oil, 84,800,000\* tons of cement, 589,000 million kW/h of electricity and 729,000 motor vehicles.

Agricultural development has been far slower, mainly owing to lack of incentives among peasants organized in *kolkhozy* (collective farms). Repeated

droughts, such as in 1965, were a contributing factor to ■ permanent shortage of grain. In the last few years, vast quantities of grain had to be imported from Canada, the U.S. and Australia. Stock breeding has also suffered from the general mismanagement of farming. The livestock in 1968 included 97,100,000 cattle, including 41,600,000 cows, and 143,900,000 sheep and goats. The level of productivity remains very low. It remains to be seen whether new incentives for peasants introduced in 1966 will bring about ■ radical change in the situation. Forests cover nearly 40 per cent. of the whole area of the Union and form ■ considerable source of wealth.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . . .	£63,250,000	£102,105,000
Exports to U.K. . . . .	123,459,000	158,073,000

#### COMMUNICATIONS

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia *via* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible ■ large-scale industrial exploitation of Kazakhstan, ■ number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Seven Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East ■ second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 239,000,000 tons of freight per year. They are supplemented by a system of canals which provide ■ through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don Canal* linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea

\* Metric.

of Azov in the South, was completed in May, 1952.

FLAG OF THE U.S.S.R.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY OF THE U.S.S.R.—November 7 (Commemorating the October Bolshevik Revolution of 1917).

#### BRITISH EMBASSY

(Naberezhnaya Morisa Toreza 14, Moscow)

Ambassador Extraordinary and Plenipotentiary, Sir (Archibald) Duncan Wilson, K.C.M.G. (1968)  
£8,600

Minister, P. C. F. Dalton, C.M.G.

Counsellors, N. E. Cox (Commercial); The Lord Bridges (Head of Chancery); Dr. E. A. Alexander (Scientific); F. Smitherman (Administration).

1st Secretaries, J. C. C. Bennett (Cultural); D. J. E. Ratford (Commercial); G. E. Clark; J. H. Symons; R. A. Longmire; L. E. Sturmer, M.B.E. (H.M. Consul); A. B. Williams; Dr. D. J. Sheehan (Medical Officer); H. Doynce-Ditmus.

2nd Secretaries, J. O. Kerr; B. H. Mason; G. D. G. Murrell; R. P. Joscelyne; H. B. Formstone (Commercial); W. B. Harris.

Defence and Air Attaché, Air Cdre. R. G. Dutton, C.B.E., D.S.O., D.F.C.

Asst. Air Attachés, Sqn. Ldr. L. E. Blackburn; Sqn.

Ldr. D. Higham; Sqn. Ldr. J. L. Blackford.

Military Attaché, Brig. H. G. Kember, O.B.E., M.C.

Asst. Military Attaché, Major J. V. H. Burke.

Naval Attaché, Capt. S. R. Sandford, R.N.

Asst. Naval Attachés, Lt. Cdr. G. R. B. Booth, R.N.;

Lt.-Cdr. A. L. Miller, R.N.

There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.

#### I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, M. A. Yasnov.

Chairman of the Council of Ministers, G. I. Voronov.

The R.S.F.S.R. has no Communist Party Central Committee of its own.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 56 per cent. of the total population. It consists of 16 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Dagestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Osetian, Tartar, Tuva, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Komsomolsk, Kuliyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Volodga, Vorenezh and Yaroslavl).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, ■ low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of ■ number of tablelands and ridges, and ■ southern mountainous part. Climatically, the R.S.F.S.R. extends over all zones, except the tropics, and may be divided into the following

belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.R.—the Bashkir and Tartar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Novokuznetsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuliyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Volgograd, Gorky, Saratov, Grozny, Rostov and Taganrog.

**CAPITAL, MOSCOW.** Population 6,567,000. Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital.  $\Psi$ Leningrad (before the First World War "St. Petersburg" and from 1914-1924 "Petrograd") has a population of 3,755,000.

Other towns with populations exceeding 500,000 are:—

Gorky (Nizhny-Novgorod).....	1,140,000
Novosibirsk (Novonikolayevsk).....	1,080,000
Kuibyshev (Samara).....	1,016,000
Sverdlovsk (Yekaterinburg).....	981,005
Chelyabinsk.....	851,000
Kazan.....	838,000
Perm (Molotov).....	811,000
Omsk.....	801,000
$\Psi$ Rostov-on-Don.....	774,000
Volgograd (Stalingrad; Tsaritsyn).....	757,000
Saratov.....	738,000
Ufa.....	724,000
Voronezh.....	668,000
Krasnoyarsk.....	592,000

$\Psi$  Seaport.

About 83 per cent. of the population are Russians.

## II.—UKRAINE

*First Secretary of the Party Central Committee, P. Ye. Shelest.*

*Chairman of the Presidium of the Supreme Soviet, A. P. Lyashko.*

*Chairman of the Council of Ministers, V. V. Shcherbitsky.*

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkassy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Donetsk, Ivano-Frankovsk, Kharkov, Kherson, Khmelnitsky, Kiev, Kirovograd, Lugansk, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Zaporozhye and Zhitomir.

*Physical Features.*—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

*Production and Industry.*—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1955, the Ukraine provided 37 per cent. of the total Soviet steel, 39 per cent. of metal goods and 32 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

**CAPITAL** (since 1934), Kiev, the oldest city in the U.S.S.R. founded in the 9th century A.D., was the capital of the Russian State from 865 to 1240. Population (1968), 1,457,000. Other towns with population over 500,000 are:—

Kharkov.....	1,148,000
Donetsk (Stalino; Yuzovka, i.e. Hughes-ovka).....	855,000
Dnepropetrovsk (Yekaterinoslav).....	837,000
$\Psi$ Odessa.....	797,000
Zaporozhye (Aleksandrovskaya).....	616,000
Lvov (Lviv; Lwow).....	524,000
Krivoy-Rog.....	523,000

## III.—BELORUSSIA

(White Russia)

*First Secretary of the Party Central Committee, P. M. Masherov.*

*Chairman of the Presidium of the Supreme Soviet, S. O. Pritytsky.*

*Chairman of the Council of Ministers, T. Ya. Kiselev.* The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

**CAPITAL, Minsk.** Population 805,000. Belorussians make up four-fifths of the population, with Russians and Poles coming next.

## IV.—UZBEKISTAN

*First Secretary of the Party Central Committee, Sh. R. Rashidov.*

*Chairman of the Presidium of the Supreme Soviet, Mrs. Ya. S. Nasriddinova.*

*Chairman of the Council of Ministers, R. Kurbanov.*

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 10 provinces (Andizhan, Bokhara, Ferghana, Kashkarda, Khorezm, Namangan, Samarkand, Surkhanda, Syr-Darya and Tashkent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khadag), coal (Angren) and sulphur (Shorsu).

The Uzbeks, a Turkic people, make up 62 per cent. of the population, the Russians (14 per cent.) and Tartars (five per cent.) come next.

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R., producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

**CAPITAL, Tashkent.** Population 1,295,000. Samarkand contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson, and a 15th-century observatory. Heavy damage was done to this ancient city by the series of severe earthquakes in April and May, 1966.

## V.—KAZAKHSTAN.

*First Secretary of the Party Central Committee,* D. A. Kunayev.

*Chairman of the Presidium of Supreme Soviet,* S. B. Niyazbekov.

*Chairman of the Council of Ministers,* M. Beysebayev. The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of the 14 Provinces: Aktyubinsk, Alma-Ata, Chimkent, Djambul, East-Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanay, Kzyl-Orda, Semipalatinsk, Taldy-Kurzan, Tselinograd and Uralsk.

Kazakhstan is a country of arid steppes and mise-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mountains, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the north and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 30 per cent. of its population. Russian settlers make up 43 per cent. and Ukrainians 8 per cent.

**CAPITAL,** Alma-Ata (formerly Verny). Population, 668,000. Karaganda, a major mining centre, has a population of 505,000.

## VI.—GEORGIA

*First Secretary of the Party Central Committee,* V. P. Mzhavanadze.

*Chairman of the Presidium of the Supreme Soviet,* G. S. Dzoteniidze.

*Chairman of the Council of Ministers,* G. D. Djavakhishvili.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjara) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are subtropical in their climatic character. The most important mineral deposits are manganese (Chiatury), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading in regards pro-

duction of manganese in the U.S.S.R. There are also many oil refineries. Viticulture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up 63 per cent. of the population, the remainder being composed of Armenians, Russians, Azerbaidjani and Ossetians.

**CAPITAL,** Tbilisi (Tiflis), population 867,000.

## VII.—AZERBAIDJAN

*First Secretary of the Party Central Committee,* V. Yu. Akhundov.

*Chairman of the Presidium of the Supreme Soviet,* M. A. Iskenderov.

*Chairman of the Council of Ministers,* E. N. Alikhanov.

The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shore of the Caspian Sea, and borders on Iran. It was formed in 1920. Between 1922 and 1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysk Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Aragva. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the second-largest oil-producing area in the U.S.S.R. A large power station on the Kura (Mingechaur) was completed in 1954. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up two-thirds of the population of the Republic, Armenians, about 12 per cent., and Russians, about 14 per cent.

**CAPITAL,** Baku. Population 1,218,000.

## VIII.—LITHUANIA

*First Secretary of the Party Central Committee,* A. J. Sniečkus.

*Chairman of the Presidium of the Supreme Soviet,* M. J. Šumauskas.

*Chairman of the Council of Ministers,* I. A. Maniūšis. Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941 until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 8.5 per cent. each.

**CAPITAL,** Vilnius (Vilna), restored to Lithuania by U.S.S.R. after the collapse and partition of Poland in 1939, and recaptured by Soviet forces in 1944). Population 329,000.

## IX.—MOLDAVIA

*First Secretary of the Party Central Committee,* I. L. Bodyul.

*Chairman of the Presidium of the Supreme Soviet,* K. F. Ilyashenko.

*Chairman of the Council of Ministers,* A. F. Diorditsa.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Rumania with the Pruth forming the frontier. In 1918, Rumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Rumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Rumanians from 1941 to 1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. Moldavians make up 65 per cent. of the population, with Ukrainians, and Russians next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population, 312,000.

#### X.—LATVIA

*First Secretary of the Party Central Committee, A. E. Voss.*

*Chairman of the Presidium of the Supreme Soviet, J. E. Kalnberzin.*

*Chairman of the Council of Ministers, V. P. Ruben.*

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

The Latvians make up 62 per cent. of the Republic's population, Russians 27 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940-41 and again after 1944.

CAPITAL, Riga. Population, 691,000.

#### XI.—KIRGHIZIA

*First Secretary of the Party Central Committee, T. U. Usabaliyev.*

*Chairman of the Presidium of the Supreme Soviet, T. Kulatov.*

*Chairman of the Council of Ministers, A. S. Suyumbayev.*

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, the Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936 a Union Republic. It contains one separate province (Osh). The Kirghiz Republic is a mountainous country, the major part being covered by the ridge of the Central Tien-Shan, while mountains of the Pamir-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alai,

Susamy, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. The Kirghiz now constitute only 41 per cent. of the population, the Russians, 30 per cent. The Uzbeks (in Eastern Ferghana) amount to 10 per cent.

CAPITAL, Frunze (formerly Pishpek). Population, 412,000.

#### XII.—TADJIKISTAN

*First Secretary of the Party Central Committee, D. Rasulov.*

*Chairman of the Presidium of the Supreme Soviet, M. Kholov.*

*Chairman of the Council of Ministers, A. Kakharov.*

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Lenina-bad Province.

The country is mountainous; in the east lie the Pamir highlands with the highest point in the U.S.S.R., Pik Kommunizmu (24,500 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syrdarya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fifty-three per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), about 23 per cent. Uzbeks, the rest Russians and Tartars.

CAPITAL, Dushanbe (formerly Stalinabad; Dyushambe). Population, 341,000.

#### XIII.—ARMENIA

*First Secretary of the Party Central Committee, A. E. Kochinyan.*

*Chairman of the Presidium of the Supreme Soviet, N. Kh. Arutyunyan.*

*Chairman of the Council of Ministers, B. A. Muradyan.*

The Armenian S.S.R. occupies the south-western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is Mount Ararat (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population, 687,000.

## XIV.—TURKMENISTAN

*First Secretary of the Party Central Committee, B. Ovezov*

*Chairman of the Presidium of the Supreme Soviet, A. Klychev.*

*Chairman of the Council of Ministers, M. Gapurov.*

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains three Provinces (Chardjou, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up 61 per cent. of the population, with Russians coming second, and Uzbeks, third.

**CAPITAL,** Ashkhabad (formerly Askhabad, Poltoratsk). Population, 244,000.

## XV.—ESTONIA

*First Secretary of the Party Central Committee, I. G. Käbin.*

*Chairman of the Presidium of the Supreme Soviet, A. A. Müürisepp.*

*Chairman of the Council of Ministers, W. J. Klauson.*

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941 and 1944, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, wood-working, etc.

The population consists of Estonians (73 per cent.) and Russians (22 per cent.).

**CAPITAL,** Tallinn (formerly Reval). Population, 346,000.

## THE VATICAN CITY STATE

(Stato della Città del Vaticano)

*Sovereign Pontiff, His Holiness Pope Paul VI (Giovanni Battista Montini), born at Concesio (Brescia), Sept. 26, 1897, elected Pope (in succession to John XXIII), June 21, 1963.*

*Secretary of State, Cardinal Jean Marie Villot, appointed April 30, 1969.*

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX (1846-1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became

part of unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City in 1969 was 1000.

## BRITISH LEGATION

(91 Via Condotti, Rome)

*Envoy Extraordinary and Minister Plenipotentiary to the Holy See, His Excellency Sir Michael Sanigear Williams, K.C.M.G. (1965)..... £5,625*

*1st Secretary, J. A. Snellgrove.*

*Attaché, Maj. H. J. D. Utley, M.V.O., M.B.E.*

*Archivist, Miss A. Y. Thomas, M.B.E.*

## VENEZUELA

(La Republica de Venezuela)

*President, Dr. Rafael Caldera Rodriguez, elected Dec. 1, 1968, assumed office March 11, 1969.*

## VENEZUELAN EMBASSY IN LONDON

3 Hans Crescent, S.W.1.

[01-584-4206]

*Ambassador (vacant).*

*Chargé d'Affaires, Señor Dr. Alejandro Tinoco.*

*Minister-Counsellor, Señor Dr. Humberto A. Rincón (Petroleum Affairs).*

*1st Secretary, Señorita Esther Meneses.*

*3rd Secretary, Señor Lic. Rafael Grimán.*

*Counsellor (Economic), Señor Lic. Gilberto Carrasquero.*

*Air Attaché, Col. Federico Schael.*

*Military Attaché, Col. Pedro J. T. Marquez.*

*Asst. Naval Attaché, Cdr. Jaime Heli Pirela-Luengo.*

*Asst. Air Attaché, Maj. Maximiliano Hernández.*

*Special Attaché, Señora Miriam Blanco-Fombona de Hood.*

*Consulate-General: 71A Park Mansions, S.W.1.*

*Minister-Counsellor, Señor Dr. Manuel Villanueva (Consul).*

There is also a Consulate-General at Liverpool.

**Area and Population.**—A South American Republic, situated approximately between 12° 40' S. lat. and 12° 26' N. lat. and 59° 52'-73° 15' W. long. It consists of one Federal District, 20 states and 11 territories. Venezuela has a total area of 352,150 square miles and a population (estimated, 1968) of 9,859,174, increasing annually at a rate of 33.7 per 1,000.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by Guyana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nuevi Esparta*. *Margarita* has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of *Patos* (170 acres) about 11 miles from the mainland.

**Physical Features.**—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by

the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,532 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincoate and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guyana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Rísquez, claimed to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 25' W. long., 2° 18' N. lat., and about 1,100 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 40 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream), which with the adjacent town of San Felix is now officially known as Ciudad Guayana. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. A British scientific expedition travelled in April-May, 1968, by Hovercraft from Manaus in Brazil *viá* the Rio Negro, Casiquiare canal and

Orinoco River to Trinidad. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area of 8,296 square miles, is the largest lake in South America. Other lakes are Zulía (290 square miles), south-west of Maracaibo, and Valencia (216 square miles) about 1,400 ft. above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler season from November to March.

**Government.**—On January 23, 1958, the military dictatorship of Colonel Marcos Pérez Jiménez, which had lasted since 1953 and covered a period of remarkable economic expansion due to the Venezuelan oil boom, was overthrown by a popular and military uprising. Since 1958 Venezuela has had a freely-elected democratic government. In elections in December, 1958, *Acción Democrática* (A.D.) gained a clear majority and Sr. Rómulo Betancourt of A.D. was elected President. For most of his five-year term of office Sr. Betancourt governed in coalition with the Christian Socialist Party, *Copei*. Further national elections were held on December 1, 1963, in which A.D. retained a reduced majority. Dr. Raúl Leoni of A.D. was elected President. The inauguration of the new Government took place on March 11, 1964. Formation of a broad-based coalition government composed of A.D., U.R.D. (*Unión Republicana Democrática*) and F.N.D. (*Frente Nacional Democrático*) was announced on Nov. 5, 1964. The F.N.D. left the Government in 1965 and U.R.D. in April, 1968. A general election held in Dec., 1968, was narrowly won by *Copei* and Dr. Rafael Caldera assumed the Presidency in March, 1969.

**Language and Literature.**—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 29 daily newspapers in Venezuela, of which 9 are published in Caracas, 75 weeklies and 23 fortnightlies. There are also 233 other periodicals, mostly monthlies, but including also some appearing once, twice or three times a week.

**Education** is free and primary education compulsory from the age of 7 years. There are eight universities in Venezuela, three in Caracas and the others in Maracaibo, Mérida, Valencia, Ciudad Bolívar and Barquisimeto.

**Production and Industry.**—The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal and tobacco. Although there is an extensive beef and dairy farming industry, the country does not produce all the grain and other food products it requires.

The principal industry is that of *Petroleum*. Daily production of the oilfields had reached a level of 3,604,800 barrels (42 gallons) by 1968. Before the war of 1939-45 over 80 per cent. of the crude oil was exported to Netherlands West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Both companies are investing heavily in desulphuri-

zation plant to satisfy anti-pollution measures in Eastern U.S.A., whither most of their product goes in the form of fuel oil. Other refineries are being operated at Caripitó, San Lorenzo, Puerto La Cruz, Tucupitó, El Chaure and El Palito. The Venezuelan Government receives about 65 per cent. of the profits of local oil companies. As a result of income tax increases decreed in December, 1958, this percentage was raised to over 70 per cent.

Rich iron ore deposits in Eastern Venezuela are being developed and production was 14,231,000 metric tons in 1968 (11 months to Nov.). Secondary processes for pelletizing and briquetting ore for export have been installed. The government-owned steel mill at Las Matanzas in the Guayana region is now in production. It uses local iron ore and obtains its electric power from hydro-electric installations on the Caroni River. It produces seamless steel tubes, billets and wire. The production of many more steel products is planned over the next four years. A mill for the production of cast iron pipe is under construction.

Other industries include petrochemicals, gold, diamonds and asbestos; textiles and clothing; plastics; manufacture of paper, cement, glass and plate glass; beer and other alcoholic beverages; tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly; preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing, sanitary ware, electric home appliances, pumps, aluminium products, toys, agricultural machinery, bicycles, electronic components, cosmetics and many others.

**Communications.**—There are about 22,500 miles of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 372 kilometres. Road and river communications have made railway development of negligible importance in Venezuela except for carrying iron-ore in the south-east. Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with the United States, Central America, South America, the West Indies and Europe. The Venezuelan state-owned merchant fleet runs 12 ships with a total deadweight tonnage of 68,865 and 2 other ships are at present being built in Europe of 11,900 tons each. C.A.V.N. also hired in 1968 a total tonnage of 170,862. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled and 97 commercial broadcasting stations. There are five television stations in Venezuela (four in Caracas and one in Valencia). The two Caracas commercial television stations have relay transmitters in the interior of the country.

#### FINANCE

	1967	1968†
	(in millions of Bs.)	
Revenue.....	8,679	8,843
Expenditure.....	8,754	8,986

† Revised estimates

**Currency.**—The unit of currency is the gold *Bolívar* of 100 *centimos*. The selling rate for foreign exchange for all purposes is Bs. 4.50 = U.S. \$1. The rates for other currencies fluctuate according to their quotations against the U.S. dollar. Importers of wheat and dried powdered milk can obtain a subsidy of Bs. 1.15 per U.S.

dollar. There are special buying rates for the proceeds of petroleum, iron ore, coffee and cocoa exports.

	TRADE	
	1966	1967
Imports.....	Bs.5,243,800,000	Bs.5,786,990,719
Exports.....	12,875,200,000	13,697,059,618

The principal imports are machinery, foodstuffs, durable and non-durable consumer goods, iron, steel and chemicals. The principal exports are petroleum and petroleum products, iron ore, coffee and cocoa. The value of sales of iron ore in 1967 and 1968 was Bs.535,200,000 and 466,400,000 respectively.

#### Trade with U.K.

	1967	1968
Imports from U.K. .	£21,372,000	£32,359,000
Exports to U.K. ....	68,290,000	73,166,000

**CAPITAL.**—Caracas (3,000 ft.). Population, 1968, 2,064,000. Other principal towns are Maracaibo (500,000), Barquisimeto (300,000), Valencia (300,000), Maracay (200,000), San Cristobal (150,000), Cumaná (120,000) and Ciudad Bolívar (100,000).

**FLAG.**—Three horizontal bands, yellow, blue, red (with seven white stars on blue band and crest next staff on yellow band). **NATIONAL DAY.**—July 5.

#### VIETNAM

##### SOUTHERN ZONE

*President*, Nguyen van Thieu, appointed June 19, 1965; re-elected Sept. 3, 1967.  
*Vice-President*, Air Vice Marshal Nguyen-cao-Ky.  
*Prime Minister*, Gen. Tran Thiem Khiem.

#### VIETNAM EMBASSY AND CONSULATE

12 Victoria Road, W.8  
 (01-937-3765)  
*Ambassador Extraordinary and Plenipotentiary*, His Excellency Le-Ngoc-Chan (1967).  
*Defence Attaché*, Lt.-Col. Nguyen Quoc Tuan.  
*Counsellors*, Than Trong Nghia (Cultural and Consular); Diep Quan Hong (Information and Press).  
*1st Secretary*, Phan Trong Quy (Press and Information).  
*and Secretary*, Miss Ngo Thi Lien Hoa (Cultural and Consular); Do Thieu Liet (Protocol).  
*Attachés*, Nguyen Xuan Khang; Nguyen Van Tri.

The Southern Zone has an area of 66,281 sq. miles. Its population was estimated in 1968 at 16,500,000. Rice and rubber are the chief products. Trade in 1968 (excluding trade financed or assisted under American aid programmes) was: Imports £158,600,000; Exports £9,160,000.

#### Trade with U.K.

	1967	1968
Imports from U.K. . . .	£3,916,000	£3,609,000
Exports to U.K. . . . .	1,038,000	794,000

Following the devaluation of sterling in 1967 exchange rates for the *piastre* were: Official rate VN \$192 = £1 and free market rate VN \$283 = £1. The free market rate is used for most transactions, including import and export business.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo Dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October

26, and his first act was to declare South Vietnam a Republic of which he became the President. An elected constituent assembly became the first Legislative Assembly of the Republic of Vietnam on Oct. 26, 1956. A new national assembly was elected on August 31, 1963, President Diem having been re-elected for a second term of 5 years in April, 1961. On November 1, 1963, the Government of President Diem was overthrown by a military *coup d'état* during which the President was killed. General Duong-Van-Minh assumed power as Chairman of the Military Revolutionary Council and Head of State, but the former position was wrested from him on January 30 by General Nguyen-Khanh who assumed the function of Prime Minister and on Aug. 17 the Presidency.

The Military Revolutionary Council was dissolved on August 27, to be followed by the Provisional Steering Committee led by three Army generals. This Committee in turn dissolved on

October 26 and on November 4 Tran van Huong became Prime Minister and Phan Khac Suu Head of State.

On December 18, the Armed Forces Council was created under General Khanh and became the real power. On December 20, the A.F.C. dissolved the High National Council and on Jan. 27, 1965, Huong was forced to resign under pressure from the A.F.C. and the Buddhists. On February 16, the A.F.C. nominated Phan Huy Quat as Prime Minister. Then on February 22 General Khanh himself was overthrown by a *coup d'état* and, under the temporary leadership of General Nguyen van Thieu, the A.F.C. lasted only until May 5 before dissolving itself and handing back control of the country to the civilian government under Mr. Quat. The latter, with the Head of State (Mr. Suu) resigned under pressure on June 12 and on June 19, full power reverted to the armed forces in the form of a National Leadership Committee led by General Thieu. Elections to a constituent assembly were held on Sept. 11, 1966, and a new democratic constitution was promulgated on April 1, 1967. Presidential elections were held on Sept. 3, 1967.

At his presidential inauguration on October 30, 1967, President Nguyen Van Thieu proclaimed the Second Republic of Vietnam. Mr. Tran Van Huong, Prime Minister since May 25, 1968, was succeeded in office by Gen. Tran Thiem Khiem on Sept. 1, 1969. The Government of the Republic of Vietnam in Saigon is recognized by the United Kingdom, the United States and other members of the United Nations as the legal government of Vietnam.

CAPITAL.— $\Psi$  Saigon, population (1968), 2,500,000, of which 25,000 were thought to be foreigners. Other principal towns are  $\Psi$  Danang (500,000) and Hué (150,000). Saigon and Danang are the main ports.

NATIONAL DAY.—November 1.

#### BRITISH EMBASSY

Saigon

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John Oscar Moreton, C.M.G., M.C. (1969) ..... £5,625  
*Defence Attaché*, Col. B. J. Coombe, G.M.

#### NORTHERN ZONE

*President*, Ton Duc Thang.

*Prime Minister*, Pham Van Dong (1955).

*Minister of Foreign Affairs*, Nguyen duy Trinh.

VIETNAMESE WORKERS' (= Communist) PARTY

*Chairman*, Le Duan.

*Politbureau of the Central Committee*, Hoang Van Hoan; Le Duc Tho; Hoang Quoc Viet; Le Duan; Le Thanh Nghi; Nguyen Chi Thanh; Nguyen Duy Trinh; Pham Hung; Pham Van Dong; Truong Chinh; Vo Nguyen Giap (*full members*); Tran Quoc Hoan; Van Tien Dung (*alternate members*).

*Secretariat of the Central Committee*, Le Duan (1st); Hoang Anh; Le Duc Tho; Nguyen Van Tran; To Huu; Le Van Luong; Pham Hung.

The Northern Zone (north of the 17th parallel) has an area of approximately 63,000 sq. miles and a population of 19,500,000 (1966). The capital is Hanoi (800,000) and the chief port is  $\Psi$  Haiphong (367,000). The chief crop is rice, of which the production in 1961 was claimed to be 4,600,000 tons. No figures have been given since. The chief industrial products are coal and cement. The production of apatite (phosphate) is increasing, and with Chinese and Soviet aid some new factories have been built to produce consumer goods.

The régime in the north styles itself the Government of the Democratic Republic of Vietnam.

Power is wielded by the *Lao Dong* (or Workers') Party which is Communist in character, and which can exert its influence through another mass organization known as the Fatherland Front (which some years ago superseded the "Vietminh"). The policy of the northern régime is to work for unification of north and south, whilst in the meantime it strives to remould the political and economic life of the north on Communist lines. A five-year plan started in 1961. Elections to the "Second National Assembly" were held in the north in April 1964. The régime has diplomatic relations with the U.S.S.R., China and other states of the Sino-Soviet bloc, but very few other countries recognize it.

There is a British Consulate General at Hanoi.

## THE YEMEN

*Council of the Presidency*, Qadi Abdul Rahman al-Iriani; Ahmad Muhammad Noman; Muhammad Ali Othman.

*Prime Minister*, Gen. Hassan al-Amri.

#### YEMENI LEGATION

41 South Street, W.1  
[01-499-5246]

*Minister* (vacant).

*Counsellor* (*Chargé d'Affaires*), Assayed Abdul Wahab Al-Shamy.

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 5,000,000 (1960). It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range, form the most fertile part of Arabia, with an abundant and regular rainfall.

*Trade*.—The main exports are coffee, cotton, oil-grains, salt, hides, and raisins. Trade agreements have been concluded with a number of countries. Aden is an important centre for Yemeni exports and imports. The chief port of the Yemen is  $\Psi$  Hodeida (Ahmedia) which now has deep water quays, able to accommodate ocean going vessels.

The ruins of Marib, the ancient Sabæan capital and its dam are in the Yemen.

*Recent History*.—The death of the ruler of the Yemen, Imam Ahmed, on September 19, 1962, was followed by an armed insurrection in Sana'a. His successor, Imam Mohammed, escaped assassination and gathered considerable Royalist support in the country.

A republican government was formed by Col. Abdullah Sallal at Sana'a on September 28, 1962, and a royalist government-in-exile by Prince Hassan, uncle of the Imam, at Jeddah, Saudi Arabia. The royalist party has since received the support of Saudi Arabia and Jordan, while the republican government was supported by the United Arab Republic, whose air and ground forces in the Yemen were reported to have reached a total strength of 70,000 by 1965.

Inconclusive conferences among the parties concerned were held at Khamer, near Sana'a, at Jeddah and at Harad, on November 23, 1965, when a royalist party sent a delegation led by Ahmed al Shami, its Foreign Minister. The Harad Conference ended, without reaching agreement, on December 24, 1965, and later talks were held between Egyptian, Saudi Arabian and Yemeni leaders.

With the withdrawal of U.A.R. forces from the country well advanced, the President was deposed on Nov. 5, 1967, and a 3-member Presidency

Council took power with the backing of the Yemen Army (see above).

**CAPITAL.**—Taiz (pop. about 20,000); Sana'a has about 60,000 inhabitants. Other cities of the Yemen are  $\Psi$  Hodeida, Ibb, Mocha and Beidha.

**FLAG.**—Horizontal bands of red, white and black, with 5-point green star in centre of white band. (Adopted Dec., 1962).

## YUGOSLAVIA

(Socijalistička Federativna Republika Jugoslavija)

*President of the Republic, President of the League of Communists of Yugoslavia, Chairman of the National Defence Council and Supreme Commander of the Armed Forces, Josip Broz Tito, assumed office, Jan. 14, 1953, re-elected for 4 years, 1954, 1958, 1963 and May 17, 1967.*

*President of the Federal Assembly, Milentije Popović. President of the Federal Executive Council, Mitja Ribičić.*

*Attaché, Bozidar Gicev.*

*Consulate, 19 Upper Phillimore Gardens, W.8.*

**Area and Population.**—Yugoslavia is a Federation comprising the Socialist Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina and Macedonia. Serbia includes the Socialist Autonomous Provinces of the Vojvodina and Kosovo. In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria) Piran (Pirano) and Novi Grad (Cittanuova). The area has now been divided between the Republics of Slovenia and Croatia. The area of Yugoslavia is estimated at 255,804 square kilometres (98,725 square miles) and the population in 1968 at 20,186,000. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

**Government.**—On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

On April 7, 1963, a new Constitution was proclaimed under which the official name of the country was changed to "The Socialist Federal Republic of Yugoslavia." The existing two Councils of the Federal Assembly were replaced by five Chambers of 120 members each (Federal Chamber, Economic Chamber, Educational-Cultural Chamber, Social Welfare and Health Chamber, and Organizational/Political Chamber), plus a Chamber of Nationalities of 70 members. A Constitutional Court was created. Elections to the new Federal Assembly were held in 1963 and in April, 1967.

In 1969 the Federal Assembly was reconstructed by the abolition of the Federal and Organizational/Political Chambers and the addition of one new

chamber, the Social/Political. All Chambers continued to have 120 members each except the Chamber of Nationalities which doubled its size to 140. Elections to this Assembly were held in April, 1969.

**Defence.**—The Army, Navy and Air Force on a peace footing consist of 289,000 officers and men.

**Religion and Education.**—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. The 1953 Census revealed that 2,127,875 of the population were without religion, 6,984,686 were Orthodox, 5,370,760 Catholic, 157,702 Protestant, 61,274 other Christians, 2,090,380 Moslem, 2,565 Jews, 495 other non-Christians, 10,096 undecided and 130,740 unknown. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1968 there were 14,067 elementary schools with 109,814 teachers and 2,893,624 pupils and 2,864 secondary schools (including adult and special schools) with 33,638 teachers and 737,210 pupils. In addition, in the 1968-69 academic year there were 13 art academies with 483 teachers and 2,078 pupils, 12 high schools with 648 teachers and 5,778 pupils, and 133 higher schools with 3,986 teachers and 89,562 pupils. There are seven universities: Belgrade, Zagreb, Ljubljana, Sarajevo, Skopje, Novi Sad and Niš, with 97 faculties, 15,675 teachers and 109,751 students.

**Language and Literature.**—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South-Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Rumanian, Albanian, Italian, Slovak and Ruthenian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 4 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana (Laibach), 2 Croat dailies in Zagreb, 1 dailies in Novi Sad, one in Hungarian, 1 dailies in Rijeka, one in Italian and daily papers at Skopje, Sarajevo, Priština, Split, Maribor and Osijek.

**Production and Industry.**—About 50 per cent. of the population is engaged in agriculture, although in recent years industry has expanded rapidly and industrial production has grown sevenfold since 1939. Recent emphasis has been on the integration of small industrial enterprises into more efficient complexes. In agriculture the main emphasis is on increased investment in mechanization and fertilizers in the large socially-owned agricultural combines but now the private sector is being encouraged to mechanize and become more efficient and small size tractors, farm machinery and implements are being supplied.

The main crops are wheat and maize, of which the yields in 1968 were 4,360,000 and 6,770,000 tons respectively. The forest areas produced 17,065,000 cubic metres of timber in 1967. According to Yugoslav official estimates, the livestock population at the beginning of 1968 was approximately as follows: cattle, 5,693,000; sheep, 10,346,000; pigs 5,866,000; poultry, 35,974,000. Minerals are an important source of wealth, particularly in the central and south-eastern regions. Estimated produc-

tion in 1968 included the following ('000 tons): Hard coal 835; brown coal 9,508; lignite 16,389; electrolytic copper 70; refined lead 95; iron ore, 2,720; pig iron 1,201; steel (total) 1,997; aluminium 48; zinc 79; mercury 510 and crude petroleum 2,494.

**Communications.**—In 1967 there were approximately 8,513 miles of standard and narrow gauge railway and approximately 49,007 miles of roads of widely varying quality. There were also 506,000 telephones in use in the country. The principal ports on the long Adriatic seaboard of Yugoslavia are Rijeka, Šibenik, Split, Zadar, Ploče, Dubrovnik, Bar, Kotor (Carraro) and Koper. A new port is still under construction at Bakar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

#### FINANCE

	1967	1968
	'000 Dinars	
Revenue.....	9,785,000	10,828,000
Expenditure.....	9,683,440	10,393,000

Since Nov. 21, 1967, the rate of exchange has been 30 dinars = £1 (see also p. 84).

#### Trade with U.K.

	1967	1968
Imports from U.K.....	£22,877,000	£24,479,000
Exports to U.K.....	15,670,000	23,436,000

The chief exports to the United Kingdom are meat and meat products, furniture and timber. The main imports from the United Kingdom are machinery of all kinds, iron and steel, chemicals, wool tops and metal manufactures.

**CAPITAL.**—Belgrade, population (Greater Belgrade, 1965) 963,000. Other towns are Zagreb (Greater 869,000); Skopje (228,000); Ljubljana (182,000); Sarajevo (227,000); Novi Sad (126,000); Maribor (94,000); Ψ Split (114,000); Ψ Rijeka (116,000).

**FLAG.**—Five-point red star outlined by narrow yellow stripe, on a ground of three horizontal bars, blue, white and red. **NATIONAL DAY.**—November 29.

#### BRITISH EMBASSY

Generala Ždanova 46, Belgrade.

**Ambassador Extraordinary and Plenipotentiary.** His Excellency Sir Terence Willcocks Garvey, K.C.M.G. (1968)..... £6,300

**Counsellors.** A. J. Wilton, C.M.G., M.C.; J. A. Molyneux (Economic and Commercial).

**Defence Attaché.** Col. C. M. Moir, O.B.E.

**Naval and Air Attaché.** Wing-Cdr. M. F. J. Matthews, A.F.C.

**1st Secretaries.** K. H. M. Duke; T. J. Clark; (Information); D. M. Harrison (Consular); H. M. Shone (Visa); R. Burns (Labour) (resident at Athens); D. K. Urquhart (Commercial).

**3rd Secretaries.** P. R. Bull (Commercial); D. T. Healy; W. J. Robertson; A. Morgan and J. Easton (Consular).

**Attachés.** K. Goodwin; B. P. Pullen.

#### BRITISH CONSULAR OFFICES

There are British Consular Offices at Belgrade, Zagreb and Split.

**British Council Representative.** M. R. Snodin, O.B.E., Generala Ždanova 34, Belgrade. There is also a centre at Zagreb.

#### PASSPORT REGULATIONS

Applications for United Kingdom passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Employment Exchange (in Northern Ireland any local office of the Ministry of Health and Social

Services). Applications for passports required in less than ten days should not be taken to such local offices.

**London.**—Clive House, Petty France, S.W.1.

**Liverpool.**—India Buildings, Water Street, Liverpool, a.

**Newport, Mon.**—Olympia House, Dock Street.

**Peterborough.**—Passport Office, Westwood, Peterborough.

**Glasgow.**—1st Floor, Empire House, 131 West Nile Street, Glasgow, C.1.

**Hours.** The above offices are open Mon-Fri, 9 a.m. to 4.30 p.m. The Passport Offices are also open for cases of special emergency only, between 4.30 p.m. and 5.30 p.m. (6.30 p.m. in London); Saturdays 10.00-12.00, and in London on Sundays and Public Holidays between 10 a.m. and noon (except Christmas Day).

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Employment Exchanges, completed forms of application should be sent to one of the five Passport Offices, with photographs, supporting documents and the fee of £2. Remittances sent with postal applications should be in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office. Notes or postage stamps should not be sent in payment.

Persons resident in Northern Ireland may apply in person to the Foreign and Commonwealth Office Passport Agency, 1st Flr., Marlborough House, 30 Victoria Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make applications to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

A Passport cannot be issued or renewed by the Foreign and Commonwealth Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest British Passport issuing authority.

United Kingdom Passports are granted:—

- (i) To citizens of the United Kingdom and Colonies.
- (ii) To British subjects without citizenship.
- (iii) To British Protected Persons.

Passports are available for ten years unless otherwise stated. They are not available beyond ten years from the original date of issue. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the holder's wife is not available for the wife's use when she is travelling alone. A wife's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. Their applications must be signed by one of their parents.

The application must be countersigned by a Member of Parliament, Justice of the Peace, Minister of Religion, Doctor, Lawyer, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by one of the parents in form (B).

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are generally available for travel to all countries. The possession of a Passport does not, however, exempt the holder from compliance with any Immigration Regulations in force in British or foreign countries, or from the necessity of obtaining a visa where required.

#### PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on thin paper and must not be glazed on the reverse side. They should measure not more than 2½ in. by 2 in. or less than 2 in. by 1½ in., and should be taken full face without hat.

#### RENEWAL OF PASSPORTS

Applications for the renewal of United Kingdom passports must be made on Form D.

#### British Visitors' Passports

A simplified form of travel document is available for British subjects\* (Citizens of the United Kingdom and Colonies) wishing to pay short visits (not exceeding three months) to certain foreign countries, viz.

ANDORRA; AUSTRIA; BELGIUM; DENMARK†; FINLAND; FRANCE (incl. CORSICA); GREECE (& THE GREEK ISLANDS); W. GERMANY (incl. West Berlin by air only); ICELAND; ITALY; LIECHTENSTEIN; LUXEMBURG; MONACO; NETHERLANDS; NORWAY†; PORTUGAL (incl. MADEIRA & AZORES); SAN MARINO; SPAIN (incl. BALEARIC & CANARY ISLANDS); SWEDEN†; SWITZERLAND; TURKEY.

\*Length of stay restricted to three months in any nine months in Nordic Group Countries (including Finland and Iceland) or whole. Holders may also pay short visits to Canada, Gibraltar and Malta. A British Visitor's Passport must be valid for three months beyond the last day on which the visitor will be in Canada.

A fee of 7s. 6d. is charged for the issue of a British Visitors' Passport, which is valid for 12 months, cannot be amended and is not renewable; on expiry application should be made for a new passport if required. Particulars of an applicant's wife and/or children under 16 years can be included at the time of issue only at no extra cost. A child of 8 years of age and over is eligible to hold a British Visitors' Passport. Applications for, or including, a person under 21 years of age (unless married or serving in H.M. Forces) must be countersigned by the legal guardian.

British Visitors' Passports are obtainable by application on Form VP (from any Employment Exchange). Applicants in England, Scotland and Wales should take the completed form in person to any Employment Exchange which will normally issue the passport without further delay; applicants in Northern Ireland to any local office of the Ministry of Health and Social Services. British Visitors' Passports are not obtainable from the Passport Offices. Two recent passport photographs will be required of the applicant and of his wife, if to be included; photographs of children are not required. Size of photographs must be 1 in. x 1½ in. (see also PHOTOGRAPHS above). No visas are required on British Visitors' Passports.

Applicants must also produce for the purpose of identification a N.H.S. Medical Card, birth certificate or retirement pension book.

\*See Legal Notes.

## EUROPEAN COMMUNITY

The ECSC, Common Market and Euratom share a single institutional framework: a Commission, Council of Ministers, Parliament and Court of Justice. The core of the Community policy-making process is the 'dialogue' between the Commission, which initiates and implements policy, and the Council of Ministers, which takes major policy decisions. The beginnings of democratic control are exercised by the European Parliament, while the Court of Justice ensures the rule of law and is the final arbiter in all matters arising from the Community Treaties.

Since the start of the Common Market and Euratom in 1958, the Parliament and Court of Justice have been common to all three Communities. Up to July, 1967, each Community had its own executive body (the EEC and Euratom Commissions, and the ECSC High Authority) and its own Council of Ministers.

In April, 1965, the Six signed a treaty providing for the merger of the three executive bodies in a single Commission and the three Councils in a single Council, with a view to the eventual merger of the three Communities themselves. The merger treaty came into force on July 1, 1967; the single Commission and single Council then took office. They enjoy the same powers under the three Community Treaties as did their predecessors.

## The Commission

The Commission consists of 14 members—three each from Germany, France and Italy, two from the Netherlands and Belgium, and one from Luxemburg. Within three years of the July, 1967, merger their number is to be reduced to nine. The members of the Commission are appointed by agreement among the six member governments for a four-year renewable term; the president and vice-presidents are appointed from among the members for a two-year term, also renewable.

The members of the Commission are pledged to independence of the governments and of national or other particular interests. They accept joint responsibility for their decisions, which are taken by majority vote.

In addition to being the initiator of Community action and having specific powers, the Commission acts as a mediator between the member governments in Community affairs and is the guardian of the Community Treaties.

## Commission of the European Communities

23-27 Avenue de la Joyeuse Entrée, Brussels 4.

President, Jean Rey (Belgium).

Vice-Presidents, S. Mansholt (Netherlands); L. Levi Sandri (Italy); F. Hellwig (Germany); R. Barre (France);

Members, A. Coppé (Belgium); G. Colonna di Palliano (Italy); H. von der Groeben (Germany); H. Rochereau (France); E. Sassen (Netherlands); V. Bodson (Luxemburg); J.-F. Deniau (France); W. Haferkamp (Germany); E. Martino (Italy).

The Commission maintains information offices in London (23 Chesham Street, S.W. 1), Washington (808 Farragut Building, 900 17th Street, N.W., D.C. 20006), New York (2207 Commerce Building, 155 East 44th Street, N.Y. 10017) and in other cities.

## The Council of Ministers

2 Rue Ravenstein, Brussels 1.

This consists of ministers from each member government, the ministers concerned depending on the subject under discussion. It is the Community's main decision-taking body but its authority is not as great in ECSC matters as in those relating to the Common Market and Euratom.

The powers of the Commission are proportionately greater under the ECSC Treaty. For coal and steel, decisions are usually by majority vote; on Common Market and Euratom matters decisions usually had to be unanimous in the early stages, but most decisions can now be taken by a qualified majority vote. For certain vital questions, however, unanimity is still required. (Admission of new members is not decided by the Council, but by a unanimous decision of the member governments.) Although the Council is the Community's ultimate decision-taking body, in almost all cases it can act only on the basis of proposals submitted by the Commission. The meetings of the Council are prepared by a committee of permanent representatives of the member states.

## European Parliament

Secretariat: Centre Européen, Kirchberg, Luxemburg.

The European Parliament consists of 142 members nominated by the national parliaments of the member countries—36 members each from France, Germany and Italy, 14 each from Belgium and the Netherlands and 6 from Luxemburg. Set up under the terms of the ECSC Treaty of 1952, its authority was extended by the Treaty of Rome 1957 to cover also the European Economic Community and Euratom. The Parliament must be consulted on all major issues and can force the dismissal of the Commission by a vote of no-confidence. The Treaty provides for its direct election and a scheme for this was drawn up by the Parliament in May, 1960. So far no decision on this project has been taken. The members of the Parliament have formed four political groups—Socialist (36 members in May, 1969), Christian Democrat (53), Liberal (25), and European Democratic Union (18). In March, 1969, seven Italian Communists and one left-wing Socialist took their seats in the Chamber following the reconstruction of the Italian delegation after the 1968 elections.

President, Mario Scelba (Italian Christian Democrat) (1969).

## European Court of Justice

12, Rue de la Côte d'Eich, Luxemburg.

The European Court superseded the Court of Justice of ECSC and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide on the legality of decisions of the Council of Ministers or the Commission and to determine violations of the Treaties. Cases may be brought to it by the member States, the Community institutions, firms or individuals. Its decisions are directly binding in the member countries. The seven judges of the court are appointed by the member Governments in concert and hold office for 6 years, being eligible for re-appointment.

Judges, R. Lecourt (President); W. Strauss; R. Monaco; A. Trabucchi; A. M. Donner; J. J. Mertens de Wilmars; Pierre Pescatore.  
Advocates-General, K. Roemer; J. Gand.  
Registrar, A. Van Houtte.

## EUROPEAN COAL AND STEEL COMMUNITY

Member States.—France, the German Federal Republic, Italy, Belgium and Luxemburg, and the Netherlands.

This, the first of the European Communities, was established in 1952. Since then it has abolished for coal, steel, iron ore and scrap, customs duties, quantitative restrictions, the dual pricing system whereby prices charged on exported coal or steel

differed from those charged to home consumers, currency restrictions and discrimination in transport rates based on the nationality of customers and the special frontier charges which made international transport of these goods within the Community dearer than transport within national frontiers. It has applied rules for fair competition and a harmonized external tariff for the whole Community.

In the period 1952 to 1968 Community steel production rose rapidly from 41.9 to 99 million tons. The coal industry, however, after expanding initially in conditions of acute energy shortage, found that a growing share of the energy market was being won by oil. The task of the ECSC thus came to be to ensure the orderly retreat of coal at a price which would avoid social or economic dislocation. So far, since the start of the crisis in 1957, the Community's coal industry has lost a third of its labour force. The ECSC has been especially active in meeting the social problems raised by such changes. Its adaptation aid from 1958 to end-1968 amounted to \$123 million and was matched by an equivalent contribution from the six governments and had by that time helped to re-train and resettle 376,000 ex-miners and steelworkers. It has also made grants and loans for industrial redevelopment, increasing this activity sharply during the coal and steel crises of 1967. Its housing programmes have provided 100,000 houses for coal and steel workers.

Decisions of the European Commission in ECSC matters are directly binding on the industries concerned. The Commission now supervises the smooth working of the common market in ECSC products, ensures that the Treaty rules of fair competition are observed, stimulates investment and research, and aids workers threatened with unemployment. The merger of the three Communities' Executives in July, 1967, is expected to bring particular benefits in permitting the co-ordination of energy policy, hitherto a field for which responsibility was divided between the ECSC (coal), EEC (oil and natural gas) and Euratom (nuclear energy).

#### EUROPEAN ECONOMIC COMMUNITY (THE COMMON MARKET)

Discussions were held at Messina, Sicily, in 1955 between the foreign ministers of the six member states of ECSC (see above) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. The Common Market is being established during a transition period of twelve years. The Treaty provides for the elimination of customs duties and quotas in trade between member states; the establishment of a common customs tariff and a common trade policy towards third countries; the abolition of the obstacles to free movement of persons, services and capital between member states; the inauguration of common policies for agriculture and transport; the establishment of a system ensuring that competition shall not be distorted in the Common Market; the coordination of economic policies; the harmonization of social and economic legislation to the extent necessary in order to enable the Common Market to work; the creation of a European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living; the establishment of a European Investment Bank intended to aid

investment in underdeveloped areas and help to finance modernization; and the association of overseas countries and territories with the Community with a view to increasing trade and to pursuing jointly their effort towards economic and social development.

To date, this programme has been put into effect as follows:

*Reduction of trade barriers.*—A first 10 per cent. reduction in customs duties between member countries took place on January 1, 1959. Decisions taken by the Council of Ministers in May, 1960, and July, 1963, resulted in a speeding up of the rate of tariff cutting. On May 11, 1966, the Council of Ministers agreed that the abolition of internal duties should be completed on July 1, 1968, and this advanced target date was met. Quota restrictions on trade within the Common Market were completely removed on January 1, 1962.

#### E.E.C. Trade with U.K.

	1967	1968
Imports from U.K.	£963,686,000	£1,195,889,000
Exports to U.K.	1,264,004,000	1,567,224,000

*Common external tariff.*—The Common Market has a common external tariff which came fully into effect on July 1, 1968. A first 30 per cent. move of notional duties towards the common external tariff was made at the end of 1960, on the basis of a notional common tariff reduced by 20 per cent. A second 30 per cent. move towards the common tariff took place on July 1, 1963.

In international tariff and trade negotiations in the GATT framework (such as the Kennedy Round), the Community is represented by the Commission, which negotiates under a mandate from the Council of Ministers.

Trade between the member countries of the Common Market increased in value by 274 per cent. to \$28,384,000,000 during the first years of its history (1958-68). Community trade with the rest of the world rose by 115 per cent. in the same period, imports totalling \$33,542,000,000; exports \$35,290,000,000.

*Free movement of labour.*—Freedom of movement for workers has been achieved within the Common Market, and those who work in member countries other than their own are ensured of rights equal to those of local workers, and of full transferability of social security benefits. They enjoy equal treatment in applying for jobs and receive priority over workers from non-member countries. There is, however, a shortage of trained labour in all Community countries at present.

*Services.*—The right of Community firms to establish businesses in member countries other than their own is being progressively freed, and is the right of Community citizens to engage in professional activities in member countries other than their own. In parallel with this programme, the harmonization of professional qualifications is being achieved.

*Capital.*—So far unconditional and complete freedom of movement has been achieved for direct investments, transfers of personal funds and emigrants' remittances, short and medium term commercial loans and the buying and selling of stocks and shares. For other transactions, such as capital issues, there is conditional liberalization. Progress is being made towards equalizing access to domestic capital markets within the Six.

*Rules for Fair Competition.*—The Common Market Treaty bans agreements which prevent, restrain or distort competition and, in particular, price-fixing, market-sharing, restriction of production or of technical development and discriminatory supply conditions if they are likely to affect trade between member states. The abuse of a dominant position

in the market by a firm or firms is also banned. Implementing regulations adopted by the Council have caused some 36,000 restrictive agreements to be registered with the Commission. Decisions banning or authorizing particular agreements have begun to be taken, and a body of case-law is being established.

*Agriculture.*—The basic machinery for a common organization of agricultural markets throughout the Community was established by decision of the Council of Ministers in January 1962. It involved the setting of target prices, support buying, levies on imports, and export rebates. Community funds can be allotted for the modernization of farming and the improvement of agricultural productivity in the Community. The common agricultural policy came into effect in July, 1962, for grains, eggs and poultry, pigmeat, fruit and vegetables, and wine. It was extended in September, 1964, to rice, and in November 1964 to beef, veal, and dairy produce, thus covering 90 per cent. of total Community agricultural output.

Under a decision reached in December, 1964, common price levels throughout the Community came into effect in July, 1967, for grains, pigmeat, and eggs and poultry. Further decisions taken on July 24, 1966, established common marketing regulations and common price levels for fruit and vegetables, sugar, dairy produce and fats and oils; to come into force between July 1, 1967, and July 1, 1968. On July 24, also, common price levels were fixed for beef and veal, milk and other dairy produce.

On July 1, 1967, grains, pigmeat, eggs and poultry reached the full single-market stage, thus bringing half the Community's farm production under the common agricultural policy's marketing and financial provisions. On May 29, 1968, the Six agreed on the pricing system for dairy produce and beef and veal in the single-market stage from July 1, 1968, having failed to agree by the original planned date of May 1. The Ministers of Agriculture did not accept the Commission's recommendation that the common prices for milk and butter be reduced in order to diminish the Community's mounting surplus of butter; they did, however, agree on measures to limit the common commitment to finance the dairy policy and to maintain differential prices between some member states ■■ temporary measure.

A progressively greater part of the cost of the agricultural policy is borne by the Community's Agricultural Guidance and Guarantee Fund, which will take over the full cost by January 1, 1970, from joint Community funds. The funds required are contributed from national budgets, partly in proportion to national receipts from the levy system. From July 1, 1967, 90 per cent. of income from the import levies goes to the Fund, meeting about 45 per cent. of its total needs; the remaining 55 per cent. will be covered, until 1970, by contributions from the member Governments. At the end of the Common Market's transitional period in 1970, all agricultural levies will go direct to the Community to help finance the common farm policy.

In December, 1968, the Commission published medium-term proposals for restoring supply/demand balance in the dairy, sugar, fruit, vegetable, and oil and fats markets, and long-term proposals for the reform of Community farming. The latter plan provided for extended pensions for older farmers, retraining programmes for younger men, grants to enable land to be taken out of production and for co-operative holdings, extensive improvements in farm capital and in the provision of new industries and services in regions affected by the decline of farming. Under these plans the Community farm population would be halved by 1980

to 5,000,000 and the annual cost of farm support in the Six cut to \$2,000,000,000 a year against \$4,500,000,000 in 1969.

*Economic Policy.*—Member States are required by the Treaty to consider their economic policies as matters of common interest, and to consult with each other and the Commission in order to concert these policies. The Commission undertakes annual economic forecasts, quarterly economic surveys, and monthly business surveys to help towards this end. A strong tradition of consultation between those responsible for economic policy in the member countries has been established. A Monetary Committee bringing together senior officials from national treasuries and central banks has met regularly since 1959 to discuss Community monetary and economic problems. Similar Committees on Short Term Economic Policy and Budgetary Policy have been established, as has a Committee of Governors of Central Banks, and a Committee on Medium Term Economic Policy, which in May, 1966, published its first 5-year programme, covering the period 1966–1970; this programme was adopted by the member states in February, 1967. In April 1964, the Council of Ministers adopted for the first time a series of recommendations to member governments on short term economic policy to meet the current threat of inflation in the Community. Steps are being taken to harmonize the tax policies of the member states. In February, 1967, the Council agreed to adopt a single system of added-value tax from 1970 with the harmonization of the applicable rate to be introduced later. In June, 1967, the E.E.C. Commission published a draft plan for the harmonization of direct taxes on debenture interest and dividend.

*Transport.*—The Treaty aims to establish ■ common policy on transport, with common rules for international transport within the Common Market, covering road, rail and inland water transport. Rates for freight which discriminate as to the national origin or destination of goods transported are to be eliminated within the transitional period. In June, 1965, the Council adopted a Commission proposal setting out the principles of ■ common policy to be put into force by the end of the transition period. The member governments did not agree on the implementation of these principles, but late in 1967 and early in 1968 a number of steps were agreed, on controlling social and economic conditions in intra-Community transport, especially road-haulage. Other measures covering railways were agreed by the Commission later in 1968 and early in 1969.

*Social Policy.*—Under the Treaty, member states agree upon the necessity to promote improvement of the living and working conditions of labour so as to permit the equalization of such conditions in ■ upward direction. They also cooperate closely on matters relating to employment, labour legislation and working conditions, occupational training, social security, industrial accidents and diseases, industrial hygiene and trade union law. Equal pay for men and women is also required and a regulation was agreed in December, 1961, by which all discrimination was to be abolished by the end of 1964. The Commission's most important instrument of social policy is the European Social Fund which promotes employment facilities and the mobility of workers within the community by means of vocational retraining, resettlement and other aids. It provides 50 per cent. of expenditure undertaken by the Six governments in the productive re-employment of workers. In June, 1969, the Commission published proposals to extend the powers of the Social Fund to play a more active role in re-training workers for higher skills.

*Regional development policy.* Proposals have been made by the Commission for an overall policy on regional development in the Community. A major instrument of this policy is the European Investment Bank with a capital of \$1,000 million, which aids investment in the Community's underdeveloped regions and helps modernization projects or new activities of general Community interest.

*The Community's external relations.*—Association agreements were signed with Greece in July, 1961, and with Turkey in September, 1963. The agreement with Greece provides for the establishment of a customs union over a transitional period of 20 years and leaves open the possibility of Greece becoming a full member of the Community when she is able to accept the economic obligations of membership. The agreement with Turkey provides for a preparatory period, during which Turkey will receive economic aid and trade benefits from the Community before any move towards a customs union is made. The Community has also concluded non-discriminatory trade agreements with Iran and Israel, and an agreement on trade and technical assistance with the Lebanon. Negotiations for association or trade agreements are in progress with Morocco, Tunisia and Algeria. Negotiations on Austria's request for association began in May, 1965. In April, 1967, the Council of Ministers agreed on a mandate for the Commission to open negotiations with Spain with a view to introducing a preferential trade agreement between her and the Community.

An association agreement, concluded on the basis of equality, was signed at Yaoundé, Cameroon, in July, 1963, by the member countries of the Community and 18 independent African states. It replaced an earlier association negotiated at the time of the Rome Treaty, and was to run until 1969. Under the agreement, tariffs were gradually abolished. The Community provided \$730,000,000 in aid over the five years 1963-1968. (\$580,000,000 was provided under the first 5-year agreement.) The association has a Ministerial Council and a parliamentary body linking members of the European Parliament and the Parliaments of the associated countries. An agreement establishing an association between the Community and Nigeria was signed in Lagos on July 16, 1966.

Britain's attempts to join E.E.C. date from the autumn of 1961, when with the Irish Republic, Denmark and Norway she sought membership, and Austria, Sweden, Switzerland, Spain and Cyprus sought association; with the Community. Negotiations terminated in January 1963. In May, 1967, the United Kingdom, Ireland and Denmark formally submitted applications for Community membership. In July, Norway applied for membership and Sweden announced that it would seek the enlargement of the Community on terms compatible with its neutrality. On July 10, 1969, President Pompidou said that France had no objection in principle to the United Kingdom joining the Common Market, but that the Six would have to agree on conditions of her membership and on the possible consequences for the Community.

*Budget of EEC.*—Contributions to the Budget of EEC were fixed in the following proportions: France, Italy and German Federal Republic, each 28 per cent.; Belgium and the Netherlands, each 7.9 per cent.; Luxembourg 0.2 per cent. The size of the budget is decided annually by the Council of Ministers.

## EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM)

A second treaty, arising from the Messina discussions between the ECSC powers on additional means of co-operation, was signed in Rome on March 25, 1957, setting up the European Atomic Energy Community. The task of *Euratom*, defined in detail in the Treaty, is to create within a short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on a large scale. Other sections of the Treaty cover the establishment and growth of nuclear industries, the procurement, ownership and control of nuclear materials, matters affecting health and safety, including training, and external relations, the stimulation of scientific research and the training of specialists, to assure through a Supply Agency adequate supplies of nuclear fuels, the supervision of the nuclear common market, inspection and control of the use of fissile material, and the safeguarding of both workers and the population at large by laying down basic standards for the protection of health.

### BRITISH AMBASSADOR TO THE EUROPEAN COMMUNITIES

28 rue Joseph II, Brussels 4.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir James Alexander Milne Marjoribanks, K.C.M.G. . . . . . £6,300

## EUROPEAN FREE TRADE ASSOCIATION (EFTA)

Following the unsuccessful attempt to create a European Free Trade Area linking the E.E.C. with other members of the O.E.E.C., seven European states—Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom—came together in 1959 to form the European Free Trade Association. The E.F.T.A. Convention became effective on May 3, 1960, and just over a year later, on June 26, 1961, Finland became an associate member. The Farøe Islands, sponsored by Denmark, were included in the EFTA from January 1, 1968.

The Convention defines the objects of the Association as (1) to promote economic expansion in the area of the Association and in each member state; (2) to ensure that trade between member states takes place in conditions of fair competition; (3) to avoid significant disparity between member states in the conditions of supply of raw materials produced within the area; and (4) to contribute to the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Members agreed to reduce progressively their tariffs on imports of industrial goods originating in the Area with a view to their complete elimination by January 1, 1970. They also undertook to abolish quantitative restrictions on imports of goods from the free trade area. Provision was made for alterations in these timetables and in May, 1963, when tariffs had been reduced to 50 per cent. of the original rates, members agreed to bring forward the date when tariffs and quotas would be finally eliminated to December 31, 1966. Since that date therefore the member countries of the Association have constituted a complete industrial free trade area. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. The Convention includes rules governing the origin of goods manufactured in the area. It also contains provisions relating to the "rules of competition"—government subsidies, restrictive business practices, etc. There are special provisions relating to trade in agricultural and fish products.

## E.F.T.A. Trade With U.K.

1967 1968

Imports from U.K. £758,431,000 £856,243,000  
 Exports to U.K. £940,902,000 £1,160,213,000

The Council of EFTA consists of one ministerial or official representative from each member country. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries.

Secretary-General, Sir John Coulson, K.C.M.G. (U.K.),  
 9-11 rue de Varambè, 1211 Geneva 20.

## THE COUNCIL OF EUROPE

Headquarters: Strasbourg 67, France.

Secretary-General, M. L. Tomic-Sorin.

A European organization founded in 1949 whose aim is to achieve a greater unity between its Members to safeguard their European heritage and to facilitate their economic and social progress. The aim of the Council is pursued through discussion and common action in economic, social, cultural, educational, scientific, legal and administrative matters and in the maintenance and furtherance of human rights and fundamental freedoms.

The following 18 countries belong to the Council: Austria, Belgium, Cyprus, Denmark, France, the Federal Republic of Germany, Greece, Iceland, the Republic of Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Sweden, Switzerland, Turkey and the United Kingdom.

The organs are the Committee of Ministers, consisting of the Foreign Ministers of member countries and the Consultative Assembly of 147 members, elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties. There is also a Joint Committee of Ministers and Representatives of the Consultative Assembly.

The Committee of Ministers is the executive organ of the Council. Certain of its conclusions take the form of international agreements or recommendations to governments. On certain major matters the Committee votes by unanimity but abstentions are permitted. Decisions of the Ministers may also be embodied in partial agreements to which a limited number of member governments are party. The Ministers may meet at the level of Deputies empowered to take all decisions which they do not wish to reserve for their Ministers of Foreign Affairs. Member governments accredit Permanent Representatives to the Council in Strasbourg, who are also the Ministers' Deputies.

The Committee is a forum for discussion between

## NORTH ATLANTIC TREATY ORGANIZATION

Headquarters: Brussels 39, Belgium.

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany in 1955. Since April, 1952, the North Atlantic Council, principal body of the Treaty Organization, has been in continuous session. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts.

Permanent U.K. Representative, Sir Bernard Alexander Brocas Burrows, K.C.M.G. (£8,600).

The senior military authority in NATO is the Military Committee composed of a Chief-of-Staff of each member country except France, which is

member governments on political and other matters, supervises the work of the technical expert committees and considers recommendations received from the Consultative Assembly. The Assembly's conclusions may take the form of recommendations to the Committee of Ministers or resolutions. Ministers, including Ministers other than those for Foreign Affairs, may address the Assembly and take part in its debates.

The Assembly holds three week-long sessions a year. The Chairman in office of the Committee of Ministers presents a report at each session. The Assembly also debates reports received annually from the O.E.C.D., other European organizations and certain specialized agencies of the United Nations. It holds an annual joint meeting with the members of the European Parliament of the "Six". Matters of mutual interest to the Committee of Ministers and the Assembly are discussed in the Joint Committee. The Council's budget is voted annually in December and is met by agreed contributions of member countries.

One of the principal achievements of the Council of Europe is the European Convention on Human Rights (1950) under which was established the European Commission and the European Court of Human Rights. These organs have built up a valuable system of European jurisprudence in the field of Human Rights. Other major achievements of the Council of Europe are the European Cultural Convention (1953) and the European Social Charter (1960). Over 60 conventions and agreements have been concluded by the Council covering matters such as social insurance, equivalence of European diplomas for university entrances, equivalence of university degrees, public health patents, extradition, etc.

The Council's cultural and educational programme is administered by the Council for Cultural Co-operation to which in addition to members of the Council of Europe belong Spain and the Holy See. A European Committee for Legal Co-operation administers the Council's legal programme. Finland also takes part in a wide range of intergovernmental activities.

The Committee of Ministers approves annually the Council of Europe Programme of Work handled by the intergovernmental committees of experts. The Work Programme lists the various projects on which the Council is working and thus provides a guide to the intergovernmental work of the Council. The revised programme for 1969-70 was adopted in May, 1969.

Permanent U.K. Representative, His Excellency Douglas John Brett Robey, C.M.G. (1969) £5,625

responsible for higher strategic direction throughout the North Atlantic Treaty area.

## THE DERBY, 1959-1969

For particulars of the Derby from 1780-1958 see 1921-59 editions.

The Distance of the Derby course at Epsom is  $\frac{1}{2}$  mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 31; Sir J. Hawley, Teddington (1851), Beadman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

*Women (Amateur)*.—*Billiards*: Miss T. March; *Snooker*: Mrs. R. Craven.

### RECORD BREAKS

*Billiards (Professional)*.—W. Lindrum, 4,137 v. J. Davis, Jan. 19-20, 1932.

*Championship (under Amended Baulk Line Rules)*.—J. Davis, 1,784, in 1936.

*Non-Championship (under Amended Baulk Line Rules)*.—W. Lindrum, 3,752 (Australia 1944).

*All Round Break (without Nursery Cannons)*.—W. Smith, 2,743 in 1928.

*Spot Stroke*.—W. J. Peall, 3,304 in 1890. (NOTE.—The whole score 3,304 was not made by the spot stroke. The break included spot-stroke runs of 92, 151, 123, 172, 120 and 400.)

*Consecutive Run of Nursery Cannons*.—W. Lindrum, 528 in 1911 equalling 1,058 points, out of total break of 1,164, 1933.

*Amateur Break*.—R. Marshall (Australia), 702 in Australian Amateur Championship, 1953.

*English Amateur Championship*.—K. Kennerley, 549 in 1937.

*English Amateur Snooker Championship Break*.—G. Thompson, 115 in 1962.

*World Professional Snooker Break*.—J. Davis, 147 in 1955; R. Williams, 147 in 1965.

*Professional Snooker Championship Break*.—J. Davis, 136 in 1946.

*World Amateur Billiards Championship*.—T. Cleary (Australia), 682 in 1954.

*World Amateur Snooker Record Break*.—R. Bader (Pakistan), 122 in 1964.

### BOWLS, 1969

*English Bowling Association Championship (Mortlake)*.

*Fours*.—S.F.: British Legion (Farnborough) beat Barnet (Herts.) 21-12; Clevedon (Somerset) beat Heaton Victoria (Northumberland) 20-16.

F.: Clevedon beat British Legion 20-13.

*Triples*.—S.F.: Rushden Town beat Boscombe Cliff 20-16; Sandwich beat Bournemouth 19-17. F.: Rushden Town beat Sandwich 18-15.

*Pairs*.—S.F.: Clevedon beat Rushden Town 21-13; L.B.C. Arlesley (Beds.) beat New Herrington (Durham) 16-15. F.: Clevedon (D. J. Bryant and D. Rhys Jones) beat L.B.C., Arlesley 25-11.

*Singles*.—S.F.: J. Davidson (Boscombe Cliff) beat R. S. T. King (Abington) 21-15; J. Burns (Greenhill, Dorset) beat E. A. Johnson (Paddington) 21-17. F.: J. Davidson beat J. Burns 21-10.

*Inter-County Championship (Middleton Cup)*.—S.F. Middlesex beat Hampshire 107-94; Hertfordshire beat Lincolnshire 124-107; F.: Middlesex beat Hertfordshire 134-83.

*International Championships*.—*Winners*.—Scotland.

*Results*.—Ireland beat Wales 129-73; Scotland beat England 100-85; Scotland beat Wales 111-88; England beat Ireland 119-87; Scotland beat Ireland 95-85; England beat Wales 125-75.

*Hilton Trophy, Indoor International Championship*.—England.

*BRITISH SHOW JUMPING, 1969*

*ROYAL INTERNATIONAL HORSE SHOW, WEMBLEY*.

*Country Life Cup*.—1, Miss M. Coakes on Stroller; 2, L. Merkel (W. Germany) on Anmut; 3, Miss A. Westwood on The Maverick.

*Prince of Wales Cup*.—1, W. Germany (L. Merkel on Anmut, H. Steenken on Simona, H. G. Winkler on Torphy and A. Schockemohle on Donald Rex); 2, G.B. (Miss A. Westwood on The Maverick, Miss A. Dummond-Hay on Merely-a-Monarch, H. Smith on Mattie Brown, and D. Broom on Mister Softie); 3, Italy.

*King George V Cup*.—1, T. Edgar on Uncle Max; 2, A. Schockemohle (W. Germany) on Donald Rex; 3, L. Merkel (W. Germany) on Anmut.

**Horse and Hound Cup.**—1, Mrs. D. Backhouse on Cardinal; 2, S. Pritchard on Telstar; 3, T. Edgar on Uncle Max and G. de Balandon Sigurd, equal.

**Daily Mail Cup.**—1, Miss J. Lefebvre (France) on Rocket; 2, Miss A. Westwood on The Maverick; 3, H. G. Winkler (W. Germany) on Torphy.

**Miss Gros. Puissance Trophy.**—1, H. Smith on O'Malley; 2, A. Schockemohle (W. Germany) on Wimpel; 3, Capt. R. d'Inzeo (Italy) on Bow-jack.

**John Player Trophy.**—1, A. Schockemohle (W.

Germany) on Donald Rex; 2, H. Steenken (W. Germany) on Simona; 3, Miss A. Westwood on The Maverick.

**CANOEING, 1969**

**Devizes—Westminster Race (124 miles) Senior Class.**—1, R. Evans and P. Pagnanelli (Parachute Brigade), 19 hr. 47 m. 20 s.; 2, A. K. Alan-Williams and R. Swindell (R.M. Canoe Fed.), 21 hr. 35 m. 49 s.; 3, I. T. Davis and M. D. Purchas (Bradford-on-Avon), 21 hr. 45 m. 20 s.

**MOTOR CYCLING, 1969**

**Senior T.T. Isle of Man.**—1, G. Agostini (Italy) (M.V.), 1 hr. 9 m. 40.2 s. (104.75 m.p.h.); 2, A. J. Barnett (Metisse), 2 hr. 18 m. 12.6 s. (98.28 m.p.h.); 3, T. Dickie (Seeley), 1 hr. 18 m. 44.2 s. (97.92 m.p.h.).  
**Junior 350 c.c. Race, Isle of Man.**—1, G. Agostini (Italy) (M.V.), 2 hr. 13 m. 25.4 s. (101.81 m.p.h.); 2, B. Steenson (Aermacchi), 2 hr. 23 m. 36.4 s. (96.64 m.p.h.); 3, J. Findlay (Aermacchi), 2 hr. 24 m. 41.2 s. (93.89 m.p.h.).  
**250 c.c. Lightweight, T.T., Isle of Man.**—1, K. Carruthers (Australia) (Benelli), 2 hr. 21 m. 35.2 s. (95.95 m.p.h.); 2, F. Ferris (Suzuki), 2 hr. 24 m. 59.4 s. (93.96 m.p.h.); 3, S. Herrero (Spain), (Ossa), 2 hr. 26 m. 21 s. (92.82 m.p.h.).  
**Manx Grand Prix (Isle of Man).**—Senior: 1, G. Daniels (Matchless), 2 hr. 25 m. 23.8 s. (93.43 m.p.h.); 2, G. Pantall (Seeley), 2 hr. 25 m. 30.8 s. (93.36 m.p.h.); 3, B. Warburton (Norton), 1 hr. 27 m. 17.4 s. (92.23 m.p.h.).

**MOTOR RACING, 1969**

**24-hours (Le Mans).**—1, J. Ickx and J. Oliver (Ford G.T.), 3,105.69 miles (129.39 m.p.h.); 2, H. Herrmann and G. Larrousse (Porsche); 3, D. Hobbs and M. Hailwood (Ford G.T.).  
**Monaco Grand Prix.**—1, G. Hill (Lotus-Ford), 1 hr. 59.4 s. (80.18 m.p.h.); 2, P. Courage (Brabham-Ford), 1 hr. 57 m. 16.7 s.; 3, J. Siffert (Lotus-Ford), 1 hr. 57 m. 34 s.  
**French Grand Prix.**—1, J. Stewart (Matra-Ford), 1 hr. 56 m. 47.4 s. (97.71 m.p.h.); 2, J. P. Beltoise (Matra-Ford), 1 hr. 57 m. 44.5 s.; 3, J. Ickx (Brabham-Ford), 1 hr. 57 m. 44.7 s.  
**British Grand Prix (Silverstone).**—1, J. Stewart (Matra-Ford), 1 hr. 55 m. 55.6 s. (127.25 m.p.h.); 2, J. Ickx (Brabham-Ford), 1 hr. 56 m. 36.1 s. (83 laps); 3, B. McLaren (McLaren-Ford) (83 laps).  
**German Grand Prix.**—1, J. Ickx (Brabham-Ford), 1 hr. 49 m. 55.4 s. (108.43 m.p.h.); 2, J. Stewart (Matra-Ford), 1 hr. 50 m. 53.1 s.; 3, B. McLaren (McLaren-Ford), 1 hr. 53 m. 17 s.

**Spanish Grand Prix.**—1, J. Stewart (Matra-Ford), 2 hr. 16 m. 53 s. (92.9 m.p.h.); 2, B. MacLaren (MacLaren-Ford), 88 laps; 3, J. P. Beltoise (Matra-Ford), 87 laps.

**Mexican Grand Prix.**—1, G. Hill (Lotus-Ford), 1 hr. 56 m. 43.95 s. (104 m.p.h.); 2, B. MacLaren (MacLaren-Ford), 1 hr. 58 m. 3.27 s.; 3, J. Oliver (Lotus-Ford), 1 hr. 58 m. 24.6 s.

**Dutch Grand Prix.**—1, J. Stewart (Matra-Ford), 2 hr. 6 m. 42.08 s. (111.047 m.p.h.); 2, J. Siffert (Lotus-Ford), 2 hr. 7 m. 6.6 s.; 3, C. Amon (Ferrari), 1 hr. 7 m. 12.59 s.

**South African Grand Prix.**—1, J. Stewart (Matra-Ford) (110.62 m.p.h.); 2, G. Hill (Lotus-Ford) (110.31 m.p.h.); 3, D. Hulme (MacLaren-Ford) (110.09 m.p.h.).

**U.S. Grand Prix.**—1, J. Stewart (Matra-Ford) (124.89 m.p.h.) (record); 2, G. Hill (Lotus-Ford); 3, J. Surtees (Honda).

**Italian Grand Prix.**—1, J. Stewart (Matra-Ford), 1 hr. 39 m. 11.26 s. (146.97 m.p.h.) (record); 2, J. Rindt (Lotus-Ford), 1 hr. 39 m. 11.34 s.; 3, J. P. Beltoise (Matra-Ford), 1 hr. 39 m. 11.43 s.

## SPORTS REPRESENTATIVE BODIES

**ANGLING.**—National Federation of Anglers. *Hon. Sec.*, J. W. Warner, 56 Ward Street, Derby.

**ASSOCIATION FOOTBALL.**—The Football Association. *Sec.*, D. Follows, C.B.E., 111 Lancaster Gate, W.2.

**ATHLETICS.**—Amateur Athletic Association. *Hon. Sec.*, B. E. Willis, 26 Park Crescent, W.1.

—Women's Amateur Athletic Association. *Hon. Sec.*, Miss G. M. Hartman, M.B.E., 41 Hayward Court, Levehurst Way, S.W.4.

**BADMINTON.**—Badminton Association of England. *Sec.*, H. A. E. Scheele, 82a High Street, Bromley, Kent.

**BASKET BALL.**—Amateur Basket Ball Association. *Sec.*, K. K. Mitchell, Dept. of Physical Education, The University, Leeds, 2.

**BILLIARDS.**—Billiards Association and Control Council. *Chairman*, J. Karnehm, 15 Exeter Street, Strand, W.C.2.

**BOBSLEIGH.**—British Bobsleigh Association. *Hon. Sec.*, N. V. L. Barclay, 78 St. Vincent Street, Glasgow, C.2.

**BOWLS.**—English Bowling Association. *Sec.*, E. Sussum, 2 Roseford Road, Cambridge.

**BOXING.**—Amateur Boxing Association, Clutha House, 10 Storey's Gate, S.W.1.—*Hon. Sec.*, W. T. Lovett.

—British Boxing Board of Control, Ramillies Buildings, Hills Place, W.1.—*Gen. Sec.*, E. J. Waltham.

**CANOEING.**—British Canoe Union. *Gen. Sec.*, Major G. E. Tomlinson, 26-29 Park Crescent, W.1.

**CLAY PIGEON SHOOTING.**—Clay Pigeon Shooting Association. *Sec.*, A. P. Page, Angel Road, N.18.

**CRICKET.**—Marylebone Cricket Club, Lord's Ground, N.W.8. *Sec.*, S. C. Griffith, D.F.C., T.D.

**CYCLING.**—British Cycling Federation, 26 Park Crescent, W.1.—*Sec.*, L. Unwin.

**FENCING.**—Amateur Fencing Association. *Sec.*, Maj. O. C. Weeks, M.B.E., R.A.(ret.), 83 Perham Road, W. Kensington, W. 14.

—Ladies' Amateur Fencing Union. *Hon. Sec.*, Mrs. H. Davies-Cooke, 23 Ennismore Mews, S.W.7.

**GOLF.**—Royal and Ancient Golf Club, St. Andrews. *Sec.*, K. R. T. Mackenzie, M.C.

—English Golf Union. *Sec.*, Lt.-Col. K. A. Nash, 12A Denmark Street, Wokingham, Berks.

—Ladies' Golf Union, 11 Fairways, Sandwich Bay, Kent.

**GYMNASTICS.**—British Amateur Gymnastics Association. *Hon. Sec.*, R. G. Taylor, Room 13, 26-29 Park Crescent, W.1.

**HOCKEY.**—Hockey Association. *Sec.*, R. J. W. Struthers, 26 Park Crescent, W.1.

—All England Women's Hockey Association. *Sec.*, Mrs. M. Macdonald, 45 Doughty Street, W.C.1.

**JUDO.**—British Judo Association, 26-29 Park Crescent, W.1. *Gen. Sec.*, Miss P. J. Hogg.

**LACROSSE.**—English Lacrosse Union. *Sec.*, C. D. Coppock, 3 Chessington Avenue, Bexley Heath, Kent.

**LAWN TENNIS.**—Lawn Tennis Association. *Sec.*, S. B. Reay, O.B.E., Palliser Road, Barons Court, West Kensington, W.14.

**MOTOR CYCLING.**—Auto-Cycle Union, 31 Belgrave Square, S.W.1. *Sec.*, K. E. Shierson.

**MOUNTAINEERING.**—British Mountaineering Council, Room 314, 26 Park Crescent, W.1. *Hon. Sec.*, H. D. Greenwood.

**NETBALL.**—All England Netball Association. *Sec.*, Miss A. Cairncross, 26-29 Park Crescent, W.1.

**RACING.**—The Jockey Club (Incorporating National Hunt Committee), 42 Portman Square, W.1. *Sec.*, D. Weatherby.

**RIFLE SHOOTING.**—National Rifle Association. *Sec.*, Air Commodore A. B. Riall, C.B.E., R.A.F. (ret.), Bisley Camp, Brookwood, Woking, Surrey.

—National Small-bore Rifle Association. *Sec.*, A. J. Palmer, O.B.E., Codrington House, 113 Southwark Street, S.E.1.

**ROWING.**—Amateur Rowing Association. *Sec.*, J. H. Page, O.B.E., 160 Great Portland Street, W.1.

**RUGBY FIVES.**—Rugby Fives Association. *Sec.*, A. V. Maltby, 7 Ennismore Mews, Knightsbridge S.W.7.

**RUGBY FOOTBALL.**—The Rugby Football Union, Whitton Road, Twickenham, Middx. *Sec.*, R. E. Prescott.

—The Rugby Football League. *Sec.*, W. Fallowfield, O.B.E., 180 Chapeltown Road, Leeds, 7.

**SKATING.**—National Skating Association of Great Britain. *Sec.*, A. R. Drake, Charterhouse, E.C.1.

**SKI-ING.**—National Ski Federation of Great Britain. *Sec.*, Maj. Gen. I. R. Graeme, C.B., O.B.E., 118 Eaton Square, S.W.1.

**SQUASH RACKETS.**—Squash Rackets Association. *Sec.*, J. H. Horry, 26 Park Crescent, W.1.

—Women's Squash Rackets Association. *Hon. Sec.*, Mrs. P. Jackson, 9 Lansdown, Box Grove Road, Guildford, Surrey.

**SUB-AQUA.**—British Sub-Aqua Club. *Director*, R. Vallintine, 160 Great Portland Street, W.1.

**SWIMMING.**—Amateur Swimming Association. *Hon. Sec.*, H. E. Fern, C.B.E., 64 Cannon Street, E.C.4.

**TABLE TENNIS.**—English Table Tennis Association. *Organising Sec.*, D. R. Tremayne, Room 323, 26/29 Park Crescent, W.1.

**TOBOGANNING.**—British Racing Tobogganning Association.—*Pres.*, N. V. L. Barclay, 78 St. Vincent Street, Glasgow, C.2.

**WATER SKI-ING.**—British Water Ski Federation. *Hon. Sec.*, T. Richardson, B. W. S. F., Egham, Surrey.

**WEIGHT-LIFTING.**—British Amateur Weight Lifters Association. *Hon. Sec.*, W. W. R. Holland, 133 Ilfrey Road, Oxford.

**WRESTLING.**—British Amateur Wrestling Association. *Sec.*, A. Wishart, 60 Calabria Road, N.5.

**YACHTING.**—Royal Yachting Association. *Sec.*, N. Hacking, 5 Buckingham Gate, S.W.1.

## LITERATURE OF THE YEAR

A notable literary bicentenary was celebrated in October (1968), that of the *Encyclopaedia Britannica*. The earliest encyclopaedia was probably the *Naturalis Historia* of Pliny the Elder, produced between AD 23 and AD 79, and running to 37 books. The first such work to be published in the United Kingdom which has survived to the present day was *Chambers's Encyclopaedia* (originally *Cyclopaedia*), first compiled and published in Edinburgh in 1728 by Ephraim Chambers, in two volumes. This and the celebrated French *Encyclopédie* edited by Diderot and D'Alembert in 28 volumes between 1751 and 1765, probably inspired Colin Macfarquhar, Edinburgh printer, to launch the *Encyclopaedia Britannica*, in partnership with Andrew Bell, the principal Scottish engraver of that day. The work was edited and largely written—or compiled, with scissors and paste—by William Smellie, another Edinburgh printer and writer, and was published in sixpenny weekly parts between 1768 and 1771. These were then reissued in three bound volumes, price £12, as the first edition of the work. This was expanded into 10 volumes for the second edition, also first published in weekly parts, between 1777 and 1784, edited by Macfarquhar himself, assisted by James Tytler, famous as the first Scottish aeronaut: he contributed a long article on balloons.

**High Reputation.**—But it was the third edition that founded the high reputation of the *Britannica*, by being the first to be more than a compilation made by one or two men from published books. It sought contributions from scholars and scientists, at first all Scotsmen but later drawing upon the whole world's store of scholarship, each contributor an expert specialist in his particular field. Macfarquhar died in 1793 while editing this edition, and the surviving proprietor, Bell, died in 1809 during the publication of a revised fourth edition; whereupon the copyright was bought by Archibald Constable, Scott's publisher. After the failure of his firm the *Britannica* was bought by Adam Black, another Edinburgh publisher, who produced two editions between 1830 and 1860, each comprising 21 volumes. The 9th edition (1875–1889), planned on a still bigger scale, seemed such a risky undertaking to Adam Black that, prophesying its failure, he retired from his firm. But in fact nearly half a million sets of the 24 volumes were sold; and a cheaper reprint published by *The Times* in 1898 was so successful that in 1902 that newspaper produced 11 supplementary volumes which, with the 24 previously published, constituted the 10th edition. An entirely new edition, the 11th, was issued in 1910–11 in 29 volumes by the Cambridge University Press; but after that, ownership of the *Britannica* passed into American hands, and it is now an Anglo-American production. Contributors to the 11th edition numbered about 1,500; today there are more than 10,000—over 3,000 of them British. The bicentenary was marked by a Guildhall banquet on October 15, and by publication of a facsimile reprint of the first three-volume edition.

A fitting sequel to the exhibition held in York (see *Literature of the Year*, *Whitaker* 1969) to mark the bicentenary of the death in 1768 of Laurence Sterne, was the translation of his remains in June (1969) from London to Yorkshire and their reburial in the churchyard of the village of Coxwold, where Sterne held the living from 1760 until his death in London. He was then buried in the cemetery in Bayswater of St. George's Church, Hanover Square. When it became known that a block of flats was to be built on the site of this long disused cemetery, the Laurence Sterne Trust arranged for the exhumation

of the remains and their reinterment at Coxwold on June 8.

**Reliques and Domesday.**—Queen's University, Belfast, secured for £90,000, in June, after a fierce saleroom tussle, the library of Thomas Percy, best remembered for his publication of *Reliques of Ancient English Poetry*, in which appeared a part of his large collection of old ballads. A grocer's son who became a scholarly bishop, Percy was a friend of Dr. Johnson, who wrote the dedication of the first edition of the *Reliques*, published in 1765. Percy also wrote or translated a number of books, and collected a remarkable library which has been in private ownership since his death in 1811. Belfast had a special interest in securing it because Percy was Bishop of Dromore, Co. Down, for many years.

Work has begun on the preparation of a new facsimile edition of the *Domesday Book*, which is to be published under the editorship of Professor V. H. Galbraith, the first volume to appear in 1970. The project, it was announced in July, is to reproduce photographically the 1,700 pages of the two volumes of *Domesday*—which was originally compiled in about 1086—in a series of separate volumes, each covering one county. Professor Galbraith will write an accompanying volume of commentary, and there will be about six more volumes reproducing previous printed editions of the work. The first printed edition appeared in two volumes in 1783. The idea of a photographic facsimile is not new; such an edition, in separate volumes for each county, was published as long ago as 1861–63. This larger venture, using the newest methods, will be spread over a period of several years.

The need for an independent statutory body to co-ordinate the work of the chief national libraries and assist in their development was urged by the National Libraries Committee in a report issued in June. The Committee was appointed by the Secretary of State for Education and Science in 1967, under the chairmanship of Dr. F. S. Dainton, Vice-Chancellor of Nottingham University. Its report recommended that a National Libraries Authority should be established to decide the particular uses to which libraries' trust funds and materials should be put, and to develop a national library information service. It proposed that a National Reference Library should be built on a site in Central London near the British Museum; and that a National Bibliographic Service should be set up, also in London, with a loan and copy centre in Boston Spa, Yorkshire, the present home of the National Lending Library for Science and Technology. Another proposal in the report was that the university libraries of Oxford and Cambridge and a few other large libraries should be helped financially to provide an inter-library lending service.

**Advertising in Libraries.**—The Department of Education and Science reported that about 600,000,000 books were issued from public libraries in 1968–69. There were in 1969 about 460 central and headquarters libraries, with 1,920 full-time and 1,130 part-time branches, and about 530 mobile libraries. The Association of Municipal Corporations' libraries committee expressed disapproval of suggestions that public lending libraries might also sell books, but said it might be appropriate in some cases to grant a lease of part of a library building to a book retailer. It might also be possible to allow booksellers and publishers to advertise in public libraries.

The monumental Twickenham Edition of *The Poems of Alexander Pope*, under the general editorship of John Butt, was completed with the publication of the Index, the 11th volume of this finely produced and definitive edition. The set will be the standard work on Pope's poetry, of the greatest value to all students of our literature, for a very long time to come.

The 75th birthday in September of J. B. Priestley was marked by the publication of a new book from his pen, a handsome study of the Prince Regent (later George IV), entitled *The Prince of Pleasure*; and by the reissue by Penguin of nine of his books, including plays, novels and essays. In his new work Mr. Priestley gives an interesting assessment of the Prince as patron of the Arts, particularly the Brighton Pavilion on which he spent vast sums (and which Queen Victoria wisely sold for £50,000 in 1850) and Windsor Castle, and their contents. He also tells us much of the celebrities of the period, and its politics and social conditions, in this highly readable and generously illustrated book.

Lorna and Robinson.—This was Lorna Doone centenary year in Devon and Somerset, and it was duly celebrated with a literary exhibition, pageants and processions. Richard Blackmore's romantic novel about the defeat of a band of cruel outlaws by the courage and constancy of two young lovers in the 17th century was first published in March 1869, and was a failure. Only 400 copies were sold in two years. Then occurred the marriage of Princess Louise to the Marquess of Lorne, and a journalist suggested in *The Times* that Lord Lorne might be descended from the outlawed Doones who, legend had it, had come to Exmoor from Doune, in Scotland. Blackmore agreed that he might have named his heroine Lorna from his having seen the name Lorne in connection with the legend; and his fortune was made. The loyal subjects of Queen Victoria, approving her daughter's romance, began to buy Blackmore's romance, and flocked to the West Country in search of Doone Valley—to the bewilderment, at first, of local residents, who had not heard of it. But they soon learned of its commercial value, and the novel that became a best seller overnight has brought them great numbers of visitors ever since.

In April fell the 250th anniversary of the first publication of *Robinson Crusoe*, one of the most universally and persistently popular of adventure stories, the first great English work of prose fiction. Defoe's name did not appear on the title page of the first edition (1719), but he soon knew that he had struck a good line in popular writing, for in a few weeks he completed the *Farther Adventures of Robinson Crusoe*, and two more books about him followed within a year. Few books, apart from the Bible, have appeared in so many editions, in so many languages.

Not so Machiavellian?—The 500th anniversary in May of the birth of Niccolò dei Machiavelli, one of the founders of political science, was marked by the publication of *Machiavelli, A Dissection* by Sydney Anglo. Machiavelli, through misunderstanding of his views and misinterpretation of his political writings by his enemies, the author writes, has come to be regarded as a man of almost diabolical wickedness. In his best book, *The Prince*, he asserted that all means were legitimate to achieve and maintain political authority; and his name has given an adjective, *machiavellian*, meaning crafty and unprincipled. Dr. Anglo considered the time had come to break down these views and to show him as a great writer. In ably setting out his views the author asserts that Machiavelli is often criticized

without his having been read. He wrote several other books, and was also a dramatist.

The death in November, 1968, of Upton Sinclair at the age of 90 removed one of the most important of modern American writers, a notable novelist and left wing polemicist for more than 60 years. His best known novel, *The Jungle*, describing the meat packing industry in Chicago, shocked America; but nearly 60 years passed before his attack on the conditions was finally fruitful, with the passing in 1967 of special legislation. His *Oil* was a similar attack (in 1927) on the darker side of the oil goliath; and *The Wet Parade* (1931) was a lively study of the Prohibition period. His biggest achievement in its scale and range was the long series of journalistic novels about world politics, beginning with *World's End* in 1940. One of them, *Dragon's Teeth*, won him the Pulitzer prize in 1943.

On the same day that Sinclair died in New Jersey another notable novelist died far away in East Berlin: Arnold Zweig, aged 81. His best known work was *The Case of Sergeant Grisha*, perhaps the best of the German novels about the first World War. It was first written as a play, which failed, when Zweig turned his work into a novel, which became a best-seller in many countries. Later, he made it the middle volume of a great trilogy.

Napoleon and Hitler.—Another bicentenary during the year, that of the birth of Napoleon Bonaparte on August 15, 1769, did not call forth the flood of books that might have been expected. Perhaps it has all been written already. Yet too much cannot be recorded, one might think, about the man who rose from obscure poverty to be virtually ruler of Europe. Four of the books about him that did appear during the year were all concerned not with his birth and rise to fame, but with the last nine years of his life. In *Imperial Sunset* R. F. Delderfield deals with the two years from the return from Moscow to the first abdication, in 1814. Other authors have dealt with the campaigns of Germany in 1813 and of France in the early months of 1814 which are generally held to show Napoleon the general at his best; but Mr. Delderfield has linked them with the accompanying political activities and peace negotiations with both skill and lucidity. *Napoleon Recaptures Paris* by Claude Manceron, translated by George Unwin, described hour by hour the last seven days of the Emperor's return from Elba: his march from Macon to Paris, March 14-20, 1815. The author tells how this was seen from Naples and Vienna, and in the camps of Napoleon and Ney, and gives an absorbing account of Napoleon's bloodless reconquest of his throne, one of the most remarkable events in his career.

Two other books related to the years of exile on St. Helena, one being the diary, never before published, of Major Gideon Gorrequer. Entitled *St. Helena During Napoleon's Exile*, and ably edited by James Kemble, it is the diary of the Military Secretary to the Governor of St. Helena, Sir Hudson Lowe. Gorrequer shared the Governor's office and table, so few could have known him better. The diary shows that, although Gorrequer was outwardly loyal and obedient, he despised and disliked his master. He confided his personal opinions to this secret diary, kept in a kind of coded shorthand, and it was preserved unpublished by his heirs until, because of a legal ruling in 1881, it passed into the vaults of the Court of Chancery and remained inaccessible until its recent transfer to the Public Record Office. Dr. Kemble has performed well the difficult task of deciphering and editing it.

A good general account of life on the island during those years was contained in *Napoleon's St.*

*Helena* by Gilbert Martineau, translated by Frances Partridge. It surveys daily life not only at Longwood but also at the Governor's residence and among the British troops and the civilian population, the various abortive plans for Napoleon's rescue, and the wrangles over his death. From both these books and from others before them it seems clear that the British Government of the day treated their captive with some petty harshness and want of chivalry, but at least they allowed him to live out his life naturally. Had Hitler been captured in Berlin in 1945, it seems likely that he would have shared the fate of some of his chief followers at Nuremberg.

**A Russian Puzzle.**—The circumstances surrounding Hitler's death in Russian-occupied Berlin were concealed by the Soviet Government for 23 years, although their reason for maintaining this secrecy was more of a mystery than was the event itself, to Western observers, especially after the thorough investigation by Major (now Professor) Hugh Trevor-Roper immediately after the war ended, published as *The Last Days of Hitler*. Belatedly, however, a Russian version appeared in October in English translation as *The Death of Adolf Hitler* by Lev Bezymenski, who glosses over the official Soviet secrecy and the repeated denials by Stalin that Hitler was dead, and purports to be giving the true story for the first time. Another mystery is why this Russian book had not been published in the U.S.S.R.: it was first published in West Germany.

Napoleon's final conqueror, Wellington, the bicentenary of whose birth (May 1, 1769) also occurred during the year, has attracted the attention of fewer authors, perhaps because his career was so much smaller in scale. The circumstances and careers of the two men present the extreme of contrast at every point: from the aristocratic birth and comfortable home of the elder to the relatively humble birth and early poverty of the younger; from the limitations of Wellington within a military life and his brief appearance as Prime Minister to the dazzling successes of Bonaparte as both soldier and statesman-ruler; even from the long life and honoured death of the Duke to the much shorter life and lonely death in remote exile of the Emperor. Only in their generalship can they be compared. But among books about Wellington one that appeared during the year was of special interest: *The Duke of Wellington* by Victor Percival. This is a pictorial biography finely produced and well composed by the officer who has charge of the Wellington Museum in Apsley House, which was the Duke's London home from his purchase of it in 1817 until his death 35 years later. The author has been able to draw upon the great store of treasures it contains, the paintings and sculptures, the services of silver and porcelain, the jewelled orders and medals and batons, to illustrate the narrative of that long and distinguished career.

**The Churchills.**—The second volume of the biography of Sir Winston Churchill, which was published about the time of the death in 1968 of its author, Randolph Churchill, was reinforced in 1969 by the issue of its *Companion Volume II*, which Mr Churchill had fortunately completed. Containing the private and official papers and correspondence which had been used in the writing of the second biographical volume (which covered the years 1901-1914), this prodigious work, running to 2,000 pages, will be of great value to the student of Edwardian political and social life. It was stated during the year that Randolph Churchill's successor, to continue to completion the life of his father,

would be Martin Gilbert, of Merton College, Oxford.

Sir Winston's mother, the beautiful, American-born Jennie Jerome, Lady Randolph Churchill, published her own reminiscences 60 years ago, in which she showed the amusing aspects of life in late Victorian and Edwardian Society. Now her great-niece, Anita Leslie, has drawn a more revealing picture in *Jennie: The Life of Lady Randolph Churchill*, written with sympathy and insight, aided by family papers. The book shows at least part of a vanished age.

Another British former prime minister whose mother was American is Mr Harold Macmillan, from whom came the third volume of his autobiography, *Tide of Fortune*, covering the years 1945-55. This former soldier and statesman, scholar and philosopher, has retained a keen sense of humour, which illuminates many of his observations of the circles in which he moved for so long. In this volume, viewing that decade in perspective, he records the many opportunities for fruitful action, some grasped, some missed, by national leaders. His own opportunity came, and was grasped firmly, when Churchill appointed him Minister of Housing in 1951, to carry out the behest of the Conservative Party conference to build 300,000 houses a year. Here he tells how this was achieved, and how his success ensured the continuance of his party in office for 13 years and his own succession to the premiership, by way of the Foreign Office and the Exchequer.

The political biography of Joseph Chamberlain was at last completed by the publication simultaneously of volumes five and six of *Joseph Chamberlain and the Tariff Reform Campaign* by Julian Amery. The fifth volume deals with the years 1901-1903, and the sixth, rather surprisingly, with the years 1903-1908, although Chamberlain died in 1914. This is because Mr Amery has added an epilogue showing that Chamberlain's policies contributed to events long after his death, such as the Ottawa Agreements and the Sterling Area. The first three volumes of this work were written after the end of World War I by the late J. L. Garvin, and the fourth by Mr Amery, in 1951, in which he embodied six chapters left in draft by Mr Garvin. Mr Amery's own political activities prevented his completing the work until this year; but politically minded readers can now study the whole of the career of one of the most influential statesmen who never became Prime Minister.

**Words in Whitehall.**—More political history enlivened by personal commentaries was contained in *Memoirs of a Conservative* by Robert Rhodes James, the Conservative of the book's title being Viscount Davidson who, as Mr J. C. C. Davidson, was active behind the scenes between 1910 and 1937. He was the indispensable private secretary and confidant, serving both Bonar Law and Baldwin with discretion and tact; and Mr James has made good use of Lord Davidson's draft memoirs, tape recordings and personal papers, and of conversations with him (he is now 80) to produce a lively and absorbing commentary on the people and events of those momentous years. Davidson was concerned in the manoeuvres that defeated Asquith in the 1918 election and, in turn, Lloyd George in 1922, curbed some of Churchill's exuberance during the 1926 General Strike, and was skilfully responsible for ending the notorious racket in the sale of Honours.

Further political information from the inside was offered in the first volume of *Whitehall Diary* by Thomas Jones, covering the years 1916-1925, edited by Keith Middlemas. Jones was a Welsh

confidant of Lloyd George, who introduced him into the new Cabinet Secretariat in 1916. Before that year no minutes or records of Cabinet meetings had been made, and Jones and Sir Maurice (later Lord) Hankey were the first outsiders to be allowed into a Cabinet meeting. They took notes, advised the Prime Minister, and circulated selected minutes and memoranda. This diary is full of fascinating sidelights on the leading political figures of those years.

**Benjamin's Father.**—The studious antiquary inevitably best known as "Disraeli's Father" was given full biographical and critical treatment by James Ogden in *Isaac D'Israeli*. Isaac failed to achieve anything approaching the fame of Benjamin, as either novelist or politician, but he wrote almost as flamboyantly and dressed nearly as colourfully. He dreamed of fame, but never woke up to find himself famous. Yet in *Curiosities of Literature* he wrote one of the best bedside books in the language; and for this, and for Mr Ogden's entertaining biography of him, gratitude is clearly due.

Something, perhaps, of the literary-political quality, without quite the same *panache*, of Benjamin Disraeli attaches to Mr Enoch Powell, whose *Freedom and Reality* appeared in April. Politician and poet, professor of Greek and Army brigadier, philosopher and administrator, Mr Powell may seem to be as radical as Conservative as was Disraeli, and sometimes as high a Tory as was Lord Beaconsfield. This book is a collection of his speeches arranged in chapters with connecting narrative to bind them into a neat whole. Some of his speeches have aroused antagonism among many who had possibly not read them in full. This book enabled them to remedy their loss.

Dr Johnson's considerable but scattered writings about Shakespeare were brought together for the first time in two handsome volumes, *Johnson on Shakespeare*, in the Yale edition of *The Works of Samuel Johnson*, in which they appeared (as volumes 7 and 8) edited by Arthur Sherbo. Johnson was amusing, critical and kindly in his treatment of Warburton's annotated edition of Shakespeare, published in 1747; and this book will be of particular interest and value to many admirers of both Shakespeare and Johnson.

**Battles of Britain.**—The victory in what came later to be called the Battle of Britain in 1940 was and has continued to be a matter for public pride and private dissension, and the subject of more than one book. A new one was *Dowding and the Battle of Britain* by Robert Wright, which had the advantage of containing Lord Dowding's own comments. A somewhat aloof man who did not easily win friends and suffered few people gladly, Dowding was wholly dedicated to the building and training of Fighter Command during the three years preceding the outbreak of World War II, and was its active leader through its most difficult first battle. It was won on September 15, 1940, when the German losses, although exaggerated at the time, were so heavy as to induce Hitler to cancel the planned sea-borne invasion. Yet two months later its victor was discarded, somewhat abruptly and with no promotion or decoration; and although he was given a peerage two years later, he was never advanced to the highest rank in his Service, that of Marshal of the Royal Air Force. Some of the reasons for this treatment of—*to quote from Basil Collier's Leader of the Few* (published in 1957), the authorized biography of Lord Dowding—"the only Air Chief Marshal, alive or dead, who had ever won a battle of any consequence," were set

out by Mr Wright, together with a clear account of the battle and of the career of its victor, now 87. In a preface to Mr Collier's book Lord Dowding wrote "I myself remain under no sense of grievance." Nothing could be more magnanimous, or characteristic.

In another "now it can be told" war book, *Saturday At M.I.9*, Mr. Airey Neave gave the full story of the escape routes used to bring home about 4,000 British and Allied soldiers and airmen who were prisoners or fugitives in German-occupied Europe. Mr. Neave, who successfully escaped from Colditz in 1942, was given charge of a small department, M.I.9, which organized the escape routes, in which, he writes, 12,000 civilians in the occupied countries took part. They risked torture and death, and more than 500 were shot or murdered in concentration camps. His book is a record of gallantry, treachery, tragedy, and occasionally comedy.

**Literary Discoveries.**—It was announced in April that several short stories by the late W. Somerset Maugham, many of them not included in his collected works, had been found and would be published in the United States in September, and presumably in Britain in due course. These *Seventeen Lost Short Stories by Somerset Maugham* were diligently traced and collected by a young American admirer, Dr. Craig Showalter, and were written between 1898 and 1908 for various British and American periodicals. Eight of the 17 have not been reprinted since their magazine publication; six were included in a volume published in 1899 but not in any later collection; and revised versions of other three have appeared in some later books.

Another discovery during the year was a quantity of unpublished manuscripts of the late Ernest Hemingway, which was announced in September. Deposited in Florida and Cuba, now sorted and catalogued by Professors Philip Young and Charles Mann, of Pennsylvania, the find was reported to comprise four novels, 18 short stories, 33 poems, and notebooks, drafts of published books, and the original manuscript and typescript of *For Whom the Bell Tolls* and *A Moveable Feast*. Among them was the manuscript of a book that is stated to have inspired *The Old Man of the Sea*, the novel which brought Hemingway the Nobel Prize for Literature in 1954. He died in 1961.

Dennis Wheatley, at 72, gave us another of his first-class adventure novels, *Evil in a Mask*, latest in the Roger Brook saga, which seems to bring his total score of books to 55, all of them in print. His total world sales were stated to be about 27 million with each title selling at least 12,000 copies annually, and paperback editions are said to sell 1,150,000 copies every year. These are prodigious figures, but he is a prodigious creator of the kinds of tales of high adventure leavened with romance and factual information that have world-wide appeal. In his latest, Brook is entangled with, but escapes, the intriguers of Napoleon's court and camp, Talleyrand and Fouché among them.

**Crime and History.**—Georges Simenon, probably the richest and most prolific author today, duly continued to narrate the activities of his renowned French policeman and delight his innumerable fans. One that appeared during the year in English translation was *Maigret Takes the Waters*, in which the inspector solves a murder that occurs at Vichy while he and his wife are there on holiday "taking the waters." Study of his own movements helps Maigret to the inevitable solution. Simenon, now 66, can still write a complete Maigret story in seven days flat, and recently said that, every

day of every year, he has at least one new book published in some part of the world. He is estimated to have written 202 novels (112 of them about detection) under his own name, and many others under nearly 20 different pen-names. The quality and inventiveness of his stories remains surprisingly high, ephemeral though they may be.

An amusing tale of a woolly-minded astrologer whom television turns into a nationally acclaimed prophet was told in *The Golden Hours of Mr. Goosepenny* by A. P. Dearsley. When politicians fear him and workers strike on the strength of his predictions, the results are bound to be funny.

A highly readable and scholarly historical study was *The Middle Ages* by Joseph Dahmus, in which he recounted the persecution and the ascendancy of Christianity, the conquest of Rome, the miseries of the Dark Ages, the Crusades, and the rise of new nations. Professor Dahmus tells us much of the medieval universities and scholars, and the way of life of the people who lived under the influences of the early Christian and Islamic churches and laid the foundations of Western civilization.

Another fascinating historical study was *The Fateful Inheritance* by Edward Grierson, an account of Philip II of Spain and the revolt of the Spanish Netherlands. The Reformation, the Armada, the Inquisition, the political, economic, dynastic and military problems that faced "the Spider of the Escorial," are well described in this eminently readable book.

Considerable research and much literary skill helped to make Lady Antonia Fraser's *Mary Queen of Scots* the leading historical biography of the year. The author showed that the Queen's three tragic marriages—all as unavoidable as they were unwise and unfortunate—the selfish barbarity of most of the nobility surrounding her throne and the implacable jealousy of Queen Elizabeth I brought her to her terrible death. Lady Antonia deals clearly and fairly with the notorious Casket Letters and concludes that Maitland was their chief forger. She also shows that they had little effect on the outcome of Mary's so-called trial, but much in blackening her reputation afterwards. The book is handsomely produced and lavishly illustrated, and should be of value to students and enjoyment to general readers for many years to come.

Among other books published during the year were the following:

#### Biography

*Gordon Craig*, by Edward Craig; *Edward Lear*, by Vivien Noakes; *Wyndham and Children First*, by Lord Egremont; *Alexander Pope: the Education of*

*Genius*, by Peter Quennell; *Action This Day: Working with Churchill*, ed. Sir John Wheeler-Bennett; *Charles I*, by Christopher Hibbert; *Lord Acton and His Times*, by David Mathew; *My Life and Times, Octave 8, 1939-1946*, by Sir Compton Mackenzie; *Robert Donat*, by J. C. Trewin; *The Gascoigne Heiress*, by Carola Oman; *Walter Monckton*, by Lord Birkenhead; *Experiences*, by Arnold Toynbee; *Wavell: Supreme Commander 1941-43*, by John Connell, edited and completed by Michael Roberts; *The Backstairs Dragon* (Robert Harley), by Elizabeth Hamilton; *Henry James at Home*, by H. Montgomery Hyde; *Jellicoe*, by A. Temple Patterson; *Sir William Hamilton*, by Brian Fothergill; *Milestones on the Dover Road*, by John Dover Wilson; *Voltaire*, by Theodore Besterman.

#### History

*A History of Warfare*, by Visct. Montgomery of Alamein; *The Black Death*, by Phillip Ziegler; *The Habsburg Empire, 1790-1918*, by C. A. Macartney; *Mission to Khartoum*, by John Marlowe; *The Normans and the Norman Conquests*, by R. Allen Brown; *Peterloo*, by Robert Walmsley; *American Presidents and the Presidency*, by Marcus Cunliffe; *The Philhellenes*, by C. M. Woodhouse; *The Kings Depart*, by Richard M. Watt; *A History of the Jesuits*, by Christopher Hollis.

#### Poetry

*New Poems*, by Roy Fuller; *Collected Poems*, by Lawrence Durrell; *The Echo at Coole*, by Austin Clarke.

#### Fiction

*I Want It Now*, by Kingsley Amis; *The Sleep of Reason*, by C. P. Snow; *Poor Clare*, by L. P. Hartley; *London End*, by J. B. Priestley; *The White Crow*, by Storm Jameson; *The Play Room*, by Olivia Manning; *High Heroic*, by Constantine Fitzgibbon; *The House on the Strand*, by Daphne du Maurier; *The Philosopher's Stone*, by Colin Wilson.

#### Essays and Criticism

*English Literature of the late Seventeenth Century*, by James Sutherland; *The Crane Bag*, by Robert Graves; *The Rise and Fall of the Man of Letters*, by John Gross; *The Achievement of Sir Walter Scott*, by A. O. J. Cockshut; *The Making of T. S. Eliot's Plays*, by E. Martin Browne.

#### Miscellaneous

*The Common Problem*, by Angus Maude; *Gothic Europe*, by Sir Sacherevell Sitwell; *The Longest Retreat: the Burma Campaign, 1942*, by Tim Carew; *Raven Seek Thy Brother*, by Gavin Maxwell.

## THE ZODIAC

The Zodiac is an imaginary belt in the heavens within which lie the apparent paths of the Sun, Moon and major planets. It is bounded by two parallels generally taken as lying  $8^\circ$  on either side of the ecliptic or path of the Sun in its annual course. The Zodiac is divided into twelve equal parts of  $30^\circ$  called Signs, which are not used by astronomers, but have some import in astrology, for which the division of the Zodiac was probably made originally. The Signs of the Zodiac take their names from certain of the constellations with which they once coincided. They are assumed to begin at the vernal equinox or intersection of the plane of the ecliptic with that of the equator. This point is still called the First Point of Aries, although the Sign of Aries now lies in the constellation of Pisces, some  $30^\circ$  to the west. This retrograding of the equinox by about  $50''$  a year is due to precession;

the signs no longer coincide with the constellations whose names they bear.

A catalogue has been made (Grimaldi, 1905) of all, so far as is known, sculptured or incised representations on ancient monuments or tablets of the traditional constellation figures, either Zodiacal or otherwise, together with many modern pictures of the Zodiac. The first in the list is a roughly shaped upright, black stone about  $2\frac{1}{2}$  feet high and  $1\frac{1}{2}$  feet broad in the Babylonian room of the British Museum on the front of which are lightly incised ten out of the twelve Signs and other constellation figures. This was found near Baghdad and its date is estimated to be about 1187-1175 B.C.

The hour when the Sun enters each Sign of the Zodiac, which varies year by year in accordance with the leap-year cycle, and slightly for other reasons, is given in the heading of page I of each month.

## DRAMATIC SUMMARY, 1968-69

**ALDWYCH**, Aldwych, W.C.2.—(1968) Oct. 23. *God Bless*, by Jules Feiffer (Roy Dotrice, Barry Stanton, Ram John Holder, Ian Hoff, Robert Lloyd and Pauline Munro). Nov. 20. *Shakespeare's Julius Caesar* (Ian Richardson, Barrie Ingham, Charles Thomas, Brewster Mason and Lynn Farleigh). (1969) Jan. 14. *A Delicate Balance*, by Edward Albee (Michael Hordern, Dame Peggy Ashcroft, Elizabeth Spriggs and Patience Collier). March 26. *Dutch Uncle*, by Simon Gray (Warren Mitchell, Patrick Magee, Megs Jenkins and Frances de la Tour). April 14. World Theatre season opened with performance of Racine's *Bérénice* by Théâtre de la Cité company from Lyons; they were followed by the Czech Theatre Behind the Gate company, the Negro Ensemble from New York and the Greek Art Theatre. June 19. Royal Shakespeare Company's production of *Troilus and Cressida* (Sebastian Shaw, Michael Williams, Alan Howard, David Waller, Norman Rodway and Helen Mirren). July 2. *Silence and Landscape*, two plays by Harold Pinter (Anthony Bate, David Waller, Norman Rodway, Dame Peggy Ashcroft and Frances Cuka). Sept. 10. Sean O'Casey's *The Silver Tassie* (Richard More, Bruce Myers, David Waller, Bernard Lloyd, Clifford Rose, Helen Mirren, Frances Cuka, Patience Collier and Sara Kestelman).

**APOLLO**, Shaftesbury Avenue, W.1.—(1968) Oct. 31. *40 Years On*, by Alan Bennett (Sir John Gielgud, Paul Eddington, Alan Bennett and Dorothy Reynolds).

**CAMBRIDGE**, Earlharn Street, W.C.2.—(1969) April 17. *Ann Veronica*, musical adaptation of H. G. Wells' novel (Peter Reeves, Arthur Lowe, Mary Millar and Hy Hazell). June 18. *Highly Confidential*, by Robert Tanitch (Hermione Gingold). Sept. 18. Piner's *The Magistrate* (Alastair Sim and Robert Coote).

**COMEDY**, Panton Street, S.W.1.—(1968) Oct. 17. *Fortune and Men's Eyes*, by John Herbert (Al Mancini, Peter Marinker, Louis Negin and Peter Howay). Dec. 9. *The Man with a Load of Mischief*, musical by Ben Tarver and John Clifton, adapted from Ashley Dukes' play (Paul Dawkins, Valentine Palmer, Julia McKenzie and Roberta d'Esti). (1969) Feb. 6. *Your Own Thing*, by Hal Hester and Danny Apolinar, U.S. musical (Les Carlson, Gerry Glasier, Leland Palmer and Marcia Rodd). April 9. *Mixed Doubles*, by various authors (Nigel Stock, Oscar Quitak, Vivien Merchant and Andrée Melly). July 8. *The Night I Chased the Women with an Eel*, by "William Payne" (John Alderton, Beatrix Lehmann and Pauline Collins).

**CRITERION**, Piccadilly, W.1.—(1969) Sept. 16. *So What About Love?* by Leonard Webb (Peter Blyth, John Thaw, Sheila Hancock and Ann Bell).

**DRURY LANE**, W.C.2.—(1969) Feb. 20. *Mame*, U.S. musical, by Jerome Lawrence, Robert E. Lee and Jerry Herman (Gary Warren, Ginger Rogers, Margaret Courtenay and Ann Beech).

**DUCHESS**, Catherine Street, W.C.2.—(1969) April 23. *The Au Pair Man*, by Hugh Leonard (Donal McCann and Joan Greenwood). July 7. *The Young Churchill*, extracts arranged by Robin Midgley, David Aukin and John Gilbert (Clive Swift, John Robinson, A. J. Brown and Avice Landon). Aug. 27. *Dames at Sea*, U.S. musical (Sheila White and Joyce Blair).

**DUKE OF YORK'S**, St. Martin's Lane, W.C.2.—(1968). Oct. 24. *Splitting Image*, by Colin Spencer (Julian Holloway, Derek Fowlds, Frank Middlemass and Lally Bowers). Nov. 19. *Dear Charles*, by Alan Melville, revived (Jack Hulbert, John

Moffat, David Hutcheson, Peter Graves and Cicely Courtneidge). (1969). March 4. *The Price*, by Arthur Miller (Harold Gary, Victor Salmi, Shepherd Strudwick and Kate Reid).

**FORTUNE**, Drury Lane, W.C.2.—(1969). May 12. *Honour and Offer*, by Henry Livings (John Sharp, Ken Wynne and Ursula Smith). June 16. *Sometime Never*, by Roy Minton (Tony Selby and Maureen Pryor). July 21. *As Dorothy Parker Once Said*, musical entertainment (Libby Morris). Sept. 29. *There'll Be Some Changes Made*, by Alun Owen (David Battley, Alan Lake, Gemma Jones and Carmen Munroe).

**GARRICK**, Charing Cross Road, W.C.2.—(1969). May 8. *Goldsmith's She Stoops to Conquer* (Tom Courtenay, Trevor Peacock, James Cossins, Nigel Terry, Juliet Mills, Rosalind Knight and Claran Madden).

**GLOBE**, Shaftesbury Avenue, W.1.—(1969). Sept. 11. *Play it Again, Sam*, by Woody Allen (Dudley Moore, Bill Kerr, Patricia Brake, Jennifer Clulow and Lorna Heilbron).

**LYRIC**, Shaftesbury Avenue, W.1.—(1969). Feb. 18. *Plaza Suite*, by Neil Simon (Paul Rogers and Rosemary Harris).

**MERMAID**, Puddle Dock, E.C.—(1968). Oct. 29. *The Goblet Game*, by Rex Edwards (Tommy Godfrey and Percy Odhams). Dec. 19. *Gulliver's Travels*, adapted by Gerald Frow and Sean Kenny (Michael d'Abbo and William Rushton). (1969). Aug. 7. *The Other House*, by Henry James (Ronald Allen and Vilma Hollingbery). Sept. 24 and 25. Marlowe's *Edward II* and Shakespeare's *Richard II* (Ian McKellen, Timothy West and Robert Eddison).

**NEW**, St. Martin's Lane, W.C.2.—(1968). Dec. 12. *Soldiers*, by Rolf Hochhuth (John Colicos, Alec Clunes and Raymond Huntley). (1969). April 16. *Anne of Green Gables*, musical, adapted from L. M. Montgomery's book by Donald Harron and Norman Campbell (Hiram Sherman, Polly James and Barbara Hamilton).

**OLD VIC** (National Theatre), Waterloo Road, S.E.1.—(1968). Oct. 8. *Home and Beauty*, by Somerset Maugham (Robert Stephens, Robert Lang, Arthur Lowe and Geraldine McEwan). Dec. 19. *Love's Labour's Lost* (Derek Jacobi, Paul Curran, Ronald Pickup, Jeremy Brett, John McEnery, Philip Locke, Joan Plowright and Louise Purnell). (1969). Feb. 13. 'H', by Charles Wood (Robert Lang, Frank Wylie, Gerald James, Paul Curran, John McEnery, Terence Taplin and Jane Wenham). May 1. *Congreve's The Way of the World* (Robert Lang, John Moffat, Edward Hardwicke, Geraldine McEwan and Hazel Hughes). July 31. *Shaw's Back to Methuselah* (Derek Jacobi, Frank Wylie, Paul Curran, Harry Lomax, Robert Lang, Bernard Gallagher, Ronald Pickup, Charles Kay, Louise Purnell, Judy Wilson, Jeanne Watts and Joan Plowright). Sept. 24. *Rabelais*, by Jean-Louis Barrault.

**PALACE**, Cambridge Circus, W.1.—(1968). Dec. 22. *Mr. and Mrs.*, musical by John Taylor (John Neville, Honor Blackman and Hylda Baker). (1969). Feb. 27. *Two Cities*, musical by Constance Cox and Jerry Wayne (Edward Woodward, John Payne and Elizabeth Power). April 30. *Belle Starr*, U.S. musical (Blayne Barrington, Malcolm Cheeseman, Betty Grable and Valeric Walsh).

**PALLADIUM**, Argyll Street, W.1. (1968). Dec 17. *Jack and the Beanstalk*, pantomime (Arthur Askey, Jimmy Tarbuck, Ivor Emmanuel, David Davenport, Charlie Cairoli, Audrey Jeans and Jean Bayless).

PICCADILLY, Denman Street, W.1.—(1968) Dec. 23. *The Young Visitors*, musical, adapted from Daisy Ashford's book by Michael Ashton and Ian Kellam (Alfred Marks, Barry Justice, Jan Waters, Anna Sharkey and Vivienne Ross). (1969). Feb. 26. *The Ruling Class*, by Peter Barnes (Derek Godfrey and Vivienne Martin).

PRINCE OF WALES, Coventry Street, W.1.—(1968). Dec. 5. *They Don't Grow on Trees*, by Ronald Millar (Ronald Lewis, Hugh Paddick, Dora Bryan and Amanda Grinling). (1969). April 15. *Cat Among the Pigeons!* by Georges Feydeau, translated by John Mortimer (Victor Spinetti, Richard Briers, Murray Melvin, Peter Gray, Helen Christie, Elizabeth Seal and Daphne Newton).

QUEEN'S, Shaftesbury Avenue, W.1.—(1968). Dec. 18. Goldoni's *The Servant of Two Masters* (Tommy Steele, Graham Crowden, Edward de Souza, Ronald Rudd, Julia Lockwood and Michele Dotrice). (1969). March 5. *What the Butler Saw*, by Joe Orton (Sir Ralph Richardson, Stanley Baxter, Coral Browne and Julia Foster). June 12. *The Stiffkey Scandals of 1932*, musical by David Wright and David Wood (Charles Lewson, Terri Stevens and Annie Ross). July 10. *Conduct Unbecoming*, by Barry England (Paul Jones, Jeremy Clyde, Michael Barrington, Donald Pickering and Maxine Audley).

ROYAL COURT, Sloane Square, S.W.1.—(1968). Oct. 29. Revival of *Look Back in Anger*, by John Osborne (Victor Henry, Martin Shaw, Edward Jewsbury, Jane Asher and Caroline Mortimer). (1969). Jan. 13. *Life Price*, by Michael O'Neill and Jeremy Seabrook (Anthony Sagar, Diana Coupland and Thelma Whiteley). Feb. 19. Opening of season of plays by Edward Bond. April 22. *In Celebration*, by David Storey (Alan Bates, Bill Owen, Brian Cox, James Bolam and Constance Chapman). July 22. Congreve's *The*

*Death Dealer* (John Castle, Nigel Hawthorne, Malcolm Tierney, Geoffrey Chater, Alison Leggat and Judy Parfitt).

ST. MARTIN'S, West Street, W.C.2.—(1968) Oct. 15. *Out of the Question*, by Ira Wallach (Michael Denison, David Knight, Bryan Hunt, Dame Gladys Cooper, Dulcie Gray and Helen Cherry). (1969). July 30. *On a Foggy Day*, by John Kerr (Kenneth Connor, Saeed Jeffrey, Siobhan McKenna and Margaret Lockwood). Sept. 4. *The Crunch*, by Felicity Douglas and Basil Dawson (Andrew Cruikshank, Michael Gwynn, Cavan Kendall, Barbara Loft and Juliet Harmer).

SAVILLE, Shaftesbury Avenue, W.C.2. (1968). Dec. 21. *Queen Passionella and the Sleeping Beauty*, pantomime (Danny La Rue, Alan Haynes, Kevin Scott, Ray Fell and Moya Donnelly). (1969). July 1. *The Resistible Rise of Arturo Ui*, by Bertolt Brecht (English version by George Tabori) (Leonard Rossiter, David Graham, Christopher Benjamin and Del Henney).

SAVOY, Strand, W.C.2.—(1968). Oct. 16. *The Secretary Bird*, by William Douglas-Home (Kenneth More, Terence Longdon, Jane Downs and Judith Arthy).

WHITEHALL, Whitehall, S.W.1.—(1969) March 19. *Dead Silence!*, by Monte Doyle (Alfred Marks, Emrys Jones, John Horsley and Peggy Thorpe Bates). Sept. 22. *Pyjama Tops*, by Mawby Green and Ed Feilbert (Philip Gilbert, Bob Grant, Peter Birrel, Tony Hughes, Katharine Schofield, Luan Peters and Julia Goodman).

WYNDHAM'S, Charing Cross Road, W.C.2.—(1968). Nov. 6. Revival of T. S. Eliot's *The Cocktail Party* (Michael Aldridge, Richard Leech, Mark Kingston, Eileen Atkins and Pauline Jameson). (1969). Feb. 11. *The Boys in the Band*, by Mart Crowley (Kenneth Nelson, Tom Aldridge and Leonard Frey).

PRESIDENTS OF THE THE ROYAL SOCIETY

The Royal Society received a charter from Charles II on April 22, 1662, when it was incorporated as a body politic and corporate under the appellation of The President, Council and Fellowship of the Royal Society of London, for improving Natural Knowledge.

## TOPICS OF THE DAY

## THE MAUD REPORT

In May, 1966, a Royal Commission, under the chairmanship of Sir John Maud (now Lord Redcliffe-Maud), was appointed to consider the structure of local government in England, outside Greater London, and to make recommendations. It was the first attempt to examine the government of our towns and countryside from top to bottom, and to plan a radically new start. The eleven-strong Commission published its report three years later on June 11, 1969.

## The Basic Faults

The report stated that there were four basic faults with the existing structure of local government. In the first place, local government areas did not fit the pattern of life and work in modern England and the gap would widen as social, economic and technological changes quickened. Secondly, the fragmentation of England into 79 county boroughs and 45 counties, exercising independent authority and dividing town from country, had made the proper planning of development and transport impossible. Thirdly, the division of responsibility within each county between the county council and a number of county district councils, together with the position of county boroughs as islands in the counties, meant that services which should be in the hands of one authority were split among several. This greatly complicated the work of meeting comprehensively the different needs of families and individuals. Lastly, local authorities were too small, in size and revenue, and in consequence too short of highly qualified manpower and technical equipment, to be able to do their work as well as it could and should be done.

The report went on to say that partly because of these structural faults, and in spite of the devoted efforts of councillors and officers, there existed serious failings in local government's relationships with the public and with the national government. The complex local government machinery seemed, and often was, irrelevant and therefore impotent in face of the problems that confronted people in their daily lives, either collectively or as families and individuals. Hence the feeling of many people that local government could not help them, and the frequent sense of frustration among councillors and officers. Parliament and the central government also doubted the ability of local governors, within the straitjacket of the present system, to run local affairs. Furthermore the variety in type and size of local authority, and the existence of several associations reflecting that variety, meant that local government seldom acted effectively as a single body in its dealings with central government.

## Solving the Problem

In considering what changes were needed to correct the basic faults, the Commission decided that there was one fundamental question—what size of authority, or range of size, in terms of population and of area, was needed for the democratic and efficient provision of particular services and for local self-government as a whole?

After examining each of the main services in turn, it decided that the answer to the problem must be found by seeking to apply to each part of the country a number of general principles. The first of these was that local authority areas would have to be so defined that they enabled citizens and their elected representatives to have a sense of common purpose. The areas must also be based upon the interdependence of town and country.

All personal services, like education, health and

housing, as well as all services concerned with physical environment, like planning and transport, must be in the hands of one authority and if possible the same authority. The reason for this was that the influence of one on the other was great and was likely to increase.

Authorities must also be bigger than most county boroughs and all county districts were at present, if they were to command the resources and skilled manpower which they needed to provide services with maximum efficiency. The size of authorities must vary over a wide range if areas were to match the pattern of population, but a minimum population was necessary. At the other end of the scale, authorities must not be so large in terms of population that organization of their business became difficult and the elected representatives could not keep in touch with the people affected by their policies.

When the area required for planning and other environmental services contained too large a population for the personal services, a single authority for all services would not be appropriate. In these parts of the country, responsibilities must be clearly divided between two levels, and related services kept together. Lastly, the new local government pattern should so far as practicable stem from the existing one.

## The Main Conclusions

Having considered what structure of local government would do most justice to the above principles, the Commission came to a number of conclusions. Their main recommendations are set out below:

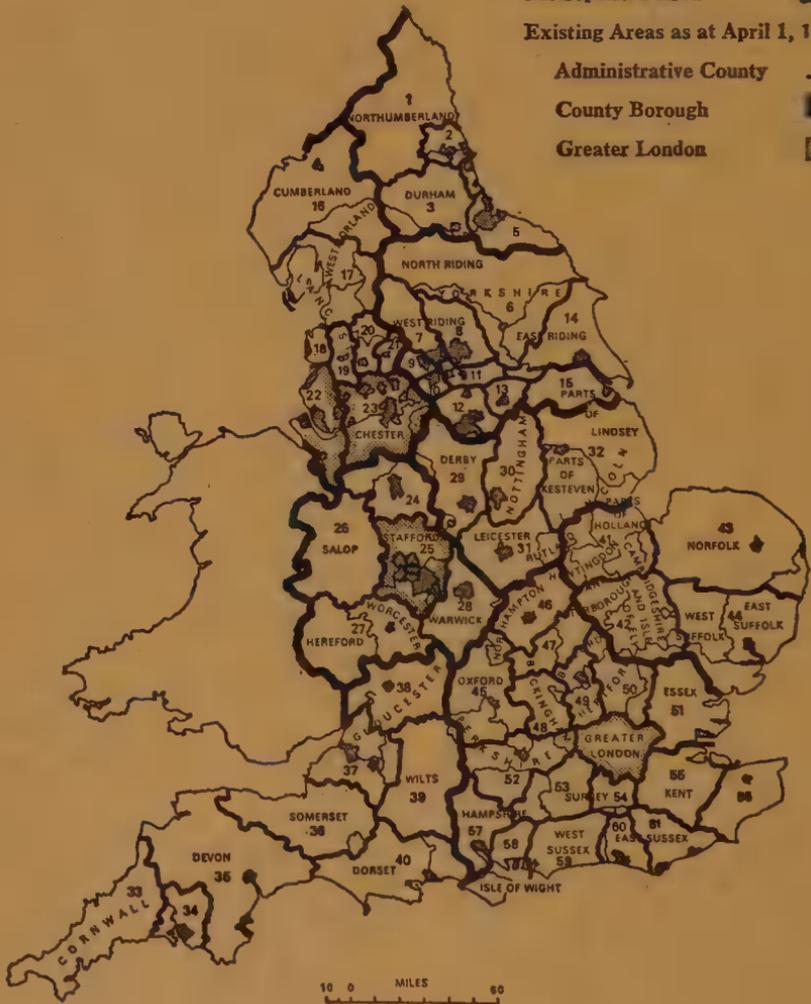

England should be divided into 61 new local government areas, each covering town and country (see map). In 58 of them a single authority, called a unitary authority, should be responsible for all services. In the 3 very large and, for some purposes, indivisible metropolitan areas around Birmingham, Liverpool and Manchester, responsibility for services should be divided in each case between a metropolitan authority whose key functions would be planning, transport and major development, and a number of metropolitan district authorities whose key functions would be education, the personal social services, health and housing. There would be 20 metropolitan districts in all—7 in the Birmingham, 4 in the Liverpool and 9 in the Manchester area.

These 61 new local government areas should be grouped, together with Greater London, in 8 provinces, each with its own provincial council. Provincial councils should be elected by the authorities for the unitary and metropolitan areas, including, in the south-east, the Greater London authorities, but should also include co-opted members. The key function of these councils would be to settle the provincial strategy and planning framework within which the main authorities must operate. They would replace the present regional economic planning councils and collaborate with central government in the economic and social development of each province.

Within the 58 unitary areas, and wherever they were wanted within the 3 metropolitan areas, local councils should be elected to represent and communicate the wishes of cities, towns and villages in all matters of special concern to the inhabitants. These local councils would, at the outset, succeed the existing county borough, borough, urban district and parish councils, though provision should be made for later adjustment of their areas. The only duty of the local council would be to re-

present local opinion, but it would have the right to be consulted on matters of special interest to its inhabitants and it would have the power to do for the local community ■ number of things best done locally. It would also have the opportunity to play ■ part in some of the ■■ local government

services, on ■ scale appropriate to its resources and subject to the agreement of the main authority.

**Advantages of the Proposed System**  
 The Commission believed that their proposed ■■ system would greatly improve service to the

public, both in providing a better environment and in taking care of the needs of individual people and families. There would be a more effective use of scarce resources and skilled manpower and increased ability of local governors to meet the challenge of technological and social change. There would also be more likelihood that people would recognize the relevance of local government to their own and to their neighbour's well being and furthermore, the revitalizing of local self-government throughout the country would mean that people would have more sense of taking an active part in their own government.

#### Prime Minister's Statement

In a statement to the House of Commons on June 22, 1969, the Prime Minister said that the Government accepted in principle the main recommendations of the Commission, which had proposed "the most far-reaching reorganization of local government this country has ever seen." He added that it was the Government's aim to reach decisions on the main structural reforms as soon as possible.

#### THE WHEATLEY REPORT

As well as appointing a Royal Commission on Local Government in England in May, 1966, at the same time the Government also appointed one to consider the structure of local government in Scotland, under the chairmanship of Lord Wheatley. Its report, published on Sept. 25, 1969, recommended a new structure.

**Regional authorities.**—There should be seven authorities for Scotland, viz., Highlands; North East; East; South East; Central; West; South West. These regional authorities should exercise the following main functions, viz., major planning and related services (industrial development, transportation and roads, water, sewerage, etc., redevelopment, new towns, control of the countryside and tourism); personal social services (education, social work, health); housing; protective services (police, fire, civil defence); weights and measures and consumer protection; refuse disposal; coast protection; parks and recreation; museums and art galleries; registration of births, deaths and marriages; registration of electors.

**District authorities.**—There should be 37 district authorities for which the main functions recommended were, viz., local planning and related services (assistance to industry, redevelopment, control of the countryside); building control; housing improvement; ancillary housing functions; civil defence (local aspects); parks and recreation; community centres; museums and art galleries; libraries; environmental functions (refuse collection, food and drugs, clean air, etc.); regulation and licensing; licensing courts; administration of justice.

The two levels of authorities should be independently elected, have their own means of raising finance, and carry out in their own right the functions listed above. In many spheres, however—particularly intelligence, certain aspects of planning, housing, redevelopment, and the provision of parks and recreational facilities—they would have to work closely together.

**Community councils.**—There should also be provision for community councils throughout Scotland. These would not be local authorities, nor would they be created by Act of Parliament. It would be for local communities to decide whether they wanted community councils or not. A council would be able to give expression to local opinion, to improve the amenity of its area, to run certain services or facilities locally by arrangement with the district authority or regional authority,

and to maintain traditional and ceremonial functions.

The structure was considered to provide seven very strong regional authorities, capable of running the large-scale expensive services. These authorities should be able to take on new services—even the National Health Service, if it were decided that this should become part of local government. The more local services should operate under the 37 district authorities. These would be big enough to tackle the local problems confidently, but be more accessible than the regional authorities, most parts of their areas being within relatively easy reach of the headquarters.

#### THE THEFT ACT, 1968

This Act, which does not extend to Scotland or Northern Ireland, came into force on January 1, 1969. It completely revises the law of England and Wales as to theft and similar or associated offences, and for this purpose repeals the Larceny Act, 1916, and many other statutory provisions, and abolishes any offences at common law of larceny, robbery, burglary, receiving stolen property, etc.

#### Theft, Robbery and Burglary

**THEFT.**—The principal offence created by the Act is theft, which is committed by a person who dishonestly appropriates property belonging to another with the intention of permanently depriving the other of it. This offence replaces the old offences of larceny, embezzlement and fraudulent conversion, and broadly speaking the effect is as if fraudulent conversion had been widened to include the whole of larceny and embezzlement. Thus *dishonest appropriation* (which bears the general meaning of fraudulent conversion) of property belonging to another becomes the central feature of theft, whereas the basis of larceny was the *taking and carrying away* of property in the possession of another.

**TEMPORARY DEPRIVATION.**—Theft requires intention permanently to deprive the owner. Temporary deprivation thus does not constitute theft, but the Act creates two specific offences involving temporary deprivation. The first (inspired by the removal from the National Gallery of Goya's portrait of the Duke of Wellington) covers the removal of an article in certain circumstances from a place to which the public have access. The second (which was previously dealt with by special statutes) covers the unauthorized taking of a conveyance constructed or adapted for the carriage of a person by land, water or air.

**ROBBERY.**—There was no statutory definition before the Act of robbery, which was an aggravated form of larceny. Robbery is now defined as being committed by a person who steals and, immediately before or at the time of doing so, and in order to do so, uses force on any person or puts or seeks to put any person in fear of being then and there subjected to force. If force or threats of force are used but no theft is accomplished the offence committed will be assault with intent to rob.

**BURGLARY.**—The offence of burglary under the Act replaces the old offences of burglary, house-breaking and sacrilege, which involved many highly technical concepts (such as "breaking", which is no longer necessary). The new offence is committed by a person who: (i) enters any building or part of a building as a trespasser and with intent to commit therein an offence of theft, inflicting grievous bodily harm, rape or unlawful damage; or (ii) having entered any building or part of a building as a trespasser, steals or attempts to steal

anything therein or inflicts or attempts to inflict grievous bodily harm on any person therein. The term "building" includes inhabited vehicles or vessels. If at the time of the commission of the offence the offender has with him any firearm or imitation firearm, weapon of offence or explosive, he will be guilty of the more serious offence of aggravated burglary. The Act also makes it an offence for a person to have with him, when not at his place of abode, any article for use in the course of or in connection with any burglary, theft or cheat.

### Fraud

**OBTAINING BY DECEPTION.**—The old offence of obtaining by false pretences has been replaced in the Act by the offence of dishonestly obtaining by deception property belonging to another with the intention of permanently depriving the other of it. The scope of the new offence is wider than the old in that false promises are brought within the definition of deception. A further offence covers cases where what is obtained is not property but pecuniary advantage, such as insurance cover or the opportunity to earn a salary.

**OTHER OFFENCES INVOLVING FRAUD.**—The Act creates certain other offences involving fraud, covering false accounting (replacing the offence under the Falsification of Accounts Act, 1875), false statements by company officers, suppression, etc. of certain documents and procuring the execution of valuable securities.

### Blackmail and Handling

**BLACKMAIL.**—The word "blackmail" was formerly used as a means of referring to a group of offences under the Larceny Act, 1916, in which, however, the word did not appear. Under the Act the offence of blackmail is committed by a person who, with a view to gain for himself or another or with intent to cause loss to another, makes any unwarranted demand with menaces. A demand with menaces is unwarranted unless the person making it does so in the belief that he has reasonable grounds for making the demand and that the use of menaces is a proper means of reinforcing the demand.

**HANDLING.**—The old offence of receiving has been replaced in the Act by the offence of handling stolen goods, which is committed by a person who (otherwise than in the course of the stealing) knowing or believing them to be stolen, dishonestly receives stolen goods, or dishonestly undertakes or assists in their retention, removal, disposal or realization by or for the benefit of another person, or arranges to do so. Stolen goods include goods obtained by deception or blackmail. The new offence is wider than the old, since it is not confined to cases of taking possession of stolen goods, but includes a much greater range of prohibited conduct.

**ADVERTISING REWARDS.**—The Act (reproducing a pre-existing offence) prohibits the use of certain words, e.g. to the effect that no questions will be asked, in public advertisements of rewards for the return of stolen or lost goods.

**MISCELLANEOUS.**—In addition to the creation of the specific offences mentioned above, the Act also makes various provisions with regard to procedure and evidence, including provisions as to searching for stolen goods, evidence and procedure on charges of theft or handling, orders for restitution, the jurisdiction of quarter sessions and summary trial of offences under the Act, and the position of spouses of offenders and witnesses.

### THE VICTORIA UNDERGROUND

The third section of the Victoria Line, the first underground railway to be built in London for more than 60 years, was officially opened by the Queen on March 7, 1969. The first section of the £70,000,000 line, between Walthamstow Central and Highbury and Islington, had been opened in September, 1968, and the second, from Highbury and Islington to Warren Street, came into operation a few months later. A 3½-mile extension of the line southwards from Victoria under the River Thames to Brixton is under construction and it is planned to open it by the end of 1971.

The Victoria Line is intended to relieve the heavy strain placed on other Underground lines and to ease street congestion, as well as opening up new cross-town and cross-river links. Of the sixteen stations on the line, including the extension to Brixton, fourteen provide interchange facilities with other Underground or British Railways lines. The length of line from Walthamstow Central to Victoria is ten route miles.

Incorporating automatic train operation, automatic ticket control and closed circuit television, the Victoria Line is the most highly automated and technically advanced underground railway in the world. Each train responds to coded commands transmitted through the running rails and picked up by coils mounted in front of the leading wheels. There are two distinct sets of codes, one for the safety system and one for the driving commands. Cameras located on platforms and at other key points in stations transmit pictures to the control centre enabling the staff there to see what conditions are like at any time and to take any action that may be necessary.

### THE BRITISH TRANS-ARCTIC EXPEDITION

A great feat of exploration was finally accomplished by the British Trans-Arctic Expedition in 1969. On May 30, the team sent a message to the Queen saying that the first surface crossing of the Arctic Ocean had been completed. Her Majesty, in turn, sent her warmest congratulations to Wally W. Herbert, the leader of the expedition, and to his three companions Dr. R. M. ("Fritz") Koerner, Allan Gill and Capt. Ken Hedges, who had spent 476 days trekking across over 3,000 miles of treacherous ice.

The four men had begun their hazardous journey in February, 1968, from Point Barrow, Alaska, where their radio operator, Squadron Leader Freddy Church, had been stationed to maintain contact with them and to transmit messages to London. During the next five months they faced many difficulties, including the cutting of their radio link by fighting huskies. Towards the end of July, when the thaw made sledging impossible, they set up summer camp for about six weeks. During this time they were forced to shoot two polar bears. They set out again at the beginning of September but had to return to the camp when Gill injured his foot. Here they remained for the winter instead of making a winter camp 200 miles farther north as planned.

The expedition was now well behind schedule and there was a constant race against time. On April 5, 1969, the North Pole was reached, but two days later there was a further setback when a tent was lost in a fire and the four men had to be accommodated in the remaining tent, which was only 7 ft. 6 ins. square and 6 ft. 6 ins. high. Later in the month, the team was out of radio contact for six days and fresh supplies were dropped by plane to them just in time.

After it had been decided that Gill would be fit enough to complete the rest of the journey, he met with further trouble and was nearly lost when trapped on breaking ice. Fortunately he just managed to rejoin his companions on a safer ice floe. After this near-disaster things greatly improved; a record 120 miles were covered in the following week and, on May 24, land was sighted for the first time in 15 months.

On May 29, the team was only about 50 yards from land when their ice floe drifted away from the shore. On the following day, however, they achieved their goal, when after four attempts, Hedges and Gill finally scrambled from the breaking ice on to a rocky island north of Spitsbergen. The men and huskies were lifted off the ice by helicopter on June 11 in deteriorating conditions and taken aboard H.M.S. *Endurance* for the voyage home to England.

The Duke of Edinburgh was patron of the expedition, which was partly sponsored by the *Sunday Times*.

### TRANSPLANT SURGERY

Nineteen sixty nine might seem a disappointing year in the transplantation field, marked by despondency among some surgeons and disillusion among the public. This was particularly so following the death of Dr. Philip Blaiberg, the world's longest surviving heart-recipient, and the rumours that attended the third British heart transplant operation. There was reason for the disappointment in the case of heart transplants, which are so much in the public eye, but other branches of the art were progressing steadily. Kidney graft operations had reached the stage where there was no public attention paid to them, unless they were part of a transfer of organs from one unfor-

tunate accident victim to a number of patients. In the extremely complicated fields of lung and liver transplants a greater measure of success was achieved than before. A Belgian was still living eight months after a lung transplant operation and two patients of Professor Roy Calne, of Cambridge, were surviving after seven months with new livers, despite the fact that the liver is the most complicated organ in the body with over fifty different functions.

The year began with a report from the British Medical Association's Planning Unit which urged the stepping up of kidney transplants but declared that heart transplantation had a considerably lower priority. "Research directed to sorting problems of rejection is more valuable than dramatic acts of surgical virtuosity," was how the chairman of the Unit, Professor Henry Miller, put it. It had been estimated that the lives of 2,000 people with kidney disease could be saved each year with long-term use of artificial kidney machines. The direct cost of this was £30,000,000 but it would also require the services of 10,000 skilled staff. At a cost of £6,000 a patient, kidney transplants, the Unit considered, were a better investment. About 1,000 of those dying from kidney failure each year in Britain were between the ages of 15 and 54 and many of these might be saved by transplants from 600 donors. Expanding the kidney transplant programme was a matter of urgency both from humane and economic viewpoints. With 15,000 deaths annually from heart troubles, even between the ages of 20 and 54, there was no potential supply of donors on the necessary scale and transplants were unlikely to make a serious contribution to the problem of degenerative heart disease. The real value of the operation was likely to be in young patients with congenital heart disease which would not respond to orthodox treatment. Heart and lung transplants, declared the report, should be undertaken as research activities on a small scale.

### Fewer Heart Transplants

British records showed that there had been 128 heart grafts in the world since Prof. Christian Barnard carried out the first in Cape Town in December, 1967. There had been only 28 operations from January to June, 1969, against 80 in the previous six months. Thirty-two of these 128 were still surviving after the death of Dr. Philip Blaiberg, Prof. Barnard's second and most famous patient, on August 17. He had survived 593 days and this compares with the one year which some surgeons have suggested as the criterion of success in transplant operations. After the death of Dr. Blaiberg, heart transplants came to a stop in Houston, Texas, the centre with most graft operations. A great advance in dealing with the rejection of the graft was needed, it was admitted, before the chance of success made the mental anguish and cost—about £10,000 an operation—worth-while. Dr. Denton Cooley, of Houston, commented on Dr. Blaiberg's death, "while he was living, the promise of transplants also lived. Now we must reflect whether to continue or not." But he added that there were good reasons for continuing heart transplants for those "at the terminal stage of illness, especially for those who know the risk and want to live another five or six months." Prof. Barnard's comment was that his team had operated on five patients who had lived for a total of 1,101 days, an average survival of over 220 days. Without operations the patients would not have lived more than 30 days.

### Third British Heart Transplants

Charles Hendrick, aged 59, received the heart of Miss Margaret Sinsbury, a 29 years old student

nurse, in Guy's Hospital, London, on May 16. He died on August 31, after cardiac arrest following a lung infection. Miss Sinsbury had an accident on her motor scooter on May 13 and was taken to Putney Hospital with severe head injuries. Public concern arose when the circumstances in which she was transferred to Guy's Hospital for further examination instead of to the nearer Atkinson Morley Hospital, a leading centre for brain damage treatment, were disclosed. The decision to transfer her was taken on the morning of May 15 and that afternoon the transplant team was told that a possible donor was coming. That night Mr. Hendrick was taken to Guy's and, when traffic had died down, Miss Sinsbury was moved to the hospital to be placed in the intensive care unit. The next morning she was examined again, by two doctors, and then the ventilator keeping her heart beating was switched off. Even with the ventilator, said a hospital spokesman afterwards, she would have lived only a very short time. Concern was expressed at the decision to switch off the machine and also at the fact that she had been moved from Putney to Guy's when supposed to be in a dying condition. In April the Council of the B.M.A. had declared that the moving of a desperately ill patient from one hospital to another, just so that his body should be available, after death, to provide organs for transplants, was ethically unacceptable. In the U.S.A. concern had been expressed at dying people being moved great distances to transplantation centres, in one case the 1,300 miles from Boston to Houston. In fairness, it should be stressed that Guy's Hospital declared that Miss Sinsbury had been moved to Guy's in her own interests, for further examinations.

Whatever the circumstances attending Miss Sinsbury's move it did increase public concern. Prof. William Peart, at St. Mary's Hospital, Paddington, said later that no kidney transplants had been carried out at the hospital for two months because of the inimical atmosphere. In the U.S.A. women went to the extent of having hearts tattooed on their breasts with the words "No Transplants". On the other hand, Prof. Roy Calne spoke of the irresponsible reporting of some heart transplants and said it had caused public concern about the integrity of the medical profession in its care of the dying. This, with the Human Tissue Act, which had ambiguities and was generally unhelpful in the development of transplantation, plus the attitude of some coroners had made it extremely difficult to keep transplantation units in the U.K. fully supplied. Mr. Richard Crossman, Secretary of State for the Social Services, expressed his concern lest the controversy over heart transplants should have reduced the number of kidney donors. He favoured a voluntary system of "contracting in"—in which people willing to donate organs should register. A committee headed by Sir Hector MacLennan, President of the Royal Society of Medicine, reported in favour of contracting out, the recording of a personal objection and the assumption, otherwise, of a willingness to donate. It did so by only six votes to five and Mr. Crossman let it be known that no action would be taken until there was a clearer expression of medical and public opinion.

#### Future Prospects

One way round the concern about organ transplants would be to provide man-made aids. In Houston Haskell Karp, 47, received the world's first artificial heart on April 4. He lived with it for 63 hours, was given a human heart on April 7 and died the next day. His artificial heart had to be linked to a heart-lung machine the size of a filing cabinet. Apart from the problem of living hooked

up to a large machine, the machine did damage to the red cells in his blood. A working artificial heart is foreseeable—provided engineers get over the problem of finding materials which survive in the body, making a pump as smooth as the heart and finding a source of power. An artificial liver would be far more difficult. In the case of children, there will always be the need to provide an organ which can grow with the patient. The main hope is the solving of the rejection problem. This is not just the problem of making the body accept a foreign organ but to do so without making it over-vulnerable to infection. The usual anti-rejection drugs knock out the whole of the body's defences against foreign invaders, including disease germs, equally. But if it were possible to reduce the activity of certain cells, called lymphocytes, alone, then it should be possible to reduce rejection without making the body irremediably liable to disease. ALS, anti-lymphocytic-serum, offers some hope. This is a serum which acts against lymphocytes and is obtained by injecting lymphocytes from one species into another, in our case, human lymphocytes into horses. It has been used in a highly successful sequence of kidney transplants in America and plans are under way, at the time of writing, for using it in the United Kingdom. Some experiments in Britain, however, have revealed a high incidence of cancerous growths in mice given prolonged treatment with ALS. Another hope is to match the tissues of donor and recipient so that rejection is not so violent. Studies of tissue typing are going on in many countries and in New York an organ transplant registry was set up for this purpose, but the real hope is to provide specific immunological tolerance. This is the condition when one person is made tolerant of grafts from another. The effect can be produced in infant animals, before their immune systems have started to operate properly, and work is going on to induce it in adult animals. Some further hope on these lines has been provided by Prof. Calne's work on pigs. He has found that not only do pigs accept liver transplants without anti-rejection treatment but that the transplantation of a liver into a pig for even a few hours can make that pig tolerant to other organs from the same donor animal, organs which normally it would reject quickly. The same effect has been demonstrated with extract of liver and Calne is optimistic that this work will have some eventual application to man.

#### THE THIRD LONDON AIRPORT

In May, 1968, the Government announced its decision to set up a non-statutory commission, under the chairmanship of Mr. Justice Roskill, "to inquire into the timing of the need for a four-runway airport to cater for the growth of traffic at existing airports serving the London area, to consider the various alternative sites, and to recommend which site should be selected".

The Commission held a number of meetings to assess the scope and nature of its task. It decided that during the first stage of the inquiry, it would consider in a broad way the whole range of alternative sites, eliminate those which were clearly unsuitable and identify the small number which required more detailed consideration. The second stage would consist of the hearing of local evidence about the short listed sites and the third stage the investigation and research into matters relevant to the choice to be made between them. The material produced during this latter stage would be considered in the fourth stage and the fifth and final stage would allow for interested parties to test the material produced during the earlier stages.

During the last two months of 1968, the Commission took evidence from various interested parties at a series of public hearings. Mr. P. G. Masfield, Chairman of the British Airports Authority, gave evidence covering a range of subjects, including airport layout and specification and the estimated costs involved. Planning bodies, like the Town and Country Planning Association, discussed the relationship between a third London airport and regional planning for the South-East of England. Organizations concerned with the control of aircraft noise and nuisance, like the British Association for Control of Aircraft Noise, also gave evidence. And at another hearing the Commission inquired into the problem of surface access to the airport, and were given advice by the Ministry of Transport.

On Feb. 24, 1969, the Commission wrote to the President of the Board of Trade, informing him that it had completed the first of the five stages of its work. It stated that the sites which it had decided should be short listed and thus made the subject of more detailed examination were, Cublington (Wing), Bucks.; Foulness (off-shore), Essex; Nuthampstead, Herts.; and Thurleigh, Beds. Later it was decided to consider an alternative site a mile and half away from the original choice at Thurleigh.

The Commission stated in its letter, which was published on March 4, that it had compiled a long list of possible sites, including many suggested by the public. This was, in due course, reduced to a list of nearly thirty sites. The short list was then evolved with the aid of the Commission's own research staff, Government Departments and many others in universities and elsewhere. No view was expressed on the urgency for the need of a third London airport. The timing of that need would require later detailed consideration.

The Commission pointed out that Stansted, Essex, did not find a place upon the short list while Nuthampstead had been included. In the Commission's view, of the possible sites in that area, Nuthampstead offered most advantage over Stansted in respect of noise and of air traffic compatibility with Heathrow. Earlier, in May, 1967, the Government had published a White Paper announcing its decision that London's third airport should be at Stansted.

With the first stage of its work completed, the

Commission went on to consider the scope of the stage two hearings. The main purpose of these would be to provide an opportunity for the Commission to be informed as early as possible of all the local implications which it would have to take into account in its further work on the short list sites. It would not advance proposals for an airport at the particular site in question but, on the assumption that an airport might be located there, would ask for objections, comments and representations on the local consequences. Finally, the hearings were not intended to afford an opportunity for making comparisons between the site in question and the other sites.

Before each hearing the Commission published information on the site concerned intended to give a broad indication of what would be involved if an airport were to be located there. It covered, in general, such subjects as airport layout, site and employment, and runway alignment, noise and disturbance and surface access. The dates on which the four hearings began were, Foulness on May 5 at Southend; Nuthampstead on June 9 at Royston; Cublington on July 14 at Aylesbury; and Thurleigh on Sept. 11 at Bedford. Meanwhile the detailed research work into the short listed sites continued. Here, the Commission decided that its two main objectives were to make as comprehensive as possible a comparison of the costs and benefits relevant to each of the four sites, and to assess when the third London airport should come into service. It was hoped to complete this third stage towards the end of 1969.

#### JOHN FAIRFAX'S ATLANTIC ROW

Two thousand people watched John Fairfax make landfall at Hollywood Beach, Fort Lauderdale, Florida, on July 19 to become the first man ever to row the Atlantic Ocean alone. When the 31-year-old British oarsman had set out from Las Palmas in the Canary Islands on Jan. 20, he had hoped to reach Florida within three months. Instead he spent 180 days at sea in his 23-foot boat *Britannia*, which had been specially designed by yachtsman Uffa Fox for maximum stability and safety. Fairfax told welcome how he nearly gave up his 4,000-mile row when only a mile from his goal. He also said he had been "plagued with frequent hallucinations".

#### NATIONAL HEALTH SERVICE STATISTICS

## EDUCATION IN THE UNITED KINGDOM

It was announced early in 1969 that public expenditure on education in Great Britain was estimated to rise from £2,123 million in 1967-68 to £2,295 million in 1968-69, when it would exceed expenditure on defence. Further increases were projected for the two following years.

### ENGLAND AND WALES

The present pattern of education in England and Wales derives from the Education Act of 1944 (Butler Act) which was modified by nine minor Acts from 1946 to 1968. New legislation is now being prepared which will consolidate current legislation and "make some desirable changes in the law".

The Secretary of State for Education and Science is assisted by three Ministers of State and a Parliamentary Under-Secretary of State. His responsibilities relating to civil science and (exercised through the University Grants Committee) the universities, cover the whole of Great Britain, but his functions in connection with schools, further education and teachers relate to England and Wales only. The work of the Department in London is organized in 17 Branches. Part of the Department, the Education Office for Wales, is in Cardiff and most of the work of the 550 H.M. Inspectors (who inspect schools and other educational establishments apart from universities and provide the Secretary of State with information and advice) is in the local education authority areas. The Secretary of State's requirements under the Act are issued, and guidance is given, mainly in the form of regulations, orders and circulars addressed to local education authorities and other bodies, and in booklets. A report and six volumes of statistics are published annually.

Among the main features of the system are:—

(a) Its administration is decentralized, the responsibility for providing state primary, secondary and further education (but not university education) to meet the needs of their areas being that of the 162 local education authorities (L.E.A.'s). These are the elected councils of counties and county boroughs and the outer London boroughs, the Inner London Education Authority being a specially constituted statutory committee of the Greater London Council. The councils appoint education committees consisting of some of their own members (a majority of the committee) and some other persons with experience in education and knowledge of local educational conditions. The L.E.A.'s maintain schools and colleges and build new ones, pay teachers and provide equipment and materials. Most of the public money spent on education is disbursed by the local authorities. Education is by far the largest item of their expenditure. L.E.A.'s are financed by rate support grants from the Ministry of Housing and Local Government and from the rates.

(b) Voluntary agencies play an important part in educational provision often in co-operation with the State. Some indication of its nature and extent is given below.

There are separate central advisory councils for education in England and Wales which advise the Secretary of State, usually on subjects referred to them. Their membership changes from one reference to another. Among the subjects on which the Council for England has reported in recent years are the education of boys and girls aged 15 to 18 (the Crowther Report, 1959), the education between 13 and 16 of pupils of average or less than average ability (the Newsom Report on *Half our Future*, 1963), and primary education and the transition to secondary education (the Plowden Report, 1967). The Plowden Report on *Children and their Primary Schools* recommended a national policy of positive discrimination in favour of areas where children are most deprived socially.

### SCHOOLS AND PUPILS

Schooling is compulsory for all children between 5 and 15 years (16 years from 1972-73). No fees are charged in any publicly maintained school.

There are four main categories of school: (a) those maintained by local education authorities, the authorities meeting their expenditure partly from local rates and partly from grants made by the Ministry of Housing and Local Government; (b) direct grant schools which are assisted by grants from the Department of Education and Science; (c) recognized independent schools i.e. independent schools which have sought and obtained recognition as efficient after inspection by H.M. Inspectors of Schools; (d) other independent schools.

Maintained schools are of two types: (i) county schools (19,000) which are built, maintained and staffed by local education authorities. Their managers (primary schools) and governors (secondary schools) are appointed by the L.E.A.'s. (ii) Voluntary schools (10,000) which although built by voluntary bodies (mainly religious denominations) are maintained by an L.E.A. More than two-thirds of the voluntary schools are Church of England schools and about 2,000 are Roman Catholic. Voluntary schools are of three kinds: controlled, aided, and special agreement. In controlled schools the L.E.A. nominates two-thirds of the managers or governors (the rest are nominated by the voluntary body), bears all costs and appoints the teachers. In aided schools the managers or governors (two-thirds appointed by the voluntary interest and one-third by the L.E.A.) are responsible for repairs to the exterior of the school building and for improvements and alterations to it though the Department of Education and Science may reimburse up to four-fifths of approved expenditure. The L.E.A. meets all running costs. The managers or governors control the appointment of teachers. Special agreement schools are those where the L.E.A. may, by special agreement, pay between one-half and three-quarters of the cost of building a new, or extending an existing, voluntary school, almost always a secondary school. Two-thirds of the governors are appointed by the voluntary body and the remainder by the L.E.A. Expenditure is normally apportioned between the authority and the voluntary body as for an aided school.

A direct grant grammar school has an independent governing body with L.E.A. representatives and receives maintenance grants direct from the Department of Education and Science in return for which a quarter of its places ("free places") are offered to pupils who have attended a grant-aided primary school for not less than two years. The remainder of the places may be available for fee-payers, except that up to a further 25 per cent. ("reserved places") may be claimed by the authority. The authority's proportion of the admissions may not, unless the governors agree, exceed one half. Fees are paid by the L.E.A.'s for the places they take up and they pay for about 60 per cent. of direct grant pupils. The fees paid by the parents of all other pupils are assessed according to the parents' means, any balance being paid to the school by the Department of Education and Science. The maintenance grant from the D.E.S. to the school comprises a capitation grant for every boy and girl in the school together with an additional sum for each sixth-former.

By the term public schools is usually meant the independent schools in the membership of the

Headmasters' Conference, the Governing Bodies Association or the Governing Bodies of Girls' Schools Association.

*Independent schools* charge fees and do not receive grants from the State. *Preparatory schools* are mainly for boys from about 11 to 13 years who wish to enter public schools. All independent schools are open to inspection and must register with the Department of Education and Science which lays down certain minimum standards and can make schools remedy any unacceptable features of their buildings or instruction and exclude any unsuitable teacher or proprietor. To be designated "recognized efficient", an independent school must satisfy the D.E.S. that its standards are broadly comparable with those of grant-aided schools.

In 1968 the Public Schools Commission, under the chairmanship of Sir John Newsom, published its first report on the integration of the independent boarding schools with the state system of education. The Commission's general conclusion was that independent schools are a divisive influence in society and that the pupils, the schools and the country would benefit if children from a wider social background were admitted to them.

The Commission has now been reconstituted, under the chairmanship of Professor D. V. Donnison, to consider its remaining terms of reference: to advise on the integration of day independent schools with the national system of education, and on the ways in which direct grant grammar schools in England and Wales and grant-aided schools in Scotland can participate in the movement towards comprehensive reorganization; and also to review the principle of central government grant to those schools.

*The State System.*—*The Primary Stage* begins at 5 years and the transfer to secondary school is made between 10½ and 12 years. About half the primary schools take 5 to 11-year olds; about a quarter are schools for infants (up to 7 years only); and most of the rest take juniors only (7 to 11 year olds). Children under 5 may attend the limited number of nursery schools or nursery classes attached to infant schools.

*Secondary Stage.*—Secondary schools are for children aged 11 to 15 (16 from 1972-73) and over. In January, 1967, when there were 2,832,851 pupils in maintained secondary schools the main types were: (a) *secondary modern* schools (1,459,377 pupils) providing mainly a general education with a practical bias, with an increasing number of pupils staying on after the school-leaving age; (b) *grammar* schools (694,898 pupils) providing an academic course from 11 to 16-18 years and constituting the main route to the universities and the professions; (c) *comprehensive* schools (407,475 pupils) catering for the secondary education of all pupils in an area; and (d) *technical* schools (69,704 pupils) providing an integrated academic and technical course. The allocation to (a), (b) and (d) of pupils leaving primary schools at or about the age of 11 years often took account of an "eleven plus" examination involving attainment or intelligence tests.

The Government aims to end selection at eleven plus, abolish separatism in secondary education and provide a system of secondary education in comprehensive schools which will cater for all the secondary school level pupils in their areas. Secondary education is consequently being reorganized and a start has been made by local education authorities in implementing the Government's policy, which was announced in 1965. But most secondary school pupils at present still attend either a secondary modern or a grammar school.

*The Further Stage* is treated separately below.

### Primary and Secondary Schools

In January, 1967, there were 33,380 schools, of which 29,821 were maintained by local education authorities, 323 were direct grant schools, 1,506 were independent schools recognized as efficient, and 1,740 were other independent schools. There were at school in 1967, 7,999,488 children (4,112,656 boys and 3,886,832 girls) of whom 7,428,593 were in maintained schools, 127,212 in direct grant schools, 306,772 in recognized independent schools and 136,911 in other independent schools. Of those in maintained schools, 4,502,197 were in primary, 2,832,851 in secondary schools and the rest in nursery (24,232) or special (69,313) schools including hospital. Almost all maintained primary schools, and rather more than half of the maintained secondary schools, are for both boys and girls. At secondary level most independent schools are for boys only or girls only.

The total number aged 15 years or over (excluding those under the school-leaving age) was 584,683 (12.1 per cent. of the age-group); of these 473,279 (9.5 per cent. of age-group) were in maintained schools, 37,577 were in direct grant schools, 64,963 in recognized independent schools and 8,864 in other independent schools. 314,138 of the 584,683 were boys.

*Class sizes.*—In January, 1967, 14.8 per cent. of primary pupils were in classes of over 40 (compared with 31.9 per cent. ten years before). 45.2 per cent. of secondary pupils were in classes of over 30 (compared with 62.1 per cent. ten years before). The average size of primary classes registered was 32.7 and of secondary 27.5 but 11.6 per cent. of all primary classes were oversize and 36.5 per cent. of secondary classes; the corresponding percentages ten years earlier were 26.1 and 52.4.

*Boarding.*—Of the 7,999,488 pupils at school in January, 1967, 174,089 were boarders (118,187 boys and 55,902 girls); of these 17,926 boys and 7,226 girls were in maintained schools (mainly in secondary and special schools), 13,105 boys and 5,122 girls in direct grant schools (including 7,201 boys and 2,117 girls in direct grant grammar schools), 80,347 boys and 40,516 girls in recognized independent schools, and 6,802 boys and 3,038 girls in other independent schools.

*School Meals.*—In 1967, 69.5 per cent. (4,846,500) of day pupils at maintained schools were taking school dinners and 79.3 per cent. (5,969,671) took school milk. Milk is not available for secondary school pupils (since September 1968).

*Immigrant pupils.*—In 1967 there were 164,725 immigrant pupils in maintained primary and secondary schools with 10 or more immigrants, of whom 44.7 per cent were from the West Indies and 20.1 per cent. from India. Of the 164,725 (2.2 per cent. of all pupils in all maintained schools), 90,857 were in the Greater London area and 28,969 in the West Midlands.

*Examinations.*—Secondary school pupils (and others) can take the General Certificate of Education (G.C.E.) or the Certificate of Secondary Education (C.S.E.). The examinations for the G.C.E., which are conducted by eight examining bodies (most connected with universities) are set at two levels: Ordinary level ("O") and Advanced level ("A"). "A" level is usually taken after two years in the sixth form following "O" level. The G.C.E. is not a "grouped subject" examination and candidates at either level may take one or more subjects as they wish. At "A" level passes are awarded in five grades. "A" level candidates may take Special papers which are usually set on the same syllabus as the basic "A" level papers but contain more searching questions.

Like the G.C.E. the Certificate of Secondary Education (C.S.E.) can be taken in one or more subjects. It is open to boys and girls in any school completing five years of secondary education. Five grades are awarded. The C.S.E. can be examined in ■ number of ways, internal and external, and is controlled largely by teachers sitting on the 14 regional examining boards. In 1967 176,000 candidates took the C.S.E. examinations.

Co-ordinating the work of the G.C.E. and C.S.E. examining boards, and advising them, is the *Schools Council for the Curriculum and Examinations* which was established in 1964 by the Secretary of State for Education and Science as an independent advisory body representing all educational interests with teachers forming ■ majority of its members. It is concerned *inter alia* with maintaining comparability of standards between boards and also between the two examinations (grade ■ in the C.S.E. is intended to indicate ■ standard such that ■ candidate achieving it might reasonably have been expected to obtain a pass at "O" level in the G.C.E. had he followed a course leading to that examination). The Council is also particularly concerned with promoting and encouraging curriculum study and development. Among its major programmes of work are those relating to English teaching at all school stages, preparations for the raising of the school-leaving age to 16, and sixth form curricula and examinations.

Of the 242,626 sixth-form pupils at school in January 1967 (138,803 boys and 103,823 girls) 227,262 were following G.C.E. "A" level courses, 135,163 of the 242,626 were in maintained grammar schools, 37,132 in recognized independent schools, 23,743 in direct grant grammar schools, 23,260 in comprehensive schools, 8,442 in technical schools, 6,970 in secondary modern schools and 7,916 in other maintained schools.

In 1966-67 305,910 boys and 288,850 girls left school. Of the boys 7.8 per cent. went to university, 1.5 to colleges of education, 8.6 to other full-time education and 82 per cent. to employment (including temporary jobs pending entry to full-time further education). The corresponding figures for girls were 3.8, 5.1, 12.2 and 78.9. Of the boys at independent schools recognized as efficient, 27.1 per cent. went to universities; the corresponding percentages for maintained grammar schools, direct grant schools, and comprehensive schools were 25.2, 37.6 and 4.1.

Of the 594,760 leavers in 1966-67 11.8 per cent. obtained 2 or more Advanced level passes in the G.C.E.

### TEACHERS

Teachers are appointed by local education authorities, school governing bodies or managers. Those in maintained schools must (except temporary and occasional teachers) be approved as "qualified" by the Department of Education and Science. Most teachers become qualified by successfully completing a course at ■ college of education or university department of education. For many years graduates and holders of certain specialist qualifications were recognized as qualified teachers without having to take a teacher-training course, but the Secretary of State for Education and Science announced in September, 1969 that such graduates and holders of graduate-equivalent qualifications will not be accepted as teachers in maintained secondary schools after 1973 and in primary schools from 1970 unless they have satisfactorily completed a suitable course of professional training.

A major problem at present relates to the supply of teachers as the number of children at school

increases with the birth rate and the number of those staying on at school beyond the statutory leaving age rises. It is estimated that in 1969 there were 8,337,600 boys and girls in schools and that there will be 8,775,400 in 1971, 9,802,600 in 1975 and 10,534,100 in 1980.

In February 1969 (provisional figures) the total number of qualified teachers in service in maintained schools was 330,100; this included the full-time equivalent of part-timers and represented an increase of 13,700 over the previous year. There were also in 1969 6,380 unqualified temporary or occasional teachers.

In October, 1967, teachers were being trained in a total of 211 institutions of various types: 28 university departments of education providing mainly one-year courses for graduates; 161 general colleges of education (109 maintained by local authorities and 52 by voluntary bodies), providing mainly three-year courses for non-graduates; 4 colleges of education (technical) which gave one-year specialist courses; 13 art training centres providing one-year courses for holders of art qualifications; and 5 departments of education in technical colleges, a new venture for the initial training of teachers. At the voluntary colleges (provided mainly by religious denominations) up to 80 per cent. of approved capital expenditure and 100 per cent. of running costs are paid by the Government. In 1967 there were 9,114 full-time teachers engaged in teaching the students in the colleges of education and departments of education in technical colleges.

There were 103,815 students in training in October, 1967 (31,720 men and 72,095 women), of whom 6,207 were in university departments of education. The Government has set a target of 111,000 teacher-training places outside the universities by 1973-74. Many colleges now provide for suitably qualified students a four-year course leading to a B.Ed. degree awarded by the university of whose institute of education the college is a member.

In 1969 (provisional figures), 6,690 married, qualified women teachers returned to service after ■ break of at least one year, 4,800 going to primary schools and 1,890 to secondary. 3,670 of them returned to full-time teaching and 3,020 to part-time; 950 of the 6,690 were graduates. Many local education authorities provide refresher courses which are often open also to graduates with no previous teaching experience.

*Salaries.*—The payment of full-time teachers in maintained schools is negotiated through ■ new Burnham Primary and Secondary Committee set up under the Remuneration of Teachers Act 1965. The committee has two sides, one (teachers' panel) representing teachers and the other (management panel) the Secretary of State for Education and Science and the local authorities, with an independent Chairman. Its agreed recommendations are transmitted to the Secretary of State who must give effect to them. If the committee is unable to agree on a new salary award the matter is referred to independent arbitration and the Secretary of State must give effect to the arbitrators' recommendations unless they are set aside by Parliament. The latest scales were the product of such arbitration. There is a superannuation scheme administered by the Department of Education and Science.

### FURTHER EDUCATION

Local Education Authorities are responsible, under the 1944 Education Act, for providing full-time and part-time courses of post-secondary education (other than university education) in their areas. There are ten Regional Advisory Councils which co-ordinate further education in their regions

and nominate ■ majority of the members of the National Advisory Council on Education for Industry and Commerce which advises the Secretary of State for Education and Science on national educational policy relating to industry and commerce.

The 8,268 further education establishments (1967 enrolment: 3,210,856 students) other than the colleges of education, may at present be grouped in eight main categories (for the new Polytechnics, see below and p. 535 of which all, except the last, are grant-aided:—

1. *National Colleges* (5 in 1967).—Established and financed jointly by the Department of Education and Science and industry to provide advanced technical studies for particular industries. 1,301 students in 1967.

2. *Regional Colleges* (25).—Providing ■ substantial amount of advanced study particularly by means of full-time and sandwich courses for students from several Local Education Authority areas. 85,265 students. See also "Polytechnics" below.

3. *Colleges of Art* (145).—117,658 students.

4. *Agricultural Colleges* (5).—Providing courses mostly of two years' duration. 1,381 students.

5. *Farm Institutes* (40).—Providing mainly non-advanced courses. 11,075 students.

6. *Other Major Establishments* (518).—Including "area" and "local" colleges; technical colleges, colleges of commerce, etc., which provide ■ substantial number of day courses. 1,557,255 students.

7. *Evening Institutes* (7,439) offering ■ wide range of courses, many of them recreational, for evening students, and often housed in premises used by day for other educational purposes. 1,419,765 students.

8. *Independent Establishments* which may apply to the Department of Education and Science for recognition as efficient; in 1967 there were 91 such recognized establishments with 17,156 students.

For Colleges of Education, see under "Teachers" above.

The number of students taking advanced courses (full-time, part-time or sandwich) leading to recognized qualifications at grant-aided establishments rose to 180,880 (157,000 men and 23,880 women) in 1967. Of these 45,080 were on full-time courses, 20,870 were sandwich course students, 68,420 were taking part-time day courses and 46,510 were attending evening only classes. Almost 24,000 of the total were working for ■ first degree (university or C.N.A.A. (see below) and 1,057 for ■ higher degree. 639,963 students were released by their employers during working hours to take part-time day courses at grant-aided establishments. In October 1968 there were 47,158 full-time teachers serving in further education establishments and 6,816 in colleges of education; this compares with 29,374 and 3,177 in October 1963.

The development of the work of the Industrial Training Boards (see pp. 535-6) set up following the Industrial Training Act of 1964 is bound to increase the demands made ■ technical colleges with more and more young people expected to be released from industry for further education.

*Polytechnics*.—To achieve ■ greater concentration of the facilities for full-time higher education within the Further Education system, the Secretary of State for Education and Science is designating as Polytechnics (see p. 535 for list) some 30 major centres (some single colleges and others combinations of colleges) in which a wide range of full-time, sandwich and part-time courses can be developed and which can become "comprehensive academic communities" catering for students at all levels of higher education, and entirely or almost entirely for those of 18 years or more. They will have governing bodies with ■ large measure of autonomy and

will be mainly teaching institutions though provision will be made for certain essential research. As part of the sector of higher education within the Further Education system they will complement the universities and colleges of education. Among the colleges named as those from which it is proposed that particular Polytechnics should be formed are many of the present regional colleges. By September 1969 eight Polytechnics had been established.

An important body with few, if any, parallels in other countries is the *Council for National Academic Awards* (C.N.A.A.) which awards degrees to students taking courses approved by it in non-university institutions. Following a recommendation of the Robbins Committee it was established by Royal Charter in 1964 as an autonomous body. Nearly 50 colleges in Great Britain conduct courses leading to its degrees: B.A., B.Sc., and the higher degrees of M.A. and M.Sc. (for postgraduate course work) and M.Phil. and Ph.D. (for research which may be undertaken jointly in industry and college). Although these degrees are mainly in science and applied science subjects they ■ be awarded in any field and include at present degrees in economics, law, languages and business studies. By November, 1967, 10,163 students (nearly 50 per cent. more than in 1966) were studying for ■ C.N.A.A. first degree and 84 for a higher.

*Adult Education*. A wide variety of courses for the education and recreation of adults is provided by local education authorities, the Workers Educational Association and other voluntary bodies, the extra-mural departments of universities and certain residential colleges. In November, 1967, the total number of students enrolled at evening institutes was 1,419,765 of whom 935,704 were women; there were also many students engaged in day-time and evening non-vocational and recreational classes at other further educational establishments. In 1966-67 there were 236,330 students attending courses provided by the university extra-mural departments, the W.E.A. and other responsible bodies. The expenditure in 1966-67 of responsible bodies (the extra-mural departments of universities, the W.E.A. and two other bodies) was £2,310,000.

*The Youth Service*.—Provides for the spare-time activities of young people. The Local Education Authorities co-operate with voluntary bodies in their areas and may maintain their own youth clubs. There are various national voluntary youth organizations which receive grants from the Department of Education and Science. By the end of 1967 there were 1,560 full-time youth leaders on the Department's register. In addition there are about 6,000 part-time paid leaders and many thousands of voluntary workers. The estimated expenditure of the L.E.A.'s on the Youth Service in 1967-68 was £7,900,000.

## SCOTLAND

The educational system of Scotland has developed independently of that of England and has ■ number of distinctive features. The Scottish Education Department is the central body and the education authorities are the local bodies concerned in administering the provisions of the (consolidating) Education (Scotland) Act, 1962. These authorities are the councils of the four cities (Aberdeen, Dundee, Edinburgh and Glasgow) and 31 county councils or joint county councils. Educational facilities of various kinds are also provided by the governing bodies of grant-aided schools, independent schools, "central institutions", and national voluntary organizations in the field of informal further education.

Schools in Scotland fall into three main categories, *viz.* public schools, which in Scotland means schools managed by education authorities; grant-aided schools, conducted by voluntary managers who receive grants direct from the Department; and independent schools which receive no direct grant, but which are subject to inspection and registration. In January 1969 there were 3,125 public schools with a roll of 907,088, 48 grant-aided schools with a roll of 22,743 and 123 independent schools attended by 17,477 pupils.

Schooling normally starts at the age of 5 and the primary school course lasts for 7 years. Primary schools usually take both boys and girls. Pupils transfer from the primary course to the secondary courses about the age of 12.

In line with Government policy for reorganizing secondary education on comprehensive lines, education authorities in Scotland have produced schemes of reorganization which they are steadily implementing as existing school accommodation and new building permit. Comprehensive education had already been established to some extent in Scotland; many secondary schools in rural areas were traditionally comprehensive, and some education authorities began to establish comprehensive schools soon after the Second World War. But until reorganization has been completed selection for secondary courses will continue in some areas, mainly on the basis of primary school teachers' assessments and verbal reasoning tests. The abilities and interests of pupils and the wishes of their parents will also be taken into account.

The secondary course lasts from 3 to 6 years. Broadly there have been three types of courses: (a) 5- and 6-year courses leading to the Scottish Certificate of Education examination on the higher grade; (b) 4-year courses leading to the S.C.E. examination on the ordinary grade; and (c) 3-year (and occasionally 4-year) courses not leading to the S.C.E. examination, but providing a general education. It is common for secondary schools to provide all these types of courses, but there are differences between areas, often determined by distribution of population. In some areas certificate and non-certificate courses are offered in separate schools. In others, the pupils all begin their secondary course together but those taking certificate courses are transferred to another school after the second, third or fourth year. As the policy of reorganization along comprehensive lines is more widely implemented these arrangements are being progressively modified, the general intention being that wherever possible all secondary pupils from a district will attend the same school for the whole of their secondary education (in a few areas of scattered population and difficult communications, however, other arrangements may have to be made).

The Scottish Certificate of Education examination is conducted by the S.C.E. Examination Board. Pupils may attempt as many of a wide range of subjects as they are capable of, on either the Ordinary grade which corresponds to the Ordinary level of the General Certificate of Education, or on the Higher grade which is normally taken a year earlier than the G.C.E. Advanced level and is therefore not of so high a standard. The Board grants a Certificate of Sixth Year Studies designed to give direction and purpose to sixth-year work by encouraging pupils who have completed their main subjects at Higher grade to study a particular subject in depth.

Facilities for further education are provided by 13 Central Institutions (grant-aided colleges administered by independent Boards of Governors) and by further education centres managed by edu-

cation authorities. The Central Institutions provide mainly advanced courses in science and technology, commerce, art, music, domestic science, and other subjects, leading to their own diplomas, professional qualifications or, in certain cases, to C.N.A.A. degrees.

The further education centres normally provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects, but a few offer courses of degree level. Courses are offered in a wide variety of subjects but to make the most economic use of resources, provision of certain courses is made on a regional or even a national basis.

All teachers in permanent posts in public or grant-aided schools in Scotland are required to be registered with the General Teaching Council for Scotland and normally to hold a teaching qualification awarded by a Scottish college of education. There are ten of these colleges and six, including two Roman Catholic residential colleges for women, provide both one- and three-year courses leading to a teaching qualification (primary education) or a teaching qualification (secondary education). Four of these colleges, in conjunction with local universities, also provide four-year combined courses leading to the degree of B.Ed. and to a teaching qualification (primary and/or secondary education). One of the Roman Catholic colleges also admits men to the three-year non-graduate course for primary teachers. Of the remaining four colleges, one is a residential college of physical education for women and the other three train only non-graduate primary teachers.

The basic scales of teachers' salaries are non-graduate, graduate and honours graduate, with additional payment for posts of special responsibility.

## NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly comparable to that in Great Britain. Under the 1947 Act (and its amendments to 1968) primary education is provided for children up to about 11½ years of age when they are transferred to secondary school. The main types of secondary school are: grammar and secondary (intermediate). Selection for secondary education is based on verbal reasoning tests at eleven-plus combined with teachers' assessments of performance in school subjects. Fees are charged at grammar schools but qualified pupils there receive scholarships from their local education authority.

In January 1969 there were 1,313 primary (including nursery) schools with 204,589 pupils, 164 secondary (intermediate) schools with 77,676 pupils, 19 technical intermediate schools with 1,745 pupils, 81 grammar schools with 49,783 pupils, 22 special schools with 2,114 pupils.

In 1967-68 there were 31 institutions of further education and over 100 centres with 1,177 full-time teachers and an enrolment of 10,182 full-time, 11,213 part-time day and 43,483 evening students. The training of teachers is carried out mainly in 8 colleges, and in the departments of education of the Queen's University of Belfast and the education centre of the New University of Ulster.

## UNIVERSITIES

There are 44 universities in the United Kingdom (see pp. 503-12). Of these, 33 are in England, eight in Scotland, two in Northern Ireland and one (a federal institution) in Wales.

In 1967-68 there were 204,927 full-time students enrolled at universities in the United Kingdom; of

these, 56,301 were women, 34,997 were postgraduates (including 7,435 women). The number of new undergraduate entrants (full-time) in 1968-69 was 59,550; this was 7.7 per cent. of the relevant age group; the corresponding figures for 1958-59 were 30,657 and 4.8 per cent. The full-time total of 204,927 in 1967-68 compares with just over 50,000 in 1938-39. In 1965-66, 32,689 first degrees (including 23,870 honours degrees) and 6,560 higher degrees were awarded by universities. In December, 1966 there were 28,015 full-time teaching and research staff in U.K. universities; 2,828 of them were professors, 4,841 readers or senior lecturers, 14,322 lecturers, and 4,299 assistant lecturers.

Revised projections show a substantial rise in the 1970s and 1980s in the number of school-leavers who will obtain appropriate qualifications for entry to higher education, as compared to earlier estimates. On the basis of these new projections it is estimated that the number of full-time places in higher education needed in the mid-1970s and after is some 40 per cent. higher than that recommended in the Robbins Report. Discussions on the part the universities would play in the higher education system over the next decade took place in September, 1969 between the Minister of State for Education and Science, the University Grants Committee and the Committee of Vice-Chancellors and Principals.

Students applying for admission to a first degree course at a university do so through the Universities Central Council on Admissions (U.C.C.A.) which was set up by the universities in 1967 on the initiative of the Committee of Vice-Chancellors and Principals. All universities now participate fully in the U.C.C.A. scheme except Aberdeen, Dundee and Glasgow, which receive direct applications from candidates resident in Scotland and from those United Kingdom candidates outside

Scotland who are not also applying to other universities within the scheme.

The requirements for entry to first degree courses may vary from one university to another but the universities publish co-operatively an annual Compendium which describes these requirements in detail.

Students who are normally resident in Britain, have certain minimum qualifications and have been admitted to a university in the United Kingdom are entitled to an award from public funds; the amount varies according to the financial circumstances of the students and their parents.

In 1966-67 the total income of universities in Great Britain was £192,245,398, of which 1.4 per cent. came from endowments, 0.4 per cent. from donations and subscriptions, 1 per cent. from grants from local education authorities, 72.5 per cent. from exchequer grants, 6.9 per cent. from students' fees, 1.1 per cent. from grants from government departments, 11.2 per cent. from payments for research, and 5.5 per cent. from other sources. Non-recurrent grants for capital expenditure paid by the Exchequer totalled £79,424,504 in 1966-67.

The University Grants Committee advises the Secretary of State for Education and Science on university matters (see p. 442). The Comptroller and Auditor General has access to the books and records of the U.G.C. and of the universities.

From January, 1971 an "Open University" will provide courses leading to degrees by a combination of television, radio, correspondence, tutorials, short residential courses and local audio-visual centres. Its first Vice-Chancellor is Dr. W. L. M. Perry. It is grant-aided directly by the Department of Education and Science and does not come within the University Grants Committee system.

#### CHILDREN IN THE CARE OF LOCAL AUTHORITIES, 1968

On March 31, 1968, there were 69,358 children in the care of local authorities in England and Wales. During the year ended March 31, 1968, 50,938 were received into care. Of the total received during the year, 16,922 children were taken into care through short term illness of the parent or guardian, 7,893 because of the confinement of the mother and 5,188 children deserted by the mother, the father being unable to care for them. 3,157 of the children were illegitimate, the mother being unable to provide a home. 1,983 children were in care because the family was homeless (through eviction, 952) and in 2,381 cases home conditions were unsatisfactory. 4,563 children were in care under fit persons orders (1,372 offenders).

## SCIENCE, DISCOVERY AND INVENTION IN 1969.

With the words "That's one small step for a man, one giant leap for mankind," American astronaut Neil Armstrong realized the age-old dream of humanity when he took the first step on the surface of the Moon at 3.56 a.m. B.S.T. on Monday, July 21, 1969. America's £10,000,000,000 programme for landing a man on the Moon in this current decade had come to success sooner than many would have believed even a short year before. Perhaps the words uttered by Armstrong were a little uncharacteristic of the more laconic comments he made during the nine days in which the world's gaze was fixed, *via* television, on *Apollo 11* and its historic journey. But they did elicit an immediate response from the millions watching the strange shadowy scene as the American foot in the heavy boot of the spaceman's outfit lowered hesitantly to the lunar surface. Armstrong, with his colleagues, Col. Michael Collins and Col. Edwin (Buzz) Aldrin, took off from Cape Kennedy in their spacecraft at the head of a 7,500,000 lbs. thrust Saturn V rocket on July 16. Two and a half days later they had crossed the point at which the Moon's gravitational pull becomes dominant over that of the Earth and four hours after that they were behind the Moon, going into orbit about it. On Sunday, July 20, Armstrong and Aldrin entered the lunar landing module, code-named *Eagle*, leaving Collins behind in the command ship, *Columbia*, and descended for the first manned landing on the Moon. Using the landing craft's rocket motors they delicately picked their way between craters, avoiding the spot originally chosen because at the last moment its unsuitability became apparent, to drop the last few feet to a level spot in the Sea of Tranquillity. With everything going faultlessly the programme was speeded up for Armstrong to become the first man to set foot on an extra-terrestrial body just over five hours after the landing. He was followed by Aldrin and together they planted the U.S. flag in the dusty surface, collected rock samples and set up scientific experiments. Armstrong spent 2 hours 32 minutes on the lunar surface, Aldrin 1 hour and 43 minutes, before returning to *Eagle* which took off again after a stay of 21 hours and 37 minutes. Just under four hours later they had joined up with Collins 69 miles above the Moon's surface ready for the return to Earth. In the official film of the expedition one thing more than any, even more than the footprints in the lunar dust, brought home the immensity of the achievement. That was the view of the cratered and scarred surface of the Moon, taken by Collins in the command ship, with the appearance to one side, of a minute pinpoint of light. That light was the Sun reflecting off the ascent stage of *Eagle* as it soared towards the rendezvous in space. That speck grew, the light changed as rocket engines fired and then the module came fully into view, with the sun glinting in innumerable reflections on its insect-like body, a strange man-made object against the stranger lunar background.

Despite forebodings that the operation was directed more towards achieving prestigious ends than scientific ones, as a piece of space one-up-manship over the Russians, it appeared afterwards that the scientific rewards of the mission would be considerable. Preliminary examinations of the rocks and the first reports from the scientific experiments left behind gave a picture of the Moon and its history entirely different from that of the Earth. The findings were not at all clear but they indicated a present-day Moon uniformly cool throughout, unlike the Earth with its distinct layers of cool crust, warm underlying mantle and molten core. Taken together the findings suggested, said NASA: "The Moon may be like a great shattered brittle ball beneath its crust, fractured into huge rock blocks with fissures and cracks penetrating deep down into the interior; the Mascons, the concentrations of mass which make the Moon exert an uneven gravitational pull on orbiting spacecraft, are probably the Moon's maria themselves, rather than some unseen feature beneath them; lunar dust is fully 50 per cent. glass in tiny rods and globe shaped particles." The surprisingly abundant glass, the high store of radioactivity in the lunar samples brought back, the high density of the rocks compared to the rest of the lunar surface and the age of the Moon's surface, at least 3,100 million years, all indicated a lunar history surprisingly different from that of Earth.

The Moon had probably been extremely active from meteor bombardment and volcanic eruptions during the first 1,500 million years of its existence but both interior and crust must have been relatively undisturbed for the past 3,000 million years. In contrast the Earth is still geologically active with mountain building, volcanic activity and continental drift still going on.

It was one of the experiments left behind, a seismograph, which led to the deductions of a fissured brittle Moon. This at first reported three "moonquakes" similar to earthquakes picked up by seismographs, indicating a lunar structure similar to that of the Earth, with crust mantle and hot core. But these first quakes were not repeated and were later accepted as being the result of electronic noise in the instrument. Subsequent signals of more than 100 events showed a pattern far different from typical earthquake recordings. According to Dr. Gary Latham of Columbia University's Lamont Geological Observatory, the signals of natural origin they had seen had been more scattered than Earth signals and of low efficiency. Either there were no major seismic sources on the Moon, either quakes or meteorite impacts—and it was very hard to believe that there were no impacts in the period under review—or else the Moon was made up of highly fractured material which partly absorbed and muffled the tremors. Such a Moon could have been formed if the material composing it had never been molten and also, perhaps if it had been struck by immense ancient meteors.

All this, it must be stressed, was purely tentative theorizing based on early studies. The lunar samples, after their initial examination at NASA laboratories were distributed during the autumn to about 140 scientific investigators in Australia, Belgium, Britain, Canada, Finland, Federal Germany, Japan, Switzerland and the U.S.A. for more intense analysis, with fifteen British research groups among the recipients. One was that of Prof. S. Tolansky, of the Royal Holloway College, London University, who had forecast that tektites, the strange glassy objects found widespread on Earth which may have been formed by meteorite impact, would be in abundance on the Moon. He was, naturally, pleased when, from the start, the astronauts commented on the glassy character of the lunar surface. They had found the surface slippery. This could have been due to a number of effects; one suggested early on was the presence of electrostatic charges, but NASA reported that stereoscopic photographs brought back by the astronauts suggested that the men were walking on thin crusts of dark glass.

One group of objects fortunately not found were bacteria. Much of the concern expressed about the possible, unwitting trans-shipment of life around

the solar system by space probes has been over the contamination of other worlds. But, in the case of *Apollo 11*, the public fear was that it might bring back strange new pathogens which might unleash on humanity a new class of diseases. To dispel that fear the astronauts were put into lengthy quarantine on their return to Earth, in which they were joined by others thought to have been contaminated by the lunar environment, in the form of such matter as the moon dust on cameras. In fact, of course, the risk was extremely small, so small in the view of most experts as to be discounted. If there are bacteria on the Moon, something which cannot be ruled out without more extensive study, then they are hardly likely to have developed proclivities for causing disease in the absence of animals on which to practise. This is not to say that they could not, if given the chance. And that awakens the disturbing thought that the quarantine was useless, not because there were no bacteria to be found but because if they were they would be lying low until they had developed their weapons against us. Anyway, there was no evidence of even the most primitive form of life in the lunar samples studied.

*Apollo 11* was preceded, in the period under survey, by a sequence of *Apollo* flights that moved with such smooth precision that they made a march of triumphal success to the Moon landing. In *Apollo 8* Col. Frank Borman, Capt. James Lovell and Major William Anders, became the first men to cross that mysterious divide where the Moon's gravitational pull overcomes that of the Earth. They went into orbit around the Moon on Christmas Eve, 1968. Their journey amounted to 585,400 miles in ten days, including 70,000 miles around the Moon and 54,000 around the Earth. Those three were also the first men to come through the blistering experience of plunging into the atmosphere and the slowing down from what the Russians call the second cosmic speed—that needed to escape from the Earth's gravitational pull. It was estimated that the heating effect over the base of their spacecraft during its entry into the atmosphere was equivalent to that of 5,000 household central heating plants.

*Apollo 9* saw Col. James McDivitt, Col. David Scott and Mr. Russell Schweikart practise, in Earth orbit, the manoeuvres which would be necessary for a Moon landing, performing a space ballet as the lunar module separated from the command module and made a long loop away from it and back. *Apollo 10*, in May, with Col. Thomas Stafford, Cdr. John Young and Cdr. Eugene Cernan, practised the manoeuvres in Moon orbit, descending to within 50,000 feet of the lunar surface. All these flights were necessary preliminaries to that of *Apollo 11*. How necessary is shown by the increased knowledge of the mascons they revealed. Because of the lack of precise understanding of the extent of these strange concentrations of mass their effect on the orbits of the earlier space craft could not be computed. It was said afterwards that if an attempt had been made to land *Apollo 8* then, in all likelihood, it would not have been possible to get its occupants back to Earth, because of the distortion of the orbit. Despite the increased knowledge of mascons obtained in that flight *Apollo 10* was still four miles off course when it made its closest descent to the surface. Instead of being over the chosen landing place in the Sea of Tranquillity it was well away from it. But, in turn, it provided the additional knowledge which contributed to the perfect performance of *Apollo 11*.

One other piece of equipment left behind by the *Apollo 11* astronauts was a reflector for bouncing back pulses of laser light sent from the Earth. Because of the uncertainty about just where the

astronauts actually landed it took three weeks to discover it with ranging signals from a laser on the top of an Arizona mountain. But then a telescopic rangefinder was used to determine the distance to the Moon more accurately than any astronomical distance has been measured before. Pulses of light lasting only one hundredth of a millionth of a second or, in other words, covering a distance of only a few metres from front to rear of the pulse were sent to the Moon. By the time they reached there they had spread to form a pancake of light four kilometres across though still only 3 metres thick. A minute part of the light was reflected back by the instrument on the Moon, which had a reflecting surface of about one fifth of a square metre. This reflected signal was picked up by the telescope and the time taken for its journey measured with a caesium timing device or atomic clock. This can measure time to one thousandth of a millionth of a second. The first measurement of the Moon's distance by this instrument gave a figure of 353,911,328 metres, plus or minus 45 metres. In time, it is hoped, further refinements will bring the accuracy down to a few millimetres. Not only will it be possible, with this technique, to study such matters as the orbit of the Moon to far greater standards of accuracy than before and determine the Moon's shape and the extent to which it rocks on its axis, it will also be possible to learn more about the Earth, its distribution of mass and even the movement of its land masses.

#### Russian Moon Probes

1969 showed, if it had not been apparent before, that the Russians had contracted out of any race to land a man on the Moon. They complimented the Americans on their achievement but commented that their plans gave a higher priority to safety and included provisions for bringing astronauts back by full automatic control if anything should go wrong. But, in one respect, they did forestall the Americans. Two of their *Zond* research probes made the journey to the Moon, around it and back to Earth before Col. Borman and his colleagues; in fact a tortoise in *Zond 5* was the first living animal to sample the near lunar environment and return to Earth. These two probes landed in the Indian Ocean and observations of the packages landed by Soviet ships afterwards led to the assumption that they were in fact *Soyuz* spacecraft. These are somewhat larger than the *Apollo* command ship and so it was assumed that they could have carried men and that the experiment would be repeated with human crews. In fact, when the experiment was repeated, with *Zond 7*, in August, 1969, it was again an automatic space station which was sent on the task of photographing the lunar surface and carrying out other observations. But the *Zond* craft are usually used for testing new space systems and *Zond 7* achieved a first by being the first craft, returning from the Moon, to come down on land, in the middle of the U.S.S.R. *Zond 7* came back very softly, helped during the final stages of descent by low-thrust rocket landing motors, which were a novel feature. It used the technique, exploited by its predecessor *Zond 6*, of slowing down by skipping in and out of the atmosphere. In the case of *Zond 6* speed was reduced from 11 kilometres a second to 200 metres a second, from 24,500 m.p.h. to 450 m.p.h., by two of these skip manoeuvres. At a height of five miles a special altimeter operated a parachute system and later the landing motors. The whole system was operated completely automatically after the triggering of a time-programmed device shortly before the separation of the re-entry capsule from the rest of the craft. The Russians intend on developing their automatic tech-

niques for space exploration, though one leading official, after stressing that very many problems of the exploration of the Moon and of Mars could be solved by automatic means, went on to add that "purely human means" of analysing unexpected situations were of great assistance. Nevertheless, it was generally expected that a permanent lunar laboratory was one of the early projects in the Soviet space programme. When *Apollo 11* was undertaking its history making mission there was some speculation that a Soviet probe, *Luna 15*, which had taken off a few days earlier, might be intended to forestall the American operation by landing, scooping up rock samples and taking off again. There had been no real indication that this was intended or had ever been practised and *Luna 15*, after going into several low orbits around the Moon, well out of the way of *Apollo 11*, ended by crashing into the surface. It could have been, itself, an early test flight for a soft landing on the Moon and return.

Further confirmation of Russian plans for building giant space stations for such purposes as astronomical research outside the Earth's atmosphere and the assembling of space vehicles, in orbit, for longer flights, came with a manned flight, the link-up of *Soyuz 4* and 5 in January. The launching of *Soyuz 4*, with Lt.-Col. Vladimir Shtalov aboard, was followed by the flight of Lt.-Col. Boris Volynov, Lt.-Col. Yevgeny Khrunov, an aircraft and spacecraft design engineer, and Mr. Alexei Yeliseyev, a civilian engineer, in *Soyuz 5*. After the docking of the two craft Khrunov and Yeliseyev changed from *Soyuz 5* to 4 and joined Shtalov for the return to Earth. This was the first docking between manned craft and, according to Sir Bernard Lovell, gave Russia a lead in assembling space equipment in orbit. The Americans, of course, carried out the docking of manned craft later in the rendezvous of *Apollo* command craft and lunar modules, though there was no firm link-up and the lunar modules were discarded. The linked *Soyuz* spaceships were described by Soviet commentators as the world's first experimental space station and these commentators pointed out that the combined living space was over 23 cubic yards. A further hint on Soviet plans was given by the revelation, about the same time, of the successful completion of a year-long experiment in which three men had remained cooped up in a sealed cabin 12 square metres in area, testing a number of possible spacecraft life support systems. In the first stage, which lasted two months, drinking water was regenerated from the men's urine and from vapour produced in the heat exchanger after being evaporated during breathing and perspiration. Highly oxygenated compounds were used for generating oxygen for breathing. In the second stage an experimental greenhouse was connected to the living chamber and artificial soil was irrigated with transpiration water from the foliage of the plants. In the third and final stage, which lasted for six months the life cycle was closed further by obtaining oxygen from the electrolytic decomposition of water and combining the hydrogen so produced with carbon dioxide, in the presence of a catalyst to re-form water. Waste water from washing was also regenerated, which meant that the water cycle was virtually complete. Solid waste, however, was not used for regenerating materials. The men's diet consisted of dehydrated food plus plants grown in the greenhouse, cabbage, water cress, fennel and borage. The men reported that the addition of the greenhouse had raised their spirits. Seeing the plants was, apparently, as important as eating them and the knowledge that they were responsible for them gave extra purpose to the men's lives. Although they had felt like

giving up after five months vanity prevented their getting up and walking away.

### Exploration of the Planets

During the year both the U.S.A. and the Soviet Union launched two unmanned planetary probes—both the Russian probes going to Venus and both the American to Mars. The two Russian probes, *Venus 5* and 7, successfully entered the Venusian atmosphere to make measurements of atmospheric temperature, density and composition. First reports indicated that they had reached the surface but it later appeared that this was not so, they survived to the point where the atmospheric pressure on them reached a quarter of a ton per square inch, though this was still 20 miles or so above the planetary surface. The Russian scientists seemed pleased with this and with the fact that the two probes coped with decelerations of several hundred *g*, equivalent to that experienced in a high speed road crash and compared to the 3-4 *g* which is the most astronauts are nowadays asked to stand, and temperatures of many thousands of degrees during the entry into the Venusian atmosphere. Conditions at the surface, computed from the findings taken on the night side of the planet, were 530 degrees and 140 earth atmospheres, nearly one ton per square inch and approaching the pressure found one mile below the surface of the sea. The main constituent of the atmosphere, as shown by the previous probe, *Venus 4*, was carbon dioxide, present in the proportions 93 per cent. to 97 per cent. Nitrogen and other inert gases represented 2-5 per cent. of the total and the oxygen figure was not more than 0.4 per cent. One place which stayed relatively cool was the inside of the instrument capsules, where the temperature remained around 30 degrees Centigrade, until the capsules failed. There had been some concern lest the "buses" the Russians use to transport their instrument capsules through space are allowed to reach planetary surfaces and so contaminate them with sterilized material. This time the Russians emphasized that their "buses" did burn up in the Venusian atmosphere, though the fact that they did not take the opportunity of the 1969 Mars launching "window" to make the first soft landing on that planet could be the result of the expression of those fears. As Mars now provides the only possibility of life in the solar system outside the Earth it would be a disaster if unsterile material reached that planet. The American probes, *Mariner 6* and 7 which flew past Mars during the late summer did not lend much support to the beliefs that there may be life on that planet. Afterwards American scientists reported that the chance of life there seemed negligible, though one American, Dr. George Pimental, of the University of California, claimed that some of the findings could indicate the presence of methane and ammonia, gases involved in the life cycle. The two probes sent back pictures of Mars considerably better than any obtained before.

### Atomic Research and Power

In the other of the big-spenders among the sciences, atomic physics, the United States had started building the world's biggest atom-smasher at Batavia, near Chicago. The machine at the National Accelerator Laboratory was to take over the title of the world's largest from the Soviet Union's 76 GeV machine at Serpukhovo. The first part of the new American accelerator, due to be completed early in 1970, was LINAC, a straight-line accelerator which would energize protons to 200 million electron volts, just one thousandth of the 200 GeV which they would acquire in the main

machine, ■ underground ring 6.4 kilometres in circumference. The complete accelerator is expected to start operations in ■ relatively modest fashion towards the end of 1972, working up to full scale operation in 1974. Total cost was put at 250 million dollars, plus outlays for experimental equipment. There were persistent reports that the Soviet Union was planning ■ machine of at least 1,000 GeV that could be working by 1980 but no official announcement of a decision to go ahead was made during the year. The European nations were going ahead with the CERN 300 GeV project, without the active co-operation of Britain, though the Director Designate was Dr. J. B. Adams, formerly Director of the Culham Research Laboratory, near Oxford, where Britain's work on the release of thermonuclear energy by controlling the fusion of light atoms was continuing, on a reduced budget. In the meantime CERN scientists were co-operating with Soviet scientists at Serpikhov in a series of experiments designed to take further studies begun with the 30 GeV CERN accelerator, which has done such good work over the past decade. As well as scientists there was a considerable transport of equipment from Geneva to Serpukhov to take advantage of the first of the world's accelerators to operate at near 100 GeV. The very first experiment indicated that studies at these new energy levels might overthrow old conceptions, ■ it produced evidence of happenings which were not expected to appear at energy levels below 1,000 GeV.

British scientists from Culham took part, during the year, in another co-operative enterprise with Soviet scientists. They took their neutron measuring equipment to the Soviet Union to help carry out a detailed study of just what was going on in the Tokomak reactor which has gone furthest of the world's reactors towards producing the conditions in which a controlled thermonuclear reaction would take place. The accepted figures on conditions in this machine still leave a long distance to go before economic reactors could be built. But this did not prevent the British Nuclear Energy Society from organizing a conference at Culham with the ambitious title, Nuclear Fusion Reactor Conference. A working reactor would have to hold plasma, extremely hot gas at a temperature around 100 million degrees, at ■ certain minimum density and for ■ certain minimum period of time, though this need only be a small fraction of a second. It is not so many years since there was general depression about the possibility of demonstrating thermonuclear power in this century: work seemed to have come up against insurmountable barriers. But Tokomak demonstrated in 1968 that one of those barriers was hardly ankle high and, following the Russian example, other scientists have found ways of stepping over it. J. L. Tuck, of the Los Alamos laboratory, pointed out at the conference that the case for fusion reactors was overwhelming. The burning of fossil fuels on a scale to meet future energy needs could have devastating effects on our climate by releasing more carbon dioxide to the atmosphere. Non-breeder fission reactors, the basis of present nuclear power stations, were dangerous and the reserves of high-grade uranium ore were inadequate. Breeder fission reactors, which make their fuel from more plentiful elements such as thorium, were also dangerous, sensitive to sabotage and had to be sited in uninhabited places that were yet not too remote from cities. And world-wide fission power, he pointed out, would mean huge amounts of potential fission bomb material, some of which could conceivably get into the hands of the criminal, the dictator or the plain madman. Fusion power plants would

probably be huge and sprawling but they would be safe and could be sited near cities so that the waste heat, instead of being ■ disadvantage, could be an asset. Faced with this sort of reasoning other participants at the conference produced arguments for the belief that reactors such as Tokomak and the American Stellarator could provide the basis of economic reactors, though these would probably have to be operated in short pulses. One study showed how it should be possible to extract 11,200 megawatts of heat from the plasma contained in the space ten feet long by eight feet in diameter. With a conversion factor of 50 per cent, this would give 5,600 megawatts of electrical energy, equivalent to the output of the largest hydroelectric station and five times as much as from a large present-day nuclear station.

In the field of fission reactors the Dragon project at Winfrith, in Dorset, celebrated its tenth anniversary in mingled feelings of satisfaction and perturbation. What started as a feasibility study has resulted in a highly successful international co-operative effort with twelve European states. Dragon, a High Temperature Gas-Cooled Reactor, is the third generation of the gas-cooled reactors of which Calder Hall was the commercial starting point. It gets over the known limitations of gas-cooled reactors by making extensive use of graphite, in particular for replacing the metal fuel cans, and so enabling high temperatures to be obtained in a compact reactor core. Dragon provides ■ megawatts from ■ core 4 feet across, has its uranium fuel in ■ ceramic form and is cooled by the inert gas helium. The Central Electricity Generating Board had concluded that this reactor will give generating cost savings of 10 per cent, over the second generation reactors of Britain's latest power stations, the Advanced Gas-Cooled Reactor (AGR). The C.E.G.B. has talked in terms of third generation reactors coming into operation in 1975-76 but, though the Director of Dragon, Dr. L. R. Shepherd, thinks industrial application of the design is imminent, nothing has actually happened. Dr. Shepherd also believes that another 5 to 25 per cent, could be added to that 10 per cent, saving in cost by getting rid of the intermediate steam generating cycle and using the hot helium to power gas turbines. Meanwhile competitors to Dragon are appearing. One of the twelve nations, Germany, is building its own 25 MW reactor, incorporating ■ gas turbine and has design studies for 300 MW and 1,000 MW stations. Brown Boveri has built a 15 MW reactor at Julich and has ■ 300 MW order in prospect. In the U.S.A. there is a 40 MW experimental reactor and a 300 MW reactor is planned.

### Lasers

Another group of British scientists concerned about the scale of effort being made in this country are those working on lasers. There was some heart searching when it was realized that at ■ international conference at Belfast only ten of the 68 papers were contributed by home scientists, ■ astonishingly low proportion for an international conference. A very small Russian delegation contributed more and still more came from a sizeable American delegation. The biggest British team is working at Queen's University, Belfast, where, among other achievements, very short pulses of laser light have been achieved. That 3 metre thick pancake of light sent to the Moon is clumsy compared with the micropulses obtained by Prof. D. J. Bradley, of Queen's and his colleagues. The laser pulse used for ranging the Moon lasted one hundredth of a millionth of ■ second: those produced by the Belfast workers last only one ■ of a millionth of ■ millionth of a second, which ■

that even at the speed of light the front of the pulse would only have travelled the thickness of a piece of tissue paper or less before the beam is shut off. One pulse might contain only a hundred or so light waves. These pulses have valuable applications in the fields of information handling and communication. Laser beams are already used for ultra-accurate measuring in the construction of Jumbo jets and the Victoria underground line, for investigating the atmosphere, in communications, in machining metals, welding and surgery. In the not too distant future they could transform computer operation times and produce faster and cheaper printing of newspapers and books. Before the end of the century they could have transformed life even more than the T.V. or transistor radio, claims Prof. Bradley. The ordinary living-room wall could be equipped with a laser display pattern which could show the up-to-the-minute newspaper, or Sunday colour supplement, at the wave of a hand. The tourist, instead of carrying a camera loaded with photographic film, will probably have one with one crystal layer capable of storing innumerable holograms which can be viewed in laser light to give perfect 3-D pictures in colour. Prof. Bradley's team numbers fifty but he is concerned that Britain may fall behind not only the giants, the United States and Russia, but some other European countries. One of the foreign delegates at the conference was Academician N. G. Basov, the Russian awarded the Nobel Prize for his part in inventing the laser. He caused some stir in the scientific world a year earlier when he reported bombarding lithium deuteride with a laser pulse in which was concentrated considerable energy and obtaining neutrons. Lithium deuteride is the substance which the Russians used for making the first deliverable H-bomb and the presence of neutrons indicated that some sort of thermonuclear reaction had been obtained in the experiment, though, of course, one which was not self-sustaining and which consumed more energy than was given out. Some disbelief at Basov's claim was dispelled when first the Americans and then other workers repeated the result and Basov later reported taking the experiment a stage further. It is unlikely that a laser beam could ever be used in initiating a thermonuclear reaction in a fusion reactor, though some scientists would not now rule that out. But there is no doubt that the intense heating effect of a laser beam used in generating plasma has a considerable part to play in the fundamental studies directed towards understanding thermonuclear reactions.

#### Supersonic Airliners

One other co-operative venture in which Britain is engaged which yielded results during the year was the *Concorde* supersonic airliner project. The first prototype, 001, built by the French side of the consortium, made its maiden flight in March, to be followed a few weeks later by 002, the British built prototype. The French prototype made its first supersonic flight during the autumn and 002 was due to follow suit in the early part of 1970. American competition in this field was lagging. The original ambitious plan for a supersonic airliner considerably faster than the planned 1,550 m.p.h. of *Concorde*, had fallen into design and cost troubles and was replaced by a less ambitious alternative. The only rival on the scene was the Russian Tu 144, which made its maiden flight on the last day of 1968, went supersonic in the early Spring and was flying at around twice the speed of sound in the summer. Confident they would get it into service by the end of 1970, the Russians had laid down a production line and were talking of their hopes of selling it to foreign airlines in two

years, but British experts could not see it as a great menace to *Concorde's* sales prospects.

#### British Cancer Research

Whatever pessimism British scientists display about prospects because of shortage of money in the "big" sciences, there is no doubt that British research in the biological and medical fields bears comparison with any. Probably the most promising line of effort in the study of cancer going on anywhere in the world is that of the team working under Prof. Henry Harris of Oxford. In the space of a month at the end of the summer two important announcements came from his laboratories where work had been done using the new technique of fusing cells. In the first Prof. Harris, himself, and some colleagues showed that the malignant qualities of an extremely malignant mouse tumour, which could usually kill if only 3 or 4 cells were injected into an animal and sometimes if only one were injected, could be suppressed if it were fused with another mouse cell known as A9. Previously it had been thought that malignancy was a dominant characteristic, all such cell fusions retaining the malignancy. It appeared that the A9 cells contributed something to the fused cell which suppressed malignancy but that this something was lost when daughter cells were produced in which some chromosomes were eliminated. At the least the work indicated a way of studying the dependency of malignancy on the genetic make-up of the cell and could, perhaps, provide chemical methods of suppressing malignancy. One other interesting result from the same experiment might also throw some light on how to counter the rejection of transplanted organs. For the A9 cell produces freely the histo-compatibility antigens, the molecules on the surface of the cell which appear to attract the attention of the lymphocytes whose job it is to eliminate "foreign" bodies. But when the A9 cell was fused with the most deadly of the tumourous cells these antigens were suppressed, as if some mechanism developed by the tumour cell for coating its antigens was working on the A9 component as well. This discovery, it was hoped, could lead to better understanding of the rejection process and ways to reduce it. A second report from the same laboratory, a month later, showed that similar cell hybrids, composed of tumourous cells with weak antigens and other cells with transplantation antigens could be used to immunize the host animal against the tumour. If mice were inoculated with the hybrid cells and later given injections of the tumourous cells then, provided these injections of tumourous cells were not above a certain level, the tumours would not develop. It was found that the degree of resistance to the tumours, in terms of the number of cells needed to cause death, had been increased by about ten thousand. Further studies showed that the resistance to the tumours was caused by immunological rejection.

**AIDING THE BUMBLEBEE.**—One victim of modern intensive farming methods is the bumblebee, because those methods destroy its normal foraging and nesting sites. Yet the bumblebee is vital for the pollination of many crops. Because of its longer tongue it can feed from and pollinate some plants which the ordinary hive bee does not visit. It also starts work earlier in the year, when it is still too cold for the hive bee to start on its own intensive round. One way to help the bumblebee survive in large numbers, by making breeding easier, could come from work done by Dr. H. Calam of the Rothamsted Experimental Station. He described in *Nature* how he had found and

isolated chemicals which probably served as scents to attract their fellows. Male bumblebees mark leaves and twigs with a scent as they fly along their well defined flight paths. The flight path of one bee will link with that of another and males of the same species visit each other's marked sites. But the chemicals also act, it is believed, as sex attractants. Queens also visit these sites and the complicated "calling" system at the marked sites on interlinking routes could be for the purpose of aiding the chances of the two sexes meeting. Although the same areas may contain several different species of bumblebee they do not visit each other's marked sites, only those of their own species.

Dr. Calam reported the identification of chemicals in six species, the Larger Bumblebee, the Small Earth Bumblebee, the Stone Bumblebee, the Early Nesting Bumblebee, the Common Carder Bee and the Red Shanked Carder Bee. The chemicals were very complex. The Larger Bumblebee secreted, as the chief component in its scent, a higher alcohol containing fifteen carbon atoms in its molecular structure, compared with the two carbon atoms in potable alcohol. The Stone Bumblebee and the Common Carder Bee produced 16 carbon alcohols of similar structure but the Small Earth Bumblebee secreted an ester molecule. This was additional proof that the Larger Bumblebee and the Small Earth Bumblebee, very hard to distinguish, even under the microscope, were, in fact, different species.

**ANIMAL EARTHQUAKE DETECTORS.**—Soviet seismologists are generally reckoned to be among the world's best and their earthquake detection equipment has a high reputation. Yet they admitted, during the summer of 1969, that they often found themselves beaten by creatures which could do the detection job much better. These were animals, birds, fishes and insects which get some prior warning through a sixth sense poorly developed in man. Evgeny Savarensky, Chairman of the Interdepartmental Council for Seismology of the Academy of Sciences, declared himself in favour of a study of animal behaviour prior to ground tremors. Animals had appeared to have had advance warning of the Tashkent and Ashkhabad earthquakes of recent years. At Tashkent in 1966 workers in the Zoo had often found it impossible to drive goats, antelopes and many other animals indoors throughout the spring and summer preceding the great earthquake, among the worst ever recorded. Tigers and other big cats continued to sleep in the open in late autumn, when they are normally seeking shelter. Before later tremors at Tashkent a school-teacher reported a mass migration of ants. The insects, carrying their *pupae*, started to leave their underground nests about an hour before the ground tremors were noticed by humans. During the eruption of a volcano in Kamchatka in the winter of 1955-56 not a single death of a bear was recorded—the animals, usually hibernating at that time, had risen from their lairs and migrated to safer places. Pheasants can apparently pick up the vibrations from routine quarry explosions nine miles away.

Savarensky wants his scientists to discover how animals can sense very slight vibrations coming from the Earth's interior, due to deformations and micro-earthquakes preceding surface earthquakes. Then, he pointed out, seismologists could get along without the animals, whose sensitivity is not always reliable because it depends on many factors.

One piece of observation led to a storm forecasting apparatus. Shrimps are known to climb on dry land before the advance of storms, while jelly fish swim away from the shore very much in advance. They both respond to low-frequency

sounds inaudible to the human ear. The storm detection instrument, using the same principle, can pick up a storm about fifteen hours before its arrival. The work had also led, already, to an improvement in seismographic equipment. This was done by a biologist, Dr. Vladimir Protasov who works on the mysterious "sound" sensing equipment which many fish have along their sides. These are bladders which detect very tiny changes in pressure and enable the fish to "hear" low frequency acoustic waves generated by earthquakes, explosions and tidal waves. Using the bladders as a model he produced a rubber membrane which, it was claimed, increased the sensitivity of seismoreceivers several times over. Nature, though, can still do best. Despite the improvement in the mechanical equipment fish are still at least ten times as good.

**BETLE'S POISON SPRAY.**—The sharp-shooting beetle which can douche its enemies with a spray of noxious chemicals at the temperature of boiling water was the subject of research by a team at Cornell University, described in the American journal *Science*. The bombardier beetle of South America, when incensed, swivels the tip of its abdomen at the object of its displeasure and fires a jet of chemicals called quinones with a noise like a small pop-gun. The quinones give most of the beetle's enemies a most unpleasant jolt. Man, though his skin is not sensitive to quinones, receives a burning sensation from the beetle's spray if it is he who is the cause of the creature's animosity. Now it has been shown that that burning sensation comes for the best of reasons—the spray is scalding hot.

It was German research which showed that the mechanism of the spray should produce heat. The beetle's spray-gun is two chambered. An inner chamber contains a solution in water of hydroquinones and hydrogen peroxide. Enzymes in the outer chamber break down the hydroquinones into quinones and the hydrogen peroxide to water and oxygen. This hydrogen peroxide reaction causes the explosive production of gas which forces the spray out of the beetle, but it also produces heat. It is, in fact, the same reaction used for forcing hot shaving cream out of a dispenser in the latest patented aerosol. The Cornell team, led by Daniel Aneshansky, calculated that the beetle's gun should produce about 0.19 calories of heat per milligramme of spray, enough to heat it to its boiling point and vaporize one-fifth. A delicate experiment, involving backing the beetle into a tiny copper calorimeter and then infuriating it, showed that the beetle was possibly a bit more efficient than the sums had shown—it produced 0.22 calories per milligramme. The temperature of the spray came out right, at 100° Centigrade. Aneshansky's comment seemed fair, "a bombardier beetle can make itself felt thermally, even when the chemical message cannot get through."

**BOTTLE "MAGIC".**—Scientists at the National Physical Laboratory at Teddington, Middlesex, demonstrated the perfect conjuring trick at an Open Day. They sampled the contents of a bottle without taking the cork out. It was done not by mirrors but by a technique called Nuclear Magnetic Resonance Cryoscopy, one which could save the chemical and pharmaceutical industries time and money. What was shown was a system of purity control able to report, in less than a minute, the proportions of impurities in a chemical which might take a whole day or more to determine by normal analytical methods. If a sealed bottle of the substance to be checked is dropped into the machine a cathode ray tube gives a blip to show that the

machine is working and the result is then displayed in ordinary numbers. It depends on the fact that a pure substance melts entirely at ■ temperature but one containing impurities melts over ■ broad band of temperature. At any one temperature in that band part is liquid and part solid. Atoms in the substance are made to resonate. The machine can easily pick out the resonances from the solid part because they are 10,000 times as broad as those from the liquid. It determines the proportion of liquid and from that it is ■ simple matter to calculate how pure the substance is. An existing machine costing £1,500 had been adapted at the National Physical Laboratory for the job. At that price it was thought to have an immediate commercial future among drug and other chemical firms which need to keep a close check on purity.

BRITISH ASSOCIATION.—The 131st annual meeting of the British Association for the Advancement of Science took place in Exeter under the presidency of Sir Peter Medawar, Director of the National Institute for Medical Research. In his presidential address Sir Peter compared present day misgivings about the way the world was going with the philosophical gloom in the first 40 or 50 years of the seventeenth century. Many reflective people, he said, believed that we were now back in the kind of intellectual and spiritual turmoil that disturbed that half century. Both periods were marked by the emptiness left when older doctrines had been found wanting and none had yet been found to take their place. Once again we were oppressed by a sense of decay and deterioration, but this time, in part at least, by a fear of the deterioration of the world through technological innovation. "Artificial fertilizers and pesticides are undermining our health (we tell ourselves), soil and sea are being poisoned by chemical and radioactive wastes, drugs substitute one kind of disease for another, and modern man is under the influence of stimulants whenever he is not under the influence of sedatives. Once again there is ■ feeling of despondency and incompleteness, ■ of doubt about the adequacy of man, amounting in all to what a future historian might again describe ■ a failure of nerve. Intelligent and learned men may again seek comfort in an elevated kind of barminess, but something kind and gentle nevertheless." Man should blame himself, not science and technology, for his sense of dissatisfaction with the modern world. In our management of our affairs we had too often been bad workmen and, like all bad workmen, we blamed our tools. He was in favour of a vigorously critical attitude towards technological innovation, but there was all the difference in the world between informed and energetic criticism and a drooping despondency that offered no remedy for the abuses it bewailed. The real trouble nowadays had very little to do with material prosperity or technology or with our misgivings about the power of research and learning, generally, to make the world a better place. The real trouble was our acute sense of human failure and mismanagement, a new and specially oppressive sense of the inadequacy of man. But there was ■ difference between today and the seventeenth century. It was then taken for granted that the poor old world was superannuated, that history was coming to ■ end. Today we were conscious that it was only just beginning. The existence of our present-day doubts was probably the best assurance that civilization would continue. Man had a history of 500,000 years. Only during the past 5,000 had his special capabilities won a reward, only during the past 500 had he begun to be, in the biological sense, ■ success. This year saw the introduction of

the £7 meeting fee but the attendance was still around the normal figure with nearly 2,000 taking part. About twelve per cent. were British Association Young Scientists, making their first appearance at an annual meeting.

The presidents of sections and the titles of their presidential addresses were: *Physics and Mathematics*, Prof. R. W. Ditchburn, "Sight and Survival"; *Chemistry*, Prof. D. H. R. Barton, "Whither organic chemistry?"; *Geology*, Prof. J. F. Kirkaldy, "Geology in schools and the universities"; *Zoology*, Prof. H. R. Hewer, "The importance of being a zoologist"; *Geography*, Maj.-Gen. R. C. A. Edge, "Changing requirements and advances in survey and cartography"; *Economics*, Sir Alexander Cairncross, "The Managed Economy"; *Engineering*, Dr. H. M. Finniston, "Future imperfect"; *Anthropology*, Dr. K. M. Kenyon, "The origin of the Neolithic"; *Biomedical Studies*, Prof. G. H. Bell, "Living bone as ■ engineering material"; *Psychology*, Dr. B. Semeonoff, "Personality assessment: prediction or description?"; *Botany*, Prof. P. W. Brian, "The state of botany today"; *Forestry*, M. J. Penistan, "A silviculturist in wonderland"; *Education*, S. T. Broad, "The educational aspects of nature and conservation"; *Agriculture*, Sir Joseph Hutchinson, "A strategy for agricultural development"; *Sociology*, J. H. Goldthorpe, "Social inequality and social integration in modern Britain"; A. W. Haslett, "Little science versus big science".

The 1970 meeting will take place in Durham under the presidency of Lord Todd.

CAMELOT DOUBTS.—Recent enthusiastic searches for evidence of King Arthur's Camelot at South Cadbury Castle, Somerset, came under attack during the year from Professor Charles Thomas, Professor of Archaeology at Leicester University. The results of the excavations, he declared, were in no way commensurate with either the money or the publicity expended. Writing in the journal *Antiquity* Professor Thomas stated that "the limits of legitimate archaeological inference are probably being exceeded" and he expressed misgivings that this could jeopardize support for work at other major sites of that era. The results of the excavations led to a non-proven verdict where any connection with a real Arthur of history was concerned.

In ■ comment Dr. C. A. Ralegh Radford said that it had never been suggested that the sole reason for digging at Cadbury was the "Arthurian" period. They wanted to uncover the whole history of Cadbury which they knew started before 3000 B.C. and went on to Ethelred's time, about A.D. 1020. Arthur attracted the public interest and brought in the money but the results they had had with Ethelred's fort were historically more important.

Excavations resumed at Cadbury in the summer "dig" season, again under the direction of Mr. Leslie Alcock, of University College, Cardiff. Sir Mortimer Wheeler, President of the Camelot Research Committee, in ■ preliminary announcement, declared that work on the picturesque hilltop had begun to open ■ impressive vista of British history and prehistory ranging from Stone Age ramparts of 3000 B.C. or earlier to a final defortification in the eleventh century A.D. when King Ethelred the Unready and Canute minted coins there. Tangible memorials, he said, included successive bulwarks of the pre-Roman Iron Age, a hint of the Roman conquest and increasing vestiges of the Dark Age when, as tradition had it, the place became the Camelot of King Arthur. Considerable effort this year would be directed towards

the further exploration of the Iron Age sequence, at the gate, in the defences and in the interior. Evidence of the existence of a large timber hall of the Arthurian period, in the fifth or sixth century, would be further examined. This measured about 60 feet long by 30 feet wide and was the first building of the period to be located at Cadbury. Timber halls of this period were known from only one other site in the West of Britain.

At the end of the summer dig Mr. Alcock described it as the most rewarding season they had had. The greatest popular attraction they had found was undoubtedly a human burial discovered deep in the topmost rampart. This was probably a sacrificial burial of a youth, aged about 20, to protect the settlement against enemy attack. He could not have been one of King Arthur's followers—the burial dated back to the first century A.D. The skeleton was tightly packed in the foetal position, with the knees up to the chin and the heels tight against the buttocks. A body could hardly be crammed into a smaller space. The belief that it was a sacrificial burial rather than the casual cramping of a dead body into a hole in the rock rested on the finding of similar remains at Maiden Castle and evidence from Denmark that youths were sacrificed in that way, strangled with a bow-string.

One of the mysteries of Cadbury Hill had been the absence of human remains. It was, indeed, a mystery of South-West Celtic Britain—what did they do with their dead? But the most significant discovery of the year lay in the further revelations of the great timber hall built in the age of King Arthur. This must have been a noble and impressive structure. Whatever its Arthurian association it made a great contribution to the archaeology of post-Roman Britain. It was the centre and focus of an area defended by twelve hundred yards of rampart. The main feature was a timber framework, which probably towered up as a fighting platform, protected at the front by a parapet. The framework was anchored with stones and earth piled around the lower parts. Some of the stones seemed to have come from Roman ruins.

Celtic Iron Age discoveries included a range of different types of house, all circular but some with walls made of thick planks while others consisted of a wickerwork framework, presumably coated with a mixture of mud, straw and dung. Generally the houses were about 30 feet in diameter. On one part of the hilltop were a collection of hearths, too many for them to have been purely domestic. A surprising collection of spears, swords, daggers, knives, cauldrons and shield fragments nearby indicated that it was the site of an armourer's workshop.

**CANCER RESEARCH.**—An advance in the treatment of leukaemia was reported by a group of Russian medical scientists in *Nature*. They treated this cancerous disease of the blood by injections of "foreign" cancerous cells from other patients to provoke the body's own defences. Although they did not claim to have achieved a cure they did report the complete disappearance of evidence of the disease in some children and, in one, the return to normal had been maintained for six months without any further treatment.

The Russian team, led by Professor S. V. Shurkovich of the Central Institute of Hematology and Blood Transfusion, Moscow, started from the premise that the immunity system in the body, which normally produces its own agents to fight foreign bodies such as disease germs and transplanted organs, is tolerant to its own tumours.

They then considered whether "foreign" cancerous cells might stimulate the immune reaction to such an extent that it would fight not only the foreign cells but the body's own leukaemic cells.

They carried out the treatment on six pairs of patients, children aged 3 to 10 years, all in a very bad stage of the disease, with enlarged lymphatic nodes, spleens and livers and with pronounced nose-bleeding and rash. The members of each pair, of the same blood group, were given injections of each other's blood, containing leukaemic cells, and also injections of leukaemic bone marrow. Eight to fifteen days later they were given what were called passive injections of blood plasma and white cells which could be expected to contain antibodies produced by the immune reaction. Normal anti-leukaemic treatment, by radiation and drugs, was stopped for the period of the test.

Successes were reported in four pairs. Complete remission of the disease occurred in three children eighteen to thirty days after the first injections; that is, all cancerous cells had disappeared from the blood. These children's bone marrow had begun to return to normal in three to four weeks. In the other five there was partial remission. Leukaemic cells had dropped in the first weeks to 2 to 3 per cent. of the blood, compared with up to 80 per cent. before the injections. Leukaemic cells in the bone marrow also fell by 8 to 45 per cent.

The five patients with partial remission were then given normal treatment as were two of those with complete remission. One patient with complete remission was not given any medication. In all cases the remission had continued for the six months which had elapsed since the injections were administered. Professor Skurkovitch and his colleagues commented that banks of leukaemic cells from the blood and marrow of every patient suffering from acute leukaemia should be set up to further research into influencing the immune response.

There was scepticism about the Russian report among some Western scientists who have been considering the immunological approach to treatment of cancers and leukaemia without so far achieving similar results. But one British authority described it as a remarkable achievement which must be followed up. There must now be efforts to repeat the findings elsewhere. Claims of success in treating the disease were complicated by the fact that there sometimes occurred spontaneous remission, lasting for varying periods. This fact had, in the past, invalidated some outright and over-optimistic claims for "cures". But eight remissions among twelve patients could not possibly occur spontaneously.

**COMEBACK FOR STEAM.**—Although steam locomotives become ever rarer spectacle on the railways the steam engine itself bids to make a comeback, on the roads. Concern about pollution and noise is an important factor in the move to replace the internal combustion engine by an external combustion engine, but also there are engineers to claim that a steam engine, using modern technology, could perform at least as well as the ordinary petrol engine. An American millionaire's belief that he would win the Indianapolis 500-mile car race in 1969 with a steam powered car was not put to the test—last minute snags prevented his 500 horsepower car's competing—but he was laying down a production line to build 500 smaller engines a week for normal cars.

Apart from the lack of pollution products in the exhaust and its relative silence, a steam engine should give much greater power at low engine speeds, so removing the need for a gearbox, even an automatic gearbox, and providing better acceleration.

One novel form of external combustion engine was being tested by the American town of Dallas in a bus, backed by a grant of \$309,709 from the United States Department of Transportation. It had to be called an external combustion engine and not a steam engine because it did not use steam but Freon—the low boiling point liquid familiar in domestic refrigerators—as a source of vapour to transfer heat energy. But, just as a steam engine does, it burnt its fuel externally, outside the actual motor, instead of inside the cylinder as in a petrol or diesel engine. In the Dallas bus engine the gas propane heats the Freon in a boiler. Pressurized vapour then operates a double-acting piston engine. A special computer continually monitors engine performance and provides a number of safety measures, including automatic "panic braking" for emergency stops. The only gas emitted from the exhaust is carbon dioxide, the Freon is continually recirculated and the engine is said to be absolutely soundless.

It was developed by a team of scientists headed by Wallace J. Minto who, at the age of 23, was a laboratory chief in the Manhattan project which developed the atomic bomb during the war. He and his colleagues experimented with pollution-free engine designs for over two years before they hit on the use of Freon, which has the advantage over water that its lower boiling point should enable a higher efficiency in work done for heat expended. They built a prototype Minto engine, installed it in a Volkswagen bus body and tested it secretly in a warehouse. Success in those initial trials led to plans for Minto engines to be supplied to an Italian firm to be installed in luxury cars but these were postponed when the bus project was approved.

**CRISP APPEAL.**—Potato crisp manufacturers have a colour prejudice. They prefer their products to be a pale golden-yellow rather than a deep brown. This has set problems for scientists at the Food Research Institute, near Norwich. Research has shown that the more sugar in the potato the browner is the crisp when cooked. For crisp-making the sugar content of the potato should be less than one part in a thousand. It has also been found that the farther north potatoes are grown the sweeter they are. Tests at six crisp factories showed that potatoes grown in the North of Scotland had a sugar content of 0.17 per cent, while potatoes grown 500 miles further south had only 0.04 per cent. So scientists at the Institute were busy trying to solve two problems. First they wanted to find out why latitude affected sugar content, whether it was the temperature or the length of the day. Secondly they were seeking a variety that had a very low sugar level and could ensure for the Scot a crisp equal to that of the most golden Channel Islands product.

**DIRTY WINTER.**—A new high voltage insulator which could cut the size of electricity sub-stations and their maintenance costs came triumphantly through its toughest possible test—a winter near Brighton. The insulators, developed by Central Electricity Research Laboratory scientists, at Leatherhead, Surrey, are smaller than normal insulators. Much more important, they stand up better to pollution, which is why they were tested at Brighton. However good sea breezes are for humans they mean trouble for insulators. A layer of salt can cause an insulator to flash over. The insulator testing station of the C.E.R.L. has been set up at Shoreham Harbour at what its scientists think is probably the most polluted spot in the world, as far as insulators are concerned. It is between the sea and the Brighton power station.

When the wind blows one way it covers the insulators with salt spray. When it blows the other it brings coal dust and dirt, just as bad. Regular washing and greasing is necessary for ordinary solid insulators and results in high maintenance costs. Without regular greasing and washing the normal insulator will break down at Brighton in less than one winter. The new insulator does not rely on solid materials, such as glass or porcelain, for its insulation, but on a bath of oil. An early type of oil bath insulator has come happily through three dirty winters at Brighton, although, when examined, it was found to be half full of brine beneath the oil. It still worked. Ordinary insulators have to allow for lengthy creepage paths, where arcing may occur. The insulation over the surface of the oil is virtually the same as in air, which means that eight inches of insulating surface is sufficient for a 132 KV line. After the successful trials preparations were under way to put the new insulators into use in the field.

Oil bath insulators are not completely new. The French tried them out in the Sahara in the 1920's—but found an insoluble problem. Locusts drank the oil. No such troubles have been found in Britain and today the insulator scientists working at the Leatherhead laboratories are reckoned equal to any in the world. They need to be because Britain, with its long coastline and industrial pollution, gives an insulator the hardest life it can expect anywhere in the world.

**DISPOSABLE BEERBOTTLE.**—One problem of hot summer day picknicking, what to do with the empty beer bottle or beer can, appeared to have been solved by the Swedish brewers, Pripps, with the help of Rigello Pak, a packaging concern. Their answer was the plastic bottle which, when empty, can be crushed together with one hand, for disposing in the litter basket, or even burnt. It also had another great advantage for picknicking, it does not matter if one forgets the bottle opener or can opener, for the PVC container can be opened by hand. A half-pint container weighs only one eighth as much as a conventional glass bottle. It has a hemi-spherical base and a cone-shaped top, is encased in a cardboard cylinder and has a shelf life of two months. However easy it is to dispose of when empty, it is claimed to be quite strong when full. It can be dropped without breaking and if it does receive an impact hard enough to break it there are no splinters.

**DIVING CHEAPER.**—New British apparatus which could save £500 on the present cost of a single deep sea dive to 1,000 feet was shown by the British Oxygen Company at an Oceanology Exhibition at Brighton. It made it possible to save the helium used to dilute the oxygen in the "air" breathed by deep divers. Helium has to be used instead of the nitrogen which makes up normal air in very deep dives because, at high pressure, nitrogen produces symptoms akin to those of drunkenness. Usually the helium is allowed to escape but it is expensive and even the amount in a large decompression chamber, needed to bring divers back to normal pressure, may be worth over £500. The new apparatus uses liquid nitrogen to separate helium from oxygen, carbon dioxide and other gases in the diver's discarded air. Of these, only helium liquefies at a lower temperature than nitrogen, so it remains a gas while the rest condense. As well as being costly helium is rare and likely to be irreplaceable in the future. It is essential for the low temperatures which appear vital for some industrial processes of the future.

**DOLPHIN SONAR.**—The injunction "don't talk with your mouth full" is one which the dolphin does not obey. In fact its anatomy is designed to do just that, according to Professor R. J. Harrison, Professor of Anatomy at the University of Cambridge. Dolphins are past masters of the art of sound echo-location, he declared in a lecture on "Diving Seals and Dolphins" at the University of Newcastle. Although they do not possess vocal cords the larynx is extended until it meets the epiglottis. Air passing through the slit so formed and into nasal sinuses is responsible for sound production. The oesophagus divides and passes around the larynx, enabling the dolphin to eat and talk at the same time. The echoes of the dolphin's voice are probably picked up by the animal's "forehead". This is really a greatly enlarged upper lip, a complex mass of muscle and fat known to whalers as the melon and which could act as a lens for focussing sound waves. The peculiar carriage of the head, with the right side twisted forward, thinks Professor Harrison, enables the animal to decide the origin of echoes more accurately.

Seals can dive and stay under water for over half-an-hour, many times longer than other more land-bound animals. Prof. Harrison, who has spent twenty years studying them, has found that when they dive their heart-rate slows considerably. The respiratory centres of the brain which, in man, set us gasping when there is more carbon dioxide than normal in the blood, are less sensitive to carbon dioxide in seals but towards the end of the dive the animal's heart-rate increases. Tethered animals begin to struggle to reach the surface. When the animal surfaces the heart-rate rises above the normal surface figure of about 90 beats a minute until normal blood concentrations of oxygen are reached. Seals and dolphins have more blood for their body size than other mammals. Much of this is held in a sinus below the diaphragm. The passage of blood between this sinus and the heart is slowed down on diving. A further aid to non-breathing is that seals are able to maintain an oxygen partial pressure in venous blood almost equal to that in the arterial system.

Although they are predators dolphins show no animosity towards man. They are indeed friendly and this, their intelligence and the fact that they are not subject to caisson disease—which hits divers who surface too quickly—has led to the suggestion that they could be used as underwater messengers.

**FISH ANTI-FREEZE.**—Fish which swim in the sub-zero Antarctic waters produce their own anti-freeze, not so dissimilar from the winter additives which man puts in his car radiator, according to a report in the American journal *Science*. Studies of the habits of fish in McMurdo Sound, where the average temperature of the water is almost two degrees below zero, led Arthur de Vries and Donald Wohlschlag, of California and Texas Universities, to the conviction that the blood serum of the fish must have some special component to account for its low freezing point. One of the fish lives in tunnels in the loose layer of ice beneath the solid ice sheet of the surface. Two other species, living at greater depths, often rest in the large masses of ice anchored on the sea bed.

Salt water freezes at a lower temperature than pure water and as blood serum is naturally salty it freezes at below 0 degrees Centigrade. But the fish could obviously retain a liquid serum at temperatures below that at which it should freeze, according to studies of the salt content. The two scientists removed the water from serum and in the residue found a substance which accounted for one third of the lowering of the freezing point, although

it was present in microscopic amounts. It appeared that the molecules of the substance were part protein and part sugar units. Sugars do contain large numbers of the hydroxyl chemical groups which are an important feature of ordinary commercial anti-freeze agents but there were hints in the American work that, once again, Nature had gone one better than Man had so far been able to do.

**FRENCH HOVERTRAIN.**—An eighty-passenger prototype of an inter-city hovertrain, able to flash over the 70 mile distance between Orléans and Paris in under half an hour, received its first public showing at Le Bourget airfield, outside Paris, during the summer. The air-cushion vehicle, which looked like being the first operational tracked hovercraft in the world, was intended to cruise at 155 m.p.h. Built of aluminium, weighing 20 tons, it was about 85 feet long and eleven feet high, excluding the giant shrouded propeller at the tail. Two turbo-jet engines, each developing 1,300 h.p., drove the propeller and a separate turbo-jet engine, of 720 h.p., produced the air-cushion. A retractable wheel, front and rear, enabled the vehicle to turn round under its own power when off the track.

This full-sized car followed the testing of a number of half-size experimental cars on a four-mile stretch of monorail at Gometz, about 30 miles outside Paris. One car reached a speed of 215 m.p.h., with rocket help, and all were reported able to cruise at 150 m.p.h. and to reach that speed in about half-a-minute from a standstill. Gas turbine jet and propeller had been tried and a second stretch of track, being built, was to be equipped with a linear electric motor (see NEW PUMP). The track used by the French for their hovertrain is in the form of an upside-down T with the car slotted on to the upright section, three feet high in the case of the Orléans-Paris prototype of the future high-speed railways. A five mile stretch of elevated track at Orléans was to have reached eleven miles of the distance to Paris by the end of the summer. The French experiment was receiving financial support from the French Transport Ministry. Britain, the home of the hovercraft, was hoping to have its first passenger-carrying hovercar running on a test track in Cambridgeshire in 1970. This was being developed by an independent firm following on nearly ten years of work since the Hythe hovercraft development centre was set up by the National Research and Development Corporation.

**FENDING OFF 100,000 TONS.**—The giant 100,000-ton oil tankers coming increasingly into use will be able to berth gently without danger of damage to vessel or jetty with the help of the Cambridge Fender, announced during the year. Developed by the civil engineering firm of John Shelbourne and Co. Ltd., with the help of the Cambridge University Engineering Laboratory, it is claimed to be able to cope with the energy absorbing problems entailed in berthing any ship so far foreseen. The fender uses a torsion bar and is based on the work of Prof. Sir John Baker on the plastic deformation of metals. One end of a mild steel bar is fixed to the dockside, the other is attached to the actual fender unit. When the ship strikes the fender the impact causes the bar to twist, so absorbing the energy. Small impacts cause only elastic twisting with the bar returning to its pre-impact position. More violent twisting will stress the bar beyond its limit, causing permanent deformation. The maximum impact likely in a given situation with a given size of vessel can be calculated and the fender unit designed with the correct degree of strength. The file of the bar in normal circumstances should be about 3,000 impacts, which should allow several

years' service. The remaining life of the torsion bar can be checked at any time and the bar renewed when necessary. A prototype was proved by absorbing impacts from 30,000-ton tankers for over a year. This, it was pointed out, was only a small unit. Operational units will have the tougher task of coping with larger vessels.

**FORGOTTEN CASTLE RE-DISCOVERED.**—British archaeologists learned to their incredulity during the year, that a twelfth-century castle with walls ten feet thick, standing, in places, ten feet high, unrecorded on any map, had been found in a wood in Huntingdonshire. The discovery was sparked by the comment of an old lady, living in the hamlet of Ashton, when she heard that tree felling was to be carried out in the wood, nearby. She hoped, she said, that the palace would not be damaged. The County Planning Officer, hearing the tale, consulted the large scale Ordnance Survey map, supposed to record every feature six feet above or below the datum line. Nothing was shown, but, instead of forgetting the tale he passed it on to Mr. Philip Dickinson, chief correspondent for the Ancient Monument Department of the Ministry of Public Buildings and Works in the county. Mr. Dickinson went to have a look at the wood, which is out of the way and rarely visited, forced his way through the undergrowth to the centre and, to his amazement, came upon the remains of a large rectangular tower and part of what must have been a moat, in some places 40 feet wide.

Mr. Dickinson reported his belief that the stone tower stands on the mound of an earlier Norman Motte and Bailey Castle. There are traces of four corner turrets. Although there are no references to the castle in twelfth and thirteenth century records, it is believed to have been the home of a succession of Roger de Torpels and has been called Torpel Castle. It must have been larger than its contemporary, Castle Heddingham, in Essex, but appears to have been abandoned in the fourteenth century.

The fairy-tale nature of the discovery, of a castle lost in a wood, forgotten to all except local legend, may appear impossible in twentieth century Britain, with continual surveying, from the air as well as from the ground. Vague references to a manor house in the area, in old records, may be of it, but, if they are, the measurements given are usually quite wrong. It seems that the castle may have been stumbled upon earlier this century, for there is a reference to a ruined castle in the English Place Names Society volume on Northamptonshire, published in the 'thirties, but, if so, nobody bothered to record it properly then. And the fact that it was then in Northamptonshire—the Soke of Peterborough, where it lies, was incorporated in Huntingdonshire in 1962—saved it from what should have been certain discovery when the Royal Commission on Historic Monuments surveyed Huntingdonshire in the 'thirties.

**GRASS WITHOUT SOIL.**—Growing grass nature's way results in about enough food per acre to feed one cow—and that usually requires that the farmer aids nature somewhat with extra nitrogenous feeding. But now man claims to have so far exceeded nature as to produce enough grass from the space of an ordinary living room to supply up to 75 cows. This miracle lies in hydroponics and results from the work of the International Working Group on Soil-less Culture (IWOSC). This brings together scientists in the Netherlands, London, West Bengal, New Knoxville, Ohio, and Stonehouse, Gloucestershire. Together they have developed a technique for growing grass without soil in six days, using simple devices. Basically these

consist of a series of shallow troughs arranged in tiers under a protective covering which shades the growing grass in over-hot climates or can be used to conserve heat in colder conditions. Additional heat, when necessary, is used to keep the temperature at an optimal level around 70 degrees F. Fluorescent lamps provide additional light. The pretreated seed is sown on sheets of paper or edible fibre and the developing plants obtain their food supplies from balanced solutions of fertilizers in water, with which their roots come into contact almost immediately on germination. The nutrients circulate along troughs beneath the grids which hold the paper with their seeds or else percolate through aggregates. Within a week from sowing, it is claimed, there is a crop five or seven inches high. The crop is easily harvested. It is just peeled off with its paper or fibre backing and fed directly to the animals. Most animals, it is claimed, have shown in trials that they will accept the fodder and, indeed, trials in the United States are said to have shown that they need 23 per cent. less total feed per pound bodyweight gain than on conventional food. Studies at the Royal Agricultural College, Cirencester, have shown superior protein, mineral and vitamin content in the soil-less grass compared with ordinary pasture. Rye grass, fodder maize, oats, barley, rye, sorghum are among the plants which can be grown in this way. Average yields per six-day cycle work out at nearly 100 lb. per square yard of trough and the cost is about £3 per ton. The capital expense of the soil-less units can be recovered within 18 months, state advocates of the scheme.

**HOT AS THE SUN.**—A furnace as hot as the surface of the Sun, which continually burns itself away and rebuilds itself, shown at a National Physical Laboratory Open Day, could make life easier and more profitable for jelly-paint makers. It could also do something for the makers of car polishes, silicon water-proofing paints and tyres. For all these manufacturing processes use special powders, many of which have to be imported. Studies of high temperatures at N.P.L. led to the development of the furnace which promises to produce these powders more cheaply than any foreign process. It uses a plasma flame to produce temperatures as high as 10,000 degrees Centigrade, concentrating the heat equivalent of 35 electric fires into a space little larger than an egg in a laboratory model. Plasma is the "fourth state of matter" in which atoms themselves are broken by great heat, the heat itself coming, in this case, from an electric discharge.

The N.P.L. scientists, in their furnace, have achieved the vaporization of silica and other refractory materials—the so-called fire-proof materials used for lining ordinary furnaces. The vapours are swept out of the furnace and condense into fine powders, unobtainable by other methods, usually acquiring valuable new properties as they do so. The furnace is itself built of the material to be vaporized and is liquid cooled, on the outside, to prevent too much of the material being burnt away, which would increase the interior size of the furnace and reduce the concentration of power. Fresh material, injected with the plasma flame, replaces that vaporized. The furnace and its operation are so designed that the fresh material not only maintains the right size of furnace but also the right shape.

One project has been carried out for a commercial firm which requires very fine silicon powder with special surface qualities. Among the uses of this powder is to "jelly" organic materials, so making thixotropic paints and converting petroleum into napalm. Other powders can be used as catalysts,

pigments, fillers for rubber and plastics and for the production of fine grained ceramics and specially hardened metals. Other projects are being developed in association with firms using very high temperatures. Previously the few very high temperature reactions operated commercially had used feeds of gaseous materials, such as the manufacture of acetylene by passing methane through a 7 ft. long arc. This particular process, used in Germany, is reputed to consume two per cent. of the entire electrical output of the Federal Republic.

**LOST TOWN UNEARTHED.**—Workers on the site of a future power station on the banks of the River Chatkal, near Tashkent, capital of Uzbekistan, unearthed a long-lost town of Central Asia. It was identified as Ardlanqet, a powerful and rich town which was last mentioned in chronicles nearly a thousand years ago. Built on trade routes, near ore deposits, at a spot where rivers gave natural protection, it was also guarded by a massive fortress. From this fortress radiated streets of pottery makers and silver-, iron- and copper-smiths' shops, as was revealed by abundant deposits of the tools of these crafts. These stood within the city walls but just outside were bazaars and beyond them fields fed by an elaborate irrigation system of canals. Legend reports that the town was wiped out by fearful hurricanes and wild beasts. There is some evidence that the climate did change suddenly about that time. But it is more likely that Ardlanqet fell victim to avaricious and belligerent envious of its prosperity. It was continually being assailed by neighbouring rulers and the Mongol invasion in 1220 was probably the final burden. Soviet archaeologists, at the last report, were hurrying to complete their excavations before the site was submerged beneath a 12 square mile lake, due to be formed by the damming of the river gorge for the power station.

**MERCURIAL PROBLEM.**—Doctors, as air liner passengers, are a serious problem. They can be a terrible bother to airlines and aircraft maintenance crews, Dr. J. Graham Taylor, Director of Medical Services, Air Corporations Joint Medical Service, London Airport, wrote to the *British Medical Journal*. The trouble is the mercury they carry with them in their tools of trade, particularly in sphygmomanometers—blood pressure measuring equipment. It leaks out of the instruments and causes serious corrosion of alloys used in aircraft construction. Mercury, pointed out Dr. Taylor, is a restricted article in air transport and should not be carried either in hand baggage or in the normal luggage unless specially prepared and packed as freight.

"It is not difficult to imagine the problems that beset aircraft engineers, using x-ray equipment, trying to trace each globule in the vast holds of aircraft or in a passenger compartment where hand baggage is inadvertently involved," he wrote. The answer was simple. Doctors should carry aneroid instruments, instead of mercury instruments, when travelling—it could mean easier travel through fewer aircraft delays as aircraft engineers were saved hours of unrewarding work.

**MILITARY MECHANICS.**—The latest in a series of "man-amplifiers", in an American programme to produce the super-soldier, was demonstrated by the U.S. Army. Behind the programme is the hope of making the American foot soldier more powerful, tireless, capable of operating in the most difficult country. To the obvious comment that, surely, the tank does just that comes the reply that the tank cannot pick things up, there cir-

cumstances in which legs are more useful than tracks and that even the best of tank-operators cannot feel exactly what his tank is doing, as if it was his own body, and respond accordingly. The latest man-amplifier turns the soldier into a one and a half ton quadruped with muscles made of hydraulic pumps, driven by oil pressure, on each leg, powered by a petrol engine. A series of levers and servo-mechanisms enable the man in the machine to sense where the machine's four legs are, what they are doing, how difficult they find the task and to control them. His right arm controls the right front leg, his left arm the left front leg and his legs the machine's rear limbs. As he raises his right arm so the machine raises its right front leg and a mechanism for feeding back part of any force felt ensures that the operator can feel anything the machine touches and gauge the resistance of an obstacle to be overcome or the force needed to lift it. In fact it is claimed that the operator can "feel" his way around so efficiently that the machine can be operated blindfold.

The machine can be manoeuvred forwards or backwards by the operator inside, balance on diagonally opposite legs, climb over a three foot obstacle or walk along a narrow pathway. It can move along level ground at 5 m.p.h., push along a half-ton object and a spike to lift a 500 lb load into a truck. It also has enough storage space to carry 500 lb. of cargo. In the demonstration it successfully walked across level ground, turned around, climbed obstacles, lifted a small vehicle out of a mud hole and hoisted a 500 lb. load on to a truck with one foot.

**NATURAL CENTRAL HEATING.**—The energy of hot water allowed to run to waste at some oilwells is greater than the energy of the oil so carefully piped, transported and refined, according to a Russian scientist, I. B. Shishkin. Mr. Shishkin, in an article in *Piroda*, put forward a strong case for using this natural heat and also a plan for heating a whole city by natural hot underground water. Underground water at a temperature of 150 degrees could be used for any purpose demanding hot water, electricity generation, house heating, certain chemical processes, greenhouse crop production. At the end of its use the water would be returned to the rock to be heated up again—600 to 1,000 metres, depending on rock conditions, would be enough separation between the hot water intake and the cold water exhaust for the cycle to be maintained.

The size of this potential source of energy is enormous, he pointed out. In the Earth's crust alone there are 1,070 million cubic kilometres of water. Going down into the mantle of the Earth for 400 metres raises that amount to 14,000 million cubic kilometres. Its heat energy would be three thousand million million million calories. Without going so far down, Shishkin reckons, the volume of thermal water beneath the U.S.S.R., with temperatures ranging between 50 and 180 degrees Centigrade, is so great that 15 million cubic metres could be used daily, without exhausting the supplies, giving the heat equivalent of 100 to 150 million tons of conventional fuel a year. It would be cheap energy—at Kamchatka thermal waters were already being used to heat greenhouses and produced vegetables at 50 to 75 per cent. less cost than if the houses were heated by solid fuel.

**MOON ROCKS STUDIED.**—As preparations went on to land a man on the Moon—the most publicized and expensive piece of exploration yet attempted—back-room scientists quietly continued their studies of Moon materials, in laboratories on Earth. In-

formation sent back by automatic probes, with far less publicity and at much less cost, was being used to solve some of the basic problems about the nature of the Moon's surface. Studies of the Moon's rocks by an automatic station need different techniques from those which depend on the geologist's hammer. A Russian space probe which orbited the Moon first sent back the information that the rocks generally seemed similar to basaltic rocks on Earth. This it did by using gamma ray analysis. American scientists reported this year that three *Surveyor* craft, landed at widely separated parts of the Moon's surface more than a year before had also reported the finding of basaltic rocks—rocks produced by solidification of liquid material which means, on Earth, by volcanic processes. The three *Surveyor* craft, landed in places being considered as landing sites for manned operations, used alpha rays for their studies. A radioactive source, carried by the spacecraft, emitted alpha rays which were deflected from rock samples scooped up. The rays were scattered in a pattern which depended on the chemicals in the rocks. Though not as precise as normal chemical analysis this technique is able to show the ratios in which different elements are combined to within a few per cent.

Comparison between these results and scatter patterns from Earth rocks led to the conclusion that the material in two Moon "seas" where *Surveyor* 5 and 6 landed closely resembled plateau basalt, a common volcanic rock on Earth. The nearest equivalent to the supposed basalt plains of the Moon's maria is in the sheet lava flows of Iceland, poured out through fissures in the Earth's crust. The sinuous wrinkles which are characteristic of the floors of the maria indicated that they also originated in fissure eruptions. The results from rocks examined by *Surveyor* 7, which landed near the Tycho crater, showed differences. These were also akin to basalt rocks but contained rather more aluminium oxides in relation to iron oxides. Tycho has been thought to have been formed by a meteorite impact and the surface of the Moon nearby may be covered with material from just below the surface which was melted by the impact and thrown around.

**NEW LIFE FOR COAL?**—A new lease of life for coal, even in competition with nuclear energy, was the hoped-for result of several years' research by the British Coal Utilization Research Association and the National Coal Board into fluidized bed burners. It was claimed to have reached the stage where a pilot power station could be built competitive with any foreseeable nuclear station when a prototype boiler was shown at a N.C.B. research station at Stoke Orchard, near Cheltenham. The phenomenon of the fluidized bed, one being used in many branches of technology, depends on the fact that small particles behave like a fluid when air is pumped through them. In the case of the fluidized bed burner the fluid is the ash into which particles of coal and air are fed. The coal and the air are rapidly dispersed through the hot ash and combustion takes place quickly and thoroughly. With steam pipes passing through the hot "fluid" extremely efficient heat transfer is obtained.

Normally, to get the high rates of burning needed in modern boilers coal has to be pulverized. With the fluidized bed the same results can be obtained with cheap, unwashed coal in particles up to a quarter of an inch across. The very high temperatures usually demanded for high efficiency are also not needed. Results equal to that of a modern furnace working on pulverized fuel are said to be achieved in a fluidized bed at the relatively

low temperature of 850 degrees Centigrade. All this adds up to a saving of ten per cent. in running costs. Other advantages are an equal ten per cent. saving in capital costs, the size of the boiler is only one quarter of that in a conventional plant, and a reduction in pollution—the combustion gases can be made virtually sulphur free by adding lime to the ash. The savings in capital and operating costs should result in electricity at a cost of  $\frac{1}{4}d.$  a unit which, claims the National Coal Board, is as good as the best that can realistically be hoped for from nuclear power stations in the foreseeable future, perhaps for the rest of this century.

Workers at the B.C.U.R.A. Industrial Laboratories at Leatherhead first applied the principle and have directed their efforts to producing smaller industrial boilers. One, commissioned during the summer, produced 3,600 kilograms of steam an hour from a boiler half the size of a conventional unit with significantly lower capital, running and maintenance costs. Maintenance costs in the fluidized bed system were so reduced that the National Coal Board was talking in terms of automatic coal-fired stations, needing only an occasional human glance at them as a check.

The Leatherhead workers also had another prospect in view, the operation of a fluidized bed at higher pressures. The units already developed and being developed worked at normal atmospheric pressures. Operation at higher pressures, at ten to fifteen atmospheres, should keep coal competitive not just for this century but beyond. A present day 500 MW conventional pulverized fuel boiler occupies a space about as big as Canterbury Cathedral. A fluidized bed steam boiler at fifteen atmospheres pressure would take up only one twenty-fifth of that space. Not only could it raise steam for steam turbines but some of the energy of the hot gases in the fluidized bed could be used to run a gas turbine. The combination of gas turbine and steam systems should mean still higher efficiency. Leatherhead had proved the feasibility of the pressurized fluidized bed and were embarking on a pilot plant. This should be operating late in 1971, at about the same time as a large 30 MW demonstration plant, at normal pressure, for which the National Coal Board hoped to get some financial help from electricity undertakings.

**NEW PUMP.**—A novel form of his linear motor, a remote-powered pump, which could be developed into an artificial heart, was demonstrated by Professor Eric Laithwaite at an Open Day at Imperial College, London. His linear motor, now being developed in a number of countries as the motive unit for 250 m.p.h. trains of the future, is basically a normal electric motor which has been unwound. The rotor is replaced by a long rail outside the vehicle which is to be moved. This rail produces a moving magnetic field which draws along it the motor's stator, the only part inside the vehicle. Demonstrating his motor at an international exhibition Professor Laithwaite noticed that a piece of metal swarf, which someone had picked up off the floor and dropped on the linear motor rail, appeared to be trying to move, although, by accepted theory, it should not. That started him thinking, thinking which came to a head as he was eating a sandwich lunch in his laboratory one day. He took a paper clip, unwound it and then rewound the stiff wire loosely around a pencil. He held the pencil over a linear motor rail and at once the wire coil began to spin. Two months later he and his undergraduate assistants had produced a range of tiny pumps working on the principle of the Archimedeans screw, some small enough to be inserted inside an artery. It seems that using

the Laithwaite magnetic motor principle the smaller the pump the more efficient it is, contrary to normal experience. A pump powered by three tiny washers, each smaller than a farthing, develop half a watt of power.

The pump is remotely powered as well as remotely controlled. There are no wires carrying electric current to it or any other tangible motive force; the force is in the magnetic field. In surgical use the pump could be placed in the body and the magnetic field produced by small three-pronged device inserted in the operating table, immediately below the pump. The first thought was that it could be used to keep the circulation going during heart operations but initially it is more likely to be used for removing fluids which get into the surgeon's way.

One thing still puzzling the professor is just why his new "rotary" form of "linear" motor works. He produced a nice theory, depending on the presence of different magnetic fluxes around the rotating part. But then one of his students, through an ingenious piece of work, measured all the fluxes and found them the same. But, like a good engineer, Professor Laithwaite is more interested in the fact that the motor does work than in why it does. He has developed yet another device, the low-speed, high-torque electric motor which a number of branches of engineering have been seeking for years.

**NUCLEAR TRANSFORMATION.**—The Wellsian vision of "World Set Free" by nuclear energy will soon be a realizable fact, according to the American nuclear physicist, Dr. Alvin Weinberg, of Oak Ridge National Laboratory. He described to the American Society of Agronomy his own vision of a vast agro-industrial complex, powered by a nuclear power station which would not only provide the energy to operate the industries but also produce the fresh water needed to transform a desert area. It was not just a vision, he stressed. They had been fortunate at Oak Ridge to have scientists in a number of different disciplines who had been able to exchange knowledge and keep each other's feet firmly on the ground of what was possible. The input to the centre would be nuclear fuel, seawater, phosphate rock and bauxite. The output would be aluminium, ammonia, phosphorus, electrolytic hydrogen, caustic soda chlorine and magnesium plus distilled water for agriculture.

To remove the 35,000 parts of salt per million from seawater requires about 3 kWh for every 1,000 gallons. A breeder reactor as large as 3,000 MWh could produce electricity at as small a cost as 2 mills, or one-fifth of a penny per kWh or even less. Even a 1,000 MWh reactor which was not a breeder could provide the electricity for less than 4 mills and, in certain instances, less than 3 mills. At 2 mills the theoretical minimum cost of desalted water was 0.6d. per 1,000 gallons. This theoretical minimum could never be reached. To reach the minimum energy expenditure considerable expenditure on capital plant would be needed, which would make the water much more costly. A balance had to be struck between energy efficiency and the complexity of the system, but they had concluded that water from the agro-industrial complex might cost between 10d. and 20d. per 1,000 gallons. Even at 10d./1,000 gallons water was normally considered too expensive for all but the most valuable crops but there were certain advantages in using desalted sea-water. It was available all the year round and on demand so, if the climate was right, three crops could be produced a year. Secondly, crop yields depended more

strongly on the variety and the fertilizer than on the amount of water, provided a certain minimum amount of water was used at the right time. Their studies had shown that even at 15d./1,000 gallons wheat could be grown at competitive prices, if new varieties were grown. The use of special sensors in Israel had cut water requirements by 50 per cent. The sensors monitored continuously the moisture content of the soil and applied water only when they decided it was needed. After general studies the Oak Ridge scientists were examining the possibilities of building complexes in such places as the Gujerat Peninsula in India and the South-Eastern rim of the Mediterranean.

**OUSTING KITCHEN SMELLS.**—That boarding house smell, compounded of boiled cabbage, garlic and frying fish, may become a thing of the past because of a discovery by "gas warfare" scientists at the Porton Down Chemical Defence Establishment. The scientists, whose ostensible task is to find ways of defending Britain against gas attacks, may go down in history as finding the defence against kitchen smells. This could be done by curtains made of carbon cloth, developed to provide better filling for gas masks than the orthodox granules of charcoal. In one laboratory was a glass box with a little mound of cut onions inside. One sniff through an opened hatch was enough to bring tears to the eyes but repeated sniffing at another opening, protected only by a thin layer of the new cloth revealed not a hint of onion. Keeping out the smell of onions was an easy task, said one of the team which discovered the cloth. He wanted to show it off with the worst smell known to man—extract of submarines. This is the liquid removed from submarine filtration plants, a concentrated mixture of human, tobacco smoke, battery fumes and cooking smells. But he was voted down.

The cloth is made by passing a rayon fabric through an oven. The heat is carefully controlled, to ensure that the rayon does not emerge as ash and to make certain the cloth retains its flexibility. In respirators and filtration plants it is more effective than charcoal, partly because it does not compact and so allow passages for gases, and smells, to pass through. A curtain of the cloth hung across a kitchen entrance would be guaranteed to absorb all the smells for months until it was impregnated. Then all that would be needed to make it as good as new again, for its smell removing task, would be put it in an oven. But not the kitchen oven, otherwise the kitchen would fill at once with those many months' accumulation of smell.

**PIPED LIGHT.**—A device to remove from the car driver some of the tedium and unwanted exercise of walking was produced by a West German firm, Jenser Glaswerk Schott, of Mainz. Up to the date of this invention the driver who wanted to check that all his lights were working had to heave himself out of his seat and walk all round the car, unless, of course, he got his wife to do it for him. And, if he was travelling, there was no alternative to stopping. Now, after Schott has come to his aid, he can check those lights, moving or stationary, at any speed and at any time, providing only that the lights are switched on. What the German firm has done is to devise a system of piping some of the light back to an indicator panel on the car's dashboard, via light conducting cables. These consist of many fine glass fibres with glass of high refractive index in the centre of the cable and less refractive glass towards the outside. No matter how much the cable, consisting of 50 to 200 fibres in a P.V.C. sheath, winds and curves its way through the car, any light entering it at the lamp

end passes through to the indicator end. There, there is no bother about indicator bulbs burning out or faulty fuses. The light from the lamp itself shows up directly. A further use for the cable is to carry light from one central source to illuminate many different spots such as dashboard switches glovebox and shelves. Light conducting cables are not new but they have been expensive. The German firm claims to have found a new process for producing the fibres cheaply and in large quantities (*New Scientist*).

**PUPILS' PUPILS.**—That wide-eyed look of wonder really does mean something. The harder one concentrates on a mental task the more the pupil of the eye dilates or expands. Dr. C. J. Holloway and Dr. Patricia Wright, of the Medical Research Council Applied Psychology Research Unit, Cambridge, gave a demonstration of this at a Royal Society Conversation. Dr. Wright's pupils dilated as Dr. Holloway gave her mental arithmetic problems. The harder the sum the wider her pupils became. When she was asked to listen to a sentence the pupils reacted hardly at all but when she was told to memorize it they opened wide again. So far the discovery is just an interesting phenomenon but it might lead to a way of assessing stress and strain. There was, however, no fear that teachers will use the pupil check to check on whether the desk-bound pupils are slacking. As Dr. Wright pointed out, "when someone is not paying attention it is usually because he is concentrating on something else." In other words it might be the attractiveness of the girl in the desk across the way or the excitement of the comic concealed in his exercise book which might be making a boy's eyes open wide, not the toughness of his lessons.

**PUTTING WASPS TO WORK.**—The problem, how to make a wasp sting, is one which most people think they could answer. What they want to know is how not to provoke the creature. But one group of American scientists were troubled by the fact that they could not get enough wasps to sting, to produce venom for their studies. Many people are allergic to wasp stings but work on reducing sensitivity to it has been held up because so little venom has been available. Methods for inducing honey-bees to sting appear not to work with wasps, according to a report from the *Annals of the Entomological Society of America*, reprinted in *New Scientist*. A new system developed by R. P. Simon and A. W. Benton, of Pennsylvania State University, does appear to be successful in inducing wasps to part with their venom in amounts sufficient for their work, without too much danger to themselves. The equipment they use consists of a collecting frame about five inches square carrying electrically charged wires at one eighth inch intervals. When a wasp touches two neighbouring wires it completes an electric circuit and a very high frequency current flows. This induces a stinging response and the venom is collected on another frame below the wires. Not only does the equipment induce the wasp which touches it to sting, it acts as a centre for the fury of other wasps. The first wasps who touch it sting several times and then release an alarm odour. This draws more wasps to the scene to deal with the intruder. Small nests of wasps can be milked in this way for about fifteen minutes. Wasp colonies can be milked every few days without any evidence of harm to them—and to prevent harm to the scientific colony of Pennsylvania the instrument's operators wear all-covering, heavy clothing while at their work.

**RHUBARB RESEARCH.**—Good news for rhubarb

lovers during the year was that a strategy to defeat viruses, which shared their fondness for the succulent stems, had been developed and promised success. Scientists at a number of research stations joined in the work, which at least raised hopes that the virus diseases which plague most commercial varieties of rhubarb could be countered. There are at least four of these diseases, three transmitted by aphids and the other by nematodes. The first step was taken by the National Vegetable Research Station, Warwick, which raised virus free plants of a number of varieties. Then the Nottingham University School of Horticulture developed a method of rhubarb reproduction able to tackle the problem of repopulating the rhubarb fields of Britain with healthy plants. In this system the growth buds which normally develop into the rhubarb sticks are taken out and rooted, using modern mist propagation technique. As more buds form these are also taken out and rooted, each bud producing a complete plant. Then the plants produced early in the season can be divided into three, according to the old-fashioned system practised by ordinary gardeners. Stockbridge House Experimental Horticulture Station, Cawood, Yorkshire, put the Nottingham technique to work on a large scale during the year and found it could produce 250 to 350 progeny from a single plant in the course of one season. Until field trials with the virus-free plants are carried out it is not known what difference they will make but small scale tests have indicated an increase in production of 25 per cent. Reinfection with virus disease is said to be slow. The first varieties of the new rhubarb plants to be distributed were the forcing kinds, Timperley Early, Prince Albert and Victoria.

**SCREENING FOR CANCER.**—A screening system to pick out women who are more likely to develop cancer of the breast was reported to be a possibility following work done in laboratories of the Imperial Cancer Research Fund. A seven-year study of women in the Channel Island of Guernsey, described in the annual report of the Fund, revealed the possible existence of a high risk group who might be identified before they contracted the disease. The Guernsey trial had been carried out to check suggestions that breast cancer might occur in women who secreted unusual amounts of hormone products—and therefore excreted unusual amounts. The survey did find that 13 of 17 women who developed breast cancer had previously been excreting abnormal amounts of hormones. The changes from normal were not all in one direction. Some showed low levels of some hormones, others showed high. The proportions differed with different hormones. But, reported Dr. R. D. Bulbrook, Head of the Department of Clinical Endocrinology, if the results were representative of women generally they indicated that about two thirds of the breast cancer cases are found in women with a previous abnormal excretion of steroids. About one fifth of women have this condition. Among these, therefore, the breast cancer rate might be as high as one in ten or one in twelve. In the other eighty per cent. of the population it would be very low. Although the average annual incidence is small, one per 800 women a year in the age range 35 to 55, the disease eventually accounts for about four per cent. of deaths in women.

Hormone assays, reported Dr. Bulbrook, might be used to pick out women at risk in the same way as mass X-ray screening was used to detect tuberculosis or lung cancer. Once a high risk woman was found, attempts might be made to correct her hormone balance. Alternatively a close watch might be kept on her, using new methods for early

diagnosis of breast cancer. But Dr. Bulbrook stated that it was not intended to adopt either of those methods at the moment as the results were not certain enough.

Dr. Bulbrook's team were also comparing urine from British women with urine from Japanese—the disease is relatively uncommon in Japan, while Britain has one of the highest rates in the world. Specimens from Japanese women are flown to London, frozen solid and packed in dry ice. In 1904 an attempt to import similar specimens from South Africa ran into trouble. The Post Office, convinced that cancer was an infectious disease, destroyed the crates as fast as they arrived. "In the present experiment the Customs Officers have been puzzled but not destructive", reported Dr. Bulbrook. One result had been to show that Japanese women over 40 had more active thyroids than British women and there was already evidence that the disease was less frequent where the thyroid was active. But Japanese women who had emigrated to Canada and ate Canadian food did not show this difference. The argument that diet affected hormone production and that this, in turn, might affect the incidence of breast cancer might appear improbable, commented Dr. Bulbrook, but in the last few years a significant relationship had been found between cancer and fat in the diet. Mice fed on a Japanese diet showed a reduced incidence of breast cancer—on the other hand the Japanese diet seemed to play a part in the high rate of stomach cancer in Japan.

**SCHOLARLY WARMTH.**—The hotter the arguments in one American college the better, for the college's funds as well as the students' progress. The Johnstown, Pennsylvania, campus of the University of Pittsburgh installed during the year a system for putting to work the heat generated by students, and by instructors. It collects waste body heat, and the heat from electric lights, kitchens and that coming through windows, to warm the college's ten buildings. Even in winter, it is claimed, no conventional heating plant will be needed.

Heat is extracted from areas where it is not needed, through ceiling louvres, and warms chilled water passing through a series of pipes. This water circulates to a central unit where its acquired heat is extracted by a centrifugal water-chilling machine. This machine pumps or whirls off the heat by a centrifugal fan, exhausts it to a condensing unit, which raises the temperature by compression, and returns the re-chilled water to the circulatory system. The recovered heat is piped back to areas which need heating by hot water radiators, any excess being stored in two insulated hot-water tanks. This stored heat automatically supplements the system when enough heat cannot be collected, at such times as weekends, holidays or at night.

Large buildings often need air-conditioning at the same time as they need heating, for heat produced in interior areas by lights, people and machines cannot escape, although exterior rooms are being chilled by outside conditions. The initial cost of the new system was said to be comparable to that of a central air-conditioning system, but operating costs were estimated at about half that of a conventional heating system, with the air-conditioning effect thrown in as a bonus. Heated arguments really do raise the temperature at the college, for research has revealed that the harder the student studies and discusses a point, the more heat his body radiates.

**SEEING THROUGH ONE'S BACK.**—Blind people can be trained to "see" with the skin of their

backs, it appeared from a report, in *Nature*, of pattern recognition work by a group of American scientists. Although they did not use the word "see" they did claim that, after sufficient experience, their new system "seems to become an extension of the sensory apparatus". Dr. Paul Bacy-y-Rita and others at the Smith-Kettlewell Institute of Visual Sciences of the Pacific Medical Center use an array of stimulators which vibrate against the skin as a substitute for the eye with its myriad light sensitive cones and rods. Into the back of a dental chair are built four arrays, each containing four hundred stimulators in a twenty by twenty pattern. The stimulators, less than a twentieth of an inch across where the tip contacts the skin, spaced half an inch apart, are linked to a television camera. This, equipped with a zoom lens, is operated by the subject sitting in the chair, who can point it at any object he chooses. The output from the camera is used to modulate the vibration pattern of the stimulators, so mapping out areas of light and shade and producing an image. After training, it was claimed, the subject can recognize objects by the touch pattern. This could be checked by connecting the camera to a normal screen, as well as to the chair, to give a visual picture to be compared with the subject's description.

A blind psychologist, with 150 hours' training, and five students, each blind from birth, with between 20 and 40 hours' training each, co-operated in the trials. The first step was to discriminate between separate and overlapping objects. From there patients moved on to letter recognition, perception of movement and the study of other persons. Eventually, it was reported, they could recognize individual characteristics such as height, hair length and whether the person was wearing spectacles or not.

In Munich a somewhat similar sensing apparatus was developed which enables the deaf and blind-deaf to "hear" with their wrists, breastbones, shoulder blades and necks. Using principles developed by Professor K. Schulte of Heidelberg University on the teaching of speech by vibration, the firm of Siemens developed an apparatus which converts the sound waves of speech into vibrations which can be perceived by touch. Deaf-mutes, people with an extreme defect of hearing and people who are blind and deaf are very sensitive to vibration throughout their bodies, Prof. Schulte has shown. The greater the hearing defect the greater the vibration sensitivity. The new apparatus consists of a vibrator operated by a transistorized amplifier, with separate base and treble controls and, instead of a loudness control, a vibration intensity adjuster. The best site for picking up the vibration appears to be the wrist joint but the sternum, clavicle and upper vertebrae are also used. A deaf child wears the vibrator and headphones while his teacher sits opposite, speaking into a microphone and operating the equipment. In this way the child, initially, has the help of seeing the teacher's lip movements as well as of any slight hearing he has left. But the teacher gradually tries to eliminate the aid of sight by moving the microphone in front of his mouth. A child, it is claimed, quickly learns to recognize the most varied sounds and words and to imitate them—and is able to check his imitation by speaking, himself, into the microphone.

**SMOKING THE BEETLES.**—Death watch beetles in the vast timbered roofs of King's College Chapel, Cambridge and Westminster Hall, London, were being smoked out during the year. A new technique, using smoke instead of the conventional

liquid insecticides, promised to help rid these architectural masterpieces and others like them of their enormous colonies of destructive beetles at less cost, without extravagant calls on scarce skills and labour and without the eyesore of scaffolding. The operation was being conducted by the Forest Products Research Laboratory of Princes Risborough. The raw materials for the beetle killing smoke are an insecticide, or a mixture of insecticides, and a substance which will liberate oxygen and fuel. When the smoke generator is started the insecticides are vaporized. Contact with the cooler air condenses the vapour into minute particles, visible as smoke, which are carried throughout the building and deposited on any surfaces they meet. Research at the Forest Products Research Laboratory had shown that a mixture of dieldrin and gamma-BHC would provide a poisonous layer effective against the common furniture beetle as it emerged. This prompted tests against the death watch beetle at King's College Chapel, where the timber roof lies about ten feet above the stone vaulted ceiling, giving a roof space of nearly 4,000 cubic yards. It proved possible to fill this space effectively with smoke and treatment in the last week in March or the first week in April resulted in dead beetles being swept up by mid-June. Four annual treatments showed that it must be preventing mating and egg-laying, for the numbers of beetles fell from 1,090 to 499. A slight increase in the next year was upsetting until it was realized that the varying amounts of decay in the roof could mean differing lengths of larval life for the beetles—the increase probably came from beetles emerging from an area with poor food supplies for the larvae, where the eggs could have been laid six or seven years before. Westminster Hall, with its exposed timbered roof, ninety feet above the floor at its apex, provides an even bigger test for smoke than King's College. But the first attempt saw the smoke steadily, if slowly, filling the whole hall. Nearly 300 beetles were collected after that one treatment and the operation is to continue.

**TASTE TONES.**—The noise which goes on at cocktail parties may serve a more important function than keeping the conversation going—it may make the drink taste better. A Danish psychologist, Dr. Kristian Holt-Hansen, announced at a congress on psychology in Amsterdam that he had found a connection between sound and taste. Whatever the drink one chooses, beer or whisky, wine or brandy, tea or coffee, it tastes best when the drinker is listening to a particular sound. The best-tasting sound differs for different drinks. Strong beers needs a different frequency from that which gives the added zip to a glass of lager. A bottle of vintage claret will not give up all its delight if drunk to the sort of tone that goes best with a humble cup of tea. The wine connoisseur may insist that the claret should be drunk with due reverence, without the accompaniment of any noise at all—except that which necessarily accompanies the sipping, tasting and swallowing. But Dr. Holt-Hansen points to the fact that his researches have shown not only that all drinks need some sound but that for most people it is the same sound for the same drink. Raise the sound or lower it from that optimum tasting tone and the drink changes in character, always for the worse.

**VACCINE FOR HEALTHY TEETH.**—Vaccination against tooth decay could come from work done at the department of dental science at the Royal College of Surgeons. Dr. W. H. Bowen and his colleagues there reported that they had developed a vaccine containing live caries-causing streptococci which, when injected into monkeys, substantially

reduced the number of spots of decay caused by bacteria of the same strain. The work was in its early stages, only six animals had been used, but the results seemed to warrant cautious optimism. A strain of bacteria known to be caries-producing in hamsters and monkeys was isolated from human caries, suspended in saline and injected into three of the monkeys. Booster injections were given twelve weeks later. All the animals were infected by mouth with the same strain of streptococcus and fed on a diet rich in the sort of carbohydrates associated with dental decay. Eighteen months or so later the three animals who had not been vaccinated had, between them, thirty-eight established spots of caries and thirteen early spots. In the vaccinated animals there were only six established spots and four early ones. Not only had the number of spots of decay been reduced but the nature of them had been changed, it was reported. The control animals had carious spots similar to those in children, with the dentine soft and the decay extending to undermine the enamel. In the vaccinated animals there was less softening and less undermining. Bacteria were found to be present throughout the experimental period so it appears that the antibody produced by the vaccine does not act directly on the organisms. It is possible it acts on an enzyme produced by the bacteria. This is as well because, apart from the clinical unsuitability of a live vaccine, this particular bacteria is associated with the disease endocarditis. But if the vaccine acts as an anti-enzyme then it would be necessary to use the bacteria but simply to isolate the active component.

**WATER WHICH IS DIFFERENT.**—A new form of water which freezes to a glass-like solid at 40 degrees below the freezing point of ordinary water and remains a stable liquid up to 500 degrees Centigrade, now exists in a number of laboratories around the world. At last the substance, regarded with considerable scepticism since the Russians first reported it in 1962, received, in 1969, an agreed name—polywater. Previously it had been described as anomalous water, super-water, plastic water, or just a figment of the imagination. Polywater is a real man-made substance. So far it has only been produced in the tiniest amounts and only in hair-thin quartz or glass tubes and it seems that molecules on the surface of the glass act as some form of catalyst in inducing ordinary water molecules, made up of two atoms of hydrogen with one atom of oxygen in between, to join together in a peculiar way. For it appears that polywater is another giant molecule substance differing from water in the same way that the plastic polyethylene differs from the gas ethylene.

British workers at the Unilever Research Laboratory at Port Sunlight reported, in April, that they also had produced the strange water and they confirmed a number of properties reported by the Russians. But not enough of the substance had been made for studies to be made into its molecular formation. Later an American team, at the University of Maryland and the U.S. National Bureau of Standards, claimed that they had produced enough to carry out infra-red studies into its structure—the pattern in which infra-red light is absorbed is a characteristic of each kind of molecule. The pattern of the new water gave a hint to its polymer construction. The H-O-H molecules appear to be linked by bonds between the oxygen atoms, perhaps forming a hexagonal network, with a hydrogen atom incorporated. This is a rare form of bond but at least two substances have infra-red spectra which resemble the spectrum of polywater.

## THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology or Medicine; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Sciences—(a) Physics; (b) Chemistry; the Royal Caroline Institute, Stockholm—(c) Physiology or Medicine; the Swedish Academy—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of five members and three deputy members. The Swedish Government appoints a chairman and a deputy chairman, the remaining members being appointed by the awarding authorities. 389 awards had been made up to August, 1969.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentina; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia; (ff) Yugoslavia; (gg) Greece; (hh) Israel; (ii) Guatemala. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901-1956, see earlier editions of WHITAKER'S ALMANACK.

## BRITISH ARCHITECTURE OF 1968-69

MOORE BARRACKS,  
SHORNCLIFFE, KENT

Situated to the west of Folkestone on a cliff top plateau some 290 feet above sea level, Shorncliffe Camp has been occupied by the army since the 19th century. Part of this site, Moore Barracks, covering an area of nearly 80 acres, has now been rebuilt to designs prepared by B. & N. Westwood, Piet & Partners, to serve the new purpose of a barracks for 750 boy soldiers, although a recent change in the Ministry's requirements has now established the barracks for use as a Junior Infantry Battalions Unit. Fortunately this change has meant very little adjustment to the architectural concept of the scheme and some of the buildings have an intrinsic quality synonymous with the best in current British architecture.

It became clear that the problem was not in fact to design a barracks in the accepted sense of the word, but a group of buildings which should, by their character and relationship one to another, create the right environment for the training of boys in all aspects of life: living, playing, learning and worship. At the same time, of course, it has to be borne in mind that the end product is a soldier and army tradition and discipline should not be overlooked.

The site is ■ excellent one for the project. Although it is sufficiently undulating to be attractive, there is adequate space for playing fields on Moore Plain and reasonably level area for building upon, rough ground for training purposes and a fine outlook to the sea.

The cliff top is partly covered with trees, rough grass and gorse falling gently in its contours to the north. A wooded valley penetrates it from the east and it is bounded on the south by a public footpath. Being on a cliff top, the site is very exposed and subject to strong winds, the influence of which can be found in the grouping and character of the buildings forming sheltered courtyards and spaces with existing trees and new planting used to form wind breaks. There was here the opportunity to design ■ comprehensive group of buildings using a similar form of construction, materials and detailing in each building, thus creating a unity of character throughout the whole scheme.

The cost allowance imposed at the time was certainly not lavish, and this, coupled with the very exposed nature of the site, caused the architects to opt for ■ traditional load bearing brick cavity wall construction. Apart from this, they were striving to create buildings with a robust character well fitted to their "tough" site and use.

Windows, doors, stairs, parapets, etc., were standardized wherever possible, the creation of character and effect relying mainly on good proportion, contrast of texture and the careful attention to shuttering for concrete finishes. The main saving of cost, however, has been due to the careful cutting out of all unnecessary circulation space, but at the same time ensuring adequate widths to corridors and entrance lobbies, etc.

While all the buildings have considerable architectural significance, one of the most outstanding is the Roman Catholic Chapel. This is a small building, seating about 100 people, and occupies an important site, being one of the first buildings seen when approaching the Camp. It is more or less triangular in shape with its entrance on the south side piercing a brick wall. On the other sides, the sloping shingle covered roof is carried nearly to the ground. The base of the building is in the form of ■ concrete saucer, from which spring the timber trusses forming a tent-like structure, the interior

being partially lined with softwood boarding. Owing to the height of the roof at the apex it has been possible to place over the vestry and sanctuary the guildroom, and over that again, ■ small choir gallery. Light enters through amber coloured cast glass on the eastern side.

Unfortunately this was one of the buildings where costs had to be reduced. This was partially achieved by using the ground as shuttering for the rim of the concrete saucer. The surrounding ground level was raised by using surplus soil from nearby foundations and left throughout the winter to consolidate. Trenches were then dug in the earth, lined with polythene sheet and the concrete poured in. In due course the earth was dug away exposing the concrete which, owing to the creasing of the polythene, has ■ most interesting rough marble like appearance.

Another notable example of the architects' work is to be found in the group of buildings housing the Gymnasium, Assembly Hall and Swimming Pool. The site was originally used for the Officers' Mess of the old barracks and is surrounded by fine groups of mature trees. Planning is compact, with the changing rooms forming the centre around which the buildings are placed—direct access from the stage to the changing rooms also allows them to be used ■ dressing rooms. A large sliding screen between the gym and assembly hall enables the two rooms to be used together when large assemblies are required.

The actual barrack blocks—the boys' sleeping quarters—are located in ■ quiet corner of the camp almost ideally situated on a site sloping steeply to the south and east overlooking ■ wooded valley. The buildings consist of six blocks linked together forming the perimeter of an irregular sloping court; the floor levels of the blocks conform to the slope of the ground. With these ingredients and the varying height of buildings, ■ pleasant informal setting has been created, far removed from the normal concept of a barracks. The grassed court, planted with groups of trees, is divided up with paths which follow the natural "flow" from the barracks to the other ranks' mess nearby. Special low level brick and concrete bollards, with built-in lights, are placed to light path junctions.

The blocks with split level floors are planned with rooms in each of which ten boys sleep. A service area in the centre houses lavatories, ablutions, drying rooms, etc. Each room has one large window and ■ range at high level, thus giving cross ventilation. Quiet rooms are planned on the ground floor.

The offices, classrooms, junior ranks' club, officers' mess and rank and file mess, even the guardroom and water tower all share with the chapel the same high standards of design and consistency of detailing which should set the pace in similar projects for some years to come.

## QUEEN ELIZABETH II

No excuse is offered for including under the heading of architecture, ■ short notice of the new Cunard liner—*Queen Elizabeth II*. It has already been said of the liner in an article carried by the Architectural Press: "The significance of this liner lies in the quality of her design. Inside and outside are as one and all parts are given equally conscientious attention by her designers whether they are the crews' quarters or the first class dining room. The Q.E.z. has ■ far greater significance, however, than other examples of a design programme consistently and skilfully carried out; for as well as being ■ ship, she is ■ national shop window, ■ travelling advertisement of what British architects and technicians can do. She will give many foreigners their

first impression of contemporary British standards of taste and design."

Significantly enough, the task of co-ordinating the interior design of the ship was given to architects—Dennis Lennon and Partners. Not only has Mr. Lennon created a sequence of related areas designed by himself such as the upper deck promenade, theatre bar and Britannia restaurant, but he has kept control over other sequences where each part has been dealt with by a different architect or designer.

The internal planning of any large liner is complex, involving the placing of large numbers of people at very high densities in what has been likened to a strong and continuous metal envelope. The 2,000 passengers are given an average of 72 sq. ft. of cabin space each, compared with approximately 48 sq. ft. on the previous *Queen Elizabeth*. Every attempt has been made to diminish any feeling of enclosure, an aspect of design carried throughout the ship, embodying the maximum number of cabins with daylight and the spatial continuity of public rooms with adjacent areas. The detailed planning of the passenger cabins follows hotel design practice in placing w.c.'s and bathrooms as a noise barrier between the corridors and cabin areas proper. Considerable use has been made of plastic laminates as a facing material on wall panels, furniture and even radiused linings to drawers. Ceilings of enamelled sheet aluminium "mini-rib" are used extensively in cabins, main circulation areas and public rooms alike. First class cabins on Deck 1, designed by Jon Bannenberg, have walls and door faced with rosewood veneers. Other wall panels are faced with proofed linen and incorporate softly lit coved ceilings of fibrous plaster.

In many ways the most exciting and probably the most admired room in the ship is the Queen's Room, designed by Michael Inchbald. The spacial juxtaposition of the promenades and interior of the room create an illusory effect echoed by the careful choice of decorative form. White fibre glass or fibrous plaster trumpet-shaped columns under each duct casing line the aisles and give a directional emphasis to the room which is continued in the patterned striations of the carpet and the large scale open screen effect of the end walls contrived by the use of walnut veneered fibreglass blocks set with mirrors lending a strong visual continuation of the space. From the ceiling, perforations in the white fibreglass construction cast a brilliant white light over a sunken central area dance floor which, to heighten the effect, is surrounded by a white fibreglass trough full of plants and flowers.

In contrast, the Double Room designed by Jon Bannenberg suggests a faint echo of the Baroque coupled with an almost angular concept in the choice of furniture and a very literal expression of horizontal planes. This room of double storey height, the largest in the ship, seating 800 passengers, serves a variety of functions. Quiet conversation corners in dark plum coloured alcoves contrast with the cocktail bar lit from above by clusters of black and silver lighting tubes. A ceiling of the almost universally used ribbed aluminium is equipped with an elaborate and flexible lighting system giving considerable effect to the general décor of the room.

A ship of contrasts and features which can often almost defy description, particularly when the designers seem purposely to go out of their way to contrive a stunning effect. So with the Midships Lobby, the point at which first class passengers will receive their introduction to the ship. The drama is contrived by Dennis Lennon in the form of a concentric floor and ceiling plan, pivoted around a single white fibreglass mushroom-headed column

rising in vivid contrast from a dark blue carpet between the apple green hide of the surrounding concentric bench seating against the background of luxurious blue hide wall panels. Both the chrome handrail protecting the sunken circular seating area and concealed perimeter lighting serve to emphasize the circular form while troughs behind the seating project lighting upwards on to a fluted silver painted ceiling in full contrast to the depth of floor colour.

Throughout the ship, bars, restaurants, swimming pools, a theatre (doubling as a place of worship on Sundays), the library, art gallery, club and shopping arcade under the careful hand of such well-known designers and architects as David Hicks, Gaby Schreiber, Theo Crosby, Stephan Buzas and Alan Irvine, the same high order of detailing and finish prevails. The wide choice of materials, in a variety of individual styles, must surely stimulate even in the most jaded intellect an appreciation of what is possibly the best exhibition of British design ever to be assembled in one "envelope".

### COMPUTER CENTRE, LEEDS

Ten buildings from thirteen regional areas have been chosen this year for the R.I.B.A.'s annual awards for architecture. Two university buildings, three schools, a local authority housing estate, a computer centre, a research station, a swimming pool and a private house go to make up this year's award winning buildings. The purpose of the scheme, which has been running since 1966, is to give public recognition to outstanding examples of current architecture and thereby achieve a greater public awareness of good architectural design. The opportunity is presented for public recognition of the merits of both large and small projects acclaiming the talents of lesser known firms of architects as well as those who have already achieved national and international status.

The award winning building in the Yorkshire region was commissioned by the Yorkshire Bank in 1967. A local firm of architects, Messrs. Braithwaite and Jackman, were briefed to prepare a design for a building in Leeds to house the Bank's new computer centre which was to provide an efficient computer service to their branches throughout the country. Accommodation was required for the computer and associated machinery, receipt and dispatch departments, a stand-by generator sub-station, air conditioning plant, administrative offices and staff facilities for the Bank's personnel. Great emphasis was placed on the need for ideal climatic conditions for both machinery and staff.

The site lies between a housing estate and a suburban shopping centre on sloping land with a 5 ft. high retaining wall crossing the middle and included a number of cellars and foundations of old property previously demolished. In view of the apparent congestion and the two levels, the architects decided to house the stand-by generating equipment, transformers and air-conditioning plant in a semi-basement, with receipt and dispatch departments, dining and toilet facilities on the ground floor and the computer suite and offices at first floor level. This permitted the exclusion of water services from the first floor and ensured that no vibration or noise from the stand-by generator could reach the computer room.

Use of *in situ* reinforced concrete produced a rigid structure and allowed the vertical circulation ducts for lifts and air conditioning to be expressed externally and used as structural supports. Doubled glazed offices were sited on the west and north elevations overlooking the car park and gardens, and internal circulation arranged in such a way as to ex-

clude visitors to the building from the computer suite, although the machinery is visible from the staircase. A new access to the suite was formed from Allerton Hill to enable vehicles to circulate more freely.

Great care was taken in the specification of the concrete to give a sympathetic colour and texture that would weather well. White Portland cement was used with a brown quartzite gravel, and the texture obtained by using profiled formwork and a retarding agent. Dark brown smooth faced bricks were laid with recessed joints in a very dark brown mortar.

The computer suite itself is fully air conditioned and the remaining areas heated with withdrawable electric floor heating cables. The floor is demountable to allow access to services beneath and this space and the one above the suspended ceiling house a carbon dioxide fire extinguishing system. Sonic and other intruder alarm systems are used throughout the building, as is smoke and heat detecting fire equipment. Plant in the basement has been raised above floor level to allow it to continue working even if the floor is accidentally flooded.

The qualities of the scheme can probably be best summed up by the following extract from the award committee's report: "The Jury were unanimous in their decision that this was the best building entered and a fine answer to the client's brief. The key working areas are on the first floor, with vertical access and services kept to the outside, and these facts are expressed with clarity and strength in a design that allows the building to sit with conviction on a difficult sloping, suburban site. The architectural language—while being of the moment—is entirely valid and is used with distinction".

#### CHRIST CHURCH PICTURE GALLERY, OXFORD

The buildings which have won regional awards, like the firms which designed them, are notable for their diversity. Powell & Moya have won awards this year both for their swimming baths at Putney and the Christ Church Picture Gallery at Oxford. It would be difficult to imagine two buildings more diverse in character, yet both express an impressive consistency and simplicity and use of building materials.

The new gallery was commissioned to house the Christ Church collection of nearly 2,000 paintings and drawings, loosely divided into three categories, Italian Primitives, prints and large oils. As the site for the new building, about one fifth of an acre in area, formed an integral part of the Dean's garden, the architects decided to create an open space round the gallery which would remain as a part of that garden with easy access to it.

Externally, the height of the gallery has been purposely restricted to keep it in scale with the surrounding garden walls of Canterbury Quad and Corpus Christi College. In order to achieve the required internal height, however, for the larger galleries, the building was sunk about 4 ft. below ground to the level of Canterbury basement, through which it is approached. The first arm of an L-shaped plan is formed by one of the smaller rooms and the main gallery, the second arm, devoted to the smaller galleries and a study planned around the Print Room which forms the central core of the building.

The external walls are all constructed of reinforced concrete simply faced with rough rubble stone to match the walls of the adjoining buildings, with smooth Portland stone dressings and quoins. Even the sloping roofs are of reinforced concrete, well insulated, waterproofed and covered with 3 in. thick Portland stone slabs. Where exposed, the

concrete is finished with a bush hammered calcined flint aggregate contrasting with the grey tinted glass and bronze metal frames of the cloister windows. Internally, the whole gallery is air conditioned. Walls are finished with a textured plaster, and ceilings in fair faced concrete or smooth white painted plaster, offsetting the floor finish of blue-grey polished York stone flag paving which predominates throughout.

In their report the award jury paid tribute to the architects' skill in handling the very difficult problem of lighting the gallery's three main areas, both natural and artificial, so arranged that the viewer is not consciously aware of the source of illumination which strikes the pictures at a suitably steep angle to avoid reflections. Access to the whole series of rooms has been carefully analysed to allow for an easy flow and choice of viewing, relating well to the environment of the Dean's inner garden, which has now become an extension of the building and together with the carefully composed roof terrace establishes a beautiful sequence of outdoor spaces.

#### CORBAY NEW TOWN

The only R.I.B.A. Regional Award given this year for a local authority housing undertaking, was made to John Stedman, Chief Architect to the Corby Development Corporation, for his work on the Lincoln Estate, Corby. This imaginative scheme displays a comprehensive appreciation on the part of the architect, of the role of each constituent element, so that the total environment becomes exceptionally satisfying. Forming a part of the Kingswood residential area, housing approximately 7,000 people, the Lincoln sector contains about 500 dwellings, representing a very wide range of housing requirements varying from the provision of accommodation for one to nine persons. The basic planning of buildings was largely organized around the footpath system, providing the most direct route from all dwellings to the primary school, shops and other social facilities, completely independently of the road system and without the need for underpasses. The layout is so designed that all activities associated with the traditional street or square other than those involving the motor vehicle will take place within the pedestrian system of footpaths and courts. These are primarily urban in character and are suitably furnished so that they may be used as social meeting places, as indeed many streets were before the advent of the motor car.

From a ridge running roughly across the centre of the site, the natural contours of the wooded land slope down both to north and south at a gentle gradient of 1 in 15. There are a few large trees on the northern slope and a large area of woodland on the western side, nearly all of which has been retained. The bulk of the housing occupies the north eastern quarter of the area on a north facing slope with an overall difference in level of some twenty five feet, but small clusters of houses were sited here and there within the wooded area with the minimum removal of trees and undergrowth. Groups of small dwellings for old people with wardens' flats have been incorporated in the family housing of the main squares. Although some of these housing clusters will be occupied by young people in the first instance, there is a degree of flexibility in meeting the future needs of old people and all the old people in the neighbourhood can use the communal facilities available.

The architect's aim has been to arrange the layout of the housing to provide some privacy to outdoor living areas by the use of single aspect and controlled aspect house types and to express each individual dwelling whilst retaining the comprehensive design

of the whole. The entire north side of a double banked multi-storey section, comprising wide frontage single aspect dwellings, is raised on top of garages accessible from the ends of *cul-de-sac* service roads, penetrating the site from the bottom of the hill. Here, three and four storeys of residential accommodation have been made possible whilst the south side is a mixture of one and two storeys with roof pitches angled to allow the upper floors a view over the central open space but not into private gardens.

The density of building has, in general, been related to the importance of the footpaths to which the dwellings are associated. It is not constant but builds up towards nodal points with housing generally at 16 dwellings to the acre and flats and maisonnettes, where these occur on the main walkways, at a density more in the order of 34 dwellings per acre. In general terms, the building pattern resembles a medium density "Radburn" terrace layout, but one which avoids the ambiguity between front and back floors so much a part of the pure Radburn system. The design permits a reasonable degree of flexibility in layout which, combined with the slope in the site and the landscaping treatment, has been exploited to provide as much variety and interest to the public spaces as possible. All dwellings are wired for telephone and television and there is a choice of heating medium, between off peak electricity and gas central heating. Even children's play spaces have not been overlooked, those for the young being distributed within the housing groups and for the older children in the central recreation area.

It has been said that the advantage of a public authority architects' department lies in its ability to develop a real understanding of the locality which it serves, while steadily evolving an appropriate design philosophy. Whatever Corby's future may be, it is evident that the present development team has during recent years reached high standards on both counts and under the careful hand of John Stedman is implementing some of the best local authority housing in the country today.

#### CZECHOSLOVAK EMBASSY

Built at a cost of a little over a million pounds, the new Czechoslovak Embassy building in Kensington Palace Gardens was officially opened in May 1969. The Czech designers, in association with British architects, Matthew, Johnson & Partners, commissioned many Czechoslovakian works of art, murals, glass ware, paintings, sculpture and *objets d'art*, all blending against a background of modern furniture and jute wall coverings. Although small by many standards this complex building exudes an essential architectural quality of

its own. Slight overtones of formalism are strikingly evident in this building, monumental in some respects, yet achieving an atmosphere of friendliness.

All working, living and reception areas are concentrated into one building, the outward expression of which is that of two linked blocks, each different both in purpose and character. A formal four storey diplomatic wing facing the park-like seclusion of Kensington Palace Gardens is sharply contrasted by the more robust nature of the adjoining seven storey slab block containing the commercial and residential sections of the Embassy, fronting on to Notting Hill Gate. Internally the building is generously planned with an abundance of good materials, craftsmanship and colour. The basement of the diplomatic wing, in addition to housing the main kitchens, contains a small cinema. This room, which can be converted into a conference hall, is served by no fewer than twenty loudspeakers, three of which give stereophonic sound reproduction. The main entrance hall and reception area are located at ground floor level with surrounding bars, dining rooms and other reception rooms, all freely interconnected by sliding doors and walls. The main reception hall itself, which is intended to accommodate any form of entertainment, has capacity for five hundred people and rises through two storeys with a gallery providing access to more reception rooms at mezzanine level with embassy offices upon the two floors above.

The larger block facing Notting Hill Gate is devoted to the commercial aspects of embassy life. Here at ground floor level are contained the consular and visa sections, together with display areas for the Czech commercial, trade and public relation activities, with associated offices at first floor level over. A separate entrance gives access to four floors and domestic accommodation, comprising sixteen flats and sixteen maisonnettes, with a dining room for the commercial staff on the seventh floor, complete with its own kitchen, a staff clubroom and four more embassy flats.

Structurally the building is an expression of *in situ* concrete rather than the pre-cast work which predominates in the external detail, giving rise to an attractive outline, but with seemingly little relevance to internal form. An unusual feature of the scheme is that the entire load of the upper five floors of the seven storey block is apparently collected at second floor level in an externally expressed band of concrete approximately 4 ft. thick. The reason for this is not self evident, although the visual expression lends considerable balance to the external appearance of the building and if carried right through the structure would provide an excellent degree of sound insulation between the offices and domestic accommodation above them.

#### BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the Journal of that Society entitled "Interruptions in the regular rise and fall of temperature in the course of the year." Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7-14, April 11-14, May 9-14, June 29-July 4, August 6-11, November 6-13, and the warm periods July 12-15, August 12-15, and December 3-14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold or warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularities." Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5-17 stormy; Jan. 18-24 anticyclonic; Jan. 24-Feb. 1 stormy; Feb. 8-16 anticyclonic; Feb. 21-25 cold; Feb. 26-Mar. 9 stormy; Mar. 12-19 anticyclonic; Mar. 24-31 stormy; April 10-15 stormy; April 23-26 unsettled; June 1-21 summer monsoon; July 10-24 warm; Aug. 20-30 stormy; September 1-17 anticyclonic; Sept. 17-24 stormy; Sept. 24-Oct. 4 anticyclonic; Oct. 5-12 stormy; Oct. 16-20 anticyclonic; Oct. 24-Nov. 13 stormy; Nov. 15-21 anticyclonic; Nov. 24-Dec. 14 stormy; Dec. 18-24 anticyclonic; Dec. 25-Jan. 1 stormy.

## THE NATIONAL PARKS

The ten National Parks described below in their order of designation have been established in England and Wales—the legislation noted on p. 373 does not apply to Scotland. These areas are not public property and visitors are not free to wander over private land within the Park boundaries. They have been marked out for special care aimed at two prime purposes: to preserve and enhance their natural beauty, and to promote their enjoyment by the public.

**Peak District National Park** (542 sq. miles).—Mainly in Derbyshire but extending into Staffordshire, Cheshire, the West Riding of Yorkshire and the City of Sheffield. In the south and east are limestone uplands, and finely wooded dales with swift, clear rivers and unspoilt stone villages. Northwards, moorlands, edged by gritstone crags, attract hill walkers and climbers. There are information centres at Edale, Castleton and at Buxton (just outside the Park) and an information caravan tours the Park.

**Lake District National Park** (866 sq. miles).—In Cumberland, Lancashire and Westmorland. Spectacular mountain scenery with wooded lower slopes enhanced by lakes and tarns. The area includes England's highest mountains (Scafell Pike, Helvellyn and Skiddaw) and largest lakes. Walking and rock-climbing are the principal recreations, but there are fishing, swimming, sailing, boating and winter sports as well. There are information centres at Ambleside and Windermere and two information vans tour the Park.

**Snowdonia National Park** (845 sq. miles).—In Caernarvonshire and Merioneth and a small section of Denbighshire in North Wales. A wild mountainous region, traversed by high passes, offering some of the finest rock-climbing and mountain walking for both beginner and expert. The main valleys, often finely wooded, hold a lake (or llyn) and are watered by rivers with cascading falls. There are information centres at Bala, Blaenau Ffestiniog, Dolgellau, Llanberis and Llanrwst and an information van tours the park.

**Dartmoor National Park** (365 sq. miles).—In Devon, the highest area of high moorland in southern England, famous for its granite "tors" often weathered into strange shapes. Fine hanging oak woods adorn the river valleys which lead up into the Moor. The Park is rich in prehistoric relics and offers fine walking and riding. An information van is sited at Two Bridges during the summer months.

**Pembrokeshire Coast National Park** (225 sq. miles).—A spectacular section of Britain's coastline, where rocky cliffs alternate with bays and sandy coves. In the north is Mynydd Prescelly, abounding in prehistoric relics. The Park includes the fine estuary of Milford Haven, Tenby, the Cathedral of St. David's, and Carew and other Norman castles. There are information centres at Tenby, St. David's and Haverfordwest.

**North York Moors National Park** (553 sq. miles).—In the North Riding of Yorkshire, the Park stretches from the Hambleton Hills in the west to the coastline above Scarborough. On the coast sheltered bays and sandy beaches alternate with headlands harbouring villages such as Staithes and Robin Hood's Bay. The heart of the Park offers tracts of open moorland, intersected by beautiful wooded valleys. Mount Grace Priory and the abbeys of Rievaulx and Byland are within the Park.

**Yorkshire Dales National Park** (680 sq. miles).—An area of upland moors, cut by deep valleys, in the North and West Ridings of Yorkshire, the Park includes some of the finest limestone scenery in Britain: Kilnsey Crag in Wharfedale, Gordale Scar, and Malham Cove in Malhamdale. In the Park also are Swaledale and Wensleydale, the three peaks of Ingleborough, Wharfedale and Pen-y-Ghent, and

many relics of the past such as the Roman fort at Bainbridge and Bolton Abbey in Wharfedale. There is an information centre at Clapham and an information van tours the West Riding area of the Park.

**Exmoor National Park** (265 sq. miles).—Mainly in Somerset but extending into Devon, this is a moorland plateau seamed with finely wooded combs. The well-known coastline between Minehead and Combe Martin Bay is exceptionally beautiful. In the east are the Brendon Hills. There are information centres at Minehead and at the Lyn and Exmoor Museum, Lynton.

**Northumberland National Park** (398 sq. miles).—A region of hills and moorland, stretching from Hadrian's Roman Wall in the south to the Cheviot Hills on the Scottish Border. The area is rich in historic interest. There are information centres at Ingram and Once Brewed and an information van tours the Park.

**Brecon Beacons National Park** (519 sq. miles).—The most recent National Park, established in 1957, is centred on "The Beacons" with its three peaks: Corn Du, Cribyn and Pen y Fan, rising to nearly 3,000 feet. Bounded in the east by the Black Mountains in Monmouthshire, its western boundary rests on the Black Mountain in Carmarthenshire. The Usk valley, Llangorse Lake, Brecon Cathedral, Carreg Cennen Castle and Llanthony Abbey are all within the Park. There are information centres at Brecon, Abergavenny, Llandovery, a mountain centre near Libanus, and a van tours the Park.

## AREAS OF OUTSTANDING BEAUTY

Generally these are smaller in extent than the National Parks. No special arrangements for their administration are laid down and there is no special provision for the development of facilities for open-air recreation. The areas so far designated are:—

**Anglesey** (83 sq. miles).—Except for breaks around the urban areas and in the vicinity of Wylfa, the designated area extends along the entire coastline with its many isolated stretches. The rugged cliffs, sandy bays, small coves and miles of soft dunes are famed for their beauty, as also are the Menai Straits, separating the island from the mainland.

**Cannock Chase** (26 sq. miles).—This is an area of high heathland in Staffordshire, relieved by varied scenery in which parklands adjoin farms, woodlands and pleasant villages. Deer continue to roam over the Chase.

**Chichester Harbour** (29 sq. miles).—Well known for its small boating and sailing facilities, the area extends from Hayling Island in the west to Appledram in the east and contains the whole of Thorney Island.

**Chilterns** (309 sq. miles).—The well-known chalk downlands from Goring in South Oxfordshire northeastwards through Buckinghamshire, Hertfordshire and Bedfordshire to Dunstable and Luton, including the outlying group of hills beyond Luton. Contains several National Trust properties and Whipsnade Zoo.

**Cornwall** (360 sq. miles).—Comprising a number of separate areas including Bodmin Moor and some of the finest and best-known coastal scenery in Britain. Most of the Land's End peninsula; the coast between St. Michaels Mount and St. Austell with Falmouth omitted; the Fowey Estuary and

Rame Head ■ all included: in north Cornwall most of the coast to Bedruthan Steps, north of Newquay, and between Perranporth and Godrevy Towns.

*Cotswolds* (582 sq. miles).—Contains the great limestone escarpment overlooking the Vales of Gloucester and Evesham. The remainder is high undulating country and narrow wooded valleys traversed by shallow rapid streams. Noted for its beautiful villages.

*East Devon* (103 sq. miles).—The area comprises the fine stretch of coastline between Orcombe Rocks, near Exmouth and the Dorset area near Lyme Regis, with Sidmouth, Beer and Seaton omitted. Inland Gittisham Hill, East Hill and Woodbury and Aylebore Commons are all included.

*North Devon* (66 sq. miles).—Comprising three sections of fine coastline—the whole of the Hartland peninsula; from Bideford Bar to the western limits of Ilfracombe, and from east of Ilfracombe to the boundary of the Exmoor National Park. Clovelly, Braunton Burrows, Woolacombe and Combe Martin are all included.

*South Devon* (128 sq. miles).—It includes the magnificent coast between Bolt Head and Bolt Tail, ■ National Trust property; Salcombe, Slapton Sands and Dartmouth, and the four estuaries and valleys of the Yealm, Erme, Avon and Dart.

*Dorset* (400 sq. miles).—This is the largest ■ so far designated. It includes the whole of the coastline between Lyme Regis and Poole, with the Isle of Portland and Weymouth omitted, and stretches inland to include the Purbeck Hills and the downs, heaths and wooded valleys of the Hardy country.

*Forest of Bowland* (310 sq. miles).—A fine tract of high open moorland running westward from near Settle and Bolton by Bowland in the Pennines, to Caton and Scortoh in Central Lancashire. A small outlying ■ east of the River Ribble includes Pendle Hill and Pendleton Moor.

*Gower* (73 sq. miles).—Partly in the county of Glamorgan and partly in Swansea, South Wales, the area is known for its beautiful coastline, its rocky limestone cliffs, sandy bays and coves and for its wooded ravines stretching inland.

*East Hampshire* (151 sq. miles).—The area stretches from the outskirts of Winchester to the Hampshire-Sussex border at a distance of about 10 miles inland from the south coast.

*South Hampshire Coast* (30 sq. miles).—14 miles of coastline on the northern shores of the Solent, between Hurst Castle and Calshot Castle, south-east of Fawley, with the central part of the area extending inland up the Beaulieu River for about six miles, including a beautiful part of the New Forest. Along much of the coast woods of oak and Scots pine stretch down to the water's edge, while at the western end are some attractive salt marshes.

*Kent Downs* (326 sq. miles).—Running from the Surrey border near Westerham (its boundary adjoining that of the Surrey Hills area), about 60 miles to the coast near Dover and Folkestone, with ■ coastal outlier at South Foreland and ■ narrow strip of the old sea cliff escarpment west of Hythe over-

looking Romney Marsh. Pleasant pastoral scenery, picturesque villages, ancient churches and castles, with the Downs rising to 600 feet.

*Llyn* (60 sq. miles).—An isolated peninsula in North Wales of unique character, still largely unspoilt by the hand of ■■■■.

*Malvern Hills* (40 sq. miles).—The area embodies the whole range of the Malvern Hills in the counties of Gloucester, Hereford and Worcester. Such well-known features as the Worcestershire Beacon, North Hill, the Herefordshire Beacon, and Midsummer Hill, ■ National Trust property, are within the area.

*Norfolk Coast* (174 sq. miles).—With coastal scenery ranging from salt marsh and mudflats, sand-dunes and shingle ridges to ■ cliffs, this area includes six miles of the south-east coast of the Wash, an almost continuous coastal strip three to five miles in depth from Hunstanton to Bacton, with a further small strip between Sea Palling and Winterton-on-Sea. The area, which is rich in wild-life, also includes part of the Sandringham Estate.

*Northumberland Coast* (50 sq. miles).—Low cliffs and rocky headlands with active fishing villages comprise this area which stretches from just south of Berwick to Amble. It includes Holy Island, with the oldest monastic ruins in the country; the Farne Islands, and the great castles of Bamburgh, Dunstanburgh and Warkworth.

*Quantock Hills* (38 sq. miles).—The main feature of this ■ in Somerset is the range of red sandstone hills rising to ■ height of 1,260 feet ■ Will's Neck above Crow Combe.

*Shropshire Hills* (300 sq. miles).—This area includes the fine landscape around Church Stretton, with Caer Caradoc, the Long Mynd, the Stiperstones, and the long ridge of Wenlock Edge from which it extends north-east to the Wrekin and the Ercall.

*Solway Coast* (41 sq. miles).—A stretch of beautiful coastline from above Maryport to the estuaries of the Rivers Eden and Esk (with Silloth omitted) backed by the Solway Plain and noted for its historic and scientific interests.

*Surrey Hills* (160 sq. miles).—The Hog's Back and the ridge of the North Downs from Guildford to Titsey in the east are within this area, ■ are Leith Hill, Hindhead Common, the Devil's Punch Bowl; the well-known villages of Abinger, Shere, Hambledon and Chiddingfold; Box Hill and Frensham Ponds.

*Sussex Downs* (379 sq. miles).—The area includes the chalk escarpment of the South Downs from Beachy Head to the West Sussex/Hampshire border, with such well-known features ■ Firlie Beacon and Chanctonbury Ring, and stretches down to the coast between Eastbourne and Seaford. In the west the boundary adjoins the East Hampshire and Surrey Hills areas.

*Isle of Wight* (73 sq. miles).—A number of separate areas comprising unspoiled stretches of coastline, the Yar Valley, the high downland behind Ventnor and the fine chalk downland ridge east of Newport to Culver Cliff and Foreland.

## WEATHER IN THE UNITED KINGDOM, 1968-1969

(1968) August was a cool month generally. It was sunnier and drier than usual in Scotland and Northern Ireland, with rain above the average in the Midlands and south-east England. The 1st and 5th were fine and warm in the north-west, but dull and cool in south-east England, where north-east winds prevailed. Heavy rain occurred in south-east England on the 6th and spread to much of the southern half of England during the 7th to 9th, giving the first rain in the south-west for some three weeks. The 10th and 11th were generally dry and sunny, after widespread fog in the early mornings. The passage of a deep depression from the west across northern England on the 13th brought a cooler spell with widespread rains and thunder in places. Further rains, alternating with showery periods, continued until the 17th. The 18th was generally sunny but night temperature fell to  $-0.6^{\circ}\text{C}$ . ( $31^{\circ}\text{F}$ .) in the Cairngorms. Rain was widespread on the 19th, and heavy in the north-west. On the 20th winds from the south-west brought higher temperatures. Further rains occurred in the west and north on the 20th and 21st. High pressure spread from the Azores on the 22nd to give a spell of dry, rather warm, weather. The 22nd and 23rd were the warmest days of the month when afternoon temperatures in parts of England reached  $28^{\circ}\text{C}$ . ( $82^{\circ}\text{F}$ .) In the west the warm dry weather continued until the 27th, but north-eastern winds brought cooler weather to the east on the 24th and drizzle along the north-east coast. Thunderstorms developed in south-east England on the 27th. The 28th and 29th were cooler, with occasional rain in the west. Rain occurred in the north-west on the 30th and spread to much of the country on the 31st.

*September.*—Cool, showery weather, with local thunderstorms, persisted during the first three days, but the 4th to 9th became drier and milder. Rain spread across the country on the 5th. On the 6th an anticyclone developed off south-west England and moved to the north-east. Rain occurred in the north-west on the 8th, but in south-east England the 9th and 10th were the warmest days of the month with afternoon temperatures reaching  $25.6^{\circ}\text{C}$ . ( $78^{\circ}\text{F}$ .) on the 10th at Camden Square (London) and Gillingham (Kent). In the south thunderstorms developed on the 10th. The 11th and 12th were cooler with heavy rains, more than 1 in. being recorded in parts of Northumberland during the night of 12-13th. The 13th was mainly dry, as a depression formed to the south-west of England to bring nearly 2 in. of rain on the 14th to the Isles of Scilly. During the three days, 14th to 16th, parts of Surrey, Kent and Essex recorded 6-8 in. in persistent rains, followed by widespread and disastrous floods in south-east England, especially in the east Molesey area. At Purligh, Essex, 2.2 in. fell in 42 mins. on the 14th. During this period Northern Ireland, Scotland and north-west England enjoyed fine, sunny weather and this spread to most of the country on the 17th and 18th. Temperature fell to  $-2.8^{\circ}\text{C}$ . ( $27^{\circ}\text{F}$ .) at Balmoral (Aberdeen-shire) on the 19th. From the 19th to 30th a succession of depressions moved eastwards across the country to give frequent rains, especially on the 25th and 27th. Mean temperatures for the month were generally near the average, the maxima being usually below and the minima above average. Sunshine was below average in most places, especially in north and east Scotland and the Midlands. Over England and Wales it was the wettest September since that of 1927.

*October.*—Dull wet weather prevailed over Scotland during the 1st and 2nd. From the 3rd to 7th this continued in Scotland but England and Wales

was generally dry. Afternoon temperatures reached  $21.7^{\circ}\text{C}$ . ( $71^{\circ}\text{F}$ .) at Southend on the 4th and at Southsea, near Portsmouth, on the 6th. On the 8th rain occurred in the south, but northern England and southern Scotland were mainly dry. Rain spread to most districts on the 9th, but the 10th was mainly sunny and dry, when a temperature of  $21.7^{\circ}\text{C}$ . was recorded at Dovercourt (Essex). A deep depression from the Atlantic reached western Scotland on the 11th to give rain over most of the country, especially in Scotland, where parts of western Inverness-shire recorded more than 4 in. By the 12th rain cleared from southern England. Showery weather, with hail and thunder, especially in the north, prevailed from the 13th to 16th. The 17th was generally dry and the 18th much warmer, with rain in western areas on both the 18th and 19th. On the 20th high pressure from the Continent spread to southern England and afternoon temperatures of  $21.7^{\circ}\text{C}$ . were again recorded, this time in the valleys behind Aberystwyth. Fog formed in many areas on the 21st and persisted in parts of the Midlands and eastern England on the 22nd, but away from the foggy areas temperatures continued above the average. On the 23rd south-easterly winds slowly cleared the fog and mild weather continued until the 27th when spells of rain occurred until the end of the month. Rain was particularly heavy in the north-west on the 31st, more than 6 in. being recorded in Co. Down. Snow fell in parts of Scotland on the 31st. Sunshine totals were everywhere below the October average, especially in the west. The month was unusually mild. Rain was below average mainly in east and north-east England, and markedly above mainly in Scotland and Northern Ireland.

*November.*—The 1st and 2nd were mild and wet over England and Wales, with 2 in. near Lincoln on the 1st. At London on the 1st temperature reached  $18.3^{\circ}\text{C}$ . ( $65^{\circ}\text{F}$ .) Northerly winds on the 3rd brought lower temperatures, while snow and hail showers occurred in the north. The 4th and 5th gave mainly dry, sunny, anticyclonic weather. Winds from the south-east spread over the country on the 6th, with some rain over England and Wales on the 6th and 7th. The 8th was generally cloudy, cool and dry. Fog was widespread over England, especially in the Midlands on the 9th, when temperature fell to  $-6.7^{\circ}\text{C}$ . ( $20^{\circ}\text{F}$ .) at Llandrindod Wells, in central Wales. On the 10th and 11th less cold weather spread over the western half of the country, but with persistent winds from the south-east temperatures generally fell steadily until the 16th. Rain fell over south-east England on the 17th and over much of the country on the 18th and 19th. A depression on the 20th brought mild, unsettled weather with heavy rains in the west on the 20th and 21st and in most districts on the 23rd. Temperatures reached  $15^{\circ}\text{C}$ . ( $59^{\circ}\text{F}$ .) at stations in the north of Scotland on the 21st and also on the 25th. The 24th was fine and sunny, while heavy rain fell in the north on the 25th. Further rains spread northwards, mainly over the west of the country on the 26th and 27th. With light winds fog was widespread on the 28th, especially in the Midlands and in the east. Winds from the north-east on the 29th brought rain spreading southwards over England and Wales and continuing in southern England on the 30th. The month as a whole was colder, drier and less sunny than usual. Cold weather persisted mainly from the 3rd to 20th. Rainfall exceeded the average in north-east England, while places in north-west England, west Wales and northern and western Scotland received more than the local average sunshine.

*December*—During the first two days winds were mainly from the south-east, with temperatures above average in the west, but below average in the east, especially in the south-east, where widespread frost occurred at night. Temperatures reached 14.4° C. (58° F.) at a few stations in Caernarvonshire and Cornwall on the 2nd and 4th, and 13.9° C. (57° F.) at Achnashellach, in the Western Highlands, on the 2nd and 3rd. The weather was mainly dry and dull, with some drizzle and fog, apart from the west which reported periods of heavy rains. Anticyclonic weather developed over the country on the 11th and with light winds fog persisted throughout the 12th in places, although heavy rains occurred in north-west Scotland on the 12th and 13th. Temperatures gradually decreased and on the 14th did not rise above freezing point over much of England and Wales. On the 15th a deepening depression to the north brought snow initially, followed by rain, to many northern districts, and further rains across central and southern England followed by widespread flooding on the 17th and 20th. A depression moved quickly to the north-east across northern Scotland on the 22nd accompanied by gales and heavy rain, but the 23rd was generally dry. A further depression moving to the south-east across Cornwall on the 24th gave heavy rain in south-west England, but snow in southern England by the evening. On Christmas morning snow lay to a depth of up to 6 in. over much of eastern Britain and southern England. Winds from the 26th to 31st were mainly from the north or north-west. Heavy snow fell in Norfolk, Lincolnshire and east Yorkshire, where many roads were blocked by snow-drifts in the strong winds. Whitby was isolated by 6 ft. snow-drifts for some days. Freezing fog occurred in south-east England on the 30th and snow returned to the east on the 31st. The month as a whole was colder, drier and less sunny than usual, with snow, especially around Christmas.

*Year 1968*—Over the country generally mean temperature was somewhat below the 1931-60 average, the coldest month being February and the warmest August. February, May, July and December were appreciably cooler than usual, while January and October were milder. Over England and Wales the mean temperature exceeded that recorded in the recent cold years 1962, 1963 and 1965, but the run of relatively cool years, which began in 1962, was continued. While western Scotland, Northern Ireland and north-west England experienced a fine warm summer and early autumn, the eastern half of England was cooler and wetter than usual. Rainfall exceeded the 1916-50 average by 3.0 in. over England and Wales, but was 4.7 in. short of the average over Scotland and 1.8 in. short over Northern Ireland. Over England and Wales the four years 1965-68 gave a total excess of 14.3 in., more than in any similar period since 1927-30. Over Scotland the rainfall since 1950 has been appreciably below the 1916-50 average, being nearer the 1881-1915 average. Over England and Wales, April to September 1968, was wetter than any similar period since that of 1931 and September since that of 1918. The periods of most outstanding heavy rains were: March 24th-29th in the north-western half of the country; July 10th with thunderstorm rains from the neighbourhood of the Severn Estuary to the Wash; September 14th-16th in south-east England and East Anglia; October 31st with more than 6 in. in Co. Down. The first three periods gave unusually widespread and heavy rains. The total duration of bright sunshine was 88, 97 and 107 per cent. of the 1931-60 average over England and Wales, Scotland and Northern Ireland respectively. Over England and Wales only March and April were sunnier than

usual; over Scotland only February, April, June and August. The sunniest stations included Jersey, Guernsey, Shanklin, Swanage and Scilly with 1,867, 1,821, 1,745, 1,734 and 1,727 hours respectively.

*January (1969)*—During the first few days generally cold weather prevailed with fog in the south-west on the 1st and in the south-east on the 4th, especially in parts of Essex. On the 6th freezing fog occurred in Northern Ireland and temperatures fell to -11.7° C. (11° F.) in Co. Tyrone and -20° C. (-4° F.) at Grantown-on-Spey (Nairn). Freezing fog also occurred in the Midlands, east and north-east England on the 9th. On the 7th heavy rains fell in Northern Ireland and western Scotland; while thunderstorms, accompanied by hail occurred in the south on the 8th. Subsequently depressions passing to the west and south-west of the country brought winds from the south to give dull, mild weather. Dense fog occurred in Northern Ireland on the 15th causing traffic dislocation. On the 17th gales were widespread, with a gust of 91 m.p.h. at Scilly; large hailstones fell at Abingdon (Berks.). At Lyme Regis a lifeboat capsized and a member of the crew drowned. Mild weather persisted from the 20th to 26th. Temperatures reached 15° C. (59° F.) on the 21st in south Devon and on the 22nd at Camden Square (London) to give the highest January temperature there this century. Extensive hill and coast fog occurred from the 21st to 25th in south-west England. Strong winds were reported from Scotland during the last few days with a gust of 103 m.p.h. near Stirling on the 30th. Over England and Wales the month was the mildest January since that of 1944 and over Scotland since 1964. At Hampstead (London) it was the mildest January for 48 years. The total rainfall exceeded twice the average in Kincardineshire, but was only half the average in parts of western Scotland. Many low-lying fields remained water-logged throughout the month. It was a dull month nearly everywhere, especially in the north-west and central Wales.

*February*—During the first four days cold northerly winds brought widespread snow showers. Snow lay to a depth of 1 to 3 in. in Kent and south-west England, while drifts up to 5 ft. occurred in north-east Scotland. Snow showers spread from the west on the 6th. On the morning of the 7th a gust of 136 m.p.h. was recorded at Kirkwall (Orkney). Cold northerly winds brought widespread snow, nearly 8 in. falling in 5 hours in Derbyshire. Roads were blocked and transport disrupted. Temperature fell to -13° C. (8° F.) at Manchester to give the coldest February night there this century. Further snow fell in places on the 8th, 9th and 10th. Following milder, wet, weather on the 10th and 11th, cold weather returned on the 12th. Widespread snow spread from the north on the 13th, and by the 15th Whitby and nearby villages became isolated by snow-drifts. On the 16th and 17th snow fell in eastern England but the south-west was sunny. Temperature fell to -20° C. (-4° F.) near Penrith (Cumberland) on the 16th. Snow showers occurred on the 18th in the east and more continuous snow over southern England and Wales on the 19th, causing the closure of Gatwick Airport. At the Lizard (Cornwall) a gust of 81 m.p.h. was recorded, sea water and shingle were carried over sea walls and sea defences were breached along the South Devon coast. By the 20th snow drifting was widespread in the south-west, Midlands and Wales. Milder weather spread over southern England on the 21st to give flooding as the snow melted and heavy rain in Northern Ireland on the 22nd. On the 23rd temperature reached 12.8° C. (55° F.) in parts of Surrey and Sussex, while dense fog occurred in the Midlands and northern England, two ships colliding in the

Humber Estuary. After the 26th the remainder of the month was mainly cold, except in the south-west, with occasional snow or sleet showers.

*March*—From the 1st to 7th the weather in the south was dry and cool, with very dry air spreading from the Continent on the 15th, while snow, heavy at times, fell in eastern Scotland and northern England. Temperature at Kew, near London, fell to  $-8^{\circ}\text{C}$ . ( $18^{\circ}\text{F}$ .) on the morning of the 7th to give the coldest night there since Jan. 25th, 1963. On the 8th a gust of 74 m.p.h. was recorded at Lerwick (Zetland). Rain on the 20th in southern England terminated a spell of some 14 days without measurable rain in the south-west. Between the 11th and 13th stations in the south-east received nearly the average rainfall for the whole of March, and flooding occurred, especially in East Anglia. On the 12th snow occurred on high ground in the Midlands and in the Border country. Blizzards were widespread from north Wales to east Scotland on the 13th and 14th, with drifting of snow isolating villages in Angus and Perthshire. Severe drifting also occurred on the Cairngorms on the 19th. In the north and east of Scotland and in north-east England strong easterly winds predominated during the 13th to 22nd. Aberdeen Harbour was closed from the 14th to 19th and a drilling rig broke away from its anchorage on the 15th. On the 18th the Longhope Lifeboat from Hoy was overwhelmed in the Pentland Firth and the eight members of the crew drowned. From the 16th to 18th glazed frost formed on higher ground in the north Midlands causing damage to trees and electric cables, and on the 19th the television transmitter mast collapsed near Huddersfield. The 20th to 26th was generally dry, with long sunny periods in the north and west but dull weather in the south. Rain fell widely on the 29th and the 30th and 31st were unsettled. The month was the driest March at Stornoway since before 1871.

*April*—The first week, including Easter (4th-7th), was generally sunny but cool. Sea fog developed along the coasts of east Scotland and north-east England on the 7th and 8th. The four days of Easter were the sunniest at Manchester since 1902 and the second sunniest this century at London and Southampton, but strong winds developed along the south and east coasts on the 5th and 6th. Temperature reached  $23.9^{\circ}\text{C}$ . ( $75^{\circ}\text{F}$ .) at Southend, in the Thames Estuary, on the 9th. Rain over Scotland and Northern Ireland on the 9th, spread to much of England and Wales on the 10th and 11th, while coastal fog occurred in south and south-west England on the 10th. The period 9th-13th was stormy with squally west or south-west winds. On the 12th gusts reached 86 m.p.h. near Stirling and 82 m.p.h. at Yeovilton (Somerset) and damage occurred to trees and property. Rain spread to most districts on the 14th and 15th, with local flooding in parts of Cheshire and Lancashire. The 16th-20th was generally cold with showers mainly in the east, snow showers occurring in East Anglia on the 18th and 19th and temperatures falling to  $-6^{\circ}\text{C}$ . ( $21^{\circ}\text{F}$ .) at Gatwick Airport on the 20th. From the 21st to 28th spells of rain occurred on most days; these were especially heavy in Deeside and the Antrim Hills on the 21st and at Lake Vyrnwy (Montgomeryshire) on the 24th. Sea fog developed along the coasts of east Scotland and north-east England during the 22nd to 24th. Gales were widespread in south-east England on the 25th and 26th, a gust of 61 m.p.h. being recorded at Eastbourne. On the 28th Jersey reported 14 hours of bright sunshine and the 29th and 30th were dry and sunny in most districts. April was the sixth consecutive dry month in parts of west Scotland, reservoirs becoming seriously depleted.

*May*—The fine weather at the end of April continued on the 1st, but the 1st and 2nd were rather cold, especially in the north, temperature falling to  $-5.6^{\circ}\text{C}$ . ( $22^{\circ}\text{F}$ .) in Lanarkshire on the 2nd. The 3rd was wet in east Scotland, especially near Aberdeen, where temperature did not rise above  $4^{\circ}\text{C}$ . ( $39^{\circ}\text{F}$ .), while  $21^{\circ}\text{C}$ . ( $70^{\circ}\text{F}$ .) was recorded at London Airport. Widespread rains occurred on the 5th and 6th, with flooding on the 6th in the Midlands, the railway station at Walsall (Staffordshire) being closed as a result of the flood-water. The weather became gradually milder after the 3rd, temperatures reaching  $27.2^{\circ}\text{C}$ . ( $81^{\circ}\text{F}$ .) on the 13th in the London area. On the 9th a boy was killed by lightning at Corby (Northamptonshire). Temperatures fell sharply on the 14th. Snow or sleet showers fell in northern districts on the 17th and 18th, and as far south as Exmoor on the 18th. On the 20th temperature fell to  $-5.0^{\circ}\text{C}$ . ( $23^{\circ}\text{F}$ .) at Alwen (Denbighshire) and to  $-2.8^{\circ}\text{C}$ . ( $27^{\circ}\text{F}$ .) at Santon Downham (Norfolk). Scotland enjoyed a relatively sunny spell from the 19th to 23rd, while Lerwick (Shetland Islands) reported 15.5 hrs. of sunshine on the 26th. The 21st and 22nd were generally fine and sunny. Unsettled weather returned on the 23rd. On the 24th 27 mm. (1.1 in.) fell in about 35 minutes during a severe thunderstorm near Liverpool, while 58 mm. (2.3 in.) was recorded at Oaken (Staffordshire). During the 25th to 31st rain and thunderstorms affected many areas as a depression moved across southern England to Germany. It was the wettest May on record at Montrose (Angus) and at Bidston (Liverpool) for 100 years and at Shrewsbury for at least 75 years. In contrast, Fort William (Inverness-shire) experienced the seventh consecutive month with less than the average amounts. The month was unusually dull over much of Scotland and the north Midlands.

*June*—Showers occurred on the 1st, followed by more widespread rains on the 2nd, associated with a deep depression to the north of the country. Unsettled weather continued in the north and west until the 7th, when temperature fell to  $-4.4^{\circ}\text{C}$ . ( $24^{\circ}\text{F}$ .) in the northern Pennines. Most of the country had a fine, sunny spell from the 5th to 13th, with rising temperature. On the 13th afternoon temperature reached  $27.4^{\circ}\text{C}$ . ( $81^{\circ}\text{F}$ .) at Southampton. Thunderstorms developed in the northern half of England, when near Barnsley 59 mm. (2.3 in.) of rain and hail fell in 45 minutes. On the 15th 35 mm. (1.4 in.) was recorded in 18 minutes at Dudley (Worcestershire) and 11 mm. (0.4 in.) in 6 minutes near Newcastle-under-Lyme (Staffordshire). Local flooding and power failures occurred in parts of the Midlands and southern Scotland, people were injured and property damaged. In Staffordshire a youth was killed by lightning. Rain spread from the south-west on the 16th and gusts of 57 m.p.h. occurred in south-west England on the 17th and 18th. There were heavy and widespread rains on the 17th in south-west England, south Wales and Dumfriesshire. On the 18th 59 mm. (2.3 in.) fell in 3 hours near Street (Somerset). Near London ground frost occurred in the early mornings of the 21st and 22nd. A slow-moving depression in the south gave widespread rains on the 23rd and 24th; play being cancelled on the 23rd, opening day of the Wimbledon Tennis Championships. A ridge of high pressure moved across the country on the 25th to give a sunny spell. On the 26th a depression in the north-west brought gale force winds and rain, but in the south the remainder of the month was generally dry and sunny. Sunshine totals exceeded the June average nearly everywhere. The total rainfall was about half the average in parts of northern Scotland,

central Wales, south Midlands and southern England.

July.—The first few days were generally dry and sunny in the south, but gales occurred in exposed places in the north on the 4th and 5th and along the south coast on the 6th and 7th. Heavy rain spread across southern England on the 6th to give more than 2 in. at a number of places. Flooding occurred in the south-east and also in East Anglia. Thunderstorms were widespread in southern and eastern England on the 8th and 9th. Temperatures then gradually increased to a maximum in Northern Ireland of 28.8° C. (84° F.) in Co. Tyrone on the 14th; in Wales to 29.4° C. (85° F.) and in Scotland (Stirlingshire) on the 15th and to 32.5° C. (91° F.) in England (Northamptonshire) on the 16th. During thunderstorms on the 16th lightning caused damage to property in Inverness, while large hailstorms fell in Northamptonshire. Southern districts experienced

a long dry, warm spell from the 9th to 27th, when many places reported no measurable rain, the 11th to 18th being especially sunny. Heavy rains fell in western Scotland and north-west England during the night 18th-19th and more widespread rains over England and Wales during the 28th and 29th. The amounts for the 28th exceeded 2 in. in parts of south Wales and the Midlands, and exceeded 4 in. in parts of south-west England, with more than 5 in. near Plymouth and on Dartmoor, some of the rains being unusually intense. Gales occurred in parts of south Wales and also in south-west England on the 28th and 29th causing some damage to property. Temperature fell to 3.3° C. (38° F.) in Buckinghamshire on the 30th. The total rainfall exceeded twice the average in parts of Devon and Cornwall and along the coasts of Essex and Kent. At Dumfries it was the driest July since 1913 and at Douglas (Isle of Man) since 1934.

### TEMPERATURE AND RAINFALL RECORDS

GENERAL: The maximum shade temperature of the air on record is 136° F. (57.8° C.) at San Louis, Mexico, on Aug. 11, 1933; the extreme lowest recorded temperature is in Antarctica e.g. -127° F. (-88.3° C.) at Vostok on Aug. 24, 1960. In the upper air temperatures as low as -143° F. (-97.2° C.) have been recorded—e.g. over Halley Bay, Antarctica, on Aug. 9, 1959 at about 27 kms.

The wettest place in the world is considered to be the neighbourhood of Cherrapunji in Assam where annual averages exceeding 400 inches have been obtained, of which 90 per cent. usually falls in the six months April to September, and annual totals have reached 905 inches.

U.K.: The maximum shade temperature recorded in the air at 4 feet above the ground is 100.5° F. (38.1° C.) at Tonbridge, Kent (July 22, 1868). The lowest shade temperature is -17° F. (-27.2° C.) at Braemar (Feb. 11, 1895).

The greatest rainfall recorded in a day was at Martinstown, near Dorchester, 11.00 inches in the 24 hours commencing 9 a.m. (July 18, 1955). Annual totals exceeding 240 inches were recorded at The Styc, Borrowdale, in 1872, 1923, 1928 and 1954; at Ben Nevis Observatory in 1898 and at Llyn Llydaw, Snowdon, in 1909. The smallest annual total is 9.29 inches at Margate in 1921 and the largest may be regarded as 257 inches at Sprinkling Tarn in 1954.

TEMPERATURE, RAINFALL AND SUNSHINE  
AT VARIOUS PLACES IN GREAT BRITAIN

Mean Temperature of the air (° C.), Rainfall (mm.) and Bright Sunshine (as mean hours per day) at representative British Health Resorts and Towns during the year July, 1968, to June 1969, and the calendar year 1968. Also height of Climatological Station above mean sea level, altitude being given in metres. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office. (To convert °C. to °F. multiply by 9/5 and add 32).

Most of the principal book publishers are members of The Publishers Association, whose address is 19 Bedford Square, London, W.C.1.—*President*, Mark Longman (Longman Group); *Secretary*, R. E. Barker.

## BOOK PRODUCTION AND BOOK EXPORTS

Figures issued by The Publishers Association (based on information supplied to its Chartered Accountants by individual publishers) show a marked and continuing increase in book exports in recent years. The totals for the years 1957 to 1968 are shown below:—

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.	Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1957	60,456,095	22,505,440	1963	90,142,709	39,043,851
1958	63,608,654	23,817,453	1964	98,489,220	43,225,649
1959	66,945,183	25,393,900	1965	104,876,998	46,123,190
1960	75,426,683	29,833,866	1966	119,578,145	51,417,786
1961	78,911,506	31,738,057	1967	125,782,262	53,838,418
1962	£81,376,301	£34,493,754	1968	£132,724,617	£58,821,420

## BOOKS PUBLISHED IN GREAT BRITAIN IN 1968

This table, from *The Bookseller* of January 4, 1969, shows the books published in 1968 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 1s. have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

## COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property and Copyright Department, Board of Trade, 25 Southampton Bldgs., W.C.2.*

Subject to the provisions of the Copyright Act, 1956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. No registration nor other formalities are required in order to obtain the protection of the Act. Protection is conferred not only against reproduction but also against the public performance of work without permission. Copyright may also subsist in sound recordings, cinematograph films

and television and sound broadcasts. Libraries entitled to receive free copies of books published in the United Kingdom are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

*Voluntary Registration at Stationers' Hall.*—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 20s. for a Book, or a Fine Art; certified copies 20s. in either case. The fee for a search is 5s.

## ANNUAL REFERENCE BOOKS

- Advertiser's Annual.—Mercury House, 103-119 Waterloo Road, S.E.1. (May). 77s.
- Advertising Agency Personnel and Data.—5 Winsley St., W.1. (May). 30s.

## CONFEDERATION OF BRITISH INDUSTRY

21 Tothill Street, London, S.W.1.

[01-930-6711]

The Confederation of British Industry was founded in August 1965 to promote the prosperity of British industry. It combines in a single, democratic and voluntary association the rôles previously played by the British Employers' Confederation, the Federation of British Industries and the National Association of British Manufacturers.

The C.B.I. is recognized nationally and internationally as the representative organization of British industry. It acts as a national point of reference for all those who seek the views of industry as a whole, and it advises the Government on all aspects of Government policy which affect the interests of industry, both at home and abroad.

Membership of the C.B.I. consists of some 14,000 companies and 300 trade associations and employers' organizations. In addition to these full members the nationalized industries are able to apply for membership as industrial associates, and thereby to

work with the C.B.I. on problems that are the concern of all industry.

The governing body of the C.B.I. is the Council, which meets monthly in London. It is assisted by some 30 expert standing committees which advise on the main aspects of industrial policy. There is a C.B.I. Regional Council with office staff in each of the standard industrial development regions of the United Kingdom, including Northern Ireland. These Regional Councils send their representatives to the governing body. The C.G.I. is represented in more than 100 centres overseas.

The C.B.I. provides its members with a wide range of services and practical advice on economic, commercial, technical, social and export questions. Member companies pay subscriptions, fixed according to a scale based on the numbers employed.

*President*, Sir Stephen Brown, K.B.E.

*Deputy President*, A. G. Norman.

*Vice-Presidents*, Sir Peter Runge; L. Jenkins.

*Director-General*, C. Adamson.

*Secretary*, J. Gough.

**TRADES UNION CONGRESS (T.U.C.)**  
Congress House, 23-28 Great Russell Street, W.C.1.  
[01-636-4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the representatives of which meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1968-69) totalled 155\* with an aggregate membership of 8,875,381.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with motions from affiliated societies on questions of policy and organization. Although 155 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only one large British union is not affiliated to the T.U.C.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the trade union movement, with authority to promote common action on general questions, and to assist trade unions in the work of organization. The General Council is elected by Congress and is composed of 39 members (37 representing 19 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group and with the number of representatives each group is entitled to have on the General Council. *Women Members.*—In 1969, a total of 1,842,427 women were members of unions in the T.U.C. The largest groups were members of the Transport and General Workers Union (200,473), National Union of General and Municipal Workers (213,095), Union of Shop, Distributive and Allied Workers (150,626), and National Union of Public Employees (153,734).

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such cases being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also if there appears to be justification to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the trade union movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council, the trade union movement maintains systematic relations with the Government and Government Departments, with the Confederation of British Industry and with a large number of other bodies. A major instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet

level; in this body the Confederation of British Industry and the boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration, affecting industry. The General Council is represented on the National Economic Development Council, established to examine problems associated with faster economic growth. The Council includes Ministers dealing with economic and industrial affairs, representatives of public and private industry and independent members. The General Council nominates members to serve on numerous other bodies, e.g. Central Training Council, National Insurance Advisory Committee, British Productivity Council, Consumer's Councils, etc. *Chairman* (1969-70), S. F. Greene, C.B.E. *General Secretary*, V. Feather, C.B.E.

### SCOTTISH TRADES UNION CONGRESS

12 Woodlands Terrace, Glasgow, C.3.

The Congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. In 1969 it consisted of 85 unions with a membership of 836,862 and 44 directly affiliated Trades Councils. The majority of the unions organize throughout Britain and affiliate on their membership in Scotland.

The Annual Congress in April elects a 17-member General Council on the basis of 10 industrial sections. Congress has been prominent in pressing for economic expansion and full employment in Scotland and the development of the social services, most of which are separately organized in Scotland.

*Chairman* (1969-70), J. Matheson.  
*General Secretary*, J. Jack, C.B.E.

## TRADE UNIONS

- MINISTRY OF LABOUR STAFF ASSOCIATION (14,159).—*Gen. Sec.*, J. L. Tindall, 244 Tolworth Rise South, Tolworth, Surbiton, Surrey.
- MUSICIANS' UNION (31,401).—*Gen. Sec.*, H. Ratcliffe, 29 Catherine Place, Buckingham Gate, S.W.1.
- NATIONAL AND LOCAL GOVERNMENT OFFICERS ASSOCIATION (373,046).—*Sec.*, W. C. Anderson, C.B.E., Nalگو House, 8 Harewood Row, N.W.1.

- NATIONAL COAL BOARD LABOUR STAFF ASSOCIATION (300).—*Sec.*, R. Gordon, 20 Pettycur Road, Kinghorn, Fife.
- PAINTERS AND DECORATORS, AMALGAMATED SOCIETY OF (63,872).—*Sec.*, A. G. Austin, 55 South Side, Clapham, S.W.4.
- PATTERNMAKERS AND ALLIED CRAFTSMEN, ASSOCIATION OF (12,159).—*Sec.*, S. P. McLaren, 15 Cleve Road, W. Hampstead, N.W.6.
- PATTERN WEAVERS' SOCIETY (228).—*Sec.*, J. D. Townend, 2 Holme Park Court, Berry Brow, Huddersfield.
- POST OFFICE MANAGEMENT STAFFS ASSOCIATION (15,507).—*Sec.*, L. F. Pratt, 52 Broadway, Bracknell, Berks.
- POST OFFICE ENGINEERING UNION (106,372).—*Sec.*, Lord Delacourt-Smith, Greystoke House, Hanger Lane, Ealing, W.5.
- POST OFFICE EXECUTIVES, ASSOCIATION OF (12,055).—*Sec.*, J. K. Glynn, 345 Upper Richmond Road, S.W.14.
- POST OFFICE WORKERS, UNION OF (192,310).—*Sec.*, T. Jackson, U.P.W. House, Crescent Lane, Clapham Common, S.W.4.
- POTTERY WORKERS, NATIONAL SOCIETY OF (29,742).—*Sec.*, A. Dulson, 5 Hillcrest Street, Hanley, Stoke-on-Trent.
- POWER LOOM CARPET WEAVERS AND TEXTILE WORKERS' ASSOCIATION (4,900).—*Sec.*, C. S. Yarsley, Callows Lane, Kidderminster.
- POWER LOOM OVERLOOKERS, YORKSHIRE ASSOCIATION OF (1,829).—*Sec.*, E. D. Sleeman, Textile Hall, Westgate, Bradford.
- POWER LOOM OVER-LOOKERS, SCOTTISH UNION OF (500).—*Sec.*, J. McCann, 33 Glenclava Terrace, Dundee.
- PRISON OFFICERS' ASSOCIATION (12,585).—*Sec.*, F. G. Castell, Cronin House, 245 Church Street, N.9.
- PROFESSIONAL FOOTBALLERS' ASSOCIATION (2,160).—*Sec.*, C. Lloyd, 124 Corn Exchange Buildings, Hanging Ditch, Manchester 4.
- PUBLIC EMPLOYEES, NATIONAL UNION OF (283,471).—*Sec.*, A. W. Fisher, Civic House, Aberdeen Terrace, Blackheath, S.E.3.
- RADIO AND ELECTRONIC OFFICERS UNION (2,823), 4-6 Branfill Road, Upminster, Essex.—*Sec.*, K. A. Murphy.
- RAILWAYMEN, NATIONAL UNION OF (198,713).—*Sec.*, S. F. Greene, C.B.E., Unity House, Euston Road, N.W.1.
- RETAIL BOOK, STATIONERY AND ALLIED TRADES EMPLOYEES' ASSOCIATION, THE (3,503).—*Sec.*, A. J. Johnson, 152-3 Temple Chambers, Temple Avenue, E.C.4.
- ROLL TURNERS' TRADE SOCIETY, BRITISH (1,000).—*Sec.*, B. W. Johnson, 44 Collingwood Avenue, Corby, Northants.
- RUBBER WORKERS OF GREAT BRITAIN, THE UNITED (4,200).—*Sec.*, L. Walsh, 219 Bury New Road, Whitefield, Prestwich, Manchester.
- SAILMAKERS, AMALGAMATED UNION OF (70).—*Sec.*, J. Pyc, 58 Winskill Road, Liverpool 11.
- SAWMAKERS' PROTECTION SOCIETY, SHEFFIELD (346).—*Sec.*, H. Lambert, 46 Archer Lane, Sheffield, 7.
- SCALEMAKERS, NATIONAL UNION OF (2,584).—*Gen. Sec.*, S. W. Parfitt, 2-4 & 6 St. John Street, E.C.1.
- SCHOOLMASTERS, NATIONAL ASSOCIATION OF (41,848).—*Sec.*, T. A. Casey, Swan Court, Waterhouse Street, Hemel Hempstead, Herts.
- SCIENTIFIC, TECHNICAL AND MANAGERIAL STAFFS, ASSOCIATION OF (101,000).—*Joint Gen. Sec.*, J. K. Dutton; C. Jenkins, 15 Half Moon Street, W.1.
- SCREW, NUT, BOLT AND RIVET TRADE SOCIETY (2,524).—*Sec.*, H. Cater, 368 Dudley Road, Birmingham 18.
- SEAMEN, NATIONAL UNION OF (56,000).—*Gen. Sec.*, W. Hogarth, Maritime House, Old Town, Clapham, S.W.4.
- SHEET METAL WORKERS, COPPERSMITHS AND HEATING AND DOMESTIC ENGINEERS, NATIONAL UNION OF (80,483).—*Gen. Sec.*, L. W. Buck, 75-77 West Heath Road, N.W.3.
- SHEET METAL WORKERS' SOCIETY, BIRMINGHAM AND MIDLAND (8,809).—*Sec.*, A. E. Cooper, 134 Bromsgrove Street, Birmingham, 5.
- SHOP, DISTRIBUTIVE AND ALLIED WORKERS, UNION OF (311,013).—*Sec.*, A. W. H. Allen, C.B.E., 188 Wilmslow Road, Fallowfield, Manchester 14.
- SHUTTLEMAKERS, SOCIETY OF (130).—*Sec.*, S. Brown, 6 Moysse Avenue, Walshaw, Bury.
- SIGN AND DISPLAY TRADES UNION (3,413), 67 Albert Road, S. Woodford, E.18.—*Gen. Sec.*, A. C. Torode.
- SPINNERS AND TWINERS, THE AMALGAMATED ASSOCIATION OF OPERATIVE COTTON (1,876).—*Sec.*, J. Richardson, 115 Newton Street, Manchester.
- SPRING TRAPMAKERS' SOCIETY (90).—*Sec.*, J. Martin, Bellamy House, Wilkes Street, Willenhall, Staffs.
- TAILORS AND GARMENT WORKERS, NATIONAL UNION OF (110,838), 14 Kensington Square, W.8.—*Gen. Sec.*, J. Macgougan.
- TEACHERS IN TECHNICAL INSTITUTIONS, ASSOCIATION OF (27,961).—*Gen. Sec.*, T. Driver, Hamilton House, Mabledon Place, W.C.1.
- TEXTILE AND ALLIED WORKERS, NATIONAL UNION OF (23,174).—*Sec.*, J. King, 81 Fountain Street, Manchester 2.
- TEXTILE CRAFTSMEN, YORKSHIRE SOCIETY OF (1,088).—*Sec.*, C. Hall, Textile Hall, Westgate, Bradford, 1.
- TEXTILE WAREHOUSEMEN, AMALGAMATED (5,020).—*Sec.*, T. Ashe, 6 The Rock, Bury.
- TEXTILE WORKERS AND KINDRED TRADES, AMALGAMATED SOCIETY OF (7,000).—*Sec.*, H. Lisle, Foxlowe, Market Place, Leek, Staffs.
- THEATRICAL AND KINE EMPLOYEES, THE NATIONAL ASSOCIATION OF (17,684).—*Sec.*, Sir Tom O'Brien, 20 Bedford Street, Strand, W.C.2.
- TOBACCO WORKERS' UNION, THE (16,710).—*Sec.*, C. A. Butler, 218 Upper Street, Islington, N.1.
- TRANSPORT AND GENERAL WORKERS' UNION (1,475,556).—*Sec.*, J. Jones, M.B.E., Transport House, Smith Square, S.W.1.
- TRANSPORT SALARIED STAFFS' ASSOCIATION (70,259).—*Gen. Sec.*, A. P. Coldrick, Walkden House, 10 Melton Street, N.W.1.
- TRANSPORT UNION, UNITED ROAD (17,253).—*Sec.*, J. Moore, 76 High Lane, Manchester 21.
- TYPOGRAPHICAL ASSOCIATION, SCOTTISH (7,221).—*Sec.*, P. Whigham, 136 West Regent Street, Glasgow, C.2.
- VEHICLE BUILDERS, NATIONAL UNION OF (71,514).—*Gen. Sec.*, A. Roberts, 44 Hathersage Road, Manchester 13.
- WALL PAPER WORKERS' UNION (4,000).—*Sec.*, D. A. McIntosh, 223 Bury New Road, Whitefield, Manchester.
- WARDRESSERS, TWISTERS AND KINDRED TRADES ASSOCIATIONS, LEEDS AND DISTRICT (144).—*Sec.*, B. Jowett, 34 Greenhill Drive, Bramley, Leeds 13.
- WATERMEN, LIGHTERMEN, TUGMEN AND BARGE-MEN'S UNION (3,494).—*Sec.*, W. A. Lindley, 33 East India Dock Road, E.14.
- WATERPROOF GARMENT WORKERS' TRADE UNION, THE (1,120).—*Sec.*, F. C. Henry O.B.E., 88a Miller Street, Manchester, 4.
- WATER WORKS EMPLOYEES, NATIONAL UNION OF (3,815).—*Sec.*, A. R. Bevan, 484 London Road, Mitcham, Surrey.

WEAVERS' AND WOOLLEN TEXTILE WORKERS' ASSOCIATION, SADDLEWORTH AND DISTRICT (1,398).—*Sec.*, F. G. Battye, 4 Grains Road, Delph, nr. Oldham.

WEAVERS' ASSOCIATION, AMALGAMATED (31,096)—*Gen. Sec.*, H. C. Kershaw, Chronicle Buildings, 74 Corporation Street, Manchester 4.

WIRE DRAWERS AND KINDRED WORKERS, THE AMALGAMATED SOCIETY OF (11,795).—*Sec.*, L. Carr, Prospect House, Alma Street, Sheffield 3.

WOODCUTTING MACHINISTS, AMALGAMATED SOCIETY OF (24,140).—*Sec.*, C. Stewart, 8 Fairfield Street, Manchester 1.

WOODWORKERS, AMALGAMATED SOCIETY OF (174,285).—*Sec.*, G. F. Smith, C.B.E., 9-11 Macaulay Road, S.W.4.

WOOL SHEAR WORKERS' TRADE UNION, SHEFFIELD (27).—*Sec.*, J. Billard, 19 Rivelin Park Drive, Sheffield 6.

WOOL SORTERS' SOCIETY, NATIONAL (1,683).—*Sec.*, N. Newton, M.B.E., 40 Little Horton Lane, Bradford 5.

WRITERS' GUILD OF GREAT BRITAIN (1,583).—*Sec.*, A. Griffiths, 430 Edgware Road, W.2.

### INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total income of these Associations exceeds £15,000,000 per annum. In 1969-70, £4,087,000 is being provided by the Ministry of Technology (1968-69, £4,016,000) and the remainder by subscriptions of individual members or through other sources.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1917. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Ministry of Technology keep a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented by substantial grants from the Government, through the Ministry of Technology.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations.

There are now 45 Research Associations and many other organizations in receipt of grants from the Ministry. They cover most of the principal industries of the country, as follows:—

#### *Brushes.*

BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, 90 COWCROSS STREET, E.C.1.—*Dir.*, D. I. Fothergill.

#### *Cast Iron.*

BRITISH CAST IRON RESEARCH ASSOCIATION, BORDSELY HALL, ALVECHURCH, BIRMINGHAM.—*Dir.*, H. Morrough, C.B.E., F.R.S.

#### *Ceramics.*

BRITISH CERAMIC RESEARCH ASSOCIATION, QUEEN'S ROAD, PENKULL, STOKE-ON-TRENT.—*Dir.*, N. F. Astbury, C.B.E., Sc.D.

#### *Civil Engineering.*

CONSTRUCTION INDUSTRY RESEARCH AND INFORMATION ASSOCIATION, OLD QUEEN STREET HOUSE, 6 STOREY'S GATE, S.W.1.—*Dir.*, A. R. Collins, M.B.E., D.Sc., Ph.D.

#### *Coal Utilization.*

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, RANDALLS ROAD, LEATHERHEAD, SURREY.—*Dir.-Gen.*, L. C. F. Blackman, Ph.D.

#### *Coke.*

BRITISH COKE RESEARCH ASSOCIATION, COKE RESEARCH CENTRE, CHESTERFIELD, DERBYSHIRE.—*Dir.*, G. W. Lee, O.B.E., D.Sc.

#### *Cotton, Silk, etc.*

COTTON, SILK AND MAN-MADE FIBRES RESEARCH ASSOCIATION, SHIRLEY INSTITUTE, DIDDSBURY, MANCHESTER, 20.—*Dir.*, L. A. Wiseman.

#### *Cutlery.*

CUTLERY AND ALLIED TRADES RESEARCH ASSOCIATION, DONCASTER STREET, SHEFFIELD; 3.—*Dir.*, E. A. Oldfield.

#### *Drop Forging.*

DROP FORGING RESEARCH ASSOCIATION, SHEPHERD STREET, SHEFFIELD, 3.—*Director*, P. H. R. Lane, Ph.D.

#### *Electrical.*

ELECTRICAL RESEARCH ASSOCIATION, CLEEVE ROAD, LEATHERHEAD, SURREY.—*Dir.*, B. C. Lindley, Ph.D.

#### *Flour Milling and Baking*

FLOUR MILLING AND BAKING RESEARCH ASSOCIATION, RESEARCH STATION, CHORLEYWOOD, RICKMANSWORTH, HERTS.—*Dir.*, G. A. H. Elton, D.Sc., Ph.D.

#### *Food Manufacture.*

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, RANDALLS ROAD, LEATHERHEAD, SURREY.—*Dir. of Research*, A. W. Holmes, Ph.D.

#### *Fruit and Vegetable Canning.*

FRUIT AND VEGETABLE PRESERVATION RESEARCH ASSOCIATION, CHIPPING CAMPDEN, GLOS.—*Dir.*, H. R. Hinton.

#### *Furniture.*

FURNITURE INDUSTRY RESEARCH ASSOCIATION, MAXWELL ROAD, STEVENAGE, HERTS.—*Dir.*, G. A. McMillan.

#### *Gelatine and Glue.*

GELATINE AND GLUE RESEARCH ASSOCIATION, SARDINIA HOUSE, LINCOLN'S INN FIELDS, W.C.2.—*Dir.*, A. Courts, D.Sc., Ph.D.

#### *Glass.*

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, NORTHUMBERLAND ROAD, SHEFFIELD 10.—*Dir.*, R. G. Newton, O.B.E., D.Sc., Ph.D.

#### *Heating and Ventilating.*

HEATING AND VENTILATING RESEARCH ASSOCIATION, OLD BRACKNELL LANE, BRACKNELL, BERKS.—*Dir.*, N. S. Billington, O.B.E.

#### *Hosiery.*

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, THORNEYWOOD, 7 GREGORY BOULEVARD, NOTTINGHAM.—*Dir.*, W. A. Dutton.

#### *Hydromechanics.*

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, CRANFIELD, BEDFORD.—*Dir.*, L. E. Prosser, O.B.E.

#### *Industrial Psychology.*

NATIONAL INSTITUTE OF INDUSTRIAL PSYCHOLOGY, 14 WELBECK STREET, W.1.—*Dir.*, R. B. Buzzard.

*Instrumentation.*

BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, South Hill, Chislehurst, Kent.—*Dir.*, S. S. Carlisle.

*Jute and Polypropylene.*

SCOTTISH TEXTILE RESEARCH ASSOCIATION, Kin-noull Road, Kingsway West, Dundee.—*Dir.*, H. P. Stout, Ph.D.

*Lace.*

LACE RESEARCH ASSOCIATION, Glaisdale Drive West, Bilborough, Nottingham.—*Dir.*, D. I. Griggs.

*Laundering.*

BRITISH LAUNDERERS' RESEARCH ASSOCIATION, The Laboratories, Hill View Gardens, Hendon, N.W.4.—*Dir.*, J. Leicester.

*Leather.*

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.*, R. L. Sykes, Ph.D.

*Linen.*

LINEN INDUSTRY RESEARCH ASSOCIATION, Research Institute, Lambeg, Lisburn, Co. Antrim, N. Ireland.—*Dir.*, H. A. C. Todd.

*Machine Tools.*

MACHINE TOOL INDUSTRY RESEARCH ASSOCIATION, Hully Road, Hurdsfield, Macclesfield, Cheshire.—*Dir.*, A. E. De Barr.

*Motor Vehicles.*

MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—*Dir.*, R. H. Macmillan.

*Mycology.*

COMMONWEALTH MYCOLOGICAL INSTITUTE, Ferry Lane, Kew, Surrey.—*Dir.*, R. Johnston.

*Non-Ferrous Metals.*

BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—*Dir.*, A. J. Kennedy, D.Sc., Ph.D.

*Paint.*

RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—*Dir.*, G. de W. Anderson, Ph.D.

*Paper, Board, Printing and Packing.*

RESEARCH ASSOCIATION FOR THE PAPER AND BOARD, PRINTING AND PACKAGING INDUSTRIES, Randalls Road, Leatherhead, Surrey.—*Dir.*, G. L. Riddell, Ph.D.

## AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 366):—

Unit of Animal Genetics, University of Edinburgh, King's Buildings, West Mains Road, Edinburgh 9.—*Director*, D. S. Falconer, B.Sc., Ph.D.

Unit of Developmental Plant Physiology and Pathology.—University of Cambridge, Botany School, Downing Street, Cambridge.—*Director*, Prof. P. W. Brian, F.R.S.

Unit of Experimental Agronomy, Department of Agriculture, University of Oxford.—*Hon. Director*, Prof. G. E. Blackman, F.R.S.

Unit of Flower Crop Physiology, Horticultural Research Laboratories Shinfield Grange, Shinfield, Reading, Berks. *Hon. Dir.*, Prof. O. V. S. Heath, D.Sc., F.R.S.

Unit of Invertebrate Chemistry and Physiology, University of Sussex, The Chemical Laboratory, Falmer, Brighton.—*Hon. Director*, Prof. A. W. Johnson, F.R.S.

Unit of Invertebrate Chemistry and Physiology (Subgroup), University of Cambridge, Zoology

*Production Engineering.*

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Melton Mowbray, Leics.—*Dir.*, D. F. Galloway, C.B.E., Ph.D.

*Rubber and Plastics.*

RUBBER AND PLASTICS RESEARCH ASSOCIATION OF GREAT BRITAIN, Shawbury, Shrewsbury, Shropshire.—*Dir.*, W. F. Watson, D.Sc., Ph.D.

*Ships.*

BRITISH SHIP RESEARCH ASSOCIATION, Research Station, Wallsend, Northumberland.—*Dir.*, R. Hurst, G.M., Ph.D.

*Shoes.*

SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Road, Kettering, Northants.—*Dir.*, A. R. Payne, D.Sc.

*Springs.*

SPRING RESEARCH ASSOCIATION, Doncaster Street, Sheffield 3.—*Dir.*, R. Haynes, Ph.D.

*Steel Castings.*

STEEL CASTINGS RESEARCH AND TRADE ASSOCIATION, East Bank Road, Sheffield 2.—*Directors*, J. Bolton; H. T. Hall, Ph.D.

*Tar.*

COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, Cleckheaton, Yorks.—*Dir.*, D. McNeil, O.B.E., Ph.D.

*Timber.*

TIMBER RESEARCH AND DEVELOPMENT ASSOCIATION, Hughenden Valley, High Wycombe, Bucks.—*Dir.*, J. S. McBride.

*Toxicology.*

BRITISH INDUSTRIAL BIOLOGICAL RESEARCH ASSOCIATION, Woodmansterne Road, Carshalton, Surrey.—*Dir.*, R. F. Crampton, Ph.D.

*Water.*

WATER RESEARCH ASSOCIATION, Ferry Lane, Medmenham, Marlow, Bucks.—*Dir.*, R. G. Allen, Ph.D.

*Welding.*

WELDING INSTITUTE, Abington Hall, nr. Cambridge.—*Dir.*, R. Weck, C.B.E., Ph.D.

*Whiting, Chalk and Lime.*

WELWYN HALL RESEARCH ASSOCIATION, The Hall, Church Street, Welwyn, Herts.—*Dir.*, W. G. B. Mills.

*Wool.*

WOOL INDUSTRIES RESEARCH ASSOCIATION, Headingley Lane, Leeds 6.—*Dir.*, B. E. King, Ph.D.

Dept., Downing Street, Cambridge.—*Associate Director*, Dr. J. E. Treherne.

Unit of Muscle Mechanism and Insect Physiology, Dept. of Zoology, University of Oxford, Parks Road, Oxford.—*Hon. Dir.*, Prof. J. W. S. Pringle, M.B.E., Sc.D., F.R.S.

Unit of Nitrogen Fixation, University of Sussex, Brighton.—*Director*, Prof. J. Chatt, Ph.D., Sc.D., F.R.S.

Unit of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Prof. C. P. Whittingham, Ph.D., D.Sc.

Unit of Reproductive Physiology and Biochemistry, 307 Huntingdon Road, Cambridge.—*Director*, Prof. T. R. R. Mann, C.B.E., M.D., Sc.D., Ph.D., F.R.S.

Unit of Soil Physics, School of Agriculture, Cambridge.—*Hon. Dir.*, E. C. Childs, Sc.D., Ph.D.

Unit of Statistics, University of Edinburgh, 21 Buccleuch Place, Edinburgh 8.—*Hon. Director*, Prof. D. J. Finney, Sc.D., F.R.S., F.R.S.E.

Unit of Structural Chemistry, Inveresk House, Strand, London, W.C.2.—*Hon. Dir.*, Prof. Sir Ronald Nyholm, D.Sc., Ph.D., F.R.I.C., F.R.S.

Systemic Fungicide Unit, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, C.B.E., D.Sc., Ph.D., F.R.S.

Institute for Research on Animal Diseases, Compton, Newbury, Berks.—*Director*, W. M. Henderson, D.Sc., M.R.C.V.S.

Institute of Animal Physiology, Babraham, Cambs.—*Director*, R. D. Keynes, Ph.D., Sc.D., F.R.S.

Animal Breeding Research Organisation, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, H. P. Donald, Ph.D., D.Sc., F.R.S.E.

Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, T. C. Carter, O.B.E., D.Sc., F.R.S.E.

Statistics Group, School of Agriculture, Cambridge.—*Officer-in-Charge*, R. C. Campbell, Ph.D.

Letcombe Laboratory, Letcombe Regis, Wantage, Berks.—*Director*, R. Scott Russell, D.Sc., Ph.D.

Ditton Laboratory, Larkfield, Maidstone.—*Director*, R. G. Tomkins, Ph.D.

Pest Infestation Laboratory, London Road, Slough, Bucks.—*Director*, E. A. Parkin, D.Sc., Ph.D.

Weed Research Organization, Begbroke Hill, Sandy Lane, Yarnton, Oxford.—*Director*, J. D. Fryer.

Food Research Institute, Colney Lane, Norwich.—*Director*, Prof. S. R. Elsdon, B.A., Ph.D.

Meat Research, Centre, Langford, nr. Bristol.—*Director*, Prof. M. Ingram, Ph.D.

#### GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture and Fisheries for Scotland.

Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. J. P. Hudson, M.B.E., G.M., Ph.D.

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E.

Animal Virus Research Institute, Pirbright, Surrey.—*Director*, J. B. Brooksby, D.Sc., Ph.D., M.R.C.V.S.

East Malling Research Station, Maidstone, Kent.—*Director*, H. C. Pereira, D.Sc., F.R.S.

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, F. W. Toovey, O.B.E., B.Sc.

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, Prof. E. K. Woodford, O.B.E., Ph.D.

Hannah Dairy Research Institute, Ayr.—*Director*, J. A. B. Smith, C.B.E., D.Sc., Ph.D., F.R.S.E.

Hill Farming Research Organisation, 29 Lauder Road, Edinburgh 9.—*Director*, J. M. M. Cunningham, Ph.D.

Hop Research Centre, Wye College, Ashford, Kent. *Head of Dept.*, R. A. Neve, B.Sc., Ph.D.

Houghton Poultry Research Station,\* Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

John Innes Institute, Colney Lane, Norwich.—*Director*, Prof. R. Markham, Ph.D., F.R.S.

Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, R. L. Mitchell, Ph.D.

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, C. J. Moss, B.Sc.

National Institute of Agricultural Engineering, Scottish Station, Bush and Dryden Estates, Milton Bridge, Penicuik, Midlothian.—*Director*, W. J. West.

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Prof. B. G. F. Weitz, O.B.E., D.Sc., M.R.C.V.S.

National Vegetable Research Stn. Wellesbourne, Warwickshire.—*Director*, D. W. Wright.

Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, C.B.E., Ph.D., F.R.S.

Welsh Plant Breeding Station, Plas Gogerddan, nr. Aberystwyth.—*Director*, Prof. P. T. Thomas, C.B.E., B.Sc., Ph.D.

Scottish Plant Breeding Station, Pentlandsfield, Roslin, Midlothian.—*Director*, N. W. Simmonds, Sc.D.

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, J. L. Blaxter, Ph.D., D.Sc., F.R.S., F.R.S.E.

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, Sir Frederick Bawden, F.R.S.

Scottish Horticultural Research Institute, Invergowrie, Dundee.—*Director*, C. H. Cadman, Ph.D.

\* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

#### PERIODS OF GESTATION AND INCUBATION

The table shows approximate periods of gestation or incubation for some common animals and birds. In some cases the periods may vary considerably from average and where doubt arises professional advice should be sought.

Species	Shortest Period. Days	Usual Period. Days	Longest Period. Days	Species	Shortest Period. Days	Usual Period. Days	Longest Period. Days
Human.....	240	273	313	Turkey.....	25	28	28

Hen.....	20	■	22	Zebra.....	■	56 weeks	

## PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

SIXTY estates in the appended alphabetical list show the principal charitable bequests noted since our last publication. The Wills of fifty women and ten men, with estates ranging from £20,000 to £1,000,000, provide the bequests and in each case the gross figure shown has to be reduced by the sum of death duties, legacies and other charges. After these deductions, however, this year's list still shows a total figure in the region of £2,800,000 remaining for distribution to charities in accordance with the testators' directions. The Treasury, by way of death duties, is still the principal beneficiary but this year's Finance Bill concession abolishing estate duty on estates under £10,000, may benefit charitable bodies by way of small legacies.

Mrs. Diana Gubbay, the only millionairess in the list, left over £100,000 to be shared between the Imperial Cancer Research Fund and St Dunstan's, the second member of the family in two years to leave £1,000,000—the residue of the estate of Mrs. Hannah Gubbay was shown in last year's list ■ passing to the National Trust. The millionaire, "Tizer King" Mr. Fred Pickup, who started selling his well-known drink from a horse and cart to Yorkshire and Lancashire children, left £10,000 for cancer research. Another "self-made" man, Mr. Elias Jolley, who owned the first ply-for-hire taxi concerns, with the first cab at Nottingham Victoria Station Hotel rank, left the balance of his £670,921 estate for various charitable purposes and Sir Stuart Coldwell Goodwin, who started as an 11-year-old boy in a steel mill and in his lifetime gave over £500,000 to charity made bequests to 55 charities by his Will disposing of his £909,692 estate. Other large legacies are noted in the estate of Mrs. Lillian M. Flanagan, who left over £100,000 for various purposes, including ■ share to the Imperial Patent Wadding Co. Ltd., "in which I have an especial interest"; £50,000 to ten charities by Mrs. Lillian Goss who stated "having assisted my relations during my lifetime, it is my earnest desire to make provision for helping the helpless"; £50,000 by Miss Margaret R. Greig between the N.S.P.C.C. and St. Dunstan's, £60,000 by Miss Ettie C. Hawley for research purposes and the National Trust, nearly £100,000 by Mr. Charles B. Lyon, including a portion for the Metropolitan and City Police Orphans' Fund, and, after a £25,000 legacy to the Crusade of Rescue, the balance—over £60,000—of Mrs. Edith M. Scott-Mason's estate goes to an order of friars in Dublin. The blind are aided by £60,000 under the Will of Miss Jessie D. Miller. Legacies to the National Trust include £50,000 by the Rev. John K. Nettlefold; two Manchester schools receive the balance of the £221,618 estate of Mrs. Marion A. Noble after a legacy of £10,000 to Sidney Sussex College, Cambridge, and £70,000 goes to the British Empire Cancer Campaign under the Will of Miss Esther Raworth.

The parish of Buckingham—population 3,286—benefits by £40,000 under the Will of Miss Gladys Harrison. Miss Edith Adams, Miss Edith M. Haywood, Mr. William S. Peet, and Miss Rosa Williams, whose total gross estates amount to £776,837, all left their properties for charitable purposes as their executors decide.

Lord Iveagh, head of the famous Guinness brewing firm, stated in his Will:—"As I have throughout my life made numerous gifts to charity I am not making any charitable bequests by my Will", Mr. Norman Laski, a shareholder in Marks & Spencer Ltd., stated that he had created the "Norman Laski Charitable Trust" and given "as fully as I have been able" and that he had made no charit-

able gifts by his Will "as I cannot foresee the effects of taxation on my estate". Mr. Norman M. Benton, former chairman of the Chinnor Cement Company, who made various charitable bequests, stated:—"I regret that owing to the ever increasing amounts levied by the Government of the day on the estates of deceased persons which in my case are likely to approach more than three-quarters of my possessions my bequests cannot be on as generous a scale as I had at one time hoped but I trust that those of my beneficiaries or friends who are disappointed may derive some measure of satisfaction from the thought that in depriving them the State may succeed in making others happier". Mrs. Marguerite Hinder, ■ widow, of Harrow-on-the-Hill, left the bulk of her estate—nearly £50,000—"for the Reduction of the National Debt".

Charities for the welfare of animals receive ■ number of benefits by this year's list, but the luckiest dog of the year was Sherry, an eight-year-old Cairn terrier, whose mistress Mrs. Vera Rae, a widow, of New Brighton, left about £30,000 for his upkeep. Sherry is installed in luxury kennels near Heswall with a sum put by for his upkeep for life and the balance of the money has been distributed by the executors of the estate to six animal charities nominated by Mrs. Rae.

The principal figure in the list below is that of the gross value of the estate:

Miss Edith Adams, of Bournemouth. . . . .	£236,930
(The residue for charitable purposes as her executors decide)	
Miss Georgiana Jane Anderson, of Tunbridge Wells. . . . .	£53,630
(The residue equally between the Cancer Research Society, the National Trust for England, the National Trust for Scotland, the Soldiers & Sailors Society, OXFAM, the R.S.P.C.A., St. Barnabas Church, Tunbridge Wells, and the Broad Oak House, Tunbridge Wells)	
Mrs. Elsie May Arter, of Lambeth. . . . .	£47,052
(The residue to the Royal Masonic Hospital)	
Mr. Alexander William Lancashire Barlow, of Bournemouth. . . . .	£150,338
(The residue to the Hospital for Sick Children, Great Ormond Street, London, W.C.1.)	
Mr. Bertram Charles Barnes, of Weston-super-Mare. . . . .	£33,094
(All of his property to the Salvation Army)	
Mrs. Anne Evenden Beach, of Taunton. . . . .	£54,123
(The residue equally between the British Empire Cancer Campaign and Dr. Barnardo's)	
Mrs. Constance Margaret Rule Beevers, of Scalby	£36,369
(The residue to The Cheshire Homes)	
Miss Constance Gladys Bourne, of Penkhull	£70,062
(The residue equally between the National Society for Cancer Relief and the British Empire Cancer Campaign)	
Mrs. Annie Emma Brand, of Weybridge. . . . .	£41,422
(The residue equally between The Bible Lands Society and the British Sailors Society)	
Mrs. Ada Alice Brown, of Palmers Green. . . . .	£33,701
(The residue to the Imperial Cancer Research Fund)	
Miss Beatrice Ethel Amy Cooper, of Leysbourne, Chipping Campden . . . . .	£129,106
(Her home to the Church of England Pensions Board, and the residue equally between the English and Scottish National Trusts)	
Miss Eleanor Dixon, of Gloucester. . . . .	£94,418
(The residue to Dr. Barnardo's)	

- Mrs. Mary Elizabeth Dorrington, of Sidmouth  
£68,664  
(The residue to the Church of England Children's Society)
- Mrs. Elizabeth Laurie Downie, of Edgware  
£43,674  
(The residue to the National Trust)
- Miss Louie Blanche Dyer, of Armley, Leeds  
£24,749  
(All of her property equally between the Retired Methodist Ministers Association, the N.S.P.C.C., and the Imperial Cancer Research Fund)
- Miss Bertha Cicely Ellis, of Highgate.... £47,237  
(The residue equally between The Guide Dogs for the Blind Association and the Cheshire Homes)
- Mrs. Evalina Ficken, of Streatham..... £61,062  
(The residue equally between the National Society for Cancer Relief, and the British Home and Hospital for Incurables, Streatham)
- Mrs. Lillian Mary Flanagan, of Chapel-en-le-Frith  
£327,154  
(The residue for the benefit of the Imperial Patent Wadding Co. Ltd., the R.N.L.I., the British & Foreign Bible Society, the Shaftesbury Homes and Aethusa Training Ship, the Boys and Girls Welfare Society, Manchester, the Church Missionary Society, and the Distressed Gentlefolks Aid Association)
- Miss Isabel Bessie Glover, of Paignton... £66,590  
(The residue to the National Trust)
- Mrs. May Glover, of Bournemouth..... £40,997  
(The residue to the Royal National Institute for the Blind)
- Sir Stuart Coldwell Goodwin, of Sheffield  
£909,692  
(£5,000 to the Royal Masonic Hospital, and the residue equally between the Cutlers Company of Hallamshire, the West Riding Masonic Charities Ltd., and the Sheffield Chamber of Commerce)
- Mrs. Lillian Goss, of Hove..... £98,110  
(The residue variously to the National Children's Home & Orphanage, The School for the Blind, the Homes for Blind Babies, the P.D.S.A., the Council of Justice to Animals and Humane Slaughter Society, the London & Provincial Anti-Vivisection Society, Our Dumb Friends League, the N.S.P.C.C., the R.S.P.C.A., the National Institute for the Blind, and the International League for the Protection of Horses)
- Miss Margaret Robb Greig, of Westcliff-on-Sea  
£118,142  
(The residue equally between the N.S.P.C.C., and St. Dunstan's)
- Mrs. Diana Gubbay, of London..... £1,713,682  
(£5,000 to the Jewish Board of Guardians, and the residue equally between the Imperial Cancer Research Fund and St. Dunstan's)
- Miss Gladys Harrison, of London..... £95,963  
(The residue for the benefit of the Parish of Buckingham)
- Miss Ettie Caroline Hawley, of Bath... £131,934  
(One-half of the residue to the Imperial Cancer Research Fund, one-third to the National Trust, and one-sixth to the Tuberculosis Research Fund)
- Miss Edith Mary Haywood, of Shipham.. £352,783  
(The residue for charitable purposes as her executor decides)
- Mrs. Ethel Elizabeth Heale, of Worthing. £85,325  
(One-half of the residue to the Church of England Children's Society, and one-fourth each to the Royal National Institute for the Blind and the National Library for the Blind)
- Dr. Margaret Helbing, of Withington... £31,909  
(The residue to the Homes for the Aged, London)
- Mr. Elias Jolley, of West Bridgford... £670,921  
(One-eleventh of the residue each to Nottingham and Notts Artificial Kidney Fund, the Mansfield and North Notts Multiple Sclerosis Society, BLESMA, Nottingham, the Imperial Cancer Research Fund, the Arthritis and Rheumatism Council for Research, the Royal National Institute for the Deaf, St. Dunstan's, Dr. Barnardo's, the National Society for Mentally Handicapped Children, the Salvation Army, and the National Trust)
- Mrs. Rose Kraemer, of London..... £32,243  
(The residue to Dr. Barnardo's)
- Miss Evelyn Caroline Loxley, of Cheam... £76,661  
(The residue to the Royal National Institute for the Blind)
- Miss Amy Constance Lupton, of Penrith.. £24,874  
(The residue equally between the National Trust and the Imperial Cancer Research Fund)
- Mr. Charles Benton Lyon, of Dumfries.. £301,802  
(The residue equally between Dr. Barnardo's, the Royal U.K. Beneficent Association, the Salvation Army, John Groom's Crippleage, the P.D.S.A., the National Trust for Scotland, Dr. Graham's Homes, Calcutta, St. George's Fund, Harrogate, the Metropolitan and City Police Orphans' Fund, and the Gurney Fund, Worthing)
- Mrs. Edith Mary Scott-Mason, of Petersfield  
£260,732  
(£25,000 to The Crusade of Rescue, and the residue to the Order of Friars Minor Capuchin, Church Street, Dublin)
- Miss Alice McGorty, of East Boldon.... £23,092  
(The residue to OXFAM)
- Miss Jessie Dorothea Miller, of London.. £137,549  
(The residue equally between St. Dunstan's and the Metropolitan Society for the Blind)
- Mrs. Maud Mary Moore, of Parkend near Lydney  
£204,613  
(£10,000 to benefit handicapped children in the county and city of Gloucester, and the residue variously to Shelter National Campaign for the Homeless, the National Society for Cancer Relief, the British Red Cross Society, the Salvation Army, the Imperial Cancer Research Fund, the Church of England Children's Society, the Church Army, Dr. Barnardo's, and OXFAM)
- Mr. Stanley Day Neale, of Bristol..... £43,794  
(£10,000 to the National Deaf Blind Helpers League, Peterborough, £5,000 each to St. Dunstan's and Bristol Institute for the Deaf, and the residue equally between the Y.M.C.A., Bristol, Mullers Homes for Children, Dr. Barnardo's, and the Salvation Army)
- Rev. John Kenrick Nettlefold, of Tewkesbury  
£99,585  
(The residue to the National Trust)
- Mrs. Marion Amy Noble, of Budleigh Salterton  
£221,618  
(£10,000 to Sidney Sussex College, Cambridge, and the residue equally between Manchester Grammar School and Manchester High School for Girls)
- Mr. William Surr ridge Peet, of Birkdale.. £155,241  
(The residue for charitable purposes as his executors decide)
- Mr. Fred Pickup, of Alkington..... £1,086,917  
(£5,000 each to the British Empire Cancer Campaign and the Imperial Cancer Research Fund)

- Miss Esther Raworth, of Harrogate. . . . . £163,651  
(The residue to the British Empire Cancer Campaign)
- Miss Edith Royle, of Southport. . . . . £67,090  
(£5,000 to the British Red Cross Society, East Lancashire, and the residue equally between the East Lancashire Homes for Disabled Sailors and Soldiers, Manchester & Salford Methodist Mission, the Royal Masonic Hospital, the British Empire Cancer Campaign, and the Empire Rheumatism Council)
- Mrs. Beatrice Maud Sangster, of Worthing  
£36,758  
(The residue to the P.D.S.A.)
- Mrs. Ruth Simpson, of Broadstairs. . . . . £118,909  
(The residue equally between the Distressed Gentlefolk's Aid Association, the Royal National Institute for the Blind, and the British Heart Foundation)
- Miss Dora Carr Skinner, of Hove. . . . . £105,046  
(All of her property equally between St. Dunstan's, the British Red Cross Society, the National Spastics Society, and the Yorkshire Council of the British Empire Cancer Campaign)
- Mrs. Hilda Slater, of Prestatyn. . . . . £53,158  
(The residue equally between St. Dunstan's, the Imperial Cancer Research Fund, and the N.S.P.C.C.)
- Mrs. Eileen Bass Smith, of Hornsey. . . . . £64,499  
(The residue to the Imperial Cancer Research Fund)
- Mrs. Helen Boyd Smith, of Petts Wood. . . . . £33,698  
(The residue equally between the Spastics Society, the Cheshire Homes, and the P.D.S.A.)
- Mr. Gilbert Nelson Southall, of London. . . . . £718,115  
(£10,000 to the British Empire Cancer Campaign)
- Mrs. Edith Marie Taylor, of Hampstead. . . . . £174,755  
(£6,000 to the National Society for Epileptics, Chalfont Colony)
- Miss Gladys Winifred Tyler, of Southwick  
£37,032  
(£5,000 each to the League of Friends of Southlands Hospital, Shoreham-by-Sea, the Royal Alexandra Home for Children, Brighton, Chailey Heritage Craft School and Hospital, and Sussex Kidney Trust, and the residue equally between the Guide Dogs for the Blind Association and the Imperial Cancer Research Fund)
- Miss Muriel Kate Wakeford, of Thornton Heath  
£10,876  
(All of her property to the Civil Service Sanatorium Society)
- Miss Louisa Mary Sampson White, of Budleigh Salterton. . . . . £80,193  
(The residue equally between the R.A.F. Benevolent Fund, St. Dunstan's, and the Missions to Seamen)
- Mrs. Doris Marguerite Whittle, of London  
£30,318  
(The residue equally between the P.D.S.A., the R.S.P.C.A., the R.N.L.I., the Institute of Cancer Research, the Guide Dogs for the Blind Association, and the British School of Osteopathy, London)
- Miss Rosa Williams, of Salford. . . . . £31,883  
(The residue for charitable purposes as her executor decides)
- Mrs. Elsie Madge Wilson, of Worthing. . . . . £68,822  
(Two-thirds of the residue to the National Society for Cancer Relief and one-third to the Guide Dogs for the Blind Association)
- Miss Kathleen Amy Woodham, of Bickley  
£49,909  
(The residue equally between the Guide Dogs for the Blind Association, the British Wireless for the Blind Fund, the R.S.P.C.A., the Cherry Tree Farm Stables for Horses and Donkeys, and the Ada Cole Memorial Stables).

### MOTOR VEHICLE AND DRIVING LICENCES

Road licences and driving licences for mechanically-propelled vehicles are issued in England and Wales by county councils and by county borough councils (Scotland, 4 cities and Greenock, Motherwell, Paisley, Coatbridge and Kirkcaldy), on behalf of the Ministry of Transport. Renewal licences are issued in certain circumstances by the Post Office. Details of the excise duties chargeable on motor vehicles are set out in the Vehicles (Excise) Act, 1962, which provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty if it were in use.

Rates of duty for motor car and motor cycle licences taken out after March 19, 1968, are shown below. For Hackney Carriages the rates of duty are: Hackney carriage with seating capacity not exceeding 20 persons, £12 os. od.; additional for each person above 20 (excluding the driver) for which the vehicle has seating capacity, 10s. od.

### MOTOR CARS, MOTOR CYCLES, ETC.

†Additional to ordinary driving licence.	

\* It was announced on Sept. 26, 1969 that the fee for a three-year licence would be increased to £1 in 1970.

## LIFE ASSURANCE AND FIRE AND GENERAL INSURANCE

## LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1968.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reinsuring parts of the risks.

CONSIDERATION FOR ANNUITIES.—These are the amounts received to provide various types of Annuities.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of

British offices is about 18½%, of which about 6½% is expended on commission and 12% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATION.—The valuation returns which are required to be made by the companies to the Board of Trade indicate liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used), and that interest will be earned at a certain rate. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

## FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

*Private Dwelling Houses*, built of brick or stone and tiled or slated and in no hazardous proximity 3s. 6d.

*Household goods therein*, usually 2s.

A number of companies issue a comprehensive policy embracing in one contract all risks incidental to private houses and contents.

*Shops and Warehouses*, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 3s. 6d.

*Stock and Utensils* in trade fixtures, and household furniture in such shops and warehouses, from 3s. 6d. A minimum premium of £1 is required under all of these insurances.

Most fire insurance companies transact accident

(including Motor) and miscellaneous business and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc. and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This is usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

## PRINCIPAL LIFE ASSURANCE COMPANIES

† 1967 figures.

C—Commonwealth Office.

\* Commercial Union—Including figures of associated companies.

■ Eagle Star—Group figures.

\* Ecclesiastical—Year ending Feb. 28, 1969.

\* Guardian—Group figures.

\* Nat.-Mut. of Austral.—Year ending Sept. 30, 1968. Includes consideration for Annuities.

■ Pioneer—Nine months ending Dec. 1968. Includes special non-recurring management charge.

■ Royal—Including figures of associated companies.

\* Sentinel—Year ending March 31, 1969.

\* Standard—Year ending Nov. 15, 1968

\* Sun Alliance &amp; London—Formed 1967—Incorporating Funds established 1720, 1824 &amp; 1883.

## LIFE ASSURANCES ■ FORCE

British Life Assurance Statistics show that 14,000,000 ordinary assurance policies to the amount of £27,100,000,000 were in force at the end of 1968, with total yearly premiums of £601,000,000 compared with 13,800,000 £23,400,000,000 and £553,000,000,000 respectively in 1967. These figures include the Ordinary Branch business of Friendly Societies.

IMMEDIATE ANNUITIES (payable half-yearly, in arrear) FOR EVERY £100 PAID (See notes, p. 1131)

These rates may vary from month to month according to current conditions

\* Note.—The Valuation period is for the 5 years ending in December of the year stated, unless otherwise marked.

A.—Annual Valuation. † Plus special additions.

Atlas.—Three years ending December 31, 1967. Plus a further special Bonus.

Avon.—Plus special final Bonus.

Caledonian.—One year ending December 31, 1968.

Colonial Mutual.—On an increasing scale.

Commercial Union.—Three years ending Dec. 31, 1966.

Eagle Star.—Three years ending December 31, 1966.

Eccelesiastical.—Five years ending February 28, 1969.

Plus 20% of existing Bonus.

Equity & Law.—Three years ending Dec. 31, 1967. Plus £2 3s. 0d.% on existing Bonus.

Friends Prov. & Cent.—Plus 10% of Bonus allocated prior to Dec. 31, 1964.

Ideal Life.—Three years ending December 31, 1965.

Legal and Genl.—Three years ending Dec. 31, 1968.

Plus 20s.% on existing Bonus.

Life Assoc. of Scot.—Three years ending Dec. 31, 1966.

Liverpool Victoria.—Two years ending Dec. 31, 1967.

London & Manchester.—Plus special Bonus.

Marine & Genl.—Increasing by 10s.% after 12 years.

Nalگو.—Plus terminal Bonus £1 10s. 0d.% p.a.

National Employers.—Special Profit-sharing System.

Natl. Farmers Union.—Plus special final Bonus.

National Mutual.—Two years ending December 31, 1968.

National Mut. of Austr.—One year ending Sept. 30, 1968.

National Provident.—Three years ending Dec. 31, 1966.

Plus terminal Bonus.

Noble Lowndes.—Three years ending Oct. 31, 1967.

Northern.—Two years ending Dec. 31, 1966. Plus supplementary Bonus 10%.

Norwich Union.—Compound Series from Jan. 1, 1965.

Phoenix.—Three years ending Dec. 31, 1966.

Pioneer.—Nine months end Dec. 31, 1968.

Reliance Mutual.—Three years ending Dec. 31, 1968.

Royal Exchange.—Three years ending December 31, 1966.

Scottish Equitable.—Three years ending Dec. 31, 1968.

Scottish Life.—Old series—Simple. New series Compound Bonus.

Scottish Mutual.—Three years ending Dec. 31, 1967. Plus 12% of existing Bonus.

Scottish Provident.—Plus 15% of existing Bonus.

Sentinel.—Three years ending March 31, 1968.

Standard.—One year ending Nov. 15, 1968.

Sun Life.—Three years ending Dec. 31, 1966. Plus 12½% of existing Bonus

United Kingdom.—Three years ending December 31, 1968.

Plus 10% (Interim—20%) of existing Bonus.

University.—Four years ending Dec. 31, 1966. Plus 10% of existing Bonus.

Yorkshire.—Two years ending December 31, 1968. Plus 10% of existing Bonus.

Yorkshire General.—Three years ending Dec. 31, 1968.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE

Life assurance may be effected either with or without participation in profits. If with participation then a higher premium is charged and the Policy is entitled to a Bonus, which is a share in the profits made by the Office, as and when declared. Valuations are made by Offices at periods varying from one to five years and the rate of Bonus then

declared is usually in respect of each year since the previous valuation. These Bonuses are normally payable with the Sum Assured for their full amount, but, if desired, they can be applied to reduce the premium or surrendered for a cash payment. If a Policy is effected without participation the Sum Assured only is payable.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100

Age at Entry	With Profits			Without Profits			Age at Entry	With Profits			Without Profits

30	2	8	7	1	8	8	40	3	3	10	2	1	3	60	6	13	11	5	2	4

The next table shows the annual premiums for a policy of £1000 payable at death, with and without profits. Normally premiums are payable throughout life but with some Offices they cease at age 85 or earlier, according to age at entry. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such

interim bonuses compare with valuation bonuses especially in cases of endowment assurance. A without profit Insurance provides the maximum amount of cover at the lowest cost and if an Office as in some cases, is prepared to allow the option of converting the Insurance at any time to "with" profits either for whole of Life or on the Endowment plan, this gives an attractive contract. The change would, of course, entail a higher premium being paid but under this arrangement the highest cover can be obtained in the early years and the alteration made when the increased cost can be met.

ANNUAL PREMIUMS FOR ASSURANCE OF £1000 PAYABLE AT DEATH. MALE LIVES (lower premiums are quoted by many offices for female lives)

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as much depends upon profit-

earning capacity—see first page of Life Assurance. Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy. The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £1000 at the end of 15, 20 and 25 years, at death, if previous, with profits.

# 1970] Annual Premiums for Endowments of £1000, with profits II 35

MALE LIVES (lower premiums ■■ quoted by many offices for female lives)

# Friendly Societies—Great Britain

Acts 1896-1968

Friendly societies are mutual insurance societies in which the members subscribe for provident benefits, in particular sickness, death, endowment and old age benefits. Those friendly societies that are known as "collecting societies" because they collect members' premiums for life assurance by house-to-house visits of collectors or agents are subject to the provisions of the Industrial Assurance Acts as well as the Friendly Societies Acts. The totals in ordinary type in the table below relate to registered friendly societies proper (including both centralized societies and the Orders with their branches); those in italics relate to collecting societies.

End of Year	No. of Societies on Register		Member-ship	Assurances or Policies	Total Funds	
			Thousands		£,000's	
1967.....	8,370	79	5,362	28,537	301,949	435,413
1938.....	19,600	149	8,491	25,738	151,613	84,837
1913.....	25,475	71	6,783	7,481	51,489	11,165

The first column headed "No. of Societies on Register" in the above table includes (for 1967) 809 societies without branches and 34 societies with branches ("Orders"), the remainder being the separately registered branches of the Orders.

Although recent years have seen the growth of societies registered for such specific purposes as the provision of Institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1967 Friendly Societies proper paid out £5.6 millions in sickness benefit and £2.3 millions in death benefit.

As compared with the previous year the number of societies without branches decreased by 37 and the number of branches by 595. Total membership decreased by 140,000 but was still in excess of 5 millions.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The latest available figures of membership and funds set out below indicate the relative strength of several leading old established societies, including the three largest Orders which operate through registered districts and branches subject to a central body:—

FRIENDLY SocS.—Name with (in brackets) Year Established	Membership	Total Funds
National Deposit Friendly Society (1868).....	449,000	£26,324
Hearts of Oak Benefit Society (1842).....	429,000	19,111
Independent Order of Odd Fellows, Manchester Unity (1810).....	337,000	30,458
Ancient Order of Foresters (1834).....	281,000	21,719
Independent Order of Rechabites, Salford Unity (1835).....	138,000	7,551

COLLECTING SocS.—Name and Year Established	No. of Industrial Premium Paying	Assurances Free Paid-up	Total Funds
			£,000's
Liverpool Victoria Friendly Society (1843).....	10,562,000	4,116,000	278,476
Royal Liver Friendly Society (1850).....	6,521,000	2,196,000	131,693
Scottish Legal Life Assurance Society (1852).....	2,092,000	1,000,000	33,017

Long before the term "Friendly Society" came into use, the seeds of voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution to insure relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the oldest, operating in Scotland, being the "Incorporation of Carters in Leith" established long ago as 1555. The oldest

society now on the register in England is the Bottesford Friendly Society established in Leicestershire in 1747.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness in successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies

deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but tax exemption (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

Important changes in the conditions under which friendly societies enjoy tax exemption were made by the Finance Act, 1966. In general, societies registered after May 3, 1966 are not entitled to any tax exemption on their life or endowment business. The same restriction applies to any society registered after December 31, 1957, which during the period of three months ending May 3, 1966 entered into a life or endowment contract on payment of a single premium. Other societies continue to enjoy tax exemption on life and endowment business which satisfies the requirements of Schedule 8 of the Act. These conditions are broadly that the term of an endowment assurance must not be less than ten years and the premiums

must be of equal or rateable amounts payable at yearly or shorter intervals over the whole term of the policy. At the same time by Part II of the Schedule the limits of assurance imposed on friendly societies were raised. The limits for tax exempt business remained unchanged at £500 gross and £104 per annum by way of annuity, but in addition a society is permitted to insure up to £2,000 as lump sum (£3,000 under a mortgage protection policy) and £208 per annum by way of annuity. All these limits are exclusive of bonuses. Profits arising from the business under the new limits are liable to tax.

The Friendly and Industrial and Provident Societies Act, 1968 made substantial changes in the statutory requirements for the keeping and auditing of the accounts of societies registered under the Friendly Societies Act, 1896 and the Industrial and Provident Societies Act, 1965. The system of "approved auditors" was abolished and the requirements were brought generally into line with those of the Companies Act. A number of provisions in the Act apply only to friendly societies and affect their periodical actuarial valuations among other matters. The requirements for giving notice of a meeting of a collecting society at which an amendment of rules is to be proposed were also varied.

## Building Societies—Great Britain

Act 1962

Building Societies are associations incorporated with limited liability under the Building Societies Act. All Building Societies are required to register their rules and file their accounts with the Registry of Friendly Societies. The following particulars showing the growth of Building Societies (as also that of Friendly and Co-operative Societies tabulated on pp. 1143 and 1150) are based on the Chief Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

During 1968 the total assets of all building societies increased by £850 millions to nearly £8,300 millions. The growth of societies in the past 20 years may be illustrated by the fact that total assets reached £1,000 millions as recently as 1948. Only seven years later the assets reached £2,000 millions and after a further eight years they doubled again to £4,000 millions. Now after only another five years they have doubled again.

Advances on mortgage increased in 1968 by £130 millions to a new record figure of £1,590 millions. The bulk of the money advanced by building societies is to owner occupiers to assist them to buy their homes. The average advance on new mortgages in 1968 was £3,125 as compared with £2,366 in 1964, an indication of the ever-increasing cost of house property and of the greater percentage of the price of a house which mortgagors expect to borrow. There is also a tendency for mortgage loans to extend for a longer period than the usual 20 years. Of the total advances in 1968, 7.9 per cent. were on repayment terms extending for periods of 26 years or more.

The number of societies on the register dropped from 554 at the beginning of 1968 to 525 at the end of the year. Thirty-one societies were removed from the register during the year, twenty-seven of them as a result of transfers of engagements. Only two societies were added to the register during the year. The largest society to merge with another during 1968 was the Borough Building Society (assets £35 millions) which transferred its engage-

ments to the Burnley Building Society (assets £148 millions).

Over the past five years the number of societies on the register has decreased by 137, 118 societies having been removed as a result of mergers. Seven societies now have assets exceeding £250 millions while over half of the societies on the register have assets of less than £1 million.

Shareholders added £2,070 millions to their accounts during 1968. This is the first year in which the intake of new monies has exceeded £2,000 millions. The reason why this record intake did not lead to an even greater expansion than in 1967 lies essentially in the fact that withdrawals also reached a record level. In addition to share and deposit interest societies paid out £1,440 millions of investors' balances. No single factor can account for this high rate of withdrawal but it is probable that societies are more and more tending to attract the kind of investor who looks on a building society account rather as a deposit account with a bank than as a long-term investment. Indeed some societies by the very nature of their advertisements encourage the short-term saver.

Mortgage balances increased from £6,538 millions at the end of 1967 to £6,901 millions at the end of 1968. The remainder of the total assets consisted mainly of investments and cash. The investments in which societies may invest their surplus funds are restricted to those authorized by the Building Societies (Authorised Investments) Orders.

For the year 1968 interest received by societies from borrowers amounted to £483 millions. Interest paid or credited to shareholders and depositors totalled £321 millions. Expenses at £149 millions for 1968 averaged only about 12s. 5d. per £100 of the mean total assets.

Payment of interest by mortgagors represents 85 per cent. of the societies' income; a further 12 per cent. is interest on investments. Payment of share and deposit interest represents 57 per cent. of the societies' expenditure; taxation takes 29 per cent. and management costs 8½ per cent. leaving approximately 4½ per cent. to add to accumulated surplus.

The rate of interest usually charged on mortgage

advances to new borrowers who are owner-occupiers is at present 8½ per cent. Interest rates paid on share and deposit accounts are usually 5 and 4½ per cent. respectively (income tax on both share and deposit interest being paid by the societies).

Section 1 of the House Purchase and Housing Act, 1959, empowered the Chief Registrar to designate building societies for the purposes of the section. Societies that had been designated up to the time of going to press are marked "D" in the list which follows. Deposits in a designated building society rank as "narrower-range investments requiring advice" and shares in such a society as "wider-range investments" under the First Schedule to the Trustee Investments Act, 1961.

The basic requirements for designation are contained in the Building Societies (Designation for Trustee Investment) Regulations, 1964 (as amended by The Building Societies (Designation for Trustee Status) (Amendment) Regulations, 1968). These regulations prescribe £1 million as the minimum asset requirement and lay down a scale of reserves required to be held by designated societies ranging from 1½ per cent. of assets exceeding £1,000 million to 2½ per cent. of assets not exceeding £100 million. At the end of 1968 there were 245 designated societies (including 21 with assets of less than

£1 million which continued to enjoy designation by virtue of transitional provisions in the 1968 regulations). All but 17 of the 241 societies with assets exceeding £1 million had been designated by the end of the year. The total assets of designated societies amounted to 98.6 per cent. of the assets of all building societies.

Under the Building Societies Acts, the Chief Registrar exercises certain power of control over building societies. Section 11 of the Prevention of Fraud (Investments) Act, 1958, under which the Registrar had prohibited certain societies from inviting investments was repealed by the Building Societies Act, 1960 (but without prejudice to any order currently in force) and the Chief Registrar was empowered to direct that a building society shall not advertise at all or to give directions to a particular society as to the matter included in its advertisements. In addition he may make an order prohibiting a building society from accepting further investments. The Chief Registrar's Report to Parliament for 1968 disclosed that at the end of that year 9 orders under the 1958 Act were still in force while 6 orders under the 1960 and 1962 Acts prohibiting the acceptance of further investments were in force at the end of 1968. Directions controlling advertising were in force in respect of 5 societies at the end of the year.

## MORTGAGE REPAYMENT TABLE

Calendar monthly subscriptions required to pay off principal and interest of mortgages at  $8\frac{1}{2}$  per cent. interest\* over various periods of years. Intermediate amounts can be determined by addition of subscription rates, e.g., Calendar monthly subscription for a mortgage of £3,500 over 20 years—£26 10s. 0d. + £4 8s. 4d = £30 18s. 4d. Part ■ of the table shows repayment figures under the Government Option Mortgage Scheme (interest rate,  $6\frac{1}{2}$  per cent.).

Period of Years	£100		£200		£300		£500		£1,000		£2,000		£3,000	
	£	s. d.	£	s. d.	£	s. d.	£	s. d.	£	s. d.	£	s. d.	£	s. d.

\* Most of the Building Societies were charging  $8\frac{1}{2}$  per cent. on new mortgages to owner-occupiers at the time of going to press.

## CO-OPERATIVE SOCIETIES—GREAT BRITAIN

During the period 1958-1968 Co-operative Retail Trading Societies (almost all "consumer societies") expanded their membership and assets by 1 per cent. and 11 per cent. respectively as shown by the following particulars covering the 641 societies on the register at the end of 1968 and 1,025 societies in 1958:

Year	Number of Members	Share Capital	Sales	Year's Surplus	Interest on Shares	Dividends on Sales	Total Assets
1968	12,575,000	£,000's 219,115	£,000's 1,059,576	£,000's 37,884	£,000's 6,781	£,000's 27,064	£,000's 514,262
1958	12,420,000	251,751	976,318	63,814	7,242	49,935	460,007

In addition, 122 Co-operative Wholesale and Productive Trading Societies (with ■ total membership of 48,000) were on the register at the end of 1968. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertaking) whose combined sales for 1968 amounted to £573,628,000, their assets at the end of the year totalling £195,673,000.

## NATIONAL HEALTH SERVICE

The National Health Service came into being on July 5, 1948, as a result of the *National Health Service Act, 1946*. The Act places a duty on the Secretary of State for Social Services to promote the establishment in England of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people and the prevention, diagnosis and treatment of illness. The Secretary of State for Wales administers the National Health Service in Wales. There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines. The Secretaries of State are responsible to Parliament for seeing that Health Services of all kinds of the highest possible quality are available to all who need them. They are advised by the Central Health Services Council (and certain Standing Advisory Committees dealing with special subjects), appointed after consultation with the various interested bodies.

The National Health Service which covers a comprehensive range of hospital, specialist, practitioner (medical, dental, ophthalmic), pharmaceutical, appliance and local authority services, is available to every man, woman and child in the country. Everyone normally resident in the country is entitled to use the Service as a whole or any complete part of it. No insurance qualification is necessary. Most of the cost of running the Service is met from the Consolidated Fund—that is, from taxes. Other sources of finance are: (i) the weekly National Health Service contributions (since September, 1957), which are estimated to produce about £165,000,000, approximately 11.4 per cent. of the total cost of the Service in 1968-69. (For convenience these are collected with the National Insurance contribution in a single combined weekly stamp); (ii) local taxation, which with Consolidated Fund grants pays for 87.2 per cent of the cost of local health and welfare services; (iii) partial charges to patients for drugs and dressings, spectacles, dentures and dental treatment and amenity beds in hospital. The cost of the Health and Welfare Services in England and Wales rose from £860,000,000 in 1960-61 to an estimated total of £1,708,000,000 in 1969-70. In Scotland the National Health Service vote totalled £158,303,000 for 1969-70 compared with a revised estimate of £150,405,000 in 1968-69.

### THE HEALTH SERVICES

#### Family Doctor Service

In England and Wales the Family Doctor Service is organized by 134 Executive Councils which also organize the General Dental, Pharmaceutical and Ophthalmic Eye Services for their areas. With few exceptions there is an Executive Council for each county and county borough area; members, who serve voluntarily, are appointed by local doctors, dentists, pharmacists and opticians (15), the Local Health Authority (8) and the Secretary of State for Social Services (7). Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 20,000 general practitioners do so. They may at the same time have private fee-paying patients. Family doctors are paid for their Health Service work in accordance with a scheme of remuneration which includes *inter alia* a basic practice allowance, capitation fees, reimbursement of certain practice expenses and payments for "out of hours" work.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the local Executive Council (in which case 14 days must elapse before the other doctor can accept him). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents", and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or, when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

**Drugs, Medicines and Appliances.**—The number of chemists (including drug stores and appliance suppliers) in England and Wales, within the National Health Service at December 31, 1968, was 13,301. 267,377,706 prescriptions were dispensed in 1968.

#### Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 20,400 of the dentists available for general practice

have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (*e.g.* fillings), provision of dentures in some cases, emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the extraction of teeth and the provision of dentures (in some cases); extensive and prolonged treatment of the gums; inlays and crowns (in some cases); special appliances and oral surgery and certain other items.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for such types of treatment as crowns, inlays or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures; these were increased in May, 1961, to £2 5s.—£2 15s. for the supply of one denture or up to £5 for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. This charge was increased to £1 10s. from May 1, 1968. From Aug. 11, 1969, the charge for a set of dentures was increased to £6 5s., with proportionate increases for partial dentures. No charge is made for clinical examination of a patient's mouth. Expectant mothers or mothers who have had a child during the preceding twelve months, children under 16, or 16 or over, but still in full-time attendance at school, do not pay charges. Other patients between 16 and 20 years of age pay charges for dentures only.

#### General Ophthalmic Service

General Ophthalmic Services, which are administered by Executive Councils, form part of the ophthalmic services available under the National Health Service and provide for the testing of sight and supply of glasses to meet more normal

needs only. Diagnosis and specialist treatment of eye conditions is available through the Hospital Eye Service as well as the provision of glasses of a special type. Testing of sight may be carried out by any ophthalmic medical practitioner or ophthalmic optician, and glasses supplied by any ophthalmic optician or dispensing optician taking part in the Services. On the first occasion a person wishes to use the Services he must obtain a medical recommendation from his doctor that his sight needs testing. No further recommendation is required subsequently and the Services may be used direct.

Until 1951 there were no charges under the Supplementary Ophthalmic Services except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses. In May, 1951, charges to patients of 10s. for each lens, plus the actual cost of the frames, were introduced. As from Aug. 11, 1969, charges to patients have been increased to 16s. for each single-vision lens or 25s. for each bi-focal lens. As hitherto, children's glasses in the standard type of children's frame remain free of charge. As from May, 1961, schoolchildren aged 10 years or over may be supplied with lenses without charge if any other type of N.H.S. frame is used. The charge for the frame must then be paid.

#### Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The Minister has a duty to provide hospital accommodation and specialist services to such an extent as he considers necessary to meet all reasonable requirements for the treatment of the acutely ill, maternity cases, the chronic sick and those suffering from tuberculosis or infectious diseases as well as the mentally disordered. Convalescent treatment is also provided for those who need it and surgical and medical appliances are supplied in appropriate cases.

In the main, this part of the Service is organized by 15 Hospital Boards (see p. 390); in 14 of these regions there is a University having a teaching hospital or medical school. Hospitals are administered on behalf of the Boards by about 330 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations and are at present 8-10 guineas per week in single rooms and 4-5 guineas per week in small wards. In such a case the patient pays nothing for the cost of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the

specialist as well. Since January 1, 1967, medical fees for private patients in National Health Service hospitals are a matter for agreement between doctor and patient.

From April 1, 1969, new charges for private patients in National Health Service Hospitals came into effect, reflecting average costs instead of costs to the individual hospital. Hospitals are divided into 5 classes for which the charges per day (with own consultant) are:

	Single room	Other
Long stay hospitals*	£4 15s.	£4 5s.
Psychiatric hospitals*	£2 15s.	£2 10s.
Acute and other hospitals*	£8 5s.	£7 10s.
London teaching hospitals...	£11 15s. †	£10 15s.
Other teaching hospitals †	£10	£9

In addition, private patients pay the consultant the fee agreed for their private medical treatment.

Where all necessary medical or surgical treatment is provided by the hospital, charges in those hospitals marked\* above are 5s. more per day; Teaching hospitals, 15s. more per day (except London teaching hospitals where a single room is £1 more per day).

Arrangements to obtain the service or advice of a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to visit the patient at home if he is unable, for medical reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above or dentures or glasses of a special type supplied at the patient's request). With certain exceptions, hospital out-patients have to pay fixed charges for dentures and glasses.

#### Local Authority Health and Welfare Services

The authorities mainly concerned with the care of patients in their own homes are the County Councils, County Borough Councils, London Borough Councils and the City of London. There are 175 local health and welfare authorities in England and Wales and 29 other authorities with delegated health and welfare functions. The only local health authority function of the Greater London Council is the provision of the ambulance service.

Local Health Services provide such services as midwifery; ante-natal, post-natal and infant welfare clinics, and priority dental services for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of home help on health grounds; special care and after-care of the sick; health education; local mental health services; and also vaccination and immunization. Most authorities also provide a chiropody service with priority for the elderly, physically handicapped persons and expectant mothers. The provision of Health Centres is also a local Health Authority responsibility in England and Wales. In Scotland such centres are the responsibility of the Secretary of State for Scotland.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, chiropody, nursing requisites, bedding and other services for care and after-care, for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. A charge may also be made for yellow fever vaccinations. The Local Health Authorities may only charge what is reasonable, having regard to the means of the users.

## NATIONAL INSURANCE AND RELATED CASH BENEFITS

*For Combined Contributions, see p. 1160.*

The State insurance and assistance schemes in force from July 5, 1948, comprised schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory benefits in place of national assistance and non-contributory old age pensions, and provided for the establishment of a new Ministry of Social Security (now the Department of Health and Social Security), with overall responsibility for the existing insurance schemes and family allowances scheme and the new scheme of non-contributory benefits, in place of the Ministry of Pensions and National Insurance and the National Assistance Board, which were abolished.

Acts consolidating the provisions of the National Insurance, Industrial Injuries, Family Allowances and National Health Service Contributions Acts passed since 1946 were brought into effect on September 6, 1965, and the Statute Law Revision (Consequential Repeals) Act, 1965, which repealed the provisions of the old Acts came into effect on the same date.

### NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1965, as amended by the National Insurance Acts, 1966 and 1967, the Family Allowances and National Insurance Acts, 1967 and 1968, the Public Expenditure and Receipts Act, 1968, and the National Insurance Acts, 1969, and Regulations made under those Acts.

The scheme provides, in return for regular weekly flat-rate contributions, weekly flat-rate cash benefits as stated below. For employees over 18 earning over £9 a week and their employers there are additional contributions graduated according to earnings, with related graduated additions to retirement pensions for employees or their widows.

The National Insurance Act, 1966, provides for the payment to persons over 18 of earnings-related short-term benefits supplementing unemployment and sickness benefit and widow's allowance.

The National Insurance Act, 1969, increased retirement pensions and other insurance benefits, together with flat-rate and graduated contributions, from the week beginning November 3, 1969.

### INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pension age becomes insured under the Acts.

There are three classes of insured persons namely:

- (a) Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.
- (b) Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.
- (c) Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

The estimated number of persons in respect of whom flat-rate contributions were payable in 1966 was as follows: employed, 23.56 million; self-employed, 1.44 million; non-employed, 0.25 million.

National Insurance contributions are payable by insured persons, by employers of employed persons (see p. 1160), and out of moneys provided by Parliament.

The ordinary flat-rate contributions are usually paid by means of stamps on a single insurance card; the stamp also covers the National Health Service contributions; in the case of employed persons the Industrial Injuries contribution; the Selective Employment Tax payable by all employers; and, in the case of employees aged 18 and over, the employer's contribution to the Redundancy Fund (see p. 1160).

Since November 3, 1969, employed persons over age 18 earning more than £9 in any week unless contracted out in part as members of approved occupational pension schemes, and their employers, have each paid, in addition to the flat-rate contribution covering earnings up to £9 a week, a graduated contribution of  $4\frac{1}{2}$  per cent. of earnings over £9 and up to £18 a week, and  $3\frac{1}{2}$  per cent. on earnings over £18 and up to £30. Employed persons over age 18 who are contracted out, and their employers, have each paid a graduated contribution of  $\frac{1}{2}$  per cent. on earnings between £9 and £18 a week, and  $3\frac{1}{2}$  per cent. on earnings between £18 and £30. People in class 1 who are contracted out pay a higher flat-rate contribution (see pp. 1156, 1160).

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay the National Insurance flat-rate contribution or not.

Men aged 70 and over and women aged 65 and over in classes (1) and (2) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions, including any graduated contributions, if they have not retired from regular employment. Normally no contributions are payable by men over 65 or women over 60 in class (3).

Regulations state the cases in which insured persons may be exempted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are exempted.

The yearly Exchequer Supplement to flat-rate contributions is equal to one-quarter of the national insurance portion of the contributions paid by employers and employed persons (excluding graduated contributions and the extra flat-rate contributions paid by employed persons who are in part contracted out of the graduated scheme and their employers) and one-third of the national insurance portion of self-employed and non-employed contributions. To maintain the Exchequer proportion of the total contribution income of the scheme at its present level of about 18 per cent., the Exchequer will also make a special contribution of £10 million in 1969-70 and £45 million in each later year.

### BENEFITS

The Acts give the following benefits:—

- Unemployment benefit.
- Sickness benefit.
- Maternity benefits, including maternity grant and maternity allowance.
- Widow's benefits, including widow's allowance, widowed mother's allowance and widow's pension.
- Child's special allowance.
- Guardian's allowance.
- Retirement pension.
- Death grant.

The benefits available to the various classes of insured persons are as follows:

Employed persons.... All benefits.

Self-employed persons.	All benefits <i>except</i> unemployment benefit.
Non-employed persons	All benefits <i>except</i> unemployment and sickness benefits and maternity allowance.

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Chief National Insurance Commissioner and National Insurance Commissioners.

### UNEMPLOYMENT BENEFIT

The *standard weekly rates of flat-rate benefit* are as follows:

	s.	d.
Man, single woman or widow over 18...	100	0
Married woman over 18: ordinary rate	70	0
Person under 18: ordinary rate.....	55	0
Increase of benefit for only child or elder or eldest child (where payable).....	31	■
Increase of benefit for second child (where payable).....	13	0
Increase of benefit for each additional child (where payable).....	11	0
Increase of benefit for adult dependant (where payable).....	62	0

*Normal Contribution Conditions.*—The claimant must have paid 26 Class ■ contributions since he last became insured, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class ■ contributions during the preceding contribution year.

*Waiting Period.*—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated ■ “linked up” if not separated by more than 13 weeks.

*Duration of Benefit.*—Benefit is payable in a period of interruption of employment for up to 312 days (a year).

*Requalification for Benefit.*—A person who has exhausted benefit requalifies therefor when he has paid 13 Class 1 contributions.

*Disqualifications.*—There are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if ■ person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment or training.

*Earnings-related Supplement.*—The supplement payable to claimants over 18 and under pensionable ■ who are entitled to flat-rate unemployment benefit is one third of the amount by which average weekly earnings exceed £9, subject to a maximum supplement of £7 (payable where average earnings are £30 a week or more) and a maximum total benefit, including increases for dependants, of 85 per cent. of earnings. Average weekly earnings will normally be taken ■ one-fiftieth of total earnings in the previous income tax year. The supplement starts from the thirteenth day of a period of interruption of employment and lasts for up to a maximum of six months. Periods of unemployment or sickness not separated by more than 13 weeks are treated as one period of interruption of employment. Where employment ■

suspended but not terminated by the employer, e.g. short-time working or lay-off, the supplement is not payable for the first six days (except Sundays and holidays) in any continuous period of suspension.

*Numbers Unemployed.*—During the year 1968 the average number of persons registered as unemployed in Great Britain was 564,100. In November, 1967, 318,000 persons were receiving unemployment benefit.

### SICKNESS BENEFIT

*Standard Rates of flat-rate Benefit.*—Same as for unemployment benefit.

*Normal Contribution Conditions.*—Same as for unemployment benefit, except that Class 2 as well as Class ■ contributions and credits are counted.

*Waiting Period.*—Same as for unemployment benefit. Days of sickness are “linked up” with days of unemployment falling within the same period of 13 weeks.

*Duration of Benefit.*—A person who has paid 156 Class 1 or Class ■ contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 312 days (one year); but he will requalify for benefit when he has paid contributions for 13 weeks.

*Disqualifications.*—Regulations provide for disqualifying ■ person for receiving sickness benefit for ■ period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in ■ way which would retard his recovery.

*Earnings-related Supplement.*—The supplement and the rules as to duration are the same as for the supplement to unemployment benefit.

*Number of Claims.*—During 1967, about 10 million new claims for sickness benefit were received.

### MATERNITY BENEFITS

*Maternity Grant.*—A cash grant of £25 is payable on the mother's own insurance or on her husband's whether she is confined at home or in hospital. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at ■ reduced rate.

*Maternity Allowance.*—A woman who is gainfully occupied receives in addition a maternity allowance of 100s. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During the year ended March 31, 1967, maternity grants were paid for about 933,000 births; in addition, about 254,000 women received weekly maternity allowances.

### WIDOW'S BENEFITS

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by the husband are (a) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (b) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50.

*Widow's Allowance.*—A woman who at her husband's death is under 60 (or over 60, if he had not retired), receives (during the first 26 weeks of widowhood) a cash allowance usually of 140s. ■ week with increases of 49s. for the first or only child, 31s. for the second child and 29s. for each other child, in addition to family allowances. Women widowed on or after October 5, 1966, before the husband's retirement, also receive a supplement to widow's allowance amounting to one-third of the husband's average weekly earnings between £9 and £30 (reckoned in the same way ■ for earnings-related supplements to unemployment and sickness benefit) (see p. 1154).

*Widowed Mother's Allowance.*—When the 26 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of 149s. ■ week as long as she has ■ child of qualifying age, and in addition 31s. ■ week for the second child and 29s. for each additional child, as well as family allowances. A widowed mother's personal allowance, usually 100s. a week, is payable to widows who, when their widow's or widowed mother's allowance ends, have living with them ■ child under 19, who has left school and is not ■ apprentice.

*Widow's Pension.*—A widow receives this pension usually of 100s. a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or (ii) when her widowed mother's allowance or widowed mother's personal allowance ends, if she is then over 50 (40 if widowed before February 4, 1957) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon remarriage. The National Insurance etc. Act, 1964, abolished the earnings rule previously applied to widowed mother's allowance and widow's pension.

If a woman who was married before July 5, 1948, to a ■■ insured under the old scheme immediately before that date does not qualify for widow's benefit, she may qualify for a widow's basic pension, usually, since March 29, 1965, of 30s. ■ week.

At the end of 1967, about 568,000 widows were receiving widowed mother's allowance, widow's pension or widow's basic pension, and about 41,000 widow's allowances were current.

### CHILD'S SPECIAL ALLOWANCE

A woman whose marriage has been dissolved or annulled and who has not re-married is paid ■ special allowance on the ex-husband's death. The normal condition is that she has a child to whose maintenance he was contributing at least 5s. a week in cash or its equivalent. The allowance is 49s. ■ week for the first or only child, 31s. for the second child and 29s. for each other child, in addition to family allowances. The contribution conditions for the allowance are substantially the same as for widow's benefit.

### GUARDIAN'S ALLOWANCE

Where the parents of ■ child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's

allowance of 49s. ■ week while the child ■ of qualifying age. At the end of 1967 about 4,800 allowances were being paid.

### RETIREMENT PENSIONS

A flat-rate retirement pension is payable for life to ■ insured person who (a) is over pension age (65 for ■ man and 60 for a woman), (b) has retired from regular employment, and (c) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (b).

The standard flat-rate pension for an insured person or widow is 100s. a week, plus 62s. for ■ dependent wife who is not qualified for a pension, plus 31s. for the first or only child, 13s. for the second child and 11s. for each other child, in addition to family allowances.

Where the insured person postpones retirement beyond minimum pension age, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for women), in respect of contributions paid ■ an employed or self-employed person during the five years after reaching minimum pension age. The increment to pension is now 1s. for every 9 contributions. A retirement pensioner between the ages of 65 and 70 (60 and 65 for women) can choose to be treated as not retired and thus earn pension increments by temporarily forgoing his pension and paying contributions during employment or self-employment.

A man aged 65 to 70 (or ■ woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of £7 10s. and ■ further sixpence for each shilling of net earnings in excess of £9 10s.

The Normal Contribution Conditions for the flat-rate pension are (a) that 156 contributions of any class have been paid (104 if insurance began before September 30, 1946), and (b) that the yearly average of contributions paid or credited is not less than 50.

*Special Provisions as to Women.*—Subject to certain conditions, a married woman over the age of 60 or ■ woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 62s. a week when he retires at 65 or after or reaches 70. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 6d. during his lifetime and 1s. on widowhood for every 12 (from October, 1967, 9) contributions paid by the husband as an employed or self-employed person while he is over 65 and under 70 and she is over 60, and her pension in widowhood is increased by 6d. for every 12 of these contributions paid by him on or after December 25, 1961, while she is under 60 (from October, 1967, 9). A widow who qualifies for retirement pension on her own insurance can receive, in addition to any increments she may earn by deferring her own retirement and paying contributions beyond age 60, half of all the 1s. increments which her husband earned by deferring retirement and paying contributions on or after December 25, 1961.

Unemployment and sickness benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment at the ■■■■ rate as the retirement pension they would have been entitled to had they retired from regular employment.

At the end of 1967 retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 6,770,000 persons, about 230,000 more than a year earlier.

### THE GRADUATED PENSION SCHEME

Since April, 1961, when the graduated pension scheme came into operation, National Insurance contributions and retirement pensions have been

graduated, within specified limits, according to earnings. The scheme does not apply to employed persons under 18, or to self-employed or non-employed persons (see p. 1160).

**Graduated Contributions.**—Employed persons over 18 (including men over 65 and under 70, and women over 60 and under 65, who have not retired), unless contracted out in part as members of occupational pension schemes satisfying certain conditions, and their employers, each pay, in addition to the weekly flat-rate contribution covering earnings up to £9 a week, a graduated contribution of 4½ per cent on all earnings over £9 and up to £18 a week; plus, since November 3, 1969, 3½ per cent on earnings between £18 and £30 (see p. 1160).

The flat-rate contribution, which includes the separate National Health Service and Industrial Injuries contributions, the Selective Employment Tax (employer only) and the employer's contribution to the Redundancy Fund, is 83s. 7d. for an employed man (of which the employee pays 17s. 8d. and the employer 65s. 11d.) and 54s. 1d. for an employed woman (of which the employee pays 15s. and the employer 39s. 1d.) (see p. 1160).

The graduated contribution is the same for men and women. Employed married women, and widows receiving certain benefits, are still able to choose not to pay the flat-rate contribution (other than the 8d. Industrial Injuries contribution), but, unless contracted out, they pay their share of the graduated contribution on their earnings over £9 a week.

The graduated contributions are in general payable on the gross earnings (including overtime pay, bonus, etc.) received in each week (or month, etc.) taken separately, and not on the cumulative total over the year.

Contracted-out employees over age 18 (whatever their earnings) and their employers pay flat-rate contributions which are higher than those payable by or for employees who are not contracted out (see p. 1160). Since November 3, 1969, they have also been liable for graduated contributions of about ½ per cent. of earnings between £9 and £18 a week and ¾ per cent of earnings between £18 and £30 (see p. 1160).

The flat-rate contributions are usually paid by means of a combined weekly stamp. The graduated contributions are collected through the P.A.Y.E. system, in association with income tax.

**The graduated pension.**—The graduated addition to the flat-rate retirement pension for each contributor is at the rate of 6d. a week for each unit of graduated contributions paid by him or her since the start of the new scheme. A unit of contributions is £7 10s. for men, and £9 for women, of graduated contributions paid by the employee. A widow gets a graduated addition to her flat-rate retirement pension equal to half of any graduated addition earned by her late husband, plus any addition earned by her own graduated contributions.

Graduated additions are subject to the usual condition of retirement and initially are subject to the same earnings rules as the flat-rate retirement pension (see p. 1155). Persons who defer retirement will continue to pay graduated contributions until they retire or reach 70 (65 for women) whether retired or not, when they will qualify for graduated additions to pension in respect of graduated contributions they have paid. In addition, half of the graduated additions they have forgone by deferring retirement will be treated as extra graduated contributions paid by them and will count towards further graduated pension.

**Contracting out.**—Adult employees who have retirement pension rights in an occupational pension

scheme can be contracted out of part of the graduated National Insurance retirement pensions scheme if the following conditions are satisfied:

- (1) the occupational scheme is financially sound;
- (2) it provides the employees contracted out with retirement pension rights at least equal to the maximum graduated pension that could have been earned in the State scheme for a corresponding period of service up to age 65 (women 60);
- (3) pension rights at least up to this amount are preserved should the employee change his job.

To be contracted out, an employee must be in an employment covered by a Certificate of Non-participation issued to his employer by the Registrar of Non-participating Employments. In general, the application for a certificate must come from the employer. An employer who wishes to contract out all or particular groups of employees must first give notice to the employees and others concerned (e.g. trustees, insurers, committee of management) and allow a period for consultation, and the Registrar can defer the issue of a certificate to allow time for further consultation. There is a right of appeal to the Adjudicator against a refusal by the Registrar to issue a certificate.

If an application was not made in sufficient time before the new scheme came into force, graduated contributions will be payable until a certificate is issued and takes effect. It is open to an employer to seek the Registrar's advice as to whether a pension scheme is suitable for contracting out before a formal application is made. A leaflet R 1, which explains the arrangements for contracting out and for modifying schemes for the purpose of satisfying the contracting out conditions, can be obtained from the Registrar of Non-participating Employments, 287 High Holborn, London, W.C.1.

#### DEATH GRANT

A death grant is payable on the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widow, and also in respect of the deaths of certain handicapped persons on the insurance of close relatives. The normal grant is for an adult £30, a child aged 6-17 £22 10s., a child aged 3-5 £15, a child under 3 £9. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £15.

The normal contribution conditions for death grant are that (a) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (b) either not less than 45 contributions of any class have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th birthday if later) is not less than 45. No grant is payable for deaths of persons already over pension age on July 5, 1948. For deaths in 1965 about 399,000 grants were awarded.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

#### FINANCE

Under the National Insurance Acts two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance Fund, and payments are made out of the Fund to meet the cost of benefits and administration.

Under the National Health Service Contributions Act, provision is made for separate National Health Service contributions to be collected in conjunction with the National Insurance contributions, in place of payments formerly made from the Fund towards the cost of the National Health Service. (See p. 1160.)

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1968, were as follows:—

Receipts		£'000
Balance, April 1, 1967.....		207,579
Flat-rate contributions from employers and insured persons.....	1,242,401	
Exchequer contribution.....	300,000	
Graded contributions.....	417,382	
Income from investments.....	12,447	
Transfer from the Reserve Fund of income from investments, etc.....	49,545	
Other receipts.....	597	
		<u>2,229,952</u>
Payments		£'000
Benefit:—	£'000	£'000
Unemployment benefit... ..	121,695	
Sickness benefit.....	322,865	
Maternity benefit.....	36,500	
Widow's benefit.....	148,000	
Guardian's allowance.....	520	
Child's special allowance..	50	
Retirement pension.....	1,384,581	
Death grant.....	9,495	
		<u>2,023,705</u>
Administration expenses.....	71,178	
Other payments.....	18,935	
Balance, March 31, 1968.....	116,134	
		<u>2,229,952</u>

Payments exceeded receipts during the year by £91.45 million. Compared with 1966-67, receipts increased by £158.85 million and payments by £237.46 million.

The balance in the Reserve Fund at March 31, 1968, was £1,168.7 million.

### INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, now operates under the National Insurance (Industrial Injuries) Act, 1965, as amended by the National Insurance Act, 1966, the National Insurance (Industrial Injuries) (Amendment) Act, 1967, the National Insurance Act, 1967, the Family Allowances and National Insurance Acts, 1967 and 1968, the National Insurance Act, 1969, and Regulations made under those Acts. The National Insurance Act, 1969, provided for increases in the rates of benefit and in amounts of contribution, with effect from the week beginning November 3, 1969.

The Workmen's Compensation Acts continue to apply, subject to certain amendments, to cases arising before the Industrial Injuries scheme started. Statutory schemes have also been made providing for the payment of allowances supplementing workmen's compensation in certain circumstances, and for the payment of benefits in certain cases

where neither workmen's compensation nor Industrial Injuries benefits are payable.

### INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance scheme (excluding members of the Forces), and numbered in 1965 23.5 million, of whom more than one-third were women.

### CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable by insured persons and employers respectively are 11d. and 1s. for men over 18, 8d. and 9d. for women over 18, 5d. and 5d. for boys under 18, and 3d. and 4d. for girls under 18. Normally contributions are paid by means of stamps on ■ single insurance card, the same stamp also covering the flat-rate National Insurance and the National Health Service contributions, etc. (see p. 1160).

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time of starting work, but if employed while of school age pay no contributions.

### BENEFITS

*Injury Benefit* is payable for not more than the first 26 weeks of incapacity. The day of the accident is not usually treated as ■ day of incapacity. The rules as to "waiting days" have, since October 6, 1966, been brought into line with those for sickness benefit under the National Insurance scheme (see p. 1154). Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of 155s. (days being paid for at one-sixth of the weekly rate), plus 62s. for one adult dependant, plus 31s. for the first or only child, 12s. for the second child, and 11s. for each other child, in addition to family allowances. Other juveniles receive lower rates. Where a claimant who is entitled to sickness benefit under the National Insurance scheme draws injury benefit instead, any earnings-related supplement to sickness benefit to which he is entitled will be paid with the injury benefit (see p. 1154).

*Disablement Benefit* is payable if at or after the end of the injury benefit period the insured person suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by ■ medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred ■ ■ result of the loss of faculty) ■ compared with ■ normal person of the same age and sex. In cases of disablement of less than 20 per cent., except in pneumoconiosis or byssinosis cases, benefit normally takes the form of a gratuity paid according to ■ prescribed scale, but not exceeding £550. Where the degree of disablement is 20 per cent. or more, or if it is due to pneumoconiosis or byssinosis, the benefit is a weekly pension payable either for a limited period or for life according to the following scale:

Degree of disablement	Weekly Rate
	s. d.
100 per cent	168
90 " "	151
80 " "	134
70 " "	118
60 " "	101
50 " "	84
40 " "	67
30 " "	50
20 " "	34

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive lower rates.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance or if his disablement is exceptionally severe. An increase of 62s. for an adult dependant and of 31s. for the first or only child, 23s. for the second child, and 11s. for each other child (in addition to family allowances) is also payable where the pensioner is either entitled to an unemployability supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw other national insurance benefits in full in addition to disablement pension.

**Death Benefit**, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of 140s. a week for the first 26 weeks and thereafter of 111s. or less a week according to circumstances, plus 49s. for the first or only child, 31s. for the second child and 29s. for each other child, in addition to family allowances.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending courses of vocational training or rehabilitation approved by the Ministry of Labour.

**Industrial Diseases, etc.**—The Industrial Injuries Act extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

**Determination of Questions and Claims.**—Provision is made for the determination of certain questions (e.g. as to insurability and liability to contribute) by the Minister, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the National Insurance Commissioners, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g., whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioners.

Almost a million new claims for injury benefit are made each year. The number of disable-

ment pensions in payment at September 30, 1966, was 200,200, of which 47,600 were in respect of pneumoconiosis. During the year ended September 30, 1966, the number of special hardship allowances in payment increased from 133,000 to 135,400. The annual number of awards of death benefit is nearly 2,000; at the end of 1966, about 26,300 widows' pensions and 13,400 allowances to dependent children were in payment.

#### FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Industrial Injuries Act, viz., the Industrial Injuries Fund.

#### NON-CONTRIBUTORY CASH BENEFITS

The National Assistance scheme in force from 1948 to 1966 was designed to substitute for certain existing services provided by the State or by local authorities a unified State service of financial assistance according to need. This service was administered by the National Assistance Board, the ultimate responsibility to Parliament resting with the Minister of Pensions and National Insurance. The National Assistance Board also administered non-contributory old age pensions payable, according to a test of means, under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and over, and had power to supplement old age pensions by national assistance in case of need.

The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory benefits termed supplementary allowances and pensions in place of national assistance and of non-contributory old age pensions, and vested responsibility for these non-contributory benefits in a new Ministry of Social Security (now the Department of Health and Social Security) in place of the Ministry of Pensions and National Insurance and the National Assistance Board. A Supplementary Benefits Commission within the Department is now responsible, subject to Regulations made by the Secretary of State for Social Services, for operating the scheme of non-contributory benefits.

The supplementary pension may be claimed by persons over pension age and the supplementary allowance by persons aged 16 or over but under pension age, who are not in full-time work. The benefit payable is the amount, assessed under the provisions of the Act, by which the claimant's income requirements exceed his resources. The scale of normal income requirements (exclusive of

rent) since the week beginning November 3, 1969, is as follows:

	Ordinary		Blind persons	
	£	s.	£	s.
Married couple	7	17	9	2 (a)
Single householder	4	16		
Other persons:—				
Aged 21 or over	3	17	6	■
Aged 18-20	3	4	4	4
Aged 16-17	2	16	3	12
Aged 13-15	2	4	2	4
Aged 11-12	2	1	2	1
Aged 5-10	1	13	1	13
Aged under 5	1	■	1	8

(a) £9 18s. when both are blind.

For long-term cases, in place of discretionary additions under national assistance to meet small special needs, there is an addition of 10s. a week to the income requirements. It applies to those over pension age who claim supplementary pensions (with certain exceptions), and also to those below pension age, other than the unemployed, after they have been in receipt of an allowance for two years.

The amount to be added for rent if the claimant (or his wife or her husband) is the householder is normally his net rent and rates in full; and in the case of the non-householder aged 18 or over, 11s. a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and for certain disregards.

Individual awards of benefit are determined by the Commission; a claimant who is dissatisfied with the amount assessed has a right of appeal to an independent Appeal Tribunal.

The Commission may vary its assessment if there are exceptional circumstances but, in the case of a claim to supplementary pension, may not reduce it. The Commission also has powers, similar to those in the national assistance scheme, to award lump-sum payments to meet non-recurring exceptional requirements, and to meet charges for appliances or services supplied under the National Health Service, e.g. for glasses, dentures or dental treatment.

The number of supplementary benefits in payment at the end of 1967 was: pensions 1,796,000; allowances 763,000.

At the end of November, 1967, about 229,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise out of the employment field. At the same date, 98 per cent. of those with pensions and 34 per cent. of those with allowances were receiving the long-term addition (then 9s.). In 1967 assistance amounting to £2,009,000 was given to meet charges under the National Health Service for spectacles, dentures and dental treatment.

### FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 6, 1946, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 5s. a week for each child in a family other than the elder or eldest. The scheme now operates under the Family Allowances Act, 1965, as amended by the Family Allowances and National Insurance Acts, 1967 and 1968. Increases in the allowance took place in 1952, 1956 and 1967 and twice in 1968. From October 8, 1968, under the Family Allowances and National Insurance Act, 1968, the allowance was increased to 18s. for second children and 20s. for subsequent children, and consequential reductions were made in dependency benefit for second and subsequent children under

the National Insurance Acts and the Industrial Injuries Acts.

The Ministry of Social Security Act, 1966, transferred the administration of the family allowances scheme from the Ministry of Pensions and National Insurance to the new Ministry of Social Security (now the Department of Health and Social Security). The allowance is payable (through the Post Office) while a child is of school age or, if handicapped, under 16, and up to 19 if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Social Security Office. Claims are decided by the National Insurance adjudication authorities.

At the end of 1967, allowances were in payment for about 4 million families (comprising about 10½ million children). It is estimated that in the year ended March 31, 1967, over £149 million was paid in allowances (excluding administrative expenses), as compared with £63 million in 1951 and nearly £146 million in 1965-66.

### EARNINGS-RELATED SOCIAL SECURITY PROPOSALS

In two White Papers published in 1969 (Cmd. 3883 and Cmd. 4124) the Government announced proposals for replacing the present national insurance scheme by a new scheme of national superannuation and social insurance under which employees will pay wholly earnings-related contributions and qualify for benefits based upon them. Public comment on the proposals was invited and consultations with interested bodies followed. The Government planned to introduce legislation early in 1970 and to start the new scheme in April, 1972.

The present scheme was considered to have failed to provide adequate pensions and nearly 30 per cent. of all pensioners (about two million out of seven million) are dependent to some extent on supplementary benefit. An objective of the new scheme is that benefits must normally be sufficient to live on without other means.

The new earnings-related contributions payable by men and women employees alike will be a straight percentage of their earnings in each year, up to a maximum of about 1½ times national average earnings. At the start of the scheme and for some years thereafter their total contribution rate will be 6½ per cent. After twenty years of new-scheme contributions, employees reaching pension age will receive earnings-related pensions at the full new-scheme rates, which, for a single person, will be made up of 60 per cent. of earnings up to half national average earnings and 25 per cent. of additional earnings up to the scheme's ceiling. Pensions for those reaching pension age during the 20-year build-up period will be at intermediate rates. These rates, as well as new-scheme rates and present-scheme pensions, will be reviewed every two years to offset rising prices and rising living standards. Earnings-related widowhood benefits based on similar principles are also proposed. Other proposals are for a new earnings-related long-term sickness benefit (invalidity pension) and an attendance allowance for the very severely disabled.

The proposals contemplate that the State scheme will work in partnership with occupational pension schemes which can both complement and supplement the State provision, and that arrangements for partial contracting out of the retirement pension can be devised in discussion with interested parties. Legislation is promised to require occupational schemes to offer to their members the right to have their pension rights preserved on change of employment instead of withdrawing their contributions, if they prefer.

## COMBINED WEEKLY FLAT-RATE CONTRIBUTIONS

Since November 3, 1969, the main combined weekly flat-rate contributions for National Insurance, the National Health Service and, in the case of employed persons, Industrial Injuries Insurance, paid by means of stamps on a single insurance card, have been as follows:—

	Employees contracted out			Employees not contracted out			Self-employed persons	Non-employed persons
	Employee	Employer	Total	Em- ployee	Em- ployer	Total		
Men 18 and over...	<i>s. d.</i> 20 ■	<i>s. d.</i> 19 1	<i>s. d.</i> 39 2	<i>s. d.</i> 17 8	<i>s. d.</i> 16 8	<i>s. d.</i> 34 4	<i>s. d.</i> 24 10	<i>s. d.</i> 19 9
Women 18 and over	16 6	16 0	32 6	15 0	14 6	29 6	■ 8	15 8
Boys under 18.....	} FLAT-RATE CONTRIBUTIONS {			11 5	11 4	22 9	14 0	11 2
Girls under 18.....				9 7	9 6	19 ■	12 0	9 2

All employers now pay with national insurance contributions the Selective Employment Tax (48*s. od.* a week for each man employed, 24*s. od.* for each woman, 24*s. od.* for each boy under 18, and 16*s.* for each girl under 18). Employers of persons aged 18 and over pay a further 1*s. 3d.* for men and 7*d.* for women in the combined contribution as a contribution to the Redundancy Fund under the Redundancy Payments Act. Further details of the various contributions including the special rates for certain employed married women, widows and people over pension age are obtainable at local Social Security Offices.

## Distribution of Combined Weekly Flat-rate Contributions

## GRADUATED NATIONAL INSURANCE CONTRIBUTIONS (see p. 1156)

Employed men and women aged 18 or over who are not in part contracted out of the graduated pension scheme pay in addition to the ordinary flat-rate contribution a weekly graduated contribution (collected in association with P.A.Y.E. income tax). This amounts to approximately 4½ per cent. of that part of their pay between £9 and £18 ■ week plus 3¼ per cent. of pay between £18 and £30 a week, and ranges from 1*d.* a week by employees earning £9 *os. 7d.* a week to 16*s. 4d.* a week by employees earning £30 a week or more. The employer pays the same amount. Contracted-out persons aged 18 or over and their employers each pay about ½ per cent. of earnings between £9 and £18 a week and 3¼ per cent. of earnings between £18 and £30 a week; this ranges from 1*d.* a week each on earnings of £9 *os. 1d.* a week to 8*s. 8d.* ■ week on earnings of £30 a week or over.

Examples of the weekly graduated contributions payable by weekly paid employees are given below:

Total Weekly Pay	If not contracted out	If contracted out	Total Weekly Pay	If not contracted out	If contracted out
£	<i>s. d.</i>	<i>s. d.</i>	£	<i>s. d.</i>	<i>s. d.</i>
10	■ ■	■	■	10 ■	2 7
12	3 ■	5	25	13 5	5 9
15	5 11	■	30 or more	16 4	8 8
18	■ ■	1 1			

Fuller details ■ given in leaflets available at local Social Security Offices.

## Legal Notes

### ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1958. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1958 that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on intestacy occurring, or under any disposition made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and the applicant must be either:—

- (a) Twenty-five years of age or over; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1958) of the infant; or
- (c) the mother or father of the infant.

Two spouses may jointly adopt an infant, but unless one of them is the mother or father of the infant, condition (a) or (b) above must be satisfied in respect of one of the applicants and the other spouse must have attained the age of twenty-one.

Except in relation to an infant who is not a United Kingdom national (where special provisions apply), the consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g., where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1958 Act places restrictions on societies which make arrangements for the adoption of children.

The Adoption Act, 1964, provides for effect to be given to adoption orders made in Northern Ireland, the Isle of Man and the Channel Islands.

The Adoption Act 1968 (which applies to Scotland) enables an adoption order to be made on the application of a person who is either habitually resident in Great Britain or possesses British nationality. The Act also provides for the recognition of certain overseas adoptions.

**Scotland.**—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1958, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1958, which is a consolidating Act, also applies, with modifications, to Scotland, and reference is also made to the Adoption Act, 1960 which amends the law with respect to revocation of adoption orders and to the Adoption Act, 1968 (See above). The Succession (Scotland) Act, 1964, gives the adopted child the same rights of succession as a child born to the adopter in wedlock, but deprives him of any such rights in the estates of his natural parents.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh

respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

### BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail;
2. the occupier of the house in which the birth happened;
3. a person present at the birth; or,
4. the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings. The registration of a birth is free. In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. Under the Public Health Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. This is in addition to the registration already mentioned.

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953.

**Birth at Sea:** The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

**Birth Abroad:** Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at the Registrar General's Office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act, 1957, applicable also to Scotland.

### SCOTLAND

New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act, 1965, which amends and re-enacts provisions in former Acts. Personal notification within 21 days of any birth, must be given to the registrar of (a) the registration district in which the birth took place, or (b) any registration district in which the mother of the child was ordinarily resident at the time of the birth and (c) in the case of a foundling child, dead or alive, when the place of birth is not known, the registration district in which the child, or the body was found. When a child is born (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the child is conveyed therein to any

place in Scotland, the birth shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by the father or mother of the child, and if they fail, by one of the following: (a) any relative of either parent who has knowledge of the birth; (b) the occupier of the premises in which the child was, to the knowledge of that occupier, born; (c) any person present at the birth; (d) any person having charge of the child. Failure without reasonable cause involves a penalty not exceeding £20.

The name of the father of an illegitimate child may be entered in the register of births at the time of registration if jointly requested by the mother and father, and the latter's name may also be recorded at a later date on declarations by both parents. A free abbreviated certificate of birth will be issued to the informant at the time of registration. Provision is made for the re-registration of the birth of a person made legitimate by the subsequent marriage of the parents or whose birth entry is affected by any matter respecting status, paternity, or has been so made as to imply that he is founding.

A still-birth must be registered and a certificate, signed by the doctor or certified midwife present at the birth or who has examined the body of the child, must be produced.

## CERTIFICATES

### OF BIRTHS, MARRIAGES, ■ DEATHS

*England and Wales.*—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 8s. (When application is made by post the charges are 13s.) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which ■ certificate is required. Certificates of marriages can also be obtained from the incumbent of the church in which the marriage took place (the customary fee being 3s. 9d.); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, ■ modified form of birth certificate, showing the names, sex and date of birth and certain other particulars, but not the parentage, may be obtained from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of ■ fee of 3s. and on furnishing certain particulars.

*English Registers.*—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House, W.C.2. *The Society of Genealogists*, 37 Harrington Gardens, S.W.7, possesses many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part, of about 4,000 Parish Registers.

*Scottish Registers of Births, Deaths and Marriages.*—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained personally at the General Register Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of 8s. for a full extract entry of birth, death or marriage, and 3s. for a short certificate of birth. When the period searched is over 20 years additional fees are payable. A short certificate of registration of deaths is issued

free of charge for National Insurance purposes in certain cases.

There are also available at the General Registry Office old parish registers of date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of 10s. A fee of 30s. is payable for ■ general search of all the Scottish registers.

## BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

*General.*—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Pakistan, Ghana, Malaysia, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho and Barbados (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Aliens Acts, 1914-1943, though these Acts did not affect the status of any person born before Jan. 1, 1915.

*Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).*

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be ■ British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds ■ British passport issued in the United Kingdom or ■ any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

### *Citizenship of the United Kingdom and Colonies.*

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. Birth on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

(a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;

(b) children born to fathers who are enemy aliens in enemy occupied territory.

2. *Descent*, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:—

(a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or

(b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or

(c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or

(d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. *Registration by the Home Secretary upon application by:—*

(a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period so ending as the Home Secretary may in the special circumstances of any particular case accept; or, in certain circumstances, if he is serving under an international organization of which the United Kingdom Government is a member, or is in the employment of a body established in the United Kingdom;

(b) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

A person in respect of whom a recommendation for deportation or a deportation order is in force under the Commonwealth Immigrants Act, 1962, is not entitled to be registered, although the Home Secretary may register such a person.

4. *Naturalization*.—In order to be eligible for a certificate of naturalization an alien must:—

(a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and

(b) be of good character and have a sufficient knowledge of the English language; and

(c) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of

his application, or such shorter period as the Home Secretary may in a particular case accept.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

(i) (a) he would, if born after that date, have qualified for citizenship by birth; or

(b) he is a person naturalized in the United Kingdom and Colonies; or

(c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or

(ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or

(iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or

(iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or

(v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1958, an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

*Citizenship of the United Kingdom and Colonies can be lost:—*

(i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war. Under the British Nationality Act, 1964, a person who has ceased to be a citizen of the United Kingdom and Colonies as a result of a declaration of renunciation is entitled to registration as a citizen of the United Kingdom and Colonies if he can satisfy the Home Secretary on a number of matters;

(ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;

(iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:—

(a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or

- (b) in time of war, traded with the enemy; or
- (c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months' imprisonment; or
- (d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.
- (v) Under a series of Acts, 1958-1968, which contain special provisions relating to Ghana, Cyprus, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, South Africa, Malaysia, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho, Barbados, Aden, Perim and Kuria Muria Islands, Mauritius and Swaziland.

**STATUS ■ ALIENS.**—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or be a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference in the Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

### CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the plaintiff at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (a) No action lies in tort against the Crown in the individual Crown servant for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered inland postal packet (in which case the action must be brought within one year of posting), not being a telegram. (b) The Crown and any member of the armed forces are immune from liability in tort in respect of death of, or personal injury to, another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

*Scotland.*—The Act extends to Scotland and has the effect of bringing the practice of the two countries closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were

fined to the Court of Session, proceedings may be brought in the Sheriff Court.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. Section 2(1) of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1966, removes the privilege whereby the wages of Crown servants, other than serving members of the armed forces, are exempt from assessment in execution.

### DEATHS, BURIAL AND CREMATION DEATHS

(For Certificates, see under BIRTHS)

*In England and Wales.*—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge. After twelve months no death can be registered without the Registrar General's consent.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1926, s. 1*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child. (See under Births (Registration), p. 1161).

*Death at Sea.*—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

*Death Abroad.*—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act, 1957.

**Deaths (Registration) in Scotland.**—New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act 1965 which amends and re-enacts provisions in former acts.

Personal notification within ■ days must be given to the registrar of (a) the registration district in which the death took place or (b) any registration district in which the deceased was ordinarily resident immediately before his death, and (c) when a body is found and the place of death is not known, either the registration district in which the body was found or any other registration district appropriate by virtue of the preceding paragraph. When ■ person dies (in or out of Scotland) in a ship, aircraft or land vehicle during ■ journey and the body is conveyed therein to any place in Scotland the death shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by one of the following: (a) any relative of the deceased; (b) any person present at the death; (c) the deceased's executor or other legal representative; (d) the occupier, at the time of the death, of the premises where the death took place; (e) if these fail, any other person having knowledge of the particulars to be registered. Failure to comply involves ■ penalty not exceeding £20.

The medical practitioner who attended the deceased during his last illness must sign a certificate of the cause of death. If there is no such medical practitioner, any medical practitioner who is able to do so, may sign the certificate. At the time of registering the death the registrar shall, without charge, give the informant ■ certificate of registration, and the person to whom the certificate is given must hand it to the undertaker previous to interment or cremation.

#### BURIAL

The duty of burial is incumbent ■ the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of ■ child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or ■ private company, and burials will take place there in accordance with the regulations. For an exclusive right to ■ burial space in the churchyard ■ faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, see above.

#### CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect.

Cremation may not take place if the deceased has prohibited that form of disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016), as amended by the Cremation Regulations 1965 (No 1146).

#### DIVORCE, ETC.

(The notes which follow must be read subject to the provisions of the Divorce Reform Act, which will probably come into operation on Jan. 1, 1971. This Act makes sweeping changes in the law of divorce, making the irrevocable breakdown of marriage the sole ground for divorce instead of the concept of a matrimonial offence.)

**Preliminary.**—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage ■ sought to be upheld; and (3) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it. By virtue of the Matrimonial Causes Act, 1967, all matrimonial causes are now commenced in one of the divorce county courts designated by the Lord Chancellor. If they remain undefended, they are tried by a county court judge in one of these courts which has also been designated as a court of trial, or in the Royal Courts of Justice in London. If the suit becomes defended, it must be transferred to the High Court.

(1) **Nullity of Marriage.**—Marriage ■ void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of the parties, if one of the parties was insane, or if one of the parties was under the age of consent, i.e., 16—Marriage Act, 1949. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1965, which in this context has no application to Scotland, a marriage is also voidable (i.e., ■ decree of nullity may be obtained) on the following grounds—(a) respondent's wilful refusal to consummate the marriage; (b) that either party at the time of marriage was ■ mentally disordered person or subject to recurrent attacks of insanity or epilepsy; (c) that at the time of marriage the respondent was suffering from communicable venereal disease; (d) that at the time of the marriage the respondent was pregnant by another man. In cases, (b), (c) and (d), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within ■ year of the marriage.

By the Matrimonial Causes Act, 1965, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that ■ decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled. Further, even if ■ marriage is void, a child of such ■ union can sometimes be treated as

legitimate if at the time of conception or of the marriage (if later) either or both of the parties reasonably believed that the marriage was valid (Legitimacy Act, 1959).

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (a) above, even though there has been no normal intercourse, but it may in certain circumstances enable a petition for Divorce to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a defence to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in the circumstances of the particular cases, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights*.—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce*.—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (2) above.

*Divorce*.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1965, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct which the sufferer should not be expected to endure, continued until health breaks down or is likely to break down constitutes legal cruelty, without proof of any intention to injure, so that the respondent's insanity is not necessarily a defence to a charge of cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties agree to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in divorce proceedings as judgment against the respondent by default.) Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) condonation of the respondent's adultery or cruelty,

i.e., complete forgiveness which restores the *status quo* (although condoned cruelty may be revived by later misconduct). Adultery or cruelty is not to be treated as condoned by reason only of a resumption of co-habitation for one period not exceeding three months if it took place with a view to reconciliation (Matrimonial Causes Act, 1965, s. 42(2)). There is a similar provision in relation to the continuance of desertion. There are also certain discretionary bars, as e.g. where there is collusion i.e. a bargain concerning the commencement or conduct of the suit; or where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1965 Act s. 5.)

*Intervention by Queen's Proctor*.—At any time during the progress of a suit, and before the decree nisi is made absolute, the Queen's Proctor may intervene.

*Decree Absolute*.—Every decree of dissolution or nullity is in the first instance a decree nisi. The marriage subsists until the decree is made absolute, usually three months after decree nisi. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, p. 1176. By section 33 a decree nisi cannot be made absolute until the court is satisfied that arrangements have been made for the care and upbringing of every child of the family who has not attained the age of sixteen which are satisfactory or the best which can be devised in the circumstances or that it is impracticable for the parties before the court to make any such arrangements.

*Maintenance, etc.*—The court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1965, the court may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the court may also deal with custody of and access to the children.

#### CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, whether the suit succeeds or is dismissed, the court can make orders as to the custody of and access to the children and as to their upkeep and education, and these orders can be made not only in respect of children of the marriage but also in respect of a child of one party who has been accepted as one of the family by the other party. A guilty spouse will normally be entitled to reasonable access to the children and may even be awarded the custody if the court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child will not thereby be deprived of his other rights as the child's guardian unless the court expressly so orders.

#### SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

#### MAGISTRATES' SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or has been convicted of certain assaults or has deserted

his wife, or has been guilty of persistent cruelty to her or to ■ infant child of the family, or of wilful neglect to maintain her or such a child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on similar grounds, so far as they are applicable to him. In particular ■ wife can sometimes be guilty of the offence of wilful neglect to provide reasonable maintenance for her husband or children and an order can be made against her (there is no such remedy in the High Court or county court). The court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum in its discretion to the wife and may order her to make a similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or both of the spouses of ■ weekly sum to the person entrusted with legal custody in respect of each child of the family up to the age of 16. If the court thinks the child would still be ■ dependant although over that age, similar payments may be ordered for support of the child up to the age of 21. The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct conducted to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wilful neglect or misconduct conducted to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

### SCOTLAND DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are grounds for divorce:—

1. *Adultery*.—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts ■ be established which give rise to ■ inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded, but the adultery shall

not be held to have been condoned if co-habitation was continued or resumed with a view to effecting a reconciliation, for any one period not exceeding three months; Divorce (Scotland) Act, 1964.

2. *Desertion*.—The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years, but in calculating the period no account is taken of any one period not exceeding three months during which the parties resumed co-habitation with a view to reconciliation. It must be shown that the desertion was without reasonable cause, and it is ■ defence to an action on this ground that during that period the pursuer has refused a genuine and reasonable offer by the defender to adhere; Divorce (Scotland) Act, 1964. Refusal by one spouse to have marital relations with the other for any period of three years without any overt act of desertion does not constitute desertion. Here also, collusion is fatal to the success of the action.

3. *Incurable Insanity*.—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. *Cruelty*.—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses. The fraudulent activity of one spouse involving the other may amount to cruelty. There must be no condonation but, as in the case of ■ action on the ground of adultery, the Divorce (Scotland) Act, 1964 provides a reconciliation period not exceeding three months.

5. *Unnatural Sexual Offences*.—An extract of the criminal conviction is sufficient proof.

*Maintenance etc.* Under the Succession (Scotland) Act, 1964, legal rights are not exigible on divorce ■ was formerly the case. The Act gives the Court power to order the guilty spouse to pay either ■ capital sum or ■ periodic allowance or both.

A husband, being liable for his wife's debts, may be ordered to pay her costs, even though he has successfully defended the action. A guilty co-respondent, if named ■ ■ defender, may be required to pay costs and damages.

*Nullity of Marriage*.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

### SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (a) adultery, (b) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for ailment.

### CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

### HIRE-PURCHASE ENGLAND AND WALES

Protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act, 1965, which applies to hire-purchase agreements under which the

hire-purchase price, *i.e.*, the total sum payable by the hirer to complete the purchase of the goods, does not exceed £2,000. The Act also provides that where the hirer is a body corporate, the Act is not to apply at all.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and the agreement must be in writing signed by the hirer himself and by or on behalf of the owner and any guarantor. The agreement must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*). If the agreement is complete as soon as the hirer signs it he must be given a copy there and then; in all other cases he must be given one copy when he signs and another within seven days of the completion of the agreement. There are also Board of Trade regulations dealing with such matters as the size of the print. In breach of any of these conditions the owner can neither recover the goods from the hirer nor enforce the agreement or any security given, although the Court can dispense with any of the conditions save that as to the signed agreement. The same result ensues (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 2s. 6d. for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he remains liable for any instalments already due, he will be under no further obligation under the agreement. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due he must pay the difference to the owner unless the court considers that a lesser sum is sufficient to compensate the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

An important new provision in the Act gives the hirer the right to cancel the agreement and recover all sums paid if he signed it at a place other than trade premises. This right (which was designed to cover the activities of door-step salesmen) must be exercised within 4 days of receiving the second copy.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

The Trade Descriptions Act, 1968, further protects the consumer by making it a criminal offence for traders falsely to describe or advertise the quantity or price of goods or services; prosecutions are brought by Inspectors of Weights and Measures. The Act provides no civil remedies.

#### SCOTLAND

Formerly the provisions governing hire-purchase in Scotland were very different from England, but

a change was made by the Hire Purchase Act, 1964, which in effect extended to Scotland the English code. Now, the Hire Purchase (Scotland) Act, 1965, provides a Scots code corresponding to, but not identical with, the English enactments found in the Hire Purchase Act, 1965, referred to above.

#### ILLEGITIMACY AND LEGITIMATION ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Supplementary Benefits Commission where the child becomes chargeable to the local authority, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum in their discretion. The evidence of the woman must be corroborated in a material particular. The mother has the custody of her bastard children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence. When the Family Law Reform Act comes into force, presumption of law as to the legitimacy (or illegitimacy) of any person will in civil proceedings be rebuttable by evidence showing that it is more probable than not that the person is illegitimate (or legitimate). If however the husband and wife are separated under an Order of the Court, a child conceived by the wife during such separation is presumed not to be the husband's child.

**LEGITIMATION.**—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Under the Act of 1959, marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimated child.

**Declarations of Legitimacy.**—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

**Rights and Duties of Legitimated Persons.**—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (*e.g.*, a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

#### SCOTLAND

**Illegitimate Children (Scotland) Act, 1930.**—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstance of the case. The Court may, upon application by the mother or by the

father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by and on the date of the subsequent marriage of its parents and there is now no objection to there having been an impediment to the marriage of the parents at the time of the child's conception—see the Legitimation (Scotland) Act, 1968, which came into operation on June 8, 1968, on which date thousands of existing illegitimate children were regarded as legitimated. By the Registration of Births, Deaths and Marriages (Scotland) Act, 1965, a child so legitimated, who has already been registered as illegitimate, may be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

The Law Reform (Miscellaneous Provisions) (Scotland) Act, 1968, gives illegitimate child full rights of succession (including legitim, see next section) in the estate of both parents, while the father and mother share equally in the estate of their illegitimate child. Unless expressly excluded, a reference in a deed to ■ relationship, e.g. "issue" or "children", is presumed to include illegitimate children.

## INTESTACY ENGLAND AND WALES

As regards deaths on or after January 1, 1967, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952, and the Family Provision Act, 1966. The 1952 and 1966 Acts increased the benefits of a surviving spouse of an intestate, and the 1952 Act extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1966 Act, so that if the death occurred before 1967 reference must be made elsewhere. If the intestate leaves ■ spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £8,750 with interest at 4 per cent. from death until payment; and (iii) ■ life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £30,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves ■ spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases,

leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £8,750 or £30,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one (this age will be reduced to eighteen when the Family Law Reform Act has effect) or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one (eighteen) or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

For further details, see Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952, and the Family Provision Act, 1966.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child, but these provisions will be repealed by the Family Law Reform Act, under which an illegitimate child can take in intestacy.

## SCOTLAND

The Succession (Scotland) Act, 1964, provides that the whole estate of any person dying intestate after the commencement of the Act shall devolve without distinction between heritable and moveable property, besides altering the law of succession in other respects. By that Act the surviving spouse of an intestate may, as a prior right (in addition to legal rights, see below), claim the matrimonial home (or in certain circumstances the value thereof), with its furniture and plenishings not exceeding £5,000 in value, plus the sum of £2,500 if the deceased left issue or, if no issue, the sum of £5,000.

The Act has been modified by the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1968, as to the status of illegitimate children (see preceding section). The succession rights of an illegitimate child are however confined to the estate of his parents. He cannot claim from the estate of a grandparent, either legitim or ■ share in intestacy, even though such would have fallen to his pre-deceasing parent.

Legal rights, referred to above, are:—

*Jus relicti*: right of surviving husband to one-half or one-third of deceased's net moveable estate, after satisfaction of prior rights.

*Jus relictae*: the corresponding right of a surviving wife in her deceased husband's estate.

*Legitim*: right of surviving children to one-half or one-third of the net moveable estate of deceased parents after satisfaction of prior rights—see p. 1179. There are no legal rights in heritage.

In general, the lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals, and so on in the ascending scale, but the Act of 1964 has made important modifications. The right of representation, i.e., the right of the issue of a person, who would have succeeded if he had survived the intestate, is open to any line of succession where previously it was limited to apply only when there were next of kin or the issue of predeceasing next of kin. The surviving mother of an intestate now has equal rights of succession with the surviving father, where formerly these were restricted. The intestate's maternal relations, who prior to the Act had no rights of succession, are now on an equal footing with his paternal relations. A surviving spouse, if there are no children, succeeds to the whole estate. Where the intestate is survived only by parents, and by brothers and sisters (collaterals) half of the estate is taken by the parents and the other half by the brothers and sisters, those of the whole blood being preferred to those of the half blood; where, however, succession opens to collaterals—which expression can include the brothers and sisters of an ancestor of the intestate—of the half blood, they shall rank equally amongst themselves, whether related to the intestate (or his ancestor) through their father or their mother.

### JURY SERVICE

Liability to Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters' Qualifications"). The names of all persons who are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although qualified to serve [see below] he is exempt from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

### QUALIFICATIONS

*England and Wales*.—Every man and woman of full age [persons over 60 are exempt but not disqualified] residing in England or Wales being the owner, legally or under trust, of freehold land worth £10 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 21 years) in the county in which they live; or being householders rated in respect of premises of a net annual value of at least £20 (or in London or Middlesex £30); is qualified and liable to serve on juries in the superior courts (civil and criminal) and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1954, a person attending for jury service is entitled to be paid travelling and subsistence allowances

together with compensation for loss of earnings and other loss of expenses. See Jurors' Allowances Regulations, 1967.

*Disqualifications*.—The disqualification of ex-prisoners is dealt with by section 74 of the Criminal Justice Act, 1967.

*Exemptions*.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; keepers of public mental hospitals; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists, registered practising dentists, registered practising veterinary surgeons; midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strond; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament.

As to their own counties: members of the G.L.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s, town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions are exempt from serving on the County Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

Section 13 of the Criminal Justice Act, 1967, provides that the verdict of a jury in criminal proceedings need not be unanimous.

### JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949 (amended by the Juries Act, 1954 with Regulations following thereon), applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, recently increased.

The number of a jury in a civil cause in the Court of Session is twelve. In a criminal trial the number is fifteen, and in inquiries by Sheriff and jury under the Fatal Accidents Inquiry (Scotland) Act, 1895, or the Fatal Accidents and Sudden Deaths Inquiry (Scotland) Act, 1906 the number is five. In Scotland there is no Coroner's Inquest.

### QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

*Exemptions*.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers,

messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

## LANDLORD AND TENANT

### ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the law on this subject is complicated by the mass of legislation thereon. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important provisions include:—

(1) As to agricultural holdings—the Agricultural Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Acts, 1927 and 1954, which do not extend to Scotland. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to unfurnished dwelling houses—the complicated mass of legislation now embodied in the Rent Act, 1968, which does not extend to Scotland or Northern Ireland. If a house is within this Act, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Act has a rent limit, and the rent recoverable by the landlord is limited to this rent.

Houses let at a rent which includes board or substantial attendance or furniture are also governed by the Rent Act, 1968.

The Rent Act, 1957, made considerable inroads into the importance of rent control by removing many houses from control altogether and fixing new maximum rent limits for all houses which remain subject to control. The principal changes effected by this Act were:

1. Any house whose rateable value on November 7, 1956, exceeded £40 in London and elsewhere £30, was automatically decontrolled.

2. No tenancies beginning on or after July 6, 1957, were subject to control unless the person to whom the tenancy was granted was already a protected tenant of that house.

3. For all houses remaining subject to control the maximum rent was determined by reference to the gross value shown in the rating valuation list on November 7, 1956.

Important changes were made by the Rent Act, 1965, without immediately affecting the system of control and determination of rents of property let before July 6, 1957, within the £40/30 limits of rateable value on the 1956 rating lists. If a tenancy of a dwelling-house was not already subject to Rent Act control immediately before 8 December 1965, the 1965 Act brought that tenancy within the Rent Acts provided the rateable value in March, 1965, did not exceed £400 in London and £200 elsewhere in Great Britain. Such a tenancy is known as a regulated tenancy. Broadly, the maximum rent recoverable from the tenant under such a tenancy is the rent payable under the

terms of the agreement between landlord and tenant, save that if within the previous three years the house has been the subject of another regulated tenancy, then the limit is the rent payable under that earlier tenancy. However, provision is made by the Act for the registration of rents, and if a rent is registered under the Act that is the maximum rent which can be recovered. The Act provides for the appointment of rent officers and rent assessment committees to determine a fair rent to be registered.

The Act also provides that if any person with intent to cause the residential occupier of any premises to give up the occupation thereof does any act calculated to interfere with the peace or comfort of the residential occupier or members of his household, he shall be guilty of an offence. A further provision prevents a landlord enforcing a right to possession against a tenant (who is not already protected by any security of tenure legislation) without a court order, and there are special rules in such cases relating to agricultural employees.

(4) Part I of the Landlord and Tenant Act, 1954, applies to most tenancies of houses for over twenty-one years at a ground rent. Where it applies, the contractual tenancy is continued until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on limited grounds.

Further, under the Leasehold Reform Act, 1967, tenants of houses under leases for over twenty-one years at a rent less than two-thirds of the rateable value of the house are in most cases given a right to purchase the freehold or to take an extended lease for a term of fifty years, provided the tenant at the time when he seeks to exercise the right has been occupying the house as his residence for the last five years or for periods amounting to five years in the last ten years.

(5) A notice to quit any dwellinghouse must be given at least four weeks before it is to take effect.

(6) Under the Housing Act, 1961 (which does not extend to Scotland), in a lease of a dwelling-house granted after October 24, 1961, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

### SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed: (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949 (amended by the Agriculture Act, 1958), which is a consolidating Act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Acts, 1949 and 1964 give a measure of security to tenants of shops. These Acts enable the tenant of a shop who is threatened with eviction to apply to the Sheriff for ■ renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for ■ renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the 1949 Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Acts apply to premises held by the Crown or Government Departments, either ■ landlord or tenant.

The series of complicated statutes known as The Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, largely govern the relations between landlord and tenant in regard to certain unfurnished houses—including parts thereof if let as separate dwellings—and it is important to note that notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. The Housing (Repairs and Rents) (Scotland) Act, 1954, provides for increase in rent of a controlled dwelling house on which repairs of a certain value have been carried out. The Rent of Furnished Houses Control (Scotland) Act, 1943 contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. These Acts were subsequently altered or modified by the Rent Act, 1957. Under it (1) Dwelling houses, the rateable value of which was on November 7, 1956, over £40, were released from control. (2) All tenancies coming into operation on or after July 6, 1957, were free from control, except where a new tenancy was granted to a statutory tenant already in occupation. (3) Provision was made for the increase of rent by a maximum of one quarter of all controlled houses. (4) The repairs increase of two-fifths provided for in the 1954 Act was increased to one-half.

However, the main provisions of the Rent Act, 1965 (see above) apply to Scotland and substantially extend the application of the Rent Acts.

The Rent Act, 1957, further provides that a notice to quit a dwelling house (furnished or unfurnished) must be sent at least four weeks before the date on which it is to take effect.

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

## LEGAL AID

### LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid and Advice Act, 1949, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself and the Regulations made thereunder but the administrative details are embodied in ■ scheme made by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, certain local courts, and civil proceedings in Magistrates Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of

defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons.

Eligibility for legal aid in civil proceedings depends upon an applicant's "disposable income" and "disposable capital." Legal aid cannot be granted if the former exceeds £700 per annum, and a person may be refused assistance if he has 1 disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to one third the excess of his disposable income above £250, together with the whole excess of his disposable capital above £125. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in cases where the spouses are living apart, or have ■ contrary interest, any resources of ■ person's wife or husband are to be treated as that person's resources. These figures will be assessed by the Ministry of Social Security, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of ■ certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. However, if the application is made in respect of proceedings in an *appellate* court and the applicant is resident in England or Wales, application should generally be made to any Area Committee—if resident elsewhere, to the Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. The costs of the assisted person's solicitor and counsel will be paid out of the legal aid fund. Under the Legal Aid Act, 1964, the court may order that the costs of ■ successful unassisted party shall be paid out of the legal aid fund.

### LEGAL ADVICE

Legal advice from a solicitor on the Legal Aid Panel is now available to anyone over the age of sixteen. Persons on Supplementary Benefits can get it free of charge, whilst those whose means are within the limits set out below can get it for 2s. 6d. An application form should be obtained from a Citizens' Advice Bureau, Court Office or from one of the Law Society's Legal Aid Offices, or from a solicitor whose name is on the panel, and, after completing the form, it should be taken to ■ solicitor on the panel and an interview requested. A person is entitled to advice on any one legal question only from one solicitor; and for not more than one hour and thirty minutes, but application for further advice may be made to the Area Committee. Lists of solicitors concerned may be consulted at the places mentioned above.

Legal advice is available for 2s. 6d. to a person whose capital is £125 or less and whose income has not been more than £7 10s. during the seven days up to and including the day of application for legal advice. Capital and income of husband and wife must be added together for this purpose, unless they are living apart or the applicant seeks advice on a matter in which the spouse has a contrary interest.

In working out capital, the value of the applicant's house, its contents and the value of clothing and tools can be ignored. In working out income, a deduction of £2 5s. may be made for a spouse living with or maintained by the applicant, of £1 7s. for each child maintained by the applicant, and of £2 5s. for any other adult person maintained by the applicant. There may also be deducted any income tax and any National Insurance, Industrial Injuries or National Health contributions paid by the applicant during the week immediately before the date of obtaining legal advice.

Quite apart from the above statutory scheme for legal advice, there exists a voluntary scheme under which any person may apply to a solicitor who is on the panel for advice for a fee of £1 for up to thirty minutes. If the matter cannot be disposed of in thirty minutes, the solicitor should give an estimate of the approximate cost of any further advice or steps which may be necessary.

It should be mentioned that under both schemes a solicitor, even though he is on the panel, is entitled to decline to give advice to the applicant without giving any reason to the applicant.

#### OTHER LEGAL AID

Neither of the advice schemes covers further action such as writing letters. If however a person wants something more than advice but something less than proceedings, he may obtain a certificate to take steps to assert or dispute a claim where the question of proceedings has not yet arisen, but if it did arise legal aid could be granted for those proceedings. This type of legal aid could cover writing letters, obtaining evidence, and negotiating settlements. The certificate limits the amount to be spent under it, and does not cover any step in proceedings, nor can counsel be instructed. It is available to a person whose disposable capital does not exceed £125 and who was either receiving supplementary benefits under the Ministry of Social Security Act, 1966 or has a disposable income not exceeding £325 per annum. In assessing disposable capital deductions are made in respect of dependants, and further deductions for them are made in assessing disposable income. Where the applicant's disposable income exceeds £253 he must pay a contribution of up to £1 for each £3 above £250.

#### LEGAL AID IN CRIMINAL CASES

The Criminal Justice Act, 1967, Part IV provides for legal aid in criminal proceedings. A criminal court (e.g., magistrates' court, Assizes, Quarter Sessions) has power to order legal aid to be granted where it appears desirable to do so in the interests of justice. The court shall make an order in certain cases, e.g., where a person is committed for trial on a charge of murder. However, the court may not make an order unless it appears to the court that the person's means are such that he requires assistance in meeting the costs of the particular proceedings in question. Application should be made to the appropriate court where proceedings are to take place.

An applicant may be required to make a contribution towards the costs of the action. In order to ascertain the amount of this contribution he will have to produce written evidence of his means. Any assessment of means will be carried out by the Supplementary Benefits Commission, which will report to the court. No contribution will be required from a person who has insufficient means.

Any practising barrister or solicitor may act for a legally aided person in criminal proceedings unless excluded by reason of misconduct. In general where legal aid is given it will normally include representation by both counsel and solicitor. However, in connection with magistrates' courts,

representation will be by solicitor alone unless it is a serious offence.

Where any doubt arises about the grant of a legal aid order that doubt is to be resolved in favour of the applicant. The court also has power to amend or revoke a legal aid order. Legal aid may also be granted in connection with appellate proceedings, e.g., on appeal to the Criminal Division of the Court of Appeal under the Criminal Appeal Act, 1968.

#### SCOTLAND

##### Civil Proceedings

The Legal Aid and Solicitors (Scotland) Acts, 1949 and 1960 provide a scheme which is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Representation of the People Act, 1949), and small debt proceedings (i.e., under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the Supplementary Benefits Commission after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action. The Legal Aid Act, 1964, which applies to Scotland with certain modifications, provides for the payment (to a limited extent) out of the legal aid fund of costs incurred by successful opponents of legally aided litigants.

##### LEGAL ADVICE

Since March, 1959, legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England. Application forms are available in the offices of all Legal Aid Committees and Citizens' Advice Bureaux.

##### Criminal Proceedings

Legal Aid (Scotland) (Criminal Proceedings) Regulations, 1964, which came into operation in October 1964, provide for the administration of criminal legal aid.

#### MARRIAGE

##### A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the

parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. MARRIAGE BY LICENCE.—Marriage licences are of two kinds:—

(i) A Common Licence, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (x The Sanctuary, Westminster, S.W.x) and (for marriages in London) at the Bishop of London's Diocesan Registry (x The Sanctuary, S.W.x), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (see below) is £2 15s.] No previous notice is required and the licence is available as soon as it is issued. Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

(ii) A Special Licence granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be per-

formed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman be invited to perform the service.

#### B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (e.g., a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be without licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (without licence)—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
- (ii) Marriage by certificate (with licence)—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (see below) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

#### ISSUE OF CERTIFICATE:

- (i) Without licence.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's

office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place ■ any time within three months from the date of the entry of the notice.

- (ii) *With licence.*—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than ■ Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

#### SOLEMNIZATION OF THE MARRIAGE:

- (i) *In ■ Registered Building.*—The marriage must generally take place at ■ building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties ■ registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage may be solemnized between the hours of ■ a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

- (ii) *In a Register Office.*—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and ■ Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that ■ know not of any lawful impediment why I, A. B., may not be joined in matrimony to

C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Register Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

- (iii) *Other Cases.*—If both parties are members of the Society of Friends (Quakers), ■ if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in ■ Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of ■ Registrar of Marriages is not necessary.

■ both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the ■ is a member. The presence of ■ Registrar of Marriages is not necessary.

#### FEES OF SUPERINTENDENT REGISTRARS.

	s.	d.
For entering notice of ■ marriage by certificate (with or without licence) in the marriage notice book.....	15	0
For a licence for marriage.....	40	5
For ■ marriage by certificate (without licence) in the presence of a Registrar....	20	0
For a marriage by certificate (with licence) in the presence of ■ Registrar.....	20	0

#### MISCELLANEOUS NOTES

*Consanguinity and Affinity.*—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

*Minors.*—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and 2nd Schedule). This age will be reduced to 20 when the Family Law Reform Act comes into force. Where both parents are living, both must consent, where one is dead, the survivor, or, if there is ■ guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of ■ parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or ■ Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

### C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

### MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

*Impediments to marriage:* These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, *i.e.*, if the legal requirement of prior residence of either of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

#### *Regular Marriages.*

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the proclamation of banns or publication by the Registrar, or by a Sheriff's licence. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must either have his or her usual residence in the Registration District, or have resided there for at least 15 days before the ceremony or have a parent so residing there. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns, or (b) notice by the Registrar. Banns must be proclaimed in a parish church situated within the registration district of the qualifying address of each party. It is ordered that the proclamation of banns should be made twice, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 7s. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1898, amended by the Marriage (Scotland) Act, 1956, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons with qualifying residence in Scotland or having parents so residing. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate. Such certificate of publication is only valid

for three months. Regulations made under the Births, Deaths and Marriages (Scotland) Act, 1965 provide that the cost of publication is 5s. and the certificate 2s. The Naval Marriages Act, 1908, regulates the publication of banns or of notice on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. The fee for the ceremony is £1. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal method of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence (valid for ten days) which is otherwise deemed in all respects to be equivalent to a certificate of publication.

#### *Irregular Marriages*

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, *viz.* marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

### MASTER AND SERVANT WAGES AND HOLIDAYS

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to manual workers, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, *e.g.*, by cheque, money order, postal order or into a banking account. The Truck Acts did not relate to the amount of wage to be paid to the employee, but to-day minimum wage rates for particular trades are prescribed by numerous statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and if the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

#### RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In Scotland, in England, inability to produce receipts does not necessarily bar defence to an action for payment.

### TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1962, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952. But under the provisions of the Land Commission Act, 1967 (which applies to Scotland), a betterment levy is payable where the development value of land is realized after April 5, 1967.

#### What is Development?—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

#### Examples of what is not deemed Development?—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

**Planning Permission.**—Application for such permission is not always necessary, the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1963 specified a number of types of development for which no permission is required e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal of permission lies to the Minister, and from the Minister, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

**Enforcement Notice.**—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement notice lies to the Minister. See also the Act of 1968.

#### Scotland.

In Scotland special provisions, in similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of com-

penation. See also the Town and Country Planning (Scotland) Act, 1959. The Highlands and Islands Development (Scotland) Act, 1965 is concerned with the promotion of the economic and social development of parts of Scotland.

### VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which is the Act of 1969. Those entitled to vote as electors at a parliamentary election in any constituency were formerly those resident there on the qualifying date who, at that date and on the date of the poll, were British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency was a prerequisite. However, by virtue of the 1969 Act, with respect to the register of electors to be published in 1970 and the elections for which those registers are used, a person will be of voting age if he is at least eighteen. Further, in relation to such registers and elections, a person who is of voting age on the date of the poll at a parliamentary or local government election will be entitled to vote, whether or not he is of voting age on the qualifying date. Accordingly, a qualified person will be entitled to be registered in a register of parliamentary electors or a register of local government electors if he will attain voting age within twelve months from the date on which the register is required to be published. Since the Electoral Registers Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," (and persons employed by the British Council in posts outside the United Kingdom), who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g., those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters", and Section 3 of the 1969 Act deals specifically with merchant seamen. Section 5 extends to certain married persons the right to vote by proxy or by post.

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, i.e., occupation as

tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

## WILLS

**IMPORTANT NOTE.**—The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939. This Act empowers the Court to order maintenance out of the testator's estate for the benefit of certain "dependants," i.e., a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of "son" or "daughter" under the Act. For further details as to the limits of an order, the Act, as amended by the Family Provision Act, 1966, should be consulted. (see also the Family Law Reform Act.)

Since the object of the Act is to provide maintenance for dependants, application is not likely to be successful where the estate is very small, e.g. two or three hundred pounds.

There are similar provisions under the Matrimonial Causes Act, 1965, whereby the court may order provision out of a deceased's estate for the support of a former husband or wife where the marriage has been dissolved or annulled.

**REASONS FOR MAKING A WILL.**—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will may be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument,

and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of codicils should be left to the lawyer. A will should be written in ink and very legibly, on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1970] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

William Jones (signed) of Green Gables, South Street, Reading, tailor.

Henry Morgan (signed) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause a of the following clauses:—

2. I give to — of — the sum of £— and to — of — the sum of £— and to — of — all my books (or as the case may require).

3. All the residue of my property real and personal I give to — of —.

**TERMS.**—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving particular property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

**RESIDUARY LEGATEES.**—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

**EXECUTION OF A WILL, AND WITNESSES.**—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the

gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

**EXECUTORS.**—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

**LAPSED LEGACIES.**—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residuum. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

**TESTAMENTARY CAPACITY.**—A minor cannot make a will except, in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property if she were a man.

**REVOCATION.**—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation) or by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise destroying the will with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in

contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

#### PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made in person at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

It is also possible to make application for a grant of probate or letters of administration through an officer of Customs and Excise authorised for the purpose, provided the net value of the estate is less than £1,000 and that the gross value for estate duty purposes is less than £3,000.

Further, certain property can be disposed of on death without a grant of probate or administration, or in pursuance of a nomination made by the deceased, provided the amount involved does not exceed £500. See the Administration of Estates (Small Payments) Act, 1965.

#### WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

#### SCOTS LAW AND WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate. The remaining portion is known as the *dead's part*. A surviving husband and children have comparable rights (*jus relicti* and *legitim*) in the wife's estate. It should be noted that the amount of any claim of *jus relicti*, *jus relictae* or *legitim* out of an estate shall be calculated by reference to so much of the net moveable estate as remains after the satisfaction of any prior claims under the Succession (Scotland) Act, 1964,—see *Illegitimacy*, Scotland and In-

testacy, Scotland, *supra*. The *dead's part* is the only portion of which the testator can freely dispose. All burdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Formerly a minor could dispose only of moveables but since the passing of the Succession (Scotland) Act, 1964 he has a like capacity to test on heritable property. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 pounds Scots (£8 6s. 8d. sterling)) and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e. written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary (or the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

*Presumption of Survivorship.*—The Succession (Scotland) Act, 1964, referred to above provides that where two persons die in circumstances indicating that they died simultaneously or if it is uncertain which was the survivor, the younger will be deemed to have survived the older; but if the persons so dying were husband and wife, neither shall be presumed to have survived the other.

## THE OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963.

This Act, which extends to Scotland with minor modifications, applies to office premises, shop premises and railway premises being, in each case, premises where persons are employed to work. Shop premises include a building which is not a shop but of which the main use is the carrying on there of a retail trade or business; a building occupied by a wholesaler where goods are kept for sale wholesale (except a warehouse belonging to the owner of a dock, wharf or quay); and a building to which the public can resort for the purpose of having goods repaired. However, the Act does not apply to premises if the only employees are the spouse, parent, grandparent, child, grandchild or brother or sister of the employer, and it does not apply to premises if the period of time worked there during each week does not normally exceed 22 hours.

The following is a very brief summary of the main provisions affecting premises to which the Act applies—

1. The premises and all furniture etc., must be kept clean, and no dirt or refuse must be allowed to accumulate.
2. No overcrowding so as to cause risk of injury to health is permitted.
3. Provisions must be made for maintaining a reasonable temperature in rooms, and a thermometer must be provided on each floor of a building.
4. Provision must be made for securing adequate ventilation.
5. Provision must be made for securing sufficient and suitable lighting.
6. Suitable and sufficient sanitary conveniences and washing facilities (including a supply of clean, running hot and cold or warm water and, in addition, soap and clean towels or other suitable means of cleaning or drying) must be provided at accessible places; and also an adequate supply of wholesome drinking water.
7. Accommodation must be provided for clothing which is not in use.
8. For each sedentary worker there must be provided a seat of a design, construction and dimensions suitable for that worker.
9. Where persons employed to work in shop premises eat meals there, suitable and sufficient facilities for eating them must be provided.
10. All floors, stairs and passages must be of sound construction and properly maintained.
11. Every dangerous part of any machinery must be securely fenced, unless it is in such a position or of such construction as to be as safe as if it were fenced. No person under 18 can clean machinery if he is thereby exposed to risk of injury from a moving part.
12. No person can be required to lift or carry a load so heavy as to be likely to injure him.
13. A first-aid box or cupboard must be provided.
14. Means of escape in case of fire must be provided, as must appropriate fire-fighting equipment.
15. Where an accident occurs which causes death to an employee or disables him from working for more than 3 days, the occupier of the premises must at once send notice of the accident to the appropriate authority.

## TAXES, STAMP DUTIES AND LICENCES

### SELECTIVE EMPLOYMENT TAX

This new tax was imposed by the Finance Act 1966, section 44, but the details regarding repayment to certain employers and a number of other matters are contained in the Selective Employment Payments Act 1966, the Finance Acts 1967, 1968 and 1969 and the Revenue Act 1968. The Finance Act 1966 imposes on the employer the liability to pay selective employment tax "in respect of each person in respect of whom the employer is liable to pay ■ employer's insurance contribution for that week"—the reference to the week is because the tax is imposed in respect of each contribution week beginning on or after September 5, 1966. The result of the above is that all employers must pay the tax in respect of all employees who work for the employers for more than eight hours in a week; the only exceptions relate to the Forces and certain seamen. The weekly amount of the tax is now as follows:—

Male over 18.....	48s. od.
Female over 18.....	24s. od.
Male under 18.....	24s. od.
Female under 18.....	16s. od.

The tax is collected together with the employer's insurance contributions (*i.e.*, contributions payable by him under the National Insurance Acts), but, in so far as collected in Great Britain, is paid by the Minister of Social Security into the Exchequer.

The tax is collected from all employers, but to manufacturing employers it was to be repaid together with ■ premium; to certain other employers the tax is repaid without ■ premium; the third group of employers pay the tax but obtain no repayment. However, since the Revenue Act 1968, the premium is only payable in respect of establishments within a development area.

#### SELECTIVE EMPLOYMENT PREMIUM

Section 1 provides for repayment by the Minister of Labour of selective employment tax and payment of ■ premium to certain employers; the weekly amount of the premium varies with the tax paid as follows:

Tax	Premium
48s. od.	37s. 6d.
24s. od.	18s. 9d.
16s. od.	12s. od.

The tax and premium are payable in respect of employment in an establishment in ■ development area engaged by way of business in certain activities, research or training, set out in more detail below, but in order to qualify for repayment of tax and payment of premium more than half of the employees must be employed wholly or mainly in connection with such activities, research or training, and must not be employed wholly or mainly in non-qualifying activities, *i.e.*, broadly, activities carried on for office purposes, or activities by way of carriage of goods by road in connection with a business by the owner of the business, or activities by way of the sale of goods.

The activities which qualify for repayment of tax and payment of premium are set out in detail in Orders III to XVI of the Standard Industrial Classification—the main headings are as follows:—

Food, Drink and Tobacco—including grain milling, making bread, etc., curing bacon, making butter, manufacturing sugar, jam, etc., preserving fruit, manufacturing animal food, brewing ale and distilling gin and whisky, and manufacturing tobacco.

Chemicals and Allied Industries, including manufacturing coke, refining petroleum, tar distilla-

tion, compounding patent medicines, and production of crude oil from seeds and fish.

Metal Manufacture, including smelting, refining and alloying. Engineering and Electrical goods. Shipbuilding and Marine Engineering, including repair of ships.

Vehicles—including repair of locomotives.

Metal goods not elsewhere specified, including assaying, smelting and refining of gold, silver and platinum.

Textiles, including preparation of fabrics.

Leather, leather goods and fur, including curing skins and dressing furs.

Clothing and footwear.

Bricks, pottery, glass, cement, etc.

Timber, furniture, etc., including saw milling.

Paper, printing and publishing, including printing of wallpaper, printing and publishing newspapers and magazines.

Other manufacturing industries—not otherwise specified.

Also included are activities by way of the manufacture from exposed film of cinematograph films for public exhibition and any scientific research or training relating to any of the activities specified above.

#### SELECTIVE EMPLOYMENT REFUND

Section 2 deals with repayment by the appropriate Minister—the Secretary for Employment and Productivity—of selective employment tax, but without payment of any premium. The repayment is payable in respect of employment in an establishment engaged by way of business in certain activities set out below, but in order to qualify more than half of the employees must be employed wholly or mainly in connection with those activities and must not be employed wholly or mainly in non-qualifying activities. Non-qualifying activities are defined above, but in this context do not include the carriage of goods by road in connection with a business by the owner of the business (except in relation to road haulage contractors).

The main activities which qualify for repayment of the tax are as follows: Sea fishing and whaling; Fishing in inland waters and the operation of fish farms; Mining and quarrying; Production and distribution of electricity and water; Railways; Road passenger transport, including taxis and car hire; Road haulage contracting; Sea transport; Port and inland water transport; Air transport; Postal services and tele-communications; Extraction of coal from open-cast workings; Agriculture, horticulture and forestry; milk processing and delivering; and relevant scientific research or training.

#### PAYMENTS TO CERTAIN PUBLIC BODIES

Section 3 enables "the designated Minister" (*i.e.*, designated by the Treasury) to repay the tax to certain public bodies with, in certain cases, a premium as well, except in respect of employees employed in National Coal Board depots which are outside the curtilage of a colliery and wholly or mainly engaged in wholesale or retail dealing in coal, or employed in premises occupied by British Transport Hotels Ltd., or employed by Thos. Cook and Son Ltd. and any wholly-owned subsidiary, or employed by the Post Office Savings Bank.

The public bodies within section 3 are as follows:

1. The National Coal Board.
2. The Electricity Council.
3. The Central Electricity Generating Board.
4. An Area Electricity Board.
5. The North of Scotland Hydro-Electric Board.

6. The South of Scotland Electricity Board.
7. The Gas Council.
8. An Area Gas Board.
9. The British Railways Board.
10. The London Transport Board.
11. The British Transport Docks Board.
12. The British Waterways Board.
13. The Transport Holding Company.
14. Any company which is a wholly-owned subsidiary of any of the bodies specified in paragraphs 9 to 13 or which would be such a subsidiary if any two or more of those bodies constituted a single body corporate.
15. Cable and Wireless Ltd.
16. The Commonwealth Development Corporation.
17. The British Overseas Airways Corporation.
18. B.O.A.C. Associated Companies Ltd.
19. B.E.A. 20. BEA Helicopters Ltd.
21. The British Airports Authority.
22. The United Kingdom Atomic Energy Authority so far as its activities are financed out of the United Kingdom Atomic Energy Authority Trading Fund.

The parts of the undertakings set out above which qualify for the payment of the premium are as follows, but only if situate in a development area—

The Brickworks Executive of the National Coal Board; The Coal Products Division of the National Coal Board; The Tredomen and Cowdenbeath workshops of the National Coal Board; The London Transport Railway Overhaul Workshops at Acton; Workshops of the British Waterways Board which are wholly or mainly engaged in manufacturing or repairing waterway equipment; Workshops and railway signal works of the British Railways Board which are wholly or mainly engaged in manufacturing or repairing railway equipment; Star Bodies (B.R.S.) Ltd.; The Engineering and Maintenance Division of the British Overseas Airways Corporation; The Engineering Department of; British European Airways Corporation; BEA Helicopters Limited. Activities financed out of the United Kingdom Atomic Energy Authority Trading Fund.

#### PAYMENTS TO LOCAL AUTHORITIES, ETC.

Section 4 enables "the appropriate Minister" (*i.e.*, in relation to ■ employer in Scotland or in Wales or Monmouthshire, the Secretary of State; in any other case, the Minister of Housing and Local Government) to make payments to certain employers by reference to the amounts paid by way of selective employment tax. The employers within the section include local authorities, development corporations, statutory water undertakers and internal drainage boards.

#### REFUNDS TO CHARITIES

Section 5 provides for the refund by the Minister of Labour of selective employment tax paid by charities, subject to certain conditions, including production to the Minister of records of the payment of the tax. For this purpose, in England and Wales, "charity" means a body registered under the Charities Act, 1960 or certified as ■ charity not requiring registration or as an ecclesiastical corporation, and includes Greenwich Hospital. In the application of this section to Scotland, "charity" has the same meaning as in the Income Tax Acts, and the Minister is not bound to make any payment unless the Secretary of State certifies that the employer is ■ charity within that meaning.

#### REFUNDS FOR CERTAIN HOUSEHOLDS

Section 6 deals with repayment by the Minister of Social Security to certain employers (not being

charities ■ above defined) of selective employment tax paid in respect of an employee in a qualified household for more than eight hours a week in giving domestic or nursing assistance, subject to the Supplementary Benefits Commission being satisfied that the requirements of section 6 are fulfilled. A qualified household is a private household which includes ■ person (not being the employee) over the age of seventy, or which includes ■ person in need of such assistance by reason of infirmity, sickness or other incapacity (including pregnancy) or which includes a child under sixteen (not being a child of the family of the employee). However, no repayment ■ be made in respect of the child under sixteen if the household includes both parents of the child, although the household must contain one (but not more) member who is either a parent or ■ spouse of a parent of the child and who is normally engaged for more than eight hours in the week in work other than domestic work of the household. If the household includes no such parent or spouse but includes a person (fulfilling the eight-hour qualification) who appears to the Supplementary Benefits Commission to be discharging the function of a parent with respect to the child, and does not include ■ spouse of such person, then repayment will be made.

#### Other Refunds—Finance Acts 1967 and 1968

1. Where an employer has paid the tax in respect of an employee for any contribution week beginning on or after 4th September 1967 in which the employee worked in that employment for less than 21 hours, the Minister shall refund to that employer a sum equal to half the tax paid, except where (a) the employee was for the purposes of the tax ■ boy or girl under the age of 18, or (b) the contract normally involved that employee's working for 21 or more hours weekly. If the contribution week begins on or after 2nd September 1968, the refund is two-thirds of the tax paid.

2. Where an employer has paid the tax in respect of an employee who, during ■ continuous period of more than 13 contribution weeks, has been employed by him wholly outside the U.K., the Minister shall refund to that employer the tax paid in respect of that employee for those weeks, provided that the 14th of such weeks began on or after 4th September 1967.

3. There are further detailed restrictions on the payment of the above refunds, and the Finance Act 1968 deals with payments in respect of a person over 65.

#### REGISTERS AND ENFORCEMENT

In the case of employments within section 1 or 2, the Minister required to make repayments must compile registers of establishments falling within the repayment and premium provisions; registration is made on application by the employer in a prescribed form. The Minister is not bound to make any payment before registration of the establishment, nor in respect of any contributions week as respects which the employer does not produce records of payment of selective employment tax. An establishment is deemed to have been registered as from the date on which the application for registration was received by the Minister or such earlier date as it appears to the Minister to be equitable to allow.

Any person authorized by the Minister may enter on registered business premises, or any premises occupied by a charity who have claimed repayment of the tax, in order to examine and make copies of records of payment of the tax, and such person may require anyone on the premises to give him such information as he may reasonably request ■ to the activities carried on in the establishment.

## INCOME TAX 1969-70

By the Finance Act, 1965, a new tax, the Corporation Tax, was introduced and applies to the income and profits of bodies corporate. The Corporation Tax is outside the scope of this article which must therefore be read throughout as not applying to bodies corporate. Income Tax remains chargeable on the income of all individuals and persons other than bodies corporate, in previous years.

Income Tax is a tax on annual income, represented by money, or money's worth. In general, the charge to tax is on the full amount of income arising for the year of assessment, the fiscal year which runs from April 6 in one year to April 5 in the next, subject to the deductions authorized by the Income Tax Acts. Under Schedule D, however, the assessment is made on the profits or gains of a continuing trade or profession for the year preceding the year of assessment, which is called the "basis year." The profits are arrived at on ordinary accountancy principles and then adjusted for tax purposes. The profits for the accounting year of the trade or profession which ends in the year preceding the year of assessment, the profits of the "basis year."

Broadly, the charge to tax is on income arising in the United Kingdom, or on income received from home or abroad, by residents in the United Kingdom. An individual is resident and ordinarily resident in the United Kingdom if he is living here in the ordinary course of his life, or for an extended period; also, though normally he lives here, if he is abroad for occasional residence only; or if he visits the United Kingdom year by year, even though his main home is abroad.

The income of a married woman living with her husband is aggregated with his income. Separate assessment may be claimed, but the tax due remains the same.

Income Tax is imposed at the rates specified by the annual Finance Acts. There are graduated rates of tax, the principal rate being called the "Standard Rate," which for 1969-70 is 41.25 per cent. (8s. 3d. in the £). There is an additional income tax on higher incomes called "Sur-tax." The enactments relating to income tax were consolidated in the Income Tax Act, 1952, as amended by subsequent Finance Acts and the Income Tax Management Act, 1964.

The Tables which follow show the income tax payable for 1969-70 and surtax (if any) for 1968-69, payable on Jan. 1, 1970 by an individual on the amount of income specified, after deduction of the personal allowance, children's allowance (where appropriate) and, in the case of earned income, the earned income relief. The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown in the Tables.

**Assessment.**—The Income Tax Acts provide for tax to be assessed and collected under a number of Schedules which deal with separate sources of income:—

**Schedule A**—abolished finally from 1964-65, as also the maintenance relief previously available. Rents now assessed under Schedule "D", Case VIII (see below).

**Under Schedule B.**—Assessment under this Schedule is now restricted to woodlands in the U.K. managed on a commercial basis and with a view to the realization of profits. The assessment on woodlands will be based on one-third of the annual value of the land arrived at on the normal rating basis on the assumption that the lands are let and occupied

in their natural and unimproved state. The taxpayer has the option to be assessed under Schedule D Case I on the results shown by accounts instead.

**Under Schedule C.**—Assessed on the paying agent. Not of concern to the individual tax payer.

**Under Schedule D.**—This schedule is divided into eight cases as follows:—Cases I and II—Profits of trades, businesses, commercial activities on land including farming, professions or vocations.

Case III—Interest on Government stocks not taxed at source (e.g. War Loan, Defence Bonds, National Development Bonds), bank deposit interest, discounts, etc. Interest on Post Office Savings Bank and Trustee Savings Bank accounts up to £15 is exempt from income tax but assessable to Surtax grossed at standard rate. This exemption applies to both husband and wife separately. Interest on the new Post Office Investment Deposits and also Trustee Savings Bank Special Investment Accounts is, however, not exempt.

Cases IV and V.—Interest from foreign or Com-

monwealth securities, rents, dividends and all other unearned income: assessed on full amount arising, whether remitted or not, where persons domiciled and ordinarily resident in the U.K. But on amount remitted, where person not domiciled in the U.K. or ■ British subject not ordinarily resident. In cases of Income earned abroad (e.g. from businesses, trades, and professions) and pensions, assessed only on amount remitted and only where person entitled is resident in U.K.

Case VI.—Sundry profits and casual receipts not assessed under any other case, e.g. insurance commission, post cessation receipts, certain premiums paid to persons other than landlords and numerous other receipts treated as income and specifically charged hereunder. As to furnished lettings, see under Case VIII below.

Case VII.—Short-term gains.—Introduced by Finance Act, 1962, on gains made from disposals within six months of acquisitions in the case of stocks

and shares and three years for land: extended by Finance Act, 1965, to gains made within twelve months on both these classes and in addition tangible assets realizing more than £1,000. The principal exceptions being private cars, private residences, wasting assets which are tangible movable property and small gifts. Such gains are treated as unearned income, assessable to income tax and surtax. Within the tax year profits and losses are aggregated: any balance of loss can only be carried forward against future years' profits. Liability is confined to persons resident and ordinarily resident in the U.K.

Case VIII.—Under this case are assessed ground rents, certain other receipts from land (other than mineral rents and royalties) and rents (less expenditure on maintenance, insurance and repairs and, where appropriate, depreciation allowances on plant and machinery included in the letting and industrial buildings or agricultural installation allowances) and, since April, 1963, premiums on leases for less than fifty years. Such premiums are assessed on amount received, less 2 per cent for every year after the first year. "Lease" includes any tenancy. Furnished lettings are normally assessed in Case VI without distinguishing the receipts as between the space let and the furniture hire: but rent for the space can be distinguished and assessed in Case VIII, the profit on hire being assessed in Case VI.

Losses.—Under Cases I, II, VI, VII and VIII losses can in general be carried forward and allowed against corresponding income or profits of subsequent fiscal years without time limit. Losses under Cases I and II can alternatively be set off against other income of the same fiscal year and the year next following.

Capital Gains.—A separate long-term gains tax has been introduced by the Finance Act, 1965, and this applies to gains realized on chargeable assets disposed of after April 6, 1965 provided the gain is not chargeable under Case VII. In the case of assets owned on April 6, 1965 and disposed subsequently, only the proportion of the gains attributable to the period after that date is chargeable. These gains are not charged to income tax and surtax as income, but in accordance with separate rules. The detailed rules of this new tax are outside the scope of this article.

For 1967/68 onwards exemption is given where the total gains in the year do not exceed £50.

The calculation of gains and losses on quoted securities held at April 6, 1965 which are disposed of after March 19, 1968 may be made solely by reference to the market value at April 6, 1965, if the taxpayer elects to deal with all his holdings in this way. Separate elections may, however, be made in relation to fixed interest stocks and preference shares and/or other quoted shares.

The rate of Capital Gains Tax payable by ■ individual is 30 per cent. but one half the net gains may be charged at the taxpayer's marginal rate of tax (including Surtax) where this produces ■ lower charge. From April 15, 1969, gains on disposal of securities issued or guaranteed by the British Government not subject to Capital Gains Tax. This exemption does not, however, extend to short term gains tax (i.e. where gains realized within 12 months of acquisition).

Under Schedule E.—Income from all offices, employments and pensions, including salaries, wages, emoluments, directors' fees, etc. Assessed on the actual earnings for the year of assessment. If, however, the individual is (a) not resident (or resident but not ordinarily resident) then the assessment is confined to the emoluments for services performed in the U.K. Or (b) although resident, the duties were performed wholly abroad when the assessment

is confined to the amount remitted to the U.K. Necessary expenses are allowable, including fees and subscriptions to certain professional bodies and learned societies and within strict limits, depreciation allowances.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to directors and employees enjoying emoluments of £2,000 p.a. or more are assessable. From 1965-66 onwards expenses incurred in providing business entertainment (including hospitality of any kind and gifts) are not allowable except when provided for an overseas customer. Where any person has premises available for his use by reason of his employment and either pays no rent or pays less than the annual value he will be charged to tax on the annual value less any rent paid. Certain payments made on retirement or removal from a person's office or employment (in excess of £5,000) are assessable to tax on him.

**Exemptions.**—Unemployment, sickness and maternity benefit and grant, and death grant payable under the National Insurance Acts are not assessable to income tax, but (retirement, widows, etc.) pensions and family allowances are included in the charge under this schedule. Under Finance Act, 1966, statutory redundancy payments are exempt from tax.

Where the emoluments are paid by an employer in the U.K., deduction of income tax is made by the

employer, at the time of payment, in accordance with employee's code number. As to P.A.Y.E. (pay as you earn) see further below.

**Under Schedule F.**—From April 6, 1966, onwards income tax will be charged on all dividends and distributions of ■ U.K. resident company. Tax will be deducted at standard rate and has to be accounted for monthly by the Company to the Inland Revenue.

**ALLOWANCES.**—The following allowances and deductions are given, in calculating the income tax payable:—

**Personal Allowance.**—To single person.... £255

To married man living with or normally maintaining his wife (but in year of marriage allowance is reduced by £10 for each fiscal month (i.e., ending May 5, June 5, etc.) which ended before the date of marriage).. £375

When either husband or wife is absent from United Kingdom throughout ■ complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. A married woman permanently separated from her husband is treated ■ a single woman.

**Children.**—For each child under 16 (or over that age at the beginning of the fiscal year and receiving full time instruction at ■ recognized educational establishment, or who is articulated or apprenticed) and who does not have income in that year

## (4) Married Couples with Two Children

50,000	39,719	79·4	39,673	79·3	39,628	79·2
100,000	85,344	85·3	85,298	85·2	85,253	85·2

exceeding £115 in his or her own right, the allowances are:—

(a) Child over 16 at commencement of fiscal year..... £165

(b) Child over 11 at commencement of fiscal year..... £140

(c) Other children (each)..... £115

Scholarship or bursary does not count for this purpose. Marginal relief is given where a child's income exceeds £115. The child relief will then be reduced by £1 for each £1 by which the child's income exceeds £115. "Child" includes step-child and adopted child. Child allowance is due to the person who has the custody of and maintains the child. If more than one person could claim the allowance; e.g. if a husband and wife are divorced or separated, the allowance will be apportioned between them, as necessary. These allowances are reduced by £42 for each child for whom Family Allowance is due for the whole year 1969-70 and by an appropriately smaller amount where the allowance is received for only part of the year.

For and from the year 1969-70 the income of children under the age of 18 not regularly working (other than earned income and income arising from compensation for personal injury to the child) is to be aggregated with the parents' income and treated for tax purposes as the parents' income.

The "Family Allowance" for children is payable to the mother but ranks only for the Earned Income Allowance.

*Dependent Relatives.*—The maximum deduction for each dependent relative is normally £75. By the Finance Act, 1967, where the claimant is a woman (other than a married woman living with her husband) the maximum deduction is £110. These allowances are reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowances) exceeds £245. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband, or whose marriage has been dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided *pro rata*.

*Daughter.*—A person who by reason of his or her old age or infirmity, has to retain the services of a daughter resident with him or her is entitled to an allowance of £40.

*Housekeeper or person looking after children.*—An allowance to:—

(a) Widows and Widowers: Housekeeper allowance of £75 in respect of a housekeeper as such or a female relative or female

employee engaged to look after children. These females must be resident.

- (b) Unmarried man: Housekeeper allowance of £75 in respect of a female relative living with and maintained by him, to look after brothers or sisters for whom he is entitled to child allowance.
- (c) All other claimants: An allowance of £100 where entitled to child allowance whether or not employing or maintaining a resident housekeeper. If the claimant is a female she must additionally, throughout the year of assessment, be either incapacitated or in full-time employment or occupation. Up to 1966-67 this allowance was only given where a resident housekeeper was maintained or employed, otherwise this allowance was £40.

**Blind persons.**—An allowance of £100 less 7/9ths of any tax free disability receipts may be claimed by a registered blind person, provided that the Daughter's allowance of £40 is not also claimed. Where both spouses are blind the maximum allowance is £200 less 7/9ths of any free disability receipts. Proportionate relief for persons registered as blind during part only of the year of assessment was contained in the Finance Act, 1965.

**Earned Income.**—Allowance of the following fractions of earned income (after deducting allowances for necessary expenses, superannuation, etc.):—

Up to £4,005—Two-ninths.

The next £5,940—One-ninth.

Maximum amount which relief can be obtained is thus £9,945.

**Married woman earning income** in her own right has deduction of earned income relief and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £255 plus Reduced Rate Reliefs as shown below.

**Small Income Relief.**—All incomes up to £450 are treated as earned income; i.e. relief of two-ninths of income is allowed. Marginal relief is given where income slightly exceeds £450 up to a maximum of £705.

**Age Relief.**—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £1,000. Where the total income exceeds £1,000, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

**Age exemption.**—Persons over 65 years of age are exempt from tax if their total incomes do not exceed:—

Single person.....£425

Married couple (either being over 65).....£680

Marginal relief is given where income slightly exceeds these amounts.

**Pension Contributions.**—Contributions by both employed and self-employed persons to officially approved superannuation funds, or premiums paid (within certain limits) to provide for retirement annuities are allowed as deductions.

**Life Assurance Premiums.**—Relief is given for premiums paid under assurance policies on life of taxpayer or his wife. A capital sum must be payable at death. Where the total premiums available for relief to taxpayer and his wife do not exceed £25 amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 the deduction is two-fifths of the premiums. Where annual premium exceeds 7 per cent. of capital sum assured, the allowable premium is restricted to 7 per cent. of capital sum. The amount on which

relief is given must not exceed one-sixth of net total income. Relief is also given on amounts paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer.

Policies effected after March 19, 1968, do not qualify for the relief outlined above and the proceeds less premiums paid will be subject to Surtax assessment unless in general terms the following conditions are also satisfied: (a) The policy is for a term of at least 10 years; (b) The premiums are spread reasonably evenly; and (c) where the policy is an endowment policy the capital payable on death is not less than 75 per cent. of the total premiums payable.

**Purchased Life Annuities.**—The capital element of annuities for a term referable to a life, which are purchased for money or money's worth from a person whose business is to grant annuities (with certain exceptions) is not taxable as income.

**Reduced Rate Relief.**—Rates of tax on taxable income are:—

On the first £260.....	30%	(6s. 0d.)
On balance.....	41.25%	(8s. 3d.)

**Repayment Claims.**—Where relief or allowance due has not been given in the assessment of the taxpayer, or where tax has been deducted from income received in excess of the amount of tax due in respect of total income, repayment may be claimed in general, within six years after the end of the year of assessment.

**Error or Mistake.**—Relief may be claimed if an assessment is excessive because of some error or mistake in the return or statement made by the taxpayer. Application for relief must be made to the Inspector within six years after the end of the fiscal year in which the assessment was made.

**Building Society Interest.**—Majority of societies operate under special arrangement with Inland Revenue and interest is paid to depositors and shareholders "free of income tax." But such interest must be included in taxpayer's total income for assessment to surtax, grossed at the standard rate.

**Victoria Cross and George Cross.**—Annuities paid to holders of the Victoria Cross and George Cross, and (from 1968) the Albert Medal and the Edward Medal, as such are disregarded for income tax purposes.

**Surtax** is an additional duty of income tax, chargeable on total income (the amount of income chargeable to income tax by deduction or assessment) of individuals. Less the following deductions: (a) approved pension and superannuation contributions including retirement annuity premiums paid by self-employed persons; (b) losses on trading activities for which relief against income tax allowed for the same year; (c) earned income relief allowed for income tax. Where the earned income less earned income relief exceeds £2,000, a further deduction is allowed of the excess over £2,000, with a limit for this purpose of £2,000; (d) interest paid on loans, mortgages, overdrafts, etc., but from March 19, 1968, in general, interest on sums borrowed to pay life assurance premiums is not deductible; (e) payments under certain Deeds of Covenant as to which see below; (f) all personal allowances as granted for income tax excluding relief on life assurance premiums, to the extent that the total exceeds £220.

Also provided by the 1969 Finance Act from 1969-70 interest paid will no longer qualify either for income tax or surtax relief unless it is proper business expense or is paid on money borrowed for the purchase or improvement of land or buildings in the United Kingdom or the Irish Republic.

The net sum is chargeable on a sliding scale as follows:—

On first £2,000			Nil
On each £ of first	£500	2s.	in the £
“ next	£500	2s. 6d.	“
“	£1,000	3s. 6d.	“
“	£1,000	4s. 6d.	“
“	£1,000	5s. 6d.	“
“	£2,000	6s. 6d.	“
“	£2,000	7s. 6d.	“
“	£2,000	8s. 6d.	“
“	£3,000	9s. 6d.	“
On each £ above	£15,000	10s. od.	“

Surtax is payable on January 1 following year of assessment, so that surtax for 1968-69 is payable on January 1, 1970. A surcharge of 10 per cent. of the surtax liability for 1965-66 was levied, payable on September 1, 1967.

**Special Charge.**—This levy applies to persons who were domiciled in the U.K. in 1968-69 or were resident for that year and ordinarily resident for the ten years to April 5, 1968. The levy is based on the aggregate investment income for 1967-68 as assessed to Surtax less personal allowances as allowed for Surtax. It does not apply to persons who died during the year 1967-68. The net investment income will be charged at the following rates:

Slice of investment income	Rate of charge
£3,000-4,000	2s. od. in the £
£4,000-5,000	3s. od. “
£5,000-8,000	6s. od. “
Over £8,000	9s. od. “

Investment income means in general all income other than earned income.

Where the Special Charge payable relates wholly or partly to Trust income, the individual may give notice to the Surtax Controller requiring that the appropriate proportion of the charge be assessed on the Trustees. Alternatively, where he pays the charge in full he may recover the part appropriate to the Trust income from the Trustees. Where income derives from a Foreign Trust the Surtax Controller should be asked to discharge the proportion of the charge appropriate to that income. The Special Charge is payable on Jan. 1, 1969, and interest at 4 per cent. (without deduction for tax) will be added (if it exceeds £5) on any amount unpaid at that date.

**Seven-year Covenants.**—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration, the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after April 6, 1965, whether in favour of a charitable body or in favour of an individual, may no longer be deducted from the covenantor's total income for surtax purposes. There are three exceptions to this: payments under a partnership agreement to a former partner, his widow or dependants, similar payments in connection with the acquisition of a business made under liability incurred for full consideration; and settlements made by one party to a marriage for the other or for the children of the marriage, in consequence of divorce, nullity or separation. A separation may be under a court order or by agreement or in such circumstances that the separation is likely to be permanent.

**Settlements in favour of taxpayer's own infant children.**—The Income of any such Settlement made since April 22, 1936, is treated as that of the Settlor for all income tax purposes it:—

(a) the settlement can be revoked within a period of six years (unless the child becomes Bankrupt).

(b) the income is paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply after the child attains 21 or marries (or from 1969-70 has reached the age of 18 and is in full employment).

**Double Taxation Relief.**—Agreements for the avoidance of Double Taxation have been made between the United Kingdom and Antigua, Australia, Austria, Barbados, Belgium, Botswana, British Honduras, British Solomon Islands, Brunei, Burma, Canada, Cyprus, Denmark, Dominica, Falkland Islands, Farøe Islands, Fiji, Finland, France, Gambia, Germany (Federal Rep.), Ghana, Gilbert and Ellice Islands, Greece, Grenada, Guernsey, Guyana, Ireland (Rep.), Isle of Man, Israel, Italy, Jamaica, Japan, Jersey, Kenya, Lesotho, Luxembourg, Malawi, Malaysia, Malta, Mauritius, Montserrat, Netherlands, Netherlands Antilles, New Zealand, Nigeria, Norway, Pakistan, Portugal, Rhodesia (suspended), St. Christopher and Nevis, St. Lucia, St. Vincent, Seychelles, Sierra Leone, Singapore, South Africa, South West Africa, Southern Yemen, Swaziland, Sweden, Switzerland, Tanzania, Trinidad and Tobago, Uganda, United States of America, Virgin Islands and Zambia.

**Persons Resident Abroad.**—Persons normally resident outside the United Kingdom are liable, in general, in respect of income from United Kingdom sources.

Certain Double Taxation agreements, however, exempt or partially exempt U.K. interest. Some agreements (e.g. that with Malta) exempt dividends from U.K. tax altogether while others (e.g. that with United States) provide for a modified rate of U.K. tax deduction (usually 15 per cent.) from U.K. dividend income.

All persons not ordinarily resident are exempt from U.K. tax on interest from beneficial holdings of:

3½% War Stock 1952 or after, 4% Victory Bonds, 4% Funding Loan 1960-90, 3% Savings Bonds (all issues), 5½% Funding Loan 1982-84, 5% Exchequer Stock 1976-78, 5½% Funding Stock 1978-80, 5½% Treasury Stock 2008-12, 5½% Funding Loan 1987-91, 6% Exchequer 1970, 6½% Exchequer 1969, 6% Funding Loan 1993, 6½% Treasury 1976, 6½% Exchequer 1971, 6½% Treasury 1995-98, 6½% Exchequer 1972, 6½% Funding Loan 1985-87, 6½% Treasury Stock 1971, 6½% Exchequer 1973, and 9% Treasury Stock 1994.

Such persons become resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per year they would be regarded as ordinarily resident here.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is:

- a British subject;
- present or former servant of the Crown; or widow of a former Crown servant;
- employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection;
- resident of the Isle of Man or the Channel Islands; or

(e) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family;

(f) entitled to such allowances under the Double Tax Agreement with the country of his residence.

**Post War Credits.**—Those Credits arising out of the temporary reduction of certain income tax allowances during the years 1941-42 to 1945-46 inclusive are repayable to women over 55 and men over 60 years of age, and to widows entitled to Credits in their own right. Where a man or woman has died, repayment is made to personal representatives or beneficiaries, irrespective of age.

Holders of Credits are also entitled to repayment if certified as blind persons or in-patients of hospitals or nursing homes, or if in receipt of any of the following: National Assistance, Constant Attendance Allowance or Unemployability Supplement, Sickness or Injury Benefit, Disablement Pensions, Workmen's Compensation 1956 Supplement; or if registered as unemployed. There is a qualifying period of 26 weeks in certain categories (12 weeks for National Assistance). Interest from October 1, 1959 will be added to the sum repayable. Forms for claiming repayment may be obtained at any Post Office.

**INCOME TAX ADMINISTRATION**

*Income Tax* under Schedules B, D and E, is assessed by H.M. Inspectors of Taxes. Schedule B assessments are made by the Inspector for the district in which the woodlands are situated. Assessments under Schedules D and E are made by the Inspector of Taxes for the district in which the Trade, Profession or Employment is carried on, or from which the Pension is paid, otherwise assessments are made in the district in which the taxpayer resides. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes direct to H.M. Inspector by whom the notice was issued within the time limit for such appeals, as stated on the notice. The grounds of appeal should be given. If the assessment cannot be agreed with H.M. Inspector, the appeal will be heard by the General Commissioners. Alternatively, certain appeals are made to the Special Commissioners. An appeal may be made by way of Case Stated from the Appeal Commissioners' decision to the High Court on points of law.

*Income Tax* is payable to the Collector of Taxes.

*Surtax* is assessable by the Commissioners of Inland Revenue. Returns of total income are made to the Controller of Surtax except where a full return of income is made to H.M. Inspector of Taxes. Appeals are made to the Special Commissioners and thence to the Courts by way of Case Stated.

*Surtax* is payable to the Accountant and Comptroller General.

**OTHER TAXES AND STAMP DUTIES**

**NOTE.**—(1) The instruments for which the use of adhesive postage stamps is "permitted" include:—  
 Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life)—s. 99. Receipts—s. 101 (2).

(2) The Commissioners as a general rule allow deeds etc., to be stamped after execution:—

**WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY.**

Deeds and instruments not otherwise excepted, within 30 days of first execution.

**NOTE.**—Where wholly executed *abroad*, the period begins to run from the date of arrival here.

*Penalties* may be incurred for failure to make proper returns of income or false claims for allowances.

Every person chargeable to *Income tax* must give notice of chargeability within one year (unless an income tax return has already been made).

Interest at 6 per cent. simple (previously 4 per cent.) is charged where tax assessed under Schedule "D", Surtax or Capital Gains Tax is unpaid two months after it has become due, where the amount of tax charged exceeds £1,000 and where the interest payable exceeds £5.

**Tax Reserve Certificates.**—Provision for future tax liabilities may be made by the purchase of Tax Reserve Certificates. When surrendered in payment of income tax (other than Schedule "E"), Surtax or Capital Gains Tax, interest is allowed for a maximum period of two years, provided the certificates tendered were purchased more than one month before the date the tax became payable. Such interest is not subject to tax.

**P.A.Y.E.**

*Income Tax* payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Notice of Coding should be checked on receipt and H.M. Inspector of Taxes informed of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by successive employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year. Form P.60 should be preserved in case it is needed in connection with any application for earnings-related supplements to sickness or unemployment benefits. Provided the correct allowances are given in determining the code number and the income from which the deduction is made is the correct amount assessable, the Inspector is not required to make a formal assessment under Schedule E, unless the taxpayer is also liable to Surtax. Where assessments are required (and the taxpayer may call for his assessment) any over-deduction of tax is repaid or under-deduction recovered in a later year: under-deductions of less than £1 are ignored.

**PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—**

Agreements under hand only. At- tested copies or contracts: after 30 days from their first execution. . . .	£ s. d.
Receipts, within 14 days after they have been given. . . . .	10 0 0
Receipts, after 14 days, but within one month. . . . .	5 0 0
Other Instruments presented after the proper time (subject to special provisions in some cases). . . . .	11 0 11

AGREEMENT for Lease, *see* LEASES. £ s. d.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (*see post*, p. 1191) with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT, not otherwise charged with duty, under hand only. . . . . 0 0 1  
N.B.—The following agreements are exempt:—

- (a) Where the value of the subject-matter is less than £5.
- (b) For the hire of any labourer, artificer, manufacturer, or menial servant.
- (c) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1193, are not exempt).
- (d) service agreements.

Not otherwise charged with duty, under seal or with clause of registration. . . . . 0 10 0

APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed. . . . . 0 10 0

**EQUITABLE MORTGAGES** under hand only For every £100 or part thereof.....

o 1 o

**ESTATE DUTY:**

In the case of every person dying on or after April 15, 1969 the total duty payable on an estate is found by adding up the amounts of duty payable on various slices of the estate, according to ■ scale laid down in F.A. 1969 Schedule 17.

The rates of duty are as follows.

- On the first £10,000—Nil
- On the next £7,500—25 per cent
- On the next £12,500—30 per cent
- On the next £10,000—45 per cent
- On the next £40,000—60 per cent
- On the next £70,000—65 per cent
- On the next £150,000—70 per cent
- On the next £200,000—75 per cent
- On the next £250,000—80 per cent
- On the excess over £750,000—85 per cent

The rate of duty for any particular asset is found by dividing the total duty by the aggregate value of the estate.

The amount of duty is in no case to exceed 80 per cent of the principal value.

The rates of duty set out above apply to Great Britain. There are different estate duty rates obtaining in Northern Ireland.

The amount of duty payable in certain circumstances on property passing ■ two deaths occurring

within 5 years of one another is reduced. (Finance Act, 1958.)

A reduction of 45 per cent. is applied to the "agricultural value" of agricultural property; and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "industrial hereditaments" and "machinery or plant" (Finance Act, 1954, s. 28).

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than seven years before death (although if the donor dies at any time within the fifth year after making the gift, the value of the property the subject of the gift is for estate duty purposes reduced by 15 per cent.; if he dies within the sixth year it is reduced by 30 per cent.; and if he dies within the seventh year it is reduced by 60 per cent.) gifts made in consideration of marriage by a parent or grandparent to either spouse or by one spouse to the other excepted as to the first £5,000 (or £1,000 if made by any other person). Gifts forming part of deceased's reasonable normal expenditure and gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personality from the day after the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest is charged on all unpaid instalments from twelve months after death.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or delivered. The name and address of sender should be inside and (not too prominent) on the outside of every parcel, and preferably be to the left of and at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas letters intended for insurance or any parcels for abroad; but if on foot or cycle not more, without notice, than 22 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is. or I. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay a clearance fee of 2s. 9d. if any duty be payable. Senders can undertake to pay customs charges of Irish Republic and some        countries (a deposit is required). The sender of a parcel from the Channel Islands may also pay the customs charges etc., at the time of posting.

AIR MAIL SERVICES

For mode of packing, prohibitions, limits of size, &c., see Post Office Guide.

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe, for which no special air mail marking is required. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet PL285).

Air letter forms, postage 0d., may be sent to all countries. Enclosures are not permitted. You may get the special forms at post offices or use privately-manufactured forms which bear a statement that they have been approved by the Post Office, with the approval number. Unapproved forms will be treated as ordinary air mail letters.

Printed papers, Phonopost Packets, Samples, Small Packets (to countries which admit them) and Newspapers may be sent by air to countries outside Europe at the rates shown in col. 4 below. Minimum charge for Small Packets 1s. 6d. For Phonopost, see note below. NEWSPAPERS: Publications registered at the P.O. as newspapers may be sent

at the reduced rates indicated in the footnote below. There is no air mail service to Europe for these items. If the quickest transmission is desired, the letter post rate should be paid.

European Countries (and The Azores)

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offers earlier delivery. The rates are:—

Letters, 0d. for the first ounce,  
5d. for each additional ounce,

Postcards, 5d.

For Gibraltar and Malta the rates are:

Letters, 5d. for the first ounce,  
2d. for each additional ounce.

Postcards, 5d.

Air mail labels should not be used.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1205-7.

Countries Outside Europe

Rates for letters, postcards and printed papers, etc. appear below; for air parcel rates see pp. 1205-7.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above; Air Parcel Rates, pp. 1205-7. For details of insurance and times of posting at London Chief Office and of transmission to principal cities, consult P.O. Air Mail Leaflet at any Post Office.

## GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matter should be addressed

to the Controller, Export Licensing Branch, Board of Trade, Hillgate House, 35 Old Bailey, E.C.4.

Under the Exchange Control Act, 1947, senders of trade letter packets or parcels exceeding £2,000 in value to most foreign countries, includ-

ing the U.S.A., and also to Canada, must furnish with each consignment a currency declaration (form C.D.6) which, with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £100 in value must furnish with the packet or parcel a currency declaration C.D.6.

**PROHIBITED AND DUTIABLE ARTICLES.**—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes, Phonopost Packets and Small Packets (to those countries which accept them) or in Letters.

**CERTIFICATE OF POSTING.**—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1d.).

**RECORDED DELIVERY** (inland, not to Irish Republic). Charge: 9d.—This service provides for a record of posting and delivery. Advice of delivery, further 9d. at time of posting, 1s. 0d. after time of posting. Money and jewellery are not allowed, and contents must not exceed £2 in value. The service does not apply to parcels.

**UNPAID PACKETS**, except Business Reply packets and redirected parcels are charged double postage on delivery; **UNDERPAID PACKETS**, double the deficiency.

**UNDELIVERABLE POSTAL PACKETS.**—*Inland packets chargeable with a postage of 4d. or more, undelivered, are returned to sender without charge, if his address is found either outside or inside. If the sender's address is not available, letters containing nothing of importance are destroyed; packets containing anything of importance, and parcels, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. Packets chargeable with postage not exceeding 4d. (1) Those bearing on the outside the name and address of the sender are returned direct and unopened. (2) Those not bearing on the outside the name and address of the sender and not marked "Newspaper Post" or posted subject to the special conditions under which rebate of postage has been allowed, are opened by an officer deputed for the purpose. If they contain the sender's address, they are returned to him unless the contents consist only of newspapers, magazines or commercial advertising material. (3) Those not bearing on the outside the name and address of the sender and marked "Newspaper Post" or posted subject to the special conditions under which rebate of postage has been allowed, are destroyed unopened. (4) Those not bearing on the outside the name and address of the sender which when opened are found to contain only newspapers, magazines or commercial advertising material are destroyed. British packets undelivered abroad are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Parcels further incur other charges unless abandonment is requested at the time of posting.*

**REPLY COUPONS**, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate by surface route from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 1s. 3d.; (valid within the Commonwealth and Irish Republic only), 7d. Sold at chief offices.

**POSTE RESTANTE** (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should

have the words "Poste Restante" to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 1 month; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

**REDIRECTION.**—(1) By agent of addressee: Packets other than parcels and business reply may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. Parcels may be re-directed free of charge, within the same time limits, only if the original and the corrected addresses are both within the same local parcel delivery area (or within the London Postal Area). Registered packets, which must be taken to a Post Office, are re-registered free only up to day after delivery.

(2) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of letters, &c., should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months (except for parcels re-directed outside the local parcel delivery area; see above); thereafter for each different surname and each new address costs 5s. for 12 months, and 10s. for each subsequent year. Separate forms must be filled in for the forwarding of telegrams.

**REGISTRATION, INLAND.**—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 3s., exclusive of postage. Advice of delivery, further 9d. at time of posting, 1s. after time of posting. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any packet apparently meant for registration and wrongly posted (3s. less any prepaid excess postage); (b) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10s. or more in value (3s.).

**COMPENSATION, INLAND.**—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to recorded delivery packets, unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. Registered letters and parcels (including items sent to the

**Irish Republic:** The fees for registration are 3s. covering compensation up to £100; 3s. 3d., £200; 3s. 6d., £300; 3s. 9d., £400 (maximum). (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) **Recorded delivery packets:** Maximum compensation £2 provided no contents inadmissible. **Unregistered parcels and unregistered packets** conveyed by Express Messenger all the way: Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by registered letter post in one of the special envelopes sold officially (see p. 1199) and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, is £5. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

**REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN** (except for parcels and printed paper items posted in bulk), is in force to all countries with the exception of Chagos Islands, Maldives Islands, or North Vietnam. No compensation is payable for the loss of or damage to valuable articles or other items sent in unregistered letter. Fee 3s. If claimed within a year, compensation (in the U.K., £3 8s.) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

**INSURANCE, BRITISH COMMONWEALTH AND FOREIGN**, may be effected on packets to many countries at the following rates:—3s. 2d. for £28; 2d. each further £14 up to 7s. 6d. for £392 and 7s. 8d. for £400 (lower maxima in many countries). For H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as letters; other valuable articles should be sent insured parcels, or as "insured boxes."

**COMPENSATION** up to a maximum of 100s. may be given for loss or damage in the U.K. to uninsured parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

**INSURED BOX POST.**—Jewellery and precious articles (not letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

**CASH ON DELIVERY SERVICE, INLAND** (not to or from Irish Republic, nor to H.M. Ships).—A sum (Trade Charge) up to £50 can, under certain conditions, be collected from addressee and remitted to sender of parcel or registered letter posted at Money Order Office. Fees (extra to first class postal charge): For Trade Charge up to £10, 3s. 6d., £25, 4s. 0d., £50, 4s. 6d.

**CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.**—Applicable to parcels only, but not to all countries, to H.M. Naval and Military

Forces and R.A.F. serving overseas. Fees for collection: 4d. for Trade Charge (amount to be collected) not exceeding £1, rising to maximum, which is usually £40 (fee 8s. 6d.), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, further fee (4d. in U.K.) not prepayable. If Trade Charge cannot be collected, special rules for undeliverable C.O.D. parcels apply.

**EXPRESS and SPECIAL SERVICES (INLAND).**—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. (1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 3s. per mile, or part of a mile, with 4d. on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. Waiting fees: 10 minutes free, each further 10 minutes or less, 1s. 1d.—(2) *After transmission by post*, on addressee's application (3s. per mile, or part of a mile, and 6d. for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (3s. + postage). This service is restricted to First Class letters and to parcels. Packets must be marked "Special Delivery," and letters bear a broad blue or black vertical line back and front. A similar line must be drawn completely round a packet or parcel. (4) *Special delivery on Sunday of postal packets (except parcels) handed in on Saturdays.* Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) available only: (1) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (2) Good Friday: to London only from towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Trafalgar Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London 4 p.m.—6.30 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is 9s. 0d. in addition to postage. Not available for parcels. (5) (Railx.) Postal packets not liable to registration are despatched by rail, met, and specially delivered in Great Britain, Douglas (I.O.M.), Northern Ireland (Belfast, Larne and Londonderry only), Jersey and Guernsey. Inclusive charges irrespective of weight but not exceeding 1 lb., 20s. 0d. but packets handed in in Northern Ireland or forwarded from Jersey and Guernsey to Great Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of telegram, of railway charges, and of Service (1) at both ends of its journey. It should be marked "Railway Parcel, to be handed to Post Office messenger at ..... Station."

**RAILWAY LETTERS, &c.**—A First Class letter, not liable to registration, may be handed in at the parcel or passenger booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between

Great Britain and Jersey, Guernsey and Douglas (I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): Between stations in Great Britain, Jersey and Guernsey: not over 2 oz., 1s. 3d.; not over 4 oz., 2s. 2d.; not over 1 lb. (maximum) 3s. 4d. From stations and ports in Great Britain, Jersey and Guernsey to stations in Northern Ireland or Douglas (Isle of Man): not over 2 oz., 1s. 7d.; not over 4 oz., 2s. 4d.; not over 1 lb. (maximum) 3s. 7d. From Douglas (Isle of Man) to a station in Northern Ireland: not over 2 oz., 1s. 7d.; not over 4 oz., 2s. 4d.; not over 1 lb. (maximum) 3s. 7d. From stations and ports in Great Britain, Jersey, Guernsey, Douglas (Isle of Man) to stations in the Republic of Ireland: not over 2 oz. (maximum) 1s. 7d. For railway letters handed in at stations in Northern Ireland the railway fee is: not over 2 oz. (maximum) 8d. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, see preceding paragraph, Services (5) and (6).

**AIRWAY LETTERS.**—On certain internal air routes operated by the British European Airways Corporation and Cambrian Airways Ltd., First Class letters may be handed in at the airport of town terminal for conveyance by the next available direct air service to be transferred to the post at the distant airport or town terminal or to be called for at the airport or town terminal. Fees (besides postage): 2 oz. 3s. 7d.; 4 oz., 4s. 3d.; 1 lb. (maximum), 5s. 2d. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic or to any country overseas. Full information can be obtained from any office of B.E.A.C. or Cambrian Airways Ltd.

**INTERNATIONAL EXPRESS SERVICE.**—From the office of delivery by special messenger is available to or from certain countries. In some countries the service is restricted to certain towns. 2s. is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P.O. Guide.)

**POST CARDS (Inland).**—Minimum size  $3\frac{1}{2} \times 5\frac{1}{2}$  in., maximum  $4\frac{1}{2} \times 9\frac{1}{2}$  in. Cards outside these sizes will eventually be charged extra. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under  $\frac{1}{16}$ th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

**BUSINESS REPLY SERVICE (Inland, excluding Irish Republic).** This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of 1d. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

**POSTAGE FORWARD PARCEL SERVICE.**—This service enables a person or firm to receive parcels from clients without prepayment of postage. A special label is used for this service and a licence to do this must be obtained from the local Head Postmaster.

**ARTICLES FOR THE BLIND (Inland, including Irish Republic).** Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable

of easy examination in the post. Postage free.

**BLIND LITERATURE, COMMONWEALTH AND FOREIGN** (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

**SAMPLE POST (not to Irish Republic).**—For abroad the sample post is restricted to (a) samples of merchandise of no commercial value which are sent free of charge to advertise it and which are not intended for sale; (b) tubes of serum or vaccine, or medicines which are urgently required and difficult to obtain and are sent in the public interest by officially recognized laboratories or institutions. Packets must be capable of easy examination in the post. (See p. 1194.)

**SMALL PACKETS POST (Commonwealth & Foreign).**—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (See p. 1194.)

**NEWSPAPER POST (INLAND).**—For newspapers "registered at the P.O." (p. 1194).

Copies of registered newspapers may be posted by the publishers or their agents in wrappers open at both ends, in unsealed envelopes approved by the Post Office for the purpose or without covers and tied with string which can be removed without cutting. Wrappers and envelopes must be prominently marked **NEWSPAPER POST** in the top left-hand corner and be easily removable for the purpose of examination. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undeliverable and reference to a page.

Newspapers posted by the public or supplements to registered newspapers despatched apart from their ordinary publications are transmitted under the conditions governing the First or Second Class Letter Services.

**STAMPS, ENVELOPES, POST CARDS, &C.** Stamps of reigns before that of King George V are no longer valid.

**POSTAGE STAMPS** (used also for receipts, telegrams, and certain Inland Revenue duties) are sold for the respective values of 1d., 2d., 3d., 4d., 5d., 6d., 7d., 8d., 9d., 10d., 1s., 1s. 6d., 1s. 9d., 2s., 5s., 10s., and £1. Books containing 6 each at 4d., 2s.; 6 each at 1d., 12 each at 4d., 4s. 6d.; 12 each at 5d., 5s.; 18 each at 4d., 6s.; 4 each at 1d., 14 each at 4d.; 12 each at 5d., 10s.; Rolls of 1d., 2d., 3d., 4d., 5d., or 6d. stamps are also sold.

**REGISTERED LETTER ENVELOPES** with a 3s. 5d. embossed stamp (3s. for registration and 5d. for postage) are of three sizes: G,  $6\frac{1}{2}$ " by  $3\frac{1}{2}$ " 3s. 8d. each; H, 8" by  $4\frac{1}{2}$ " 3s. 9d. each; K,  $11\frac{1}{2}$ " by 6" 4s. 0d. each.

**FORCES AIR LETTER FORMS** issued against purchase of 4d. stamp.

**LETTER CARDS** with 4d. stamp: 5d. each; with 5d. stamp: 6d. each.

**POST CARDS** with impressed 4d. stamp: 5d. each. **EMBOSSSED ENVELOPES** with 4d. stamp: A ( $5\frac{1}{2}$ " by  $3\frac{1}{2}$ " 5d. each; B ( $9\frac{1}{2}$ " by  $4\frac{1}{2}$ " 6d. each. With 5d. stamp: A ( $5\frac{1}{2}$ " by  $3\frac{1}{2}$ " 6d. each; B ( $9\frac{1}{2}$ " by  $4\frac{1}{2}$ " 7d. each.

**Air Letter Forms** impressed with 9d. stamp, 9d. each. Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms or newspaper-wrappers may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

## MONEY ORDERS

Advice of Payment: 9d. inland (and to Irish Republic), 9d. overseas orders (to certain countries).

Payment may be stopped (see *od.*); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

*Inland Ordinary Money Orders (and to Irish Republic).*

The poundage charged is, for sums not exceeding £10, 2s. *od.*; and for each additional £10, 2d., to £50 (maximum), 2s. 8d. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of certain Revenues (*e.g.*, Income Tax) if demand note is produced (see Post Office Guide).

*Inland Telegraph Money Orders (and to Irish Republic).*

Money may be transmitted by this means from most Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day, Boxing Day and Good Friday special arrangements apply (see Post Office Guide).

Poundage at the following rate, plus cost of official Telegram of Advice, 5s. for Inland Orders and 6s. for Irish Republic Orders.

	Poundage
Up to £10 .....	2s. 6d.
Over £10 and up to £20 .....	2s. 8d.
Over £20 and up to £30 .....	2s. 10d.
Over £30 and up to £40 .....	3s. 0d.
Over £40 and up to £50 .....	3s. 2d.

*Ordinary Money Orders for Abroad.*

Poundage, up to £2, 2s; £5, 3s.; £10, 4s., and thereafter 2s. per £10 or part thereof. Limits of amount vary according to destination but in any case may not exceed £40; validity varies between one and twelve months (see Post Office Guide).

*Telegraph Money Orders for Abroad.*

Poundage as below, plus cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries).

	Poundage
Up to £2 .....	3s. 6d.
Over £2 and up to £5 .....	4s. 6d.
Over £5 and up to £10 .....	5s. 6d.
Over £10 and up to £20 .....	7s. 6d.
Over £20 and up to £30 .....	9s. 6d.
Over £30 and up to £40 .....	11s. 6d.

Application to remit money orders to countries outside the Scheduled Territories (formerly known as the Sterling Area) must be made on a special declaration form upon which the purpose of the remittance must be stated. This form is obtainable at any money order office, where it may be ascertained whether any particular country with which a money order service is in operation is outside the Scheduled Territories.

### POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and/or paid in many countries within the Commonwealth and in a few other countries. Transmission of postal orders to any country outside the Scheduled Territories (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are paid (but not issued) in Irish Republic. They are printed with a counterfoil, for 1s. and every multiple of 6d., up to 5s., for 6s., and by 1s. steps up to £1 1s. then for £2 and every multiple of £1 up to £5. Adhesive, unmarked current British Postage Stamps not exceeding two

in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage: 1s., 3d.; 1s. 6d. to £1 1s., 4d.; £2 to £5, 6d. The name of payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

### INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 5s. *od.* (to Irish Republic 12 words or less 6s. *od.*), each further word 5d. Standard Greetings telegrams on appropriately designed forms in golden decorative envelopes cost 5s. 6d. for 12 words or less, each extra word 5d. Greetings telegrams for special occasions on a large *de luxe* folded card with matching envelope cost 7s. *od.* for 12 words or less, each extra word 5d. Greetings telegrams may be tendered by telephone or handed in any day prior to day of delivery. Priority rate (not available to or from Irish Republic) 2s. extra.

### Overnight Telegram

An Overnight telegram may be sent between 11 a.m. and 10.30 p.m. for delivery, normally by first post, the following morning. On days when there is no postal delivery, Overnight telegrams are held until the next postal delivery. The charge is 2s. 6d. for 12 words or less and 2½d. for each extra word. Charges are rounded down to the nearest 1d. The Overnight service is not available to the Irish Republic. A redirection charge of 5s. *od.* per telegram is made if the original and new addresses are in the same delivery area or London Postal District. In all other cases the redirection charge is at the ordinary inland rate. Telegrams, except Press telegrams, handed in on *Sundays* and (exc. Scotland) *Good Friday* or *Christmas Day* are charged 2s. 6d. extra. Replies may be prepaid within the limits of 2s. 6d. (minimum) and £1 (maximum) (Irish Republic 7s. *od.* (minimum) and £1 (maximum)); the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph, telex or telephone account rendered by the Post Office, or its value refunded to sender, the addressee or person applying on behalf of the sender of the original telegram, on completion of the declaration on the back of the voucher. Receipt for charges free on request. Certified copy 2s. 6d.; application to the local Head Postmaster must be within 3 months of the date of sending. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that any necessary charge will be collected on delivery.

TELEGRAPH OFFICE ALWAYS OPEN IN LONDON: — Trafalgar Sq., 24-28 William IV Street, W.C.2.

### OVERSEAS TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to places abroad are shown below and on pp. 1205-7. The minimum charge for an ordinary telegram is as for 7 words. To any place in the British Commonwealth the full rate does not exceed 1s. *10d.* per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge is 9s. 6d. for 11 words or less (including the indica-

tion=GLT=) and *rd.* for each additional word except to Bermuda, Canada, Cyprus, Jamaica, Trinidad and Tobago and certain Commonwealth points in the Caribbean to which lower charges apply, and they are normally delivered the day following the day of handing in.

Most countries admit Letter Telegrams at half the full rate for messages in plain language of a lengthy though less urgent character for which the minimum charge is as for 22 words including the appropriate indication=ELT= for European countries and =LT= for countries outside Europe. ELT messages are not delivered until at least 5 hours from the time of handing in and LT messages normally during the day following.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in facsimile to many places in the world. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Post Office or Overseas Telegraph Office.

### RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The charge for radiotelegrams is *rs. 8d.* per word (standard rate) for all vessels other than (1) British trawlers and (2) British vessels REGULARLY engaged in voyages not exceeding 1,000 miles to or from a port in the British Isles. Radiotelegrams at the Standard rate should be addressed Portlhead Radio unless the sender nominates another coast station. Radiotelegrams for British trawlers should be charged at the reduced rate of *rs. 5d.* per word and addressed Wick Radio unless the sender nominates another coast station. Radiotelegrams for British vessels REGULARLY engaged in voyages not exceeding 1,000 miles to or from a port in the British Isles should also be charged at the reduced rate of *rs. 5d.* per word and addressed to the nearest coast station unless the sender nominates another coast station. The address should contain (1) the name or rank of the addressee, (2) the name of the ship and (3) the name of the coast station in the British Isles if the sender knows that the ship is within range of that station; or the name of a foreign coast station if the message is to be routed through such a station.

Radiotelegrams may be sent to H.M. Ships in the Home Fleet or based on the Home Station at a reduced rate of *8½d.* a word. Total charge is rounded down to nearest *rd.* The charge for messages to H.M. Ships in foreign waters or proceeding to and from a foreign naval station is *rs. 1d.* a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine"), (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels in Home Waters at a reduced rate of *8½d.* per word. Total charge is rounded down to nearest *rd.* Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words "R.A.F. Vessel" before the name of the ship.

The minimum charge is as for seven words.

### RADIOTELEPHONE SERVICE

Radiotelephone services are available between telephone subscribers (but not from coin-box telephones or call offices unless the caller is a holder of a telephone credit card) in Great Britain, Northern Ireland, the Channel Islands and the Isle of Man and suitably equipped ships. The service is generally

available at all hours of the day and night, but the periods of communication with a particular ship vary with the ship's position and are dependent on radio conditions.

Calls are normally made through the coast stations, listed below, and callers should ask the local exchange telephone operator for SHIPS' TELEPHONE SERVICE adding, if known, the telephone number and name of the coast station through which the call should be made. If the name of the coast station is not known the caller will be connected to the nearest coast station. When connected to the coast station operator, the caller should ask for SHIPS' RADIOTELEPHONE CALL giving the name of the ship and the name (or designation) of the person required.

Anglesey Radio.....	0407 83 541
Cullercoats Radio.....	0894 4 23479
Humber Radio.....	Mablethorpe 3447
Ilfracombe Radio.....	Ilfracombe 3453
Land's End Radio.....	0736 77 493
Niton Radio.....	0983 73 495
North Foreland Radio....	0843 20592
Oban Radio.....	0024 2059
Portpatrick Radio.....	0776 81 311
Stonehaven Radio.....	0569 2917
Thames Radio (restricted short range VHF services)	0843 20592
Wick Radio.....	0955 2271

There is also a restricted short range radiotelephone service available through Clyde Radio. To obtain calls through this service subscribers should ask the local exchange telephone operator for CLYDE RADIO VHF RADIOTELEPHONE SERVICE 0475 22255.

Charges vary according to the position of the ship. Ships in Zone A (All waters within the limits 13°W, 9°E, 45°N and 63°N) the charge is *rs. 6d.* for a 3 minute call (minimum charge) and *4s. 2d.* per additional minute. Ships in Zone B (All Northern waters beyond Zone A) and within the limits 35°W, 35°E and 35°N and the whole of the Mediterranean Sea) the charge is *£1 16s.* for a 3 minute call (minimum charge) and *rs. 5d.* per additional minute. Ships in Zone C (All waters beyond those defined in Zones A and B) the charge is *£3* for a 3 minute call (minimum charge) and *£1* per additional minute.

The service is available, for calls to and from H.M. Ships, subject to the approval of the Duty Commander M.O.D. Navy, through whom all calls to H.M. Ships should be booked. The charges are the same as those for merchant ships but as H.M. Ships do not normally keep watch for private radiotelephone calls from the shore, no attempt should be made to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on the ship. The caller must be able to give the name of the coast station through which the call is to be made, or the approximate position of the ship at the time the call is required.

The holder of a telephone credit card issued in Great Britain, Northern Ireland, the Channel Islands or the Isle of Man may use it to make radiotelephone calls to ships at sea from any telephone in this country (including coin-box telephones and call offices) and have the charges debited to his own account.

### INLAND TELEPHONES

The quarterly rental for single exclusive lines is *£4.* For shared service, in which two subscribers share one line but have practically the same facilities as those provided by individual lines, each subscriber pays *£2* per annum less than for exclusive line service. A condition of telephone service is that all new lines removing residential

subscribers since January, 1948, are liable to share their lines if called upon to do so. Subscriber trunk dialling (STD) facilities are provided at an increasing number of exchanges. Local and dialled trunk calls from these exchanges are charged in *2d.* units (*6d.* from pay-on-answer coin-box lines): the length of time per unit depends on the distance of the call, from four minutes for a local call to eight seconds for distances over 50 miles. Additional time is allowed during the cheap after 6 p.m. and weekend rates.

From other exchanges local calls are charged  $2\frac{1}{2}d.$  from residence telephones, *3d.* from business telephones and *4d.* from a call office or coin-box line where STD is not available. All trunk calls are obtained via the operator. Operator-controlled trunk calls from any exchange have a three minute minimum charge which varies with the distance but does not exceed *4s.* (*7s.* to Irish Republic from non-coin-box telephones). Operator-controlled calls made from coin-box lines are charged *1s.* extra (*6d.* during the cheaper rates). Trunk calls via the operator are cheaper if made after 6 p.m. or at weekends. Personal calls (to specified person) *2s.* *od.* extra, if the person cannot be found nothing further is charged. For fuller information see Preface to Telephone Directory, Dialling Instruction Booklet (where appropriate) and Post Office Guide.

#### TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is from £160 per annum (depending upon the equipment required). Charges for inland calls between exchanges 35 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are less than charges for telephone calls; to extra-European countries the charges are generally the same as for telephone calls, *i.e.* £1 per minute and in some cases £1 5s. per minute. The minimum call charge is three minutes except for subscriber-dialled calls to the U.S.A., New Zealand, Canada and Europe where the minimum call charge is one minute. Automatic equipment allowing messages to be sent at the maximum speed of 400 characters (about 70 words) per minute can be rented in addition. Descriptive booklet available from all Telephone Managers; for local address see Telephone Directory.

#### DATTEL SERVICES

Data transmission facilities are provided to cater for transmission speeds ranging from 50 to 2400 bits per second. They are:

**Datel 100:** This service uses private telegraph circuits and the public telex network with maximum transmission speeds of 100 and 50 bits per second respectively. The service has been extended internationally using the public telex network for transmission to several countries in Western Europe.

**Datel 200:** This service provides for the transmission of data in both directions simultaneously at speeds up to 200 bits per second on telephone circuits using Post Office modems. Service is available to certain Western European countries.

**Datel 300:** This is a low cost data collection system operating at about 100 characters per second over the public telephone network. Complete outstation equipment is provided by the Post Office together with the instation modem. Two systems will be provided. The card system transmits information from 80 column punched cards and a numeric keyboard. The tape system will transmit information from paper tape or edge punched cards. Both systems should be available by late 1969.

**Datel 600:** This provides for transmission of data on telephone circuits at speeds up to 600 bits per

second, and on certain connections, 1200 bits per second, using Post Office modems. The service has been extended internationally for transmissions between the United Kingdom and the majority of W. Europe and N. America.

**Datel 2400:** This service, using Post Office modems, enables transmission at a rate of 2,400 bits per second over private speech type circuits with improved characteristics. The modem has optional facilities to send at speeds of 600 or 1,200 bits per second over the public telephone network.

**Wideband circuits:** Specially designed circuits for the transmission of high speed data can be made available if required. (Introduction was planned for late 1969 of the Datel 48K service using Post Office modems capable of transmitting and receiving data at speeds of 48,000 bits per second over wideband circuits.)

#### OVERSEAS TELEPHONES

Callers on STD exchanges in Birmingham, Edinburgh, Glasgow, Liverpool London and Manchester can dial calls themselves to Belgium, France, Germany, Luxemburg, the Netherlands, Norway and Switzerland. For calls via the operator London subscribers on automatic exchanges should dial:—

to Austria, Belgium, Germany, Italy, Luxemburg, the Netherlands and Scandinavia 104  
to the rest of Europe..... 104  
to places outside Europe..... 108  
to Ships (ask for Ships Telephone service)... 100  
All other callers should ask for the Continental or International service.

#### Continental Service.

The rates quoted are for calls from all places in Great Britain, Northern Ireland, the Isle of Man and the Channel Islands to any place in the country concerned, except the U.S.S.R., where there are two charging zones. For *Personal Calls* an additional charge equivalent to one minute's conversation is made. The minimum charge for a call made via the operator is that for a 3-minute call. Directly dialled calls are charged in *2d.* units.

#### International Service.

Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to some countries are limited. A surcharge is made for personal calls to Canada, Brazil, Chile, Israel, Lesotho, Mexico, South Africa, Swaziland and the mainland of the U.S.A. For all other countries a *person to person call* may be booked without extra charge; if it fails (or the call is cancelled) a *Report Charge* is made (*4s.* to *9s.*) but not if the call matures. On Radio Services a time allowance is made for interruption by adverse conditions. At night (10 p.m. to 10 a.m.) and on Sundays a reduced rate is available on the services with Canada, U.S.A. and Cuba. Reduced Sunday rates apply also in the services with most countries in Central America and in certain other services.

#### Calls to Ships

For calls to ships at sea, see p. 1201, col. a.

#### GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

(For Express Services see p. 1198).

On SUNDAY THROUGHOUT THE U.K. there is no delivery of letters, &c. There is a collection for night despatch in most places. IN LONDON, the Trafalgar Square Branch Office is open always. OUTSIDE LONDON, some Head Offices and a few country telegraph Sub-offices open 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps,

telegrams, registration and with some exceptions telegraph money orders up to £5, Savings Bank withdrawals up to £10, and National Savings Stamps encashment up to £3; all other offices are closed.

**Christmas Day, Boxing Day and Good Friday**

*London:* There are ■ deliveries of letters and parcels on Christmas Day, Boxing Day or Good Friday. All offices except Trafalgar Square Branch office are closed.

*Outside London:* In Scotland, normal weekday deliveries except on Christmas Day when there are no deliveries of letters and parcels; offices open as usual on Boxing Day and Good Friday; on Christmas Day some town sub-offices are shut, and after noon many chief offices are open only for telegraph

business. In England, Wales and Northern Ireland there are no deliveries of letters and parcels on Christmas Day or Boxing Day; on Good Friday there is one delivery; offices ■ closed on Christmas Day; head offices and some country telegraph sub-offices are open from 9 a.m. to 10.30 a.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

#### Other Public Holidays

In Scotland on New Year's Day office hours and classes of business are as on Sundays; no delivery of letters and parcels and no collection. Post Office counter and postal services ■ other public holidays in the U.K., vary in accordance with local conditions—details may be obtained from the local Head Postmaster.

### BROADCAST RECEIVING LICENCES

(Licence costs shown are those effective from Jan. 1, 1969)

#### Sound

Broadcast receiving licences (excluding television) may be obtained at most post offices, price £1 5s. 0d.

#### Television

Broadcast receiving licences (for radio and television) are obtainable at most post offices for £6 (excluding colour) and £11 (including colour). The colour television licence includes reception of television programmes in black and white.

If the applicant holds an unexpired (£1 5s. 0d.) sound licence, it should be surrendered when the sound and television licence is applied for and ■ refund of 2s. 1d. will be given for each unexpired month or part of a month. Similarly if an applicant holds an unexpired (£6) combined sound and television (excluding colour) licence, it should be surrendered when the sound and television (including colour) licence is applied for and a refund of 10s. will be given for each unexpired month or part of ■ month.

#### Blind Persons

Blind persons who produce the required certificates of registration may obtain free sound licences or concessionary sound and television (excluding colour) licences for £4 15s. 0d. and a sound and television (including colour) licence for £9 15s. 0d.

#### Demonstration Licences

Demonstration licences for radio and television dealers cover the use of radio and television sets (in monochrome and colour) at their business

premises only, including separate premises used solely for repairing and testing radio and television sets. They are issued for 5s.

#### Licensing Requirements

One licence (which needs to be a colour television licence if a colour television set is used anywhere in the household) covers any number of sets in a single household; but lodgers, paying guests and occupiers of flats (even if not self-contained) count as separate householders and require separate licences. Licences are required both for self-contained sets and for loudspeakers worked by wire extensions from main receiving sets outside the household concerned. Licences are also required by those using apparatus which is rented or hired. A separate licence is necessary for a radio or television set fitted in a motor car.

#### Period of Validity

An initial licence (except a demonstration licence) is dated to expire twelve months from the last day of the month preceding that of issue. A renewal licence covers a period of twelve months from the date on which the previous licence expires. The demonstration licence is valid for a period of seven years dating from the first day of the month in which it is sold.

#### Savings Facilities

Special savings cards, for use with 2s. 0d. National Savings stamps, are available at all post offices. These cards are intended to help licensees save towards the cost of their renewal licence.

### LETTER POST SINCE 1897

The following list shows the cost of sending within the United Kingdom ■ ordinary letter not exceeding the weight shown:

After June 22, 1897.....	4 oz. for 1d.
Nov. 1, 1915.....	1 oz. for 1d.
	■ oz. for 2d.
	4 oz. for 2½d.
June 3, 1918.....	4 oz. for 1½d.
	6 oz. for 2d.
June 1, 1920.....	3 oz. for 2d.

Gold Coin.—Gold ceased to circulate during the First World War. Under Exchange Control laws it is now illegal for a resident in the U.K. to hold gold coin other than collectors' pieces. Even collectors, under the Exchange Control (Gold Coins Exemption) Order of April 27, 1966, must apply for official permission if their collection includes more than four gold coins minted after 1837. A new collector, however, must obtain permission to hold even one such coin.

The English sovereign, however, is still used as currency in certain Middle East countries and to meet foreign demand during the years 1958–1968 the Royal Mint struck some 44.5 million sovereigns.

Silver.—Prior to 1920 our silver coins were struck from standard silver—an alloy of which 925 parts in 1,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. From January 1, 1947 all 'silver' coins, except Maundy money, have been struck from cupro-nickel—an alloy of copper 75 parts and nickel 25 parts. Maundy coins since 1947 have been struck from standard silver.

Nickel-brass is an alloy of copper 79 parts, zinc ■ parts and nickel ■ part.

Bronze, introduced in 1860 to replace copper, is ■ alloy of copper 97 parts, zinc 2½ parts and tin ½ part. These proportions are subject to slight variation.

The 'Remedy' is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Mint.

The legal weight of a penny is one-third of ■ ounce avoirdupois.

Legal tender of coin.—Gold, dated 1838 onwards, if not below least current weight, is legal tender to any amount. Silver, dated 1816 onwards, and cupro-nickel are legal tender for sums up to £2, nickel-brass 3d. up to two shillings and bronze up to one shilling. Farthings ceased to be legal tender on December 31, 1960, the halfpenny on August 1, 1969 and the half-crown on January 1, 1970.

Royal Mint Output in 1968.—Production of coins at the Royal Mint during 1968 was 1,357 million pieces, some 10 million pieces fewer than in the previous year and some ■ per cent. below the record number of 1,400 million pieces produced in 1966. Of this total production, 1,058 million coins were struck at Tower Hill and 299 million in South Wales. For the United Kingdom, almost 901,000,000 coins were struck including some 523,600,000 decimal coins. The figures for £s.d. coins were:—half-crowns, 14,163,200; florins, 17,566,000; sixpences, 76,004,000; threepences, 48,100,800; pennies (a new record figure), 170,400,000; halfpennies, 46,226,400; gold sovereigns, 4,703,000; silver Maundy coins, 3,940. The

decimal coins struck in anticipation of the change-over to decimal currency on February 15, 1971 were:—ten new pence, 167,142,000; five new pence, 76,590,000; two new pence, 220,600,000; one new pence, 25,800,000; half new pence, 6,400,000; coins used in five-coin decimal souvenir sets, 27,054,000.

Apart from the comparatively small number of coins issued in the sets, the decimal bronze coins—the two, one and half new pence coins—will remain in bank storage until February 15, 1971, when they will become legal tender. New cupro-nickel coins issued totalled £19,840,000 of which £18,290,000 represented ■ expansion of the amount of this coin in circulation.

The recovery of silver coins continued and, out of the £8,959,827 mixed white coin sorted, £691,827 of silver coin was withdrawn for refining. Overseas coinages were struck for a total of 28 Commonwealth and foreign countries comprising 79 denominations in ten different alloys.

Over the five years 1964–68, average annual production at the mint totalled 1,285,366,881 pieces, a rise of almost 70 per cent. over the annual average figure for the previous five year period.

The foundation stone of the new Royal Mint at Llantrisant near Cardiff was laid on February 19, 1968 and work on the completion of Phase 1 of the building programme (the decimal Mint) made it possible to start production by the end of the year. The new Mint which will eventually cover 30 acres compared with the cramped 4½ acre site at Tower Hill has as its initial task the production of the bronze decimal coins needed to replace the present penny, threepenny piece and sixpence. While work on the first phase of the new Mint was being carried out, a temporary factory at Bridgend commenced production of the new decimal coins—the first time since the seventeenth century that coins of the realm had been struck in Wales.

## BANK NOTES

Bank of England notes are issued in denominations of 10s., £1, £5 and £10 for the amount of Fiduciary Note Issue and the value of the gold held in the Issue Department of the Bank. All notes are legal tender in England and Wales, and notes of denominations less than £5 are legal tender in Scotland and Northern Ireland. The Bank of England is the only bank legally obliged to change a note on demand for the equivalent in other notes and coin.

Notes for £20, £50, £100, £500 and £1,000 which were issued until April 22, 1943, ceased to be legal tender on May 1, 1945. However, on February 28, 1969, notes of these values were still outstanding to ■ total of some £985,000.

The £10 note—after an interval of 21 years—was restored on February 21, 1964. This completed the series bearing portraits of the Queen, plans for which were announced in November, 1959.

The last of the old white £5 notes, dated up to September 20, 1956, and the £5 notes issued between 1957 and 1963, bearing a portrait of Britannia, ceased to be legal tender on March 13, 1961 and June 27, 1967, respectively. The old series of £1 notes issued during the years 1928 to 1960 and the 10s. notes of the same type issued from 1928 to 1961—those without the portrait of the Queen—ceased to be legal tender on May 28 and October 29, 1962, respectively. Bank notes which are no longer legal tender are payable when presented at the head office of the Bank of England in London.

A new series of bank notes, generally smaller in size than the notes at present in issue, is to be introduced over the next few years. The first of the series will be a £20 note, which the Bank of England plan to introduce sometime during the current year. There will be no 10s. note in the new series as the present 10s. note was replaced by the 50 new penny coin in October 1969. Because the £1 note in the new series will be similar in size to the present 10s. note, it will not be introduced before 1972 so as to allow adequate time for the latter's withdrawal. The £5 and £10 denominations will follow at an even later date.

Note circulation is highest at the two peak spending periods of the year—around Christmas and the beginning of August. On December 21, 1968, it reached a peak of £3,385 million, which was £172 million more than the peak Christmas figure for 1967.

£5 notes continue to enjoy popularity and now represent over 53 per cent. of the total value of notes in circulation as against 14 per cent. in 1956. On the other hand, the proportion of £1 notes has dropped from 76 per cent. to just over 30 per cent. and that of 10s. notes from 5 per cent. to slightly less than 3½ per cent. The percentage of £10 notes in circulation has increased steadily since 1965 and now represents almost 9 per cent. of the total. On February 28, 1969, the values of notes in circulation were:—£10: £278,000,000; £5: £1,677,000,000; £1: £957,000,000; 10s: £109,000,000.

Partly because of a rapidly-growing preference by the public for new notes rather than used ones, the demand for new bank notes has increased greatly in recent years. Between 1957 and 1969 the average life of a £1 note fell from nineteen months to ten and that of a 10s. note from six months to five and a half, and consequently it has been necessary for the Bank of England to print more notes per head of the population than in comparable countries abroad.

In an attempt to alleviate the high cost of note replacement the 50 new penny coin was introduced in October, 1969, in place of the 10s. note. The

Bank of England has been conducting a campaign in conjunction with the commercial banks to encourage the public to accept more used but clean notes and this has been successful in reducing the public's requirements of new notes of the lower denominations. The success of a further campaign to stimulate the use of higher sum notes is evidenced by the continued increase in the number of £5 and £10 notes issued and the £20 note is being introduced to encourage this trend further.

*Other bank notes.*—Bank Notes are issued by four Scottish banks—Bank of Scotland, British Linen Bank, Clydesdale Bank Ltd., Royal Bank of Scotland Ltd. (notes of the two constituent banks—Royal Bank of Scotland and National Commercial Bank of Scotland Ltd.—are being withdrawn from circulation). All issue notes for £1, £5, £10, £20 and £100. There are no Scottish 10s. notes. Scottish notes are not legal tender but in Scotland they enjoy a status equal to that of the Bank of England note.

*Channel Isles and the Isle of Man.*—The States of Jersey and Guernsey issue notes for £5 and £1, and are now issuing 50 new penny coins of their own design, to replace their 10s. notes which are gradually being withdrawn from circulation. The Government of the Isle of Man issues notes for £5, £1 and 50 new pence—the latter notes being issued from August, 1969, to replace the 10s. notes formerly issued. These are legal tender only in their respective islands.

Although none of the series of notes specified above are legal tender in the United Kingdom they are generally accepted by the banks irrespective of their place of issue. At one time English banks made a small commission charge for handling Scottish and Irish notes but this was abolished some years ago.

*Currency Notes.*—Under the provision of the Currency and Bank Notes Act, 1928, Currency Notes (popularly known as Treasury Notes) of the value of 10s and £1 were replaced by the issue of Bank of England notes of the same denominations as from November 22, 1928.

## DECIMAL CURRENCY IN THE UNITED KINGDOM

(For Decimal Currency Board, see p. 376)

The Decimal Currency Act 1967, gave effect to proposals described in the White Paper, "Decimal Currency in the United Kingdom" (Cmnd. 3164) presented to Parliament in December, 1966. From February 15, 1971, the £ will be the major unit of currency as at present but it will be divided into 100 minor units. The minor unit is to be called "the new penny" and there will be six denominations in the new coinage, one of which has already replaced the 10s. note. The £1, £5 and £10 notes will remain in use, although a new series of notes will be introduced over the next few years beginning with the £20 note in 1970.

### Halsbury Committee Recommendations

A Committee of Inquiry headed by the Earl of Halsbury recommended in July, 1963, by a majority of four to two the adoption of the £-cent system (now to be known as the "£-new penny" system). The United Kingdom is at present the only major country in the world without a decimal currency. Decimalization will harmonize money and other calculations. This will not only speed money calculations and the mechanics of payment and change-giving in shops, but it will also make it possible for ordinary calculators to be used for monetary calculations, thereby enabling calculating machines to be standardized and manufacturers to

keep down costs and compete more easily abroad. In schools, teaching time will be saved.

In the view of the Halsbury Committee there were eight features which were desirable in a decimal currency system.

The system (1) should be a consistent decimal system and should seek to maximize the benefits hoped for from decimalization; (2) should be simple; (3) should be flexible, and convenient for money transactions of all values; (4) should be lasting. The introduction of the system; (5) should not affect the international standing of sterling; (6) should not present people with undue difficulties of adaptation in the changeover period; (7) should not result in avoidable price changes; (8) should not result in unduly high machine and non-machine costs. The Committee pointed out that there was no single decimal system which would incorporate all these desirable features fully. In their Report they analysed the merits of 25 systems—four of them in detail—and concluded that the final choice must lie between the £-cent and 10s.-cent systems. In both systems the smallest coin would be worth the equivalent of 1.2d.

### The Government's View

The Government considered that the practical advantages of retaining the £ were decisive and it therefore followed the majority report of the

Committee which favoured the £-cent system. This decision was not based primarily on the "international case" for the £, ■ there are other arguments for retaining the £ which are more obvious and concerned with sterling ■ a domestic currency. A high value major unit has advantages in ■ highly developed industrial and trading economy and, as the Halsbury Committee's majority report stressed, to halve the value of the major unit by adopting a 10s. system "seems to go against the economic logic of history". There are also both short and long term accounting and machine advantages in retaining the £. During the changeover, the costs of converting accounts in industry and commerce will be substantially lower ■ well as the costs of converting business machines. In the long term these advantages are also important in that the high value unit means ■ more efficient system and a more effective use of machinery. Furthermore, given that the importance of currency units changes ■ standards of living rise, there would need to be powerful reasons to justify ■ switch to a major unit with only half the value of the present £.

Retaining the £ avoids the need to find an acceptable name for ■ new major unit. A new name is required for the minor unit, which is to be called ■ "new penny" during the changeover period and the adjective "new" is to be gradually dropped after the transition.

#### ■ Associability ■

The 10s. system has some short term advantages of what the Halsbury Committee called "associability", which ■■ the ease with which it is possible to translate sums of money from £ s. d. to decimals and back and to other factors which affect the willingness of the general public to adapt themselves to the new system. However, the £ has a very important "associability" advantage because it retains the most important unit of our money values as a familiar point of reference. The problem of conversion from £ s. d. to decimals will be largely overcome by conversion tables and dual-price labels in shops. Although the £ system has coinage disadvantages—mainly the introduction of ■ new halfpenny—compared with the 10s. system, these disadvantages are essentially transitional or short term. There should be no significant difference between the two systems in the cost of the changeover or in price increases stemming from the change.

As well as being the domestic currency of the United Kingdom the £ sterling is also widely used throughout the world as a trading and ■ reserve currency. The Government considered that there was a danger that if ■ new unit were introduced some of those who at present hold or use sterling might cease to do so.

#### The New Coinage

With one exception, the Government has followed the Halsbury Committee recommendations on the choice of coins, weight-value relationship and the denomination of the halfpenny. The

exception is the 20 new penny piece which the Government considers would be unpopular.

In addition to the five recommended coins, which are described in the Act, ■ new seven-sided coin—a 50 new penny piece—was introduced in October, 1969, to replace the 10s. note. This move is not really part of the decimalization process and was made primarily for economic reasons: although costing more to produce, a coin will last probably 40–50 years, compared with ■ average life in circulation of no more than 5½ months for ■ 10s. note.

The complete new coinage will, therefore, comprise the six coins shown below. The 5 and 10 new penny coins were put into circulation on April 23, 1968: this was made possible because, except for their design, they are identical in value, size, weight and metal content with the shilling and florin respectively, and are completely interchangeable with them. Although contained in souvenir coin sets—which have been on sale since June, 1968—the other three recommended coins will not become legal tender until Decimal Day. These coins differ in size, weight and value from the coins they replace.

Following the changeover in February, 1971, there will be a transitional period during which £sd and decimal coins will circulate together. This period is necessary because it is impossible to convert the country's five million accounting, vending and other similar machines overnight. The Decimal Currency Board considers that it is unlikely that the period will exceed 18 months and that it may well be shorter.

To avoid confusion with the 20 coin during the changeover period, the former halfpenny was demonetized ■ August 1, 1969. The date announced for demonetization of the halfcrown was Jan. 1, 1970. The major tasks in the preparatory period were nearing completion in 1969 and these include the minting of 4,150 million decimal coins and their distribution throughout the United Kingdom; the conversion of the five million machines already referred to; and the making-known by intensive publicity campaigns of the issues involved—and the need on the part of management, industry, commerce and the man-in-the-street to plan accordingly.

The Decimal Currency Act 1969 supplements the 1967 Act and provides for the arrangements to effect the changeover to decimal currency. Briefly, the Act covers the following points: (a) The new coins become legal tender from Decimal Day and the £sd coins may be used in either currency until the end of the transitional period when the penny, threepence and sixpence will be demonetized; (b) authorization is given to the whole new penny conversion table (see p. 1211) which appears as ■ schedule to the Act and Bank balances will be converted in accordance with this table. Periodical payments (excluding those under Friendly Society and Industrial Assurance Company contracts and those relating to wages and salaries) will also be converted from this table; (c) any Bills of Exchange,

Denomination	Present Value	Metal	Standard Weight (grams)	Standard Diameter (centimetres)
New halfpenny.....	1.2d.	bronze	1.78200	1.7145
New penny.....	2.4d.	bronze	3.56400	2.0320
2 New pence.....	4.8d.	bronze	7.12800	2.5910
5 New pence.....	2s.	cupro-nickel	5.65518	2.3595
10 New pence.....	2s.	cupro-nickel	11.31036	2.8500
50 New pence.....	10s.	cupro-nickel	13.5	3.0

cheques, warrants, etc. drawn before Decimal Day in £sd will be treated as though they were drawn with a corresponding amount in the new currency, converted in accordance with the whole new penny table and holdings of registered stocks will also be converted from this table (see below); (d) February 11-13, 1971 will be non-business days for the purposes of the Bills of Exchange Act, 1882, thus enabling the Banks to remain closed for normal business on those days; bills of Exchange falling due on February 11 and 12 will be payable on February

10 and those which fall due for payment on February 13-14 will be payable on February 15, 1971; (e) the part of the 1967 Act which required the Decimal Currency Board to consider claims for compensation in respect of loss or expenditure caused by the change to the new currency, was repealed; (f) the Act also sets new legal tender limits, deals with Maundy Money, makes illegal the melting down of current or demonetized coins and authorizes the minting of new coins in the future in metals other than cupro-nickel, silver or bronze.

Official Conversion Tables (see (b) and (c) above)

Use of the new halfpenny table below is not mandatory, but all concerned with the retail prices of goods and services are expected to use it wherever practicable. The whole new penny table is for use in banking and accounting transactions where the new halfpenny will not be used.

FUEL AND POWER MEASURES

British Thermal Unit (B. Th. U.)=The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39.1 degrees F. = B.Th.U.=1.055 06kJ.

Unit of electricity (kilowatt-hour)=Output of 1,000 watts for one hour. 1 k.w.h.=3.413 B.Th.U.

Therm=100,000 B.Th.U.=29.3 k.w.h.=105.506 MJ.

Atmosphere=pressure = 14.223 lb. per sq. in.= 1 kilogram per sq. cm.

Petroleum

Barrel=35 Imperial gallons=4.2 U.S. gallons.

Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi-Arabia, Iraq, etc.) varies from 7.0 barrels per metric tonne to 7.7 barrels, and in the smaller oil producing states (e.g., Albania) is as low as 6.7 barrels per tonne. Crude petroleum in the United Kingdom, 7.355 barrels per metric tonne (2,205 lbs.); 7.472 barrels per long ton (2,240 lbs.).

HALL-MARKS ON GOLD AND SILVER WARES

London (Goldsmiths' Hall) Date Marks  
From 1478 to 1976.

	Lombardic, double cusps .....	1478-9 to 1497-8		Roman letter, small	1736-7 ■ 1755-6
	Black letter, small.....	1498-9 „ 1517-8		Old English, capitals	1756-7 ■ 1775-6
	Lombardic .....	1518-9 „ 1537-8		Roman letter, small...	1776-7 „ 1795-6
	Roman and other capitals.....	1538-9 „ 1557-8		Roman letter, capitals	1796-7 „ 1815
	Black letter, small ...	1558-9 „ 1577-8		Roman letter, small...	1816-7 „ 1835-6

	Roman letter, capitals	1716-7 ■ 1735-6			

Hall-marks are the symbols stamped on gold or silver articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold or silver articles are required by law to be hall-marked before they are offered for sale. Hall-marking was instituted in 1300 under a statute of Edward I.

Normally a complete modern hall-mark consists of four symbols—the maker's mark, assay office mark, standard mark and date letter. Additional marks have been authorized from time to time.

**Maker's Mark.**—Instituted in 1363, the maker's mark was originally a device such as a bird or *fleur-de-lys* and now consists invariably of the initials of the Christian and surnames of the maker or of the firm.

**Assay Office Mark.**—The existing assay offices and their distinguishing marks are:—

LONDON (Goldsmiths' Hall).

A leopard's head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From

1697-1720 this mark was used in London for gold only and not for silver.

BIRMINGHAM.....An anchor.  
SHEFFIELD.....A York rose.  
EDINBURGH.....A castle.

Offices formerly existed in other towns, e.g. Chester, Glasgow, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

Standard Mark.—Instituted in 1544. The current legal standards and their marks ■ ■ follows:—

SILVER.—Sterling silver (92.5 per cent. silver) is marked by English assay offices with a *lion passant* and by the Edinburgh Assay Office with ■ *thistle*. A full-length figure of *Britannia* was impressed on

fine silver plate (95.84 per cent. silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

GOLD.—22 carat articles (91.6 per cent. gold) are marked by English offices with a crown followed by the figure 22; by the Edinburgh office with the figure 22 following the standard mark as for sterling silver (see above).

18 carat articles (75 per cent. gold) are marked by English assay offices with ■ crown followed by the figure 18.

All British assay offices mark 14 carat gold (58.5 per cent. gold) with the figures 14.585 and 9 carat gold (37.5 per cent. gold) with the figures 9.375.

Date Letter.—Instituted in 15th Century. The date letter denotes the year in which an article was assayed or hall-marked. Each alphabetical cycle

has ■ distinctive style of lettering or shape of shield. The date letters are different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. The date letter is changed at the London Office in May each year and at Birmingham and Sheffield in July. Specimen shields and letters used by the London Office in each period from 1438 to date are shown below.

### OTHER MARKS

Duty Mark.—In 1784 an additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty in 1890.

Silver Jubilee and Coronation Marks.—Voluntary marks were authorized to be used at manufacturers' request to commemorate the silver jubilee of King George V and Queen Mary and the Coronation of Her Majesty Queen Elizabeth II. The Jubilee Mark was used on silver made in 1933, 1934 and 1935 and the Coronation Mark on gold and

silver with date letter 1952/3 or 1953/4.

Foreign Wares.—Since 1842 foreign wares imported into Great Britain have been required to be hall-marked before sale. The marks consist of the importer's mark, ■ special assay office mark (see below), the decimal figures denoting fineness (together with the carat figure in the case of gold) and the annual date letter. The current assay office marks for foreign wares are as follows:—

LONDON.—The sign of the Constellation Leo.

BIRMINGHAM.—Equilateral triangle.

SHEFFIELD.—The sign of the Constellation Libra.

EDINBURGH.—St. Andrew's Cross.

### CLOSE TIMES

Wild Birds.—The *Protection of Wild Birds Act, 1954*, lays down a close season for wild birds (other than Game Birds) from February ■ to August 31 inclusive, each year. Exceptions to these dates are made for—

*Capercaillie* and (except Scotland) *Woodcock*, Feb. 1—Sept. 30.

*Snipe*, Feb. 1—Aug. 11.

*Wild Duck and Wild Goose* (in or over water areas), Feb. 21—Aug. 31.

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, wigeon) and certain wild geese (bean, Canada, pink-footed and white-fronted).

Certain wild birds may be killed or taken at any time by authorized persons—cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, starling, stock-dove and wood pigeon; and, in Scotland only, goosander, red-breasted merganser and rock-dove. The sale of Wild Bird's Eggs is prohibited, except that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. 1—

April 14 inclusive.

Game Birds—In each case the dates are inclusive:—

*Black Game*—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

\**Grouse*—Dec. 11 to Aug. 11.

\**Partridge*—Feb. ■ to Aug. 31.

\**Pheasant*—Feb. 2 to Sept. 30.

\**Ptarmigan*—(Scotland only) Dec. ■ to Aug. 11.

It is also unlawful (in England and Wales) to kill the game marked \* on a Sunday or Christmas Day.

Hunting and Ground Game.—There is no statutory close-time for fox-hunting or rabbit-shooting, nor for hares; but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March ■ to July 31 inclusive under ■ penalty of a pound. The First of November is the recognized date for the opening of the fox-hunting season, which continues till the following April. *Otter-hunting* lasts from mid-April to mid-September.

*Deer*.—The Deer Act, 1963, effective from Nov. 1, 1963, imposed the following close times. *Red Deer and Sika Deer*: Stags, May 1-July 31; Hinds, March 1-Oct. 31. *Fallow Deer and Roe Deer*: Buck, May 1-July 31; Doe, March 1-Oct. 31. Under the Act it is an offence to take or wilfully kill deer of any species from one hour after sunset to one hour before sunrise.

## WEIGHTS AND MEASURES

The Weights and Measures Act of 1963, enacts the legal measures for Great Britain, basing them upon "United Kingdom primary standards" in the custody of the Standards Department of the Board of Trade. The primary standards are the yard, pound, metre and kilogramme. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1963 defines the GALLON as the space occupied by 10 pounds weight of distilled water of density 0.998 859 gramme per millilitre weighed in air of density 0.001 217 gramme per millilitre against weights of density 8.136 grammes per millilitre. The METRE and the LITRE have the meanings assigned by order of the Board of Trade to reproduce in English the international definition of these measures in force at the time of making of the orders.

New definitions for an international yard and pound were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States:

international yard = 0.914 4 metre.

international pound = 0.453 592 37 kilogramme.

The following list shows the definitions of measures set out in the Weights and Measures Act, 1963 and some useful conversions. See also Conversion Tables, p. 1218.

## Measurement of Length

## Imperial Units

Mile = 1,760 yards.  
Furlong = 220 yards  
Chain = 22 yards.  
YARD = 0.914 4 metre.  
Foot =  $\frac{1}{3}$  yard.  
Inch =  $\frac{1}{36}$  yard.

1 mil =  $\frac{1}{1000}$  inch.  
12 inches (in.) = 1 foot (ft.).  
3 feet = 1 yard (yd.).  
6 feet = 1 fathom.  
22 yards = 1 chain = 100 links.  
10 chains = 1 furlong.  
8 furlongs = 1 mile = 1,760 yards.

## Metric Units

Kilometre = 1,000 metres.  
METRE (see above) = 1.094 yards.  
Decimetre =  $\frac{1}{10}$  metre.  
Centimetre =  $\frac{1}{100}$  metre.  
Millimetre =  $\frac{1}{1000}$  metre.

1 millimetre (mm.) = 1 centimetre (cm.) = 0.393 701 inch.  
10 centimetres = 1 decimetre (dm.) = 3.937 011 inches.  
10 decimetres = 1 METRE (m.) = 1.093 614 yards.  
10 metres = 1 dekametre (dam.) = 10.936 143 yards.  
10 dekametres = 1 hectometre (hm.) = 109.361 43 yards.  
10 hectometres = 1 kilometre (km.) = 0.621 371 mile.

A kilometre is approximately five-eighths of a mile, so that 8 kilometres may be regarded as 5 miles.

## Measurement of Area

## Imperial Units

Square mile = 640 acres  
Acre = 4,840 square yards.  
Rood = 1,210 square yards.  
SQUARE YARD = a superficial area equal to that of a square each side of which measures one yard  
Square foot =  $\frac{1}{9}$  square yard  
Square inch =  $\frac{1}{144}$  square foot.

144 sq. inches = 1 sq. foot.  
9 sq. feet = 1 sq. yard.  
4 roods = 1 acre.  
10 square chains = 1 acre = 4,840 sq. yards.  
640 acres = 1 square mile.

## Metric Units

Hectare = 100 ares.  
Dekare = 10 ares.  
Are = 100 square metres  
SQUARE METRE = a superficial area equal to that of a square each side of which measures one metre.  
Square decimetre =  $\frac{1}{100}$  square metre.  
Square centimetre =  $\frac{1}{100}$  square decimetre.  
Square millimetre =  $\frac{1}{100}$  square centimetre.

1 sq. centimetre = 0.155 sq. inch.  
1 sq. METRE = 10.763 9 sq. feet = 1.195 99 sq. yds.  
1 are (a.) = 0.098 8 rood.  
1 hectare (10,000 sq. metres) (ha.) = 2.471 05 acres.  
1 sq. kilometre = 0.386 102 sq. mile.

## Measurement of Volume

## Imperial Units

CUBIC YARD = a volume equal to that of a cube each edge of which measures one yard.  
Cubic foot =  $\frac{1}{27}$  cubic yard.  
Cubic inch =  $\frac{1}{1728}$  cubic foot.

1,728 cubic inches = 1 cubic foot.  
27 cubic feet = 1 cubic yard.

## Metric Units

CUBIC METRE = a volume equal to that of a cube each edge of which measures one metre.  
Cubic decimetre =  $\frac{1}{1000}$  cubic metre.  
Cubic centimetre =  $\frac{1}{1000}$  cubic decimetre.

1 cubic metre (cbm. or m<sup>3</sup>.) = 35.314 7 cu. ft. = 1.307 95 cu. yds.  
(1 stere (= 1 cu. metre) is used as a unit of measurement of timber.)  
1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

## Measurement of Capacity

## Imperial Units

GALLON (see above)  
Quart =  $\frac{1}{4}$  gallon.  
Pint =  $\frac{1}{2}$  quart.  
Gill =  $\frac{1}{4}$  pint.  
Fluid ounce =  $\frac{1}{20}$  pint.

4 gills = a pint.  
2 pints = 1 quart.  
4 quarts = 1 GALLON  
1 gallon = 160 fluid ounces.

Bushel = 8 gallons.  
Peck = 2 gallons

2 gallons = 1 peck.  
4 pecks = 1 bushel.  
8 bushels = 1 quarter.  
A chaldron is 36 bushels = 4  $\frac{1}{2}$  quarters.

= 277.274 cubic inches.  
1 hectolitre = 2.749 69 bushels.  
1 hectolitre per hectare = 1.11 bushels per acre.  
1 quintal = 3.674 3 bushels.  
1 quintal per hectare = 1.49 bushels per acre.

## Measurement of Capacity—continued

Fluid drachm =  $\frac{1}{8}$  fluid ounce. | See Apothecaries Weight (below)  
Minim =  $\frac{1}{60}$  fluid drachm.

## Metric Units

Hectolitre = 100 litres.

LITRE = The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under a pressure of one standard atmosphere (14.696 lb. per sq. inch).

Decilitre =  $\frac{1}{10}$  litre.

Centilitre =  $\frac{1}{100}$  litre.

Millilitre =  $\frac{1}{1000}$  litre.

■ centilitre (cl.) = 0.070 4 gill.

■ decilitre (dl.) = 0.175 98 pint.

■ LITRE\* (1/1,000 cubic metre) (lit.) = 1.759 8 pints = 0.88 Imp. quart = 0.22 Imp. gallon = 61.025 5 cu. inch = 0.035 315 7 cu. ft.

■ hectolitre (hl.) = 21.997 5 Imp. gallons = 26.417 1 U.S. gallons = 2.749 Imp. bushels = 2.837 7 U.S. bushels.

## Measurement of Mass or Weight

## Imperial Units

Ton = 2,240 pounds.

Hundredweight = 112 pounds.

Cental = 100 pounds.

Quarter = 28 pounds.

Stone = 14 pounds.

POUND = 0.453 592 37 kilogram.

Ounce =  $\frac{1}{16}$  pound.

Dram =  $\frac{1}{16}$  ounce.

Grain =  $\frac{1}{7000}$  pound.

7000 grains (gr.) = 1 pound (lb.).

16 drams (dr.) = 1 ounce (oz.).

16 ounces = 1 POUND (lb.).

14 pounds = 1 stone.

28 pounds = 1 quarter (of ■ cwt.).

■ quarters (112 lb.) = 1 hundredweight (cwt.).

20 hundredweight (2,240 lb.) = 1 ton.

20 pennyweights (dwt.) = 1 Troy ounce.

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same ■ the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. A Troy

POUND (= 5,760 grains) is legalized in the United States.

Ounce apothecaries' = 480 grains.

Drachm =  $\frac{1}{3}$  ounce apothecaries'.

Scruple =  $\frac{1}{3}$  drachm.

See Apothecaries Weight (below)

Ounce Troy = 480 grains

Pennyweight = 24 grains

## Metric Units

Metric ton = 1,000 kilograms.

Quintal = 100 kilograms.

1 centigram (cg.) = 0.154 32 grains.

1 decigram (dg.) = 1.543 2 grains.

■ gramme (gm.) = 15.432 4 grains.

1 dekagram (dag.) = 5.643 8 drams.

1 hectogram (hg.) = 3.527 4 oz.

■ KILOGRAM (kg.) = 32.150 7 oz. Troy = 35.273 4 oz. Avoirdupois = 2.204 62 lb. Avoirdupois.

1 myriagram = 22.046 2 lb. Avoirdupois.

1 quintal (q.) = 100 kg. = 220.5 lb. Avoirdupois = 1.968 4 cwt.

1 tonne (t.) = 0.984 207 U.K. or long ton = 1.102 31 U.S. or short ton.

## Measurement of Electricity

Units of measurement of electricity, the AMPERE (unit of electrical current), the OHM (unit of electrical resistance), the VOLT (unit of difference of electrical potential) and the WATT (unit of electrical power) have the meanings assigned to them respectively by order of the Board of Trade, to reproduce in English the international definition in force at the date of the making of the order.

Kilowatt = 1000 watts.

Megawatt = 1,000,000 watts.

## Apothecaries' Weight

## Measures of Weight.

20 grains = 1 scruple (℞).

3 scruples = 1 drachm (℥).

8 drachms = 1 ounce.

## Measures of Capacity.

60 minims (min.) = 1 fluid drachm.

8 fluid drachms = 1 fluid ounce.

5 fluid ounces = 1 gill.

4 gills = 1 pint.

■ pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the ■ as the Avoirdupois drachm, and is spelled differently. A fluid ounce of distilled water ■ a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to TWO Avoirdupois drams.

## Angular or Circular Measure

60 seconds (") = 1 minute (').

60 minutes = 1 degree (°).

90 degrees = 1 right angle or quadrant.

Diameter of circle  $\times 3.141 6$  = circumference.

Diameter squared  $\times .7854$  = area of circle.

Diameter squared  $\times 3.141 6$  = surface of sphere.

Diameter cubed  $\times .523 6$  = solidity of sphere.

One degree of circumference  $\times 57.3$  = radius.\*

Diameter of cylinder  $\times 3.141 6$ ; product by length or height, gives the surface.

Diameter squared  $\times .7854$ ; product by length or height, gives solid content.

■ Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of ■ yards = 1 chain.

## Water Measures.

Cubic inch..... = 252.458 grains.

Gallon (277.274 cu. in.)... = 10 lb. (distilled).

Cubic foot..... = 62.321 lb.

35.943 cubic ft. (24 gals.)... = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, ■■■■■ 18 gals.

**THERMOMETER COMPARISONS**

CONVERSION.  
 Let F = Fahr.  
 " C = Cent.  
 " R = Réaumur.

NOTE.—The normal temperature of the human body is 98.4° F., or 37° C., or 99.5° R. Freezing point = 32° F., 0° C., 0° R.; Boiling point = 212° F., 100° C., 80° R. "Absolute" temperature is temperature reckoned from "Absolute Zero," which is at 273° C. below 0° F., and 218.4° below 0° R., and is denoted by the letter "K."

Below 32° F., subtract 32.

$$F = \frac{9C}{5} + 32$$

$$C = \frac{5(F - 32)}{9}$$

$$R = \frac{4(F - 32)}{9}$$

An Inch of Rain on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100.992 tons.  
 Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lbs. in addition to its own weight.

Million, Billion, etc.  
 Value in the United Kingdom

Million.....	thousand × thousand (10 <sup>6</sup> )
Billion.....	million × million (10 <sup>12</sup> )
Trillion.....	million × billion (10 <sup>18</sup> )
Quadrillion.....	million × trillion (10 <sup>24</sup> )

Value in U.S.A.

Million.....	thousand × thousand (10 <sup>6</sup> )
Billion.....	thousand × million (10 <sup>9</sup> )
Trillion.....	million × million (10 <sup>12</sup> )
Quadrillion.....	million × billion U.S. (10 <sup>15</sup> )

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

Royal 4to.....	=	12½	×	10	"
Imperial 4to.....	=	15	×	11	"
Crown Folio.....	=	15	×	10	"
Demy Folio.....	=	17½	×	11½	"
Royal Folio.....	=	20	×	12½	"
Music.....	=	14	×	10½	"

NOTE.—*Folio* means ■ sheet folded in half, *quarto* folded into four, and so on; thus, ■ crown 8vo page is one-eighth the size of ■ crown sheet. Books are usually bound up in sheets of 16 or 32 pages. *Octavo* books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

## INTERNATIONAL PAPER SIZES

Simplification of the large number of stock paper sizes in use in the United Kingdom has been proceeding since publication of British Standard 730 in 1937. Recommendations made by the International Organization for Standardization were accepted by the United Kingdom in 1959 and it is considered that general adoption of the international or A size will bring great economies to users of ■ paper.

The basis of the international series of paper sizes is ■ rectangle having an area of one square metre, the sides of which are in the proportion of  $1:\sqrt{2}$ . In other words, taking one side as X and the other as Y, this basic size provides the equation— $X:Y = 1:\sqrt{2}$ ; and  $X \times Y = 1$ . It may be noted that the proportions  $1:\sqrt{2}$  have a geometrical relationship, the side and diagonal of any square being in this proportion. As the basic size is one square metre in area, this means that  $X = 841$  millimetres and  $Y = 1,189$  millimetres. The effect of this arrangement is that if the short side is doubled or the longer side halved, i.e., if the area of the sheet is doubled or halved, the shorter side and the longer side of the new sheet are still in the same proportion  $1:\sqrt{2}$ . This feature is particularly useful where photographic enlargement or reduction is used, as the proportions remain the same.

Description of the A series is by the capital A followed by a figure. The basic size has the description A0 and the higher the figure following the letter, the greater is the number of sub-divisions and therefore the smaller the sheet. Half A0 is A1 and half A1 is A2. Where larger dimensions are required the A is preceded by a figure. Thus 2A means twice the size of A0; 4A is four times the size of A0.

It is an essential feature of these series that the dimensions are of the trimmed or finished sizes.

## 'A' SERIES OF TRIMMED SIZES

Designation	SIZE	
	mm	inches
A 0	841 × 1189	33·11 × 46·81
A 1	594 × 841	23·39 × 33·11
A 2	420 × 594	16·54 × 23·39
A 3	297 × 420	11·69 × 16·54
A 4	210 × 297	8·27 × 11·69
A 5	148 × 210	5·83 × 8·27
A 6	105 × 148	4·13 × 5·83
A 7	74 × 105	2·91 × 4·13
A 8	52 × 74	2·05 × 2·91
A 9	37 × 52	1·46 × 2·05
A 10	26 × 37	1·02 × 1·46

*Subsidiary Series.*—A series of B sizes has been devised for use in exceptional circumstances when sizes intermediate between any two adjacent sizes of the A series are needed.

## 'B' SERIES OF TRIMMED SIZES

Designation	SIZE	
	mm	inches
B 0	1000 × 1414	39·37 × 55·67
B 1	707 × 1000	27·83 × 39·37
B 2	500 × 707	19·68 × 27·83
B 3	353 × 500	13·90 × 19·68
B 4	250 × 353	9·84 × 13·90
B 5	176 × 250	6·93 × 9·84
B 6	125 × 176	4·92 × 6·93
B 7	88 × 125	3·46 × 4·92
B 8	62 × 88	2·44 × 3·46
B 9	44 × 62	1·73 × 2·44
B 10	31 × 44	1·22 × 1·73

In addition there is a series of C sizes which is used much less. A is for magazines and books, B for posters, wall charts and all other large items, C for envelopes particularly where it is necessary for ■ envelope (in C series) to fit into another envelope. The size recommended for business correspondence is A4.

*Long Sizes.*—Long sizes are obtainable by dividing any appropriate sizes from the two series above into three, four or eight equal parts parallel with the shorter side in such a manner that the proportions mentioned in paragraph ■ (above) are not maintained, the ratio between the longer and the shorter sides being greater than  $\sqrt{2}:1$ . In practice long sizes should be produced from the A series only.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the **■** may be. *Examples*—1 centimetre=0.394 inch and 1 inch=2.540 centimetres. 1 metre=1.094 yards and 1 yard=0.914 metre. 1 kilometre=0.621 mile and 1 mile=1.609 kilometres.

**SYMBOLS FOR CORRECTING PROOFS**

Supplied by **WILLIAM CLOWES & SONS LTD**, Beccles, Suffolk, Printers of "WHITAKER"

Letter(s) or word(s) requiring alteration should be struck through **IN INK** in the text and the substitution should be written in the nearest margin followed by / (the symbol used to denote that the marginal mark is concluded). Insertions should be indicated by  $\wedge$  or  $\wedge$  at the conclusion of the marginal mark *and* at the desired place in the text.

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Delete (take out)	$\mathcal{D}$ or $\mathcal{D}$	/ or — Vertical stroke to delete one or two letters; horizontal line to delete more	Take letter(s) or word(s) from beginning of one line to end of preceding line	<u>back</u> or <u>take back</u>	$\square$
Delete and close up	$\mathcal{D}$ or $\mathcal{D}$	$\mathcal{I}$ Strike out letter(s) not required and add "close up" mark above and below	Begin a new paragraph	<u>n.p.</u>	$\square$ before first word of new paragraph
Close up: delete space between letters	$\mathcal{C}$	$\mathcal{C}$ linking letters or words	No new para. here or run on previous matter with later matter	<u>run on</u>	$\curvearrowright$ between paras. or other matter
Use ligature (fi, fl, fil, etc.) or diphthong (æ, œ)	$\mathcal{C}$ enclosing ligature or diphthong required	$\mathcal{C}$ enclosing letters to be altered	Spell out in full the abbreviation, contraction, or figure	<u>spell out</u>	Encircle words, etc., or figures concerned
Insert space between letters or words	# $\wedge$	$\wedge$	Insert omitted portion of copy	<u>out - see copy</u>	$\wedge$ Attach the relevant copy to the proof, indicating omitted portion
Leave as printed (i.e. ■ cancellation of previous marking)	<i>stet</i>	.... under letter(s) or word(s) crossed out but to be retained	Inserted or substituted letter(s), figure(s), or sign(s) under which this is placed to be superscript (i.e. high alignment) <sup>1</sup>	7 (see footnote)	$\wedge$ for insertions For substitutions encircle letter(s), figure(s), or sign(s) to be altered
Invert type (of letter(s) upside down)	$\mathcal{D}$	Encircle letter(s) to be altered	Inserted or substituted letter(s), figure(s), or sign(s) over which this is placed to be subscript (low alignment) <sup>2</sup>	7 (see footnote)	$\wedge$ for insertions For substitutions encircle letter(s), figure(s), etc., to be altered
"Battered" letter(s) to be replaced by similar but undamaged characters	X	Encircle letter(s) to be replaced and write the correct letter(s) in the margin	Change to lower case	<i>l.c.</i>	Encircle letter(s) to be altered
Push down space or "high" letter(s) or word(s)	$\mathcal{I}$	Encircle space, letter(s), or word(s) affected	Replace "wrong fount" by letter(s) of correct fount	<i>w.f.</i>	Encircle letter(s) or word(s) to be altered
Transpose	<i>tr.</i> or <i>trs.</i>	$\mathcal{I}$ between letters or words, numbered when necessary	Change to capital letters	<i>caps.</i>	$\equiv$ under letter(s) or word(s) to be altered
Take letter(s) or word(s) from end of one line to beginning of next line	<u>take over</u> or <u>over</u>	$\square$	Change to small capitals	<i>s.c.</i>	$\equiv$ under letter(s) or word(s) to be altered

$\mathcal{D}$  indicates a superior (superscript) figure one

$\mathcal{I}$  indicates ■ inferior (subscript) figure two

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Use capital letters for initial letter(s) (as desired) and small capitals for rest of word(s)	caps & s.c.	≡ under initial letter(s) and ≡ under the remainder of the word(s)	Move lines to the left		at right side of group of lines to be moved (indicating approx. position)
Change to bold type		Draw wavy line under letter(s) or word(s) to be altered	Move portion of matter so that it is positioned  indicated		at limits of required position
Change to roman type		Encircle letter(s) or word(s) to be altered	Raise lines		over lines to be raised
Change to italic type		Draw this straight line under letter(s) or word(s) to be altered	Lower lines		under lines to be lowered
Letter(s) or word(s) to be underlined		under letter(s), word(s), etc., to be underlined	Correct the vertical alignment		
Equalize space between words	eq. #	between words	Straighten lines	==	== through lines to be straightened
Reduce space	less #	between words	Insert parentheses (round-shaped brackets)	(/ ) or (/ )/	^ ^
Space to be inserted between lines or paragraphs	# >	Amount of space should be indicated	Insert [square] brackets	[ / ] or [ / ]/	^ ^
To be placed in centre of line, etc.		Position to be indicated by	Insert hyphen	- /	^
Indent one en (approx. space occupied by n of type in use)	en 	indicating approximate position	Insert en (= half-em) rule (see above)	en /	^
Indent one  (approx. space occupied by M of type in use)	em 	Ditto	Insert one-em rule (see above)	em /	^
Indent two ems (approx. space occupied by MM of type in use)		Ditto	Insert two-em rule (see above)	2-em /	^
Move to the left		Ditto	Insert apostrophe	' /	^
Move to the right		Ditto	Insert single quotation marks	' ' / ' ' /	^ ^
Move lines to the right		at left side of group of lines to be moved (indicating approx. position)	Insert double quotation marks	" " / " " /	^ ^
			Insert ellipsis	... /	^
			Insert leader (visual guide to alignment in contents pages, etc.)		^ (three, two, or one dot)
			Insert shilling stroke (oblique)		^

Punctuation    > ^    > /    > ^    > /    @    @    ? ^    ? /    ! ^    ! /
