HIGHLANDS AND ISLANDS DEVELOPMENT BOARD

Bridge House, Bank Street, Inverness.

The Board, a grant-aided body, responsible to the Secretary of State for Scotland, has two broad objectives. These are (1) to assist the people of the Highlands and Islands to improve their economic

and social conditions; (2) to enable the Highlands and Islands to play a more effective part in the economic and social development of the nation. To this end the Board will concert, promote, assist or undertake measures for economic and social development.
Secretary, J. A. Mackaskill.

HISTORIC BUILDINGS COUNCILS

Under the *Historic Buildings and Ancient Monuments Act, 1953*, as since amended, these councils advise the Secretary of State for the Environment and the Secretaries of State for Scotland and Wales on the exercise of the powers contained in the Act to make grants and loans towards the repair or maintenance of buildings of outstanding historic or architectural interest, their contents and adjoining land, and, where necessary, to acquire such buildings or to assist the National Trusts or local authorities to acquire them.

Also under the *Town and Country Planning (Amendment) Act 1972*, to advise the Secretaries of State on their powers to make grants or loans towards the cost incurred in the promotion, preservation or enhancement of the character or appearance of outstanding conservation areas. In 1975-76 £2,250,000 is available for repair grants in England, £107,500 in Wales and £225,000 in Scotland. In addition, the amounts available for conservation grants are £1,250,000 in England, £50,000 in Wales and £100,000 in Scotland, where there is a further allocation of £100,000 for the Edinburgh New Town Conservation Area.

HISTORICAL MANUSCRIPTS COMMISSION *See Record Office*

ROYAL COMMISSION ON HISTORICAL MONUMENTS [ENGLAND]

Fortress House, 23 Savile Row, W.1
[01-734-6010]

The Royal Commission on Historical Monuments (England) was appointed in 1908 to survey and publish in inventory form an account of every building, earthwork or stone construction up to the year 1714. A new Royal Warrant in 1943 abolished the date limit and the Commissioners then set themselves a limit of 1850, but with discretion to record later buildings of outstanding significance. The Commission has published up to present date inventories covering in whole or in part eleven counties, four cities, Roman York and Roman London. It is a purely recording body and though the Commissioners may recommend that certain structures should be preserved, they have no power to implement their recommendations. The Commission is also responsible for the direction of the National Monuments Record, created in 1964, which includes the National Buildings Record begun in 1941, of which the Commissioners are the managing trustees.

Chairman, The Lord Adeane, P.C., G.C.B., G.C.V.O.
Commissioners, H. M. Colvin, C.B.E., F.S.A.; A. J. Taylor, C.B.E., F.S.A.; Prof. W. F. Grimes, C.B.E., D.Litt., F.S.A.; Prof. S. S. Frere, F.S.A.; Prof. R. J. C. Atkinson, F.S.A.; Prof. H. C. Darby, O.B.E., Litt.D., F.B.A.; Prof. G. Zarnecki, C.B.E., F.B.A., F.S.A.; H. M. Taylor, C.B.E., T.D., F.S.A.; Prof. J. K. S. St. Joseph, O.B.E., Ph.D., F.S.A.; A. R. Duffy, C.B.E., F.S.A.; P. ROYAL COMMISSION ON ANCIENT AND HISTORICAL MONUMENTS OF SCOTLAND

54 Melville Street, Edinburgh 3
[01-225-5994]

The Commission was appointed in 1908 to make an inventory of the Ancient and Historical Monuments of Scotland from the earliest times to 1707, and to specify those that seem most worthy of preservation. The terms of reference were extended by Royal Warrant dated Jan. 1, 1948, to cover the period since 1707 at the Commissioners' discretion. The National Monument Records of Scotland, a branch of the Commission housed in the same premises, contains an extensive collection of photographs, drawings and printed books relating to Scottish architecture, which may be consulted by members of the public.

HOME OFFICE

Whitehall, S.W.1

[01-213-3000]

The Home Office deals with such internal affairs in England and Wales as are not assigned to other Departments. The Home Secretary is the channel of communication between the Crown and the subjects of the realm, and between the U.K. Government and the Governments of the Channel Islands and the Isle of Man. He exercises certain prerogative powers of the Crown of which the most important are the prerogative of mercy and the maintenance of the Queen's Peace. He is also concerned with the administration of justice; criminal law; the treatment of offenders; probation; the prison service; public morals and certain public safety matters; the police, fire and civil defence services; immigration and nationality; community relations and community and urban programmes.

Other Home Office responsibilities include: addresses and petitions to the Queen and the preparation of presentations to Parliament; preparation of patents of nobility for peers and formal proceedings for the granting of honours; requests for the extradition of criminals; scrutiny of local authority byelaws; grant of licences for scientific experiments on animals; game laws and the protection of wild birds; cremation and burials, exhumation and removal of bodies; firearms; dangerous drugs and poisons; general policy on liquor licensing laws, gaming and lotteries; taxis; charitable collections and Charities Act 1960; theatre and cinema licensing; co-ordination of government action in relation to the voluntary social services; and sex discrimination policy.

[01-353-1066]

Established by the Betting and Gaming Act, 1960, as successor in title to the Racecourse Betting Control Board established by the Racecourse Betting Act, 1928.

Its function is to operate totalisators on approved racecourses in Great Britain, and it also provides off-course cash and credit offices. Under the Horse-race Totalisator and Betting Levy Board Act, 1972, it is now further empowered to offer bets at starting price (or other bets at fixed odds) on any sporting event.

Deputy Chairman, Sir Leonard Barford.
Members, Sir Alexander Glen, K.B.E., D.S.C.; Dame Elizabeth Ackroyd, D.B.E.; G. H. C. Ardron, M.B.E., Ph.D. (*Director-General*).

INDEPENDENT BROADCASTING AUTHORITY

70 Brompton Road, S.W.3
 [01-584-7011]

The Authority was created in July 1954 as the Independent Television Authority. In July 1972 it was renamed the Independent Broadcasting Authority and its functions extended to cover the provision of independent local radio. The Chairman and Members of the Authority are appointed by Ministers responsible for broadcasting matters. The eleven members of the Authority constitute the body which has the statutory task of providing the independent broadcasting services in television and radio. This task includes both the provision of the transmitting facilities and the general supervision of programmes and advertising. In both media, the Authority is required to obtain its normal programme supply from programme companies operating under contract to the Authority. Fifteen television programme companies hold contracts to provide programmes in the 14 independent television regions of Britain (two companies share the contract for London—one on weekdays, the other at weekends). They are financed by selling advertising time. The contractors pay a rental to the Authority to meet the I.B.A.'s own requirements, and an additional rental, which is calculated in relation to their profits, to the Exchequer to recognize their use of frequencies which are public assets. Under the terms of the Independent Broadcasting Act 1973, the I.B.A. has set up 19 independent local radio stations.

DEPARTMENT OF INDUSTRY

1 Victoria Street, S.W.1
 [01-215 7877]

The Department of Industry is responsible for general industrial policy, and for the industrial component of regional policy, including financial assist-

ance to industry under the Industry Act (except that certain regional industrial policy functions in Scotland and Wales are now exercised by the Scottish and Welsh Offices). It sponsors individual manufacturing industries, including iron and steel, aircraft and shipbuilding; it is responsible for two nationalised industries, the British Steel Corporation and the Post Office. The Department, is responsible for technical services to industry, and for industrial research and development, including civil aerospace research and the supervision of the industrial research establishments of the former Department of Trade and Industry. The Design Council and the National Research Development Corporation also come within its sphere.

CENTRAL OFFICE OF INFORMATION

Hercules Road, S.E.1

[01-928-2345]

The Central Office of Information is a common service department which produces information and publicity material, and supplies publicity services, for other Government departments which require them. In the United Kingdom it conducts Government display press, television and poster advertising (except for the National Savings Committee), produces and distributes booklets, leaflets, films, television material, exhibitions, photographs and other visual material; and distributes departmental press notices. For the overseas departments it supplies British Information posts overseas with press, radio and television material, booklets, magazines, reference services, films, exhibitions, photographs, display and reading room material; manages schemes for promoting the overseas sale of British newspapers and periodicals; arranges tours in the United Kingdom for official visitors from overseas. Administrative responsibility for the Central Office of Information rests with Civil Service Department Ministers, while the ministers whose departments it serves are responsible for the policy expressed in its work.

BOARD OF INLAND REVENUE

Somerset House, W.C.2

[01-438 6622]

The Board of Inland Revenue was constituted under the Inland Revenue Board Act, 1849, by the consolidation of the Board of Excise and the Board of Stamps and Taxes. In 1909 the administration of excise duties was transferred to the Board of Customs. The Board of Inland Revenue administers and collects direct taxes—mainly income tax, corporation tax, capital gains tax, capital transfer tax, stamp duty and petroleum revenue tax—and advises the Chancellor of the Exchequer on policy questions involving them. The Head Office is in London and there are Inspectors of Taxes offices and Collection offices throughout the United Kingdom. The Department's Valuation Office is responsible for valuing property for tax purposes, for compensation and for compulsory purchase and (in England and Wales) for local rating purposes. In 1974/5 Inland Revenue collected over £14,000,000,000 tax at a cost of approximately £250,000,000.

H.M. LAND REGISTRY

Lincoln's Inn Fields, W.C.2

[01-405 3488]

The registration of title to land was first introduced in England and Wales by the Land Registry Act, 1862. Many changes have been made to the original system by subsequent legislation and H.M. Land Registry operates today under the Land Registration Acts, 1925 to 1971. The object of registering title to land is for dealings with it to be made more simple and economical. This is achieved by maintaining a register of land owners whose title is guaranteed by the State and by providing simple forms for the transfer, mortgage and other dealings with real property. Under the Land Registration Act 1966, the voluntary first registration of land in non-compulsory areas was severely curtailed in order to facilitate an accelerated programme for the extension of the compulsory system to cover all the built-up areas of the country as soon as possible. The intention is that registration of title shall ultimately be universal throughout

England and Wales. Nevertheless, a great deal of land was formerly registered voluntarily in non-compulsory areas and it is still possible to register building estates, upon certain conditions, throughout the country. A great deal of land in non-compulsory areas is therefore already registered. H.M. Land Registry is administered under the Lord Chancellor by the Chief Land Registrar and the work is decentralized to a number of regional offices. The Chief Land Registrar is also responsible for the Land Charges Department and the Agricultural Credits Department.

LIBRARIES**THE BRITISH LIBRARY**

Store Street, W.C.1

[01-636 0755]

The British Library was established on July 1,

1973, under the British Library Act, 1972, to provide, on a national scale, comprehensive reference, lending, bibliographic and other services based on its vast collections of books, manuscripts maps, music, periodicals and other material.

The Library was created by bringing together under a management Board a number of national organizations to form three main Divisions. The Reference Division comprises the former library departments of the British Museum including the Newspaper Library at Colindale and Science Reference Library. The Lending Division comprises the former National Lending Library for Science and Technology and the former National Central Library. The Bibliographic Services Division incorporates the British National Bibliography and the (former British Museum) Copyright Receipt Office. There is also a Research and Development Department, and a Central Administration.

The Reference Division contains more than 9,000,000 printed books, about 80,000 Western and 35,000 Oriental manuscripts, and outstanding collections of newspapers, official papers, papyri, charters, seals, maps, music and postage stamps. Admission to the reading rooms for research is by ticket only. The Science Reference Library is the principal public reference library in the United Kingdom for contemporary literature of science and technology, and here no reader's ticket is necessary.

The Lending Division in Yorkshire operates a rapid postal loan or photocopy service for organizations and currently receives about 2,500,000 requests a year. Individuals should apply through their local libraries. The stock contains some 2,350,000 volumes of books and periodicals, about 1,500,000 documents in microfilm, and large quantities of semi-published materials such as reports, translations and theses.

MONOPOLIES AND MERGERS COMMISSION

New Court, 48 Carey Street, W.C.2
 [or-831 6111]

The Commission was established under the Monopolies and Restrictive Practices (Inquiry and Control) Act 1948 as the Monopolies and Restrictive Practices Commission and was reconstituted on subsequent occasions. It became the Monopolies and Mergers Commission when the Fair Trading Act, 1973, came into operation on November 1, 1973. The Commission has the duty of investigating and reporting on questions referred to it in accordance with the Act with respect to (a) the existence or possible existence of monopoly situations not registrable under the Restrictive Trade Practices Act, 1956, as extended by the 1973 Act, and relating to the supply of goods or services to the United Kingdom or part of the United Kingdom or to the supply of goods for export; (b) the transfer of a newspaper or newspaper's assets; (c) the creation or possible creation of a merger situation qualifying for investigation within the meaning of the Act.

In monopoly references (except those "limited to the facts") and in merger references it is the duty of the Commission to report on the effect of the facts which they find on the public interest and to consider and, if they think fit, to recommend the action to be taken to remedy or prevent adverse effects. In addition the Fair Trading Act, 1973, provides for references to the Commission on the general effect on the public interest of specified monopoly or other uncompetitive practices and of restrictive labour practices.

THE BRITISH MUSEUM

Great Russell Street, W.C.1
 [or-636 1551]

Antiquities Department: Egyptian, Greek and Roman, Mediaeval and Later, Oriental, Prehistoric and Roman-British Western Asiatic; also, Coins and Medals, Prints and Drawing, Ethnography. Main entrance, Great Russell Street, W.C.1; North entrance, Montague Place, W.C.1. Open weekdays (including Bank Holidays) 10 to 5 and Sundays 2.30 to 6. Closed on Good Friday, Christmas Eve, Christmas Day, Boxing Day and New Year's Day. The ethnographical collections are displayed in The Museum of Mankind at 6 Burlington Gardens, W.1. Opening times as above.

The British Museum may be said to date from 1753, when Parliament granted funds to purchase the collections of Sir Hans Sloane and the Harleian manuscripts, and for their proper housing and maintenance. The building (Montague House) was opened in 1759. The present buildings were erected between 1823 and the present day, and the original collection has increased to its present dimensions by gifts and purchases. The administrative expenses were estimated at £5,030,000 in 1976-77, and were met by a vote under "Museums, Galleries and the Arts", Class X of the Civil Estimates. The constitution of the British Museum was revised under the terms of the British Museum Act, 1963.

Under the provisions of the British Library Act 1972 and the British Library Act (Appointed Day) Order 1973, the Library Departments of the British Museum were transferred on July 1, 1973, from the responsibility of the Trustees of the British Museum to that of the British Library Board and became part of the British Library.

THE BRITISH MUSEUM (NATURAL HISTORY)

Cromwell Road S.W.7

[01-589 6323]

Open free on week-days (except New Year's Day, Good Friday, Christmas Eve, Christmas Day and Boxing Day) 10 to 6, and on Sundays from 2.30 to 6.

The Natural History Museum originates from the natural history departments of the British Museum, Bloomsbury. During the 19th century the natural history collections grew so extensively

that it became necessary to find new quarters for them and in 1881 they were moved to South Kensington. The British Museum Act, 1963, made the Natural History Museum completely independent with its own body of Trustees. The Zoological Museum, Tring, bequeathed by the second Lord Rothschild, has formed part of the Museum since 1938. Research workers are admitted to the libraries and study collections by Student's Ticket, applications for which should be made in writing to the Director. There are lectures for visitors at 3 p.m. on week-days and lecturers are also available at other times for special parties by arrangement with the Department of Public Services.

The administrative expenses were estimated at £3,771,000 in 1976-77.

MUSEUM OF LONDON

The Museum of London was due to open in December 1976 in its new building at the corner of London Wall and Aldersgate Street in the City. It is based on the amalgamation of the former Guildhall Museum and London Museum, both now closed. The Museum is controlled by a Board of Governors, appointed (6 each) by the Government, the Corporation of London and the Greater London Council. The exhibition will illustrate the history of London from prehistoric times to the present day.

The National Maritime Museum was established
by Act of Parliament in 1934, for the illustration of
the maritime history, archaeology and art of Great
Britain. The Museum is in two groups of build-
ings, in Greenwich Park, the Main Buildings,
centred round the Queen's House (built by Inigo
Jones, 1617-35) and the Old Royal Observatory,
including the Wren Flamsteed House, to the south.
The collections include paintings; actual craft and
ship-models; ships' lines; prints and drawings;
maps, atlases and charts; navigational and astronomi-
cal instruments; uniforms and relics; books and
MSS. The amount for salaries and expenses, in-
cluding a Grant-in-Aid, was estimated at £1,423,000
for 1975-76.

museum was made possible by the gift of St. Fagans
Castle and its Grounds by the Earl of Plymouth in
1946. The rooms of the Castle contain period
furniture; the gardens are maintained. A woollen
factory from Brecknockshire, a tannery from Rad-
norshire, a 16th-century barn from Flintshire, four
farmhouses, an 18th-century cockpit from Denbigh,
a turnpike house, a cottage, a smithy and an 18th-
century chapel have been re-erected and other
typical Welsh buildings are being re-erected in an
area adjoining the Castle to picture the Welsh way
of life and to show the rural crafts of the past. The
new museum building contains galleries of Material
Culture, Costume, Agriculture and Agricultural
Vehicles.

NATIONAL RESEARCH DEVELOPMENT CORPORATION

Kingsgate House, 66-74 Victoria Street, S.W.1
 [01-828 3400]

The National Research Development Corporation operates under the Development of Inventions Act 1967. Its function is to secure, "where the public interest so requires", the development and exploitation of inventions derived from publicly supported research and from other sources. The Corporation provides firms with the opportunity to take up, under licence, inventions arising from public research. It also offers financial assistance towards the development of technically new products. These may be based on a firm's own ideas or on inventions which it has acquired from the Corporation or from other sources.

Chairman, The Lord Schon.

Managing Director, W. Makinson.

Head of Public Relations, B. S. W. Mann.

DEPARTMENT FOR NATIONAL SAVINGS

Blythe Road, W.14

[01-603 2000]

The Department for National Savings was established as a Government Department when the former Post Office Savings Department became separated from the Post Office on October 1, 1969. At the same time the civil service staff supporting the National Savings Committees for England and Wales and for Scotland, were integrated with the Department, so that its scope was extended to cover the promotion as well as the operation of National Savings. The Department operates the National Savings Bank and maintains the records of holdings of National Savings Certificates, Save As You Earn contracts, Premium Savings Bonds, British Savings Bonds (and their forerunners Defence and National Development Bonds) and Government stock on the National Savings Stock Register.

**OFFICE OF THE PARLIAMENTARY
 COMMISSIONER AND HEALTH
 SERVICE COMMISSIONER**

Church House, Great Smith Street, S.W.1

[01-212 7676]

The Parliamentary Commissioner for Administration is responsible for investigating complaints referred to him by Members of the House of Commons from members of the public who claim

to have sustained injustice in consequence of maladministration in connection with administrative action taken by or on behalf of Government Departments. Certain types of action by Departments are excluded from investigation. Actions taken by other public bodies (such as local authorities, the police, the Post Office and nationalised industries) are outside the Commissioner's scope.

The Health Service Commissioners for England, for Scotland and for Wales are responsible for investigating complaints against National Health Service authorities that are not dealt with by those authorities to the satisfaction of the complainant. Complaints can be referred direct by the member of the public who claims to have sustained injustice or hardship in consequence of the failure in a service provided by a relevant body, failure of that body to provide a service or in consequence of any other action by that body. Certain types of action are excluded, in particular, action taken solely in consequence of the exercise of clinical judgment. The three offices are initially held by the Parliamentary Commissioner.

[Crawley 27833]

The Paymaster General's Office was formed by the consolidation in 1835 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Its function is that of paying agent for Government Departments, other than the Revenue Departments. Most of its payments are made through banks, to whose accounts the necessary transfers are made at the Bank of England. The payment of many types of public service pensions is an important feature of its work. The expenses of the office were estimated at £4,290,000 for 1976-77.

**OFFICE OF POPULATION
CENSUSES AND SURVEYS**

St. Catherine's House, W.C.2
[01-242 0262]

The Office of Population Censuses and Surveys was created by a merger in May 1970 of the General Register Office and the Government Social Survey Department. The Registrar General controls the local registration service in England and Wales in the exercise of its registration and marriage duties. Copies of the original registrations of births, stillbirths, marriages and deaths are kept in London. A register of adopted children is held at Titchfield. Central indexes are compiled quarterly and certified copies of entries may be obtained on payment of certain fees. Since 1841 the Registrar General has been responsible for taking the census of population. He also prepares and publishes a wide range of statistics and appropriate commentary relating to population, fertility, births, stillbirths, marriages, deaths and cause of death, infectious diseases, sickness and injuries. The Registrar General also maintains, at Southport, a central register of persons on doctors' lists, for the purposes of the National Health Service.

THE POST OFFICE

23 Howland Street, W.1

[01-631 2345]

Crown services for the carriage of Government despatches were set up about 1516. The conveyance of public correspondence began in 1635 and the mail service was made a Parliamentary responsibility with the setting up of a Post Office in 1657. Telegraphs came under the Post Office control in 1870 and the Post Office Telephone

Service began in 1880. The National Data Processing Service, the Post Office's commercial computer bureau, was set up in 1967. The Giro service of the Post Office began in 1968. The Post Office ceased to be a Government Department on October 1, 1969, following the Post Office Act 1969. On that date the office of Postmaster General was abolished and responsibility for the running of the postal, telecommunications, giro, remittance and data processing services was transferred to the new public authority called the Post Office. The Chairman and members of the Post Office Board are appointed by the Secretary of State but responsibility for the running of the Post Office as a whole rests with the Board in its corporate capacity.

PUBLIC HEALTH LABORATORY SERVICE

Headquarters Office:
 Lower Entrance, Colindale Hospital,
 Colindale Avenue, N.W.9
 [01-205 1295]

The Service was originally set up in 1939 as an
 emergency service to augment the existing public
 health resources of England and Wales in combat-
 ing outbreaks of infectious diseases such as might
 arise from enemy action or abnormal conditions in
 time of war. In 1945 the Government decided to
 retain the Service on a permanent footing, and
 statutory authority for doing so was included in the
 National Health Service Act, 1946, the Minister of
 Health being empowered to provide a Bacterio-
 logical Service in England and Wales for the con-
 trol of the spread of infectious diseases. The
 Service was administered by the Medical Research

Council, as agents of the Ministry of Health until
 August 1, 1961, when, under the provision of the
 Public Health Laboratory Service Act, 1969, a new
 Public Health Laboratory Service Board was
 established as a statutory body capable of acting in
 its own right as agent for the Department of Health
 and Social Security.

PUBLIC WORKS LOAN BOARD

Royex House, Aldermanbury Square, E.C.2

[01-606 7321]

The Board is an independent statutory body, consisting of 12 unpaid Commissioners appointed by the Crown to hold office for 4 years; 3 Commissioners retire each year and may be re-appointed.

The functions of the Commissioners, derived chiefly from the Public Works Loans Act, 1875, and the National Loans Act, 1968, are to consider applications for loans by Local Authorities and other prescribed bodies, and when loans are approved, to collect the repayments.

Funds for loans are authorised from time to time by Parliament and are drawn from the National Loans Fund. Rates of interest on the Board's loans and fees to cover management expenses are fixed by the Treasury.

During the year ended March 31, 1976, gross issues from the National Loans Fund for advance by the Public Works Loan Board amounted to £2,113,000,000.

HOUSE OF LORDS RECORD OFFICE

House of Lords, S.W.1

[01-219 3741]

Since 1497, the records of Parliament have been kept within the Palace of Westminster. They are in the custody of the Clerk of the Parliaments, who in 1946 established a record department to supervise their preservation and their production to students. The Search Room of this office is open to the public throughout the year, Mondays to Fridays inclusive from 9.30 a.m. to 5.30 p.m. The records preserved number some 3,000,000 documents, and

include Acts of Parliament from 1497, Journals of the House of Lords from 1510, Minutes and Committee proceedings from 1610, and Papers laid before Parliament from 1531. Amongst the records are the Petition of Right, the Death Warrant of Charles I, the Declaration of Breda and the Bill of Rights. The House of Lords Record Office also has charge of the Journals of the House of Commons (from 1547), and other surviving records of the Commons (from 1572), which include plans and annexed documents relating to Private Bill legislation from 1818. Among other documents are the records of the Lord Great Chamberlain, the political papers of certain members of the two Houses (including those papers previously preserved in the Beaverbrook Library), and documents relating to Parliament acquired on behalf of the nation. All the manuscripts and other records are preserved in the Victoria Tower of the Houses of Parliament.

ROYAL COMMISSION ON HISTORICAL MANUSCRIPTS

Quality House, Quality Court, Chancery Lane, W.C.2

[101-242 1198]

The Historical Manuscripts Commission was first appointed by Royal Warrant in 1869, and was empowered to make enquiry into the place of deposit of collections of manuscripts and papers of historical interest and with the consent of the owners to publish their contents. The Commission was reconstituted by Royal Warrant in 1959, with wider terms of reference, including the preservation of records and assistance to other bodies working in the same field. The Master of the Rolls, who is the Chairman of the Commission, exercises through it his responsibility under the Law of Property (Amendment) Act 1924, and the Tithe Act, 1936, for manorial and tithe documents. The Commission has published over 200 volumes of printed reports upon manuscripts of historical import and compiles the *National Register of Archives*, which now contains over 20,000 typed reports upon privately-owned records, with extensive indexes, and may be consulted by historical researchers. The Commission undertakes to advise owners upon the preservation and use of their manuscripts and records.

Chairman, The Master of the Rolls.

SCOTTISH RECORD OFFICE

H.M. General Register House, Edinburgh 1

[1031-556 6585]

The Scottish Record Office has a continuous history from the 13th century. Its present home, the General Register House, was founded in 1774 and built to designs by Robert Adam, later modified by Robert Reid. Here are preserved, in accordance with the Treaty of Union, the older public records of Scotland and many

collections of local and church records and family muniments. Search Rooms open daily from 9 to 4.45; Saturdays, 9 to 12.30 (Historical Search Room only). Certain groups of records, mainly the more modern records of courts and government departments and the plans collection, are preserved in the Scottish Record Office's auxiliary repository at the West Register House in Charlotte Square—the former St. George's Church which was designed by Robert Reid. The West Register House Search Room opens daily from 9 to 4.45 (Mondays to Fridays). Permanent and special exhibitions of documents are mounted in the Museum at the West Register House, which is open to the public on weekdays during Search Room hours. The National Register of Archives (Scotland), which is a branch of the Scottish Record Office, is based in the West Register House.

Keeper of the Records of Scotland, J. Imrie.

Her Majesty's Stationery Office was established in 1786 and is the British Government's central organization for the supply of printing, binding, office supplies and office machinery of all kinds, and published books and periodicals, for the Public Service at home and abroad; it also undertakes duplicating and distributing for government departments. The Stationery Office is the publisher for the Government, and has bookshops for the sale of Government publications in London, Edinburgh, Cardiff, Manchester, Bristol, Birmingham and Belfast; leading booksellers in the larger towns act as agents; and there are wholesale departments in London, Edinburgh and Belfast from which booksellers may obtain supplies. It is also the agent for the sale of publications of the United Nations and its specialized agencies and for certain other international organizations. The Controller of the Stationery Office is under Letters Patent the *Queen's Printer of the Acts of Parliament* and in him is vested the Copyright in all British Government documents.

Government publications are of a wide and varied range and over 7,500 publications are produced each year. They include *London Gazette*, which has been issued since 1665, and *Hansard*, the verbatim report of the proceedings in both Houses of Parliament, available on the morning following the debate. The Stationery Office has in stock some 90,000 titles and its subscriptions and standing order lists contain about 150,000 addresses. The annual sales total about 37,000,000 copies.

The aggregate net estimate for the department for 1976-77 was £88,549,000 (an increase of £15,214,000 on the same estimate for 1975-76).

Generally the department obtains its supplies from commercial sources by competitive tender. For printing and binding, however, the Stationery Office has its own printing works and binderies which produce about one-third of the total requirement, including telephone directories, pension allowance books, national savings certificates and stamps, postal orders, premium bonds. National Insurance stamps, road fund licences, and television licences.

The staff employed on April 1, 1976, was 7,412 (an increase of 229 over the previous year), including 1,661 in warehouses and 2,442 at printing works: the total space occupied was 3,135,447 square feet, including 1,037,000 sq. ft. for warehouse space and 1,087,000 sq. ft. for the printing works.

SUGAR BOARD

52 Mark Lane, E.C.3

[01-480 6221]

The Sugar Board was constituted under the Sugar Act, 1956, on October 15, 1956. The Board buys the sugar which the United Kingdom has contracted to buy under the Commonwealth Sugar Agreement up to the end of 1974 at prices negotiated triennially by the Government and re-sells the sugar commercially at world prices. To meet the difference between the two prices, the Treaty of Accession to the E.E.C. provides for the Board to levy a charge on the importation of the sugar if the world prices are lower than the negotiated prices, or to pay a subvention in the reverse position if world prices exceed them.

Overseas Trade. The Department is responsible for commercial policy and relations with overseas countries and is concerned with economic policies affecting the international position of the United Kingdom. It promotes United Kingdom commercial interests overseas, negotiates on trade and commercial matters and administers U.K. protective tariffs. Under the direction of the British Overseas Trade Board, which was set up in January 1972 and has the Secretary of State for Trade as President, the Department promotes British exports, providing an export information service to industry and commerce, largely through the eight regional offices, and handling Government support for overseas trade fairs.

Shipping and civil aviation. The Department is the sponsor for the United Kingdom shipping and civil aviation industries including the conduct of international negotiations. It is also responsible for the regulation of marine safety. The Department sponsors the British Airways Board, the British Airports Authority and the Civil Aviation Authority, and approves the capital investment of these bodies. In addition, the Department issues policy guidance to the Civil Aviation Authority and administers the Authority's annual grant until such time as full recovery of costs is attained.

Commerce and Industry. The Department is responsible in general for the basic legal framework for the regulation of industrial and commercial enterprises, administering a number of statutes governing company affairs and insolvency. It also holds general responsibility for company law, patent, trade mark and copyright matters, and for all matters affecting insurance. The Department of Trade is also the sponsor Department for tourism and the hotel and travel industries; the newspaper, printing and publishing industries; the film industry and the distributive and service trades.

THE TREASURY

Parliament Street, S.W.1

[01-233-3000]

The Office of the Lord High Treasurer has been continuously in commission for well over 200 years. The Lord High Commissioners of H.M. Treasury consist of the First Lord of the Treasury (who is also the Prime Minister), the Chancellor of the Exchequer and five Junior Lords. This Board of Commissioners is assisted at present by the Chief Secretary, a Parliamentary Secretary who is the Chief Whip, a Financial Secretary and Minister of State (who are also members of the Government) and by the Permanent Secretary. The Prime Minister and First Lord is not primarily concerned in the day-to-day aspects of Treasury business. The Parliamentary Secretary and the Junior Lords are Government Whips in the House of Commons. The management of the Treasury devolves upon the Chancellor of the Exchequer and, under him, the Chief Secretary, the Financial Secretary and the Minister of State. The Chief Secretary is responsible for the control of public expenditure. The Financial Secretary discharges the traditional responsibility of the Treasury for the largely formal procedure for the voting of funds by Parliament. All Treasury Ministers are concerned in tax matters.

COUNCIL ON TRIBUNALS

6 Spring Gardens, Cockspur Street, S.W.1

[01-930-8691]

The Council on Tribunals, with its Scottish Committee, was constituted in 1958 under the provisions of the *Tribunals and Inquiries Act* of that year to act as an advisory body in the field of administrative tribunals and statutory inquiries. It now operates under the *Tribunals and Inquiries Act, 1971*.

Its principal functions are (a) to keep under review the constitution and working of the various tribunals which have been placed under its general supervision by the Act; (b) to report on particular matters relating to any tribunal which may be referred to it by the Lord Chancellor and the Lord Advocate; and (c) to report on matters relating to statutory inquiries which may be similarly referred to it or which the Council may determine to be of special importance. In addition, the Council

must be consulted both about rules of procedure for statutory inquiries and before rules are made for any of the tribunals under its general supervision, and it may make general recommendations about appointments to membership of such tribunals. The numerous tribunals which have been placed under the Council's supervision are concerned with a wide variety of matters varying from agriculture and road traffic to independent schools and pensions. They include the main National Health Service and National Insurance Tribunals, together with such tribunals as the Civil Aviation Authority, Industrial Tribunals, the Land Tribunal, the Mental Health Review Tribunals, Local Valuation Courts, Rent Tribunals, Rent Assessment Committees and the Transport Tribunal. There is power in the 1971 Act to extend the Council's jurisdiction to additional classes of tribunals and inquiries or hearings.

The Scottish Committee of the Council considers Scottish tribunals and matters relating only to Scotland.

The Members of the Council are appointed by the Lord Chancellor and the Lord Advocate. The Scottish Committee is composed partly of members of the Council designated by the Lord Advocate and partly of other persons appointed by him. The Parliamentary Commissioner for Administration is *ex officio* a member both of the Council and of the Scottish Committee.

The Council submits an annual report on its proceedings and those of the Scottish Committee to the Lord Chancellor and the Lord Advocate, which must be laid before Parliament.

CORPORATION OF TRINITY HOUSE

Trinity House, Tower Hill, E.C.3

[01-480-6601]

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII granted the institution its first charter in 1514. The Corporation is the general lighthouse authority for England and Wales, the Channel Islands and Gibraltar, with certain statutory jurisdiction over aids to navigation maintained by local harbour authorities, etc., and by the General Lighthouse Authorities for Scotland and Ireland. It is also responsible for dealing with wrecks dangerous to navigation, except those occurring within port limits or wrecks of H.M. ships. The Lighthouse Service, including those of Scotland and Ireland, is maintained out of the General Lighthouse Fund which is provided from light dues levied on ships using the ports of the United Kingdom and Eire. The Corporation is also the principal pilotage authority in the United Kingdom and is responsible for London and 40 other districts. Certain charitable trusts are administered by the Corporation for the relief of aged or distressed mariners and their dependants. The affairs of the Corporation are managed by a Board of ten active Elder Brethren and the Secretary, assisted by Administrative, engineering and marine staff. The active Elder Brethren also act as

nautical assessors in marine causes in the Admiralty Division of the High Court of Justice.

VALUE ADDED TAX TRIBUNALS

Value added tax tribunals for England and Wales are established in London, Cardiff, Birmingham and Manchester, and value added tax tribunals for Scotland and Northern Ireland in Edinburgh and Belfast respectively. A person dissatisfied with a decision of the Commissioners of Customs and Excise relating to certain aspects of value added tax may appeal to a tribunal.

The tribunals are entirely independent of the Commissioners. They are under the supervision of the Council on Tribunals and are intended to determine disputes concerning value added tax speedily and with a minimum of formality, and to assist in obtaining uniformity in the application of the tax throughout the United Kingdom.

COMMISSIONS, ETC.

COMMISSION FOR LOCAL
ADMINISTRATION IN ENGLAND

21 Queen Anne's Gate, London, S.W.1

[01-930-3333]

Three Local Commissioners are responsible for investigating complaints from members of the public in England who claim to have suffered injustice because of maladministration by a local authority, a water authority or a police authority. Certain types of action are excluded from investigation, particularly personnel matters and commercial transactions unless they relate to the purchase or sale of land. Complaints must normally be made through a member of the authority against which the complaint is made although a complaint can be put to a Local Commissioner direct if a member fails or refuses to refer it. A free booklet "Your Local Ombudsman" is available from the Commission's office.

FOREIGN COMPENSATION COMMISSION

Alexandra House, Kingsway, W.C.2

The Commission was set up by the *Foreign Compensation Act, 1950*, to distribute funds paid by foreign governments as compensation for expropriated British property and other losses sustained by British nationals. The *Foreign Compensation Act, 1962*, provided, *inter alia*, for the payment out of moneys provided by Parliament of additional compensation in respect of claims arising in connection with certain events in Egypt. The *Foreign Compensation Act, 1969*, provided, *inter alia*, for the payment by the Board of Trade to the Commission for distribution of moneys held by the Custodian of Enemy Property being former property of a Baltic State or ceded territory. The Commission has completed the final distribution of the funds contributed by Yugoslavia, Czechoslovakia, Bulgaria, Poland, Rumania and Hungary, and the moneys received from the Board of Trade in respect of claims under the U.S.S.R. Distribution Order. The Commission has registered certain British claims in Czechoslovakia and also in the Baltic States and territories annexed by the Soviet Union. The £27,500,000 compensation paid by the Government of the United Arab Republic under the financial agreement of Feb. 28, 1959, has been fully distributed. The *Foreign Compensation (Egypt) Order* in respect of British-owned property affected by Egyptian measures of nationalization between 1960 and 1964 came into operation on Feb. 1, 1972, and the Commission is engaged in determining claims thereunder. The *Foreign Compensation (German Democratic Republic) (Registration) Order 1975* which came into operation on May 7, 1975,

enables certain claims relating to property in the German Democratic Republic and Berlin (East) owned by United Kingdom nationals or relating to debts owed by persons resident in the German Democratic Republic and Berlin (East) to United Kingdom nationals to be registered with, and reported upon by, the Commission.

THE BRITISH COUNCIL

10 Spring Gardens, S.W.1

The British Council was established in 1934. Its Royal Charter (1940) defines its aims as the promotion of a wider knowledge of Britain and English abroad, and the development of closer cultural relations with other countries. Most of its funds are provided by Parliament: the gross budget for 1976-77 is £36,603,000, and it administers a further sum, estimated for 1976-77 at £25,420,000, as agent for Government Departments and international organizations.

Chairman, The Lord Ballantrae, K.T., G.C.M.G., G.C.V.O., D.S.O., O.B.E.

Director-General, Sir John Llewellyn, K.C.M.G., Ph.D., D.Sc.

THE NATIONAL TRUST

40-42 Queen Anne's Gate, Westminster, S.W.1
[01-930 0211]

The National Trust was founded in 1895 by Miss Octavia Hill, Sir Robert Hunter and Canon Rawnsley, their object being to preserve as much as possible the history and beauty of their country for its people. It became an organization incorporated by Act of Parliament (1907) to ensure the preservation of lands and buildings of historic interest or natural beauty for public access and benefit. It is independent of the State and relies on the voluntary support of private individuals for working funds. As a charity, however, it is allowed certain tax exemptions.

The Trust is now the largest private landowner in the country and third overall only to the Crown and the Forestry Commission. It protects nearly 500,000 acres, much of it superb hill country in the Lake District, Snowdonia, the Peak District and other National Parks. The Trust also owns and opens to the public some 200 country houses and gardens, and preserves villages, nature reserves, archaeological sites and many farms.

In 1965 the Trust launched a campaign to acquire as much as possible of the most beautiful stretches of coastline which were under threat from development. The Trust now protects 367 miles of coastline, the first target of £2,000,000 was reached in November 1973, and the appeal continues.

The Trust has now over 530,000 members paying an annual subscription and about 100,000 new members are joining each year. Rents, admission fees, legacies and gifts are other important sources of support and income.

The policy of the Trust is determined by the governing body, the Council. Half of its members are appointed by national institutions, such as the British Museum, the National Gallery, the Rammers' Association and the Royal Horticultural Society; the other half are elected by Trust members at the Annual General Meeting. The Council appoints the Executive Committee, which in turn has established Regional Committees responsible for the management of the Trust's properties.

THE NATIONAL TRUST FOR SCOTLAND

5 Charlotte Square, Edinburgh 2

The National Trust for Scotland was founded in 1931, and its objects are similar to those of the National Trust. Like that organization, it is incorporated by Act of Parliament, is dependent for finance upon legacies, donations and the subscriptions of its members, is recognized as a charity for tax exemption purposes, and enjoys certain privileges under various Finance Acts regarding death duties.

The Trust administers about 80 major properties covering over 82,000 acres. Great houses in its care include:—The Binn, West Lothian; Brodick Castle, Isle of Arran; Crathes Castle, Kincardineshire; Culzean Castle, Ayrshire; Falkland Palace, Fife; Hill of Tarvit and Kellie Castle, Fife, and the Castle of Drum, Castle Fraser, Leith Hall and Craigievar Castle, Aberdeenshire.

In the Trust's care are also several noteworthy gardens. Some are associated with the great houses, others are:—Inverewe, in Wester Ross; the re-created 17th century garden of Pitmedden in Aberdeenshire; and Threave in Kirkcudbrightshire, where a School of Practical Gardening is run;

Branklyn Gardens, Perth, and Greenbank, Clarkston, Glasgow.

Among the mountainous country owned by the Trust is the Pass of Glencoe and the mountain group "The Five Sisters of Kintail" and the estate of Torridon in Wester Ross.

Islands in the Trust's care include the St. Kilda group, and Fair Isle. At Bannockburn, Killiecrankie, Glenfinnan and Culledon, the Trust owns sites associated with Scottish history.

Among smaller properties are houses associated with famous Scots:— the birthplaces of Barrie in Kirriemuir, Carlyle in Ecclefechan, and Hugh Miller in Cromarty; and Burns' Bachelors' Club, Tarbolton and Souter Johnnie's House, Kirkoswald in Ayrshire.

At Culross in Fife, and at Dunkeld, Perthshire, the restoration of attractive groups of houses led to the creation of a special fund under which such properties are brought, restored and sold. Under this scheme over 100 properties in the coastal burghs of East Fife and elsewhere have been and are being restored. This operation was one of the four pilot projects in the United Kingdom selected for special allocation during European Architectural Heritage Year, 1975 and in 1976 was awarded the European Prize for the Preservation of Ancient Monuments, given by the F.V.S. Foundation of Hamburg.

BRITISH STANDARDS INSTITUTION

British Standards House, 2 Park Street, W.1

The British Standards Institution is the recognized authority in the U.K. for the preparation and publication of national standards for industrial and consumer products. The Institution originated in 1901, when the Institutions of Civil, Mechanical and Electrical Engineers, together with the Iron and Steel Institute and the Institution of Naval Architects, formed a joint Engineering Standards Committee—which subsequently became the British Engineering Standards Association. A Royal Charter was granted in 1929 and with the extension of the scope of the organization to include the building, chemical and textile industries its title was later changed to "British Standards Institution".

The Institution, in consultation with the interests concerned, now prepares standards relating to nearly every sector of the nation's industry and trade. There are over 7,000 British Standards covering specifications of quality, construction dimensions, performance or safety; methods of test and analysis; glossaries of terms; and codes of practice. About 500 new and revised British Standards are published each year.

The Institution represents the U.K. in the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC) and other international bodies concerned with harmonizing standards.

British Standards are issued for voluntary adoption though in a number of cases compliance with a British Standard is required by legislation. The Institution operates certification schemes under which industrial and consumer products are certified as complying with the relevant British Standard and manufacturers satisfying the requirements of such schemes may use the Institution's registered certification mark (known as the "Kitemark"). Other testing and certification services, together with information services, are available to industry, including help in meeting technical requirements in export markets.

The Institution is financed by voluntary subscriptions, an annual Government grant, the sale of its publications and fees for testing and certification. There are more than 16,000 subscribing

members of B.S.I., including public authorities, trade and technical bodies, professional institutions, manufacturers, distributors and large scale purchasers.

DESIGN COUNCIL

28 Haymarket, S.W.1

[01-830-8000]

The Council, originally set up in 1944 as the Council of Industrial Design, is sponsored by the Department of Industry to promote the improvement of design in the products of British industry. Its name was changed in 1972 to reflect its increasing activity in the field of engineering design.

The Council's services to industry are based on teams of engineering field officers and industrial officers who visit companies throughout the United Kingdom to diagnose engineering design problems and to discuss and advise on design policy. The Council's Record of Engineering Design Expertise provides information about consultants, companies, universities and research organizations able to advise companies on engineering design problems and the Council's Designer Selection Service can recommend selected industrial designers for specific jobs.

The Council maintains permanent exhibitions of independently selected British goods from Design Index and its Design Centres in London's Haymarket and at 72 St. Vincent Street, Glasgow. Thematic exhibitions are also mounted at the Design Centres and at the Council's smaller Welsh Office in Cardiff. Design Index, the Council's unique photographic and sample record of about 10,000 current British products selected for their good design, can also be consulted at the Design Centres.

Other services include annual award schemes for consumer and contract goods, engineering products and components, and medical and motor vehicle equipment; training courses and conferences for retail staff, manufacturer's and managers; publications, including the monthly magazines *Design and Engineering*; a slide loan library; and press and information services. *Crafts* magazine is published bi-monthly by the Council as part of its services to the Crafts Advisory Committee.

THE LONDON CLEARING BANKS

COMMITTEE OF LONDON CLEARING BANKERS

(1821), 10 Lombard Street, E.C.3

The Committee consists of the Chairmen of the six Clearing Banks (Barclays, Coutts, Lloyds, Midland, National Westminster, and Williams & Glyn's) and meets regularly to discuss matters of common interest. It is the body through which the Bank of England communicates official policy to the banks and through which the banks may present their views to the Bank of England and the Treasury.

Secretary-General, P. J. Nicholson.

BANKERS' AUTOMATED CLEARING SERVICES, LTD.

3 De Havilland Road, Edgware, Middlesex

Bankers' Automated Clearing Services is a company wholly owned by the London Clearing Banks. Its function is to receive money transfers recorded on magnetic tape and to distribute them to the appropriate bank. Nearly all standing orders in Great Britain are interchanged through BACS as is a substantial volume of direct debits originated by non-banking organizations for payments of rates, insurance premiums and hire purchase payments. Credits are also received on magnetic tape, mainly for payment of salaries and pensions.

Managing Director, D. J. Pyne.

BANKERS' CLEARING HOUSE

10 Lombard Street, E.C.3

This is the organization through which the Clearing Banks and the Bank of England exchange cheques drawn on each other and settle their indebtedness to one another. The clearing system

came into being in London during the second half of the eighteenth century, and has served as a pattern for the Clearing Houses that have been established since throughout the world.

To obtain payment for any cheque received from a customer for his credit, a banker must present it for payment to the bank on which it is drawn, and the Bankers' Clearing House affords a quick and efficient means of doing this. On an average day 4,000,000 cheques with a total value of £8,400 million, are exchanged and paid for by the Clearing Banks and the Bank of England on behalf of their branches throughout England and Wales which number over 10,000.

At present two cheque clearings are operated each business day. The Town Clearing, which takes place from 2.30 p.m. until 3.50 p.m., enables cheques of £5,000 and over to be cleared the same day, provided that such cheques are drawn on, and paid into, a Town Clearing branch. There are one hundred branches of the Clearing Banks so designated within a half-mile radius of the Clearing House.

The General Clearing, which takes place each morning, handles all cheques, drawn on branches of the member banks, which cannot be passed through the Town Clearing or cleared under local arrangements. Since April, 1960, a Credit Clearing has been operated through which the member banks exchange credit items in respect of monetary transfers between their customers. The daily average for this Clearing, including work passed through the Bankers' Automated Clearing Service, is 1,161,000 items with a total value of £209 million.

At the end of the day each member bank works out the net balance resulting from its transactions in that day's Town Clearing, the previous day's General Clearing and Credit Clearing and B.A.C.S. output and such differences as need to be adjusted. This net balance is either credited to or deducted from the bank's own account at the Bank of England.

Chief Inspector, S. C. Veal.

Deputy Inspector, B. L. Newitt.

PREMIUM SAVINGS BONDS

One of the most popular forms of saving in the United Kingdom is through Premium Savings Bonds. These bonds are a United Kingdom Government security and were first introduced on November 1, 1956. Instead of earning interest, however, each bond offers to its holder the chance of winning a money prize in a prize draw. Bonds are issued in values ranging from £5 to £500 and each £1 buys one bond unit, which has one chance in the prize draw.

Prizes are paid from a fund formed by the interest, at present 5½ per cent. *per annum*, on each bond eligible for the draw. A bond becomes eligible for the draw three clear calendar months following the month of purchase and goes into every subsequent draw whether or not it has won a prize until the end of the month in which it is repaid. Bonds belonging to a deceased bondholder will remain eligible for all Prize Draws held

in the month of death and in the following 12 calendar months, provided they have not been repaid earlier. They will then become ineligible for all further draws. These terms also apply to bonds purchased before August 1, 1960 (Series "A"). Prizes range in value from £5,000 to £25, a single prize of £100,000 and a second prize of £25,000 each month, one of £50,000 and 25 of £1,000 each week, the winning numbers being selected by the electronic random number indicator equipment—usually called "ERNIE". Winning numbers are printed monthly in the *London Gazette*.

It is estimated that by the end of June, 1976, bonds to the value of £2,014,029,527 had been sold. Of these £864,171,077 had been cashed, leaving £1,149,858,450 still invested. After the draws in July, 1976, 13,236,826 prizes, totalling £530,328,700 had been distributed since the inception of the Premium Savings Bond Scheme.

NATIONAL SAVINGS CERTIFICATES

The amount, including accrued interest, remaining to the credit of investors in National Savings Certificates on March 31, 1976 was approximately £2,673,071,000. In 1975-76, £588,803,270 was subscribed and £402,826,505 (excluding interest) was repaid. Note—Certificates of the current Fourteenth Issue may be purchased in denominations of 1, 2, 3, 4, 5, 10, 20, 50, 100, 200 and 500 units and certificates of the Index-Linked Retirement Issue in denominations of 1, 2, 5, 10, 20 and 50 units.

Index Linked Retirement Issue (1975).. (50)	£10			Unlike conventional issues where interest is accrued periodically the repayment value of Index-Linked Certificates, subject to their being held a year, is related to the movement of the United Kingdom General Index of Retail Prices. If held for 5 years a bonus of 4 per cent. of the Purchase Price will be added to the repayment value. Any gain is free of UK income tax or capital gains tax and the precise terms of the Issue are set out in a Prospectus. NB. Certificates of the Retirement Issue are available only to men aged 65 years and over and women aged 60 years and over, maximum £500 per person.

May be held from date of issue: * until further notice; † as announced by the Treasury.

BRITISH SAVINGS BONDS

8½% British Savings Bonds (Jubilee Issue) are a guaranteed state security. They cost £5 each and may be held up to a maximum of £10,000. Bonds acquired by inheritance do not count towards this limit. They may be held by individuals solely or jointly; by trustees; by charitable, friendly and provident societies; by clubs and funds, by corporate bodies generally. Interest is earned at the rate of 8½% a year, provided they are held for a minimum period of 6 months. The interest which is payable half yearly is taxable but tax is not deducted at source. The value of British Savings Bonds remains constant and they may be encashed at par on one month's notice. They will be redeemable at the rate of £104 for £100 of Bonds on the next interest date after 5 years have passed from the purchase date. The £4 capital bonus is exempt from United Kingdom Tax. British Savings Bonds may be bought at any Post Office transacting Savings Bank business, Trustee Savings and other Banks.

GOVERNMENT STOCKS AND BONDS

Government Stocks and Bonds on the National Savings Stock Register can be bought and sold at low rates of commission through the Department for National Savings, Bonds and Stock Office, Lytham St. Annes, Lancashire, or a Trustee Savings Bank. Prices are those current on the Stock Exchange at the time of the transaction. Application forms and information leaflets with a list of the Stocks and Bonds are available at Post Offices transacting Savings Bank business and at Trustee Savings Banks. The amount standing to the credit of holders in the Department for National Savings section of the National Savings Stock Register as at March 31, 1976 was £891,152,000.

SAVE AS YOU EARN

The "Save As You Earn" Scheme was brought into operation on October 1, 1969. A Second Issue was introduced on July 1, 1974, and a Third Issue ("Index-linked") was brought in on July 1, 1975. Any individual aged 16 years or over may participate by making regular monthly payments with a minimum of £4 and a maximum of £20.

Savings may be contributed by deductions from pay, by standing order on a bank or National Giro or by cash payments at most post offices.

Indexation applies only to completed savings contracts, except that contracts terminated by the death of the saver will attract indexation if repaid after the first year. At the end of five years, the

repayment value of completed contracts will be the total contributions plus any increase due to the monthly linking of contributions to the Retail Price Index. Completed contracts which are not withdrawn will qualify for further index-linking and a bonus equal to two monthly contributions at the end of seven years.

Savers who wish to stop payments will be able to withdraw the total sum saved, but there cannot be partial withdrawals. Tax-free compound interest will be paid at the rate of 6 per cent. per annum on amounts withdrawn after the first year.

By the end of June 1976, 607,075 live SAYE contracts remained registered with the Department for National Savings, with a total monthly commitment to save of £6,876,810. The total payments received since October 1, 1969, amounted to £184,731,386.

SAVINGS BANKS

National Savings Bank.—On December 31, 1975, there were approximately 21,000,000 active accounts with the sum of £1,524,794,624 due to depositors in Ordinary accounts and £615,832,044 in Investment accounts. Interest on National Savings Bank Ordinary deposits is allowed at 4 per cent. per annum. A higher rate of interest is paid on deposits in National Savings Bank Investment accounts (the current rate can be ascertained at any Savings Bank Post Office). A depositor may have more than one account in either series. The total balance in the Ordinary account is subject to a limit of £10,000 with certain exceptions; there is no upper limit on the balance that may be held in an Investment account.

On December 31, 1975, the average amount held in Ordinary accounts was £72.81; in Investment accounts, approximately £757.00.

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community.

On Nov. 20, 1975, there were 14,279,750 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £4,461,792,537 which comprised £3,852,135,661 due to depositors in the Ordinary, Current and Special Investment Departments, £438,975,109 Stocks and Bonds held for depositors, £79,828,051 in respect of Save As You Earn contributions and £90,853,716 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these banks and their offices, can be obtained from the *Trustee Savings Banks Central Board*, P.O. Box 99, 3 Gracechurch Street, E.C.3. *Chairman*, A. BRITISH FORCES BROADCASTING SERVICE

King's Buildings, Dean Stanley Street, London S.W.1

The Service came into existence during the early part of the Second World War to entertain, inform and to maintain the morale of the Serviceman in the field. No exact date can be given for the inception of the Service because, in answer to the need, special broadcasting for the Services overseas began in many different places almost simultaneously during 1942.

In 1960 B.F.B.S. was reorganised; a Director was appointed and a Head Office was created in London. In addition to directing the activities of the Service Head Office also produces every week some 30 hours of radio programmes featuring leading personalities in sport, music and entertainment, which the stations overseas cannot produce themselves. These programmes are recorded and dubbed in London and flown to the B.F.B.S. stations abroad, as well as to H.M. Ships in many parts of the world,

and for the benefit of unaccompanied personnel serving in places such as Belize.

B.F.B.S. Television, a service combining programmes from all three channels in the U.K., started at Celle, near Hannover on September 18, 1975. When the full transmitter chain is completed, it will serve all the main concentrations of personnel and their families in West Germany.

The Combined Services Entertainment section of B.F.B.S. organises stage shows, about 45 of which are sent out every year to tour Northern Ireland and Commands overseas.

The staff of B.F.B.S. are all civilian, professional broadcasters and engineers. The Service is administered by the Army on behalf of the other two Services and is financed from Ministry of Defence funds.

Director, I. J. Woolf.

Meteorological Office

London Road, Bracknell, Berks.
 [Bracknell: 20242]

The Meteorological Office is the State Meteorological Service. It forms part of the Ministry of Defence, the Director General being ultimately responsible to the Secretary of State for Defence.

Except for the common services provided by other government departments as part of their normal functions, the cost of the Meteorological Office is borne by Defence Votes.

Of the expenditure chargeable to Defence Votes about £16,900,000 represents expenditure associated with staff and £8,400,000 on stores, communications and miscellaneous services. About £5,600,000 is recovered from outside bodies in respect of special services rendered, sales of meteorological equipment, etc.

THE UNION JACK SERVICES CLUBS

Patron-in-Chief: Her Majesty the Queen.

President: Major-Gen. Sir Julian Gascoigne, K.C.M.G., K.C.V.O., C.B., D.S.O.

Comptroller: Col. C. A. la T. Leatham.

Club Secretary: L. F. Moulton.

THE UNION JACK CLUB

Sandell Street, S. E. 1

[Tel.: 01-928 6401]

The Union Jack Club has recently been rebuilt and the new premises stand on the site of the old building. It provides residential accommodation for service and ex-service men and women and their families. All serving men and women below

commissioned rank are members. Ex-service membership is by election. Honorary membership is extended to the Forces of other nations visiting the United Kingdom.

The new premises provides the most modern standards of accommodation with 417 single bedrooms and 55 double bedrooms for families. The facilities include restaurant, bars, a full range of public rooms including billiards, a sauna bath and launderette. A new feature of the Union Jack Club is a separate conference area with a maximum capacity of 200 persons for meetings, or 100 for Regimental or Association dinners.

The original Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War and other campaigns and was opened in 1907 by King Edward VII.

SERVICE SALARIES AND PENSIONS

The military salaries for Service men and women, effective from April 1, 1975, were increased with effect from April 1, 1976 by a pay supplement of £6 a week, subject to a limit on individual earnings of £8,500 a year, and with proportionately smaller increases for juniors and apprentices. The rates of pay shown below are those introduced on April 1, 1975 and do not include the pay supplement. The Review Body on Armed Forces Pay, who recommended the payment of the supplement in their Fifth Report, was concerned with ranks up to and including that of Brigadiers, whilst the salaries of Major-Generals (or equivalent rank) and above, and

also the salaries of medical and dental officers, are subject to separate review. Since 1970 the determining factor of the Review Body's recommendations has been the relation of forces' salaries to civilian earnings by job evaluation. On this occasion their recommendation was made in the context of the Government's incomes policy as set out in "The Attack on Inflation." The undermentioned salaries for the Women's Services reflect equal pay for equal work and conditions but because the X-factor for women is lower than that for men, women's rates approximate to 95.45 per cent. of the rates for men.

SERVICE RETIREMENT BENEFITS, ETC. (Applicable to those retiring after March 31st, 1976)

NOTE—A major change in the Armed Forces pension arrangements was made in 1975 with the introduction, from April 1, of "preserved" pensions to comply with the appropriate provisions of the Social Security Act 1973. Those who leave the Forces having served at least five years after the age of 21, but not long enough to qualify

for the appropriate immediate pension, now qualify for a preserved pension and terminal grant both of which are payable at age 60. The tax-free resettlement grants shown below are payable on release to those who qualify for a preserved pension and who have completed 9 years service from age 21 (officers) or 12 years from age 18 (other ranks)

OFFICERS.—Captain, 16–34 years' service: £1,386–2,488; Major, 16–34 years: £1,609–2,968; Lt.-Col., 16–34 years: £1,968–3,598; Colonel, 18–34 years: £2,561–4,249; Brigadier, 22–34 years: £3,464–4,777.

SERVICEWOMEN (22–37 years' service).—Below Corporal: £909–1,386; Corporal: £1,108–1,688; Sergeant: £1,204–1,836; Staff Sergeant: £1,324–2,016; Warrant Officer Class II: £1,352–2,077; Warrant Officer Class I: £1,446–2,244.

NOTES

Terminal grants are in each case three times the rate of retired pay or pension. There are special rates of retired pay for Chaplains, Flight Lieutenants (Specialist Aircrew), and certain other ranks not shown above. Deductions may be made in cases of voluntary retirement. Gratuities may be payable instead of preserved pension in certain instances, e.g., male officers with 10 years' qualifying service would receive £3,260 with a further £650 for each additional year. The normal rates of gratuity for officers with short-service commissions are £495 (men) and £473 (women) for each year completed. Resettlement grants are: officers, £1,697 (men) and £1,621 (women); non-commissioned ranks, £1,209 (men) and £1,155 (women).

THE CHURCH OF SCOTLAND

Church Office, 121 George Street, Edinburgh 2.

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly), to whom Her Majesty the Queen has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign, if not present in person, is represented by a Lord High Commissioner, who is appointed each year by the Crown. The country, for Church purposes, is divided into 12 Synods and 46 Presbyteries, and there are about 2,000 ministers and licentiates engaged in ministerial and other work. The figures at Dec. 31, 1975, were:—

Congregations, 1,964; total membership 1,041,772. In 21 Overseas Mission fields there are 184 European missionaries (and in addition many missionaries' wives, most of whom are doing mission work in the various fields).

LORD HIGH COMMISSIONER (1976). Sir Hector MacLennan, M.D.

MODERATOR OF THE ASSEMBLY (1976-77), Right Rev. T. F. Torrance, M.B.E., B.D., D.Th.

Principal Clerk, Rev. D. F. M. Macdonald, M.A., LL.B.

Depute Clerk, Rev. A. G. McGilvray, M.A., B.D. Procurator, C. K. Davidson, Q.C.

Law Agent and Solicitor of the Church, R. A. Paterson, M.A., LL.B.

Parliamentary Solicitor, Colin McCulloch (London).

General Treasurer, W. G. P. Colledge, C.A.

The Presbyterian Church in Ireland.—The largest of the Presbyterian churches in Ireland consists of 22 presbyteries, 441 ministers, 564 congregations, with 135,125 communicants, 128,407 families and 6,642 Sabbath-school teachers. During the 12 months ended Dec. 31, 1975, the branch

contributed by congregational effort £616,422 for religious, charitable, and missionary purposes. The total income for the period raised by congregations for all purposes was £4,339,301—*General Sec.*, Rev. A. J. Weir, M.Sc., D.D., Church House, Belfast, 1.

UNITED REFORMED CHURCH

The United Reformed Church was formed by the union of the Congregational Church in England and Wales and the Presbyterian Church in England on October 5, 1972. It is divided into 12 Provinces, each with a Provincial Moderator, and 65 Districts. 187,408 members, and 1,837 ministers. It carries out its overseas work through the Council for World Mission (Congregational and Reformed).

Its ministers are trained at five recognized colleges. *General Sec.*: Rev. A. L. Macarthur, M.A., M.Litt., Church House, 86 Tavistock Place, W.C.1.

Those members of the Congregational Church who did not join the United Reformed Church comprise the Congregational Federation. *Sec.*, J. B. Wilcox, 12 Canal Street, Nottingham.

THE METHODIST CHURCH

The Methodist Church is governed primarily by the Conference, secondarily by the District Synods (held in the autumn and the spring), consisting of all the ministers and of selected laymen in each district, over which a chairman is appointed by the Conference; and thirdly by the circuit meeting of the ministers and lay officers of each circuit. The authority of both Synods and Circuit Meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.

President of the Conference (July 1976-77), Rev. C. M. Morris, B.A.

Vice-President of the Conference (July 1976-77), C. J. Bennett.

Secretary of the Conference, Rev. K. G. Greet, D.D., 1 Central Buildings, Westminster, S.W.1.

President Designate (1977-78), Rev. B. A. Shaw, B.A.

Vice-President Designate (1977-78), Dr. E. M. Waterhouse.

Statistics.—In 1975 in association with the Conference in Great Britain there were 3,865 Ministers, 16,962 Local Preachers, 557,249 Members in 734 Circuits. Statistics are published triennially.

The World Methodist Council, founded 1881, re-

organized 1951, associates Methodism throughout the world in 82 countries.

The Methodist Church was founded in 1739 by the two brothers Wesley and rapidly spread throughout the British Isles and to America before 1770. The Methodist Church in Great Britain was united in 1932 by the fusion of the Wesleyan Methodist Church which was the original section, the Primitive Methodist Church, which arose through the evangelists Hugh Bourne and William Clowes in 1810, and the United Methodist Church, itself a fusion in 1907 of the Methodist New Connexion which dated from 1797, the Bible Christian Methodist Church, which dated from 1815 and the United Methodist Free Churches which originated in controversies in 1828 and 1849. The United Methodist Church of America was formed by a union of United Methodist denominations with the United Evangelical Brethren.

METHODIST CHURCH IN IRELAND

The Methodist Church in Ireland has 224 Ministers, 271 Lay Preachers, 23,898 Adult and 16,978 Junior Members.

President (1976-77), Rev. R. Greenwood.

Secretary, Rev. H. Sloan, 3 Upper Malone Road, Belfast, 9.

THE UNITED CHURCH OF CANADA

The United Church of Canada is the result of the

union (1925) of Methodist, Presbyterian and Congregational Churches in Canada. Subsequently several other communions have become part of the Church. *Moderator*, Rt. Rev. W. K. Howard, B.A., D.D. *Sec. of General Council*, Rev. D. G. Ray, D.F.C., B.A., D.D., The United Church House, 85 St. Clair E., Toronto.

INDEPENDENT METHODISTS

Independent Methodists.—This body is Congregational in its organization, with an unpaid Ministry. Its first Conference was held in 1805. In 1976 there were in Great Britain 183 Ministers, 5,187 Members, 130 Chapels and 4,644 Sunday scholars, *Secretary*, J. M. Day, The Old Police House, Croxton, Stafford.

WESLEYAN REFORM UNION

This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland and Northern counties. In 1975 there were in Great Britain 22 Ministers, 218 Lay Preachers, 4,353 Members, 150 Chapels and 5,008 Sunday scholars.—*President* (1976-7), L. Cook, Matlock. *General Secretary and Connexional Editor*, Rev. D. A. Morris, Wesleyan Reform Church House, 123 Queen Street, Sheffield 1.

THE PRESBYTERIAN CHURCH OF WALES

The PRESBYTERIAN OR CALVINISTIC METHODIST CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government is Presbyterian, and it is a constituent of the World Alliance of Reformed Churches. It is also a member of the British Council of Churches and the World Council of Churches.

In 1975 the body numbered—chapels and other buildings, 1,228; ministers in pastoral charge, 276; elders, 5,636; communicants 94,116; Sunday scholars 37,160; Contributions for various religious purposes (including the ministry), £1,544,440.

The *Eastern Association* which includes nine of the English Presbyteries, was formed in 1947.

Moderator of General Assembly (1976-77), L. Howell, O.B.E., Cardiff.

Moderators of Associations (1976-77) *South Wales*, Miss M. Roberts, Amiwh; *North Wales*, Rev. E. Hughes, B.A., Ruthin, *The East*, Rev. G. D. Bowen, Aberdare.

Chief Secretary, Rev. G. Evans, B.A., 9 Camden Road, Brecon, Powys.

The BAPTISTS have over 33,000,000 members in all countries. In Britain they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1812-13. In the British Isles there were, in 1975, 1,608 pastors. The members numbered 187,066, young people (14-20), 37,009, juveniles (under 14) 142,278. *President of the Baptist Union of Great Britain and Ireland* (1976-77), Rev. F.

A. Goodwin. *Secretary*, Rev. D. S. Russell. *Office*, 4 Southampton Row, W.C.1.

THE JEWS

It is estimated that about 410,000 Jews are resident in the British Isles, some 280,000 being domiciled in Greater London.

The *Board of Deputies of British Jews*, established in 1760, is the representative body of British Jewry and is recognized by H.M. Government. The basis of representation is mainly synagogal, but secular organizations are also represented. It is a deliberative body and its objects are to watch over the interests of British Jewry, to protect Jews against any disability which they may suffer by reason of their creed and to take such action as may be conducive to their welfare.

President, The Lord Fisher of Camden.

Office, Woburn House, Upper Woburn Place, W.C.1.

CHIEF RABBI—The Very Rev. I. Jakobovits, Ph.D. *Executive Director*, M. Davis. *Office*, Adler House, Tavistock Square, W.C.1.

The *Beth Din* (Court of Judgment) is a rabbinic body consisting of *Dayanim* (Assessors) and the Chief Rabbi, who is President of the Court. The Court arbitrates when requested in cases between Jew and Jew and gives decisions on religious questions. The decisions are based on Jewish Law and practice and do not conflict with the law of the land. The *Beth Din* also deals with matters concerning dietary laws and marriages and divorces, according to Jewish Law.

Dayanim, L. Grossnass; Dr. M. Lew; M. Swift. *Clerk to the Court*, Marcus Carr, Adler House, Tavistock Square, W.C.1.

OTHER RELIGIOUS DENOMINATIONS

The General Assembly of Unitarian and Free Christian Churches has about 176 ministers, 272 chapels and other places of worship in Great Britain and Ireland. *Gen. Sec.*, Rev. B. L. Golland, Essex Hall, Essex Street, W.C.2.

The Salvation Army, first known as the Christian Mission, was founded by William Booth, in the East End of London in 1865. In 1878 it took its present name and adopted a quasi-military method of government. Since then it has become established in over 80 countries of the world. The head of the denomination, known as the General, is elected by a High Council, consisting of all active Commissioners and Territorial Commanders who have held the rank of Colonel for at least two years. In 1975 there were in Great Britain, 1,965 Corps (Churches) and 1,959 Officers engaged in evangelistic and social work. The latest statistics for the world (1975) are 16,262 Corps and 24,776 Officers. *General*, Clarence D. Wiseman.

International Headquarters:—101 Queen Victoria Street, E.C.4.

The Society of Friends (Quakers) consists of 19,998 members in Great Britain, and has 440 places of worship (*Recording Clerk*, Arthur J. White).

The total number in the world is about 198,750

(121,232 are in U.S.A. and Canada). *Central Office* (*Great Britain*), Friends House, Euston Road, N.W.1, (*Ireland*), 6 Eustace Street, Dublin.

The First Church of Christ, Scientist, in Boston, Massachusetts, U.S.A. (District Manager, Committees on Publication for Great Britain and Ireland, 108 Palace Gardens Terrace, W.8), has about 300 branch churches and societies in Great Britain and Ireland.

The Moravian Church, 5 Muswell Hill, N.10, has in the U.K. 40 congregations and preaching stations, with 3,500 communicants.

The Free Church of England (otherwise called The Reformed Episcopal Church) has 33 churches in England. *Gen. Sec.*, Rev. A. Ward, 65 Elmfield Avenue, Teddington, Middlesex.

The Seventh Day Adventists (*Hdqrs.*, Stanborough Park, Watford, Herts.), have 149 organized churches, 45 companies and 12,680 members in the British Isles.

At Woking, Surrey, is the Shah Jehan Mosque for Moslems, the first in Great Britain, built in 1889. There are also Mosques at Southfields, S.W.18, Commercial Road, E.1, Birmingham, Manchester, Cardiff, Newcastle upon Tyne, South Shields, Coventry and Glasgow.

THE ROMAN CATHOLIC CHURCH

HIS HOLINESS POPE PAUL VI (Giovanni Battista Montini), Roman Pontiff, *born* in Concesio, Italy, September 26, 1897; *ordained priest* May 29, 1920; *nominated Archbishop of Milan*, November 1, 1954; *Cardinal*, December 15, 1958; *elected Pope* June 21, 1963; *crowned* June 30, 1963.

THE SACRED COLLEGE OF CARDINALS, when complete, consisted of six Cardinal Bishops, fifty Cardinal Priests and fourteen Cardinal Deacons. This number was fixed by Pope Sixtus V in 1586. Pope John XXIII created 52 new Cardinals. The present Pope created 27 new Cardinals on Feb. 22, 1965, 27 on June 26, 1967, 33 on Apr. 28, 1969, 30 on March 5, 1973, 20 on May 24, 1976. In July 1976 there were 137 Cardinals. The Cardinals are advisers and assistants of the Sovereign Pontiff and form the supreme council or Senate of the Church. On the death of the Pope they elect his successor. The assembly of the Cardinals at the Vatican for the election of a new Pope is known as the Conclave in which, in complete seclusion, the Cardinals elect by secret ballot; a two-thirds majority is necessary before the vote can be accepted as final. When a Cardinal receives the necessary votes the Dean of the Sacred College formally asks him if he will accept election and the name by which he wishes to be known. On his acceptance of the office the Conclave is dissolved and the First Cardinal Deacon announces the election to the assembled crowd in St. Peter's Square. On the first Sunday or Holyday following the election the new Pope is crowned with the tiara, the triple crown, the symbol of his supreme spiritual authority. A new pontificate is dated from the coronation.

FORMS OF ADDRESS: *Cardinal*, "His Eminence Cardinal . . ." (if an Archbishop, "His Eminence the Cardinal Archbishop of . . ."); *Archbishop* "The Most Rev. Archbishop of . . ."; *Bishop*, "The Rt. Rev. the Bishop of . . ."

LONDON CATHEDRALS, CHURCHES, ETC.

ST. PAUL'S CATHEDRAL, CITY of London, E.C.4 (1675-1710), cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in S.W. tower weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). The choir and high altar were restored in 1958 after war damage and the North Transept in 1962. The American War Memorial Chapel was consecrated in November, 1958. The Chapel of the Most Excellent Order of the British Empire in the Crypt of the Cathedral was dedicated on May 20, 1960. Nave and transepts free; Fees to the following parts (on weekdays only, 10.45 a.m. to 3.15 p.m. and—during Summer Time only—4.45 p.m. to 6 p.m.); Crypt, 30p; library, whispering gallery, stone gallery and belfry, 30p; total 60p (Children half-price). Service on Sundays at 8, *10.30 and *3.15. Weekdays at 8, *10, *4.

WESTMINSTER ABBEY, S.W.1. (built A.D. 1050-1760).—Open on weekdays 8 a.m. to 6 p.m. (8 p.m., Weds.). Admission beyond the Choir Screen by fee of 40p. (children 5p) (weekdays) except on Wednesdays from 6 p.m. to 8 p.m. (open free). Transepts and Nave open on Sundays only between services.

Holy Communion at 8; matins at 10.30; Holy Communion at 11.40. Evensong at 3. Evening service with Sermon at 6.30; Daily—Holy Communion at 8 a.m.; Westminster School Service at 9 a.m. (term-time only); matins 9.20 a.m. (choral Tuesdays and Fridays); evensong (choral), 5.0 p.m. (said on Wednesdays) (Saturday, 3 p.m.). Chapel of Henry VII Chapter House and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings and queens (Edward I, Edward III, Henry V, Mary Queen of Scots, Queen Elizabeth I), and many other monuments and objects of interest, including the grave of "An Unknown Warrior" and St. George's Chapel at the W. end of Nave and Poets' Corner. The Coronation Chair encloses the "Stone of Scone" brought from Scotland by Edward I in 1297.

SOUTHWARK CATHEDRAL, south side of the Thames, near London Bridge, S.E.1.—Mainly 13th century, but the nave is largely rebuilt. Open 7.30 a.m. to 6.30 p.m., free. Sunday services, Holy Communion, 9 and 11 a.m.; Choral Evensong, 3.30 p.m. Weekdays: Mondays, Holy Communion, 5.30 p.m., Tuesdays, Wednesdays and Thursdays, Holy Communion, 8 a.m., Thursdays, Holy Communion, 5.30 p.m., Fridays, Holy Communion, 1.10 p.m., Saturdays, Holy Communion, 12 noon.

Evensong, Tuesdays 6 p.m. (sung), Wednesdays 5.30 p.m. (said), Fridays 5.30 p.m. (sung). The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; Shakespeare effigy backed by view of Southwark and Globe Theatre in S. aisle; the altar screen (erected 1520) has been restored; the tomb of Bishop Andrews (died 1626) is near screen. The Early English Lady Chapel (behind the choir), restored 1930, is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner); and is

still used for this purpose. John Harvard, after whom Harvard University is named was baptized here in 1607.

TEMPLE CHURCH, The Temple, E.C.4.—The nave formed one of five remaining round churches in England, the others being at Cambridge, Northampton, Little Mapiestead (Essex), and Ludlow Castle. Rebuilding of the church was completed in 1958. Sunday morning services, open to the public, 11.15 a.m., except in August and September. *Master of the Temple*, Very Rev. R. L. P. Milburn, M.A. *Reader*, Rev. Preb. W. D. Kennedy-Beli, M.A.

COUNCIL FOR NATIONAL ACADEMIC AWARDS

344-354 Gray's Inn Road, W.C.1

Established in 1964 with powers to award degrees and other academic distinctions, comparable in standard with awards granted and conferred by universities to students in polytechnics and other institutions of higher education in the United Kingdom which do not have the power to award their own degrees. The Council awards degrees and honours degrees of B.A., B.Ed. and B.Sc. and has higher and research degrees and doctorates. On Sept. 1, 1974, the Council assumed responsibility for the work formerly undertaken by the National Council for Diplomas in Art and Design, and in September, 1976, for the Diploma on Management Studies.

President, H.R.H. the Prince of Wales, K.G., G.C.B.

Chairman, Sir Michael Clapham, K.B.E., M.A.

First Degrees in *General Engineering* or *Engineering Science* are granted by the Universities of Aberdeen, Cambridge, Durham, Edinburgh, Exeter, Leicester, Loughborough, Oxford, Reading, Surrey, and Warwick. Courses leading to first degrees in *Engineering* granted by the Council for National Academic Awards are provided by Kingston Polytechnic, Lanchester Polytechnic, Manchester Polytechnic (*Engineering Technology*), Middlesex Polytechnic, Oxford Polytechnic, Paisley College of Technology (*Engineering with Marketing*), Sheffield Polytechnic, and Thames Polytechnic, also by the Royal Military College of Science. The fifteen member institutions of The Council of Engineering Institutes, 2 Little Smith Street, S.W.1, are the principal qualifying Societies (see below).

Aeronautical Engineering

See main heading:

AERONAUTICS AND AERONAUTICAL ENGINEERING

Agricultural Engineering

First Degrees in *Agricultural Engineering* and *Agricultural Mechanisation* are granted by the University of Newcastle upon Tyne. Courses in *Agricultural Engineering* leading to degrees granted by Cranfield Institute of Technology are provided by National College of Agricultural Engineering, Silsoe, Beds.

Chemical Engineering

First Degrees are granted by the Universities of Aston in Birmingham, Bath, Belfast, Birmingham, Bradford, Cambridge, Edinburgh, Exeter, Heriot-Watt, Leeds, London (Imperial College of Science and Technology; University College), Loughborough, Manchester (Manchester Institute of Science and Technology), Newcastle upon Tyne, Nottingham, Salford, Sheffield, Strathclyde, Surrey, Wales (University College, Swansea). Courses leading to first degrees granted by the Council for National Academic Awards are provided by North East London Polytechnic, the Polytechnic of the South Bank, Teeside Polytechnic and Polytechnic of Wales.

Civil, Electrical & Mechanical Engineering

Degrees in *Civil, Electrical and Mechanical Engineering* are granted by Aberdeen, Aston in Birmingham, Bath (*E. & M. & Structural*), Belfast, Birmingham, Bradford, Bristol, Brunel (*E. & M.*), Cambridge, City, Dundee, Edinburgh, Glasgow, Heriot-Watt, Lancaster, Leeds, Liverpool, London (Imperial College of Science and Technology, King's College, Queen Mary College, University College), Loughborough, Manchester, also Manchester Institute of Science and Technology, Newcastle upon Tyne, Nottingham, Reading (*E. & M.*), Salford, Sheffield, Southampton, Strathclyde, Surrey, Sussex (*E. & M. & Structural*), Wales (University Colleges at Cardiff and Swansea; Institute of Science and Technology, Cardiff; University College, Bangor E.).

Some 30 polytechnics or colleges of technology provide courses (in one or more of civil, electrical and mechanical engineering) leading to first degrees granted by the Council for National Academic Awards.

Electronic Engineering & Electronics

First Degrees in *Electronic Engineering* or *Electronics* or *Electrical and Electronic Engineering* or *Electrical Engineering* (including *Electronics*) are granted by the following universities: Aston, Bath, Belfast, Birmingham, Bradford, Bristol, City, Dundee, Edinburgh, Essex, Glasgow, Heriot-Watt, Hull, Keele, Kent at Canterbury, Leeds, Liverpool, London (Chelsea College, Imperial College of Science and Technology, King's, Queen Mary and University Colleges), Loughborough, Manchester (also Manchester Institute of Science and Technology), Newcastle upon Tyne, Nottingham, Salford, Sheffield, Southampton, Strathclyde, Surrey, Sussex, Wales (University Colleges of Bangor, Cardiff and Swansea, Institute of Science and Technology).

Courses leading to first degrees in *Electronic Engineering* or in *Electrical and Electronic Engineering*, granted by the Council for National Academic Awards are provided by more than 20 polytechnics or colleges of technology.

Marine Engineering and Naval Architecture

First Degrees in *Marine Engineering* and *Naval Architecture* and *Shipbuilding* are granted by the University of Newcastle upon Tyne; in *Naval Architecture* and *Ocean Engineering* by the University of London (University College); in *Naval Architecture* by Glasgow and Strathclyde; in *Ship Science* by the

University of Southampton and in *Maritime Technology* by the University of Wales (Institute of Science and Technology).

Offshore Engineering

First Degrees are granted by Heriot-Watt University.

Production Engineering

First Degrees are granted by the following Universities: Aston (in Birmingham), Bath, Birmingham, Brunel, City, Liverpool (*Industrial Engineering*), Loughborough, Nottingham, Salford, Strathclyde and Wales, Institute of Science and Technology). Courses leading to first degrees granted by the Council for National Academic Awards are provided by City of Birmingham Polytechnic (*Industrial Engineering*), Dundee College of Technology (*Industrial Engineering*), Hatfield Polytechnic (*Industrial Engineering*), Lanchester Polytechnic, Leeds Polytechnic and Trent Polytechnic.

Structural Engineering

First Degrees are granted by the Universities of Bath, Bradford (*Civil and Structural Engineering*), Cambridge (*Structural and Civil Engineering*), Heriot-Watt, London (University College: *Civil, Structural and Environmental Engineering*), Sheffield (*Civil and Structural Engineering*), Sussex, and Wales (University College, Cardiff (*Civil and Structural Engineering*)).

Qualifying Engineering Institutions

ROYAL AERONAUTICAL SOCIETY, 4 Hamilton Place, W.1.

PROFESSIONS SUPPLEMENTARY TO MEDICINE

The standard of professional education in chiropody, dietetics, medical laboratory technology, occupational therapy, orthotics, physiotherapy, radiography and remedial gymnastics is the responsibility of eight professional boards, which also publish an annual register of qualified practitioners. The work of the Boards is co-ordinated and supervised by The Council for Professions Supplementary to Medicine (York House, Westminster Bridge Road, S.E.1).

CHIROPODY

Professional qualifications are granted by the Society of Chiropodists, 8 Wimpole Street, W.1, to students who have passed the qualifying examinations after attending a course of fulltime training for three years at one of the eight recognized schools in England and Wales and two in Scotland. Qualifications granted by the Society are approved by the Chiropodists Board for the purpose of State Registration, which is a condition of employment within the National Health Service.

DIETETICS

(See main heading, p. 520)

MEDICAL LABORATORY SCIENCES

Courses at higher and further education establishments and training in medical laboratories are approved for progress to the professional examinations and qualifications of the Institute of Medical Laboratory Sciences, 12 Queen Anne Street, W.1.

OCCUPATIONAL THERAPY

Professional qualifications are awarded after examination by the British Association of Occupational Therapists, 20 Rede Place, Bayswater, W.2, which recognizes 14 training schools in England, Wales, Scotland, N. Ireland and Eire.

ORTHOPTICS

Orthoptists undertake the diagnosis and treatment of all types of squint and other anomalies of binocular vision, under the direction of an ophthalmic surgeon or a recognized ophthalmic medical practitioner. Industrial Training Foundation

18 Thurloe Place, S.W.7

Formed in 1964 with the support of the Ministry of Labour (now Department of Employment and Productivity) and the Department of Education and Science to assist in implementing the Industrial Training Act, 1964.

It provides a service for all industries and all categories of employees through its six regional offices. A Training Officer and Advisory Service assists individual firms in the development of training programmes and makes available the part-time services of qualified training officers. This service also provides assistance in maintaining training records required by Industrial Training Boards and advice on dealing with questionnaires and grant claims.

The main activities of the ITF are: assessment of training needs; provision of training for apprentices, operators, supervisors, instructors and salesmen. There is a personal tutorial service for management. The Foundation operates training schemes to the requirements of individual firms or on a group basis.

A further activity of the ITF under its training officer service is the operation of the Engineering Industries Group Apprenticeship Scheme (EIGA) formed in 1953, which serves 1,000 firms throughout the country and provides 3,000 training places.

BRITISH POLITICS

(1975) Sept. 20. The Tory Reform Group was launched in London as a new pressure group to the left of the Conservative Party. The Liberal Party annual assembly concluded at Scarborough with a demand for a fair voting system, devolution of power from Westminster, and reform of Parliament. 23. Lord Winterbottom, defence spokesman, detailed to the Lords the next steps the Government had decided on the procurement of major guided weapons systems for British forces, including opening of negotiations with France, Germany and the U.S. for equipment if the terms were right and cancellation of the British missiles projects. 25. The Government suffered three more defeats on the Employment Protection Bill during its committee stage in the Lords, making a total of seven defeats on the measure during the week in the Upper Chamber which had re-assembled for four days during the summer recess to deal with a backlog of legislation. 26. Mrs. Thatcher, Opposition Leader, returned to London from her North American tour, and denied accusations by members of the Government that she had attacked Britain in her speeches there. 28. At an eve-of-conference meeting the Labour Party's national executive, a motion calling on the Government to impound Chilean assets in Britain was carried by 20 votes to 7. 29. The Labour Party Conference in Blackpool carried by a large majority on a show of hands a resolution supporting the £6-a-week voluntary restraint on incomes agreed by the Government and T.U.C. A motion calling for the abolition of private education in Britain by 1980 was carried narrowly despite the national executive's request that it should be remitted and another resolution carried against the national executive advice criticised the Government for not assisting the end of "private landlordism" and not extending the municipalization of housing. 30. Results of the ballot for the national executive of the Labour Party included the removal from it of the Chancellor of the Exchequer (Mr. Healey) and his replacement by Mr. Eric Heffer, M.P. for Walton, Liverpool. The Party Conference carried by a large majority on a show of hands a resolution calling on the whole Labour movement to support the Government's anti-inflation fight.

Oct. 1. At the Labour Party Conference, a resolution calling for the 250 major monopolies, banks, insurance companies and land to be nationalized was massively rejected by 5,721,000-407,000 votes. On a show of hands, a motion was carried demanding an immediate substantial increase in health expenditure and opposing cuts in the National Health Service and welcoming the proposed removal of private practice from it with the long-term aim of the total abolition of private practice and the prohibition of all private patients' insurance plans. 7. The Conservative Party conference opened in Blackpool and carried a resolution stating that some short term financial assistance to

industry might sometimes be necessary, and also another which expressed concern at falling educational standards, calling on the Conservative Party to redefine its priorities in education. Another motion approved deplored the "erosion of individual freedom, choice, and responsibility." 8. At the Conservative Party conference, a motion "deploping the ineffectiveness of the Tory Party in opposition" was declared defeated on a show of hands, the session ending in protests as constituency delegates unsuccessfully demanded a ballot. By a substantial majority, a resolution was carried opposing any modifications of the electoral system which would make voting more complicated or increase the likelihood of ineffective minority governments. 9. The Conservative Party conference overwhelmingly carried a motion viewing with alarm the "increasing threat to the rule of law posed by groups and individuals who resorted to direct action and intimidation." 11. Mr. Karamanlis, the Greek Prime Minister, left London after two days of talks on the Cyprus situation and Greece's application for E.E.C. membership. 15. The Commons rejected by 281-265 votes, a Government majority 16, the "Goodman amendments" to the Trade Union and Labour Relations (Amendment) Bill which were carried overwhelmingly in the Lords in March 1975 to protect editors and outside contributors from closed shop legislation. On October 20 the Lords rejected a Government amendment and approved an amendment proposed by Lord Goodman to safeguard the right of editors not to belong to a trade union and to commission articles from non-journalists. 20. Mr. John Stonehouse, Labour M.P. for Walsall North, made a statement to the Commons on "the events surrounding my disappearance last November." The Prime Minister announced in the Commons the setting-up of a Royal Commission on the National Health Service. 23. The Prime Minister announced the setting-up of a Royal Commission on gambling under the chairmanship of Lord Rothschild to inquire into the existing law and practice on betting, gaming, lotteries and prize competitions. 27. An Opposition censure motion on the Social Services Secretary (Mrs. Castle) over her handling of the N.H.S. was defeated in the Commons by 287-267 votes, Government majority of 20. 29. The Lords rose at 7.51 a.m. after an all-night sitting in the committee stage of the Community Land Bill which lasted 16 hours 42 minutes, the longest for more than 4 years in the Upper House.

Nov. 4. The second report from the Select Committee on Assistance to Private Members was published with a recommendation that each M.P. who wants one should be able to have a full-time personal assistant paid for by public funds. 11. Resisting "closed shop" provisions which in their view would fetter the freedom of the Press, the Lords "killed" the Government's Trade Union and Labour Relations (Amendment) Bill for the current parliamentary session by insisting on the re-insertion of amendments embodying *inter alia* a Press Charter. Mr. Ron Hayward, Labour Party general secretary, accepted the report by Mr. Anthony Barker, Reader in Government at Essex University, that there was no overall bias by B.B.C. against Labour in its coverage of the last general election after the Labour Party itself instituted the inquiry. 12. The Employment Secretary (Mr. Foot) confirmed that the Government intended to invoke the Parliament Act in favour of the Trade Union and Labour Relations (Amendment) Bill. Parliament was prorogued. 19. The Queen opened the new session of Parliament, and in the Speech outlining the Government's legislative

The Foreign Secretary (Mr. Callaghan) told the Commons that there was to be a major review headed by Sir Kenneth Berrill of Britain's requirements at home and abroad with consideration of future pattern of overseas representation. The Home Secretary (Mr. Jenkins) announced he had asked Sir Claus Moser, director of Central Statistical Office, to inquire into the "clerical error" about immigration from the new Commonwealth in 1973. 15. Mr. John Robertson, Labour M.P. for Paisley, joined the breakaway Scottish Labour Party, following a similar decision earlier by Mr. James Sillars, Labour M.P. for Ayrshire South. There were five newcomers and five changes of duties in a list of Opposition Front-bench spokesmen announced by Mrs. Thatcher. 18. The Scottish Labour Party was formally launched in Glasgow. 19. U.K. agreed to withdraw her naval protection vessels from the

disputed Icelandic fishing waters and invited Iceland's Prime Minister to London for talks. The Government announced it was proposed to allocate up to £500,000 for official British contributions to the celebrations commemorating the bicentenary of the U.S. The four-day debate in the Commons on the Government's devolution proposals ended with the Government's motion to "take note" of its White Paper being carried by 295-37 votes, a Government majority of 258 after the Opposition amendment was rejected by 375-244 votes, Government majority of 71. A Scottish Nationalist amendment was defeated by 304-27 votes, Government majority 277. 22. The Prime Minister announced the Government's acceptance of new rules concerning the publication of ministerial memoirs as recommended in a report of a committee of Privy Counsellors chaired by Lord Radcliffe. Retailers agreed to give broad support to the Government's new 5 per cent. price restraint programme after concessions from the Prices and Consumer Protection Secretary (Mrs. Williams). 25. Iceland's Prime Minister (Mr. Hallgrímsson) conferred in London with Mr. Callaghan over the cod war dispute, after he had had talks at Chequers the previous day with Mr. Wilson. 29. Trawlermen who had started to leave the cod waters off Iceland decided to remain and resume fishing after the British Government offered about £100,000 compensation for loss of earnings. A group of at least 50 Labour M.P.s abstained during the vote in the Commons for a Government motion expressing deep concern at the continuing rise in unemployment, but the motion was approved by 234-25 votes, Government majority 209, the official Opposition also abstaining, and then the Conservative amendment critical of the Government's failure to take decisive action against inflation was defeated by 209-250, Government majority 49. Mr. Jeremy Thorpe, the Liberal leader, issued a statement that there was no truth in the "wild allegations" after a man later placed on probation in Barnstaple magistrates' court for dishonestly obtaining social security payments had declared that he was being hounded because of his relationship with Jeremy Thorpe.

Feb. 2. Mr. George Thomas, Labour M.P. for Cardiff West, and the Deputy Speaker, was elected speaker of the House of Commons to succeed Mr. Selwyn Lloyd who resigned. Mr. Oscar Murton (Con. Poole) was appointed Deputy Speaker and Chairman of Ways and Means. 4. The Liberal Chief Whip (Mr. Cyril Smith) issued a statement after a meeting of Liberal M.P.s at the Commons which said that Mr. Jeremy Thorpe re-affirmed to his colleagues that there was no truth in the allegations made against him by "one Norman Josiffe (Scott)" and that the party re-affirmed its support for Mr. Thorpe's continued leadership. 5. R.N. frigates were ordered back into the waters off Iceland after a gunboat cut the warps of the Huii trawler, *Loch Eriboll*. 9. Mr. Wilson told the Commons that it appeared probable that a number of British mercenaries had been shot in Angola although he could not confirm that 14 had been executed for refusing to fight, and disclosed that a considerable number of Britons had been killed in other war operations. On Feb. 10, Mr. Wilson ordered an inquiry under Lord Diplock into the recruitment of British mercenaries for Angola as more than 40 arrived home and were questioned about the previous week's reported execution of 14 of their comrades. 10. New pension provisions were announced by the Social Services Secretary (Mrs. Castle) to ensure that women would have the same access to occupation schemes as men from April 1978. 11. The Conservatives secured a

surprise defeat of the Government in the Commons on a motion to reduce the salary of the Industry Secretary (Mr. Varley) in protest at Government industrial policies, the vote against the Government being 214-209, an Opposition majority of 5. The position was restored on Feb. 17 when the Government won a motion 296-280, a majority of 16. 12. Another frigate, H.M.S. *Andromeda*, was ordered to sail for Icelandic waters after a collision off north-east Iceland between H.M.S. *Yarmouth* and the Icelandic gunboat *Thor*. An Opposition amendment in the Lords to incorporate a "conscience" clause in the Trade Union and Labour Relations (Amendment) Bill to enable compensation to be claimed by a worker dismissed from a closed shop because he objected on grounds of conscientious conviction to belonging to the recognized trade union was carried, against Government advice, by 128-91 votes, a majority of 37 against the Government. 26. Mr. Frank Tomney, Labour M.P. for Hammersmith North, was rejected as candidate for the constituency at the next general election by 45-31 votes at a constituency party management committee meeting.

Mar. 2. Lord George-Brown, former deputy leader of the Labour Party, resigned from it in protest at the Government's closed shop legislation. Earlier he was among 71 peers who voted against the Government's plan to provide a "Press charter" in the Trade Union and Labour Relations (Amendment) Bill on the grounds of its inadequacy to defend Press freedom under the closed shop provisions, although the Government won the division by 109-71, majority of 38. 4. The Government won the by-election in Coventry N.W. with a majority of 3,694 over the Conservatives compared with its general election majority of 7,488. 5. Defence Secretary (Mr. Roy Mason) announced that the U.K. had decided to proceed with Germany and Italy in the production of the Multi Role Combat Aircraft (MRCAs) and that the R.A.F. would take 385 of them. 6. Government chief whip (Mr. Robert Mellish) was re-elected chairman of Greater London regional council of the Labour Party by 687,000 votes against 443,000 for his challenger, Mr. Arthur Latham, left-wing Labour M.P. 8. Proposed new procedure for future elections of the leader of the Liberal Party was published as a discussion paper. 9. The Prime Minister told the Commons at question time that he had "no doubt at all that there was strong South African participation in recent activities relating to Mr. Thorpe," Mr. Wilson said there had been "very strong and heavily-financed private master-minding of certain political operations," although there was no evidence that the South African Government was involved. The controversial Trade Unions and Labour Relations (Amendment) Bill completed its

third reading stage in the Lords without discussion and no vote but with one amendment about "sincerely-held personal conscientious convictions" which was however rejected by the Commons on March 18 by 298 votes to 253, Government majority of 45. 10. The Government was defeated in the Commons on its own motion supporting its plans for public expenditure by 284-256 votes, an Opposition majority of 28, after abstentions by 37 left-wing Labour M.P.s. Earlier the Government rejected an Opposition amendment declining to approve their White Paper on Public Expenditure by 304-274 votes, Government majority of 30. On March 11 the Government had a majority of 17 in the Commons on a vote of confidence following their major defeat on public expenditure, voting being 297-280; three Parliamentary Private Secretaries who abstained on March 10 lost their unpaid posts. 11. Conservatives retained Carshalton and The Wirral in by-elections with majorities of 9,732 and 24,112 respectively. 16. Mr. Wilson, in an unexpected statement, announced he was to resign the premiership as soon as the Parliamentary Labour Party had elected a new leader. On a free vote, the Commons decided by a majority of 175 that B.B.C. and independent radio should be permitted to sound broadcast their proceedings, the favourable vote being 299-124. 17. The Parliamentary Liberal party decided that there should be no leadership election until after the Liberal Assembly in September. The Defence Secretary (Mr. Roy Mason) published the Defence White Paper. 22. In a Commons statement on Rhodesia, Mr. Callaghan set out four pre-conditions for negotiations in a constitution for the country. Mr. Gromyko, Russia's Foreign Minister, arrived in U.K. for three days of talks. 24. Mr. Cyril Smith, M.P. for Rochdale, resigned as Liberal Chief Whip and Mr. Alan Beith, M.P. for Berwick on Tweed, succeeded him. 25. Result of the first ballot for the Labour Party leadership and choice of the next Prime Minister was: Mr. Michael Foot 90, Mr. James Callaghan 84, Mr. Roy Jenkins 56, Mr. Wedgwood Benn 37, Mr. Denis Healey 30, Mr. Anthony Crosland 17. Mr. Crosland automatically dropped out of the second ballot. 30. Result of the second ballot for Labour Party leadership, Mr. Jenkins and Mr. Wedgwood Benn having previously withdrawn from the contest, was: Mr. Callaghan 141, Mr. Foot 133, Mr. Healey 38. Mr. Healey was automatically eliminated.

Apr. 5. The third and final ballot for the Labour party leadership resulted: Mr. Callaghan 176, Mr. Foot 137. Mr. Callaghan was appointed Prime Minister by the Queen two hours after the announcement. In his speech to the Parliamentary Labour Party, Mr. Callaghan declared: "My task will be to lead a united Government and a united party." 6. Mr. Denis Healey presented his Budget proposals in the Commons and announced income tax reliefs conditional on T.U.C. agreement to a pay rise limit "in the order of 3 per cent." 7. Mr. John Stonehouse, M.P. for Walsall North, resigned from the Parliamentary Labour Party, and decided to sit as an independent on the opposition benches, but on April 14 joined the English National Party. 8. The Prime Minister announced his first cabinet which included four new members and excluded four members of Mr. Wilson's Cabinet. New Cabinet ministers were Mr. Bruce Millan (Scottish Secretary), Mr. Albert Booth (Employment Secretary), Mr. Edmund Dell (Trade Secretary) and Mr. David Ennals (Social Services Secretary). Departing Cabinet ministers were: Mr. Edward Short (Lord President of the Council and Leader of the Commons), Mr. William Ross

(Scottish Secretary), Mrs. Barbara Castle (Social Services Secretary), and Mr. Robert Mellish (Govt. Chief Whip). 13. Mr. John Stonehouse, Ind. M.P. Walsall North, was ordered to leave the Commons for disorderly conduct after he had clashed more than once with the Deputy Speaker (Sir Myer Galpern). 14. The Prime Minister issued the second and final list of his new administration which resulted in promotion for 10 back-bench M.P.s and the dropping of 4 ministers. 29. Britain's first export cargo of North Sea crude oil from the Forties Field was carried in the B.P. tanker, *British Dragon*, from the Firth of Forth to Wilhelmshaven.

May 3. Leader of the House (Mr. Foot) told the Commons that official travel by the 635 M.P.s cost taxpayers about £1,000,000 in 1975-76, the money being incurred by members' journeys between their homes, constituencies and the House and on attending official functions. 6. The Agriculture Minister (Mr. Peart) announced in the Commons that two more R.N. frigates were being sent to join the four protecting British trawlers off Iceland. 9. Fifteen Conservative M.P.s formed a Parliamentary committee to oppose plans for Scottish and Welsh Assemblies. 10. Mr. Jeremy Thorpe resigned as leader of the Liberal Party after 9 years in office and spoke of "a sustained witch hunt" against him, and a "campaign of denigration which has endured for over three months," declaring also that no man could effectively lead a party "if the greater part of his time has to be devoted to answering allegations as they arise and countering plots and intrigues." The Labour party's organization committee ordered that the annual general meeting of Newham North-East constituency party in February, when Mr. Reg Prentice, Overseas Development minister and the local M.P., was dropped as their candidate at the next general election, be reconvened and that all delegates' credentials be inspected to ensure they were eligible to vote. 12. Mr. Jo Grimmond, Liberal Party leader from 1956-67, agreed to resume the leadership until a special conference of the Party in June set in motion a new procedure to elect the leader by July 12. 14. Scottish Conservative and Unionist Party at their annual conference in Perth approved a compromise resolution on devolution which supported the principle of a directly-elected assembly in Edinburgh, but opposed any Government proposals based on the present White Paper on Devolution. 25. The Leader of the Commons (Mr. Foot) told M.P.s that the Government's proposals for devolution for Scotland and Wales would be covered in a single bill to be introduced in the autumn. Social Services Secretary (Mr. Ennals) announced that the Government had decided to postpone the introduction of the child benefit scheme under which benefits would be paid direct to mothers with husbands losing tax allowances for their children and instead to pay a new family allowance of £1 a week for the first child from April 1977, with £1.50 allowance, as now, for other children. 26. Sir Harold Wilson, the former Prime Minister, announced his resignation honours list, including nine new life peers. There were furious scenes in the Commons over the future of the Government's bill to nationalize the major part of the aircraft and shipbuilding industries when Mr. Foot proposed that M.P.s should debate a Government motion to dispense with delaying procedural committee work after the Speaker had ruled the measure was *prima facie* "hybrid," which meant that it would have to go before a select committee of M.P.s. On May 27 the Commons was adjourned by the Speaker because of "scenes of grave disorder" after the

Government had a one-vote majority on the motion to dispense with private standing orders and thus allow the bill to proceed, the figures being 304-305. Labour M.P.s stood to sing "The Red Flag" and Mr. Michael Heseltine, Shadow Industry Secretary, removed the mace and brandished it towards the Government benches until Mr. James Prior, Opposition spokesman on employment, returned it to the Clerks' Table. Blows were exchanged as the Speaker suspended the sitting for 20 minutes. Immediately the House resumed, the Speaker adjourned the sitting until next day when Mr. Heseltine apologized for his behaviour. A golden copy of the Magna Carta was handed over in Westminster Hall to a delegation of 25 senators and members of the House of Representatives as a gift to mark the bicentenary of U.S.A., the presentations being made by the Speaker to his American equivalent, Mr. Carl Albert. 27. The Labour Party published its economic and social programme extending into the 1980s. 28. The Conservative Opposition decided to adhere to their decision to stop pairing and other cooperation with the Government following the Commons row on May 27. The decision followed a meeting between the Prime Minister and Mrs. Thatcher. 30. The annual conference of Scottish National Party ended at Motherwell when a motion to campaign for independence rather than devolution was defeated by 564-481 votes, a majority against of 83.

June 1. The third cold war between Britain and Iceland ended when a 6-month agreement was signed by the U.K. Foreign Secretary (Mr. Crosland) and Iceland's Foreign Minister (Mr. Agustsson) to allow an average of 24 British trawlers a day to fish within the 200-mile zone claimed by Iceland. 9. An Opposition motion of no confidence in the Government was defeated by 309 votes to 290, Government majority of 19, in the Commons, the Conservatives voting their full strength were supported by 11 Scottish Nationalists, 3 Welsh Nationalists, one United Ulster Unionist, and one independent while the Liberals and the rest of the United Ulster Unionists abstained. 12. At a special assembly in Manchester, the Liberals became the first party in Britain to elect their leader by popular poll when delegates decided on a constituency system of voting with Liberal M.P.s controlling only the nomination of candidates. 17. The Prime Minister ordered an "urgent and thorough" inquiry to identify the person who leaked a set of Cabinet papers on the decision to postpone the introduction of the child benefit scheme and told M.P.s the investigation would be conducted by Sir Douglas Allen, head of the home civil service. On July 1, the Prime Minister told Parliament police were being called in to investigate the leak and said he was setting up a committee of 3 Privy Counsellors to examine the present rules for handling Cabinet documents. 22. The Prime Minister appealed to the Conservatives to end their campaign of non-cooperation with the Government in Westminster and offered a re-run of the disputed one-vote majority on May 27 in procedures on the bill to nationalize the aircraft and shipbuilding industries. The Government won this vote on June 29 with a majority of 14 after the 14 Scots and Welsh Nationalist M.P.s abstained following an eleventh-hour promise by Mr. Foot to consider the demand for a separate Scottish entity within the State board which would run the industry. The first report from the House of Commons select committee on direct elections to the European Assembly was published. 23. It was announced after talks at 10 Downing Street between President Giscard d'Estaing and Mr. Callaghan that the French President and the British Prime

Minister were to hold regular annual meetings starting in the autumn. Earlier the French President addressed both Houses of Parliament in the Royal Gallery at Westminster. 24. The Labour Party won the Rotherham by-election with a majority of 4,527 over the Conservative candidate compared with a majority of 17,034 at the last general election. 30. Relaxations in the Prices Code, adding about one per cent. to prices over the next year, were announced in the Commons by Prices Secretary (Mrs. Williams). At the same time a Government White Paper, "The Attack on Inflation: the Second Year," was published, stating that industry had to be permitted to achieve sufficient profitability to generate funds for investment.

July 1. Mrs. Thatcher decided to resume the pairing of M.P.s with the Government after assurances from the Labour Party about stricter pairing arrangements. 7. Mr. David Steel, M.P. for Roxburgh, Selkirk and Peebles, was elected new leader of the Liberal Party, the electoral college, representing all constituency associations, giving him 12,541 votes compared with 7,032 for Mr. John Pardoe, M.P. for North Cornwall, the only other contender. 12. Mr. Foot announced a £6 a week increase in M.P.s salary, bringing the annual salary to £6,062, but this should only be drawn if it did not put the total earnings above the £8,500 limit for an increase under the present pay policy. M.P.s would also be able to claim up to £6-a-week increase for their secretaries. 14. During the report stage of the Finance Bill, M.P.s voted 190-170, a majority against the Government of 20, to free the first 50 per cent. of war widows pensions from tax. 15. Mrs. Thatcher again called off pairing with Government ministers and M.P.s after Mr. Foot announced that the Government intended to guillotine five major bills on one day, in an unprecedented use of the Parliamentary time-table motions. Labour held their seat at the Thurrock by-election with a majority over the Tories of 4,839 compared with a majority at the October 1974 general election of 19,680. 20. The Government had a majority of 6 in the Commons on a motion to guillotine debates on bills to phase out pay beds from N.H.S. hospitals and to extend the scope of work which might be done by registered dock workers, voting being 311-305. Another motion restricting debating time on the bill to nationalize the aircraft and shipbuilding industries was carried by 311-294, a Government majority of 17, a division in which 14 Scottish and Welsh Nationalist M.P.s abstained. A third time-table motion on bills to enforce comprehensive secondary education and to give security of tenure to tenants in tied agricultural cottages was also won by the Government. 20. Proposals of the Scottish National Party for an independent Scotland to maintain a "practical working relationship with the rest of Britain" were announced. 22. Mr. Healey announced in the Commons cuts in public spending amounting to £1,012 million in the year beginning April 1977, and an increase of 2 per cent. in employers' national insurance contributions effective from April 6, 1977, to yield about £910 million in 1977/78 and about £1,030 million in a full year. 23. It was announced that the London living allowance of M.P.s was to rise by £200 a year with their car allowance raised from 10.2p per mile to 11.8p backdated to April. M.P.s voted in the Commons to approve a £6 weekly rise in their Parliamentary salary. 26. Mr. Jim Sillars, M.P. for South Ayrshire, and Mr. John Robertson, M.P. for Paisley, who formed the breakaway Scottish Labour party, said that they would no longer accept the Labour Whip because they were totally opposed to the Government's public spending cuts. 28. Labour Party's

national executive committee endorsed the new version of the social contract by 13-7 votes and carried by similar figures a motion attacking the public expenditure cuts. Britain broke diplomatic relations with Uganda, the first time U.K. had taken the lead in cutting links with a Commonwealth nation. 29. The Bill to nationalize the aircraft and shipbuilding industries received a third reading in the Commons by 311 votes to 308, a Government majority of 3. Seventy-eight Labour M.P.s signed a motion criticizing the Government's decision to cut public expenditure in the next financial year.

Aug. 3. Mr. Foot told M.P.s of changes and additions to the Government's plans for devolution and repeated the Government's determination to proceed with them despite warnings from Labour and Tory back-benchers. A White Paper was published dealing with these revised proposals for devolved assemblies for Scotland and Wales. The report of the Committee of Privy Councillors appointed to inquire into the recruitment of mercenaries was published with a recommendation for legislation to prohibit such recruitment. 17. An announcement from 10 Downing Street stated that Mr. John Stonehouse, M.P. for Walsall North, had been removed from the Privy Council at his own request. 19. The second report from the Select Committee on Direct Elections to the European Assembly was published and favoured single-member constituencies for the first elections in 1978, being against the introduction of the single transferable vote for the 81 seats allotted the U.K., the proposed basis being England 66, Scotland 8, Wales 4, Northern Ireland 3. 26. The report of the committee chaired by Lord Houghton on financial aid to political parties was published. The majority recommendation was for annual grants to be paid from Exchequer funds to the central organizations of parties for general purposes on the basis of 5p for each vote cast for its candidates at the previous General Election. Four of the 12 members considered that no case had been made out for state assistance. 27. Mr. John Stonehouse, M.P. for Walsall North, who was serving a 7-year sentence for forgery, fraud and false pretences, resigned his Parliamentary seat.

Sept. 10. Prime Minister carried out major ministerial reshuffle; among nine Cabinet changes announced was appointment of Mr. Merlyn Rees (formerly Secretary of State for Northern Ireland) as Home Secretary in succession to Mr. Roy Jenkins (who would be taking over as President of European Commission in 1977), Mrs. Shirley Williams (formerly Secretary of State for Prices and Consumer Protection) became Secretary of State for Education and Science, and Mr. Roy Mason (formerly Secretary of State for Defence) became Secretary of State for Northern Ireland.

IRELAND

(1975) Sept. 22. At least nine Ulster cities and towns from Londonderry to Belfast were hit by bomb and gun attacks in one of the worst days of violence since the Provisional I.R.A. announced its ceasefire in February 1975; twelve civilians and three policemen were injured. Two men were given life sentences at Belfast City Commission for the murder of a young Roman Catholic on the outskirts of Portadown on Oct. 27, the judge declaring that the real and primary reason for his death was religion. Mr. Merlyn Rees, Northern Ireland Secretary denied in a statement read on his behalf in the House of Lords, reports of a document containing a list of 12 points of a "peace deal" with the Provisionals being found when David O'Connell was arrested in Dublin and that it was

in the hands of the Dublin authorities. 29. Mr. William Craig, Vanguard Party leader, resigned as deputy chairman of United Ulster Unionist coalition because of his statement that a voluntary coalition government between Loyalists and the S.D.L.P. was essential until the present emergency ended. A 20-year old nurse alleged to have admitted carrying bomb-making materials into an R.C. church near the centre of Belfast in January 1975 was sentenced at Belfast City Commission to six years jail.

Oct. 2. Five people died and nine were injured in a series of shootings and bomb attacks in Belfast, including three people, two sisters among them, who were shot dead at a Roman Catholic beer bottling factory. Four more deaths occurred when a bomb-carrying car with four men in it, exploded in the village of Faren Lester, near Coleraine, Co. Londonderry, while a tenth fatality was a woman killed in a bomb attack in a bar at Killylea, Co. Down, where 10 people were also reported injured. 3. The Eire Government refused to release three leading Provisional I.R.A. prisoners or to make any major concessions in return for the life of Dr. Tiede Herrema, the Dutch managing director of the Ferenka factory near Limerick, who was kidnapped near his home in Co. Limerick in the morning, but the management of Ferenka decided to close down for 24 hours as demanded by the gang. On Oct. 22 Irish police and troops surrounded the council house in Monasterevin, Co. Kildare, where Dr. Herrema was held captive. On Oct. 26 Provisional I.R.A.'s political wing, Sinn Féin, appealed to the kidnappers to free Dr. Herrema. Late on Nov. 7 he was released unhurt and the I.R.A. pair who had been holding him hostage for a total of 36 days, Eddie Gallagher and Marian Coyle, surrendered to the Eire police. On March 11, Gallagher and Coyle were jailed for 20 years and 15 years respectively in Dublin Special Criminal Court for their part in the kidnapping and also received concurrent sentences for other offences connected with it, including the wounding of a detective. Two accomplices, Brian McGowan and John Vincent Walsh, were each jailed for 8 years. David Dunne, who pleaded guilty to kidnapping, was sentenced to 3 years' imprisonment suspended for 3 years. 11. Mr. William Craig, leader of Ulster's Vanguard Unionist Party, was backed by his party's central council which supported a motion of confidence in him by 128-79 votes following his proposal for an emergency coalition between the Unionist majority in Northern Ireland and the Social Democratic and Labour Party. After the vote, nine Vanguard members of the N.I. Convention resigned. Eire released 84 prisoners from jail to mark the canonization next day in Rome of Blessed Oliver Plunkett, executed at Tyburn in 1681; none were guilty of politically-connected crimes. 14. A meeting of the United Ulster Unionists Council in Belfast suspended Mr. William Craig, and three followers from membership because of their attitude to voluntary emergency power-sharing. On Oct. 24 Mr. Craig was expelled from the U.U.U. Coalition. 15. A Provisional I.R.A. bomb smashed part of the Castlereagh barracks of the R.U.C. in Belfast's eastern suburbs, injuring slightly four police officers and three civilians. 29. One man was shot dead and at least 14 wounded in a series of Belfast ambushes involving Republican extremists. 30. A 6-year-old girl was shot dead when a gunman burst into her parents' home in the Republican Upper Falls Road area and sprayed the living room with bullets. 31. Seamus McCusker, who administered Provisional Sinn Féin "incident centres" linked with the Security forces, was shot dead by

teenage terrorists in the New Lodge Road district of Belfast.

Nov. 4. Mr. Merlyn Rees told the Commons that people convicted of terrorist offences in Ulster after March 1, 1976, would not be given the status of special category prisoners. 7. The Northern Ireland Convention, set up six months earlier, ended its term with the 78 members unable to agree on recommendations to the U.K. Government about a form of future devolved government for Ulster. The Convention's formal report was submitted to the Northern Ireland Secretary on Nov. 8. 11. Four men were killed and four others wounded as the quarrelling between the Official and Provisional wings of the I.R.A. continued. 14. Eire's Government retained its majority when Fine Gael held by a majority of 3,000 votes the West Mayo seat in a by-election. 19. Mr. Roy Bradford, Vanguard Unionist M.P. for South Belfast, resigned from the party and applied to join the Official Unionists. Eire Government introduced the Criminal Law Jurisdiction Bill to enable Eire courts to try fugitive offenders from Ulster and Britain. 22. Three soldiers were killed and one was seriously injured in Ulster when Provisional I.R.A. men surrounded their observation post in South Armagh. 25. Two policemen were killed and two others wounded when their Land-Rover was ambushed by terrorists on a lonely country road between Pomeroy and Castlecaulfield, Co. Tyrone. 29. A man was killed and three people injured superficially when two bombs exploded at Dublin Airport, the airport being evacuated and closed for six hours.

Dec. 5. Mr. Rees ended detention without trial in Ulster when he signed release orders for the last 73 of the 1,981 men and women held at various times since internment started in August 1971. 11. Nine people were hurt when a bomb exploded at an Army H.Q. in the centre of Belfast and a large area of shops and offices was damaged. 17. The Prime Minister of Eire (Mr. Cosgrave) disclosed in the Dail that the total cost in compensation for damage and lost earnings from tourism and business because of the terrorist campaign in Ulster was about £250 million while in the current year alone cost of the Army and police would be about £120 million. 21. Terrorists unsuccessfully tried to blow up buildings at Belfast Airport after taking four workers hostage and forcing two other workmates to drive a truck loaded with explosives into the airport compound. 29. Terrorists hijacked a goods train and blew it up on the main Dublin-Belfast line shortly before the southbound Dublin Enterprise express was due to pass.

(1976) Jan 1. Total death toll in Ulster in 1975 comprised 14 soldiers, 11 R.U.C. men, 5 part time members of U.D.R., and 216 civilians, or 33 more dead than in 1974. 2. About 90 Provisional I.R.A. prisoners at Eire's Port Laoise maximum security prison ended a 36-hour hunger strike without any of their demands being met by the Dublin authorities. 3. At least 42 people were injured in Ulster in bomb attacks on public houses in Camlough and Portadown. 4. Terrorists shot dead five members of the Social Democratic and Labour Party in two separate incidents in Co. Armagh. 5. Ten Protestant men travelling home from work at a textile factory in a mini-bus in South Armagh were ambushed and shot dead. 6. Mr. Wilson ordered the Army's "spearhead battalion" to move immediately to South Armagh following the previous night's wave of violence. 8. An agreement between Mr. Rees and the Irish Justice Minister (Mr. Cooney), was reached to set up a hot line to connect British Army's H.Q. in Bessbrook and the Irish Army's forward base at Dundalk as part of

closer cooperation between U.K. and Eire in the campaign against terrorists. 12. Mr. Rees announced that the Ulster Convention would be reconvened on Feb. 3 for four weeks in the hope that it would reach agreement on "partnership and participations" in the future government of the Province. Mr. Wilson told the Commons of intensified security measures to make the whole of Co. Armagh a special emergency area. 13. Two I.R.A. men who planted it and two other people were killed by a bomb which exploded in a Belfast shopping arcade and 20 other persons were injured. 14. Provisional I.R.A. announced a campaign of terror against senior civil servants in Ulster, disclosing that it had begun on Jan. 5 with bomb attacks on homes of four officials. 22. Eire police and troops discovered the largest cache of I.R.A. explosives found on either side of the Irish border, uncovering nearly 3 tons of materials and equipment in a field at Gormanstown, Co. Meath. Terrorists claimed the lives of six more people in Ulster, including two policemen killed when a booby-trapped shotgun exploded. 28. Eire's Finance Minister (Mr. Richie Ryan), presenting his budget proposals, declared the Provisional I.R.A.s "forces of evil" were costing the country vast amounts of money and announced price rises on whiskey (up 5p to 56p a double), beer (up 5p to 30p a pint), cigarettes up 3p to 43p for 20), and petrol (up 10p a gallon to 86p).

Feb. 6. Provisional I.R.A. blew up part of the Belfast-Dublin Enterprise express over a bridge at Scarva, Co. Armagh, but only 4, including 2 children, were slightly injured. 8. The new leader of the Provisional I.R.A. was named as Leo Martin of Belfast in succession to Seamus Twomey, ousted chief of staff. 10. Two bombs in the centre of Belfast and 8 incendiary devices planted in shops marked the first anniversary of the "ceasefire" in Ulster. 13. A bomb exploded at Dublin's Shelbourne Hotel. The building was cleared after a warning and no one was hurt. A series of fire-bombs went off almost simultaneously in seven of the City's department stores. Roman Catholic youths in western areas of the City hijacked cars, stoned soldiers and attacked police. 20. Eight people were taken to hospital in Belfast after a bomb was thrown into a bar from a passing car following a series of incendiary attacks on shops in the City centre. 28. Glen Barr, Leader of the Workers' Defence Council during the 1974 Ulster general strike, resigned as political adviser to Ulster Defence Association and severed all links with the para-military organizations.

Mar. 3. The Eire Parliament gave final approval by 65-61 votes to the Criminal Law Jurisdictions Bill which sought to prevent the Republic being a sanctuary for terrorists. 5. Ulster's Convention was formally dissolved by Mr. Rees because there was "no prospect of agreement between the parties there", but he made it clear that direct rule would be positive and not negative. 6. Fourteen mortar rockets were fired at Belfast's Aldergrove Airport from a hijacked lorry, but no one was injured. 26. Terrorists fired six mortar bombs at the Army base in Fort George, Londonderry, but caused only slight damage, no one being hurt. 31. Three soldiers were killed and a fourth wounded when their Land-Rover was blown up by a land mine in a country road in South Armagh. An estimated £700,000 was stolen by Provisional I.R.A. in an armed raid on a mail train near Dublin. Patrick Joseph Thompson, unemployed coach-builder of Tullydonnell, South Armagh, was jailed for life and recommended to serve no less than 30 years when convicted at Belfast City Commission of murdering four soldiers in a booby trap explosion in South

Armagh in July 1975.

April 3. Thirty-eight people were injured when a bomb exploded in the Roman Catholic Lower Falls area of Belfast in a crowded bar. 19. An I.R.A. gunman murdered a prison officer in his Belfast home while his wife was held in another room by a second gunman. Earlier another prison officer was shot and badly wounded outside Crumlin Road jail by two teenaged terrorists. 21. The Eire Government banned the Dublin demonstration planned for Sunday, April 25, by the Provisional I.R.A. to mark the 60th anniversary of the 1916 Easter rising, this being the first ban of its kind in Dublin since the 1930s. 22. Two U.F. men, David Wallace and Thomas Lawder, both of Belfast, were each sentenced at Belfast City Commission to 20 years jail on charges of bombing a public house in the Roman Catholic Markets area of Belfast in August 1975, attempting to murder a customer, and having a gun and ammunition. 23. Robert Welsh, aged 19, an apprentice joiner of Belfast, was sentenced to life imprisonment at Belfast City Commission and recommended to serve not less than 15 years for the murder of a Roman Catholic street cleaner in Belfast on Feb. 10. 28. Irish Parliamentary Labour party withdrew the whip from one of its deputies, Dr. David Thornley, for appearing in the Dail with Provisional I.R.A. leaders at the previous week-end's illegal Sinn Féin parade in Dublin. Mr. Rees told Westminster M.P.s that committees had been set up in Northern Ireland to review the provisions for compensation for injury and damage to property.

May 5. About 600 troops of the Army's spearhead Battalion left Ulster, the pull-out leading to greater involvement by R.U.C. and Royal Military Police in West Belfast. Nine prisoners, two serving sentences for attempted murder, and all members of Irish Republican Socialist party, escaped from Maze Prison, Co. Antrim, by digging a tunnel with makeshift tools. 6. Eight men of the Special Air Services unit of the British Army appeared in a Dublin special criminal court on firearms charges after being arrested about 500 yards inside Eire and were released on bail of £5,000 each, the Army Minister (Mr. Bob Brown) informing the Commons at Westminster, that the soldiers had inadvertently crossed the border due to a map-reading error. 6. LABOUR AND TRADE UNIONS

(1975) **Sept. 23.** The National Union of Seamen who had banned members from crewing British-registered ships to Chile as a protest against the new régime, reached a compromise agreement with shipowners. An offer of £6 a week wage increase was made to 30,000 workers on national and London evening newspapers by the Newspaper Publishers Association effective from Oct. 1 for the next 12 months. 26. Local authorities granted 500,000 manual workers the full £6-a-week wage increase permitted under the Government's anti-inflation policy at a cost to ratepayers in a full year of £205 million, an average of 2.8p in the £. 27. Six members of the Electricity Supply Union, not recognized by employers in a national agreement, and who worked at the Ferrybridge power station, Knottingley, West Yorkshire, were dis-

missed for refusing to join a recognized union. 29. Vauxhall Motors announced the introduction of a closed shop agreement for production workers at Luton, Dunstable and Ellesmere Port, Cheshire.

Oct. 1. Result of a ballot of N.U.J. members on annual delegate meeting decisions on compulsory introduction of a closed shop and the position of editors rejected five of seven points adopted as policy by the conference, editors now being offered freedom of choice on membership and 100 per cent. post-entry membership not now being a provision of future national and house agreements. 3. The Labour Party Conference ended after a resolution was carried overwhelmingly calling for widespread changes in the control and financing of the Press. 8. Junior hospital doctors in Plymouth, Sheffield, Leicester, Exeter, Norwich and other centres decided to reject the new pay deal and working conditions accepted by the B.M.A. on their behalf the previous week, the main grievance was about overtime rates of 13p an hour. The B.B.C.'s monthly-paid staff accepted a £6-a-week pay increase costing £6,240,000 a year. 10. Junior doctors were informed by the Health Department that the new pay and conditions contract would be suspended while talks continued. 12. No copies of the *Daily Telegraph* were produced in London or Manchester after a dispute involving the stereo department of the National Graphical Association. 13. Representatives of 1,500 junior hospital doctors in the North West voted to treat emergency cases only from Oct. 15, but rejected proposals for a full-scale strike. In Plymouth, hospitals in the City were brought down to an emergency service when junior staff stopped work for 24 hours. 14. Restrictions on services continued at several northern hospitals and doctors at Blackburn, Bury, Bolton, Leigh and Salford decided to join the emergency-cases-only action. The Government rejected a demand from the A.U.E.W. for an inquiry into the affairs of Norton Villiers Triumph, the motor-cycle manufacturers, to examine whether public money staked in the industry had been used wisely. 16. Junior doctors decided to hold a national ballot on likely industrial action after the refusal by Mrs. Castle (Social Services Secretary) to make more money available to them. The Central Electricity Generating Board announced that 28 power stations in England and Wales were to be shut down and another 20 partly closed over the next two years, affecting 4,952 jobs, but without compulsory redundancies for two years. 17. The crew of the car ferry, *Eagle*, sold to a French company, prevented vehicles leaving the ship when she docked for the last time in Southampton and dockers blocked the loading ramp with two tractors. On Oct. 20 the blockade was called off after P. & O. made financial concessions to the crew. 20. Doctors withdrew their threat to boycott the Royal Commission on the N.H.S. when the Prime Minister told the Commons that the inquiry would be free to consider the relationship between the N.H.S. and private medical practice. The Jockey Club agreed to form a National Joint Council for stable lads. 21. Britain's first North Sea oil terminal of the Ekofisk pipeline at Seal Sands, Cleveland, Teesside, was inaugurated. 22. The *Financial Times* was not published after N.G.A. members rejected management reassurances on redundancy plans and stopped work. British Steel Corporation announced the formation of a new management company, B.S.C. (Industry) to concentrate and expand the Corporation's efforts to bring new industry into steel closure areas. 23. More junior doctors throughout the country joined the campaign of industrial action

which was affecting care in many hospitals. A further effort by British Rail to agree terms with union leaders for economies failed to progress over the issue of compulsory redundancies. **26.** North-West Thames region of the Junior Medical Staff Association, representing 1,600 doctors, decided to withdraw all but emergency services in their dispute with the Social Services Secretary. **28.** A change in the production of Northern editions of national newspapers involving editing from London by modern production methods was announced in Manchester by the Mirror Group Newspapers and led to an immediate walk-out by N.G.A. members. **31.** Unions representing 240,000 ancillary manual workers in the N.H.S. settled for a £6-a-week wage increase from second week of December.

Nov. 1. The 17-day strike by coke oven workers which threatened to close British Steel Corporation's Ravenscraig plant in Lanarkshire ended. **4.** A 10-day old strike by property men over new manning proposals at Thames Television which disrupted programme production at the Teddington studios, ended after their union refused to make the dispute official. **5.** A "closed shop" agreement whereby all new employees of British Gas Corporation must join one of the two recognized unions was negotiated in the gas industry. A £6-a-week pay rise for 90,000 building workers employed by local authorities was agreed, costing £28 million in a full year. No copies of the *Daily Mirror* were printed in Manchester because members of N.U.J. went home without working in a dispute over redundancy proposals, and on Nov. 6 *Daily Telegraph* northern editions were stopped because of a meeting of N.U.J. members protesting against delay in a management statement on production plans in Manchester. **8.** The *Scottish Daily News*, the workers' cooperative newspaper launched six months earlier, ceased publication. **11.** A joint meeting at Coventry decided to appoint joint management-union committees to save Chryslers and ensure its future in U.K. London editions of *Daily Express* were not published because of a pay dispute involving engineering union members. **14.** Normal working on London editions of national newspapers was resumed following interim settlement of an unofficial stoppage in the pay dispute involving Engineering members employed by the *Daily Express*. **17.** Forty members of the Peterborough branch of the National Union of Journalists were ordered by their national executive to pay fines of between £20 and £40 for working against union instructions during a printing workers' pay dispute and five of them received a one-year suspension from membership. A record £6 a week pay rise for farm workers was awarded by the Agricultural Wages Board for England and Wales. **18.** Moderate candidates captured control of the national executive of the Amalgamated Union of Engineering Workers when results of the postal ballots were declared. A £6-a-week pay increase for 34,000 manual workers in the water supply industry was agreed. **20.** Doctors' leaders decided to call on hospital consultants to treat only emergency cases from Dec. 1 as part of the campaign against the Government's plan to end pay beds in N.H.S. hospitals. **25.** The Government won by six votes when the Liberals' amendment objecting to the proposal to extend the National Dock Labour Scheme to all port transport work within 5 miles of the sea was defeated by 294-288 votes in the Commons. **26.** The National Union of Bank Employees was formally readmitted to the T.U.C. **28.** Effects of the junior hospital doctors' industrial action over their pay

dispute resulted in closures of some hospitals units and wards. Delegates representing 90,000 company busmen voted unanimously in London to accept the £6 flat rate increase permissible from March 1976. **30.** A dispute which closed over 470 public houses in the Midlands ended when workers at Ansells Brewery, Birmingham, agreed to return to work, following settlement over union representation of public-house managers.

Dec. 3. The meeting between the Prime Minister and doctors' leaders at 10 Downing Street produced no immediate solution to the dispute over the N.H.S. The National Union of Public Employees blacked all 158 private beds in Birmingham's 18 hospitals because of industrial action by consultants. **8.** By 32-20 votes, the engineering section national committee of the A.U.E.W. instructed the executive to "comply with the policy on wages as adopted by the 1975 T.U.C." Members of the N.U.J. employed on provincial and London suburban newspapers voted to accept a pay offer of £6 a week for seniors by the Newspaper Society against the recommendation of their own executive. Qualified agreement was announced between national newspaper publishers and leaders of four print unions for a policy of no compulsory redundancies and other measures to reduce manning levels with the introduction of new technology. **9.** The teachers' panel of the Burnham Committee agreed to accept the £6 pay rise limit for their next claim due to be effective in April 1976 although they decided to press for the whole £6. **12.** Leaders of junior hospital doctors decided to advise their colleagues to accept a new agreement in pay and contractual terms, but on Dec. 16 the doctors decided to continue their overtime ban. **19.** The strike by 800 office workers ended and averted a threatened shut-down of British Steel Corporation's Ebbw Vale works, the lay-off of 3,600 other workers being cancelled. **29.** Rolls-Royce announced that it was to close two of its factories—Dundonald in Northern Ireland, and Wellhouse Mill at Barnoldswick, Yorks.—and that it was to reduce its work force by 6,000 in 1976 by "natural wastage if possible." The B.B.C. cancelled all its main news programmes on both T.V. and radio when 700 journalists staged a one-day strike in a dispute over payments for working unsocial hours. **30.** The British Steel Corporation announced that it was proceeding with economies aimed at saving £200 million a year.

(1976) Jan. 4. Several thousand steelworkers reported for work at plants in South Wales and the Midlands in defiance of the B.S. Corporation's ban on most week-end shifts as part of its programme to reduce losses, but no steel was produced. **11.** Strikers at B.S.C.'s Port Talbot steelworks voted to continue their stoppage against economy measures. **19.** Port of London announced it was to close West India and Millwall docks general cargo handling by the end of 1976, the work being transferred to the Royal Group. **21.** Unions agreed to accept a £6-a-week increase for nearly 460,000 teachers payable from April 1. **25.** Work restarted at 3 of the 4 South Wales plants affected by strikes protesting at the British Steel Corporation costs-cutting plan and the fourth plant resumed the following day. **26.** The Civil and Public Servants' Association with 230,000 clerical members, and the Society of Civil Servants, with 97,000 members, announced proposals for a merger.

Feb. 2. A 24-hour unofficial strike by Southern Region train drivers affected 70,000 home-going commuters with at least 40 of the normal 150 rush-hour services from Waterloo being cancelled.

Pan American cancelled all its Heathrow flights for 24 hours after maintenance men staged a lightning one-day strike over three non-union workers brought in from outside. 3. Six Ferrybridge power station workers at Knottingley, near Doncaster, won their industrial tribunal claim for unfair dismissal against the Central Electricity Generating Board which arose from a closed shop agreement with four T.U.C. unions. A settlement of the strike at Chrysler's Linwood plant was agreed after protracted negotiations, the deal giving the 50 Scottish packing workers the £1.10 a week extra which was the cause of the dispute. 8. Nearly a million copies of the *Sunday Times* and *Sunday People* were lost through unofficial industrial action by members of S.O.G.A.T. in a dispute over distribution of newspapers. 11. Improved overtime payments for junior hospital doctors were recommended by the Independent Doctors' Pay Review Body; these were accepted by the Government. The Industrial Secretary (Mr. Varley) told M.P.s that a group representing the major motor manufacturers and unions was to be set up to try to deal with the problems facing the British motor industry. 12. Results of a ballot of hospital consultants over the private practice issue showed 4,438 voted to accept the compromise proposals of Lord Goodman and 2,048 voted against, and the consultants' committee then decided to suspend emergency only sanctions and resume normal working while the proposals were examined. N.U.M. decided to impose a national overtime ban from Feb. 16 in protest against the planned closure of Langwith Colliery, Derbyshire. 13. British Steel Corporation announced proposals for a total reduction by March 1978 of about 8,000 of the work force in its Welsh plants, of which 2,300 would be white-collar employees, in its attempt to save £170 million over the next two years. Agreement was reached between publishers and leading print unions to set up a supervisory board to monitor developments in the national newspaper industry as part of a joint effort to overcome its problems. 16. The new £65 million blast-furnace at Llanwern, South Wales, was opened one year late because of industrial disputes. 19. Five of the six Ferrybridge power station workers lost their claim for reinstatement to their former jobs, the sixth man not applying for his job back as he had joined a textile firm. The national executive of N.U.M. at a special meeting voted to end the overtime ban imposed on Feb. 15 and decided to hold a ballot of members to endorse the return to normal working. 23. Leaders of N.U.R. voted to seek an immediate meeting with the Prime Minister about fares and investment levels proposed for the railways and decided to seek a joint approach with the other two rail unions, A.S.L.E.F. and T.S.S.A. Redundancy payments were made to 340,215 workers in 1975 at a cost of £178,284,000 compared with 182,161 payments at a cost of £73,560,000 in 1974, the Under Secretary, Employment (Mr. John Fraser) told the Commons. 24. Junior hospital doctors agreed to accept a new N.H.S. contract under which they would receive overtime money after 40 hours work a week instead of 80, thus ending their long dispute with the Social Services Secretary over pay and terms of service. 25. The Social Services Department confirmed that nurses and midwives would get a £6 a week pay rise from April 1 and that lodging charges would be raised by about £1 a week. N.H.S. staff in professions complementary to medicine would receive similar rises.

Mar. 1. Six men were dismissed for refusing to rejoin the National Society of Metal Mechanics,

their employers, Haverhill, of Tetbury, Gloucestershire having a closed shop agreement with the union. A new procedure for resolving disputes in the engineering industry was signed after five years during which no formal arrangements had existed between unions and employers. 4. A minimum wage for stable staff of £30 for a 40-hour week effective from April 1 was agreed by the National Joint Council. 7. About 3 million copies of national Sunday newspapers were not printed or distributed in London because of unofficial industrial action by members of S.O.G.A.T. 8. Inter-City and commuter services out of King's Cross and other Eastern Region services were disrupted by unofficial lightning strikes by A.S.L.E.F. train drivers protesting at British Rail economy cuts; thousands of passengers were stranded. In a 67 per cent. poll by N.U.M.'s 260,000 members, 61 per cent. approved their executive's action in calling-off the previous month's overtime ban over the N.C.B.'s decision to close Langwith Colliery, Derbyshire, voting being 109,410 in favour and 69,369 against. 9. Continued unofficial strikes by train drivers affected 21 depots on the Eastern Regions as the protests over service cuts spread. On March 10 A.S.L.E.F. national executive called on unofficial strikers to return to work. On March 12, British Rail refused union demands that the *status quo* be accepted and the cuts restored but recognized that a breakdown in negotiating procedure had led to the walk-outs. A.S.L.E.F. appealed for normal working, which was fully restored by March 16. 23. The March figures published by the Employment Department showed the first drop for 22 months in the number of wholly unemployed by 19,501 to 1,284,915 or 5.5 per cent. of the working population. 29. Britain and France agreed in Paris to manufacture spare parts in advance of orders for the 5 *Concorde* aircraft still unsold, thus providing employment over the next 2½ years. 30. The executive of A.U.E.W. instructed the 32 Birmingham toolmakers at the S.U. Carburetors factory, whose strike was threatening to stop all Leyland car production, to return to work. Another group of toolroom strikers at the Coventry Triumph plant was also ordered to return to work. In both cases the reason given was that their demands could not be met within the £6 pay limit. 31. The Employment Secretary (Mr. Foot) announced the U.K. was to have a new bank holiday from 1978 to mark May Day, traditional festival of the Labour movement.

April 2. Four employees were dismissed by British Rail who issued notices of dismissal to 23 others for refusing to comply with its closed shop policy and join a trade union; it was stated that another 72 employees were awaiting a decision. Five strikes affecting British Leyland earlier in the week were reduced to two when 400 toolmakers at Solihull Rover plant and at 8 components factories in Birmingham ended their 3-week stoppage over a pay dispute, strikes in Leyland plants at Canley, Coventry and Llanelli being settled the previous day. 3. Junior Hospital Doctors' Association agreed to merge with the Hospital Consultants' and Specialists' Association to campaign against the Government's proposals to abolish pay-beds. The 32 toolroom men on strike at British Leyland's S.U. Carburettor factory in Birmingham returned to work after failing to win a £6 a week rise backdated to December but accepting the increase from April 1. 7. A 24-hour lightning strike by stewards and stewardesses over a manning dispute brought most of British Airways European Division to a standstill. 10. Ten barges and tugmen blockading two docks at Hull

were served with writs and summonses ordering them to lift their action. 11. The week-long strike of 80 cargo riggers at Hull was called off but the blockade of King George and Queen Elizabeth docks by British Waterways crews continued. 13. Four printing unions accepted proposals of British Printing Industries Federations and Newspaper Society for new wage agreements operating from April 24 after balloting their members. 14. British Leyland toolmakers at Longbridge, Birmingham, voted to return to work after their shop stewards had been called before the A.U.E.W. national executive. 15. Industrial action by 300 ambulance officers in London was called off when it was announced by their union, NALGO, that their assimilation into the national pay structure at the level they had been seeking would take place. 20. The Scottish T.U.C. annual conference at Perth defeated a motion calling for "an end to incomes policy measures like the £6 wage limit and any similar scheme" by 1,187 votes to 632. Delegates unanimously supported a demand for old-age pensions of £30 a week or not less than 50 per cent. of adult earnings for married couples and £20 or one third of average earnings for single people. 21. Normal working was resumed by the 157 prison officers at Risley remand centre, near Warrington, to allow discussion between the Governor and officials of the Prison Officers' Association following a work-to-rule and 3-hour strike on April 20 over overtime cuts. Scottish T.U.C. annual conference heavily rejected the Government's pay limit but also turned down another motion refusing any form of incomes policy by 1,049 votes to 717. The conference unanimously supported a proposal for a Scottish assembly with powers over the economy and industry, but opposed a referendum of Scottish people on separation. The boycott of British Leyland products imposed by Arab States because of the firm's dealings with Israel had been officially lifted after six years, it was confirmed. 23. Hospital doctors in N.W. England voted to hold one-day strikes in protest against the Government's pay-beds bill. Rail members at 18 ports and others at British Transport Docks Board's London H.Q. received a £6 a week pay rise from April 26. The 32 British Leyland lorry drivers from Rubery Owen factory at Darlaston, Staffs, agreed to return to work on April 26 after a week-long strike over lay-offs, while at Leyland's Cowley management and union officials agreed on a formula to end the stoppage by 3,350 workers over the dismissal of two men for a clocking offence. 24. The Welsh T.U.C. meeting in Llandudno rejected the Government's pay deal and overwhelmingly carried a motion declaring that the Chancellor had failed to reduce unemployment, control prices, or promote growth in Wales. 25. The 900 striking craftsmen at Ebbw Vale steel plant returned to work after promises of talks on the dispute over Easter Monday night shift payment. 26. Three thousand car assembly workers at British Leyland's Cowley plant ended their strike over dismissal of two men for "clocking" offences, and production also resumed at Longbridge, Birmingham, when 32 drivers at the Rubery Owen components firm in Darlaston went back.

May 2. Prison officers, at Swansea and at Gartree Jail, Leicestershire, began an overtime ban in protest at reduction of their working hours due to budget cuts; similar disputes at other prisons during April were settled after talks on staffing levels. 5. Mr. Healey announced agreement with the T.U.C. negotiating team of a new pay policy giving rises of between £2.50 and £4 a week in the year beginning August 1. The T.U.C. General Council

approved the agreement by 25 votes to 5. The Chancellor later announced that if the T.U.C. special conference on June 16 approved the deal, the Government proposed to recommend to Parliament the enactment in full of the conditional tax reliefs specified in the Budget on April 6. The Institution of Professional Civil Servants decided on a card vote at their Eastbourne conference by 54,434 to 38,246 to seek immediate affiliation to T.U.C. 6. The *Daily Telegraph* northern editions were affected by a dispute with members of the N.U.J. chapel in Manchester over office staffing in the interim rundown period to the introduction of new technology in two years' time. 11. The Government accepted the award recommended by the independent review body, back-dated to April 1, for a £6 a week pay rise for doctors and dentists whose income was under £8,500 a year, at a cost of £12.6 million. 14. Journalists at the *Daily Telegraph* returned to work after N.U.J. officials called off a 10-day dispute, which halted publication of the paper in London for two days and which concerned introduction of new technology. 25. London printing of *The Times* and *The Guardian* was stopped by pay and inter-union manning disputes. 27. British Rail issued notices of dismissal to 23 Southern region employees who refused to join a trade union.

June 7. Delegates of white collar workers in the gas industry voted at the gas group meeting at NALGO's annual conference at Eastbourne to ban regular overtime from Aug. 1 to create jobs for other workers. 16. Another year of wage restraint from August 1 was approved at the special T.U.C. conference in London where on a card vote delegates decided to support the Government's 4½ per cent. pay deal by 9,262,000 votes to 531,000. 24. A Government White Paper based on a report from the Occupational Pensions Board proposed that half the seats on all bodies concerned with the general management of occupational pensions schemes should be filled by trade union nominees. 28. A 24 hour wildcat strike by A.S.L.E.F. drivers at Waterloo rail station, the Southern Region terminal, began at midnight in protest over disciplinary action against a driver who took a crowded passenger train through a red signal. The dockers' unofficial shop stewards' committee at Hull lifted their 21 month blacking of British Inland Waterways Board, bringing to an end the dispute over the introduction of the Danish-owned BACAT (barge-aboard-catamaran) cargo service which was forced to withdraw from the Humber 6 months earlier. 30. A plan by British Leyland management to raffle five of the new 3500 Rover saloons in a deal for higher productivity disrupted production of the new model because it was open only to assembly line workers.

July 8. At its annual conference in the Isle of Man, the National Union of Miners voted without dissent to demand retirement at 60 in January 1977, followed by a six-monthly lowering of the age to 55 by June 1980, without loss of pay or concessionary fuel up to the State retirement age. 13. London Fire Brigade ended work-to-rule after an independent inquiry was set up to investigate their grievances. 15. Leaders of junior hospital doctors decided to resume a ban on overtime working in a dispute over holiday and study leave pay and their decision was supported by a large majority at B.M.A.'s annual representative meeting in London. 19. Industrial action by junior hospital doctors over holiday and study leave pay began in Birmingham where a ward was closed at the city's general hospital and other hospitals in the area postponed appointments. The Industry

Secretary (Mr. Varley) announced a further investment of £100 million for steelmaking at Port Talbot and a re-examination of the prospects for Shotton in view of changed circumstances since the closure proposal was first made. 20. The number unemployed for this month totalled 1,478,200, the highest July figure since the end of the war, with a record 209,037 jobless school leavers. 21. An industrial tribunal in Manchester decided that four workers at the Eaton Transmission Co., Walkden, Lancs, expelled after a strike in March 1975, were entitled to be members of the Amalgamated Union of Engineering Workers, the tribunal chairman stating the union's Bolton District Committee had taken "a dire decision" to expel four loyal trade unionists without being fully aware of the facts of their case. 28. Executive of British Medical Association gave official approval for industrial action by junior doctors in their dispute over holiday and study pay. 29. Under an agreement drawn up by the National Joint Council for Gas Staffs and senior officers, white-collar workers joining the gas industry must join or remain members of one of five trade unions from Oct. 1, 1976. 30. Civil servants in the Department of Trade and Industry imposed an immediate ban on overtime in protest at the Government's plan to reduce Whitehall jobs by 26,000; the ban was backed by the Civil and Public Services Association and the Society of Civil Servants.

Aug. 3. The Employment Secretary (Mr. Booth) announced jobs, training courses or work experience schemes for 60,000 young people, who might otherwise be unemployed in the autumn, under a plan to help school-leavers. A £2,900,000 plan to add 900 jobs to the advance factory programme in the regions was announced by the Department of Industry. 6. Strikers at the Jaguar plant in Coventry agreed to return to work, after setting up of an immediate inquiry by Advisory, Conciliation and Arbitration Service into the case of nine members of the Transport Union who had joined the Engineering Union. 11. London Broadcasting, the commercial radio station, went back on the air when striking journalists called off their industrial action over alleged delays in negotiating a new staff house agreement. 12. Work resumed for the first time in nearly eight weeks on a "blackened" Concorde at British Aircraft Corporation's test centre at Fairford, Glos. 13. Journalists on the *Daily Mirror*, whose industrial dispute over allowances resulted in no London editions, voted 69-34 for a return to work pending further talks. 16. Stage staff at the new National Theatre began an unofficial strike in a pay dispute and performances were cancelled until it ended after four days. 19. The Hospital Junior Staffs Committee decided to strike for 24 hours on Aug. 31 if their dispute with the Government over leave and study pay was not ended. 20. Tunnel workers on many sites in the country were recommended to return to work after their representatives agreed to end their unofficial stoppage over pay, after talks in London with T.G.W.U. leaders who decided to negotiate at national level. 23. The Government decided not to lift its ban on the plan by Toyota G.B., the wholly British manned company which imports Toyota vehicles, to set up a storage base for Japanese cars at Bristol, the company having been refused an industrial development certificate to establish a warehousing and distributions complex in the new West Dock at Avonmouth to employ 400 workers. The National Coal Board decided to sell its entire stock of 85,000 homes at half-price with first refusal being given to sitting

tenants. 24. Central Electricity Generating Board announced that it was to pay in full the £16,774 compensation awarded to the "Ferrybridge Six" power station workers by a Leeds industrial tribunal which ruled their dismissal was unfair. 25. Junior doctors called-off the 24-hour strike threatened the following week after a settlement with the Social Services Secretary (Mr. Ennals) over pay during holidays and study leave. Unemployment figures of 1,501,976, the worst since the war, were announced. The Employment Secretary (Mr. Booth) signed an Order enabling workers in firms with fewer than four employees to complain to an industrial tribunal if they felt they had been unfairly dismissed. 26. Ford workers at Halewood, Liverpool, agreed to resume work when the company agreed to increase supervisors' manning levels and to allow four sewing-machine mechanics to revert to a higher grade with more pay. 27. National Graphical Association instructed all members employed by United Newspapers and East Midland Allied Press, two large provincial groups, to strike from 5 p.m. in a dispute over "unrecognized" print work. Discussions to reach a solution were fixed for an early date and publications of the newspapers affected resumed on Sept. 3. 30. Some 10,000 British Leyland workers in the Midlands were idle because of a pay and recognition dispute which stopped Jaguar, Mini, Allegro and Princess production. Coventry paint-shop workers struck for 24-hours in protest at plans to build a new £12 million paint shop in Birmingham. 31. Hull dockers who unload fish resumed normal working after a 2-month work-to-rule over 50 redundancy notices, now withdrawn.

Sept. 2. Eighteen thousand workers were laid off by British Leyland after a walk-out by 2,000 maintenance men at the plant at Longbridge, Birmingham, in a dispute arising from another dispute involving tool setters. Junior hospital doctors accepted an agreement worked out between the British Medical Association and the Department of Social Services to end the dispute over pay for leave and study. 6. On first day of Trades Union Congress in Brighton, the National Union of Seamen reported that its members had voted in favour of industrial action in support of pay claim; two days later, executive of Union voted to call national strike from midnight on Sept. 11, which was subsequently postponed for two weeks. 8. British Leyland's plant at Longbridge was re-opened after decision by striking toolmakers to return to work. T.U.C. in Brighton rejected by large majority a return to unrestricted free collective bargaining when present wage restraint policy ended in August, 1977. 12. Publication of the whole print of *Sunday Telegraph* was prevented because of industrial action.

LEGAL

(1975) Oct. 1. The Lord Chief Justice (Lord Widgery), in a reserved judgment in the High Court, ruled that he could see no grounds in law to stop publication of the first volume of the diaries of the late Mr. Richard Crossman relating to Cabinet affairs between 1964 and 1966 and that although the courts did have power to prevent breaches of Cabinet confidences they should intervene only in the clearest of cases "where the continuing confidentiality of the material can be demonstrated." The Attorney General (Mr. Sam Silkin) had sought an injunction to stop publication against two publishers and the literary executives of Mr. Crossman and another injunction against Times Newspapers which had published edited extracts from the memoirs in the *Sunday Times*. The Report of the

Committee on Mentally Abnormal Offenders under the chairmanship of Lord Butler was published and called for major changes in the law and practice relating to prosecutions, detentions, treatment, and after-care of mentally abnormal offenders. 2. Mr. Justice Megarry left the Law Courts for Occan Island in the Pacific which was the subject of an action by native landowners against the British Government and British Phosphate Commissioners, this being the first time an English High Court judge had "sat" outside the U.K. 16. In the annual report on the legal aid schemes published by the Law Society, it was stated that total costs of legal aid and advice in civil cases and legal aid for criminal cases in magistrates courts rose to £28,907,691 in 1974-75 compared with £21,247,676 in the previous year. 24. The report of the committee on criminal procedure in Scotland under Lord Thomson, appointed six years earlier, was published and proposed improvements but "not radical change" with increased police powers of arrest and detention. 27. Mr. Justice Foster ruled in the High Court that the T.U.C. Disputes Committee had acted outside its powers in making an order for the Association of Professional, Executive, Clerical and Computer Staff to call off its merger with the Staff Association of General Accident Assurance Group and that the T.U.C. General Council's decision to enforce the order was similarly in excess of the Council's powers.

Nov. 5. The House of Lords relaxed its rule that English money judgments must be expressed in sterling only.

Dec. 3. The House of Lords by a majority of 3-2 held that the Water Act 1973 did not empower a water authority to require the owner or occupier of premises not connected to its main drainage to pay charges demanded for 1974 in respect of sewerage and sewage disposal services and that statutory orders made under the Act which prescribed the charges were *ultra vires*. 4. A London solicitor, Mr. Andrew Congreve, of Maida Vale, achieved victory in the Appeal Court for thousands of viewers who took out overlapping licences to beat the £6 colour licence fee increase when three judges ruled unanimously that the Home Secretary had acted illegally in revoking or threatening to revoke licences taken out before April 1 unless the extra amount was paid. On December 9 the Home Secretary told the Commons he had decided not to seek leave to appeal to the House of Lords, that the licence holders concerned would be asked to ignore the revocation letters, and that he was making arrangements to refund the additional £6 paid by those who took out overlapping licences and responded to requests for the extra money. 10. The Report of the Advisory Group on the Law of Rape under the chairmanship of Mrs. Justice Helbron, the High Court Judge, was published with recommendations on anonymity for rape victims in court cases and new rules to curtail cross-examination about their sexual history. The House of Lords Appeal Committee ruled that it was an offence under the Trades Description Act to confirm a passenger's booking knowing that the flight might be overbooked and that a confirmation that a passenger had a seat reserved should be taken as a statement of fact and not a promise of intention.

(1976) Jan. 28. In a test case for severely handicapped people who had their houses or flats adapted to allow them to live at home, the House of Lords by a majority of 4-1 ruled that a London solicitor who had been paralysed for the past 18 years, was not entitled to rating relief on his specially-equipped flat, thus reversing a majority decision of the Court

of Appeal and a Lands Tribunal ruling that he qualified for relief.

Feb. 12. Mr. Wilson announced the setting up of a royal commission on lawyers and legal services with wide terms of reference including solicitors' monopoly of conveyancing. 23. Reforms of the conspiracy laws with new offences to deal with squatting, sex shows, public indecency, and obscene films were proposed in a report published by the Law Commission under the chairmanship of Mr. Justice Cooke. 31. A report published by the Law Commission proposed new laws to clarify the liability of occupiers of land and premises to those who were injured or suffered damage while trespassing.

April 12. The House of Lords Privileges Committee recommended that Mr. Geoffrey Russell, 54, should succeed to the Barony of Amphilhill which had also been claimed by his stepbrother, Mr. John Russell, 25, whose case was rejected. 14. Three Appeal Court judges all agreed in the High Court that Greater London Council were breaking the law by allowing grossly indecent films to be shown in public cinemas and that G.L.C. was applying the wrong test when deciding that films should be banned because they had a tendency to deprave and corrupt whereas the test was whether the films were indecent in common law. 21. The Island Parliament of Sark agreed to set up a special committee to consider introducing a law on divorce. 27. The House of Lords agreed without a division to the recommendations of its Committee for Privileges that Mr. Geoffrey Russell should succeed to the barony of Amphilhill.

May 4. Mr. Justice Tudor-Evans ruled in the High Court that newspapers publishing reports about children who were wards of court, risked punishment for contempt unless a judge had authorized publicity. 6. By a 2-1 majority decision, the Court of Appeal ruled that the N.S.P.C.C. could be compelled by the courts to reveal the names of informants in suspected child cruelty cases. 13. After the Court of Appeal freed Christopher Whitby, sentenced to six years' imprisonment for robbery in 1974 after new evidence was produced, Lord Justice James announced that five judges would examine a number of cases involving identification evidence so that courts could act while waiting for the Devlin report to be implemented. 26. The House of Lords ruled that three anti-Fascists who distributed pamphlets during the October 1974 general election urging voters not to support National Front candidates were guilty of offences under the election laws and in a unanimous decision the five law lords hearing the D.P.P.'s successful appeal held it was an offence for a person without an election agents' authority to incur the expense of issuing pamphlets. 27. The Attorney-General (Mr. Silkin) announced new guidelines to prevent wrongful conviction on identification evidence in prosecutions brought by the Director of Public Prosecutions.

June 4. Ministers from 18 European countries approved the draft European Convention on the Suppression of Terrorism covering the use of explosives, firearms, hijacking and kidnapping, it being approved in Brussels by member nations of the Council of Europe. 15. The Lord Chancellor (Lord Elwyn Jones) announced plans to abolish legal aid in undefended divorce cases and to extend the "divorce by post" procedure to all undefended cases. 18. The longest action in English legal history concluded its arguments in the High Court in London after 221 working days in a case in which the former inhabitants of Ocean Island in the Pacific claimed £21 million in royalties for phosphate mining by Britain. 24. By a 4-1 majority, the

Law Lords ruled in the House of Lords that it was unlawful for a tenant to receive a premium for the transfer of a protected tenancy under the Rent Act even though he had surrendered the remainder of his tenancy and the lease to the new tenant was granted by the landlord.

July 5. In the High Court, Mr. Justice Brightman ordered the London Co-operative Society to compensate its pension fund because of the low rates of interest paid for borrowings from March 1952 to July 1969. **6.** A specially-constituted five-judge Appeal Court sat in London to hear the first of five cases to lay down guidelines to judges and juries on identification evidence in criminal trials following its establishment in May after two controversial cases. On July 9 the Lord Chief Justice (Lord Widgery) sitting with 4 other judges, issued these guidelines, saying that the important aspect of identification was its quality. **7.** The Monopolies and Mergers Commission, published report recommending the abolition of the "two-counsel" rule operated by barristers in England and Wales and by advocates in Scotland under which in general a Q.C. might not appear in court without a junior and which, the Commission declared, constituted a monopoly. The House of Lords, in the first reference to reach them on points of law following the acquittal of a soldier serving in Northern Ireland on an indictment charging him with murder, decided unanimously that the form of the reference made it impossible for them to give any general guidance as to the use of force by soldiers serving in the Province. **12.** The Lord Chief Justice (Lord Widgery) in the High Court, ordered the Tameside Council, Greater Manchester, to obey the directive of the Education Secretary (Mr. Mulley) and make its schools comprehensive under section 68 of the 1944 Education Act. On July 26 three Appeal Court judges unanimously decided that the Education Secretary had acted unlawfully in issuing this directive and allowed the Council's appeal with costs against the High Court order, also refusing the Education Secretary permission to appeal to the House of Lords. On July 29 five law lords granted the Education Secretary leave to appeal. THE CENTENARIES OF 1977

The year 1877, like its predecessor, was dominated by the Eastern Question. The conference at Constantinople, which had been convened late in 1876 in an attempt to settle the differences between Russia and Turkey, continued into the new year, but broke down in the middle of January. The

demands of the Powers for administrative autonomy in the Balkan provinces were modified, but Turkey was unable to accept them even in their amended terms.

In consequence, Russia made preparations for war. She gave a secret undertaking to Austria that

the latter might, when the time came, occupy Bosnia and Herzegovina, and M. Ignatieff, the Russian Ambassador in Constantinople, was sent on a mission round the European Courts to sound out their attitudes. On March 31 a Protocol was signed in London by the major Powers, calling on Turkey to reduce its army to a peace footing and to put in hand the reforms which they had long urged; in return Russia would demobilise the forces deployed on the frontier. The Turks, however, refused to comply and on April 21 the Russian armies were ordered to begin operations.

The British Government announced its neutrality, contingent on Russian promises to respect Egypt, the Suez Canal, the Persian Gulf, Constantinople and the Bosphorus. These promises were duly given.

Mr. Gladstone, who had been drawn from semi-retirement the previous year by his indignation at the "Bulgarian Atrocities", continued in his anti-Turkish policy, but his proposal for a declaration that Turkey had forfeited all claim to British support was defeated in the House of Commons.

There were, however, serious divisions in Lord Beaconsfield's Cabinet, aggravated by the steady Russian advance and the possible threat to Constantinople. The Prime Minister was anxious to safeguard British interests there, but Lord Derby, the Foreign Secretary, together with Lord Salisbury and Lord Carnarvon, were opposed to active measures. The fleet was again despatched to Besika Bay, as it had been in 1876, and the Mediterranean garrisons were strengthened. But Lord Beaconsfield's proposals for an expedition to hold Gallipoli and for the fleet to go to Constantinople, were not supported by his senior colleagues.

A respite was secured by the check to the Russian army at Plevna, which was defended against them for no less than four months, and did not finally fall until December 9. The threat to Constantinople was then renewed, and after prolonged Cabinet discussions, during which the Prime Minister threatened to resign, it was finally agreed that Parliament should be summoned earlier in the New Year, that the armed forces should be materially increased, and that Britain should offer to mediate between Russia and Turkey. At the end of the year Turkey did in fact ask the Powers to intervene. During the Cabinet controversy, the Queen marked her support for Lord Beaconsfield by doing him what was then considered the exceptional honour of visiting him at his home at Hughenden and lunching with him.

On January 1, at a spectacular Durbar at Delhi, presided over by Lord Lytton, the Viceroy, in state, Queen Victoria was proclaimed Kaiser-i-Hind, Empress of India. She noted in her Journal that that day she signed herself for the first time V.R. & I.

Sir Theophilus Shepstone had been sent by the British Government to investigate the situation in the Transvaal with power to annex the country if the position appeared to warrant it, and on April 12 he took this step.

Towards the end of the Parliamentary session, the Irish Nationalist M.P.s, under the leadership of Mr. Parnell, began a campaign to obstruct Government business and succeeded in delaying legislation. The measures taken at the time to thwart obstruction were not very effective, and the Nationalists' action was a foretaste of their continued subsequent policy.

The result of the Presidential election in the U.S.A. in the previous autumn had remained undecided, and an Electoral Commission had been appointed by Congress to resolve the deadlock between Mr. Hayes (Republican) and Mr. Tilden

(Democrat). The Commission, by a strictly party vote, decided in favour of Mr. Hayes, who took office at the beginning of March.

In France, the President, Marshal MacMahon, forced the resignation of the moderate Republican government, which had been constitutionally elected in the previous year, and replaced it by a non-elected ministry under the Monarchist Duc de Broglie. In June the President dissolved the Chamber, and with his new ministers made strenuous endeavours to secure a majority at the ensuing elections. The Republicans, under M. Gambetta, made the funeral of M. Thiers, the former President, who died on Sept. 3, the occasion for a great political demonstration. Shortly afterwards, M. Gambetta was sentenced to three months' imprisonment for libelling Marshal MacMahon. However, the elections on Oct. 14 resulted in a sweeping Republican victory, 335 Republicans being returned against 198 official candidates, and the President was eventually compelled to appoint another moderate Republican Ministry.

On January 27, when he celebrated his eighteenth birthday, the Queen conferred the Order of the Garter on her eldest grandchild Prince William of Prussia, later the Kaiser William II.

On February 28, London University resolved to admit women to degrees in medicine—an early recognition of women's rights.

Two new English dioceses were created during the year. On April 25 Dr. Edward White Benson (later Archbishop of Canterbury) was consecrated the first Bishop of Truro, and on June 12, Dr. Cloughton, previously Bishop of Rochester, was enthroned as Bishop of the newly-formed see of St. Albans.

On May 1 it was announced that the Queen had extended the award of the Albert Medal to cases of gallantry in saving life on land; this was done so that the medal could be given to the rescuers of a large number of miners who had been entombed when the Treodryhiw Colliery in the Rhondda had been flooded in the previous month.

The railway bridge over the Tay estuary—then the longest railway bridge in the world—was opened on September 25. Part of this bridge was blown into the river only two years later, with a train which was crossing it at the time, resulting in much loss of life.

The obelisk popularly known as Cleopatra's Needle was removed from its site at Alexandria during the year, and on Sept. 21 it was taken in tow by the steamship *Olga* for removal to England. The voyage was eventful, the obelisk having to be taken into Ferrol after being rescued from the Bay of Biscay; it did not finally reach England till January 1878.

During the year Mr. Andrew Barclay Walker, Mayor of Liverpool, presented the Walker Art Gallery, built at his sole cost, to the corporation of Liverpool. On Sept. 27 the foundation stone of the University College at Nottingham was laid, Mr. Gladstone speaking at the ceremony.

The only instance of a dead-heat in the history of the Oxford and Cambridge boat race occurred when the race was rowed on March 24.

A special service was held at Westminster Abbey on June 2 to commemorate the 400th anniversary of the first book known to have been printed in England, by William Caxton.

The year is not a notable one for literary anniversaries. *The American*, by Henry James, is perhaps one of the few books first published in 1877 to be still widely read, though Herbert Spencer's *Principles of Sociology* had considerable influence in its day.

NATIONAL INSURANCE AND RELATED CASH BENEFITS

The State insurance and assistance schemes in force from July 5, 1948, comprised schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory benefits, termed supplementary allowances and pensions, in place of national assistance and non-contributory old age pensions, and provided for the establishment of a new Ministry of Social Security (now the Department of Health and Social Security), with overall responsibility for the existing insurance schemes and family allowances scheme and the new scheme of supplementary benefits, in place of the Ministry of Pensions and National Insurance and the National Assistance Board, which were abolished.

The Conservative Government's Social Security Act, 1973, which was intended to be brought into force in April, 1975, provided for the replacement of the National Insurance scheme by a basic scheme of social security, offering a range of benefits, including flat-rate basic pensions, similar to those under the existing legislation; a separate reserve pension scheme providing, in addition to the basic pension, earnings-related pensions for those employees not in recognized pensionable employment; and the assimilation of the Industrial Injuries scheme to the basic scheme. It also laid down minimum conditions for recognition of occupational pension schemes so as to exempt the employers and employees concerned from liability to contribute to the reserve pension scheme.

The new Labour Government decided that the basic scheme provisions of the 1973 Act should come into force on April 6, 1975, as planned, but it decided not to bring into effect the provisions of that Act relating to the reserve pension scheme or the recognition tests for occupational pension schemes seeking exemption from the reserve pension scheme (except the provisions relating to the preservation of benefits under occupational schemes). Effect was given to the Government's decisions by an order made in June 1974 under the 1973 Act, and by the Social Security (Amendment) Act, 1974, passed in December, 1974.

Three measures—the Social Security Act, 1975 (now the principal Act); the Social Security (Consequential Provisions) Act, 1975; and the Industrial Injuries and Diseases (Old Cases) Act, 1975—were enacted on March 20, 1975, for the purpose of consolidating the law relating to social security in Great Britain, and corresponding measures were passed for Northern Ireland.

The Labour Government published in September, 1974, in a White Paper, "Better Pensions fully protected against inflation", its proposals for a new pensions scheme. The Social Security Pensions Bill based upon these proposals, after consultation with interested bodies, was introduced, with an explanatory memorandum, in February, 1975, and after amendment was passed as the Social Security Pensions Act, 1975, in August, 1975. Preparations are being made for the new scheme to come into force in 1978 (see p. 616).

SOCIAL SECURITY SCHEME, 1975

From April 6, 1975, the National Insurance scheme 1948-1975 was replaced by a new scheme of social security benefits and contributions under the Social Security Act, 1975, as amended, and regulations made thereunder. Like the former scheme, the new scheme is financed on a pay-as-you-go basis mainly by contributions but in part out of Ex-

chequer funds (rates of benefit and of contributions being reviewed normally annually in accordance with statutory criteria), but the new scheme contributions, to a greater extent than national insurance contributions, are earnings-related. The graduated pension scheme 1961-1975 has been wound up (existing rights being preserved); otherwise the new scheme provides a pattern of pension and other benefits similar to that of the old scheme. The Industrial Injuries scheme continues with only minor changes, but steps have been taken to assimilate the industrial injuries legislation to the general scheme: thus the separate industrial injuries contribution and the Treasury supplement thereto under the Industrial Injuries Acts have been abolished, and the Industrial Injuries Fund has been merged with the National Insurance Fund.

CONTRIBUTIONS AND CONTRIBUTION CONDITIONS

The funds required for paying benefits payable under the Social Security Act, 1975, as amended, out of the National Insurance Fund and not out of other public money; for the making of payments towards the cost of the National Health Service and into the Redundancy Fund; and for paying benefit under the Industrial Injuries and Diseases (Old Cases) Act, 1975, are provided by means of contributions payable by earners, employers and others (such as non-employed persons paying voluntary contributions), together with the Treasury supplement.

Contributions are of four classes:

Class 1, earnings-related:

- (a) primary Class 1 contributions from employed earners; and
- (b) secondary Class 1 contributions from employers and other persons paying earnings;

Class 2, flat-rate, payable weekly by self-employed earners;

Class 3, flat-rate, payable by earners and others voluntarily with a view to providing entitlement to benefit, or making up entitlement; and

Class 4, payable by self-employed persons in respect of the profits or gains of a trade, profession or vocation, or in respect of equivalent earnings.

Particulars of current rates of contributions for each class are given on p. 619.

Regulations state the cases in which earners may be exempted from liability to pay contributions, and the conditions upon which contributions are credited to persons who are exempted.

The Secretary of State for Social Services is empowered by the Social Security Act, 1975, as amended, to alter certain rates of contributions by order approved by both Houses of Parliament, and is required by the same enactment to make annual reviews of the general level of earnings in order to determine whether such an order should be made. The Government Actuary has pointed out that with a system of mainly earnings-related contributions the income of the National Insurance Fund will rise automatically with increases in the general level of earnings and will broadly be sufficient to meet the cost of corresponding increases in the level of benefits provided the earnings limits for contribution liability and the flat-rate (Classes 2 and 3) contributions are adjusted regularly. Following the decision in the summer of 1975 to make further increases in benefits in November, 1975, provision was made by the Social Security (Contributions, Re-rating) Order, 1975, made in November, 1975,

for increases in certain rates of contributions and for changes in the various earnings limits for contribution liability for the 1976-77 tax year. The new rates and limits applied from April 6, 1976 (see p. 619). It is expected that a further order will be made later in 1976 setting out the amounts which are to apply for the tax year 1977-78.

The yearly Treasury supplement to the National Insurance Fund is equal to 18 per cent. of the contributions of the four classes paid during the year after deducting the National Health Service allocation and the allocation to the Redundancy Fund (see p. 619).

BENEFITS

The benefits payable under the Social Security Act, 1975, as amended, are as follows:

- (1) Contributory Benefits:
 - Unemployment benefit.
 - Sickness benefit.
 - Invalidity pension and allowance.
 - Maternity benefit, comprising maternity grant and maternity allowance.
 - Widow's benefit, comprising widow's allowance, widowed mother's allowance and widow's pension.
 - Child's special allowance.
 - Retirement pensions of the following categories:
 - Category A.
 - Category B.
 - Death grant.
- (2) Non-contributory Benefits:
 - Guardian's allowance (see p. 618).
 - Attendance allowance (see p. 618).
 - Non-contributory invalidity pension (see p. 618).
 - Mobility Allowance (see p. 618).
 - Invalid care allowance (see p. 618).
 - Retirement pensions of the following categories:
 - Category C (see p. 618).
 - Category D (see p. 618).
- (3) Benefits for Industrial Injuries and Diseases.

Cash benefits provided under other enactments (supplementary benefits, family allowances and child benefit, and family income supplement) are dealt with on pp. 617-18.

The Social Security Act, 1975, empowers the Secretary of State to increase certain rates of benefit by order approved by both Houses of Parliament, and requires him to increase certain rates by such an order if an annual review shows that they have not retained their value in relation to the general level of earnings and prices obtaining in Great Britain.

The first order providing for increases in benefit rates took effect from November 17, 1975. The next increases in benefits were authorised by the Social Security Benefits Up-rating Order, 1976, made in July, 1976. These new rates are to apply from November 15, 1976.

Entitlement to the contributory benefits provided by the Act of 1975 (except invalidity benefit) depends on contribution conditions being satisfied either by the claimant or by some other person (depending on the kind of benefit). The class or classes of contribution which for this purpose are relevant to each benefit are as follows:

<i>Short-term benefits</i>	
Unemployment benefit	Class 1
Sickness benefit	Class 1 or 2
Maternity grant	Class 1, 2 or 3
Maternity allowance	Class 1 or 2
Widow's allowance	Class 1, 2 or 3

Other benefits

Widowed mother's allowance	} Class 1, 2 or 3
Widow's pension	
Child's special allowance	
Category A retirement pension	
Category B retirement pension	
Death grant	

With the change from a system of flat-rate national insurance and industrial injuries contributions and graduated pension contributions to a system of wholly earnings-related contributions for employed earners the contribution conditions for entitlement to benefit could no longer be based on the number of weekly contributions paid in a contribution year or throughout a working life. The Social Security Act, 1975, introduced a new system of contribution conditions related to yearly levels of earnings on which contributions have been paid. The contribution conditions for different benefits are set out in sections 13 to 33 of and Schedule 3 to the Act, and in summary form in leaflets on the benefits available at local Social Security offices. There are two contribution conditions for most of the benefits. The first condition must be satisfied to qualify for benefit at all; the second condition generally determines whether benefit is paid at the standard rate or at a reduced rate. Under the arrangements made for the transition from the old scheme to the new one, provision has been made for such matters as treating old-style flat-rate contributions as new-style earnings-related contributions and vice versa, and the use of modified contribution tests for short-term benefits for an initial period following the start of the new scheme.

There is one system of adjudication on all claims for benefit under the Act; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Chief Commissioner and Commissioners.

The rates of benefit stated below are, unless otherwise indicated, the standard rates having effect from November 15, 1976.

UNEMPLOYMENT BENEFIT

The standard weekly rates of flat-rate benefit payable to primary Class 1 contributors are as follows:

	£
Man, single woman or widow.....	12.90
Married woman: normal rate.....	9.20
Increase of benefit for only child or elder or eldest child (ordinary rate).....	4.05
Increase of benefit for each additional child (ordinary rate) in addition to family allowances.....	2.55
Increase of benefit for wife or other adult dependant (ordinary rate) where payable.....	8.00
<i>Waiting Period.</i> —Flat-rate benefit is not payable for the first three days of a period of interruption of employment.	

Duration of Benefit.—Benefit is payable in a period of interruption of employment for up to 312 days (a year). Spells of unemployment and sickness not separated by more than 13 weeks count as one period of interruption of employment.

Requalification for Benefit.—A person who has exhausted benefit requalifies therefor when he has again worked as an employed earner for at least 21 hours a week for 13 weeks.

Disqualifications.—There are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without

good cause, refused an offer of suitable employment or training.

Earnings-related Supplement.—This supplement is payable to claimants under minimum pension age who are entitled to flat-rate unemployment or sickness benefit. The amount of the supplement depends upon reckonable earnings in the relevant income tax year. Where based on earnings in the 1974-75 income tax year, it is one-third of the amount of reckonable weekly earnings lying between £10 and £30 and 15 per cent. of those lying between £30 and £54. Where it is based on earnings in the 1975-76 income tax year, the upper limit on the band of weekly earnings on which it is paid at 15 per cent. will be increased from £54 to £69. The total benefit, including increases for dependants, is subject to a maximum of 85 per cent. of earnings. The supplement starts from the thirteenth day of a period of interruption of employment and lasts for up to a maximum of six months. Periods of unemployment or sickness not separated by more than 13 weeks are treated as one period of interruption of employment. Where employment is suspended but not terminated by the employer, e.g. short-time working or lay-off, the supplement is not payable for the first six days (except Sundays and holidays) in any continuous period of suspension.

SICKNESS BENEFIT

Standard Rates of flat-rate Benefit payable to primary Class 1 and to Class 2 contributors while incapable of work through illness or disablement.—Same as for unemployment benefit.

Waiting Period.—Same as for unemployment benefit.

Duration of Benefit.—Sickness benefit is payable for 28 weeks of sickness and is then replaced by invalidity benefit (see below).

Disqualifications.—Regulations provide for disqualifying a person for receiving sickness or invalidity benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or observe prescribed rules of behaviour.

Earnings-related Supplement.—The supplement and the rules as to duration are the same as for the supplement to unemployment benefit.

INVALIDITY BENEFIT

Normally, after 28 weeks of sickness, sickness benefit is replaced by an *invalidity pension* of £15.30 (£9.20 for a wife) unless the claimant is over pension age and has retired from regular employment. In addition an *invalidity allowance* is payable if incapacity for work begins more than five years before pension age. The allowance varies in amount from £1.00 to £3.20 a week, according to the age on falling sick, and if still in payment at pension age will continue as an addition to retirement pension. The increases of benefit for children of an invalidity pensioner are at the higher rate, viz., £7.45 for the first child and £5.95 for any other child, in addition to family allowances. Earnings-related supplement is not payable with invalidity benefit. The dependent wife of an invalidity pensioner residing with him is subject to the same tapered earnings rule as applies to retirement pensioners which begins to operate when earnings exceed £35 (after April 1977 £50). As to the age addition if the pensioner or dependant is 80 or over, and non-contributory invalidity pensions, see p. 618).

MATERNITY BENEFITS

Maternity Grant.—A cash grant of £25 is payable

on the mother's own insurance or on her husband's, or late husband's, whether she is confined at home or in hospital. Extra grants are payable, in certain circumstances, if more than one child is born.

Maternity Allowance.—A woman who has been employed or self-employed and paying contributions at the full rate receives in addition a maternity allowance of £12.90 a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. Earnings-related supplement is payable with maternity allowance if the claimant's title to the supplement has not been used up in respect of other benefits, see above.

WIDOW'S BENEFITS

Only the late husband's contributions of any class count for widow's benefit in any of its three forms.

Widow's Allowance.—A woman who at her husband's death is under 60 (or over 60, if he had not retired), receives (during the first 26 weeks of widowhood) a cash allowance usually of £21.40 a week with increases of £7.45 for the first or only child and £5.95 for each other child, in addition to family allowances. She may also be entitled to an earnings-related addition to her widow's allowance based on her late husband's earnings (reckoned in the same way as for earnings-related supplements to unemployment and sickness benefit), see above.

Widowed Mother's Allowance.—When the 26 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of £22.75 a week as long as she has a child of qualifying age, and in addition £5.95 for each additional child, as well as family allowances. A widowed mother's personal allowance, usually £15.30 a week, is payable to widows who, when their widow's or widowed mother's allowance ends, have living with them a child under 19, who has left school and is not an apprentice.

Widow's Pension.—A widow receives this pension usually of £15.30 a week when widow's allowance ends, if she was over 50 at the time of her husband's death; or (ii) when her widowed mother's allowance or widowed mother's personal allowance ends, if she is then over 50 (40 if widowed before February 4, 1957).

Flat-rate widow's pensions on a graduated scale were introduced in April 1971 for women who are widowed between the ages of 40 and 50, or who cease to be entitled to a widowed mother's allowance between those ages.

Widow's benefit of any form ceases upon re-marriage.

CHILD'S SPECIAL ALLOWANCE

A woman whose marriage has been dissolved or annulled and who has not re-married is paid a special allowance on the ex-husband's death based on his contribution record. The normal condition is that she has a child to whose maintenance he was contributing, or had been liable to contribute, at least 25p a week in cash or its equivalent. The allowance is £7.45 a week for the first or only child and £5.95 for each other child, in addition to family allowances.

RETIREMENT PENSION (CATEGORIES A AND B)

A *Category A pension* is payable for life to men or women on their own contributions if (a) they are

over pension age (65 for a man and 60 for a woman), and (b) they have retired from regular employment. Men aged 70 or over and women aged 65 or over are not required to satisfy condition (b).

The standard flat-rate pension, when the contribution conditions are fully satisfied, is £15.30, plus £9.20 for a dependent wife who is not herself qualified for a pension, plus £7.45 for the first or only child and £5.95 for each other child, in addition to family allowances. An increase for a dependent wife is reduced, under the earnings rule, below, if she earns more than a certain amount. (As to the age addition payable at 80, see p. 618.)

Where a person does not retire at 65 (60 for a woman) or later cancels retirement, and does not draw a Category A pension, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for a woman), in respect of contributions paid when employed or self-employed during the five years after reaching minimum pension age. For periods of deferred retirement after April 5, 1975, the rate of pension (without any increases except invalidity allowance), when it is finally awarded, will normally be increased by one-eighth of one per cent. for each week of deferment except those weeks in which other benefits (such as sickness or unemployment benefit) were drawn. A married man can also earn extra pension for his wife.

A Category B pension is normally payable for life to a woman on her husband's contributions when he has retired, or is over 70, and has qualified for his own Category A pension, and she has reached 60 and retired from regular work or has reached 65. It is also payable on widowhood after 60 whether or not the late husband had retired and qualified for his own pension. The weekly pension is payable at the lower rate of £9.20 while the husband is alive, and at the higher rate of £15.30 on widowhood after 60. Where a woman is widowed before she reaches 60, a Category B pension is paid to her on reaching 60 at the same weekly rate as her widow's pension if she retires. If a woman qualifies for a pension of each category she receives whichever pension is the larger. For periods of deferred retirement after April 5, 1975, a Category B pension will normally be increased by one-sixteenth of one per cent. of the husband's pension rate (apart from any increase other than invalidity allowance) for each week while both husband and wife defer retirement. If the husband dies after April 5, 1975, the extra pension which he earned for his wife by not drawing his pension after she reached 60 will be doubled. She will also receive half of any extra pension he earned for any period before she reached 60. (As to the age addition payable at 80, see p. 618.)

A man aged 65 to 70, or a woman aged 60 to 65, who has qualified for pension will have it reduced if he or she earns more than a certain amount. Until April 1977 the pension will be reduced by 5p for each 10p of net earnings between £35 and £39 and by 5p for each 5p earned over £39. During the twelve months following, the "earnings rule" will start to operate when earnings exceed £50. A man's pension is not affected by his wife's earnings unless he is drawing an increase of his pension for her.

Unemployment, sickness or invalidity benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular work at the same rate as the basic retirement pension they would have received had they retired. A retirement pension will be increased by the amount of any invalidity allowance the pensioner was getting within the period of 13 weeks before reaching minimum pension age. As to attendance allowance and invalid care allowance, see p. 618.

Persons who do not qualify for a Category A or B pension may qualify for a Category C or D pension (see p. 618), or for a supplementary pension (see p. 617).

GRADUATED PENSION

The graduated pension scheme under which national insurance contributions and retirement pensions were graduated within specified limits, according to earnings, was discontinued in April, 1975, under the Social Security Act, 1975. Any graduated pension which an employed person over 18 and under 70 (65 for a woman) had earned by paying graduated contributions between April 6, 1961, when the scheme started and April 5, 1975, will be paid when the contributor retires, or at 70 (65 for a woman), in addition to any retirement pension for which he or she qualifies.

Graduated pension is at the rate of 2½p a week for each "unit" of graduated contributions paid by the employee (half a unit or more counts as a whole unit). A unit of contributions is £7.50 for men, and £9.00 for women, of graduated contributions paid.

A wife can get a graduated pension in return for her own graduated contributions, but not for her husband's. A widow gets a graduated addition to her retirement pension equal to half of any graduated additions earned by her late husband, plus any additions earned by her own graduated contributions. If a person defers retirement beyond 65 (60 for a woman), half the graduated pension he or she has forgone by deferring retirement (whether before or after April 5, 1975) will be treated as extra graduated contributions paid, and will count towards further graduated pension on retirement or at 70 (65 for a woman).

DEATH GRANT

A death grant is payable on the death of a qualifying contributor or of his wife, child or widow or, if the contributor is a woman, of her husband, child or widower, and also in respect of the deaths of certain handicapped persons on the insurance of close relatives. The normal grant is for an adult £30, a child aged 6-17 £22.50, a child aged 3-5 £15, a child under 3 £9. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £15. No grant is payable for deaths of persons already over pension age on July 5, 1948.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

FINANCE

Under the National Insurance Acts before April 6, 1975, two funds were set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds were paid into the National Insurance Fund, and payments were made out of the Fund to meet the cost of benefits and administration. Under the National Health Service Contributions Act, provision was made for separate National Health Service contributions to be collected in conjunction with the National Insurance contributions, in place of payments formerly made from the Fund towards the cost of the National Health Service.

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1975, were as follows:—

Receipts	£'000
Balance, April 1, 1974.....	574,094

(a) Including estimated amounts of earnings-related supplement as follows: unemployment benefit £34.0 million; sickness benefit £84.0 million; widow's benefit £8.0 million; graduated retirement benefit £39.0 million.

Receipts exceeded payments during the year by £615.7 million. Compared with 1973-74 receipts increased by £1,515.1 million and payments by £1,138.8 million.

The balance in the Reserve Fund at March 31, 1975, was £886.7 million.

INDUSTRIAL INJURIES BENEFITS

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injuries caused and prescribed diseases and injuries developed on or after July 5, 1948, now operates under the Social Security Act, 1975, and regulations made under the Act. The Social Security Benefits Up-rating Order, 1976, provided for increases in the rates of benefit with effect from November 15, 1976. Rates of benefit are now reviewed annually.

Supplementary allowances payable in certain circumstances in cases arising before the Industrial Injuries scheme started are governed by the Industrial Injuries and Diseases (Old Cases) Act, 1975, and regulations made under the Act. Statutory schemes have also been made providing for the payment of allowances supplementing workmen's compensation in certain circumstances, and for the payment of benefits in certain cases where neither workmen's compensation nor Industrial Injuries benefits are payable.

The scope of "employed earners" and their employments to which the industrial injuries scheme

applies is defined in the Social Security Act, 1975, and regulations made under the Act.

Separate Industrial Injuries contributions were discontinued in April, 1975. The Industrial Injuries Fund was at the same time merged in the National Insurance Fund, and the separate Treasury Supplement to the Industrial Injuries Fund came to an end.

BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity, but not usually for the first three days. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of £15.65 (days being paid for at one-sixth of the weekly rate); with increases of £8.00 for a wife or other adult dependant, and normally £4.05 for the first or only child and £2.55 for each other child, in addition to family allowances. Other juveniles receive lower rates. Where a claimant who is entitled to sickness benefit draws injury benefit instead, any earnings-related supplement to sickness benefit to which he is entitled will be paid with the injury benefit (see p. 613).

Disability Benefit is payable if at or after the end of the injury benefit period the employed earner suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal. In cases of disablement of less than 20 per cent., except in pneumoconiosis or byssinosis cases, benefit normally takes the form of a *gratuity* paid according to a prescribed scale, but not exceeding £1,660. Where the degree of disablement is 20 per cent. or more, or if it is due to pneumoconiosis or byssinosis, the benefit is a weekly *pension* payable either for a limited period or for life, according to the following scale:

Degree of disablement	Weekly Rate £
100 per cent.	25.00
90 " "	22.50
80 " "	20.00
70 " "	17.50
60 " "	15.00
50 " "	12.50
40 " "	10.00
30 " "	7.50
20 " "	5.00

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive lower rates.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance or if his disablement is exceptionally severe. If the beneficiary is entitled to an unemployability supplement there are increases of £7.45 for the first or only child and £5.95 for any other child, and, subject to the earnings rule, £9.20 for an adult dependant. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw sickness or invalidity benefit as appropriate, in addition to disablement pension, during spells of incapacity for work.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of £21.40 a week for the first 26 weeks *plus* any earnings-related addition she would have received if she had been entitled to national insurance widow's allowance (see p. 613), and thereafter a pension of £15.85 or less a week according to circumstances, *plus* £7.45 for the first or only child and £5.95 for each other child, in addition to family allowances.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of claimants for injury or disablement benefit, that of submitting to medical examination and treatment.

Industrial Diseases, etc.—The scheme extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an employed earner's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions by the Secretary of State for Social Services, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the Commissioners, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g. whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Secretary of State, or a local appeal tribunal consisting of a chairman appointed by the Secretary of State and equal numbers of members representing employers and employed earners, or, on appeal, by the Commissioners.

FINANCE

Before April 6, 1975, contributions from employers, insured persons and the Exchequer were paid into, and benefits and administrative expenses were paid out of, a fund established under the Industrial Injuries Act, viz., the Industrial Injuries Fund.

PLANS FOR EARNINGS-RELATED PENSIONS

The Social Security Pensions Act, 1975, which became law in August 1975, embodied proposals for the future coordinated development of State and occupational pensions. When the Act comes into force in April 1978, the present flat-rate retirement and other State pensions will be replaced for employed earners by fully earnings-related pensions, but it will be twenty years after that before any pensions become payable at the full rate.

The aims of the Act will be, by providing better pensions, to reduce reliance upon means-tested supplementary benefit in old age, in widowhood and in chronic ill-health; to ensure that occupational pension schemes which are contracted out of part of the State scheme fulfil the conditions of a good scheme; that pensions are adequately protected against inflation; and that in both the State and occupational schemes men and women are treated equally.

Under the new State scheme retirement, invalidity and widow's pensions for employees will be related to the earnings on which contributions have been paid. The lower earnings limit for Class 1 contribution liability will be broadly the current level of the basic component of the retirement pension—in April 1975 terms £11.60 a week. Employees with earnings at or above this base level in any week will pay contributions on all their earnings up to a limit of about seven times the base level—in April 1975 terms about £80 a week. The standard rate of contribution set by the Act is 16½ per cent. (which includes 1 per cent. for the National Health Service and 0.2 per cent. for the Redundancy Fund), employees paying 6½ per cent. and employers 10 per cent., instead of the 1975 figures of 5½ per cent. and 8½ per cent. Provision is made for the rate to be reviewed before the new scheme comes into operation. Employees who are contracted out will pay the full rate of contribution on earnings up to the lower limit, but on higher earnings up to the upper limit the rate will be 9½ per cent. (4 per cent. for employees and 5½ per cent. for employers), the rate to be reviewed at intervals of not more than five years. The Treasury supplement will be 18 per cent. of all contributions, calculated so as to include those that would have been received if there had been no contracting out. Self-employed persons will pay contributions towards the basic pension. The non-employed and employees with earnings below the lower limit may contribute voluntarily for basic pension. Women who marry for the first time after the new scheme begins will no longer have a right to elect not to pay the full contribution rate. No primary Class 1 contributions or Class 2 or Class 4 contributions will be payable by persons who work beyond pension age (65 for men, 60 for women), but the employer's liability for secondary Class 1 contributions will continue.

The new system of earnings-related pensions for retirement, widowhood and invalidity to replace the present flat-rate pensions will provide for employees of either sex with a complete insurance record a category A pension in two parts, a basic and an additional component. The rate of the basic component set by the Act is £11.60 (the flat-rate pension payable under the present system from April 7, 1975): up to this level the pensioner will receive weekly, from the start of the new scheme, £1 for £1 of average weekly earnings on which contributions have been paid. The additional component will be 1½ per cent. of average earnings above the level of the basic component and up to the upper earnings limit of about £80 for each year

of such earnings under the scheme, and will thus build up to 25 per cent. in twenty years. When the number of years exceeds twenty, pensions will be based on contributors' twenty best years of earnings between age 16 and pension age. Actual earnings are to be revalued in terms of the earnings level current in the last complete tax year before pension age (or death or incapacity). In April 1975 terms the total personal retirement pension at maturity under the new scheme would vary from £11.60 for average earnings of £11.60 a week to about £29.00 for average earnings of about £80 or over; a married couple's pension (on the husband's contribution record alone) from £18.50 to £35.90; and a married couple's pension (where both have contributed) from £23.20 to £58.00. The basic component of pensions in payment will be uprated annually in line with the movement of earnings or prices, whichever is increasing the faster, and the additional component in line with the movement of prices. Graduated retirement pensions in payment and rights to such pensions earned by people who are still working will be brought into the annual review of benefits. Among other steps to be taken to give women equal treatment in benefit provision the State scheme will permit years of home responsibilities to count towards satisfying the contribution conditions for retirement pension, widowed mother's allowance and widow's pension, and from April 1979 the "half-test" by which a married woman cannot qualify for a Category A retirement pension unless she has contributed on earnings at the basic level in at least half the years between marriage and pension age is to be abolished. The range of short-term social security benefits and industrial injury benefits under the Social Security Act, 1975, will continue with only minor changes: these will include the repeal of the provision which at present imposes a lower rate of sickness and unemployment benefit on married women.

Members of occupational pension schemes which meet the standards laid down by the Act can be contracted out of a part of the State retirement and widow's benefits. A contracted-out scheme will be required to provide a minimum level of pension calculated on a basis similar to that for the additional component of retirement pension under the State scheme, with a widow's pension at half this rate. The benefits payable from the State scheme will be correspondingly reduced. The State scheme will help in meeting the cost of giving pensions under contracted-out schemes the same protection against inflation as if they had not been contracted out. The Act contains provisions designed to give women the same rights as men to belong to an occupational pension scheme. The Occupational Pensions Board established under the Social Security Act, 1973, will be responsible for deciding whether an occupational scheme should be accepted as a contracted-out scheme, and for ensuring that a contracted-out scheme has adequate financial resources. The Secretary of State for Social Services is empowered to make regulations for requiring employers to inform employees and their organisations and to have consultations before making an election to contract out.

SUPPLEMENTARY BENEFITS

The Ministry of Social Security Act, 1966, as amended by later measures, enacted a scheme of non-contributory benefits termed supplementary allowances and pensions in place of national assistance and of non-contributory old age pensions, and vested responsibility for these supplementary benefits in a new Ministry of Social Security (now the Department of Health and Social Security).

A Supplementary Benefits Commission within the Department is now responsible, subject to Regulations made by the Secretary of State for Social Services, for operating the scheme of supplementary benefits.

The supplementary pension may be claimed by persons over pension age and the supplementary allowance by persons aged 16 or over but under pension age, who are not in full-time work. The benefit payable is the amount, assessed under the provisions of the Act, by which the claimant's income requirements exceed his resources. The basic weekly rates of supplementary benefit (exclusive of rent) since November 15, 1976, are as follows:

	Ordinary	Blind persons
	£	£
Married couple.....	20.65	21.90 (a)
Single householder.....	12.70	
Other persons:—		
Aged 18 or over.....	10.15	13.95
Aged 16-17.....	7.80	8.70
Aged 13-15.....	6.50	6.50
Aged 11-12.....	5.35	5.35
Aged 5-10.....	4.35	4.35
Aged under 5.....	3.60	3.60
(a) £22.70 when both are blind.		

The long-term weekly rates, which apply, with certain exceptions, to supplementary pensioners, and also to those below pension age, other than the unemployed who are required to register for work, after they have been in receipt of an allowance for two years, are as follows:

	Ordinary	Blind persons
	£	£
Married couple.....	24.85	26.10 (a)
Single householder.....	15.70	
Other persons aged 18 or over.....	12.60	16.95
(a) £26.90 when both are blind.		

Where the claimant or a dependant is aged 80 or over a further 25p is added to these long-term rates. Any extra allowances on account of exceptional expenses, other than for heating and certain other items, will be set off against part of the long-term rates, viz., 50p (75p in the case of those over 80). See as to attendance allowances, p. 618.

The amount to be added for rent if the claimant (or his wife or her husband) is the householder is normally the net rent and rates in full; and, in the case of the non-householder aged 16 or over, £1.20 a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and for certain disregards.

Individual awards of benefit are determined by the Commission; a claimant who is dissatisfied with the decision on his claim has a right of appeal to an independent Appeal Tribunal.

The Commission may vary an assessment if there are exceptional circumstances but, in the case of a claim to supplementary pension, may not reduce it. The Commission also has powers, similar to those in the national assistance scheme, to award lump-sum payments to meet non-recurring exceptional requirements, and to meet charges for appliances or services supplied under the National Health Service, e.g. for glasses, dentures or dental treatment, and prescriptions.

OLD PERSONS' PENSIONS

The Social Security Act, 1975, provides, subject to a residence test, a non-contributory retirement pension of £9.20 a week (£5.60 for a wife or other adult dependant) for persons who were over pen-

sionable age on July 5, 1948, and for women whose husbands are so entitled if they are over pension age and have retired from regular work, with increases for adult and child dependants (Category C pension); and for others when they reach 80 if they are not already getting a retirement pension of any category or if they are getting that pension at less than these rates (Category D pension). An age addition of 25p per week is payable if persons entitled to retirement pension or their dependants are aged 80 or over.

ATTENDANCE ALLOWANCES

The Act of 1975 provides for the payment out of Exchequer funds of a tax-free and non-means-tested attendance allowance to the severely disabled, as determined by the Attendance Allowance Board. The full rate of £12.20 a week is paid to those in need of a great deal of attention or supervision both by day and by night. The allowance is paid at the lower rate of £8.15 a week to those whose need for attention or supervision arises either by day or by night. The allowance is treated as an additional requirement under the supplementary benefits scheme.

NON-CONTRIBUTORY INVALIDITY PENSION

The Social Security Act, 1975, provides for a non-contributory invalidity pension for persons of working age, other than married women supported by their husbands, who have been incapable of work for a period of at least 28 weeks but who do not qualify for a contributory invalidity pension. The benefit has been payable since November 15, 1976, at the rate of £9.20 a week, with additions for dependants. The cost is met from the Consolidated Fund.

INVALID CARE ALLOWANCE

The Social Security Act, 1975, also provides for a non-contributory invalid care allowance for persons of working age, other than married women supported by their husbands, who are not gainfully employed because they are regularly and substantially engaged in caring for a severely disabled relative who is receiving attendance allowance. The benefit has been payable since November 15, 1976, at the rate of £9.20 a week, with additions for dependants. The cost is met from the Consolidated Fund.

MOBILITY ALLOWANCE

The Social Security Pensions Act, 1975, made provision for a new non-contributory cash benefit under the principal Act which, subject to certain conditions, is to be payable to persons over the age of 5 and under pensionable age who are suffering from such physical disablement that they are unable to walk or virtually unable to do so, and their handicap is likely to last for at least a year. The allowance which is taxable is being introduced for different age groups over a period of three years or less starting in January, 1976. The weekly rate of the allowance is initially £5.00, but provision has been made for the rate to be reviewed in each tax year.

GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, the person who has the child in his family receives a guardian's allowance of £7.45 a week while the child is of qualifying age. The allowance is a non-contributory benefit under the Social Security Act, 1975, and, on certain conditions, is payable on the death of only one parent. The allowance cannot be claimed in addition to family allowance or other benefits for children.

FAMILY ALLOWANCES AND CHILD BENEFIT

Until April 4, 1977, family allowances of £1.50 a week will continue to be payable out of moneys provided by Parliament for each child in a family after the first while he or she is of school age or under, and up to 19 if he or she is undertaking full-time instruction in a school or is an apprentice. Until the same date child interim benefit, a new benefit introduced in April, 1976, under the Child Benefit Act, 1975, will be payable at £1.50 a week for the first or only child within the age limits in certain one-parent families.

From April 5, 1977, when the permanent provisions of the Child Benefit Act come into operation, family allowances and child interim benefit will be replaced by child benefit payable for all children in a family within the age limits, including the first or only child. The rates at the outset will be £1.00 for the first or only child (£1.50 in the case of certain one-parent families) and £1.50 for each child after the first. Consequential adjustments will be made in dependency benefit for first or only children under the Social Security Act, 1975.

FAMILY INCOME SUPPLEMENT

A benefit met out of Exchequer funds is payable under the Family Income Supplements Act, 1970, and regulations made thereunder, to families, including a single person, with at least one dependent child under 16 (or over 16 if still at school), whose total family income is below the "prescribed amount" if the head of the family (in the case of a couple, the man) is employed or self-employed, and normally so engaged, in remunerative full-time work (i.e., 30 or more hours work a week). The "prescribed amount" is £39.00 if there is one child in the family and rises by £4.50 for each additional child. "Total income" includes gross earnings, family allowances and a wife's earnings. The supplement is one-half of the amount by which the family's total income falls below the "prescribed amount", subject, since July 20, 1976, to a maximum payment of £8.50 for families with one child, rising by 50p for each additional child; odd amounts are rounded up to the next 10p above, and the minimum amount payable is 20p a week. Usually the supplement is awarded for 52 weeks and is not affected if the claimant's circumstances change during that time. Claim forms can be obtained at a Social Security Office or a Post Office. Claims are decided by the Supplementary Benefits Commission but there is an appeal to an independent Appeal Tribunal.

NATIONAL INSURANCE CONTRIBUTIONS

From April 6, 1975, when the National Insurance and Industrial Injuries schemes were replaced by a new scheme of social security benefits and contributions under the Social Security Act, 1975, combined weekly flat-rate Class 1 contributions ceased to be payable, and the graduated pension scheme was wound up (existing rights being preserved). Under the new scheme employees and their employers both pay wholly earnings-related contributions, based on a percentage of the employee's earnings (Class 1). Self-employed persons continue to pay flat-rate Class 2 contributions, but may also be liable to pay a contribution (Class 4) based on their profits or gains within certain limits. Class 3 contributions are voluntary, and may be paid to help qualify for certain benefits, including retirement pension. The contribution rates and earnings limits stated below apply for the tax year starting on April 6, 1976.

Class 1 contributions.—Primary Class 1 contributions are payable by employed earners and office holders over minimum school-leaving age with gross earnings at or above the lower earnings limit of £13 a week. For those with gross earnings at or above this level, contributions are payable on all earnings up to an upper limit of £95 a week. "Gross earnings" include overtime pay, commission, bonus, etc., without deduction of any superannuation contributions. The standard rate of primary contribution is 5.75 per cent. of reckonable earnings (National Insurance Fund 5.35 per cent.; National Health Service 0.4 per cent.). Married women and most widows who have elected not to pay contributions at the full rate pay at a reduced rate of 2 per cent. over the same earnings range: this covers industrial injuries benefits and a contribution of 0.4 per cent. to the National Health Service. An election or change of election relates to complete tax years. No primary contributions are payable by retirement pensioners when in employment, by persons over pension age with no title to pension, or by men over 70 and women over 65 who continue to work. Secondary Class 1 contributions are payable by employers of employed earners, and by the appropriate authorities in the case of office-holders, except in the case of persons earning less than the lower earnings limit of £13 a week. The rate is 8.75 per cent. (National Insurance Fund 7.95 per cent.; National Health Service 0.6 per cent.; Redundancy Fund 0.2 per cent.) over the same earnings range as primary contributions (regardless of the employed earner's contribution rate). Primary contributions are deducted from earnings by the employer, and are paid, together with the employer's contributions, to the Inland Revenue along with income tax collected under the PAYE system, so dispensing with contribution cards for employed earners.

Class 2 contributions.—These contributions are payable by self-employed earners over school-leaving age at a flat-rate normally of £2.41 a week for men and £2.20 for women. The women's rate is to be raised to the men's rate by 1980. Those with earnings below £775 a year can apply for exception from liability to pay Class 2 contributions for the tax year 1976-77. Married women and most widows can choose whether or not to pay Class 2 contributions when self-employed. An election or change of election relates to complete tax years. No Class 2 contributions are payable by retirement pensioners when self-employed, by persons over pension age with no title to pension, or by men over 70 and women over 65 who continue to work. There are special rules for those who are concurrently employed and self-employed. Class 2 contributions may be paid by direct debit of a bank or National Giro account or by stamping a contribution card. People who while self-employed are exempted from liability to pay contributions on the grounds of small earnings may pay either Class 2 or Class 3 contributions voluntarily. Self-employed earners (whether or not they pay Class 2 contributions) may also be liable to pay Class 4 contributions based on profits or gains within certain limits.

Class 3 contributions.—These are voluntary flat-rate contributions payable by persons over school-leaving age who would otherwise be unable to qualify for retirement pension and certain other benefits because they have an insufficient record of Class 1 or Class 2 contributions. The rate is £2.10 a week. Payment may be made by stamping a contribution card or by direct debit through a bank or Giro account. Married women and widows who have elected not to pay Class 1 (full rate) or Class 2 contributions cannot pay Class 3 contributions.

Class 4 contributions.—These contributions are payable by self-employed earners under 70 (65 for women), whether or not they pay class 2 contributions, on annual profits or gains from a trade, profession or vocation chargeable to income tax under Schedule D. The rate of contribution is 8 per cent. (including a contribution of 0.6 per cent. to the National Health Service) of such profits or gains falling between £1,600 and £4,900 a year. The maximum Class 4 contribution, payable on profits or gains of £4,900 or more, is £264. The contribution is based on profits or gains subject to certain allowances and relief, which differ in some respects from those for income tax. Class 4 contributions are generally assessed and collected by the Inland Revenue along with Schedule D income tax. Self-employed persons under 16, or who are over pension age and have retired from regular work or are treated as having retired, or do not qualify for a retirement pension on their own contributions, can apply for exception from liability for Class 4 contributions. There are special rules for people who have more than one job, or who pay Class 1 contributions on earnings which are chargeable to income tax under Schedule D.

The cuts in public spending announced by the Chancellor of the Exchequer in the House of Commons on July 22, 1976, were accompanied by an increase from April 6, 1977, of 2 percentage points in employers' national insurance (secondary Class 1) contributions.

Leaflets relating to each class of contribution, and an employer's guide to national insurance contributions, are obtainable from local Social Security offices.

CONFEDERATION OF BRITISH INDUSTRY

21 Tothill Street, London, S.W.1.

The Confederation of British Industry was founded in August 1965 to promote the prosperity of British industry and those elements of British business closely associated with it. It combines in a single, democratic and voluntary association the rôles previously played by the British Employers' Confederation, the Federation of British Industries and the National Association of British Manufacturers.

The C.B.I. is recognized nationally and internationally as the representative organization of the management side of industry for the United Kingdom. It acts as a national point of reference for all those who seek the views of industry and management and it advises the Government on all aspects of Government policy which affect the interests of industry and business, both at home and abroad.

Membership of the C.B.I. consists of more than 10,000 companies and over 200 trade associations and employers' organizations. In addition to these most of the nationalized industries are in membership as public sector members and thereby able to work with the C.B.I. on problems that are the concern of all management.

The governing body of the C.B.I. is the Council, which meets monthly in London. It is assisted by some 30 expert standing committees which advise on the main aspects of policy. There is a C.B.I. Regional Council and seven C.B.I. offices in the administrative regions of England and offices and Councils covering Scotland, Wales and Northern Ireland. These Regional Councils send their representatives to the governing body. The C.B.I. is represented in more than 100 centres overseas.

HOME-GROWN CEREALS AUTHORITY

Hamlyn House, Highgate Hill, N.19.

Constituted under the Cereals Marketing Act, 1965, the Authority consists of 9 members representing cereal growers, 9 representing dealers in, or processors of, grain and 5 independent members. The purpose of the Authority is to improve the marketing of home-grown cereals. Production now exceeds 15 million tons per annum; at full E.E.C. prices this is valued at over £1,200,000,000. The Authority is empowered by the Act to provide a market intelligence service; to operate schemes for the encouragement of forward sales, and the orderly phasing of supplies according to market needs; and to undertake research aimed at the expansion of the market for home-grown cereals. It has been appointed executive agent for the Intervention Board for Agricultural Produce in respect of the denaturing of wheat and intervention buying,

The C.B.I. provides its members with a wide range of services and practical advice on economic, industrial relations, commercial, technical, social and export questions. The organization is financed by the subscriptions of its members.

The NBA is a Government-sponsored, non-profit distributing Agency, whose aims are to encourage improved methods of design, construction and management in the building industry. Founded in 1964 it was initially concerned with the appraisal of building systems (which it now does jointly with the Agrément Board) with metrication and with demonstration housing projects. Currently it provides a wide range of technical and building management services to public authorities, housing associations, government departments and private clients. It receives a grant from the Department of the Environment for certain services to the local authorities and the Housing Corporation, but charges normal fees for its consultancy work.

NOTES.—1. Before 1801 there existed no official return of the population of either England or Scotland. Estimates of the population of England at various periods, calculated from the number of baptisms, burials and marriages, are: in 1570, 4,160,221; 1600, 4,811,718; 1630, 5,600,517; 1670, 5,773,646; 1700, 6,045,008; 1750, 6,517,035.

2. The last official Census of Population in respect of England and Wales, Scotland, Northern Ireland, the Isle of Man and Guernsey, was taken on the night of April 25, 1971, and in respect of Jersey on April 4, 1971. The figures for 1971 are based on the final results of the 1971 Census.

3.†All figures refer to the area which is now Northern Ireland. Figures for N. Ireland in 1921 and 1931 are estimates based on the Censuses held in 1926 and 1937.

ISLANDS.—The figures given above do not include islands of the British seas. Populations of these islands at census years since 1900 were:—

INCREASE OF THE PEOPLE

Mid-year estimates of the future total population of the United Kingdom are based on estimates by the Registrars General of the total population at mid-1973. The projections have been prepared by the Government Actuary's Department in consultation with the Registrars General. It is assumed in their projections below that, at ages under 60 for males and 70 for females, death rates will decline over the period of the projection until after 40 years, they are three-quarters of present rates. Above these ages the assumed improvement becomes proportionately smaller as age advances until they vanish at ages over 90. Annual live births implied in the projections are 751,000 in mid-1973/74, 735,000 in

1974/75 and 732,000 in 1975/76 followed by a gradual increase in birth and fertility rates until 1983/84 when the number of births reaches 914,000. The projection for 2001/02 is 845,000 and for 2012/2013 is 950,000. The ratio of male to female births is taken as 1.06 (N. Ireland 1.07) throughout and allowance has been made for a net outward migration of 19,000 in 1973/74 rising to 50,000 a year from 1978 onwards.

LOCAL GOVERNMENT IN ENGLAND AND WALES

The Local Government Act, 1972 provided for the reorganisation of local government in England (outside Greater London whose local government was reorganised in 1965) and Wales. On April 1, 1974 the former county, county borough, and county district councils were abolished. Two tiers of new local authorities, county and district councils, covering metropolitan and non-metropolitan counties and districts, replaced them.

Structure and Areas in England

Six metropolitan counties cover the main conurbations outside Greater London: Tyne and Wear, West Midlands, Merseyside, Greater Manchester, West Yorkshire and South Yorkshire. They range in population from 1,200,000 (Tyne and Wear) to 2,800,000 (West Midlands). Each metropolitan county extends to the edge of the general continuously built-up area of the conurbation. Thus each of the major conurbations outside London has now one local authority to administer strategic functions over the whole conurbation.

The six metropolitan counties are divided into 36 metropolitan districts. These range in population from 173,000 (South Tyneside) to 1,100,000 (Birmingham). Most of them have a population of over 200,000 and most include a former county borough. They form compact areas.

There are 39 non-metropolitan counties ranging in population from 120,000 (Isle of Wight) and 283,000 (Northumberland) to 1,400,000 (Kent). These counties have generally been formed by combining former administrative counties and associated county boroughs, i.e. they are based on geographical counties. There are, however, three completely new non-metropolitan counties: Avon, Cleveland, and Humberside. Some former counties have been merged to form Cumbria (Cumberland, Westmorland and the Furness area of Lancashire); Hereford and Worcester; Cambridgeshire (Huntingdon and Peterborough and Cambridgeshire and Isle of Ely); and Leicestershire (Leicestershire and Rutland). Smaller boundary adjustments have been made between, e.g. Berkshire and Oxfordshire, Buckinghamshire and Berkshire, and Hampshire and Dorset.

Each of the non-metropolitan counties is divided into non-metropolitan districts, of which there are 296. These districts have been formed generally by the amalgamation of former county districts to cover areas with populations broadly between 60,000 and 100,000. About one third of the non-metropolitan districts, however, have populations above this range because of the need to avoid dividing large towns. Some districts, mainly in sparsely populated areas, have populations below 60,000 though only 14 have populations below 40,000 (as compared with three quarters of the 1,220 former authorities).

Permanent Local Government Boundary Commissions for England and Wales have been set up to keep the areas and electoral arrangements of the new local authorities under review.

Constitution and Elections

The new county and district councils consist of directly elected councillors. The broad range of sizes of councils are: county councils 60-100 members; metropolitan district councils 50-80 members; non-metropolitan district councils 30-60 members. The councillors elect annually one of their number as chairman. There are no aldermen under the new system, though councils may give past councillors the title "honorary alderman". The title carries no right to sit on the council.

All the new authorities were elected *en bloc* in 1973 (as "shadow" authorities until they took on their functions on April 1, 1974). After a transitional period all councillors will be elected for a term of four years. All county councils will be elected *en bloc* in 1977 and every four years thereafter. One third of the councillors for each ward of each metropolitan district will be elected from 1975 in each of the three years between county council elections. Non-metropolitan district councils can choose whether to have elections on the county council or metropolitan district council basis. Most of their electoral areas will need revision and the next elections will therefore be held in 1976 on a whole council basis. If they choose whole council elections these will be held in the mid-year between county council elections. If they choose elections by thirds, for geographical reasons it may not be practicable to arrange for elections by thirds in every ward. Local elections will normally be held on the first Thursday in May.

Greater London (See below) is not affected by reorganisation. Elections to local authorities in Greater London are, however, to be brought into line with the rest of England so that the normal term of office for councillors on the G.L.C. and the London Borough Councils will be four years instead of three. Greater London Council elections will take place in the same year as county council elections in 1977 and every fourth year thereafter. Aldermen will cease to sit as members of the G.L.C. after the 1977 elections. The next London Borough Council elections will be held in May 1978. Aldermen will cease to sit as members of London Borough Councils after the 1978 elections.

Internal Organisation and

Local Government Services in England

The council are the final decision making body within any authority. They are free to a great extent to make their own internal organisational arrangements. Normally questions of major policy are settled by the full council, while the administration of the various services is the responsibility of committees of members. Day to day decisions are delegated to the council's officers, who act within the policies laid down by the members.

Many councils have set up corporate management teams of the Chief Executive and chief officers. Such teams consider the operations of their authority as a whole, rather than dealing with each service separately, as was often the case in the past.

Local authorities are empowered or required by various Acts of Parliament to carry out functions in their areas. The legislation concerned comprises public general Acts and "local" Acts which local authorities have promoted as private bills. Functions are divided everywhere between two tiers of authorities, though their allocation within the metropolitan areas is somewhat different from outside, the metropolitan district councils exercising more functions than the non-metropolitan district councils.

Responsibility for the main local government functions is allocated as follows (though responsible authorities may involve other authorities in the provision of certain of their services through agency arrangements):

County councils: Strategic planning (e.g. structure plans; major projects); traffic, transport and highways; police; fire service; consumer protection (other than hygiene); refuse disposal; smallholdings.

Non-metropolitan county and metropolitan district councils: Education; social services; libraries.

District Councils: Local planning; housing; high-

ways (maintenance of certain urban roads and off-street car parks); building regulations; environmental health; refuse collection; cemeteries and crematoria.

Concurrent (county and district councils); Recreation (e.g. parks, playing fields, swimming pools); museums; encouragement of the arts.

The sewerage and sewage disposal functions of local authorities have been transferred to 9 new water authorities and the Welsh National Water Development Authority. Water authorities, however, are expected to make agreements whereby the new district councils discharge sewerage functions on an agency basis. Apart from these functions, the water authorities are responsible for water supply and conservation; river pollution control and river management; fisheries; land drainage; and use of water space for recreation and amenity purposes.

The personal health functions of local authorities have been transferred to area health authorities, whose areas are the same as non-metropolitan and Welsh counties and metropolitan districts. The area health authorities will work within strategies formulated by regional health authorities. They will work in close collaboration with local education, social services and environmental health authorities.

London.—The Greater London Area embraces the old counties of London and Middlesex (except Potter's Bar, Staines and Sunbury-on-Thames) and parts of the neighbouring counties of Essex, Herts., Kent and Surrey and the whole of the county boroughs of Croydon, East Ham and West Ham.

For those functions which need to be considered for the whole of the Area, the Greater London Council is responsible; such functions as traffic, major roads and overall planning. All other matters are the concern of the 32 London borough councils; the City of London, besides retaining its previous functions, has the powers of a London borough.

Parishes

The existing rural parishes in England are generally not affected by local government reorganisation except that the powers of parish councils have been extended and a few of them have been divided by the boundaries of new counties and districts. 300 former small borough and urban district councils have become parish councils with the same powers as other parish councils.

Parishes with 200 or more electors must generally have parish councils, and about three-quarters of the parishes have councils. A parish council comprises at least 5 members, the number being fixed by the district council. All parishes have parish meetings, comprising the electors of the parish.

Parish council functions include; allotments; arts and crafts; community halls, recreational facilities (e.g. open spaces, swimming pools); cemeteries and crematoria; and many minor functions. They must also be given an opportunity to comment on planning applications. They may, like county and district councils, spend up to a 2p rate for the general benefit of the parish. They precept on the district councils for their rate funds. Parish councils will be elected, after a transitional period, every four years, in the year in which the local district councillor is elected.

Civic dignities

District councils may petition for a royal charter granting borough status to the district. In boroughs the chairman of the council is the mayor. The status "city" with or without the right to call the mayor "Lord Mayor" may also be granted

by letters patent. Parish councils may call themselves "town councils", in which case their chairman is the "town mayor".

Charter trustees are established for those former boroughs which are too large to have parish councils and are situated in districts without city or borough status. The charter trustees are the district councillors representing the former borough and they elect a mayor, continue civic tradition, and look after the charters, insignia and civic plate of the former borough.

Local Government Elections

Generally speaking, all British subjects or citizens of the Republic of Ireland of 18 years or over, resident on the qualifying date in the area for which the election is being held are entitled to vote at local government elections. A register of electors is prepared and published annually by local electoral registration officers.

A returning officer has the overall responsibility for an election. Voting takes place at polling stations, arranged by the local authority and under the supervision of a presiding officer specially appointed for the purpose. Candidates, who are subject to various statutory qualifications and disqualifications designed to secure that they are suitable persons to hold office, must be nominated by electors for the electoral area concerned.

Local Commissioners for England and Wales

There now exist Local Commissioners for England and Wales whose duty it is to investigate complaints of maladministration in many aspects of local government.

Wales

Wales, including the former Monmouthshire, has been divided into eight counties; Gwynedd; Clwyd; Powys; Dyfed; West, Mid and South Glamorgan; and Gwent. They range in population from 99,000 (Powys) to 536,000 (Mid-Glamorgan). There are 37 new districts in Wales, many of those in the less populated parts reflecting the areas of former Welsh counties. Their populations range from 18,000 (Radnor) to 285,000 (Cardiff).

The arrangements for Welsh counties and districts are generally similar to those for English non-metropolitan counties and districts. There are some differences in functions: Welsh district councils have refuse disposal as well as refuse collection functions and they may provide on-street as well as off-street car parks with the consent of the county council. A few districts have also been designated as library authorities.

In Wales parishes have been replaced by communities. Unlike England, where many areas are not in any parish, communities have been established for the whole of Wales; there is one for each Welsh parish, county borough, borough or urban district (or part where the former area is divided by a new boundary). Community meetings may be convened as and when desired. Community councils already exist where there were formerly parish councils, and also in nearly all the former boroughs and urban districts, and further councils may be established at the request of the community meeting. Community councils have broadly the same range of powers as English parish councils. Community councillors will be elected *en bloc* on the same basis as parish councillors in England, i.e. at the same time as a district council election and for a term of four years.

Local Government Finance

Local government is financed from various sources. (x) *Rates.*—Levied by district councils and in London by the City Corporation and the London

boroughs. Sums required by the Greater London Council and by county councils are included in the rates levied by London boroughs and district councils. Rates are levied by a poundage tax on the rateable value of property in the area of the rating authority. Under the General Rate Act, 1967, rating authorities are required to charge a lower rate in the pound, on dwellings than on property generally in their area. Differentials of 13p and 18½p for England (33½p and 36p for Wales) respectively were prescribed for 1974-75 and 1975-76. New valuation lists, prepared by valuation officers of the Board of Inland Revenue, came into force on April 1, 1973. These are updated as new property enters the list, and changes to existing property necessitate amendments to the rateable value. The lists remain in force until the next general revaluation due in 1980. Certain types of property are exempt from rates, e.g. agricultural land and buildings, and churches. Some charities and other non-profit making organisations can receive partial exemption. Under the General Rate Act, 1967, as amended by the Local Government Act, 1974, local authorities can resolve to rate specified classes of empty property by an amount up to 100 per cent. of the full rates. Since April 1, 1974 rating authorities must levy a surcharge on empty commercial property at double the normal rates for the first twelve months, treble the rates for the second twelve months and so on progressively during the period of non-use. The Local Government Act, 1974, also makes provision for rate rebates for domestic ratepayers, regardless of the type of property in which they live, eligibility depending on income and family circumstances.

(2) *Government Grants.*—In addition to specific Government grants in aid of revenue expenditure on particular services, from April 1, 1974 grants known as rate support grants are payable to local authorities under the provisions of Part 2 of the Local Government Act, 1974. These grants, which replace the block grants previously paid under the Local Government Act, 1966, consist of three elements: the needs element, the resources element and the domestic element. The needs element, which is payable to non-metropolitan counties, metropolitan districts, London boroughs, the City of London, and the Isles of Scilly, is intended to compensate for variations between authorities in the amount they need to spend per head of population to provide a comparable level of service. The grant is distributed to local authorities on the basis of a distribution formula, which may vary from year to year, using various objective factors for measuring the relative needs of each authority. The resources element is payable to those rating authorities whose rateable resources per head of population fall short of a prescribed national standard for the year, and is so calculated to bring their resources effectively up to that national standard. The domestic element is payable to all rating authorities to reimburse them for the cost of giving the domestic rate relief prescribed for the year.

In order to arrive at the total amount of the rate support grants to local authorities in England and Wales for any year, the aggregate of Exchequer grants to local authorities in respect of their relevant expenditure for the year is determined in advance (housing subsidies and specific grants towards expenditure on rate rebates and mandatory awards to students and trainee teachers are outside this aggregate amount) and from this is deducted the estimated amount of specific grants for the year in aid of revenue expenditure and the supplementary grants for transport purposes and in connection with national parks; the resulting balance is the

amount of rate support grant. This amount can be subsequently increased if there is a substantial increase in the relevant expenditure of local authorities due to an increase in the level of prices, costs or remuneration, or because later legislation has created new areas of expenditure.

Forecasts of local authority relevant expenditure for 1976-77 in England and Wales adopted by the Government for rate support grant purposes were as follows. The amounts given are at November 1975 prices.

The aggregate amount of Exchequer grants for 1976-77 was determined at £6,852,000,000 being 65.5 per cent. of the estimated relevant expenditure. Of this, the specific revenue grants and the transport and National Parks supplementary grants were estimated at £931,000,000 giving a total for rate support grants of £5,921,000,000 of which £3,565,000,000 was in respect of the needs element, £640,000,000 the domestic element and £1,716,000,000 the resources element.

Rates and Rateable Values.—The total rateable value for England and Wales on April 1, 1975 was £6,742,000,000. The latest estimate of the amount to be raised in rates (net of rate rebates) in 1976-77 is £4,135,000,000.

Average Rates.—The estimated average rates levied in England in 1976-77 were: Inner London Boroughs, domestic rate 48.6p, non-domestic rate 69.2p; Outer London, 55.6p and 74.8p; Metropolitan Districts, 56.2p and 75.4p; Non-metropolitan districts, 51.6p and 71p. In Wales the estimated average rates levied were, domestic rate 50.3p, non-domestic rate, 87p. The average rates levied in England and Wales were estimated as 52.7p (domestic) and 72.4p (non-domestic).

SCOTLAND

Under the new structure of local government, in terms of the Local Government (Scotland) Act, 1973, which came into administrative effect on May 16, 1975, Scotland is for local government purposes divided into 9 regions, and 3 islands areas covering respectively Orkney, Shetland and the Western Isles. Within the regions there is a second independent tier of 53 districts.

Functions.—Regions and districts have separate responsibility for specific functions. In addition they share responsibility for certain concurrent functions. Islands area councils are all-purpose authorities responsible in these areas for the functions (except police and fire services) which are the separate or concurrent responsibility of regions and districts.

Regional Functions.—The new regional authorities are directly responsible for overall planning strategy and the highly technical or expensive services, e.g. the provision of major infrastructure services including transportation, roads and passenger transport, airports, water, sewerage, river purification, flood prevention, as well as education, social work, police and fire services.

District Functions.—The district authorities deal with more local matters such as local planning; development control; building control; housing; environmental health including cleansing, refuse collection and disposal, food hygiene, inspection of shops, offices and factories, clean air, markets and slaughterhouses, burial and cremation; regulation and licensing, including cinemas and theatres, betting and gaming, taxis, house to house collections; libraries.

Concurrent Functions.—These include countryside and tourism, industrial development, recreation parks, art galleries and museums.

Community Councils.—Provision is also made in the Act for setting up community councils under schemes prepared by each district and islands authority. The Act required that the schemes be submitted to the Secretary of State for approval by May 16, 1976. Such councils are not local authorities but have a statutory base. They have no statutory functions but are expected to take such action in the community as appears to their members to be desirable and practicable.

Local Government Electors.—In October 1975 there were 3,763,194 electors in Scotland. The first ordinary elections of all the new authorities took place on May 7, 1974.

Rates and Rateable Values.—In 1973-74, the latest year for which final figures were available, a total of £285,085,000 was received from the general rates of local government in Scotland and £11,939,000 from domestic water rates. The rate-

able value on which rates were leviable was £296,668,000 on the general rates and £172,869,000 on the domestic water rates. The average general rate levied was 96p and the domestic water rate levied was 7p.

Provisional figures for 1974-75 show total receipts from general rates of £331,968,000 and £14,762,000 from domestic water rates, and £434,801,000 and £18,235,000 for 1975-76. The rateable value leviable for 1974-75 was £301,127,000 (general) and £174,055,000 (domestic water rate) and £309,484,000 (general) and £174,936,000 (domestic water rate) for 1975-76. The average rate per £ levied for 1974-75 was 110p (general) and 8·5p (domestic water) and 140·5p (general) and 10·5p (domestic water) for 1975-76.

NORTHERN IRELAND

On October 1, 1973 a single-tier system of 26 district councils, based on the main centres of population, replaced the former system of two-tier county and district and the single-tier county borough councils.

The new district councils are responsible for a wide range of local services including refuse collection and disposal, the provision and maintenance of recreational and social facilities, street cleansing, environmental health, tourist development, enforcement of building regulations, miscellaneous licensing and registration matters, and gas supply.

They have in addition a consultative function, partly statutory and partly administrative, in relation to roads, housing, water and planning and also nominate representatives as members of public bodies responsible for education, health and housing.

Electors.—The register published on February 15, 1975, contained the names of 1,039,544 local government electors. Of this total, 252,992 related to the City of Belfast and 50,642 to Londonderry District.

THE NATIONAL PARKS

The ten National Parks described below in their order of designation have been established in England and Wales. These areas are not public property and visitors are not free to wander over private land within the Park boundaries. They have been marked out for special care aimed at two prime purposes: to preserve and enhance their natural beauty, and to promote their enjoyment by the public.

Peak District National Park (542 sq. miles).—Mainly in Derbyshire but extending into Staffordshire, Cheshire, South Yorkshire, West Yorkshire and Greater Manchester. In the south and east are limestone uplands, and finely wooded dales with swift, clear rivers and unspoilt stone villages. Northwards, moorlands, edged by gritstone crags, attract hill walkers and climbers. There are information centres at Bakewell, Edale, Castleton and at Buxton (just outside the Park) and an information caravan tours the Park.

Lake District National Park (866 sq. miles).—In Cumbria. Spectacular mountain scenery with wooded lower slopes enhanced by lakes and tarns. The area includes England's highest mountains (Scafell Pike, Helvellyn and Skiddaw) and largest lakes. Walking and rock-climbing are the principal recreations, but there are fishing, swimming, sailing, boating and winter sports as well. There are information centres at Keswick, Ambleside and Bowness. Information vans are sited at Waterhead, Conistone, Glenridding and Hawkeshead. At Brockhole, Windermere, is a National Park centre.

Snowdonia National Park (838 sq. miles).—In Gwynedd in North Wales. A mountainous region supporting farms, forest, reservoirs and power stations and traversed by high passes, offering some of the finest rock-climbing and mountain walking for both beginner and expert. The main valleys,

often finely wooded, hold lakes and are watered by rivers with cascading falls. There are information centres at Aberdŷfi, Bala, Blaenau Ffestiniog, Conwy, Harlech, Dolgellau, Llanberis and Llanrwst.

Dartmoor National Park (365 sq. miles).—In Devon, the highest area of high moorland in southern England, famous for its granite "tors" often weathered into strange shapes. Fine hanging oak woods adorn the river valleys which lead up into the Moor. The Park is rich in prehistoric relics and offers fine walking and riding. Information vans are sited at Yelverton, Haytor and New Bridge.

Pembrokeshire Coast National Park (225 sq. miles).—A spectacular section of Britain's coastline, where rock cliffs alternate with bays and sandy coves. In the north is Mynydd Preseli, abounding in prehistoric relics. The Park includes the fine Milford Haven waterway reaches, Tenby, the cathedral of St. David's, and Carew and other Norman castles. There are information centres at Tenby, St. David's, Pembroke, Fishguard, Kilgetty and Haverfordwest. A countryside unit is open at Broad Haven.

North York Moors National Park (553 sq. miles).—In North Yorkshire and Cleveland, the Park stretches from the Hambleton Hills in the west to the coastline above Scarborough. On the coast sheltered bays and sandy beaches alternate with

headlands harbouring villages such as Stalthes and Robin Hood's Bay. The heart of the Park offers tracts of open moorland, intersected by beautiful wooded valleys. Mount Grace Priory and the abbeys of Rievaulx and Byland are within the Park. There are information centres at Danby Lodge and Sutton Bank.

Yorkshire Dales National Park (680 sq. miles).—An area of upland moors, cut by deep valleys, mostly in North Yorkshire but extending into Cumbria. The Park includes some of the finest limestone scenery in Britain: Kilnsey Crag in Wharfedale, Gordale Scar, and Malham Cove in Malhamdale. In the Park also are Swaledale and Wensleydale, the three peaks of Ingleborough, Wharfedale and Pen-y-Ghent, and many relics of the past such as the Roman fort at Balmbridge and Bolton Abbey in Wharfedale. There are information centres at Clapham, Aysgarth Falls, Malham and Settle. An information caravan is sited at Hawes.

Exmoor National Park (265 sq. miles).—Mainly in Somerset but extending into Devon, this is a moorland plateau seamed with finely wooded combes. The well-known coastline between Minehead and Combe Martin Bay is exceptionally beautiful. In the east are the Brendon Hills. There are information centres at Minehead, Lynmouth and Dulverton. An information van is sited at Combe Martin.

Northumberland National Park (398 sq. miles).—A region of hills and moorland, stretching from Hadrian's Roman Wall in the south to the Cheviot Hills on the Scottish Border. The area is rich in historic interest. There are information centres at Byrness, Ingram and Once Brewed and an information van tours the Park.

Brecon Beacons National Park (519 sq. miles).—The most recent National Park, established in 1957, is centred on "The Beacons" with its three peaks: Pen y Fan, Corn Du and Cribyn rising to nearly 3,000 feet. But it includes the Black Mountains to the east and the Black Mountain to the west, thus taking in parts of Gwent and Dyfed as well as southern Powys and a small area of mid-Glamorgan. The Upper Usk Valley, Llangorse Lake, Brecon Cathedral, Carreg Cennen Castle and Llanthony Abbey are all within the Park. There are information centres at Brecon, Abergavenny, Llandovery and a mountain centre near Libanus, Brecon.

AREAS OF OUTSTANDING NATURAL BEAUTY

Anglesey (83 sq. miles).—Except for breaks around the urban areas and in the vicinity of Wylfa, the designated area extends along the entire coastline. The varied scenery is famed for its beauty, as also are the Menai Straits, separating the island from the mainland.

Arnside and Silverdale (29 sq. miles).—Lying along the upper half of Morecambe Bay, the area embraces the Kent estuary where it adjoins the Lake District National Park and includes extensive tidal flats in the Bay. The varied coastal landscape contains several limestone hills, woodland and bog areas locally known as "mosses". Known for its wild-fowl breeding grounds, the whole area is of considerable ecological value.

Cannock Chase (26 sq. miles).—This is an area of high heathland in Staffordshire, relieved by varied scenery in which parklands adjoin farms, woodlands and pleasant villages. Deer continue to roam over the Chase.

Chichester Harbour (29 sq. miles).—Well known for its small boating and sailing facilities, the area extends from Hayling Island in the west to Apuldrum in the east and contains the whole of Thorney Island.

Chilterns (309 sq. miles).—The well-known chalk downlands from Goring in South Oxfordshire northeastwards through Buckinghamshire, Hertfordshire and Bedfordshire to Dunstable and Luton, including the outlying group of hills beyond Luton. Contains several National Trust properties and Whipsnade Zoo.

Cornwall (360 sq. miles).—Comprising a number of separate areas including Bodmin Moor and some of the finest and best-known coastal scenery in Britain. Most of the Land's End peninsula; the coast between St. Michael's Mount and St. Austell with Falmouth omitted; and the Fowey Estuary are all included; in north Cornwall most of the coast to Bedruthan Steps, north of Newquay, and between Perranporth and Godrevy Towns.

Cotswold (582 sq. miles).—Contains the great limestone escarpment overlooking the Vales of Gloucester and Evesham. The remainder is high undulating country and narrow wooded valleys traversed by shallow rapid streams. Noted for its beautiful villages.

Deudham Vale (22 sq. miles).—This, the smallest area so far designated, is the flat land of water meadows with hedges and woodland, bordering Essex and Suffolk, where John Constable (1776-1837) painted during most of his life. Fladford Mill, Willy Lott's Cottage and the church of Stoke-by-Nayland still stand.

East Devon (103 sq. miles).—The area comprises the fine stretch of coastline between Ocombe Rocks, near Exmouth, and the Dorset area near Lyme Regis, with Sidmouth, Beer and Seaton omitted. Inland Gittisham Hill, East Hill and Woodbury and Aylebore Commons are all included.

North Devon (66 sq. miles).—Comprising three sections of fine coastline—the whole of the Hartland peninsula; from Bideford Bar to the western limits of Ilfracombe, and from east of Ilfracombe to the boundary of the Exmoor National Park. Clovelly, Braunton Burrows, Woolacombe and Combe Martin are all included.

South Devon (128 sq. miles).—It includes the magnificent coast between Bolt Head and Bolt Tail, a National Trust property; Salcombe, Slapton Sands and Dartmouth, and the four estuaries and valleys of the Yealm, Erme, Avon and Dart.

Dorset (400 sq. miles).—Takes in the whole of the coastline between Lyme Regis and Poole, with the Isle of Portland and Weymouth omitted, and stretches inland to include the Purbeck Hills and the downs, heaths and wooded valleys of the Hardy country.

Forest of Bowland (310 sq. miles).—A fine tract of high open moorland running westward from near Settle and Bolton by Bowland in the Pennines, to Caton and Scorton in Central Lancashire. A small outlying area east of the River Ribbles includes Pendle Hill and Pendleton Moor.

Gower (73 sq. miles).—In the county of West Glamorgan, South Wales, the area is known for its beautiful coastline, its rocky limestone cliffs, sandy bays and coves and for its wooded ravines stretching inland.

East Hampshire (151 sq. miles).—The area stretches from the outskirts of Winchester to the Hampshire/Sussex border at a distance of about 10 miles inland from the south coast.

South Hampshire Coast (30 sq. miles).—14 miles of coastline on the northern shores of the Solent, between Hurst Castle and Calshot Castle, south-east of Fawley, with the central part of the area extending inland up the Beaulieu River for about six miles, including a beautiful part of the New Forest. Along much of the coast woods of oak and

Scots pine stretch down to the water's edge, while at the western end are some attractive salt marshes.

Kent Downs (326 sq. miles).—Running from the Surrey border near Westerham (its boundary adjoining that of the Surrey Hills area), about 60 miles to the coast near Dover and Folkestone, with a coastal outlier at South Foreland and a narrow strip of the old sea cliff escarpment west of Hythe overlooking Romney Marsh. Pleasant pastoral scenery, picturesque villages, ancient churches and castles, with the Downs rising to 600 feet.

Lincolnshire Wolds (216 sq. miles).—The area extends in a south-east direction from Laceyby and Caistor in the north to the region of Spilsby, about ten miles west of Skegness. Its charm is derived from the undulating terrain, sparse settlement pattern and the excellent views from the chalk escarpments. The wolds are extensively farmed and contain numerous small, attractive villages.

Llyn (60 sq. miles).—An isolated peninsula in Gwynedd, North Wales, of unique character, still largely unspoiled by the hand of man.

Malvern Hills (40 sq. miles).—The area embodies the whole range of the Malvern Hills in the county of Hereford and Worcester, just touching Gloucestershire. Such well-known features as the Worcestershire Beacon, North Hill, the Herefordshire Beacon, and Midsummer Hill, a National Trust property, are within the area.

Mendip Hills (78 sq. miles).—Comprising over half of the Mendip Hills, the area stretches, east to west, from Bleadon Hill to the A.39 road north of Wells. Blagdon Lake and Chew Magna Lake are within the boundary which, in the south, takes in Cheddar Gorge. The plateau, rising to over 1,000 ft., commands fine views over the Bristol Channel and surrounding countryside. Noted for its caves, including Wookey Hole, the area is of great scientific and historic interest.

Norfolk Coast (174 sq. miles).—With coastal scenery ranging from salt marsh and mudflats, sand-dunes and shingle ridges to sea cliffs, this area includes six miles of the south-east coast of the Wash, an almost continuous coastal strip three to five miles in depth from Hunstanton to Bacton, with a further small strip between Sea Palling and Winterton-on-Sea. The area, which is rich in wild-life, also includes part of the Sandringham Estate.

Northumberland Coast (50 sq. miles).—Low cliffs and rocky headlands with active fishing villages comprise this area which stretches from just south of Berwick to Amble. It includes Holy Island, with the oldest monastic ruins in the country; the Farne Islands, and the great castles of Bamburgh, Dunstanburgh and Warkworth.

Quantock Hills (38 sq. miles).—The main feature of this area in Somerset is the range of red sandstone hills rising to a height of 1,260 feet at Will's Neck above Crow Combe.

Isles of Scilly.—There are about 140 islands and skerries in the Scillies group of which only five are inhabited. Geologically, the formation is similar to Land's End and other granite areas in Cornwall. The coastline is dramatically rocky, interspersed

with sheltered sandy beaches and areas of dune of bleached decomposed granite, glistening with mica and shells. There are coastal paths round the larger islands, and a number of sites of Special Scientific interest, identified by the Nature Conservancy Council.

Shropshire Hills (300 sq. miles).—This area includes the fine landscape around Church Stretton, with Caer Caradoc, the Long Mynd, the Stiperstones, and the long ridge of Wenlock Edge from which it extends north-east to the Wrekin and the Ercall.

Solway Coast (41 sq. miles).—A stretch of beautiful coastline in Cumbria from above Maryport to the estuaries of the Rivers Eden and Esk (with Silloth omitted) backed by the Solway Plain and noted for its historic and scientific interests.

Suffolk Coast and Heaths (151 sq. miles).—Takes in 38 miles of coastline and parts of the Stour and Orwell estuaries, while the Deben, Alde and Blyth flow through it. With heath, woodland, marsh and beaches, the scenery is attractively varied and the area important to ornithologists.

Surrey Hills (160 sq. miles).—The Hog's Back and the ridge of the North Downs from Guildford to Titsey in the east are within this area, as are Leith Hill, Hindhead Common, the Devil's Punch Bowl; the well-known villages of Abinger, Shere, Hambledon and Chiddingfold; Box Hill and Frensham Ponds.

Sussex Downs (379 sq. miles).—The area includes the chalk escarpment of the South Downs from Beachy Head to the West Sussex/Hampshire border, with such well-known features as Fittle Beacon and Chantonbury Ring, and stretches down to the coast between Eastbourne and Seaford. In the west the boundary adjoins the East Hampshire and Surrey Hills areas.

North Wessex Downs (671 sq. miles).—An upland area in Hampshire, Wiltshire, Oxfordshire and Berkshire, bounded by the Marlborough and Lambourn Downs in the west and the Chiltern Hills in the east. To the south of the downs the area is intersected by the Kennet Valley, the Vale of Pewsey and Enbourne Vale, with Savernake Forest in the midst. The southern section comprises the North Downs where they descend to the Test Valley which, together with Salisbury Plain, form the southern limit of what is so far the largest area designated.

Isle of Wight (73 sq. miles).—A number of separate areas comprising unspoiled stretches of coastline, the Yar Valley, the high downland behind Ventnor and the fine chalk downland ridge east of Newport to Culver Cliff and Foreland.

Wye Valley (125 sq. miles).—This area lies within the counties of Gwent, Gloucestershire and Hereford and Worcester. The lower Wye Valley landscape is characterised by its steeply-wooded slopes, cliffs and gorges where the river has cut through limestone outcrops. Further north the valley is broader and the river meanders through pleasant pastureland. Tintern Abbey and the well-known viewpoint from Symonds Yat are within this beautiful area. The flora include many rare species.

THE KINGDOM OF ENGLAND

Position and Extent.—The Kingdom of England occupies the southern position of the island of Great Britain and lies between $55^{\circ} 46'$ and $49^{\circ} 57' 30''$ N. latitude (from the mouth of the Tweed to the Lizard), and between $1^{\circ} 46'$ E. and $5^{\circ} 43'$ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the West by the Atlantic Ocean, Wales and the Irish Sea. It has a total area of 50,333 sq. miles (land 50,053; inland water 280) and a population (1971 Census) of 46,029,000.

Relief.—There is a natural orographic division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the *Cheviot Hills* run from east to west, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N. by W. to S. by E., with its highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the *Cumbrian Mountains*, which contain in *Scafell Pike* (3,210 feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being *Urre Moor* (1,489 feet). South of the Pennines are the *Peak of Derbyshire* (2,088 feet) and *Dartmoor* (High Willhays, 2,039 feet). In the western county of Salop are the isolated *Wrekin* (1,335 feet), *Longmynd* (1,666 feet), and *Brown Clee* (1,792 feet); in Hereford the *Black Mountain* (2,310 feet); in Worcester the *Malvern Hills* (1,395 feet); the Cotswold Hills of Gloucestershire contain *Cleeve Clod* (about 1,100 feet).

Hydrography.—The *Thames* is the longest and most important river of England, with a total length of 210 miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (69 miles from its mouth) and forms county boundaries almost throughout its course; on its banks are situated London, the capital of the British Commonwealth; Windsor Castle, the home of the Sovereign, Eton College, the first of the public schools, and Oxford, the oldest university in the kingdom. The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of *Plinlimmon* (Wales) and entering England in Salop with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the *Vrynwy*, *Tern*, *Stour*, *Teme* and *Upper* (or *Warwickshire*) *Avon*. The *Severn* is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as *Tewkesbury* (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the *Severn* is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the *Gloucester and Berkeley Ship Canal* (16½ miles), which admits vessels of 350 tons to Gloucester. The *Severn Tunnel*, begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, is 4 miles 628 yards in length of which 2½ miles are under the river). A road bridge over the *Severn* estuary, between *Haysgate*,

and *Almondsbury*, Glos., with a centre span of 3,240 ft. was opened by Her Majesty the Queen on September 8, 1966. Of the remaining English rivers those flowing into the North Sea are the *Tyne*, *Wear*, *Tees*, *Ouse* and *Trent* from the *Pennine Range*, the *Great Ouse* (160 miles) from the *Central Plain*, and the *Orwell* and *Stour* from the hills of *East Anglia*. Flowing into the *English Channel* are the *Sussex Ouse* from the *Weald*, the *Itchen* from the *Hampshire Hills*, and the *Axe*, *Teign*, *Dart*, *Tamar* and *Exe* from the *Devonian Hills*; and flowing into the *Irish Sea* are the *Mersey*, *Ribble* and *Eden* from the western slopes of the *Pennines* and the *Derwent* from the *Cumbrian Mountains*. The *English Lakes* are noteworthy rather for their picturesque scenery and poetic associations than for their size. They lie in *Cumbria*, the largest being *Windermere* (10 miles long), *Ullswater* and *Derwentwater*.

Islands.—The *Isle of Wight* is separated from *Hampshire* by the *Solent*; total area 147 sq. miles, population (estimated 1975) 112,000. The climate is mild and healthy, and many watering places have grown up during the last century. *Capital*, *Newport*, at the head of the estuary of the *Medina*, *Cowes* (at the mouth) being the chief port; other centres are *Ryde*, *Sandown*, *Shanklin*, *Ventnor*, *Freshwater*, *Yarmouth*, *Totland Bay*, *Seaview* and *Bembridge*. The *Scilly Islands*, 25 miles from *Land's End*, consist of about 40 islands, with a total area of about 4,000 acres, only *St. Mary's*, *Tresco*, *St. Martin's*, *St. Agnes* and *Bryher* being inhabited (population, 1971, 2,428). The capital is *Hugh Town*, in *St. Mary's*. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. *Lundy* (= *Island*) 11 miles N.W. of *Hartland Point*, *Devon*, is about 2 miles long and about ½ mile broad (average), with a total area of about 1,050 acres (mainly picturesque), and a population of about 20; it became the property of the *National Trust* in 1966 and has 3 lighthouses (one disused).

Climate.—The mean annual air temperature reduced to sea-level varies from 11°C . in the extreme south-west to 9°C . near *Berwick-on-Tweed*. In January the south and west are warmer than the east, the mean temperature reduced to sea-level being less than 4.5°C . over the eastern half of the country. In July the warmest districts are more definitely in the south and inland, the range being from 17°C . around *London* to less than 5.9°C . in the extreme north. The decrease of mean temperature with height is about 0.6°C . per 100 metres. The coldest month of the year is January and the warmest July. Sea temperature reaches its maximum rather later than air temperature. The average annual rainfall decreases from west to east, owing to the preponderance of south-west winds, and also increases with altitude. The annual average, 1916-1950, varies from 20 in. (500 mm.) in the neighbourhood of the *Thames Estuary* and locally in *Cambridgeshire* to more than 100 in. (2,500 mm.) over the mountains of the *Lake District*. Rather more rain falls in the summer half-year in parts of the east, but in the west much more falls in the winter half-year. The months of least rain are *March* to *June* and the wettest months *October* to *January*. The mean annual number of hours of bright sunshine varies from 1,750 hours along the south-east coast to less than 1,300 hours in the neighbourhood of the *Pennine Range*. June is the sunniest month followed by *May*, *July* and *August* in that order.

EARLY INHABITANTS

Prehistoric Man.—Palæolithic and Neolithic remains are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (10 miles N. of Salisbury, Wiltshire) which consists of two circles of menhirs (the largest monolith being 22½ feet in height). The village of *Avebury* and its surroundings were scheduled in 1937, and in 1943 about 1,000 acres of Avebury were purchased by the National Trust, thus preserving the Circle of megalithic monuments, the Avenue, Silbury Hill, etc., relics of Stone Age culture of 1900-1800 B.C., which make this one of the most important archaeological sites in Europe. The *Devil's Arrows*, near Boroughbridge, Yorkshire, are regarded as the finest remaining megalithic monoliths in northern Europe; the tallest arrow is 30 ft. 6 in. high and its greatest circumference is 16 ft. In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age other Celtic races of *Brythons* and *Belgae*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C. The Emperor Claudius, nearly 100 years later (A.D. 42), dispatched Aulus Plautius, with a well-equipped force of 40,000, and himself followed with reinforcements in the same year.

The British leader from A.D. 48-51 was *Caratacus* (Caractacus), who was finally captured and sent to Rome. By A.D. 70 the conquest of South Britain was completed, a great revolt under *Boadicea*, Queen of the Iceni, being crushed in A.D. 61. In A.D. 122, the Emperor Hadrian visited Britain and built a continuous rampart, since known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway). The work was entrusted by the Emperor Hadrian to Aulus Platorius Nepos, legate of Britain from 122 to 126, and it is now regarded as "the greatest and most impressive relic of the Roman frontier system in Europe."

The Romans administered Britain as a Province under a Governor, with a well-defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. Well-preserved Roman towns have been uncovered at (or near) *Silchester* (Calleva Atrebatum), 10 miles south of Reading, *Wroxeter* (Viroconium), near Shrewsbury, and *St. Albans* (Verulamium) in Hertfordshire.

Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties.

Christianity reached the Roman province of Britain from Gaul in the 3rd century (or possibly earlier), *Alban*, "the protomartyr of Britain,"

being put to death as a Christian during the persecution of Diocletian (June 22, 303), at his native town Verulamium. The Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attended the Council of Arles in 314.

The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern areas. A system of coast defence was organized from the Wash to Southampton Water, with forts at Brancaster, Burgh Castle (Yarmouth), Walton (Felixstowe), Bradwell, Reculver, Richborough, Dover, Stutfall, Pevensey and Porchester (Portsmouth). About A.D. 350 incursions in the north of Irish (Scott) and Picts became most formidable, and towards the end of the 4th century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders and Britain was cut off from Rome. The last Roman garrison was withdrawn from Britain in A.D. 442 and the S.E. portion was conquered by the Saxons.

The Latin-speaking Celts of England were replaced by their heathen and Teutonic conquerors, to the submergence of the Christian religion and the loss of Latin speech. According to legend, the British King *Vortigern* called in the Saxons to defend him against the Picts, the Saxon chieftains being *Hengist* and *Horsa*, who landed at Ebbsfleet, Kent, and established themselves in the Isle of Thanet. Bede, a Northumbrian monk, author of the *Ecclesiastical History* at the opening of the 8th century, described these settlers as Jutes, and there are traces of differences in Kentish customs from those of other Anglo-Saxon kingdoms.

Anglo-Saxons and Normans.—What happened in Britain during the 150 years which elapsed between the final break with Rome and the coming of St. Augustine is shrouded in the deepest mystery. The Jutes, the Saxons and the Angles (whose gods *Twi*, *Woden*, *Thunor* and *Frigg* are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and England appears to have been again converted by the end of the 7th century. In the 8th century *Offa*, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh.

The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871-899), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating (at Stamford Bridge, Yorkshire, Sept. 25) an invading army under Harald Hadrada, King of Norway (aided by the outlawed Earl Tostig, of Northumbria, younger son of Earl Godwin), he was himself defeated at the *Battle of Hastings* on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy.

Lords Lieutenant of Counties.—The actual words used in the Letters Patent relative to these appointments are "Her Majesty's Lieutenant of and in the County of . . ." and this is the official title whether the individual appointed be a Peer or a Commoner. In documents of the highest formality the proper term is therefore "Her Majesty's Lieutenant." In less formal and informal documents and colloquially, the style "Lord Lieutenant" has been applied to H.M. Lieutenants, Peers and Commoners alike, for a great many years. The duties of the Lord Lieutenant are to advise the Lord Chancellor as to the appointment of magistrates to the county bench, to appoint Deputy Lieutenants and to raise the militia, if need be, in time of riot or invasion. The Lord Lieutenant is often a peer or a baronet and a large landowner and is often appointed *custos rotulorum* (keeper of the records).

GREATER LONDON COUNCIL

The Greater London Council and 32 London Borough Councils were constituted under the London Government Act, 1963. They replaced, on April 1, 1965, the London County Council, the Middlesex County Council, the County Borough Councils of Croydon, East Ham and West Ham, 28 metropolitan borough, 39 non-county borough and 15 urban district councils. The boundaries and constitution of the Corporation of the City of London were not affected.

Under the Act, Greater London became for the first time a clearly defined local government area including, in addition to the former counties of London and the greater part of Middlesex, parts of Metropolitan Essex, Kent, Surrey and Hertfordshire.

The Greater London Council at present consists

Greater London Council
(Elected April 12, 1973)

Greater London comprises an area of 610 sq. miles and has a population of 7,111,500 (1975 mid-year estimates).

of 92 councillors and 15 aldermen. Councillors are elected for single-member electoral divisions which are coterminous with the parliamentary constituencies. Councillors hold office for four years. Aldermen are elected by the councillors from among councillors or persons eligible to be councillors. The Local Government Act 1972 provides for the abolition of the position of alderman at the end of the current term of office. The Chairman, Vice-Chairman and Deputy Chairman are elected annually by the councillors and aldermen. The political head of the administration is the Leader of the Council, elected by the majority party. The Council meets at three-weekly intervals at 2.30 p.m. on Tuesdays except in holiday periods. Most committees and sub-committees meet at three-weekly intervals.

Director-General and Clerk to the Council, Sir James Swaffield, C.B.E., R.D.

G.L.C. Services

The services provided by the G.L.C. include planning, roads, traffic management and control, fire services, refuse disposal, housing, parks and licensing. For certain services it shares responsibility with the London Borough Councils and the City Corporation.

Education.—The local education authority for an area corresponding with the area of the twelve inner London boroughs and the City of London is the Inner London Education Authority, a special committee of the G.L.C. consisting of the members of the Council elected for the inner London boroughs together with a representative of each inner London Borough Council and of the Common Council. The Council charges to the rating authorities in the Inner London Education Area the expenditure of the I.L.E.A., the amount being determined by the Authority. This unique arrangement preserves the continuity of the service which has developed since 1870 as a unity without regard to local boundary divisions.

The total number of pupils on the rolls of the Authority's nursery, primary and secondary schools (including special schools for handicapped children) is 412,241. There are 41 nursery, 716 county (including 1 at Children's homes), 342 voluntary and 119 special schools, staffed by the equivalent of 24,284 full-time teachers. Vocational instruction, cultural studies and recreational activities for persons over compulsory school age are arranged at the various establishments for further education. The Authority maintains 24 colleges and makes grants to 5 polytechnics and 8 other institutions. Non-vocational classes are offered at 31 evening and literary institutes, 1 recreational institute and 77 youth centres, including 2 drama centres. Nine colleges for the training of teachers are also managed by the Authority. The 20 outer London Borough Councils are the education authorities for their Boroughs.

Housing.—The Council shares with the London Borough Councils responsibility for housing in London and it accommodates about 14,000 families a year, 2,500 of them in expanding towns many miles from London. The G.L.C. has about 200,000 homes, nearly 50,000 homes having been transferred to the London Borough Councils since 1971.

Planning and Transportation.—The Council as planning authority for Greater London as a whole has prepared a strategic development plan which lays down basic planning policies and principles for the whole area. The Greater London Development Plan has recently been modified by the Secretary of State for the Environment in the light of findings of a Public Inquiry. The Secretary of State is now considering objections to the modified plan. Since the submission of the original plan, the Transport (London) Act, 1969, has given the G.L.C. responsibility for preparing more detailed transport plans, and, through a London Transport Executive appointed by the Council, for London Transport

policies and finance. It is thus now able to consider and co-ordinate priorities for investment in all forms of transport in London.

Within the framework of the Development plan, the London Borough Councils and the City Corporation will prepare their own detailed local development plans. Town planning control of private development proposals is mainly the concern of the London Boroughs but the G.L.C. has some responsibilities in this field. As planner and developer the Council is involved in many major schemes. Notable examples are the Thamesmead project and the Covent Garden area.

The Council is responsible for the construction, improvement and maintenance of principal roads. As the traffic authority for all roads in Greater London it prepares or approves schemes for one-way working, traffic signals, clearways, bus-only lanes, waiting and loading restrictions and speed limits and makes the orders which enforce them. It maintains the Thames tunnels, the Woolwich Free Ferry, and all but four of the Thames bridges (London, Tower, Blackfriars and Southwark, which are maintained by the Corporation of London).

The Transport (London) Act, 1969, gives the Council the primary responsibility for overall transport planning, including the fullest possible integration of all forms of public transport, traffic measures and the development of the most important roads, in close association with land use planning.

Expanding towns.—One aspect of the Council's policy is the provision of homes for people in housing need from London, willing to move to jobs in towns expanding under agreements with the G.L.C. made under the Town Development Act 1952. The Council has such agreements with over 20 towns.

Parks.—The Council maintains some 5,500 acres of parks and open spaces. The London Borough Councils and the City Corporation between them provide a further 26,500 acres. Up to 1,000 open-air entertainments are arranged in G.L.C. parks each summer and almost all games and sports are provided for. At Crystal Palace, in addition to the Council's 70 acre park is the Crystal Palace National Sports Centre, owned by the Council and managed by the Sports Council.

Other features of the G.L.C.'s administration include its responsibility for the Royal Festival Hall, Queen Elizabeth Hall and Purcell Room and the Hayward Gallery; the maintenance of the Iveagh Bequest, Kenwood, several other buildings of historic interest and two museums. The Greater London Record Office and Library house official records and other manuscripts, books, maps, drawings and photographs relating to London and are open to the public for reference purposes. The Research and Intelligence unit is concerned with information and research on any matters concerning

Greater London. The results of its work will be available to government departments, local authorities and the public.

Refuse disposal.—The Council is responsible for the disposal of refuse throughout Greater London—almost 3,000,000 tons being handled each year. It operates twenty-five transfer stations (where refuse is transferred into bulk road vehicles or barges) and five incinerators. Refuse is used for infilling at some twenty land reclamation sites. The Boroughs continue to be responsible for refuse collection. Well over 18,000 old vehicles and more than 150,000 tons of bulky household refuse (the latter deposited direct by members of the public but included in the total of 3,000,000 tons) are also dealt with as a means of improving the environment under the Civic Amenities Act, 1967.

Land Drainage and Flood Prevention.—The G.L.C. and the Borough Councils exercise land drainage functions on certain watercourses within a 400 sq. mile area in and adjoining Greater London known as the London Excluded Area. The G.L.C. undertakes flood prevention works and maintains unobstructed flows in main metropolitan watercourses including the Ravensbourne, Beverley Brook, Wandle, Crane and Brent rivers. The Council also has flood prevention functions along some 120 miles of riverbank of the Thames and its tidal tributaries. Work has started, and will continue over the next four years, on the construction of a barrier across the Thames at Silvertown which, with associated bank raising schemes, will provide flood protection against surge tides.

Licensing.—The Council is the licensing authority in Greater London for certain places of entertainment, greyhound race tracks and petroleum installations and, as agent for the Department of the

Environment, licenses motor vehicles and drivers.

Fire Services.—The Council runs the fire service for its whole area.

The London Fire Brigade set up on April 1, 1965, under the London Government Act, 1963, consists of the Brigades of the former counties of London and Middlesex (excluding the districts of Staines, Sunbury and Potters Bar), the former county boroughs of East Ham, West Ham and Croydon and of parts of Essex, Herts., Kent and Surrey. Headquarters, 8 Albert Embankment, S.E.1.

The Brigade has 114 land and 2 river stations. Wholtime authorized establishment, 6,658. There are 578 fire-fighting appliance vehicles and three fire boats in commission. In 1975, there were 93,542 calls to fires and other emergencies.

Acting Chief Officer and Deputy Chief Officer, D. R. Burrell, Q.F.S.M.

Finance.—The gross revenue expenditure of the G.L.C. (excluding London Transport) in 1976–77 is estimated in the annual budget at over £693,100,000 and that of the I.L.E.A. £453,400,000, making a total of £1,146,500,000; of this total about 60 per cent. (£695,100,000) will be met from rates, about 28 per cent. (£321,600,000) from income from rents, services, etc., and the balance of about 12 per cent. (£129,800,000) from central Government grants. The amount levied by the G.L.C. in rate precepts varies for different London Borough Councils according to the services provided.

Gross capital expenditure of the G.L.C. and the I.L.E.A., approved in the annual budget and mainly met by borrowing, amounts to about £375,000,000. Capital expenditure on housing and loans for house purchase accounts for over two-thirds of the total.

THE CORPORATION OF LONDON

The City of London is the historic centre at the heart of London known as "the square mile" around which the vast metropolis has grown over the centuries. The City's population is 4,232 (1971 Census, preliminary). The civic government is carried on by the Corporation of London through the Court of Common Council, a body consisting of the Lord Mayor, 25 other Aldermen and 150 Common Councilmen. The legal title of the Corporation is "the Mayor and Commonalty and Citizens of the City of London."

The City is the financial and business centre of London and includes the head offices of the principal banks, insurance companies and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall and the 15th century Guildhall, to the massive splendour of St. Paul's Cathedral and the architectural beauty of Wren's spires.

The City of London was described by Tacitus in A.D. 62 as "a busy emporium for trade and traders". Under the Romans it became an important administration centre and hub of the road system. Little is known of London in Saxon times when it formed part of the kingdom of the East Saxons. In 886 Alfred recovered London from the Danes and reconstituted it a burgh under his son-in-law. In 1066 the citizens submitted to William the Conqueror who in 1067 granted them a charter, which is still preserved, establishing them in the rights and privileges they had hitherto enjoyed. The mayoralty was established on the recognition of the corporate unity of the citizens by Prince John in 1191, the first Mayor being Henry Fitz Ailwyn who filled the office for 21 years and was succeeded by Fitz Alan (1212–15). A new charter was granted by King John in 1215, directing the Mayor to be

chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398, 1406, 1419); and many modern cases have occurred. The earliest instance of the phrase "Lord Mayor" in English is in 1474. It is used more generally in the latter part of the 15th century and becomes invariable from 1535 onwards. At Michaelmas the Liverymen in Common Hall choose two Aldermen who have served the office of Sheriff for presentation to the Court of Aldermen, and one is chosen to be Lord Mayor for the ensuing mayoral year. The Lord Mayor is presented to the Lord Chief Justice at the Royal Courts of Justice on the second Saturday in November to make the final declaration of office, having been sworn in at Guildhall on the preceding day. The procession to the Royal Courts of Justice is popularly known as the *Lord Mayor's Show*.

Aldermen are mentioned in the 11th century and their office is of Saxon origin. They were elected annually between 1377 and 1394, when a charter of Richard II directed them to be chosen for life. The *Common Council*, elected annually on December 17, was, at an early date, substituted for a popular assembly called the *Folkemote*. At first only two representatives were sent from each ward, but the number has since been greatly increased.

Sheriffs were Saxon officers: their predecessors were the *wic-reeves* and *portreeves* of London and Middlesex. At first they were officers of the Crown, and were named by the Barons of the Exchequer; but Henry I (in 1132) gave the citizens permission to choose their own Sheriffs, and the annual election of Sheriffs became fully operative

under King John's charter of 1199. The citizens lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888; but the Liverymen continue, as heretofore, to choose two Sheriffs of the City of London, who are appointed on Midsummer Day, and take office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The office of Chamberlain is an ancient one, the first contemporary record of which is 1276. The Town Clerk (or Common Clerk) is mentioned in 1274 and the Common Serjeant in 1291.

Activities.—The work is assigned to a number of committees which present reports to the Court of Common Council. These Committees are:—City Lands and Bridge House Estates, Coal, Corn and Rates Finance, Planning and Communications, Central Markets, Billingsgate and Leadenhall Markets, Spitalfields Market, Police, Port and City of

London Health, Library (Library, Records, Art Gallery and Museum), Schools, Music (Guildhall School of Music and Drama), General Purposes, Establishment, Housing, Gresham (City side), Epping Forest and Open Spaces, West Ham Park, Policy and Parliamentary, Privileges, Social Services, Guildhall Reconstruction, Barbican and Central Criminal Court (Extension).

The Honourable the *Irish Society*, which manages the Corporation's Estates in Ulster, consists of a Governor and 5 other Aldermen, the Recorder, and 19 Common Councilmen, of whom one is elected Deputy Governor.

The *City's Estate*, in the possession of which the Corporation of London differs from other municipalities, is managed by the City Lands and Bridge House Estates Committee, the Chairmanship of which carries with it the title of "Chief Commoner."

The Right Honourable the Lord Mayor 1975–1976*

Deputies.—In the preceding list each Common Councilman so described serves as *Deputy* to the Alderman of his Ward.

THE CITY GUILDS (LIVERY COMPANIES)

The Livery Companies of the City of London derive their name from the assumption of a distinctive dress or livery by their members in the 14th century.

The order of precedence (according to 2nd Report of Municipal Corporations' Commissioners, 1837), omitting extinct companies, is given in parentheses after the name of each Company. There are 84 Guilds in existence.

About 10,000 Liverymen of the Guilds are entitled to vote at elections in *Common Hall*.

Public and Private Buildings in London

ADELPHI, Strand, W.C.2.—Adelphi Terrace and district commemorate the four architect brothers, James, John, Robert and William ADAM, who laid out the district (formerly Durham House) at the close of the 18th century. Four of the streets in the Adelphi were formerly called James, John, Robert, and William Streets to commemorate these founders of the Adam style of architecture and internal decoration. They are now Adam Street, John Adam Street, Robert Street and Durham House Street. Extensive rebuilding took place between the two World Wars, and there are now few 18th-century houses left in the district. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens), the commemorative streets being *Charles Street, Villiers Street, Duke Street, Of Lane, Buckingham Street* (Of Lane is now "York Buildings").

AUSTRALIA HOUSE, Strand, W.C.2.—A handsome and imposing building, erected 1911-14 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. NEW SOUTH WALES, QUEENSLAND, VICTORIA and WESTERN AUSTRALIA have separate offices in the Strand; TASMANIA at Golden Cross House, Charing Cross, and SOUTH AUSTRALIA at S.A. House, 50 Strand, W.C.2.

BALTIC EXCHANGE, St. Mary Axe, E.C.3.—The world market for the chartering of cargo ships. The present Exchange was built in 1903 and the new wing opened by Her Majesty the Queen on Nov. 21, 1956.

BANK OF ENGLAND, Threadneedle Street, E.C.2. (Not open to sightseers)—The Bank of England, founded in 1694, has always been closely connected with the Government. The present building, completed in 1940 to the designs of Sir Herbert Baker, incorporates features reminiscent of the earlier architects, Sampson (1734), Sir Robert Taylor (1765) and Sir John Soane (1788).

BRIDGES.—The bridges over the Thames (from East to West) are the *Tower Bridge* (built by the Corporation of London and opened in 1894), with its bascules, operated now by new electrically-run machinery; *London Bridge* (opened after rebuilding in 1831 by Rennie; the new London Bridge was completed in 1973 and opened by Her Majesty the Queen on March 16, 1973; *Southwark Bridge* (opened in 1819, also by Rennie; rebuilt by the Corporation of London, 1922); *Blackfriars Bridge* (opened in 1769, rebuilt, 1869, and widened by the Corporation of London in 1909); *Waterloo Bridge* (Rennie), opened in 1817, commanding a fine view of western London, rebuilt by L.C.C. and re-opened 1944; *Hungerford Bridge*, 1863 (railway bridge with a footbridge); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet; rebuilt and re-opened in 1862; width, 84 ft.) with Thomas Thornycroft's *Boadicea* at the north-eastern end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall and St. Thomas's Hospital; *Lambeth Bridge* (built 1862, rebuilt 1932) leading from Lambeth Palace to Millbank; *Vauxhall Bridge* (built in 1811-16, rebuilt in 1906), leading to Kennington Oval; *Chelsea Bridge*, leading from Chelsea Hospital to Battersea Park (reconstructed and widened; 1937) and *Albert Bridge* (1873); *Battersea Bridge* (opened in 1890); *Wandsworth Bridge* (opened in 1873; rebuilt and re-opened in 1940); *Putney Bridge* (built 1729, rebuilt 1884, widened in 1933, where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammersmith Bridge* (rebuilt

1887); *Barnes Bridge* (for pedestrians only, 1933); *Chiswick Bridge* (opened in 1933); *King Edward VII Bridge, Kew* (rebuilt in 1902, opened 1903, leading to the Royal Botanic Gardens, Kew; *Twickenham Lock Bridge; Twickenham Bridge* (opened 1933); *Richmond Bridge* (opened in 1777); *Kingston Bridge* (built 1828 and widened 1914) and *Hampton Court Bridge* (rebuilt, 1933).

BUCKINGHAM PALACE, St. James's Park, S.W.1. (Not open to the public).—Was purchased by King George III in 1762 from the heir of the Duke of Buckingham, and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Re-fronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

The Queen's Gallery, containing a changing selection of the finest pictures and works of art from all parts of the royal collection, was opened to the public on July 25, 1962. Open: Tues.-Sat., and Bank Holidays 11-5 p.m.; Sundays, 2-5 p.m. Admission 30p; *Children, Students, OAPs* 10p, entering from Buckingham Palace Road.

The Royal Mews is open to visitors on Wednesdays and Thursdays throughout the year (except in Ascot Week), 2-4 p.m. The following charges, the net proceeds of which are devoted to charities, are payable on admission: *Adults*, 15p; *Children*, 5p.

CANADA HOUSE, Trafalgar Square, S.W.1.—A conspicuous building on the Western side of the Square, housing the Office of the High Commissioner for Canada in the United Kingdom. Designed by Sir Robert Smirke and built in 1824-7, it was renovated and embellished when acquired from the Union Club in 1924. Further major alterations have been completed to incorporate the former Royal College of Physicians building, also designed by Sir Robert Smirke, which was acquired in 1964. The renovated building was re-opened in March, 1967. The exteriors of the two buildings were originally designed to create the appearance of a single building by presenting a common façade facing Trafalgar Square. Certain interior features of the original building are preserved and the spacious, richly furnished room now occupied by the High Commissioner is much admired. Surrounded by Offices of Canadian Banks, Steamship, Railway and other Companies, the Canadian Building is one of London's landmarks. It was opened by King George V. in June, 1925.

CANONBURY TOWER, Canonbury, N.1.—The largest remaining part of a 16th-century house originally built by the Priors of St. Bartholomew, and since 1952 used as the headquarters of a non-professional theatre company. Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen nearby.

CARLYLE'S HOUSE, 24 Cheyne Row, Chelsea, S.W.3. The home of Thomas Carlyle for 47 years until his death in 1881, and containing much of his furniture, etc. Now the property of the National Trust. Open daily, except Mondays and Tuesdays, 11-1, 2-6, or dusk, if earlier. Sundays, 2-6. Closed New Year's Day, Good Friday and all December. Admission 25p; *Children and Students* 12p.

CATHOLIC CENTRAL LIBRARY, St. Francis Friary, 47 Francis Street, S.W.1.—Founded as a private library in 1914, it was taken over in 1959 by the Franciscan Friars of the Atonement. It is an up-to-date lending and research library of over 50,000 volumes, 120 periodicals, for the general reader, student and ecumenist. Books are sent by post

when required. Hours of opening: Mon.-Fri. 10.30-6.30; Sat. 10.30-4.30.

CEMETERIES.—In *Kensal Green Cemetery*, North Kensington, W.10 (70 acres), are tombs of W. M. Thackeray, Anthony Trollope, Sydney Smith, Shirley Brooks, Wilkie Collins, Tom Hood, W. Mulready, George Cruikshank, John Leech, Leigh Hunt, Brunel ("Great Eastern"), Ross (Arctic), Charles Kemble and Charles Mathews (Actors). In *Highgate Cemetery*, N.6, are the tombs of George Eliot, Herbert Spencer, Michael Faraday, Karl Marx and G. J. Holyoake. In *Abney Park Cemetery*, Stoke Newington, N.16, are the tomb of General Booth, founder of the Salvation Army, and memorials to many Nonconformist Divines. In the *South Metropolitan Cemetery*, Norwood, S.E.27, are the tombs of C. H. Spurgeon, Lord Alverstone, Douglas Jerrold, John Belcher, R.A., Theodore Watts-Dunton, Dr. Moffat (Missionary), Sir H. Bessemer, Sir H. Maxim, Sir J. Barnby, Sir A. Manns and J. Whitaker, F.R.S. (*Whitaker's Almanack*). In the churchyard of the former *Marylebone Chapel* are buried Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician). The chapel itself was demolished in 1949. **CREMATORIA.**—*Ilford* (City of London); *Norwood*; *Hendon*; *Streatham Park*; *Finchley* (St. Marylebone) and *Golders Green* (12 acres), near Hampstead Heath, with "Garden of Rest" and memorials to famous men and women.

CENOTAPH. Whitehall, S.W.1.—(Literally "empty tomb"). Monument erected "To the Glorious Dead", as a memorial to all ranks of the Sea, Land and Air Forces who gave their lives in the service of the Empire during the First World War. Designed by Sir Edwin Lutyens. Erected as a temporary memorial in 1919 and replaced by a permanent structure in 1920. Unveiled by King George V on Armistice Day, 1920. An additional inscription was added after the 1939-45 War, to commemorate those who gave their lives in that conflict.

CHARTERHOUSE. The Hospital of King James, Sutton's Hospital, Charterhouse Square, E.C.1 (Master, O. Van Oss; Registrar and Clerk to the Governors, J. C. Moss), a Carthusian monastery until 1537, when it came into the possession first of Sir Edward (later the first Lord) North; and was eventually sold by the second Lord North to the former Duke of Norfolk, who renamed it "Howard House". After his execution, following the Ridolfi Plot, hatched at Charterhouse, in due time the Crown restored the Lord Thomas Howard, later the Earl of Suffolk, and it was purchased from him in 1611 by Thomas Sutton as a hospital for aged "Brothers" and a School (removed to Godalming in 1872). The buildings are partly 14th (but mainly 16th) century. They suffered much damage during the 1939-45 War but are now restored and can accommodate nearly 40 "Brothers". Visitors can be shown round at 2.45 p.m. on Wednesday during the months of April to July inclusive, except the Wednesdays immediately after Easter and Spring Holiday. (Charge for admission, 30p per person.) Roger Williams, the founder and governor of Rhode Island, U.S.A., was elected a scholar of the Foundation on June 25, 1621. Among many famous Carthusians are John Wesley; the poets Crashaw and Lovelace; Addison and Steele; Sir William Blackstone and Thackeray, who described "Greyfriars School" (Charterhouse) in "The New-comers"; Baden-Powell and Vaughan Williams.

CHELSEA PHYSIC GARDEN. Royal Hospital Road, S.W.3.—A garden of general botanical research, established in latter part of 17th century by the Society of Apothecaries, occupies site presented in

1722 by Sir Hans Sloane. Transferred in 1899 to the Trustees of the London Parochial Charities. Applications for tickets of admission to the Clerk to the Trustees, 10 Fleet Street, E.C.4:—*Bona fide* students and teachers on any weekday. Unqualified persons limited to two special Open Days a year. 1977, May 5 and September 17.

CHELSEA ROYAL HOSPITAL (founded by Charles II, in 1682, and built by Wren; opened in 1692), Royal Hospital Road, Chelsea, S.W.3, for old and disabled soldiers. Great Hall and Chapel open daily 10 to 12 and 2 to 4 (Museum 10 to 12 and 2 to 5) and on Sunday afternoons. The extensive grounds include the former Ranelagh Gardens. Governor, General Sir Antony Read G.C.B., C.B.E., D.S.O., M.C.; *Lieut-Governor and Secretary*, Major-General P. R. C. Hobart C.B., D.S.O., O.B.E., M.C.

CITY BUSINESS LIBRARY (Corporation of London), 55 Basinghall Street, E.C.2. Open Mon.-Fri. 9.30-5.30.

COLLEGE OF ARMS OR HERALDS' COLLEGE, Queen Victoria Street, E.C.4.—Her Majesty's Officers of Arms (Kings, Heralds and Pursuivants of Arms) were first incorporated by Richard III, and granted Derby House on the site of the present College building by Philip and Mary. The building now in use dates from 1671-88. The powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to State ceremonial are largely exercised through the College, which is the official repository of English coats of arms and pedigrees. Enquiry may be made to the Officer on duty in the Public Office, Mon.-Fri. between 10 a.m. and 4 p.m.

COMMONWEALTH INSTITUTE, Kensington High Street, W.8.—A permanent exhibition opened on Nov. 6, 1962, by Her Majesty the Queen, replacing the former Imperial Institute opened in 1893 in S. Kensington. An interesting feature of the building is its paraboloid copper-sheathed roof. The Institute contains, in 60,000 square feet arranged in 3 galleries, a visual representation of the history and geography of the Commonwealth countries and dependencies: on the ground floor, exhibits of Canada, Australia, New Zealand, India, Sri Lanka and Bangladesh and the smaller island territories in the southern hemisphere; on the middle gallery, the African territories; and on the upper gallery, the other countries of the Commonwealth. Art gallery; Cinema, showing documentary films daily.

Open, week-days, 10-5.30; Sundays, 2.30-6. Admission free, Closed Good Friday, Christmas Eve, Christmas Day, Boxing Day and New Year's Day.

COUNTY HALL, Westminster Bridge, S.E.1.—The Headquarters of the Greater London Council (see pp. 634-6) built on the Pedlar's Acre, Bishop's Acre, Four Acres and Float Mead, Lambeth, from the designs of Ralph Knott, with a river façade of 750 ft. The main building was completed in 1933. The building of the North and South blocks on a site to the East of the main building started in the early 1930s. They were occupied in 1939 but not finally completed until 1963. The Council, when in session, meets in public in the council chamber at three-weekly intervals on Tuesday afternoons at 2.30 p.m.

CUSTOM HOUSE, Lower Thames Street, E.C.3.—Built 1813-17, with a wide quay on Thames. The Long Room is about 190 ft. long.

DICKENS HOUSE, 48 Doughty Street, W.C.1.—In this house Charles Dickens lived from 1837 to 1839, and here he completed *Pickwick Papers*. It is the headquarters of the Dickens Fellowship and contains many relics of the novelist. It is open to the public daily, 10 to 5 (Sundays and Bank Holi-

days excepted); admission 40p; students, 30p; Children, 15p.

DR. JOHNSON'S HOUSE, Gough Square, Fleet Street, E.C.4.—A tall late 17th-century house in which Samuel Johnson (and his wife) lived between 1748 and 1759. His *Dictionary* was compiled here. The house is furnished with 18th century pieces and there is an excellent collection of Johnsoniana. Open daily (except Sundays and Bank Holidays) from 11 to 5.30 (Winter 5). Admission 20p; Students, 10p.

ELY PLACE, Holborn Circus, E.C.1.—The site of the London house of former Bishops of Ely, Ely Place is a private street (built in 1773) whose affairs are administered by Commissioners under a special Act of Parliament. The 14th-century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk.

FULHAM PALACE, Bishop's Avenue, Fulham, S.W.6.—The courtyard is 16th century, remainder 18th and 19th century. Former residence of the Bishop of London. Grounds of about 9 acres.

GEFFRYE MUSEUM, Kingsland Road, E.2.—Open on Tuesdays to Saturdays 10 to 5, Sundays 2 to 5. Closed on Christmas Day and on Mondays except Bank Holidays. Admission free.

The Museum is housed in a building erected originally as almshouses in 1715. It was eventually purchased by the London County Council and opened as a museum in 1914. The exhibits are shown in a series of period rooms dating from 1600 to 1939, each containing furniture and domestic equipment of a middle-class English home. An 18th century woodworker's shop, an openhearth kitchen and the original chapel are also shown. Temporary exhibitions are held in the Exhibition Hall. There is a reference library of books on furniture, social history and art. Special arrangements for children visiting the Museum in school parties (which must be booked in advance) and in their leisure time. *Curator*, J. Daniels.

GEORGE INN, Southwark.—Near London Bridge Station. Given to National Trust in 1937. Last galleried inn in London, built in 1677. Open during licensed hours.

GUILDHALL, King Street, City, E.C.2.—Scene of civic government for the City for more than a thousand years. Built c. 1411-c. 1440; façade built 1788-9; damaged in the Great Fire, 1666, and by incendiary bombs, 1940. The main hall and crypt (the most extensive mediæval crypt in London) have been restored. Events in Guildhall include the annual election of Lord Mayor, election of Sheriffs, receptions in honour of Sovereigns and Heads of State, and the meetings of the Court of Common Council (see "Corporation of London"). Open free; weekdays, 10-5; Sundays (May to Sept.) 2-5. *Keeper of the Guildhall*, A.J. Marshall.

The Library and Museum of the Clockmakers' Company are housed in new premises, and are open to the public, Mon. to Sat., 10-5. Admission free (entrance in Aldermanbury). The Library contains Plans of London, 1570; Deed of Sale with Shakespeare's signature; first and second, fourth folios of Shakespeare's plays, etc. see also City Business Library).

HONOURABLE ARTILLERY COMPANY'S HEAD-QUARTERS, City Road, E.C.1.—The H.A.C. (Sec. Lt.-Col. P. Massey, M.C.) received its charter of incorporation from Henry VIII in 1537, and has occupied its present ground since 1641. The Armoury House dates from 1735. The present castellated barracks date from 1807. Four of its members who emigrated in the 17th century, founded in 1638 the Ancient and Honourable Artillery Company of Massachusetts. The H.A.C. is the senior regiment of the Territorial Army

Volunteer Reserves, and maintains a Headquarters with an Officer Training Wing, and four squadrons.

HORNIMAN MUSEUM AND LIBRARY, London Road, Forest Hill, S.E.23. Open daily except Christmas Eve and Christmas Day, 10.30 to 6, Sundays 2 to 6. Special arrangements on Boxing Day. Admission free. The Museum was presented in 1901 to the London County Council by the founder, Mr. F. J. Horniman, M.P. The Museum has three main departments, anthropology, musical instruments and natural history. In the anthropology department the large collections include exhibits illustrating man's progress in the arts and crafts from prehistoric times. The natural history department includes an aquarium. Reference library (except Mondays). Schools Service. Free concerts and lectures (autumn to spring). *Curator*, D. M. Boston.

HORSE GUARDS, Whitehall, S.W.1.—Archway and offices built about 1753. The mounting of the guard (Life Guards, or the Blues and Royals) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into *Horse Guards' Parade* (230,000 sq. ft.), where the Colour is "trooped" on the Queen's Official Birthday.

HOUSES OF PARLIAMENT, Westminster, S.W.1.—After its destruction by fire in 1834, the Palace of Westminster was re-built in 1840-68 from the designs of Sir Charles Barry and Augustus Welby Pugin, at a cost of over £2,000,000.—Open (free) to visitors on Saturdays, on Easter Monday and Tuesday, Spring and late summer Bank Holiday Mondays and Tuesdays; Mon., Tues. and Thurs. in August and Thurs. in September, if neither House be sitting. Admission at the Norman Porch. House of Lords, on the above-mentioned days, from 10 a.m. to 4.30 p.m. Closed to visitors on Christmas Day, Boxing Day and Good Friday and the Saturday preceding the State Opening of Parliament. Admission to the Strangers' Gallery of the House of Lords as arranged by a Peer or by queue *via* the St. Stephen's Entrance. Admission to the Strangers' Gallery of the House of Commons, during session by Member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall after the House meets. The present House of Commons was used for the first time on October 26, 1950, the original Chamber having been destroyed by bombs in 1941. The Victoria Tower (House of Lords) is about 330 ft. high, and when Parliament is sitting the Union Jack flies by day from its flag-staff. The Clock Tower of the House of Commons is about 320 ft. high and contains "Big Ben," the Hour Bell, named after Sir Benjamin Hall, First Commissioner of Works when the original bell was cast in 1856. This bell which weighed 16 tons 11 cwt., was found cracked in 1857. The present bell 13½ tons) is a recasting of the original and was first brought into use in July, 1859. A light is displayed from this tower at night when Parliament is sitting.

INNS OF COURT.—The *Inner* and *Middle Temple*, S. of Fleet Street, E.C.4, and N. of Victoria Embankment, to which the gardens extend, have occupied (since early 14th century) the site of the buildings of the Order of Knights Templars. *Inner Temple Hall* (rebuilt in 1955 after bomb damage) is open to the public on Monday-Friday, 10-11.30 a.m. and 2.30-4 p.m., except during Vacations. *Temple Church*, restored in 1958 after severe damage by bombing, is open on weekdays 10-5 p.m. and the public are admitted to Sunday services. *Middle Temple Hall* (1562-70) is open to the public when not in use, Monday-Friday, 10-12 and 3-4.30 p.m.; Saturday, 10-4.30. Closed

1-2 p.m. and Sundays. In Middle Temple Gardens (not open to the public) Shakespeare (Henry VI, Part I) places the incident which led to the "Wars of the Roses" (1455-85). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C.2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. The records show the Society as being in existence in 1422. The Hall and Library Buildings are of 1845, although the Library is first mentioned in 1474, and the old Hall early 16th century, the Chapel was rebuilt c. 1619-23. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Holborn/Gray's Inn Road, W.C.1. Early 14th century. Hall (1556-60); Chapel (largely rebuilt in 1698). (Services 11-15 a.m. during Law Dining Terms only). Holy Communion 1st Sunday in every month except Aug.-Sept. Public welcome. Library (33,000 vols., mss. and printed books) may be viewed by appointment. Gardens open to the public from 12 noon to 2 p.m. (May-July), 9.30 a.m.-5 p.m. (Aug.-Sept.). The Inn, although badly damaged during the last war has been completely restored to its former beauty with gracious red brick buildings overlooking grass covered squares and gardens. Strong Elizabethan associations. No other "Inns" are active, but what remains of *Staple Inn* is worth visiting as a relic of Elizabethan London; though heavy damage was done by a flying-bomb, it retains a picturesque gabled front on Holborn (opposite Gray's Inn Road). *Clement's Inn* (near St. Clement Danes' Church), *Clifford's Inn*, Fleet Street, and *Thavies Inn*, Holborn Circus, are all rebuilt. *Serjeant's Inn*, Fleet Street (damaged by bombing) and another (demolished 1910) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1922.

JEWISH MUSEUM, Woburn House, Upper Woburn Place, W.C.1.—Opened in 1932, the Museum contains a comprehensive collection of Jewish antiquities, liturgical items and "Anglo-Judaica". Open free (Mon.-Thurs.), 2.30-5; (Fri. and Sun.), 10.30-12.45. Closed on Saturdays, Jewish Holy days and Bank Holidays. Conducted tours of parties by arrangement with the Secretary.

KEATS HOUSE, Keats Grove, Hampstead, N.W.3.—In two houses here, now made into one, John Keats lived at various times between 1818 and 1820. Restored 1974-75. Open weekdays, 10 a.m.-6 p.m.; Sundays and Bank Holidays, 2 p.m.-5 p.m. Closed—Christmas Day, Boxing Day, New Year's Day, Good Friday, Easter Eve. The Keats Memorial Library contains over 5,000 volumes.

KENSINGTON PALACE, W.8.—The original house was bought by William III in 1689 and rebuilt by Christopher Wren. The birthplace of Queen Victoria in 1819. The state apartments are open to the public and contain pictures and furniture from the royal collections. A suite of rooms devoted to the memory of Queen Victoria is also shown. *Hours of Opening*: (March 1-Sept. 30) 10 a.m.-6 p.m.; Sundays, 2-6 p.m.; (Feb. and Oct. 10-5; Sundays, 2-5; Jan. Nov. and Dec., 10-4; Sundays, 2-5) *Kensington Gardens* (a.v.) adjoin.

LAMBETH PALACE, S.E.1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Chaplain.

LIVERY COMPANIES' HALLS.—The Principal Companies (see pp. 640-1) have magnificent halls, but admission to view them has generally to be arranged beforehand. Among the finest or more interesting may be mentioned the following:

Goldsmiths' Hall, Foster Lane. The present hall was completed in 1835, and contains some magnificent rooms. Exhibitions of plate have been shown here periodically in recent years. **Fishmongers' Hall**, London Bridge (built 1831-3), now admirably restored after severe bomb damage, also contains fine rooms. **Apothecaries' Hall**, Black Friars Lane, was rebuilt in 1670, after the Great Fire, and has library, hall and kitchen which are good examples of this period, together with a pleasant courtyard. **Vintners' Hall**, Upper Thames Street, was also rebuilt after the Great Fire, and its hall has very fine late 17th century panning. The Watermen and Lightermen's Company is not, strictly speaking, a Livery Company, but its hall, in St. Mary at Hill, is a good example of a smaller 18th century building, with pilastered façade. It was completed in 1780. **Stationers' Hall**, in Stationers' Hall Court, behind Ludgate Hill, another post-Fire Hall, standing in its own court, has a particularly finely carved screen; its façade dates from 1800. **Barbers' Hall**, Monkwell Street, with a Hall attributed to Inigo Jones, was completely destroyed by bombing, but has now been rebuilt. The new hall was built some 30 ft. from the old site to enable one of the bastions and part of the wall of the Roman fort to remain exposed to view.

LOYD'S, Lime Street, E.C.3.—Housed in the Royal Exchange for 150 years and in Leadenhall Street from 1928-1957. The present building was opened by H.M. Queen Elizabeth the Queen Mother on Nov. 14, 1957. The underwriting space has an area of 44,250 sq. ft.

LORD'S CRICKET GROUND, St. John's Wood Road, N.W.8.—The headquarters (since 1814) of the Marylebone Cricket Club (founded 1787), the premier cricket club in England, the scene of some of the principal matches of the season and Middlesex County headquarters. Tennis court and squash courts in building behind members' pavilion.

The Cricket Memorial Gallery, a museum of cricket, open to the public on match days, until 5 p.m., and on other days by prior arrangement. Adults, 15p, children, 8p. In winter, admission is by prior arrangement.

MANSION HOUSE, City, E.C.4.—(Built 1739-53, reconstructed 1930-31.) The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfields is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield (present buildings, 1866); *Leadenhall Market* (Meat and Poultry (built 1881, part recently demolished); *Billingsgate*, (Fish), Thames Street (built 1875, part recently demolished); *Spitalfields*, E.1. (Vegetables, Fruit, etc.), enlarged 1928, and opened by the late Queen Mary; *London Fruit Exchange*, Brushfield Street (built by Corporation of London 1928-29) faces Spitalfields Market. Other markets are—*Covent Garden* (now moved to Nine Elms) (established under a charter of Charles II, in 1661) and *Borough Market*, S.E.1, for vegetables, fruit, flowers, etc.

MARLBOROUGH HOUSE, Pall Mall, S.W.1.—The London home of Queen Mary until her death in 1953. Built by Wren for the great Duke of Marlborough and completed in 1711, the house finally reverted to the Crown in 1835. Prince Leopold lived there until 1831, and Queen Adelaide from 1837 until her death in 1849. In 1863 it became the London house of the Prince of Wales. The

Queen's Chapel, Marlborough Gate, begun in 1623 from the designs of Inigo Jones for the Infanta Maria of Spain, and completed for Queen Henrietta Maria, is open to the public for services during part of the year. In 1959 Marlborough House was given by the Queen as a Commonwealth centre for Government conferences and it was opened as such in March, 1962. It is open to the public at certain times when conferences are not taking place.

LONDON MONUMENT (commonly called "The Monument"), Monument Street, E.C.3.—Built from designs of Wren, 1671-77, to commemorate the Great Fire of London, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 120 ft. high (the moulded cylinder above the balcony supporting a flaming vase of gilt bronze is 42 ft. In addition), and is based on a square plinth 40 ft. high, with fine carvings on W. face (making a total height of 202 ft.). Splendid views of London from gallery at top of column (311 steps). Admission (until 20 minutes before closing time) 15p; children, 7p, Monday to Saturday, 9 a.m. to 6 p.m. (Oct.—March to 4 p.m.). Sundays—May to Sept. 2-6 p.m. Closed Christmas Day, Boxing Day and Good Friday.

PERCIVAL DAVID FOUNDATION OF CHINESE ART, 53 Gordon Square, W.C.1.—Set up in 1951 to promote the study and teaching of the art and culture of China and the surrounding regions, and provide facilities necessary to that end. The Foundation contains the collection of Chinese ceramics formed by Sir Percival David and his important library of books on Chinese art. To these was added a gift from the Hon. Mountstuart Elphinstone of part of his collection of Chinese monochrome porcelains. The galleries were opened to the public in 1952. The Foundation is administered on behalf of the University of London by the School of Oriental and African Studies. Hours of opening: Galleries, Mon. 2 to 5 p.m.; Tues. to Fri. 10.30 a.m. to 5 p.m.; Sat. 10.30 a.m. to 1 p.m.; Closed Bank Holidays. Library available to ticket holders only; applications in writing to the Curator. Head of the Foundation, Prof. W. Watson.

PORT OF LONDON.—The Port of London comprises the tidal portion of the River Thames from Teddington to the seaward limit (Tongue light vessel), a distance of 95 miles and three dock systems and land for redevelopment covering an area of 4,512 acres, of which 512 acres are water. The governing body is the Port of London Authority, whose Head Office is in World Trade Centre, E.1. Particulars of the docks are as follows:—*India & Millwall Docks*, E.14.—Area 449 acres including 127 acres water. Principal commodities handled are hardwood, fruit, plywood, wood pulp and wine in bulk. *Royal Victoria & Albert & King George V Docks*, E.16.—Area 1,019 acres, including 230 acres water—have special facilities for grain and tobacco. Large quantities of fruit and general cargo are also dealt with. *Tilbury Docks*, Essex.—Area 1,059 acres, including 155 acres water. These docks are 26 miles below London Bridge and are used principally by vessels plying on the Australian, North American, Indian, other Eastern routes, West Africa and the Continent. Tilbury Passenger Landing Stage provides accommodation for liners at all states of the tide and adjoins Tilbury Riverside Station.

A development and extension scheme at Tilbury has added nearly 2 miles of deepwater quays, to provide 13 new berths, of which 6 are for container traffic and 3 for packaged timber. Also included are a freight-liner rail container terminal and a riverside grain terminal which can accommodate vessels up to 65,000 tons deadweight and provide a rated maximum discharge of 2,000 tons per hour. Cost of this development (including Grain Terminal) was estimated at about £35 million.

The St. Katharine Docks were sold to the G.L.C. in 1969 and the London Docks were closed on May 31, 1969 and sold to Tower Hamlets Council in 1976. Surrey Commercial Docks were closed in 1970 and a large proportion was sold to the G.L.C. and Southwark Council in 1976.

PRINCE HENRY'S ROOM, 17 Fleet Street, E.C.4.—Early 17th century timber-framed house containing fine room on first floor with panelling and moulded plaster ceiling. Open Mon. to Fri. 1.45 p.m. to 5 p.m.; Sat. to 4.30 p.m. Admission 10p. Closed Christmas Day and Good Friday. Available

occasionally for evening lettings on application to The Town Clerk, Guildhall, E.C.2.

ROMAN LONDON.—Though visible remains are very few, almost every excavation for the foundations of new buildings in the City reveals Roman remains. Sections of the City wall, often however merely a mediæval re-build on the Roman foundations, are the most striking remains still to be seen. Fragments may be seen near the White Tower in the Tower of London, Trinity Square, No. 1 Crutched Friars, All Hallows, London Wall—its semi-circular vestry being built on the remains of a round bastion—St. Alphage, London Wall, recently restored by the Corporation of London and showing a striking succession of building and repairs from Roman till later mediæval times, St. Giles, Cripplegate and, by permission only, the great bastion beneath the pavement of the yard of the G.P.O. in Giltspur Street. Recent excavations in the Cripplegate area have revealed that a fort was built in this area and later incorporated in the town wall in this north-west corner of the City. Evidence from these excavations proves that the fort was not built until about A.D. 100–120 and the date of the town wall must therefore be considerably later. Remains of a bath building are preserved beneath the Coal Exchange in Lower Thames Street and other foundations may be seen in the Crypt of All Hallows Barking by the Tower. The governmental headquarters of the town was a great basilica, more than 400 ft. long from east to west, the massive walls of which have been encountered, extending from Leadenhall Market across Gracechurch Street as far as St. Michael's, Cornhill. Excavations during the past few years have shown that buildings over the river front were erected on huge oaken piles and a framework of timber for a considerable distance both east and west of the present London Bridge. The "Roman Bath", in Strand Lane approached via Surrey Street, which is not now held by most authorities to be of Roman origin, is maintained by the G.L.C. on behalf of the National Trust, and is open to the public on weekdays from 10 a.m. to 12.30 p.m. (Admission, 10p). Excavations since 1948 on a bombed site in Walbrook, on the banks of the old Wall Brook, produced interesting discoveries, including a Temple of Mithras, from which the splendid marble statues have been placed in Guildhall Museum, now in the Royal Exchange, where many other relics from the Roman City may be seen.

ROYAL EXCHANGE, E.C.3 (founded by Sir Thomas Gresham, 1566, opened as "The Bourse" and proclaimed "The Royal Exchange" by Queen Elizabeth I, 1571, rebuilt 1667–69 and 1842–44).—Open to the public, free. Statues of Queen Elizabeth I, Charles II, Queen Victoria, Sir Thomas Gresham and others; mural paintings in the ambulatory by Leighton, Brangwyn, Wyllie, F. O. Salisbury and others. The carillon of the Royal Exchange (reinstated 1950) is temporarily out of use. With the exception of the courtyard and ambulatory (now used for exhibitions, art displays, etc.) and the shops the whole of the building is occupied by departments of the Guardian Royal Exchange Assurance Group and is administered by the Gresham Committee (Clerk, Mercers' Hall, Ironmonger Lane, E.C.2).

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W. 7.—Map Room open to public, free.

ST. JAMES'S PALACE, in Pall Mall, S.W.1.—(Not open to the public.) Built by Henry VIII; the Gatehouse and Presence Chamber remain, later alterations by Wren and Kent. The Chapel Royal and the Queen's Chapel (1623) opposite the Palace are open to the public for services. Representatives

of Foreign Powers are still accredited "to the Court of St. James's". Clarence House (1825) in the palace precinct is the home of H.M. the Queen Mother.

ST. JOHN'S GATE, Clerkenwell, E.C.1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the entrance of the Priory of that Order, of which the gate house (early 16th century) and crypt of Church (12th century) alone survive, They may be inspected on application to the Curator.

SIR JOHN SOANE'S MUSEUM, 13 Lincoln's Inn Fields, W.C.2. The house and galleries, built 1813–24, are the work of the founder, Sir John Soane (1753–1837) and contain his collections, arranged as he left them, in pursuance of an Act procured by him in 1833. Exhibits include the Sarcophagus of Seti I (c. 1290 B.C.), classical vases and marbles, Hogarth's *Rake's Progress* and *Election* series, paintings by Canaletto, Reynolds, Turner, Lawrence, etc., and sculpture by Chantry, Flaxman, etc. Soane's library of 8,000 vols, and a collection of 20,000 architectural drawings are available for study. Open Tues.–Sat. inclusive, 10 a.m. to 5 p.m. Closed Bank Holidays. Curator, Sir John Summerson, C.B.E., F.B.A. Inspector, Miss D. Stroud, M.B.E., F.S.A.

SOMERSET HOUSE, Strand, W.C.2, and Victoria Embankment, W.C.2.—The beautiful river façade (600 ft. long) was built in 1776–86 from the designs of Sir W. Chambers; the eastern extension, which houses part of King's College, was built by Smirke in 1829. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until 1692.

STOCK EXCHANGE, E.C.2.—The market floor of the new Stock Exchange building in London opened for trading in June, 1973. A tower, 331 feet high, the new Market, and a separate Public Relations block replace the complex of buildings started in 1801 on the same site. The new building is the headquarters of The Stock Exchange, following the amalgamation of all the Stock Exchanges in Great Britain and Ireland on March 25, 1973.

The Stock Exchange provides a market for the purchase and sale of about 9,000 securities officially listed, and valued at over £250,000,000 and also securities listed on other Stock Exchanges throughout the World. At present the members of The Stock Exchange who consist of brokers (agents for clients) and Jobbers (dealers in specific securities) number about 4,150. The Visitors' Gallery is open between 10.00 a.m. and 3.15 p.m. Monday to Friday. Admission free and without ticket; film show, audio-visual exhibition. Advance bookings can be made; last complete programme begins at 2.50 p.m.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Sir J. W. Bazalgette for the Metropolitan Board of Works, 1864–70 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Albert Embankment on the S. side (from Westminster Bridge to Vauxhall), 1866–69; the Chelsea Embankment, 1871–74. The total cost exceeded £2,000,000. Sir J. W. Bazalgette (1819–91) also inaugurated the London main drainage system, 1858–65. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The headquarters of the G.L.C. include an embankment on the Surrey side.

THAMES TUNNELS.—The *Rotherhithe Tunnel*, constructed by the L.C.C. and opened in 1908, connects Commercial Road E.14, with Lower Road, Rotherhithe; the total length is 1 mile 332 yards, of which 474 yards are under the river. The cost of the tunnel and its approaches was £1,506,914. The first *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connecting East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The cost of the tunnel with its approaches was about £1,323,663. A second tunnel (for southbound vehicles only) was opened in August, 1967, at a cost of about £9,750,000 and the old tunnel was improved at a cost of about £1,350,000 and made one-way northbound. Both tunnels are for vehicles only. The relative lengths of the tunnels measured from East India Dock Road to the Gate House on the south side are 6,215 ft. (old tunnel) and 6,152 feet. *Greenwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E.16, to High Street, Woolwich, S.E.18. The length of the subway is 552 yards, and its cost was about £86,000. The *Thames Tunnel* (1,300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C.1 and E.C.3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LONDON, E.C.3.—Admission to a general view of the Tower, the White Tower (Armouries), the Beauchamp and Bloody Towers and the Chapels Royal—80p; children, 30p; to the Jewel House, 30p, children 10p. On Sundays throughout the year the public is admitted to Holy Communion, 9.15 a.m. and Morning Service, 11 a.m. Open on weekdays, March 1 to October 31, 9.30-5; Nov. 1-Feb. 28, 9.30-4; Sundays, 2 p.m. to 5 p.m., Mar. 1-Oct. 31 only; Tower closed Christmas Eve, Christmas Day, Boxing Day, Good Friday and New Year's Day. CONSTABLE, Field Marshal Sir Geoffrey Baker, G.C.B., C.M.G., C.B.E., M.C., Lieutenant, Lieut. Gen. Sir Napier Crookenden, K.C.B., D.S.O., O.B.E.; RESIDENT GOVERNOR AND KEEPER OF THE JEWEL HOUSE, Maj.-Gen. W. D. M. Raeburn, C.B., D.S.O., M.B.E.; MASTER OF THE ARMOURIES, A. R. Dufty, C.B.E., F.S.A.; CHAPLAIN AT THE CHAPEL ROYAL OF ST. PETER AD VINCULA, Rev. J. F. M. Llewellyn.

The White Tower is the oldest and central building in Her Majesty's Royal Palace and Fortress of the Tower of London. It was built at the order of William I and constructed by Gundulph, Bishop of Rochester, in the years 1078-98. The Inner Wall, with thirteen towers, was constructed by Henry III in the 12th century. The Moat was extended and completed by Richard I and the Wharf first mentioned in 1228. The Outer Wall was completed in the reign of Edward I and now incorporates 6 towers and 2 bastions. The last Monarch to reside in the Tower of London was James I. The Crown Jewels came to the Tower in the reign of Henry III. All coinage used in Great Britain was minted in the Outer Ward of

the Tower of London until 1810 when the Royal Mint was formed. The Tower of London has had a military garrison since 1078. The Chapel Royal of St. John the Evangelist, within the White Tower (1080-1088) is the oldest Norman church in London. The chapel of St. Peter ad Vincula was built in the early 16th century.

WELLINGTON MUSEUM, Apsley House, 149 Piccadilly, at Hyde Park Corner, W.1.—Admission free on weekdays and Bank Holidays, 10 to 6; Sundays, 2.30 to 6. Closed Good Friday, Christmas Eve, Christmas Day, Boxing Day and New Year's Day. Apsley House was designed by Robert Adam for Lord Bathurst and built 1771-8. It was bought in 1817 by the Duke of Wellington, who in 1828-29 employed Benjamin Wyatt to enlarge it, face it with Bath stone and add the Corinthian portico. The museum contains many fine paintings, services of porcelain and silver plate and personal relics of the 1st Duke of Wellington (1769-1852) and was given to the Nation by the 7th Duke. It was first opened to the public in 1952, under the administration of the Victoria and Albert Museum.

WESTMINSTER HALL, S.W.1 (built by William Rufus, A.D. 1097-99 and altered by Richard II, 1394-1401), adjacent to and incorporated in the Houses of Parliament—Westminster Hall is part of the old Palace of Westminster and survived the fire, which destroyed most of the remainder of the Palace (Oct. 16, 1834) and the bombs of 1941. The Hall is about 240 ft. long, 69 ft. wide, and 90 ft. high. The hammer beam roof of carved oak, dating from 1396-98, is one of the principal attractions. King Charles I was tried in the Hall. Extensive repairs to the Hall have recently been carried out. Admission: During sessions—Mon. to Thurs., 10 a.m. until 1.30 p.m., provided neither House is sitting. Sat. 10 a.m.-5 p.m. During Recess—Mon. to Fri., except Good Friday, Christmas Day and Boxing Day, 10 a.m.-4 p.m.; Sat., 10 a.m.-5 p.m.

ENVIRONS OF LONDON

BARNET AND HADLEY GREEN.—Scene of Battle, A.D. 1471. Hadley Woods.

BURNHAM BEECHES and FLEET WOOD, Bucks.—Magnificent wooded scenery, purchased by the Corporation of London for the benefit of the public in 1899, includes Fleet Wood (65 acres) presented in 1921. During summer omnibus runs daily. Sundays included, from Slough Station (Western Region), passing within 250 yards of "Gray's Eley" Church. See "Stoke Poges".

BUSHY PARK (1,099 acres).—Adjoining Hampton Court, contains many fine trees and avenue of horse-chestnuts enclosed in a fourfold avenue of limes, planted by King William III. "Chestnut Sunday" (when the trees are in full bloom with their "candles") is usually about May 1 to 15.

CHEQUERS, a country residence for Prime Ministers, was presented to the Nation (with an endowment to maintain the estate, etc.) by Lord and Lady Lee of Farnham, as the official country residence for the Prime Minister of the day, and the gift was approved by Parliament in the *Chequers Estate Act, 1917*. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a mansion in Tudor style in the Chilterns about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

DARWIN AND DOWN HOUSE, Downe, Farnborough, Kent.—Where Charles Darwin thought and worked for 40 years and died in 1882. Maintained by the Royal College of Surgeons. Open 1 to 6. Closed Mondays (except Bank Holidays), Fridays, Christmas Eve, Christmas Day, Boxing Day and February. Admission, 50p. Children, 20p.

DORNEYWOOD, country house in 215 acres, near Burnham Beeches, Bucks., was presented to the nation by Lord Courtauld-Thomson (died 1954) as an official residence for any Minister of the Crown chosen by the Prime Minister during office. Administered by the National Trust. Garden and grounds open to the public on Saturdays only. (August and Sept, 2.15–6 p.m.) Admission 10p. Children, 5p.

DULWICH, S.E.21 (5 miles from London), contains *Dulwich College* (founded by Edward Alleyn in 1619), the *Horniman Museum* and *Dulwich Park* (72 acres). The *Dulwich Picture Gallery*, built by Sir John Soane to house the collection bequeathed by the artist, Sir Francis Bourgeois, was damaged by enemy action in the Second World War. The pictures, however, were saved, and the gallery has been rebuilt with the aid of a grant from the Pilgrim Trust. It was reopened by Queen Elizabeth the Queen Mother on April 27, 1953. In *Dulwich Village* the rural characteristics of the pre-suburban periods are preserved.

ELTHAM, Kent (10 miles from London by Southern Region). Remains of 13th–15th century Eltham Palace, the birthplace of John of Eltham (1326), son of Edward II. The hall, built by Edward IV, contains fine hammer-beam roof of chestnut. In the churchyard of St. John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship (Doggett's Coat and Badge).

EPPING FOREST (6,000 acres, originally purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present forest is 12 miles long by 1 to 2 miles wide, about one-tenth of its original area). LOUGHTON, BUCKHURST HILL, CHINGFORD, HIGH BEECH (London Transport and Eastern Region). Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by

Henry VI in 1440, the scholars numbering 1,195 in July, 1970. Buildings date from 1442.

GREENWICH, S.E.10.—*Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II, largely from designs by John Webb, and by Queen Anne and William III, from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391–1447), son of Henry IV. Henry VIII, Queen Mary I and Queen Elizabeth I were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI died there. In the principal quadrangle is a marble statue of George II, by Rysbrack. (For *National Maritime Museum*, see Index.) *Painted Hall* and *Chapel* open daily except Thursdays from 2.30 p.m. to 5 p.m. (closed on Sundays, Oct.–April inclusive). Visitors are also admitted to Morning Service in the Chapel at 11 a.m., summer and winter, except during College vacations. *Greenwich Park* (1963 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II, from the designs of Le Nôtre. The Queen's House, begun in 1616, was designed for Anne of Denmark by Inigo Jones. On a hill in Greenwich Park is the former Royal Observatory (founded 1675). Part of its buildings at Greenwich have been taken over by the Maritime Museum and named *Flamsteed House*, after John Flamsteed (1646–1719), first Astronomer Royal. The Parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1728, and restored after severe damage during the Second World War. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII was christened in the former church. *Charlton House*, built in the early 17th century (1607–1612) for Adam Newton, tutor to Prince Henry, brother to Charles I. The house is largely in the Jacobean style of architecture. *Cutty Sark*, the last of the famous tea clippers, which has been preserved as a memorial to ships and men of a past era. The ship is fully restored and re-rigged, with a museum of sail on board. Open to visitors: weekdays, 11 to 5 (Summer, 6 p.m.); Sundays and Boxing Day, 2.30 to 5. The yacht *Gipsy Moth IV* in which Sir Francis Chichester sailed single-handed round the world, 1966–67, is preserved alongside *Cutty Sark*.

HAM HOUSE, Richmond.—A notable example of 17th-century domestic architecture, long the home of the Tollemache family (Earls of Dysart). The contents, described as "probably the finest and most varied collection of Charles II's reign to survive", were purchased for the Victoria and Albert Museum which now administers the house. Ham House may be seen on Tues.–Sun. inclusive and on Bank Holidays, 2–6 p.m., April–Sept., 12–4 p.m., Oct.–March. Closed Mon. (except Bank Holidays), Christmas Eve, Christmas Day, Boxing Day and Good Friday and New Year's Day. Admission, 20p; Children and Pensioners, 10p.

HAMPTON COURT.—Sixteenth-century Palace built by Cardinal Wolsey, with additions by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1769). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII in 1530. The Palace is closed on Christmas Eve, Christmas Day, Boxing Day, New Year's Day and Good Friday. April–September: State Apartments: 50p; (Oct.–March 20p). Mantegna Paintings 15p. (Oct.–March 15p, 5p). State Carriages 5p. Maze 2p. State Carriages, Tennis Court, closed Oct.–March. Maze closed Nov.–Feb. Open May–Sept. 9.30–6 (Sundays 11–6) (Maze 10–6; 11–6).

Nov.-Feb. 9.30-4 (Sundays 2-4). Oct., March and April 9.30-5 (Sundays 2-5) (Maze 11-5).

HARROW-ON-THE-HILL.—10 miles by Metropolitan and other railways. Large public school founded by John Lyon in 1571. The "Fourth Form Room" dates from 1608.

HUGHENDEN MANOR, High Wycombe, Bucks.—The home of Disraeli from 1847 till his death and contains much of his furniture, books, etc. Conveyed to the National Trust in 1947. Open daily including Sundays and Bank Holidays, 2-6 or till dusk. Saturdays and Sundays, 12.30 to 6. Closed Tuesdays and all December (1974), January, Good Friday and Christmas Day. Admission (non-members), 25p; Children, 12p.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old *Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn built out of the timbers of the *Mayflower* by the 17th-century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

KEW, Surrey, was a favourite home of the early Hanoverian monarchs. Kew House, the residence of Frederick, Prince of Wales, and later of his son, George III, was pulled down in 1803, but the earlier Dutch House, now known as Kew Palace, survives. It was built in 1631 and acquired by George III as an annexe to Kew House in 1781. The famous Kew Gardens (see p. 649) were originally laid out as a private garden for Kew House for George III's mother in 1759 and were much enlarged in the nineteenth century, notably by the inclusion of the grounds of the former Richmond Lodge.

MARBLE HILL HOUSE, Twickenham, Middlesex.—Example of the English Palladian style, built 1724-9 for Henrietta Howard, Countess of Suffolk, mistress of George II. Reopened 1966, after restoration work on the elevations of the house, entrance hall, main staircase and first floor rooms. The Great Room and mahogany staircase are noteworthy. Open daily except Fri. Admission free.

NATIONAL ARMY MUSEUM, Royal Hospital Road, S.W.3. Established by Royal Charter (1960). Official Museum for British Army, Honourable East India Company, Indian Services and Colonial Forces. History of British, Indian and Colonial Forces, 1485 to 1924, in new building at Chelsea. Indian Army room remains open at R.M.A. Sandhurst, Camberley, Surrey.

OSTERLEY PARK, Isleworth.—House and park of 140 acres given to the National Trust by the Earl of Jersey in 1949. Part of the Elizabethan house, built in 1577 for Sir Thomas Gresham, remains, but it was largely remodelled by Robert Adam, and the staterooms are among the best examples of Adam decoration. Open daily, except Mondays, (April-Sept.) 2-6 p.m.; (Oct.-Mar.) 12 noon-4 p.m. Closed Monday (except Bank Holidays), Christmas Eve, Christmas Day, Boxing Day, New Year's Day and Good Friday. Admission 20p, children 10p.

RICHMOND, SURREY, contains the red brick gateway of *Richmond Palace* (Henry VIII, 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the former home of Queen Mary's mother (the Duke of Windsor was born there, June 23, 1894). The *Star and Garter* Home for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,469 acres) contains herds of fallow and red deer.

ROYAL AIR FORCE MUSEUM, Colindale, Hendon.—The museum was established in 1963 and officially opened by the Queen in November 1972. It covers all aspects of the history of the Royal Air Force and its predecessors and most of the history of aviation generally. The museum building is sited on ten acres of the historic former airfield at Hendon. Its aircraft hall, which occupies two hangars dating from the First World War, displays some 40 aircraft from the museum's total collection of over 100 machines. Open weekdays, 10 a.m.-6 p.m., Sundays, 2 p.m.-6 p.m. Admission free.

RUNNIMEDDE.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Carta Island* (claimed as the actual site of the sealing), presented to the National Trust in 1930.

A memorial at *Cooper's Hill*, near Runnymede, to members of the Commonwealth air forces who lost their lives in the Second World War while serving from bases in the United Kingdom and north-western Europe and have no known grave, was unveiled by the Queen on October 17, 1953. Her Majesty on May 14, 1965, unveiled a memorial to the late President of the United States, John F. Kennedy, on ground nearby.

ST. ALBANS.—A city in Hertfordshire, on the River Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1115. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI in 1455, and of the Earl of Warwick in 1461. The site of the pre-Roman city of King Tasciovanus and the remains of the ancient City of Verulamium, with well preserved theatre and many other features, excavated in recent years.

SYON HOUSE, Brentford.—The summer home of the Duke of Northumberland. The House is built on the remains of the Nunnery of Syon, founded by the order of Henry V in 1415. At the Dissolution of the Monasteries the estate reverted to the Crown. In 1594 it was granted to the 9th Earl of Northumberland, who altered and improved the property. In the eight years, 1762-1770, the interior was transformed and furnished by Robert Adam. Open Easter to Sept.

WALTHAM ABBEY (or **WALTHAM HOLY CROSS**), 13 miles from London (Eastern Region).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England (consecrated May 3, 1066) and the traditional burial place of King Harold II (1066), and a Lady Chapel of Edward II, with crypt below. New evidence of the position and style of several buildings, which once stood on the site of the Augustinian monastery, were revealed by the prolonged drought in the summer of 1933. At Waltham Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood near the spot now occupied by the statue of Charles I at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066-87).—22 miles from London, by Western and Southern Regions. The Castle Precincts are open daily, free of charge, from 10 a.m. to one hour before sunset or 4 p.m. (whichever is the later). When the Queen is not in official residence, the *State Apartments* of Windsor Castle are open to the public, during Her Majesty's pleasure, on every weekday and on certain Sunday afternoons during the summer months. When the State Apartments are open, the charges for admission are for Adults, 20p and for Children, 10p. By the Queen's command, the net proceeds go to charities. The hours of admission to the State Apartments are: Jan. to mid-March, mid-Oct. to Dec., 10.30-3; March to mid-Oct., 10.30-5; Sundays, March to mid-Oct. 1.30-5; Closed, Nov.-Feb. *Queen Mary's Doll's House*, the *Exhibition of Dolls* and the *Exhibition of Drawings* by Holbein, Leonardo

da Vinci and other artists can be seen on the same days and hours as the State Apartments, admission 5p each person to each. When the State Apartments are closed, Queen Mary's Doll's House and the *Exhibition of Drawings* remain open to the public. The *Albert Memorial Chapel* is open free throughout the year from 10-1; 2-4; closed on Sundays; Admission free. A fee is charged to visit *St. George's Chapel*. The *Curfew Tower* may be seen under the guidance of the Keeper to whom application must be made at the entrance.

The *Royal Mausoleum*, Frogmore Gardens, Home Park, is open annually on two days in early May, usually the first Wednesday and Thursday in the month, in conjunction with the opening of Frogmore Gardens in aid of the National Garden Scheme, 10 a.m.-dusk. Also open on the Wednesday nearest to May 24 (Queen Victoria's birthday) from 11 a.m. to 4 p.m. Admission free.

HOUSES OPEN TO THE PUBLIC

Times of summer opening and admission fees shown are those which obtained in 1976, and are subject to modification. THE PRINCIPAL ENGLISH CITIES

BIRMINGHAM

BIRMINGHAM (West Midlands) is the second largest City in Britain and the chief centre of the hardware trade. In local government reorganization effective from April 1, 1974, Birmingham is merged with Sutton Coldfield as a Metropolitan District in the West Midlands Metropolitan County. It is estimated that over 1,500 distinct trades are carried on in the city, the chief industries being the manufacture of buttons, plastic goods, chocolate, chemicals, electroplate, guns, machine tools, glass, motor-cars and motor cycles, motor tyres, nuts and bolts, pens and nibs, tubes, paint and enamels, tools, toys, electrical apparatus, wire, jewellery and brass working, etc.

The first section of Birmingham's Queen Elizabeth Hospital, erected at Edgbaston at a cost of approximately £1,000,000, is claimed to be the finest of its type in Europe. A new maternity hospital adjoining was opened in 1969. The construction of an inner ring road round the centre was completed in 1971, hotel accommodation has been increased and there have been many improvements in the shopping centre including the redevelopment of the old market centre in the Bull Ring at a cost of £8,000,000. A new complex of buildings near the Town Hall includes a School of Music, Central Library, a shopping precinct and Corporation offices. A new television centre is in being and the City's new repertory theatre was opened in October, 1971. The National Exhibition Centre at Bickenhill opened in 1976.

The principal buildings are the Town Hall, built in 1832-1834; the Council House and Corporation Museum and Art Gallery (1878); Victoria Law Courts (1891); the University (1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church); the Roman Catholic Cathedral of St. Chad (Pugin) and the Methodist Central Hall. Birmingham was incorporated as a borough in 1838, and was created a city in 1889. The generally accepted derivation of "Birmingham" is the *ham* or dwelling-place of the *ing* or the family of *Beorma* presumed to have been a Saxon. Between the 11th and 16th centuries the de Berminghams were Lords of the Manor.

The Lord Mayor (1976-77), H. Powell.

Stipendiary Magistrate, J. F. Milward (1951).

Chief Executive, F. J. C. Amos, C.B.E. (1974)

BRADFORD

BRADFORD (West Yorkshire), the principal town in the Metropolitan District of Bradford, is 192 miles N.N.W. of London and 8 miles W. of Leeds. The metropolitan area is 91,444 acres with a population (1974 estimate) 461,000.

Although the area has always been associated with wool and textiles, industrial activity now covers a much wider range. Together with Keighley and Shipley in the Aire valley it is well known for its engineering and electrical industries, high quality machine tools, mail order firms, iron and printing works and quarries.

The chief public buildings of Bradford in addition to the 15th century Cathedral (formerly the Parish Church) and Boiling Hall (14th century), are the City Hall (1873), the tower of which contains a clock with dials, chimes and a carillon, Cartwright Hall (1904) commemorating the inventor of the power loom, Grammar School (Charter 1662), St. George's Hall (Concert Hall, 1853), Technical College (1882), Wool Exchange (1867), Britannia House (1933) and Bradford University. A new

Central Library, planned on the "subject department" principle was opened in 1967 and the new Magistrates' Courts were opened in 1972. The Civic Precinct was opened in 1974.

The Saxon township of Bradford was created a parliamentary borough in 1832, a borough in 1847, a county borough in 1889, and a city in 1897. The office of Lord Mayor was created in 1907. The Council consists of a Lord Mayor and 92 Councillors.

The Lord Mayor (1976-77), F. Hillam.

Chief Executive, G. C. Moore.

BRISTOL

BRISTOL, situated in the new county of Avon, is the largest non-metropolitan district in population in the country, and is 119 miles W. of London. The present municipal area is 27,068 acres, with a population (1975 estimate) of 421,000.

Among the various industries are aircraft and aero-engine construction, general and nuclear engineering, boot and shoe manufacture, chocolate and cocoa, tobacco, paper bags, cardboard and allied products, printing, chemical industry and shipbuilding and repairing. The principal imports are grain, flour and other cereal products, cocoa, tea, coffee, molasses, feeding stuffs, fruit, provisions, frozen meat, metals, ores, phosphates, paper, petroleum and chemicals, fertilizers, timber, tobacco, wood pulp and other goods, and the chief exports are metals and machinery, chemicals, unmanufactured clay, motor vehicles and parts, carbon black, electrical apparatus, tea, wines and spirits and manufactured goods.

The chief buildings, in addition to the 12th century Cathedral (with later additions), with Norman Chapter House and gateway, the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth I as "the fairest, goodliest, and most famous parish church in England"), and Wesley's Chapel, Broadmead, are the Merchant Venturers' Almshouses, the Council House (opened by H.M. the Queen in April, 1956), Guildhall, Exchange (erected from the designs of John Wood in 1743), City Museum and Art Gallery, Central Library, Cabot Tower, the University and Clifton College, Red Lodge (Tudor), Georgian House, and Blaise Castle and Mansion with Folk Museum. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon, was projected by Brunel in 1836 but was not completed until 1864. The new Roman Catholic Cathedral at Clifton was opened in 1973.

Bristol was a Royal Borough before the Norman Conquest. In 1373 it received from Edward III a charter granting it county statutes and in 1899 its Mayor became a Lord Mayor. The Corporation includes 84 Councillors. The earliest forms of the name are *Brigstowe* and *Bristow*.

The Lord Mayor (1976-77), J. D. Fisk.

Chief Executive, P. M. McCarthy.

CAMBRIDGE

CAMBRIDGE, a settlement far older than its ancient University, lies on the Cam or Granta, 51 miles north of London and 65 miles south-west of Norwich. It has an area of 10,060 acres and a population (est., 1974) of 104,000.

The city is a parliamentary borough, county town and regional headquarters. Its industries, which include radio and electronics, flour milling, cement making and the manufacture of scientific instruments are extensive but nowhere obtrusive. Among its open spaces are Jesus Green, Sheep's Green, Coe Fen, Parker's Piece,

Christ's Pieces, the University Botanic Garden, and the Backs, or lawns and gardens through which the Cam winds behind the principal line of college buildings. East of the Cam, King's Parade, upon which stand Great St. Mary's Church, Gibbs' Senate House and King's College Chapel with Wilkins' screen, joins Trumpington Street to form one of the most beautiful thoroughfares in Europe.

University and College buildings provide the outstanding features of Cambridge architecture but several churches (especially St. Benet's, the oldest building in the City, and St. Sepulchre's the Round Church) also make notable contributions. The modern Guildhall (1939) stands on a site of which at least part has held municipal buildings since 1224.

The City Council has 42 members. The District was granted Borough status and reaccorded the style of City from April 1974.

Mayor (1976-77), R. E. Wright.

Chief Executive, G. G. Datson.

CANTERBURY

CANTERBURY, the Metropolitan City of the Anglican Communion, has an unbroken history going back to prehistoric times. It was the Roman Durovernum and the Saxon Cant-wara-byrig (stronghold of the men of Kent). Here in 597 St. Augustine began the re-conversion of the English to Christianity, when Ethelbert, King of Kent, was baptized. In 1170 the rivalry of Church and State culminated in the murder in Canterbury Cathedral, by Henry II.'s knights, of Archbishop Thomas Becket, whose shrine became a great centre of pilgrimage as described by Chaucer in his *Canterbury Tales*. After the Reformation pilgrimages ceased, but the prosperity of the City was strengthened by an influx of Huguenot refugees, who introduced weaving. In the first Elizabethan era Christopher Marlowe, the poetic genius and precursor of Shakespeare, was born and reared in Canterbury, and there are literary associations also with Defoe, Dickens and Barham, author of the *Jingoltsby Legends*, and Somerset Maugham.

The Cathedral, with its glorious architecture ranging from the eleventh to the fifteenth centuries, is world-famous. Modern pilgrims are attracted particularly to the Martyrdom, the Black Prince's Tomb and other historic monuments, the Warriors' Chapel and the many examples of mediæval stained glass.

Of the Benedictine St. Augustine's Abbey, burial place of the Jutish Kings of Kent (whose capital Canterbury was) only extensive ruins remain. St. Martin's Church, on the eastern outskirts of the City, is stated by Bede to have been the place of worship of Queen Bertha, the Christian wife of King Ethelbert, before the advent of St. Augustine.

The mediæval City Walls are built on Roman foundations and the fourteenth century West Gate is one of the finest buildings of its kind in the country.

The University of Kent at Canterbury admitted its first students in 1965.

The city has an area of 120 square miles, and a population of 115,000. Before the institution of the Mayoralty in 1448 it was governed by bailiffs and earlier still by prefects or provosts.

Mayor (1976-77), I. Fowler.

Sheriff (1976-77), J. H. Snell.

Chief Executive, C. C. Gacy.

COVENTRY

COVENTRY (West Midlands) is a city 92 miles N.W. of London, and an important industrial centre. It has a population (estimated, 1973) of 336,000.

Coventry owes its beginning to Leofric, Earl

of Mercia and his wife Godiva in 1043, when they founded a Benedictine Monastery. The beautiful guildhall of St. Mary dates from the 14th century, three of its churches date from the 14th and 15th centuries. Sixteenth century almshouses may still be seen. Coventry's first cathedral was destroyed at the Reformation, its second in the 1940 blitz (its walls remain) and the great new cathedral designed by Sir Basil Spence, consecrated in 1962, now draws innumerable visitors.

Post-war public buildings include the Art Gallery and Museum, Lanchester Polytechnic, the Civic Theatre and new swimming baths. The city centre has been redeveloped.

Coventry returns four M.P.'s. It is governed by a Lord Mayor and a Council of 54. Coventry produces cars, agricultural machinery, machine tools and telecommunications.

Lord Mayor (1976-77), R. F. Loosley.

Chief Executive, T. Gregory, O.B.E.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated, from April, 1974 in the County of Humberside, at the junction of the River Hull with the Humber, 22 miles from the North Sea and 205 miles N. of London. The municipal area is 17,593 acres, with a population (1971 Census), of 285,970.

Hull is one of the great seaports of the United Kingdom. It has docks covering a water area of over 200 acres, well equipped for the rapid handling of cargoes of every kind, and its many industries include oil-extracting, saw-milling, flour-milling, engineering and chemical industries. New industries, such as electricals, and clothing and textiles are being developed. It also claims to be the premier distant-water fishing port and is an important centre for allied processing activities.

The City, restored after very heavy air raid damage during World War II, is well laid out with fine thoroughfares. It has good office and administrative buildings, its municipal centre being the Guildhall, its educational centre the University of Hull and its religious centre the Parish Church of the Holy Trinity.

Kingston upon Hull was so named by Edward I. City status was accorded in 1897 and the office of Mayor raised to the dignity of Lord Mayor in 1914. The Lord Mayor presides over a Council of 63 Councillors, representing the 21 wards of the City.

The Lord Mayor (1976-77), A. Parker.

Sitipendary Magistrate, I. R. Boyd (1973).

Chief Executive, A. B. Wood.

LEEDS

LEEDS (West Yorkshire), a Metropolitan District from April 1, 1974, is a junction for road, rail and canal services and an important commercial centre, situated in the lower Aire Valley, 195 miles by road N.N.W. of London.

Leeds has a wide variety of manufacturing industries, notably cloth and ready-made clothing, heavy and light engineering, leather and chemical products.

The municipal area is 138,441 acres, the population is 749,000.

The principal buildings are the Civic Hall (1933), the Town Hall (1858), the Municipal Buildings and Art Gallery (1884), the Corn Exchange (1863) and the University. The Parish Church (St. Peter's) was rebuilt in 1841; the 17th century St. John's Church has a fine interior with a famous English renaissance screen; the last remaining 18th century church is Holy Trinity, Boar Lane (1727). Kirkstall Abbey (about 3

miles from the centre of the city), founded by Henry de Lacy in 1152, is one of the most complete examples of Cistercian houses now remaining. Temple Newsam, birthplace of Lord Darnley, was acquired by the Corporation in 1922. The present house, a stately building in red brick, was largely re-built by Sir Arthur Ingram in about 1620. Adel Church, about 5 miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I in 1626, made a county borough in 1889, and created a city in 1893. The Lord Mayor presides over 96 Councillors. The earliest forms of the name are *Loidis* or *Ledes*, the origins of which are obscure.

The Lord Mayor (1976-77), E. H. Morris.
Stipendiary Magistrate, F. D. L. Loy (1972).
Chief Executive, K. H. Potts.

LEICESTER

LEICESTER is situated geographically in the centre of England, 100 miles north of London. The City dates back to pre-Roman times and was one of the five Danish *Burhs*. In 1589 Queen Elizabeth I granted a Charter to the City and the ancient title was confirmed by Letters Patent in 1919. The title of Lord Mayor was conferred upon the Chief Magistrate in 1928. Under local government reorganization Leicester's area remained unchanged at 18,141 acres, and with a population of 290,600 (1975 est.) it is the third largest non-metropolitan district in England and Wales in population. It retains its designation as a City Council.

The principal industries of the city are hosiery, boots and shoes, and light engineering. The growth of Leicester as a hosiery centre increased rapidly from the introduction there of the first stocking frame in 1670; in 1833 there were 14,000 knitting frames in the city, which to-day has some of the largest hosiery factories in the world. Hosiery and knitwear produced includes socks, stockings, dresses, underwear, pullovers, scarves and gloves, much of which is exported. Leicester is also a centre for the ancillary industries.

Engineering, developed partly for the supply of machinery to the hosiery and boot and shoe industries, has become one of the foremost industries in the city. Printing and the manufacture of electronic and plastic goods are also carried on.

The principal buildings in the city are the Town Hall; the University; Leicester Polytechnic; De Montfort Hall, one of the finest concert halls in the provinces, with accommodation for over 2,750 persons, and the Museum and Art Gallery. The ancient Churches of St. Martin (now Leicester Cathedral) St. Nicholas, St. Margaret, All Saints, St. Mary de Castro, and buildings such as the Guildhall, the 14th century Newark Gate, the Castle and the Jewry Wall Roman site still exist. Leicester has a large number of parks and open spaces. The Sports Centre, which contains an athletics arena and cycle track, was the site of the 1970 World Cycling Championships. The Haymarket Theatre, an integral part of a large new shopping and car-parking complex, was opened in 1973.

The Lord Mayor (1976-77), B. Toft.
Chief Executive, J. S. Phipps.

LIVERPOOL

LIVERPOOL (Merseyside) a Metropolitan District, on the right bank of the river Mersey, 3 miles from the Irish Sea and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 27,819 acres (which includes 2,840 acres in the bed of the river

Mersey) (about 43 square miles, excluding the bed of the river), with a population of 574,560 (est. June 1973). Quays on both sides of the river are about 38 miles long, and the Gladstone Dock can accommodate the largest vessels afloat. Net tonnage of ships entering and leaving the port annually exceeds 45,000,000 tons. The main imports are petroleum, grain, ores, non-ferrous metals, sugar, wood, oil, fruit and cotton. The new Seaforth Container Terminal was opened in 1972, covering 500 acres and costing £50 m.

The Metropolitan District Council owns large industrial estates at Speke, Kirkby and Aintree, on which many modern factories have been built. These three estates have provided work for some 65,000 people. In 1943 a lease for 99 years was taken of the Elizabethan mansion at *Speke Hall* at a nominal rent.

The principal buildings are the Anglican Cathedral, erected from the designs of Sir Giles Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; the Metropolitan Cathedral of Christ the King, designed by Sir Frederick Gibberd and consecrated in 1967; St. George's Hall, erected 1838-1854, and regarded as one of the finest modern examples of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Walker Art Gallery; Victoria Building of Liverpool University; The Royal Liver, Cunard and Mersey Docks building at Pier Head; the Municipal Offices; and the Philharmonic Hall.

Constructed between 1925 and 1934, the *Mersey Tunnel* connecting Liverpool and Birkenhead was opened to traffic on July 18, 1934, the total cost being estimated at £6,077,800. More than 17,000,000 vehicles pass through the Mersey Tunnel annually. A second tunnel between Liverpool and Wallasey was opened by the Queen on June 24, 1971, and a similar tunnel running adjacent to it was opened on Feb. 14, 1974.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Metropolitan District Council consists of a Lord Mayor and 98 Councillors.

The Lord Mayor (1976-77), R. F. Craine, M.B.E.
Stipendiary Magistrate, Leslie Mervyn Pugh (1965).
Chief Executive, A. J. Stocks.

MANCHESTER

MANCHESTER (Greater Manchester) (the *Mancunium* of the Romans, who occupied it in A.D. 78) is 189 miles N.W. of London. The municipal area is 28,720 acres (about 43 square miles) and the population (estimated 1973), 530,580.

Manchester is a commercial rather than an industrial centre, the industries being largely in the neighbouring towns. Within 25 miles radius, lives a population of 4,500,000 engaged in engineering, chemical, clothing, food processing and textile industries and providing the packing, transport, banking, insurance and other distributive facilities for those industries. The city is connected with the sea by the Manchester Ship Canal, opened in 1894, 35½ miles long, and accommodating ships up to 15,000 tons. Manchester Airport handles approximately 2,318,000 passengers yearly.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A., together with a large extension of 1938; the Royal Exchange, built in 1869 and enlarged in 1921; the Central Library (1934); the Art Gallery; Heaton Hall; the Gallery of English Costume; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); the Univer-

sity Institute of Science and Technology; the 15th-century Cathedral (formerly the parish church) and the Free Trade Hall. Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development, as has the Royal Northern College of Music.

The town received its first charter of incorporation in 1838 and was created a city in 1853. The new charter and title of city, under local government reorganization, was presented in May, 1974. The City Council consists of 99 Councillors. *The Lord Mayor (1975-76)* Dame Kathleen Ollerenshaw, D.B.E.

Stipendiary Magistrate, J. Bamber (1965).

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Tyne and Wear) a Metropolitan District on the north bank of the River Tyne, 8 miles from the North Sea and 272 miles N. of London, has an area of 11,401 acres and a population of 295,700. A Cathedral and University City, it is the administrative commercial and cultural centre for north-east England and the principal port. It is an important manufacturing centre with a wide variety of industries.

The principal buildings include the Castle Keep (12th century), Black Gate (13th century), West Walls (13th century), St. Nicholas's Cathedral (15th century, fine lantern tower), St. Andrew's Church (12th-14th century), St. John's (14th-15th century), All Saints (1786 by Stephenson), St. Mary's Roman Catholic Cathedral (1844), Trinity House (17th century), Sandhill (16th century houses), Guildhall (Georgian), Grey Street (1834-39), Central Station (1846-50), Laing Art Gallery (1904), University of Newcastle Physics Building (1962), Civic Centre (1963), Central Library (1969) and Eldon Square Development (1976). Open spaces include the Town Moor (927 acres) and Jesmond Dene. Seven bridges span the Tyne at Newcastle.

The City derives its name from the "new castle" (1080) erected as a defence against the Scots. In 1400 it was made a County, and in 1882 a City. The City Corporation comprises a Lord Mayor (1906) and 78 Councillors.

Lord Mayor (1976-77), H. J. White.

Chief Executive, K. A. Galley.

NORWICH

NORWICH (Norfolk) is an ancient City 110 miles N.E. of London. It grew from an early Anglo-Saxon settlement near the confluence of the Rivers Yare and Wensum, and now serves as provincial capital for the predominantly agricultural region of East Anglia. The name is thought to relate to the most northerly of a group of Anglo-Saxon villages or "wics". The present City comprises an area of 9,655 acres, with a population (1971 Census, preliminary) of 121,688.

Norwich serves its surrounding area as a market town and commercial centre, banking and insurance being prominent among the City's businesses. Continuously from the fourteenth century, however (when Flemish Immigrants helped to establish Norwich as the centre of the woollen industry until the Industrial Revolution) it has combined industry with commerce, and manufactures of a wide variety are now produced in the City. The biggest single industry is the manufacture of shoes and other principal trades are engineering, printing, and the production of chemicals, clothing, confectionery and other foodstuffs. Norwich is accessible to seagoing vessels by means of the River Yare, entered at Great Yarmouth, 20 miles to the east.

Among many historic buildings are the Cathedral (completed in the twelfth century and surmounted by a fifteenth century spire 315 feet in height), the Keep of the Norman Castle (now serving as a museum and also housing the Colman Collection of works by the Norwich School of painters), the fifteenth century flint-walled Guildhall, some thirty mediæval parish churches, St. Andrew's and Blackfriars' Halls, the Tudor houses preserved in Elm Hill and the Georgian Assembly House. The administrative centre of the City is the City Hall, built in 1938. A new central library, opened in 1963, is adjacent to the City Hall. The University of East Anglia has been established in Norwich and received its first students in 1963. The buildings of the University occupy a spacious site at Earlham on the City's western boundary.

The City's first known Charter was granted in 1158 by Henry II and its privileges and form of self government were prescribed successively by later Charters until the enactment of the Municipal Corporations Act, 1835. The City Council consists of 48 Councillors.

The Lord Mayor (1976-77), R. C. Frostick.
Chief Executive, G. G. Tisley.

NOTTINGHAM

NOTTINGHAM (Nottinghamshire) stands on the River Trent, 124 miles N.N.W. of London in one of the most valuable coalfields of the country with excellent railway, water (being connected by canal with the Atlantic and the North Sea), and road facilities. The municipal area is 18,364 acres and population (estimated, 1975) of 287,790.

The principal industries are hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, the manufacture of tobacco, chemicals, furniture, typewriters and mechanical products.

The chief buildings are the 17th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), Wollaton Hall (1580-88) owned by the City Council and now a Natural History Museum, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842-4), the Council House (1929), the Guildhall and Court House (1888), Shire Hall, Albert Hall, the University, Trent Polytechnic and Newstead Abbey, home of Lord Byron.

Snotingham or Notingeham, "the village or home of the sons of Snot" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobauc*, "Cave Homes". The City possesses a Charter of Henry II, and was created a City in 1897. Under local government reorganization, the style of city was reacquired from April, 1974. The City Council consists of 55 Councillors (including the Lord Mayor).

The Lord Mayor (1976-77), S. J. Rushton.

Chief Executive, M. H. F. Hammond.

OXFORD

OXFORD is a University City, an important industrial centre, and market town. A City from time immemorial, it has an area of 8,785 acres and a population of 115,100. Oxford is a parliamentary constituency returning one member and is governed by a Council of 45 members. Industry played a minor part in Oxford until the motor industry was established in 1912.

It is for its architecture that Oxford is of most interest to the visitor, its oldest specimens being the reputed Saxon tower of St. Michael's church, the remains of the Norman castle and city walls and the Norman church at Iffley. It is chiefly famous however, for its Gothic buildings, such as the Divinity Schools, the Old Library at Merton

College, William of Wykeham's New College, Magdalen College and Christ Church and many other college buildings. Later centuries are not represented by so many examples, but mention can be made of the exquisite Laudian quadrangle at St. John's College, the Renaissance Sheldonian Theatre by Wren, Trinity College Chapel, and All Saints Church; Hawke'smoor's mock-Gothic at All Souls College, and the superb example of eighteenth century architecture afforded by Queen's College. In addition to individual buildings, High Street and Radcliffe Square, just off it, both form architectural compositions of great beauty. Most of the Colleges have gardens, those of Magdalen, New College, St. John's (designed by "Capability" Brown) and Worcester being the largest.

The visitor will always find some of the college chapels, halls and gardens open for public inspection between 10 a.m. and 5 p.m.

Lord Mayor (1976-77), Miss A. H. Spokes.

Chief Executive, E. J. Patrick.

PLYMOUTH

PLYMOUTH is situated on the borders of Devon and Cornwall at the confluence of the Rivers Tamar and Plym, 210 miles from London, with an area of 19,936 acres and a population (Reg. Gen. Estimate) of 257,900.

Following extensive war damage, the city centre comprising a large shopping centre, municipal offices, law courts and public buildings, has been re-built. The main employment is provided by H.M. Dockyard. Many new industrial firms have become established in the post-war period. In conjunction with the Cornwall County Council, the Tamar Bridge was constructed linking the City by road with Cornwall.

The Lord Mayor presides over a Council of 66 Councillors.

The Lord Mayor (1976-77), A. Floyd.

Chief Executive, A. F. Watson.

PORTSMOUTH

PORTSMOUTH, a city, and local government district, with an area of 14½ sq. miles, occupies Portsea Island, Hampshire, with boundaries extending to the mainland. Portsmouth is 70 miles by road from London (90 minutes by electric train). It has a population (estimated, 1975) of 195,730.

Industries include H.M. Naval Base, the principal centre of employment with a labour force of 14,000, which occupies the south-western part of the Island. The holiday and tourist industry, centred on the coast at the resort area of Southsea, caters annually for 200,000 visitors and 1,000,000 day trippers. Other industries are shipbuilding and maintenance, electronics, aircraft engineering and the manufacture of corsets, cardboard boxes, confectionery, baby products, refrigerators and brushes. The commercial port (the Camber, Flathouse and Mile End is owned and run by the City Council. In 1976 a Continental Ferry Port was opened, with car ferries running to St. Maïo and Cherbourg.

Among many tourist attractions are Lord Nelson's flagship, H.M.S. *Victory*; Charles Dickens' birthplace at 393 Old Commercial Road, now a Dickens museum; Southsea Castle, now a museum of military history, and the Round Tower and Point Battery, which for hundreds of years have guarded the entrance to Portsmouth Harbour. Southsea is particularly noted for its panoramic views of the busy shipping lanes of the Solent and Spithead.

Lord Mayor (1976-77), I. G. Gibson.

Chief Executive, J. R. Hasiegrave, C.B.E., T.D.

SHEFFIELD

SHEFFIELD (South Yorkshire), the centre of the special steel and cutlery trades, is situated 159 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the River Don. The City is set in a beautiful countryside, its residential suburbs penetrating the Peak District of Derbyshire.

Sheffield has an area of 91,000 acres (nearly 150 square miles), including 4,065 acres of publicly owned parks and woodland, and a population (est. 1975) of 559,800. Though its cutlery, silverware and plate have long been famous, Sheffield has other and now more important industries—special and alloy steels, engineering and tools in great variety. Refractory materials, silver refining, brush making, the manufacture of confectionery, canning, type-founding, pharmaceutical products, paper and the making of snuff are other contrasting industries in Sheffield. Research in glass, metallurgy, radio-therapy and other fields is carried on.

The parish church of St. Peter and St. Paul, founded in the twelfth century, became the Cathedral Church of the Diocese of Sheffield in 1914. Parts of the present building date from about 1435. The principal buildings are the Town Hall (1807 and 1923), the Cutlers' Hall (1832), the University (1905 and recent extensions, including 19-storey Arts Tower), City Hall (1932), Central Library and Graves Art Gallery (1934), City Museum (1937), Castle Market Building (1959), the new retail market (1973), the rebuilt Mappin Art Gallery and the Crucible Theatre.

Sheffield was created a borough on Aug. 24, 1843, a county borough in 1888 and a city in 1893, the Mayor becoming a Lord Mayor in 1897. On April 1, 1974 Sheffield became a Metropolitan District Council incorporating Stocksbridge and most of the Wortley Rural area, and retained city status.

The Lord Mayor (1976-77), R. E. Munn.

Master Cutler (1975-76) 352nd Master of the Company of Cutlers in Hallamshire, N. Hanlon.

Chief Executive, I. L. Podmore.

SOUTHAMPTON

SOUTHAMPTON, the principal city of Southern England, is Britain's premier passenger port. The first Charter was granted by Henry II and Southampton was created a county of itself in 1447. In February, 1964, Her Majesty the Queen granted city status by Royal Charter. The city has an area of 12,071 acres excluding tidal waters and a population of 213,000. The University of Southampton (1952) had 5,370 students in 1975-76.

The Civic Centre, completed in 1939, comprises four blocks, municipal offices and law courts, guildhall, library and art gallery. The tower, which is a notable land-mark for shipping using Southampton Water and which can be seen for many miles from vantage points in the surrounding countryside, incorporates a clock and bells. Public open spaces total over 1,000 acres in extent and comprise 9 per cent. of the city's area. The Sports Centre is 267 acres in extent. The Common covers an area of 328 acres in the central district of the city and is mostly natural parkland.

The City Council consists of 51 councillors.

Mayor (1976-77), Mrs. M. Key.

Chief Executive, D. Scouller.

STOKE-ON-TRENT

STOKE-ON-TRENT (Staffordshire), familiarly known as The Potteries, stands on the River Trent 157 miles N. of London. The present municipal area is 22,916 acres (36 square miles), with a

population (estimated, 1975) of 255,800. The City is the main centre of employment for the half-million population of North Staffordshire. It is the largest clayware producer in the world (chinaware, earthenware, sanitary goods, refractories, bricks and tiles) and has a large coal mining output drawn from one of the richest coalfields in Western Europe, with proved reserves exceeding one thousand million tons. The City has iron works, steelworks, foundries, chemical works, engineering plants, rubber works, paper mills, and a very wide range of manufactures including textiles, furniture, electrical goods, vehicle components, toys, machinery, plastic materials, metal stampings, glass and glazes.

Extensive reconstruction has been carried on since 1930. A unique feature of the city is that it has six "centres" and more shops and public halls than other areas of comparable size. The City was formed by the federation in 1910 of the separate municipal authorities of Tunstall, Burslem, Hanley, Stoke-upon-Trent, Fenton, and Longton, all of which are now combined in the present City of Stoke-on-Trent. Each of the six areas still has its own public buildings and amenities, but all civic administration is controlled by the City Council.

The City has 72 Councillors and elects 3 Members of Parliament.

The Lord Mayor (1976-77), W. Screen.
Town Clerk, S. W. Titchener.

STRATFORD UPON AVON

STRATFORD UPON AVON (in Warwickshire, on the banks of the River Avon) had a population of 19,452 at the Census of 1971. As the birthplace of Shakespeare the borough is visited annually by travellers from all parts.

Shakespeare's Birthplace. Half timbered house preserved by Shakespeare Birthplace Trust. Contains period furniture and a collection of rare books, mss. and objects of Shakespearian interest. Garden contains the new Shakespeare centre. *King Edward VI School*. Founded by the mediæval Guild of the Holy Cross of Stratford, and re-endowed by King Edward VI. Here Shakespeare acquired his "small Latin and less Greek." *Anne Hathaway's Cottage*. At Shottery, one mile from the centre of the town, is the thatched farmstead, the early home of Shakespeare's wife, Anne Hathaway. A fine specimen of domestic architecture. *Shakespeare Memorial*. Mainly due to munificence of C. E. Flower (1830-92) and his wife. Group comprises *Library*, with 10,000 volumes of Shakespeare editions and dramatic literature. *Gallery of pictures*. *Gardens*. *Royal Shakespeare Theatre* burnt down in 1926, rebuilt 1932, with 1,300 seats, chiefly by American generosity. The Shakespeare Festival takes place from spring to autumn each year at this theatre.

Chief Executive, T. J. W. Foy.

WINCHESTER

WINCHESTER, the ancient capital of England, is situated on the River Itchen 65 miles S.W. of London and 12 miles north of Southampton. The City has an area of 3,890 acres and a population (1971 Census, preliminary) of 31,041.

Occupation of the city area can be traced back to 1800 B.C. but organized settlements appeared later. Saxon history is somewhat obscure but Winchester became the capital of Wessex and in the 9th century capital of all England. Alfred the Great made Winchester a centre of education. William the Conqueror marched straight from his victory at Hastings to Winchester where he established a new Palace, his Treasury and his capital. Here he compiled Domesday Book as the returns

came in from the shires. Winchester remained the capital for many years, but its decline as a capital began with the civil war between Stephen and Matilda; and by 1338 it had lost its favourable position.

Winchester is rich in architecture of all types but the Cathedral takes first place. The longest Gothic cathedral in the world, it was built in 1079-1093 and exhibits splendid examples of Norman, Early English and Perpendicular styles. Winchester College, founded in 1382, is one of the most famous public schools, the original building (of 1393) remaining almost unaltered. St. Cross Hospital, the third great mediæval foundation in Winchester, lies 1 mile south of the City. Founded in 1136 by Bishop Henry de Blois, the Almshouses were re-established in 1445 by Cardinal Henry Beaufort. The Chapel and dwellings are of great architectural interest, and visitors may still receive the "Wayfarer's Dole" of bread and ale.

It is not certain when Winchester was first designated a city but it is probable that the term was applied between 650 and 700. Winchester was one of the oldest corporations in the country; the first written record of a Mayor occurs in 1200.

Recent excavations in the Cathedral Close have revealed the sites of two earlier minsters, including the original burial place of St. Swithun, before his remains were translated to a site in the present Cathedral. Excavations in other parts of the city have thrown light on Norman Winchester, notably on the site of the Castle, where new Law Courts have been built.

Mayor (1976-77), Mrs. G. A. Shave.
Chief Executive, E. M. E. White.

YORK

The City of YORK is a District in the County of North Yorkshire, and is an archiepiscopal seat. The City has an area of 7,295 acres and a population of 102,700. It returns one member to Parliament and is governed by 39 Councillors.

The recorded history of York dates from A.D. 71, when the Roman Ninth Legion established a base under Petilius Cerealis which later became the fortress of Eboracum. By the 14th century the city had become prosperous and was used as the chief base against the Scots. It became a great mercantile centre, chiefly owing to its control of the wool trade, but under the Tudors its fortunes declined, though Henry VIII made it the headquarters of the Council of the North.

With its development as a railway centre in the 19th century the commercial life of York expanded and it is now a flourishing modern city. The principal industries are the manufacture of chocolate, railway coaches, scientific instruments, glass containers and sugar. The City is also an important tourist centre.

It is rich in examples of architecture of all periods. The earliest church (built, 627) was succeeded by several others until, in the 12th to the 15th centuries, the present Minster was built in a succession of styles. The finest features are the West front with its two towers, the spacious transepts and the stained glass. Other examples within the city are the mediæval city walls and gateways, churches and guildhalls. Domestic architecture includes the Georgian mansions of The Mount, Micklegate and Bootham. Its museums are world-famous and include the Castle Museum which is one of the best-known folk museums in Great Britain and the new National Railway Museum.

Rt. Hon. Lord Mayor (1976-77), J. Archer.
Sheriff (1976-77), Mrs. D. C. Walker.
Chief Executive, R. Howell.

AERODROMES AND AIRPORTS

There are 165 aerodromes in Great Britain, Northern Ireland, the Isle of Man and the Channel Islands which are either State owned, operated by the Civil Aviation Authority or licensed for use by civil aircraft. A number of unlicensed airfields not included in this list are also available for private use by permission of the owner or controlling authority.

S=Aerodrome owned and operated by the State.

CAA=Aerodrome operated by the Civil Aviation Authority.

BAA=Aerodrome operated by the British Airports Authority.

M=Aerodrome owned or operated by Municipal Authority.

J=Military airfield available for civil use by prior permission.

H=Licensed helicopter station.

Those aerodromes which are designated as Customs airports are printed in bold type. Customs facilities are available at certain other aerodromes by special arrangement.

ENGLAND AND WALES

THE PRINCIPALITY OF WALES

Position and extent.—Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 8,017 sq. miles (5,130,880 acres); it is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, Hereford and Worcester and Gloucester, and on the W. by St. George's Channel. Across the Menai Straits is the Welsh island of *Anglesey* or *Ynys Môn* (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826 (freed from toll as from Jan. 1, 1941) and by the tubular railway bridge (1,100 ft. long) of the former L.M. & S. Railway, built by Stephenson in 1850. Holyheadharbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Dun Laoghaire and Dublin (70 miles).

Population.—The population at the Census of 1971 was 2,723,596 (preliminary figures), compared with 2,644,023 at the 1961 Census.

Relief.—Wales is mostly mountainous, the chief systems being those of North Wales (Snowdon 3,560 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-mawddwy 2,970 ft.); Powys (Pinnlunnon 2,468 ft., Dryan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,906 ft., Pen-y-gader fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Pinnlunnon to the English border. The *Wye* (130 miles) also rises in the slopes of Pinnlunnon. The *Usk* (56 miles) flows into the Bristol Channel, through Gwent. The *Dee* (70 miles) rises in Baia Lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee". The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Gwynedd, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, and Birmingham is supplied from a chain of reservoirs in the Elan and Cierwen valleys.

The Welsh Language.—Statistics published on Oct. 1, 1973, show that only 542,400 persons (of three years and over) in Wales were able to speak Welsh at the time of the 1971 Census, compared with 656,000 at the 1961 Census and 715,000 at the 1951 Census. One per cent. of the population could speak Welsh only, compared with 4 per cent. in 1931. The proportion of people speaking Welsh fell from 28.9 per cent. in 1951 to 20.8 per cent. in 1971. As in 1961, the Western Counties (75.9 per cent.), had the highest proportion of Welsh speakers.

Flag.—A red dragon on a green and white field (per fess argent and vert a dragon passant gules). The flag was augmented in 1953 by a royal badge on a shield encircled with a ribbon bearing the words *Ddraig Goch Ddyry Cychwyn* and imperially crowned. Only the unaugmented flag is flown on Government offices in Wales and, where appro-

priate, in London. Both flags continue to be used elsewhere.

EARLY HISTORY

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* and *Belgae* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caratacus* (Caractacus or Caradog), Chieftain of the Catuvellauni and son of *Cunobelinus* (Cymbeline) King of the Trinobantes. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Caerleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall giving them the name of *Waelisc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated Wales from Cornwall and the battle of Chester (613) cut off communication with Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century Rhodri Mawr united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last named being Howel Dda, who codified the laws of the country, while Llewelyn ap Iŷtysyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1018 to 1023.

The Norman Conquest.—After the Norman conquest of England, William I created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of Griffith ap Rhys and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house of Gwynedd, in the north, gained an ascendancy over the whole of Wales, and Llywelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign. Llywelyn ap Gruffydd (grandson of Llywelyn ap Iorwerth), the last native prince, was killed in 1282 during hostilities between the Welsh and English. On Feb. 7, 1301, Edward of Caernarvon, son of Edward I, was created *Prince of Wales*.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

CARDIFF

CARDIFF (South Glamorgan) at the mouth of the rivers Taff, Rhymney and Ely, is the capital City of Wales and one of Britain's major administrative, commercial and office centres. It has many industries including steel works, car component manufacturing, cigars and a flourishing port with a substantial and varied trade, including citrus fruits and timber. There are many fine buildings in the civic centre started early this century which includes the City Hall, the National Museum of Wales, University Buildings, Law Courts, Welsh Office, County Hall, Police Headquarters and the Temple of Peace and Health. Also in the city are Llandaff Cathedral, the Welsh National Folk Museum at St. Fagans and Cardiff Castle.

New buildings include the Sherman Theatre and the Cardiff College of Music and Drama. The City returns four Members to Parliament. Population, 287,000.

Rt. Hon. Lord Mayor (1976-77), I. Jones.

Stipendiary Magistrate, Sir Lincoln Hallinan.

Chief Executive, H. Mansfield, O.B.E.

SWANSEA

SWANSEA (in Welsh, Abertawe), is a City and a seaport of West Glamorgan with its own municipal airport. The beautiful Gower Peninsula was brought within the City boundary under local Government reform on April 1, 1974. The trade of the port includes coal, patent fuel, ores, and the import and export of oil. The municipal area is 60,511 acres, with a population (1975 est.) of 188,350.

The principal buildings are the Norman Castle (rebuilt in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton and the Guildhall, containing the Brangwyn panels. Swansea was chartered by the Earl of Warwick, circa 1158-1184, and further charters were granted by King John, Henry III., Edward II., Edward III. and James II., 2 from Cromwell and 1 Lord Marcher.

Mayor (1976-77), W. W. Sivertsen.

Chief Executive, A. N. F. Rees.

THE KINGDOM OF SCOTLAND

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between $60^{\circ} 51' 30''$ and $54^{\circ} 38' N.$ latitude and between $1^{\circ} 45' 32''$ and $6^{\circ} 14' W.$ longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 29,798 square miles (or 19,068,724 acres) exclusive of inland water, tidal water and foreshore. The population (1971 Census, prelim.) was 5,227,706, an increase of 48,362 or 0.09 per cent. annually since the census of 1961. The average density of the population in 1971 was 175 persons per square mile, compared with 171 persons per square mile in 1951.

Land's End to John o' Groat.—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 603 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends farther N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV (1488–1513).

Relief.—There are three natural orographic divisions of Scotland. The *Souther Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Broad Law (2,754 feet) in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and *Ben Muich Dhui* (4,296 feet). The *Chelviot Hills* form a natural boundary between Scotland and England, their highest point being *The Cheviot* (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet) and Stonebyres Linn (86 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (10,289 ft.), opened in 1887, and the *Tay Road Bridge* (7,365 ft.), opened by H.M. Queen Elizabeth the Queen Mother on Aug. 18, 1966. The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles),

the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth (Railway) Bridge* (1890), constructed at a cost of £3,000,000, with a length of 5,330 ft., and the *Forth (Road) Bridge*, with a total length of 6,156 ft. (over water) and a single span of 3,300 ft. The latter was completed in 1964 at a cost of £20,000,000.

The waterfall, *Eas-Caul-Aulin* in Sutherland with a total height of 658 ft. and the *Falls of Glomach* in Ross-shire, with a drop of 370 feet, are the highest in the British Isles; the *Grey Mare's Tail* (Dumfries-shire) is 200 feet.

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Erich in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Maree in the northern Highlands.

Climate.—The general climatic values for Scotland are given below, together with the corresponding values for England and Wales within brackets—mean air temperature reduced to sea level $47.1^{\circ} F.$ (49.7); rainfall, 50.3 inches (35.2); number of days with rain 217 (188); mean hours per day of bright sunshine, 3.36 (3.96).

Gaelic Language.—The preliminary report on the 1961 Census of Scotland showed that 76,587 persons were Gaelic speakers, compared with 95,447 in 1951. 1,079 persons spoke Gaelic only and not English (compared with 2,178 in 1951). The majority of Gaelic speakers lived in the counties of Ross and Cromarty (38.29 per cent.) and Inverness (24.44 per cent.). 75,508 persons spoke both Gaelic and English, compared with 93,269 in 1951.

Commerce.—The principal exports are machinery, ships and vehicles, iron and steel manufacturers, non-ferrous metals, woollen and worsted yarns and products, food and drink and textile materials. Whisky continues to be the leading export to dollar countries.

THE SCOTTISH ISLANDS

The preliminary report on the 1971 Census of Scotland showed a continued decline in the population of the islands. The populations at April 25, 1971, with 1961 populations in parenthesis, included: Islay, 3,825 (1961, 3,871); Mull (including Iona, etc.), 1,560 (1,635); Coll and Tiree, 1,021 (1,173); Skye 7,372 (7,772); Barra, 1,087 (1,564); North Uist, 1,732 (1,932); South Uist, 3,781 (4,000).

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is $375\frac{1}{2}$ square miles, with a population (1971 Census, preliminary) of 17,075 (1961, 18,888). 1971 populations of the islands (with 1961 figures in *italics*) are: Eday, 179 (202); Hoy and Walls, 531 (699); Mainland, 6,502 (7,764); N. Ronaldsay, 134 (166); Rousay, 256 (350); Sanday, 592 (682); Shapinsay, 346 (432); S. Ronaldsay, 990 (1,275); Stronsay, 440 (497); Westray 841 (1,015); Kirkwall (4,618), in *Mainland* (Pomona), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between *Mainland* and *Hoy*, was the war station of the Grand Fleet from 1914–19 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Zetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Zetland or Shetland, a group of about 100 islands and islets, of which one-fifth are inhabited. The total area of the group is 551 square miles, with a population (1971 Census, prelim.) of 17,298 (1961, 17,978). Lerwick (6,107), in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group is famous for handknitted hosiery, and *Unst* (with Fair Isle, 1,129) for the finest of the Shetland woollen work for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51' 30" N. lat.).

Western Islands.—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. **The Hebrides.**—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorenes*, a name that survives in the Anglican bishopric of "Sodor and Man." The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree, famous as a refuge of Prince Charlie after his defeat at Culloden, Inverness-shire, in 1746), which contains the *Cullins* (Sgurr Alasdair 3,309 feet), *Red Hills* (Ben Callich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles), containing *Ben More* (3,169 feet), *Ben Buy* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura* (Beinn-an-Oir, 2,571 feet and Beinn Chaolais, 2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis with Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callanish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but usually regarded as a heathen monument of the remote Stone Age.

EARLY HISTORY

Prehistoric Man.—The *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body, seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands. Celtic *Goidels*, *Brythons* and *Belgae* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked

by the *Wall of Pius*, towards which ran military roads from the *Cheviots*. The Roman occupation of Southern *Caledonia* was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall* (Tyne to Solway Firth).

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brythons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or *Picts' Work Dyke*, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the *Cheviots*). *Christianity* was introduced into Southern *Caledonia* about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the *Picts* and *Scots*, the *Brythonic Waelisc* (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the *Lothians*. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in *Caledonia*. In the reign of Malcolm I (943-954) the *Brythons* of *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (*Lothian*) being conquered by Malcolm II (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at *Stirling Bridge* (1297) and *Robert Bruce*, who won the victory of *Bannockburn* (1314). James IV and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI, the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary Queen of Scots, was the great-granddaughter of Henry VII), succeeded Queen Elizabeth I on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII and II, the crown devolved upon William III (grandson of Charles I) and Mary (daughter of James VII and II) and, their issue failing, upon Anne (second daughter of James VII and II). Anne's children died young, and the throne devolved upon George I (great-grandson of James VI and I). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII and II, but died after a military success at *Killiecrankie*. In 1715, armed risings led to the indecisive battle of *Sheriffmuir*, but the movement died down until 1745, when Prince Charles Edward defeated the Royalist troops under Sir John Cope at *Prestonpans* and advanced to Derby in England (1746). From Derby, the adherents of "James VIII and III" (the title claimed for his father by Prince Charles Edward) fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III, in 1468, the Danish suzerainty being formally relinquished in 1590.

PRINCIPAL SCOTTISH CITIES

EDINBURGH

EDINBURGH, the Capital of Scotland, has a municipal area of 34,781 acres, and a population of 475,042. The city is built on a group of hills and contains in Princes Street one of the most beautiful thoroughfares in the world. The principal buildings are the Castle, which includes St. Margaret's Chapel, the oldest building in Edinburgh, and near it, the Scottish National War Memorial; the Palace of Holyroodhouse; Parliament House, the present seat of the judicature; the University; St. Giles, Cathedral (restored 1879-83); St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott); the General Register House (Robert Adam); the National and the Signet Libraries; the National Gallery; the Royal Scottish Academy; and the National Portrait Gallery. The city is governed by the City of Edinburgh District Council which includes the area of South Queensferry, Kirkcaldon, Currie, Ratho and Balerno and sends 9 Members to Parliament.

Rt. Hon. Lord Provost, J. Millar.

Chief Executive, E. G. Glendinning.

GLASGOW

GLASGOW, a Royal Burgh, City, largest District in the Strathclyde Region, and the principal commercial and industrial centre in Scotland, has a municipal area of 48,822 acres and a population of 880,617. The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries in the world. The principal industries include ships, heavy engineering, motor cars, aero and marine engines, chemicals, printing, carpet, cotton thread, food processing, etc. The chief buildings are the Early Gothic former Cathedral, the University (Sir Gilbert Scott), the City Cham-

bers, Pollok House, the Transport Museum, Kelvingrove Art Galleries and the Mitchell Library, Home of Scottish National Orchestra, Scottish Opera, etc. The city is governed by the City of Glasgow District Council with 72 Members and sends 15 Members to Parliament.

Rt. Hon. Lord Provost, P. T. McCann.

Chief Executive, C. Murdoch.

ABERDEEN

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 126 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 46,557 acres, with a resident population of 212,237. The chief industries are quarrying and granite working, white fish, salmon and herring fisheries, engineering, chemicals, plastics, ship-building, tourism, paper-making, clothing manufacture, wool and linen fabric. The city and surrounding area is now the principal centre of North Sea oil exploration. Aberdeen is famous for its many beautiful buildings, including Marischal College, reputed to be the most imposing white granite building in the world, King's College (1494), St. Machar Church (1378), the Auld Brig o'Balgownie (1320) and the Municipal Buildings. There is a sea beach promenade which stretches for fully two and a half miles along golden sands, and at Hazlehead an open public park of 800 acres, of which 200 are wooded, with one of the finest public golf courses in Scotland and a zoo. The climate is bracing and healthy. The city is governed by a District Council of 48 Members.

The Lord Provost (1975-77), R. S. Lennox.

Chief Executive, J. F. Watt.

Northern Ireland

(For geographical and historical notes on Ireland, see Index)

The population of Northern Ireland in 1973 was 1,536,065 (males, 754,676; females, 781,389) compared with a total population of 1,484,775 at the Census of 1966. In 1971 the number of persons in the various religious denominations (expressed as percentages of the total population) were: Roman Catholic, 31.4; Presbyterian, 26.1; Church of Ireland, 2.2; Methodist, 4.7; others 5.8; not stated, 9.4. Northern Ireland has a total area of 5,452 sq. miles (land, 5,206 sq. miles; inland water and tideways, 246 sq. miles) with a density of population of 293 persons per sq. mile in 1971.

Constitution and Government. A separate parliament and executive Government was established for Northern Ireland in 1921 by the Government of Ireland Act. The Northern Ireland Constitution Act, 1973, abolished the post of Governor and Parliament of Northern Ireland and provided for the transfer of certain legislative functions to a Northern Ireland Assembly and Executive. Elections for a Northern Ireland Assembly took place on June 28, 1973. Devolved Government came into operation with effect from January 1, 1974 but when the Executive collapsed the Northern Ireland Assembly was prorogued on May 29 1974. The Northern Ireland Constitution Act, 1974, which became law in July 1974, made provision for temporary arrangements for the government of Northern Ireland by the Secretary of State for Northern Ireland and also provided for the holding of elections and a Constitutional Convention. The Convention which had the purpose of considering what provision for the government of Northern Ireland was likely to command the most widespread acceptance throughout the community there, reported on November 8, 1975. The Convention was reconvened on February 3, 1976 so that it might be determined whether agreement could be reached on the specific and crucial issue of a system of Government within Northern Ireland which provided for a form of partnership and participation. No further report was made and the Convention was dissolved on March 5, 1976. Direct Rule continues in being under the terms of the Northern Ireland Act 1974.

FLAG.—The national flag is that of the United Kingdom.

BELFAST

BELFAST, a City, the seat of Government of Northern Ireland, situated at the mouth of the River Lagan at its entrance to Belfast Lough, has a municipal area of 16,017 acres, exclusive of tidal water (2,034) and a population (1973) of 353,700. The city received its first charter of incorporation in 1613 and has since grown, owing to its easy access by sea to Scottish coal and iron, to be a great industrial centre. The chief industries are ship-building and the manufacture of aircraft, machinery, textiles, ropes and tobacco. Belfast is an important seaport with extensive docks.

The principal buildings are of a relatively recent date and include the Parliament Buildings at Stormont, the City Hall, the Law Courts, the

Public Library and the Museum and Art Gallery. The Queen's University (previously Queen's College) was chartered in 1908.

The city returns 4 members to the House of Commons at Westminster. Belfast was created a city in 1888 and the title of Lord Mayor was conferred in 1892.

Lord Mayor, R. E. M. Humphreys.
Town Clerk, W. Johnston.

LONDONDERRY

LONDONDERRY, a City situated on the River Foyle, has a population (estimated, 1973) of 51,200 and was reputedly founded in 546 by St. Columba. Londonderry (formerly *Derry*) has important associations with the City of London. The Irish Society, under its royal charter of 1613, fortified the city and was for long closely associated with its administration. On April 2, 1969, the Corporation of Londonderry and Londonderry R.D.C. were dissolved and replaced by the Londonderry Development Commission. The Development Commission was dissolved in Sept. 1973, and its functions were taken over by the newly elected Local District Council and various Government departments and Area Boards.

Famous for the great siege of 1688-89, when for 105 days the town held out against the forces of James II until relieved by sea, Londonderry was an important naval base throughout the Second World War. Interesting buildings are the Protestant Cathedral of St. Columb's (1633) and the Guildhall reconstructed in 1912 and containing a number of beautiful stained glass windows, many of which were presented by the livery companies of London. The famous Walls are still intact and form a circuit of almost a mile around the old city. The manufacture of shirts and collars is the staple industry. Other industries include motor and mechanical engineering and fancy box making. New industries established in Londonderry in the post-war period include the manufacture of synthetic fibre and rubber, tyre cord and light engineering. A large part of Ulster's agricultural export trade passes through the port.

FINANCE

Taxation in Northern Ireland is largely imposed and collected by the United Kingdom Government. After deducting the cost of collections and of Northern Ireland's contributions to the European Economic Community the balance, known as the Attributed Share of Taxation, is paid over to the Northern Ireland Consolidated Fund. Northern Ireland's revenue is insufficient to meet its expenditure and is supplemented by a grant in aid.

PRODUCTION

Industries.—The total value of the industrial production of Northern Ireland in 1973 was approximately £1,693,000,000 and employment was given to about 195,000 persons. The products of the engineering, shipbuilding and aircraft industries which employed 47,000 persons, were valued at £208,000,000. The textile industries, employing 37,000 persons, produced yarns, fabrics, house-

hold textiles, handkerchiefs, carpets, hosiery, ropes and a wide variety of other products valued at approximately £294,000,000. The food and drink industry, giving employment to 20,000 persons, produced goods valued at £297,000,000 and clothing to the value of £69,000,000 was manufactured in 1973, of which £29,000,000 represented shirts and collars, which are manufactured principally in Londonderry. Other industries of importance to the economy of Northern Ireland are synthetic rubber and products, mineral oil refining, furniture and building materials and cardboard boxes and packing cases.

Minerals.—2,068 persons were employed in mining and quarrying operations in Northern Ireland in 1974 and the minerals raised were valued at £8,393,503.

Fisheries.—The total value of sea and freshwater fish caught in 1974 was £3,649,375.

COMMUNICATIONS

Seaports.—The net tonnage of shipping using the principal ports in 1975 was about 12,000,000 tons.

Belfast.—Regular services operate to and from ports on the Western coast of Great Britain and the Continent of Europe. In addition there are frequent though less regular, calls by many other coastal and foreign-going ships. There are roll on/roll off services to Liverpool, Ardrossan and Heysham. Container services—with adequate cranes available—operate to Liverpool, Heysham, Holyhead, Garston, Ardrossan and Southampton and there are weekly sailings catering for palletised and container traffic to ports in France, Germany, Holland, Belgium, Sweden, Norway and Denmark. *Larne.*—Roll on/roll off ferry services carrying passengers, cars and commercial vehicles operate nine times daily to Stranraer and five times daily to Cairnryan, also a roll on/roll off service for commercial vehicles operates once daily to Fleetwood. There is a daily lift on/lift off service to Cairnryan. *Warrenpoint.*—Container services operate to Garston and Preston three times weekly, Rotterdam, bi-weekly and Gothenburg fortnightly. A roll on/roll off berth has now been provided.

Road and Rail Transport.—The reorganization of public transport in Northern Ireland was completed by the Transport Act (N.I.), 1967, which provided for the abolition of the Ulster Transport Authority and the establishment of the Northern Ireland Transport Holding Company. The Holding Company took over the assets of the Authority and is responsible for the supervision of the subsidiary companies, Northern Ireland Carriers, owned jointly with the National Freight Corporation, which operates road freight services, Ulsterbus Ltd. which operates the public road passenger services, Northern Ireland Railways Co. Ltd., which provides the railway services, and Northern Ireland Airports Ltd. which is responsible for running the main airport at Aldergrove, near Belfast. A few privately operated bus services are provided in rural areas under licence. Citybus Ltd. provides omnibus services in the Belfast area. Road freight services are also provided by a large number of hauliers operating competitively under licence.

Air Transport.—Passenger and freight services operate between Belfast Airport and airports throughout Great Britain. A limited number of services are also operated to North America. In 1975, 1,200,000 passengers, and 11,000 metric tons of freight, including mail, were carried making the Airport the sixth busiest in the United Kingdom. Plans for the improvement of terminal, airside and landside facilities have recently been agreed and a major development programme is due to begin early in 1977.

Note.—Since the reorganisation of Local Government, rates in Northern Ireland are now collected by the Department of Finance and consist of two rates. A regional rate of £2.99 was made by the Department of Finance. Each of the 26 District Councils made their own separate rate. The regional rate was subject to subsidy at varying levels to provide a gradual transition from the previous differing rates made by former rating authorities.

THE ISLE OF MAN (MONA)

An island in the Irish Sea, in lat. 54° 3'–54° 25' N. and long. 4° 18'–4° 47' W., nearly equidistant from England, Scotland, and Ireland. The total land area is 141,263 acres (221 sq. miles), of which 76,701 acres are under cultivation. An interim report on the 1971 Census showed a total population of 56,289 (males, 26,461; females 29,828). In 1973 the births numbered 807 and the deaths 921. 165 persons were returned at the Census of 1961 as able to speak the Manx language, compared with 4,657 in 1901 and 355 in 1951. The principal

sectors of the Island's economy in terms of income generated and in order of importance (1971/72 figures) are Manufacturing Industry, Insurance, Banking and Finance, and Tourism.

Government.—The Isle of Man is governed by a Legislature, called the Tynwald, consisting of two branches—the Legislative Council and the House of Keys. The Council consists of the Lieutenant-Governor, the Bishop of Sodor and Man, the First Deemster, the Attorney-General and 7 members appointed by the House of Keys. The House

of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the adult male and female population, 13 from the six *sheedings*, 7 from Douglas, 2 from Ramsey, and 1 each from Castletown and Peel. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Lieutenant-Governor and the Speaker of the House of Keys. The Isle of Man is associated for certain purposes with the Common Market under Protocol 3 of the Treaty of Accession. Community rules on agricultural trade, customs duties etc., apply to the Island.

Finance.—The Island's Budget for 1975/76 provided for revenue and capital expenditure of £31,765,620. The principal sources of Government revenue are a) Income Tax, charged at the rate of 21.25 per cent of all taxable income and b) Customs and Excise Duties, collected on behalf of the Island under the "Common Purse Agreement" by

H. M. Customs and Excise. There are no surtax or death duties, although there is a Company Registration Tax, which is levied at the flat rate of £200 on every company incorporated in the Isle of Man which trades, and there is a Land Speculation Tax payable at the rate of 21.25 per cent.

An annual contribution of 5 per cent of the net "Common Purse" receipts is made towards the cost of defence and other common services provided by the United Kingdom Government.

There are also reciprocal Social Security arrangements with the U.K.

There are 36 primary, 6 secondary schools, a college of further education and a domestic science college, in addition to King William's College and the Buchan School for Girls.

CAPITAL, Ψ Douglas. Population (1971), 20,389; Ψ Castletown (2,820) is the ancient capital; the other towns are Ψ Peel (3,081), and Ψ Ramsey (5,048).

THE CHANNEL ISLANDS

Situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to the Crown, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres) Guernsey (15,654 acres), Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44) and Lihou (38), a total of 48,083 acres, or 75 square miles. In 1971 the population of Jersey was 72,532; and of Guernsey, etc. (1975) (Guernsey, 51,620; Alderney, 1,785; Sark, 604).

The climate is mild, and the soil exceptionally productive. The land under cultivation is about 38,765 vergées (2½ vergées=1 acre) in Jersey, and about 16,500 vergées (2½ vergées=1 acre) in Guernsey, the principal product of the soil of Jersey being potatoes, tomatoes and flowers, and of Guernsey, tomatoes, flowers and fern. The famous Jersey and Guernsey breed of cows have earned a well-deserved celebrity. The Lieutenant-Governors and Commanders-in-Chief of Jersey and Guernsey are the Personal Representatives of the Sovereign and the channel of communication between H.M. Government and the Insular Governments. The Bailiffs of Jersey and Guernsey, appointed by the Crown, are Presidents both of the Assembly of the States (the Insular Legislature) and of the Royal Courts respectively.

The official language is English and a Norman-French *patois* is also in use (except in Alderney). The principal imports are food, beverages, tobacco, manufactured goods, fuels and chemicals, and the chief exports potatoes, tomatoes, grapes, flowers and cattle. The chief town of Jersey is Ψ St. Heller on the south coast; the principal town of Guernsey is Ψ St. Peter Port, on the east coast, and of Alderney is St. Anne's.

The Commonwealth

The Commonwealth is a free association of the 36 sovereign independent states listed below together with their dependencies (mostly small islands which are dependencies of Britain, Australia or New Zealand) and the Associated States of the Eastern Caribbean.

UNITED KINGDOM	MALAWI
CANADA	MALAYSIA
AUSTRALIA	MALTA
NEW ZEALAND	MAURITIUS
BAHAMAS	NAURU (special member)
BANGLADESH	NIGERIA
BARBADOS	SEYCHELLES
BOTSWANA	SIERRA LEONE

FIJI	SRI LANKA
GAMBIA	SWAZILAND
GHANA	TANZANIA
GRENADA	TRINIDAD AND TOBAGO
GUYANA	UGANDA
INDIA	ZAMBIA
JAMAICA	TONGA
KENYA	WESTERN SAMOA
LESOTHO	PAPUA NEW GUINEA

AREA AND POPULATION.—The total area of the independent British Commonwealth is 10,123,670 square miles (excluding the U.K.). Details of the areas and populations of the Member States and dependencies appear in the following pages and are also tabulated on pp. 199–203. The total population of the Commonwealth is estimated to be approaching 900,000,000.

GOVERNMENT.—Most members of the Commonwealth are parliamentary democracies, their laws being made with the consent of a freely elected parliament after discussion in that parliament, the executive government holding office by virtue of majority in parliament. However, Nigeria (1966) has suspended its constitution and is under military rule; the Constitution granted to Lesotho on independence in 1966 was suspended in January, 1970. In January, 1971, Uganda came under military rule.

Queen Elizabeth II is recognized as Queen and Head of State in the following member countries of the Commonwealth: United Kingdom, Canada, Australia, New Zealand, Jamaica, Trinidad and Tobago, Fiji, Barbados, Mauritius, Bahamas, Grenada and Papua New Guinea. In each of these countries (except the United Kingdom) Her Majesty is personally represented by a Governor-General, who in many respects holds the same position in relation to the administration of public affairs as is held by the Sovereign in Britain (with the exception of certain constitutional functions which are performed by Her Majesty personally). The Governor-General is appointed by the Queen on the recommendation of the Government of the country concerned and is wholly independent of the British Government; in many cases he is a national of the country in which he holds office.

India, Ghana, Nigeria, Cyprus, Uganda, Tanzania, Kenya, Malawi, Zambia, Singapore, The Gambia, Guyana, Nauru, Sierra Leone, Botswana, Sri Lanka, Bangladesh, Malta and Seychelles are Republics with Presidents as Head of State, Malaysia has one of the State Rulers as elected Monarch (*Yang di-Pertuan Agong*) and Head of State; Lesotho, Tonga and Swaziland are monarchies which have their own Kings. Western Samoa has a Head of State whose functions are analogous to those of a constitutional monarch. All Members of the Commonwealth accept The Queen as the symbol of the free association of the member nations of the Commonwealth and as such, Head of the Commonwealth.

The status of member nations was defined by

the Imperial Conference of 1926 and given legal substance by the *Statute of Westminster, 1931*, in which the Commonwealth nations were described as "autonomous communities within the British Empire, equal in status, in no way subordinate one to another, but united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations." Other parts of the Commonwealth, such as the Dependent Territories and Associated States, are regarded as forming part of the Commonwealth by virtue of their relationship with member states of the Commonwealth.

CONSULTATION.—The most important means of consultation between Governments are Heads of Government Meetings. These Meetings, which replaced the more formal pre-war Imperial Conferences, have been held at frequent intervals since 1944. They are a useful means whereby Commonwealth Heads of Government consult together on major issues of international affairs and other matters which affect them all. It is not their practice to pass Resolutions or to seek to formulate common and binding policies on international issues; but they have on occasion made general statements of principle to which they all subscribe—such as the Commonwealth Declaration agreed at Singapore in January 1971 and the statement on Nuclear Weapon Tests issued during the meeting held at Ottawa in August 1973—and the policies of individual Governments are clearly often influenced by the information and ideas exchanged at these Meetings. In addition to meetings of Heads of Government, there are annual meetings of Finance Ministers, as well as less frequent meetings between Ministers or officials responsible for subjects such as trade, education, medicine and law.

RHODESIA.—Southern Rhodesia was united with Northern Rhodesia and Nyasaland in a federation which lasted from 1953 until 1963, since when Nyasaland (as Malawi, 1964) and Northern Rhodesia (as Zambia, 1964) have become independent. Southern Rhodesia made a unilateral declaration of independence on Nov. 11, 1965. Its present constitutional status is as set out in the Southern Rhodesia Act, 1965.

CITIZENSHIP AND NATIONALITY.—Each member of the Commonwealth of Nations defines the citizenship and nationality of its own people and determines the status of other Commonwealth nationals within its own boundaries. In most cases, though not in all, they possess a common status as British subjects (or Commonwealth citizens). Even where there is no such provision for a common status, the Members of the Commonwealth differentiate, in greater or lesser degree, as regards the grant of privileges, between citizens of the Commonwealth and aliens. The Republic of Ireland, which in 1949 ceased to be a member of the Commonwealth, is not regarded by the other Commonwealth nations as a foreign country or her citizens as foreigners.

THE JUDICATURE.—The Supreme Judicial Authority for certain parts of the Commonwealth is the Judicial Committee of the Privy Council. Appeals may be brought to it from the Courts of the dependencies and also from the Courts of certain independent members of the Commonwealth which have not abrogated the right of appeal (i.e. Australian States, New Zealand, Jamaica, Trinidad

and Tobago, Malaysia, Singapore, The Gambia, Barbados, Mauritius, Fiji, The Bahamas and Grenada). The Committee consists of such members of the Privy Council as have held or are holding high judicial office in Great Britain or are or have been judges in certain Commonwealth countries. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

DEFENCE.—Each of the independent members of the Commonwealth is completely responsible for its own defence and all are members of the United Nations. The United Kingdom and Canada belong to N.A.T.O.; the United Kingdom, Australia and New Zealand are members of S.E.A.T.O.; Australia and New Zealand are signatories of the Pacific Security Treaty. The United Kingdom has a defence agreement with Malta, and is a signatory to the Treaty of Guarantee of Cyprus. With Australia and New Zealand, the United Kingdom is also a partner in joint defence arrangements with Malaysia and Singapore.

THE ASSOCIATED STATES.—Early in 1967 the former colonies of Antigua, Dominica, Grenada, St. Kitts-Nevis-Anguilla and St. Lucia became "non-dependent" States in association with Great Britain. Legal effect was given to this status by the West Indies Act, 1967. In October, 1969, St. Vincent also became an Associated State. The main features of the association are that each State is responsible for its own internal affairs, may amend its own Constitution and may sever the association by unilateral declaration, subject to the observance of procedures contained in the Constitution of each State. Her Majesty's Government retains responsibility for the external affairs and defence of each territory. On February 7, 1974, Grenada left the association on becoming an independent member of the Commonwealth.

OVERSEAS DEPENDENCIES.—The United Kingdom, Australia and New Zealand have dependencies for which they are independently responsible. (See following sections.)

Colony (or Settlement): a territory belonging by settlement, conquest or annexation to the British Crown.

Protectorate: a territory not formally annexed, but in respect of which, by treaty, grant, usage, sufferance, and other lawful means, Her Majesty has power and jurisdiction.

Protected State: a territory under a ruler which enjoys Her Majesty's protection, over whose foreign affairs she exercises control but in respect of whose internal affairs she does not exercise jurisdiction.

Condominium: a territory for which responsibility is shared by two administering powers.

Leased Territories: this term applies only to that part of the mainland of China which was in 1898 leased to Great Britain for 99 years and is administered by the Government of Hong Kong.

Other Commonwealth Dependencies.—Australia and New Zealand administer a number of island territories and extensive Antarctic areas.

DEVELOPMENT AND FINANCE.—Complete financial autonomy is enjoyed by all members of the Commonwealth. In some countries, customs tariffs are lower for merchandise of Commonwealth origin than for imports from foreign countries. The British Government provides guarantees for the capital issues made by dependent territories and also provides budgetary assistance in many cases as well as direct loans and grants to assist development.

Under the Colonial Development and Welfare Act, 1940, annual sums of £5,000,000 were made available for developments and £500,000 for research for a ten-year period. Succeeding Acts

increased the total sum to be made available and extended the period to be covered. In 1965 the Act was extended for a final 5 years. It authorized Exchequer Loans towards the cost of approved development programmes amounting to £125,000,000 and a ceiling of £390,000,000 for development and welfare assistance in the period 1941-1970. Thereafter the development needs of the remaining dependencies have been dealt with under the provisions of the Overseas Aid Act, 1966.

PHYSIOGRAPHY

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec was captured by the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866.

Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41'.

Relief.—The relief of Canada is dominated by the mountain ranges running north and south on the west side of the Continent, by the pre-Cambrian shield on the east, with, in between, the northern extension of the North American Plain. From the physiographic point of view Canada has six main divisions. These are: (1) Appalachian-Adian Region, (2) the Canadian Shield, (3) the St. Lawrence-Great Lakes Lowland, (4) the Interior Plains, (5) the Cordilleran Region and (6) the Arctic Archipelago. The first region occupies all that part of Canada lying southeast of the St. Lawrence. In general, the relief is an alternation of highlands and lowlands, and is hilly rather than mountainous. The lowlands area seldom rises over 600 feet above sea level. The great Canadian Shield comprises more than half the area. The interior as a whole is an undulating, low plateau (general level 1,000 to 1,500 feet), with the more rugged relief lying along the border between Northern Quebec and Labrador. Throughout the whole area water or muskeg-

filled depressions separate irregular hills and ridges, 150 to 200 feet in elevation. Newfoundland, an outlying portion of the shield, consists of glaciated, low rolling terrain broken here and there by mountains. The flat relief of the St. Lawrence-Great Lakes lowland varies from 500 feet in the east to 1,700 feet south of Georgian Bay. The whole area in the western part slopes gently to the Great Lakes. The most striking relief is provided by the eastward facing scarp of the Niagara escarpment (elevation 250 to 300 feet). The Interior plains, comprising the Pacific Provinces, slope eastward and northward a few feet per mile. The descent from west to east is made from 5,000 feet to less than 1,000 feet in three distinct levels, with each new level being marked by an eastward facing *coteau* or scarp. Horizontal strata and peneplanation make for slight relief of the level to rolling type. Five fairly well-developed topographic divisions mark out the Cordilleran region of western Canada. These are: (1) coastal ranges, largely above 5,000 feet with deep fiords and glaciated valleys, (2) the Interior plateau, around 3,500 feet and comparatively level, (3) the Selkirk ranges, largely above 5,000 feet, (4) the Rocky Mountains with their chain of 10,000 to 12,000-foot peaks, and (5) the Peace River or Tramontane region with its rolling diversified country. The Arctic Archipelago, with its plateau-like character has an elevation between 500 and 1,000 feet, though in Baffin Land and Ellesmere Island the mountain ranges rise to 8,500 and 9,500 feet. Two tremendous waterway systems, the St. Lawrence and the Mackenzie, providing thousands of miles of water highway, occupy a broad area of lowland with their dominant axis following the edge of the shield.

Climate.—The climate of the eastern and central portions presents greater extremes than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months.

GOVERNMENT

The Constitution of Canada has its source in the British North America Act of 1867 which formed a Dominion, under the name of Canada, of the four provinces: Ontario, Quebec, New Brunswick and Nova Scotia; to this Federation the other Provinces have subsequently been admitted. Under this Act Canada came into being on July 1, 1867 (Dominion Day), and under the Statute of Westminster, which received the royal assent on Dec. 11, 1931, Canada and the Provinces were exempted (in common with other self-governing Dominions of the Commonwealth of Nations) from the operation of the Colonial Laws Validity Act, the Statute of Westminster having removed all limitations with regard to the legislative autonomy of the Dominions. Provinces admitted since 1867 are: Manitoba (1870), British Columbia (1871), Prince Edward Island (1873), Alberta and Saskatchewan (1905) and Newfoundland (1949).

The Executive power is vested in a Governor-General appointed by the Sovereign on the advice of the Canadian Ministry, and aided by a Privy Council.

FLAG.—Red maple leaf with 11 points on white square, flanked by vertical red bars one half the width of the square.

THE LEGISLATURE

Parliament consists of a Senate and a House of Commons. The Senate consists of 104 members, nominated by the Governor-General (age limit

75). They are distributed between the various provinces thus: 24 each for Ontario and Quebec, 10 each for Nova Scotia and New Brunswick, 6 each for Newfoundland, British Columbia, Manitoba, Alberta, and Saskatchewan and 4 for Prince Edward Island, 1 for North West Territories and 1 for Yukon; each Senator must be at least thirty years old, a resident in the province for which he is appointed, a natural-born or naturalized subject of the Queen, and the owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is elected every five years at longest.

The House of Commons has 264 members. Representation by provinces is at present as follows: Newfoundland 7, Prince Edward Island 4, Nova Scotia 11, New Brunswick 10, Quebec 74, Ontario 88, Manitoba 13, Saskatchewan 13, Alberta 19, British Columbia 23, Yukon 1, Northwest Territories 1.

THE JUDICATURE

The Judicature is administered by judges following the Civil Law in Quebec Province and Common Law in other Provinces. All Superior and County Court Judges are appointed by the Governor-General, the others by the Lieutenant-Governors of the Provinces, until age 70, except present incumbents who may remain until age 75. Each Province has its Court of Appeal and the highest court is the Supreme Court of Canada, composed of a Chief Justice and eight puisne judges, which holds three sessions each year. There is only one other Dominion Court, the Federal Court of Canada which has both a trial and an appeal division and which replaces the Exchequer Court with expanded jurisdiction.

NATIONAL DEFENCE

On Aug. 1, 1964, the Headquarters of the Royal Canadian Navy, the Canadian Army and the Royal Canadian Air Force were integrated to form a single Canadian Forces Headquarters (C.F.H.Q.) under a single Chief of Defence Staff. The role of C.F.H.Q. is to provide military advice to the Minister of National Defence and to control and administer the Canadian Forces which are organized in seven major commands: *Mobile Command* (units for support of the United Nations or other peacekeeping operations; ground forces, with tactical air support, for the protection of Canadian territory; combat forces in Canada for support of overseas commitments); *Maritime Command* (all sea and air forces on the Atlantic and Pacific coasts for defence of Canada against attack by sea, provision of anti-submarine defence in support of N.A.T.O., conduct of search and rescue operations and sea transport in support of Mobile Command; No. 1 Air Division (the Canadian contribution to strike reconnaissance forces available to the Supreme Allied Commander Europe (SACEUR); *Air Defence Command* (participates with U.S.A. in air defence of North America through NORAD); *Air Transport Command* (air transport for all Canadian forces; search and rescue operations in Ontario and Quebec); *Training Command*; *Canadian Forces Communications System*. In addition there is a *Reserve and Survival Organization* (aid to the civil power, emergency forces for national survival). Armed Forces expenditure for the fiscal year ended March 31, 1976, was \$2,797,855,782.

Chief of Defence Staff, Gen. J. A. Dextraze.

On March 31, 1976, the total strength of the Canadian Armed Forces was 78,412.

EDUCATION AND LANGUAGE

Education is under the control of the Provincial Governments, the cost of the publicly controlled schools being met by local taxation, aided by provincial grants. There were (1974-75) 15,191 publicly controlled elementary and secondary schools with 5,415,915 pupils. In addition there were 169,040 pupils in 1,094 private elementary and secondary schools. There are special schools for Indians with 33,825 pupils (1974-75). In 1974-75 there were 68 degree-granting universities with a full-time university enrolment of 350,960, as well as 211,260 students in other post-secondary, non-university institutions.

Canada has two official languages, English and French. At the 1971 census 67.1 per cent. of the total population gave English as their official language, 18.0 per cent. French, 13.4 per cent. both English and French, and the remaining 1.5 per cent. neither English nor French.

CANADIAN PRODUCTION

Agriculture.—About 7 per cent. of the total land area of Canada is classified as farm land and approximately half of this is under cultivation, the remainder being woodland or suitable only for grazing purposes. More than three-quarters of the land now cultivated is found in the prairie region of Western Canada. Farm cash receipts from the sale of farm products in 1975 were \$9,790,299,000. Livestock, poultry and eggs contributed \$3,432,330,000; field crops \$4,658,959,000 and dairy products \$1,349,320,000.

Canadian grain crops (in thousands of bushels):

ALL CANADA	1973	1974	1975
Wheat	604,738	488,513	627,515
Oats	326,880	254,745	289,619

Corn for grain	110,365	101,440	142,648
Rapeseed	53,200	51,300	72,100

Livestock.—In 1976, the livestock included 13,696,500 cattle, 504,500 sheep, 5,467,300 hogs & 36,772,000 poultry. The total milk production in 1975 was 17,674,949,000 lb.; butter, 291,865,000 lb.; factory cheese, 265,312,000 lb.; concentrated milk products 766,166,000 lb.; ice cream mix 31,555,000 gallons.

Fur Production.—Fur farms in Canada in 1974-5 produced 1,114,102 pelts valued at \$16,587,286, mink contributing 99 per cent of the total. Wild life pelts totalled 3,241,148 with a value of \$24,949,708.

Fisheries.—The total value of fishing products and by-products in 1974 was \$709,033,000.

Forestry.—About 1,259,192 square miles, or 35 per cent. of the total land area is in forests, producing in 1973, about 673,160,000 cubic feet of merchantable timber. The value of forest products in 1973 was newsprint \$1,339,411,000; paper (other than newsprint) \$912,869,000; lumber \$2,227,156,000; wood pulp \$1,301,486,000.

Minerals.—Canada was, in 1973, the world's leading producer of nickel, silver, zinc and asbestos, and ranked second in gypsum, molybdenum, potash and copper. The total value of mineral production in 1975 was \$13,402,603,000. The value of principal minerals produced was: crude petroleum \$3,781,067,000; copper \$1,016,819,000; nickel \$1,109,230,000; zinc \$895,357,000; iron ore \$719,036,000; natural gas \$686,614,000; natural gas by-products \$767,766,000; potash \$346,806,000; asbestos \$266,943,000; gold \$276,125,000; silver \$176,627,000; coal \$575,800,000; cement \$265,283,000; sand and gravel \$260,340,000; lead \$151,837,000.

COMMUNICATIONS

Railways.—The total first main track mileage of railways in operation on Dec. 31, 1974, was 44,266 miles, the capital of the railways being (1974) \$6,141,787,049; operating revenues \$2,568,993,823; and operating expenses \$2,512,922,021. In 1974 the passengers carried on railways numbered 24,134,340, and revenue freight 138,655,302 ton-miles.

Shipping.—The registered shipping on Dec. 31, 1975 including inland vessels, was 31,288 vessels with gross tonnage 4,135,367. The volume of international shipping handled at Canadian ports in 1974 was 116,966,358 tons loaded and 66,930,216 tons unloaded.

Canals.—The bulk of canal shipping in Canada is

handled through the Montreal-Lake Ontario and Welland Canal sections of the St. Lawrence Seaway. Total Seaway transits in 1975 (unduplicated between the two sections) numbered 7,099 carrying 66,895,989 cargo tons. Principal commodities carried were iron ore, wheat, corn, barley, soybeans, fuel oil, manufactured iron and steel, and coal.

Civil Aviation.—The number of passengers carried in 1974 (all carriers) was 24,621,126. 550,786,432 ton-miles of freight were carried.

Motor Vehicles.—Total motor vehicle registrations numbered 11,002,003 in 1974.

Post.—There were 8,665 postal facilities operating in Canada on March 31, 1975. 5,236,834 points of call were served by letter carriers on 11,968 full and 459 partial letter carrier routes. Mail was delivered to 887,338 customers through 4,956 rural routes and suburban services. Total postal revenue in the fiscal year 1974-75 was \$617,743,000; total expenditure \$938,682,000.

YUKON TERRITORY

The Yukon Act, 1970, as amended, provides for the administration of the Territory by a Commissioner acting under Instructions from time to time given by the Governor in Council or the Minister of Indian Affairs and Northern Development. Legislative powers, analogous to those of a provincial government, are exercised by the Commissioner in Council. The Council comprises twelve members elected from electoral districts in the Territory. The area of the Territory is 207,076 square miles with a population (Jan. 1, 1976) of 21,000. Mining is the chief industry, though trapping remains important and there is considerable timber production. Mining production, including asbestos, copper, silver, lead, zinc, gold and nickel, was valued at \$228,898,000 in 1975.

SEAT OF GOVERNMENT, Whitehorse. Pop. (1971) 11,217.

Commissioner, J. Smith.

NORTHWEST TERRITORIES

The Northwest Territories Act, 1970, as amended, provides for an executive, legislative and judicial structure. Legislative powers are exercised by the Commissioner in Council under the direction of the Minister of Indian Affairs and Northern Development. Council comprises 15 elected members.

The Northwest Territories are subdivided into the districts of Mackenzie, Keewatin and Franklin.

The area of the Northwest Territories is 1,304,903 square miles with a population of 38,000 (estimated Jan. 1, 1976). The chief industry is mining, with a total value of \$189,477,000 in 1975. Zinc and lead contributed 74 per cent. of the total; gold and silver 21 per cent., and natural gas and petroleum 4 per cent.

SEAT OF GOVERNMENT, Yellowknife. Pop. (1971) 6,122.

Commissioner, S. M. Hodgson.

PROVINCES OF CANADA

ALBERTA

Area and Population.—The Province of Alberta has an area of 255,285 square miles, including about 6,485 square miles of water, with a population (estimated January, 1976) of 1,804,000.

Government.—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 75 members, elected for five years, representing 75 electoral districts in the Province. At a provincial election held in March, 1975, the Progressive Conservative Party took 69 seats, Social Credit Party (in office for 36 years), 4, the

New Democratic Party, one seat and Independent one seat.

Production.—The mining, manufacturing and construction industries have increased in economic impact so much more forcibly that agriculture is no longer of prime importance in Alberta.

The net value of production by industries (estimated 1975) is: mining \$5,374,000,000; construction \$1,570,000,000; manufacturing \$1,407,000,000; electric power \$221,000,000; agriculture \$1,519,000,000; other \$32,000,000. Total: \$10,131,000,000.

Mining (1975 preliminary):—Crude oil \$3,254,971,000; natural gas \$1,639,898,000; natural gas by-products \$748,063,000; coal \$185,000,000; sulphur \$87,749,000; cement \$25,410,000.

Manufacturing.—The value of manufacturing shipments (1975 preliminary) was \$3,812,000,000. Number of industrial establishments 1,860, total employees 60,168. The leading industries are slaughtering and meat processing, petroleum refining, chemicals and chemical products, primary metal and metal fabricating products.

Government Finance—Fiscal Year 1976-77 [Budgetary Estimates]—Revenue \$2,930,000,000; Expenditure \$2,961,400,000. NOTE: The Budgetary revenue figure does not include funds allocated to the Alberta Heritage Savings Trust Fund.

Finances.—Estimated current Revenue for 1976-77, \$3,615,250,000. Estimated current expenditure, \$3,615,245,000. There was no direct debt at March 31, 1976.

Production and Industry.—The production levels of the four leading industries were estimated for 1975 as follows: wood manufactures, \$1,500,000,000; paper and allied industries, \$1,400,000,000; minerals, \$1,223,300,000; agriculture, \$373,000,000; fisheries, \$146,000,000. Manufacturing activity is based largely on the processing of products of the main basic industries. The principal manufacturing centres are Vancouver, New Westminster, Victoria, North Vancouver and Port Moody. Forestry and forest-based industries form the most important economic activity, accounting for approximately 40 per cent. of total production. British Columbia is the leading province of Canada in the quantity and value of its timber and sawmill products. Mining, the second most important economic activity, is based on copper, zinc, lead, iron concentrates, molybdenum, coal, natural gas, crude petroleum, asbestos and nickel. Molybdenum production is approximately 90 per cent. of the Canadian total. The most important agricultural products are livestock, eggs and poultry, fruits and dairy products. Salmon accounts for approximately 75 per cent. of the value of fisheries. Other species include halibut, herring, sole, cod, flounder, perch, tuna and shellfish. The climate is healthy, quite moderate on the coast and continental east of the coast mountains. The economy is dependent upon markets outside the province for

the disposal of most of the products of her industry. Canadian and world markets receive forestry, mineral, fishing and agricultural products.

Transport.—The province has deep water harbours which are well serviced by railways and modern paved highways. Vancouver is the base for regular scheduled air routes to other parts of Canada, the United States; Europe, Mexico, South America, Hawaii, Fiji, Australia, Japan, Hong Kong and the Middle East.

Principal Cities.—CAPITAL, Ψ VICTORIA, Metropolitan population (1972) 199,000. Ψ Vancouver (founded in 1886), the largest city in the Province, metropolitan population (1972) 1,098,000, is the western terminus of the Canadian Pacific Railway and the Canadian National Railways (the C.N.R. also has a terminus at Prince Rupert) and the southern terminus of the British Columbia Railway, and possesses one of the finest natural harbours in the world, servicing a variety of vessels, including large bulk cargo carriers. Other principal cities are Prince George (65,000), Kamloops (55,000), Kelowna (45,000) and Nanaimo (44,000).

MANITOBA

Area and Population.—Manitoba, originally the Red River settlement, is the central province of Canada. The Province has a considerable area of prairie land but is also a land of wide diversity combining 400 miles of sea-coast, large lakes and rivers covering an area of 30,225 square miles and Precambrian rock which covers about three-fifths of the Province. The total area is 251,000 square miles with a population estimated at 98,000 in 1973.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 15 Ministers, who are members of the Legislative Assembly of 57 members. Each member of the Legislative Assembly receives an annual sessional indemnity of \$17,352.

The New Democratic Party has formed the government of Manitoba since June 25, 1969. The standing in the House at May 1, 1975 was: New Democrats 31, Progressive Conservative 21, Liberal 3. **Lieut.-Governor**, His Honour Francis L. Jobin (1976).

Finance.—The revenue of the provincial government, 1975-76, is estimated at \$1,163,656,000 and the expenditure \$1,176,490,000.

Agriculture and Livestock.—The total land area in Manitoba is 135,536,000 acres, of which 19,088,000 acres are in occupied farms. The gross value of agriculture production in 1975 was estimated at \$1,106,000,000 and livestock \$332,000,000. Farm animals in June 1974, numbered 1,300,000 cattle, 800,000 pigs, 29,000 sheep and 4,095,000 poultry.

Manufactures.—The gross annual value of manufactured products in 1975 was estimated at \$2,493,000,000. Manufacturing enterprises employed about 50,300 persons in Sept. 1975. The chief manufacturing centres are Winnipeg, Brandon and Selkirk. The largest manufacturing industry is the food and beverage industry, followed by the clothing and metal fabricating industries.

CAPITAL.—Winnipeg, population (estimated, 1975), 553,000. Other centres are Brandon (35,237), Thompson (20,625) and Portage la Prairie (13,300).

The capital city of Winnipeg was amalgamated with its suburban municipalities on January 1, 1972 to form one city with a central government.

NEW BRUNSWICK

Area and Population.—New Brunswick is situated between 45°-48° N. lat. and 63° 47'-69° W. long. and comprises an area of 28,354 square miles with an estimated population (Jan. 1974) of 658,000. It was first colonized by British subjects in 1761, and in 1783 by inhabitants of New England, who had been dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 58 members elected by the people. At the General Election of November 18, 1974, 33 Conservative and 25 Liberal members were returned.

Finance.—The estimated revenue for the year ending March 31, 1976, was \$883,767,000 and ordinary expenditure, \$890,991,200.

Manufactures.—Forest products: pulp, paper and timber form the major manufacture group, followed by foods, transportation equipment, metal fabrication, chemicals and chemical products, non-metallic mineral products, electrical products and miscellaneous other products. Saint John is the principal manufacturing centre. Total value of manufactured products was \$1,690,000,000 in 1975.

Agriculture and Livestock.—The total land area is 17,582,720 acres of which about 85 per cent. is forested. The Province is the largest potato-producing area of Canada, grown chiefly in the upper Saint John River Valley. Dairy farming is next in importance with, on Jan. 1, 1976, 106,000 cattle, 7,500 sheep, 41,000 hogs and 1,455,000 (approx.) poultry. Farm cash receipts \$99,052,000 in 1975.

Fishing.—The chief commercial fish are lobsters, sardines, herring, tuna, crab, plaice, red fish and cod, with an estimated market value of \$105,000,000 in 1975.

Minerals.—Extensive zinc, lead and copper deposits are now being mined in the north-eastern part of the Province with a lead smelter operating in conjunction with one mine operation. The only antimony mine in Canada is operating in the Southern part of the Province and coal continues to be mined at an increasing rate. High calcium limestone, lightweight aggregates and horticultural peat have also shown growth in recent years. Exploration by two major companies on two newly discovered potash plants is under way. Total mineral production was valued at \$219,000,000 in 1974.

Principal Cities.—CAPITAL Ψ Fredericton: population (1973), 42,000. Ψ Saint John (pop. 106,745) is one of the principal winter ports of Canada and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (47,890); Bathurst (16,675); Edmundston (12,365); Campbellton (10,335).

NEWFOUNDLAND AND LABRADOR

Area and Population.—The Island of Newfoundland is situated between 46° 37'–51° 37' N. latitude and 52° 44'–59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle on the N.W. and by Cabot Strait on the S.W. The island is about 317 miles long and 316 miles broad and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.) and Cape Ray (S.W.) at the angles. It comprises an area of 43,359 sq. miles with a population (estimated Jan. 1975) (inclusive of Labrador) of 546,000.

Labrador forms the most easterly part of the North American continent, and extends from Blanc Sablon, at the northeast entrance to the Straits of Belle Isle, on the south, to Cape Chidley, at the eastern entrance to Hudson's Straits on the north.

It has an area estimated at 112,826 sq. miles.

Government.—On March 31, 1949 Newfoundland became the 10th Province of the Dominion of Canada. The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 51 members.

The Legislature.

A General Election was held on Sept. 16, 1975, when 30 Progressive Conservatives, 16 Liberals, 4 Liberal Reform and 1 Independent Liberal were returned.

Finance.—The estimated net general revenue in the fiscal year ending March 31, 1977, is \$651,661,000 and the net expenditure on current and capital accounts \$799,963,500.

Production and Industry.—The main primary industries are fishing, forestry and mining. In 1974 shipments of fish products were valued at \$86.1 million. In 1975 paper products from the 3 pulp and paper mills were valued at \$160.0 million and the 12 mining operations plus the structural materials producers had combined shipments of \$568.2 million of which \$486.6 million was from the 3 iron ore mines located in Labrador. Manufacturing shipments with the exclusion of fish and paper products totalled \$435.8 million in 1974.

Transport.—The province is connected to mainland Canada by a ferry service from North Sydney, Nova Scotia to Port aux Basques and Argentina. The main line of the railway extends from St. John's on the east coast to Port aux Basques on the west coast. Transport between various points on the island is by highway but the south coast and Labrador still rely on the coastal boat service.

Principal Cities.—The Capital, St. John's (population 1971 Census, Greater St. John's 131,814) is North America's oldest city, and thus of historical interest and is the seat of the provincial legislature, the site of most provincial and federal government offices and the principal port for the island of Newfoundland. Newfoundland's second city of Corner Brook (population 1971 Census, 26,309) is situated on the west coast, its principal industry being its pulp and paper mill.

LABRADOR

Labrador, the most northerly district in the Province of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, at the north-east

entrance to the Straits of Belle Isle, on the south, to Cape Chidley, at the eastern entrance to Hudson's Straits on the north. The territory under the jurisdiction of Newfoundland has an area estimated at 112,826 square miles, with a population (1971) of 28,165. Labrador is noted for its cod fisheries and also possesses valuable salmon, herring, trout and seal fisheries. Newfoundland (Labrador) supplies more iron ore than any other province in Canada and the huge hydro-electric plant on the Churchill River will be the largest in the world with a 5,250,000 kW. capacity when completed.

NOVA SCOTIA

Area and Population.—Nova Scotia is a peninsula between 43° 25'–47° N. lat. and 59° 40'–66° 25' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area of 21,425 square miles including 1,023 square miles of lakes and rivers with a 6,479 miles of shoreline. No place is more than 35 miles from the Atlantic Ocean. Total population (1971 census) 788,960.

Government.—The Government consists of a Lieutenant-Governor and a 46-member elected Legislative Assembly, from which the Executive Council (Cabinet) is selected. The Lieutenant-Governor represents the Queen and is appointed by the Governor-in-Council.

Finance.—The revenue for the fiscal year ending March 31, 1975, was \$672,053,417 and expenditure was \$794,529,807. The net direct debt was \$319,065,487.

Manufacturing.—Manufacturing constitutes the single most important sector of the economy. Shipments were worth \$1,711,500,000 in 1975 with a total value added of more than \$466,800,000. Manufacturing plants provide employment for 43,000 or 15 per cent. of the labour force. Capital

expenditure has increased from \$690,400,000 in 1975 to \$758,100,000 (estimated) in 1976.

Utilities.—There is one major electrical utility; the Nova Scotia Power Corporation. With more than 2,300 employees, the Corporation delivered over 5.2 billion kilowatt hours of electrical energy during the year ending March 31, 1976. Power developed in the province is produced in fossil-fuelled thermal and hydro plants and is supported by auxiliary 85 MW gas turbines which provide rapid "peak demand" service. The Corporation, an agent of the provincial government, also operates seven retail electrical appliance outlets throughout the province.

Strait of Canso.—The Strait of Canso Superport in Nova Scotia is the largest deepwater harbour development on the Atlantic coast of North America. Government agencies and private corporations have been building this unique deepwater facility and related basic industries for more than 10 years. Existing industry includes an oil refinery, a thermal power generating station, a heavy water plant, bleached sulphate mill and newsprint mill. Major upgrading of the airport facilities at Port Hawkesbury was started in 1976 to enable commercial airlines to service the Strait area.

Tourism.—Between May 1 and October 31, 1975, 1,350,000 visitors spent \$88,000,000 in the province. There was an increase of visitors of 4.3 per cent. over 1974.

Forest Products.—The estimated gross value of primary and secondary forestry is \$213,000,000 annually. Forest lands total 10,982,000 acres or 80.1 per cent. of the land area. About 72 per cent. of forest land is privately owned. Forest based industries employ about 6,000.

Fishing.—The value of fish landed in 1975 was a record \$88,793,000. Products have been diversified and enlarged into a variety of processed foods that are increasing in number. Primary fishing and fish processing employed 15,811 in 1974.

Mining.—The total value of mineral production in 1975 was estimated at \$96,688,000, of which \$47,600,000 was contributed by coal. Structural materials, gypsum (\$12,410,000), salt (\$12,355,000) and sand and gravel (\$12,500,000) followed in dollar value.

Agriculture.—Farm cash receipts were estimated at about \$115,784,000 in 1975. About 6 per cent. of the total area, or 1,781,000 acres, is classified as agricultural land, dairy products being the major sector.

Principal cities.—Capital Ψ HALIFAX, including the neighbouring city of Dartmouth, has a population of over 225,000. In addition to a 56-acre container-handling terminal, a super autoport has been built at Port Halifax to handle both the export and import of motor vehicles. A second container port will be operational by 1977. A shipyard, with drydock, can build and repair the largest ocean-going liners. The harbour, ice-free the year round, is the main Atlantic winter port of Canada. Other cities and towns include Ψ Sydney (33,230), Ψ Glace Bay (22,400), Amherst (9,966) and New Glasgow (10,849).

CAPE BRETON ISLAND

This has been part of Nova Scotia since 1819. It is the centre of the steel manufacturing and coal mining industries, and is also noted for its large lakes and beautiful coastal scenery, making it a tourist attraction in Canada.

ONTARIO

Area and Population.—The Province of Ontario contains a total area of 412,582 sq. miles, with a population (estimated June 1976) of 8,300,000.

Government.—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 125 members elected for five years. The state of the parties in June 1976 was 51 Progressive Conservatives, 38 New Democrats, 36 Liberals. Lieutenant-Governor, Hon. Pauline McGibbon, Q.C. (1974).

Livestock.—In January 1976 the numbers of livestock included—cattle, 3,251,000; sheep and lambs, 133,000 and pigs, 2,000,000.

Forestry.—Productive forested lands cover 164,000 sq. miles or about 48 per cent. of the land area of the Province. Paper and allied industries are by far the most important sector of Ontario's forest industry.

Minerals.—Ontario leads other Canadian provinces in production of metallic minerals, producing more than 40 per cent. of the national total. Ontario produces all Canada's calcium, magnesium, platinum group metals and nepheline syenite, more than 80 per cent. of uranium, 70 per cent. of nickel, 60 per cent. of salt, 50 per cent. of elemental sulphur and 30 per cent. of zinc.

Electrical Power.—Ontario Hydro produced 84.2 billion kWh of primary electric energy in 1975.

Manufacture.—Ontario is the chief manufacturing province in Canada, producing over 51 per cent. of all manufactured goods. Seventy-five per cent. of Canada's fully manufactured exports are produced in Ontario.

CAPITAL.— Ψ Toronto (population, 2,741,000) has a wide range of manufacturing and service industries and is a centre of education, business and finance. Other major urban areas are: Ottawa, the national capital (626,000); Ψ Hamilton (498,523),

with iron and steel industry, metal fabrication, machinery, electrical and chemical industries; London (296,000), a business and manufacturing centre; Ψ Windsor (266,000); Kitchener (238,000) and Sudbury (154,000).

FEDERAL CAPITAL

OTTAWA, the Federal Capital, 111 miles west of Montreal and 247 miles north-east of Toronto, is a city on the south bank of the Ottawa river. The city was chosen as the Capital of the Province of Canada in 1857 and was later selected as the site of the Dominion capital. Ottawa contains the Parliamentary Buildings, the Public Archives, Royal Mint, National Museum, National Art Gallery and the Dominion Observatory.

A National Arts Centre opened on June 2, 1969, near the Parliament buildings. Facilities provided on 6½ acres of terraced land include an opera house with seating for 2,300, a theatre (800 seats), an experimental studio (300 seats) and a hall (100 seats).

Manufacturing is also carried on, food production, printing and publishing being of greatest importance. Ottawa is connected with Lake Ontario by the Rideau Canal. The City population was 302,341 at the Census of 1971; Metropolitan Ottawa (estimated, 1974), 626,000.

PRINCE EDWARD ISLAND

Area and Population.—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°–47° N. lat. and 62°–64° 30' W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (1975) 119,000.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and Legislative Assembly of 32 members elected for a term of 5 years, 16 as Councillors and 16 as Assemblymen. PHYSICAL FEATURES

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the mainland is 7,614,500 sq kms, the island of Tasmania having an area of 67,800 sq kms and making a total area for the Commonwealth of 7,682,300 sq kms. The coastline of Australia is approximately 36,800 kms (including Tasmania, 3,200 kms), and its geographical positions is between $10^{\circ} 41' - 39^{\circ} 8'$ ($43^{\circ} 39'$, including Tasmania) South latitude and $113^{\circ} 9' - 153^{\circ} 30'$ East longitude; the greatest length East to West is 4,000 kms, and from North to South 3,180 kms (3,680 kms, including Tasmania). Nearest distances from England *via* Cape of Good Hope are East Coast 22,957 and West Coast, 20,048 kms.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent

intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,900 kms ranging in width from 19 kilometres in the north to 240 kilometres in the south. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted to agriculture, beef cattle and dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 2,228 metres. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the continent: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the

Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria and Daly; and the Roper, Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. The scarcity of the natural water supply in the interior has, however, been mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. A major development is the use of the waters of the Snowy River in south-eastern New South Wales for hydro-electricity generation and irrigation.

Significant mineral resources comprise bauxite, coal, copper, crude petroleum, gems, gold, ilmenite, iron ore, lead, limestone, manganese, nickel, rutile, salt, silver, tin, tungsten, uranium, zinc and zircon. Recently, geological exploration has significantly increased the mineral resources of the nation.

Australia now has seven oilfields in production: Moonie, Alton and Bennett, Queensland; Barrow Island, Western Australia; and Barracouta, Kingfish and Halibut in the Gippsland Shelf area offshore from Victoria. In addition, a small amount of oil is being produced from several other wells in the Surat Basin in Queensland. The production of crude oil in 1975 from the Australian oil fields was 22,705,000 cubic metres, approximately 67 per cent. of the country's requirements. Work is at present in progress to develop the offshore Tuna and Mackerel oilfields on the Gippsland Shelf area.

Production from natural gas deposits to supply Brisbane, Melbourne and Adelaide began during 1969 and to supply Perth in 1971. Other natural gas reserves have since been discovered in South Australia and Queensland and off the shore of Western Australia and Victoria.

Climate.—The seasons are: summer, December to February; autumn, March to May; winter, June to August, spring, September to November. Australia is less subject to extremes of climate than are regions of similar size in low parts of the world, though the climate varies considerably from the tropical to the alpine.

GOVERNMENT

The Commonwealth of Australia was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. The Government is that of a Federal Commonwealth within the British Commonwealth of Nations, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of twenty-four Ministers of State. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Federal Government also controls such matters as social services, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate on these and other matters is not abrogated except in connection with matters exclusively under Federal control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

FLAG.—The British Blue Ensign, consisting of a blue flag, with the Union Jack occupying the upper quarter next the staff, differenced by a large white star (representing the six States of Australia and the

Territories of the Commonwealth) in the centre of the lower quarter next the staff and pointing direct to the centre of the St. George's Cross in the Union Jack and five white stars, representing the Southern Cross, in the fly.

THE LEGISLATURE

Parliament consists of the Queen, a Senate and a House of Representatives. The Constitution provides that the number of members of the House of Representatives shall be, as nearly as practicable, twice the number of Senators. An Act, assented to on May 18, 1948, provided for an increase in the number of members of the Senate from thirty-six to sixty, and as a result the number of members of the House of Representatives was increased from 74 to 123. There are now 127 members in the House of Representatives, including one member for the Northern Territory and two for the Australian Capital Territory. Members of the Senate are elected for six years by universal suffrage, half the members retiring every third year. Each of the six States returns an equal number of 10 Senators, the Australian Capital Territory, two Senators and the Northern Territory one Senator. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of five members for each State. The state of parties in the House of Representatives after the general election held in November 1975 was Liberal Party 68, National Country Party, 23, Australian Labour Party 36. Members of both Houses received \$A20,000 per annum, with allowances and free air and rail travel on parliamentary business.

President of the Senate, Senator Hon. C. L. Lancke.

Clerk of the Senate, J. R. Odgers, C.B.E.

Speaker, House of Representatives, Rt. Hon. B. M. Snedden, Q.C.

Clerk of the House, N. J. Parkes, O.B.E.

DEFENCE

A single Department of Defence was created on November 30, 1973, following the abolition of the Departments of the Navy, Army and Air. Legislation relating to the reorganization of the higher management of the Defence Force and Department of Defence was passed by the Commonwealth Parliament in September 1975 and the main provisions took effect on February 9, 1976.

The separate identities of the three services have been retained. The three Service Boards have been dissolved. Most of their previous powers are now exercised by the Minister for Defence or have been delegated by him to specific military or civilian appointments within the Department of Defence.

A new statutory appointment of Chief of Defence Force Staff has been created, under the Minister for Defence, responsible for command of the Defence Force through the three Service Chiefs of Staff (Navy, Army, Air Force) who are the professional heads of their respective arms of the Defence Force. The Chief of Defence Force Staff is also the principal military adviser to the Minister.

The Secretary to the Department of Defence has generally the powers and functions prescribed for such appointments in the Australian Public Service Act and the Audit Act. He is responsible to the Minister for Defence for advice on policy, resources and organization.

Royal Australian Navy

The Royal Australian Navy consists of an Anti-Submarine Warfare and strike aircraft carrier, 5 destroyers, 6 destroyer escorts, 4 submarines, 3 mines counter-measure vessels, 12 patrol boats, 2 survey ships, 2 fleet support ships, 6 landing craft heavy, 2 oceanographic ships and one training ship. The Fleet Air Arm is equipped with Skyhawk, Tracker, Macchi and HS748 fixed-wing aircraft, and with Sea King, Wessex, Iroquois and Bell 206 helicopters.

The strength of the Royal Australian Navy on 30 June 1976 was 2,100 officers and 14,015 sailors.

Army

In May 1976 the Australian Army comprised a volunteer Regular Army component of 31,415 and a volunteer Army Reserve component (formerly known as the Citizen Military Force) of 20,890.

The command structure of the Australian Army was reorganized in 1973, replacing the previous geographically based organization with a modernized functional organization.

The major development was the raising of three new functional commands which were invested with Australia-wide responsibilities for the command of units allocated to them and for the conduct of their specialist functions. Field Force Command, with its headquarters in Sydney, commands all field force units and is responsible for the operation of the Army's fighting formations. Logistic Command, with its headquarters in Melbourne, commands all logistic units and is responsible for the broad military functions of transport, supply and repair. Training Command, with its headquarters in Sydney, is responsible for the command of operation of all Army schools and training establishments.

Air

The total strength of the R.A.A.F. on June 1, 1976, was 21,268. There were 17 operational units, 5 maintenance squadrons, 3 control and reporting units, 3 aircraft depots, 3 stores depots, one ammunition depot, 22 training units, 7 Air Training Corps squadrons, 5 Citizen Air Force squadrons and supporting services. Three flying units, one maintenance squadron and supporting personnel were serving at Butterworth air base in Malaysia.

COMMONWEALTH FINANCE

Revenue and expenditure of the consolidated fund balanced at \$A15,391,000,000 in 1974-75, compared with \$A11,976,000,000 in 1973-74. Total loan fund expenditure was \$A3,447,000,000 in 1974-75 (1973-74, \$A1,828,000,000).

The unit of Australian currency is the \$A. Rates of exchange in Mar. 1976, were \$A1=£0.645 (buying) and £0.639 (selling).

DEBT

The total of the Commonwealth Debt on June 30, 1975, was \$A5,956,000,000. Adding the indebtedness of the States, viz. \$A11,814,000,000, the "face" or "book" value of Australian government securities on issue amounted (June 30, 1975) to \$A17,770,000,000.

The Debt per head of population at June 30, 1975, was \$A1,319.34.

In 1974-75 Australia produced 793,000,000 kg. of wool (as in the grease), estimated value, \$A965,000,000; 175,498,000 kg. of butter; 95,793,000 kg. of cheese; and 17,638 tonnes of bone-in and 36,745 tonnes of bone-out bacon and hams. The total meat production (beef, veal, mutton, lamb and pig meat) in terms of carcass weight was 2,228,655 tonnes.

Mines and Minerals.—In 1974-75 the mine production of gold was 14,823 kg. and of black coal 70,338,694 tonnes. Smelter and refinery production of principal metals in 1974 was: pig iron, 10,006,000 tonnes; ingot steel 7,250,000 tonnes; copper (refined), 162,461 tonnes; blister copper, 196,129 tonnes; lead (incl. bullion), 336,960 tonnes; tin, 6,714 tonnes; zinc, 276,831 tonnes; silver, 256,475 kg. Value added by the mining industry in 1973-74 was estimated at \$A1,985,340,000.

Manufactures.—In 1973-74 there were in Australia 37,144 industrial establishments, employing 1,338,444 persons; wages paid amounted to \$A7,167.8 m; purchases, transfers in and selected expenses \$A19,067.1 m; value added by manufacture \$A13,149.2 m; and turnover \$A31,246.9 m.

Trade Unions.—On December 31, 1975, there were 280 separate trade unions in Australia with a total membership of 2,814,000.

(a) Excludes certain government subsidies aggregating \$A44,742,000.

The gross earnings of all Government lines in 1974-75 were \$A809,429,000, working expenses \$A1,146,534,000, and net loss \$A337,104,000. In 1974-75 passenger journeys numbered 339,954,000 and 103,465,000 tonnes of goods and livestock were carried.

Shipping.—The entrances and clearances (one entrance and one clearance per voyage, irrespective of the number of ports visited) of vessels engaged in overseas trade at the various Australian ports in 1974-75 were: entered 6,230 (80,313,404 tons); cleared 6,254 (80,304,792 tons).

The total, including local shipping, entering the ports of the capital cities during 1974-75 was: Sydney, 2,725 vessels of 16,481,399 tons; Melbourne, 2,608 (13,059,935); Brisbane, 1,246 (8,572,573); Adelaide, 1,108 (4,087,016); Fremantle, 1,243 (9,555,935); Hobart 534 (1,594,330) tons. At June 30, 1975, the Australian trading fleet vessels 200 tons gross and over comprised 120 vessels with a total 1,572,124 tons gross. Of these, 106 vessels totalling 1,363,950 tons gross were coastal trading vessels.

Posts and Telegraphs.—In the year ended June 30, 1975, there were 6,068 post offices dealing with 2,273,531,000 letters, 373,657,000 packets and newspapers, 11,168,000 registered articles and 23,889,000

parcels. 16,092,000 internal telegrams and 2,427,000 international telegrams were despatched. At June 30, 1975, there were 5,772 telephone exchanges with 3,539,020 services and 5,266,845 instruments.

Broadcasting and Television.—On June 30, 1975, the Australian Broadcasting Commission operated 100 stations, including 6 short-wave stations in Australia. Privately owned commercial broadcasting stations totalled 118. Requirement for television and radio licences was abolished on Sept. 17, 1974. On June 30, 1975, 132 television stations were in operation.

Motor Vehicles.—At June 30, 1975, there were 6,345,100 motor vehicles registered in Australia. These comprised 4,899,700 cars and station wagons, 281,100 motor cycles, and 1,165,700 commercial vehicles; revenue derived from motor registration fees and motor tax, &c. in 1973-74 was \$A380,741,000.

Civil Aviation.—At June 30, 1975, there were 478 recognized landing grounds, including 378 licensed public aerodromes, in the various States and Territories, and 5 flying boat bases and alighting areas. Aircraft on the Australian Register at June 30, 1975, numbered 4,164.

CAPITAL

Canberra is the capital of Australia. It is situated in the Australian Capital Territory which has an area of 939 sq. miles and was acquired from New South Wales in 1911. Canberra, which is the seat of the federal government, had a population at June 30, 1976, of 202,000. Apart from Parliament House, the city also contains other National institutions, such as the Australian War Memorial, National Library, Royal Australian Mint and the Australian National University. Most Government departments have their headquarters in Canberra. An artificial lake is a central feature of this planned city, based on Walter Burley Griffin's design.

THE NORTHERN TERRITORY

The Northern Territory has a total area of 520,280 square miles, and lies between 129°-138° east longitude and 11°-26° south latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia. The Department of the Northern Territory, created in 1972. The Northern Territory elects one member to the Federal House of Representatives in Canberra and is represented by two Senators in the Senate.

The Legislative Council for the Northern Territory, established in 1947 under the provisions of the Northern Territory (Administration) Act, to make Ordinances for the peace, order and good government of the Territory (subject to the assent of the Administrator or Governor General), with 17 members, including 11 elected members, was superseded in October, 1974, by a fully elected Legislative Assembly of 19 members.

The estimated Aboriginal population in the Northern Territory at the 1971 Census was 25,000. Areas totalling 94,000 square miles, about one-fifth of the Northern Territory, have been set aside as reserves for the use and benefit of the Aboriginal people. Legislation is to be introduced to enable Aboriginal tenure of these lands and as a result of recommendations of a Royal Commission the Government set up land councils which are now operating.

Approximately 16,000 Aborigines live in communities which are now focal points for education, health and social development.

About 4,000 Aborigines live permanently on pastoral properties and the government aims to establish communal living areas for these communities. Other Aborigines live in or around the main towns. In some of the more remote regions, the contact with European Australians has been relatively recent and traditional beliefs and customs are still strong.

The year 1974-75 saw an accelerating decline in the fortunes of the Territory's major rural industry, beef cattle raising, with total earnings down by 60 per cent. to \$A10,400,000. The Katharine meat works was the only cattle export abattoir to open in 1975. Owing to a financial problem it was unable to open in the first half of 1976. Two buffalo abattoirs operated and sent buffalo meat, as game meat, overseas. Low beef prices and the limited abattoir season were factors in the continuing increase in cattle numbers which at June 30, 1975 stood at 1,335,000—a rise of 37,000 on the previous year. By-products earned \$A920,000 of which \$A595,000 came from the sale of buffalo meat.

The export of live buffalo breeders by air to New Guinea, Venezuela and Nigeria continued through 1975 and into 1976. The attraction of the Territory's buffaloes for overseas buyers is their freedom from serious stock diseases.

Research and extension activities towards the primary industries were maintained in the fields of animal production, animal health, economics, range management, agricultural crops, land surveys and soil conservation. There were considerable developments in the pig and poultry industries near Darwin to the stage of self sufficiency in these products.

Mineral industry projects are important to both regional and national economic development. The value of mine and quarry production for 1974-75 was just under \$A140,000,000, derived mainly from bauxite ore and alumina, manganese, copper, gold and bismuth ores. Recently, iron ore production ceased and copper production has been curtailed because of unfavourable world prices. The rich Alligator Rivers uranium deposits are not yet developed. In the McArthur River district a pilot plant has been established to develop an economic treatment method for the extensive, low-grade, but extremely finely disseminated, lead-zinc sulphides deposits, which pose a major dressing problem. The production of manganese from the extensive deposits at Groote Eylandt supplies all Australia's requirements of metallurgical grade manganese ore.

Tourism, an important industry, is estimated to be worth \$A28,000,000 a year.

The chief rivers of the Territory are the Victoria, Adelaide, Daly, Roper, South Alligator and McArthur. These are navigable from 40-100 miles from their mouths for boats up to 4 ft. draft.

The north-south axis route is the Stuart Highway. This is sealed from Darwin to Alice Springs (1,535 km) and from Alice Springs to the border with South Australia 207 km. is sealed and the remainder should be completed by December 1976.

The route to and from Queensland via Mt. Isa is via sealed Barkly Highway (648 km) which connects to the Stuart Highway near Tennant Creek.

The principal access route to Western Australia via Kununurra is the sealed Victoria Highway 467 km long that joins the Stuart Highway at Katherine.

The Government has a continuous programme of improvement and maintenance of the highways which are part of the National Highway System.

A rail line connects Alice Springs to Adelaide which is being replaced by a standard gauge line following a new route less susceptible to flood

damage. The rail link extending from Darwin south to Larrimah (500 km) ceased operating in 1976.

Following the cyclone on Christmas Day 1974, which destroyed 90 per cent. of the city, the population of Darwin fell to 11,000. By June 1976, it was estimated at 41,000, 5,000 less than the pre-cyclone figure. Darwin, which is 97 ft. above sea level, overlooks Port Darwin. Alice Springs is situated in the MacDonnell Ranges. The climate of the Northern Territory ranges from dry in the south to wet-monsoonal in the north.

NORFOLK ISLAND

The island is situated in latitude 29° S. and longitude 168° E., being about 1,042 miles from Sydney and 400 miles north of New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 53 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The island is a popular tourist resort, and a large proportion of the population depends on tourism and its ancillaries for employment. Estimated population (including tourists) (June 30, 1975), 1,870.

Seat of Government and Administration Offices, Kingston. The Norfolk Island Council advises the Administrator on policy and the control of public finance. The island is administered by the Australian Government through the Department of Administrative Services in Canberra.

Regular air services operate from Australia and New Zealand.

Administrator, Air Cdre. E. T. Pickerd, O.B.E., D.F.C. (acting).

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands were declared a British possession in 1857. In 1878 they were placed under the control of the Governor of Ceylon and were later annexed to the Straits Settlements and incorporated with the colony of Singapore. On Nov. 23, 1955, their administration was transferred to Australia. They are two separate atolls comprising some 27 small coral islands with a total area of about 5½ square miles, situated in the Indian Ocean in latitude 12° 5' South and longitude 96° 53' East. The main islands are West Island (the largest, about 6 miles from north to south) on which are the aerodrome and the administrative centre, and most of the European community; Home Island, the headquarters of the Clunies Ross Estate; Direction Island, on which is situated the Department of Civil Aviation's marine base; and Horsburgh. North Keeling Island, which forms part of the Territory, lies about 15 miles to the north of the group and has no inhabitants. The climate is equable and pleasant, being usually under the influence of the south-east trade winds for about three-quarters of the year. A three weekly air charter service operates between Perth and the Cocos Islands and Christmas Island. Population (estimated June 30, 1975), 604.

Administrator, R. J. Linford.

CHRISTMAS ISLAND

Until the end of 1957 a part of the then Colony of Singapore. Christmas Island was administered

as a separate colony until October 1, 1958, when it became Australian territory. It is situated in the Indian Ocean about 224 miles S. of Java Head. Area 52 sq. miles. Population (estimated, June 30, 1975) 3,032. The island is densely wooded and contains extensive deposits of phosphate of lime. The Christmas Island Phosphate Commission is responsible for mining activities in the Territory on behalf of the Australian and New Zealand Governments. By agreement, the Commission's function of obtaining and distributing phosphates for the Australian and New Zealand markets is carried out by the British Phosphate Commissioners as managing agents.

Administrator, W. Worth.

THE ANTARCTIC CONTINENT

The area of the Antarctic Continent is estimated at approximately 14,000 square kilometres. The greater part of the coastline has been charted, but considerable portions of the interior have not been visited, or at best have been seen only from the air. The question of territorial rights is complicated and there is no general international agreement thereon.

The *Australian Antarctic Territory* was established by an Order in Council, dated February 7, 1933, which placed under the government of the Commonwealth of Australia all the islands and territories, other than Adélie Land, which are situated south of the latitude 60° S. and lying between 160° E. longitude and 45° E. longitude. The Order came into force on August 24, 1936, after the passage of the *Australian Antarctic Territory Acceptance Act, 1933*. The boundaries of Terre Adélie were definitely fixed by a French Decree of April 1, 1938, as the islands and territories south of 60° S. latitude lying between 136° E. longitude and 142° E. longitude. The *Australian Antarctic Territory Act, 1954* declared that the laws in force in the Australian Capital Territory are, so far as they are applicable, in force in the Australian Antarctic Territory.

On February 13, 1954, the Australian National Antarctic Research Expeditions (ANARE) established a station on Mac. Robertson Land at latitude 67° 36' S. and longitude 62° 53' E. The station was named Mawson in honour of Sir Douglas Mawson and was the first permanent Australian station to be set up on the Antarctic continent. Scientific research conducted at Mawson includes

upper atmosphere physics, meteorology, earth sciences, biology and medical science. Mawson is also the centre for coastal and inland exploration.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on January 13, 1957, at latitude 68° 35' S. and longitude 77° 58' E. The station was named in honour of Captain John King Davis, second in command of two of Mawson's expeditions and master of several famous Antarctic ships. The station was temporarily closed on Jan. 25, 1965 and reopened on Feb. 15, 1969. Scientific programmes carried out at Davis include meteorology, biology, upper atmosphere physics, with field investigations in geology. In February, 1959, the Australian Government accepted from the United States Government custody of Wilkes Station on the Budd Coast, Wilkes Land is about 66° 15' S. and longitude 110° 33' E. The station was closed in February 1969, and activities were transferred to Casey station. Casey station was named in honour of Lord Casey, former Governor-General of Australia, in recognition of his long association with Australia's Antarctic effort. The station, at 66° 17' S., 110° 31' E., is of advanced design and scientific programmes carried out there include upper atmosphere physics, cosmic ray physics, geophysics, meteorology with field programmes in glaciology, geology, etc.

Since 1948 ANARE has also operated a station on Macquarie Island, a dependency of Tasmania, situated at 54° 30' S. and 158° 57' E., about 900 miles north of the Antarctic Continent.

On December 1, 1959, Australia signed the Antarctic Treaty with Argentine, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, the United Kingdom, the United States and U.S.S.R., all countries which have been active in Antarctic operations and research. The Treaty reserves the Antarctic area south of 60° S. latitude for peaceful purposes, provides for international co-operation in scientific investigation and research, and preserves, for the duration of the Treaty, the *status quo* with regard to territorial sovereignty, rights and claims. The Treaty came into force on June 23, 1961, and has been acceded to by another four nations not actively engaged in the area.

For other Commonwealth dependencies in the Antarctic see New Zealand.

STATES OF THE COMMONWEALTH OF AUSTRALIA

NEW SOUTH WALES

The State of New South Wales is situated entirely between the 28th and 38th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 square miles (exclusive of 939 sq. miles of Australian Capital Territory which lies within its borders).

POPULATION.—The estimated population at June 30, 1975 was: Males, 2,396,700; Females, 2,392,800. Total, 4,789,600.

Births, Deaths and Marriages

Year	Births	Deaths	Marriages
1972	95,278	41,652	43,038
1973	87,332	41,122	40,722
1974	86,162	43,999	39,327
1975	80,783	40,512	36,967

Vital Statistics.—Annual rate per 1,000 of mean population in 1974:—Births, 18.10; Deaths, 9.24; Marriages, 8.26. Deaths under 1 year per 1,000 live births, 16.58.

Religions

The members of the Church of England in New South Wales, according to the Census of 1971, number 1,639,316. Roman Catholic (including "Catholic") 1,319,250, Presbyterian 352,107, Methodist 302,856, Congregational 20,902, Baptist 59,541, Orthodox 129,178, Lutheran 33,776, Salvation Army 19,733, and Hebrew 25,971. The religion of 519,125 persons was either not stated in the census schedules or was stated as "none".

PHYSIOGRAPHY

Natural features divide the State into four strips of territory extending from north to south, viz., the Coastal Divisions; the Tablelands, which form the Great Dividing Range between the coastal districts and the plains; the Western Slopes of the Dividing Range; and the Western Plains. The highest points are Mounts Kosciuszko, 7,328 feet, and Townsend, 7,266 feet. The coastal district is well watered by numerous rivers flowing from the ranges into fertile flats which form their lower basins. The western portion of the State is watered by the rivers of the Murray-Darling system and immense reservoirs have been constructed for

irrigation purposes, as well as many artesian bores. The Darling, 1,702 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, part of which forms the boundary between the States of New South Wales and Victoria. Other inland rivers are: Lachlan, Macquarie-Bogan, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is equable and very healthy. At the capital (Sydney) the average mean shade temperature is 18°C. The mean (shade) temperature ranges for the various divisions of the State are as follows: coastal, 16°C in the south to 20°C in the north; northern and central tableland, 12°C to 16°C; southern tableland, 7°C to 14°C; and for the rest of the State (western slope, central plains, Riverina and western), 15°C in the south to 18°C in the north.

GOVERNMENT

New South Wales was first colonized as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 Responsible Government was granted, the present Constitution being founded on the Constitution Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

EDUCATION

Education.—Education is compulsory between the ages of 6 and 15 years. It is non-sectarian and free at all state schools. The enrolment in August 1975 in 2,464 state schools was 788,943. In addition to the state schools there were, in 1975, 794 private colleges and schools, with an enrolment of 218,868 scholars. The six universities had an enrolment of 58,666 students in 1975; 17,667 at Sydney (incorporated 1850), 18,128 at New South Wales (1948), 7,395 at New England (1954), 8,917 at Macquarie (1964), 4,434 at Newcastle (1965) and 2,125 at Wollongong (1975). Colleges of Advanced Education which provide courses at tertiary level, but with a more vocational emphasis than universities, had 26,227 students enrolled in 1975. Students enrolled in technical colleges in 1975 numbered 226,292. The State expenditure on education was \$A783,168,000 in the year 1974-75.

The Public Debt of New South Wales at June 30, 1975, was \$A3,834,052,000, of which an amount of \$A58,241,000 was repayable in London (interest \$A3,256,000), \$A19,928,000 was repayable in New York (interest \$A1,085,000), \$A2,121,000 was repayable in Canada (interest \$A122,000), \$A4,775,000 was repayable in Switzerland (interest \$A215,000), \$A1,505,000 was repayable in the Netherlands (interest \$A75,000) and \$A3,747,843,000 was held in Australia, with an annual interest bill of \$A238,427,000.

Banking, etc.—There were (Feb. 1976) 10 trading banks with deposits of \$A7,237,300,000. Savings bank deposits amounted to \$A4,154,100,000, representing \$A864 per head of the population. The amount assured in New South Wales in *Life Insurance* in Feb. 1976 was \$A8,820,166,000 ordinary, \$A1,471,515,000 superannuation and \$A570,498,000 industrial. The membership of *Friendly Societies* was 158,629, and the funds at June 30, 1975 were \$A40,328,000. On Dec. 31, 1974, there were 191 separate *Trade Unions* in New

South Wales with a total membership of 1,059,700. Balances outstanding on *Instalment Credit* for retail sales on March 31, 1976, were \$A846,600,000.

PRODUCTION AND INDUSTRY

Value of Production.—In 1974-5 the net value of production of the primary industries (excluding mining and quarrying), was \$A1,520,422,000. Of that agriculture contributed \$A682,448,000, live-stock products (wool, milk, etc.) \$A448,240, live-stock slaughterings \$A300,244,000 and other industries (forestry, fishing and trapping) \$A76,098,000. Value added in mining and quarrying industries and manufacturing industries in 1973-4 was \$A384,563,000 and \$A5,184,450,000 respectively.

Agriculture.—The production of wheat in 1974-75 was 3,808,658 tonnes of grain and 42,713 tonnes of hay. Other important crops in 1974-75 were 407,553 tonnes of barley, 293,068 tonnes of oats, 376,232 tonnes of rice, besides other kinds of grain, 117,901 tonnes of potatoes, and 1,369,103 kilograms of dried leaf tobacco. Sugar-cane to the extent of 996,654 tonnes was crushed; while 77,954,994 kilograms of bananas were obtained; almost every kind of fruit and vegetable is grown.

Pastoral, etc.—A large area is suitable for sheep-raising, the principal breed of sheep being the celebrated merino, which was introduced in 1797. On March 31, 1975, there were 8,935,074 cattle, 54,983,009 sheep and lambs, and 729,209 pigs. In 1974-75, 232,271,000 kg. (stated as in the grease) of wool were produced, 19,831,000 kg. of butter, 9,934,000 kg. of cheese, and 220,434,000 kg. of bacon and ham.

Mining Industry.—The principal minerals are coal, lead, zinc, rutile, zircon, copper and tin. The total value of minerals won in 1974-75 was \$A784,097,000; the value of output of the coalmining industry was \$A451,879,000 and of the silver-lead-zinc industry, \$A145,646,000. The mining industry gave employment to 23,575 miners during 1974-75. In 1974-75, 42,482,000 tonnes of coal were produced.

Manufacturing Industry.—At June 30, 1974, there were 13,807 manufacturing establishments. The average number of persons employed during 1973-74 was 516,221, and the value added to materials was \$A5,184,450. Large iron and steel works with subsidiary factories are in operation at Newcastle and Port Kembla in proximity to the coalfields. Products of the regions include iron and steel of various grades, pipes, boilers, steel wire and wire netting, copper wire, copper and brass cables and tin-plate. The production (1974-75) of pig-iron was 5,942,000 tonnes, and of steel ingots 6,912,000 tonnes.

OVERSEAS TRADE

Year ended June 30	Overseas Imports \$A(f.o.b.)	Overseas Exports \$A(f.o.b.)
1972	1,764,769,000	1,204,938,000

1974	2,590,179,000	1,513,202,000
1975	3,494,781,000	1,979,005,000

The chief exports in 1974-75 were wool, wheat, coal, meat, iron and steel, chemicals, raw sugar and machinery. Chief imports were machinery, tex-

tiles, motor vehicles, chemicals, petroleum, paper products, iron and steel, food stuffs, medical instruments, etc., pharmaceuticals, printed matter and plastic materials.

TRANSPORT AND COMMUNICATIONS.

Shipping.—Excluding coastal trade, 3,726 vessels entered ports of N.S.W. during the year ended June 30, 1975, the net tonnage being 30,693,539. The shipping entries at Sydney, including coastal, were 2,925 vessels of 16,481,399 net tonnage.

Roads and Bridges.—There are 207,971 kilometres of roads and streets in New South Wales, including 42,012 kilometres of natural surface and cleared only. The total expenditure by the Government and the local councils on roads, bridges, &c. in 1973-74 was \$A317,033,000. Sydney Harbour Bridge which was completed and opened for traffic in March, 1932, carries eight lanes of roadway with a total width of 25.6 m, two footways each 3 m wide, and two lines of railway. At mean high water there is a headway of 52.6 m.

Motor Vehicles.—At June 30, 1975, there were 2,171,900 registered motor vehicles (cars, 1,420,600).

Railways.—The railways of New South Wales are controlled by the State, which also operates omnibus services. At June 30, 1975, the route kilometres of the State railways open for traffic was 9,756, revenue in the year 1974-75 being \$A296,059,000.

Aviation.—Sydney is the principal overseas terminal in Australia. Traffic movements at Sydney airport in 1974-75 were: passengers 6,506,529 (4,953,051 domestic, 1,553,528 international); freight 100,620 tonnes (49,886 domestic, 50,734 international); aircraft, 112,427 (93,345 domestic, 19,082 international).

Posts, Telegraphs and Telephones.—The postal, telegraphic, telephonic and radio services are administered by the Australian Government. At June 30, 1975, there were 1,965 post offices in New South Wales. During the year 5,539,000 telegrams were despatched to places within Australia and 1,156,000 cablegrams to places outside Australia. Transit time between Sydney and London is approximately 2½ days for airborne mail and between 4 and 6 weeks for seaborne mail. The telephone services in operation numbered 1,362,817.

Radio and Television.—In June, 1975, there were 21 National Broadcasting Stations in New South Wales and 39 commercial stations operating under licence. At June 30, 1975, there were 28 television stations (14 national, 14 commercial) in operation.

TOWNS.

ΨSYDNEY, the chief city and capital and the largest city in Australia, stands on the shores of Port Jackson, with a water frontage of 245 kilometres; the depth of water at the entrance is not less than 24 m and at the wharves up to 12 m. There are extensive facilities for handling cargo, and for storing and loading grain in bulk or bags. For 21 kilometres Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the harbour is about 55 square kilometres, of which approximately one-half has a depth of not less than 9 m; the average tidal range is 1 m.

The Sydney Statistical Division embraces an area of approximately 4,077 square kilometres, with a population of 2,922,760 (at June 30, 1975). The Newcastle and Wollongong Statistical Districts contain populations of 363,010 and 211,240 respectively.

The population of principal municipalities located outside the boundaries of these statistical areas are: Albury 32,250, Wagga Wagga 32,510, Broken Hill 28,160, Tamworth 25,360, Orange 24,830, Goulburn 22,160, Lismore 21,650, Blue Mountains 20,410 (part not included in Sydney Statistical Division), Armidale 20,300 and Dubbo 19,000.

DEPENDENCY OF NEW SOUTH WALES.

LORD HOWE ISLAND (702 kilometres north-east of Sydney). Lat. 31° 33' 4" S., Long. 159° 4' 26" E. Area 17 sq. km. Pop. June 30 1975, 240. The island is of volcanic origin with Mount Gower reaching an altitude of 366 m. The affairs of the island and the supervision of the Kentia palm seed industry are controlled by an elected Island Committee and a Board at Sydney. Office, N.S.W. Department of Lands.

QUEENSLAND

This State, situated in lat. 10° 40'–29° S. and long. 138°–153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 1,728,000 square kms. (i.e., equal to more than 5½ times the area of the British Isles).

POPULATION.—At Dec. 31, 1975, the population numbered 2,012,400 persons.

Births, Deaths and Marriages

Year	Births	Deaths	Marriages
1973	38,067	16,732	16,490
1974	37,852	18,128	16,086
1975	36,403	16,421	15,262

Vital Statistics.—Annual rate per 1,000 of mean population in 1975; Births, 18.2; Deaths, 8.2; Marriages 7.6. Deaths under 1 year, 15.0 per 1,000 live births.

Religions

At the Census of 1971 there were 544,432 Church of England, 467,203 Roman Catholics (including Catholics undefined), 192,079 Presbyterians, 182,887 Methodists, 45,228 Lutherans, 28,329 Baptists, 15,554 Orthodox, 10,608 Salvation Army, 10,196 Church of Christ, 9,627 Congregationalists, 75,668 other Christians, and 1,491 Hebrews.

PHYSIOGRAPHY

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Selwyn and Kirby Ranges divide the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt into the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

GOVERNMENT

Queensland was constituted a separate colony with Responsible Government in 1959, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 18 members.

EDUCATION.

Education is compulsory between the ages of
6 and 15, and is free in state primary and secondary
schools. On Aug. 1, 1975 there were 1,209 state
schools, including 225 providing secondary educa-
tion, in operation, with 17,183 teachers and an
enrolment of 331,374 children, and 323 private and
8 grammar schools, with an enrolment of 91,148.
In 1974 tertiary level course enrolments at colleges
of advanced education (incl. government teachers'
colleges) and technical colleges, were 8,610 full-time
and 3,277 part-time. Sub-tertiary level course enrol-
ments at these establishments and rural training
schools numbered 2,240 full-time and 32,401 part-
time, including correspondence and apprenticeship
students. The three state-aided Universities had an
enrolment of 10,545 full-time students and 10,156
part-time students.

PRODUCTION AND INDUSTRY.

The gross value of primary industry commodities
produced (excluding mining) in 1974-75 was
\$A1,261,880,000 (including crops \$A866,348,000,
livestock disposals \$A193,273,000, livestock pro-
ducts \$A163,790,000, forestry \$A25,163,000,
fisheries \$A12,606,000 and hunting \$A700,000).

Agriculture and Livestock.—The most important
crop in 1974-75 was sugar-cane, producing
2,727,533 tonnes of raw sugar. Wheat yielded
692,090 tonnes, maize 71,769 tonnes, sorghum
634,120 tonnes and barley 297,268 tonnes. The live-
stock on March 31, 1975 included 10,878,959
cattle, 515,298 being dairy cattle, 13,907,860 sheep
and 400,435 pigs.

Forestry.—Total Australian grown timber pro-
cessed in 1974-75 amounted to 1,071,000 cubic
metres.

Minerals.—There are rich deposits of bauxite,
coal, copper, lead, phosphate, silver, uranium, and
zinc, and deposits of tin, limestone, ironstone,
wolfram and mineral sands. Coal is mined exten-
sively in Central Queensland and on a lesser scale in
North Queensland and Ipswich districts. Commer-
cial production of oil began at Moonie in South
Queensland in 1964 and at Alton nearby in 1966.
The output in 1975 included gold, \$A1,190,168,
coal, \$A448,201,946; copper \$A155,520,261; tin
\$A7,187,098; silver \$A37,696,617; lead
\$A62,296,640; zinc \$A70,762,451; bauxite
\$A54,829,000; mineral sands \$A44,674,765.

Manufacturing.—At June 30, 1974, 4,290 estab-
lishments employed 121,012 persons. During the
year value added was \$A1,220,170,000. Much
production was the processing of primary products,
e.g. meat, sugar, minerals, timber, fruit and vege-
tables, flour, and butter. Included in other factory
production were the products from engineering,
transport equipment, basic and fabricated, chemical
fertilizer works, cement, paper and woollen mills
and oil refineries.

Banking.—Advances made by Trading Banks
(including the Commonwealth Trading Bank of
Australia) at June 30, 1975, totalled
\$A1,247,595,000. The deposits at the same date

amounted to \$A2,148,915,000. Depositors' balances in Queensland savings banks at June 30, 1975, \$A1,618,206,000, averaged \$A808 for each inhabitant. There were 2,608,000 operative accounts.

COMMUNICATIONS

Road and Rail.—The State is served by 9,780 kilometres of railways, practically all of 1,067 millimetres gauge. During 1974-75, 36,632,000 passengers and 30,208,000 tonnes of goods and livestock were carried. At June 30, 1974, there were 131,412 kilometres of formed roads in the State, and 906,000 motor vehicles were on the register.

Aviation.—Regular services operate between Brisbane, the main Queensland coastal and inland towns and the southern capitals. Brisbane is also a port of call on several international services.

Radio and Television.—On June 30, 1975, 22 national and 26 commercial sound broadcasting and 32 national (including 5 microwave repeater stations) and 11 commercial television stations were operating in Queensland.

OVERSEAS TRADE

Year	Imports	Exports
1972-73	\$A311,448,000	\$A305,569,000
1973-74	542,046,000	1,380,764,000
1974-75	580,051,000	2,007,775,000

The chief overseas exports are minerals, meat, sugar, wool, alumina, and cereal grains.

TOWNS

CAPITAL, Ψ BRISBANE, is situated on the Brisbane River, which is navigable by large vessels to the city, over 23 kilometres from Moreton Bay. The population of the Brisbane Statistical Division at June 30, 1975 was 958,800. This area includes the cities of Brisbane (723,000), Ipswich (67,500) and Redcliffe (38,200).

Other cities and towns with population over 10,000 at June 30, 1975, are: Ψ Townsville, 82,500; Gold Coast, 80,250; Toowoomba, 62,900; Ψ Rockhampton, 51,500; Ψ Cairns, 35,200; Ψ Bundaberg, 29,100; Mount Isa, 32,850; Ψ Maryborough, 19,000; Ψ Mackay, 20,550; Ψ Gladstone, 19,800; Gympie, 10,900.

Transmission of mails from London to Brisbane, by air, 3 days; by sea 5 to 6 weeks.

SOUTH AUSTRALIA

The State of South Australia is situated between 26° and 38° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION.—At 30 June, 1975, the population was estimated to be 1,234,100.

Religions.

Religion is free and receives no State aid. At the Census, 1971, the persons belonging to the principal religious denominations were as follows: Church of England, 286,754; Methodists, 215,328;

Congregationalists, 15,238; Baptists, 22,010; Lutherans, 62,641; Roman Catholics, 242,166; Presbyterians, 39,920; Churches of Christ, 22,802; and Orthodox, 32,636.

PHYSIOGRAPHY

The most important physical features of South Australia are broad plains, divided longitudinally by four great secondary features, which form barriers to east-west movement, and which have thus largely determined the direction of roads and railways, the sites of towns and villages and the manner of distribution of the population. These four barriers are Spencer Gulf, Gulf St. Vincent, the Mt. Lofty-Flinders Ranges and the River Murray. The long, deeply-indented coast-line, which provides a few major, and a multitude of lesser harbours, trends generally south-eastward. Pleasant weather conditions and good rainfall are experienced in most coastal areas.

The north-western portion of the State is mostly desert, while north of latitude 32° S. the country is unpromising by comparison with the fertile land which surrounds the hill country of the east. The Murray, which flows for some 400 miles through the south-eastern corner, is the only river of importance.

The lack of rivers and fresh-water lakes in the settled areas has necessitated the building of a number of reservoirs, which have been supplemented since 1941 by the construction of pipelines from the River Murray.

Climate.—The mean annual temperature at Adelaide is 17.1°C, the winter temperature (June-August) averaging 11.8°C, and the summer (Nov-Mar.) 21.5°C. During the summer months the maximum temperature at times exceeds 40°C, but is associated with a relatively low humidity. The average annual rainfall at Adelaide, derived from over 130 years' record is 21 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while in Adelaide precipitation has fallen as low as 10.11 inches.

GOVERNMENT

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 12 Ministers.

THE LEGISLATURE

Parliament consists of a Legislative Council of 22 members elected for 6 years, one-half retiring every 3 years; and a House of Assembly of 47 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for both the Legislative Council and the House of Assembly for all British subjects, male and female. The number of electors in 1975 was 771,414.

The elections to the House of Assembly in July, 1975, returned 23 Labour members, 20 Liberals, 2 Liberal Movement, 1 Country Party and 1 Independent.

President of the Legislative Council, Hon.

F. J. Potter..... \$A22,550

Speaker of the House of Assembly, Hon.

E. Connelly..... \$A22,550

Leader of the Opposition, D. O. Tonkin.

THE JUDICATURE

Law and Justice.—The Supreme Court is presided over by the Chief Justice and nine Puisne Judges.

EDUCATION

Education at the primary and secondary level is available at Government schools controlled by the Education Department and at independent schools, most of which are denominational. In 1975 there were 619 Government schools with 234,712 students, and 151 independent private schools with 39,297 students. The Department of Further Education administers the South Australian College of External Studies, apprentice training and contributing education in 8 metropolitan and 4 country technical colleges and 5 metropolitan and 11 country further education centres.

There are two universities: the University of Adelaide, founded in 1874, and the Flinders University of South Australia, opened in 1966. In 1974 there was a total enrolment of 9,113 full-time students. There are also eight Colleges of Advanced Education.

FINANCE

Banking.—There are 8 trading banks in Adelaide, including the Commonwealth Trading Bank and the State Bank of South Australia, having total average deposits of \$A973,499,000 in June 1975. The eight savings banks had deposits of \$A1,394,585,000 at June 30, 1975.

Revenue and Expenditure (For years ended June 30)

Year	Revenue	Expenditure	Debt
	\$A	\$A	\$A
1972	455,245,000	456,312,000	1,333,720,000

1975	828,985,000	820,601,000	1,555,333,000

PRODUCTION AND INDUSTRY

The gross value of primary production in 1974-75 was: crops \$A428,253,000, livestock slaughterings \$A104,293,000, livestock products \$A169,379,000, and other primary \$A28,466,000.

Agriculture.—Wheat harvest 1974-75, 1,486,000 tonnes; barley, 1,134,000 tonnes. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. In 1974-75 214,349,000 litres of wine and 4,709 tonnes of currants and raisins were produced. Considerable quantities of fruits (fresh and dried), wine and brandy, are annually sent to overseas countries, and to other Australian States. Some areas of the State, particularly near Adelaide, are also very suitable for growing all kinds of root crops and vegetables.

Livestock (March 31, 1975).—There were 17,621,000 sheep, 1,869,000 cattle, 349,000 pigs. Wool production (1974-75), 107,452,000 kg.

Minerals.—Iron, pyrite, gypsum, salt, coal, limestone, clay, &c., are found. The total mineral output was valued at \$A125,978,000 in 1974-75, including iron ore valued by the South Australian Director of Mines at \$A48,195,000.

Manufactures.—In 1974-75 there were 2,968 factories, employing 128,142 hands, the value of production being \$A1,104,400,000.

Transport and Communications.—There were (June, 1975) 6,030 kilometres of railway in South Australia, 765 kilometres of tram and bus routes and 100,255 kilometres of roads, including roads and tracks outside local government areas. There are a number of excellent harbours, of which Port Adelaide is the most important. The number of vessels (exceeding 200 net tons) entering South Australia from overseas and interstate during 1974-75 was 1,287 with net tonnage of 7,665,356. The total value of shipping at South Australian ports during 1974-75 was 10,984,701 net tons involving 2,459 recorded entries of vessels. The countries of registration of vessels entered were: Australia 1,413; United Kingdom 253; Greece 83; Norway 62; Sweden 43; New Zealand 61; Liberia 102; Japan 81; all other countries 361. There are 761 post offices in the State.

Civil Aviation.—There are 29 Government and licensed airports; the largest of these, Adelaide airport, recorded 1,425,860 passenger movements during 1974-75.

Motor Vehicles.—The registrations on 30 June, 1975, were 612,636, equal to 1 per 2.01 persons.

Wireless and Television (June 30, 1975)—Broadcasting stations 18; Television stations 11.

(17,934); Ψ Port Pirie (15,456); Ψ Port Augusta (12,224); and Ψ Port Lincoln (9,158).

Transit.—Transmission of mails from London to Adelaide, approximately 29 days by sea and 5 days by air.

TASMANIA

Tasmania is an island state of Australia situated in the Southern ocean off the south-eastern extremity of the mainland. It is separated from the Australian mainland by Bass Strait and incorporates King Island and the Furneaux group of islands which are in the Strait. It lies between 40° 38'–43° 39' S. lat. and 144° 36'–148° 23' E. long., and contains an area of 26,383 square miles.

POPULATION.—The estimated population at Dec. 31, 1975, was 409,000.

Year	Births	Deaths	Marriages
1972	7,824	3,277	3,426
1973	7,326	3,347	3,395
1974	7,398	3,484	3,567
1975	6,981	3,340	3,207

Vital Statistics.—The birth rate in 1974 was 18.4, death rate 8.7, marriage rate 8.9 per 1,000. Infant mortality (1974) 16.6 per 1,000 births.

Religions

In 1971 there were 169,089 members of the Church of England, 77,250 Roman Catholics, 42,173 Methodists, 17,281 Presbyterians, 4,134 Congregationalists and Independents, and 8,039 Baptists.

PHYSIOGRAPHY

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,300 ft. in height, and expanses of level, open plains. There are numerous rivers, the Gordon, Derwent, Pieman and Esk being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not often reach the island. At Hobart the mean maximum temperature ranges from about 54°F in winter to 70°F in summer, the minimum from 40°F to 52°F. The western side of the island is very wet, the eastern side being much drier; the average rainfall varies from 20 inches to 140 inches in different parts.

GOVERNMENT

The island was first settled by a British party from New South Wales in 1803, becoming a separate colony in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 responsible government was established. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), but is exercised by Cabinet Ministers responsible to the Legislature, of which they are members.

GOVERNOR

Governor of Tasmania, His Excellency Sir Charles Stanley Burbury, K.B.E.; assumed office Dec. 5, 1973.

AGENT-GENERAL IN LONDON

Agent-General for Tasmania, R. R. Neville, 458–9 Strand, Charing Cross, W.C.2.

THE LEGISLATURE

Parliament consists of two Houses, a *Legislative Council* of 19 members, elected for six years (3 retiring annually, in rotation, except in every sixth year, when four retire) and a *House of Assembly* of 35 members, elected by proportional representation for five years in five 7-member constituencies, the electors for both Houses being all Tasmanians of 18 years and over who have resided continuously in the State for 6 months. The current term of five years for the House of Assembly will be reduced to four years after the next General Election.

At the election held on April 22, 1972, the Labour Party was returned to power in the House of Assembly after the resignation of the Liberals who had held office for a little under three of the scheduled five year term. The Labour Party's previous term had lasted for 35 years. The composition of the House of Assembly after the election was: Labour 21; Liberal 14.

President of the Legislative Council, Hon. C. B. M. Fenton.

Clerk of the Council, G. B. Edwards.

Speaker of the House of Assembly, Hon. H. N. Hoigate.

Clerk of the House, B. G. Murphy.

THE JUDICATURE

The Supreme Court of Tasmania, with civil, criminal ecclesiastical, admiralty and matrimonial jurisdiction, was established by Royal Charter on October 13, 1823.

Chief Justice, Hon. G. S. M. Green.

Puisne Judges, Hon. Sir George Crawford; Hon. F. M. Neasey; Hon. D. M. Chambers; Hon. R. R. Nettlefold; Hon. J. R. Rex.

Local Courts established under the Local Courts Acts, 1896, are held before Commissioners who are legal practitioners with a jurisdiction up to \$A1,500 in the case of liquidated claims (\$A1,000, unliquidated claims). Courts of General Sessions, constituted by a chairman who is a Justice of the Peace and at least one other Justice, are established in the municipalities for the recovery of debts and demands not exceeding \$A200. Courts of Petty Sessions are established under the Justices Act, 1959, constituted by Police Magistrates sitting alone, or any two or more justices. A single justice may hear and determine certain matters.

EDUCATION

Government schools are of three main types: primary, secondary and matriculation schools. On Aug. 1, 1975, there were 80,917 scholars enrolled in 285 Government schools. There were also 68 independent schools with an enrolment of 14,597. The University of Tasmania at Hobart, established 1890, had 2,314 full-time students and 1,085 part-time (including external) students in 1975. A College of Advanced Education offering degree and

diploma courses was established in 1972. Enrolments in 1975 were 1,748 full-time students and 687 part-time students.

FINANCE

Revenue and expenditure of the Consolidated Revenue Fund and debt of Tasmania at current rates of exchange (June 30) was:—

Year	Revenue	Expenditure	Debt
	\$A	\$A	\$A
1971-72	157,751,717	160,236,825	709,921,268
1972-73	181,866,413	185,998,130	751,990,198
1973-74	206,946,676	210,096,694	787,618,086
1974-75	268,521,721	282,065,237	833,861,830

Banking.—The weekly average of depositors' balances at trading banks in March 1976 was \$A299,691,000; the savings bank balances at the end of March 1976, were \$A24,449,000.

PRODUCTION AND INDUSTRY

Gross values of agricultural production in 1974-75 were: crops, \$A53.9m.; livestock slaughtering and other disposals, \$A31.7m., and livestock products, \$A58.6m. Total value added in manufacturing in 1973-74 was \$A340.3m.; value added in mining was \$A72.9m. in 1974-75.

Agriculture and Livestock.—The principal crops are potatoes, apples and other fruit, hay, hops, oats, beans, oil poppies, green peas, turnips (for stock feed), barley and wheat. The livestock included (March 31, 1975) 921,000 cattle, 4,136,000 sheep and 64,000 pigs. The wool production (1974-75) was 18,888,000 kg.

Electrical Energy.—Tasmania, the smallest Australian state, ranks fourth as a producer of electrical energy—most of it derived from water power, with an assessed annual capacity of 7,610 million kWh. By reason of its low-cost electrical energy, Tasmania has large plants producing ferro-manganese and newsprint. A large aluminium plant is situated at Bell Bay and Tasmania is the source of the bulk of Australian requirements of electrolytic zinc and fine papers. The Hydro-electric Commission has completed a network of 22 stations including two oil fired stations at Bell Bay. Work is continuing on two hydro-electric developments in the remote western and south-western regions of the state, which will increase the installed generator capacity from 1.44 million kW to 2.20 million kW.

Forestry.—The quantity of timber (excluding firewood) of various species cut in 1974-75 was 3,937,610 cubic metres, including 2,866,340 cubic metres for woodchip and wood-pulp.

Minerals.—The chief ores mined are those containing copper, tin, iron, silver, zinc and lead. The gross value of output in all mines and quarries in 1974-75 was \$A17.8m.

Manufactures.—The chief manufactures for export are: refined metals, pelletized iron ore, preserved fruit and vegetables, butter, cheese, woollen manufactures, alginates, paper, confectionery, wood chips and sawn timber. In 1973-74, 935 manufacturing establishments employed 31,527 persons, including working proprietors. Salaries and wages paid totalled \$A161.4m.

COMMUNICATIONS

Road and Rail.—Tasmania is served by a 1,067 mm gauge Federal Government railway system of 985 route kms. An additional 134 route kms of the same gauge is privately operated. During 1974-75 the Government system carried 430,000 passengers and 1,731,000 tonnes of goods and livestock. At June 30, 1975 there were 20,993 kilometres of road

normally open to traffic. Of this total 6,937 kilometres were sealed. Motor vehicles on the register at Dec. 31, 1975 were: cars and station wagons, 159,200; commercial vehicles, 36,100 and motor cycles, 7,700.

Aviation.—Regular services operate between Tasmania and the other Australian States. During 1974-75 876,000 passengers were carried on these services. The main cities and towns in the State are served by regular internal services.

OVERSEAS TRADE

Year	Imports	Exports
	\$A'000	\$A'000
1972-73	45,045	218,712
1973-74	69,277	259,745
1974-75	100,610	226,154

The principal overseas exports are ores and concentrates, refined metals, fresh fruit, greasy wool, meat and butter.

TOWNS

CAPITAL, Ψ HOBART, founded 1804. Population (June 30, 1975), 136,550.

Other towns (with estimated population at June 30, 1975) are Ψ Launceston (64,850), Ψ Devonport (20,270), Burnie-Somerset (21,060), Ulverstone (8,680) and New Norfolk (6,870).

VICTORIA

The State of Victoria comprises the south-east corner of Australia, at the part where its mainland territory projects farthest into the southern latitudes; it lies between 34°-39° S. latitude and 141°-150° E. longitude. Its extreme length from east to west is about 493 miles, its greatest breadth is about 290 miles, and its extent of coast-line is about 980 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,884 square miles.

Population.—The population at June 30, 1973, was 3,586,574 (1,792,201 males and 1,794,373 females).

Births, Deaths and Marriages

Year	Births	Deaths	Marriages

1973	67,123	30,696	30,203
1974	66,201	30,875	29,708

Vital Statistics.—Annual rate per 1,000 of population in 1974: Births, 18.25; Deaths, 8.51; Marriages, 8.19. Deaths under 1 year per 1,000 births, 14.9.

RELIGION

Members of the Church of England at the date of the Census in 1971 numbered 892,568, Roman Catholics 1,003,826, Presbyterians 364,338, Methodists 256,058, Orthodox 140,600, Baptists 41,753, Churches of Christ 32,950, Lutheran 39,832 and Hebrew 30,117. The number of persons who did not state their religion was 215,122.

PHYSIOGRAPHY

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The length of the Murray River, which forms part of the northern boundary of Victoria, is about 1,200 miles along the Victorian bank. Melbourne,

the capital city, stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The climate of Victoria is characterized by warm summers, rather cold winters, and rain in all months with a maximum in winter or spring. Prevailing winds are southerly from November to February inclusive, with a moderate percentage of northerlies often associated with high temperatures. Northerly or westerly winds predominate from March to October inclusive. Rain on an average falls in Melbourne on 143 days per year, the annual average being 25.85 inches.

GOVERNMENT

Victoria was originally known as the Port Phillip District of New South Wales and was created a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of Ministers.

EDUCATION

Primary Education is compulsory, secular and free between the ages of 6 and 15. At Aug. 1, 1974, there were 1,724 Government Primary Schools attended by 366,303 pupils, 34 Primary-Secundary Schools with 8,588 pupils, and 262 Secondary Schools (excluding Junior Technical Schools) with an enrolment of 168,987. There were also 101 Government Junior Technical Schools with 61,599 pupils and 40 Special Schools with 3,166 pupils. In addition there are various Senior Colleges and Colleges of Advanced Education.

At Aug. 1, 1974, 196,420 pupils attended 571 non-Government schools, 466 of which were Roman Catholic.

There are three State-aided Universities—Melbourne, Monash and La Trobe. Enrolments for 1974 at Melbourne were 15,539, at Monash 12,837 and at La Trobe 6,481.

PRODUCTION AND INDUSTRY

The gross value of primary production (excluding mining and quarrying) in 1973-74 was \$A1,467,007,979, agricultural \$A461,231,870, pastoral \$A597,851,098, dairying \$A276,934,278, poultry and bee-keeping \$A69,813,714, trapping \$A5,633,632, forestry \$A44,478,755 mining and quarries (including oil and natural gas) \$A432,949,000, fisheries \$A11,064,632. The net value of production of primary industries was \$A1,081,611,136. Wool, wheat, flour, butter, live stock, fruits, milk and cream, meats, poultry and eggs are staple products.

Live Stock.—There were on rural holdings in March, 1974, 25,778,000 sheep, 5,840,000 cattle, and

424,000 pigs. The quantity of wool produced in 1973-74 was valued at A248,232,000 (preliminary figures).

Minerals.—Minerals raised include oil and natural gas, brown coal, limestone, clays and stone for construction material. Production of brown coal in 1973-74 amounted to 26,354,577 tonnes.

Banking, etc.—State Savings Bank deposits at June 30, 1974, amounted to \$A1,861,972,000; in addition, deposits in the Commonwealth Savings Bank (in the State of Victoria) amounted to \$A853,858,000, and in other savings banks \$A1,214,312,000.

Insurance (other than Life).—The total revenue of companies or other bodies transacting business in Victoria during the year 1973-74 amounted to \$A522,897,000, made up of premium income \$A486,197,000, and other income \$A36,699,000. Expenditure totalled \$A485,354,000 (excluding taxation), comprising claims \$A361,053,000, commission and agents' charges \$A39,555,000 and other expenditure \$A84,746,000.

Crude Oil and National Gas.—In February, 1965 natural gas was first discovered in commercial quantities in the offshore waters of the Gippsland Basin in eastern Victoria. An even larger gas field was found early in 1966, and during 1967 two valuable oilfields were located in the same general area. These fields are still the largest yet found in Australia. Following the development of the four fields, commercial gas began to flow to consumers in Melbourne during April 1969, and crude oil came on stream in October, 1969. Production from the Gippsland fields during the calendar year 1974 was: stabilized crude oil, 20,136,889 cubic metres; treated natural gas, 2,128,154,045 cubic metres; commercial propane, 918,372 cubic metres and commercial butane, 1,055,219 cubic metres.

Secondary Industry.—In 1972-73 there were 11,734 manufacturing establishments in which 314,269 males and 141,004 females were employed. The principal industrial sub-divisions were: Transport equipment, 60,909 persons; basic and fabricated metal products 51,003 persons; other industrial machinery, 66,663 persons; clothing and footwear, 61,129 persons; and food, beverages and tobacco, 63,847 persons. Manufacturing activity is concentrated in the Melbourne Statistical Division. Important manufacturing centres are Geelong, Ballarat, Bendigo and in the shire of Morwell. Value added in the course of manufacture was \$A3,738 million.

TRANSPORT

Victoria State Railways.—At June 30, 1974, there were 6,685 kms of railway open for traffic. The revenue and expenditure for the year ended June 30, 1974, were \$A115,612,777 and \$A156,119,624 respectively. Total distance travelled was 33,352,420 kms and passenger journeys numbered 114,589,353. The tonnage of goods and livestock carried was 11,231,160.

Shipping.—During the year ended June 30, 1974, 3,530 vessels with net tonnage 22,192,000 entered Victorian ports and 3,530 vessels with total net tonnage of 22,074,695 were cleared.

Motor Vehicle Registration.—The number of vehicles on the register at June 30, 1974, was: cars and station wagons, 1,301,900; light commercial type vehicles, 150,100; trucks and omnibuses, 111,600, and motor cycles, 45,800.

OVERSEAS TRADE

The export trade (excluding inter-state trade) consists largely of agricultural and mining products. The principal overseas imports of the State are aircraft and parts, apparel and textiles, manufactured fibres, electrical and other machines and machinery, motor vehicles and tractors, metals and metal manufactures, iron and steel, rubber manufactures, crude petroleum, paper, drugs and chemicals, synthetic resins and professional, scientific and controlling instruments.

CITIES, TOWNS AND BOROUGHES

Ψ MELBOURNE, the capital city, which is an archiepiscopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum, art gallery and large churches are the principal features of the city. At the Census of June 30, 1971, the population of Urban Melbourne was 2,394,117. Other urban centres are Ψ Geelong, 115,181; Ballarat, 58,620; Bendigo, 45,936; Moe-Yallourn, 20,863; Shepparton, 19,410; Ψ Warrnambool, 18,684; Morwell 16,858; Wangaratta, 15,586; Traralgon, 14,665.

WESTERN AUSTRALIA

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 113° 9' E. long. and from 13° 44' to 35° 8' S. lat. Its extreme length is 1,480 miles, and 1,000 miles from east to west; total area 975,920 sq. miles.

POPULATION.—At June 30, 1975, the population was estimated at 1,122,559 (males, 572,703; females, 549,856). The figures include full-blood Aborigines.

Religions.—Census of 1971—Church of England 362,759, Roman Catholics 267,990, Methodists 85,283, and Presbyterians 48,367.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Meharry (4,082 ft) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range

in the south-west. The coastal regions are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a seaward slope to the Indian Ocean, into which flow many streams, notably the Preston, Collic, Murray, Swan, Murchison, Gascoyne, Ashburton, Fortescue and De Grey. In the north the Fitzroy flows from the King Leopold ranges into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the State may be described as an immense tableland, with an average elevation of 1,000 to 1,500 ft. above sea-level, the surface of which varies from stretches of clay soils to the sand dunes of the far interior. The climate is one of the most temperate in the world. The total rainfall at Perth during 1975 was 682 millimetres, the average for the previous 100 years 879. Of the total area two-thirds is suitable for pastoral purposes.

GOVERNMENT

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 Responsible Government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon the Constitution Act, 1889, the Constitution Acts Amendment Act, 1899, and amending Acts. The Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

The Legislative Assembly (elected March, 1974) is composed of Liberal Party 23, Australian Labour Party 22, National Country Party 6.

THE LEGISLATURE

Parliament consists of a *Legislative Council* and a *Legislative Assembly*, elected by adult suffrage subject to qualifications of residence and registration. The qualifying age for electors for both the Legislative Council and Legislative Assembly was lowered in 1970 from 21 to 18 years. There are 30 members in the Legislative Council, two from each Province, for a period of 6 years, one member from each Province retiring triennially. The Legislative Assembly is composed of 51 members, who are elected for a term of 3 years.

EDUCATION

Education.—In 1975 there were 629 government schools and 191 non-government schools (excluding kindergartens) with 195,024 and 43,373 pupils respectively. The total amount expended on education (from State Revenue) during the year ended June 30, 1975, was A179,890,614, including grants of \$A4,643,727 to the University of Western Australia (6,279 full-time students in 1975), and \$A145,577 to Murdoch University (417 full-time students in 1975).

PRODUCTION AND INDUSTRY

The gross value of primary production (excluding mining) in 1974-75 was: crops \$A473,191,000; livestock slaughterings, etc., \$A102,042,000; livestock products \$A257,884,000; forestry \$A14,314,000; fishing and whaling \$A37,577,000; hunting \$A1,663,000.

Crops and Livestock.—The production of wheat for grain in 1974-75 was 3,277,071 tonnes. On March 31, 1975, the livestock included 2,554,012 cattle, 34,476,337 sheep, and 264,157 pigs. The wool clip in 1974-75 was 172,221,000 kg. in the grease.

Manufacturing Industries.—There were 2,818 manufacturing establishments operating in the State at June 30, 1974. The total number of persons employed (including working proprietors) by these establishments at the end of June, 1974, was 69,711.

Forestry.—The forests contain some of the finest hardwoods in the world. The total quantity of sawn timber produced during 1974-75 was 392,481 cubic metres.

Minerals.—The State has large deposits of a wide range of minerals, many of which are being mined or are under development for production. The ex-mine value of all minerals produced during 1974-75 was \$A860,451,000.

Communications.—On June 30, 1975, there were 6,075 kms. of State government railway open for general and passenger traffic; and 731 kms. of the Trans-Australian railway (Kalgoorlie-Port Pirie Junction). In the year ended June 30, 1975, 3,604 vessels (net tonnage 50,212,347) entered Western Australian ports and 3,623 (net tonnage 50,625,843) cleared. The total length of roads at June 30, 1975, was 161,654 kms. The number of registered motor vehicles at June 30, 1975, was 549,775 (414,402 motor cars and station wagons, 129,416 light and heavy commercials, and 25,957 motor cycles and motor scooters).

FINANCE

Total revenue of Western Australia in 1974-75 was \$A734,239,941, compared with \$A567,683,368 in 1973-74. Expenditure in 1974-75 totalled \$A743,373,939 (1973-74 \$A573,416,368). The net public debt of the State at June 30, 1975, was \$A1,119,226,523 (1974, \$A1,069,211,744).

PHYSIOGRAPHY

New Zealand consists of a number of islands of varying size in the South Pacific Ocean, and has also administrative responsibility for a large tract in the Antarctic Ocean. The two larger and most important islands, the North and South Islands of New Zealand, are separated by only a relatively narrow strait. The remaining islands are very much smaller and, in general, are widely dispersed over a considerable expanse of ocean. The boundaries, inclusive of the most outlying islands and dependencies, range from 8° South latitude to south of 60° South latitude, and from 160° East longitude to 150° West longitude.

Geographical Features.—The two principal islands have a total length of 1,040 miles, and a combined area of 102,374 square miles. A large proportion of the surface is mountainous in character. The principal range is that of the Southern Alps, extending over the entire length of the South Island and having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several volcanoes, two of which are active, others being dormant or extinct. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 1½ wide), the Franz Josef and the Fox are the best known. The North Island is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for use in navigation. The more important include the Waikato (270 miles in length); Wanganui (180), and Clutha (210). Lakes (Taupo, 234 sq. miles in area; Wakatipu, 113; and Te Anau 133) are abundant, many of them of great beauty.

Climate.—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits of some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 15° C. in the North to about 9° C. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is from approximately 13 to over 250 inches. The

number of rainy days is generally in the neighbourhood of 160 to 180 in the North Island and between 110 and 140 in the South, except in the southern portion of the west coast. The amount of sunshine is generally over 2,000 hours per annum and ranges between 1,600 to 2,500 hours.

GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Janszoon Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642.

The islands were visited, and charted, in 1769 by Captain Cook, who returned to them in 1773, 1774 and 1777. From 1800 onwards sealers and whalers settled along the coasts, and trade in timber and flax followed. Christianity was introduced in 1814, and in 1832 a British Resident was appointed. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, created a separate colony distinct from New South Wales. Organized colonization on a large scale commenced in 1840 with the New Zealand Company's settlement at Wellington. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Imperial Act of 1852, and on the New Zealand Constitution (Amendment) Act of Dec. 10, 1947. The Statute of Westminster was formally adopted by New Zealand in 1947. The executive authority is entrusted to a Governor-General appointed by the Crown and aided by an Executive Council, within a Legislature consisting of one chamber, the House of Representatives.

FLAG: Blue ground, with Union Jack in top left quarter, four five-pointed red stars with white borders on the fly. On June 20, 1968, a new naval ensign bearing the Southern Cross was adopted, replacing the British white ensign.

POLICE

On March 31, 1975 the strength of the Police Force was 4,119 of all ranks, equivalent to 1 for every 745 of the population. The total cost of police protection in 1975-76 was \$NZ49,434,000.

DEFENCE

A unified Ministry of Defence was set up on Jan. 1, 1964. The Ministry is responsible, under the Minister of Defence, for the whole field of national defence. Defence expenditure in 1975-76 amounted to \$NZ193,465,000.

Navy

The Royal New Zealand Navy was greatly expanded during the Second World War and a number of small vessels were built in New Zealand. The naval forces include the Women's Royal New Zealand Naval Service, and Volunteer Reserve forces in four divisions. The strength is 4 frigates, 1 survey ship. Active naval personnel number 303 officers and 2,850 ratings. A frigate is normally attached to the Far East Station.

Army

The New Zealand Army consists of the Regular Force, the Territorial Force and the Army Reserve. The strength of the Regular Force at March 31, 1975 was 5,523 and of the Territorial Force 5,618.

The Army is now organized on the basis of one integrated Regular/Territorial Brigade Group, with its own logistic support and reserves. In addition, a regular force battalion is stationed as part of the Commonwealth Far East strategic reserve in Malaysia.

Air

Operational elements of the R.N.Z.A.F. include one Strike Squadron, one ground attack squadron, one anti-submarine warfare squadron, one helicopter squadron and three transport squadrons, one of which is based in Singapore. Aircraft operated by the R.N.Z.A.F. include the Skyhawk, Strikemaster, Orion, Hercules and Bristol Freighter. The strength of the Regular Force at March 31, 1975, was 4,297.

FINANCE

Into the Consolidated Revenue Account (New Zealand's main public account) are paid the proceeds of income tax, sales tax, customs and excise duties and other taxes, also interest, profits from trading undertakings, and departmental receipts (departmental expenditure is included gross). Revenue from taxation is also paid into the National Roads Fund principally from a tax on motor spirits and registration and licence fees for motor vehicles.

Revenue from taxation in 1975-76 amounted to \$NZ3,185,289,000 of which \$NZ3,084, 039,000 represented receipts into the Consolidated Revenue Account, and \$NZ101,250,000 receipts into the National Roads Fund.	

DEBT

The gross *Public Debt* amounted on March 31, 1975, to \$NZ4,199,699,000, of which \$NZ682,640,000 was domiciled in London and \$NZ128,156,000 in the U.S.A.; \$NZ54,955,000 represented World Bank loans.

CURRENCY

World recession has affected New Zealand through low export prices and high import prices, as shown in a rise in import prices in the two years ended March 31, 1974. To counter this trend, the Government devalued the New Zealand dollar by 15 per cent. on August 10, 1975.

BANKING

There are five trading banks (with numerous branches) doing business, two of which are predominantly New Zealand banks. Of these the Bank of New Zealand is owned by the State. At Mar. 31, 1976, assets of all trading banks in respect of New Zealand business amounted to \$NZ2,584,000,000; liabilities, \$NZ2,529,600,000; and the value of notes in circulation amounted to \$NZ368,500,000. The Reserve Bank of New Zealand commenced business on August 1, 1934. The note-issuing powers of other banks have since been withdrawn and the Reserve Bank notes are legal tender. New Zealand's official overseas reserves at March 31, 1976, amounted to \$NZ684,800,000, of which \$NZ374,200,000 represented assets of the New Zealand banking system. Trading banks' advances, including discounts on Mar. 31, 1976, totalled \$NZ1,787,600,000 compared with \$NZ1,673,300,000 in the previous year. Deposits with trading banks on Mar. 31, 1976, amounted to \$NZ2,459,500,000 (1974, \$NZ2,102,900,000).

Post-office and trustee savings banks had, at the close of the year 1975-76, over 4 million accounts having \$NZ2,136, 547,000 to their credit. Private savings banks have been operated by the trading banks since Oct. 1964, and at March 31, 1976, deposits totalled \$NZ556,848,000.

EDUCATION

Schools are free and attendance is compulsory between the ages of 6 and 15. There are opportunities for apt pupils to proceed to university. In 1974 there were 472,099 pupils attending public primary schools, and 50,574 pupils attending registered private primary schools. The secondary education of boys and girls in the cities and large towns is carried on in 233 state secondary schools, 48 state secondary departments of district high schools and 112 private secondary schools. The total number of pupils receiving full-time secondary education in July 1974 was 208,596 and in addition there were 107,507, students attending technical classes and 17,679 receiving part-time tuition from the Technical Correspondence School. The university system consists of the University of Auckland, the University of Waikato, Massey University of Manawatu, Victoria University of Wellington, the

University of Canterbury and the University of Otago. The Lincoln university college of agriculture is associated with the University of Canterbury. The university system is co-ordinated by the University Grants Committee. The Universities had a total of 39,969 students in 1974.

The total expenditure on education out of public funds in 1975-76 was \$NZ631,750,700.

Forestry.—The output of sawn timber for 1975 was 825,000,000 board ft., of which 676,000,000 board ft. represented exotic varieties, mainly pine.

Livestock.—Livestock on farms at Jan. 31, 1974, included 3,125,000 dairy cattle (of which 2,080,000 were dairy cows in milk during season), 6,528,000 beef cattle (of which 2,199,000 were beef breeding cows), and 500,000 pigs. At June 30, 1975, sheep numbered 55,320,000, including 41,108,000 breeding ewes.

Manufactures.—Statistics of factory production show (1973-74) 7,690 factories in operation, employing 244,522 persons. Salaries and wages amounted to \$NZ1,042,214 000; cost of materials used, \$NZ3,112,806,000. Total value of production, \$NZ5,250,878,000.

Minerals.—Coal output in 1974 was 2,564,317 tons. Gold-mining was formerly an important industry, but production has declined greatly in recent years. Other minerals produced on a relatively small scale are copper, silver, iron ore, manganese ore, zinc, leads, cadmium, tungsten and asbestos. Valuable deposits of natural gas have been discovered in Taranaki, and this has been piped to some main North Island centres. New Zealand has large resources of potential iron ore in the black sands of many of its beaches of which 992,099 tons were exported in 1973 and steelworks have been built near Auckland to utilize such deposits.

TRADE

Provisional figures of New Zealand's trade during the year ended June, 1975, were; Imports (c.i.f.) \$NZ2,737,460,000, compared with \$NZ2,014,177,000 in 1973-74; Exports, (f.o.b.) \$NZ1,612,607,000, compared with \$NZ1,787,563,000 in 1973-74.

Trade with U.K.

Exports to U.K.....	276,171,000	247,603,000

New Zealand produce exported to the U.K. in the 12 months ending June, 1975, was valued at \$NZ346,100,000 and included butter, valued at \$NZ76,200,000, cheese (\$NZ15,300,000; beef (\$NZ26,800,000); wool (\$NZ44,700,000); lamb (\$NZ135,700,000).

Railways.—In March, 1975, there were 2,981 route miles of Government railway in operation. The number of passengers carried on Government lines in 1974-75, including season-ticket holders, was 18,896,000. Goods railed amounted to 12,883,000 tonnes. Railway total revenue and expenditure were \$NZ153,911,000 and \$NZ199,071,000 in 1974-75.

Motor Vehicles.—On December 31, 1975, there were 1,884,904 motor vehicles licensed, including 1,164,483 cars and 92,208 motor cycles and power cycles. The number of persons per passenger car was 2.8.

Shipping.—During 1975 the vessels entered from overseas ports numbered 3,692 (net tonnage 20,078,000) and those cleared for overseas 3,688 (net tonnage 19,976,000).

Post Office Statistics.—During 1974-75 internal postal services handled 699,026,000 items, including 351,148,000 letters and 329,605,000 items of printed matter. Overseas mails included 2,583,618 lb. of airmail received and 1,680,056 lb. despatched. Telephone subscribers totalled 980,307 at March 31, 1975.

Civil Aviation.—In 1975 domestic scheduled services flew 25,171,000 kilometres and carried 2,312,000 passengers. Freight carried amounted to 62,900 tons. In 1975 international services to and from New Zealand carried 1,179,000 passengers, 39,877 tonnes of freight and 2,270 tonnes of mail.

THE ISLANDS OF NEW ZEALAND

In addition to North, South, Stewart and Chatham Islands:—

The Three Kings (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S. lat. and 172° 8' 8" E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (used as a weather station). *Antipodes Group* (40° 41' 15 S. lat. and 178° 43' E. long.) uninhabited. *Bounty Islands* (47° 4' 43 S. lat., 170° 01 30 E. long.). *Snares Islands* and *Solander* (uninhabited).

The Kermadec Group (population normally 9 or 10) between 29° 101 to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Raoul or Sunday, Macaulay, Curtis Islands, L'Esperance, and some islets. All the inhabitants are government employees at a meteorological station.

Cook and other Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Matiaro, Manuae, Takutea, Palmerston, Penrhyn or Tongareva, Manihiki, Rakahanga, Pukapuka or Danger, and Nassau. The total population of the group was 18,937 at Sept. 30, 1974. Niue, which is geographically part of Cook Islands, but which is administered separately, had an estimated population on Sept. 30, 1974 of 3,992. The chief exports of the Cook Islands are fruit juice, clothing, copra, bananas, citrus fruit and pulp, and pearl shell. The trade is chiefly with New Zealand, Australia, Japan, the U.K. and the U.S.A. Financial aid to the Cook Islands and Niue approved by the New Zealand Government totalled \$NZ5.5 million for the 1973-74 financial year.

The High Commissioner of the Cook Islands is employed in a dual role, since he represents both the Queen and the New Zealand Government. Since Aug. 4, 1965, the Islands have enjoyed complete internal self-government, executive power being in the hands of a Cabinet consisting of the Premier and five other ministers. The new Constitution Act was passed by the New Zealand Parliament in November 1964, but did not come into force until it had been endorsed by the 22-member Legislative Assembly of the Cook Islands, elected in April 1965.

The New Zealand citizenship of the Cook Islanders is embodied in the Constitution, and assurances have been given that the changed status of the Islands will in no way affect the consideration of subsidies or the right of free entry into New Zealand for exports from the group.

A New Zealand Representative is stationed at Niue, which since October 1974 has been self-governing in free association with New Zealand, which is responsible for external affairs and defence. Executive power is in the hands of a Premier and a Cabinet of 3 drawn from the Assembly of 20 members.

Tokelau (or *Union Islands*).—A group of atolls (Fakaofu, Nukunono and Atafu) (population 1,574 in Sept. 1974), proclaimed part of New Zealand as from Jan. 1, 1948.

THE ROSS DEPENDENCY

The *Ross Dependency*, placed under the jurisdiction of New Zealand by Order in Council dated July 30, 1923, and defined as all the islands and territories between 160°E. and 150°W. longitude which are situated south of the 60°S. parallel. The Ross Dependency includes Edward VII Land and portions of Victoria Land. For some years there have been permanent bases in the area, staffed by survey and scientific personnel.

The Bahamas

The Bahama Islands are an archipelago lying in the Atlantic Ocean between 20° 55'–27° 22' N. Lat.; 72° 40'–70° 20' W. Long. They extend from the coast of Florida on the north-west almost to Haiti on the south-east. The group consists of 700 islands, of which 30 are inhabited and 2,400 cays comprising an area of more than 5,380 square miles. The population, at the end of 1974, was estimated at 197,000. The principal islands include: Abaco, Acklins, Andros, Berry Islands, Bimini, Cat Cay, Cat Island, Crooked Island, Eleuthera, Exumas, Grand Bahama, Harbour Island, Inagua, Long Cay, Long Island, Mayaguana, New Providence (on which is located the capital, Nassau), Ragged Island, Rum Cay, San Salvador and Spanish Wells. San Salvador was the first landfall in the New World of Christopher Columbus on October 12, 1492.

The Bahamas were settled by British subjects when the islands were deserted. The ownership of the Bahamas was taken over in 1782 by the Spanish, but the Treaty of Versailles in 1783 restored them to the British.

Tourism is the economic mainstay of the Bahamas, whose salubrious climate and fine beaches attract over 1,000,000 visitors annually.

GOVERNMENT

The Bahamas gained independence on July 10, 1973. There are a Senate of 16 members and an elected House of Assembly of 38 members.

Governor-General, His Excellency Sir Milo Bough-ton Butler, G.C.M.G., G.C.V.O.

Industries.—A plant for the manufacture of cement and an oil refinery have been established in Freeport, Grand Bahama, where there are also a number of light industries. A rum distillery is in operation in New Providence and a multi-million dollar aragonite operation is in progress off the island of Andros. Other industries are those associated with the treatment of local agriculture and marine produce, salt extraction and handwork, and timber-felling for plywood.

Education.—Education is compulsory between the ages of 5 and 14. More than 57,000 students are enrolled in Ministry of Education and Independent schools in New Providence and the Family Islands.

Civil Aviation.—Facilities for external traffic are provided by Bahamasair, Pan-American World Airways, British Airways, Air Canada, Air Jamaica, Eastern Air Lines, Delta Air Line, National Airlines, International Air Bahama, Flamingo Airways, Lufthansa, Sabena, and Mackey International Airline. Kivin Air provides internal schedule and charter flights to the Family Islands, and Bahamas Air Traders' Island Flying Service provides internal schedule and charter flights to the outlying islands. There are daily return flights between Nassau and Miami, several daily flights between Nassau–Palm Beach–Fort Lauderdale and Tampa, and a regular service between Nassau, Kingston and Montego Bay, Jamaica, besides regular trunk communication with London, New York, Chicago, Toronto, Montreal, Bermuda, Kingston and Haiti.

Communications.—There are a General Post Office in Nassau, 4 branch offices in New Providence and 109 sub-offices in the Family Islands. Wireless and telephone services are in operation to all parts of the world. There are 132 radio-telephone channels among the islands.

The imports are chiefly foodstuffs, manufactured articles, building material, lumber and machinery. The chief exports in 1972 were pulpwood, cement, rum, crawfish, salt and aragonite.

Bangladesh

Area, Population, Climate, etc.—The People's Republic of Bangladesh consists of the territory which was formerly East Pakistan (the old province of East Bengal and the Sylhet district of Assam), covering an area of 55,126 sq. miles in the region of the Gangetic delta, and has a population, according to the 1974 census, of 71,316,817, but official estimates place the current figure at 78,000,000.

The country is crossed by a network of navigable rivers, including the eastern arms of the Ganges, the Jumna (Brahmaputra) and the Meghna, flowing into the Bay of Bengal. The climate is tropical and

monsoon; hot and extremely humid during the summer, and mild and dry during the short winter. The rainfall is heavy, varying from 50 inches to 135 inches in different districts and the bulk of it falls during monsoon season (from June to September). The mean temperature during the winter (November to February) is about 20°C. (68°F.) and during the hot season 30°C (86°F.).

Prior to becoming East Pakistan, the territory had been part of British India. It acceded to Pakistan in October, 1947, and became a Republic on March 23, 1956.

By a proclamation of March 26, 1971, Bangladesh purported to secede from the central government, and a government-in-exile was set up in April in Calcutta. The short war between India and Pakistan, in both the East and the West, and India's overwhelming defeat of the Pakistani Army in the East, brought about a *de facto* secession of the East wing. The Indo-Pakistan war was concluded on December 16, 1971, and Mr. Zulfikar Ali Bhutto became President on December 20. Sheikh Mujib was sworn in as Prime Minister on January 12. Recognition of the new state was accorded swiftly by many countries. Bangladesh was admitted to the Commonwealth on April 18, and to the United Nations in 1974. Pakistan and Bangladesh accorded one another mutual recognition in Feb. 1974 but they have yet to establish diplomatic relations.

Government.—A Constitution was promulgated on December 15, and provided for a multi-party system of democratic government. In Dec. 1974 the President declared a State of Emergency and suspended certain constitutional privileges. In January 1975 Sheikh Mujib introduced constitutional amendments which empowered him to assume the Presidency and to establish a one-party system of government. On August 15 Sheikh Mujib and his family were assassinated by dissident Army officers. The former Commerce Minister, Khandaker Moshtaque Ahmed, assumed the Presidency. On November 4 Brigadier Khaled Mosharraf, Chief of Army Staff, led a short-lived *coup* which displaced President Moshtaque, but Mosharraf was himself overthrown and killed a few days later. Since then a non-political administration under President Mr Justice A. M. Sayem (the former Chief Justice) has administered the country under martial law.

President and Chief Martial Law Administrators, Mr. Justice A. M. Sayem.

1st Secretaries, D. P. Small, M.B.E. (Head of Chancery); G. T. Burgess, M.B.E. (Commercial) A. E. Montgomery; M. D. K. Halsey; M. C. McCulloch (Aid), H. Davidson O.B.E., (Agricultural Advice); W. A. Tincey (Consular and Immigration); J. R. Travis (Aid); N. H. B. Verlod (Administration).

2nd Secretaries, J. P. Bedingfield (Commercial); H. A. Condor (Consular); R. Brean (Aid).

British Council Representative, E. T. J. Phillips, 5 Fuller Road, Ramna, Dacca 2.

Education.—The present system of education is

under review. Primary education is free but not universal. There are six Universities; Dacca, Rajshahi, Chittagong, Bangladesh University of Engineering and Technology (at Dacca), Bangladesh Agricultural University (at Mymensingh), and Jahangirnagar (opened in 1970). In 1974 literacy was estimated at 22.21 per cent. of the whole of Bangladesh and 26 per cent. of the male population.

Transport and Communications.—Principal seaports with total import and export tonnages for 1975 in millions, were: Ψ Chittagong 4.59, and Ψ Chalna 1.54. The Bangladesh Shipping Corporation has been set up by the Government to operate the Bangladesh merchant fleet. The principal airports with runway lengths in feet are Dacca-Tejgaon (9,000) and Chittagong (7,500); a new international airport outside Dacca is scheduled for completion in 1977. A national airline, Bangladesh Biman, has been established with services to London and Calcutta, Bangkok, Karachi, Dubai and Katmandu, and an internal network.

There are about 3,900 miles of roads in Bangladesh; 2,400 miles are metalled. There are 2,600 miles of railway track.

Radio Bangladesh is the main national broadcasting service. A television service was introduced in 1965.

Production.—Bangladesh is the principal producer of raw jute in the world. Other agricultural products are rice, tea, oil seeds, pulses, and sugar cane. The chief industries are jute, cotton, tea, leather, paper, fertilizer and sugar.

Aid. Bangladesh is a major recipient of bilateral and multilateral development aid. Commitments in the financial year 1975-76 totalled U.S. \$945,000,000, of which U.S. \$905,000,000 derived from the Aid Group led by the I.B.R.D. Commitments were composed of U.S. \$290,000,000 in food aid, U.S. \$336,000,000 commodity aid and U.S. \$319,000,000 project aid.

CAPITAL, Dacca. Population 2,539,991, according to the results of the 1974 census.

Barbados

Barbados, the most easterly of the West India islands, is situated in latitude 13° 14' N. and longitude 59° 37' W. The island has a total area of 166 square miles, the land rising in a series of tablelands marked by terraces to the highest point, Mt. Hillaby (1,104 ft.). It is nearly 21 miles long by 14 miles broad. Some 46 acres are covered by forest and 68,875 acres are cultivated. **Climate.**—Barbados has a pleasant climate with annual average temperature 26.5°C. (79.8°F.) and rainfall varying from a yearly average of 75 inches

in the high central district to 50 inches in some of the low-lying coastal areas. *Population*.—Since the Census held in April, 1970, the population has risen from 235,229 to an estimated total of 254,964 in 1975.

CAPITAL.— Ψ Bridgetown (population, estimated April, 1971, 18,789). Populations of other administrative areas (parishes) in 1970 were: St. Michael (88,097); Christ Church (36,033); St. Philip (17,230); St. George (16,903); St. James (14,658); St. Peter (10,820) and St. Thomas (10,624). Bridgetown, the only port of entry, has a deep-water harbour with berths for 8 ships, opened in 1961. Oil is pumped ashore at one installation on the West Coast. *FLAG*.—Three vertical stripes, dark blue, gold and dark blue, with trident device on gold stripe. *NATIONAL DAY*.—Nov. 30 (Independence Day).

Government.—Barbados was first settled by the British in 1627 and was a Crown Colony from 1652 until it became an independent state within the Commonwealth on November 30, 1966. The Legislature consists of the Governor-General, a Senate and a House of Assembly. The Senate comprises 21 members appointed by the Governor-General, of whom 12 are appointed on the advice of the Prime Minister, 2 on the advice of the Leader of the Opposition and 7 by the Governor-General at his discretion to represent religious, economic or social interests in the Island or such other interests as the Governor-General considers ought to be represented. The House of Assembly comprises 24 members elected every five years by adult suffrage. In 1963 the voting age was reduced to 18. In June, 1976, seats in the House of Representatives were distributed as follows: Democratic Labour Party 17, Barbados Labour Party 6, People's United Party 1. Education.—Primary and secondary education is free in Government-aided schools.

Communications.—Barbados has some 840 miles of roads, of which about 780 miles are asphalted. There is an international airport at Seawell, 12 miles from Bridgetown, and frequent scheduled services connect Barbados with the major world air routes. There are a colour television service, and a radio broadcasting service operated by the Caribbean Broadcasting Corporation, and a wired broadcasting service operated by a local subsidiary of Rediffusion Ltd.

Production, etc.—The principal exports are sugar, molasses, rum, clothing, lard and margarine, and the imports food, manufactured goods, machinery, transport equipment and chemicals. Barbados' major trading partners are the U.K., U.S.A., CARICOM and Canada. The tourist industry is a major source of revenue.

TRADE

Goods to the value of BDS \$217,120,000 were exported in 1975, including sugar (\$95,137,000), molasses (\$11,761,000), and rum (\$4,347,000).

Botswana

Botswana (formerly the British Protectorate of Bechuanaland) lies between latitudes 18° and 26° S. and longitudes 20° and 28° W. and is bounded by the Cape and Transvaal Provinces of South Africa on the south and east, by Rhodesia, the Zambesi and Chobe (Linyanti) Rivers on the north and north-east and by South West Africa on the west. Botswana extends some 500 miles by 550 miles, with a total area of

220,000 square miles. The climate of the country is generally sub-tropical, but varies considerably with latitude and altitude. A plateau at a height of about 4,000 feet divides Botswana into two main topographical regions. To the east of the plateau streams flow into the Marico, Notwanli and Limpopo Rivers; to the west lies a flat region comprising the Kgalagadi Desert, the Okavango Swamps and the Northern State Lands area. The Kgalagadi Desert is a level tract closely covered with thorn bush and grass, extending 300 miles to the west and bounded by the Makgadikgadi salt pans and the Boteti River in the north. Its rainfall varies from 20 inches in the east to 9 inches in the south-west. The Okavango Swamps, 6,500 square miles in area, lie in the remote north-western corner of Botswana, and, apart from the Limpopo and Chobe Rivers, are the only source of permanent surface water in the country. North of the Boteti River and the Makgadikgadi depression the Kgalagadi Desert gives way to forest and dense bush of the Northern State Lands. Large areas of the country support only herds of game. Elephant numbers have been estimated at 10,000.

Population.—At the census in August, 1971, it was recorded that Botswana had a population of 620,000. The eight principal Botswana tribes are Bakgatla, Bakwena, Bangwaketse, Bamaletse, Bamangwato, Barolong, Batawana and Batlokwa. **CAPITAL.**—Gaborone, estimated population 18,000. Other business centres are Francistown (20,000) and Lobatse (13,000). **FLAG.**—Horizontal bands of blue, white, blue, with a black stripe on the white band.

Government.—On September 30, 1966, Bechuanaland became a Republic within the Commonwealth under the name Botswana. The President of Botswana is Head of State and appoints as Vice-President a member of the National Assembly who is his principal assistant and leader of Government business in the National Assembly. The Assembly consists of the President, 32 members elected on a basis of universal adult suffrage, 4 specially elected members, the Attorney-General (non-voting) and the Speaker. There is also a House of Chiefs.

Mineral extraction and processing has recently become a major source of income for the country, following the opening of large mines for diamonds and copper-nickel. Very large deposits of coal have been discovered, and are being mined on a small scale; plans for comprehensive development remain to be formulated. Much of the country has yet to be fully prospected. Manufacturing industry is expected to grow rapidly in the future, as communications improve.

Education.—In 1972, there were 294 primary schools with enrolment of 81,662 and 15 secondary schools with enrolment of 5,564. There were also three teacher training establishments with enrolment of 332. The principal languages in use in the country are English and Setswana.

Communications.—The railway from Kimberley and Mafeking in South Africa to Bulawayo in Rhodesia passes through eastern Botswana. The main roads in the country are the north-south road, which closely follows the railway, and the road running east-west that links Francistown and Maun. A new road from Nata to Kazungula which will provide a direct link to Zambia from Botswana, is under construction. Air services are provided on a scheduled basis between the main towns, linking with services from South Africa and Zambia. There are telephone and telegraph links to South Africa and Rhodesia.

The country is essentially pastoral, although sorghum, maize, beans, pumpkins and melons are sown. Cattle thrive, despite the drought of 1965-66, during which time the numbers of cattle decreased by 350,000. In 1972, after three years of good rain, the national herd numbered about 2,000,000. Plans for the development of agriculture and cattle production, for combating soil erosion, investigating the water resources of the country and improving water supplies are being carried out.

Cyprus

Area, Climate and Population.—Cyprus with an area of 3,572 square miles, is the third largest island in the Mediterranean Sea, exceeded in size by Sicily and Sardinia. Its greatest length is 140 miles and greatest breadth 60 miles. It is situated at the extreme north-east corner of the Mediterranean in latitude 35° N. and longitude 33° 30' E. It is about 40 miles distant from the nearest point of Asia Minor, 60 miles from Syria and 240 miles from Port Said. The main topographical features of Cyprus are: (a) A narrow limestone range of mountains extending in an unbroken chain for nearly 100 miles along the north coast, at an average height of 2,000 feet; (b) A broad central plain, running for some 60 miles from west to east; (c) An extensive igneous mass rising to over 6,000 feet in the west of the island; and (d) Narrow coastal plains between the mountains and the sea. The rivers are little more than mountain torrents. There is no permanent stream of any volume.

Cyprus has a somewhat intense Mediterranean climate (with a hot dry summer and a variable warm winter). There are two contrasted seasons, winter and summer, while the intermediate ones are short and transitional. The winter is generally sunny with frequent cold spells between the beginning of December and end of February. The mean temperatures of the coldest month range from 36° to 50° F.

The rainy season lasts from October to April with average total rainfall of about 20 inches.

The summers are hot, dry and almost cloudless. July and August are the warmest months, with mean temperatures ranging from 80°–85° F. in the lowlands, to 70° in the mountains. In April 1974 the estimated population was 632,000. There are two major communities, Greek Cypriots (78 per cent.) and Turkish Cypriots (18·2 per cent.); and minorities of Armenians, Maronites and others. The population increases on the average at 0·9 per cent. annually. The birth rate in 1973 was estimated to be 18·2 and the death rate 9·5 per thousand.

CAPITAL.—Nicosia, near the centre of the island, with a population of 235,000 (including suburbs); the other principal towns are Ψ Limassol (population 125,300), Ψ Famagusta (124,300), Ψ Larnaca (60,900), Paphos (57,300) and Kyrenia (32,700). (Since the events of July and August 1974 (see below) there have been significant changes in population distribution). Nicosia is distant from London 2,028 miles by air.

[Following an uprising led by Greek Officers of the Cyprus National Guard, on July 15, 1974, Archbishop Makarios left Cyprus. On July 23, Mr. Olafkos Clerides, Speaker of the House of Representatives, was sworn in as Acting President.] Archbishop Makarios returned to Cyprus on Dec. 7, 1974 to resume his presidential functions.

GOVERNMENT

Cyprus passed under British administration from 1878. Cyprus was formally annexed to Great Britain on Nov. 5, 1914, on the outbreak of war with Turkey. From 1925 to 1960 it was a Crown Colony administered by a Governor, assisted by an Executive Council and also for a time by a partly-elected Legislative Council. Following the launching in April 1955 of an armed campaign by EOKA in support of ENOSIS (union with Greece), a state of emergency was declared in November, 1955, and Archbishop Makarios was deported. Further proposals for a workable constitution made in 1956 and a seven-year-plan for the government of Cyprus in association with Greece and Turkey were rejected by

the Greek Government and Greek Cypriots. Archbishop Makarios was released in March, 1957, but was not allowed to return immediately to Cyprus. Following a meeting at Zürich between the Prime Ministers of Greece and Turkey, a conference was held in London and an agreement was signed on February 19, 1959, between the United Kingdom, Greece, Turkey and the Greek and Turkish Cypriots which provided that Cyprus would be an independent Republic.

Constitution.—Under the Cyprus Act, 1960, the island became an independent sovereign republic on August 16, 1960. The constitution provides for a Greek Cypriot President and a Turkish Cypriot Vice-President elected for a five-year term by the Greek and Turkish communities respectively. The House of Representatives, elected for five years by universal suffrage of each community separately, consists of 35 Greek and 15 Turkish members. The 1960 Constitution proved unworkable in practice and led to the intercommunal troubles. Talks have been in progress between Greeks and Turks since 1968 on a new Constitution for the island assisted by the Special Representative in Cyprus of the U.N. Sec.-Gen. and more recently the Secretary General personally. The mandate of the U.N. Peace Keeping Force in Cyprus (UNFICYP) was last renewed for the twenty-seventh time on June 13, 1975, for a further period of six months.

A General Election was held for the 35 Greek Cypriot seats on July 5, 1970, resulting in the following state of parties: *Unified Party*, 15; *Akel* (Communist), 9; *Progressive Front*, 7; *Democratic Centre Union*, 2; and *Independents*, 2. On the same day elections were held in the Turkish sector to elect 15 members for Turkish Cypriot national seats and 15 Turkish communal seats which together form a temporary chamber in the Turkish Cypriot sector first set up in December, 1967, but which is not recognized by the Cyprus Government. On July 15, 1974, mainland Greek officers of the Greek Cypriot National Guard launched a *coup d'état*

against President Makarios and installed a former EOKA member Nikos Sampson in his place. Turkey, purportedly acting under the 1960 Treaty of Guarantee by which Britain, Greece and Turkey reserved to themselves the right to maintain constitutional order and the independence and territorial integrity of the island, invaded northern Cyprus on July 20, subsequently moving on August 13, to occupy approximately 40 per cent. of the island. Despite successive U.N. resolutions calling for the withdrawal of all foreign forces from the island and the return of refugees (who number about 210,000) to their homes, much of the northern part of Cyprus remains under Turkish military occupation with a "Turkish Federated State" declared in this area.

British Sovereign Areas.—The United Kingdom retained full sovereignty and jurisdiction over two areas of 99 square miles in all—Akrotiri-Episkopi-Paramali and Dhakelia-Pergamos-Ayios Nicioios-Xylophagou—and use of roads and other facilities. The British Administrator of these areas is appointed by the Queen and is responsible to the Secretary of State for Defence.

Production and Industries.—About 36 per cent. of those gainfully employed take part in agriculture, the chief agricultural products being:—cereals, vine products, potatoes, carobs, carrots, citrus and other fresh and dried fruit, tobacco and legumes.

Various kinds of livestock are raised, principally sheep, goats, pigs and poultry. The value of agricultural and livestock exports in 1974 was about £28,250,000. Mining is an important industry in Cyprus; the value of minerals exported in 1974 was £9,742,000. The principal minerals are cupreous and copper concentrates, copper pyrites, and asbestos. There is no heavy industry, but a wide variety of light manufacturing industries. Tourism prior to July–August 1974, was an important source of revenue. Long-stay visitors to the island in 1973 numbered 257,000.

Fiji

This is a group of some 840 islands (of which about 100 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'–21° 10' S. lat. and 176° E.—178° W. long. is 7,072 square miles. The International Date Line has been diverted to the east of the island group. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanua Levu, Taveuni and Kandavu. The climate is oceanic. Shade temperatures seldom rise above 93° F. or fall below 60° F. except in the mountains. There is a great contrast in vegetation between the windward and leeward sides of the larger islands with rain forests and luxuriant vegetation giving way in the drier zones to grassland with scattered trees. The chief products are sugar cane, coconuts, (and coconut products, e.g., copra), gold, rice, bananas, pineapples, yams and dalo or taro (colocasia). Tourism is an increasingly important source of revenue.

The population (1974 estimate) was 569,800 (288,000 Indians, 251,000 Fijians, 10,000 part-Europeans, 4,000 Chinese, 2,000 Europeans, and 14,000 other Pacific races).

CAPITAL.—Suva, in the island of Viti Levu. Population 60,000.

Government.—Fiji was a British colony from 1874 until October 10, 1970, when it became an independent state and a member of the Commonwealth. Under the Constitution there is a Governor-General appointed by the Queen. An elected House of Representatives (52 members) consists of 12 Fijians, 12 Indians and 3 General members elected on Communal rolls; and 10 Fijians, 10 Indians and 5 General members elected on National rolls, in which members of all races vote on the same register. General members are in the main representatives of the European, part-European and Chinese communities.

There is a Senate of 22 members, 8 appointed by the Great Council of Chiefs, 7 by the Prime Minister, 6 by the Leader of the Opposition and one by the Council of Rotuma, an island dependency 400 miles from Suva, discovered in 1879 and annexed in 1881.

Governor-General, His Excellency Ratu Sir George Cakobau, G.C.M.G., O.B.E. (1973).

The principal exports are raw sugar, coconut oil,

gold, oil seed cake and meal, lumber, copra, ginger, molasses, biscuits, fish, unmanufactured tobacco, veneer sheets, paints and cement. The chief imports are machinery, electrical goods, foodstuffs, all types of fabrics, petroleum products, motor vehicles and miscellaneous manufactured articles. The tourist trade continues to expand.

Communications.—Fiji is approximately 11,000 miles from the United Kingdom; transit time from London via Panama Canal about 28–30 days. Air connections are provided between the United Kingdom and Fiji via Canada, United States of America, Hong Kong, Japan and U.S.S.R., and the Middle East either through New Zealand and Australia or through New Caledonia and Singapore. The following trunk route operators provide services through Nadi Airport; Qantas, Pan American, Air New Zealand, U.T.A., and CP Air. Flights connecting with Fiji operate to Auckland, Sydney–Perth and Darwin and points beyond; Honolulu, San Francisco or Los Angeles or Vancouver and points beyond; Tahiti and points beyond; Pago Pago; Noumea and points beyond. Fiji is one of the main aerial crossroads in the Pacific.

Air Pacific Ltd. (previously Fiji Airways Ltd.) is based at Nausori Airport near Suva and operates scheduled domestic services within the Fiji islands and from Suva provides connection to Nadi, Labasa, Savusavu and Tavenni, and there are regional services to Tonga, Western Samoa, Papua, New Guinea (Port Moresby) via the New Hebrides (Vila); the Solomon Islands (Honiara) and the Republic of Nauru via the Gilbert Islands, and Auckland, N.Z., via Tonga, Fiji Air Services Ltd. operates Charter flights within the Fiji group of islands and South Pacific and provides scheduled services within the Fiji group.

The Gambia

The West African river Gambia was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth I, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It consists of a narrow strip of land, estimated at 4,003 sq. miles, lying on both sides of the River Gambia to a distance of about 300 miles, mainly between 13° 15'–13° 45' N. and 13° 45'–13° 65' W. The river is navigable to ocean-going vessels for 150 miles and to river steamers up to 300 miles from its mouth. The capital and chief port, Banjul, formerly Bathurst, is situated at the mouth of the river. The provisional figure for the total population of the country at the 1973 Census was 493,499. The climate of Banjul is extremely pleasant except during the rainy season from June to October, when it sometimes becomes uncomfortably humid. Rainfall, 30–60 inches a year.

CAPITAL.—Ψ Banjul. Population (1973 census), 39,476.

FLAG.—Horizontal stripes of red, blue and green, separated by narrow white stripes.

Government.—On February 18, 1965, the Gambia became an independent monarchy within the Commonwealth, with the Queen as Head of State. On April 24, 1970, following a referendum, the constitution was changed to that of a Republic (within the Commonwealth) with an executive President. The House of Representatives, which elects its own Speaker, consists of 32 elected members, 4 elected Head Chiefs, 3 nominated members and the Attorney General (who is also a nominated member with voting rights). The Vice-President, who is the Government leader in the House, and other Ministers are appointed by the President. The latter's tenure of office is co-terminous with the life

of a Parliament.

High Commissioner, His Excellency, M. H. G. Rogers (1975).

Communications.—Banjul is 2,600 miles from London. There are two direct air services weekly via Casablanca and Las Palmas and three weekly, changing at Dakar. There are no regular passenger or mails service by sea. Ocean-going vessels entering the ports in 1972 totalled 282 (net tonnage 668,000). There is an international aerodrome at Yundum, 17 miles from Banjul. Internal communication is by road and river. There are 794 miles of motor road, including 180 miles of bituminous surface roads, 330 miles of gravel roads and 284 miles of Commissioners' roads. There are eight Government wireless stations and a V.H.F. telephone service linking Banjul with the principal towns in the provinces. There is a broadcasting service.

Education.—There are 96 primary schools and 22 secondary schools, with a total enrolment of 26,338 pupils, including 8,071 girls. There are 99 students, including 31 females, at the Yundum Teacher Training College. Vocational and Training Centres operate at Banjul and Lamin, total enrolment, 196, including 11 girls.

Production.—Most of the population is engaged in agriculture, the chief product being ground-nuts which is the single important cash crop. Other crops are rice, millet and various kinds of fruit and vegetables. Fishing and livestock production are considerable. No minerals are at present being exploited and there are practically no manufactures other than ground-nut processing and a bottling plant.

The chief exports are ground-nut products, which account for 95 per cent. of total exports, the main markets being Italy, the United Kingdom, W. Germany, Switzerland and the Netherlands. Other exports are palm kernels, dried fish and hides. Foodstuff imports include rice, sugar, flour and kola nuts. Tourism has been developed in recent years and is an increasing source of foreign exchange. Manufactured goods of all kinds are imported, the chief being textiles and apparel, vehicles, machinery, metal goods and petroleum products.

Ghana

Ghana (formerly the British Colony of the Gold Coast) is situated on the Gulf of Guinea, between 3° 07' W. long. and 1° 14' E. long. (about 334 miles), and extends 441 miles north from Cape Three Points (4° 45' N.) to 11° 11' N. It is bounded on the north by the Republic of Upper Volta, on the west by the Republic of Ivory Coast, on the east by the Republic of Togo, and on the south by the Atlantic Ocean. Although a tropical country, Ghana is cooler than many countries within similar latitudes.

Area and Population.—Ghana has a total area of 92,100 sq. miles with a total population (Census of 1970) of 8,545,561, some 27 per cent. more than the population at the Census of 1960. Almost all Ghanaians are Sudanese Negroes, although Hamitic strains are common in Northern Ghana.

CAPITAL.—ACCRA. Population of the Capital District (including Accra Tema City Council area, and Accra Rural area) (provisional, 1970) 851,614. Other towns are Kumasi, Tamale, Sekondi-Takoradi, Cape Coast, Sunyani, Ho, Koforidua, Tarkwa and Winneba. Accra is 3,920 miles by sea from Liverpool, transit 12 to 30 days.

FLAG.—Equal horizontal bands of red over yellow over green; five-point black star on gold stripe.

INDEPENDENCE DAY—March 6.

GOVERNMENT

The Gold Coast region of West Africa was first visited by European traders in the fifteenth century. The Gold Coast Colony, Ashanti, the Northern Territories and Trans-Volta-Togoland, the constituent parts of the new State, came under British administration at various times, the original Gold Coast Colony, the coastal and Southern areas, being first constituted in 1874; Ashanti in 1901; and the Northern Territories Protectorate in 1901. The territory of Trans-Volta-Togoland, part of Togo, a former German colony, was mandated to Britain by the League of Nations after the First World War, and remained under British administration as a United Nations Trusteeship after the Second World War. After a plebiscite in May,

1956, under the auspices of the United Nations, the territory was integrated with the Gold Coast Colony.

The former Gold Coast Colony and associated territories became the independent state of Ghana and a member of the British Commonwealth on March 6, 1957, under the *Ghana Independence Act*, 1957, and adopted a Republican constitution on July 1, 1960.

On Feb. 24, 1966, the Army seized power and Dr. Nkrumah and his ministers were dismissed.

Ghana was administered until October 1, 1969, by a National Liberation Council of four representatives each from the Army and the police, during which time a Constitution for the Second Republic of Ghana was evolved and brought into force by a 150 member Constituent Assembly on Aug. 22, 1969.

General elections were held on August 29, 1969, in which Dr. K. A. Busia's Progress Party won 105 seats and Mr. K. A. Gbedemah's National Alliance of Liberals 29, the remaining 6 seats being won by minority parties. Dr. Busia was appointed Prime Minister on Sept. 3, 1969, and the N.L.C. formally handed over to the civilian government on October 1, 1969. A three-man presidential Commission was appointed under Brigadier Afrifa in September 1969. It was dissolved in July 1970, and a month later Mr. E. Akufo-Addo was elected President.

On January 13, 1972, the Busia administration was ousted in an army *coup d'état* led by Colonel I. K. Acheampong. The Constitution was withdrawn, political activity banned and the Presidency abolished. The National Redemption Council is the supreme governing body, assisted by an Executive Council. Rule is by decree.

JUDICIARY

The Judiciary, headed by the Chief Justice, represents the judicial control of Ghana and has authority over all civil and criminal matters, except those heard by military tribunals. Fundamentally the Courts of Ghana consist of two divisions, the *Superior Court of Judicature* and the *Inferior Courts*. The former consists of the Court of Appeal and the High Court. The *Inferior Courts* consist of the Circuit Courts, approximately equivalent to the old British Assize Courts, now Crown Courts, and such courts as deal with judicial matters on a district and juvenile level.

The *Court of Appeal*, when constituted with five Justices, is the final Court of Appeal in Ghana. The Chief Justice has discretion to create divisions of the Court of Appeal.

The *High Court of Justice*.—This court has jurisdiction over criminal, industrial and labour matters. Consisting of the Chief Justice and a minimum of twelve Puisne Judges, it may also include any other judge appointed at the discretion of the Chief Justice. Individual courts may consist of up to three judges, with or without a jury.

PRODUCTION, ETC.

Agriculture.—Agriculture forms the basis of Ghana's economy, employing 70 per cent. of the working population. Crops of the *Forest Zone* include cocoa, which is the largest single source of revenue, rice and a variety of other foodstuff crops grown on mixed-crop farms. Fruits such as avocado pears, oranges and pineapples are grown. Cassava is the most important crop of the *Coastal Savannas Zone*, which consists of the Accra Plains (1,400 sq. miles) and Ho-Keta Plains (2,600 sq. miles) of the lower Volta area. Fishing is important in coastal areas and in the Volta itself. Production of pulses such as groundnuts, tiger nuts and cowpeas is widespread. Near the Togo border oil palms, yams, maize, cassava, fruit and vegetables are produced. Livestock is raised in the uncultivated areas. The *Northern Savanna Zone* is Ghana's principal cattle rearing area and other livestock production there is important for home consumption. Corn and millet crops are produced in the far north and maize, yams, rice and groundnut crops in more southerly parts of the Zone.

A State Farms Corporation, established in 1963 to further larger scale farming enterprise, has more than 100 farms in various parts of the country and operates from eight regional centres.

Fisheries.—Some 150,000 of the country's population are engaged in fisheries which now produce about 180,000 tons annually. Ghana's estimated annual requirement is at least 250,000 tons and there are considerable imports of fish products. About 80 per cent of home supply is obtained from sea fisheries, but production from the Volta Lake and other inland fisheries is increasing rapidly thanks to greatly increased fish population.

Mineral Production.—The area within a 60 mile radius of Dunkwa produces 90 per cent. of Ghana's mineral exports. Manganese production from Nsuta ranks among the world's highest and gold, industrial diamonds and bauxite are also produced. Some 30,000 persons are employed by the mining companies.

Manufactures.—Examples of the small-scale traditional industries are tailoring, goldsmithing and carpentry. Priority has been given in recent years to the establishment of a number of "Pioneer Industries" including sawmill furniture, prefabricated doors, plywood, vehicle assembly, cigarettes, boatbuilding, refrigerator assembly, food processing (biscuits, edible oils, confectionery, brewing, etc.), cotton textiles, clothing, footwear, printing and other light industries. A modern industrial complex is growing in the Accra-Tema area.

Volta River Project.—The Volta River is formed at the confluence of the Black and White Voltas, both of which rise in the neighbouring republic of Upper Volta. With its tributaries the Volta drains an area of 150,000 sq. miles of which 61,000 sq. miles lie in Ghana. The Volta Dam at Akosombo was inaugurated in January, 1966, to generate hydro-electric power for the processing of bauxite and feed a power transmission network for the Accra-Kumasi-Takoradi area. Electricity is now also sent to Togo and Dahomey. The lake raised by the Volta Dam has a maximum area of 3,275 sq. miles, a length of 250 miles and a shore line of 4,500 miles. A water transport service from Akosombo to various points on the lake has been instituted.

Power output from Akosombo is planned to reach 768 megawatts, 22 times the country's 1959 generating capacity. Smaller dams with 150 MW. and 93 MW. capacity are to be built at Kpong rapids and at Bui in the Northern Region. Planned aluminium output in Ghana by 1973 was 145,000 tons (1969, 103,000 tons).

COMMUNICATIONS

There are four aerodromes in Ghana, situated at Accra, Takoradi, Kumasi and Tamale. Accra Air-

port is an international airport and is the terminus for services from the United Kingdom, the Northern, Ashanti and Western Regions.

Railway communications consist of a main line running from Takoradi to Kumasi thence to Accra, a distance of 357 miles. From Huni Valley on the Kumasi line north of Takoradi a line runs to Kotoku on the railway about 17 miles north of Accra. Branch lines run to Sekondi, Prestea, Kade, Awaso and Tema. Total railway mileage open to traffic is 600. There are 20,245 miles of motorable roads, of which 2,335 are bitumen.

Takoradi Harbour consists of two breakwaters enclosing a water area of 220 acres. Seven quay berths are situated on the lee breakwater—five are used for the handling of general cargo, one is leased specially for manganese exports and one is used for shallow draft colliers. Tema Harbour—Africa's largest artificial harbour and a prospective major port of the South Atlantic—was opened in 1962. There are 10 berths for larger ocean going vessels and the harbour also has the largest dry dock on the West African coast. An oil berth has also been built to serve the Ghana refinery which has been constructed at Tema.

Guyana

GUYANA, the former colony of British Guiana, which includes the Counties of Demerara, Essequibo and Berbice, is situated on the north-east coast of South America and has a total area of 83,000 square miles with a seaboard of about 270 miles. The population at December 31, 1970, was estimated at 714,233. There are about 31,460 Amerindians. The territory is bounded on the south by Brazil, on the east by Surinam, on the west by Venezuela, and on the north and N.E. by the Atlantic. The coastline is very like the Netherlands, below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the Guyana-Venezuela-Brazil boundaries is Mt. Roraima, a flat topped mountain 9,000 feet above sea-level. There are many beautiful waterfalls in Guyana: on the Potaro River (a tributary of the Essequibo) is the *Kaieteur Fall*, with a clear drop of 741 feet and a total fall of 822 feet, and on the Essequibo, the *Horse Shoe Falls* (discovered in 1934); a fall, with a drop of some 500 feet, discovered in 1934 on the Ipobe River, a tributary of the Kuribrong, has been named the *Marina Fall*, and other falls were discovered in 1938 on the Kamarang River, 80 miles north-east of Mt. Roraima.

The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate on the coast is pleasant and healthy for the greater part of the year. In the Aug.-Oct. period it is hot. The mean temperature is 80-3°, its extremes during 87 years ranging between 68° and 96°, but these are very rare, the usual extremes being 70° and 90°. In the interior the mean temperature is higher—82-6°, its extremes ranging from 66° to 103°. The yearly rainfall is subject to marked variation, its mean on the coast lands averaging about 90 inches with an average of 58 inches on the savannahs. The daily average sunshine is nearly 7 hours and, except when rain is falling, dull and cloudy weather is rarely experienced.

Government.—Guyana became independent on May 26, 1966, with a Governor-General appointed by the Queen. It became a Cooperative Republic on Feb. 23, 1970, and Mr. Arthur Chung was elected first President on March 17, 1970, for a term of six years. The electoral system is a Proportional Representation or "single list" system, each voter casting his vote for a party list of candidates. The Prime Minister and Cabinet are responsible collectively to a National Assembly of 53 members elected by secret ballot; the voting age is 21. Elections to the National Assembly are held every five years; the last election was on July 16, 1973.

An important feature of the Constitution is its provision for the appointment of an *Ombudsman*. The life of the Assembly, presided over by a Speaker, who may or may not be a Member of the Assembly, is five years.

CAPITAL.—Ψ Georgetown. Estimated population, including environs, 168,000. Other towns are: Linden (population 29,000); Ψ New Amsterdam (population 23,000); Corriverton (population 17,000).

FLAG.—Red triangle with black border, pointing from hoist to fly, on a yellow triangle with white border, all on a green field.

President.—His Excellency Arthur Chung, re-elected for a further term of office, March 12, 1976.

JUDICATURE

The Supreme Court of Judicature consists of a Court of Appeal and a High Court. There are also Courts of Summary Jurisdiction. The Court of Appeal consists of the Chancellor as President, the Chief Justice and such number of Justices of Appeal as may be prescribed by Parliament.

The High Court consists of the Chief Justice, as President, and nine Puisne Judges. It is a court with unlimited jurisdiction in civil matters and exercises exclusive jurisdiction in probate, divorce and admiralty, and certain other matters. It also sits as a Full Court of the High Court of the Supreme Court of Judicature comprising not less than 2 Puisne Judges and then its jurisdiction is almost entirely appellate.

Production, etc.—Much of the country is forest. The cultivated portion (about 600,000 acres, of which 107,182 are under sugar-cane and 316,950 in rice) is largely confined to the narrow coastal alluvial belt. There are extensive deposits of gold, diamonds, bauxite and mica.

Communications.—The Georgetown Automatic Exchange had 7,900 direct extension lines in 1972, involving 12,913 telephones. Twenty-six subsidiary exchanges provided a total of 1,465 direct exchange lines with 2,181 telephone stations. Thirty-nine

land-line telegraph stations are maintained at coastal post offices and telegraph stations in the interior, providing communications with the coast. In Georgetown a central radio station, operated by the Guyana Telecommunication Corporation, provides radio-telephone communication with 5 branch offices, 20 stations operated by other Government departments, and 48 by private concerns. Overseas telephone, telex and telegraph services are provided by Cable and Wireless (W.I.) Ltd. in association with the Guyana Telecommunications Corporation. At the end of 1972 there were 50 district post offices (including two mobile post offices) at which all classes of postal business were transacted. There are two broadcasting stations operated on a commercial basis. The Guyana Airways Corporation provides internal and coastal air services.

Education.—At the end of the school year 1971-72 there were 390 primary schools with 130,671 pupils receiving first level education, or 81.27 per cent. of the 6-12 age group. Secondary education is offered in three types of school, 31 government-owned, 13 government-aided and approximately 50 privately-owned schools. In August 1972 there were 61,747 pupils receiving secondary education in government schools. This enrolment represented 45.4 per cent of the 12-17 age group. There were also about 10,000 pupils in private institutions.

The University of Guyana is the only institution which provides higher education. In 1971-72 1,232 students were enrolled in the Faculties of Arts, Natural Science, Social Science, Technical Studies and Education as well as in first-year studies in Law and in Diploma and Certificate courses. There are four established technical institutions: Georgetown and New Amsterdam Technical Institutes, the Carnegie School of Home Economics and the Guyana Industrial Training Centre. Besides these, there are 20 Home Economics and Industrial Arts Centres in various parts of the country. There are also Home Economics and Industrial Arts Department in many primary and secondary schools. Government trains teachers for both primary and secondary schools.

It was estimated that in 1973 the Government would spend G\$35,200,000 on education, of which G\$8,200,000 would be spent on building new schools and improving existing schools.

CONSTITUTION

The Constitution of India came into force on January 26, 1950. The Constitution provides for a single and uniform citizenship for the whole of India, with the right of vote for every adult citizen.

EXECUTIVE

The executive of the Indian Union consists of the President, the Vice-President and the Council of Ministers. The President is elected for five years by an electoral college consisting of all elected members of Parliament and of the various State Legislative Assemblies. The Vice-President is also elected for five years by members of the two Houses of Parliament. As head of the State the President exercises his functions with the aid and advice of the Council of Ministers headed by the Prime Minister. The Council is collectively responsible to the House of the People.

LEGISLATURE

The Legislature of the Union is called Parliament. It consists of two Houses known as the Council of States (*Rajya Sabha*) and the House of the People (*Lok Sabha*). The Council of States consists of not more than 250 members, of whom

12, having special knowledge or practical experience in literature, science, art or social service, are nominated by the President and the rest are indirectly elected representatives of the State and Union Territories. The Council is not subject to dissolution, one-third of its members retiring every two years. The House of the People at present consists of 524 members. Of these, 506 are directly elected from 21 States and 15 from eight Union Territories. One member is nominated by the President to represent the Union Territory of Arunachal Pradesh and two to represent the Anglo-Indian community. The House has a maximum duration of five years.

Subject to the provisions of the Constitution the Union Parliament can make laws for the whole of India and the State legislatures for their respective units. The distribution of legislative powers is governed by a system of three lists—the Union, the State and the Concurrent—under which all legislative activity has been mapped out. The Union Parliament has exclusive powers to legislate on 97 subjects of all-India importance, such as defence, foreign affairs, communications, railways, currency and banking, insurance, customs duties, etc. The State List contains 65 headings, e.g. public order and police, justice, education, public health, local government, agriculture, etc. The Concurrent List contains 48 subjects of common interest to the Union and the States.

OFFICIAL LANGUAGE

The Constitution (Art. 343) provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English, which was originally to continue as the official language for a period of 55 years from the commencement of the Constitution (January 1950), will, under the Official Language Act, 1963, as amended, continue to be used for all the official purposes for which it was used before Jan. 26, 1965, and also for the transaction of business in Parliament.

THE JUDICATURE

The Supreme Court of India, consisting of a Chief Justice and not more than 13 other judges; is the highest court in respect of constitutional matters. It is also the final Court of Appeal in the country.

DEFENCE

The supreme command of the armed forces is vested in the President. Administrative and operational control resides in the Army, Navy and Air Headquarters under the supervision of the Ministry of Defence.

The Army has five Commands, Southern, Eastern, Northern, Western and Central. A Territorial Force was inaugurated in Oct. 1949. A National Cadet Corps, with senior, junior, and girls' divisions, has also been raised.

The Indian Navy consists of an aircraft-carrier, two cruisers, a number of frigate squadrons, including some of the latest type of anti-submarine and anti-aircraft frigates, a squadron of anti-submarine patrol vessels, a minesweeping squadron, conventional type submarines, a submarine depot ship and fast boats carrying surface-to-surface guided missiles. A Naval aviation wing and a hydrographic

office have also been set up. India has started building her own naval craft.

The *Indian Air Force* is organized in five major formations, the Western, Eastern and Central Air Commands, and the Training and Maintenance Commands and an Independent Operational Group. Aircraft in use include SU-7, Hunter, Gnat, Mig 21 and HF24; Canberra bomber, helicopter and training planes.

PRODUCTION

About 70 per cent. of the inhabitants of India are dependent on agricultural pursuits. Most of the agricultural holdings are less than 5 acres. Food grains occupy three-fourths of the total cropped area. There are about 176,000,000 cattle, or about a quarter of the world's cattle population.

Banks and Banking.—The number of scheduled banks was 74 and the number of offices of banks was 18,730 in June 1976. The total credit at the end of June 1975 was Rs. 8,963 crores.

COMMUNICATIONS

Civil Aviation.—India occupies an important place in civil aviation among the nations of the world. All air lines were nationalized in 1953 and two corporations formed, Indian Airlines and Air India.

Four international aerodromes are managed by the International Airports Authority. The other 84 aerodromes are controlled and operated by the Civil Aviation Department of the Government.

Railways.—The railways are grouped into nine administrative zones, Southern, Central, Western, Northern, North-Eastern, North-East Frontier, Eastern, South-Eastern and South-Central.

Gross Traffic Receipts (1974-75), crores of rupees 1408.19. Working expenses, 1317.29. Net railway revenues, 73.64.

Ports.—The chief seaports are Bombay, Calcutta, Madras, Mormugao, Cochin, Visakhapatnam, Kandla, Paradip, Mangalore and Tuticorin. There are 167 intermediate and minor ports with varying capacity.

Shipping.—On Dec. 31, 1975, 471 ships totalling 38.69 lakh gross tons were on the Indian Register.

Postal.—On March 31, 1975, there were 117,222 post offices, and 1,744,088 telephones.

Jamaica

Jamaica is situated in the Caribbean Sea south of the eastern extremity of Cuba and lies between latitudes 17° 43' and 18° 32' North, and longitude 76° 11' and 78° 21' West. The island was discovered by Columbus on May 4, 1494, and occupied by the Spanish from 1509 until 1655 when a British expedition, sent out by Oliver Cromwell, under Admiral Penn and General Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid. Jamaica became an independent state within the British Commonwealth on August 6, 1962.

Area and Population.—Jamaica is 4,411 square miles in area and is divided into three counties (Surrey, Middlesex and Cornwall) and 14 parishes. The surface of the island is extremely mountainous, the highest peak being 7,402 ft. above sea level. The greatest length from east to west (Morant Point to Negril Point) is 146 miles and the extreme breadth 51 miles. At Dec. 31, 1975 Jamaica's population was estimated to be 2,060,300. Jamaica for climatic and other reasons is a popular tourist resort, attracting visitors mainly from the U.S.A. The total number of visitor arrivals in 1975 was 553,258. Tourist expenditure in 1975 was estimated at J\$116.8 millions.

Physical Features.—The topography consists mainly of coastal plains, divided by the Blue Mountain Range in the east, and the hills and limestone plateaus which occupy the central and western areas of the interior. The central chain of high peaks of the Blue Mountains is over 6,000 feet above sea level, and the Blue Mountain Peak, the highest of these, reaches an elevation of 7,402 feet. The rivers flow down from the central mountainous area. Most of the rivers are narrow and fast flowing, and some have rapids. In general those flowing south are longer and are fed by more tributaries than those flowing north. None is navigable except the Black River, and that only for small craft.

CAPITAL.—The seat of government is Kingston, the largest town and seaport (estimated population of the Corporate area of Kingston and St. Andrew in 1971, 572,653). Other towns are Montego Bay (42,800) and Spanish Town (41,600).

FLAG.—Gold diagonal cross forming triangles of green at top and bottom, triangles of black at hoist and in fly. **NATIONAL DAY.**—First Monday in August (Independence Day).

GOVERNMENT

The Legislative consists of a Senate of 21 nominated members and a House of Representatives consisting of 53 members elected by universal adult suffrage. The number of members cannot be fewer than 45 nor more than 60. The Senate has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives. The Constitution provides for a Leader of the Opposition.

COMMUNICATIONS

There are several excellent harbours, Kingston being the principal port. The island is intersected by 2,700 miles of main road, of which 1,350 are asphalted. There are 229 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages.

There are two international airports capable of handling the largest civil jet aircraft, the Norman Manley Airport on the south coast serving Kingston, and the Donald Sangster Airport on the north coast serving the major tourist areas. In addition there are licensed aerodromes at Port Antonio, Ocho Rios, Tinson Pen and Mandeville, which are used by Trans Jamaica Airlines on scheduled domestic flights. There are seven privately owned airstrips.

Air Jamaica, the national airline formed by the Government of Jamaica in association with Air Canada, operates scheduled services between the U.K., Canada, U.S.A., Nassau, Europe and Jamaica. Twelve other international carriers provide air communication with Europe, North, Central and South America and the Caribbean islands. They are: British Airways, British West Indian Airways, Air Canada, Pan American World Airways, A.L.M. Antillean, Cubana, Delta Luft-hansa, Cayman Airways, Mexicana Airlines, Eastern Airlines and TACA International Airlines.

Scheduled internal routes are operated by Trans-Jamaica Airlines. There are also six non-scheduled air services catering for various services and activities.

PRODUCTION

Most of the staple products of tropical climates are grown. Sugar and rum are manufactured and exported (the latter is still counted the best in the world), and fine quality coffee is grown in certain areas of the Blue Mountains. Sugar production in

1975 amounted to 355,000 tons. There is trade in fruits, chiefly bananas, with U.K. Citrus, cocoa, coffee, pimento and ginger are important export crops. Jamaica has developed a breed of dairy cattle known as Jamaica Hope and a beef breed, the Jamaica Black. Jamaica is the second largest producer of bauxite in the world; output for 1975 was 11,388,000 tons. The bauxite deposits are worked by one of Canadian and five U.S. companies; the Canadian company and a consortium of the U.S. companies process bauxite into alumina. Further expansion of the industry is in progress. Gypsum is also mined, production in 1975 being 235,975 tons. Cement is manufactured locally, the output of the factory being 399,000 tons in 1975. The Esso Oil Refinery is designed to process 26,000 barrels of crude oil daily. The Jamaica Industrial Development Corporation is responsible for implementing the Government's industrial development programme. This Corporation administers incentive legislation which was enacted to stimulate the establishment of industries locally. In addition to undertaking promotional activities both locally and abroad, the Corporation maintains offices in the United States and the United Kingdom. In the last decade, manufacturing has grown from the processing of a few agricultural products into the production of a whole new range of commodities dependent on both local and foreign raw materials.

Kenya

Kenya is bisected by the equator and extends approximately from latitude 4° N. to latitude 4° S. and from longitude 34° E. to 41° E. From the coast of the Indian Ocean in the east, the borders of Kenya are with Somalia in the east and Ethiopia and Sudan in the north and north-west. To the west lie Uganda and Lake Victoria. On the south is Tanzania. The total area is 224,960 square miles (including 5,224 square miles of water). The population is estimated to be 12,934,000 and to be increasing by 3.5 per cent. annually. The country is divided into 7 Provinces (Nyanza, Rift Valley, Central, Coast, Western, Eastern and North-Eastern).

CAPITAL.—Nairobi, situated at latitude 2° S. and longitude 36° 49' E. at 5,453 feet above sea level, covers an area of 266 sq. miles and has a population of about 509,000. It is 307 miles by road from Mombasa, the country's main port. Mombasa (246,000) possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Nakuru (47,800), Kisumu (30,700), Eldoret (16,900), Thika (18,100) and Nanyuki (11,200).

Nairobi: transit from London about 25 days by sea; by air, 10 hrs.

GOVERNMENT

Kenya became an independent state and a member of the British Commonwealth on December 12, 1963, after six months of internal self-government. The national assembly consists of a single House of Representatives. Kenya became a Republic on Dec. 12, 1964. On July 4, 1974, the executive of the ruling Kenya African National Union decided that Swahili should become Kenya's official language, to be used in the National Assembly and in the country's administration, instead of English.

Production.—Agriculture provides about 35 per cent. of the national income. The great variation in altitude and ecology provide conditions under which a wide range of crops can be grown. These include wheat, barley, pyrethrum, coffee, tea, sisal, coconuts, cashew nuts, cotton, maize and a wide variety of tropical and temperate fruits and vegetables. The total area of high potential land on which concentrated alternate husbandry can be practised amounts to only 16,761 sq. miles or 11.9 per cent. of the total land area. The remainder is arid or semi-arid country suitable for stock raising. In the areas of high potential, most of the old, large scale farms, formerly farmed by Europeans, have been bought by the Government for settlement of landless people and for transfer to African large-scale farmers.

In 1973 Kenya's forest area totalled 4,621,000 acres, of which 306,000 acres were under plantation.

Prospecting and mining are carried on in many parts of the country, the principal minerals produced being soda ash, salt and limestone. Major deposits of fluorite and galena are now being exploited.

Small amounts of gold are also mined. Value of all minerals produced in 1973 was £K3,445,000.

Hydro-electric power has been developed, particularly on the Upper Tana River. Owen Falls

Dam scheme in Uganda is connected to the Kenyan system, and supplies about 30 per cent. of consumption. Work is in progress on the second stage of the £37,000,000 Seven Forks Project which is expected to provide 300 MW on completion in the early 1980s.

There has been considerable industrial development over the last 15 years and Kenya has a wide variety of industries processing agricultural produce and manufacturing an increasing range of products from local and imported raw materials. New industries have recently come into being such as steel, textile mills, dehydrated vegetable processing and motor tyre manufacture as well as many smaller schemes which have added to the country's already considerable consumer goods. There is an oil refinery in Mombasa supplying both Kenya and Uganda, and a fuel pipeline to Nairobi is expected to open shortly. The market served comprises all the East African territories and the volume of exports to adjoining African and Indian Ocean countries is increasing year by year. Industrial areas have been developed in all the principal towns and light industrial estates are being developed for African *entrepreneurs*. The Kenya Government is actively encouraging investment in the industrial sector and has a Foreign Investments Protection Act to protect such investments.

The main imports are manufactured goods, classified chiefly as materials, machinery and transport equipment, mineral fuels, lubricants and related fuels and chemicals.

Communications.—The East African Railways and Harbours are self-contained and self-financing services of the East African Community; the railway, which is metre gauge, has a total route mileage of open line of 3,670 miles (1,270 miles in Kenya). In addition the East African Railways operate a marine service on Lakes Victoria and Tanganyika, with a route mileage of 3,469 miles. There are also 2,367 miles of road services providing regular transport to the Southern Highlands of Tanzania, and beyond the railhead at Pakwach in Uganda. East African Harbours control the four seaports of Mombasa, Tanga, Dar-es-Salaam and Mtwara. Mombasa, Dar-es-Salaam and Mtwara have deep-water berths and Tanga is a lighterage port.

Scheduled trunk airline services are operated to and from Kenya, through Nairobi airport, by East African Airways, British Airways, Air India, Air France, Scandinavian Airlines System, Alitalia, Pan Am, K.L.M., Ethiopian Airlines, El Al Israel Airlines, Pakistan International Airlines, Lufthansa German Airlines, Sabena, Swissair, Olympic Airways, T.W.A. and Egyptair, while regional scheduled services are also run by East African Airways, Ethiopian Airlines, Air Zaire, Air Malawi, Zambia Airways, Sudan Airways and Air Madagascar.

The country has approximately 26,000 miles of road including 3,850 miles of trunk roads and 6,200 miles of secondary roads. There is a total of 2,318 miles of bitumen-surfaced roads, apart from town streets, etc.

Lesotho

Lesotho is a landlocked state entirely surrounded by the Republic of South Africa. Of the total area of 11,716 sq. miles a belt between 20 and 40 miles in width lying across the western and southern boundaries and comprising about one-third of the total is classed as Lowlands, being between 5,000 and 6,000 ft. above sea level. The remaining two-thirds are classed as Foothills and Highlands, rising to 11,425 ft. The land is held in trust for the nation by the King. The population was estimated at 1,181,900 in April, 1975.

CAPITAL.—Maseru, population about 30,000.

FLAG.—Blue with conical white Basotho hat in centre, red and green vertical stripes (next staff).

Government.—Lesotho became a constitutional monarchy within the Commonwealth on October 4, 1966. The independence constitution was suspended in January, 1970, when the country was governed by a Council of Ministers, until the establishment of a National Assembly in April, 1974.

The country is divided into nine administrative districts. In each district there is a District Administrator who co-ordinates all Government activity in the area, working in co-operation with hereditary chiefs.

Judiciary.—The Lesotho Courts of Law consist of: the Court of Appeal, the High Court, Magistrates' Courts, Judicial Commissioners' Court, Central and local Courts. Magistrates' and higher courts administer the laws of Lesotho which are framed on the basis of the Roman-Dutch law. They also adjudicate appeals from the Judicial Commissioner's and Subordinate Courts.

Head of State, His Majesty King Moshoeshoe II.

LESOTHO HIGH COMMISSION

16A St. James's Street (1st Floor), S.W.1

[01-839 1154]

High Commissioner, His Excellency T. E. Ntshakana (1975).

BRITISH HIGH COMMISSION

P.O. Box 521, Maseru

High Commissioner, His Excellency Reginald H. Holden, D.F.C. (1976).

British Council Representative, G. A. Tindale, Hobson's Square, P.O. Box 429, Maseru.

Education.—There were 1,083 primary schools with 218,038 pupils enrolled in 1974, 58 secondary schools with 14,908 students and 7 teacher training colleges, with 383 trainees. There are also two main vocational training schools with 180 students and a training centre for civil servants. There is an Agricultural College with 120 students. The University of Botswana, Lesotho and Swaziland has its headquarters in Lesotho.

Health Services.—There are nine Government General hospitals, the largest being the Queen Elizabeth II Hospital in Maseru, one mental hospital, eight Mission hospitals and a leprosarium as well as 85 health centres and clinics run by Government, Missions and other voluntary organizations.

Communications.—The main north-south road of about 330 km (of which 176 km are bituminised) links Maseru and the lowlands. The mountainous

areas are linked by a 1,200 km network of access tracks which are normally only suitable for four-wheel drive vehicles. Gravel roads link border towns in South Africa with the main towns in Lesotho. There is also an extensive network of about 900 km of gravel roads serving the lowlands and foothill areas, with about 1,000 km of bridle paths in the mountains. Maseru is connected by rail with the main Bloemfontein-Durban line of the South African Railways. Scheduled international services are operated three times a week between Maseru and Johannesburg. There are 32 airstrips. Internal scheduled services are operated by the Lesotho Airways Corporation. The telephone network is fully automated in all urban centres. Subscribers can dial direct to telephone exchanges in South Africa. Similar facilities exist for telex subscribers, who can also dial direct to a number of overseas countries. Radio telephone communication is used extensively in the remote rural areas.

Agricultural Production.—The economy of Lesotho is mainly agrarian. At the last enumeration livestock numbers were: cattle 465,500, sheep 1,556,900, goats 961,900, horses 114,000, poultry 578,800, 4,764,158 kg. of wool valued at R3,451,776 and 678,003 kg. of mohair valued at R1,589,162 were exported in 1974. Five large scale integrated agricultural development projects amounting to R25,330,000 are being implemented for increasing agricultural production, with emphasis on cash crops and livestock.

Finance, Trade and Industry.—The main sources of revenue are customs and excise duty. Estimates of expenditure and revenue for 1975-6 are: Recurrent Account, R25,000,000, Capital Account R16,500,000. Lesotho has few known and developed natural resources but it is intended to develop commercially the mineral resources of water and diamonds (the value of diamond exports for 1974-5 is R845,573). Drilling is being carried out for oil. Tourism is being developed and is rapidly playing a major role in the economic progress of the country. A National Park has been established at Schlabathebe in the Maluti mountains. A number of light industries have recently been established. They include the manufacture of clothing, tapestries, carpets, sheepskin products, jewellery, pharmaceuticals, bricks and building materials; together with milling, diamond cutting and tractor assembly.

Malawi

MALAWI, formerly the Nyasaland Protectorate, comprises Lake Malawi (formerly Lake Nyasa) and its western shore, with the high table-land separating it from the basin of the Luangwa River, the watershed forming the western frontier with Zambia; south of the lake, Malawi reaches almost to the Zambesi and is surrounded by Mozambique) the frontier lying on the west on the watershed of the Zambesi and Shire Rivers, and to the east on the Ruw, a tributary of the Shire, and Lakes Chiuta and Chirwa. This boundary reaches the eastern shore of Lake Malawi and extends up to the mid-point of the lake for about half its length where it returns to the eastern and northern shores to form a frontier with Tanzania.

Malawi has a total area of 45,747 sq. miles (land area, 36,324). The population of Malawi at the Census of August, 1966, was 4,039,583 (52 per cent. female); estimated, mid-1976, 5,175,000.

CAPITAL.—Lilongwe (population, 1974, 87,000). The city of Blantyre, incorporating Blantyre and Limbe (population, 1974, 181,000), is the major commercial and industrial centre and headquarters of the Southern region. Other main centres are: Mzuzu, headquarters of the Northern Region; Thyolo, Mulanje, Mangochi, Mzimba, Nkhosakota and Zomba, the former capital.

FLAG.—Horizontal stripes of black, red and green, with rising sun in centre of the black stripe.

Government.—Malawi became a republic on July 6, 1966, having assumed internal self-government on February 1, 1963, and achieved independence on July 6, 1964, and is a member of the Commonwealth. There is a Cabinet consisting of the President and other Ministers. The National Assembly consists of 87 members, each elected by universal suffrage. Under the Constitution Act, 1966, the President exercises power to nominate in addition up to fifteen members to represent special interests. Being a one-party State (the Malawi Congress Party), all elected members are required to be members of the Party. The Assembly, which usually meets three times a year, is presided over by a Speaker, who need not himself be a member of it.

President, Minister of External Affairs, Works and Supplies, Agriculture and National Resources and Justice, Dr. H. Kamuzu Banda, born 1907, elected 1966, sworn in as President for Life July 6, 1971.

Minister of Youth and Culture, Hon. G. Chakuamba Phiri.

High Commissioner, His Excellency Robert B. Mbaya (1975).

BRITISH HIGH COMMISSION

Lingadzi Building (P.O. Box 30042), Lilongwe
High Commissioner, His Excellency Kenneth Gordon Ritchie, C.M.G.

Deputy High Commissioner, W. Jones.

British Council Representative, (vacant), P.O. Box 456, Glyn Jones Road, Blantyre. There is also an office at Lilongwe.

Education.—Primary education is the responsibility of local authorities in both urban and rural areas. About 35 per cent. of the population of school age can be taken into schools and only 10 per cent. of those successfully completing primary education can be placed in secondary schools. The Ministry is responsible for policy, school curricula, secondary education teachers' and technical training. Religious bodies, with Government assistance, still play an important part in primary and secondary education and teacher training. Further training is pursued at the University of Malawi, opened in September 1965. For the academic year 1974/75 there were 1,147 students studying for degrees and diplomas at the three constituent colleges.

Communications.—A single-track railway runs from the south-western area of Lake Malawi (itself served by two passenger and a number of cargo boats) through Blantyre to the southern frontier into Mozambique, crossing the Zambesi River by a bridge 12,050 feet long, and connecting with the Mozambique port of Beira, which handles the bulk of the country's imports and exports. In 1970 a 70-mile line was opened from Liwonde to Nayuci, linking the Malawi rail system with the Mozambique network to the port of Nacala. Construction of a new railway line from Salima to Lilongwe is in progress and was expected to be completed in 1976. Plans are underway and funds are available for another line from Lilongwe to Mchinji. A road system of 6,808 miles covers the whole country, of which 900 miles are bituminized from Mulanje through Blantyre and Zomba to Lilongwe, the new capital, and from there to the lakeshore at Salima, the northern terminus of the railway. Plans are underway for a bituminized road from Blantyre to the Mozambique border and onwards to Tete and Salisbury, Rhodesia.

Agriculture is the country's mainstay, the principal exports being tea, tobacco, cotton, sugar and groundnuts. The value of exports of these crops in 1975 was: tea, K20,827,000; tobacco, K50,390,000; groundnuts, K6,503,000; cotton, K1,933,000; sugar, K12,294,000. Other agricultural exports include tung oil, rice, sisal, castor, coffee and vegetables. A total of K94,654,000 of crops was exported in 1975. Imports are mainly clothing materials, vehicles, fuels and machinery.

Malaysia

Malaysia, comprising Malaya, Sabah and Sarawak, forms a crescent well over 1,000 miles long between latitudes 1° and 7° North latitude and longitudes 100° and 110° East. It occupies two distinct regions—the Malay Peninsula which extends from the Isthmus of Kra to the Singapore Strait and the North-West Coastal area of the Island of Borneo. Each is separated from the other by 400 miles of the South China Sea.

Area and Population.—The total area of the 13 states of Malaysia, including the Federal Territory of Kuala Lumpur (94 sq. miles) is estimated to be 130,000 sq. miles, containing a population of 10,434,034 at the Census of Housing and Population of Malaysia held in 1970. Details of individual states appear on p. 201.

Climate.—The whole region is open to maritime influences and is subject to the interplay of wind systems which originate in the Indian Ocean and the South China Sea. The year is commonly divided into the Southwest and Northeast monsoon seasons. Rainfall averages about 100 inches throughout the year, though the annual fall varies from place to place. The average daily temperature throughout Malaysia varies from 70° Fahrenheit to 90° Fahrenheit, though in higher areas temperatures are lower and vary widely.

CAPITAL.—Kuala Lumpur was proclaimed Federal Territory on February 1, 1974. Its population is about 770,000. The chief town of Sarawak is Kuching, and of Sabah is Kota Kinabalu.

Bahasa Malaysia (Malay) is the national language. In Sarawak English will continue as an official language as well as Bahasa Malaysia until 1979, when the Sarawak State Council will review the position.

RELIGION.—Islam is the official religion of Malaysia, each Ruler being the head of religion in his State, though the Heads of State of Sabah and Sarawak are not heads of the Muslim religion in their States. The Yang di-Pertuan Agung is the head of religion in Malacca and Penang. The Constitution guarantees religious freedom. **NATIONAL DAY.**—August 31 (*Hari Kebangsaan*).

FLAG.—Equal horizontal stripes of red (7) and white (7); 14 point yellow star and crescent in blue canton.

GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, as a result of an agreement between H.M. the Queen and the Rulers of the Malay States, whereby Her Majesty relinquished all powers and jurisdiction over the Malay States and over the Settlements of Penang and Malacca which then became States of the Federation. On Sept. 16, 1963, the Federation was enlarged, by the accession of the further states of Singapore, Sabah (formerly British North Borneo) and Sarawak, and the name of MALAYSIA was adopted from that date. On Aug. 9, 1965, Singapore seceded from the Federation.

The Constitution was designed to ensure the existence of a strong Federal Government and also a measure of autonomy for the State Governments. It provides for a constitutional Supreme Head of the Federation (His Majesty the Yang di-Pertuan Agung) to be elected for a term of five years by the Rulers from among their number, and for a Deputy Supreme Head (His Royal Highness the *Timbalan Yang di-Pertuan Agung*) to be similarly elected. The Malay Rulers are either chosen or succeed to their position in accordance with the custom of the particular state. In other states of Malaysia choice of the Head of State is in the discretion of the Yang di-Pertuan Agung after consultation with the Chief Minister of the State. Save in certain instances provided in the Constitution, the Supreme Head acts in accordance with the advice of a Cabinet appointed by him from among the members of Parliament on the advice of the Prime Minister. The Supreme Head appoints as Prime Minister the person who in his judgement is likely to command the confidence of the majority of the members of the House of Representatives. He also has the powers to promulgate emergency ordinances. The National Operations Council was dissolved on February 19, 1971, and the Yang di-Pertuan Agung promulgated the reconvening of Parliamentary democracy the following day.

SUPREME HEAD OF MALAYSIA

Supreme Head of State, His Royal Highness Tuanku Yahya Putra Ibni-Marhum Sultan Ibrahim (Sultan of Kelantan), assumed office for a term of 5 years, Sept. 21, 1975.

Deputy Supreme Head of State, His Royal Highness Sultan Haji Ahmad Shah Al-Musta'in Billah Ibni Ai-Marhum Sultan Abu Bakar Ri'ayatuddin Al-Mu'adzam Sha (Sultan of Pahang).

High Commissioner, His Excellency Sir Eric George Norris, K.C.M.G.

Deputy High Commissioner, J. D. B. Shaw, M.V.O.

British Council Representative, J. Lawrence, O.B.E.,

Kota Kinabalu (Sabah) and Kuching (Sarawak).

LEGISLATURE

The Federal Parliament consists of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) consists of 58 members, under a President (*Yang di-Pertua Dewan Negara*), 26 elected by the Legislative Assemblies of the States (2 from each) and 32 appointed by the *Yang di-Pertuan Agung* from persons who have achieved distinction in major fields of activity or are representative of racial minorities, including the Aborigines. The House of Representatives (*Dewan Rakyat*), consists of 154 members (Peninsular Malaysia, 114; Sarawak, 24; and Sabah, 16). Members are elected on the principle of universal adult suffrage with a common electoral roll. The House of Representatives is presided over by a Speaker who is either a member of the House or is qualified to be elected as a member. *Speaker*, Tan Sri Datuk Nik Ahmed bin Kamil.

The Constitution provides that each State shall have its own Constitution not inconsistent with the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the *Menteri Besar* or Chief Minister and a single chamber Legislative Assembly. Three *ex officio* members sit in the Executive Council besides these elected members. They are the State Secretary, the State Legal Adviser and the State Financial Officer. The State Constitutions provide for the Ruler or Governor to appoint as *Menteri Besar* or Chief Minister, to preside over the Executive Council, a member of the Legislative Assembly who in his judgement is likely to command the confidence of the majority of the members of the Assembly. The Legislative Assemblies are fully elected on the same basis as the Federal Parliament.

Legislative powers are divided into a Federal List, a State List and a Concurrent List, with residual powers vested in the State Legislatures. The Federal List comprises broadly, external affairs, defence, civil and criminal law and justice, the machinery of government, finance, commerce and industry, communications and transport, power, education, medicine and labour and social security. The State List includes land, agriculture and fores-

try, local government and services and the machinery of state government. In the Concurrent List are, *inter alia*, social welfare, wild-life, animal husbandry, town and country planning, public health and drainage and irrigation.

A State of Emergency was declared after disturbances on May 13, 1969. As Parliament was not then sitting, the *Yang di-Pertuan Agung* did not summon Parliament and instead established the National Operations Council and Y.A.B. Tun Abdul Razak bin Dato Hussein, the then Deputy Prime Minister, was appointed Director of Operations vested with the executive authority of the Federation including the powers to make essential regulations. The *Yang di-Pertuan Agung* remained as the Supreme Head of Federation with powers to promulgate emergency ordinances.

JUDICATURE

The Judicial System consists of a Federal Court and two High Courts, one in Peninsular Malaysia and one for Sabah and Sarawak (sitting alternately in Kota Kinabalu and Kuching). The High Court in Peninsular Malaysia known as the High Court in Malaya has its principal registry in Kuala Lumpur while the High Court in Sabah/Sarawak known as the High Court in Borneo has its principal registry in Kuching.

The Federal Court comprises a President, the two Chief Justices of the High Courts and other judges.

This court possesses appellate, original and advisory jurisdiction. In its capacity as an appellate court it has exclusive jurisdiction to determine appeals from the decisions of a High Court or of a judge thereof (except decisions of a High Court given by a registrar or other officer of the court and appealable under federal law to a judge of the Court). This appellate jurisdiction is subject to limitations imposed by or under federal law. It also has jurisdiction to determine disputes between the Federation and any of the States within the Federation, any challenge to the competence of the Federal or any State legislature to enact a particular law and any question as to the effect of any of the provisions of the Constitution which question has arisen in proceedings before another court. It also renders advisory opinions on questions referred to it by the *Yang di-Pertuan Agung* as regards the effect of any provisions of the Constitution which has arisen or is likely to arise.

Each of the High Courts consists of a Chief Justice and not less than 4 other judges. The Federal Constitution allows for a maximum of twelve such judges for Malaya and eight for Borneo. In Peninsular Malaysia the Subordinate Courts consist of the Sessions Courts and the Magistrates' Courts. In Sabah/Sarawak the Magistrates' Courts constitute the Subordinate Courts.

DEFENCE

The Malaysian Armed Forces consist of the Army, Navy and Air Force, together with volunteer forces for each arm. The defence of the country is largely borne by the army in its role of providing defence against external threat and counter-insurgency operations and also to assist the police in the performance of public order duties. The *Royal Malaysian Navy (RMN)* has the responsibility of defending the 3,000 miles of the country's coastline and maintaining constant patrol of 500 miles of the high seas that separate Sabah and Sarawak from the mainland. The *Royal Malaysian Air Force (RMAF)* is capable of providing close strategic and tactical support to the army and police in the defence and internal security of the country.

PRODUCTION AND TRADE

The agricultural sector continues to be the mainstay of the Malaysian economy. However diversification of crops and rapid growth in the manufacturing sector has made Malaysia less vulnerable to fluctuations in the price of its primary crop, natural rubber.

Malaysia is the largest exporter of natural rubber, tin, palm oil and tropical hardwoods. Other major export commodities are manufactured and processed products, petroleum, oil, and other minerals, palm kernel oil, tea and pepper.

Exports of the four major primary commodities: rubber, tin, palm oil and tropical hardwoods accounted for 62.7 per cent. of the total exports in 1975 (preliminary figures). With the rapid expansion in the manufacturing sector, Malaysia is also increasing her export of manufactured products.

Another commodity which is produced throughout Malaysia is rice, the staple food of Malaysians. Total output of *padi* in the 1974-75 season amounted to 1,099,000 tons. The level of self-sufficiency of rice has increased to 90 per cent. in Peninsular Malaysia. To achieve self-sufficiency, various measures aimed at increasing output and productivity are being introduced. They include wider use of improved seeds and fertilizers, expansion of double-cropping through the provisions of large-scale irrigation schemes and research programmes to improve rice yields.

Imports in 1973 consisted mainly of machinery and transport equipment, manufactured goods, food, mineral fuels, chemicals and inedible crude materials for her growing population and to accelerate the pace of her economic growth and development.

Malta

Malta lies in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94.9 square miles. Malta includes also the adjoining island of Gozo (area 25.9 sq. miles); *Comino* and minor islets. The estimated population on Dec. 31, 1973, was 318,481 (including temporary visitors). Malta's climate, although not tropical, is hot in summer.

Malta was in turn held by the Phoenicians, Greeks, Carthaginians, Romans and Arabs. In 1090 it was conquered by Count Roger of Normandy. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grandmaster La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and the island was subsequently blockaded by the British fleet. The Maltese people freely requested the protection of the British Crown in 1802 on condition that their rights and privileges would be preserved and respected. The islands were finally annexed to the British Crown by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged. In recognition of the part played by the Maltese people, King George VI awarded the George Cross to the island, but this honour is no longer used.

Government.—Following the report of a Constitutional Commission under the chairmanship of Sir Hilary Blood, a new Constitution for Malta was introduced by the Malta (Constitution) Order in Council, 1961, under which the Island became known as "the State of Malta". On Sept. 21, 1964 under the Malta Independence Order, 1964, Malta became an independent state within the Commonwealth; on December 13, 1974, Malta became a republic within the Commonwealth. Elections under the 1964 Order were held in June, 1971, for the 55 seats in the House of Representatives and they resulted as follows: Nationalist Party, 27 seats; Malta Labour Party, 28 seats. The present state of the parties is Malta Labour Party 29 seats, Nationalist Party 26 seats. Maltese and English are the official languages of administration and Maltese is ordinarily the official language in all the courts of law and the language of general use in the islands.

CAPITAL.— Ψ Valletta. Population (estimated, Dec., 1973), 14,152. Valletta Grand Harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call and ship repairing centre for vessels, being half-way between Gibraltar and Port Said.

FLAG.—Equal vertical stripes of white (next staff), and red; a silver George Cross outlined in red in top corner of white stripe.

President, His Excellency Sir Anthony Joseph Mamo, O.B.E., Q.C.

MALTESE HIGH COMMISSION

24 Haymarket, S.W.1

[01-930 9851]

High Commissioner, His Excellency Arthur J. Scerri (1971).

BRITISH HIGH COMMISSION

7 St. Anne Street, Floriana, Malta,

High Commissioner, (vacant).

British Council Representative, H. R. H. Salmon, Piazza Indipendenza, Valletta.

Education.—In October 1975 there were 104 Government Primary Schools with 22,681 pupils and 37 Secondary and Upper Secondary Schools with 22,769 pupils. Third level education is available at the Royal University of Malta (844 students in October 1975) and the Malta College of Arts, Science and Technology (1,284 students in October 1975). The Government also runs Trade Schools, a Nautical School, a Training Centre in Industrial Electronics, a School of Art, a School of Music, and a School of Nursing. A number of private schools offer more or less the same facilities that exist in Government Primary and Secondary (including sixth form) Schools. These are fee-paying and entry at Secondary level is selective.

In religion, the Maltese are Roman Catholics.

The Maltese language is of Semitic origin and held by some to be derived from the Carthaginian and Phoenician tongues.

Production.—The total labour force in 1975 was 112,708 of which 107,814 were gainfully employed.

Agriculture plays a significant role in the economy. There are 5,500 full time farmers and about 8,000 part time farmers. The yearly crop production is about 25,000 tons consisting mainly of potatoes, tomatoes, onions, cabbages and cauliflowers. Some 8,000 tons of fruit are produced. Grape is the largest fruit crop.

Industry.—The island's leading industry is the state-owned Malta Drydocks employing about 4,500 people. Local manufacturers include textiles, footwear, furniture, detergents, plastics, rubber products, electronic equipment and components, glass products and carpets. The private sector employs some 75,000.

Tourism.—In 1975, 334,519 tourists visited the island. Income from this industry stood at £M14.3 million.

FINANCE AND TRADE

	1973/4	1974/5
Revenue.....	£M55,850,000	£M74,500,000
Expenditure.....	£M54,342,000	£M64,200,000

The Central Bank of Malta has the sole right of issuing legal tender currency notes and coins. The Maltese pound is divided into 100 cents and 1,000 mils. On 1 June 1976 the rate of exchange was £stg1 = £M1.3059.

Trade.—The principal imports for home consumption are foodstuffs—mainly wheat, meat and bullocks, milk and fruit—fodder, beverages and tobacco, fuels, chemicals, textiles and machinery (industrial, agricultural and transport). The chief domestic exports are potatoes, tomatoes, onions, smoking requisites, textile fabrics, rubber goods, gloves, hosiery, beer, mineral waters, edible oil, fresh flowers, fibres and yarns, rubber seals, flower cuttings, plastic goods, wine, mattresses, knitwear, stainless steel sinks, electronic equipment and components, carpets, etc.

Mauritius

Mauritius is an island group lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and lat. 10° 58'–20° 33' S., and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1972 was: Mauritius, 826,199; Rodrigues, 24,769; Lesser Dependencies about 500, made up of Europeans (mainly of French extraction), Asiatic races and persons of mixed descent. The total population, including dependencies, was estimated in 1975 at 894,150.

Mauritius was discovered in 1511 by the Portuguese; the Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. From 1638 to 1710 it was held as a small Dutch colony and in 1715 the French took possession but did not settle it until 1721. Mauritius was taken by a British Force in 1810. A British garrison remained on the island until its withdrawal in June 1960. The French language and French law have been preserved under British rule. English is the official language but French is in common use.

Climate.—Mauritius enjoys a sub-tropical maritime climate, with sufficient difference between summer and winter to avoid monotony; further variation is introduced by the wide range of rainfall and temperature resulting from the mountainous nature of the island. Humidity is rather high throughout the year and rainfall is sufficient to maintain a green cover of vegetation, except for a brief period in the driest districts.

CAPITAL.—Port Louis, population (1975), 140,800; other centres are Beau Bassin and Rose Hill (83,000); Curepipe (54,000); Vacoas and Phoenix (50,000) and Quatre Bornes (53,000) (all figures provisional). FLAG.—Red, blue, yellow and green horizontal stripes.

Government.—A Crown Colony for 158 years, Mauritius became an independent state within the Commonwealth on March 12, 1968. The Constitution defined by Order in Council in 1964 was slightly altered in 1966 on the recommendation of the Banwell Commission, the effect being to increase the membership of the Legislative Assembly to 70, 62 elected by block voting in multi-member constituencies (including 2 members for Rodrigues) and 8 specially-elected members. Of the latter, 4 seats go to the "best loser" of whichever communities in the island are under-represented in the Assembly after the General Election and the four remaining seats are allocated on the basis of both party and community. The Constitution provides for the appointment of a Governor-General who acts on the advice of the Council of Ministers,

collectively responsible to the Legislative Assembly. The present state of the parties in the Assembly is: Government; Labour, 40; Comité d'Action Muséliman 5; Opposition; P.M.S.D. (Parti Mauricien Social Démocrate) 15; Independent Forward Bloc 4, Union Démocratique Mauricienne 5, Mouvement Militant 1, Mauricien (Socialiste Progressiste) 1.
Governor-General, His Excellency Sir Raman Osman, G.C.M.G., C.B.E. (1973).

COUNCIL OF MINISTERS

Premier and Minister of Defence, Information and Broadcasting and Internal Security, Dr. the Rt. Hon. Sir Seewoosagar Ramgoolam.

Minister of External Affairs, Tourism and Emigration, Sir Harold Walter.

Minister of Finance, Sir Veerasamy Ringadoo.

MAURITIUS HIGH COMMISSION

32-33 Elvaston Place, S.W.7

[01-581-0294]

High Commissioner, His Excellency Sir Leckraz Teelock, C.B.E. (1968).

Counsellor, Ghan Nath.

BRITISH HIGH COMMISSION

High Commissioner, His Excellency (Arthur) Henry Brind, C.M.G. (1974).

Deputy High Commissioner. R. J. C. Pease (Head of Chancery).

1st Secretary, P. H. Charters (Aid).

British Council Representative, Miss M. E. Platon, O.B.E., Royal Road, Rose Hill.

Education.—At the primary level education is free and is provided for 136,564 children at 184 government primary schools and 50 aided primary schools. Although education is not compulsory it is estimated that about 90 per cent. of children of primary school age attend school. There are 6 government secondary schools—and also 119 private secondary schools, of which 25 are grant-aided. Total enrolment in secondary schools (1975) is 64,612. In addition there are 4 junior technical schools which provide education in practical subjects, 5 rural craft training centres (small scale industries) and 1 industrial trade training centre. There is a teacher training college for the training of primary school teachers. An Institute of education has been set up for the purpose of training secondary school teachers and engaging in curriculum and examination reform. The University of Mauritius consists of a School of Administration, a School of Administration, a School of Agriculture and a School of Industrial Technology. There are 1,009 students (1975). Estimated expenditure on education in 1975-76 was: recurrent Rs. 107,514,000; capital Rs. 16,028,000.

Communications.—Port Louis, on the N.W. coast, has an excellent harbour which handles the bulk of the island's external trade. Goods unloaded in 1974 amounted to 861,000 metric tons and goods loaded to 820,000 metric tons. The International airport is located at Plaisance in the south-east of the island about 2 miles from Mahébourg. Freight unloaded there during 1974 totalled 952 metric tons and freight loaded totalled 1,360 metric tons. Scheduled services are operated by Air France, Air India, Air Malawi, Air Mauritius,

British Airways, East African Airways, Lufthansa, Qantas, South African Airways, Zambia Airways, Air Malagasy and Alitalia. There are 27 telephone exchanges serving 24,300 individual telephone installations on the islands. There are 13 daily newspapers published, mostly in French with occasional articles in English, and 3 Chinese daily papers. The Mauritian Broadcasting Corporation has a monopoly of radio broadcasting in the country. Television was introduced in February 1965, educational television in 1969, and colour television in 1975.

Production.—In 1974, sugar cane was cultivated over an area of 214,000 acres compared with 13,500 acres under tea, 1,300 acres under tobacco and about 3,560 acres devoted to vegetables and other crops. The sugar crop in 1975 was 460,900 long tons.

Finance.—The main sources of Government revenue are private and company income tax, customs and excise duties, mainly on imports, but also on sugar exports.

In addition to Rodrigues, the islands of Agalca and St. Brandon are dependencies of Mauritius. Other small islands, formerly Mauritian dependencies, including Six Islands, Peros Banhos, Salomon, Diego Garcia and Trois Frères, have since 1965 constituted the British Indian Ocean Territory.

Nigeria

(For MAP, see Index).

Area and Population.—The Republic of Nigeria is situated on the the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west by the Republic of Benin, on the north by Niger and on the east by Cameroun. It has an area of 356,669 sq. miles with a population (1963 Census) of 55,654,000. (The 1973 census provisional results give 79,760,000). The population is almost entirely African.

A belt of mangrove swamp forest 10-60 miles in width lies along the entire coastline. North of this there is a zone 50-100 miles wide of tropical rain forest and oil-palms. North of this the country rises

and the vegetation changes to open woodland and savannah. In the extreme north the country is semi-desert. There are few mountains, but in Northern Nigeria the central plateau rises to an average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy season is from about April to October; rainfall varies from under 25 inches a year in the extreme north to 172 inches on the coast line. During the dry season the *harmattan* wind blows from the desert; it is cool and laden with fine particles of dust.

CAPITAL.— Ψ LAGOS, estimated population, 1,000,000. Other important towns are Ibadan, Kano, Ogbomoso, Oyo, Oshogbo, Onitsha, Ife, Abeokuta, Enugu, Aba, Malduguri, Katsina, Ψ Port Harcourt, Sokoto, Zaria, Calabar, Benin, Jos and Ilorin. **FLAG.**—Three equal vertical bands, green, white and green. **NATIONAL DAY.**—October 1 (Republic Day).

GOVERNMENT

Following the military take-over of January 16, 1966, the Federal and Regional Constitutions were suspended, in relation to the offices of President, Prime Minister, Regional Governors and Regional Premiers, and Parliament and the Regional Legislatures were dissolved. The country was divided into 12 new States by decree in May, 1976, and this number was increased to 19 in January 1976. A Federal Military Government, made up of a Supreme Military Council, a Council of State composed of the State Military Governors, and a Federal Executive Council (the latter with some civilian members) perform the functions of the former Federal Government and Council of Ministers. A Military Governor administers each of the 19 States. *Head of State*, Lieut.-Gen. Olusegun Obasanjo.

NIGERIAN HIGH COMMISSION

Nigeria House, 9 Northumberland Avenue, W.C.2
[01-839 1244]
High Commissioner, His Excellency Sule Kolo.

BRITISH HIGH COMMISSION

Kajola House, 62-64 Campbell Street, Lagos.
High Commissioner, J. R. Williams, C.M.G. (*acting*).

British Council Representative in Nigeria, O. D. Elliott,
Western House, 8-10 Broad Street, Lagos.
Branch offices at Ibadan, Kano, Kaduna and Enugu.

Education.—There are six Universities, situated in Lagos, Ife, Zaria, Benin, Nsukka (with campuses at Nsukka, Calabar and Enugu) and Ibadan (with campuses at Ibadan and Jos). Four more universities are planned.

Railways.—The Nigerian railway system, which is controlled by the Nigerian Railway Corporation, is the most extensive in West Africa. There are 2,680 route miles of lines.

Civil Aviation.—Trunk route services operated by Nigerian and the principal international airlines bring Nigeria within less than 12 hours of the Western European capitals and South Africa. There are also services to other parts of Africa and to the United States. A network of Internal air services connects the main centres. Comprehensive radio navigational aids are installed at Kano and Lagos airports, and basic radio navigational facilities are provided at the twelve other aerodromes in regular use. Several flying strips are also in use by light aircraft. There is a network of meteorological reporting stations.

Production and Industry.—Nigeria has a traditional but increasingly mixed economy: farming, forestry, and fishing activities contribute just under forty per cent. of the country's gross domestic product but manufacturing industry and, in particular, petroleum are gaining in importance. The export structure is diversified. Mineral oil is the principal source of export revenue, followed by cocoa and palm kernel products. Other crops include beniseed, capscums, cassava, coffee, copra, cotton, ground nuts, guinea-corn, gum arabic, kola-nuts, maize, millet, piassava, rice, rubber, tobacco, and yams. There are important tin and coal-mining industries at Jos and Eriugu respectively. The coal is mainly used within the country. Nigeria is the principal source of supply of the world's requirements of columbite. Timber and hides and skins are other major exports. Some of the country's more important industrial installations include a steel-rolling mill, a tin smelter, a petroleum refinery, flour mills, a sugar factory, several cement plants and textile factories. Of growing importance is the local assembly of motor vehicles, bicycles, radio sets, fans and sewing machines. Other major manufactures include soap, cigarettes, beer, soft drinks, vegetable oils, canned food, confectionery, metal containers, plywood, footwear, tyres and tubes, paints, pharmaceuticals, plastic goods, glass containers, cement products, and roofing sheets.

Trade.—The principal imports are food, cotton yarn and thread, medicines and drugs, milk, motor vehicles and spares, general machinery and iron and steel bars, electrical goods, pipes and sheets. The principal export is crude oil.

Papua New Guinea

Papua New Guinea extends from the equator to Cape Baganowa in the Louisiade Archipelago at 11 degrees 40 minutes south latitude and from the border with Irian Jaya to 160 degrees east longitude. The total area of Papua New Guinea is 178,260 square miles, of which approximately 152,420 are on the main island.

The main group of islands in Papua New Guinea is the Bismark Archipelago, portion of the Solomon Islands, the Trobriands, the D'Entrecasteaux Islands and the Louisiade Archipelago. The main islands of the Bismark Archipelago are New Britain, New Ireland and Manus. Bougainville is the largest of the Solomon Islands within Papua New Guinea.

Papua New Guinea lies wholly within the tropics between the continents of Asia and Australia and has a typically monsoonal climate. Atmospheric temperature and humidity are uniformly high throughout the year. The temperature may be slightly less in the dry areas around Port Moresby. The average rainfall is about 80 inches per year but there are wide variations—from 47 inches *per annum* at Port Moresby to 200 inches at Kikori in the Gulf of Papua.

Population.—At December 1974 the estimated total indigenous population of Papua New Guinea was 2,654,509. The indigenous inhabitants of the country comprise a great diversity of physical types and a large number of linguistic groups. The population increases by approximately 2.7 per cent. annually.

Capital.—Port Moresby. Estimated population 110,000. Other major towns are Lae, Rabaul, Madang, Wewak, Goroka and Mount Hagen.

Flag.—A rectangle divided diagonally from the top of the hoist to the bottom of the fly, the upper segment scarlet and containing a soaring yellow bird of paradise. The lower segment is black charged with five white five-pointed stars representing the Southern Cross.

Government.—New Guinea was sighted by Portuguese and Spanish navigators in the early sixteenth century. In 1884 Germany formally took possession of what came to be known as the Trust Territory of New Guinea. In 1914 the Territory was occupied by Australian troops and remained under military administration until 1921. In 1884, a British Protectorate was proclaimed over the southern coast of New Guinea and the islands adjacent thereto. British New Guinea, by which name the Protectorate was called, was annexed outright in 1888. In 1902 the Territory of British New Guinea was placed under the authority of the Commonwealth of Australia. In 1920 the League of Nations conferred on the Government of the Commonwealth of Australia a mandate for the government of the Territory of New Guinea.

New Guinea was administered under the Mandate until the Japanese invasion brought about the suspension of civil administration and the devastation of large areas of the country. Papua was administered under the Papua Act until the invasion by the Japanese in 1942 when the civil administration was suspended and an Australian Military Government established for the parts not occupied by the Japanese. With the surrender of the Japanese in 1945, civil administration of Papua New Guinea was progressively restored between October 1945 and June 1946, under the provisions of the Papua-New Guinea Provisional Administration Act 1945-1946.

The first House of Assembly opened in 1964 and had 64 members who included an elected indigenous majority and only ten nominated official members.

Elections held in April 1972 returned a Coalition Government to the House of Assembly. Elections are at present held every four years. The House of Assembly comprised 100 elected Members, 18 from Regional electorates, the remainder from Open electorates. After 1970 there was a gradual assumption of powers by the Papua New Guinea Government, culminating in formal self-government in December 1973. Final reserve powers held by Australia over defence and foreign relations were relinquished to Papua New Guinea in March 1975.

In June 1975, the Coalition Government obtained the approval of the House of Assembly for Papua New Guinea to achieve full independence on September 16, 1975.

BRITISH HIGH COMMISSION

P.O. Box 739, Port Moresby

High Commissioner, His Excellency George William Baker, O.B.E., V.R.D. (1971).

Communications.—The most important roads are those linking Lae with the populous and developing Highlands and with Wau, and those in the hinterlands of Port Moresby, Rabaul, Madang and Wewak.

Air Niugini (the National Airline) and Qantas operate regular air services from Australia to Port Moresby. Air Niugini also operates regular services to Manila (Philippines), Honiara (Solomon Islands) and Jayapura (Indonesia). Internal air services are operated by Air Niugini, Douglas Airways, Panga Airways and Talair.

Several shipping companies operate regular cargo and passenger services between Papua New Guinea and Australia, Europe, the Far East and U.S.A. Over 100 coastal vessels up to 1,000 tons provide cargo and limited passenger services between Papua New Guinea main ports, outports, plantations and missions.
