Papua New Guinea is linked via the Seacom international cable to Australia, Guam, Hong Kong, Kota Kinabalu and Singapore. Further connections via the Compac cable are made to Canada, New Zealand and the United Kingdom. Direct dialling is available between the major towns and also with Australia. Telex services are also available.

Economy.—Papua New Guinea is essentially an agricultural nation and relies on primary industries for most of its overseas income. Before the mineral resources were tapped in any large quantities its wealth came from the primary crop products of coconuts, rubber, coffee, cocoa, tea and oil palm.

In the last few years the Bougainville copper project has become the country's major overseas money earner. Indications are that extensive mineral deposits exist in other parts of the country. Developers are investigating these and they could contribute significantly to the country's economic prosperity and development in the future.

Of the agricultural products, copra is the largest money earner but it has been losing ground in recent years. Coconuts grow in most coastal areas of Papua New Guinea and all exported nuts leave the country as copra or coconut oil.

Tea is a relative newcomer to Papua New Guinea. Experimental plantings were made in the early 1950s. The first commercial blocks were leased in 1965. Centrally placed processing factories on the large tea plantations provide facilities for smallholders in the vicinity.

A new crop for Papua New Guinea with considerable export potential is palm oil. Commercial plantings of the oil palm started in New Britain in 1967/68. As with tea, central processing factories on nucleus estates provide points of sale and processing facilities for smallholder blocks in their neighbourhood.

A beef cattle herd is being established in Papua

New Guinea and this is expected to reach 300,000 by 1980. The development of the livestock industry in Papua New Guinea is primarily directed towards the internal market. Small dairy herds exist in some main centres.

Secondary industry was originally orientated towards the processing of the local primary products. Emphasis has now swung to industries that service the expanding local market. Amongst those in successful operation are beer brewing, bottle and other packaging factories, paint manufacture, plywood, nails and other wire products, steel drums, clothing, match manufacture, louvred windows and doors, furniture, cement bricks and pipes and many others.

More and more Papua New Guinean entrepreneurs are starting their own businesses or are

taking up equity in overseas operated companies. Papua New Guineans are increasingly entering the fields of retail trading, road transport and all aspects of the building industry.

OVERSEAS TRADE

	1973-74 Kina	1974-75 Kina

* provisional.

Currency.—Currency is the Kina, against which the £ Sterling floats. Exchange rate approximately K1.45 = £1 Sterling.

Sierra Leone

Area and Population, etc.—The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The total area of Sierra Leone is 27,925 sq. miles, and the total population (1974 Census) is 3,002,426. For administrative purposes, the interior portion of Sierra Leone is divided into 3 Provinces covering 12 Districts, each administered by a Resident Minister. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the South.

CAPITAL.—Freetown (population 274,000). FLAG.—Three horizontal stripes of leaf green, white and cobalt blue. NATIONAL DAY.—April 19.

Government.—Sierra Leone became a fully independent state and a member of the British Commonwealth on April 27, 1961. There is a House of Representatives consisting of a Speaker and not fewer than 60 members, elected from constituencies established by an Electoral Commission.

After a period of martial law, and suspension of the Constitution, Parliament re-opened in June 1968.

A Bill instituting republican status for Sierra Leone and providing for the appointment of the interim Governor-General as its first President was approved on April 19, 1971, and the Prime Minister, Mr. (later Dr.) Siaka P. Stevens thereupon declared Sierra Leone a republic. He was elected President on April 20, 1971, and was sworn in for a four year term of office in April, 1976. A general election was held in May 1973. The Sierra Leone People's Party withdrew from the election and the All Peoples' Congress were unanimously returned. The number of seats actually held in Parliament at present (1975) is 85 elected members, 1 Paramount Chief from each of the 12 Districts, and 2 members elected by the President. There is provision for a third such elected member.

SIERRA LEONE HIGH COMMISSION
33 Portland Place, W.1.
[01-636 6483]

High Commissioner, His Excellency Ralph Emeric Kasope Taylor-Smith (1974)

BRITISH HIGH COMMISSION
Standard Bank Sierra Leone Building,
Wallace Johnson Street, Freetown.

High Commissioner, His Excellency David Arthur Roberts (1976).

British Council Representative, J. Mulholland, P.O. Box 124, Tower Hill, Freetown.

Communications.—The public railway has been phased out, but the Sierra Leone Development Company's railway runs for 52½ miles from the iron ore deposits at Marampa to the shipping port of Pepel. There are about 5,000 miles of road in the country, of which about 2,100 miles are surfaced.

The Freetown international airport is situated at Lungi, across the Sierra Leone River from Freetown. The main port is Freetown, which has one of the largest natural harbours in the world, and where there is a deep water quay providing about six berths for medium sized ships. There are smaller ports at Pepel and Bonthe. The Sierra Leone Broadcasting Service operates a direct service. Broadcasts are made daily in several of the more important indigenous languages, in addition to English. There is also a television service.

Education.—There are 914 primary schools in Sierra Leone and 72 secondary schools. Technical education is provided in the two Government Technical Institutes, situated in Freetown and Kenema, in two Trade Centres and in the technical training establishments of the mining companies. Teacher training is carried out in two universities, one advanced college, five women's primary colleges and four Church training colleges in the Provinces, and in the Milton Margai Training College near Freetown. The University of Sierra Leone (1967), consists of Fourah Bay College (1960) and Njala University College (1964).

Production and Trade.—In the Western area, farming is largely confined to the production of cassava and garden crops, such as maize and vegetables, for local consumption. In the Provincial areas, the principal agricultural product is rice, which is the staple food of the country and export crops such as palm kernels, cocoa beans, coffee and ginger.

The economy depends largely on mineral exports (80 per cent), mainly diamonds and bauxite and, until 1975, iron ore. Exports of diamonds in 1975 totalled Le.67.3 million compared with Le.74.6 million in 1974.

Total exports in 1975 were valued at Le.116.8 million; imports Le.167.5 million.

	1974	1975
Imports from U.K.....	£18,700,000	£21,100,000 (f.o.b.)
Exports to U.K.	£41,900,000	£32,600,000 (c.i.f.)

Finance.—In August 1964, Sierra Leone adopted decimal currency. The basic unit is the Leone (worth 50p.). It is divided into 100 cents.

Total revenue was estimated at Le.98.4 million in

1975/76; expenditure on ordinary budget Le.105.8 million. Development expenditure was estimated at Le.63.6 million.

Singapore

The Republic of Singapore consists of the island of Singapore and 54 smaller islands, covering a total area of 225.6 square miles. Singapore Island is 26 miles long and 14 miles in breadth and is situated just north of the Equator off the southern extremity of the Malay Peninsula, from which it is separated by the Straits of Johore. A causeway, carrying a road and railway, crosses the three-quarters of a mile to the mainland. The highest point of the island is 581 feet above sea level. **Climate.**—The climate is hot and humid and there are no clearly defined seasons. Rainfall averages 96 inches a year and temperature ranges from 24°–31° C (76°–87°F.). **Population.**—Estimated at 2,249,000 on June 30, 1975, the population is multi-racial with a preponderance of Chinese. The racial groups were estimated in 1975 to be divided as follows: Chinese—1,712,800; Malays—338,000; Indians, Pakistanis and Ceylonese—155,200; others (Europeans, Eurasians etc.)—43,100. At least 6 Chinese dialects are used and Malay, Mandarin, Tamil and English are the official languages. **FLAG.**—Horizontal bands of red over white; crescent with five five-point stars on red band near staff. **NATIONAL DAY.**—August 9.

Government.—Singapore, where Sir Stamford Raffles had first established a trading post under the East India Company in 1819, was incorporated with Penang and Malacca to form the Straits Settlements in 1826. The Straits Settlements became a Crown Colony in 1867. Singapore fell into Japanese hands in 1942 and civil government was not restored until 1946, when it became a separate colony. Internal self-government and the title "State of Singapore" were introduced in 1959. Singapore became a state of Malaysia when the Federation was enlarged in September, 1963, but left Malaysia and became an independent sovereign state within the Commonwealth on August 9, 1965. Singapore adopted a Republican constitution from that date, the Yang di-Pertuan Negara being re-styled President. There is a Cabinet collectively responsible to a fully-elected Parliament of 65 members.

HEAD OF STATE

President, Benjamin Henry Sheares, G.C.B., assumed office as President, Jan. 2, 1971 (re-elected for second 4-year term from Jan. 1, 1975).

CABINET

Prime Minister, Lee Kuan Yew, G.C.M.G., C.H.

Deputy Prime Minister and Minister of Defence, Dr.

Goh Keng Swee.

Minister for Science and Technology, Dr. Lee Chiaw Meng.

Finance, Hon Sui Sen.

Foreign Affairs, S. Rajaratnam.

Home Affairs and Education, Chua Sian Chin.

National Development and Communications, Lim Kim San.

Culture, Jek Yeun Thong.

Social Affairs, Inche Othman bin Wok.

Law and Environment, E. W. Barker.

Health, Dr. Toh Chin Chye.

Labour, Ong Pang Boon.

Speaker of Parliament, Dr. Yeoh Ghim Seng.

SINGAPORE HIGH COMMISSION

2 Wilton Crescent, S.W.1

[01-235 8315]

High Commissioner, (vacant)

BRITISH HIGH COMMISSION

Tanglin Circus, Singapore 10

High Commissioner, His Excellency John Peter Tripp, C.M.G. (1974)

British Council Representative, J. P. Harmiman, 310 Cathay Building, Mount Sophia, Singapore 9.

Communications.—Singapore is one of the largest seaports in the world, with deep water wharves and ship repairing facilities. Ships also anchor in the roads, unloading into lighters. 52,100,000 tons of cargo were handled in 1975. The International Airport at Paya Lebar, 7½ miles from the centre of the city, has a runway 13,350 feet long. There are 28 miles of railway connected to the Malaysian rail system by the causeway across the Straits of Johore, and 1,337 miles of roads, 1,026 miles of which are metalled roads maintained by the Government. There are both wireless and wired broadcasting services carrying commercial advertising. Television was introduced in 1963 and a colour service on two channels in 1974.

Production, etc.—Historically Singapore's economy was largely based on the sale and distribution of raw materials from surrounding countries and on entrepot trade in finished products. In the last decade, however, new manufacturing industries have been introduced, including ship building and repairing, iron and steel, textiles, footwear, wood products, micro-electronics, scientific instruments, detergents, confectionery, pharmaceuticals, petroleum products, sanitary-ware, building materials, domestic electrical appliances, plastic articles, transport equipment, etc. Singapore has also become a financial centre with over seventy banks established in the Republic.

Projects now being undertaken include the reclamation of 1,850 acres of land for a new International Airport at Changi for the 1980's; further reclamation of marshy land at Jurong Town where industrial sites and housing development already cover over 12,000 acres; extension of other industrial estates; the building of 148,000 low-cost housing units by the Housing & Development Board by 1979; a new drainage system throughout the island; and the development of additional water-supply catchments.

FINANCE

	1975-6	1976-7*
Revenue.....	\$2,647,461,000	\$3,107,570,000
Estimated.....	2,646,319,000	3,103,797,000

*Estimated.

Currency.—On June 12, 1967, the Singapore Currency Board began issuing its own currency, the \$ Singapore (of 100 cents) approximately equivalent (June 1976) to 23p sterling. The \$ is freely interchangeable with the \$Brunei (also issued on June 12, 1967). An interchangeability agreement with Malaysia was cancelled on May 8, 1973.

Exports to U.K.....	74,758,000	64,558,000

Sri Lanka

AREA AND POPULATION

Sri Lanka (formerly Ceylon) is an island in the Indian Ocean, off the southern tip of the peninsula of India and separated from it by a narrow strip of shallow water, the Palk Strait. Situated between $5^{\circ} 55' - 9^{\circ} 50'$ N. latitude and $79^{\circ} 42' - 81^{\circ} 52'$ E. longitude, it has an area of 25,332 square miles, including 33 square miles of inland water. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles, no point in Sri Lanka being more than 80 miles from the sea.

At the Census of 1971, the population was 12,747,755.

Races and Religions

The races of Sri Lanka are low-country Sinhalese, Kandyan Sinhalese, Ceylon Tamils, Indian Tamils, Ceylon Moors, Indian Moors, Burghers and Eurasians, Malays and Veddahs. Generally Sinhalese who trace their descent to a low-country district are classified as low-country Sinhalese, others as Kandyan Sinhalese. The Western and Southern Provinces, the Southern (Chilaw) District and the Western parts of Puttalam District are low-country areas; the Central and North Central Provinces, Uva, Sabaragamuwa and Kurunegala are regarded as Kandyan districts. At the 1971 Census 42.8 per cent. of the population were low-country Sinhalese, 29.1 per cent. Kandyan Sinhalese. The religion of the great majority of inhabitants is Buddhism, introduced from India, according to ancient Sinhalese chronicles, in 247 B.C. Next to Buddhism, Hinduism has a large following.

PHYSIOGRAPHY

Sri Lanka is a compact area, except for the island of Mannar and an almost detached portion in the north, the Jaffna Peninsula and its satellite islands of Delft, Kayts, etc. The relief of the island includes a mountainous area in the south-central region of 3,000 to 7,000 feet above sea level, surrounded by an upland belt of about 1,000 to 3,000 feet and a narrow coastal plain broadening out to a vast tract in the north. The coastal plain continues for a distance out to sea as a continental shelf and a coral reef, for the most part submerged, lies close to the coast. On the Central Ridge of the hill country are some of the highest peaks in Sri Lanka, Pidurutalagala (8,281 ft.), Kirigalpotta (7,857 ft.) and Totapolakanda (7,741 ft.) and the high plains Nuwara Eliya (over 6,000 ft.), Elk Plains (6,000 ft.) and Horton Plains (over 7,000 ft.). The other principal peaks are Adam's Peak (7,360 ft.), Namunukula (6,679 ft.), Knuckles (6,112 ft.) and Haycock (2,167 ft.). The Peninsula of Jaffna and the island of Mannar are featureless level stretches.

The Mahaveli-ganga, 208 miles long, is the largest river of Sri Lanka. Rising on the western side of the central hilly ridge, it flows north and east to empty into the Koddliyar Bay on the east coast. Other rivers are the Kelaniganga (90 miles), Aruvi-arui (104), Kala-oya (92), Yam-oya (88) and Deduru-oya (88). Waterfalls girdle the central mountainous massif and offer some of the best scenic features in the island; Dunhinda (Badulla), Diyaluma (Koslanda), Elgin (Hatton Plateau) and Perawella are among the outstanding falls. Forests, jungle and scrub cover the greater part of the island, often being intermingled. The forests, of varying species, extend from fairly near the coast right into the hill country. In areas over 2,000 feet above sea level grasslands (*patanas* or *talawas*) are found. Their total area is some 250 square miles, principally in the Province of Uva.

Climate.—The climate of Sri Lanka is warm throughout the year, with a high relative humidity. Temperatures average 80° F. during the year in the lowlands, falling off in the hills to 60° F. at elevations over 6,000 ft. Day humidity is over 70 per cent. and night humidity over 85 per cent. Temperature ranges vary little between wet and dry seasons. In the hilly areas morning mists sometimes occur. Traces of ground frost appear occasionally at night, at the highest levels, and disappear at sunrise. Thunderstorms occasionally give hail, but snow is completely absent. Rainfall is generally heavy, with marked regional variations; the heaviest falls (200–250 inches) are recorded on the south-west slopes of the central hills. Some depression or cyclonic activity occurs generally during October to December.

GOVERNMENT

Early in the sixteenth century the Portuguese landed in Ceylon and founded settlements, eventually conquering much of the country. Portuguese rule in Ceylon lasted 150 years during which the Roman Catholic religion was established among the Sinhalese inhabitants and to some extent Portuguese modes of living adopted. In 1658, following a twenty-year period of decline, Portuguese rule gave place to that of the Dutch East India Company which was to exploit Ceylon with varying fortunes until 1796.

The Maritime Provinces of Ceylon were ceded by the Dutch to the British on February 16, 1798, becoming a British Crown Colony in 1802 under the terms of the Treaty of Amiens. With the annexation of the Kingdom of Kandy in 1815, all Ceylon came under British rule.

On February 4, 1948, Ceylon became a self-governing state and a member of the British Commonwealth of Nations under the *Ceylon Independence Act 1947*. Under this Act the Parliament of Ceylon consisted of (a) The Queen (represented by the Governor-General) and (b) two houses, namely, the Senate and the House of Representatives. The Executive consisted of the Prime Minister and a Cabinet chosen from the party which had the majority in the House of Representatives. The House of Representatives constituted itself as the constituent Assembly in July, 1970, to draft a republican Constitution for Ceylon. Accordingly, a new republican Constitution was adopted on May 22, 1972, and the country was renamed the Republic of Sri Lanka (meaning 'Resplendent Island'). The new republic continues to be in the Commonwealth.

CAPITAL.— Ψ Colombo, population (1971 Census), 563,705. Other principal towns are Ψ Jaffna (106,856), Kandy (91,942), Ψ Galle (71,060), Ψ Negombo (55,722) and Ψ Trincomalee (38,800).

REPUBLIC DAY.—May 22.

FLAG.—Yellow lion of Kandy on a maroon ground; Sinhalese pinnacle at the corners; yellow border; two vertical stripes of green and saffron at the staff side.

President. WILLIAM GOPALLAWA, b. 1897.

CABINET

Prime Minister and Minister of Defence and Foreign Affairs, Planning and Economic Affairs and Plan Implementation, Mrs. Sirimavo Bandaranaike.
 Irrigation, Power and Highways, Maitripala Senanayake.

Trade, Public Administration and Home Affairs, T. B. Illangaratne.

Education, Dr. Badiudin Mahmud.

Shipping, Aviation and Tourism, P. B. G. Kalugalle.

Labour, M. P. De Z. Siriwardene.

Finance and Justice, Felix Dias Bandaranaike.

Industries and Scientific Affairs, T. B. Subasinghe.

Plantation Industries, Ratnasiri Wickremarajane.

Agriculture and Lands, Hector Kobbekaduwa.

Housing and Construction, Pieter G. B. Keuneman.

Posts and Telecommunications, Chelliah Kumarasuriar.

Information and Broadcasting, R. S. Perera.

Cultural Affairs, T. B. Tennekoon.

Social Services, S. S. Kulatilake.

Parliamentary Affairs, Sport and Transport, K. B. Ratnayake.

Local Government, W. P. G. Ariyadasa.

Food, Co-operatives and Small Industries, S. K. K. Suriarachchi.

SRI LANKA HIGH COMMISSION

13 Hyde Park Gardens, W.2

[01-262 1841]

High Commissioner, His Excellency Vernon L. B. Mendis (1975).

BRITISH HIGH COMMISSION

Galle Road, Kollupitiya (P.O. Box 1433),

Colombo 3

High Commissioner, His Excellency David Pascoe Aiers, C.M.G.

British Council Representative, A. F. Keith, 190 Galle Road, Colombo 3.

THE LEGISLATURE

Under the Republican constitution which came into operation on May 22, 1972, the supreme legis-

lative power is vested in the National State Assembly, a unicameral legislative body.

THE JUDICATURE

The Judicial System includes a Supreme Court of Appeal, Supreme Court, District Courts, Magistrates' Courts, Courts of Requests and Rural Courts. Trial by jury obtains in the Supreme Court.

PRODUCTION

Agriculture.—The staple products of the island are agricultural, including paddy, tea, rubber and coconuts.

Industry.—Factories are established for the manufacture or processing of ceramic ware, vegetable oils and by-products, paper, tanning and leather goods, plywood, cement, chemicals, sugar, salt, textiles, ilmenite, tiles, tyres, fertilizers and hardware and there is a petroleum refinery.

Trade with U.K.

	1974	1975
Imports from U.K....	£10,042,000	£15,882,000
Exports to U.K.....	30,436,000	27,178,000

COMMUNICATIONS

There are 11,700 miles of motorable roads in Sri Lanka. A commercial wireless telegraph station has a range of 500 miles by day and about 1,000 to 2,000 miles by night and handles ship-to-shore traffic.

On May 6, 1976, Sri Lanka inaugurated a satellite earth station at Padukka, in south-west Sri Lanka. Constructed with assistance from the Asian Development Bank, the earth satellite station provides instant telecommunication links *via* satellite with any part of the globe.

Air Ceylon currently operates a Trident 1 aircraft on twice-weekly flights to Kuala Lumpur, Singapore, Bangkok and Bombay; thrice weekly to Madras and once a week to Sharjah. A DC-8 is operated twice weekly on the Colombo, Karachi, Paris, London route; and an Avro HS 748 three times a week to Male and Trichinopoly.

Swaziland

Swaziland is the smallest of the former three High Commission Territories in Southern Africa. Geographically and climatically, it is divisible into four physiographic provinces; the broken mountainous Highveld of the west, adjacent to the Drakensberg, with altitudes averaging over 4,000 ft., the Middleveld which is mostly mixed farming country, about 2,000 ft. lower and the Lowveld, a hot scrubland region, bounded on the east by the Lubombo mountains, with an average altitude of 1,500 ft. The Lubombo mountains form the fourth physiographic province. Four rivers, the Komati, Usutu, Mbuluzi and Ingwavuma, flow from west to east, cutting their way through the Lubombo mountains to the Indian Ocean. The exploitation of these rivers is particularly important to the agricultural development of the middle and bush veld, where irrigation projects are giving the scenery a different aspect. The total area is 6,704 sq. miles and the population (estimated, 1976), 493,728.

CAPITAL.—Mbabane (population, estimated, 1975, 21,500), the headquarters of the Government, is situated on the hills at an altitude of 3,800 ft. Other main townships are: Manzini (population 18,000), Hlatikulu (2,000), Nhlalango (3,500), Pigg's Peak (3,000), Havelock (5,500), Big Bend (4,000) and Mhlume (3,000). **FLAG.**—Five horizontal bands, crimson, bearing shield and spears device, bordered by narrow yellow bands; blue bands at top and foot.

Government.—The Kingdom of Swaziland came into being on April 25, 1967, under a new internal self-government constitution and became an independent kingdom in membership of the Commonwealth on September 6, 1968. On April 12, 1973, the King, in response to a motion passed by both Houses of Parliament, repealed the Parliamentary Constitution of 1968 and assumed supreme legislative, executive and judicial power, to be exercised in collaboration with a Council constituted by his Cabinet Ministers.

King of Swaziland, His Majesty Sobhuza II, K.B.E.

BRITISH HIGH COMMISSION

Mbabane

Prime Minister and Minister of Foreign Affairs, Colonel Maphur Dlamini.

High Commissioner, His Excellency John Edwin Alfred Miles, O.B.E.

SWAZILAND HIGH COMMISSION

58 Pont Street, S.W.1.

[01-589 5447]

High Commissioner, His Excellency J. M. Fakudze (1973).

Education.—In 1974 the primary school enrolment was 86,110; secondary schools, 14,301.

Communications.—Swaziland's first railway was completed in 1964. It is about 140 miles long,

starting at Ngwenya, 13 miles north-west of Mbabane, and connecting at the Mozambique frontier with an extension to the existing line between Lourenco Marques and Goba. Principal export traffic on the railway is the iron ore mined at Bomvu Ridge, near Ngwenya, by the Swaziland Iron Ore Development Company. A large part of the country's passenger and goods traffic is carried by privately-owned motor transport services. Besides these, the South African Railways Road Motor Services maintain regular goods and passenger services between Mbabane and Manzini and the main railroads in South Africa which serve Swaziland—Breyten, Piet Retief, Komatiport, Hectorspruit and Golela. There are post offices, telegraph and telephone offices at all the chief centres.

Production.—Exports in 1974 amounted to E.120,000,000 of which iron ore was worth E.12,289,000; sugar E.46,300,000; unbleached wood

pulp E.31,328,400; wood and wood products E.5,433,500; asbestos E.5,682,200; citrus fruit E.4,516,700; live animals E.1,851,600; meat and meat products E.2,691,200; hides and skins E.426,400.

Finance.—Government revenue for 1974-75 was estimated at E.32,807,000 and expenditure at E.34,877,000. Of a capital budget of E.16,026,000, E.3,818,000 was estimated aid funds from the United Kingdom.

Currency.—The unit of currency is the Lilangeni (plural, Emalangeni). This currency was introduced on Sept. 6, 1974. Under the Currency Order of 1974 the value of one Lilangeni is equal to one South African Rand.

Trade with U.K.

	1973	1974
Imports from U.K....	£150,721	£511,000
Exports to U.K....	£12,961,645	£16,119,100

Tanzania

Tanganyika, the mainland part of the United Republic of Tanzania (Tanganyika and Zanzibar) occupies the east-central portion of the African continent, between 1°-11° 45' S. lat. and 29° 20'-40° 38' E. long. It is bounded on the N. by Kenya and Uganda; on the S.W. by Lake Malawi, Malawi and Zambia; on the S. by Mozambique; on the W. it is bounded by Rwanda, Burundi and Zaïre; on the E. the boundary is the Indian Ocean. Tanganyika has a coastline of about 500 miles and an area of 362,820 sq. miles (including 20,650 sq. miles of water). The greater part of the country is occupied by the Central African plateau from which rise, among others, Mt. Kilimanjaro, the highest point on the continent of Africa (19,340 ft.) and Mt. Meru (14,979 ft.). The Serengeti National Park, which covers an area of 6,000 sq. miles in the Arusha, Mwanza and Mara Regions, is famous for its variety and number of species of game.

The African population consists mostly of tribes of mixed Bantu race. The total population of Tanzania at the Census held in August, 1967, was 12,311,991 (estimated, July, 1973, 13,968,000); Africans form a very large majority, while the Europeans, the Asians, and other non-Africans form a small minority. Annual average population growth is 2.7 per cent. The total population of Zanzibar at the 1967 census was 354,815 (estimated, 1973, 403,000). Swahili is the national and official language. English is the second official language, both for educational and government purposes.

Zanzibar.—Formerly ruled by the Sultan of Zanzibar, and a British Protectorate until Dec. 10, 1963. Zanzibar consists of the islands of Zanzibar and Pemba. It has a total area of approximately 1,000 sq. miles. The islands produce a large part of the world's supply of cloves and clove oil, and coconuts, coconut oil and copra are also produced.

Zanzibar became internally self-governing on June 24, 1963, and fully independent on Dec. 10, 1963. The revolutionary Afro-Shirazi party seized power on Jan. 12, 1964, and the Sultan was forced to leave the country. Later Zanzibar united with Tanganyika (see below).

CAPITAL.—Ψ Dar es Salaam (population about 300,000). Other towns are Ψ Tanga (61,061); Mwanza (34,861); Arusha (32,452); Moshi (26,853); Morogoro (25,262); Dodoma (23,559); Iringa (21,746); Tabora (20,994) and Mtwara (20,396). In Zanzibar, the chief town and seaport of that name (population, 68,490) provides facilities for shipping and trade. The principal international airport is Dar es Salaam. Other airports include Zanzibar, Arusha, Mwanza and Tanga. A new international airport has been opened at Kilimanjaro between Arusha and Moshi to take "Jumbo Jets".

FLAG.—Green (above) and blue; divided by diagonal black stripe bordered by gold, running from bottom (next staff) to top (in fly). **NATIONAL DAY.**—December 9 (anniversary of independence).

President of the United Republic, Julius Kambarage Nyerere, b. 1922; elected Nov. 1962; took office Dec. 9, 1962; re-elected Sept., 1965, Nov., 1970 and Oct., 1975.

Vice Presidents, Aboud Jumbe; R. M. Kawawa (also Prime Minister).

GOVERNMENT

Following a constitutional conference held in Dar es Salaam in March, 1961, Tanganyika became an independent state and a member of the British Commonwealth on December 9, 1961.

Tanganyika became a Republic, within the Commonwealth, on December 9, 1962, with an executive President, elected by universal suffrage, who is both the Head of State and Head of the Government. A presidential election will be held whenever Parliament is dissolved, and the presidency is closely linked with the official party, the Tanganyika African National Union (TANU), since Tanzania is a one-party state.

On April 25, 1964, following a Parliamentary ratification of an agreement signed by the President of the Republic of Tanganyika and the President of the People's Republic of Zanzibar and Pemba, Tanganyika united with Zanzibar to form a

new sovereign state. By this agreement, the President of the United Republic is Julius K. Nyerere; the First Vice-President is Aboud Jumbe (also President of Zanzibar), and the Second Vice-President is Rashidi Mfaume Kawawa (of Tanganyika) who is also Prime Minister and the leader of the Government business in the National Assembly of the United Republic. The Vice-Presidents and Ministers form the Cabinet of the Union Government, which is presided over by the President. There are 4 Zanzibar Ministers and 2 Junior Ministers in the Union Government, and 35 others (15 backbenchers nominated from Zanzibar, 20 backbenchers nominated from Members of the Revolutionary Council) and 5 Zanzibar Regional Commissioners who are *ex officio* M.P.s in the National Assembly of the United Republic.

Zanzibar has its own legislature which legislates for matters which are not under the Union Govern-

ment, e.g. education, agriculture, health and community development.

British Council Representative, G. W. Shaw.

CABINET

Minister for Foreign Affairs, Ibrahim M. Kaduma.
Agriculture, John Malecela.
Commerce, A. M. Rulegura.
Works, L. A. Sazia.
Finance and Planning, A. H. Jamal.
Health, Dr. Leader Stirling.
Home Affairs, Ali Hassan Mwinyi.
Natural Resources and Tourism, S. O. Saibul.
Information and Broadcasting, N. M. Mwakawago.
Water, Energy and Minerals, Dr. W. K. Chagulo.
Lands, Housing and Urban Development, Mrs. T. Siwale.
National Education, I. Elinewinga.
Defence and National Service, E. M. Sokoine.
Labour and Social Welfare, Crispin Tungaraza.
Communications and Transport, Alfred C. Tandau.
National Culture and Youth, Mrisho Sarakikya.
Justice, Miss Julie Manning.
Industries, C. D. Msuya.
Manpower Development, N. A. Kuhanga.
Ministers of State, P. Siyovelwa; H. N. Moyo; Hasnu Makame; H. R. Shekilangu.

Chief Justice, Hon. A. Saidi.

TANZANIA HIGH COMMISSION

43 Hertford Street, W.1

[01-499 8951]

High Commissioner, His Excellency Amon James Nsekela (1974)

BRITISH HIGH COMMISSION

Dar es Salaam.

High Commissioner, His Excellency Mervyn Brown, C.M.G., O.B.E. £9,228

EDUCATION

Education, almost entirely under state control, is characterised by official insistence that education must serve the aims of overall Government policy and planning. All Tanzanian Secondary Schools are expected to include practical subjects in the basic course. All who receive secondary (or equivalent) education are called up for a period of National Service. The school system is administered in Swahili and the intention is for the national language to become the medium at all levels. For higher education most Tanzanian students go to the University of Dar es Salaam, other East African universities, or to Universities and Colleges outside East Africa, mainly in Britain.

PRODUCTION AND TRADE

The economy is based mainly on the production and export of primary produce and the growing of foodstuffs for local consumption. The chief commercial crops are sisal, cotton, coffee, cashew nuts and oilseeds. The most important minerals are diamonds. Hides and skins are another valuable export. Industry is at present largely concerned with the processing of raw material for either export or local consumption. There is also a healthy growth of secondary manufacturing industries, including factories for the manufacture of leather and rubber footwear, knitwear, razor blades, cigarettes and textiles, and a wheat flour mill.

TRADE WITH U.K.

	1973	1974
Imports from U.K.	£29,129,000	£41,540,000
Exports to U.K.	49,105,000	31,865,000

Trinidad and Tobago

AREA AND POPULATION

Trinidad, the most southerly of the West Indian Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 3'–10° 50' N. lat. and 60° 55'–61° 56' W. long., and is about 50 miles in length by 37 in width, with an area of 1,864 sq. miles. *Population*.—Of the population (estimated at 1,027,900 in Dec. 1974), 43 per cent. are African, 36 per cent East Indian, 2 per cent. European, 1 per cent. Chinese, and the rest mixed.

The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., El Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from 82° F. by day to 74° F. by night and a rainfall averaging 82.7 inches a year. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Tobago lies between 11° 9' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W. of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888. The island is 26 miles long, and 7½ wide, and has an area of 116 sq miles. The population was 33,333 in the 1961 census and was estimated at 33,950 in Dec. 1974. It is one of the healthiest of the West Indies and a popular tourist resort. The main town is Scarborough.

Other Islands.—Corozal Point and Icos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important.

CAPITAL.—Port of Spain (population 100,000), one of the finest towns in the West Indies, with sewerage, electric lighting, omnibus and telephone services. Other towns of importance are San Fernando (population, 42,000*), about 33 miles south of the capital, and Arima (population, 13,000*).

FLAG.—Black diagonal stripe bordered with white stripes, running from top by staff, all on a red field.

NATIONAL DAY.—August 31 (Independence Day).

* Estimated

GOVERNMENT

The Territory of Trinidad and Tobago became an independent state and a member of the British Commonwealth on August 31, 1962, under the Trinidad and Tobago Independence Act, 1962. There is a Parliament consisting of a Senate and a

House of Representatives with an elected Speaker and 36 members. The Senate has 24 members of whom 13 are appointed on the advice of the Prime Minister, 4 on the advice of the Leader of the Opposition and 7 on the advice of the Prime Minister after consultation with religious, economic and

social organizations. Legislation was passed in April 1976 under which Trinidad and Tobago would become a Republic with a President as Head of State. General Elections under the new Constitution were due to take place before Sept. 14, 1976.

Governor-General, His Excellency Sir Ellis Emmanuel Innocent Clarke, G.C.M.G. (1973).

CABINET

Prime Minister and Minister of Finance, Rt. Hon. E. E. Williams, C.H., D.Phil.

Public Utilities, Hon. Shamshudding Mohammed.

Agriculture, Lands and Fisheries, Hon. O. R. Padmore.

National Security, Hon. V. L. Campbell.

Health and Local Government, Hon. Kamaluddin Mohammed.

Labour, Social Security and Co-operatives, Hon. B. M. Barrow.

Attorney-General and Legal Affairs, Hon. B. L. B. Pitt.

Education and Culture, Hon. G. M. Chambers.

Tobago Affairs, Hon. W. Winchester.

Industry and Commerce and Petroleum, Hon. E. E. Mahabir.

External Affairs, Dr. Hon. C. Joseph.

Ministers in the Ministry of Finance, Hon. L. M. Robinson (Planning and Development); Senator

Hon. F. C. Prevatt (Public Investment); Hon. C. Gomes (Pensions and Gratuities).

President of the Senate, Dr. the Hon. W. Ali.

Speaker of the House of Representatives, Hon. C. A. Thomasos.

TRINIDAD AND TOBAGO HIGH COMMISSION

42 Belgrave Square, S.W.1

[01-245 9351]

High Commissioner, His Excellency Dr. Patrick Vincent Joseph Solomon (1971).

Deputy High Commissioner, L. E. Williams.

Counsellors, R. K. Ablack; B. Rambissoon.

BRITISH HIGH COMMISSION

Port of Spain

High Commissioner, His Excellency Christopher Ewart Digges, C.M.G. (1973) £8,425

Education.—The system of education has been reformed to co-ordinate more closely the nursery, primary, junior secondary, senior secondary and university stages. The system provides for education of the pupils from 4-5 in nursery schools, 5-11 (or 15) in primary schools. Admission to secondary schools (11-18) is by common entrance examination at 11 years. A Primary School leaving Examination can be taken at 15. Junior secondary schools catering for the 11-14 group are being introduced to ease the shortage of places at second-

dary level. A General Certificate of Education giving admission to the University of the West Indies is taken in senior secondary schools. The Government Polytechnic Institute was established in 1959. There are two Technical Institutes, a government Vocational Centre and six Teacher Training Colleges. One of three branches of the University of the West Indies is ten miles from Port of Spain, at St. Augustine.

Communications.—There are some 4,000 miles of all-weather roads. The only general cargo port is Port of Spain but there are specialized port facilities elsewhere for landing crude oil, loading refinery products and sugar and for landing, storing and trans-shipping bauxite and cement. Regular shipping services call at Port of Spain, which is also a port for the many small inter-island craft. International scheduled airlines, including the national airline, B.W.I.A., use Piarco International Airport outside Port of Spain. A local airline flies between Piarco and Crown Point Airport in Tobago.

There are two commercial broadcasting stations, one radio station and one commercial television station. There is an internal telephone system and good external telephone and telegraph connections.

Production.—Oil is extracted from land and sea wells for refining locally and large quantities of crude oil are also imported. The most important agricultural crop is sugar, but there is a growing diversification into other crops for local use and export. There is considerable industrialization, which already includes the manufacture of cement, chemicals, tyres, clothing, soap, furniture and foodstuffs.

Total exports in 1975 amounted to TT\$3,847 million, of which TT\$3,345 million was on account of exports of crude oil and petroleum products. Other main exports were sugar and sugar preparations, ammonium compounds, tar oils, coffee and cocoa beans and fertilizers. Total imports in 1975 were TT\$3,232 million, of which TT\$1,629 million was accounted for by imports of crude oil.

FINANCE

The following statistics show figures in TT\$ millions.

Exports to U.K....	15,312,000	34,844,000

Uganda

Situated in Eastern Africa, Uganda is flanked by Zaire, the Sudan, Kenya and on the south by Tanzania and Rwanda. Large parts of Lake Victoria, Idi Amin Dada and Mobutu Sese Seko are within its boundaries, as are Lakes Kyoga and Salisbury and the course of the River Nile from its outlet from Lake Victoria to the Sudan frontier post at Nimule. Despite its tropical location, Uganda's climate is tempered by its situation some 3,000 ft. above sea level, and well over that altitude in the highlands of the Western and Eastern Regions. Temperatures seldom rise above 85° F. (29° C.) or fall below 60° F. (15° C.). The rainfall averages about 50 inches a year which means that the country is covered in a lush green cloak for most of the year. Uganda has three National Parks with a wide variety of wildlife and flora.

Area and Population.—Uganda has an area of 91,000 sq. mile (water and swamp 16,400 sq. miles) and population (estimated, 1974) of 11,172,000. The official language of Uganda is Swahili, although English is commonly spoken and is used in commercial circles. The main local vernaculars are of Bantu, Luo and Hamitic origins. Ki-Swahili is generally understood in trading centres. **CAPITAL.**—Kampala (population of Greater Kampala, 331,000). **FLAG.**—Six horizontal stripes of black, yellow and red (repeated) with a crested emblem on a white orb in the centre. **NATIONAL DAY.**—October 9 (Independence Day).

Government.—Uganda became an independent state and a member of the Commonwealth on October 9, 1962, after some 70 years of British rule. A Republic was instituted on September 8, 1967, under an executive President, assisted by a Cabinet of Ministers.

Early on Jan. 25, 1971, while the President, A. Milton Obote, was in Singapore at the 1971 Commonwealth Prime Ministers' Meeting, the Uganda Army, with the co-operation of the police forces, assumed control of the country. All political activity in Uganda was suspended. On Jan. 26, 1971, Maj.-Gen. Idi Amin, the Army Commander, proclaimed himself Head of State, having previously announced that there would be an early return to civilian rule "after free and fair general elections". There was some short-lived military opposition in northern parts of Uganda, by troops loyal to Dr. Obote. On Feb. 2, Gen. Amin announced the suspension of certain parts of the Constitution, dissolution of Parliament and the formation of a Defence Council under his own Chairmanship.

President and Commander in Chief of the Armed Forces and Minister of Defence, Field-Marshal Al-Hajji Idi Amin Dada, born 1926, assumed office Jan. 26, 1971.

Diplomatic relations with Uganda were suspended by the United Kingdom in the summer of 1976.

Education.—Education is a joint undertaking by the Government, Local Authorities and, to some extent, Voluntary Agencies. The education system is divided into three distinct sectors—Primary, Secondary and Post-Secondary. The Primary course covers the first seven years of schooling. There were an estimated 786,899 pupils in grant-aided Primary Schools in 1972. Education at secondary level falls into four categories—Secondary schools, which are of the Grammar type of school with a course extending over six years to Higher School Certificate; Technical Schools;

Farm Schools; and Primary Teacher Training Colleges. Further education is provided at the Uganda Technical College, the National Teachers' College, the Uganda College of Commerce; and Agricultural Colleges. There are also in addition to these, several departmental training schools training staff for different departments. The Medical Department alone has eight such schools training nurses, midwives, medical assistants, health inspectors, and other medical staff.

University level education is available at Makerere University, Kampala; the University College, Nairobi, in Kenya, and the University College, Dar es Salaam, in Tanzania. Uganda students also go to universities and colleges outside East Africa for higher education.

Communications.—There is a first-class international airport at Entebbe, with direct flights to many places in Africa, Asia and Europe. There are 10 other state airports and airfields in Uganda. There are 1,700 kilometres of bituminized and 25,000 kilometres of gravel roads. Nearly 75 per cent. of all trunk roads are metalled, the remainder and all feeder roads are gravel roads of good standard. A railway network joins the capital to the western, eastern and northern centres. Lake, marine, road and rail services are operated by the E. African Railways and Harbours Administration.

Trade, etc.—The principal export commodities are coffee, cotton, copper, animal feeding-stuffs, hides and skins and unmanufactured tobacco. Other crops grown include sugar and groundnuts. Hydro-electric power is produced from the Owen Falls power station which has a capacity of 150,000 kWh. Plans are under way for increasing the output of electricity.

TRADE WITH U.K.

	1973	1974
Imports from U.K....	£ 4,913,000	£ 7,238,000
Exports to U.K.....	20,788,000	24,412,000

Zambia

The Republic of Zambia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. It has an area of 290,587 square miles within boundaries 3,515 miles in length and a population (Census, 1969) of 4,054,000, including about 50,000 non-Africans.

With the exception of the valleys of the Zambesi, the Luapula, the Kafue and the Luangwa Rivers, and the Luano valley, the greater part of Zambia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 6,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country.

Although Zambia lies within the tropics, and fairly centrally in the great land mass of the African continent its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambesi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

Government.—At the dissolution of the Federation of Rhodesia and Nyasaland, on December 31, 1963, Northern Rhodesia (as Zambia was then known) achieved internal self-government under a new constitution. Zambia became an independent republic with the Commonwealth on October 24, 1964—75 years after coming under British rule and nine months after achieving internal self-government. Until December 1972, when the 1964 Constitution was superseded, the country had a multi-party constitution. In July 1973, a new Constitution was introduced, providing that the United National Independence Party shall be the only party.

CAPITAL.—Lusaka, situated in the Central Province. Population (estimated, 1972), 347,900. Other centres are Livingstone, Kabwe, Chipata, Mazabuka, Mbala, Kasama, Solwezi, Mongu, Mansa, Ndola, Luanshya, Mufulira, Chingola, Chililabombwe, Kalulushi and Kitwe, the last six towns being the main centres on the Copperbelt. **FLAG.**—Green with three small vertical stripes, red, black and orange (next fly); eagle device on green above stripes.

President, Dr. Kenneth David Kaunda, assumed office October 24, 1964; re-elected, December 1973.

CABINET

The President (also Minister of Defence).

Prime Minister (also Minister of National Guidance and Development), E. H. K. Mudenda

Minister of Foreign Affairs, R. Banda.

 British Council Representative, Dr. R. E. Wright,
 Heroes Place, Cairo Road, Lusaka.

JUDICATURE

There is a Chief Justice appointed by the President, all other judges being appointed on the recommendation of the Judicial Service Commission consisting of the Chief Justice, the chairman of the Public Service Commission, a senior Justice of Appeal and one Presidential nominee.

Chief Justice of Zambia, Hon. A. M. Silungwe.
 Deputy Chief Justice, L. S. Baron.
 Justice of the Supreme Court, B. T. Gardener.

GRENADA

Grenada is situated between the parallels of 12° 13'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 80 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and about 120 miles S.W. of Barbados. Area, including the Grenada Grenadines about 133 square miles; estimated population (including some of the Grenadines), 104,000 (1976). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1763. It became an Associated State in 1967 and an independent nation on Feb. 1, 1974.

The soil is very fertile, and cocoa, bananas, nutmeg and other spices, coconuts, sugar cane and fruit are grown. The imports are chiefly dry goods, wheat, flour, dried fish and rice.

St. George's (population 8,600) on the south-west coast, is the chief town, and possesses a good harbour.

Trade

Total imports (1973)..... \$42,537,790
 Total exports (1974)..... \$14,816,634
 Includes Colonial Development and Welfare Grant.

Puisne Judges, G. B. Muwo; W. S. Bruce-Lytle;
 B. Cullinan; G. Care; M. Moodley; B. Bwewepe.

Education.—In 1973 there were 810,740 pupils in primary schools and 65,764 (1974) in secondary schools.

Full-time university enrolment in 1974 was 2,612.

Production and Employment.—Principal products are tobacco, maize, groundnuts, cotton, livestock and vegetables.

Mineral production was valued at K933,599,000 in 1974. The production of copper totalled 702,490 tonnes valued at K874,037,504. In 1973 an oil refinery at Ndola came into operation and the pipeline running through Zambia to Ndola was switched over to the transportation of crude oil.

In Dec. 1973, 383,830 persons were estimated to be in full employment. Included in this figure are: mining and quarrying, 62,590; agriculture, forestry and fishery, 36,500; construction, 75,560; manufacturing, 42,060.

Finance and Currency.—Zambia adopted decimal currency on Jan. 16, 1968, the unit being the Kwacha.

	1973	1974
Revenue.....	K329,300,000	K682,900,000
Expenditure.....	356,600,000	490,000,000
Capital expenditure.	113,900,000	241,800,000

Government

Grenada's legislature is bicameral consisting of Her Majesty (represented by a Governor-General), a Senate and a House of Representatives. The 13 Senators are appointed by the Governor-General, 7 on the advice of the Prime Minister, 3 on the advice of the Leader of the Opposition, and 3 on the advice of the Prime Minister after he has consulted interests which he considers Senators should be selected to represent. The Cabinet consists of the Prime Minister, the other Ministers, and at any time when his office is a public one, the Attorney-General. Governor-General, Sir Leo de Gale (1974). Premier, Hon. Eric M. Gairy.

The Grenadines are a chain of small islands lying between Grenada and St. Vincent, within which Governments they are included. The largest island is Carriacou, attached to the Government of Grenada, with area of 13 sq. miles and population of about 8,000.

GRENADA HIGH COMMISSION
 King's House, 10 Haymarket, S.W.1
 [01-930 7902]

British High Commission (see Trinidad and Tobago)

REPUBLIC OF NAURU

The Republic of Nauru is an island of 8.2 sq. miles in size, situated in 166° 55' E. longitude and 32° S. of the Equator. It has a population (estimated June, 1972) of 6,768, of whom two-thirds are Nauruans or other Pacific Islanders. There are Chinese and European minorities. About 43 per cent. of Nauruans are adherents of the Nauruan Protestant Church and there is a Roman Catholic Mission on the island.

Until 1968 Nauru was administered by Australia under an international trusteeship agreement which on Nov. 1, 1947, superseded a former League of Nations Mandate. It became an Independent State from February 1, 1968. It was announced in November, 1968, that a limited form of membership of the Commonwealth had been devised for Nauru at the request of its Government.

President, Premier and Minister for External Affairs,
 Internal Affairs, Island Development and Industry
 and Civil Aviation, His Excellency Hammer
 DeRoburt, O.B.E.

Minister for Finance, Hon. J. A. Bop.

Justice, Hon. J. D. Audoa.
 Health and Education, Hon. A. Bernicke.
 Works and Community Services, Hon. R. B. Detudamo.
 Chief Justice, I. R. Thompson.

Judiciary.—The Nauruan judiciary consists of a District Court, a Central Court and a Court of Appeal.

Education and Welfare.—Nauru has a hospital service and other medical and dental services. There is also a maternity and child welfare service. Education is available in 9 primary and 2 secondary schools on the island with a total enrolment of 1,797 pupils.

Production, etc.—There are valuable deposits of phosphates on the island which were purchased from the Pacific Phosphate Company in 1919 by the Governments of Australia, New Zealand and

the United Kingdom for £3,500,000 and vested in the British Phosphate Commissioners. Royalties on phosphate exports (about £5,000,000 annually) have been paid partly to the Nauruans and partly into a trust fund which used income from investments abroad to pay for Nauru's administrative and social services. Phosphate mining employs 1,369 persons out of a labour force of 2,208.

The assets on Nauru of the British Phosphate Commissioners have been purchased by the Nauruans, control of mining and marketing passing to the Nauru Phosphate Corporation on July 1, 1970.

FLAG.—Twelve-point star (representing the 12 original Nauruan tribes) below a gold bar (representing the Equator), all on a blue ground.

SEYCHELLES

The Republic of Seychelles, in the Indian Ocean, consists of two distinct collections of islands—the Mahé group, 45 islands in all, granitic with high hills and mountains (highest point about 2,990 ft.) and the outlying islands, the Coralline group, numbering 49 more and, for the most part, only a little above sea-level. Proclaimed as French territory in 1756, the Mahé group began to be settled as a dependency of Mauritius from 1770, was captured by a British ship in 1794 and was finally assigned to Great Britain in 1810. By Letters Patent of September, 1903, these islands, together with the Coralline group, were formed into a separate Colony. On June 28, 1976, the Islands became an independent republic within the Commonwealth.

The total area of the Granitic group is 190 square miles, of which Mahé, the largest island and the seat of Government, claims 57. The next largest island is Praslin, home of the unique double coconut, *Coco de Mer*. Islands of the Coralline group lie at distances from Mahé varying between 60 and 612 miles and have a total area of approximately 81 sq. miles. In 1965 the islands of Farquhar, Desroches and Aldabra were detached from Seychelles and with the Chagos Islands, formerly of Mauritius, formed the new British Indian Ocean Territory, but returned to Seychelles on independ-

ence. The coralline islands have no permanent population and, where worked, are supplied by contract labour from the Granitic group. The population at the 1971 Census was 52,650. Although only 4° S. of the Equator, the islands are healthy. There are 36 primary schools, 14 secondary schools, five vocational training centres and a teachers' training college.

A new Constitution was introduced in 1976. The National Assembly consists of 25 elected members and the Speaker.

	TRADE	
	1974	1975
Imports.....	Rs.160,500,000	Rs.191,400,000
Exports.....	18,700,000	12,900,000

The principal imports are rice, mineral oils, cotton piece goods, vehicles, manufactured items and building materials. The chief exports are tourism, cinnamon bark and copra; others include cinnamon leaf oil, guano, vanilla, patchouli oil and tortoise shell.

CAPITAL.—Victoria (population, 1971, 13,736), on the N.E. side of Mahé.

President. Hon. J. R. Mancham.

Prime Minister. Hon. A. Rene.

Letters to and from London—5 to 10 days.

TONGA

The Tongan or Friendly Islands, a British-protected state for 70 years, became independent on June 7, 1970.

These islands are situated in the Southern Pacific some 450 miles to the E.S.E. of Fiji, with an area of 270 sq. miles, and population (estimated, 1974) of 97,157. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nuku'alofa, on the island of Tongatapu, is the seat of government. The present King Taufa'ahau Tupou IV, G.C.V.O., K.C.M.G., K.B.E., succeeded his mother, the late Queen Salote Tupou III, on December 16, 1965. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 22 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of Island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially.

Premier, Minister of Foreign Affairs and of Agriculture. H.R.H. Prince Fatafehi Tu'ipelohake, C.B.E.

Soil generally is fertile, the principal exports are copra and bananas. Revenue July 1974–June 1975 T\$4,792,800; expenditure T\$4,298,500. The national debt is T\$1,363,395 (June 1975). Total imports (1974) T\$11,819,247. Total exports (1974) T\$4,561,494. The total shipping cleared in 1974 was 611,281 tons. Tongan currency is at parity with Australia.

CAPITAL.—Nuku'alofa (20,000).

FLAG.—Truncated red cross on rectangular white ground (next staff) on a red field.

TONGAN HIGH COMMISSION
New Zealand House, Haymarket, S.W.1
[01-839 3287]

High Commissioner. His Excellency 'Inoke Fotu Faletau.

BRITISH HIGH COMMISSION
Nuku'alofa
High Commissioner. His Excellency Humphrey Augustine Arthington-Davy, O.B.E.

WESTERN SAMOA

Head of State. H. H. Malietoa Tanumafili II, C.B.E. (April 15, 1963).

Prime Minister. Hon. Tupuola Efi.

Formerly administered by New Zealand (latterly with internal self-government), Western Samoa became, on January 1, 1962, the first fully-independent Polynesian State.

The State was treated as a member country of the Commonwealth until its formal admission on August 28, 1970.

Western Samoa consists of the islands of Savai'i (662 sq. miles) and of Upolu, which with nine other islands, has an area of 435 sq. miles. All islands are mountainous. Upolu, the most fertile, contains the harbours of Ψ Apia and Ψ Saluafata and Savai'i the harbour of Ψ Asau. The islanders are Christians of different denominations. In 1974 the population was estimated to be 152,000.

The chief exports are copra, cocoa, bananas and timber.

Total exports 1974 were \$7,699,300.

Total imports 1974 were \$17,459,900.

TRADE WITH U.K.

	1972	1974
Imports from U.K.	£1,116,000	£322,000
Exports to U.K.	124,000	387,000

CAPITAL.— Ψ Apia (population 28,800). Robert Louis Stevenson died and was buried at Apia in 1894.

FLAG.—Five white stars (depicting the Southern Cross) on a quarter royal blue at top next staff, and three quarters red.

Associated States, Colonies, Protectorates, etc.

Flags of the Dependencies.—Generally the dependencies use the Union Flag ("Union Jack") or Blue Ensign bearing a badge of arms of the Dependency (with surrounding garland when used with the Union Flag). In a few cases, e.g. Bermuda, the Red Ensign is used with badge. (See also ANTIGUA (W. Indies); BRUNEI; ST. KITTS (W. Indies); ST. LUCIA (W. Indies).)

ASCENSION See ST. HELENA BELIZE

British Honduras, in Central America, was officially renamed Belize on June 1, 1973. It lies within $18^{\circ} 29' 50''$ to $51^{\circ} 53' N.$ latitude and $89^{\circ} 13' 28''$ to $87^{\circ} 21' 30'' W.$ longitude. Its extreme length and breadth are approximately 186 m. and 118 m. respectively; it is bounded on the north and north-west by Mexico, on the west and south by Guatemala; and on the east by the Caribbean Sea. The total area (including offshore islands) is about 8,867 sq. miles, with an estimated population (1947) of 140,000. The climate generally is damp and warm, but not unhealthy. The temperature ranges from 47° to $94^{\circ} F.$ The average lies between 75° and 80° , but this is considerably tempered by the prevailing sea-breezes.

The greater part of the country is covered by forest, of which 50 per cent. is high rain forest, 15½ pine forest and dry savannah, 5½ wet savannah and mangrove forest, the remaining 20 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasturage for cattle. The north of the territory and the southern coastal plain (8 to 20 miles wide) are nearly flat. Near the sea the plain is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 20 per cent. of the area of the territory is over 1,000 feet in elevation above mean sea-level.

The staple products are obtained from the forests, and include mahogany, cedar, and *chicle* (the basis of chewing-gum), Santa Maria, pine and rosewood. Agricultural crops which grow readily include sugar cane, coconuts, citrus fruit, plantains, pineapples, mangoes, maize, cucumbers, rice, varieties of beans and peas. Bananas also grow well in certain localities. All varieties of citrus fruits flourish, and in particular grape-fruit, of which a very high grade is exported. Lobster tails and shrimps are also exported.

In 1974 there were 181 Government and grant-aided primary schools and 8 unaided private elementary schools in the country, the total enrolment being 35,000. There are also 21 secondary schools with a total enrolment of 6,000.

There are 50 post offices in the country. A new transmitting and receiving station at Ladyville has been completed. External telegraph and radio telephone and telex services are operated by Cable and Wireless Ltd. Air services are scheduled 7 times weekly to and from the capitals of Panama, Honduras, Mexico, Salvador, Guatemala, Nicaragua, Costa Rica and twice weekly to and from Jamaica. There is a six times weekly service from

and to New Orleans, a seven times weekly service from and to Miami and a weekly service to Mexico City. A local scheduled air service links the six districts into which the country is divided.

CAPITAL, Belmopan (estimated population, Dec. 31, 1974, 3,500). The largest city and the former capital is Ψ Belize City (population, 1970, 38,000), which was badly damaged by a hurricane in October, 1961. It was announced in 1965 that a new capital would be built, 50 miles inland. Construction is proceeding on the new city, Belmopan, with U.K. aid of \$24,000,000. The first phase was completed in 1970. Other towns are Ψ Corozal (12,319), Cayo (16,484), Ψ Stann Creek (13,435) Orange Walk (13,266), Toledo (9,804).

FINANCE

	1974	1975
Revenue.	\$23,487,200	\$31,606,444
Expenditure.	23,487,200	27,647,259

Estimated revenue and expenditure on capital projects in 1974 balanced at \$16,677,277.

Public Debt (Dec. 31, 1974), \$17,469,814.

The Canadian Government has made a loan of \$8,000,000 for modern water and sewerage systems in Belize City.

TRADE WITH U.K.

	1973	1974
Imports from U.K.	£3,770,000	£4,218,000
Exports to U.K.	2,730,000	4,975,000

GOVERNMENT

Under the Constitution introduced on Jan. 1, 1964, the Governor retains special responsibility for defence, external affairs, internal security and the safeguarding of the terms and conditions of service of public officers. For so long as the Government continues to receive grant-in-aid from the U.K. Government, the Governor also has special responsibility for maintaining or securing financial and economic stability and for ensuring that any condition attached to any financial grant or loan made by the U.K. Government is fulfilled. The Governor appoints as Premier the person who appears to him to be likely to command the support of a majority in the House of Representatives. Ministers are appointed by the Governor on the advice of the Premier.

The National Assembly comprises a House of Representatives and a Senate. The House of Representatives consists of 18 members elected by universal adult suffrage. The Speaker may be elected by the House from among its own members, or from outside; the Deputy Speaker is elected by the House from among its own members. The

Senate consists of 8 members appointed by the Governor (5 on the advice of the Premier, 2 on the advice of the leader of the Opposition and 1 after consulting such persons as he considers appropriate).

<i>Governor and Commander-in-Chief, His Excellency Richard Neil Posnett, O.B.E.</i>

Belize is distant from London about 4,700 miles; transit, 17 days by sea, 18 hours by air via Miami.

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (about 20 only of which are inhabited) situated in the west of the Atlantic Ocean, in 32° 18' N. lat. and 64° 46' W. long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The total area is now approximately 20.59 sq. miles which includes 2.3 sq. miles leased to, or reclaimed by, the U.S. authorities between 1941 and 1957 under the terms of the 99 year lease. The civil population was 53,000 at the Census taken in October, 1970. The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1515, but no settlement was made until 1609, when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding, but since 1943 almost entirely destroyed by blight. At one time the islands enjoyed a flourishing export in onions, potatoes, and green vegetables, but the imposition of tariffs in U.S.A. and the growing shortage of arable land made further growing for export unprofitable. The lily bud trade with Canada and U.S.A. and locally manufactured concentrates and pharmaceuticals are now the Colony's leading exports. Little food is produced except vegetables and fish, other foodstuffs being imported.

The Colony's economic structure is based on its importance as a tourist resort and as a naval base and from these sources most of its revenue is derived. Bermuda is now within two hours' air travel from New York, and in 1972 a total of 488,271 visitors arrived in Bermuda. The airport is used by B.O.A.C., Pan-American Airways, Air-Canada, Eastern, North-East and Qantas air lines and most cruise ships dock at Hamilton.

Free elementary education was introduced in May, 1949. Free secondary education was introduced in 1965 for those children in the aided and maintained schools who were below the upper limit of the statutory school age (16 from 1969 onwards).

There are 4 radio and 2 television stations, one daily and 3 weekly newspapers and overseas telephone and telegraph services are maintained.

GOVERNMENT

Internal self-government was introduced on June 8, 1968. There are a Legislative Council of 11 Members and an elected House of Assembly of 40 Members. The Governor retains responsibility for external affairs, defence, internal security and the police.

Voters must be British subjects of twenty-one years of age or older at the time of registration, and if they do not possess Bermudian status, they must have been ordinarily resident in Bermuda for the whole of the period of three years immediately before registration. Registration is held every year during the month of February. Candidates for election must qualify as electors and must possess Bermudian status.

THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 42, of which 11 are uninhabited, and have a total area of about 59 square miles. The principal are Tortola, the largest (situate in 18° 27' N. lat. and 64° 40' W. long., area, 21 sq. miles), Virgin Gorda (84 sq. miles), Anegada (15 sq. miles) and Jost Van Dyke (3½ sq. miles). The 1970 Census of Population showed a total population of 10,030 (Tortola (8,676); Virgin Gorda (904); Anegada (269); Jost Van Dyke (123); and other islands 68). Apart from Anegada, which is a flat coral island, the British Virgin Islands are hilly, being an extension of the Puerto Rico and the U.S. Virgin Islands archipelago. The highest point is Sage Mountain on Tor-

tola which rises to a height of 1,780 feet. The islands are very picturesque and form one of the finest sailing areas in the world on account of their sheltered waters. The sea is rich in gamefish and there are said to be over 400 wrecks off Anegada. Tourism is the main industry, but there is some cattle raising and fishing. Other products are vegetables, fruit, charcoal and a small amount of rum.

The islands lie within the Trade Winds belt and possess a pleasant and healthy sub-tropical climate. The average temperature varies from 71° to 82° F. in winter and 78°–88° F. in summer. The summer heat is tempered by sea breezes and the temperature usually falls by about 10° at night. Average rainfall is 53 inches. Hurricanes are very rare—the last occurrence being in 1928.

The principal airport is on Beef Island, linked by bridge to Tortola, and an extended runway of 3,600 feet, opened in 1969, enables larger aircraft to call. There is a second airfield on Virgin Gorda and a third on Anegada. There are direct shipping services to the United Kingdom and the United States and fast passenger services connect the main islands by ferry.

GOVERNMENT

The British Virgin Islands are partially internally self-governing, with a ministerial system. The Governor, appointed by the Crown, remains responsible for defence and internal security, external affairs, the civil service, administration of the courts and finance, and acts in accordance with the advice of the Executive Council. The Executive Council consists of the Governor as Chairman, two *ex officio* members (the Attorney-General and the Financial Secretary), the Chief Minister and two other ministers. The Legislative Council consists of a Speaker chosen from outside the Council, two *ex officio* members (the Attorney-General and Financial Secretary), one nominated member appointed by the Governor after consultation with the Chief Minister and seven elected members returned from seven one-member electoral districts. The islands are proud of their tradition of stable government.

BRUNEI

Sultan, H. H. Hassanah Bolkiah Mu'izzadin Wad-aulah, G.C.M.G., acceded 1967, crowned Aug. 1, 1968.

Brunei is situated on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (estimated 1975), 162,200, of whom 71.7 per cent. are of Malay or other indigenous race and 23.4 per cent. Chinese. The chief town, Bandar Seri Begawan, with its nearby water village (groups of houses on stilts on the Brunei River) has a population of about 42,000. The country has a humid tropical climate.

In 1959, the Sultan of Brunei promulgated the first written Constitution, which provides for a Privy Council, a Council of Ministers and a Legislative Council. Under the 1959 Agreement, as amended in 1971, Britain is responsible for external affairs, and has an obligation to consult the Brunei Government on the defence of the State. The post of British Resident was abolished in 1959 and many of his functions were transferred to the Sultan in Council. A *Mentri Besar* (Chief Minister) is appointed by the Sultan, and is responsible to him for the exercise of executive authority. The Sultan presides over the Privy Council and the Council of Ministers.

FLAG.—Yellow, with diagonal bands of white over narrow black band (from top by staff), with red device on diagonal bands.

Currency.—Brunei issues its own currency, the *Brunei dollar* of 100 *cents*, which is fully interchangeable with the currency of Singapore.

Imports from the U.K. in 1974 totalled £5,113,000 (1973, £2,550,000).

FALKLAND ISLANDS

The Falkland Islands, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'–53° S. lat. and 57° 40'–62° W. long. They consist of East Falkland (area 2,610 sq. miles), West Falkland (2,090 sq. miles) and upwards of 100 small islands in the aggregate, the estimated population at the Census of Dec. 31, 1975 being 1,905. Mount Osborne, the loftiest peak, rises 2,312 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to a part at least of the group in 1771. The settlement was destroyed by the Americans in 1831. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. The climate is cool. At Stanley the mean monthly temperature varies between 49° F. in January and 35.5° F. in July. The air temperature has never

been known to exceed 77° F. or to fall below 12° F.; it is notably windy. The islands are chiefly moorland. The population is almost totally British, and is principally engaged in sheep-farming to which practically all the land in the colony is devoted, 644,014 sheep being carried in 1974/5. Wool, hides and sheepskins are exported. The only town is Ψ Stanley on the coast of East Falkland.

GOVERNMENT

The Governor is assisted by a Legislative Council of 8 members, with the Governor as President, 2 *ex officio* (Chief Secretary and Financial Secretary), 2 non-official members (nominated by the Governor), and 4 representatives elected by the people.

Governor and Commander-in-Chief, His Excellency Neville Arthur Irwin French, C.M.G., M.V.O. (1975) (+ *duty allce.* £936) £4,500

CHIEF TOWN, Ψ Stanley, estimated population 1,079. Stanley is distant from England about 8,103 miles. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Islands can be accomplished in 4 to 5 days travelling to Comodoro Rivadavia, *via* Buenos Aires, thence by air to Stanley.

DEPENDENCIES.—South Georgia, an island 800 miles east-south-east of the Falkland group, with an area of 1,450 sq. miles. Some 22 persons reside at the British scientific base which has been established at King Edward Point. The South Sandwich Islands group, which is uninhabited and lies some 470 miles S.E. of South Georgia, is the only other dependency.

GIBRALTAR,

a rocky promontory, $3\frac{3}{4}$ miles in length, $\frac{3}{4}$ of a mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. In a total area of $2\frac{1}{2}$ sq. miles, the population at the census of Oct. 1970 was 26,833. The estimated civilian population at the end of 1975 was 29,934.

Gibraltar is a naval base of strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779–83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar enjoys the advantages of an extensive shipping trade. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on consumer items. Import duties are low and Gibraltar is a popular

shopping centre. The gradual change from a fortress city to an attractive holiday centre has led to a flourishing tourist trade.

A total of 2,433 merchant ships (14,695,736 net tons) entered the port during 1975. Of these 1,787 were deep-sea ships (14,490,381 net tons). In addition 2,384 yachts (35,836 net tons) called at the port. There are 26.75 miles of roads.

Education is compulsory and free between the ages of 5 and 15 and scholarships are available for university or further education in Britain. There are 12 Government, 2 private and 2 Services primary schools, with 3,759 pupils in Dec. 1975. The two government secondary schools had 1,561 pupils in 1975. Government expenditure on education in 1975 was £928,698.

GOVERNMENT

The Constitution of Gibraltar, approved in 1969, made formal provision for certain domestic matters to devolve on Ministers appointed from among elected members of the House of Assembly then set up to replace the former Legislative Council. The House of Assembly consists of an independent Speaker, 15 elected members and the Attorney-General and Financial and Development Secretary. Governor and Commander-in-Chief, His Excellency

Marshal of the Royal Air Force Sir John Grandy, G.C.B., K.B.E., D.S.O. (1973) (including £1,500 *entertainment allowance*) £8,750
 Flag Officer, Gibraltar, and Admiral Supr., H.M. Naval Base, Gibraltar, Rear Admiral M. L. Stacey, Chief Minister, Sir Joshua Hassan, C.B.E., M.V.O., Q.C.

Chief Justice, Sir Edgar Unsworth, C.M.G. £4,890
 Speaker, A. J. Vasquez, C.B.E.
 Deputy Governor, E. H. Davis, C.M.G., O.B.E. £4,890
 Financial and Development Secretary, A. Collins..... £4,490

Attorney-General, J. K. Havers, O.B.E., Q.C. £4,490
 Distance from London 1,209 miles; transit, $3\frac{1}{4}$ days. British Airways operate regular direct air services to the U.K. (Some services are *via* Madrid.) Transit times average 3 hours.

GILBERT ISLANDS

Until October 1, 1975, the Gilbert Islands formed part of the Gilbert and Ellice Islands Colony.

On the recommendation of a Commissioner appointed by Her Majesty's Government to consider requests by the Ellice leaders to have their island group separated from the Gilberts, a referendum of Ellice Islanders was held in the autumn of 1974. This showed an overwhelming support for separation and this was effected on October 1 1975. The Ellice Islands became a separate Colony known as Tuvalu and the remainder of the original Gilbert and Ellice Islands changed its name to the Gilbert Islands. Separation of the Administration took place on January 1, 1976.

The Gilbert Islands which includes Ocean Island, the Phoenix Islands and the Line Islands is situated in the South West Pacific around the point at which the International Date Line cuts the Equator. The Colony consists of 33 coral atolls (of which 21 are permanently inhabited) with a total land area of

264 square miles spread over some 2 million square miles of ocean. Few of the atolls are more than 12 feet above sea level or more than half a mile in width. The vegetation consists mainly of coconut palms, breadfruit trees and pandanus. The total population based on a census in 1973 is approximately 48,000. The Phoenix and Line Islands now have no indigenous populations. Christianity is widespread, roughly half of the population being Protestant and the other half Roman Catholic. Most people still practice a subsistence economy, the main staples of their diet being coconuts and fish.

The Colony is administered by a Governor. In May 1974 a ministerial form of government was introduced providing for the establishment of a House of Assembly which comprised 28 elected members and three *ex officio* members, and a Council of Ministers which comprised the Governor, the three *ex officio* members of the House of Assembly, a Chief Minister (chosen by and from among the elected members) and between four and six Ministers appointed by the Governor on the advice of the Chief Minister. In May 1975 the constitution was slightly altered to take account of the separation of the Ellice Islands. Apart from reducing the number of seats in the House of Assembly (now 21) separation made little difference to the Gilbert Islands constitution.

Local Government services are provided by elected Island Councils. Under an agreement reached in 1939, Canton and Enderbury islands in the Phoenix Group are jointly administered by the United Kingdom and the United States.

The unit of currency is the Australian dollar. Estimated revenue for 1975 was \$A24,944,500 and estimated expenditure \$A24,942,500. The principal imports are foodstuffs, consumer goods and building materials. The only exports are phosphates from Ocean Island, and copra, most of which is produced by small landowners. There are three copra plantations in the Line Islands.

Communication between the islands is mainly by small ships operated by the Development Authority, a non-government organisation. There is a weekly service to Fiji. A few islands are served by an internal air service.

The Government maintains a teacher training college and a secondary school. Four junior secondary schools are maintained by missions. Throughout the Colony there are about a hundred primary schools. The total enrolment of children of school age is in the region of 13,000. The Marine Training School at Tarawa trains seamen for service with overseas shipping lines. There is a general hospital at Tarawa and the British Phosphate Commissioners maintain a general hospital on Ocean Island. The other inhabited islands have dispensaries, the larger ones being in the charge of qualified medical officers.

CAPITAL.—Tarawa. Estimated population, 17,000.

Governor. His Excellency John Hilary Smith, C.B.E. (1973).

HONG KONG

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52'–114° 30' E. long.

The capital city, Victoria, situated on the island of Hong Kong, is about 81 miles S.E. of Canton and 40 miles E. of the Portuguese province of Macau at the other side of the Pearl River. It lies

along the northern shore of the island and faces the mainland; the harbour (23 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equalling that of Victoria. The total area of the territory is 403.8 sq. miles (including recent reclamation) with a population which has varied considerably during recent years owing to unsettled conditions in China: at the end of 1975 it was 4,379,900.

The island of Hong Kong is about 11 miles long and from 2 to 5 miles broad, with a total area of 29 square miles; at the eastern entrance to the harbour it is separated from the mainland by a narrow strait (Lel Yue Min), 500–900 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898. Hong Kong Island is now linked to the Kowloon peninsula by a mile-long underwater road tunnel opened in 1972.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is 1,805 feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3,140 ft.

Climate.—Although Hong Kong lies within the tropics it enjoys unusually varied weather for a tropical area. The mean monthly temperature ranges from 15° C. in February to 28° C. in July. Spring is cloudy and humid, often with spells of fog and drizzle. Summer days are hot with temperatures exceeding 33° C. several times in most years. The average annual rainfall is 2,168.8 mm., of which nearly 80 per cent. falls between May and September. Tropical cyclones passing at various distances from Hong Kong sometimes cause high winds and heavy rain, particularly in July, August and September. Autumn and early winter are the most pleasant seasons, with sunny, dry and mild weather. In late winter there is more cloud and strong northerly winds can cause temperatures to drop below 10° C. and frost is not uncommon.

Communications.—Hong Kong, one of the world's finest natural harbours, possesses excellent wharves at which vessels up to 800 ft. in length and 36 ft. draught can be berthed. An ocean terminal pier with an overall length of 1,250 ft. can accommodate large liners and cargo vessels. A recent addition is the Kwai Chung container terminal which opened in 1972. It has six berths, each 1,000 ft. in length, capable of berthing container ships drawing 40 ft. draught. Excellent dockyard facilities are available and include two floating drydocks, one of which can accommodate vessels up to 100,000 deadweight tons. The net tonnage of ocean-going shipping which entered the port in the year to December 31, 1975, amounted to 32,780,000.

Hong Kong International Airport, Kai Tak, situated on the North shore of Kowloon Bay, is an important link on the main air routes of the Far East. It is regularly used by 27 scheduled airlines and many charter airlines, providing frequent services throughout the Far East, to Europe, North America, Africa, Australia and New Zealand.

British Airways operate 20 passenger services per week to Britain, Australia, Africa and Japan. Cathay Pacific Airways, the Hong Kong based airline, operate 89 passenger and cargo services from Hong Kong weekly to points in the Far East. A total of 910 services is operated weekly to and from Hong Kong by scheduled airlines.

During the year ending Dec. 31, 1975, 51,904 aircraft on international flights arrived and departed, carrying 3,865,459 passengers, 141,619 metric tons of freight and 4,764 metric tons of mail.

Education.—In Sept. 1975 there were 2,805 schools with 1,305,918 pupils. About 62.4 per cent. of the pupils are financed wholly or in part by the Government. The University of Hong Kong has a full-time student strength of 3,802 in Faculties of Arts, Science, Medicine, Engineering and Architecture, and Social Sciences and Law. There is also a Centre of Asian Studies and a Department of Extra-Mural Studies. The Chinese University of Hong Kong, inaugurated in Oct. 1963, has a full time enrolment of 3,861 students in Faculties of Arts, Science, Social Science and Business Administration. There is also a Department of Extra-Mural Studies. The Hong Kong Polytechnic has an enrolment of 20,932 full-time and part-time students.

FINANCE

	1974-75	1975-76
Public revenue. . . .	\$5,875,309,787	\$6,519,539,700
Public expenditure. .	6,255,150,535	6,032,190,492

TRADE

Hong Kong is now established as an industrial territory with an economy based on exports rather than the domestic market. Domestic industry, producing mainly light manufactures, has grown rapidly in recent years and now provides the bulk of goods for the export trade; but the secondary role as an *entrepôt*, has also been sustained. In 1974 the value of the re-export trade was 23.7 per cent. of total exports.

Hong Kong produces a wide range of articles, including cotton yarn, cotton piece-goods, garments of all types, woollen and man-made fibre knitwear, electronic products, watches and clocks, footwear, wigs, transistor radios, household enamel and aluminium ware, plastic articles (including household ware, toys and artificial flowers), iron and steel bars, photographic equipment, foodstuffs and beverages, cigarettes, jade, ivory, jewellery and goldsmiths' and silversmiths' ware, and an extensive range of metal products.

Diversification of manufacture continues to be a major feature of recent industrial development, as are industrial partnerships with foreign companies in a wide and varied field of manufactures. New products include quartz watches, shipping containers, air conditioners, automatic telephone dialling equipment, electric household appliances such as rice cookers and toasters, T.V. receiving sets and T.V. tuners and antennae, high grade semiconductors, electronic modules, electronic flash bulbs, electronic desk calculators and other electronic components, steel pipes, rigid P.V.C. tubes and corrugated sheeting, P.V.C. covered fabrics, mixed cotton-synthetic fabrics, extruded aluminium sections, watches and clocks and fibreglass pleasure craft. Modern manufacturing processes have also been introduced to local industry; these include the permanent press for ready-made garments, soil release processing for garments and the manufacture of polyester fabrics. The marked improvement in both quality and output of items for which precision engineering is required, has continued.

The adverse balance on visible trade is offset by a favourable balance on invisible account-remittances from overseas Chinese, investments, exchange, shipping and insurance profits, and the spending of tourists, etc. In 1975 Hong Kong's principal customers for its domestic products, in order of value of trade, were U.S.A., the Federal Republic of Germany, the United Kingdom,

Australia, Japan, Canada, Singapore, the Netherlands, Sweden and Switzerland. Japan was its principal supplier, followed by China, U.S.A., Taiwan, Singapore, the United Kingdom, the Federal Republic of Germany, Switzerland, South Korea and Australia.

	1974 H.K.\$	1975 H.K.\$
Total Exports. . . .	30,035,685,777	29,831,969,825
Total Imports. . . .	34,120,084,595	33,471,617,640

	1974	1975
Imports from U.K. . .	£167,400,505	£166,548,839
Exports to U.K. . . .	238,624,317	269,660,845
£12:1 = £1.		

With effect from Nov. 26, 1974, the Hong Kong dollar was allowed to float—that is, market rates would not be maintained within 2½ per cent. either side of the central rate of HK\$5.0850 = US\$1. The exchange rates used in the above conversions were the closing selling rates for the last working day of the respective years. Exchange Rates 1974, £1 = HK\$11.60. 1975, £1 = HK\$10.30.

GOVERNMENT

Hong Kong is administered as a Crown Colony with a Governor, aided by an Executive Council, consisting of 6 official and 8 unofficial members, and a Legislative Council, which consists of 14 official and 15 unofficial members. There is also an Urban Council, financially autonomous, in which is vested, *inter alia*, power of making by-laws in respect of certain matters of public health and sanitation, culture and recreation.

THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees

of East longitude. It includes 13 large and some 70 small islands, including the Banks and Torres Islands in the North, and has a total land area of about 6,050 square miles. The principal islands are Vanua Lava and Gaua (Banks), Espiritu Santo, Maewo, Pentecost, Aoba, Maleku, Ambrym, Epi, Efate, Erromango, Tanna and Aneityum.

The Territory is administered by an unique British-French Condominium Government. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have staffs of national officers to assist them in general administrative work and the running of social services (health and education) financed from national funds. In addition they control the "joint" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The Resident Commissioners are advised regarding policy and legislation by the Advisory Council, a composite body of New Hebrideans, French and British Nationals, some appointed and some elected, which meets twice a year.

The 1967 Census showed a population of 77,988 of whom 72,243 were New Hebrideans. There were 3,841 French Nationals and 1,629 British Nationals but only 1,773 of these were of European ethnic origin. Estimated population (Dec. 31, 1972), 89,031.

Principal products are frozen fish, copra, timber, frozen and canned meat, coffee, cocoa and manganese. Condominium Budget, 1973 (Recurrent and Development) \$A9,000,000; British National Service Budget \$A6,150,000; French National Service Budget NFF574,000,000. Two currencies are in use; the New Hebrides Franc and the Australian dollar. They may be converted at the official rate of exchanges as laid down by the Resident Commissioners.

Seat of New Hebrides Administration—Ψ Vila, Efate, population of Greater Vila, estimated, 1972, 12,715.

British Resident Commissioner, R. W. du Boulay, C.V.O.

French Resident Commissioner, R. Langlois.

PITCAIRN ISLANDS

Pitcairn, a small volcanic island of less than two square miles in area, is the chief of a group of Islands situated about midway between New Zealand and Panama in the South Pacific Ocean at longitude 130° 06' W. and latitude 25° 04' S.

The island rises in cliffs to a height of 1,100 feet and access from the sea is possible only at Bounty Bay, a small rocky cove, and then only by whaleboats. Mean monthly temperatures vary between 66° F. in August and 75° F. in February and the average annual rainfall is 80 inches. Moderate easterly and north-easterly winds predominate but short easterly and south-easterly gales occasionally occur from April to September. With an equable climate, the island is very fertile and produces both tropical and sub-tropical trees and crops.

The small community, descendants of the Bounty mutineers and their Tahitian companions who did not wish to remain on Norfolk Island (see p. 715) and returned here, numbers about 66 (1976). The Islanders live by subsistence farming and fishing, and their limited monetary needs are satisfied by the manufacture of wood carvings and other handicrafts which are sold to passing ships and to a few

overseas customers. Other than small fees charged for gun and driving licences there are no taxes and Government revenue is derived almost solely from the sale of postage stamps. Communication with the outside world is maintained by cargo vessels travelling between New Zealand and Panama which call at irregular intervals in each direction; and by means of a telegraphic link with Fiji.

The other three islands of the group (Henderson lying 105 miles E.N.E. of Pitcairn, Oeno lying 75 miles N.W. and Ducie lying 293 miles E.) are all uninhabited. Henderson Island is occasionally visited by the Pitcairn Islanders to obtain supplies of "miro" wood which is used for their carvings. Oeno is visited for excursions of about a week's duration every two years or so.

Under a scheme of co-operation, New Zealand supplies Pitcairn with a teacher for the one-teacher primary school on the island. Education is compulsory between the ages of five and fifteen. Secondary education in Fiji and New Zealand is encouraged by the Administration which provides scholarships and bursaries for the purpose. Medical care is provided by a registered nurse and additional help is obtained when required from the surgeons of passing ships. Since 1887 the islanders have all been adherents of the Seventh Day Adventist Church.

Pitcairn became a British Settlement under the British Settlement Act, 1887, and was administered by the Governor of Fiji from 1952 until 1970, when the administration was transferred to the British High Commission in New Zealand and the British High Commissioner was appointed Governor. The local Government Ordinance of 1964 provides for a Council of ten members of whom four are elected.

Governor of Pitcairn, Ducie, Henderson and Oeno Islands, H. Smedley, C.M.G. (*British High Commissioner for New Zealand*).

Commissioner, R. J. Hicks (*British High Commission, Auckland, New Zealand*).

Island Magistrate and Chairman of Island Council, I. Christian.

Education Officer and Government Adviser, T. Whin.

RHODESIA

Rhodesia, comprising Matabeleland, Mashonaland, Manicaland, Midlands and Victoria, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Zambia and Portuguese East Africa on the N.; the Transvaal and Botswana on the S. and W.; and Portuguese East Africa on the E. Rhodesia has a total area of 150,820 square miles and a population (estimated, 1974) of 6,100,000 (Europeans, 273,000; Africans, 5,800,000; Asians and Coloured, 29,300).

The majority of Africans of Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the territory are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition

of residential property on easy terms of repayment. Under the Land Tenure Act, operative from March 2, 1970, Rhodesia is divided into three areas—European Area (44,950,000 acres), African Area (44,950,000 acres) and National Area (6,600,000 acres).

FINANCE AND TRADE

Expenditure.....	282,580,000	318,110,000

The expenditure from revenue funds for 1973-74 was estimated at £290,197,000.

TRADE WITH U.K.

	1973	1974
Imports from U.K....	£794,000	£831,000
Exports to U.K.....	60,000	105,000

EDUCATION

African education comes under the Minister of Education in the Rhodesian Government. In 1974 there were 3,217 primary schools, 108 secondary schools, 20 teacher training schools, 6 special schools for the physically handicapped, 9 home-craft schools and 60 part-time classes. The total enrolment in African schools, exclusive of evening and part-time schools and study groups, was 835,760. The total enrolment of non-African pupils was 60,107.

GOVERNMENT

Rhodesia (then *Southern Rhodesia*) obtained self-government in 1923 and has a legislative Assembly of 66 members and a Cabinet of 14 members.

Municipal self-government has been established in the cities of Salisbury, Bulawayo, Umtali and Gwelo and the towns of Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged.

MINISTRY

On March 2, 1970, the Government of Mr. Ian Smith declared Rhodesia a republic and adopted a new constitution. The British Government has declared the assumption of republican status to be illegal.

The Parliament of Rhodesia, elected on April 10, 1970, consists of 50 Rhodesian Front, 7 Centre Party, 1 National People's Union and 8 Rhodesia Electoral Union People's Party, 2 Democratic Party and 4 Independents.

Prime Minister, Hon. I. D. Smith.

CAPITAL.—SALISBURY, situated on the Mashonaland plateau, altitude 4,850 ft., population (Dec. 1973), 503,000 (European, 122,100; Asian and Coloured, 10,840; African, 370,000). BULAWAYO, the largest town in Matabeleland, altitude 4,450 ft., population (Dec. 1973), 308,000 (European, 58,200; Asian and Coloured, 9,730; African, 240,000). Other centres are Umtali, Gwelo, Gatooma, Que Que, Fort Victoria and Wankie.

Salisbury is 5,600 miles from London (air route) transit 12 hours; by sea, *via* Cape Town, 17 days (approx.).

FLAG.—Vertical stripes of green, white, green; Rhodesian coat of arms in centre of white stripe.

ST. HELENA

Probably the best known of all the solitary islands in the world, St. Helena is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America, 1,694 from Cape Town and 4,477 from Southampton (transit $3\frac{1}{2}$ days and 9 days

respectively), in $15^{\circ} 55'$ S. lat. and $5^{\circ} 42'$ W. long. It is $10\frac{1}{2}$ miles long, $6\frac{1}{2}$ broad, and encloses an area of 47 square miles, with a population in 1975 of 5,058.

St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. Since the collapse of the New Zealand flax (*phormium tenax*) industry in 1965, there have been no significant exports, but a five year development plan, launched in 1974, seeks primarily to increase the island's productivity in its limited land and sea resources. Ψ St. James's Bay, on the north-west of the Island, possesses a good anchorage.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of a Legislative Council, consisting of the Governor, two *ex-officio* members (Government Secretary and Treasurer) and twelve elected members. Five committees of the Legislative Council are responsible for general oversight of the activities of Government Departments and have in addition a wide range of statutory and administrative functions. The Governor is also assisted by an Executive Council of the two *ex-officio* members and the Chairmen of the Council committees.

Governor, His Excellency Sir Thomas Oates, C.M.G., O.B.E., (1971).....	£3,750

Imports from U.K. in 1975-76 were valued at £706,800.		

CAPITAL. Ψ Jamestown. % Population (1974), 1,475.

ASCENSION

The small island of Ascension lies in the South Atlantic ($7^{\circ} 56'$ S., $14^{\circ} 22'$ W.) some 700 miles north-west of the island of St. Helena. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. It was uninhabited until the arrival of Napoleon in St. Helena in 1815 when

a small British naval garrison was stationed on the island. The population at December 31, 1975, was 1,131 of whom 698 were St. Helenian. The island remained under the supervision of the Board of Admiralty until 1922, when it was made a dependency of St. Helena by Royal Letters Patent and came under control of the Secretary of State for the Colonies.

Ascension is a rocky peak of purely volcanic origin, the highest point (Green Mountain) some 2,817 ft. is covered with lush vegetation, which with each rainy season is slowly creeping down to the lower areas. Cable & Wireless Ltd., maintains a farm of some 10 acres on the mountain, permitting the production of vegetables and livestock. The island is famous for Turtles, which land on the beaches from January to May to lay their eggs. It is also a breeding area for the sooty tern, or wide-awake, large numbers of which settle on the south-western coastal section every eighth month to hatch their eggs. Other wild life on the island includes feral donkeys and cats, rabbits and francolin partridge. All wild life except rabbits and cats is protected by law. The ocean surrounding the island abounds with shark, barracuda, tuna, bonito and many other fish.

Cable & Wireless Ltd. owns and operates a cable station which connects the Dependency with St. Helena, Sierra Leone, St. Vincent, Rio de Janeiro and Buenos Aires. A B.B.C. relay station was opened on the island in 1966.

Administrator, G. C. Guy, C.M.G., C.V.O., O.B.E.

TRISTAN DA CUNHA

Tristan da Cunha is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles. The main island, with a peak rising to 6,760 ft., is about 1,500 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817, William Glass, a corporal of artillery (*died* 1853), remaining at his own request, with his wife and two children. This party, with five others, formed a settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party.

The islands form a dependency of St. Helena, being administered by the Foreign and Commonwealth Office through a resident Administrator, with headquarters at the settlement of Edinburgh. Under a new constitution introduced in 1969, he is advised by an elected Island Council of 8 members of whom one must be a woman, and three appointed members, with universal suffrage at 18. The population numbered 292 persons in 1974, plus 7 expatriate Government officers and their families.

In October, 1961, a volcano, believed to have been extinct for thousands of years, erupted and lava was thrown up in some cases to a height of 75 feet. In view of the danger of further volcanic activity, the inhabitants were evacuated and reached the United Kingdom on Nov. 23, 1961, where they remained for nearly two years. An advance party returned to Tristan da Cunha in the spring of 1963, and the main body of the islanders has now returned to the island. Some went back to England in 1966, but most returned in August, 1967.

A boat harbour was completed in 1967. The first freezing factory was re-established in 1966. There are no taxes on Tristan, income being derived from royalties paid by the fishing company and from the sale of stamps. The new Camogli Hospital was opened early in 1971 and a new school was opened in 1975.

Administrator, S. G. Trees, M.V.O., O.B.E.
Chaplain, Rev. E. Buxton.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937, but has been abandoned.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{3}{4}$ mile wide, and rises in two peaks, 960 and 1,105 ft. above sea-level respectively. The smaller islands, Stoltenhof and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

SOLOMON ISLANDS

Governor, His Excellency Colin Hamilton Allan, C.M.G., O.B.E. (1976). (+ *allice*. \$A5,000) \$A12,850
Chief Justice, R. Davis, O.B.E. \$A6,590*
Deputy Governor, A. J. Clark, C.B.E., M.V.O.

Attorney General, P. J. Keenan. \$A7,010*
Financial Adviser, R. J. Wallace, O.B.E. \$A6,505*

*Certain allowances are paid in addition under the Overseas Aid Scheme.

The Protectorate (officially called the Solomon Islands since June 1975), established in 1893, includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Isabel, the Shortlands Group, Vella Lavella, Kolombangara, Ranongga, Gizo, the New Georgia Group, the Florida Group, Guadalcanal, the Russell Islands, Malaita and San Cristobal, and the outlying islands of Beliona, Rennell, Santa Cruz, Vanikolo, Tikopia, Swallow (or Reef Islands) and Duff Groups, the Stewart Islands and the Ontong Java Atoll.

The Solomons are situated between 5-13° S. lat. and 155-170° 20' E. long. They have a total land area of about 11,500 sq. miles. Distribution of population at the Census of 1970 was: Melanesian 149,667; Polynesian 6,399; Micronesian 2,362; European 1,280; Chinese 577; Others 713. Total 160,998.

CAPITAL, Honiara (population 14,993).

FINANCE AND TRADE

Estimated revenue (1976), \$A18,420,000 (incl. British Development Aid \$A5,750,000 and grant in aid of recurrent expenditure from the United Kingdom \$A1,600,000).

The main imports are foodstuffs, consumer goods, machinery and building materials. Principal exports are copra, timber, fish. Other exports include cocoa, marine shells, tobacco and scrap metal.

GOVERNMENT

The British Solomon Islands Order 1974 came into effect in August 1974, thereby revoking the 1970 Order. The new constitution was drafted in accordance with the recommendations of a special select committee on constitutional development appointed by the former governing council, and established a new office of Governor of the Protectorate (replacing the High Commissioner so far as the Solomon Islands was concerned) and redesignating the Governing Council as the Legislative Assembly, with no increase in membership.

The first Chief Minister was elected from the Legislative Assembly and he in turn chose his Council of Ministers, the equivalent of the Cabinet. The British Solomon Islands (Amendment) Order 1975 increased the number of Ministers from six to eight, and replaced the Financial Secretary by an elected Minister of Finance. The Council of Ministers also includes two *ex officio* members (the Deputy Governor and the Attorney General).

Under the Solomon Islands (Amendment) Order 1975, the territory received a major measure of internal self government on January 2, 1976. The Chief Minister became the President of the Council of Ministers in place of the Governor, who is bound under the amended constitution to act in accordance with the advice of the Council. Responsibility for defence, external affairs, internal security and the public service remains however with the Governor.

A general election was held in June 1976 and returned 38 members of the Legislative Assembly, the Legislative having been increased from 24 seats under the Solomon Islands (Amendment) Order 1976. The new Government will negotiate the Independence constitution at a constitutional conference to be held with the British Government before Independence, scheduled for 1977.

JUDICIARY

The High Court of the Solomon Islands constituted by the Solomon Islands Court Order, consists of a Chief Justice and such number of Puisne Judges as may be prescribed by the Governor.

The Court is a Superior Court of Record and possesses all the jurisdiction which is vested in Her Majesty's High Court of Justice in England.

EDUCATION

In consequence of the withdrawal of some of the Churches from primary education, a new primary and secondary structure, with a national teaching service, is now being set up. Government participation in technical and teacher training and further education overseas continues.

COMMUNICATIONS

An internal air service, Solair, serves 19 airstrips, but the bulk of the inter-island traffic is by small ships. There are two air connections weekly each to Brisbane, Papua New Guinea, Fiji and Nauru. There are 283 miles of main roads in the country of which 14 miles are in Honiara. Guadalcanal has some 73 miles of main road along the north coast, with a further 100 miles of feeder roads; Malaita has 98 miles of main roads around the north of the island; a coastal road is being built along the north coast of San Cristobal, of which some 34 miles has been completed. Except for timber roads, other islands only have short minor roads. All the main islands have transceivers (HF) to maintain communications with Honiara District Headquarters, and there is a VHF link between Honiara and Auki. There are telegraph and radio telephone links with the international networks via Fiji and Australia, and there are overseas airmail services on four days a week.

TUVALU

Tuvalu, formerly the Ellice Islands, formed part of the Gilbert and Ellice Islands Colony until October 1, 1975.

On the recommendation of a Commissioner appointed by Her Majesty's Government to consider requests by the Ellice leaders to have their island group separated from the Gilberts, a referendum was held in the autumn of 1974. This showed an overwhelming support for separation, which was formally implemented on October 1, 1975. The Ellice Islands then became a separate Colony known as Tuvalu. The remainder of the former Gilbert and Ellice Island Colony became known as the Gilbert Islands. Separation of the Administration took place on January 1, 1976.

Tuvalu comprises nine coral atolls situated in the South West Pacific around the point at which the International Date Line cuts the Equator. The total land area is only about 10 square miles. Few of the atolls are more than 12 feet above sea level or more than half a mile in width. The vegetation consists mainly of coconut palms. The total population, based on a census in 1973, is approximately 10,000, of whom about 1,500 work in the phosphate industry in Nauru or serve in overseas ships. The entire population is Christian and is predominantly Protestant. Most people still practice a subsistence economy, the main staples of their diet being coconuts and fish.

Tuvalu came into being at the same level of constitutional development as that reached in the former joint Colony. The constitution provides for a Chief Minister and two other Ministers. The Queen's representative, who is responsible direct to the Secretary of State in London, is styled Her Majesty's Commissioner. He is chairman of the Cabinet which consists of the three Ministers and two *ex officio* members—the Attorney-General and Financial Secretary. The House of Assembly has eight elected members and the two *ex officio* members. Local Government services are provided by elected Island Councils.

The unit of currency is the Australian dollar. The main imports are foodstuffs, consumer goods and building materials.

The only export is a small amount of copra.

The capital, Funafuti, has a grass strip airfield from which a twice fortnightly service operates. There is no internal air service.

There are eight primary schools in Tuvalu and a church secondary school run jointly with the Government. The total of enrolled children of school age in 1975 was 1,728. There are no training institutes of any kind in the territory.

There is a new 31-bed hospital at Funafuti. All islands (except one which has no permanent population) are served by a dispensary.

CAPITAL.—Funafuti. Estimated population 1,000. H. M. Commissioner, His Excellency Thomas H. Layng.

VIRGIN ISLANDS,
see BRITISH

THE WEST INDIES

The West Indies are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 56° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which is now independent.

III. LESSER ANTILLES, which are variously divided; the British islands in the Lesser Antilles are the Leeward and Windward Islands. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are Independent, 12,300 British, 3,800 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

The West India Islands which lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds which in this area generally blow from the east.

COMMISSION FOR THE EASTERN CARIBBEAN GOVERNMENTS

10 Haymarket, S.W.1

Commissioner, Dr. Claudius C. Thomas.

The British West Indies were governed under a series of federal arrangements, the last of which, a federation of the Leeward and Windward Islands with Barbados, was abandoned in 1966. The islands of Antigua, Dominica, Grenada, St. Kitts-Nevis-Anguilla and St. Lucia became States in association with Britain in February and March 1967. St. Vincent became an Associated State in October, 1969. Grenada became independent on Feb. 7, 1974. Britain's power and responsibilities are limited to defence and external affairs.

West Indies Associated States

The Associated States are described individually in the following sections. The Office of the British Government Representative is at George Gordon Building (P.O. Box 227), Castries, St. Lucia.

British Government Representative, E. G. Le Tocq, C.M.G.

Deputy do., C. G. Mortlock.

Development Adviser, Sir Bruce Greatbach, K.C.V.O., C.M.G., M.B.E. (Resident at Bridgetown, Barbados).

Supreme Court

Established by Order in Council (1967), which gives the Court additional jurisdiction in Montserrat and the British Virgin Islands. There are two constituents, a Court of Appeal and a High Court. The Chief Justice is appointed by Her Majesty and puisne judges by the Judicial and Legal Services Commission. Expenses of the Supreme Court, after allowing for contributions from Montserrat and the Virgin Islands, are met by the States in equal shares.

Chief Justice, Sir Maurice Davis, O.B.E., Q.C.

Justices of Appeal, E. L. St. Bernard; N. Peterkin (acting).

Puisne Judges, N. A. Berridge (St. Vincent); E. A. Bishop (Antigua); W. A. Bruno (Dominica); E. F. Glasgow (St. Kitts-Nevis); C. E. Hewlett (Montserrat and British Virgin Islands); R. A. Nedd (Grenada); J. D. B. Renwick (St. Lucia).

ANTIGUA

Antigua lies in 17° 6' N. lat. and 61° 45' W. long., and is nearly 108 square miles in area with a coastline of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. Population in 1970 totalled 65,000. Antigua is much less hilly and wooded than the other Leeward Islands. Exports include petroleum products refined in the island. Cotton and rum are also exported. Tourism is the most important industry, with a good choice of resort hotels mostly built to take advantage of the many fine white sand beaches. There are frequent air services to Canada, U.S.A. and the United Kingdom.

FLAG.—Inverted triangle (centred on a red field) divided horizontally into three bands of black over

blue over white; rising sun device in gold on black band.

Finance and Trade

	1973

Expenditure (recurrent).....	23,718,000	
Total imports.....	94,504,000	
Governor, Sir Wilfred Ebenezer Jacobs, O.B.E., Q.C.		
(1967) (plus £1,000 allee. and house).....	\$22,300	

Trade with U.K.

	1973	1974*
Imports from U.K....	£4,215,000	£6,303,000
Exports to U.K.....	135,000	2,532,000
* Including British Virgin Islands.		

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 42' W. Area, 62 square miles. Population, 1,000. The island is flat and mostly stony, producing cotton, corn and ground-nuts. Wild deer are found, and there is good tarpon and other fishing.

Redonda is uninhabited.

CAPITAL Ψ St. John's. Population 22,000.

THE CAYMAN ISLANDS

The Cayman Islands, between 70° 44' and 81° 26' W. and 19° 15' and 19° 46' N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (Census, 1970), 10,652. The constitution provides for a Governor, Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Governor, not fewer than two nor more than three official members and 12 elected members. The Executive Council consists of the Governor and three official members appointed by the Governor, and four elected members, chosen by the elected members of the Assembly from among their own number. The normal life of the Assembly is four years. Supervisory powers over the government of the Islands exercised by the Government of Jamaica came to an end in August, 1962.

The principal town is Ψ George Town, in Grand Cayman, population (1970 census) 3,000.

FINANCE

MONTserrat

Situated in 16° 45' N. lat. and 61° 15' W. long., 27 miles S.W. of Antigua, the island is about 11 miles long and 7 wide, with an area of 39 square miles; population (1972), 12,905. Discovered by Columbus in 1493, it was settled by Irishmen in 1632, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains two active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest capable of cultivation. The chief exports are sea island cotton, tomatoes and other fruits and vegetables. Real estate development and tourism have done much to aid the island's economy. Revenue (1974) EC\$6,307,000; Expenditure EC\$7,275,000.

Cabinet government was introduced in Montserrat in 1960. The Executive Council is composed of 4 elected members (the Chief and 3 other Ministers) and two official members (the Attorney-General and the Financial Secretary). The 4 Ministers are appointed from the members of the political party holding the majority in the Legislative Council. The present composition of the Legislative Council consists of the President (the Governor), two official members, one nominated unofficial member and 7 elected members. Governor (vacant).

EXECUTIVE COUNCIL

Chairman, The Governor.

Chief Minister and Minister of Finance, Hon. P. A. Bramble.

Minister of Education, Health and Welfare, Hon. Mrs. M. R. Tuitt.

Agriculture, Trade, Lands and Housing, Hon. W. H. Ryan.

Communications and Works, Hon. E. A. Dyer.

Attorney-General, Hon. J. S. Weekes.

Financial Secretary, Hon. J. O. Whitaker.

Secretary to the Executive Council, K. A. Cassell.

CHIEF TOWN.— Ψ Plymouth (1,300).

ST. KITTS-NEVIS-ANGUILLA

Governor, His Excellency Sir Probyn Ellsworth Inniss, M.B.E. (1975).

The State of St. Kitts-Nevis-Anguilla is located at the northern end of the Eastern Caribbean. It comprises the islands of St. Kitts (65 sq. miles, population about 35,000), Nevis (36 sq. miles, 13,000), and Anguilla (35 sq. miles, 6,200).

St. Kitts, lat. $17^{\circ} 18' N$. and long. $62^{\circ} 48' W$. was the first island in the British West Indies to be colonised (1623). Its economy has been based on sugar for over three centuries. Tourism and light industry is being developed. The central area of the island is forest-clad and mountainous, rising to the 3,792 ft. Mount Misery. The capital, Basseterre, is a port of registry. Golden Rock airport can take large jet aircraft.

Nevis, lat. $17^{\circ} 10' N$. and long. $62^{\circ} 35' W$. is separated from the southern tip of St. Kitts by a strait two miles wide. The sea ferry route from Basseterre, St. Kitts to Charlestown, Nevis is 11 miles. Newcastle airstrip can take small aircraft, e.g. Islanders: no night landing facilities are available. The economy of Nevis centres on small peasant farmers. The island is dominated by the central Nevis Peak, 3,232 ft. The chief town, Ψ Charlestown, is a port of entry.

The Territory of St. Kitts-Nevis-Anguilla became a State in Association with Britain on Feb. 27, 1967. The State became responsible for internal affairs, while Britain became responsible for defence and external affairs. Her Majesty the Queen is represented by a Governor, appointed by her. There is a Cabinet Government with a Ministerial system.

CAPITAL: Basseterre (St. Kitts), population about 17,000. FLAG: Tricolor of green (next staff), yellow and blue vertical stripes; palm tree device on yellow stripe.

ANGUILLA

Anguilla is a flat coralline island about 70 miles N.W. of St. Kitts. The island is rather less than 16 miles in length, $3\frac{1}{2}$ miles in breadth at its widest point and its area is about 35 sq. miles. The population is 6,500 (1974). Salt and lobster are the principal products.

The island is covered with low scrub and fringed with some of the finest white coral-sand beaches in the Caribbean. The climate is pleasant and healthy

with temperatures in the range of $75-85^{\circ}F$. throughout the year.

Three months after the Associated State of Saint Christopher (St. Kitts)-Nevis-Anguilla came into being in 1967 the Anguillans repudiated government from St. Kitts. In 1971 the Anguilla Bill and Anguilla (Administration) Order were enacted, which provide for the administration of Anguilla by a Commissioner who is appointed by Her Majesty The Queen.

H.M. Commissioner for Anguilla, D. F. B. Le Breton (1974).

TURKS AND CAICOS ISLANDS

The Turks and Caicos Islands are situated between $21^{\circ}-72^{\circ}-30'$ West, about 100 miles north of Haiti and 50 miles West of the Bahamas of which they are geographically an extension.

There are over 30 islands of which eight are inhabited covering an estimated area of 192 square miles. The principal is Grand Turk. The 1970 Census of population showed a total population of 5,675 (Grand Turk 2,500). The most important industry is fishing but tourism is of increasing importance with over 8,000 visitors in 1975.

The islands lie in the Trade Wind but with an excellent climate. The average temperature varies from $75^{\circ}-80^{\circ}F$. in the Winter and $85^{\circ}F$.- $90^{\circ}F$. in the summer and humidity is generally low. Average rainfall is 21 inches per annum. Hurricanes are rare, the last occurring in 1960.

The principal airports are on the islands of Grand Turk, South Caicos and Providenciales. There are direct shipping services to the U.S.A. (Miami). There is a twice weekly air service between Miami, Florida and Grand Turk and a weekly air service between Nassau, Bahamas and South Caicos. An internal air service provides a twice daily service between the principal islands. A comprehensive telephone and telex service is provided by Cable and Wireless (W.I.) Ltd.

FINANCE

	1974	1975
Revenue.....	\$3,022,536	\$3,378,000
Expenditure.....	\$3,534,870	3,692,000

TRADE

	1973	1974
Imports.....	\$3,625,404	\$3,989,217
Exports.....	504,867	511,681

A new Constitution was agreed for introduction in 1976, providing for an Executive Council and Legislative Council, and for the appointment of a Chief Minister and three other Ministers from elected members of the Legislative.

Governor, His Excellency A. C. Watson.

The Windward Islands

The Windward Islands consist of Grenada, now independent, and the three Associated States of St. Vincent, St. Lucia and Dominica with their dependencies. Since March 1967, with the attainment of Associated Statehood, there has been a Governor in St. Lucia and Dominica and in St. Vincent since October, 1969. Each island has its own elected Parliament and a Premier. St. Vincent, St. Lucia and Dominica operate under single-chamber Parliaments, known in each case as the House of Assembly. The ministerial form of government was introduced in 1956. Grenada became independent in 1974.

ST. LUCIA

St. Lucia, the second largest and the most picturesque of the Windward group, situated in $13^{\circ} 54' N$. lat. and $60^{\circ} 50' W$. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St.

Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with an estimated population (1974) of 110,780. About 56,000 acres are devoted to agriculture. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are bananas, copra, coconuts, cocoa, edible oil. Over 31,600 tons of bananas, valued at \$17,539,000, were exported to the U.K. in 1975. The chief imports are flour, machinery, cotton piece goods, building materials and fertilisers.

CAPITAL.— Ψ Castries (estimated population, 47,000) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. **FLAG.**—Blue, bearing in centre a device of yellow over black over white triangles having a common base.

Government

There is a Cabinet of Ministers presided over by the premier and consisting of five other Ministers and the Attorney-General. There is a Legislature which consists of Her Majesty and a House of Assembly, of which the normal life is five years. The House of Assembly consists of a Speaker who may be elected from within or without the House, 17 elected and three nominated members and the Attorney General. The Constitution provides for a political Attorney-General if the Legislature or the Premier so decides.

Governor, Sir Allen Montgomery Lewis, Q.C.
Premier, J. G. M. Compton.

ST. VINCENT

St. Vincent achieved Associated Statehood with the United Kingdom on October 27, 1969. The territory of the State of St. Vincent includes certain of the Grenadines, a group of islands set across the Caribbean sea, stretching 40 miles south, some of the larger of which are Bequia, Canouan, Mayreau, Mustique, Union Island, Petit St. Vincent and Isle-a-Quatre. The territory extends 150 square miles (96,000 acres).

The main island, St. Vincent, is situated between 13° 6' and 14° 35' N. Latitude and 61° 6' and 61° 20' W. Longitude approximately 21 miles South West of St. Lucia and 100 miles West of Barbados. The island is 18 miles long and 100 miles wide at its extremities comprising an area of 133 square miles and an estimated population of 90,000 (1970). St. Vincent was discovered by Christopher Columbus in 1498. It was granted by Charles I to the Earl of Carlisle in 1627 and after subsequent grants and a series of occupations alternately by the French and English, it was finally restored to Britain in 1783. The capital and principal port is Ψ Kingstown, population approximately 23,000.

The economy is based mainly on agriculture but the tourist industry has been rapidly expanding, bringing approximately \$5,500,000 to the State in 1972. The main products are bananas, arrowroot, coconuts, cocoa, spices, and various kinds of food crops. The main imports are foodstuffs (meat, rice, sugar, flour, butter and pickled and salted fish), textiles, lumber, cement and other building materials, fertilizers and motor vehicles.

The territory's education system provides a general primary and secondary education. Primary education is free but not compulsory. In 1972 there were 61 primary schools with a total enrolment of 27,609; and 16 secondary schools with a total enrolment of 4,015.

Government.—As an Associated State St. Vincent has a constitution under which there is a Governor who is Her Majesty's Representative. Except where otherwise provided, the Governor is required to act in accordance with the advice of the Cabinet. Statehood allows St. Vincent the full self-governing control of its internal affairs including the right to amend its own constitution and the power to end the Association and declare itself independent. The United Kingdom Government accepts the responsibility for the State's external affairs and defence.

Governor, His Excellency Sir Rupert Godfrey John.
Chief Minister, Hon. R. M. Cato.

The House of Assembly consists of 13 elected members, three nominated members and the Attorney-General. It is presided over by a Speaker elected by the House from within or without it.

DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 1, 1940. It is situated between 15° 20' and 15° 45' N. lat. and 61° 13' and 61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad comprising an area of 290 sq. miles, of which about 41,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°F. The climate is healthy, and during the winter months is very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra, ground provisions, grapefruits, coconut oil and washing soap. Population (estimated, 1974, 74,000). The principal towns are Ψ Roseau, on the south-west coast population, 10,157 and Portsmouth, population, 2,379.

Education.—There are 57 elementary schools providing primary and post-primary education, with a total enrolment of 20,821 pupils and seven secondary (grammar) schools, including one for boys and two for girls, with a total enrolment of 2,269 pupils. The other secondary schools are co-educational. Primary education is free. There are 63 pre-schools in Dominica for the 3 to 5 year age group. There are also two post-secondary institutions and a Nursing School.

Finance and Trade

	1972	1973
Revenue (incl. Grants)	\$19,140,895	\$12,611,000
Expenditure (do.) . . .	19,670,419	19,267,000

Government

On March 1, 1967, Dominica became an Associated State of the United Kingdom. The Queen's Representative was redesignated the Governor.

The House of Assembly now comprises 21 elected and 3 nominated members, one nominated on the advice of the Leader of the Opposition. The Cabinet (Executive) presided over by the Premier, consists of 7 other Government Ministers and the Attorney-General (Official Member). The Premier is appointed by the Governor from the elected members of the House of Assembly. The other Ministers are appointed by the Governor on the advice of the Premier. The Speaker is elected from among the members of the House or from outside.

Governor, His Excellency Sir Louis Cools-Lartigue,
O.B.E. (1967).

Premier, Hon. Patrick John.

H.M. COASTGUARD

The eleven Divisions of Her Majesty's Coastguard are administered by the Department of Trade, and co-ordinate search and rescue (SAR) operations around the 2,500-mile coastline of Great Britain and Northern Ireland. Approximately 600 regular and 8,000 Auxiliary Coastguard initiate and co-ordinate all SAR measures for vessels or persons in need of assistance; between January 1 and December 31, 1975 they took part in 5,850 incidents and were responsible for the rescue of 7,363 persons.

Each Coastguard Division has three or four Districts within its boundaries, and each District comprises a number of Stations and Lookouts, of which there are four types. Constant Watch stations are manned at all times and keep a 24-hour watch. Day Watch Stations are manned by three or four Coastguards each keeping a four-hour watch in daylight, additional watch being kept in times of casualty risk (strong winds or poor visibility). Auxiliary Lookouts and Auxiliary Rescue Stations are manned by Auxiliaries as and when the need arises. All are comprehensively equipped for rescue work.

From these stations, frequently located on bleak

cliff-tops and headlands, the Coastguard are on the alert for oil slicks, shipping hazards, and vessels or people in distress. At the first sign of trouble, using their own modern telecommunications equipment and the extensive facilities provided by the Post Office Coast Radio Stations, they are in position to alert the most appropriate rescue facilities: the lifeboats of the Royal National Lifeboat Institution, Coastguard rescue companies, ships in the vicinity, Navy or RAF helicopters, fixed-wing aircraft, or Naval Vessels.

For those who regularly sail in local waters, or make longer passages, the Coastguard CG66 Boat Safety Scheme provides an invaluable service free. Its aim is to give the Coastguard a record of the movements of craft, information invaluable in an emergency. The scheme consists of cards CG66A and CG66B—"A" for the local sailor and "B" for longer voyages. Cards are available from all Coastguard Stations, Harbourmaster's Offices, and most yacht clubs and marinas.

From St. Margaret's Bay, Kent, Coastguards keep a constant watch on shipping traffic in the Dover

Strait, providing a Channel Navigation Information Service for all shipping in one of the busiest sea-lanes in the world.

Vital warning of impending bad weather is given to local shipping through the gale warning service. Most Coastguard stations hoist cones on their flag-masts, the direction of the gale being indicated by the positions of the cone; point upwards indicating a gale from the northern half of the compass, point downwards indicating a gale from the southern half.

Founded in 1822 to guard our coasts against smuggling, the Coastguard's role today is a very different one—that of complete dedication to the guarding and saving of all life at sea. Members of the public who see an accident or a potentially dangerous incident on or around the coast should without hesitation dial "999" and ask for the Coastguard. They will be connected to the nearest Coastguard Rescue Centre.

THE ZODIAC

The Zodiac is an imaginary belt in the heavens within which lie the apparent paths of the Sun, Moon and major planets. It is bounded by two parallels generally taken as lying 8° on either side of the ecliptic or path of the Sun in its annual course. The Zodiac is divided into twelve equal parts of 30° called Signs, which are not used by astronomers, but have some import in astrology, for which the division of the Zodiac was probably made originally. The Signs of the Zodiac take their names from certain of the constellations with which they once coincided. They are assumed to begin at the vernal equinox or intersection of the plane of the ecliptic with that of the equator. This point is still called the First Point of Aries, although the Sign of Aries now lies in the constellation of Pisces,

some 30° to the west. This retrograding of the equinox by about $50''$ a year is due to precession; the signs no longer coincide with the constellation; whose names they bear.

A catalogue has been made (Grimaldi, 1905) of all, so far as is known, sculptured or incised representations on ancient monuments or tablets of the traditional constellation figures, either Zodiacal or otherwise, together with many modern pictures of the Zodiac. The first in the list is a roughly shaped upright, black stone about $2\frac{1}{2}$ feet high and $1\frac{1}{2}$ feet broad in the Babylonian room of the British Museum on the front of which are lightly incised ten out of the twelve Signs and other constellation figures. This was found near Baghdad and its date is estimated to be about 1187-1175 B.C.

Ireland

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between $51^{\circ} 26'$ and $55^{\circ} 21'$ N. latitude and from $5^{\circ} 25'$ to $10^{\circ} 30'$ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annaghead), is 174 miles. On the N. coast of Achill Island (Co. Mayo) are the highest cliffs in the British Isles, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Sieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of Allen, Boders, Forbes, Ree and Derg, and the Erne Chain of Gowna, Oughter, Lower Erne, and Erne; Melvin, Gill, Gara and Conn in the north-west; and Corrib and Mask (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -17° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appears to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laigins-tir, Mumans-tir and Kunna-k-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill

king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Rualdhri O'Connor (the high king of Ireland), and visited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII, Sir Edward Poyning, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poyning's Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

Republic of Ireland

Area and Population.—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Laoighis, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the Census held on April 18, 1971, was 2,978,248 (males, 1,495,760; females 1,482,488), a density of 112 persons per sq. mile (Census, 1966, 2,884,002). Provisional figures showed 69,508 births, 21,103 marriages and 33,532 deaths in the year 1975.

THE PRESIDENT

Uachtarán-na-hÉireann (President), Cearbhall Ó Dálaigh (Carroll Daly), born 1911, assumed office, Dec. 19, 1974.

A new Irish Government took office on March 14, 1973. Following the victory of the National Coalition of the Fine Gael and Labour in the general election held on February 28, the leader of Fine Gael, Mr. Liam Cosgrave, was elected *Taoiseach* (Prime Minister) when the new *Dáil* (Lower House of Parliament) met for the first time on March 14. Later that evening, following his formal appointment by the President, Mr. de Valera, the new *Taoiseach*, Mr. Cosgrave, announced his Cabinet to the *Dáil*.

MEMBERS OF THE GOVERNMENT

Taoiseach, Liam Mac Cosgair (Liam Cosgrave).
Tánaiste and Minister for Health and Minister for Social Welfare, Brendan Mac Fheórais (Brendan Corish).
Minister for Defence, Pádraig S. Ó Donnagáin (Patrick S. Donegan).
Minister for Local Government, Seamus Ó Táithligh (James Tully).
Finance and the Public Service, Risteárd Ó Rlain (Richie Ryan).
Agriculture and Fisheries, Marcus Mac Giolla fhionntáin (Mark Clinton).
Labour, Micheál Ó Laoire (Michael Ó'Leary).
Minister for the Gaeltacht, Tomás Ó Domhnaill (Tom O'Donnell).
Lands, Tomás Mac Giolla Phádraigh (Tom Fitzpatrick).
Foreign Affairs, Gearóid Mac Gearailt (Garret Fitzgerald).
Posts and Telegraphs, Conchubhar Crús O Brian (Conor Cruise-O'Brien).
Transport and Power, Peadur de Barra (Peter Barry).
Industry and Commerce, Saorbhreathach Céitinn (Justin Keating).
Education, Risteárd de Búrca (Dick Burke).
Justice, Pádraigh Ó Cuana (Patrick M. Cooney).

Parliamentary Secretaries

Parliamentary Secretary to the Taoiseach and to the Minister for Foreign Affairs, Seán Ó Ceallaigh (John Kelly).
Do. to the Minister for Agriculture and Fisheries, Micheál Pádraigh Ó Murchadha (Michael Pat Murphy).
Do. to the Minister for Health, Risteárd de Barra (Richard Barry).
Do. to the Minister for Finance, hAnraoi Ó Cionaith (Henry Kenny).
Do. to the Minister for Social Welfare, Proinsias Mac Bhloscaidh (Frank Cluskey).
Do. to the Minister for Finance, and to the Minister for Defence, Micheál Ó Beaglaoi (Michael Begley).
Do. to the Minister for Education and to the Minister for Industry and Commerce, John Bruton.
Do. to the Minister for Local Government, Ochbheah Ó Flannagáin (Oliver J. Flanagan).
Attorney-General, Declan Costello.
Secretary to the Government, Dónal Ó Súilleabháin (Daniel O'Sullivan).
Assistant Secretary to the Government, H. S. Ó. Dubha (H. J. Dowd).

Irish Embassy

17 Grosvenor Place, S.W.1

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Donal O'Sullivan.

British Embassy

33 Merrion Road, Dublin 4

Ambassador Extraordinary and Plenipotentiary, His Excellency Walter Robert Haydon, C.M.G. (1976)

£15,000

Counsellor, J. K. Hickman.

First Secretaries, P. J. Goulden (Head of Chancery); R. W. James (Agriculture).

GOVERNMENT

The Constitution.—The constitution approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the reintegration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves *Dáil Éireann* on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The National Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

Dáil Éireann is composed of 144 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the *Taoiseach* and 49 are elected; three by the National University of

Ireland three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

Members of Dáil Éireann are paid an allowance of £5,403 per annum (and members of Seanad Éireann £3,087); are allowed free travelling facilities between Dublin and their constituencies and are, subject to certain restrictions granted free telephone and postal facilities from Leinster House and allowances for overnight stays in Dublin.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dáil Éireann. The Taoiseach appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the *Tánaiste* and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann has 144 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 18 years and are not disqualified by law have the right to vote. Each Dáil may continue for a period not exceeding five years from the date of election.

The result of the general election on Feb. 28, 1973 was as follows: *Fine Gael and Labour Coalition*, 73; *Fianna Fáil*, 69; *Independent*, 2. Total membership including the *Ceann Comhairle* (Chairman), 144.

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include a High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, with such exceptions and subject to such regulations as may be prescribed by law. No law may, however, be enacted excepting from the appellate jurisdiction of the Supreme Court the question of the validity of any law, having regard to the provisions of the Constitution.

Chief Justice. Hon. Thomas F. O'Higgins £16,391
President of the High Court. Hon. Thomas A. Finlay..... 14,211
Judges, Supreme Court. Hon. Brian Walsh;
Hon. Seamus Henchy; Hon. Francis Griffin; Hon. Seán Kenny; Hon. Weldon R. C. Parke..... 13,847

Judges, High Court. Hon. George Murnaghan; Hon. Seán Butler; Hon. John M. Gannon; Hon. Liam Hamilton; Hon. Thomas A. Doyle; Hon. James McMahon; Hon. Herbert R. McWilliam; Hon. John J. Durkan.....each 12,029

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. To aid and counsel the Minister for Defence there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 15,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending Dec. 31, 1976, provide for approximately 22,800 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force or three years in the Permanent Defence Force and nine years in the Reserve Defence Force. For the Naval Service, enlistment is for four years in the Permanent Defence Force or six years in the Permanent Defence Force and six years in the Reserve Defence Force. There are at present six Brigades in the Army. Each comprises three infantry Battalions and a squadron or company from each Corps (except Ordnance and Air). The Naval Service has three coastal minesweepers and a patrol vessel. The equipment of Air Corps includes Chipmunk, Provost, Dove and Cessna aircraft, Fouga Magister CM170 jet trainers and Alouette helicopters. The Defence Estimates for the year ending Dec. 31, 1976 provide for an expenditure of £72,960,000.

FINANCE

	1975 (Actual)	1976 (Estimated)
Revenue.....	£1,071,230,000	£1,355,600,000
Expenditure...	1,349,994,000	1,682,600,000

In addition to the Expenditure figures shown above there were certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1975 amounted to £334,630,000, and for 1976 are estimated at £419,920,000.

The estimated Revenue for 1976 includes Customs Duties, £16,000,000; Excise Duties, £404,000,000; Estate etc. Duties, £70,000,000; Income Tax, £419,000,000; Corporation Profits Tax, £28,000,000; Motor Vehicle Duties, £37,500,000; Stamp Duties, £15,000,000; Post Office Services, £99,400,000; Value-added Tax, £212,500,000; Agricultural Levies, £3,000,000; Capital Taxes, £8,000,000. Total (including other items), £1,355,600,000.

The principal items of estimated current Expenditure for 1976 are Debt Service, £355,200,000; Agriculture, £118,200,000; Defence, £72,900,000; Police and Justice, £64,100,000; Education, £228,600,000; Social Welfare, £246,600,000; Health Services, £242,500,000; Transport, £60,500,000; Post Office, £78,400,000; Superannuation, £47,500,000; Industry, £51,600,000. Total (including other items), £1,682,600,000.

The Gross Debt on December 31, 1975 was £2,051,000,000 with capital assets of £1,076,000,000 at that date.

EDUCATION

Primary education is directed by the State, with the exception of approximately 120 private primary schools with an enrolment of about 23,000 in 1974-75.

There were 3,632 State-aided primary schools with an enrolment of 520,000 in 1974-75.

In 1974-75 there were 541 recognized secondary schools with 173,118 pupils under private management (mainly religious orders). Also, 63,772 full-time pupils (and approximately as many part-time pupils) received secondary education in 250 permanent secondary vocational schools (and a number of temporary centres), and 3 of the 8 Regional Technical Colleges—all these schools and colleges are controlled by some 38 statutory local Vocational Education Committees. There were 14 State comprehensive schools in 1974-75 with a total enrolment of 6,707 students, and 16 community schools with an enrolment of 6,818 students. There were also other miscellaneous second-level schools and the total full-time enrolment at second-level for 1974-75 was 256,652.

Third-level education is catered for by five University Colleges, a National Institute for Higher Education, and also by third-level courses offered by the Technical Colleges and Regional Technical Colleges and other miscellaneous third-level institutions. There were 30,989 full-time third-level students in 1974-75, of whom 20,711 were attending university courses.

The estimated State expenditure on education in the period Jan. 1, 1976 to Dec. 31, 1976, excluding administration and inspection, is Primary £104,631,000; Secondary £112,085,000. The vote for Universities and third-level Colleges amounted to £27,623,000, while, in addition, grants of £3,674,984 were provided in respect of the facilities of General Agriculture, Veterinary Medicine and Dairy Science.

PRODUCTION AND INDUSTRY

Agriculture and Livestock.—In 1974 there were 860,400 acres under corn crops, 275,500 under root and green crops, 8,900 under fruit and 2,510,600 under hay, a total of 3,692,500 acres. The principal produce in 1974 was: oats, 154,000 tons; wheat, 241,000 tons; barley, 1,021,000 tons; turnips, 1,252,000 tons; potatoes, 1,096,000 tons; sugar beet, 1,911,000 tons; and hay, 3,726,000 tons. The livestock included, 7,216,500 cattle, 4,059,700 sheep, 922,600 pigs and 98,100 horses and ponies.

Minerals.—300 persons were employed in the coal mines in 1975 and 46,000 tons of coal won.

Sea Fisheries.—6,352 persons were employed in the fisheries in 1975. Total value of all fish (excluding salmon) landed in 1975 was £9,137,625.

COMMUNICATIONS

Railways.—In the nine months ended Dec. 31, 1974, there were 1,360 miles of railway all of standard (5 ft. 3 in.) gauge; 12,376,000 passengers and 2,652,000 tons of merchandise were conveyed; the receipts were £14,100,000 and expenditure £23,465,916. These figures are in respect of railway working by *Coras Iompair Éireann*, the national transport undertaking which is now the only concern operating a rail service in the State.

Road Motor Services.—In 1975 road motor (omnibus) vehicles carried 278,617,791 passengers, the gross receipts being £26,602,187.

Shipping.—In 1975 the number of ships with cargo and in ballast in the foreign trade which arrived at Irish ports was 12,464 (21,758,457 net registered tons); of these 1,650 (2,675,217 net registered tons) were of Irish nationality.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1975 the airport handled 1,031,325 passengers, 52,939 tonnes of cargo and 1,496 tonnes of mail.

Dublin Airport, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline *Aer Lingus* and other airlines. During 1975 the airport handled 2,195,690 passengers, 42,709 tonnes of cargo and 2,419 tonnes of mail.

Cork Airport, 5 miles S. of Cork, serves the cross-channel and European services operated by *Aer Lingus* and other airlines. During 1975 the airport handled 255,627 passengers and 3,608 tonnes of cargo and 16 tonnes of mail.

There are 23 private aerodromes.

1975..	1,699,644,283	1,441,369,285	258,274,998

PRINCIPAL ARTICLES

Imports (1975)

The principal groups were: live animals, £14,071,282; food, drink and tobacco, £212,488,951; petroleum and petroleum products, £270,438,272; chemicals, £191,712,165; machinery (non-electric), £218,563,412; electrical machinery, £107,546,384; transport equipment, £93,096,165; metal and manufactures, £126,054,522; textiles and clothing, £158,931,863; paper, paperboard and manufactures, £49,793,122; professional, scientific, etc. goods, £26,029,672.

Exports (1975)

Principal live animals, £123,581,031; meat and meat preparations, £239,822,291; other food, drink, and tobacco, £310,587,525; machinery and transport equipment, £161,220,953; clothing, headgear and footwear, £57,506,331; textiles, £90,496,386; metal ores and scrap, £29,963,312; metals and manufactures, £42,403,271; non-metallic mineral manufactures, £27,912,300; chemicals, £108,125,299; professional, scientific, etc. goods, £35,370,703.

CAPITAL.—Dublin (*Baile Átha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1971, its population was 567,866.

Other cities and towns, with populations at the Census of 1971 are: Ψ Cork (128,645); Ψ Limerick (57,161); Ψ Dun Laoghaire (53,171); Ψ Waterford (31,968); Ψ Galway (27,726); Ψ Dundalk (21,672).

FLAG.—Equal vertical stripes of green, white and orange.

NATIONAL DAY.—March 17 (St. Patrick's Day).

The United States of America

Area and Population

Population.—The total resident population of the United States on April 1, 1976 was estimated at 214,374,000, excluding Armed Forces stationed abroad. Civilian resident population at the same date was estimated at 212,705,000. Including Armed Forces stationed abroad (April 1, 1976), 214,850,000.

Births based on 50 per cent. sample. *Provisional.

Note.—Figures tabulated are for the United States. Deaths exclude fetal deaths. Rates are based on the population as estimated on July 1 (1970, April 1).

IMMIGRATION AND NATURALIZATION

From 1820 to 1975, 47,098,919 immigrants were admitted to the United States. Of the 386,194 admitted during fiscal year 1975, 70 per cent. were born in the following countries: Mexico (62,205), the Philippines (31,751), Italy (11,552), Greece (9,984), Cuba (25,995), Jamaica (11,076), the United Kingdom (10,807), China and Taiwan (18,536), Canada (7,308), Portugal (11,845), the

Dominican Republic (14,066), India (15,773), Korea (28,362), Trinidad and Tobago (5,982) and Colombia (6,434). During 1975, 141,537 aliens residing permanently in the United States were naturalized, an increase of eight per cent. over 1974, and 27,731 persons acquired citizenship status at birth abroad, after birth by the naturalization of parents, through marriage, or by other reasons.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolution.

Year	Marriages	Per 1,000 Pop.‡	Estimated Divorces	Per 1,000 Pop.‡
1966	1,857,000	9.5	499,000	2.5

PHYSIOGRAPHY

The coterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude $25^{\circ} 07' - 49^{\circ} 23'$ North and longitude $66^{\circ} 57' - 124^{\circ} 44'$ West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of $71^{\circ} 23'$ N., at Point Barrow (2,502 miles from the U.S. geographic centre).

The general coastline of the 50 States has a length of about 2,069 miles on the Atlantic, 7,623 miles on the Pacific, 1,060 miles on the Arctic, and 1,631 miles on the Gulf of Mexico.

The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of 3,710 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, Roanoke and Savannah; of the latter, the Columbia-Snake, Sacramento, and Colorado. The Nueces, Brazos, Trinity, Pearl, Mobile-Tombigbee-Alabama, Apalachicola-Chatahoochee, Suwannee and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 647,300 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,234,600 are drained by the Mississippi-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tupil-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. The highest point is Mount McKinley (Alaska), 20,320 ft. above sea level and the lowest point of dry land is in Death Valley (Inyo, California), 282 ft. below sea-level.

THE PRESIDENTS OF THE UNITED STATES OF AMERICA

Name (with Native State)	Party	Born	Inaug.	Died	Age
1. GEORGE WASHINGTON, <i>Va.</i>	Fed.	1732, Feb. 22	1789	1799, Dec. 14	67
2. John Adams, <i>Mass.</i>	"	1735, Oct. 30	1797	1826, July 4	90
3. Thomas Jefferson, <i>Va.</i>	Rep.	1743, April 13	1801	1826, July 4	83
4. James Madison, <i>Va.</i>	"	1751, Mar. 16	1809	1836, June 28	85
5. James Monroe, <i>Va.</i>	"	1758, April 28	1817	1831, July 4	73
6. John Quincy Adams, <i>Mass.</i>	"	1767, July 11	1825	1848, Feb. 23	80
7. Andrew Jackson, <i>S.C.</i>	Dem.	1767, Mar. 15	1829	1845, June 8	78
8. Martin Van Buren, <i>N.Y.</i>	"	1782, Dec. 5	1837	1862, July 24	79
9. William Henry Harrison†, <i>Va.</i>	Whig.	1773, Feb. 9	1841	1841, April 4	68
10. John Tyler (a), <i>Va.</i>	"	1790, Mar. 29	1841	1862, Jan. 17	71
11. James Knox Polk, <i>N.C.</i>	Dem.	1795, Nov. 2	1845	1849, June 15	53
12. Zachary Taylor† <i>Va.</i>	Whig.	1784, Nov. 24	1849	1850, July 9	65
13. Millard Fillmore (a), <i>N.Y.</i>	"	1800, Jan. 7	1850	1874, Mar. 8	74
14. Franklin Pierce <i>N.H.</i>	Dem.	1804, Nov. 23	1853	1869, Oct. 8	64
15. James Buchanan, <i>Pa.</i>	"	1792, April 23	1857	1868, June 1	77
16. Abraham Lincoln†§, <i>Ky.</i>	Rep.	1809, Feb. 12	1861	1865, April 15	56
17. Andrew Johnson (a), <i>N.C.</i>	"	1808, Dec. 29	1865	1875, July 31	66
18. Ulysses Simpson Grant, <i>Ohio.</i>	"	1822, April 27	1869	1885, July 23	63
19. Rutherford Birchard Hayes, <i>Ohio.</i>	"	1822, Oct. 4	1877	1893, Jan. 17	70
20. James Abraham Garfield†§, <i>Ohio.</i>	"	1831, Nov. 19	1881	1881, Sept. 19	49
21. Chester Alan Arthur (a), <i>Vt.</i>	"	1830, Oct. 5	1881	1886, Nov. 18	56
22. Grover Cleveland, <i>N.J.</i>	Dem.	1837, Mar. 18	1893	1908, June 24	71
23. Benjamin Harrison, <i>Ohio.</i>	Rep.	1833, Aug. 20	1889	1901, Mar. 13	67

35. Lyndon B. Johnson (a), <i>Texas.</i>	"	1908, Aug. 27	1963	1973, Jan. 22	64
36. Richard M. Nixon, <i>California.</i>	Rep.	1913, Jan. 9	1969
37. Gerald R. Ford <i>Michigan.</i>	"	1913, July 14	1974

† Died in office.

§ Assassinated.

(a) Elected as Vice-President.

† Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of organized Territories. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternatively. July 4 (Independence Day) is observed as the National Day.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-sixth, Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951, March 29, 1961, Jan. 23, 1964, Feb. 10, 1967 and June 30, 1971), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election for one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the *first Monday after the second Wednesday in December* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *sixth day of January* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice-President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice-President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of \$200,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance not exceeding \$100,000. Under the XXIIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein. (2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials. (3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President is invoked. (4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress. (5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objection of the President.

President of the United States, GERALD RUDOLPH FORD, born July 14, 1913, Sworn in August 9, 1974. Republican.

Vice-President, Nelson A. Rockefeller, born July 8, 1908, sworn in Dec. 19, 1974.

THE CABINET (each \$60,000)

Secretary of State, Henry A. Kissinger, (born May 27, 1923), appointed Sept. 1973.

Secretary of the Treasury, William E. Simon (born 1927), appointed May 8, 1974.

Secretary of Defence, Donald H. Rumsfeld, appointment confirmed Nov. 18, 1975.

Attorney-General, Edward H. Levi (born 1911), appointment confirmed Feb. 5, 1975.

Secretary of the Interior, Thomas S. Klepper, appointment confirmed Oct. 9, 1975.

Secretary of Agriculture, Earl L. Butz (born 1909), appointed Nov. 11, 1971.

Secretary of Commerce, Elliot L. Richardson, appointment confirmed Dec. 11, 1975.

Secretary of Labour, William J. Usery, appointment confirmed Feb. 10, 1976.

Secretary of Health, Education and Welfare, F. David Mathews (born 1935), nominated June 27, 1975.

Secretary of Housing and Urban Development, Carla A. Hills (born 1934), appointment confirmed March 5, 1975.

Secretary of Transportation, William T. Coleman (born 1920), appointment confirmed March 3, 1975.

UNITED STATES EMBASSY

Grosvenor Square, W.1

[01-499 9000]

Ambassador Extraordinary and Plenipotentiary, Her

Excellency the Hon. Anne L. Armstrong (1976).

Deputy Chief of Mission, Hon. Ronald I. Spiers.

Minister for Economic and Commercial Affairs, Hon.

William K. Miller.

DEFENCE

Department of Defence

Secretary of Defence (in the Cabinet), Donald H. Rumsfeld.

Secretary of the Army, Martin R. Hoffman.

Secretary of the Navy, J. W. Middendorf II.

Secretary of the Air Force, Thomas C. Reed.

Chairman, Joint Chiefs of Staff, Gen. George S. Brown, U.S.A.F.

The Department of Defence includes the Secretary of Defence as its head, the Deputy Secretary of Defence, the Defence staff offices, the Joint Chiefs of Staff and the Joint Staff, the three military departments and the military services within those departments, the unified and specified commands, and other Department of Defence agencies as the Secretary of Defence establishes to meet specific requirements. The Defence staff offices and the Joint Chiefs of Staff, although separately organized function in full coordination and cooperation. They include the offices of the Director of Defence Research and Engineering, the nine Assistant Secretaries of Defence, the General Counsel of the

CAPITAL OF THE UNITED STATES

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 61 square miles, with a population at the Census of 1970 of 756,510.

The District of Columbia has hitherto been governed by a Commissioner and assistant and a 9-member City Council, all appointed by the President. From Nov. 5, 1974, this body has been replaced by an elected mayor and City Council.

The *City of Washington* is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The average number of persons represented by each Congressman is 1 for 469,088. The Senate consists of 100 members. The salary of a Senator is \$42,500 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 Representatives, a resident commissioner from Puerto Rico and a delegate from the District of Columbia, Guam and the Virgin Islands. The salary of a Representative is \$42,500 per annum, with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On Nov. 1, 1972, there were 139,642,000 persons of voting age, excluding members of the armed forces overseas.

THE NINETY-FOURTH CONGRESS

President of the Senate, Nelson A. Rockefeller (Vice-President of the United States).

Speaker of the House of Representatives, Carl Albert, Oklahoma.

Secretary of the Senate, Francis R. Valeo, District of Columbia.

Clerk of the House of Representatives, W. Pat Jennings, Va.

Members of the 94th Congress were elected on Nov. 5, 1974.

The 94th Congress is constituted as follows:

Senate.—Democrats 62; Republicans, 38; Total, 100. House of Representatives.—Democrats, 291; Republicans, 144. Total, 435.

Department of Defence and such other staff offices as the Secretary of Defence may establish. The Joint Chiefs of Staff, as a group, are directly responsible to the Secretary of Defence for the functions assigned to them. Each member of the Joint Chiefs of Staff, other than the Chairman, is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary and functions under the direction, authority and control of the Secretary of Defence.

The Department of Defence maintains and employs armed forces: (1) to support and defend the Constitution of the United States against all enemies, foreign and domestic; (2) to insure, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; (3) to uphold and advance the national policies and interest of the United States; and (4) to safeguard the internal security of the United States. All functions in the Department of Defence and its component agencies are performed under the direction, authority and control of the Secretary of Defence.

Commanders of unified and specified commands are responsible to the President and the Secretary of Defence for the accomplishment of military missions assigned to them.

Unified Defence Commands

Commanders-in-Chief

U.S. European Command, Brussels.—Gen. Alexander M. Haig, Jr. (U.S.A.) (concurrently N.A.T.O. Supreme Allied Commander).

U.S. Southern Command, Quarry Heights, Panama Canal Zone.—Lt.-Gen. Dennis P. McAuliffe (U.S.A.).

Atlantic, Norfolk, Virginia.—Adm. Isaac C. Kidd (U.S. Navy) (concurrently N.A.T.O. Supreme Allied Commander, Atlantic).

Pacific, Hawaii.—Adm. Maurice Weisner (U.S. Navy).

† *U.S. Naval Forces, Europe, London.*—Adm. David Baglay (U.S. Navy).

North American Air Defence Command, Colorado Springs.—Gen. Daniel James (U.S.A.F.).

* *Strategic Air Command, Omaha.*—Gen. Russell E. Dougherty (U.S.A.F.).

Alaskan Air Command, Anchorage, Alaska.—Lt.-Gen. James E. Hill (U.S.A.F.).

U.S. Readiness Command, MacDill, Florida.—Gen. John J. Hennessey (U.S. Army).

* A Specified Command.

† A subordinate component of U.S. European Command.

Army.—The Army of U.S. had a strength of 8,293,766 (including 2,310,436 Air Force) on V.E. Day, reduced by June 30, 1959, to 861,964 (excluding Air Force). The strength on March 31, 1976, was 771,301. Stationed in Germany were four divisions. There was one division in Korea. *Chief of Staff of the Army,* Gen. Fred C. Weyand.

Navy.—The peak strength of the Navy (including Marine Corps in 1945, was 3,855,497. The strength of the U.S. Navy in 1975, was 535,900. Strength of the Marine Corps, 196,000.

The U.S. Navy had in service in 1976, 478 active fleet ships, including 14 attack carriers, 26 cruisers, 69 destroyers, 64 frigates, 116 submarines (65 nuclear, 41 SSBN and 10 diesel), 61 amphibious, 3 mine warfare, 117 auxiliaries and 18 patrol craft, *Chief of Naval Operations,* Adm. James Holloway.

Air.—The United States Air Force was established as a separate organization on September 18, 1947. At April 30, 1976, there were 595,988 officers and airmen on active duty, with 231,377 civilian employees. Air Force Reserve and Air National Guard numbered 137,103 on May 31, 1976.

To deter aggression the Air Force has about 140 strategic bombers maintaining constant alert as well as 1,054 inter-continental ballistic missiles in hardened silos. In addition, the Air Force maintains the capability to carry out limited war and special warfare operations. In March, 1961, the Air Force was assigned primary responsibility for the Department of Defence space development programmes and projects. By June 13, 1976, the United States had placed a total of 3,901 space-craft into earth orbit or deep space. These included Air Force, Army and N.A.S.A. shots.

Chief of Staff of the U.S. Air Force, Gen. David C. Jones.

NATIONAL ORIGINS OF THE POPULATION

About 102,200,000 of the approximately 205 million persons in the United States reported on a sample survey conducted in March, 1972, that they were of one of eight specific origin categories. Approximately 25.5 million persons reported German origin; 29.5 million, English, Scottish or Welsh; 16.4 million Irish; 9.2 million, Spanish; 8.8 million, Italian; 5.1 million, Polish; and 2.2 million, Russian. About 11 million persons living in the United States at the time of an earlier survey of 1969 were foreign born, Germany, Italy, Mexico and the United Kingdom were the major contributing countries. Two-thirds of them reported English as the language usually spoken in their homes. They were 23 years older on the average than the native population.

Countries of birth of the foreign-born population (1969) were: Austria (236,000), Cuba (504,000), Germany (1,004,000), Ireland (277,000), Italy (1,353,000), Mexico (938,000), Poland (550,000), Russia (412,000), Sweden (166,000), United Kingdom (1,006,000); other countries, 4,434,000.

SOCIAL WELFARE EXPENDITURE

The total value of government expenditure on social welfare (federal, state and local government) in 1975 was \$286,547,000,000 compared with \$239,302,600,000 in 1974 and \$52,293,000,000 in 1960. In 1975 expenditure per person (of the total population of U.S.A.) was \$1,319—social insurance, \$567; education, \$361; public aid, \$187; health and medical services, \$77; veterans' welfare, \$76; other services, \$36 per person. Total expenditure by programmes was:

PUBLIC DEBT

On June 30, 1976, the total gross *Federal Debt* of the United States stood at \$631,285,027,000; the equivalent debt for 1975 was \$544,131,193,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical workers—single persons and families—in 50 cities representative of all cities in the United States) showed a monthly average during the calendar year 1975 of 161.2 (the basic figure of 100 being the 1967 average). The Consumer Price Index rose 6.2 per cent. in 1973, 11.0 per cent. in 1974 and 9.1 per cent. in 1975. From June 1974 to June 1975 the index rose 9.3 per cent. for all items, 8.8 per cent. for food, 9.3 per cent. for other commodities, 5.1 per cent. for rent and 10.5 per cent. for other services.

The Wholesale Price Index of all commodities averaged 160.1 in 1974 (compared to the base of 100.0 in 1967) and was 173.7 in June, 1975. From June, 1974 to June, 1975 the index rose 11.6 per cent. for all items, 10.4 per cent. for farm products, 14.2 per cent. for processed foods and feeds and 11.1 per cent. for industrial commodities.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$944.9 billion in 1972 to \$1,055.0 billion in 1973,

\$1,150.5 billion in 1974 and \$1,220.8 billion in the second quarter of 1975. In the latter period, labour income was \$885.5 billion, 4.4 per cent. above the level of the previous year. Business proprietors, professional and farm income totalled \$86.0 billion in the second quarter of 1975 (4.2 per cent. decrease on previous year) and dividends, interest, and rent totalled \$176.7 billion (up 10.6 per cent.). Transfer payments were \$177.9 billion and personal contributions to social insurance, which are offsets to income, were \$49.7 billion.

Disposition of personal incomes.—Personal taxes were \$142 billion in the second quarter of 1975, leaving households with \$1,078.8 billion of disposable income. Consumption expenditures were \$938.1 billion; \$130.0 billion for durable goods, \$408.5 billion for non-durable goods and \$399.6 billion for services. Personal saving was \$114.6 billion. Disposable income per capita was \$5,056 in the second quarter of 1975.

Private domestic investment.—The total gross private domestic investment rose from \$179.3 billion in 1972 to \$209.4 billion in 1973, and to \$213.0 billion in the second quarter of 1974. It declined to \$147.3 billion in the second quarter of 1975. Fixed investment in new residential construction declined to \$46.0 billion in 1974 (1973 \$57.2 billion) and other construction rose to \$52.0 billion (1973 \$47.0 billion). Investment in producers' durable equipment rose from \$89.18 billion in 1973 to \$97.1 billion in 1974.

AGRICULTURE AND LIVESTOCK

Agriculture.—The total land surface, including Hawaii and Alaska, is 2,263,591,000 acres of which about 50 per cent. is in farms. The total number of farms in 1975 was 2,818,580. The cash income from crops in 1974 was \$52,677,000,000, and in 1973, \$42,346,000,000. Cash income from livestock and livestock products in 1974 was \$46,244,000,000 and in 1973 \$42,327,000,000.

Combined production of all crops in 1974 was about 8 per cent. less than in 1973. There were record outputs of wheat, rice, dry beans, peanuts, potatoes, and citrus fruits. Yields per acre were at new high levels for peanuts and potatoes. Farm output of livestock and livestock products was up 4 per cent. due largely to record high meat animal production.

MINERALS

The value of mineral production in the United States in 1975 totalled an estimated \$63.1 billion compared with \$54.9 billion in 1974 and \$36.8 billion in 1973.

The value of processed minerals and mineral materials increased 22 per cent. to \$270 billion. Imports and exports of minerals and mineral materials totalled \$40 billion and \$18 billion respectively.

Lead refinery production declined 7 per cent. from that of 1974 and aluminium primary production at 3.9 million tons decreased 22 per cent. from that of 1974. Mine production of zinc decreased 5.2 per cent. and iron ore dropped 3 per cent.; uranium concentrate mill production increased by 1 per cent.

About 72 per cent. of the mineral production of the United States (in value) consists of fuels. In 1975 U.S. production of crude petroleum amounted to 3.1 billion barrels. Total demand (domestic plus exports) averaged 12.5 million barrels daily, a 2.1 per cent. increase from 1974.

The 1975 average daily production in the three principal oil producing States declined: in Texas by 111,000 barrels (total average daily production 3,381,000 barrels); in Louisiana by 224,000 barrels

(total average daily production 1,846,000 barrels); and in California by 2,000 barrels (total average daily production 882,000 barrels).

Anthracite production declined for the second consecutive year in 1975. Production fell to 6.2 million tons, 6.3 per cent below 1974 output. The continued decline in production reflected competition from other fuels, particularly oil and gas, in domestic and foreign markets.

Bituminous coal and lignite output in 1975 rose to a record high of 640 million tons. Exports rose 9.1 per cent. to 66 million tons.

LABOUR

Organized Labour.—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formally established in 1928, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership in 1974 was 16,938,000. There are also 4,705,000 members of unions not affiliated to the AFL-CIO. Of the 21,643,000 members of national and international unions with headquarters in U.S.A., 1,444,000 were employed in Canada.

Approximately 25.8 per cent. of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 5,031 stoppages recorded in 1975. There were 31,237,600 man-days of idleness, representing 0.16 per cent. of estimated working time of all non-agricultural workers.

Employment and Unemployment.—The civilian labour force (working population) was 94,557,000 in May, 1976. This includes self-employed, wage and salary-earners, and unpaid family workers,

	Wages (Preliminary Figures) April 1976	Average Weekly Earnings \$	Hours per Week	Average Hourly Earnings \$

Laundries, Cleaners...	112.70	35.0	3.22	

employed and unemployed. Unemployment was estimated at 6,860,000 in May 1976 (7.3 per cent.)

Wages.—In April, 1976, gross average weekly earnings in industry ranged from \$337.00 per week in malt liquors to \$71.12 in eating and drinking places (28.0 hours and \$2.54 average hourly earnings). The average for all manufacturing was \$198.74 compared with \$185.25 in May, 1975.

On Jan. 1, 1976, the minimum wage set by federal law became \$2.30 an hour for most non-agricultural employees subject to the Fair Labour Standards Act. This law covers employees engaged in or producing goods for interstate commerce and employees of certain large enterprises. The law requires at least time and a half of an employee's regular rate of pay for all hours over 40 a week for most covered workers.

Other non-agricultural employees employed in enterprises or occupations made subject to the minimum wage provisions on or after February 1, 1967, became subject to a \$2.20 minimum wage rate also on Jan. 1, 1976, and will become subject to the \$2.30 minimum wage on Jan. 1, 1977. The minimum wage for hired farmworkers was increased to \$2.00 on Jan. 1, 1976, will become \$2.20 on Jan. 1, 1977, and \$2.30 an hour on Jan. 1, 1978. The minimum wages for the three employment categories will be increased to \$2.30 an hour over a 2 to 4 year period.

There are certain exemptions from these requirements in specific occupations and industries.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health benefits financed by the employer or by employer and employees jointly.

ROADS

In 1974 there were 3,815,807 miles of roads and streets in the United States, of which 3,178,152 miles were in rural areas and 637,655 miles were in municipal areas. Surfaced roads and streets account

for 3,067,438 miles of the total; 748,369 miles were unimproved and graded and drained. State primary roads, including extensions in municipal areas, total 476,982 miles (474,296 surfaced). Other roads and streets under State control total 313,404 miles (283,701 surfaced), 2,801,273 miles are under local control (2,238,753 surfaced); and 224,148 miles (70,688 surfaced) are under Federal control (in national forests and parks).

An estimated total of \$24,506,000,000 was spent in 1974 for roads and streets in the United States. Of this total \$15,832,000,000 was spent for State highways, \$3,630,000,000 was spent for county and local rural roads, \$4,509,000,000 was spent for city streets and \$535,000,000 was spent on roads in Federal areas. Capital outlay accounts for 53.3 per cent. of the total expenditure; 26.5 per cent. was spent for maintenance, and 7.5 per cent. for administration; 8.3 per cent. for highway police and safety; and 4.4 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.—The number of motor vehicles registered in 1974 in the United States was 129,893,311, an increase of 3.4 per cent. over the 1973 total of 125,669,992. The State governments received \$13,121,049,000 in 1974 from motor fuel, motor vehicle and motor-carrier taxes. In 1974 the Federal Government received \$5,846,038,000 from excise taxes on motor vehicles and parts, tyres and tubes, petrol, diesel and special fuels and lubricating oils.

Accidents.—In 1974 there were 46,200 deaths caused by motor vehicle accidents. The death rate per 100,000 vehicle-miles of travel was 3.6 in 1974, compared with 4.3 in 1973.

SHIPPING

The ocean-going Merchant Marine of the U.S. on April 1, 1975, consisted of 910 vessels of 1,000 gross tons and over, of which 553 were privately owned and 357 were government-owned ships. Of the 553 privately owned active vessels, 168 were freighters, 6 were combination passenger and cargo, 223 were tankers, 16 were bulk carriers and 140 were intermodal types. There were 310 ships in the National Defense Reserve Fleet of inactive government-owned vessels, of which 78 were to be sold for scrap.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1974 were estimated to have carried 207,449,000 passengers over 162,917,241,000 revenue passenger miles. The freight flown by the scheduled airlines during 1974 totalled 4,890,074 ton miles and express 80,845,000 ton miles. In addition, the airlines flew 1,150,832,000 ton miles of mail, a decrease of 3.9 per cent. over 1973.

Total operating revenues of all U.S. scheduled airlines reached the record figure of \$14,699,125,000 in 1974, an increase of 18.4 per cent. over 1973. Similarly, total operating expenses rose to a record high total of \$13,973,385,000 last year, or a 11.9 per cent. increase over 1973. The net operating income (i.e. before deduction of taxes, interest, etc.) was \$725,740,000, an increase of 24.0 per cent. from the previous year, resulting in a profit of \$321,641,000 compared with a profit of \$226,693,000 in 1973.

Ten principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (11); (b) Local Service Carriers, operating routes of lesser traffic density between the smaller traffic centres and between small and large centres (8); (c) The International and Territorial Carriers, including all U.S. flag air carriers authorized to operate between the

U.S.A. and foreign countries, other than Canada, and over international waters; also between foreign countries and into Mexico, the Caribbean (10); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Intra-Alaskan Carriers, providing service within Alaska (4); (f) All Cargo Carriers (3); (g) Helicopter Carriers (3); (h) Supplement

Air Carriers (14); (i) Air Freight Forwarding Companies (181) and Air Taxi operators; and (j) Intra-State Carriers, with operations limited to State boundaries.

In 1974, 3,307,318 persons were employed by the domestic and international airlines, 1.3 per cent. more than in 1973.

U.S. SCHEDULED AIRLINE INDUSTRY STATISTICS, 1974 (Thousands)

	Domestic Trunk Airlines	Local Service Airlines	Intra- Hawallan Carriers	Helicopter Carriers	International and Territorial Airlines	Intra- Alaskan Carriers	All Cargo Carriers
Revenue passengers carried	147,993	35,200	4,675	592	17,725	1,107	..

EDUCATION

State School Systems

Forty-nine of the fifty States in the Union have compulsory school attendance laws. In general, children are obliged to attend school from 7 to 16 years of age. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In Oct. 1974 the total number of children in the United States of 5 to 17 years of age was 50,539,000, of whom 48,474,000 or 95.9 per cent. were enrolled in schools below the college level. Approximately 10 per cent. of these students attended non-public schools, and the remaining 90 per cent. were enrolled in public schools.

Preliminary data for the 1975-76 school year for public elementary and secondary schools were as follows: enrolment of 44,838,490; 2,203,089 classroom teachers with an average salary of \$12,448; \$59,149,733,000 for current expenditures; \$5,982,539,000 for sites, buildings, furniture and equipment expenditures; and \$1,970,297,000 expenditures for interest on school debt.

Revenue for public school purposes comes from the Federal, State, and local governments. Total receipts in 1973-74 were about \$58,230,892,000; of this, approximately 8.5 per cent. (\$4,930,351,000) came from the Federal Government, 41.4 per cent. (\$24,113,409,000) from State governments, and 50.1 per cent. (\$29,187,132,000) from local sources.

During the 1973-74 school year, the average daily attendance in public elementary and secondary schools was 41,438,000; the average length of the school term was 178.7 days; and the average number of days attended by each pupil enrolled was 159.5 days.

Institutions of Higher Education

In the autumn of 1975 enrolment in institutions of higher education numbered 9,731,431.

Institutions of higher education include universities, colleges, professional schools, and two-year colleges. The 1975 survey of enrolments covered 3,018 institutions classified as follows: 1,891 universities, colleges and professional schools enrolling 7,143,286 students; and 1,127 two-year colleges enrolling 2,818,507 students. Publicly controlled institutions of higher education enrolled 76.3 per cent. (7,425,772) of the students and privately controlled 23.7 per cent. (2,305,659).

During the school year 1973-74, an estimated 946,000 bachelor's degrees were conferred, 527,000 to men and 418,000 to women; 53,800 first-professional degrees, 48,500 to men and 5,200 to women; 277,000 master's degrees (157,800 to men and 119,100 to women), and 33,800 doctorates, 27,300 to men and 6,450 to women. There were 185,600 bachelor's degrees in Education, 150,800 in Social Sciences and 132,300 in Business and Management. The three leading fields of study for the master's degree were Education (112,250), Business and Management (32,750) and Social Sciences (17,300). The most popular fields of study on the doctorate level were Education (7,300), Social Sciences (4,100) and Physical Sciences (3,600).

Particulars of some of the Universities (with opening autumn enrolment figures, 1975) are: *Harvard* (20,498 students, including 7,883 women), founded at Cambridge, Mass. on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; *Yale* (9,734 students, including 3,210 women), founded at New Haven, Connecticut, in 1701; *Bowdoin*, Brunswick, Me. (founded 1794; 1,348, including 437 women); *Brown*, Providence, R.I. (founded 1764; 6,766 students, including 2,717 women); *Columbia*, New York, N.Y. (founded 1754; 23,343 students, including 11,339 women); *Cornell* (founded at Ithaca, N.Y., 1865); 17,295 students, including 6,097 women); *Dartmouth*, Hanover, N.H. (founded 1769, 4,026 students, including 971 women); *Georgetown*, Washington, D.C. (founded 1789; 10,835 students, including 4,135 women); *North Carolina*, Chapel Hill, N.C. (founded in 1789; 20,536 students, including 9,151 women); *Pennsylvania*, Philadelphia, Pa. (founded 1740; 20,380 students, including 7,891 women); *Pittsburgh*, Pa. (founded 1787; 29,085 students, incl. 12,595 women); *Princeton*, N.J. (founded 1746; 5,975 men and 1,775 women); *Tennessee*, Knoxville, Tenn. (founded 1794; 29,999 students, including 12,820 women); *William and Mary*, Williamsburg, Va. (founded 1693; 6,200 students, including 2,934 women); *New York University*, founded in 1831 at New York, had 29,698 students, including 13,808 women.

WEIGHTS AND MEASURES

The weights and measures in common use in the United States are of British origin. They date

back to the American Revolution when practically all the standards were intended to be equivalent to those used in England at that period. The principal units were the yard, the avoirdupois pound, the gallon, and the bushel. More or less authentic copies of the English standards of the denominations mentioned had been brought over and adopted by the different colonies. Divergencies in these weights and measures were, however, quite common, due no doubt to the fact that the system of weights and measures in England was not itself well established, and hence the copies brought to this country were often adjusted to different standards.

Because of these discrepancies, the system of weights and measures in the United States (U.S. Customary System) is not identical with the British system. The U.S. bushel and the U.S. gallon, and their subdivisions differ from the corresponding British units. Also the British ton is 2,240 pounds, whereas the ton generally used in the United States is the short ton of 2,000 pounds. The American colonists adopted the English wine gallon of 231 cubic inches. The English of that period used this wine gallon and they also had another gallon, the ale gallon of 282 cubic inches. In 1824 these two gallons were abandoned by the British when they adopted the British Imperial gallon, equivalent to 277.42 cubic inches. At the same time, the bushel was redefined as 8 gallons. In the British system the units of dry measure are the same as those of liquid measure. In the United States these two are not the same, the gallon and its

subdivisions being used in the measurement of liquids, while the bushel, with its subdivisions, is used in the measurement of certain dry commodities. The U.S. gallon is divided into 4 liquid quarts and the U.S. bushel into 32 dry quarts. All the units of capacity mentioned thus far are larger in the British system than in the U.S. system. But the British fluid ounce is smaller than the U.S. fluid ounce, because the British quart is divided into 40 fluid ounces, whereas the U.S. quart is divided into 32 fluid ounces.

The rapidly diminishing world-wide use of the U.S. Customary and British Systems of measurement and the corresponding rise in metric usage, promoted the passage of Public Law 90-472. Pursuant to this law, the National Bureau of Standards conducted a programme of investigation, research and survey to determine the impact on U.S.A. of such increasing world-wide and domestic use of the metric system (SI), reporting back to Congress in July, 1971. The study recommended a concerted, co-ordinated, but voluntary national effort to make the SI the predominant form of measurement in the United States. Legislation to effect this recommendation has been introduced in Congress.

The International System of Units—officially abbreviated SI—is a modernized version of the metric system. It was established by international agreement to provide a logical and interconnected framework for all measurements in science, industry and commerce.

TERRITORIES, ETC. OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam, Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 101,592 in 1970. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Director, Office of Territorial Affairs, Dept. of the Interior, Washington, D.C.

CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix

Island Group in the Central Pacific) were declared to be for the common use of Great Britain and U.S.A. for aviation and communication. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

Canton Island was successively used for aviation support activities and as a missile tracking station by the U.S. National Aeronautics and Space Administration. These activities have been terminated. Enderbury has been uninhabited since World War II.

GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 209 square miles, with an estimated civilian population (1974) of 105,000.

The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941 but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. The Governor is popularly elected. In 1972 a non-voting delegate was elected to serve in the U.S. House of Representatives. A 21-member unicameral legislature is elected bien-

nially. There is also a District Court of Guam, with original jurisdiction in cases under federal law. Governor, Ricardo J. Bordallo; elected Nov. 1974. Lt. Governor, Rudolph G. Sablan; elected Nov. 1974. CAPITAL, Agaña. Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. *Wake Island* was occupied by Japanese, Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945. Population (1970), 1,647.

Midway Islands, with a total area of 28 sq. miles and a population (1970) of 2,220, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50' - 18^{\circ} 30'$ N. lat. and $65^{\circ} 30' - 67^{\circ} 15'$ W. long., with a total area of 3,435 square miles and a population (1973 Census preliminary) of 2,913,000. The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 100 miles from west to east, and 35 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,600 miles distant from New York, and 1,000 miles from Miami. *Puerto Rico* was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes and yams are also grown. The trade is principally with the U.S. In 1973 there were 3,972 miles of highway under maintenance. There are good harbours at San Juan, Mayaguez and Ponce.

The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 29 members (2 from each of 8 senatorial districts and 13 at large) and the House of Representatives of 52 members (1 from each of 40 representative districts and 12 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 9 members is appointed by the Governor, with the advice and consent of the Senate. There are 10 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all judges. *Puerto Rico* is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote, although he has a right to vote on certain committees within the House of Representatives. Great improvement has been made in the progress. Industrialization and welfare of the island during the last two decades. A programme of tax exemption has raised income from industry to a level higher than that from agriculture. Public schools are

established throughout—enrolment in 1973 was 711,030.

CAPITAL.— Ψ San Juan, population 851,247; Other major towns are: Ψ Ponce (173,500); Bayamón (170,500); Ψ Mayagüez (92,900); and Ψ Arecibo (73,283).

TRADE

	1973-74
Total Imports.....	\$4,262,000,000
Total Exports.....	3,339,000,000

Trade with U.K.

	1973	1974
Imports from U.K.....	£7,004,000	£8,548,000
Exports to U.K.....	11,634,000	12,789,000

Governor, Rafael Hernández Colón, elected 1972. Resident Commissioner, Jaime Benítez (1972).

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 67.5 square miles and a population of 27,769 in 1970.

Tutuila, the largest of the group, has an area of 52 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1960, 1,251). The constitution of American Samoa designates the village of Fagatogo as the seat of government. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces or other naturalization procedure. Governor, Earl B. Ruth.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1970 was 101,592. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary considerably among island groups and even more among islands and atolls in the same geographic area. Nine different languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947, administration being under the general jurisdiction of the Secretary of the Interior.

For administrative purposes, the territory is divided into six districts: The Marianas, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, Edward E. Johnston.

Deputy High Commissioner, Peter T. Coleman.

CAPITAL (Provisional).—Saipan, Mariana Islands.

Ψ Seaport.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 133 sq. miles, with a population (estimated 1972), of 90,000. *St. Thomas* (28 sq. miles) had a population of 29,565; *St. Croix* (84 sq. miles) had a population of 31,892; *St. John* (20 sq. miles) had a population of 1,743.

CAPITAL, Ψ Charlotte Amalie contains one of the finest harbours in the West Indies. The government of the Virgin Islands is organized under the provisions of the Revised Organic Act of the Virgin Islands, enacted by the Congress of the United States on July 22, 1954. Legislative power is vested in the Legislature of the Virgin Islands, a unicameral body composed of 15 senators popularly elected for two-year terms. Virgin Islanders are citizens of the United States. From the elections of November, 1970, the Governor has been popularly elected. In 1972, a non-voting delegate was elected to serve in the U.S. House of Representatives. The Virgin Islands are now a favourite tourist area in the Caribbean. The climate of the islands is delightful at all times, and particularly so during the winter months.

Governor, Cyril E. King, elected Nov. 1974.

Lieut.-Governor, Juan F. Luis, elected Nov. 1974.

THE PANAMA CANAL

The Panama Canal, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1951, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General H. R. Parfitt, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

The Canal Zone has an area of 64.7 sq. miles (about 1 per cent. of the total area of Panama) (land area, 37.2 sq. miles) and a population in 1970 of 51,000.

Chief Towns.—Balboa Heights, Balboa, Ancon, Gamboa and Margarita.

BRITISH EMBASSY

3100 Massachusetts Avenue, N.W.
Washington, D.C. 20008

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 10 fiscal years (see table in col. 1). In 1974 the 14,033 vessels using the canal carried the highest tonnage so far recorded.

Fiscal Year	No. of Transits	Canal, Net Tons	Cargo Tons
1965	11,835	74,853,264	76,573,071
1966	11,926	78,918,013	81,712,940
1967	12,413	88,266,343	86,193,430
1968	13,199	96,487,843	96,550,165
1969	13,150	100,603,265	101,391,132
1970	13,658	108,141,640	114,257,260
1971	14,020	111,006,363	118,626,906
1972	13,766	112,971,058	109,233,725
1973	13,841	126,203,549	126,104,029
1974	14,033	135,715,628	147,906,914
1975	13,609	135,053,680	140,101,459

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 500 to 1,000 feet wide at the bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea takes on average 8 to 10 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging.

The Panama Canal Company is engaged in a Canal improvement programme. The widening of Gaillard Cut from 300 to 500 feet was completed in August, 1970. The maximum draft allowable for ships using the Panama Canal is determined by the level of Lake Gatun, which is an average of 85 feet above sea level. During dry season, from December to April, the lake level drops, imposing draft restrictions. The all-time high maximum tropical fresh water draft was 40 feet for certain types of vessels in 1967.

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21–Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York. October 24 has been designated "United Nations Day".

The following 144 states are members of the United Nations:—

Afghanistan, Albania, Algeria, Argentina,* Australia,* Austria, Bahamas, Bahrain, Bangladesh, Barbados, Belgium,* Bhutan, Bolivia,* Botswana, Brazil,* Bulgaria, Burma, Burundi, Byelorussian Soviet Socialist Republic,* Cambodia, Cameroon, Canada*, Cape Verde, Central African Republic, Chad, Chile,* China,* Colombia*, Comoros, Congo (Pop. Repub.), Costa Rica,* Cuba,* Cyprus, Czechoslovakia,* Dahomey, Denmark,* Dominican Republic,* Ecuador,* Egypt,* El Salvador,* Equatorial Guinea, Ethiopia,* Fiji, Finland, France,* Gabon, Gambia, Germany (East), Germany (West), Ghana, Greece,* Guatemala,* Guinea, Guyana, Haiti,* Honduras,* Hungary, Iceland, India,* Indonesia, Iran,* Iraq,* Republic of Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Kenya, Kuwait, Laos, Lebanon,* Lesotho, Liberia,* Libya, Luxemburg,* Madagascar, Malawi, Malaysia, Maldives Islands, Mali, Malta, Mauritania, Mauritius, Mexico,* Mongolia, Morocco, Mozambique, Nepal, Netherlands,* New Zealand,* Nicaragua,* Niger, Nigeria, Norway,* Oman, Pakistan, Panama,* Papua New Guinea, Paraguay,* Peru,* Philippines,* Poland,* Portugal, Qatar, Rumania, Rwanda, Sao Tome and Principe, Saudi Arabia,* Senegal, Sierra Leone, Singapore, Somalia, South Africa,* Spain, Sri Lanka, Sudan, Surinam, Swaziland, Sweden, Syria,* Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey,* Uganda, Ukrainian Soviet Socialist Republic,* Union of Soviet Socialist Republics,* United Arab Emirates, United Kingdom,* United States of America,* Upper Volta, Uruguay,* Venezuela,* Yemen (Arab Repub.), Yemen (P.D.R.), Yugoslavia,* Zaire, Zambia.

* Original member (i.e. from 1945). (From October 25, 1971, "China" was taken to mean the People's Republic of China.)

The principal organs of the United Nations are:— (1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided among seven Main Committees, on each of which every Member has the right to be represented:— (1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories);

(5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission. In 1964 the General Assembly set up the United Nations Conference on Trade and Development (UNCTAD) as a permanent body.

The United Nations Industrial Development Organization (UNIDO) was set up on Jan. 1, 1967, to promote industrialization and co-ordinate United Nations activities in this field.

President of the United Nations General Assembly,
Gaston Thorn (Luxemburg) (1975).

2. The Security Council

The Security Council consists of fifteen Members, each of which has one representative and one vote. There are five *permanent Members* (China, France, U.K., U.S.A., U.S.S.R.) and ten non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of nine Members must include the concurring votes of the *permanent Members*, and it is this clause which makes the *Veto* possible. The only exception to this rule is that with regard to measures for peaceful settlement a party to a dispute may refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A *Committee on the Admission of New Members* was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the

United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Pacific, Western Asia, Latin America and Africa. The Council also supervises and co-ordinates the work of fourteen related agencies.

United Nations Children's Fund (UNICEF).—UNICEF embraces all aspects of child welfare and assists the governments of the developing countries in developing maternal and child health services, the prevention and treatment of disease, nutrition and the preparation of children for adult life. It is financed by voluntary contributions from Governments and from the public and its work is carried out in co-operation with the relevant technical members of the United Nations.

4. Trusteeship Council

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and one other country elected by the General Assembly for a three-year term.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

THE SECRETARIAT

Secretary-General (1972-77), Kurt Waldheim (Austria).

Under-Secretaries-General

Inter-Agency Affairs and Co-ordination, C. V. Narasimhan (India).

Special Political Affairs, B. E. Urquhart (U.K.); Roberta Guyer (Argentina).

Conference Services, B. Lewandowski (Poland).

Economic and Social Affairs, Gabriel Van Laetham (France).

Political Affairs and Decolonization, Ming-Chao Tang (China).

Political and Security Council Affairs, A. Shevchenko (U.S.S.R.).

Director-General, U.N. Office, Geneva, V. Winspeare Guicciardi (Italy).

Office or Administration and Management, G. Davidson (Canada).

Legal Counsel, E. Suy (Belgium).

U.N. Information Centre, 14-15, Stratford Place, W.1.

BUDGET OF THE UNITED NATIONS

The budget is now approved for periods of two years, and the appropriation for the biennium 1975-76 is U.S.\$745,813,800 (*gross*). The scale of assessments for 1974-76 includes: Australia, 1.44 per

cent.; Canada, 3.18 per cent.; India, 1.20 per cent.; New Zealand, 0.28 per cent.; United Kingdom, 5.31 per cent. The United States contribution is 25.00 per cent.; U.S.S.R. is 12.97 per cent.; France is 5.86 per cent.; Italy is 3.60 per cent and Japan is 7.15 per cent.

UNITED KINGDOM REPRESENTATIVES

845 Third Avenue, New York

Permanent Representative to the United Nations and Representative on the Security Council, Ivor Scward Richard, O.C. (1974).

Minister and Deputy Permanent Representative, James Murray, C.M.G.

Minister (Economic and Social Affairs), P. H. R. Marshall, C.M.G.

Counsellors, J. C. Thomas (Head of Chancery); F. R. N. Ficot (Legal Adviser); C. A. Lovitt, M.B.E. (Administration); M. F. H. Stuart (Treasury Adviser).

1st Secretaries, C. C. R. Battiscombe; A. D. Baighy; D. Broad; J. B. Donnelly; Miss S. E. Harden, M.B.E.; F. C. G. Hohler; D. B. C. Logan; M. A. Pattison; A. J. C. E. Rellie; T. L. Richardson; Miss E. C. Wallis, M.B.E.

INTERNATIONAL ATOMIC ENERGY AGENCY

Kärntnering 11-13, P.O. Box 590, Vienna

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it or under its supervision is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and some of the specialized agencies. In June, 1976, 109 states were members.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (34 members) carries out the functions of the Agency and meets usually four times a year. The Budget in 1976 amounted to \$37,002,000.

Director-General, Sigvard Eklund (Sweden).

INTERNATIONAL ORGANIZATIONS

Fourteen other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organization (ILO) Geneva (London Branch Office, 87-91 New Bond Street, W.1.). Established with the League of Nations in 1919 under the Treaty of Versailles, the ILO became in 1946 the first specialized agency associated with the United Nations. In June, 1976, the Organization had 132 member States. The aim of the ILO is to promote lasting peace through social justice, and to this end it works for better economic and social conditions everywhere. It was awarded the Nobel Peace Prize in 1969.

The ILO establishes international labour standards, which set guidelines for improving working conditions and protecting basic human rights; runs a world-wide programme of technical assistance to developing countries (with funds from all sources amounting in 1974-75 to about \$80 million); conducts research and disseminates information on the human aspects of economic activity, with a view to improving social and economic well-being. Through its World Employment Programme, the ILO is attacking unemployment and its associated ills by aiding national and international efforts to

provide productive work for the world's fast-growing population.

The International Labour Conference, composed of national delegations of two government delegates, one worker delegate and one employer delegate, meets at least once a year. It formulates international labour standards and broad policies of the Organization, provides a forum for discussion of world labour and social problems, and approves the ILO's work programme and budget, which is financed by member States.

A 56-member Governing Body, composed of 28 government members, 14 worker members and 14 employer members, acts as the Organization's executive council. Ten governments hold seats on the Governing Body because of their industrial importance. These are Canada, China, France, the Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States of America.

The International Labour Office, the secretariat of the Organization, collects and distributes information, assists governments on request in drafting legislation on the basis of international labour standards, directs technical co-operation activities, and issues publications.

Director-General, Francis Blanchard (France).

Food and Agriculture Organization of the United Nations (FAO), Viale delle Terme di Caracalla, Rome.—Established on October 16, 1945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy and ensuring man's freedom from hunger. Among its many activities the Organization promotes the global exchange of information in the fields of agriculture, forestry and fisheries, facilitates international agreement in these fields and provides technical assistance in such subjects as nutrition and food management, soil erosion control, re-forestation, the establishment of paper industries, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. As well as its work as an intergovernmental agency the Organization also mobilizes the efforts of private individuals and associations through the world-wide *Freedom from Hunger Campaign*. Jointly with the United Nations it administers a \$1,000,000,000 World Food Programme using food as capital backing for development programmes in developing countries. The 1975 session of the governing Conference approved a budget of \$167,000,000 for the two years 1975–76. In addition FAO is carrying out field programmes involving expenditure of about \$100,000,000 under the U.N. Development Programme and other aid programmes. Through its co-operative programme with the World Bank it is helping to increase international investment in agriculture and allied fields.

The policy of the Organization is directed by a two-yearly Conference of the 136 member countries. A council (42 members) acts for the Conference between its sessions.

Director-General, Edouard Saouma (Lebanon).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris 75700.—Under its constitution, the Organization makes its contribution to peace and security by promoting collaboration among its Member States in the fields of education, science, culture and communications. It aims at furthering

a universal respect for justice, for the rule of law and for human rights, without distinction of race, sex, language or religion, in accordance with the Charter of the United Nations.

Unesco continues to work for the advancement of mutual knowledge and understanding of peoples . . . to give fresh impulse to popular education and to the spread of culture . . . to maintain, increase and diffuse knowledge.

The Organization is composed of three organs: (i) the *General Conference*, consisting of representatives of Member States, which meets biennially to decide the programme and budget; (ii) the *Executive Board*, composed of 40 members elected by the General Conference to supervise the execution of the approved programme and (iii) the *Secretariat*, which is responsible for Unesco's day-to-day functioning and the execution of the programme. In most Member States National Commissions serve as a link with Unesco and help carry out the programme. The broad objectives of Unesco: in education, its democratization and regeneration; in science, the development of science policy, the application of science and technology to development and the intensification of international programmes of scientific co-operation; in culture, the evolution of cultural policy; in communication, the improvement and development of the mass media in Member States as a means of increasing the flow of information. Member States in July, 1975, 136. *Director-General, Amadou-Mahtar M'Bow (Senegal).*

U.K. National Commission for UNESCO, Ministry of Overseas Development, Stag Place, S.W.1.

Secretary, D. Bell.

World Health Organization (WHO), ¹²¹¹ Geneva 27. Established on April 7, 1948, the aim of the World Health Organization is the attainment by all peoples of the highest possible level of health. Through its advisory services, it helps its member governments to develop health manpower, streamline health services, control communicable diseases, promote family health—including mother and child care, family planning, nutrition and health education—and strengthen environmental health. Its other services include the International Pharmacopoeia, drug evaluation and monitoring, biological standardization, epidemiological surveillance, medical research and scientific publications. Approved budget for 1977, \$147,184,000. Membership (May 1976), 151.

Organs are a *World Health Assembly* meeting annually to frame policy, an *Executive Board* (30 members), meeting at least twice a year, and a *Secretariat*.

Director-General, H. T. Mahler (Denmark).

International Bank for Reconstruction and Development (*The World Bank*), 1818 H Street, Washington, D.C.; European office, 66 Ave. d'Iéna, 75116, Paris, France.—Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of member countries by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources. The 1,311 loans made by the Bank since its inception to June 30, 1976, totalled \$32,552,000,000. Subscribed capital, June 30, 1976, \$30,860,568,000.

The *Board of Governors* consists of one Governor and one alternative appointed by each of the 127 member countries.

Twenty *Executive Directors* exercise all powers of the Bank except those reserved to the Board of Governors. The *President*, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff. *President*, Robert S. McNamara (U.S.A.).

International Development Association (IDA), 1818 H Street, Washington, D.C.; European office, 66 Ave. d'Iéna, 75116 Paris, France.—an affiliate of the World Bank established in September 1960. Its purposes are to promote economic development, increase productivity and thus raise standards of living in the less developed areas of the world included within the Association's membership, in particular by providing finance to meet their important developmental requirements on terms which are more flexible and bear less heavily on the balance of payments than those of conventional loans, thereby furthering the objectives of the World Bank and supplementing its activities. IDA's Board of Governors and Executive Directors are the same as those holding equivalent positions in the World Bank, serving *ex officio* in IDA. By June 30, 1976, IDA had extended 668 development credits totalling \$9,993,000,000 in 68 countries for improved transportation, agriculture, electric power facilities, industry, education and municipal water supplies. The credits were for terms of 50 years, free of interest.

International Finance Corporation (IFC), 1818 H Street, Washington, D.C.; European office, 66 Ave. d'Iéna, 75116 Paris, France.—The IFC was established in 1956 as an affiliate of the World Bank to assist less developed member countries by promoting the growth of the private sector of their economies. IFC's share capital of \$108,324,000 at June 30, 1976, had been subscribed by 100 countries. In addition, IFC is empowered to borrow up to approximately \$685,000,000 from the World Bank for use in its lending programme. At the end of June, 1976, IFC had made commitments totalling more than \$1,505,000,000 in 61 countries. *President*, Robert S. McNamara (U.S.A.).

International Monetary Fund, 19th and H Streets, N.W. Washington, D.C.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. 126 countries were in membership of the Fund in June, 1975.

The Fund's financial assistance takes the form of a foreign exchange transaction. The member pays to the Fund an amount of its own money equivalent to the amount of foreign currency it wishes to purchase. The member is expected to "repurchase" its own currency from the Fund within three, or at the outside five years, with a payment of gold or dollars or convertible currency acceptable to the Fund. These arrangements are subject to certain charges which rise in proportion to the amount of foreign exchange involved, and the length of time it is held.

Currencies drawn from the Fund may be used in a flexible way to relieve the member's payments difficulty, but its assets are not intended to be used for military purposes, or for programmes of economic development.

Each member of the Fund is assigned a quota

which approximately determines its voting power and the amount of foreign exchange that it may draw from the Fund. The subscription of each member is equal to its quota, and is payable partly in gold and partly in the member's own currency. *Managing Director*, H. Johannes Witteveen (Netherlands).

International Civil Aviation Organization (ICAO), International Aviation Square, 1,000 Sherbrooke Street, W., Montreal, Quebec, Canada.—In existence since April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations or operation, and simpler procedures at international airports. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 134 states are now members of ICAO.

An *Assembly* of delegates from member states meets at least once every three years. A *Council* of 30 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

President of Council, Assad Kotaite (Lebanon).
Secretary-General, Yves Lambert (France).

Universal Postal Union (UPU), Weltpoststrasse 4, 3000 Berne 15.—Established on October 9, 1874, by the postal Convention of Berne and in operation from July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union includes almost all the countries of the world. Budget, 1976, \$U.S.6,353,000. A *Universal Postal Congress* meets at five-yearly intervals, the last Congress was held at Lausanne in 1974. The next is due to be held in Brazil in 1979. *Director-General*, Mohammed I. Sobhi (Egypt).

International Telecommunication Union (ITU), Place des Nations, Geneva.—Founded at Paris in 1865 as the International Telegraph Union. ITU became a U.N. Specialized Agency in 1947 and as from Jan. 1, 1975, is governed by the Convention adopted by the Torremolinos Conference held in 1973. ITU exists to set up international regulations for telegraph, telephone and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, collects and publishes information on telecommunication matters, including space radio communications. The Budget for 1977 is 74,034,000 Swiss francs.

Secretary-General, M. Mili (Tunisia).

World Meteorological Organization (WMO), Geneva.—Came into existence in 1951. The present membership is 134 States and 11 Territories. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology, and to promote the establishment and maintenance of centres providing meteorological services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, water problems, agriculture, and other human activities; to encourage research and training in meteorology and to co-ordinate their international aspects. Budget (1976-79), \$U.S.40,542,000. A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (24 members), meeting at least annually carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), eight technical commissions and a Secretariat. *Secretary-General*, D. A. Davies (U.K.).

Inter-Governmental Maritime Consultative Organization (IMCO), 101-104 Picadilly, W.1. A United Nations Specialized Agency established on March 17, 1958, to provide means for co-operation and exchange of information among governments on technical matters related to international shipping, especially with regard to safety at sea and preventing marine pollution caused by ships.

IMCO is responsible for calling maritime conferences and drafting maritime agreements, e.g. Load Line Convention, 1966 and Convention on Tonnage Measurement of Ships. It has produced International Maritime Dangerous Goods Code; Code of Safe Practice for Bulk Cargoes; Code for the Construction and Equipment of Ships carrying Liquefied Gases in bulk; revised International Code of Signals, and fire safety measures for ships. In June, 1976, 97 nations were in membership. Budget, 1976-77, \$11,249,000.

Secretary-General, C. P. Srivastava (India).

International Trade. *General Agreement on Tariffs and Trade* (GATT), Villa le Bocage, Palais des Nations 1211, Geneva 10. A multilateral treaty, in operation since 1948, to which 83 countries are parties; a further 22 countries apply GATT *de facto*. Its rules thus govern over four-fifths of the world trade. Objectives of GATT are to expand international trade and promote economic development. GATT provides a permanent forum for discussion and solution of particular international trade problems, and for multilateral negotiations to reduce tariffs and other obstacles to the expansion of international trade. In September 1973, 102 countries agreed in Tokyo to launch comprehensive new negotiations in GATT, aimed at further reductions in both tariff and non-tariff barriers to industrial and agricultural trade. Special attention is given to trade problems of developing countries. An International Trade Centre, set up by GATT in 1964 to aid developing countries in export promotion, is now operated jointly by GATT and UNCTAD. *Director-General*, O. Long (Switzerland).

VEHICLE LICENCES

From October 1, 1974, registration and first licensing of vehicles has been done through local offices (known as Local Vehicle Licensing Offices) of the Department of the Environment's Driver and Vehicle Licensing Centre in Swansea. The records of existing vehicles are now being transferred to Swansea in stages. Local facilities for relicensing will remain available as follows:—

- (i) Before transfer of the record to the centralised system through local authority Local Taxation Offices (on behalf of the Secretary of State for the Environment), and
- (ii) after transfer through DOE Local Vehicle Licensing Offices.

In certain circumstances licences are also issued by post offices. Details of the present duties chargeable on motor vehicles are set out in the Finance Act, 1975. The Vehicles (Excise) Act, 1971 provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty as if it were in use.

Rates of duty for motor car and motor cycle licences are shown below. For Hackney Carriages the rates of duty are: Hackney Carriage with seating capacity not exceeding 20 persons, £20.00; additional for each person above 20 (excluding the driver) for which the vehicle has seating capacity, 50p.

Type of Vehicle	Exceeding	Not Exceeding	12 Months	4 Months
MOTOR CARS				
Electric and those first registered before January 1, 1947.....	—	7 hp	28-80	10-55
Other than the above	—	40-00	40-00	14-65
MOTOR CYCLES

* Amendment of licence (e.g. for additional Group of vehicles), for the unexpired period.....	0.25
Provisional Driving Licence: 12 months..	1.00
Public Service Vehicle Driving Licence: 3 years†.....	0.15

Driving Licences

The Road Traffic Act 1974 contained provision for driving licences to run until the age of 70 with renewals on application at 3-yearly intervals thereafter. Full licences issued to commence on or after Jan. 1, 1976 to new drivers passing the driving test and to full licence holders upon renewal of their licences are now valid until their holder's 70th birthday on payment of the new once-and-for-all fee of £5 (£1 for people aged 65 and over). This fee will also cover subsequent issues. Drivers of any age with certain disabilities may be granted licences for one, two or three years.

* But see opposite.

† Additional to ordinary driving licence.

Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Capitals, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies and Consulates-General in London for various corrections and additions.

Salaries and Allowances

The Salaries of Officers of H.M. Diplomatic Service are shown below. In addition foreign allowances are assigned to officers serving abroad:—

- Grade 1—£18,675.
- Grade 2—£14,000.
- Grade 3—£12,465.
- Grade 4—£9,115 to £11,465.
- Grade 5—£8,515 to £9,115.
- Grade 6—£6,145 to £7,915.
- Grade 7—£5,365 to £6,365.
- Grade 7A—£4,869 to £5,898.
- Grade 7E—£4,365 to £5,165.
- Grade 8—£2,860 to £4,135.
- Grade 9—£2,350 to £4,135.
- Grade 10—£1,665 to £3,005.

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

AFGHANISTAN

(Afghānistān)

Head of State (President), Mohammad Daoud, born 1909, assumed office, July 17, 1973. (Also *Prime Minister, Minister of National Defence and Foreign Affairs.*)

COUNCIL OF MINISTERS

Prime Minister, Mohammad Daoud.

First Deputy Prime Minister, Dr. Mohammad Hussan Sharq.

Second Deputy Prime Minister and Finance, Sayed Abdul Ellah.

Justice, Abdul Majid.

Interior, Abdul Qadir.

Education, Prof. Dr. Abdul Qayum.

Frontier Affairs, Faiz Mohammad.

Commerce, Mohammad Khan Jalal.

Mines and Industries, Eng. Abdul Tawab Asafi.

Public Works, Ghausuddin Faq.

Communications, Eng. Abdul Karim Attayee.

Health, Dr. Abdullah Omar.

Information and Culture, Prof. Dr. Abdul Rahim Navin.

Agriculture and Irrigation, Azizullah Wasefi.

Planning, Ali Ahmad Khoram.

EMBASSY IN LONDON

31 Princes Gate, S.W.7.

[01-589 8891/2]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hamidollah Enayat-Seraj (1974).

1st Secretary, Mohammed Yussuf Samad.

Afghanistan lies to the N. and W. of Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population (U.N. estimate, 1969) 16,516,000. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durrans, from whom the Royal Family came, and the Ghilzais. Then come the Tadjiks, an Iranian people mainly cultivators and

small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashs, who belong to the Shia sect.

Afghanistan is bounded on the W. by Iran (boundary fixed 1857 and 1904), on the S. by Baluchistan (now Pakistan) (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (now Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Iran frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Mary and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. An Afghan-Chinese border treaty was signed in 1963 and the border demarcation in 1964. The Pakistan-Afghan frontier was settled by the Durand agreement of 1893.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into 26 provinces each under a Governor.

Government.—The constitutional monarchy, introduced by the 1964 Constitution, was overthrown by a *coup d'état* on July 17, 1973. Pending a new constitution, which is in preparation, the country is under rule by Presidential Decree.

By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Judiciary.—Hitherto Afghanistan has been ruled on the basis of Shariat or Islamic law. However, the Constitution introduced in 1965 provided for the creation of a legal code, and for a new structure of courts, consisting of a lower court in each *wilwusal* (sub province), and a court of appeal in each province, with a Supreme Court in Kabul. The complete separation of executive and judiciary in this constitution was abolished by Presidential Decree in July, 1973.

Defence.—The Army has been reorganized and is recruited by yearly calls. Service is for one year for officers and 2 years for other ranks. The peace strength is about 100,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair

cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (a) Internal: Kabul-Kandahar (310 miles); Kandahar-Herat (350 miles); Herat-Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif-Kabul (380 miles). Also Kabul-Khanabad-Faizabad (450 miles); Kabul-Gardez (80 miles); Kabul-Bamian (140 miles). The road from Kabul to the North has now been shortened by the completion in 1964 of the Salang pass. (b) Roads to the frontiers: Kabul-Khyber (175 miles); Kandahar-Chaman (70 miles) and roads from Herat to the Russian and Iranian borders. Five of the major roads in Afghanistan have been surfaced by U.S. and Soviet Aid. The Kabul-Khyber, Kandahar-Spin Baldak and Kabul-Kunduz-Qizil Qala roads are also surfaced. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Motor transport has taken the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles). Internal air services between the main towns are being developed.

Language and Literature.—The languages of the country are Persian and Pushtu, and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pushtu. The Government is encouraging the spread of Pushtu, the language of the Pathans. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have become eligible for income-tax.

Trade with U.K.

	1974	1975
Imports from U.K.	£3,345,000	£4,541,000
Exports to U.K.	12,887,000	8,645,000

Exports are mainly Persian lambskins (Karakul), fruits, cotton, raw wool, carpets, spice and natural gas, while the imports are chiefly oil, cotton yarn and piece goods, tea, sugar, machinery and transport equipment.

CAPITAL, Kabul (about 500,000). The chief commercial centres are Kabul and Kandahar (125,000). Other provincial capitals are Herat (86,000), Mazar-i-Sharif (42,000), Jalalabad (22,000).

FLAG.—Vertical stripes of black, red and green, with gold emblem.

NATIONAL DAY.—July 17.

BRITISH EMBASSY (Kabul)

Ambassador Extraordinary and Plenipotentiary, His Excellency Kenneth Roy Crook (1976).

1st Secretary, J. A. Birch (*Consul*).

Oriental Secretary, Miss K. J. Himsworth.

2nd Secretary, B. W. V. Tomsett (*Commercial*).

British Council Representative.—P. A. Connell, P.O. Box 453, 855 Shehabuddin Wat, Kabul (British library).

Kabul is distant 5,000 miles from London, transit 21 days; by air 12 hours.

ALBANIA

Head of State, Haxhi Lleshi, assumed office, July 24, 1953.

Chairman, Council of Ministers, Mehmet Shehu.

Labour (= Communist) Party

Politbureau of the Central Committee, R. Alla; A. Carcani; K. Hazbiu; Enver Hoxha; H. Isai; H. Kapo; S. Koleka; R. Marko; P. Miska; M. Myftiu; M. Shehu; H. Toska (*full members*); L. Gegprifti; Q. Mihali; P. Peristeri; X. Spahiu (*candidate members*).

Secretariat of the Central Committee, Enver Hoxha (*First Secretary*); R. Alla; H. Isai; H. Kapo; H. Toska; P. Dode.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1974) of 2,377,600.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hoxha as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945; on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic. It was admitted to the United Nations in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Although Albania was almost entirely an agricultural country (staple crops are wheat and maize), industrial expansion of her natural resources is now in process.

CAPITAL, Tirana (pop. 200,000).

FLAG.—Black-two-headed eagle surmounted by yellow outline star, all on a red field.

ALGERIA

(Republic of Algeria)

President of the Council of Revolution and Minister of National Defence, Houari Boumedienne, assumed office June 19, 1965.

CABINET

Minister of State, Cherif Belkacem.

Minister of State responsible for Transport, Rabah Bitat.

Minister of the Interior, Mohamed Ben Ahmed Abdelghani.

Foreign Affairs, Abdelaziz Bouteflika.

Information and Culture, Ahmed Taleb.

Health, Dr. Omar Boudjellab.

Justice, Boualem Benhamouda.

Industry and Energy, Belaid Abdesselam.

Public Works, Abdelkader Zaibek.

Agriculture and Agrarian Reform, Mohamed Larbi Tayebi.

Commerce, Layachi Yaker.

Labour and Social Affairs, Mohamed Said Mazouzi.
Higher Education and Scientific Research, Mohamed Benyahia.

Tourism, Abdelaziz Maoui.

Primary and Secondary Education, Abdelkrim Benmahmoud.

Religious Affairs, Mouloud Kassim.

Ex-Servicemen, Mahmoud Guennez.

Posts and Telecommunications, Said Ait Messaoudene.

Youth and Sports, Abdallah Fadel.

Finance, Abdelmalek Temam.

ALGERIAN EMBASSY IN LONDON

6 Hyde Park Gate, S.W.7

[01-584 9502]

Ambassador Extraordinary and Plenipotentiary, His Excellency Lakhdar Brahimi (1971).

Minister Plenipotentiary, Abdelkrim Chitour.

1st Secretary, Mohamed Larbi Tebbal.

Attachés, Lamri Khelif; Hamid Haraigue; Abdelkader Mesbahi; Abdelhamid Ghomari.

Algeria lies between 8° 45' W. to 12° E. longitude, 37° 6' N. to a southern limit about 19° N. Area, 855,900 sq. miles (estimated). The population (U.N. estimate, 1970) is 13,547,000, of which 30 per cent. are urban dwellers.

Government.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. Between 1955 and 1960 these were reorganized to form 13 departments: Algiers, Tizi-Ouzou, Orleansville, (now El-Aznam) Médéa, Constantine, Bône (now Annaba), Setif, Batna, Oran, Tlemcen, Mostaganem, Saida and Tiaret. The Southern Territories of the Sahara, formerly a separate colony,

became an integral part of Algeria on the attainment of independence, forming the two additional departments of the Saoura and the Oasis. An armed rebellion led by the Moslem *Front de Libération Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. French control of Algeria came to an end when President de Gaulle declared Algeria independent on July 3, 1962; by October, 1963, all agricultural land held by foreigners had been expropriated and by 1965 more than 80 per cent. of the French population had left Algeria. More have left since.

Ben Bella was elected President of the Republic in Sept., 1963, but was deposed and a Council of the Revolution presided over by Col. Boumedienne assumed power on June 19, 1965.

Development in Algeria is regulated by a series of national development plans. The 1970-73 plan provided for expenditure of approximately £3,200 million, with particular emphasis being placed on industrial development. The 1974-77 Plan provides for expenditure of the order of £13,000 million, and places greater emphasis on infrastructure development, and the social services.

Trade with U.K.

	1973	1974
Imports from U.K. . . .	£37,900,000	£54,700,000
Exports to U.K.	45,700,000	36,100,000

Algeria's main exports are crude oil and liquefied

natural gas. Principal imports from the United Kingdom are capital plant and equipment for industrial use.

Algeria's main industry is the hydrocarbons industry. Oil and natural gas are pumped from the Sahara to terminals on the coast before being exported; the gas is first liquefied at liquefaction plants at Skikda and Arzew.

Other major industries being developed include a steel industry, motor vehicles, building materials, paper making, chemical products and metal manufactures. All major industrial enterprises are now under State control.

Algeria has a rapidly expanding network of roads and railways. Considerable sums are also being spent on the development of the State airline, the national shipping company and telecommunications.

CAPITAL.—Algiers, population (census of 1966), 943,000. The large numbers of French inhabitants who left the country have largely been replaced by an influx of Algerians to the city. Other towns include Oran (328,000); Constantine (254,000); Annaba (formerly Bône) (168,000); Blida (99,000); Setif (98,000); Sidi-Bel-Abbès (91,000); Tlemcen 87,000; Mostaganem (75,000); Skikda (formerly Philippeville) (72,000); El Aznam (formerly Orleansville) (70,000) and Tizi Ouzou (53,000).

FLAG.—Red crescent and star on a vertically divided green and white background.

NATIONAL DAY.—November 1.

BRITISH EMBASSY

Résidence Cassiopée, 7 Chemin de Glycines, Algiers.

Ambassador Extraordinary and Plenipotentiary, His Excellency John Armstrong Robinson, C.M.G. (1974).

Cultural Attaché, British Council Representative, K. R. Hunter, 6 Avenue Soudani Boudjemaa, Algiers. There is a British Council library in Algiers.

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France, with an approximate area of 180 square miles and population of about 28,500, one-third of whom are native Andorrans. It is surrounded by mountains of 6,500 to 10,000 feet. Historians place the origin between the eight and ninth centuries. Andorra is divided into six Parishes, each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-four. Constitutionally, the sovereignty of Andorra is vested in two "Co-Princes", the President of the French Republic and the Spanish Bishop of Urgel. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. They are represented by Permanent Delegates of whom one is the French Prefect of the Pyrenees Oriental Department at Perpignan and the other is the Spanish Vicar-General of the Diocese of Urgel. They are in turn represented in Andorra la Vella by two resident "Viguiers" known as the Viguié Français and the Viguié Episcopal, who have a joint responsibility for law and order and overall administration policy, together with judicial powers as members of the Supreme Court.

The official language of the country is Catalan, but French and Spanish are also spoken. Spanish *pesetas* and French *francs* are the accepted currency and the Budget is expressed in *pesetas*. A good

road crossing the Valleys from Spain to France is open all year. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 2,250,000 tourists visit the Valleys during the year.

There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

CAPITAL: Andorra la Vella (population 11,000).

FLAG.—Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.

H.M. Consul-General, L. J. Evans (*Resident at Barcelona*).

ANGOLA

President, Dr. Agostinho Neto.

Angola, which has an area of 488,000 square miles lies on the western coast of Africa; its population in 1970 was 5,673,046 although in the wake of fighting between the rival liberation movements, the white population, formally of several hundred thousand has been greatly reduced, by a mass exodus.

After a Portuguese presence of at least four centuries, and an anti-colonial war since 1961, Angola became independent on Nov. 11, 1975 in the midst of civil war. Soviet-Cuban military assistance to the Popular Movement for the Liberation of Angola (M.P.L.A.) enabled it to defeat its South African-assisted rivals early in 1976. Cuban troops remain in Angola which has entered a period of reconstruction.

Angola exports diamonds, iron ore, oil and coffee.

CAPITAL.— Ψ Luanda (346,763 in 1970).

FLAG.—Red and black with a yellow star, machete and cog-wheel.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E, long, and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from 'Aqaba at the head of the Gulf of 'Aqaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in

Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

3rd Secretary, José Crescencio Quijano.

Consulate-General, 53 Hans Place, S.W.1 (01-584 1701).

There is also a Consulate in *Liverpool*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries; on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Río Negro; and south of the

Río Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Córdoba by the San Luis and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south Colorado and Río Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 22 provinces, one territory (Tierra del Fuego) and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with a population (Census of 1970) of 23,360,000 (male 11,600,000; female 11,760,000).

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán.

Following months of crisis, marked by political

and economic uncertainty, and continuous violence from guerrilla forces, President María Estela Perón temporarily relinquished her powers on September 14, 1975, and handed over power to her constitutional successor, Sr. Italo Argentino Luder, speaker of the Senate.

President Perón resumed her powers on October 16, 1975, but continuing political and labour unrest, together with increased terrorist activity and the lack of any effective Government, led inevitably to a reluctant *coup d'état* by the Armed Forces Commanders, which took place bloodlessly on March 24, 1976; President Perón and many of her senior advisers and officials of her Government were arrested. A Junta, consisting of the three commanders of the Armed Forces, was established and one of their number, Lt.-General Videla, was also sworn in as President on March 29, 1976.

Agriculture.—Of a total land area of approximately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar, fruit and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export trade in many others. Pastoral and agricultural products provide about 85 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Ríos, Córdoba and La Pampa.

The following table shows the yield of some of the more important crops:

	1973-74 metric tons
Maize.....	9,900,000
Wheat.....	6,560,000
Linseed.....	297,000
Oats.....	561,000
Barley.....	732,000
Rye.....	613,000
Rice.....	316,000
Sunflower seed.....	970,000
Cotton (gross bulk production).....	418,400
Sugar cane.....	15,536,000
Millet.....	228,500
Tobacco.....	97,700
Soya.....	496,000

Livestock.—Livestock population in 1975 was: cattle, 57,000,000; sheep, 42,000,000; and pigs, 4,000,000. Meat exports to UK fell from 38,373 tons in 1974 to 19,558 tons in 1975. 11,975,602 cattle were slaughtered in 1975 (1974, 10,000,000).

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquén), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also a natural gas pipeline from the same source to the outskirts of Buenos Aires. Another project of importance was the construction of the natural gas pipeline between Neuquén and Bahía Blanca, completed in 1970. The production of oil is of first importance to Argentina's industries and, to

some extent, to her economic and financial development. Total petroleum output for 1975 was 22,953,000 cubic metres compared with 24,247,000 cubic metres in 1974.

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold, silver and tin. Coal production in 1975 was 502,300 tons, compared with 695,000 tons in 1974; this is produced at the Río Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural resources, especially copper for which the Government and private companies are carrying out exploration.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile, plastic and machine tool industries and engineering, especially in the production of motor vehicles and steel manufactures.

Communications.—There are 25,386 miles of railways of which 14,000 miles are broad gauge (5' 6"), 2,000 miles standard (4' 8½"), 8,720 miles of narrow 1 metre, 537 miles of 0·75 metre and 129 miles of 0·60 metre. They are all State property. Plans are in hand for complete re-organization of the railways in order to improve their operating efficiency and reduce a very large financial deficit. The combined national and provincial road network totals approximately 137,000 miles of which 23,180 miles are surfaced. There are air services between Argentina and all the neighbouring republics, Europe, Asia, Canada, the U.S.A. and South Africa. Total tonnage entering Argentine ports in 1974 was 12,179,235.

There are 16 short-wave broadcasting stations, 150 medium wave (of which 65 are official). In addition there are 65 television stations, of which 4 are in Buenos Aires. About 3·8 million television receivers are in use.

Defence.—The Army consists of four corps organized into ten brigades, including mountain, jungle, airborne and armoured troops. It numbers about 5,000 officers, 15,000 N.C.O.s and 65–70,000 conscripts who serve 1 year.

The Navy consists of 2 cruisers, 1 aircraft carrier, 9 destroyers, 4 frigates/corvettes, 4 submarines, 4 minesweepers, 1 minehunter and ancillary craft. Strength is about 3,000 officers and 30,000 ratings, including 11,000 conscripts.

The Air Force consists of 5 brigades and a training force, with a strength of 1,600 officers, 15,000 other ranks and 20,000 civilians. Aircraft total 321, including Meteor IV's, Skyhawk A.4 BS1, Lockheed C130, Fokker F27, Fokker F28, HS.748 and Mirage III.

Education—Primary and Secondary. The educational reform programme has been frozen since early 1971. The government is formulating a new education policy. At the moment, education is compulsory for the 7 grades of primary school (6 to 13). Secondary schools (14 to 17+) are available in and around Buenos Aires and in most of the important towns in the interior of the country. Most secondary schools are administered by the Central Ministry of Education in Buenos Aires, while primary schools are administered by the Central Ministry or by Provincial Ministries of Education. Private schools, of which there are many, are also loosely controlled by the Central Ministry. *Teacher-Training* now takes place at

post school level, courses lasting from 2 to 4 years. **Universities**—Many new universities have been created over the last two years. The total is now over 50 with 24 national (including the Federal Technological University), 25 private and a small number of provincial universities.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the first Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. About 450 daily newspapers are published in Argentina, including 7 major ones in the city of Buenos Aires. The English language newspaper is the *Buenos Aires Herald* (daily). There are several other foreign language newspapers.

Attachés, Dr. Ernst Menhofer (Press); Dr. P.

Marginter (Cultural); Mrs. A. Schmidt, Mrs. D.

Baldwin (Administration); Mrs. T. Stockert

(Social Welfare); Mrs. M. Ballod (Consular).

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population (1975), 7,519,900.

Government.—The Austrian Federal Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-

Hungarian Empire. In March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German *Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely-elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 183 Deputies. In the elections of October, 1975, the Socialists won an overall majority of the votes.

The state of the parties in June 1976, was:

Socialist Party	93
People's Party	80
Freedom Party (right wing)	10

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 15 and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz, Innsbruck, Salzburg, Linz and Klagenfurt.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are 6 daily papers in Vienna and 24 in the provinces, as well as numerous weeklies and monthlies.

Communications.—Internal communications in Austria are partly restricted because of the mountainous nature of the country, and road and rail routes must, of necessity, follow the river valleys. The railways in Austria are state-owned and have 5,901 km. of track of which 2,721 km. had

been electrified by June, 1976. While road surfaces in many cases are not up to British standards, the main roads linking the major towns are generally good and relatively fast. The *Westautobahn*, completed in 1967, links Munich, Salzburg, Linz and Vienna. A second major autobahn (*Inntal Autobahn*) is now complete between Kufstein, Innsbruck and the Brenner Pass, thus linking the West German and Italian autobahn networks through Austria. A third major autobahn (*Südatobahn*) linking Vienna with Graz, Klagenfurt and Villach is under construction and about half of it is already open for use.

Production and industry.—Agriculture is an important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth, about 39 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hardwood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1975 include (in thousands of metric tons): pig iron 3,055.8, steel 4,068, rolled products 2,857. Raw magnesite, nitrogenous fertilizers, paper, chemical pulp and synthetic fibres are produced in quantity. In addition, motor cycles, scooters, buses, tractors and motor lorries are produced.

Energy.—Of Austria's energy requirement in 1975, 42.8 per cent. was supplied from internal sources. Production of crude oil in Upper and Lower Austria amounted to 2 million metric tons in 1975, 25 per cent. of annual consumption. Imports of crude oil were 6 million tons, of which 2.8 million came from Iraq, 1.1 million from the U.S.S.R., 0.95 million from Libya and 0.57 million from Iran. Austria produced 1.8 billion cubic metres of natural gas in 1975 and imported 1.7 billion cubic metres from the U.S.S.R. Production of electric power in 1975 amounted to 35 million mwh and net exports of electric power were 4.5 million mwh. A 700 mw nuclear power station is under construction, due to commence operation in the summer of 1977 and tenders have been issued for a second.

Minerals.—There are iron ore and oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

BAHRAIN EMBASSY IN LONDON

98 Gloucester Road, S.W.7

[01-370 5132]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ali Ibrahim Al-Mahroos.

Minister Plenipotentiary, Dr. Wasfi Nimer.

1st Secretary, Mustafa Kamal Mohamed (*Consul*).

2nd Secretary, Ebrahim Salahudin Ebrahim.

Area and population.—Bahrain consists of a group of low-lying islands situated about half-way down the Gulf, some 20 miles off the east coast of Arabia. The largest of these, Bahrain island itself, is about 30 miles long and 10 miles wide at its broadest. The capital, Manama, is situated on the north shore of this island. The next largest, Muharraq, with the town and airfield of the same name, is connected to Manama by a causeway 1½ miles long.

The Population (1971) is 216,000. There are about 5,000 British, 2,500 other Europeans and Americans, and 30,000 other resident foreigners, of whom about half are Iranians, Indians and Pakistanis. The Bahrainis are about equally divided between Sunnis and Shias; the ruling family and many of the most prominent merchants are Sunnis.

Climate.—The climate is humid all the year round, with rainfall of about 3 in., concentrated in the mild winter months, December to March; in summer, May to October, temperatures can exceed 110°F.

Economy.—The largest source of revenue is oil. The Bahrain field, discovered in 1932, is now owned 60 per cent. by the Government, represented by the Bahrain National Oil Co., and 40 per cent. by the Bahrain Petroleum Co. (BAPCO), a Caltex subsidiary, which operates the field. Production in 1975 was 22.3 million barrels. BAPCO owns the Sitra refinery, which derives about 70 per cent. of its crude by submarine pipeline from Saudi Arabia. Bahrain also has a half share, with Saudi Arabia, in the profits of the offshore Bu Sa'afa field. A reservoir of unassociated gas has recently been developed on Bahrain Island.

The second source of revenue is the *entrepôt* trade to the mainland and to other Gulf states. This has fallen from some 70 per cent. of all imports a few years ago to about 35 per cent., in spite of the encouragement of a free transit area in the port.

Heavy industry is limited to the Aluminium Bahrain smelter, with an annual capacity of 120,000 tonnes of ingots, billets and slabs; it uses alumina from Australia and the local natural gas. The Bahrain Government owns 77.9 per cent. of the shares. A dry dock able to take tankers of 500,000 dwt is under construction for a consortium of the OAPEC countries.

The pearling industry, once the basis of the economy, has virtually ceased to exist. There is however a variety of light industries, and construction is thriving.

The state is being developed as a financial centre. Apart from commercial banks, led by the National Bank of Bahrain, the Chartered Bank, the British Bank of the Middle East and the Bank of Bahrain and Kuwait, many international banks are being licensed as "offshore banking units"; there are also money brokers and merchant banks.

The currency is the Bahraini Dinar (BD) divided into 1,000 fils. In June 1976 it was worth approximately US \$2.53.

Trade with U.K.

	1974 million	1975 million
Imports from UK.....	BD25.7	BD42.8
Exports to UK.....	2.6	1.9

Communications.—The port of Mina Sulman has six alongside berths for ships up to 30' draft, and is being extended and deepened.

Muharrarq airport is the main air traffic centre of the Gulf; it is the headquarters of Gulf Air, and a stopping point on routes between Europe and Australia and the Far East, including British Airways Concorde.

A world-wide telephone and telex service, by satellite, is operated by Cable and Wireless Ltd.

FLAG.—Red, with vertical serrated white bar next to staff.

CAPITAL.—Manama; population (1971) 89,608.

BELGIAN EMBASSY IN LONDON.

Chancery and Passport Office, 103 Eaton Square, S.W.1.

[01-235 5422]

Ambassador Extraordinary and Plenipotentiary, (vacant).

Minister Counsellors, M. Henri J. Perdieu; M. J. Kadik (Economic Affairs).

Counsellors, M. C. Fellens (Culture and Information); M. Roger P. Martin; M. A. Adam; M. Maurice Cammaerts (Agriculture).

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, (Dec., 1970) of 9,650,944. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 898 miles, and a seaboard of 41 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Signal de Botranges, rises to a height of 2,276 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is divided linguistically between those who speak Dutch (the Flemings, who occupy the North) and those who speak French (the Walloons, who occupy the South) with a small German-speaking region east of Liège. Nearly all Belgians are Roman Catholics.

Government.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 4, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September 1944. A monument at Herta in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 106 members out of 181 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The last election for the Chamber of Deputies was held on March 10, 1974, and M. Tindemans's Social Christians' Party won 32 per cent. of the votes. The results were as follows:

	Seats	
	1974	(1971)
Social Christians.....	72	(67)
Socialist.....	59	(61)
Liberals.....	30	(31)
French-speaking bloc.....	25	(27)
Flemish Nationalist "People's Union".....	21	(21)
Communists.....	4	(5)

Elections were also held for the Senate, 106 of whom were directly elected, 50 were appointed by the newly-elected provincial councils, and 25 co-opted

by secret ballot. The overall distribution of seats in the Senate was as follows (1971 results in parentheses): Social Christians, 66 (61); Socialists, 50 (49); Liberals, 27 (29); French-speaking bloc, 21 (19); Flemish Nationalists, 16 (19); Communists, 1 (1). H.R.H. Prince Albert is also a member of the Senate.

On April 24, 1974, M. Tindemans formed a minority coalition Government of Social Christians and Liberals, who were sworn in on April 25. M. Tindemans has since re-shuffled his Government on two occasions, and he has enlarged it to include the French-speaking Rassemblement Wallon.

Production.—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly averaged some 30,000,000 tons but which dropped to 8,841,000 metric tons in 1973 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. In 1973 about 4.1 per cent. of the active population was engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Crude steel output in 1973 was 15,527,000 metric tons.

Education.—The budget for education (over 100,000,000,000 Belgian francs) represents approximately a quarter of the national budget and does not include the amount spent by the Communes, provinces and the church in subsidized schools. The nursery schools provide free education for the 2½ to 6 age group. There are over 8,000 primary schools (6 to 12 years) of which approximately 5000 are administered by the State, province or commune and the remainder are free institutions (predominantly Roman Catholic). There are more than 1,100 secondary schools offering a general academic education slightly over half of which are free institutions (predominantly Roman Catholic but subsidized by the State) and the remainder official institutions. The official school leaving age is 14.

Language and Literature.—Dutch is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of

Brabant, and French in the provinces of Hainault, Namur, Luxembourg, Liège and the southern half of Brabant. Dutch is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. Brussels is officially bi-lingual.

In July, 1971, the Belgian Parliament passed three Bills together implementing the constitutional amendments introduced in December 1970, to ease friction between the French-speaking and Dutch-speaking communities. The first Bill established a cultural council for each linguistic group, in operation from Dec. 1, 1971, all members of the Chamber of Representatives and the Senate being members of one council or the other. A Cultural Council for the German-speaking community also has since been established. The second Bill defined the powers of the cultural councils, providing that the councils would be responsible for certain aspects of cultural life; commissions for co-operation with the other council would be set up, with a statutory obligation to hold at least two meetings with the other council in each Parliamentary session. The third Bill provided for the establishment of five "agglomerations" of municipalities centred on Antwerp, Brussels, Charleroi, Ghent and Liège and the federation of small municipalities, with special provision in respect of the border boroughs of Brussels (which have a predominantly Flemish population) designed gradually to reduce the influence of the French speakers in that area. Regional councils for Flanders, Wallonia and Brussels were established in 1974.

The literature of France and the Netherlands is supplemented by an indigenous Belgian literary activity, in both French and Dutch. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Emile Verhaeren (1855-1916) was a poet of international standing. Of contemporary Belgian writers, perhaps the most celebrated is Georges Simenon (born at Liège in 1903). There are 45 daily newspapers (French, Dutch and some German) in Belgium.

FINANCE

Ordinary Budget	1973 B. Fr.	1974 (millions)
Revenue.....	406,642	472,623
Expenditure.....	406,642	473,303

Extraordinary Budget

Revenue.....	802	604
Expenditure.....	86,900	82,610

The unit of currency is the Belgian franc. Since June 1972 there has been no fixed rate. (See also p. 83)

TRADE

	1972 ('000 Francs)	1973 ('000 Francs)
Total Imports.....	681,772,789	852,639,796
Total Exports.....	710,979,595	870,244,933

Trade with U.K.

	1972	1973
Imports from U.K....	£385,700,000	£612,200,000
Exports to U.K.....	309,500,000	434,300,000

COMMUNICATIONS.—On Dec. 31, 1972, there were 4,080 kilometres of normal gauge railways operated by the Belgian National Railways, of which 1,232 kilometres were electrified; the length of regional railways operated in 1973 was 215.8 kilometres. Belgian National Railways also operate 4,425 kilometres of regular bus routes. Other operators run 14,179 km. of bus routes. On Dec. 31, 1973, there were 1,625,726 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825-27) which permits the passage to Ghent of ships up to 60,000 tons; the Canal of Willebroeck *Rupel-Brussels* (20 miles, by which ships drawing 18 ft reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The *Albert Canal* (79 miles), which figured prominently in the fighting (Sept. 1944) for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 and accommodates barges up to 1,350 tons. The modernization of the port of Antwerp begun in 1956 is well advanced. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal are being widened or deepened to take barges up to 1,350 tons.

In 1973 there were 12,830 km. of trunk roads of which about 1,030 km. are motorways. Most of the maritime trade of Belgium is carried in foreign shipping, the mercantile marine consisting (1973) of 89 vessels (1,091,984 metric tons), in addition to which there were 268 fishing boats.

The Belgian National Airline *Sabena* operates regular services between Brussels and London, and many continental centres, as well as overseas services to the United States, Zaire, Canada, Mexico, Guatemala, Middle East, Far East, India, etc. Many foreign airlines call at Brussels.

CITIES AND TOWNS

The Capital, BRUSSELS, had an estimated population (Dec. 31, 1971) of 1,075,000 (with suburbs). Other towns are Ψ Antwerp, the chief port (67,259); Ψ Ghent (229,687), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (446,990), the centre of the iron industry, and Charleroi (218,089), the important coal-mining and metallurgical centre; Ψ Bruges (118,000); Ψ Ostend (47,230); Malines (67,730). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, 1 hr.

NATIONAL FLAG.—Three vertical bands, black, yellow, red.

NATIONAL DAY.—July 21 (Accession of King Leopold I, 1831).

British Council Representative to Belgium and Luxembourg, C. H. Whistler, Galilée Building, Avenue Galilée 5, 1030, Brussels (Council Library at Brussels).

BRITISH CHAMBER OF COMMERCE FOR BELGIUM AND LUXEMBOURG (INC.), 30 Rue Joseph II, 1040 Brussels.

BENIN

(People's Republic of Benin)

President of the Military Revolutionary Government and Head of State, Lt.-Col. Mathieu Kerekou; assumed office, October 26, 1972.

A republic situated in West Africa, between 2° and 3° W. and 6° and 12° N., Benin (formerly known as Dahomey) has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by Upper Volta and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population (estimate, 1973) of 2,948,000. Although poor in resources, Benin is one of the most thickly populated areas in West Africa, with a high level of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of inter-communicating lagoons, a clay belt and a sandy plateau in the north.

The first treaty with France was signed by one of the kings of Abomey in 1811 but the country was not placed under French administration until 1892. Benin became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. In October, 1963, a popular revolution led to the fall of the government of the first President of Benin, Hubert Maga. The Army held power until Sourou-Migan Apithy was elected President and Justin Ahomadegbé Chief of Government in January, 1964, after a new constitution had been agreed. This government was overthrown in November, 1965, following a long-standing disagreement between Maga and Apithy. It was replaced by President Tahirou Congacou, who was in turn dismissed in December of the same year by the Army. Christophe Soglo then assumed control and dismissed the Assembly. Soglo was in his turn overthrown by an Army *coup d'état* on December 17, 1967. Seven months later Dr. Zinsou was installed, with the support of the Army, as President, an appointment which was confirmed by a national referendum on July 28, 1968.

Dr. Zinsou was overthrown by a military coup on December 10, 1969 and for five months the country was ruled by a military "Directoire". Following abortive elections in March, 1970, a Presidential Council was set up in May, 1970 consisting of MM. Maga, Ahomadegbé and Apithy, with M. Maga as President of the Council and Head of State. He was succeeded in May, 1972 by M. Ahomadegbé, who in turn would have been succeeded in May 1974 by M. Apithy, but for the *coup d'état* of October 26, 1972 which brought the Military Revolutionary Government, headed by Lt.-Col. Kerekou, to power.

Benin is a member of the *Conseil de l'Entente*, the *Organisation Commune Africaine et Malgache* (OCAM) and the Organization of African Unity (O.A.U.). The official language is French.

Finance.—The currency of Benin is the *Franc CFA* (Francs CFA 50=1 French Franc) (Francs CFA 450=£1, June, 1975).

Trade.—The principal exports are palm products (80 per cent.) followed by ground nuts, shea-nuts and coffee. Small deposits of gold, iron and chrome have been found.

Trade with U.K.

	1973	1974
Imports from U.K....	£2,032,006	£3,605,289
Exports to U.K.....	53,595	457,891

CAPITAL.—Porto Novo (85,000). Principal commercial town and port, Cotonou (120,000).

FLAG.—Three stripes, one vertical, green, two horizontal yellow and red.

NATIONAL DAY.—August 1.
British Embassy (see Togo).

BHUTAN

King of Bhutan, Jigme Singye Wangchuck, born 1955; succeeded his father, July, 1972; crowned, June 2, 1974.

Bhutan, with an area of about 18,000 sq. miles and an estimated population (1972) of 1,010,000, mainly Buddhists, is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a State of the Indian Union. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives at the United Nations as well as in India. It also receives from the Government of India an annual payment of Rs.500,000 as compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. A motor road runs 107 miles from Paro, the winter capital, to Phuntsholing in W. Bengal. Three other roads linking Bhutan with India are under construction or projected. The Government of India has a diplomatic representative in Bhutan.

CAPITAL. Thimphu. *FLAG.*—Orange and crimson divided diagonally, with dragon device in centre.

BOLIVIA

(República de Bolivia)

President, Col. Hugo Banzer, assumed office Aug. 22, 1971.

BOLIVIAN EMBASSY IN LONDON

106 Eaton Square, S.W.1.

[01-235 4248]

Ambassador Extraordinary and Plenipotentiary, His Excellency General Rogelio Miranda Baldvina (1974).

Consulate, 106 Eccleston Mews, S.W.1.

1st Secretary, Srta. Marta Bosacomá Bonel.

Mining Attaché, Sr. H. Zannier.

There are Bolivian Consular Offices in Liverpool, Birmingham and Hull.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W. It has an area estimated at 415,000 square miles with an estimated population (1970) of 4,658,000. (For MAP, see Index.) The Republic derives its name from its liberator, Simón Bolívar born 1783, died 1830).

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenez, Beni, Mamore and Madre de Dios.

President Barrientos, who had held office since his election on July 3, 1966, was killed in a helicopter accident on April 27, 1969, and in accordance with the Constitution was succeeded by Vice-President Dr. Luis Adolfo Siles Salinas. On Sept. 26, 1969, the armed forces overthrew the constitutional Government and set up a civilian-military government under the Presidency of General Ovando. On October 7, 1970, Gen. Torres assumed the

Presidency after defeating the right-wing military group which had overthrown the Government of Gen. Ovando only the day before, and held office until August 22, 1971.

A *coup d'état* occurred in August 1971, when, after reported heavy fighting, the President was ousted by Army leaders headed by Col. Hugo Banzer, Gen. Florentino Mendieta and Col. Andres Selich. Col. Banzer was proclaimed President in La Paz on Aug. 22, and subsequently formed a national front embracing the Armed Forces and the two leading political parties. However, the political parties have now been excluded, and no elections will be held until 1980.

Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaysia, the largest in the world. Copper, antimony, lead, zinc, asbestos, wolfram, bismuth salt and sulphur are found, and petroleum is also produced.

The Republic is now a net oil exporter. Production of crude oil in 1975 totalled 14,500,000 barrels (of 42 U.S. gallons). The Bolivian Gulf Oil Company was nationalised on October 17, 1969, and shortly afterwards exports diminished (4,662,004 barrels in 1970 compared with 8,807,834 barrels in 1969). Exports rose in 1975 to 40,000 barrels per day. Bolivia's agricultural produce consists chiefly of rice, barley, oats, wheat, sugarcane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, etc. The development of manufacturing industry progresses slowly. However, Bolivia has joined the Latin American Free Trade Area, and on May 26, 1969, signed the Andean Pact which is designed to secure economic integration and co-operation within the Andean Group of countries. Total Exports (F.O.B.) in 1975 were U.S. \$500 million.

Transport and Communications.—There are 2,200 miles of railways in operation including the lines from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312 miles). There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Río Mulato to Potosi, and from Potosi to Sucre, the legal capital. The Antofagasta (Chile) and Bolivia Railroad was formerly an all-British concern, but the Bolivian sector has now been nationalised. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railhead at Puno.

Commercial aviation in Bolivia is conducted by Braniff International Airways (American), Lufthansa, Iberia, Aerolineas Argentinas, and Lloyd Aereo Boliviano (Bolivian), providing international connections with U.S.A., West coast South American countries, Canal Zone, Europe and Argentina; Lloyd Aereo Boliviano, maintaining a service to Lima, São Paulo, Buenos Aires, Arica and Miami, and attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, etc. and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones and Antofagasta by the "Pacific War" of 1879-1884.

Language and Literature.—The official language of the country is Spanish, but many of the Indian

inhabitants (about two-thirds of the population) speak Quechua or Aymará, the two linguistic groups being more or less equal in numbers.

The Roman Catholic religion was disestablished in 1961 but relations between it and the State are good. Elementary education is compulsory and free and there are secondary schools in urban centres. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are six other universities, the largest being the University of San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are twelve principal daily newspapers in Bolivia, with an estimated daily circulation of 150,000.

FINANCE

The Budget for 1974, which included State industrial organisations (except the State Mining Corporation) and local authorities, envisaged an expenditure of \$26,742,172,500 showing a small deficit of just over \$349,000,000.

The Bolivian currency, after remaining stable for 15 years at 12 pesos to the U.S. dollar, was devalued in October 1972; the new rate is 20 pesos. A stand-by credit of U.S. \$30,000,000 was granted by the I.M.F. and a stabilisation programme set up to effect a faster rate of growth and a balancing of the National Budget. Exchange cross-rate \$548.2 = £1 (1974) (see also p. 83).

Bolivia has benefited considerably from the high prices of basic materials, notably oil, gas and tin, and her foreign exchange earnings for 1974 were U.S. \$560,000,000.

Trade with U.K.

	1974	1975
Imports from U.K.	£4,300,000	£5,279,000
Exports to U.K.	9,700,000	19,007,000

The principal exports are tin ore (most of which is exported to the U.K.), oil and gas, lead and antimony ores, silver, copper, wolfram, zinc, gold, nuts, hides and skins, cotton and coffee. The chief imports are wheat and flour, iron and steel products, machinery, vehicles and textiles.

Seat of Government.—La Paz. Population (estimated 1970) 553,000. Other large centres are Cochabamba (149,000), Oruro (119,700), Santa Cruz (124,900), Potosi (96,800), Sucre, the legal capital and seat of the judiciary (84,900) and Tarija (35,700).

FLAG: Three horizontal bands; Red, yellow, green.

NATIONAL DAY.—August 6 (Independence Day).

BRITISH EMBASSY.

Casilla 694, La Paz.

Ambassador Extraordinary and Plenipotentiary, His Excellency Ronald Christopher Hope-Jones, C.M.G. (1973).

1st Secretary, M. S. Green (Commercial and Head of Chancery).

Defence Attaché, Captain D. L. G. James, R.N. (resident in Lima, Peru).

2nd Secretaries, Miss J. D. Robertson (Aid and Information); B. A. Barrett (Administration and Consul).

There are also a Brazilian Consulate-General at Liverpool and honorary consular offices at Cardiff, Newcastle upon Tyne, and Glasgow.

POSITION AND EXTENT

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles, with a population (1975) of 107,145,168.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra da Mantiqueira* (Itatiaia, 9,163 feet) and the *Serra do Espinhaço* (Itacolumi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paraná*, between Goiás and Minas Gerais, the *Serra dos Aimorés*, which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia, Branca and Araripe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco, Rio Negro, and Japurá*; its southern tributaries are the *Juruá, Purus, Madeira and Tapajós*, while the *Xingú* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from the Plateau of Mato Grosso and the mountains of Goiás to the Gulf of Pará. The *Parnaíba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguaçu* or *Iguassú*, which unites with the Upper *Paraná* at the Brazil-Argentine-Paraguay boundary, are the majestic Falls of the *Iguaçu* (200 ft.), and on the *São Francisco* are the no less famous falls of *Paulo Afonso* (260 ft.).

Government.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed.

In October 1969, Congress confirmed the appointment of General Emílio Média as President for five years. A series of amendments to the Constitution came into effect on October 30, which codified the powers assumed by the régime, and which laid down that subsequent Presidents should be elected by an electoral college; previously the President had been chosen by the military, and approved by Congress. In January 1974, 66 Senators, 310 Deputies, and 127 delegates from the State Legislatures elected General Ernesto Geisel, the candidate of the Government party, to succeed President Médici, whose term of office was due to expire in March 1974.

Production.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is being exploited to an increasing extent. The iron ore deposits of Minas Gerais and the untapped ones of the Amazon region are particularly rich and plans for mining them are advanced. Production is increasing all the time.

In 1974 10,114,294 cubic metres of oil was produced; 7,504,000 tons of steel ingots and almost 23,000,000 cubic metres of refined petroleum (including refining of imported oil); 59,000,000 tons of iron ore were exported at a value of U.S. \$571,000,000.

Total foreign private investment in Dec. 1974 was estimated at almost U.S. \$6,027,000,000.

In 1974 the Brazilian automobile industry produced 858,500 vehicles.

The main exports of agricultural produce in 1974 were:

	Metric tons	Value U.S.\$
Coffee.....	731,000	1,002,000,000
Sugar.....	2,249,000	1,259,000,000
Soya.....	4,754,000	888,000,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

Defence.—The peace-time strength of the Army is 180,000 of which some 70 per cent are doing military service, with an immediate reserve of 250,000. The Navy consists of 1 Aircraft Carrier, 14 Destroyers and Escorts, 8 Submarines, 6 Minesweepers, 6 Survey Vessels, 10 Corvettes (tugs), 45 other vessels and 3 helicopter squadrons. The strength of the Navy is 57,000 including 13,000 marines. The Air Force, with a strength of 44,000, including approximately 1,600 pilots and aircrew, has 650 aircraft and is the largest in South America.

Education.—Primary education is compulsory and is the responsibility of State governments and municipalities. At this level approximately 10 per cent attend private schools. Secondary education is largely the responsibility of the State and Municipal Governments, although a small number of very old foundations (the Pedro II Schools) remain under direct Federal control. Over 50 per cent. of all pupils at this level attend Private Schools. Higher education is available in Federal State, Municipal and private universities and faculties.

Language and Literature.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers.

Communications.—In 1973 there were about 30,394 kilometres of railways in service, largely of 1 metre gauge, but including 3,880 kilometres of other gauges. During 1974, the ports of Brazil were used by 31,331 vessels, shipping a total of 110,348,000 tons. There are 7,800 kilometres of navigable inland waterways.

Varig of Brazil and 11 foreign airlines operate services between Brazil and Europe, 3 between Brazil and U.S.A., and there are connections with all Latin American countries. Four major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country.

FINANCE

	1972 Cruzeiros '000	1973 Cruzeiros '000
Revenue.....	39,419,929	52,726,000
Expenditure.....	38,198,339	50,767,000

In Dec. 1974, Brazil's foreign debt stood at U.S. \$16,100,000,000. Reserves in Feb. 1975 were \$4,750,000,000. The rate of exchange in May 1975 was Cr \$79 = U.S.\$1.

TRADE (1975)

Total Imports.....U.S.\$12,260,000,000
Total exports.....U.S.\$ 9,420,000,000

Trade with U.K. (1975)

Imports from U.K.....£160,890,000
Exports to U.K.....174,883,000

The principal imports in 1971 and 1972 were machinery and aircraft, foodstuffs, raw materials, oil and chemicals, and manufactured goods. Principal exports were coffee, manufactured goods, iron ore and other minerals, foodstuffs and fruits.

CAPITAL.—Brasília (inaugurated on April 21, 1960). Population (estimated 1970), 544,862. Other important centres are São Paulo (5,901,553); the former capital Ψ Rio de Janeiro (4,296,782); Ψ Belo Horizonte (1,232,708); Ψ Recife (1,078,819); Ψ Salvador (1,000,647); Ψ Porto Alegre (885,567); and Ψ Fortaleza (842,231).

FLAG.—Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

NATIONAL DAY.—September 7 (Independence Day).

Military, Naval and Air Attaché, Lt-Col. Dimitar Petkov Toskov.

Deputy Commercial Counsellor, Genadi M. Pankin.

1st Secretary, Mladen Galabov.

The Republic of Bulgaria is bounded on the north by Rumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population in December, 1972 of 8,594,493. The largest religion of the Bulgarians is the Bulgarian Orthodox Church. The Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobruja to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobruja to Bulgaria.

On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465.

On May 16, 1971 a referendum was held, at which a new Constitution was adopted. According to the Constitution the legislature is a single chamber National Assembly of *Subranie* elected by adult suffrage for a maximum term of 5 years and consisting of 400 deputies representing constituencies of equal size. The 1971 Constitution also established the Council of State, being the supreme permanent body of the National Assembly with both legislative and executive functions. The opposition Agrarian Party was suppressed in 1947, but its remnant was later revived as the Agrarian Union which now constitutionally shares power with the Communist Party.

Production.—Until 1939 Bulgaria was a predominantly agricultural country, but has since pursued an elaborate programme of industrialization. About 90 per cent. of the country's agriculture has been turned over to co-operatives, and a smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The livestock includes cattle, sheep, goats, pigs, horses, asses, mules and water buffaloes.

There is now a substantial engineering industry producing *inter alia* machine tools, electric trucks of all kinds, agricultural machinery, cranes, electric motors and electronic components, which accounts for about two-thirds of Bulgaria's exports; and considerable production of ferrous and non-ferrous metals. In 1975 production of electricity was 25,232 million kilowatt-hours, of steel 2,265,000 tons and of coal 28,920,000 tons (of which about one-quarter was soft coal).

There are mineral deposits of varying importance. Bulgaria's heavy industry includes the Kremikovski Steel Plant near Sofia and the Lenin steel mill at Pernik, the chemical complex at Devnya, the petro-chemical plant at Bourgas with an annual capacity of 6 million tons of processed oil and various other chemical and metallurgical works situated around the country. The Soviet-designed nuclear power station at Kozodui will have four reactors, each with a capability of producing 800 million kilowatt-hours; at present in 1976 two are in operation.

Defence.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 152,000 strong.

Education.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1975 there were 7,553 kindergartens, and a total of 4,485 educational establishments for primary and secondary education including vocational, technical and other specialized schools for secondary age pupils. The total number of pupils attending these establishments was 1,529,857. There are three Universities (at Sofia, Plovdiv and Veliko Turnovo) and 21 higher educational establishments whose pupils total 106,055.

Language and Literature.—Bulgarian is a Southern Slavonic tongue, closely allied to Serbo-Croat and Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature chiefly educational and popular. The alphabet is Cyrillic. In 1967 there were 8 daily newspapers in Sofia.

Finance.—Estimated budget revenue for 1976 is 8,778,000,000 *levs*, expenditure 8,757,000,000 *levs*. Currency in Bulgaria is the *lev*. Rate of exchange (June 1976) was 1·65 *levs* = £1.

TRADE

The principal imports are industrial and agricultural machinery, industrial raw materials, machine tools, chemicals, dyestuffs, pharmaceuticals, rubber, paper. The principal exports are non ferrous metals, electric trucks and motors, pumps, ships, accumulators and machine tools, cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals and oils including attar of roses. In 1975 80 per cent. of Bulgaria's foreign trade was with the Soviet bloc, including about 50 per cent. with the Soviet Union.

Trade with U.K.

	1974	1975
Imports from U.K.	£18,042,000	£23,610,000
Exports to U.K.	13,549,000	7,410,000

CAPITAL.—Sofia, Pop. (1975), 965,728, at the foot of the Vitosha Range, the capital and commercial centre is on the main railway line to Istanbul, 338 miles from the Black Sea port of Varna (251,588) and 125 miles from Lom (28,500), on the Danube; Ψ Bourgas (144,000) is also a Black Sea Port, those on the Danube being Ψ Rousse (163,012), Ψ Svishtov (18,537), Ψ Vidin (43,000). Other important trading and industrial centres are Plovdiv (309,242), Pleven (108,180),

Stara Zagora (122,200), Pcrnik (87,432), Sliven (90,000), Yambol (75,861), Haskovo (75,031) and Tolbukhin (86,184).

FLAG.—3 horizontal bands, white, green, red; national emblem on white stripe near hoist.

NATIONAL DAY.—Sept. 9 (Day of Freedom).

BRITISH EMBASSY

Residence, 65 Boulevard Tolbukhin, Sofia.

Ambassador Extraordinary and Plenipotentiary, His Excellency John Cecil Cloake (1976).

3rd Secretaries, G. M. Johnson; Miss V. Lemon; M. Corbett.

BURMA

(The Socialist Republic of the Union of Burma)

Government of the Union

President, U Ne Win.

BURMESE EMBASSY AND CONSULATE

19A Charles St., Berkeley Square, W.1.

[01-499 8841]

Ambassador Extraordinary and Plenipotentiary,

His Excellency U Tha Kyaw (1975).

Counsellor, U Maung Maung Gyi.

Military Attaché, Lt.-Col. Soe Myint.

Cultural Attaché, U Mg Mg Soe Tint.

2nd Secretary, U Soe Thinn.

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 102° 9' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west and a frontier with Bangladesh along the Naaf River, defined in 1964 by a Memorandum of Agreements, and India to the north-west defined in 1967, in the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and has since been demarcated; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. (*For MAP, see Index*). The total area of the Union is about 262,000 square miles, with an officially estimated population of 30,834,000 in 1975—about 118 persons to the square mile.

Political Divisions.—The Socialist Republic of the Union of Burma is comprised of fourteen States and Divisions. Amongst the former are the Kachin State (34,000 sq. miles), Kayah State (4,500 sq. miles); Karen (formerly Kawthoolei) State (12,000 sq. miles), Chin State (14,000 sq. miles), Mon State, Arakan State and the Shan State (60,000 sq. miles).

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region) the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-

Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Thai groups. The three important non-indigenous elements are Indians, Chinese and those from the former East Pakistan. Numbers of resident foreigners have shown a sharp decline in recent years. Burmese is the official language, but minority languages include Shan, Karen, Chin, and the various Kachin dialects. English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma became an independent republic outside the British Commonwealth on January 4, 1948, and remained a parliamentary democracy for 14 years.

On March 2, 1962 the army took power, and suspended the parliamentary Constitution. A Revolutionary Council of senior officers under General Ne Win took measures to create a Socialist State in accordance with their policy statement "The Burmese Way to Socialism". The Burmese Socialist Programme or Lanzin Party was founded to provide political leadership for the country.

In January 1974 a new Constitution was adopted after a national referendum. In February elections to the People's Assembly and local councils were held. On March 2 the Revolutionary Council transferred power to the bodies elected under the new Constitution. The highest authority is the People's Assembly (450 representatives) which is expected to meet twice a year. When the Assembly is not in session the Council of State (29 members) is vested with wide powers. The senior executive body is the Council of Ministers. The Chairman of the Council of State (U Ne Win) is also President of the Socialist Republic of the Union of Burma.

Education.—The literacy rate is high compared with other Asian countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade.

Under the University Education Law of 1964, the Government reorganized the higher education system to encourage the expansion of medical and technical studies. The two existing Universities (Rangoon and Mandalay) retain their separate role but decentralisation has enhanced their facilities (at present there are two Medical Institutes in Rangoon and one in Mandalay, and an Institute of Dental Medicine in Rangoon), two independent institutes for medicine, technology, agriculture, economics, education and veterinary science. Under the two Universities are colleges at Bassein, Moulmein, Magwe, Akyab, Taunggyi and Myitkyina and the Workers' College (Rangoon).

There are teachers' training colleges in Rangoon, Moulmein and Mandalay which train junior assistant teachers and 13 State Teachers Training Institutes for primary assistant teachers. The Institute of Education in Rangoon trains senior assistant teachers and awards degrees. There are five Government technical institutes at Insein (near Rangoon), Mandalay, Kalaw, Chauk and Prome. There are 6 technical high schools, 2 in Rangoon, 1 in Mandalay, 1 in Maymo, 1 in Taunggyi and 1 in Moulmein. British aid to Burma under the Colombo Plan amounts to some £300,000 annually, over half of this being devoted to technical assistance awards.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1976-7 were: Revenue, K15,923,200,000; Expenditure, K16,726,300,000. The monetary unit is the Kyat of 100 Pyas. (For rate of exchange, see p. 83.)

Production, Industry and Commerce.—Three-quarters of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat, grain, tea, sugarcane, Virginia and Burmese tobacco, jute and rubber. Rice has traditionally been the mainstay of Burma's economy but the poor harvest of 1972-73 and increased home consumption have greatly reduced the quantity of exported rice. Exports in 1975 amounted to 283,500 tons, including by-products.

The net area sown to all crops in 1975-76 was 23,490,000 acres and reserved forests covered 37,655 square miles. The principal export after rice is teak, of which some 200,000 tons were exported annually before the war. The 1975 figure was 88,400 cubic tons.

Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum products are the most important. Oil is now being produced from oil-fields in Myanaung, Prome and Shwepyithra and at Chauk, Yenangyaung, Mann, and Letpando. Production of crude oil in 1975 totalled 236,131,000 gallons. There is a refinery at the main oilfield, Chauk, and another at Syriam near Rangoon. Their combined output of petroleum products is almost sufficient for most of Burma's needs. The production and distribution of petroleum and the importation of oil products is a monopoly of Myanna Oil Corporation (formerly Burmah Oil Company (1954), Ltd.) which is owned by the Government of Burma.

Under the Government's development plan, a cement plant, a brick and tile factory, a steel rolling mill, a jute bag and twine mill, four cotton spinning and weaving mills, a pharmaceutical plant, a large hydro-electric scheme, five sugar factories, a paper factory and a plywood factory are in operation. West German soft loans have been made available to finance construction of a glass factory, a fertilizer plant, a textile mill, a natural gas liquefying plant, a soda ash factory and a formaldehyde plant, as well as a seismic survey for crude oil sources and technical assistance in the general field of mineral exploitation.

The Japanese Government has approved a third commodity loan of US \$22,000,000. Loans amounting to US \$102,500,000 have been extended by the World Bank as follows: forestry, US \$24 million; telecommunications US \$21 million; railways, US \$16.7 million; inland water transport, US \$16.3 million; irrigation, US \$17 million; livestock development, US \$7.5 million. The Asian Development Bank has loaned US \$41,600,000 for the fishing (US \$9.8 million), rice products (US \$6.5 million) and jute mill (US \$25.3 million) industries. The UNDP Governing Council has approved US \$35,000,000 towards the Second Country Programme for Burma covering 1974 to 1978, and consisting of 52 large scale and 25 small scale projects. British grants in 1975 were £2 million for equipment, spare parts and commodities and £1.9 million for on-shore oil exploration.

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries and through the specialized agencies of the United Nations.

Trade with U.K.

	1974	1975
Imports from U.K. . . .	£4,366,000	£6,221,000
Exports to U.K.	4,099,000	2,510,000

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

Ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein. Transit from London to Rangoon: by sea, 35 days; by air, 16 hours.

The Burma Railways network covers 2,780 route miles, extending to Myitkyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and there are now 164 diesel locomotives in service, as well as 229 steam. There were 2,452 miles of Union highways and 11,429 miles of other main roads in 1975-76. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 13 miles north of Rangoon, has been reconstructed and handles international traffic.

CAPITAL.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1973), 3,186,886.

Mandalay, the chief city of Upper Burma, had a population of 781,819 in 1973, Moulmein of 679,484 and Bassein of 335,588. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

FLAG.—The Union flag is red, with a canton of dark blue, inside which are a cogwheel and two rice ears surrounded by 14 white stars.

NATIONAL DAY.—January 4.

BRITISH EMBASSY

(80 Strand Road, Rangoon.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Terence John O'Brien, C.M.G., M.C. (1974).

Social Affairs and Labour, Damien Barakamfitiye.

Public Health, Joseph Nindorera.

Formerly a Belgian trusteeship under the United Nations, Burundi was proclaimed an independent State on July 1, 1962. Situated on the east side of Lake Tanganyika, the State has an area of 10,747 sq. miles and a population (estimated, 1966) of 3,475,000. There are some 2,500 Europeans and 1,500 Asians. The majority of the population are of the Bahutu tribe, but power rests in the hands of the minority Batutsi tribe.

Burundi became independent as a Constitutional monarchy but this was overthrown on November 28, 1966. The Constitution and Parliament were also abolished. The President rules through a Cabinet of Ministers and the UPRONA party apparatus. Burundi is a one-Party State.

The chief crop is coffee, representing about 80 per cent. of Burundi's export earnings, some 87 per cent. of which is exported to the United States. Cotton is the second most important crop. Minerals and hides and skins exports are also important. Joint economic arrangements of Burundi with Rwanda ended in 1964 and each country now has its own national bank, coffee organization, etc.

Trade with U.K.

	1974	1975
Imports from U.K.	£964,000	£1,003,000
Exports to U.K.	590,000	476,000

The currency is the Burundi Franc. The rate of exchange was Bu. Fr. 16c = £1 (July 1976). Government expenditure for 1972 was Bu. Fr. 2,400,000,000 and revenue the same.

CAPITAL.—Bujumbura (formerly Usumbura), with about 70,000 inhabitants. Gitega (7,000 inhabitants) is the only other sizeable town. Official languages are Kirundi, a Bantu language, and French. Kiswahili is also used.

FLAG.—White diagonal cross on green and red quarters, with a circular white panel in the centre.

NATIONAL DAY.—July 1.

British Ambassador, His Excellency Richard James Stratton, C.M.G. (1974) (resident at Kinshasa, Zaïre).

CAMBODIA

(Democratic Cambodia)

President of the State Presidium, Khieu Samphan, acceded, April 11, 1976.

First Vice-President, Sau Phim.

Second Vice-President, Nhim Ros.

Prime Minister, Pol Pot. (replaced by Nuon Chea, Oct. '76).

Deputy Premiers, Ieng Sary (Foreign Affairs); Vorn Veth (Economic Affairs); Son Sen (Defence).

Information and Propaganda, Hou Nim.

Health, Thiounn Thioeunn.

Social Affairs, Ieng Thirith.

Public Works, Toch Phoeun.

Education and Culture, Yun Yat.

Area and Population.—Situated between Thailand and the south of Vietnam and extending from the border with Laos on the north to the Gulf of Thailand, Cambodia covers an area of some 70,000 square miles. It has a population (March, 1976) of 7,735,279. (For MAP, see Index.)

History.—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. Full independence was proclaimed on November 9, 1953. The Geneva Conference of 1954 took Cambodia further along the road to Independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955, the Kingdom of Cambodia became financially and economically independent not only of France but also of Laos and Vietnam. For the next fifteen years the political life of the country was dominated by Prince Norodom Sihanouk, first as King, then as Head of Government after he had abdicated in favour of his father and finally (following his father's death in 1960) as Head of State. Although

the Sangkum Reastr Niyom or Popular Socialist Community, which he set up to embody his political views still won all the seats in the National Assembly elections of September, 1966, his initial popularity was, towards the end of the sixties, increasingly dimmed by criticism both of his management of the economy and of the pro-communist slant of the neutralist policy he proclaimed, which condoned extensive use of Cambodian territory by the North Vietnamese in their military operations against South Vietnam.

On March 18, 1970, during his absence from the country, Prince Sihanouk was deposed as Head of State by a vote of the National Assembly. A Republic was declared on October 9, 1970, and the name of the country changed to the Khmer Republic. A constitution was adopted by referendum on April 30, 1972 and Marshal Lon Nol elected President. A bicameral parliament was elected in September 1972. Prince Sihanouk however maintained a rival government-in-exile in Peking (Royal Government of National Union of Cambodia—GRUNC).

In April 1970 widespread fighting developed between communist Viet-Nameese and Khmer forces which gradually developed into a general civil war with republican forces controlling the major centres of population and large areas of the country falling under the control of the Khmer Rouge supported by North Viet-Nameese. With large-scale assistance from the United States the armed forces of the Republic were increased from 35,000 in 1970 to 250,000 in 1973.

In March 1973 a State of National Emergency was declared, various clauses of the constitution were suspended and a coalition "government of exception" formed under the premiership of In Tam. Following In Tam's resignation in December 1973, Long Boret, formerly Foreign Minister, was appointed Prime Minister.

In April 1975 Phnom Penh fell to the Khmer Rouge. Khieu Samphan ran the government and Prince Sihanouk returned to Cambodia on September 9, to resume his role as Head of State. However, a new Constitution was promulgated in Jan. 1976 and elections to a People's Representative Assembly were held in March. Prince Sihanouk resigned as Head of State in April, and when the Assembly met on April 11 Khieu Samphan was elected President of the State Presidium. A Government led by Pol Pot was appointed.

Geography, Economy and Communications.—Cambodia has an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber used to be the main exports though rubber production was brought to a standstill by the hostilities, and rice exports ceased in 1972, the country becoming for the first time a substantial importer. Following the Khmer Rouge victory, the populations of Phnom-Penh and other towns were forcibly evacuated to the country to work on the land. It was announced that the 1975 rice crop amounted to 2,200,000 tons, which was twice the amount needed to feed the population for a year. Subsequently, when the roads and railways had been repaired after war damage, many more of the population were redeployed to work on the land, and re-establish the plantations producing such crops as cotton, rubber and bananas. Factories, in particular textile mills, iron smelting works and cement works were put back in production.

Fifty per cent. of the total land area is forest or

jungle, abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has over 5,000 kilometres of roads, of which nearly half are hard-surfaced and passable in the rainy season. There are two railways. One runs from Phnom-Penh to the Thai border; the other from Phnom-Penh to Kampot and on to Kompong Som. Phnom-Penh is on a river capable of receiving ships of up to 2,500 tons all the year round. The deep water port at Kompong Som on the Gulf of Thailand can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway.

Religion and Education.—The state religion was Buddhism of the "Little Vehicle". The new constitution guaranteed religious freedom, but "reactionary religion which is detrimental to Democratic Cambodia and the Cambodian People" was forbidden. There are also small Muslim and Christian communities. The national language is Khmer. In the years preceding the civil war considerable efforts were devoted to the development of education and new schools, colleges and technical institutes had been established. Until April 1975 there was a Buddhist University in Phnom-Penh, where there were also Faculties of Arts, Medicine and Law and a Technological Institute. Several residential teachers' training colleges were in operation.

CAPITAL, Phnom-Penh.

FLAG.—Red, with a yellow three-towered temple in the middle.

NATIONAL DAY.—October 9.

CAMEROON REPUBLIC

(United Republic of Cameroon)

President, Ahmadou Ahidjo, *elected for 5 years,* May 5, 1960; *re-elected for 5 years,* May 7, 1965; Mar. 20, 1970 and April 5, 1975.

CAMEROON EMBASSY

84 Holland Park, W.11.

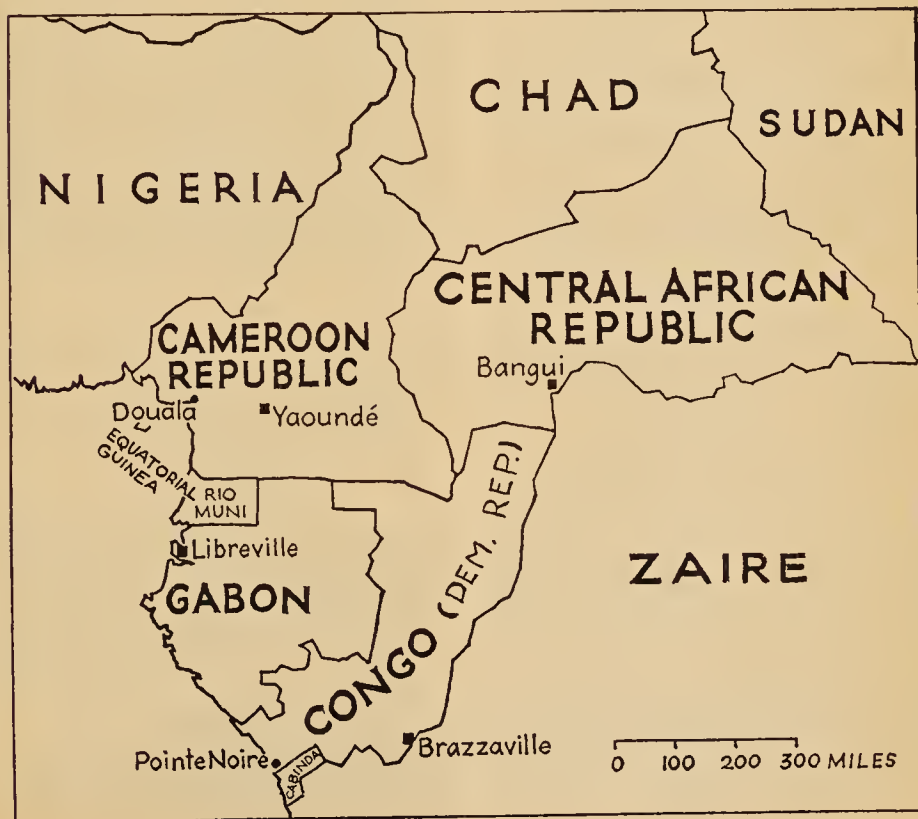

[01-727 0771]

Ambassador Extraordinary and Plenipotentiary, His Excellency Michel Koss Epangué (1975).

2nd Counsellor, Nkuo Thaddeus.

1st Secretary, Francis Isidore Wainchom Nkwain.

The United Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west, Chad and the Central African Republic to the east and Congo and Gabon and Equatorial Guinea to the south. It has an area of 183,381 sq. miles (432,000 sq. km.) and a population estimated (1976) at about 7,000,000. Principal products are cocoa, coffee, bananas, cotton, timber, ground-nuts,

aluminium, rubber and palm products. There is an aluminium smelting plant at Edéa with an annual capacity of 50,000 tons. Annual trade of the United Republic is approximately, Exports, *FCFA* 107,000,000; Imports, *FCFA* 132,000,000. Rate of Exchange, July 1975, 426 Francs CFA= £1 (floating).

Trade with U.K.

	1974	1975
Imports from U.K.	£6,253,000	£7,730,000
Exports to U.K.	3,043,000	5,377,000

The whole territory was administered by Germany from 1884 to 1916. From 1916 to 1959, the former East Cameroon was administered by France as a League of Nations (later U.N.) trusteeship. On Jan. 1, 1960 it became independent as the Republic of Cameroon. The Republic was joined on October 1, 1961, by the former British administered trust territory of the Southern Cameroons, after a plebiscite held under United Nations auspices. Cameroon became a Federal Republic governed by a President, Vice-President and 19 Federal Ministers, with separate East and West Cameroon state governments. Subsequently in a plebiscite held in May, 1972, there was an overwhelming vote in favour of the proposal that Cameroon should become a United Republic and on July 3, 1972, the President appointed the first government of the United Republic.

Cameroon is the only country in Africa where French and English are both official languages enjoying equal status, and the government's declared long-term objective is to achieve complete "bilingualism" and "biculturalism".

Unlike in neighbouring Nigeria and Gabon, oil has not yet been discovered in commercially significant quantities. The main economic emphasis is on agricultural development, both through encouraging small-scale peasant agriculture, and through the development of large-scale agro-industrial complexes, with the aim of making the country agriculturally self-sufficient and a major food exporter.

CAPITAL.—Yaoundé (180,000). Ψ Douala (250,000), is an important commercial centre.

FLAG.—Vertical stripes of green, red and yellow with two five-pointed stars in upper half of green band.

NATIONAL DAY.—January 1 (Independence Day).

BRITISH EMBASSY

Yaoundé

Ambassador Extraordinary and Plenipotentiary, His Excellency Albert Edward Saunders, C.M.G., O.B.E. (1975).

1st Secretary, J. K. Gordon (*Head of Chancery and Consul*).

2nd Secretaries, C. A. Gregg; D. Wyatt.

British Council Representative, H. F. Grant.

CAPE VERDE ISLANDS

President, Aristides Pereira born 1924, assumed office, July 5, 1975.

The Cape Verde Islands, off the west coast of Africa, consist of two groups of islands, *Windward* (Santa Antão, São Vicente, Santa Luzia, São Nicolau, Boa Vista and Sal) and *Leeward* (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 sq. miles and a population (1970) of 272,071. *Capital*, Ψ Praia (1970, 6,000).

The Islands colonised in c. 1460 achieved independence from Portugal on July 5, 1975, after the decision of the Armed Forces Movement to give up the Portuguese colonies. Elections for a constituent assembly were held on June 30. President Pereira favours an eventual political union of the islands with neighbouring Guinea-Bissau and Article 1

of the latter's constitution expresses a similar wish. (Till 1879 Guinea-Bissau and the Islands were a single administrative unit.)

CENTRAL AFRICAN REPUBLIC

President, Marshal Jean Bedel Bokassa, assumed office Jan. 1, 1966.

Formerly the French colony of Ubanghi Shari, the Republic lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has a common boundary with the Republic of Chad in the north and with Zaïre in the south. The Republic has an area of about 234,000 sq. miles and a population of 3,200,000 (est. 1975). On December 1, 1958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960. The first President of the Central African Republic, M. David Dacko, held office from 1960 until Jan. 1, 1966, when he was replaced by the then Col. Bokassa after a *coup d'état*. Imports from U.K. 1974, £342,000; Exports to U.K., £287,000.

CAPITAL.—Bangui, near the border with the Zaïre (301,793).

FLAG.—Four horizontal stripes blue, white, yellow, green, crossed by central vertical red stripe; a yellow star in centre of blue half-stripe next staff.

CHAD REPUBLIC

Head of State, Gen. Felix Malloum, assumed office, May, 1975.

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by Libya in the north, by the Sudan on the east and by the Central African Republic on the south. (*For MAP, see Index.*) It has an area of 487,920 sq. miles and a population now estimated at 4,000,000. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960. On April 14, 1962, a new Constitution was adopted involving a presidential-type régime. Mr. Tombalbaye accepted the formal title of President on April 23, 1962. He was killed in the military coup on April 13, 1975.

Trade with U.K.

	1974	1975
Imports from U.K.	£209,000	£823,000
Exports to U.K.	1,378,000	15,000

CAPITAL.—N'djaména (formerly known as Fort Lamy) south of Lake Chad (126,000).

FLAG.—Vertical stripes, blue, yellow and red.

CHILE

(República de Chile)

Head of State, General Augusto Pinochet (Ugarte), born, November 25, 1915, Army Commander-in-Chief and President of the Military Junta that took power on September 11, 1973.

Other Junta Members, Admiral José Toribio Merino (Castro), C.-in-C. Navy; General Gustavo Leigh (Guzmán), C.-in-C. Air Force; General César Mendoza (Durán), Director-General of Carabineros.

CABINET

Foreign Affairs, Vice Adm. Patricio Carvajal.

Interior, Gen. César Benavides.

Defence, Gen. Herman Brady Roche.

Education, Rear Adm. Arturo Roncoso Daroch.

Mines, Sr. Luis E. Valenzuela Blanquiere.

Finance, Sr. Jorge Cauás.

Economy, Sr. Sergio de-Castro Spikula.

Justice, Sr. Miguel Schweitzer Speisky.

Public Works, Sr. Hugo Leon Puelma.

Transport, Gen. Raúl Vargas Miguel.

Agriculture, Gen. Marlo Mackay.

Land and Settlement, Gen. Lautaro Recabarren.

Labour, Sr. Sergio Fernandez Fernández.

Health, Gen. Fernando Matthey Aubel.

Housing, Sr. Carlos Granifo Harms.

Minister without Portfolio, Gen. Hernán Bejares González (*Secretary General to the Government*).

CHILEAN EMBASSY AND CONSULATE IN LONDON

12 Devonshire Street, W.1

[01-580 6392]

Ambassador Extraordinary and Plenipotentiary, His

Excellency Admiral Kaare Olsen.

Minister-Counsellor, Sr. Carlos Bustos.

Counsellor, Sr. Fernando Cousiño (*Commercial*).

Naval Attaché, Rear Adm. Maurice Poisson.

Air Attaché, Col. Guillermo Kaempffer.

1st Secretary, Sr. Jaime Pardo.

3rd Secretaries, Sr. Jorge Montero; Sr. Miguel Poklepovic.

Asst. Naval Attaché, Cdr. John Howard.

Cultural and Press Attaché, Sr. Igor Entralá.

Civil Attaché, Sr. Guillermo Santa Cruz.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. $17^{\circ} 15'$ and $55^{\circ} 50'$ S. and long. $66^{\circ} 30'$ and $75^{\circ} 48'$ W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41° , of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid. (*For MAP*, see p. 815.)

Among the island possessions of Chile are the *Juan Fernandez group* (3 islands) about 360 miles distant from Valparaíso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (*Robinson Crusoe*) shipwreck. *Easter Island* ($27^{\circ} 8'$ S. and $109^{\circ} 28'$ W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and 13 administrative and economic regions and the total area of the Republic is estimated at 290,000 square miles, with a population (estimated, 1971) of 10,000,000. Two of these provinces, Arica and Antofagasta, were annexed from Peru and Bolivia respectively after the War of the Pacific (1879-84). The province of Tacna was also annexed but under a treaty signed in 1929 was returned to Peru which at the same time received payment of £1,200,000 for Arica. The Chilean population has four main sources: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fugians, and Chingos; (c) mixed Spanish Indians; and (d) European immigrants. Only the few remaining indigenous Indians and some originally Bolivian

Indians in the north are racially separate. Following extensive inter-marriage there is no effective distinction among the remainder.

Government.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipo* (April 5, 1818), achieved the independence of the nation. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

At a general election held on Sept. 4, 1970, the Marxist candidate Dr. Allende was elected President by a narrow margin. A new Cabinet took office on Oct. 30, 1970.

Severe industrial unrest, notably a crippling strike by the National Confederation of Lorry Owners, which began in July 1973, led to sympathy strikes in other occupations; there were widespread violent incidents and a congressional vote of censure against the Government, with resultant resignations from the Cabinet. The Government of Dr. Salvador Allende was overthrown on September 11, 1973, by a coup planned, and carried out within a few hours, by leaders of the Armed Forces and National Police. President Allende was said to have committed suicide.

Although the Constitution of 1925 is still notionally in force, the National Congress has been dissolved, all political parties have been banned, as have all political activities. As a temporary expedient the Government has assumed wide-ranging civil powers. Inflation is still the main problem; revaluation of the Peso (against the U.S. \$) takes place continuously, approximately in line with the variation in the internal value of the currency (i.e. cost of living index).

Production.—Wheat, maize, barley, oats, beans, peas, rice, lentils, wines, tobacco, hemp, chili-pepper, potatoes, sugar beet, onions and melons are grown extensively and livestock accounts for nearly 40 per cent. of agricultural production. The vine and all European fruit trees flourish in the central zone and fruit is a fairly important export item. Good wines are produced and exported and are becoming more widely known in world markets. Sheep farming predominates in the extreme south (Province of Magallanes). There are large timber tracts in the central and southern zones of Chile, some types of which are exported, along with wood derivatives such as cellulose, to Europe and the Argentine and other markets. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. Copper production in 1975 totalled 836,955 metric tons. Copper provides over 70 per cent. of Chile's exports earnings, the remainder of which are derived mainly from other minerals, wool, fruit, fish and forestry derivatives. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural resources in the world. Production in 1975 (including potassium nitrate) was 726,449 metric tons. Chile also produces iodine, manganese ore, coal, mercury, molybdenum, zinc, lead and a small quantity of gold. 1,459,854 metric tons of coal were produced in 1975. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities, but reached 96,323 metric tons in 1972. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945. Production in 1975 was 1,422,200 cu. metres of crude oil and 7,096,900,000 cu. metres of natural

gas—all in the Magallanes area. This total production, and imported crude oil, amounting in 1975 to about 75 per cent. of the input, is refined at Concon and San Vicente in the central part of the country. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepción. Current production capacity is about 600,000 metric tons of steel ingots per year, to be increased to one million metric tons per year.

Most consumer goods are manufactured locally—copper, steel and oil derivatives, pulp and paper, cement and other building materials, tobacco, cutlery, food products and beverages, sugar refining, textiles, clothing and footwear, plastic products, household equipment, tyres and other rubber products, radio and television sets, chemicals, pharmaceutical products, soaps, detergents and cosmetics. New classes of manufacture being developed are in the fields of motor-vehicle assembly, chemicals and petrochemicals, cellulose, metallurgy and some electrical, electronic and mechanical equipment.

Communications.—Chilean ships have a virtual monopoly in the coastwise trade, though, with the improvement of the roads, an increasing share of internal transportation is moving by road and rail. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *via* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine numbers about 63 vessels (of over 100 tons gross) with a total deadweight tonnage of 678,556 (1976). Under a law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels with the intention of this figure eventually reaching 100 per cent. of bulk and refrigerated cargoes.

The first railway was opened in 1851 and there are now 6,575 miles of track. A metre-gauge line (the *Longitudinal*) runs from La Calera, just north of Santiago, to Iquique. The wide gauge railway (1-676 metres) runs from Valparaíso through La Calera, 60 miles inland, and after passing through Santiago ends at Puerto Montt.

With the completion of a section of 435 miles from Corumbá, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentina) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft.

Chile is served by 15 international airlines. The domestic traffic is carried almost exclusively by the State-owned Línea Aérea Nacional, which also operates internationally. Chile has an extensive system of airports which are being modernized with international financial assistance.

Chile's road system is about 65,000 kilometres in length, but only an estimated 7,000 kilometres are first-class paved highways. At the end of 1974 there were registered 216,122 cars, 15,682 buses and taxis and 166,308 goods vehicles, excluding about 15,000 tractors.

Defence.—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. The Army's total strength is 50,000, which includes 3,000 officers and 25,000 conscripts (2 years). In addition there is a police force of "Carabineros" of 30,000 officers and men. The Air Force has 800 officers and 8,700 other ranks with a strength of 200 aircraft. The Navy consists of 3 cruisers, 12 destroyers, frigates and escorts, some patrol vessels and FPBs and 3 sub-

marines. There is a support force of transports, tankers, 1 submarine depot ship and ancillary small craft. The strength of the Navy is 1,000 officers and 14,000 men, plus a Marine Force of 60 officers and 2,000 men.

Education.—Elementary education is free, and has been compulsory since 1920. There are 8 Universities (3 in Santiago, 2 in Valparaíso, 1 in Antofagasta, 1 in Concepción and 1 in Valdivia). The religion is Roman Catholic.

Language and Literature.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señiorita Gabriela Mistral, for Chilean verse and prose, and in 1971 to the poet Pablo Neruda. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

Finance.—Total revenue for 1975 was estimated at Pesos 18,725,666,000 and expenditure at Pesos 17,540,966,000. Foreign debt in December 1975 was estimated at some U.S. \$4,802,000,000.

The official rate of exchange, (July 1976), was about Pesos (\$) 23 = £1.

EXTERNAL TRADE (Final figures)

	1974	1975
Total imports . . .	\$U.S.2,178,400,000	1,811,000,000
Total exports . . .	2,043,400,000	1,548,000,000
Trade with U.K.		

	1974	1975
Imports from U.K. . .	£36,878,000	£36,195,000
Exports to U.K. . . .	86,516,000	62,091,000

The principal exports are metallic and non-metallic minerals (refined copper, ingots and bars, iron ore, etc.), wood derivatives, some metal products, fish products, vegetables, fruit and wool. The principal imports are wheat and other food products, industrial raw materials, machinery, equipment and spares, oil fuels, lubricants, transportation equipment and raw cotton.

CAPITAL, Santiago, 4,000,000 (Greater Santiago). Other large towns are:—Ψ Valparaíso (500,000), Concepción (170,000), Temuco (110,000), Ψ Antofagasta (110,000), Chillán (79,467), Ψ Talcahuano (75,643), Talca (75,354); Ψ Valdivia (70,000), Ψ Iquique (50,000), Ψ Punta Arenas (50,000). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

FLAG.—2 horizontal bands, white, red; in top sixth a white star on blue square, next staff.

NATIONAL DAY.—September 18 (National Anniversary).

AREA AND POPULATION.—The area of China is about 3,700,000 square miles. Estimates of the

present population vary considerably, but the U.N. estimate for 1974 gave a figure of 827,850,000. The Chinese also now make public reference to a population of 800,000,000. According to figures published in 1957 by the National Bureau of Statistics, the total population of China was 656,630,000, not including Chinese living in Hong Kong, Macau or abroad. A birth-rate of 32 per 1,000 and death rate of 17 per 1,000 were estimated for 1970. In 1953 the percentage distribution of the population was as follows:

Han, 94.13; Mongolian, 0.26; Tibetan, 0.48; Manchu, 0.41; Tribal, 3.57; Others, 1.15. There is no reason to suppose that the proportions have significantly changed.

THE PROVINCES OF CHINA.

Population figures made public in 1967-76 were as follows:

Anhui.....	40,000,000
Chekiang.....	34,000,000
Chinghai.....	2,000,000
Fukien.....	18,000,000
Heilungkiang.....	25,000,000
Honan.....	60,000,000
Hopei.....	50,000,000
Hunan.....	38,000,000
Hupeh.....	38,000,000
Kansu.....	14,000,000
Kiangsi.....	28,000,000
Kiangsu.....	47,000,000
Kirin.....	20,000,000

Sinkiang is the largest region or province in area (about 1/6th of the whole area of the country) and Szechuan the most populous.	

Government.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

On September 30, 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C.) met in Peking and appointed the National People's Government Council under the Chairmanship of Mao Tse-tung. On October 1, Mao proclaimed the inauguration of the Chinese People's Republic. The Soviet Union broke off relations with the Nationalists and established relations with the new régime on October 2. The régime was recognized by all the Communist bloc countries in quick succession, and soon after by the Asian countries of the Commonwealth, the United Kingdom and by a number of other countries. France recognized the Chinese People's Republic on January 27, 1964. Canada agreed to recognize the People's Republic in October 1970. From 1970 to 1975 the Chinese People's Republic has established or renewed diplomatic relations with over 50 countries. The United States and certain other countries continue to recognize the Nationalist régime in Formosa.

The C.P.P.C.C. continued to be the supreme legislative body of the new state until September 20, 1954, when a new constitution was adopted. It was then replaced as the highest organ of state power by the National People's Congress which exercised legislative power.

With the adoption of the 1954 Constitution, the National People's Government Council was replaced by the State Council, composed of the Premier, 16 Vice-Premiers and the heads of ministries and commissions. This body was the supreme administrative body, responsible for the day-to-day running of the country.

In January 1975 a new Constitution was adopted by the Fourth National People's Congress, which established the leading role of the Chinese Communist Party in all spheres of national life. Institutions such as the National People's Congress and the State Council and the system of People's Congresses remain, but their powers are less clearly defined under the new Constitution, or are curtailed. The post of State Chairman has been abolished, and the Standing Committee of the National People's Congress now appears to act as a kind of collective Head of State. Among its powers is that of acting for the country in its dealings with foreign states, i.e. in the despatch and recall of Chinese representatives abroad and the reception of foreign diplomatic envoys. The National People's Congress, which is supposed to hold one session a year, is empowered to amend the Constitution, make laws, appoint and remove the Premier and members of the State Council on the recommendation of the Party Central Committee, and to approve the national economic plan, the state budget and the final state accounts. Command over the armed forces is now vested in the Chairman of the Chinese Communist Party.

The system of elections to local People's Congresses and to the National People's Congress is maintained under the new Constitution; but there is no reference to deputies to congresses at the primary level being "directly elected by the voters". Deputies to congresses at all levels are now to be elected "through democratic consultation". Deputies to the National People's Congress are, as before, elected by provinces, autonomous regions, municipalities directly under the Central Government and by the armed forces, but no longer by Chinese resident abroad.

Local government is now entrusted to local Revolutionary Committees. These bodies, which emerged during the Cultural Revolution to replace the former People's Councils, were firmly established under the new Constitution as the permanent organs of the local people's congresses by which they are elected and to which they are accountable, in each instance at the corresponding level. They are also accountable to the "organ of state at the next higher level" (this would appear to mean the people's congress at the next higher level).

Autonomous regions, prefectures and counties continue to exist for national minorities and are described as self-governing. The system prevailing is that found elsewhere, i.e. people's congresses and revolutionary committees. Peking, Shanghai and Tientsin continue to come directly under the central government.

It is only in the 1975 Constitution that the leading role of the Chinese Communist Party is spelt out; but its complete dominance over the Government, which includes "united-front" figures from lesser parties, has always been achieved by ensuring that all the really important positions at whatever level have been filled by Party members.

During the Cultural Revolution both Party and State organs were disrupted. The system of

"Revolutionary Committees" was devised to replace the People's Councils at provincial level and below. Party Committees have been reconstituted at all levels. The leadership in both Party and Revolutionary Committees is for the most part identical, thus providing for an interlocking relationship between the two bodies. Until April, 1959, Mao Tse-tung was Chairman both of the Republic and the Communist Party. When he stood down from his position as Head of State his place was taken by Liu Shao-chi who was then First Vice-Chairman of the Party. In October 1968, the Party's Central Committee resolved to strip Liu of all his posts both in the Party and in the State. The 10th Congress of the Chinese Communist Party was held in Peking from August 24 to 28, 1973. The Congress was unusual in several respects; the Party Constitution provides that congresses should normally be held every five years, and only four years had passed since the previous one; the Congress was unusually short, lasting only five days compared to 24 days for the ninth congress, and it also took place in unusual secrecy, no official announcement being made until after it had finished. It was stated that 1,249 delegates, representing 28,000,000 party members, attended. The agenda consisted of three items, adoption of the Central Committee's political report, which was presented by Chou En-lai, a report on the revision of the new party constitution adopted in 1969, presented by Wang Hung-wen and election of a new Central Committee of 195 full and 124 alternate members.

Armed Forces.—All three military arms in China are parts of the People's Liberation Army (P.L.A.) The size of this body has not been formally given, but it is estimated that China has between 2½ and 3 million men under arms, with a further 12 million (or perhaps many more) reserves who take part in militia activities. Until 1955 the P.L.A. did not have a rank structure, but one was introduced in that year similar to that of the Russian Army. In the same year compulsory military service was introduced for all men between the ages of 18 and 40. This service was on a selective basis. In January, 1965, the length of service for those conscripted was increased by one year, to four years for the Army, five years for the Air Force and six years for the Navy; and with effect from June 1, 1965, the rank structure was abolished, together with all marks of distinction of branch of service (although members of the services may still be distinguished from one another by the colour of their uniforms). This means a reversion to the previous system by which members of the armed forces are known only by their appointment.

China exploded her first experimental nuclear device on October 16, 1964 and made further tests in 1965 and in May, October and December, 1966. Her first hydrogen bomb was tested in June, 1967, and further tests of nuclear devices were detected up to January, 1976. China launched her first earth-satellite in April, 1970, a second one in March, 1971 and others in July, November and December, 1975.

Religion.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. There are also Chinese Moslems and Christians. Since 1949, the practice of all religions has been severely curtailed, although not actually prohibited.

Education.—Although primary education was compulsory under the Nationalists, mass education did not become a fact until after the Communists had

taken over. All major educational establishments closed down at the start of the Great Proletarian Cultural Revolution in 1966. Primary and middle school education was interrupted and it was announced that the entire education system was to be reformed. School classes are being resumed, and, among the reforms observable are a reduction in the number of years in primary and middle schools, and the application of the principle of part-work part-study. In the summer of 1970 some of the major institutes of higher education started to enrol new students, and courses started in the autumn. Students are being selected from among workers, peasants, soldiers and also middle-school graduates who have had two-three years experience of manual labour in factories or in the rural areas. The new courses are from 2-3 years duration.

Language and Literature.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchos, Ning-po and Wu (Shanghai). The Common Speech or *Putonghua* (often referred to as "Mandarin") which is being taught throughout the country is based on the Peking dialect. The Communists, when they came into power, continued the Kuomintang policy of promoting it as the national language and made much more intensive efforts to propagate it throughout the country. Since the most important aspect of this policy is the use of the spoken language in writing, the old literary style of writing has fallen into disuse.

Chinese writing is ideographic and not phonetic. The number of sounds in *Putonghua* is strictly limited; each sound may have a large number of different characters and meanings. Whereas originally the language was monosyllabic and confusion was avoided by the use of different characters,

thus producing texts which were visually clear but ambiguous to the ear, with the increasing use of the spoken language for writing people are increasingly making use of polysyllabic compounds both in speech and writing in order to avoid confusion. In 1956, after some 4 years of study, the Government decided to introduce 230 simplified characters with a view to making reading and writing easier. The list was enlarged; there are now about 1,000 simplified characters in use. In January, 1956, all Chinese newspapers and most books began to appear with the characters printed horizontally from left to right, instead of vertically reading from right to left, as previously.

In November 1957, after some experimentation, the Government introduced a system of Romanization, using 25 of the letters of the Latin alphabet (not v). This has been used within the country largely for assisting school children and others to learn the pronunciation of characters in *Pitonghua*. It has been announced that there is no intention of using the alphabet to replace characters.

Although the pinyin system of romanisation of names was due to be brought into use from Sept. 1, 1975, it was announced in Peking on Aug. 27 that it would not then be introduced.

Chinese literature is one of the richest in the world. Paper has been employed for writing and printing for nearly 2,000 years. The Confucian classics which formed the basis of the traditional Chinese culture date from the Warring States period (4th-3rd centuries B.C.) as do the earliest texts of the rival tradition, Taoism. Histories, philosophical and scientific works, poetry, literary and art criticism, novels and romances survive from most periods. Many have been translated into

English. In the past all this considerable literature was available only to a very small class of *literati*, but with the spread of literacy in the 20th century, a process which has received enormous impetus since the Communists took over in 1950, the old traditional literature has been largely superseded by modern works of a popular kind and by the classics of Marxism and modern developments from them.

Three daily (and one monthly) newspapers are published in Peking of which the most important is the People's Daily, the organ of the Chinese Communist Party.

Currency.—The *yuan* was revalued with effect from March 1, 1955, on the basis 10,000 old *yuan* for one new *yuan*. (See also p. 83.)

Production and Industry.—China is essentially an agricultural and pastoral country: peasants constitute about 80 per cent. of the population. After the establishment of the Chinese People's Government at which time land for the most part was privately owned, there occurred several stages of land reform culminating in the formation of the people's communes in 1958. With the exception of a few State farms, the communes embrace the whole rural population. In all there are 74,000 communes and each is sub-divided into production brigades and teams. Work is assigned on a collective basis and the production team (of about 45 families) is the normal unit of accounting and labour. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities. The mineral wealth of the country is very great. Coal of excellent quality is produced. Iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundant. Oil is produced in Kansu, Sinkiang, Sining and three new major oil-fields located in the northeast and east of the country. No reliable figures for industrial production have been published since 1959. The figures given below are those estimated for 1974.

Steel, 23,800,000 tons; Pig Iron, 31,500,000 tons; Coal, 380,000,000 tons; Electric Power, 108,000,000,000 kWh.; Crude oil, 65,300,000 tons; Cement, 31,600,000 tons; Timber 53,000,000 cubic metres; Chemical Fertilizers, 24,880,000 tons; Cotton Cloth, 7,600,000,000 metres; Motor Vehicles, 110,000 (1973); Machine Tools, 80,000 (1973).

Following the Great Leap Forward in 1958 and during three subsequent years of difficult conditions for agriculture, there was a cut back in both agricultural and industrial production which then recovered to its pre-1958 level. During the Cultural Revolution there was some economic dislocation. Industrial policy is governed by the need to build up agriculture, and some branches of industry, especially those such as machine tools and chemical fertilizers which have a direct relevance to agriculture have gone ahead more quickly. China is now self-sufficient in petrol and oil.

A new (third) Five Year Plan began in 1966. The Fourth Five Year Plan ran from 1971 to 1975; as with the Third Plan, no details of it were published, but it has been announced that it has been successfully completed. The Fifth Five Year Plan began in 1976.

The principal articles of export are animals and animal products; oils; textiles; ores, metals and tea. The principal imports are raw cotton, cotton yarn

and thread; motor vehicles; machinery; chemical fertilizer plants; wheat; aircraft; books, paper and paper-making materials; chemicals; metals and ores; and dyes.

Trade with U.K.

	1974	1975
Imports from U.K....	£71,738,000	£80,368,000
Exports to U.K....	66,681,000	59,423,000

Communications.—Of the total area of China about half consists of tableland and mountainous areas where communications and travel are generally difficult. By 1949, the communications system, as a result of years of neglect and civil war, was more or less completely paralysed. In any case such roads and railways as did exist were largely confined to the eastern plains. After the Communists achieved complete control they devoted much attention to restoring and improving the communication system. By the end of 1958 the total length of railways was 19,000 miles (42 p.c. more than 1949), the total length of roads was 250,000 miles (about 5 times as much as in 1949) and of inland waterways about 100,000 miles (twice as much as 1949). In addition, internal civil aviation has been developed; routes total more than 20,000 miles. As a result the communications network now covers most of the country. In the past where roads did not exist the principal means of communications east to west was provided by the rivers, the most important of which are the Yangtze (3,400 miles long), the Yellow River (2,600 miles long) and the West River (1,650 miles). These, together with the network of canals connecting them are still much used, but their overall importance is less than it was. In the past 10 years great progress has been made in developing postal services and telecommunications. It is now claimed that 95 p.c. of all rural communes are on the telephone and that postal routes reach practically every production brigade headquarters.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population (estimated, 1957) of 1,270,000.

From 1911 to 1950, Tibet was virtually an independent country but its status was never officially so defined. In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby the Chinese army was allowed entry into Tibet. A Communist military and administrative headquarters was set up. In 1954 the Government of India recognized that Tibet was an integral part of China, in return for the right to maintain trade and consular representation there.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government. In its place the 16-member Preparatory Committee for the Tibetan Autonomous Region, originally set up in 1955 with the Dalai

Lama as Chairman, was to administer Tibet under the State Council. The Preparatory Committee was to have the Panchen Lama as Acting Chairman and also to include 4 Chinese Officials. Elections were held to choose local People's Congresses in Tibet, thus indicating that the government organization there no longer differed significantly from that of any ordinary province in China. The Dalai Lama, now exiled in India, announced a "new constitution" in March, 1963.

In December, 1964, the Dalai Lama, although absent, was declared to be a traitor, and both he and the Panchen Lama were dismissed. The position of Acting Chairman of the Preparatory Committee was assumed by Jigme, who had long been the most prominent secular figure in Tibet. This move marked the end of the period of co-operation by the Chinese Government with the traditional religious authorities, and the eclipse of the latter. The Preparatory Committee completed its work with the setting up of Tibet as an Autonomous Region of China on Sept. 9, 1965.

CAPITAL.—Peking, population (U.N. estimate, 1972), 7,570,000. The population of Ψ Shanghai was estimated at 10,820,000 (U.N. 1972); Nanking, 2,000,000 (Chinese est.); figures for the other principal towns are those for 1957; Tientsin, 3,220,000; Shenyang (Mukden), 2,411,000; Wuhan (formerly Hankow, Hanyang and Wuchang), 2,146,000; Chungking, 2,121,000; Ψ Canton, 1,840,000; Harbin, 1,552,000; Ψ Port Arthur (Lushun), Dairen, 1,508,000; Sian, 1,310,000; Ψ Tsingtao, 1,121,000; Chengtu, 1,107,000; Taiyuan, 1,020,000.

FLAG.—Red, with large gold five-point star and four small gold stars in crescent, all in upper quarter next staff.

NATIONAL DAY.—October 1 (Founding of People's Republic).

BRITISH EMBASSY

11 Kuang Hua Lu,

Chien Kuo Men Wei, Peking.

Ambassador, His Excellency Edward Youde, C.M.G., M.B.E. (1974).

Counsellors, N. M. Fenn (*Head of Chancery*); E. T. Davies (*Commercial*).

Defence Attaché, Col. P. J. L. Tustin.

1st Secretaries, R. R. Garside; R. E. Allen (*Commercial*); J. H. C. Gerson.

2nd Secretaries, W. H. H. Sanders; R. P. Margolis; R. J. Shaw; W. G. Ehrman.

FORMOSA

(Taiwan)

President, Dr. C. K. Yen (Yen Chia-kan), sworn in, April 6, 1975.

Premier, Gen. Chiang Ching-kuo (June 1, 1972).

An island of some 13,800 sq. miles in the China Sea, Formosa lies 90 miles east of the Chinese mainland in latitude $21^{\circ}45'N$ — $25^{\circ}38'N$. The population (15,353,291 in March, 1973), is almost entirely Chinese in origin and includes about 2,000,000 mainlanders who came to the island with Chiang Kai-Shek in 1947-49. The territory of Formosa includes the Pescadores Islands (50 sq. miles), some 35 miles west of Formosa, as well as Quemoy (68 sq. miles) and Matsu (11 sq. miles) which are only a few miles from the mainland. Settled for centuries by the Chinese, the island has been known as Ryukyu and Taiwan. It was administered by Japan as a province from 1895 to 1945. General Chiang Kai-shek withdrew to Formosa in 1949, towards the end of the war against the Communist régime accompanied by 500,000 Nationalist troops,

since when the territory continued under his presidency. Gen. Chiang Kai-Shek died on April 5, 1975 and was succeeded by the Vice-President, Dr. C. K. Yen. A mutual defence treaty between the United States and Formosan Governments was signed in 1954.

The eastern part of the main island is mountainous and forest covered. Mt. Morrison (Yu Shan) (13,035 ft.) and Mt. Sylvia (Tzu'ukaoshan) (12,972 ft.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, tea, bananas, pineapples and tobacco. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports Ψ Kee-lung (305,545) and Ψ Kaohsiung (724,222) are situated in the northern and southern sections of the island.

Trade with U.K.

	1974	1975
Imports from U.K....	£39,152,000	£33,829,000
Exports to U.K....	66,663,000	73,045,000

CAPITAL.—Taipei (population March, 1973, 1,921,736). Other towns are Ψ Kaohsiung (915,035); Tainan (495,454); Taichung (490,992); and Ψ Keelung (333,998).

FLAG.—Red, with blue quarter at top next staff, bearing a twelve-point white sun.

BRITISH CONSULATES

The British Consulate was withdrawn from Taiwan on March 31, 1972.

COLOMBIA

(República de Colombia)

President (1974-78), Alfonso López Michelsen, elected April 21, 1974; assumed office, August 7, 1974.

COLOMBIAN EMBASSY IN LONDON

3 Hans Crescent, S.W.1

101-589 91771

Ambassador Extraordinary and Plenipotentiary, His Excellency Alfredo Vázquez-Carrizosa (1975).

Counsellors, Srta. N. Millán; Dr. F. Corredor (*Economic*).

1st Secretary, Dr. A. Arango.

2nd Secretaries, Sra. B. de Perdomo; Dr. J. M. Santos (*Coffee Affairs*).

There are *Consulates-General* in London and Liverpool.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between $4^{\circ}13'S$ to $12^{\circ}30'N$. lat. and 68° to 79° W. long., with an approximate area of 440,000 square miles, and a population (estimated 1973) of 23,500,000.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 Simón Bolívar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and became a separate Republic.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the most important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic. The highest mountain in Colombia is Cristóbal Colón (18,946 feet) in the Sierra Nevada de Santa Marta on the Caribbean coast.

The principal rivers are the Magdalena, Guaviare, Cauca, Atrato, Caqueta, Putumayo and Patía. The Patía flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guaiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Rio Bogotá is the great *Fall of Tequendama*, 482 ft. in height.

Government.—During the early nineteenth-fifties Colombia suffered a period of virtual civil war between the supporters of the traditional political parties, the Conservatives and the Liberals. The dictatorship of Gen. Rojas Pinilla (1953–57) put an end to the worst of the violence and on May 10, 1957, following Pinilla's summary dismissal, a military junta took over, preparing the way for a return to democratic government. Congressional elections were held on March 16, 1958, which yielded a Liberal majority. This led, the same year, to the institution of the National Front system, to run for a period of 16 years. The Presidency alternated every four years between the Liberals and Conservatives while parity of appointment was maintained between the two parties in Congress, the Government and all Government Departments.

During the presidency of Dr. Carlos Lleras (May, 1966 to April, 1970) the country made considerable economic advances, but the National Front system was nearly overthrown at the 1970 presidential election, when Gen. Rojas, with his political movement, the National Popular Alliance, almost defeated the Government candidate, Dr. Misael Pastrana.

In 1974 the first election not subject to the National Front system for the Presidency and Congress was won by the Liberal candidate, Alfonso López Michelsen; parity in administrative appointments between the traditional parties will continue, however, until 1978.

Production.—The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead and coal. In 1975 the country was producing 156,000 barrels of oil per day after a peak production figure of 218,000 in 1970. Measures have recently been taken to encourage exploration for new reserves, but since early 1975 Colombia has exchanged its rôle of net-exporter for that of net-importer of crude oil. The principal agricultural products are coffee (which accounts for nearly 50 per cent. of total exports by value) cotton, bananas, rice, cocoa, sugar, tobacco, maize, cut flowers, wheat and other cereals. Manufactures (mainly for home consumption, but with an increasing export trade) consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery cigarettes, beer, cement, glass containers and steel. The Government, backed by massive international finance and technical aid, has continued to encourage the development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery. The importation of many consumer goods is restricted,

although there has recently been a slight relaxation of controls.

Defence.—The Army peace effective strength is 41,000; war effective 300,000. The Navy consists of 4 destroyers, 4 frigates, 2 submarines, some gunboats and other small craft, with personnel about 5,000 including one battalion of marines; a battalion of the Colombian army and elements of the Navy served with the United Nations forces in Korea. The Air Force, with 4,000 personnel, has jet trainers and a front-line squadron equipped with Mirage fighters.

Communications.—The first railway was opened in 1855, about 1,914 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Marta, was opened in July, 1961. There are about 2,200 miles of rail in use at present. The total road network (1973) consists of 39,900 km. of roads of all types, of which 7,000 km. are classified as main trunk and transversal roads. A programme of road improvement and construction is under way, financed by a tax on petrol. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, and services to London daily *via* Miami, *via* Paris and once a week by British Caledonian to London. Air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to most parts of the country.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University with headquarters at Bogotá there are 26 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

Finance.—For rate of exchange, see p. 83.

	1974	1975
Total imports (c.i.f.)	1,337,000,000	1,345,000,000
Total exports (f.o.b.)	1,345,000,000	1,345,000,000
Trade with U.K.		

	1974	1975
Imports from U.K.	£24,213,000	£28,696,000
Exports to U.K.	12,458,000	24,066,000
CAPITAL, Bogotá, population (estimated, 1975)	3,200,000.	
Bogotá is an inland city in the Eastern Cordilleras, at an elevation of 8,600 to 9,000 ft. above sea level. Other centres are Medellín (1,100,000); Cali (950,000); Barranquilla (700,000); Bucaramanga (320,000); Manizales (300,000); Cucuta (230,000); Cartagena (340,000).		

FLAG.—Broad yellow band in upper half, surmounting equal bands of blue and red.

NATIONAL DAY.—July 20 (National Independence Day).

2nd Secretaries, M. Leach (Commercial and Information); A. T. R. Oaten.

There are British Consular Offices at Bogotá, Barranquilla and Cali.

British Council Representative, R. S. Newberry, Calle 11, No. 5-16, Bogotá.

CONGO

(People's Republic of the Congo)

President of the PCT, Commandant Marien Nguabi.

Prime Minister, Head of Government, President of the Committee for the Plan, Louis Sylvain Goma.

The Republic lies on the Equator between Gabon on the west and Zaïre on the east, the River Congo and its tributary the Ubanghi forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. Area of the Republic of Congo is 129,960 sq. miles, with a population of approximately 2,100,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

M. Fulbert Youlou held office as President of the Republic from Aug. 7, 1960. Growing discontent with the régime culminated in riots in Brazzaville and led to the President's resignation on Aug. 15, 1963, and the dissolution by the Army of the National Assembly. A provisional Government led by M. Alphonse Massamba-Débat took office on Aug. 16, and a new constitution, giving the provisional Government full powers, came into operation in December, 1963.

On Jan. 12, 1968, the President dismissed the Prime Minister, M. Noumazalay, with three other members of his Cabinet and himself assumed office as Prime Minister with a reformed Ministry. He was himself arrested after heavy fighting during the last few days of August and resigned on Sept. 4, 1968. Conduct of affairs was assumed by a National Council of Army officers.

Commandant Marien Nguabi became President of the Republic on December 31, 1968. The Parti Congolais du Travail (PCT) was created by the Congress of December 29-31, 1969. The People's Republic of the Congo was established, and a new Constitution was promulgated. Follow-

ing the Second Extraordinary Congress of the Party in December 1972, a new Constitution and a reorganization of the structures of the Party and the State were submitted to a people's referendum, in July 1973.

Trade with U.K.

	1974	1975
Imports from U.K....	£1,324,000	£1,460,000
Exports to U.K....	5,266,000	6,765,000

Currency.—The Congolese currency is the CFA Franc, currently pegged to the French Franc at 1 CFA Franc=0.02 French Franc.

CAPITAL.—Brazzaville (156,000); Pointe Noire (76,000). FLAG.—Red, with hammer and sickle in centre.

COSTA RICA

(República de Costa Rica)

President (1974-78), Lic. Daniel Oduber Quirós, born 1923, elected February 8, 1974; assumed office, May 8, 1974.

COSTA RICAN EMBASSY

1 Culross St., W.1.

[01-286 7898]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sr. Don Eduardo Echeverría-Villafranca (1974).

Minister-Counsellor, Sr. Julio Revollo Acosta (Economic and Consular).

2nd Secretary, Srta. Ana María Aranz.

The Republic of Costa Rica, in Central America extends across the isthmus between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of 19,653 English sq. miles, and a population (estimated January, 1974) of 1,875,000. The population is basically of European stock, in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country obtained its independence, although from 1824 to 1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific by rail.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Increasing attention is being paid to cattle raising.

The chief ports are Ψ Limón, on the Atlantic coast, through which passes most of the coffee exported, and Ψ Puntarenas on the Pacific coast. A new Pacific port, Caldera, currently under construction with Japanese aid, is likely to divert traffic from Puntarenas within a few years.

Bananas are exported from Golfito, on the Pacific Coast, by the United Fruit Co., and from Limón by the Standard Fruit Co. In 1973, 1,605 ships entered at Costa Rican ports bringing in approximately 1,539,000 tons of goods. About 500 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, Iberia, Viasa, TACA, SAHSA and COPA call at San José, while feeder services link the main centres of population with the capital. LACSA is the national airline with BAC-111 flights to Miami, Mexico, Central American capitals and Caracas, Barranquilla and Maracaibo in South America, besides internal flights to local airports.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

GNP.—1975 \$U.S. 1,000,000,000.

FINANCE

	1974	1975
	Colones, millions

CUBAN EMBASSY IN LONDON

57 Kensington Court, W.8

[01-937 8226]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Llonel Soto Prieto (1973).

Cuba (the largest of the "West India" islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population at the Census of 1970 of 8,553,395.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, where in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office.

A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years. Dr. Castro has since proclaimed the revolution to be Socialist and himself to be a Marxist-Leninist.

In October, 1965, the Communist Party of Cuba was formed to succeed the United Party of the Socialist Revolution. It is the only authorized political party. Elections are no longer to be held. The First Congress of the Communist Party of Cuba was held in December 1975. The new Socialist Constitution came into force on February 24, 1976.

The Revolutionary Government has carried out programmes of land and urban reform and of nationalization of the means of production and distribution. By June, 1963, 90 per cent. of industrial production, all foreign trade and about 50 per cent. of small commercial companies were in state hands. In March, 1968, virtually all remaining private commercial enterprises were nationalised. About 70 per cent. of the cultivated land is in state farms or co-operatives. Private smallholders, who own the remainder, also come under a measure of Government control.

Although efforts are being made to diversify the economy, sugar is still its mainstay and Cuba's

principal source of foreign exchange. It still accounts for some 80 per cent. in value of total Cuban exports. The largest sugar harvest ever was produced in 1960/70, when total production reached about 8,500,000 tons. This was achieved at considerable expense to the rest of the economy, however, and the declared target of 10 million tons, which was to have been reached in 1970, has been delayed. Cuba's other main exports are nickel, tobacco and rum, while increases are expected shortly in the availability of fish, meat and citrus fruit.

Despite increased trade with Western Europe and Japan, the Communist countries, particularly the Soviet Union, form Cuba's main trading partners, covering about 60 per cent. of imports and exports. In addition, the U.S.S.R. offers substantial aid from an imbalance in the annual trade profits in Cuba's favour which has recently been in the region of 250 to 350 million roubles.

11,915 miles of railway are open (public service 4,880; sugar plantations and mining areas 7,035) and about 12,000 miles of telegraph line. There are about 8,291 miles of road. At present scheduled international air services run to Mexico City, Moscow, Prague, Madrid, Rabat, Algiers, Georgetown, Kingston, Montreal, Panama, Lima, Berlin and Brussels.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728, but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. There are universities at Santiago de Cuba and Santa Clara. Public libraries have been established. The daily press and broadcasting and television are under the control of the Government.

Finance.—The public revenue rose from an estimated 8365,247,946 in 1958 to 82,399,006,000 for 1964, including profits from State trading concerns, etc. No up-to-date figures are available for the public debt—at the end of 1958 this stood at 8760,300,000.

Currency—Average, Pesos 1:45=£1, U.S. currency ceased to be legal tender in Cuba on June 30, 1951 (see also p. 83).

Trade.—Exports in 1973 were valued at Pesos 1,150·8m, compared with Pesos 770·9m, in 1972; imports, 1973, Pesos 1,390·6m (1972, Pesos 1,189·8m).

Trade with U.K.

	1974	1975
Imports from U.K....	£23,926,000	£36,977,000
Exports to U.K.	19,952,000	6,318,000

The exports are principally sugar and tobacco; the imports are mainly machinery.

CAPITAL, ΨHavana (pop., Census 1970), 1,755,360; other towns are ΨSantiago (292,251), Santa Clara (213,296), Camagüey (166,854), Holguín (183,115), and ΨCienfuegos (164,061).

FLAG.—Five horizontal bands, blue and white (blue at top and bottom) with red triangle, close to staff, charged with 5-point white star.

NATIONAL DAY.—January 1 (Day of Liberation).

3rd Secretaries, Jan Příkopa; Dr. Miloslav Ježil.

Attaché, Milan Pokorný.

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory affected having an area of 53,700 square miles, reduced, by the cession of Ruthenia to U.S.S.R. in 1945, to 49,400 square miles. The population of Czechoslovakia was 14,686,255 in 1974.

Government.—The Communist Party, with the aid of Action Committees, seized power in Czechoslovakia in February, 1948, and Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

In January, 1968, pressures for reform of the system were realized with the removal of the First Secretary of the Communist Party, Novotný, and his replacement by Alexander Dubček. They were translated into a Party Action Programme adopted in April. Shortly afterwards the country's supreme legislative body, the National Assembly, began work on new legislation, which envisaged the democratisation of the country's political life, greater guarantees of fundamental liberties and the establishment of a federal system.

The speed of events and their implications for the internal development of the other communist regimes in Eastern Europe and the Soviet Union, as well as for the system of alliances among these countries, alarmed the Soviet Union. On the night of August 20, Czechoslovakia was invaded by Soviet, Polish, East German, Hungarian and

Bulgarian troops, the capital and all major towns being occupied.

The Russians were unable to depose the Czechoslovak leadership, but forced them to sign on August 26 an Agreement modifying their policies and, on October 18, a treaty legalising the presence of Soviet troops on Czechoslovak territory.

On April 17, 1969, Gustáv Husák took over the leadership of the Communist Party, and the reforms of 1968 were abandoned with exception of the Federal system of government, which had been set up in October 1968. Czechoslovakia now consists of the Czech Socialist Republic and the Slovak Socialist Republic, each of which has its own government responsible to its legislative body—the National Council. Areas such as the Constitution, Defence, Foreign Affairs, State Material Reserves and Currency are the responsibility of the Federal Administration. The Federal Government is responsible to the Federal Assembly, which is composed of two Chambers, the Chamber of the People, whose duties are elected throughout the Federation, and the Chamber of the Nations, consisting of an equal number of Czech and Slovak Deputies. The federal system was not extended to the organization of the Communist Party.

The Economic System.—Czechoslovakia has long been one of the most highly-industrialised countries of Central Europe. Under the present political system industry is state-owned, while nearly all agricultural land is cultivated by state or co-operative farms. Economic planning is centralised, and state economic plans have the force of law. In 1965 the system was reformed to allow for a greater devolution of responsibility to enterprises and factories, and greater emphasis was placed on profitability and competition within a centrally planned economy. After the events of 1968–69 there was a sharp swing back to the present highly centralised system. There are at present no signs of substantial economic reform.

Language and Literature.—Czech and Slovak are the official languages, each having its own literature. The Reformation gave a wide-spread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415 as a religious and social reformer) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the 17th century when Jan Amos Komenský or Comenius (1592–1670) was expelled from the country. He is still recognized as an outstanding educationist and a thinker of first magnitude. Under Austrian repression and with the persistent pursuit of Germanization, there was a period of stagnation until the national revival in the first half of the 19th century. Modern prose, drama and fiction, penned between the Wars, are represented by several authors, of international reputation, notably K. M. Čapek–Chod (1860–1927), Viktor Dyk (1877–1931), Jaroslav Hašek (1883–1923) Karel, Čapek (1890–1938), Vladimír Vančura (1891–1942), and Ivan Olbracht (1882–1952). Liberty of the press ceased with the loss of independence and the Nazi occupation in 1939. It was temporarily restored on the liberation of the country. After the Communist take-over of February, 1948, however, freedom of the press was curtailed. All papers and periodicals were forced to follow the Party line and a number of publications were banned. Following the thaw of 1956 and after the relapse into dogmatism after the Hungarian Revolution, the new wave of freedom started in 1962–1963 and led to increased recognition of Czech and Slovak literature in the world. Greater international recognition is hampered by translation difficulties. In 1966 nearly 250 Czech and Slovak books were published abroad, including roughly one-third in non-Socialist

countries. The prominent writers include František Hrubín (b. 1910), Bohumil Hrabal (b. 1914), Václav Havel (b. 1936), Ladislav Mňačko (b. 1919), Ladislav Novomeský (b. 1904), Arnošt Lustig (b. 1926), Jiří Mucha (b. 1915), and others. Poetic writing ranges from traditional lyric (Jaroslav Seifert) to "concrete" and typographic modernism (Jiří Kolář, Josef Hřímal). In the present political conditions few of these writers are published in Czechoslovakia.

Education.—Education is compulsory and free for all children from the ages of 6 to 15. The number of pupils in basic nine-year schools is 1,890,081 (1973–74). There are 127,451 students in the secondary grammar schools and the number given for technical schools of all kinds is 277,945. There are five universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno, Olomouc and Košice. In addition there are a considerable number of other institutions of university standing, technical colleges, agricultural colleges, etc. In 1973–74, there were 135,874 students in centres of higher education of which 23,811 were part-time.

Finance.—The Czechoslovak currency is the Czechoslovak Koruna (Kčs=Czechoslovak crown) of 100 heller. The present Czechoslovak rate of exchange is Kčs. 10.45 = £1 (June 1976) with a bonus of 75 per cent. for non-commercial travellers (see also p. 83).

DENMARK

(Kongeriget Danmark)

Queen, Margrethe II, eldest daughter of King Frederik IX, born April 16, 1940, succeeded Jan. 14, 1972, married June 10, 1967, Count Henri de Monpezat (Prince Henrik of Denmark) and has issue Crown Prince Frederik born May 26, 1968; and Prince Joachim, born June 7, 1969.

CABINET

Prime Minister, Anker Jørgensen.
 Foreign Affairs, K. B. Andersen.
 Finance, Knud Heinesen.
 Economic Affairs, Per Hækkerup.
 Labour, Erling Dinesen.
 Foreign Economic Affairs, Ivar Nørgaard.
 Housing and Environment, Helge Nielsen.
 Interior, Egon Jensen.

Public Works and Cultural Affairs, Niels Matthiasen.
Social Affairs, Eva Gredal.
Commerce, Erling Jensen.
Justice and Defence, Orla Møller.
Education, Ritt Bjerregaard.
Inland Revenue, Svend Jakobsen.
Ecclesiastical Affairs and Greenland, Jørgen Peder Hansen.
Agriculture and Fisheries, Poul Dalsager.

ROYAL DANISH EMBASSY IN LONDON

29 Pont Street, S.W.1

[01-584 0102]

Ambassador Extraordinary and Plenipotentiary, His Excellency Erling Kristiansen, G.C.V.O. (1964).
Minister Plenipotentiary, K. E. Willumsen, K.C.V.O.
1st Secretaries, E. H. Schmiegelow, M.V.O.; E. Hede-gard.

Minister Plenipotentiary, Press and Culture, H. Agerbak, C.V.O.

Economic Counsellor, B. V. Blond.

Agricultural Counsellor, M. Hermansen.

Defence Attaché, Col. H. H. Prince Georg of Denmark K.C.V.O.

Commercial Counsellor, J. Marcussen.

Area and Population.—A Kingdom of Northern Europe, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic, the Faroes and Greenland. Denmark is situated between 54° 34'–57° 45' N. lat., and 8° 5'–15° E. 12' long., with an area of 17,000 square miles, and a population estimated (April 1975) of 5,054,909. In 1972 there were 75,505 live births, 50,445 deaths and 31,073 marriages.

Government.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Farøes and 2 for Greenland. Voting age has been 18 since 1971.

A Social Democrat minority Government was formed in February 1975. The representation in the *Folketing* following the 1974 election was as follows; Social Democrats 53; Venstre 42; Progress Party 24; Radicals 13; Conservatives 10; Christian People's Party 9; Socialist People's Party 9; Communists 7; Centre Democrats 4; Left Socialists 4; Greenland 2; Farøes 2.

In 1973 Denmark joined the European Economic Community. Denmark is also a member of NATO, and the Nordic Council.

Education is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478), Aarhus (1933), Odense (1966), Roskilde (1972) and Aalborg (1974). A further University at Esbjerg is planned.

Language and Literature.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1807–1875), Søren Kierkegaard (1813–1855) and Georg Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1944. Among recent authors of note are Klaus Rifbjerg (b. 1931) and Leif Panduro (b. 1923). Some 52 newspapers are published in Denmark. 10 daily papers are published in Copenhagen.

Production and Industry.—Nine per cent. of the labour force is engaged in agriculture, fishing, forestry, etc.; 35 per cent. in manufacturing, building and construction; 17 per cent. in commerce and 28 per cent. in administration, the liberal

professions, etc. The chief agricultural products are pigs, cattle, dairy products, poultry and eggs, seeds, cereals and sugar beet; manufactures are mostly based on imported raw material but there are also considerable imports of finished goods.

COMMUNICATIONS.—Mercantile marine (ships above 100 gross tonnage) at end of 1972, 1,567 ships, with a gross tonnage of 4,069,017. On March 31, 1973, there were 2,522 km. of railway. In 1973 the capacity of the telecommunications network in circuit km. was 12,366,000.

FINANCE

1976–77

Revenue (Budget estimate).... Kr. 67,000,000,000

Expenditure (Budget estimate)... 79,300,000,000

Denmark's balance of payments on current account showed a deficit for 1975 of Kr. 3,050,000,000 (1974, Kr. 5,755,000,000).

Rate of Exchange.—Kr. 10.80–11.00 = £1 (floating) (June 1976) (see also p. 83).

TRADE

	1974	1975
	Kr. million	
Total Imports.....	60,138	59,491
Total Exports.....	46,915	50,053

Trade with U.K.

	1974	1975
Imports from U.K..	£427,074,000	£443,122,000
Exports to U.K....	577,115,000	621,704,000

The principal imports are petroleum and its products, machinery, vehicles and textile products. The chief exports are agricultural produce, fish products, butter, bacon, eggs, meat and livestock and machinery.

CAPITAL. Ψ Copenhagen, pop. (1970), 802,226; Greater Copenhagen, 1,380,118. Other centres are: Ψ Aarhus, 198,980; Ψ Odense 137,288; Ψ Aalborg, 100,255; Ψ Esbjerg, 68,085; Ψ Randers, 58,411; Roskilde, 44,245; Ψ Kolding, 41,612; Ψ Horsens, 44,121; Ψ Fredericia, 36,154; Ψ Vejle, 43,876.

FLAG.—Red, with white cross
NATIONAL DAY.—June 5 (Constitution Day).
 Copenhagen, distant from London 728 miles; transit 26 hours by rail and sea.

BRITISH EMBASSY

Offices, Kastelsvej 36–40, Copenhagen.

Residence, Bredgade 26, Copenhagen.

Ambassador Extraordinary and Plenipotentiary, Her Excellency Anne Marion Warburton, C.V.O. (1976).

Counsellor, R. J. T. McLaren.

Counsellor (Commercial), G. L. Simmons, M.V.O.

Defence, Naval, Military and Air Attaché, Cdr. D. Monsell, R.N.

1st Secretaries, J. P. Davies; W. E. W. Matthey (Administration and H.M. Consul); F. S. Napier (Information); J. R. Cowling (Commercial); P. S. Astley; G. L. Jones (Agriculture and Fisheries); C. Marshall (Labour) (resident in Stockholm).

Asst. Military Attaché, Major R. N. L. Denyer.

Asst. Air Attaché, Sqn. Ldr. C. P. Russell-Smith.

2nd Secretaries, D. G. Parker (Commercial); D. A. Rogers.

Attachés, Miss P. A. Terry (Consular); Miss B. Brett-Rooks (Commercial).

Chaplain, Rev. D. H. T. Pictou.

There are Consulates at Aabenaa, Aalborg, Esbjerg, Aarhus and Odense; and at Thorshavn and Klaksvig (Farøes).

British Council Representative and Cultural Attaché, D. B. Pickersgill, Montecroft 1, Copenhagen.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 81,000 inhabitants. The FARØES, or Sheep Islands (540 sq. m.; pop. (1969) 38,000), capital, Thorshavn, are governed by a *Lagting* of 26 members, a *Landstyre* of 4 members which deals with special Farøes affairs, and send 2 representatives to the *Folketing* at Copenhagen. On Sept. 14, 1946, the *Lagting*, with the consent of the Danish Government, for its own guidance held a plebiscite on the Farøes. About one-third of the electors did not, however, take part in the voting; of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At subsequent general election for the *Lagting* a great majority voted in favour of remaining part of the Kingdom of Denmark with a certain measure of home rule and in 1948 the Farøes received this. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, 1965, 48,792) is divided into 3 provinces (West, North and East). Greenland (capital, Godthaab) has a *Landsraad* of 17 members and sends 2 representatives to the *Folketing* at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department. Mineral and oil prospecting revealed deposits of lead, zinc, iron ore, oil and gas. Commercial exploitation of these resources has not yet begun. The United States of America has acquired certain rights to maintain air bases in Greenland.

DOMINICAN REPUBLIC

(República Dominicana)

President, Joaquín Balaguer, born Sept. 1, 1907; elected June 1, 1966; re-elected May 16, 1970; re-elected, May 16, 1974.

EMBASSY AND CONSULATE

4 Braemar Mansions, Cornwall Gardens, S.W.7 [01-937 1921]

Ambassador Extraordinary and Plenipotentiary, His Excellency Alfredo A. Ricart (1975).
Cultural Attaché, Mrs. N. Barletta.

There are also Consular Offices at Liverpool, Birmingham, Manchester, Nottingham, Grimsby, Southampton, Plymouth, Cardiff, Edinburgh, Glasgow and Belfast.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America. The

western part of the island forms the Republic of Haiti. (For Map, see p. 870.)

The island lies between Cuba on the west and Puerto Rico on the east and the Republic covers an area of about 19,322 square miles, with a population (U.N. estimate, 1970) of 4,012,000. The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes.

Government.—Santo Domingo was discovered by Christopher Columbus in December, 1492, and remained a Spanish Colony until 1821. In 1822 it was subjugated by the neighbouring Haitians who remained in control until 1844 when the Dominican Republic was proclaimed. The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. In July, 1924, a properly elected Constitutional Government was installed. From 1930 until May 30, 1961 (when he was assassinated) Generalissimo Rafael Trujillo ruled the country.

A Council of State headed by Rafael F. Bonnelly was set up in 1962, and Professor Juan Bosch, elected President in December 1962, held office until September, 1963, when he was deposed by a military junta. A revolt in favour of ex-President Bosch in April, 1965, developed into civil war lasting until September the same year when a provisional President was elected. At a further election on June 1, 1966, Dr. Joaquín Balaguer was elected President; re-elected May 16, 1970 and again on May 16, 1974.

Communications.—According to local classification there are 2,932 miles of first class and 1,392 miles of second class and inter-communal roads in the Republic. There is a direct road from Santo Domingo to Port-au-Prince, the capital of Haiti, but that part of it in the border area has fallen into disuse and although road travel is possible, it is preferable to travel direct between the two capitals by air. The frontier has been closed since Sept., 1967, except for that section crossed by the main road linking the two capitals. A telephone system connects practically all the principal towns of the republic and there is a telegraph service with all parts of the world. There are more than 90 commercial broadcasting stations and there is a television station operated by Radiotelevision Dominicana, which with the help of relay stations provides receptions of its programmes in the major cities. Three other television stations in Santo Domingo—Rahintel, Tele-Inde and Color-Vision—transmit to the local area.

Spanish is the language of the Republic.

The Republic is served by two national and six foreign airlines, and an international airport 18 miles to the east of the capital is in operation. Another is being constructed near Puerto Plata on the north coast.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, ferro-nickel, bauxite, gold, silver, cattle, sisal products, honey and chocolate. There is a growing number of light industries producing beer, tinned foodstuffs, glass products, nylon and cotton textiles, soap, cigarettes, construction materials, plastic articles, shoes, papers, paint, rum, matches, peanut oil and other products.

	FINANCE	
	1975 (est.)	1976 (est.)
Budget	RD\$486,308,238	RD\$530,000,000

	TRADE	
	1974	1975
Imports	RD\$673,000,000	RD\$773,000,000
Exports	RD\$650,000,000	RD\$920,000,000

Trade with U.K.

	1974	1975
Imports from U.K....	£6,396,000	£6,123,000
Exports to U.K.....	10,553,000	7,522,000

The chief imports are machinery, food stuffs, iron and steel, cotton textiles and yarns, mineral oils (including petrol), cars and other motor vehicles, chemical and pharmaceutical products, electrical equipment and accessories, construction material, paper and paper products, and rubber and rubber products; the chief exports are sugar, coffee, cocoa, tobacco, chocolate, molasses, bauxite, ferro-nickel and gold.

The principal export to U.K. over a number of years has been sugar by-products; ferro-nickel and bauxite are also exported in considerable quantities to the U.S.A. and Europe.

CAPITAL, Ψ Santo Domingo, population of the Capital District (1970 census), 817,000. Other centres, with populations (1970 census); Santiago de los Caballeros (245,000); La Vega (156,000); San Francisco de Macoris (126,000); San Juan (114,000); San Cristóbal (106,000).

FLAG.—Red and blue, with white cross bearing an emblem at centre.

NATIONAL DAY.—February 27 (Independence Day, 1844).

There are consulates at *Liverpool*, *Birmingham* and *Glasgow*.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. $1^{\circ} 38' N.$ to $4^{\circ} 50' S.$, and between $75^{\circ} 20'$ and $81^{\circ} W.$ long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles. (For MAP, see Index.)

The Republic of Ecuador is divided into 20 provinces. It has a population estimated (1973) at 7,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,408 ft.), Ilinza (17,405 ft.), Carluhuairazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,612 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholuca (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Giant Tortoise) *Islands* forming the province of the Archipelago de Colón, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1973) of 4,000. The capital is San Cristóbal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the *Antarctic Humboldt Current*. The province consists for the most part of National Park Territory, where unique marine birds, iguanas, and the giant tortoises are conserved. There is some local subsistence farming; the main industry, apart from tourism, is tuna and lobster fishing.

Government.—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). On Jan. 11, 1976, a military junta assumed power from President Guillermo Rodríguez Lara.

Production and Industry.—The chief products are petroleum, bananas, cocoa, coffee, sugar, rice, straw hats, pyrethrum, xanthophyll, scopolamine, vegetable ivory and balsa wood. The oil deposits in the Oriente are estimated at between 10-15,000,000,000 barrels. The oil is evacuated by a trans-Andean pipeline to the port of Balao (near Esmeraldas). In the highlands the principal crops are maize, wheat, potatoes and other temperate products. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found. A Five-Year industrialisation programme was introduced in 1973, and industry is being rapidly diversified; textiles have traditionally been predominant.

Communications.—There are 23,256 km. of permanent roads and 5,044 km. of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. Nine commercial airlines operate international flights, linking Ecuador with New York, Miami, Panama, Lima, Santiago, Rio de Janeiro, Paris, Frankfurt, Madrid, etc. There are internal services between all important towns.

Defence.—The standing Army has a strength of about 15,000. There is an Air Force of some 90 aircraft of various kinds and a small Navy.

Language and Literature.—Spanish is the language of the country. The electorate is confined to adult

male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 4 at Guayaquil. Elementary education is free and compulsory. In 1973 there were 8,062 primary schools with 1,091,102 pupils and 894 high schools with 278,400 pupils. The 9 Universities, at Quito (2), Guayaquil (3), Cuenca, Machala, Loja and Portoviejo, the Polytechnic Schools at Quito and Guayaquil and the 8 technical colleges in other provincial capitals had 70,138 students in the same year.

FINANCE 1973
Revenue (Budget Estimates)... Sucres 8,700,000,000
Expenditure (Budget Estimates)..... 8,700,000,000

1974
Revenue (Budget Estimates).... Sucres 9,427,000,000
Expenditure (Budget Estimates)..... 9,427,000,000
Internal Debt (Sept. 30, 1967)..... 4,516,570,000
External Debt (Dec. 31, 1972)... U.S.\$343,295,000

The official rate of Exchange: Sucres 57= £1, is used for most legal imports and exports. There is also a free rate of exchange. See also p. 83.

TRADE
Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

1971 1972
Imports.... \$U.S.289,793,000 \$U.S.279,128,000
Exports.... 221,544,000 279,783,000

Trade with U.K.

1974 1975
Imports from U.K..... £13,600,000 £17,307,000
Exports to U.K..... 2,170,000 2,065,000

The chief exports are petroleum, bananas, cocoa, coffee and sugar. Other exports are rice, balsa wood, castor-oil seeds, hats, pharmaceuticals, fish, ivory, nuts and pyrethrum. Manufactured goods and machinery are the main imports.

CAPITAL—Quito. Population (estimated 1972), 700,000; Ψ Guayaquil (1,000,000) is the chief port; other centres are Cuenca (100,000); (est. 1968) Ambato (69,766); Riobamba (50,710); Ψ Esmeraldas (51,573); and Ψ Manta (42,750). The foregoing figures of urban populations have been revised by the Census and Statistics Office to exclude from 1968 figures for rural areas of the cities (i.e. areas not supplied by city fuel or water services).

FLAG.—Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others); emblem in centre.

NATIONAL DAY.—August 10 (*Día de la Independencia*).

Counsellors, Gamal Mohamed Said; Mahmoud Abdel Rahim Pasha; Hassan Shakir Abdel-Aal; Emad El Din Aly El-Kadi; Mohamed Salah El-Din Mohamed Abboud; Ahmed Amin Waly; Farouk Mohammed Youssef El-Kady.

1st Secretaries, Mohammed Abdel Rahim Mohamed (Consular); Nabil Rihaan (Consular); Ali Mutwaili Hegazi; Farouk Heimy Ali Helmy; Hamdi Mohamed Nada.

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (385,120 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population (estimated May, 1971) of 34,000,000.

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellāh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayūm. The third element is the *Nubian* of the Nile Valley between Aswān and Wadi-Halfa of mixed Arab and Negro blood. The *Bedouin* and *Nubians* are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubai, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollūm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweināt Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of 'Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of 'Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddāns* (12,431 square miles) and the area of lakes at 641,000 *feddāns* (1,039 square miles), a total of 8,308,000 *feddāns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country.

The Nile has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river formerly had a regular yearly rise and fall of about 13 feet at Cairo, but since the commencement of storage in the reservoir of the Aswan High Dam in 1965, there has been no flood downstream of the Dam and the water level remains almost constant throughout the year. Westward from the Nile Valley into Tripolitania stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia and Siwa.

On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Gizeh, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

Religions.—The predominant religion is Islam but there are about 2,000,000 Christians (mainly Copts). By 1968 nearly all the Jews had left the country. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti Gumhuriya Misr al Arabiya*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire under which it remained until early in the 19th century.

A British Protectorate over Egypt declared on Dec. 18, 1914, lasted until Feb. 28, 1922, when Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936) and the military occupation by British troops was terminated.

In July, 1952, following a military *coup d'état*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

A union with Syria was affected in 1958 and lasted until September, 1961, when Syria seceded after a *coup d'état*. The title and flag of the United Arab Republic were, however, retained for Egypt until Sept. 2, 1971.

President Nasser died suddenly on Sept. 28, 1970, and the duties of Head of State were assumed by Mr. Anwer Sadat who was elected President in a referendum on Oct. 15.

Agriculture.—Despite increased industrialization and the discovery of new oil fields, agriculture continues to provide the most substantial contribution to the national economy. Cotton (10 million *kanbars* in 1974) is the most important export, but sugar cane, onions, potatoes and citrus fruits are also sold extensively to overseas markets. Nearly all cultivation is carried out by peasant farmers whose operations are funded and generally controlled by co-operative organizations. Productivity is usually good. Irrigation and land reclamation schemes have contributed to a small increase in the cultivable area, and a \$147 million drainage project, financed partly by the International Bank for Reconstruction and Development, is intended ultimately to irrigate nearly one million acres.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and

southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to a new port being constructed upstream of the High Dam. At this point a steamer connection runs to New Halfa, connecting Egypt with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollüm, thus joining Libya to Egypt. The gauge is standard (4 ft. 8½ in.).

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollüm and thence to connect with the coast road in Libya. A bitumen road leads to Kharga and Dakhla, from the former of which there is a route, known as the Darb el 'Arabain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir, a metalled road, being probably the most frequently used.

Shipping.—Ψ Apart from the three great seaports of Alexandria, Port Said and Suez, the last two of which are now undergoing reconstruction following several years of disuse after the 1967 war, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollüm and Matruh on the Mediterranean, Thor, Abu Zenima, Zeïda, Jemsa and Hurgghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

Currency.—£E (Egyptian pound of 100 piastres) = 97p sterling. Floating Official Rate of Exchange, plus a Preferential Rate of Exchange for visitors, about 50 per cent. above the Official Rate.

Trade with U.K.

	1974	1975
Imports from U.K.	£52,000,000	£108,000,000
Exports to U.K.	27,000,000	41,000,000

The principal imports are metals, and manufactures thereof, chemicals and pharmaceuticals, machinery and transport equipment, foodstuffs, beverages and textile fibres. The exports are principally raw cotton, textile yarns, rice, fruit and vegetables, petroleum products and a growing list of secondary exports, many of them manufactured goods.

CAPITAL.—Cairo (population, estimated in 1975 at 8,143,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century and containing in its walls the Mosque of Mohamed Ali built in the 19th century.

Ψ ALEXANDRIA (estimated population, 1,900,000), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World". Other towns are: Ismaïlla; Ψ Port Said; Mansura (102,709); Asyût (284,000); Faiyûm (162,000); Tanta (139,965); Mahalla el Kubra (115,509); Ψ Suez; Ψ Damietta (97,000).

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days; *via* Marseilles, 6 days.

FLAG.—Horizontal bands of red, white and black, with two 5-point green stars in white band. **NATIONAL DAY.**—July 23 (Anniversary of Revolution in 1952).

BRITISH EMBASSY

Kasr el Doubara, Garden City, Cairo
Ambassador Extraordinary and Plenipotentiary, His

Excellency Willie Morris, C.M.G. (1975).

Counsellor, P. J. S. Moon.

Defence and Military Attaché, Col. W. C. Deller, O.B.E.

H.M. Consul, D. H. G. Rose.

2nd Secretaries, K. J. Passmore; T. Airey (*Administration*); N. R. Brice (*Commercial*).

British Consulate-General, Alexandria

Consul-General, F. W. Hall.

Vice-Consul, G. B. B. Chavasse.

British Council Representative, Dr. N. A. Daniel, C.B.E., 192 Sharia el Nil Agouza, Cairo.

EQUATORIAL GUINEA

President, Francisco Macias (Nguema), elected October 12, 1968.

Formerly the territory of "Spanish Guinea", Equatorial Guinea consists of the Island of Macias Nguema (formerly known as Fernando Póo), an island in the Bight of Biafra about 20 miles from the west coast of Africa, Pagalu Island (formerly Annobon) in the Gulf of Guinea, the Corisco Islands (Corisco, Elobey Grande and Elobey Chico) and Rio Muni, a mainland area between Cameroon and Gabon. It has a total area of about 11,000 sq. miles and a population (U.N. estimate, 1969) of 286,000.

Macias Nguema is a mountainous island with forests of oil palm, ebony, mahogany and oak, and sugar-cane, cotton and indigo. Cocoa, coffee, sugar, tobacco, vanilla nut and kola nut are cultivated and cocoa and other products are exported.

Government.—Former colonies of Spain, the territories now forming the Republic of Equatorial Guinea were from April 1, 1960, constituted as two provinces of Metropolitan Spain, the inhabitants having the same rights as Spanish citizens. As a result of a plebiscite held on Dec. 15, 1963, an autonomous régime was instituted on June 2, 1964, with the approval of the Spanish Government. Equatorial Guinea became fully independent on October 12, 1968, after a referendum on the new constitution held in August, 1968, and presidential elections on Sept. 22, 1968. The latter were supervised by a U.N. Mission. The first President, Señor Francisco Macias, assumed office on Independence Day.

Severe disorders occurred during February and March, 1969, following incidents at the town of Bata (in Rio Muni). Spanish residents left Equatorial Guinea in large numbers, having had to seek the protection of residual Spanish forces while awaiting evacuation to Spain. Some 600 Spanish civilians elected to remain in Macias Nguema and about 80 in Rio Muni, but most of these have subsequently left. Following Nigerian allegations of continuing mistreatment, most of the Nigerian labour force, on whom cocoa production largely depended, were repatriated in late 1975 and early 1976. The economy is now mainly dependent on outside aid, mostly from Communist countries.

CAPITAL, Ψ Malabo (formerly known as Santa Isabel) on the island of Macias Nguema (population 9,000). Ψ Bata is the principal town and port of Rio Muni. **FLAG.**—Three horizontal bands, green over white over red; blue triangle next staff; coat of arms in centre of white band.

British Ambassador, His Excellency, Albert Edward Saunders, C.M.G., O.B.E. (1975) (Resident at Yaoundé, Cameroon).

ETHIOPIA

Provisional Military Administrative Council
Chairman, Brig.-Gen. Teferi Benti.
First Vice-Chairman, Major Mengistu Haile Mariam.
2nd Vice-Chairman, Lt.-Col. Atenafu Abate.

EMBASSY IN LONDON
 17 Prince's Gate, S.W.7
 [01-589 7212]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ato Zaudie Makuria (1976).
1st Secretaries, Ato Mismaku Asrat; Ato Tesfaye Demeke; Ato Aklilu Gebre Kidan.
3rd Secretary, Ato Getahun Dessaiegn.
Attaché, Ato Demelesh Teshome.

Position and Extent.—Ethiopia, with which Eritrea was federated from 1952 to 1962 when it was incorporated as a province, is in North-Eastern Africa, bounded on the north west by the Sudan; on the south by Kenya; on the east by Afars and Issas Territory and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles, with a population of 26,000,000 of whom about one-third are of the ruling race of Semitic origin (Amharas and Tigres) and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. Eritrea consists of a mountainous hog-sback range up to 10,000 ft., interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges are very hot; the higher plateauxs are well watered, with a genial climate. On the high plateauxs there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

Those of Semitic origin (Amharas and Tigres), who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christians of the Ethiopian Orthodox Church, which was formerly led by the head of the Coptic Church, the Patriarch

at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous and the new Patriarch, Abuna Theophilos, was enthroned by the Ethiopian archbishops in May, 1971. Moslems predominate in some areas, notably northern Eritrea, Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

Following considerable military and civil unrest in early 1974 the Emperor Haile Selassie I announced on March 5 the convening of a commission to revise the Constitution, and the setting up within six months of a conference to consider the commission's proposals. It appeared likely that more power would devolve on to Parliament. Internal unrest continued through the summer, however, and at the end of June, the armed forces assumed effective control of the country by establishing an "Armed Forces Committee" now entitled the Provisional Military Administrative Council. Their demands for far-reaching reforms were acceded to by the Government, with the agreement of the Emperor, who was finally deposed on Sept. 12, 1974.

Eritrea.—Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1972, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown, becoming a province of Ethiopia in 1962. An armed campaign for independence has accompanied the collapse of the imperial régime.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 64 per cent. of the country's total exports by value in 1974. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, tyres, beer and cement. Hydro-electric power production and telecommunications are expanding rapidly, however, mainly with loans from the World Bank, which in 1971 had approved a number of loans for agricultural development.

Communications.—A railway links Addis Ababa, the capital, via Dire Dawa, with Djibouti, 486 miles away. In Eritrea a narrow gauge line runs from Massawa to Asmara and on to Agordat. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with a branch from Dessie to Assab on the Red Sea Coast. Addis Ababa and Asmara are linked by a road running through Gondar and along Lake Tana. Others run from Addis Ababa west to Lekempti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East to Dire Dawa, Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to many provincial towns. External services are operated to Athens, Frankfurt, Rome, Paris, Aden, Djibouti, Sana'a, Taiz, Jeddah, Cairo, Khartoum, Nairobi, Dar-es-Salaam, Entebbe, Lagos,

Accra, Douala, Kigali, Kinshasa, Bombay, New Delhi, Peking and London.

Defence.—Under the Ministry of Defence the armed forces comprise the Army the Air Force and the Navy. The Army consists of four infantry divisions, including one mechanized brigade with armour, with normal artillery, engineer units and supporting arms including a parachute battalion. An American Military Advisory and Assistance Group (MAAG) assists the forces, mainly the Army, with training and advice, under an agreement signed with the Ethiopian Government. There is a military academy at Harar and a military training centre at Holleta with a specialist training wing. The Air Force comprises a transport squadron, a bomber squadron, three fighter squadrons, a training squadron, a jet conversion squadron, and an elementary training unit. The Air Force Headquarters is situated at Debre Zeit. The aircraft are mostly of American manufacture but also include Canberras.

The Navy has a headquarters in Addis Ababa with a main base at Massawa and a smaller one at Assab. The principal units are an ex-U.S. seaplane tender (*Ethiopia*), a patrol craft squadron of 5, an MTB squadron of 4, and an ex-Dutch minesweeper.

Education.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools, and cadet-schools for the Army, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. In 1961 the Hailé Selassie I University was founded to co-ordinate the existing institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.) and to provide a framework for future development. There is also a Catholic-run university in Asmara. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa. In 1971 the International Development Agency granted a loan of U.S. \$95 million for the development of secondary education.

Finance.—Total revenue for 1974–75 was estimated at £180 m., while expenditure was expected to reach £188 m. The Ethiopian dollar has a value of 5.52 grains of fine gold and is divided into 100 cents. At Jan. 31, 1975, the combined note and coin issue amounted to £128,000,000. Foreign exchange and gold reserves of the National Bank amounted to £115,000,000 at the same date. Eth. \$4.90 = £1 (May 1975). (See also p. 83.)

Trade.—The chief imports by value are machinery and transport equipment, manufactured goods, chemicals, beverages and tobacco (from U.K.); the principal exports by value being coffee, oilseeds, hides and skins, and pulses.

TRADE

	1973	1974
Total Imports.....	£85,000,000	£116,000,000
Total Exports.....	122,000,000	143,000,000
	1974	1975
Imports from U.K.....	£9,815,000	£8,709,000
Exports to U.K.....	4,804,000	3,762,000

CAPITAL. Addis Ababa (population, estimated 912,000), also capital of the province of Shoa; Asmara (population 250,000) is the capital of the Province of Eritrea. Dire Dawa is the most

important commercial centre after Addis Ababa and Asmara, the Massawa and the Assab (recently enlarged) are the two main ports. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG.—Three horizontal bands; green, yellow, red; bearing crowned lion at centre.

NATIONAL DAY.—July 23.

BRITISH EMBASSY
(Addis Ababa)

Ambassador Extraordinary and Plenipotentiary, His Excellency Derek Malcolm Dey, C.M.G. (1975).

There are British Consular Offices at Addis Ababa and Asmara.

British Council Representative, E. C. Pugh, Artistic Building, Adua Avenue, Addis Ababa.

FINLAND

(Suomi)

President, Dr. Urho Kaleva Kekkonen, G.C.B., born 1900, elected Feb. 15, 1956; re-elected 1962 and 1968; term extended until 1978 by Act of Parliament (1973).

CABINET

Prime Minister, Martti Miettunen (CP).

Foreign Minister, Kalevi Sorsa (SDP).

Minister in the Cabinet Office, Reino Karpola (CP).

FINNISH EMBASSY AND CONSULATE

38 Chesham Place, S.W.1

[01-235 9531]

Ambassador Extraordinary and Plenipotentiary, His Excellency Richard Björnson Tötterman, K.C.V.O., O.B.E. (1975).

Counsellor, Erkki Mäentakanen.

1st Secretary, Juhani Muhonen.

2nd Secretaries, Erkki Palmqvist; Esko Hamilo.

Press Counsellor, Kristofer Gräsbeck.

Cultural Counsellor, Henrik Antell.

Defence Attaché, Lt.-Col. Pertti Nykänen.

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,165 square miles, of which 70 per cent. is forest, 10 per cent. cultivated, 9 per cent. lakes and 11 per cent. waste and other land, population (1975), 4,720,259. In 1975 the birth rate was 14.1, death rate 9.4 per 1,000. The infant mortality rate was 10.2 per 1,000 live births. 92.6 per cent of the people are Lutherans, 1.2 per cent. Greek Orthodox and 6.2 per cent. others.

The Åland Archipelago (Åhvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1973) of 21,800 (96.3 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are

eligible, composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

The present government came into office on Dec. 1, 1975. The five parties in the coalition are the Social Democratic Party, the Centre Party, the Finnish People's Democratic League (which includes the Finnish Communist Party), the Swedish People's Party and the Liberal People's Party.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the Army is limited to a force not exceeding 34,400. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8-11 months. None of the Defence Forces has the full complement permitted.

Education.—Primary education is compulsory for children from 7 to 16 years, and free in certain State and municipal schools. In the autumn of 1975, there were 128,172 in primary schools, 449,942 in comprehensive schools, 16,391 in experimental comprehensive schools and 196,807 in secondary schools. There are 11 Higher Schools and 6 Universities (1975): Helsinki University (1975), 20,894 students. Combined enrolment at Higher Schools and Universities was 72,502.

Language and Literature.—Most Finns are bilingual. 93.2 per cent. speak Finnish as their first language, 6.6 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1917 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Fin-

nish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 62 daily newspapers in Finland which appear on 4 or more days per week (55 Finnish language, and 7 Swedish).

Production and Industry.—Finland is a highly industrialised country producing a wide range of capital and consumer goods. Timber and the products of the forest-based industries remain the backbone of the economy, accounting for about half of her export earnings, but the importance of the metal-working, shipbuilding and engineering industries is growing. This sector in 1975 accounted for over a quarter of Finland's exports. The textile industry is well developed and Finland's glass, ceramics and furniture industries enjoy international reputations. Other important industries are rubber, plastics, chemicals and pharmaceuticals, footwear, foodstuffs and electronic equipment.

Communications.—There are 5,900 kilometres of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R., passenger boat connection with Britain, Sweden, Denmark and West Germany. Vessels on the London to Leningrad route call at Helsinki. There are also passenger/cargo services between Britain and Helsinki, Korka and other Finnish ports. External civil air services are maintained by British Airways, Finnair, Kar Air, Scandinavian Airlines, Maley, Lufthansa, Interflug, Pan American, LOT (Polish Airlines), Aeroflot, Czechoslovak Airlines and Swiss Air. The merchant fleet at the end of 1975 totalled 450 vessels (2,048,100 tons gross); 24 steamers (13,300 tons gross); 365 motor vessels (896,200) and 61 tankers (1,138,600).

FINANCE

	1975 Finnmarks	1976* Finnmarks
Revenue (Budget) . . .	24,779,000,000	29,010,000,000
Expenditure (Budget) 27,050,000,000	27,050,000,000	29,009,000,000

* Proposed budget figures for 1976.

TRADE

	1974 Finnmarks	1975 Finnmarks
Total Imports . . .	25,676,000,000	27,974,000,000
Total Exports . . .	20,687,000,000	20,248,000,000

	1974	1975
Imports from U.K. . .	£228,000,000	£264,466,000
Exports to U.K. . . .	493,000,000	400,402,000

The principal imports are raw materials, foodstuffs, machinery and manufactured goods. The exports are principally the output of the timber and forest based industries and metal industry (e.g. paper-working machinery and ships).

CAPITAL.—ψ Helsinki (Helsingfors). Population 505,719; other towns are Tampere (Tammerfors), 164,423; ψ Turku (Åbo), 162,210; Lahti, 93,396; ψ Oulu (Uleaborg) 89,039; ψ Pori (Björneborg) 79,295; Jyväskylä, 59,930; Kuopio, 69,569; Lappeenranta, 52,052; and ψ Vaasa (Vasa) 54,115.

Mme. Françoise Giroud (Culture).

FRENCH EMBASSY IN LONDON

Residence: 11 Kensington Palace Gardens, W.8 [01-229 9411]

Chancery: 58 Knightsbridge, S.W.1. [01-235 8080].

Ambassador Extraordinary and Plenipotentiary, His Excellency Monsieur Jacques de Beaumarchais (1972).

Minister-Counsellor, M. Jean-Max Bouchaud.

2nd Counsellors, M. Charles Crettien; M. Robert Delos Santos.

Press Counsellor, M. Daniel Contenay.

1st Secretaries, M. Denis Nardin; M. Jean-Paul Réau; M. Henri Vignal.

2nd Secretary, M. Philippe Selz.

3rd Secretary, M. Dominique Raoux (Press).

Area and Population.—The largest state in Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 85' E. to 4° 45' W. long., bounded on the north by the English Channel and the Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles and its area at 213,000 sq. miles divided into 95 departments, including the island of Corsica, in

the Mediterranean, off the west coast of Italy. The population of France (estimated) in 1975 was 52,590,000.

Government.—Following the death of President Pompidou in 1974, M. Giscard d'Estaing was elected President. He assumed office on May 27. After the most recent parliamentary elections held on March 4 and 11, 1973, the strengths of the party groups in the National Assembly were established as follows:—

Union of Democrats for the Republic (Gaullist).....	183
Socialists and left-wing Radicals.....	102
Communists.....	73
Independent Republicans (Government Supporters).....	55
Reformers.....	34
Central Union (Government Supporters)....	30
Others.....	13

Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The *Prime Minister* is appointed by the President, as is the Cabinet on the Prime Minister's recommendation. They are responsible to Parliament. But the executive is constitutionally separate from the legislature and Ministers may not sit in Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session.

A *Constitutional Council* is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the *Economic and Social Council* gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

Production.—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1974-75 was:—

	(Quintals)
Wheat.....	159,685,000 (1974-75)
Oats.....	36,868,000 (1975)
Barley.....	61,803,000 (1974-75)
Rye.....	3,892,000 (1975)
Maize.....	52,206,900 (1975)

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1974 was 62,100,000 hectolitres. Cider-making is also an important industry. The mineral resources include coal, natural gas, pig iron, bauxite, lead, silver, antimony and salt. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

Language and Literature.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Tunisia, Algeria, Mauritius, Haiti and the Province of Quebec, Canada, to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 11 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1927), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952), Albert Camus (1957), St. John Perse (Alexis Léger) (1960) and Jean Paul Sartre (1964).

Defence.—The personnel of the Defence Forces in September 1975 totalled: ARMY 331,500; AIR FORCE 102,000; NAVY 69,000; GENDARMERIE 70,000. National nuclear forces include medium-range ballistic missiles, submarine-launched ballistic missiles and *Mirage IV* medium bombers. The Army has a variety of new French-made equipment in service, including medium tanks, field and anti-aircraft SP guns, trucks and radio equipment.

Defence Budget for 1974, 38,221,000,000,000 francs.

Education.—The educational system is highly developed and centralized. It is administered by the Ministry of National Education, comprising (a) the *Direction des Enseignements Supérieurs*; *Direction de la Pédagogie, des Enseignements Scholaires et de l'Orientation*; *Direction des Personnels d'Enseignement Général Technique et Professionnel*; *Direction des Services Administratifs et Sociaux*; *Direction de l'Équipement Scolaire, Universitaire et Sportif*; *Direction des Bibliothèques et de la Lecture Publique*; *Direction de la Coopération*; (b) the Superior Council of National Education (consultative); and (c) the Inspectorate. *Local Administration* comprises 25 Territorial Academies, with inspecting staff for all grades, and Departmental Councils presided over by the *Préfet*, and charged especially with primary education.

Primary and secondary education are compulsory, free and secular, the school age being from 6 to 16. Schools are for boys, for girls, or mixed. (i) *Primary education* is given in *écoles maternelles* (nursery schools), *écoles primaires élémentaires* (primary schools) and *collèges d'enseignement général* (4-year secondary modern course); (ii) *Secondary education* in *collèges d'enseignement technique*, *collèges d'enseignement secondaire* and *lycées* (7-year course leading to one of the five *baccalauréats*). *Baccalauréat A* consists largely of philosophy and languages with a little mathematics, and provides entry into the faculties of Letters and Law. *Baccalauréat B* groups languages, mathematics and economics with philosophy classes oriented towards psychology and sociology. It provides entry to the faculties of Letters for the social sciences and to the faculty of Law for economics. *Baccalauréat C*, consisting of mathematics and physics with some languages, provides entry to the faculty of Sciences for those studying for a degree in mathematics and physics. *Baccalauréat D* has the same language component as *Baccalauréat C*, but its main feature is the natural sciences. It provides entry to the faculty of Sciences for natural science degrees, and also to the Medicine and Pharmacy Faculties. *Baccalauréat E* is largely scientific and technical with a language element, and provides entry to engineering schools and the Faculty of Science. (iii) *Special schools* are numerous. (iv) There are numerous *Grandes Ecoles* in France which award diplomas in many subjects not taught at university, especially applied science and engineering. Most of them are State institutions but have a competitive system of entry, unlike the universities. (v) The reform of the French university structure continues, and there are now universities in twenty-four towns in France. In the major provincial towns the existing university has been reorganized to form two, or three universities, and in Paris and the immediate surrounding district there are, since autumn 1970, thirteen universities.

Archæology, etc.—There are dolmens and menhirs in Brittany, prehistoric remains and cave drawings in Dordogne and Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cæsar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgæ from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and

those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and the XVIIth and XVIIIth century châteaux survived the French Revolution.

Roads.—The length of the *Routes Nationales* at the end of 1974 was 73,306 km. and of motorways 2,628 km. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use in 1975 were 8,623 km.

Railways.—The system of railroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic at the end of 1974 was 34,810 km., of which 9,325 km. were electrified. Traffic at the end of 1974 totalled 47,100,000,000 passenger-km. and 77,054,000,000 ton-km.

Shipping.—The French mercantile marine consisted in Jan. 1973, of 531 ships of 7,440,004 tons gross, of which 26 were passenger vessels (229,696 tons gross), 129 tankers (4,658,995 tons gross) and 376 cargo vessels (2,551,313 tons gross).

FINANCE

	1973	1974
	F. millions	
Total revenue (<i>Budget</i>).....	225,278	272,898
Total expenditure (<i>do.</i>).....	220,018	254,148
The Public Debt on Dec. 31, 1972, was F.87,810,000,000 of which the external debt amounted to F.8,400,000,000.		

Currency.—The unit of currency is the *franc* of 100 *centimes*, which was devalued on Aug. 10, 1969. Bank notes in 10, 50, 100 and 500 *franc* denominations and coins in 1, 5, 10 and 20 *francs* are issued.

EXCHANGE RATE (at May 14, 1976).—F.8-53/8-63 = £1 (see also p. 83).

COMMERCE

The principal imports are machinery, mineral fuels, chemical products, automobiles, iron, electrical equipment, minerals and non-ferrous metals, textile and leather goods, meat, fish, poultry and other agricultural products and precision instruments. The principal exports are automobiles, chemical products, iron and steel, textile and leather goods, machinery, electrical equipment, cereals and flour, wine and other agricultural products.

OVERSEAS DEPARTMENTS

With effect from Jan 1, 1947, the colonies of Guyane (French Guiana), Martinique, Guadeloupe and La Réunion with its dependencies have been theoretically administered in exactly the same way as the Metropolitan Departments, but in practice somewhat greater discretion is allowed to the Prefects and the locally elected bodies.

La Réunion.—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (1974), 476,675. Capital,

St. Denis (104,603). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations 1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land in the Antarctic Continent are also dependencies of Réunion. Imports from U.K., 1975, £1,138,000.

Martinique.—An island situated in the Windward Islands group of the West Indies, between Dominica in the north and St. Lucia in the south. Population 324,832. Capital Ψ Fort de France (100,576). Other towns are Ψ Trinité (11,214) and Ψ Marin (6,104).

Guadeloupe.—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Population 324,530. Capital Ψ Pointe à Pitre 23,889. Other towns are Ψ Basse Terre (15,778) in Guadeloupe and Ψ Grand Bourg (6,611) in Marie Galante.

French Guiana.—Area, 35,000 sq. miles. Population (U.N. estimate, 1969), 48,000. Capital, Ψ Cayenne (20,000). Situated on the north-eastern coast of South America, French Guiana is flanked by Surinam on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royal and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894 to 1899. Imports from U.K. in 1975 were valued at £422,000.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (estimated, 1975), 2,317,227 (town); 6,293,958 (incl. suburbs).

District of Paris.—Created by legislation promulgated on August 10, 1966, the District consists of 8 Departments one of which is the City of Paris (see list of Departments, p. 855).

Paris is administered by the Council of Paris which is composed of 90 members elected for six years by popular vote within the city/Department. The President and four Vice-Presidents of the Council are elected for one year by the members. The President presides over the meetings of the Council and is the representative of Paris on all official occasions. The administrative functions exercised in all other towns by the Mayor are exercised in Paris by two Government nominees: the Prefect of Paris, and the Prefect of Police. But Mayors are elected in each of the 20 *arrondissements* of Paris to carry out local civil duties.

The following towns have a population of over 150,000 inhabitants:—Paris (2,317,227); Ψ Marseilles (914,356); Lyons (452,841); Toulouse (383,176); Ψ Nice (346,620); Ψ Nantes (263,689); Strasbourg (257,303); Ψ Bordeaux (226,281); Saint-Etienne (221,775); Ψ Le Havre (219,583); Rennes (205,733); Montpellier (195,603); Ψ Toulon (185,050); Reims (183,610); Lille (177,218); Ψ Brest (172,176); Grenoble (169,740); Clermont-Ferrand (161,203); Dijon (156,787); Le Mans (155,245).

The chief towns of Corsica are Ψ Ajaccio (44,659) and Ψ Bastia (51,022).

Paris is distant from London 267 miles; transit by air, 1 hr.

FLAG.—The “tricolour”, three vertical bands, blue, white, red (blue next to flagstaff).

NATIONAL DAY.—July 14.

BRITISH EMBASSY

(35 rue du Faubourg St. Honoré, Paris 8e)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Nicholas Henderson, K.C.M.G., (1975).

Minister, C. M. James.
 Minister (Economic), R. Arculus, C.M.G.
Defence Attaché, Air Cdre. W. J. Herrington.
 Counsellor and Consul-General, J. McAdam Clark,
 C.V.O., M.C.

BRITISH CONSULAR OFFICES

There are British Consulates-General in Metropolitan France at *Paris, Bordeaux, Lille, Lyons, Marseilles and Strasbourg*.

BRITISH CHAMBER OF COMMERCE

6 Rue Halévy, Paris 9e

President, O. G. Longley, M.C.

Vice-Presidents, D. H. Goodchild; K. G. W. Bartell.

BRITISH COUNCIL

Representative in *Paris*, R. M. Auty, O.B.E., 9 rue de Constantine, 75007 Paris.

There is a British Council office at *Toulouse*; British Council libraries at *Paris, Bordeaux, Lille, Lyons and Strasbourg*.

THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 1958, envisaged the establishment of a French Community of States closely linked with common institutions. A number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally members of the French Community. The Community Institutions in fact never operated as envisaged. Nevertheless, with the exception of Guinea, which opted out of the Community in the 1958 referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements.

Francophone Countries.

In the following countries French is either the official or national language or the language of instruction; where there is another national language the name of it is shown after the name of the country:—*Algeria (Arabic)*; *Belgium (Flemish)*; *Benin*; *Burundi (Kirundi)*; *Cambodia (Khmer)*; *Cameroon (English)*; parts of *Canada* (in *Quebec*, parts of *Ontario* and *New Brunswick (English)*); *Central African Republic (Sangho)*; *Chad*; *Congo (P.D.R.)*; *France*; *Gabon*; *Guinea*; *Haiti (Creole)*; *Ivory Coast*; *Laos (Laotian)*; *Lebanon (Arabic)*; *Luxembourg (German and Letzeburgesch)*; *Madagascar (Malagasy)*; *Mali*; *Morocco (Arabic)*; *Mauritania (Arabic)*; *Niger*; *Rwanda (Kinyarwanda)*; *Senegal*; *Switzerland* (1,000,000 French speaking); *Togo*; *Tunisia (Arabic)*; *Upper Volta*; *Vietnam (Vietnamese)*; *Zaire*. French is also spoken in the Overseas Departments (see above).

OTHER TERRITORIES

French Territory of the Afars and Issas.—Situated on the north-east coast of Africa, the Territory has an area of 9,000 sq. miles with a population (estimate, 1970) of about 81,200.

Formerly French Somaliland, the Territory was renamed on July 6, 1967, to emphasize the existence of the two main ethnic groups in the population. A renamed Chamber of Deputies succeeded the former territorial assembly to which a governing council is responsible for the administration of the territory. The French High Commissioner retains responsibility for foreign policy, defence, currency, credit, citizenship and law, other than traditional civil law. Capital, Ψ Djibouti (62,000).

New Caledonia.—Area, 7,200 sq. miles. Population (estimate, 1971), 100,600. Capital Ψ Noumea (12,000). A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are

the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc.), the Huon Islands and Alofisi. New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement. It is the world's third largest producer of nickel, after Canada and U.S.S.R.

Wallis and Futuna Islands.—Following a request from local kings and chiefs, it was decided by referendum (Dec. 27, 1959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 8,550, mostly Polynesians.

French Polynesia.—Area, 2,500 sq. miles. Population (estimate, 1971), 119,200. Capital, Ψ Papeete (15,200), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-oo, etc., 500 sq. miles, population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambler Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raiavae, Rimatara and Rapa Island; and Maiao Island).

Comoro Archipelago.—Area, 800 sq. miles. Population (estimated 1970), 275,227. Capital, Moroni. Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean. Except for Mayotte, the islands voted in favour of independence in a referendum in December, 1974.

St. Pierre and Miquelon.—Area, 93 sq. miles. Population (1968), 5,200. Two small groups of Islands off the coast of Newfoundland.

GABON

(Gabonese Republic)

(For MAP, see Index).

President, Omar Bongo, assumed office, December, 1967.

EMBASSY IN LONDON

48 Kensington Court, W.8.

[01-937 5285]

Ambassador Extraordinary and Plenipotentiary, His Excellency Joseph N'Goua.

Gabon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by Equatorial Guinea and Cameroon and on the east and south by the People's Republic of Congo. It has an area of 101,400 sq. miles and a population (estimated 1972) of 500,000. Gabon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

Over the past decade Gabon has known one of the fastest economic growth rates in Africa, based almost entirely on oil, production of which attained 11.5 million tonnes in 1975, making Gabon the fourth largest oil producer in Africa. Other wealth includes okoumé wood, manganese, uranium and iron.

The budget increased by 575 per cent. between 1970 and 1975, and for 1975 stands at £424,000,000. Gabon became an associate member of OPEC in 1973 and a full member in 1975.

Trade with U.K.

	1974	1975
Imports from U.K.	£3,505,000	£2,828,000

FLAG.—Horizontal bands, green, yellow and blue.

NATIONAL DAY.—August 17.

British Ambassador (vacant).

Chargé d'Affaires, 1st Secretary and Consul, J. K. Gordon (resident at Yaoundé).

Consul, S. Prince (resident at Douala).

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863-1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the name German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

THE WAR OF 1939-1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, which had (March 31) given a pledge to support Poland against aggression.

On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that

existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in March, 1948.

FEDERAL REPUBLIC OF GERMANY

President, Walter Scheel, born July 8, 1919, elected July 1, 1974, for five years.

CABINET

Federal Chancellor, Helmut Schmidt (SPD).

Foreign Minister and Vice-Chancellor, Hans Dietrich Genscher (FDP).

Interior, Dr. Werner Maihofer (FDP).

Justice, Jochen Vogel (SPD).

Finance, Hans Apel (SPD).

Economics, Dr. Hans Friderichs (FDP).

Food, Agriculture and Forestry, Josef Ertl (FDP).

Labour and Social Affairs, Walter Arendt (SPD).

Defence, Georg Leber (SPD).

Transport, Posts and Telecommunications, Kurt Gscheidle (SPD).

Regional Planning, Building and Urban Development, Karl Ravens (SPD).

Intra-German Relations, Egon Franke (SPD).

Health, Family and Youth Questions, Dr. Katharina Focke (SPD).

Education and Science, Hans Rohde (SPD).

Research and Technology, Hans Matthöfer (SPD).

Economic Co-operation, Egon Bahr (SPD).

FDP=Free Democrats; SPD=Social Democrats.

EMBASSY IN LONDON

23 Belgrave Square, S.W.1

[01-235 5033]

(Consular, Passports, etc.):

6 Rutland Gate, S.W.7.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Karl-Günther von Hase, K.C.M.G. (1970).

Minister Plenipotentiary, H. H. Noebel.

Minister-Counsellor, Dr. K. Stöckl.

Minister, Herr Hans Freiherr von Stein (Head of Economic Dept.).

1st Counsellors, Dr. Rolf Breitenstein (Press); Frau Dr. Brigitte Lohmeyer (Cultural); Dr. Hans-Peter Lorenzen (Scientific Affairs); Dr. Christian Hofman (Agriculture); Herr Lothar Schiebschick (Defence Research).

Counsellors, Herr Hans-Wolfgang Neugebauer; Herr Dietrich Lincke; Dr. Rudolf Vollmer (Labour); Dr. Mario Graf von Matuschka; Dr. Hans-Cajetan Schmidt-Dahlenburg (Commodities); Dr. Christopher Niemöller (Legal and Consular).

1st Secretaries, Fräulein Margarete Stark; Dr. Wilhelm Dünwald; Herr B. Oetter; Herr Günter Habelt; Frau Dr. Jutta Grütznier; Frau Dr. Elke Schmitz; Herr Jörg-Rainer Wendicke, Herr Bertold Brandenstein (Finance); Herr Klaus Metscher.

*Nazi historians referred to the National Socialist régime as *Drittes Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

NOTE.—Except where otherwise indicated statistical data on the Federal Republic of Germany include Berlin (West).

Area and Population.—The area of the Federal Republic is approximately 95,993 sq. miles. Total population of the Federal Republic on December 31, 1975, was 61,644,600. Distribution of the population among the *Länder* in 1975 was:

Schleswig-Holstein.....	2,582,400
Hamburg.....	1,717,400
Lower Saxony.....	7,238,500
Bremen.....	716,800
North Rhine Westphalia.....	17,129,600

Vital Statistics.—There were 10.1 live births per 1,000 inhabitants in the Federal Republic in 1974, compared with 19.5 per 1,000 for the same area in 1938.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948–49 Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 23, 1949. It provides for a President, elected for a five-year term, a Lower House, with a four-year term of office, elected by direct universal suffrage, and an Upper House

composed of delegates of the *Länder*, without a fixed term of office.

The preliminary results of the elections held for the lower House (*Bundestag*) on October 3, 1976, were as follows:

Party	Numbers
Social Democrats.....	213
Christian Democratic Union.....	191
Christian-Social Union.....	53
Free Democrats.....	39
Total.....	496

with an additional 22 representatives of Berlin elected by the Berlin Chamber of Deputies (Social Democrats, 12; Christian Democrats, 9; Free Democrats, 1). The Social Democrats form a coalition with the Free Democrats. The Christian Democratic and the Christian Social Unions are the Parliamentary Opposition.

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the *Länder* governments in June, 1976, were:—

Ministers-President

Baden-Württemberg.—Dr. Hans Filbinger.
Bavaria.—Dr. Alfons Goppel.
Berlin.—Klaus Schütz (Governing Mayor).
Bremen.—Hans Koschnick (Mayor).
Hamburg.—Peter Schulz (Mayor).
Hessen.—Albert Osswald.
Lower Saxony.—Dr. Ernst Albrecht.
North Rhine-Westphalia.—Heinz Kühn.
Rhineland-Palatinate.—Dr. Helmut Kohl.
Saarland.—Dr. Franz-Josef Röder.
Schleswig-Holstein.—Dr. Gerhard Stoltenberg.

Economic position.—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1975 was estimated at DM.1,040.4 milliard, an increase of DM.44.7 milliard or 4.5 per cent. over 1974.

Agriculture.—In 1975 total area of farmland was 13,303,100 hectares, of which 7,538,000 hectares were arable land. Forest areas cover 7,161,600 hectares. The 1975 harvest yielded 9,241,900 metric tons of bread grains, 10,853,200 metric tons of potatoes. The livestock population at the end of 1975 included 14,511,462 cattle, 341,562 horses, 1,093,844 sheep, 19,853,250 pigs and 91,248,575 fowl.

Industrial Production.—The index of industrial net production adjusted for irregularities of the calendar (1970=100) has developed in the Federal Republic, including Berlin, as follows:

	1973	1974	1975
Mining.....	92.3	91.4	84.8
Manufacturing industry.....	112.6	110.6	103.2
(i) Basic materials.....	116.3	116.0	101.6
(ii) Capital goods.....	110.3	107.2	102.1
(iii) Consumer goods.....	112.2	107.7	101.9
(iv) Foodstuffs.....	111.9	113.7	114.0
Power (electricity and gas)....	139.8	159.8	155.7
Building Industry.....	110.3	104.8	93.8

Total industry..... 113.1 111.5 104.5
 Productivity of labour in industry (excluding electricity, gas and building industries) per man-hour: 1968, 90.5; 1969, 96.5; 1970, 100; 1971, 106.1; 1972, 114.6; 1973, 122.7; 1974, 128.3; 1975, 134 per cent.

Some production figures are shown below (monthly averages):

	1974	1975
	Number	
Passenger cars.....	214,607	224,212
Commercial vehicles.....	18,786	20,386
	Tons	
Sulphuric acid (SO ₃).....	348,983	282,819
Chlorine.....	227,094	191,329
	Tons	
Artificial plastic material.....	522,601	420,503

Man-made fibres.....	78,302	62,394
Cotton yarn.....	17,831	16,027
Woolen yarn.....	4,565	4,285

436,800 new dwellings were completed in 1975 in the Federal Republic (1974, 604,400).
 Labour.—Of 25,350,000 employed in 1975 (annual average), 15,978,000 were men. The average number of unemployed was 1,074,217 of whom 622,627 were men (1974=582,481 and 324,685). On September 30, 1975, 2,038,800 foreign workers were employed in the Federal Republic. An average of 7,615,882 (1974=8,143,537 were employed in industry (establishments employing 10 or more persons).

	1974	1975
Coal mining.....	224,422	225,867
Iron and steel production..	316,046	310,242
Mechanical engineering.....	1,700,155	1,606,866
Chemicals.....	600,498	582,577
Textiles and clothing.....	703,997	645,192

Finance.—As from January 1, 1975, the distribution of taxes in the Fed. Rep. of Germany between Federation, Länder, communities and local authorities has been regulated by an amendment of the Basic Law (Constitution) as follows:—
 (1) Of the yields of wage tax and assessed income tax, Federation and Länder receive 43 per cent. each, and the communities 14 per cent. The

yields of capital yield tax and corporation tax are distributed to Federation and Länder with 50 per cent. each.

(2) The turnover taxes have been made joint taxes of which the Federation obtains 68.25 per cent. and the Länder 31.75 per cent, after deduction of the E.C. share.

(3) Of the trade tax which so far had been fully allocated to the communities, the Federation and the Länder receive equal shares (about 20 per cent. of the trade tax receipts).

(4) The yields of capital transactions taxes, insurance and bill taxes accrue to the Federation.

Excise duties, other than the beer tax, accrue to the Federal Government, all other taxes (with the exception of local taxes, *i.e.* particularly taxes on land and buildings) to the Länder.

Preliminary figures of budgetary expenditure in 1976 are: total expenditure DM.164,047,000,000 (1975, 156,262,000,000); Defence DM.33,384,000,000 (1975, 32,101,000,000); Social expenditure, DM.61,478,000,000 (1975, 57,051,000,000) (about 37 per cent.); Agriculture and food, DM.2,465,000,000 (1975, 2,255,000,000) (about 1.5 per cent.); Transport, DM.11,750,000,000 (1975, 11,468,000,000).

Currency.—The currency of the Federal Republic is the *Deutsche Mark* of 100 *Pfennig*, the rate of exchange with sterling being at April 30, 1976, DM.4.679 = £1. The rate of exchange of the pound sterling has been floating since 23 June 1972. (See also p. 83.)

Foreign Trade.—In 1975, imports were valued at DM.184,312,510,000 (1974, 179,732,599,000); and exports at DM.221,588,594,000; 16.9 per cent. of imports consisted of foodstuffs and 16.4 per cent. of industrial raw materials; 49.5 per cent. came from the Common Market* countries; 8.7 per cent. from the E.F.T.A.† and 8.7 per cent. from the United States and Canada. The Common Market countries took 43.6 per cent. of all exports, the E.F.T.A. 14.5 per cent. and the United States and Canada 6.8 per cent.

Trade with U.K.

	1974	1975
Imports from U.K.	£1,011,271,000	£1,272,446,000
Exports to U.K.	1,892,651,000	1,996,903,000

Communications.—In December, 1975, the state-owned railways of the Federal Republic measured 17,910 miles of which 6,215 miles were electrified, and the privately owned railways 1,919 miles, a total of 19,829 miles. In 1975 the railways handled 329,203,032 tons of goods and the inland waterways 227,329,886 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1975, 256 steam locomotives, 2,629 electric locomotives, 3,097 diesel locomotives, 17,548 passenger coaches, 627 rail buses and 287,755 goods waggons. Classified roads measure 104,940 miles. On Jan. 1, 1976, there were registered 18,161,179 cars, 1,293,158 commercial vehicles (incl. buses) and 1,441,778 tractors. Ocean-going shipping under the German flag in Dec., 1975, amounted to 8,700,371 tons gross (1,742 ships). Civil aircraft in service at the same date totalled 162 aircraft.

*Common Market: Belgium and Luxembourg, Denmark, France, Italy, Netherlands, Rep. of Ireland, U.K., W. Germany.

†E.F.T.A. (European Free Trade Association): Austria, Iceland, Norway, Portugal, Sweden, Switzerland.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the second and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a decent standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1797–1856). German authors have received the Nobel Prize for Literature on seven occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), Thomas Mann (1929), N. Sachs (1966) and Heinrich Böll (1972). In 1973 there were 404 daily papers.

Education.—School attendance is compulsory for all children and juveniles between the ages of 6 and 18. Compulsory education comprises 9 years of schooling at primary schools (*Volksschulen*)—full-time compulsory education—and 3 years of compulsory vocational education on a part-time basis. Preliminary figures showed that in autumn, 1974, there were in the Federal Republic 18,094 primary schools (*Volksschulen*) with 6,451,775 pupils. Intermediate schools (*Realschulen*) numbered 2,320 with 1,099,887 pupils. There were 2,543 secondary schools (*Gymnasien* including *Gesamtschulen*) with 1,914,001 pupils.

There were also 2,631 special schools (*Sonderschulen*) for retarded, physically and mentally handicapped and socially maladjusted children in the Federal Republic with 384,952 pupils.

The secondary school leaving examination (*Abitur*) entitles the holder to a place of study at a university or another institution of higher education. The number of examinations passed in 1974 was 109,967.

Juveniles below the age of 18 who are not attending an intermediate school, a secondary or a full-time vocational school (*Berufsfachschule*) are obliged to take a three-year course (part-time) at a vocational school. In November, 1974, there were 1,776 part-time vocational schools (*Berufsschulen*) and 500 vocational extension schools (*Berufsaufbauschulen*) with 1,680,518 pupils, 2,840 full-time vocational schools with 274,989 pupils, 1,409 advanced vocational schools (*Fachschulen*) with 130,835 pupils; 819 schools for secondary technical studies (*Fachoberschulen/Fachgymnasien*) with 117,517 students and 1,789 Public High Schools with 80,674 pupils. [State expenditure for primary schools per annum amounted to DM.2,100 per pupil, for intermediate schools DM.2,300 and for grammar schools DM.3,300. State expenditure per pupil for part-time vocational, full-time vocational and advanced vocational schools per annum amounted to DM.1,500.] According to preliminary results, in the winter term 1975/76 there were 60 universities—including a college for physical education (*Sporthochschule*)—(599,226 students), 11

colleges of theological philosophy (*Theologische Hochschulen*) (1,768 students), 33 teachers' training colleges (*Pädagogische Hochschulen*) (79,163 students), 26 colleges of arts (*Kunsthochschulen*) (15,395 students) and 124 vocational colleges (*Fachhochschulen*) (145,205 students); a total of 254 institutions of higher education with 840,757 students. The largest universities were in Munich, Berlin, Hamburg, Münster (Westf.), Cologne, Bonn and Frankfurt-am-Main.

Religion.—In 1970 there were 29,696,571 Protestants in the Republic, 27,060,826 Roman Catholics, 31,684 Jews and 3,861,518 others.

CAPITAL, Bonn, in North Rhine Westphalia, 15 miles distant from Cologne. Population 283,711 (Dec. 31, 1975).

FLAG.—Horizontal bars of black, red and gold.

BRITISH EMBASSY

Friedrich-Ebert Allee 77, 5300 Bonn
Ambassador Extraordinary and Plenipotentiary, His
Excellency Sir (John) Oliver Wright, K.C.M.G.,
D.S.C (1975).
Ministers, J. L. Bullard, C.M.G.; H. T. A. Overton,
C.M.G.

Counsellors, J. S. Whitehead, C.M.G. (*Head of Chancery*); J. R. Rich (*Commercial*); J. S. P. MacKenzie, O.B.E. (*Labour*); C. A. Alldis, C.B.E., D.F.C., A.F.C. (*Defence Supply*); R. I. T. Cromartie (*Scientific*); P. W. Unwin (*Economic*); B. Hitch; W. C. Lyall, M.B.E. (*Administration*); P. H. Towers-Picton, O.B.E.; T. J. Clark (*Press and Information*).

1st Secretaries, P. Yarnold; K. J. Chamberlain; G. M. Stephens; C. A. K. Cullimore; C. D. Powell; A. O'B. ffrench Blake; H. L. Davies; A. S. Payne; R. F. Cornish; A. Carter; R. G. Bowen; J. F. MacCulloch; E. T. Hanley; H. Davies; G. Brook, M.B.E.; A. F. Blake-Pauley; G. Hay, M.B.E.; W. B. McCleary.

2nd Secretaries, Miss P. E. Lambe; A. E. Gay; A. J. Frost; S. Macpherson; N. J. Guthrie; T. G. Longdon-Griffiths; R. Tempest; R. C. Cutler.

Defence and Military Attaché, Brig. C. M. A. Mayes.
Asst. Military Attaché, Lt.-Col. J. C. McC. Johnston.

Naval Attaché, Captain B. J. Williams, R.N.

Asst. Naval Attaché, Lt.-Cdr. L. S. J. Barry, R.N.

Air Attaché, Air Cdre. L. G. P. Martin.

Head of Visa Section (Düsseldorf), Miss D. M. Symes.

Chaplain, Rev. F. H. Mountney.

There are British Consulates-General at Berlin, Hamburg, Hanover, Düsseldorf, Frankfurt, Munich and Stuttgart and a British Consulate at Bremen.

BRITISH COUNCIL

Representative, Dr. J. M. Mitchell, C.B.E., Hahnenstrasse 6, Cologne. Offices at Berlin, Hamburg and Munich and British Council libraries at Berlin, Cologne and Munich.

BERLIN

G.O.C. British Sector, Maj.-General R. M. F. Redgrave, M.C.

Minister and Deputy Commandant, J. H. Lambert, C.M.G.

Counsellor, D. A. S. Gladstone (*Political Adviser and Head of Chancery*).

GERMAN DEMOCRATIC REPUBLIC

Area and Population.—The German Democratic Republic comprises the five former German *Länder* of Brandenburg, Mecklenburg, Saxony, Saxony-Anhalt and Thuringia (an area of 41,768 sq. miles). The seat of Government is East Berlin (156 sq. miles). The population of the Republic, including

East Berlin, (end of 1974) is 16,890,800. In 1952 the former *Länder* were replaced by fourteen *Bezirke* (regions): Potsdam, Cottbus and Frankfurt (formerly Brandenburg); Rostock, Schwerin and Neubrandenburg (formerly Mecklenburg); Karl-Marx-Stadt, Dresden and Leipzig (formerly Saxony); Halle and Magdeburg (formerly Saxony-Anhalt); Erfurt, Gera and Suhl (formerly Thuringia.)

The present Constitution, which defines the GDR as a Socialist state, came into force on April 9, 1968 after endorsement by a referendum. It replaced the first Constitution of October 7, 1949. Among items of the 1949 Constitution omitted from that of 1968 were the rights of trade unions to strike, of citizens to emigrate and of newspapers to publish without censorship. Further amendments came into force on October 7, 1974 after adoption by the *Volkskammer* on September 27, 1974. They mainly involved (a) the deletion of all references to the German nation and to the possibility of reunification, and (b) the recording of the transfer of certain governmental functions from the State Council to the Council of Ministers which had their origin in the Law on the Council of Ministers of October 16, 1972. The supreme organ of State power is the *Volkskammer*, which has power to elect and dismiss the State Council, the Council of Ministers, the Chairman of the National Defence Council, the Supreme Court and the Procurator-General. The State Council retains the presidential powers which it has exercised since the abolition of the office of President on September 12, 1960, together with responsibility for the organization of defence with the help of the National Defence Council. The Council of Ministers is responsible to the *Volkskammer* for the conduct of State policy. The present *Volkskammer* is that elected on November 14, 1971.

As with other communist countries, effective power lies with the ruling Marxist-Leninist Party, in this case the Socialist Unity Party of German (SED). The other parties and mass organizations are members of the SED-controlled National Front.

Council of State

Chairman, Herr Willi Stoph.

Deputy Chairmen, Herr Friedrich Ebert; Herr Gerald Götting; Dr. Heinrich Homann; Dr. Manfred Gerlach; Herr Hans Rietz.

Members, Herr K. Anclam; Herr F. Clermont; Prof. E. Correns; Herr W. Grandetzka; Herr E. Grützner; Frau B. Hanke; Prof. Lieselott Herfurth; Herr E. Honecker; Herr F. Kind; Frau M. Müller; Herr B. Quandt; Prof. H. Rodenberg; Herr K. Sorgenicht; Herr P. Strauss; Frau I. Thiele; Herr P. Verner; Frau R. Walther; Herr H. Tisch.

Council of Ministers

Prime Minister, Herr Horst Sindermann.

1st Deputy Prime Ministers, Dr. Günter Mittag; Herr Alfred Neumann.

Total membership of the Council is 41, including 9 other Deputy Prime Ministers, 13 holding principal portfolios and 15 holding portfolios of a mainly technical nature.

SOCIALIST UNITY PARTY OF GERMANY.

Politbureau of the Central Committee, H. Axen; F. Ebert; W. Felpe; G. Grüneberg; K. Hager; Gen. H. Hoffman; E. Honecker; W. Krolkowski; W. Lamberz; E. Mielke; G. Mittag; E. Mückenberger; K. Naumann; A. Neumann; A. Norden; H. Sindermann; W. Stoph; H. Tisch; P. Verner (*full members*); H. Dohls; J. Herrmann; W. Jarowsky; G. Kleiber; E. Krenz; Frau I. Lange; Frau M. Mueller; G. Schürer; W. Walde (*candidate members*).

Secretariat of the Central Committee, E. Honecker (*General Secretary*); H. Axen; G. Grüneberg; K. Hager; J. Herrmann; W. Jarowinsky; W. Lamberz; A. Norden; P. Verner; W. Krolkow-ski; I. Lange; H. Dohls (*Secretaries*).

EMBASSY IN LONDON
34 Belgrave Square, S.W.1
[01-235 9941]

Ambassador Extraordinary and Plenipotentiary, His Excellency Karl-Heinz Kern.

Economic Position.—Before the 1939-45 war, the economy of the area at present occupied by the GDR was largely devoted to agriculture and light industry, most heavy industry being concentrated in other parts of the Reich. In spite of this imbalance, compounded by severe war damage, a declining population, a shortage of labour and a lack of basic raw materials, East Germany has made considerable economic progress and is now in the world's top ten industrial nations in terms of G.N.P., and is second to the U.S.S.R. in Eastern Europe as a major producer of industrial goods. East Germany has a number of highly developed industries including basic chemicals and petro-chemicals, machine tools and industrial plant, ship-building and transport equipment, electronic and engineering equipment, precision tools and optical instruments.

The East German economy, including the control of industry and foreign trade, is centrally planned and administered. The State Planning Commission, which is subordinate to the Council of Ministers, is responsible for drawing up the 5- and 1-year Plans. The 5-year Plans determine the future development and structure of the economy; the 1-year Plans have to achieve these aims. The implementation of these plans is the responsibility of the State Production Enterprises under the supervision of the economic and industrial Ministries.

The economy is very closely integrated with those of other member countries of C.M.E.A. and particularly with the U.S.S.R.

Trade with U.K.

	1974	1975
Imports from U.K...	£39,230,000	£32,580,000
Exports to U.K....	£44,880,000	£39,230,000
Principal cities and towns (population, 1974):		
East Berlin (1,094,147); Leipzig (570,972); Dresden (507,692); Karl-Marx-Stadt (Chemnitz) (303,811); Magdeburg (276,089); Halle/Saale (241,425); Rostock (210,167); Erfurt (202,979); Zwickau (123,069).		

FLAG.—Horizontal bands of black, red, gold; hammer, compasses and corn device at centre.

There are Honorary Consulates at Birmingham, Bradford, Bristol, Falmouth, Hull, Immingham, Leeds, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Southampton, Cardiff, Edinburgh and Glasgow, and at Belfast.

A maritime State in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian and Mediterranean seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. A census held throughout the country on March 14, 1971, recorded a population of 8,768,641.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos and the island of Thasos), Thrace (including the island of Samothrace), Epirus, Thessaly, Continental Greece (which includes the island of Euboea and the Sporades, or "scattered islands," of which the largest is Skyros), the Peloponnese (or Morea), the Dodecanese or Southern Sporades (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the Cyclades (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the Ionian Islands (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the Aegean Islands (Chios, Lesbos, Limnos and Samos). In Crete there was for over 1,500 years (300 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afforded evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

Government.—A military coup on April 21, 1967, suspended parliamentary government and, following an unsuccessful royal counter coup on December 13, 1967, King Constantine went into voluntary

exile in Rome. A new constitution was approved in 1968 in a national referendum. On June 1, 1973, following allegations of a plot within the Navy to overthrow the government, the monarchy was abolished and a republic established under the Presidency of Mr. George Papadopoulos.

A referendum held on July 29, 1973, confirmed the new presidential Constitution with Mr. Papadopoulos as President until 1981. In early October a civilian government, headed by Mr. Markezinis, was appointed. Following student demonstrations in early November the Army, on November 17, was called in to restore order and martial law was declared. On November 25, following an Army coup, the Markezinis Government was overthrown and General Gizikis was sworn in as President of the Republic.

The overthrow of Archbishop Makarios, President of Cyprus, on July 15, by a military coup led by Greek Officers of the Cypriot National Guard caused an international crisis, in the wake of which the heads of the Greek armed forces decided, on July 23, to relinquish power. President Gizikis called upon Mr. Konstantinos Karamanlis, Prime Minister between 1955 and 1963, to return from his self-imposed exile in Paris and form a provisional Government. On August 1, Mr. Karamanlis announced that the Constitution of 1952 would be reintroduced, pending a new Constitution.

The first elections for ten years were held on November 17, 1974. Mr. Karamanlis' New Democracy Party polled 54.3 per cent. of the vote and gained 220 out of the 300 seats in Parliament (this was later reduced in by-elections to 216 seats). Mr. Karamanlis formed a new Government on November 21.

The constitutional position of the King, however, remained unsettled until December 8, when by a referendum, the Greek people rejected "crowned democracy" by 69.2 per cent. to 30.8 per cent. and Greece became a republic.

On December 18, 1974 Mr. Michael Stassinopoulos was elected by Parliament President of the Hellenic Republic until a new constitution should be passed. The draft of the new constitution was presented by the Government to Parliament in January 1975 and was formally passed on June 7, coming into force on June 11, 1975.

On June 19 the Greek Parliament elected Mr. Constantine Tsatsos President of the Hellenic Re-

public under the new constitution. He assumed office on June 20, 1975.

Defence.—The Navy consists of 17,500 men and is equipped with a balanced fleet of destroyers, submarines, fast patrol boats and amphibious warfare vessels, mostly of U.S., French and German origin. The strength of the Army is 122,000. The Air Force consists of 23,000 men and is equipped with a modern inventory of aircraft disposed in 12 combat squadrons supported by the necessary transport, training, helicopter and reconnaissance squadrons.

Communications.—The 2,650 kilometres of Greek railways are State-owned with the exception of the Athens-Piraeus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Greek roads total somewhat over 35,500 kilometres, of which about 25 per cent. are classified as national highways and just under 30,000 km. are classified as provincial roads.

On Dec. 31, 1975, the Greek Mercantile fleet numbered 2,971 ships with a total tonnage of 25,108,441 tons gross. On the same day Greek-owned ships registered under foreign flags numbered 1,359 with a total tonnage of 23,189,995 tons gross. (N.B. These figures exclude Greek-owned vessels under 100 tons gross). Athens has direct airline links with Australasia, North America, most countries in Europe, Africa and the Middle East.

Religion.—Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Ecumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Ecumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Ecumenical Patriarch.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are four Universities, Athens, Salonika, Patras and Ioannina. There are several other institutes of higher learning, mostly in Athens.

Language and Literature.—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevousa*, a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748-1833) but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854-1920). The poets Solomos, Palamas, Cavafis, Sikelianos and Seferis have won a European reputation.

Production.—Though there has in recent years been a substantial measure of industrialization, Greece is still largely an agricultural country. Agriculture employs about 40 per cent. of the working population, the most important product and export being tobacco, which accounts for about one-tenth of the value of total visible exports from Greece. Since the war the production of wheat, cotton, sugar and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, peach, almond, pomegranate and currant-vine, and

considerable efforts have lately been made to develop exports of Greek fresh fruit and vegetables as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are nickel, bauxite, iron ore, iron pyrites, manganese, magnetite, chrome, lead, zinc and emery, and prospecting for petroleum is being carried on. Oil refineries are in operation near Athens and at Salonika, where there is also a petro-chemical plant. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. In recent years new factories have been opened for the production of aluminium, nickel, iron and steel products, tyres, chemicals fertilizers and sugar (from locally-grown beet). Food processing and ancillary industries have also grown up throughout the country. The development of the country's electric power resources, irrigation and land reclamation schemes and the exploitation of Greece's lignite resources for fuel and industrial purposes are also being carried out, and the television network is being expanded. Tourism is developing rapidly. Greece has announced her intention of becoming a full member of the E.E.C., but has yet to negotiate transitional arrangements.

Currency.—The Greek *drachma* has a floating exchange rate of about 65=£1 (July 1976) and 36=\$1 U.S.

(See also p. 83)

TRADE

Embassy Chaplain, Ven. S. R. Skemp.
Hon. Attaché, H. W. Catling, D.Phil. (Director, British School of Archaeology).

BRITISH CONSULAR OFFICES

There are British Consular Offices at Athens, Piræus, Corfu, Samos, Rhodes, Salonika, Heraklion, Kavalla and Patras.

BRITISH COUNCIL

17 Philikis Etaireias Street, Kolonaki Square, Athens 138

Representative, P. G. Lloyd, C.B.E.

There is also an office at Salonika and British Council libraries at both centres.

GUATEMALA

(República de Guatemala)

President, Gen. Kjell Eugenio Laugerud García, elected, March, 1974; assumed office, July 1, 1974.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long. from 88° 12' 49" to 92° 13' 43", and has an area of 42,042 square miles, and a population of 5,400,000 (for MAP, see p. 871). The constitutionally elected president, Gen. Miguel Ydígoras Fuentes, who had taken office on March 3, 1958, was overthrown on March 31, 1963, by the Army, which handed executive and legislative powers to the Minister of Defence, Col. Enrique Peralta Azurdia. Important changes were included in a new constitution promulgated on Sept. 15, 1965, including the reduction of the presidential term from 6 to 4 years and the establishment of a Council of State under the chairmanship of a Vice-President. Elections for a new Congress and for President and Vice-President took place on March 6, 1966. Dr. Méndez was chosen as President at the first meeting of the new Congress and was succeeded by Col. Arana in 1970.

The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec. 1917. An earthquake in Feb. 1976 killed about 25,000 people, and caused considerable damage to property and the infrastructure. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 59 in. per annum. The chief seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Santo Tomás de Castilla and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

Finance.—Actual revenue and expenditure in 1974 were Quetzales 282,245,200 and Quetzales 322,912,800 respectively, compared with Quetzales 214,706,800 and Quetzales 253,484,000 in 1973.

At par 1 Quetzal= \$1 U.S. (See also p. 84).

TRADE

	1973 Quetzales	1974 Quetzales
Imports (c.i.f.).....	431,002,200	700,473,700
Exports (f.o.b.).....	436,151,300	572,133,300

Trade with U.K.

	1974	1975
Imports from U.K.	£6,948,000	£9,838,000
Exports to U.K.	7,410,000	31,918,000

The principal export is coffee, other articles being manufactured goods, sugar, bananas, cotton, beef and essential oils. The chief imports are petroleum, vehicles, machinery and foodstuffs.

CAPITAL, *Guatemala*. Population: 790,311. *Quezaltenango* (second city of the Republic), has a pop. of 54,487. Other towns are Ψ *Puerto Barrios* (29,435), *Mazatenango* (23,932), and *Antigua* (17,270).

FLAG.—Three vertical bands, blue, white, blue; coat of arms on white stripe.

BRITISH EMBASSY

(Diplomatic relations suspended, July 31, 1963).

GUINEA

(Republic of Guinea)

President, *Ahmed Sékou Touré*, elected for seven year terms, January 1961, 1968 and on Dec. 27, 1974.

President of National Assembly, *Léon Maka*.

SUPER MINISTERS

Prime Minister, *Dr. Lansara Beavogui*.

Interior and Security, *Moussa Diakite*.

Culture and Education, *Mamadou Keita*.

Social Domain, *Alpha Bocar Barry*.

Exchanges Domain, *N. Famara Keita*.

Economy and Finance, *Ismael Touré*

As from the Government changes of May 22, 1975, there were 31 Ministers in the domains of the Super Ministers, including the President.

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Guinea-Bissau and Sierra Leone and in the interior is adjacent to Senegal, Mali, Ivory Coast, Liberia and Sierra Leone (see below). Area, 96,865 sq. miles. The population (U.N. estimate, 1969), is 3,890,000, mostly the Fullah, Malinké and Soussou tribes. It is estimated that there are about 2,000 Europeans in the country.

Government.—Guinea was separated from Senegal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. *M. Sékou Touré*, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, 1961 and re-elected in 1968. General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the *Guinea franc* (at par with the *franc C.F.A.*). This led to the rupture of commercial relations with France, hitherto her most important supplier and purchaser. Guinea is in receipt of economic aid and technical assistance from a number of countries, including the United States, Federal Republic of Germany, Yugoslavia, the Soviet Union and China. The Government's foreign policy is one of "positive neutralism" and non-alignment. In May, 1963, Guinea signed agreements with France covering *inter alia* the settlement of Governmental claims and technical co-operation. Diplomatic relations with U.K., suspended in December, 1965, were resumed on Feb. 20, 1968.

Production, etc.—The principal products of Guinea are alumina, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. In the mountains in the hinterland of Guinea (Fouta Djalon, 4,970 feet), where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) are worked and alumina is produced for export. Bauxite has been worked and exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on. There are a British-built cotton mill and a Chinese-built cigarette and match factory. Guinea imported goods to the value of £3,644,000 from U.K. and exported to U.K. goods to be the value of £22,000 in 1975.

CAPITAL.—Ψ Conakry (120,000). Other towns are Kankan (29,000), which is connected with Conakry by a railway, Kindia (25,000), N'Zérékoré, Mamou, Siguiri and Labé.

FLAG.—Three vertical stripes of red, yellow and green.

NATIONAL DAY.—October 2 (Anniversary of Proclamation of Independence).

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency John Ernest Powell-Jones, C.M.G. (1976) (resident at Dakar).

GUINEA-BISSAU

President of the Council of State, Sr. Luis Cabral.

Guinea-Bissau, formerly Portuguese Guinea, lies in western Africa, between Senegal and Guinea; it has an area of 14,000 sq. miles and had a population in 1972 of 544,000 (est. 1975—600,000).

Guinea-Bissau achieved independence on Sept. 10, 1974.

Currency, it is planned to replace the *escudo* in 1978 by Guinea-Bissau's own unit of currency, the *peso*.

Economy, The country produces rice, coconuts and ground-nuts. Cattle are raised, and there are bauxite deposits in the south.

Provisional Capital, Medina de Boc. The former capital and chief port is Ψ Bissau.

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency John Ernest Powell-Jones, C.M.G. (1976) (resident at Dakar).

HAITI

(République d'Haiti)

President, Jean Claude Duvalier, born 1951, installed as *President for life*, April 21, 1971.

CABINET

Interior and Defence, Pierre Biamby.
Agriculture and Rural Development, Remillot Leveille.
Labour and Social Affairs, Dr. Achille Savant.
Public Health and Population, Dr. Willy Verrier.
Public Works, Transport and Communications, Fernand Laurin.
National Education, Dr. Raoul Pierre-Louis.
Finance and Economic Affairs, Emmanuel Bros.
Justice, Aurélien C. Jeanty.
Co-ordination and Information, Pierre Gousse.
Foreign Affairs, Edner Brutus.
Commerce and Industry, Antonio André.

EMBASSY AND CONSULATE

17 Queen's Gate, S.W. 7
[01-581 0577]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Hervé Boyer.

The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic, including off-shore islands, is about 10,700 sq. miles with a population (estimated, 1969) of 4,768,000. The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood. About 250 British subjects, many of West Indian origin, reside in Haiti.

A French colony under the name of Saint-Domingue from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former negro slave, who, on January 1, 1804, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

Dr. Duvalier was installed as President in 1957 and was re-elected as President for life on June 15, 1964. He died on April 21, 1971. He was succeeded as President for life on the same day by his son, Jean Claude Duvalier, whom he had nominated as his successor under Article 102 of the Constitution of 1964 as amended on January 14, 1971.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion.

In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of productivity. The main project is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley.

The principal products are coffee, sugar, essential oils, sisal, cocoa and cotton. Coffee accounts for about one third of total exports and is still a mainstay of the country's economy though exports now rarely exceed 300,000 bags (of 60 kg.). Exports of bauxite began in 1957. Production of copper in the Terre Neuve area started in 1960, but was suspended as uneconomic at the end of 1971. Industry is still on a small scale but the last few years have seen a steady and considerable expansion of light industry (the so-called transformation industries) taking advantage of cheap local labour (minimum wage \$U.S.1.30 per day) to assemble or manufacture labour-intensive goods for the U.S. market (baseballs, brassieres, electronic equipment, etc.). Exports of manufactures now rank second after coffee at about 40 per cent. of total exports. The tourist industry is again expanding and many French Canadians are now attracted to Haiti for winter holidays. The country is one of the most beautiful in the Caribbean.

Communications.—There are very few asphalted roads and internal communications are bad although the situation is improving. Air services are maintained between the capital and the principal provincial towns. The principal towns and villages are connected by telephone and/or telegraph. The telephone company is now state owned (51 per cent.) and the service both in Port-au-Prince and Inter-urban has been greatly improved. External telegraph, telephone and postal services are normal. There are several commercial radio stations and a television station at Port-au-Prince.

Haiti is very well served by air from New York, Miami and Kingston to the North and from Martinique, Puerto Rico and other points to the South, with daily services by one line or another in both directions. The airlines touching Port-au-Prince International Airport include Pan American, Air France, American Air Lines, Eastern Airlines, and A.L.M. Regular passenger liner services to New York have ceased, but cruise ships call regularly, one Norwegian line operating a weekly cruise service to Kingston and Miami. Freight sailings are frequent for the U.S.A., Canada, Europe, Latin America (except Cuba) and the main Caribbean

ports. (Airmail: U.K./Port-au-Prince, 4-14 days—extremely variable.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March-Oct.) and the winter (Nov.-Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the language of the government and the press, but it is only spoken by the educated minority. The usual language of the people is Creole. Education is free but estimates of illiteracy are as high as 75 per cent. There are 3 French daily newspapers and one monthly in English. The total circulation is very small.

Finance.—The International Monetary Fund has granted Haiti a stand-by credit of \$U.S.4,000,000

	1974-75*	1975-76*
	\$U.S.	\$U.S.
Revenue.....	38,916,000	43,300,000
Expenditure.....	38,916,000	43,300,000

* Haitian budget figures; there is also non-fiscal revenue—e.g. from the Tobacco Monopoly. Exchange Rate: 5 Gourdes = \$1 (U.S.). (See also p. 84.)

Trade.—Value of imports 1974 \$U.S. 119,900,000 (est.); exports 1974 \$U.S. 100,800,000 (est.)

Trade with U.K.

	1974	1975
Imports from U.K.....	£2,000,000	£2,143,000
Exports to U.K.....	199,000	139,000

The principal exports are listed above; the principal imports are foodstuffs, machinery, vehicles, chemicals and miscellaneous manufactured goods.

CAPITAL, Ψ Port-au-Prince. Population (estimated, 1974), 400,000. Other centres are: Ψ Cap-Haïtien (24,957); Ψ Gonaïves (13,534); Ψ Les Cayes (11,835); Jérémie (11,138); Ψ St. Marc (10,485); Ψ Jacmel (8,545); Ψ Port de Paix (6,309) (1960 Census figures).

FLAG.—Two vertical bands, black (next staff) and red; arms in centre on a white background.

NATIONAL DAY.—January 1.

HONDURAS EMBASSY IN LONDON

48 George Street, W.1.

[01-486 3380]

Ambassador Extraordinary and Plenipotentiary (vacant).

Honduras, one of the five Republican States of Central America, lies between lat. 13° and $16^{\circ} 30' N.$ and long. 83° and $89^{\circ} 41' W.$ with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains a total area of approximately 43,278 sq. miles and a population (preliminary, March 1974, census) of 2,646,828, of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras. Most of the soil is poor and acid, except for a few acres along the North coast and in the interior. Rainfall is seasonal, May to October being wet and November to April dry. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

On December 4, 1972, General López Arellano

took over the Government from the previous National/Liberal Coalition headed by Dr. Ramón Ernesto Cruz, in a bloodless *coup*, and set up a military régime. President López Arellano was removed on April 22, 1975, and replaced by Colonel Juan Alberto Melgar Castro. The coup followed allegations of corruption, involving bribes alleged to have been paid by the American banana concern, United Brands, to obtain a reduction in a banana export tax.

Following the cancellation of special privileges and concessions to foreign banana companies, the establishment of the Honduran Banana Corporation was decreed, the Corporation taking control of all operations concerned with bananas as well as ports and railways owned by the banana companies.

The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, tobacco, beans, maize, rice, cotton, sugar cane, cement and tropical fruits. Cattle raising is becoming an increasingly important industry, a number of cattle being exported to the neighbouring countries every year. Honduras is also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

There are about 730 miles of railway in operation, chiefly to serve the banana plantations and the Caribbean ports. There are 5,943 km. of

roads, of which 1,228 are paved. Improvements are being made and new roads built. There are 33 unpretentious airports and three international airports in use in Honduras. A new international airport suitable for jet aircraft has been built near San Pedro Sula. There are numerous small landing and emergency fields. There are four international air services (AVIATECA, SAHSA, PAA and TAN) and 3 domestic air services (SAHSA, Aero Servicios and LANSA).

The language of the country is Spanish. Primary and secondary education is free, primary education being compulsory, and, although there is still a great deal of illiteracy, it is gradually diminishing.

ψThe chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

2nd Secretary, M. Károly Kovács (Press).

3rd Secretary, M. Laszlo Merklin (Consul).

Attaché, Dr. István Földesi.

Area and Population.—The area of Hungary may be stated as approximately 36,000 sq. miles with a population (1976) of 10,572,000.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939-45

War on the side of Germany in 1941. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

After the liberation, a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties carried out major land reform and mines, heavy industry, banks and schools were nationalized. By 1949 the Communists had suc-

ceeded in gaining a monopoly of power. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been "socialized".

In mid-1953 Mr. Imre Nagy became Prime Minister, replacing Mr. Rákosi, who remained as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry. However, in April 1955 he was removed from his position as Prime Minister and subsequently expelled from the Party. But opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerő, who had been one of his closest associates.

The period from July to the outbreak of the national revolution on Oct. 23, 1956, was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overtaken and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerő's successor as First Secretary of the Party, was announced. The trial and execution of Imre Nagy and three of his associates was announced on June 17, 1958.

Industrialization has made considerable progress in the last decade and now produces 68 per cent. of national income. Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, considerable deposits of natural gas (some not yet under full exploitation), some iron ore and oil. Output figures in 1975 (1,000 tons), coal, 24,900; bauxite, 2,890; steel 3,671; crude oil, 2,006; cement, 3,759. Natural gas production totalled 20,457 million cubic metres.

Agriculture still occupies an important place in the Hungarian economy. 10.6 per cent. of the entire land area is owned by State farms and a further 63.8 per cent. is within co-operative farms. Production of the most important crops in 1975 was as follows (1,000 tons): wheat, 4,005; rye 147; barley 699; maize 7,088; rice 69; oats 87; sugar beet 4,089; green maize and silage maize 5,105; lucerne 2,328.

In 1975 most plan targets were fulfilled apart from that for agriculture. National income grew by 5 per cent., and industrial output by 6 per cent. Agricultural production was only 1 per cent. higher than in 1973. The index of retail prices rose 3.6 per cent. The new Fifth Five Year Plan will run from 1976-1980. Targets in this Plan are slightly lower than the performance in 1971-75.

Since 1968 the Hungarian economy has been run according to a system which allows more decentralized decision-making than in some other Eastern European countries. More difficult economic circumstances have led to some slight moves to

more central control in vital areas such as the allocation of fuels and raw materials.

Religion and Education.—About two-thirds of the population are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—kindergartens 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18). In the academic year 1974-75 there were 103,390 students at higher education institutions, 374,569 (incl. 209,646 attending day courses) at secondary schools, and 1,039,600 at general schools.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugric languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800-1855), Sándor Petőfi (1823-1849), János Arany (1817-1882), Imre Madách (1823-1864), Kálmán Mikszáth (1847-1910), Endre Ady (1877-1918), Attila József (1905-1937), Mihály Babits (1883-1941) and Dezső Kosztolányi (1885-1936).

Finance.—The budget estimates for the year 1975 were: Revenue, *Forints* 318,500,000,000; Expenditure, *Forints* 323,400,000,000. The tourist rate of exchange for the *Forint* (of 100 Filler) was 38.53 *Forints* = £1 (July, 1 1976).

EMBASSY IN LONDON
1 Eaton Terrace, S.W.1
[01-730 5131]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sigurður Bjarnason (1976).

Minister-Counsellor, M. Eiríkur Benedikt.

1st Secretary, M. Helgi Ágústsson.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from $63^{\circ} 23'$ to $66^{\circ} 33'$ N. lat., and from $13^{\circ} 22'$ to $24^{\circ} 35'$ W. long., with an estimated area of 40,500 square miles, or about one-sixth greater than that of Ireland. The population was 218,682 on Dec. 1, 1975.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of seven Ministers, responsible to the *Althing*, a Parliamentary assembly of 60 members. A coalition of Progressives, Left Wing Liberals and members of the People's Alliance (Communists) held office from 1971 until the general election of June 30, 1974, in which government and opposition parties obtained an equal number of seats. After prolonged discussions between the party leaders, a new

coalition of members of the Independence Party (25 seats) and Progressives (17 seats) took office on Aug. 28, 1974.

The principal exports are frozen fish fillets, salt fish, stock fish, fresh fish on ice, frozen scampi, fishmeal and oil, skins and aluminium; the imports consist of almost all the necessities of life, the chief items being petroleum products, transport equipment, textiles, foodstuffs, animal feeds, timber, and alumina.

At January 1, 1976, the mercantile marine consisted of 635 vessels of under 100 gross tons and 360 ships of 100 gross tons and over; a total of 995 vessels (175,207 gross tons), of which 898 were fishing boats and trawlers and 48 were coasters. There is a regular shipping service between Reykjavík and Felixstowe and between Reykjavík and Weston Point on the Mersey and the Continent.

In the period since Iceland attained independence in 1944, relations between Britain and that country have come under strain on several occasions as a result of unilateral action by Iceland to extend the area of her exclusive fishery jurisdiction. In 1952, Iceland extended her fishing limits from 3 miles to 4 miles from new base lines across bays and estuaries, and the consequent dispute with Britain lasted until 1956. In 1958, Iceland extended her fishing limits from 4 to 12 miles. The ensuing dispute with Britain (and West Germany) was settled in March 1961 by an Exchange of Notes in which it was agreed, *inter alia*, that Iceland would give Britain 6 months' notice of any further extension of her fisheries jurisdiction and that in the event of a dispute about such extension the matter could be referred to the International Court of Justice at the request of either party.

The Icelandic Government which came to power in July 1971, declared their intention of extending the fishing limits to 50 miles from September 1, 1972, and on February 15, 1972, passed legislation purporting to have this effect. Britain then referred the matter to the International Court. As an interim measure, the Court granted Britain an injunction restraining Iceland from enforcing the 50 mile limit against British vessels and at the same time ordered Britain to limit her catch in the area to 170,000 tons a year (the average for 1967-1971). The Court subsequently decided that it had jurisdiction, but the Icelandic Government refused to recognize the Court's competence in the matter and sought to apply the new fishing limit by force. After September 1, 1972, British trawlers were subjected to warp cutting and harassment by Icelandic Coastguard vessels. On May 19, 1973, the British Government ordered naval vessels into the disputed zone to provide protection for British trawlers. An interim settlement recorded in an Exchange of Notes dated Nov. 13, 1973, established maximum numbers for British trawlers fishing off Iceland and a system of rotating areas around the coast in which it was agreed that they should fish, with certain other areas reserved for conservation purposes. This agreement was valid for 2 years.

Negotiations failed to produce a further agreement before its expiry, and the sequence of warp-cutting and naval protection once again ensued, this time leading to a breach of diplomatic relations on Feb. 19, 1976. Informal contacts within NATO subsequently prepared the way for an agreement signed in Oslo on June 1, 1976, which provided for a daily average of 24 trawlers to fish in designated areas for a period of 6 months, at the end of which British vessels would fish only to the extent provided for in arrangements agreed with the Government of Iceland.

A regular air service is maintained between

Glasgow and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A., Germany and Luxemburg.

Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres and a few key highways are metalled the rest being of gravel, sand and lava dust. The climate and terrain make first-class surfaces for highways out of the question. Total number of vehicles licensed is about 75,000 (private cars, 60,000).

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of Java and Madura, the island of Sumatra, the Riouw-Lingga Archipelago which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the province of Riau, the islands of Bangka and Billiton, part of the island of Borneo (Kalimantan), Sulawesi (formerly Celebes) Island, the Molucca Islands (Ternate, Halmahera, Buru, Seram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of Timor Island, the islands of Bali and Lombok and the western half of the island of New Guinea (Irian Jaya), with a total area of 735,000 sq. miles, and a population of about 129,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War 1939-45, during which the Archipelago was occupied by the Japanese, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands of all the former Dutch East Indies except W. New Guinea took place on December 27, 1949.

Dr. Sukarno was elected President of Indonesia and held office until his deposition in 1967. He died on June 21, 1970.

Following the establishment of Malaysia (including Sabah and Sarawak) in 1963, President Sukarno pursued a policy of "confrontation" against it, involving border incursions in both West and East Malaysia. Commonwealth forces

assisted Malaysian resistance. Western New Guinea became part of Indonesia in 1963 under the name West Irian (now Irian Jaya), this interpretation being confirmed in an "Act of Free Choice" in July, 1969, of which the United Nations took note in November 1969.

On Sept. 30, 1965, an attempted *coup d'état* assisted by the Palace Guard resulted in the murder of six generals. The Indonesian Communist Party was charged with plotting to destroy the power of the Army and to set up a Peking-oriented régime, nominally under President Sukarno. The coup was swiftly crushed and a widespread massacre of Communists and their supporters followed. Sukarno remained in office but his Foreign Minister, Dr. Subandrio, among others, was arrested and later sentenced to death. The sentence had not been carried out by the summer of 1976.

Following a three-week period of unrest and violent student demonstrations the Minister of the Army, General Soeharto, took over effective political power in March, 1966, and announced the banning in Indonesia of the Communist Party. The new régime concluded an agreement ending the "confrontation" with Malaysia on Aug. 11, 1966, and Indonesia resumed membership of the United Nations Organization which it had left in 1965. General Soeharto was made Acting President with full powers, on March 11, 1967.

Using his powers as Acting President, General Soeharto revised the membership of the two Houses of Parliament, and on March 28, 1968, the MPRS (Provisional People's Consultative Congress), the highest constitutional body, appointed him full President for a period of five years. The 1971 elections resulted in the Government faction Golkar (functional groups) achieving a large majority.

In accordance with another instruction General Soeharto on June 6 replaced the Ampera Cabinet with the Development Cabinet, i.e. one which was intended to reflect the emphasis to be placed henceforward on the development of the country, economic affairs, efficiency and expertise in general, and to reduce the direct influence of the military in the Government.

From March 12-24, 1973, the M.P.R. (Peoples' Consultative Assembly) met at Jakarta, the first time that it had assembled in its proper form during

Indonesian Independence. The primary outcome was the re-election of President Soeharto for a further term of 5 years, the election of Hamengku Buwono IX, Sultan of Yogyakarta, as Vice-President, and the determination of the broad lines of State policy. In March a new Cabinet, called the Second Development Cabinet, was sworn in. The Government have announced that the next elections will take place in May 1977, and that the M.P.R. will meet in 1978.

Finance.—Following new measures introduced by the Government in October, 1966, inflation declined from the rate of 600 per cent. in 1966 to about 2 per cent. in 1971. At the end of 1972, a rice shortage, followed by a rise in other prices, increased inflationary pressure on the economy and inflation rose to 27 per cent. in 1973 and 40 per cent. in early 1974 but special measures reduced this to about 2 per cent. for the year. Following the agreement on the re-scheduling of Indonesia's debts in 1966, Western creditor nations agreed to make available aid amounting to \$200,000,000 as balance of payments support. Commitments undertaken by these countries in May 1974 amounted to over \$900,000,000.

The new measures adopted by the Government in October, 1966, included the abolition of State controls and the introduction of a free market policy with more realistic exchange rates geared to a floating rate for the purchase of foreign exchange in the form of bonus export certificates for essential imports. The rate had risen to a peak of *Rps.*480 = \$1 by mid-1968, but fell to *Rps.*378 = \$1 by mid-1969. It has remained stable since then even though on April 17, 1970, the Government abolished the bonus exports certificate system and introduced a free market for foreign exchange. *Rps.*415 = U.S. \$1 (July 1974).

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg, pepper and cloves are produced, mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estates. Rubber, tea, coffee and tobacco are also produced by both in large quantities. Timber is now the second largest foreign exchange earner after oil. Rice is a traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers, but production

is only gradually rising and up to 1976 has been insufficient to meet home demands.

Oil is the most important asset with production in 1974 earning some U.S. \$7,500,000,000 in foreign exchange.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits. Aid to Indonesia is channelled through the Inter-Governmental Group on Indonesia (IGGI), which pledged U.S. \$940,000,000 in May 1975.

The first five-year development programme announced on Dec. 30, 1968, concentrating particularly on agriculture and communications, was inaugurated on April 1, 1969. The second five-year plan began in April 1974 and envisages a five-fold increase in the Government's development expenditure and a 7½ per cent. annual rate of growth in Gross National Product.

Trade with U.K.

There was a progressive decline in British exports to Indonesia after 1960. This became more marked during Indonesia's policy of "confrontation" against Malaysia which resulted in a disruption of normal commercial relations and stringent import controls due to lack of foreign currency, but exports have improved markedly since the restoration of normal commercial relations in 1967.

	1974	1975
Direct Imports from U.K.	£46,693,000	59,500,000
Exports to U.K.....	14,419,000	15,100,000

Principal exports to the United Kingdom are rubber, tea, coffee, spices and sugar. Imports from the United Kingdom are mainly of machinery, chemicals, electrical equipment, motor vehicles, cycles, lubricating and heavy oils, and metal goods.

Language.—The National Language is Bahasa Indonesia; common spelling for Malay and Bahasa Indonesia was introduced in August 1972.

Transport.—In Java a main line connects Jakarta with Surabaya in the East of Java and there are several branches, including a line from Semarang on the North coast to Yogyakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago are maintained by the State-run shipping companies Djakarta-Lloyd (ocean-going) and Pelnit coastal and inter-island) and other smaller concerns. Transport by small craft on the rivers of the larger islands plays an important part in trade. Air services in Indonesia are operated by Garuda Indonesian Airway and other local airlines, and Jakarta is served by various international services. There are approximately 50,000 miles of roads.

CAPITAL.— Ψ Jakarta, formerly Batavia (population 5,000,000). Other important centres are: (Java), Ψ Surabaya, Ψ Semarang, Bandung, Ψ Cirebon, Ψ Surakarta and Yogyakarta; (1971 populations) (Madura) Pamekasan (180,000); (Sumatra) Palembang (582,961); Medan (800,000); and Ψ Padang; (Sulawesi) Ψ Ujung Pandang (formerly Makassar) (600,000); and Ψ Manado; (Kalimantan, Borneo) Banjarmasin, Ψ Balikpapan and Ψ Pontianak; (Moluccas) Ternate (70,000); (Bali) Denpasar and Singaraya (120,000); (W. Timor) Kupang (10,000); (W. Irian) Jayapura.

NATIONAL DAY.—August 17 (Anniversary of Proclamation of Independence).

FLAG.—Equal bands of red over white.

IRAN

(Persia)

Shanshah of Iran, H.I.M. Mohammed Reza Pahlavi, born Oct. 26, 1919; *acceded* Sept. 16, 1941 (on abdication of his father Reza Shah Pahlavi); *married* (March 15, 1939), Princess Fawzieh, sister of ex-King Farouk of Egypt (marriage dissolved Nov. 17, 1948). and has issue a daughter born 1940. The Shah *married* (Feb. 12, 1951) Suraya Efsandari Bakhtiari (marriage dissolved, April 6, 1958); *married* Dec. 21, 1959, Farah Diba (Empress Farah Pahlavi) and has issue Crown Prince Reza, born Oct. 31, 1960; Princess Farahnaz, b. March 12, 1963; Prince Ali Reza, b. April 28, 1966; Princess Leila, b. Mar. 27, 1970.

Prime Minister, Amir Abbas Hoveida

IRANIAN EMBASSY IN LONDON

16 Princes Gate, S.W.7

[or-584 8101]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Parviz Radji (1976).

Area and Population.—Iran has an area of 628,000 sq. miles, with a population of 25,781,090 (Census of 1966); U.N. estimate, March, 1970, 28,448,000. It is mostly an arid table-land, encircled, except in the east, by mountains, the highest in the north rising to 18,934 ft. The central and eastern portion is a vast salt desert.

The Iranians are mostly Shi'ah Moslems but among them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian and Assyrian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Iran was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Iranian

Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 16, 1941, Reza Shah abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammed Reza Shah Pahlavi.

In March 1949, the Shah issued an Imperial Farman convoking a Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On February 26, 1963, the Shah announced his six-point "White Revolution". The six points are: 1. A land reform designed to redistribute land and place it in the hands of the peasants. 2. Nationalization of all forest land. 3. The sale of government shares in factories and industrial enterprises to raise money for the implementation of the land reform. 4. The distribution of factory profits among the factory employees. 5. The granting of the vote to women. 6. The creation of a Literacy Corps to bring basic education to the rural areas. Six additional points have since been added.

On March 2, 1975, the Shah dissolved the two-party system, and announced the formation of the *Rastakhiz* (National Resurrection) Party, which would be the only political party. On June 20, general elections were held for the *Majhs* (Chamber of Deputies) and the Senate.

For the purposes of local government the country is divided into 14 Provinces (*Ustans*) and 8 Countries (*Farmandariye Kol*), comprising 147 Sub-

Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The Army has a strength of about 175,000 men, in 3 armoured divisions, 2 infantry divisions and 4 Independent brigades. Two years' military service is compulsory. The Air Force has a strength of about 50,000, with over 200 aircraft. The Navy, with personnel of about 13,000, consists of 3 destroyers, 4 frigates, 4 corvettes, 6 mine-sweepers, and patrol boats, landing craft and hovercraft. The Gendarmerie is an all regular, paramilitary force of about 70,000 men which provides frontier guards and mans small posts throughout the country.

Education.—Since 1943 primary education has been compulsory and free, but there is large scale absenteeism, particularly outside the towns. The establishment in 1963 of the Literacy Corps (a body of National Servicemen who are seconded to the Ministry of Education to work as Primary School teachers in rural districts) has brought schooling to hitherto deprived villages and is making a valuable contribution in increasing educational opportunities for country people. There are in Iran eight universities (Tehran 3, Tabriz, Meshed, Isfahan, Shiraz, Rezayeh and Ahwaz).

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kāsim Mansūr, or Firdausi (A.D. 939-1020), Omar Khayyām, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa'di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389).

Finance.—The budget for the Iranian year beginning March 21, 1971, including development expenditure, balanced at Rls. 481,000,000,000 an increase of 18 per cent. over 1970-71. The unit of currency is the *Rial* of 100 *Dinars* (for rate of exchange, see p. 84).

Production and Industry.—While petroleum is the principal product and by far the greatest export Iran, except for its desert areas, is primarily an agricultural country and more than half of the inhabitants depend of their living on the land. Wheat is the principal crop, using about half the area under cultivation. Other important crops are barley, rice, cotton, sugar beet, fruits and vegetables. Wool is also produced—sheep, as well as goats, being numerous. There are extensive forests in the north and west, the conservation of which is an urgent problem. Rapid progress has been made in the development of industry. Apart from oil, the principal industrial products are carpets, textiles (mainly cotton), sugar, cement and other construction materials, ginned cotton, vegetable oil and other food products, leather and shoes, metal manufactures, pharmaceuticals, automobiles, fertilizers, plastics, matches and cigarettes. A steel mill at Isfahan began the production of pig iron at the end of 1971. There are now three petrochemical plants in operation, producing fertilizers, plastics, detergents, sulphur and liquid petroleum gas. Large-scale copper deposits have been found in the south-eastern part of the country.

The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946. Production had risen to a total of 35,000,000 metric tons in 1950, the last full year before nationalization. Oil shipments ceased in 1951 and were not resumed until Oct. 30, 1954.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Iran were

taken over for an initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Iran £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Iran and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20-25 years. The consortium is responsible for the production, refining and sale of Iranian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Oilfields outside the Consortium area are being developed by several oil companies formed jointly by N.I.O.C. with western oil companies, notably S.I.R.P., I.P.A.C., L.A.P.C.O. and I.M.I.N.C.O. Production from offshore oil wells in the Persian Gulf developed by these companies is increasing rapidly.

Recent oil production figures are (in long tons): 1966, 105,100,000; 1967, 129,300,000; 1968, 142,200,000; 1969, 168,100,000; 1970, 194,000,000.

Communications.—The principal roads are from the frontier of Iraq at Khosravi to Tehran; from Tehran *via* Saveh and Hamadan to Ahwaz and Khorramshahr; from Tehran *via* Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with a branch road into Turkey; from Tehran to Meshed; three roads through the Elbruz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, *via* Yazd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Meshed is connected by road with Herat (Afghanistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. The *Trans-Iranian Railway*, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and thence to Quetta and branch lines from Ahwaz to Khorramshahr and Khorramshahr to Tanuma in Iraq (on the Shatt al Arab, opposite Basrah) were opened during the war. An extension from Qum to Yazd *via* Kashan is now in operation as is one from Bandar Shah to Gorgan. Extensions from Yazd to Kerman and from Tabriz to Van (Turkey) are being built. It is hoped to connect the Iranian rail system with the Turkish and with the Pakistan systems, thereby offering a through route from Europe to Pakistan.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. The *Iranian National Airlines Corporation* was formed from the former *Iranian Airways* and *Persian Air Services* in February, 1962. The Company is 51 per cent. Government-owned and operates internal and international routes. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, British Airways, Qantas, P.I.A., Aeroflot, Alitalia, Aryana Airways and El Al operate services to Tehran.

TRADE

	1968-69	1969-70
Imports.	Rials 106,723,875,715	Rials 115,567,000,000
Exports.	16,268,001,537	18,533,000,000

These figures are calculated at the commercial rate of exchange and exclude oil exports. Total exports, including oil exports for 1969-70, Rials 612,357,000,000.

Trade with U.K.

	1974	1975
Imports from U.K. ..	£278,580,000	£494,621,000
Exports to U.K.	513,270,000	700,933,000

Imports into Iran consist mainly of industrial and agricultural machinery, iron and steel (including manufactures), electrical machinery and goods, sugar, chemicals and pharmaceuticals, motor vehicles and certain textile fabrics and yarns. The principal exports, apart from oil, are cotton, carpets, dried fruits and nuts, hides and skins, mineral ores, wool, gums, caviare, cummin seed and animal casings. West Germany, the U.S.A. and the U.K. are Iran's three leading suppliers. West Germany, the U.S.S.R., the U.K. and the U.S.A. are the main customers for non-oil exports.

CAPITAL: Tehran, population (1970), 3,150,000. Other large towns are Tabriz (388,000), Isfahan (340,000), Meshed (312,000), Shiraz (206,000), Resht (119,000), Kerman (73,000), Hamadan (115,000), Yazd (74,000), Kermanshah (152,000), Abadan (273,000), Ahwaz (145,000).

FLAG.—Equal horizontal bands of green, white and red; with arms (lion and sun) in centre.

NATIONAL DAY.—October 26 (Anniversary of Birthday of the Shahanshah).

IRAQ

REVOLUTIONARY COMMAND COUNCIL

Chairman, President of the Republic, and Supreme Commander of the Armed Forces, Field Marshal Ahmad Hasan al Bakr, assumed office July 17, 1968.

Members, Saddam Hussain (Vice-Chairman); General Sa'dun Ghaidan (Minister of Communications); Dr. Izzat Mustafa (Minister of Labour and Social Affairs); Sd Izzat Ibrahim al Duri (Minister of the Interior); Sd Taha al Jazrawi (Minister of Works and Housing).

In addition to those members of the R.C.C. holding departmental portfolios listed above, there are 23 other ministers, including 5 ministers of State.

EMBASSY OF THE REPUBLIC OF IRAQ

21-22 Queen's Gate, S.W.7

[01-584 7141]

Ambassador Extraordinary and Plenipotentiary, H. E. Abdul Malik Ahmed Ali-Yasin.

Area, etc.—Traversed by the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E. and from Iran on E. to Syria and Arabian Desert on W. The approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. (see

MAP, p. 878). The area of Iraq is officially estimated at 172,000 sq. miles of which 37 per cent. is desert land. About 35 to 40 per cent. of the remainder is potentially cultivable either by rainfall or by irrigation.

Population.—At the Census of 1965 Iraq had a total population of 8,097,230; estimated 1970, 9,498,362.

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dag, a mountain of Eastern Erzurum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzurum in the Dumlü Dag. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Antiquities.—In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C. Excavations in 1948 at Tel Abu Shahraïn, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world. Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel). Mosul *Liwa* covers a great part of the ancient kingdom of Assyria, the ruins of Ninevah, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the *Garden of Eden*. The "*Tree of Knowledge*," which had stood there "from time immemorial," withered and died in December, 1946. It has been replaced by a shoot said to be from the original tree.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal was elected King of Iraq. The country was a monarchy until July, 1958, when King Faisal II was assassinated. From 1958 Iraq has been under Presidential rule.

Diplomatic relations with the United Kingdom were broken in June 1967 and resumed in May 1968. They were again broken in Dec. 1971 and resumed once more in April 1974.

Language.—The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts.

Education.—In 1974 Iraq had 149 infant schools, with 867 teachers and 16,831 pupils; 6,731 primary schools, with 58,455 teachers and 1,408,929 pupils; and 1,193 intermediate and preparatory secondary schools, with 14,871 teachers and 388,624 full-time students. There were 5 universities and 4 other public institutes of higher education, with 2,669 teachers and lecturers and 58,351 students. In 1974 there were 64 vocational schools (agriculture, commerce and industry, home economics).

Communications and Trade.—New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. The port of Basrah is not at present able to handle expeditiously all seaborne traffic. Continuous dredging of the Shatt al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun). The port of Umm Qasr near the Kuwaiti

border has been developed for freight and sulphur handling. Road routes from Turkey and the Mediterranean are well used, and carry through traffic to Kuwait and the south.

There are international airports at Baghdad and Basrah. Iraqi Airways provide a London/Baghdad service six days a week. British Airways and other European airlines operate frequently. Iraqi Airways and Middle East Airlines operate within the area, including (Iraqi) services to Basrah and Mosul. Iraqi Republican Railways provide regular passenger and goods services on a standard gauge line between Basra, Baghdad and Mosul, which links up through Syria and Turkey with the Mediterranean and the Bosphorus. There is also a metre gauge line connecting Baghdad with Khanaqin, Kirkuk and Arbil.

Agriculture and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. The Government's concern with agricultural development is shown in the large financial allocations made to the sector. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development and two harvests can usually be gathered in the year. Production fluctuates from year to year according to rainfall. During the five years 1964–69 crops of barley, millet, rice, wheat, dates, cotton and tobacco were produced in sufficient quantities to allow a margin for export. However, due to a poor harvest in 1969–70 dates were the only important agricultural export. All crops improved in 1971–72 but fell to 1970 levels in 1973.

Few industries with the exception of the oil industry are yet established on any scale, but increasing industrialization is taking place, mainly in the public sector. Priority is being given to petrochemicals, food industries, construction industries and engineering. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel fabrications, furniture, tanning, textiles, footwear and vegetable oils. In 1972 there were 1,319 industrial establishments employing an average number of 121,409 persons annually. Turnover of these establishments was ID.235,986,000. Iraq's major industry is oil production, and this accounts for approximately 98 per cent. of the country's foreign exchange receipts, 90 per cent. of total government revenue and 45 per cent. of the Gross National Product. Production figures in long tons are:

1970	75,241,000	1972	71,207,000
1971	82,450,046	1973	97,802,000

Total revenues from exports of crude oil have not been published since 1972, but they are believed to have been worth some ID.2,120,000,000 in 1974. The Iraq Petroleum Company was nationalized on June 1, 1972, and its associate, Basrah Petroleum Company, was nationalized on Dec. 8, 1975. Following nationalization, Iraq's oil production fell to an estimated 65,000,000 long tons in 1972. However, as a result of an agreement reached between the Iraq Petroleum Company and the Government in March 1973 Iraq's oil production has since risen to meet market requirements and reached some 97,800,000 long tons in 1973.

FINANCE

	1973–74	1974–75*
Total revenue . . .	ID.1,270,300,000	ID.2,747,851,776
Total expenditure	1,375,200,000	2,993,458,195
	* Budget estimates.	

The Iraqi Dinar of 1,000 Fils = £1.40 sterling.
Exchange rate (July, 1976), 524 Fils = £1 (see also p. 84).

TRADE
(Excluding oil)

	1973	1974
Total imports.....	ID270,316,788	ID700,100,000
Total exports.....	32,522,820	28,100,000

Trade with U.K.

	1974	1975
Imports from U.K.....	£59,838,000	£136,500,000
Exports to U.K.....	106,577,000	102,500,000

In 1974, petroleum accounted for some £103,000,000 of exports to the U.K.

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, dates, cement, raw wool, raw hides and skins and raw cotton.

CAPITAL.—Baghdad. Population of the governorate (estimated 1970), 2,696,000. Other towns of importance are Ψ Basrah and Mosul.

FLAG.—Horizontal stripes of red, white and black, with three green stars on the white stripe.

Sharia Salah Ud-Din,
Karkh, Baghdad

Ambassador Extraordinary and Plenipotentiary, His Excellency John Alexander Noble Graham, C.M.G. (1974).

Counsellor, R. G. Giddens.

Commercial Secretary, N. W. Lomas.

Defence Attaché, Col. A. J. Adcock.

Air Attaché, Wg. Cdr. A. A. Hutchinson.

Consul, W. J. Dixon.

Second Secretaries, N. Witney; R. Austen.

Attachés, D. White (Commercial); S. H. Palmer (Consular).

There are no British Consular Offices outside Baghdad.

British Council Representative, R. A. K. Baker, 7/29 Waziriya, Baghdad.

ISRAEL
(Yisrael)

President of Israel, Professor Ephraim Katzir, born May 16, 1916, elected President May 24, 1973.

CABINET

Prime Minister, Yitzhak Rabin.

Deputy Prime Minister and Minister for Foreign Affairs, Yigal Allon.

Interior, Dr. Joseph Burg.

Education and Culture, Aharon Yadlin.

Agriculture and Communications, Aharon Uzan.

Labour, Moshe Bara'm.

Defence, Shimon Peres.

Police, Shlomo Hillel.

Health, Victor Shemtov (Mapam).

Finance, Yehoshua Rabinowitz.

Commerce and Industry, Haim Bar-Lev.

Transport, Gad Yaacobi.

Justice, Haim Yosef Zadok.

Housing, Avraham Ofer.

Immigration Absorption, Shlomo Rosen (Mapam).

Religious Affairs, Itzhak Raphael.

Tourism, Moshe Kol (I.L.P.).

Social Welfare, Zevulun Hammer.

Without Portfolio, Israel Galili; Gideon Hausner (I.L.P.).

Apart from Ministers marked otherwise, members of the Cabinet belong to the Israel Labour Party, a merger (Jan. 21, 1968) of the former *Mapai*, *Ahdut Avodah* and *Rafi* parties. *Mapam*=United Workers' Party; *I.L.P.*=Independent Liberal Party.

EMBASSY IN LONDON

2 Palace Green, Kensington, W.8
[01-937 8050]

Ambassador Extraordinary and Plenipotentiary, His Excellency Efraim Evron (1976).

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30'–33° 15' N. and longitude 34° 15'–35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South-West.

The area is estimated at 7,992 square miles out of the 10,429 square miles which comprised the pre-1948 mandated territory of Palestine (the remainder being occupied by Israel since the Six Day War in June, 1967, together with the Sinai Peninsula and the Golan Heights in Syria). The population was estimated in 1973 at 3,230,000. Jewish immigration has made rapid progress since the establishment of the State in 1948. In 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048. During the upheavals of 1948–49 a large number of Arabs left the country as refugees and settled in neighbouring countries. Since 1948 the population of Israel has more than quadrupled.

Hebrew and Arabic are the official languages of Israel. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judaea and Samaria, rising in places to heights of nearly 4,000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheeba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hula and Tiberias (Sea of Galilee) the river falls 926 ft. in 111 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Kishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51.5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are among the principal historic sites in Israel: Jerusalem: the Church of the Holy Sepulchre; the Al Aqsa Mosque and Dome

of the Rock, standing on the remains of the Temple Mount of Herod the Great, of which the Western (walling) Wall is a fragment; the Church of the Dormition and the Cenaculum on Mount Zion; Ein Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Atlit, Massada, Megiddo and Hazor. Other antiquities in the West Bank of Jordan, Sinai or the Golan Heights at present occupied by Israel can now be visited from Israel.

Government.—There are a Cabinet and a single-chamber Parliament (*Knesset*) of 120 members. A general election is held at least once every four years. The last took place on Dec. 31, 1973.

* A "Government of National Unity" was formed on December 11, 1969, headed by Mrs. Golda Meir. It was a broad coalition and, with one exception, embraced the same parties as were in the two previous governments formed in June, 1967, and March, 1969, by the late Mr. Levi Eshkol and Mrs. Meir respectively. In August, 1970, the *Gahal* bloc left the Government because they were opposed to a resumption of the jarring negotiations. Following the General Election held on December

31, 1973 (postponed from October 30 owing to the outbreak of war), there was a prolonged ministerial crisis, finally resolved when Mrs. Meir succeeded in forming a new Coalition Government, and the Cabinet was chosen on March 6. The Government received a vote of confidence in the *Knesset* on March 10. However, on April 10, Mrs. Meir announced her resignation; on April 22 the Labour Party chose General Itzhak Rabin as Prime Minister-designate, and on April 26 President Katzir asked him to form a new Government, which was chosen on May 28, and received a vote of confidence in the *Knesset* on June 3. The present coalition government commands 57 seats in the *Knesset*, as follows: *Alignment*, 50; *Arab & Druse Lists* (affiliated to Labour Party), 3; *Independent Liberals*, 4. The Opposition commands 59 seats in the *Knesset* as follows: *Likud*, 39; *National Religious*, 10; *Agudat Blo*, 5; *Ya'ad* (the former C.R.M. with *Lyivva Filar* from the Labour Party) 4; *New Communists*, 4; *Israel Communists*, 1.

Immigration.—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. From the establishment of the State until April 1975, more than 1½ million immigrants had entered Israel from over 100 different countries.

Education.—Elementary education for all children from 5 to 15 years is compulsory. The Law also provides for working youth, age 15–18, who for some reason have not completed their primary education, to be exempted from work in order to do so.

In 1974–75 enrolment in all educational establishments was 1,012,300; kindergartens 192,600 (including 37,000 in private schools); elementary education, 503,500; teacher's training colleges, 11,100; secondary education, 175,300; academic institutions, 51,000.

Finance.—Government expenditure for the fiscal year 1974–75 totalled £40,650,000,000.

The unit of account is the Israeli pound of 100 *agorot*. Exchange rate, see p. 84.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lod, Nahariya, Beersheba, Domona, Oron, Ashdod and intermediate stations. In March 1973 the total railway network amounted to 795 km. There were over 10,000 km. of paved road and 375,340 licensed vehicles in 1974.

Shipping.—Israel's merchant marine had reached a total of 3,435,076 tons deadweight by December, 1973.

The chief ports are Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; the harbour on the Red Sea at Eilat, inaugurated in September 1965, has a capacity of 10,000 tons a day; Acre has an anchorage for small vessels; the deep-water port at Ashdod, 20 miles south of Tel Aviv, which started operations at the end of 1965, handled 3,363,000 million tons of cargo in 1973. In 1974 Israel's three main ports handled 9,989,000 tons of cargo (excluding petroleum).

Civil Aviation.—In 1974, El Al carried 862,000 passengers. El Al operates Boeing jets exclusively and has bought three Boeing 747's. Arkia, the internal airline, has had a steep increase in traffic since the Six-Day War and in 1974 carried 363,000 passengers. Arkia uses five Heralds and five Viscounts.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to sub-tropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities mostly in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1972–73 season was 1,495,038 tons. Of this total, 846,770 tons were exported, of which 182,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 23,737 tons in 1973. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production. The area under cultivation during 1972–73 was

4,225,000 dunams, of which 1,815,000 were under irrigation. The largest of these is the Kinneret-Negev Project. Much of the dairy industry is dependent on the production of fodder crops under irrigation; arcas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—In value polished diamonds now account for more than one-third of Israel's total exports. Amongst the most important of her exporting industries are textiles, foodstuffs, chemicals (mainly fertilisers and pharmaceuticals). Her metal-working and science-based industries have been developed to a highly sophisticated and technologically advanced level. These include the aircraft and military industries. Other important manufacturing industries include plastics, rubber, cement, glass, paper and oil refining.

TRADE

	1973	1974
Imports..	\$U.S. 3,080,174,000	\$U.S. 4,339,910,000
Exports..	1,647,490,000	2,129,214,000

Trade with U.K.

	1974	1975
Imports from U.K..	£219,206,000	£237,243,000
Exports to U.K....	78,701,000	91,253,000

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

CAPITAL.—Most of the Government departments are in Jerusalem (population, 1974, 380,000). A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950. It is not, however, recognized as the capital by the United Nations. Other principal towns are ♀ Tel Aviv and district (947,000); ♀ Haifa and district (514,000) and Beersheba and district (228,000).

FLAG.—White, with two horizontal blue stripes, the Shield of David in the centre. **NATIONAL DAY** (1976)—May 5.

JERUSALEM

Until 1967 Jerusalem was divided between Israel and Jordan, two of the 36 recognized Christian Holy Places (in the New City) being under Jewish administration, the remainder under Arab administration in the Old City. At the conclusion of hostilities between Israel and the surrounding Arab countries in 1967 the entire city was under Israeli control.

BRITISH EMBASSY

 (01-235 4831).
 Consul General, Sig. M. Manea.

Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands. Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area is about 324,000 sq. kilometres (125,000 sq. miles).

The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are *Monte Rosa* (15,217 feet), *Matterhorn* (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (405 miles), which

flows through Piedmont, Lombardy and the Veneto, and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in 49 B.C., thus "invading" Italy in arms) is used to indicate definite commitment to some course of action.

Population.—Italy has a resident population estimated at 56,024,000 at the end of 1975 about 428 persons per sq. mile. Live births in 1970 totalled 917,496, deaths, 528,622 and marriages 395,321 (estimated).

Government.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (1805-72), Garibaldi (1807-82) and Cavour (1810-61) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader) was born July 29, 1883, and was continuously in office as Prime Minister from Oct. 30, 1922, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

Constitution.—The constitution of the Republic of Italy, approved by the Constituent Assembly on December 22, 1947, provides for the election of the President by an electoral college which consists of the two Houses of Parliament (the Chamber of Deputies and the Senate) sitting in joint session together with three delegates from each region (one in the case of the Valle d'Aosta). The President, who must be over 50 years of age, holds office for 7 years. He has numerous carefully defined powers, the main one of which is the right to dissolve one or both Houses of Parliament, after consultation with their Speakers.

Senator Leone was elected President at the twenty-third ballot on December 24 with 518 votes (the required majority was 505). The new President was sworn in before Parliament in joint session on December 29, 1971.

Since the General Election of 1948, governments have been formed by Signor de Gasperi (1948-53, coalition); Signor Pella (1953-54, *Christian Democrat*); Signor Scelba (1954-55, coalition); Signor Segni (July, 1955-May, 1957, coalition); Signor Zoli (June, 1957-May, 1958, *Christian Democrat*); Signor Fanfani (May, 1958-Feb., 1959, coalition); S. Segni (Feb., 1959-Feb., 1960, *Christian Democrat*, with *Liberal* support). Signor Tambroni (March 25-July 1960, *Christian Democrat*, with Neo-Fascist support); Signor Fanfani (July 27, 1960-Feb., 1962,

Christian Democrat); Signor Fanfani (Feb. 1962–June, 1963, coalition); Signor Leone (June–Nov., 1963, *Christian Democrat*); Signor Moro (coalitions formed, Nov., 1963; July, 1964; Feb., 1966); Sen. Leone (May, 1968–December, 1968, *Christian Democrat*); Sig. Rumor (December, 1968–June, 1969, Centre Left coalition); Sig. Rumor (second Government) (August, 1969–April, 1970, *Christian Democrat*); Sig. Rumor (third Government, April–Aug., 1970, Centre Left coalition); Sig. Colombo (Aug., 1970–Feb., 1972, Centre Left coalition); Sig. Andreotti (Feb., 1972, *Christian Democrat*); Sig. Andreotti (June, 1972–June, 1973, *Christian Democrat, Social Democrat and Liberals*); Sig. Rumor (July, 1973–March, 1974, Centre Left Coalition); Sig. Rumor (March 1974–Oct. 1974, Centre Left Coalition); Sig. Moro (Nov., 1974–Jan. 1976, *Christian Democrat and Republican*); Sig. Moro (Feb.–June, 1976, *Christian Democrat*); Sig. Andreotti (July, 1976, *Christian Democrat*).

Sig. Rumor's fifth government (Centre-Left Coalition) was forced to resign on Oct. 3, 1974, owing to differences among the coalition parties. After an unsuccessful attempt by Sig. Fanfani to form a Government, Sig. Moro (CD) formed a two-party coalition of Christian Democrats and Republicans, supported in Parliament by the Socialists and Social Democrats, which received its final vote of confidence in the National Assembly in December, 1974.

This government survived throughout 1975, but resigned on Jan. 7, 1976 after the Socialists had withdrawn their parliamentary support, mainly because of disagreements over economic policy. Following the usual consultations, Sig. Moro formed his fifth government on Feb. 11, consisting only of Christian Democrats, with non-parliamentarians as ministers of Justice and Finance. Dependent on the abstention of the Socialists in Parliament, this government was weakened by a serious financial crisis. The refusal of the Socialists (and of the Communists, who were consulted) to agree to an emergency economic programme proposed by the government, led Sig. Moro to tender his resignation on April 30. After consultations, President Leone dissolved Parliament on May 1, and general elections were held on June 20, 1976.

In the Chamber of Deputies, the Christian Democrats won 263 seats, the Communists 228, Socialists 57, Republicans 14, Social Democrats 15, Italian Social Movement 35, Liberals 5, Radicals 4, Democratic Proletarians 6 and South Tirol Party 3. In the Senate the Christian Democrats won 135 seats, the Communists 116, Socialists 29, Republicans 6, Social Democrats 6, Liberals 2 and Italian Social Movement 15.

Consequently, Sig. Andreotti formed a minority Christian Democrat government, which received a vote of confidence on Aug. 11, through Communist abstentions.

Defence.—The period of conscription is 18 months for the Army and Air Force and 12 months for the Navy. The Army consists of 300,000 men including 22,000 officers. It has two armoured divisions, five infantry divisions, four independent infantry brigades, five Alpine brigades, one independent armoured brigade, one missile brigade, one parachute brigade and one amphibious regiment. There is also a para-military force, the *Carabinieri*, about 84,000 strong. The Navy consists of 3 cruisers, 37 escorts including four G.W. destroyers, 10 submarines, 60 minesweepers and also coastal craft and fleet auxiliaries. Approximate strength: 43,000 uniformed personnel. The Air Force consists of 500 aircraft; approximate strength: 75,000 men.

REGIONS OF ITALY

Rome and Central Italy.—Rome was founded, according to legend, by Romulus in the year now known as 753 B.C. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire and became the capital of Italy when the Kingdom was established in 1871. With a metropolitan population of 2,842,616, Rome has been recreating herself as a major capital in the 100 years since Italy's reunification. The capital is concerned mainly with tourism and government, but owing partly to the fact that the power of the Central Government is increasingly felt by industry, and that the headquarters of the giant State and parastatal companies are located there, Rome's importance as a business centre, although far from rivalling that of Milan, is steadily increasing.

Lombardy and Milan.—In the small area around Milan, which has a metropolitan population of 1,724,819, are to be found some 22 per cent. of Italy's commercial and banking services and some 30 per cent. of her industry. Here too, a market for consumer goods greatly exceeds that of any other comparable area in Italy. Lombardy's population of some 8.3 million is growing fast, both naturally and by immigration, and enjoys a *per capita* income some 40 per cent. above the national average. The whole range of Italian industry is there. Most important are the steel, machine tool and motor car factories.

Turin and Piedmont.—Turin between 1861 and 1865 was Italy's first capital as the home of the Piedmontese Royal Family. Now with a metropolitan population of 1,187,832 it is famous as the headquarters of Europe's largest manufacturer of motor cars, produces 75 per cent. of Italy's motor vehicles and over 80 per cent. of its roller bearings. Turin is also Italy's second largest steel producing city. Piedmont is the centre of the Italian textile industry based mainly on Biella.

Genoa and the Ligurian Riviera.—Genoa, with a metropolitan population of 842,114, is Europe's fourth largest port and handles one-third of Italy's foreign trade. About 80 per cent. of the goods handled are imports. Anglo-Genoise trade goes back to the 13th century and 20 per cent. of Genoa's imports still come from Britain. Genoa is Italy's third most important industrial city.

Venice and the North-East.—Venice, with a metropolitan population of 367,528 is primarily a tourist attraction of unique beauty. It was founded in the middle of the 5th century by refugees from the mainland fleeing from Barbarian attacks. At the beginning of the 16th century it was one of the strongest and richest states of Europe, dominating Eastern Mediterranean trade. It lost its independence in 1797 when Napoleon handed it over to Austria. Industry is now developing in the Venice area, particularly on the autostrada linking

Venice with her historical and now developing rivals, Verona, Vicenza, Padua and in the areas around Pordenone. Padua is known for mechanical equipment, Verona for paper and stationery, Treviso for consumer goods, and Valdagno for its woollen industry. An important electrical appliance industry is based near Treviso and at Pordenone. Near Trieste, which has a population of 277,135, is the modern Monfalcone shipyard. Present-day Trieste itself consists of Zone A, the area which was administered by the Allied Military Government from June 12, 1945, to October 26, 1954, when it was handed over to the Italian authorities. The remainder of the area of Trieste was administered by Yugoslavia after the War and handed over to that country in 1954 after the free territory of Trieste, an arrangement agreed in the Italian Peace Treaty of 1947, had proved to be unworkable. An agreement was reached in 1975 between Italy and Yugoslavia for each country to abandon its residual claims to the other's zone.

Tuscany, Emilia and Romagna.—Before the last war this area was the agricultural centre of Italy and there was little industry. Now there are large industrial centres at Bologna (metropolitan population, 493,700), Florence (metropolitan population, 460,944), Modena, Pistoia and Ravenna. Most of the new firms are small or medium-sized. In Prato there are about 1,000 textile firms. The footwear industry is based on Florence, reproduction furniture at Cascina and Poggibonsi, ceramics at Sassuolo, and glass and pottery at Empoli and Montelupo. Bologna is an important centre for the food industry. Florence, the capital of Tuscany was one of the greatest and most creative cities in Europe from the 11th to the 16th centuries. Under the Medici family in the 15th century flourished many of the greatest names in Italian art, including Filippo Lippi, Botticelli, Donatello and Brunelleschi. In the 16th century the tide turned to Rome where great Florentine artists like Michelangelo and Leonardo da Vinci flourished.

Naples and the Toe of Italy.—Naples (metropolitan population 1,258,721), formerly the capital and administrative centre of the Kingdom of Naples and Sicily, remains the dominant city in the area, but it is beset with great problems of unemployment and the need for modernization. Around it, however, helped by Government incentives, industry is slowly developing, northwards to Caserta, southwards to Salerno and eastwards to Benevento.

Puglia.—Bari (metropolitan population, 356,250) has always been a commercial centre. Fairly rapid industrial development is now taking place in the areas of Taranto, Bari, Brindisi and Foggia. At Taranto there are a highly-mechanized steel-works and a modern oil refinery. The Bari industrial zone has factories producing electronic and pneumatic valves, specialized vehicle bodies and tyres, etc. The main industry of Brindisi is a petro-chemical plant. At Foggia there is a textile factory.

Sicily.—The main source of income is agriculture, particularly citrus fruits, almonds and tomatoes, but this faces severe competition. Oil and oil products have recently supplanted citrus fruits as Sicily's main exports. The island is the scene of intense activity in the fields of oil, natural gas and petrochemicals. Small and medium sized industries, benefiting from the Government's incentives, are developing. Of the island's 279 factories, some 90 are in the Catania area and 60 around Palermo (metropolitan population, 657,326), the capital of the island. Tourism is bringing an increasing amount of revenue to Sicily.

Sardinia.—Sardinia is another autonomous region, with its capital at Cagliari (metropolitan

population, 225,812). Six main industrial development areas have been officially designated; they are at Cagliari, Porto Vesme, Oristano, Sassari, Oibia and Arbatax. Lead and zinc mining are important. At Porto Vesme, a large smelting plant has been constructed. In the same area, a company is investing some £60 million in an aluminium plant. There is a flourishing tourist industry.

THE ECONOMY

Italian gross domestic product in 1975 was *lire* 135,120 milliards, as compared with *lire* 119,840 milliards in 1974. The economy developed fast in the fifties and early sixties with an average real annual increase in the gross national output of about 7 per cent. But its recovery after a setback caused by labour unrest in the last quarter of 1969, has been slower than was expected. After a partial recovery came the energy crisis of 1973/74. In 1975 the balance of payments deficit was reversed and inflation halved but this was accompanied by stagnation and increasing unemployment.

Currency.—The market rate of exchange on June 16, 1976, stood at *lire* 1,517 = £1.

Industry.—The general index of industrial production (1970=100) stood at 108.1 in 1975. The State-owned sector of Italian industry is important, dominated by the holding companies IRI (mechanical, steel, airlines), ENI (petro-chemicals) and ENEL (electricity).

Mineral Production.—Italy is generally poor in mineral resources but since the war deposits of natural methane gas and smaller deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Other minerals produced in significant quantities include iron ores and pyrites, mercury (over one-quarter of the world production), lead, zinc and aluminium. Marble is a traditional product of the Massa Carrara district. Tobacco is still a Government monopoly.

Agriculture.—Agriculture accounted for 9.2 per cent. of gross domestic product in 1972, and at the end of 1974 employed about 16.5 per cent. of the working population. Some three-quarters of the 3,785,000 farms and small holdings are privately owned and operated. In the period 1964–71 Italy was a net exporter of rice, vegetables, fresh and dried fruit and wine, but the rising standard of living has increased imports of foodstuffs, particularly meat and animal food.

Tourist Traffic.—About 32,910,000 visitors entered Italy in 1974, a decline of 9 per cent. from 1973.

Communications.—The main railway system is State-run by the *Ferrovia dello Stato*. A network of motorways (*autostrade*) covers the country, built and operated mainly by the IRI State-holding company and ANAS the State highway authority. The *autostrada* network covered 5,176 kms. in 1974. *Alitalia*, the principal international and domestic airline, is also State-controlled by the IRI group. Other smaller companies, including ATI (an *Alitalia* subsidiary) and *Itavia* operate on domestic routes. The Italian mercantile marine total of 8,378,000 tons in December, 1972, compared with 3,500,000 tons before the War.

FOREIGN TRADE

Total Italian imports in 1975 were *lire* 25,092 milliards (a decrease of 5.7 per cent. over 1974). Exports were *lire* 22,752 milliards (an increase of 15.6 per cent. over 1974).

The main markets for Italian exports in 1974 were West Germany (22.9 per cent.), France (14.2 per cent.) and U.S.A. (9.8 per cent.). The U.K. accounted for 4.3 per cent. of Italian exports. The main commodities exported were: machinery, motor vehicles, iron and steel, footwear, textiles

and clothing, plastic and artificial resins and materials. The main commodities imported were petroleum products, iron and steel, meat, copper and motor vehicles. The E.E.C. provides the largest share in Italy's imports (55.7 per cent. in 1974). The U.K.'s share has decreased from 6.3 per cent. in 1963 to 3 per cent. in 1974.

Trade with U.K.

	1974	1975
Imports from U.K.	£510,100,000	£563,258,000
Exports to U.K.	£73,800,000	£809,641,000

Language and Literature.—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265–1321; Petrarch, 1304–1374; and Boccaccio, 1313–1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474–1533; Machiavelli, 1469–1527; Tasso, 1544–1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785–1873), Carducci (1835–1907) and Gabriele d'Annunzio (1864–1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1971, there were 85 daily newspapers published in Italy, of which 22 were published in Rome and 10 in Milan.

Education.—Education is free and compulsory between the ages of 6 and 14; this comprises five years at primary school and three in the “middle school”, of which there are about 8,000. Pupils who obtain the middle school certificate may seek admission to any “senior secondary school”, which is roughly equivalent to a U.K. grammar school but may be a lyceum with a classical or scientific or artistic bias, or may be an institute or school for teacher training, or may be an institute directed at technology (of which there are eight different types) or trade or industry (including vocational schools). Courses at the lyceums and technical institutes usually last for five years and success in the final examination qualifies for admission to university. There are 35 State and 14 private universities, some of ancient foundation; those at Bologna, Modena, Parma and Padua were started in the 12th century. University education is not free, but entrants with higher qualifications are charged reduced fees according to a sliding scale. In general, schools, lyceums and universities are financed by local taxation and central government grants.

CAPITAL, Rome. Metropolitan population (estimated Oct. 1971), 2,842,616.

Oct. 1971 estimates of the metropolitan population of the principal cities and towns are Milan, 1,724,819; Naples 1,258,721; Turin, 1,187,832; Genoa, 842,114; Bologna, 493,007; Florence, 460,944; Venice, 367,528; Bari, 356,250; Trieste, 277,135; Verona, 262,014; Padua, 228,854; Taranto, 223,392; Brescia, 209,659; Modena, 170,450; Reggio Calabria, 167,087; Salerno, 152,780; and Bergamo, 126,504; in Sicily; Palermo, 657,326; Catania, 414,619; Messina, 274,740; in Sardinia; Cagliari, 225,812.

ISLANDS.—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of

31 sq. miles and a population of 9,601. The Pelagian Islands (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,811. The Tuscan Archipelago (including Elba), area 293 sq. km., pop. 31,861; Pontine Archipelago (including Ponza, area 10 sq. km., pop. 2,515); Flegrean Islands (including Ischia, area 60 sq. km., pop. 51,883); Capri; Eolian Islands (including Lipari, area 116 sq. km., pop. 18,636); Tremiti Islands (area 3 sq. km., pop. 426).

FLAG.—Vertical stripes of green, white and red.

NATIONAL DAY.—June 2.

BRITISH EMBASSY

Via XX Settembre 80a, Rome.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Alan Hugh Campbell, K.C.M.G. (1976).

Ministers, A. J. Williams, C.M.G., A. A. W. Landymore, C.B.E. (FAO).

Defence and Military Attaché, Col. P. E. B. Madsen.

Naval Attaché, Capt. M. A. George, R.N.

Air Attaché, Group-Capt. R. G. Churcher, D.S.O., M.V.O., D.F.C.

Counsellors, M. R. Morland (Head of Chancery); A. F. R. Harvey, O.B.E. (Commercial); K. Kenney, O.B.E. (Labour); C. de L. Herdon, O.B.E.

1st Secretaries, A. M. Layden; M. Pellen (Information); N. H. Young (Administration); E. F. Macleod; J. H. Bailey (Consul); A. A. C. Nash, M.B.E. (Commercial); P. M. Scoia (Agriculture); R. A. Fulton.

2nd Secretaries, J. Smith; C. P. P. Baldwin.

Asst. Defence Attaché, Maj. N. Boggis-Rolfe.

3rd Secretaries, H. R. Mortimer; J. M. G. Freeman.

Chaplain, Rev. D. Murfet.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Milan, Rome, Naples, Genoa, Florence, Palermo, Turin, Venice, Trieste, Messina and Cagliari and a trade representative at Bari.

British Council Representative, R. E. Cavaliere, Palazzo del Drago, Via delle Quattro Fontane 20, 00184, Rome.

There are British Council Institutes at Milan and Naples, each with a library.

IVORY COAST

(République de Côte d'Ivoire)

President, Félix Houphouët-Boigny, elected for five years in 1960; re-elected 1965, 1970 and 1975.

President of National Assembly, Philippe Yacé.

President of Economic and Social Council, Mamadou Coulibaly.

President of Supreme Court, Alphonse Boni.

Ministers of State, Auguste Denise; Mathieu Ekra; Jean-Baptiste Mockey; Loua Diomandé; Nanlo Bamba.

Minister for Foreign Affairs, Arsène Assouan Usher.

IVORY COAST EMBASSY IN LONDON

2 Upper Belgrave Street, S.W.1

[01-235 6991]

Ambassador Extraordinary and Plenipotentiary, His Excellency Louis-Antoine Aduko (1973).

1st Counsellor, M. Patrice K. Anoh.

Counsellors, M. J. M. Kacou Gervais (Head of Commercial Section); M. Benjamin Amuah.

2nd Secretary, M. Raymond T. Dieckert.

3rd Secretary, M. Kouakou G. Loukou.

Financial Attaché, M. Gérard Blatchon.

The Ivory Coast is situated on the Gulf of Guinea between 5° and 10° N. and 3° and 8° W. and is flanked on the West by Guinea and Liberia, on

the North by Mali and Upper Volta and on the East by Ghana. It has an area of about 127,000 square miles—tropical rain forest in the southern half and savannah in the northern—and a population of 5,400,000 (1972 estimate) divided into a large number of ethnic and tribal groups.

Although official French contact was made in the first half of the 19th century, the Ivory Coast became a Colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The Ivory Coast was a founder member of the *Conseil de l'Entente*, established on May 29, 1959, as a loose union embracing also, without abrogation of sovereignty, Dahomey, Niger and Upper Volta. Togo also adhered in June, 1966. The Ivory Coast is also an Associated State of E.E.C. and a member of the *Organisation Commune Africaine et Malgache* (O.C.A.M.), the Organization of African Unity (O.A.U.) and the *Communauté Economique de l'Afrique de l'Ouest* (C.E.A.O.). The official language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 120 members was elected in 1975 for five years. The defence of the Constitution which was promulgated on Nov. 3, 1960, is vested in a Supreme Court.

Finance.—The unit of currency of the Ivory Coast is the *Franc CFA* (*Francs CFA* 50=1 French franc). In 1975, the Ivory Coast Budget totalled *Francs CFA* 180,841,000,000.

Trade.—The principal exports are coffee, cocoa, timber and bananas all of which are exported to the U.K. Diamonds are exported. There are a few deposits of minerals including manganese and iron. Trade in 1975 was valued at: Imports, *Francs CFA* 241,393,158,663; Exports, *Francs CFA* 254,571,664,570.

Trade with U.K.

	1974	1975
Imports from U.K. . . .	£6,528,000	£12,288,000
Exports to U.K.	19,928,000	18,836,000

CAPITAL, Ψ Abidjan (population, 900,000) which is also the main port.

FLAG.—3 vertical stripes, orange, white and green.

NATIONAL DAY.—December 7.

BRITISH EMBASSY

Immeuble Shell, Abidjan, B.P. 2581.

Ambassador Extraordinary and Plenipotentiary, His Excellency Joe Booth Wright (1975).

(also Ambassador to Niger and Upper Volta).

1st Secretary, F. M. A. Cargill (Commercial).

2nd Secretary, P. J. Wilson.

3rd Secretary, G. B. Anderson (Admin. and Vice-Consul).

JAPAN

(Nihon Koku—Land of the Rising Sun)

Emperor of Japan, His Majesty Hirohito, born April 29, 1901; succeeded Dec. 25, 1926; married (1924) Princess Nagako (born March 6, 1903), daughter of the late Prince Kuniyoshi Kuni, and has issue two sons and four daughters.

Heir-Apparent, His Imperial Highness Prince Akihito, Crown Prince, born Dec. 23, 1933; married April 10, 1959, Miss Michiko Shoda and has issue Prince Naruhito Hironomiya, born Feb. 23, 1960, Prince Fumihito, born Nov. 30, 1965 and Princess Sayako, born April 18, 1969.

CABINET

Prime Minister, Takeo Miki.

Deputy Prime Minister (and Director-General, Economic Planning Agency), Takeo Fukuda.

Justice, Osamu Inaba.

Foreign Affairs, Zentaro Kosaka.

Finance, Masayoshi Ohira.

Education, Michio Nagai.

Health and Welfare, Masami Tanaka.

Agriculture, Shintaro Abe.

International Trade and Industry, Toshio Komoto.

Transport, Mutsuo Kimura.

Posts and Telecommunications, Isamu Murakami.

Labour, Takashi Hasegawa.

Construction, Noburu Takeshita.

Home Affairs, Hakime Fukuda.

Ministers of State, Ichitaro Ide (Chief Cabinet Secretary); Mitsunori Ueki (Prime Minister's Office, and Director-General, Okinawa Development Agency); Yuzo Matsuzawa (Director General, Administrative Management Agency); Michita Sakata (Director-General, Defence Agency); Yoshitake Sasaki (Director-General, Science and Technology Agency; Chairman, Atomic Energy Commission); Tatsuo Ozawa (Director-General, Environment Agency); Shin Kanemaru (Director-General, Land Development Agency).

JAPANESE EMBASSY AND CONSULATE

43-46 Grosvenor Street, W.1

Ryusuke Sakai; Yasuhide Hayashi; Masaharu

Wakasa (Scientific); Katsuhisa Uchida; Yasuyuki

Shimizu; Akihiko Hayashi (Commercial); Hiro-

yuki Ieda; Michio Hamano.

Area and Population.—Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 128° 6' East and 145° 49' East and between latitude 26° 59' and 45° 31' N., with a total area of 142,812 square miles and a population (1974) of 110,050,000.

Japan Proper consists of Honshū (or Mainland), 230,448 sq. k. (88,839 sq. m.), Shikoku, 18,757 sq. k. (7,231 sq. m.), Kyūshū, 42,079 sq. k. (16,170 sq. m.), Hokkaido, 78,508 sq. k. (30,265 sq. m.). Formosa and the Kwangtung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the Allied Nations (Aug. 14, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

British participation in the occupation of Japan was virtually over by May, 1950. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces, from the United Kingdom, Australia, New

Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure. On July 1, 1956, the base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of 1957.

Under the terms of the Japan-U.S.A. Security Treaty of Sept. 8, 1951, United States forces remained to assist in the defence of Japan. However, as Japan's own Self Defence Forces have been built up, U.S. ground troops have been withdrawn. A revised version of the security treaty, which went into effect on June 23, 1960, was the subject of considerable controversy in the summer of that year.

Vital Statistics.—The birth rate in 1973 was 19.4 per 1,000 (1947, 34 per 1,000; 1967, 19.7 per 1,000). It has been stated that a considerable part in reducing the birth rate to its present level was played by drastic methods, induced abortion and sterilization, the legal grounds for which had been extended by the Eugenics Law, 1948, to include economic and social hardships. The improving standard of living has also played an important part in keeping the birthrate down.

The death rate in 1973 was 6.6 per 1,000, compared with 17 per 1,000 in pre-war years, natural increase of the population being 1,382,500 in 1973.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical in the south to cool temperate in the north. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing

offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the First Emperor of Japan, ascended the throne on Feb. 11, 660 B.C. Under the constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "*Meiji Constitution*" of 1889, and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

A General Election was held in December 1972, in which the Liberal Democratic Party was once more returned to power. The strength of the parties in the House of Representatives on May 23, 1976, was: Liberal Democratic Party, 274; Japan Socialist Party, 114; Japan Communist Party, 39; Komeito, 30; Democratic Socialist Party, 19; Independent, 11.

A regular election for the House of Councillors was held in 1974. The Liberal Democratic Party maintained their overall majority in the Upper House. The state of the parties there is now: Liberal Democratic Party, 129; Japan Socialist Party, 62; Komeito, 24; Japan Communist Party, 20; Democratic Socialist Party, 10; Niin Club, 5; Independent, 3.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. The forest land includes *Cryptomeria japonica*, *Pinus massoniana*, *Zeikowaskeaki*, and *Pawlonia imperialis*, in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. The tobacco plant, tea shrub, potato, rice, wheat and other cereals are all cultivated: rice is the staple food of the people, about 13,165,000 metric tons being produced in 1975. The floral kingdom is rich, beautiful and varied. Fruit is abundant, including the mandarin, persimmon, loquat and peach; European fruits such as apples, strawberries, pears, grapes and figs are also produced.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1975 (average) was 52,770,000, of which 990,000 were unemployed. Of the total labour force, some 45,630,000 were engaged in non-agricultural industries, 6,150,000 in agriculture, forestry and fisheries.

Communications.—There were 26,852 kilometres of Government and private railroad (steam and electric) in March, 1976. The merchant fleet (ocean-going ships over 3,000 tons gross) consisted of

1,167 vessels totalling 33,006,116 tons gross in July, 1975.

Armed Forces.—After the unconditional surrender of August, 1945, the Imperial Army and Navy were disarmed and disbanded and all aircraft confiscated by the occupying forces.

Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being in August, 1950, and a Maritime Safety Force was established in April, 1952. In August, 1952, these Forces were renamed the National Safety Force and the Coastal Safety Force and were placed under a National Safety Agency. In July, 1954, the Agency was renamed the Defence Agency, the Forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force, was created. At the same time the mission of the forces was extended to include the defence of Japan against direct and indirect aggression.

A Treaty of Mutual Co-operation and Security between Japan and the U.S.A. was signed in January, 1960, replacing an earlier Security Treaty signed in 1951 at the same time as the Peace Treaty. By this Treaty each country recognised that an armed attack against either in the territories under the administration of Japan would be dangerous to its own safety and declared that it would act to counter the danger.

The defence budget allocated for the fiscal year 1976/77 amounted to Yen 1,512 billion, equivalent to 0.90 per cent. of Japan's Gross National Product, or 6.22 per cent. of the total budget. The authorised uniformed strength was: Ground Self-Defence Force (GSDF) 180,000 (Reserve 36,000); Maritime Self-Defence Force (MSDF) 41,388 (Reserve 300); Air Self-Defence Force (ASDF) 44,575 (Reserve 490).

In 1976 the GSDF was organised into five Armies of thirteen Divisions. In addition, in the Northern Army there were one Artillery Brigade, one Anti-Aircraft Artillery Brigade and one Tank Brigade; the Eastern Army had one Airborne Brigade and all five Armies had one Engineer Brigade. Under the Ground Staff Office there were one Helicopter Brigade and one Signal Brigade. Seven divisions had an authorised strength of almost 9,000 (four combat groups) and the remainder of about 7,000 (three combat groups). Major equipment included 700 tanks, 700 APCs, 1,427 artillery pieces, 50 missiles, 140 Hawks, and 410 aircraft. Equipment is now largely manufactured in Japan.

The MSDF has 161 warships totalling 159,775 tons and including two DDH, two TARTAR-equipped GMDs, 41 escort ships, 16 submarines and 96 others. The MSDF has a total of 286 aircraft (75 helicopters, 30 S2F-1, 30 P2V-7, 46 P2J-1, 14 PS1 A/S flying boats and 91 others).

The ASDF has about 940 aircraft (160 F104J, 185 F86F (with 70 in reserve), 63 F4EJ, 14 RF4E; 284 trainers T34, Fuji T-1, MHIT-2, T-33, F104DH; 24 transports and about 100 search and rescue and communications). The principal fighter is the F104J augmented by the F4EJ. Domestically designed and built supersonic T2 trainers and Cx cargo planes have entered service. There are about 5 Nike surface to air missile units.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 1 Cardinal, 1 archbishop and 14 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 11 Japanese bishops (1968) and is an autonomous branch of the Anglican communion. There is also a United Protestant Church.

Education.—Under the Education Law of 1948 education at elementary (6 year course) and lower secondary (3 year course) is free, compulsory and co-educational. They have courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. 32.2 per cent. of upper secondary school leavers went on to higher education in 1973. There are 2 or 3 year junior colleges and 4 year universities. Some of the 4 year universities have graduate schools. In May 1973 there were 905 universities and junior colleges, 101 state maintained, 78 local authority maintained and 726 privately maintained. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaido (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when Chinese characters came into use. Japanese who have received school education (99.8 per cent. of the population) can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is taught in all middle and high schools. By 1973, the number of public libraries was 915, with 33,587,084 volumes. In addition there are 1,059 university libraries with 66,485,099 volumes. There are 123 daily newspapers in Japan. Japan's total newspaper circulation was estimated at 39,847,332 copies and 1.25 per household at the end of 1973. The National Diet Library contained in 1973 2,866,956 books; 135,602 atlases; 140,098 public records; 47,382 items of microfilm; and 26,695 periodicals.

FINANCE

The Budget for the financial year 1976-77, ending on March 31, was initially estimated at Yen 24,296,011,447,000 for revenue and expenditure on the general account, an increase of 14.1 per cent. over the preceding financial year, before the Supplementary Budget and 16.6 per cent. after the Supplementary Budget.

The market rate of exchange with Sterling in June 1976, was Yen 532 = £1. (see also p. 83).

PRODUCTION AND TRADE

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports in 1975 consisted of mineral oils (33.9 per cent.), raw materials (20.1 per cent.) e.g. metal ores, 7.6 per cent., timber, 4.5 per cent.; raw cotton, 1.5 per cent.; and soya beans, (1.6 per cent.), foodstuffs (15.3 per cent.) (e.g. wheat and sugar) machinery (7.4 per cent.), chemicals (3.6 per cent.) and textiles (2.3 per cent.). Principal exports consist of steel (18.2 per cent.), ships (10.8 per cent.), automobiles (11.1 per cent.), electric machinery and appliances (11.0 per cent.), non-electric machinery (12.1 per cent.), chemicals (7.0 per cent.) and textile goods (6.7 per cent.).

FOREIGN TRADE

	1974 (\$1,000)	1975 (\$1,000)
Total imports.....	62,110,456	57,863,088
Total exports.....	55,535,755	55,752,805

TRADE WITH U.K.

	1974	1975
Imports from U.K....	£319,047,000	£308,470,000
Exports to U.K.....	570,009,000	671,745,000

CAPITAL.—TOKYO. Population (estimated Oct. 1, 1975), 11,671,138. The other chief cities had the following populations at the beginning of 1971: Ψ Osaka (2,778,973); Ψ Nagoya (2,079,676); Ψ Yokohama (2,621,704); Kyoto, the ancient capital (1,461,053); Ψ Kobe (1,360,601); Kita-Kyushu (1,058,067); Ψ Sapporo (1,240,617); Ψ Kawasaki (1,014,909); Ψ Fukuoka (1,002,221).

FLAG.—White, charged with sun (red).

NATIONAL DAY.—April 29 (Birthday of the Emperor).

Yokohama, by sea via Cape Town, 14,653 miles (50 days); via Panama, 12,544 miles (35 days); Tokyo, by air (B.O.A.C., polar route), 8,382 miles distant from London: transit, 17 hrs.; (B.O.A.C. trans-Siberia route (13 hrs.).

BRITISH EMBASSY

(No. 1 Ichiban-cho, Chiyoda-ku, Tokyo)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Michael Wilford, K.C.M.G. (1975).
Minister (Commercial and Economic), C. S. R. Giffard, C.M.G.

Counsellors, R. A. H. Duke, C.V.O., C.B.E. (Cultural); H. A. J. Prentice (Scientific); N. C. R. Williams (Economic); B. Thorne, M.B.E. (Commercial); J. N. T. Spreckley (Head of Chancery); W. K. Slatcher, C.V.O. (Information).

1st Secretaries, R. A. Kidd; A. J.-J. Dunn (Cultural); M. S. Baker-Bates (Commercial); C. A. Axworthy (Administration); J. G. Dearlove; P. M. Newton (Economic); Dr. P. E. Roe (Scientific); A. C. Thorpe (Economic); P. B. Preece; J. W. MacDonald (Commercial); R. S. Howe, M.B.E. (Commercial); R. Irving, M.B.E. (and Consul General).

2nd Secretaries, T. Havey (Administration); D. F. Bleakley (Vice-Consul); G. Julian (Commercial); J. A. Townner; G. H. Fry (Commercial); S. J. Gomersall; D. F. Parsons (Commercial); S. D. M. Jack; J. McLaren.

Defence and Military Attaché, Col. D. F. Ryan, O.B.E. Naval Attaché, Captain C. McK. Little, A.F.C., R.N. Air Attaché, Group Captain R. H. B. Dixon.

Financial Attaché, J. E. W. Kirby.

Assistant Defence Attaché, Lt.-Col. D. O. Caton.

There is a British Consulate-General at Osaka and an Honorary Consulate at Kita Kyushu.

JORDAN

(The Hashemite Kingdom of The Jordan)
King of the Jordan, Hussein, G.C.V.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age.

Crown Prince, Prince Hassan, third son of King Talal of Jordan, born 1948, appointed Crown Prince, April 1, 1965.

CABINET

(Feb. 8, 1976)

Prime Minister, Foreign Affairs and Defence, Zaid al Rifai.

Construction and Development, Dr. Subhi Amin Amer.

Culture and Information, Salah Abu Zaid.

Education, Thouqan al Hindawi.

Finance, Saïim Massadeh.

Tourism and Antiquities, Ghalib Barakat.

Public Works, Ahmed al Shawbaki.

Agriculture, Marwan al Humoud.

Islamic Affairs, Sheikh Abed al Aziz Khayat.

Transport, Mahmoud Hawamdeh.

Interior, Tharwat al Telhouini.

Justice, Naji al Tarawneh.

Health, Dr. Trad Saud al Qadi.

Communications, Dr. Mohammed Addoub al Zabin.

Trade and Industry, Dr. Rajal al Muashir.

Supplies, Salah Juma'ah.

Labour, Isam Ajlouni.

Municipal Affairs, Isma'el Armouti.

Ministers of State, Rakan Inad al Jazi (*Cabinet Affairs*); Hassen Ibraheem (*Foreign Affairs*).

JORDANIAN EMBASSY AND CONSULATE

6 Upper Phillimore Gardens, W.8

[01-937 3685]

Ambassador Extraordinary and Plenipotentiary, His

Excellency, Ma'an Abu Nowar.

Minister Plenipotentiary, Hani B. Tabbara.

Counsellor, Hassan Abu Nimah.

Counsellor, Miss Zein Samir Rifai (*Press*).

Military, Naval and Air Attaché, Brig. Rlad Kat Khuda.

Service Office: 16 Upper Phillimore Gardens, W.8. (01-937-9611).

Area and Population.—The Kingdom, which covers 37,700 sq. miles, is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. Since the hostilities of June, 1967, that part of the country lying to the west of the Jordan River has been under Israeli occupation. The majority of the population are Sunni Moslems and Islam is the religion of the State. Total population (1974) is 2,660,000, of whom 1,890,000 live in East Jordan and the remainder on the West Bank and in East Jerusalem. (For MAP, see p. 882).

History and Government.—After the defeat of Turkey in the First World War the Amirate of Transjordan was established in the area east of the River Jordan as a state under British mandate. The mandate was terminated after the Second World War and the Amirate, still ruled by its founder, the Amir Abdullah, became the Hashemite Kingdom of Jordan. Following the 1948 war between Israel and the Arab States, that part of Palestine remaining in Arab hands (but excluding Gaza) was incorporated into the Hashemite Kingdom. King Abdullah was assassinated in 1951; his son Talal ruled briefly but abdicated in favour of the present King, Hussein, in 1952. All of Jordan west of the River has been under Israeli occupation since 1967. As a result of the wars of 1948 and 1967 there are about 750,000 refugees and displaced persons living in East Jordan, about 200,000 of whom live in refugee and displaced persons camps established by the U.N. Relief and Works Agency (UNRWA). In addition there are some 300,000 entirely self-supporting Palestinian members of the East Jordanian community. It was largely among the refugee population that the Palestinian *fedayeen* (commando) movement which had come into existence some years earlier grew considerably in strength during 1969 and 1970. The *fedayeen* organizations conducted a number of operations against Israel but during 1970 came more and more into conflict with the Jordanian Government. After the civil war between the Jordan Army and the *fedayeen* the Jordan Government re-established its authority. The *fedayeen* were finally expelled from Jordan in the summer of 1971. In March 1972 King Hussein put forward a plan for the "United Arab Kingdom" which was to be implemented after liberation of the West Bank. The plan provides for the creation of a federal State, composed of two autonomous regions, Palestine and East Jordan. During the war of October 1973 between the Arab countries and Israel, Jordan sent two armoured brigades into Syria to support the Syrian campaign on the Golan Heights.

The present constitution of the Kingdom came into force in 1952. It provides for a senate of 30 members (all appointed by the King) and an elected

House of Representatives of 60 persons. The King himself appoints the members of the Council of Ministers. Crown Prince Hassan normally acts as Regent when King Hussein is away from Jordan.

Production and Industry.—West Jordan is fertile, though many areas have suffered from soil erosion. In East Jordan the main agricultural areas are the east part of the Jordan Valley, the hills overlooking the Valley and the flatter country to the south of Amman and around Madaba and Irbid. The rest of the country is desert and semi-desert. The principal crops are wheat, barley, vegetables, olives and fruit (mainly grapes and citrus fruits). Agricultural production in the Jordan Valley has suffered from the continued hostilities in the area, though the East Ghor Canal, vital to the irrigation of the area, has now been restored and is being extended. The only important industrial product is raw phosphates (production 1974: 1,674,800 tons), most of which is exported. There are schemes under consideration for the production of copper, potash and phosphate fertilizers. Tourism was a major industry and foreign currency earner before the 1967 war but dwindled considerably as most of the tourist sites are now in Israeli occupied territory. In recent years it has begun to increase once more, with numbers of tourists visiting the archaeological sites of East Jordan and the resort of Aqaba. The Trans-Arabian oil pipeline (Tapline) runs through North Jordan on its way from the eastern province of Saudi Arabia to the Lebanese coast of Sidon. A branch pipeline feeds a refinery at Zerqa (production 1974: 748,400 tons) which meets most of Jordan's requirements for refined petroleum products.

Communications.—The trunk road system is good. Amman is linked to Damascus, Baghdad and Jeddah by tarred roads which are of considerable importance in the overland trade of the Middle East. The former Hejaz Railway enters Jordan east of Ramtha and runs through Zerqa and Amman to Ma'an with a spur to the top of the Raz al-Naqb escarpment. The formerly abandoned section from Ma'an to Medina in Saudi Arabia has been partially reconstructed. A total of 299 vessels called at Aqaba in 1974 and 1,483,300 tons of cargo were handled. Much of Jordan's trade moves overland to and from the ports in Syria and Lebanon. The Royal Jordanian Airline (ALIA) operates from Amman Airport to other cities in the Middle East and to Rome, London, Paris, Frankfurt, Athens, Istanbul and Madrid. There is a service to the newly constructed airport at Aqaba.

BRITISH COUNCIL

Representative, J. G. Mills, Box 634, Jebel Amman, Amman.

KOREA

Korea is situated between $124^{\circ} 11'$ and $130^{\circ} 57'$ E. long., and between $33^{\circ} 7'$ and $43^{\circ} 1'$ N. lat. It has an area of 85,256 sq. miles with an estimated population of about 48,000,000, of whom about 33,500,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart).

Agriculture.—The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and sericulture are also practised. Gingseng, a medicinal root much affected by the Chinese, forms a rich source of revenue.

Minerals.—Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north.

In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Since 1966, however, rapid industrialization has taken place in the south.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean

armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korean forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Inchon which was quickly followed by a breakthrough from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not signed by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 15, 1954, but failed to agree on measures for reunifying the country.

Republic of Korea

President, Park, Chung Hee, assumed office, March 22 1962; re-elected for four years 1963, 1967 and 1971; and for six years in 1972.

Prime Minister, Choi Kyu Hah (1975).

KOREAN EMBASSY

4 Palace Gate, W.8.

[01-581 0247]

Ambassador Extraordinary and Plenipotentiary, His Excellency Yong Shik Kim (1974).

Ministers, Jong Ick Choi; Dong Kun Kim.

Counsellors, In Hwan Choi; Jai Sung Kim; Chu Won Yoon.

Defence Attaché, Col. Dong Yull Seo.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 38,452 sq. miles and a population of 33,459,000.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected the late Dr. Syngman Rhee as the first President of the Republic of Korea, an office which he held until 1960. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end.

President Syngman Rhee was overthrown by a widespread popular rising in 1960. After a year of unstable and ineffectual governments a new régime was set up by an army officers' coup on May 16, 1961 led by Major-Gen. Park Chung Hee. On March 22, 1962, he took over as acting President, retaining his post as Chairman of the Supreme Council. Elections were originally promised for May and August, 1963, respectively, but when political

activities were allowed to start again at the beginning of that year there was considerable confusion, so that the military government decided to retain power until December, 1963. Elections were then held in which General Park was elected and the Democratic Republican Party secured a majority. At further elections held in 1967, Pres. Park was returned by a comfortable majority for a new four-year term. In 1969 a constitutional amendment was passed to enable Pres. Park to stand for a third term and he was re-elected on April 27, 1971.

In 1972 a new constitution was inaugurated under which there was no limit to the number of terms which the President could serve. President Park was then elected in December 1972 to a six-year term.

The Republic of Korea has an army of about 550,000 men, a small navy mainly for coast protection duties, a small air force and a Marine Corps which includes one division trained in amphibious operations.

Finance.—The Budget for 1976 totalled *Won* 2,036 billion, of which 35 per cent. was for defence.

The unit of Korean currency is the *Won*. In 1976 the rate of exchange was about 854 *Won* to £1.

Trade.—The Republic of Korea's main exports are textiles, plywood and wood products, fish and fish preparations, electrical and electronic equipment, chemicals, footwear, rubber, petroleum products, cement, ships, musical instruments, toys, sports goods, iron and steel products and metalliferous ores and scrap. Her main customers are Japan and the U.S.A. Imports greatly exceed exports. In 1975 exports totalled \$U.S. 5,081,016,000; imports amounted to \$U.S. 7,274,434,000.

Trade with U.K.

	1974	1975
Imports from U.K....	£36,045,000	£52,577,000
Exports to U.K.....	50,985,000	74,543,000

CAPITAL.—Seoul, population (1973), 6,289,556. Other main centres are ΨPusan (pop. 2,015,162), Taegu (pop. 1,082,750) and ΨInchon (pop. 646,013). Pusan on the south-east coast, and Inchon on the

west coast, only 28 miles from Seoul, are the main ports but the development of Inchon is hampered by a tide variation of 28–30 feet.

FLAG.—White, with red over blue device in centre, three black parallel bars, some broken, in each quarter.

NATIONAL DAY.—August 15 (Independence Day).

BRITISH EMBASSY Seoul

Ambassador Extraordinary and Plenipotentiary, His Excellency William Stanley Bates, C.M.G. (1975). *Counsellor*, R. G. Tallboys, O.B.E. (Commercial). *1st Secretaries*, I. C. Secretariat of the Central Committee, Kim Il Song (*Secretary-General*); Choe Yong Ko; Kim Il; Kim Yong Chu; O Chin U; Kim Tong Kyu; Kim Chung Im; Han Ik Su; Hyon Mu Kwang; Yang Hyong Sop; Yon Hyong Muk; Kim Yong Nam; Yu Chang Sik.

FLAG.—Broad red horizontal band bordered by white lines bearing a five-point red star on a white disc in centre; blue horizontal bands at top and bottom.

KUWAIT

(The State of Kuwait)

Amir, H.H. Shaikh Sabah as-Salem as-Sabah, *born* 1915; *acceded* Nov. 24, 1965.

Crown Prince and Prime Minister (Dec. 1965), H.H. Shaikh Jabir al-Ahmed-as-Sabah; *appointed Crown Prince*, May 31, 1966.

KUWAIT EMBASSY IN LONDON 40 Devonshire Street, W.1 [01-580 8471]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sheikh Saud Nasir Al-Sabah (1975).

Area and Population.—Kuwait extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 7,500 square miles and a population (Census, 1975) of 990,000. It is officially estimated that about 47 per cent. of this total are Kuwaitis, the remainder being large numbers of other Arab peoples, Persians, Indians and Pakistanis. The total European and American population is about 7,000. Kuwait has a hot, dry climate with a summer season extending from April to September. During the coldest month

(January) the temperatures can fall below freezing, but normally range between 50° to 60°F. Shade temperatures are about 85°F; and can reach 130°F; 180°F has been recorded in the sun. Humidity rarely exceeds 60 per cent. except in July and August.

Government.—Although Kuwait had been independent for some years, the "exclusive agreement" of 1899 between the Shaikh of Kuwait and the British Government was formally abrogated by an exchange of letters dated June 19, 1961. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait and, in accordance with the terms of the exchange, the Amir requested British military assistance to help him maintain his sovereignty and independence, which was immediately supplied. British troops were withdrawn in October, 1961, and replaced by the Arab League Security Force composed of contingents from various Arab States. The withdrawal of this Force was completed in January, 1963. On May 7, 1963, Kuwait was admitted to the United Nations and on Oct. 4, 1963, Iraq recognized Kuwait's independence. On May 13, 1968, an exchange of Notes was signed giving notice that the 1961 defence agreement with the United Kingdom would end on May 13, 1971.

Elections were held in December, 1961, for a Constituent Assembly, which held its first meeting in January, 1962. A council of Ministers including non-members of the ruling family was formed in January, 1962, to replace the former Supreme and Joint Councils. Under the Constitution drafted by the Constituent Assembly, the first 50-member National Assembly was elected in January, 1963. The present National Assembly was elected for four years in January, 1975. The Constitution provides that the Assembly must pass all laws and approve the Heir Apparent nominated by the Amir. The Prime Minister is appointed by the Amir and can appoint his Ministers from the members of the Assembly or from outside. The Assembly has the right to pass a vote of no confidence in any Minister except the Prime Minister.

Education, etc.—As a result of the very considerable oil revenues, the Kuwait Government embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. Kuwait University was opened in 1966. In 1974, 488 students graduated out of a total 2,600. In 1975 there were over 182,778 pupils at 285 government schools.

Public Utilities.—Kuwait has a domestic water supply from water distillation plants which operate on waste natural gas from the oil fields. These plants can produce over 40,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. There are also two 7,500,000 gallon reservoirs at Shuaiba and two of similar capacity at Abraq Kheitan.

In 1961 a natural source of fresh water was discovered at Raudhatain in the north of the State. This has been developed to produce 5,000,000 gallons per day for at least 20 years and a pipeline has been built to carry the water to Kuwait town. Kuwait signed an agreement with Iraq on Feb. 11, 1964, allowing her to draw up to 120,000,000 gallons of sweet water a day from the Shatt-al-Arab, but this has yet to be implemented. Electricity is produced by three power stations in Kuwait (160 MWh) and two at Shuaiba (400 MWh). Tawal town is served by a network of dual carriageway roads and more are under construction.

Communications.—Ships of British, Dutch, Kuwaiti and other lines make regular calls at Kuwait.

British Airways, Kuwait Airways, K.L.M., Luft-hansa and several international and Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications, telephone and postal services are conducted by the Kuwait Government, which has built an earth satellite station.

Finance.—Banking is carried out by the National Bank of Kuwait, the Commercial Bank, the Gulf Bank, the Ahli Bank, and by the Bank of Kuwait and the Middle East. The banking system is controlled by the Central Bank of Kuwait.

Revenue for the financial year 1975-76 was budgeted at KD1,736,166,000. Estimated total expenditure for 1975-76 was KD826,000,000 including KD45,111,000 on health, KD65,750,000 on defence, KD86,740,000 on education, and KD 50,756,000 on public works.

Production and Trade.—Until 1974, the Kuwait Oil Company was wholly owned by the British Petroleum Company and the American Gulf Oil Corporation. The Government of Kuwait then began to participate by stages in the ownership of the Company and an agreement was signed in November 1975 which brought 100 per cent. government ownership.

The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait City. Oil is exported through a specially constructed port at Mina al Ahmadi, which is about five miles from the Company's administrative and residential centre at Ahmadi. Production of crude oil in 1975 was approximately 103 million metric tons. The Company employs about 3,000 people, including Kuwaitis, British, Americans, Indians, Pakistanis and citizens of other Arab Countries.

Oil is also lifted in the Kuwait/Saudi Arabia Partitioned Zone, south of the State. Concessions for this area are held by the American Independent Oil Company (AMINOIL) from Kuwait and the Getty Oil Company from Saudi Arabia. AMINOIL's production in 1975 (i.e. Kuwait's share) was approximately 4 million metric tons.

The Arabian Oil Company of Japan, having been awarded in 1958 the oil concession for the Partitioned Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 1960. The first shipment of crude oil was made in March 1961; production in 1972 was approximately 8.5 million metric tons. A concession covering the offshore area of Kuwait proper was awarded to the Shell Company in November 1960, and the concession agreement in the name of the Kuwait Shell Petroleum Development Company was signed in Kuwait on January 15, 1961. Exploratory drilling began in 1962 but was suspended in the autumn of 1963. The establishment of the Kuwait National Petroleum Company was authorised by an Amiri Decree on October 5, 1960. This company took over the distribution of petroleum products in Kuwait from the Kuwait Oil Company on June 1, 1961, and was, in partnership with the Spanish Company Hispanoil, awarded the concession to exploit an area relinquished by the KOC Ltd in 1962.

In addition to petroleum products, wooden prefabricated office accommodation, skins and wool are also exported. Trade in 1974 amounted to: Imports, KD331,300,000; Exports (including re-exports), KD79,100,000, excluding oil.

Trade with U.K.

	1974	1975
Imports from U.K....	£59,800,000	£99,200,000
Exports to U.K.....	600,000,000	419,300,000

CAPITAL.— Ψ Kuwait (population, excluding suburbs, 400,000).

FLAG.—Three horizontal stripes of green, white and red, with black trapezoid next to staff.

NATIONAL DAY.—February 25.

LAOS

(People's Democratic Republic of Laos)

President, Souphanouvong, *assumed office*, Dec. 2, 1975.

Prime Minister, Kaysone Phomvihane.

EMBASSY IN LONDON

5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary, His Excellency Plathana Chounlamany (1976).

Position and Extent.—The People's Democratic Republic of Laos is in the northerly part of Indo-China, lying between China and Viet-nam, on the north and east, and Burma and Thailand on the west. Laos has a common boundary with Cambodia to the south. The area of the country is approximately 90,000 sq. miles, with a population (estimated, 1976) of about 3,000,000.

History.—The Kingdom of Lane Xang, the Land of a Million Elephants, was founded in the 14th century, but broke up at the beginning of the 15th century into the separate kingdoms of Luang Prabang and Vientiane and the Principality of Champassac, which together came under French protection in 1893. In 1945 the Japanese executed a *coup de force* and suppressed the French administration. Under a Constitution of 1947 Laos became a constitutional monarchy under King Sisvang Vong of the House of Luang Prabang, and an independent sovereign state in 1949.

The next twenty-five years in Laos were marked by power struggles and civil war. International conferences were held in Geneva in 1954 and 1961–2 to produce a settlement based on neutrality and independence. But the resulting Coalition Governments were short-lived. Personalities involved include the present adviser to the Government, Prince Souvanna Phouma, who in 1957 formed a Government of National Union, including *Pathet Lao* (Communist) ministers, and held office as Prime Minister with intervals from 1962 to 1975; Prince Boun Oum of Champassac who formed a rightist Government in December 1960, fled Laos in 1975 and was consequently condemned to death, and Prince Souphanouvong, who took part in a later coalition with Souvanna Phouma and Boun Oum in 1962–63. Attempts to seize power by Capt. Kong Le (1960), Gen. Phoumi Nosavan (1965) and Gen. Thoa Ma (1966 and 1973) were unsuccessful.

Recent Events.—After 1967 North Vietnamese forces steadily increased their military activities in Laos. Although there were regular seasonal fluctuations in the fighting, which resulted in many areas of the country changing hands several times, Government forces gradually lost ground. By

February 21, 1973, when a ceasefire agreement was signed in Vientiane between the *Pathet Lao* and the Government in Vientiane, Communist forces had occupied or dominated most of the strategic areas of Laos, including the Plain of Jars in the north, and the Bolovens Plateau in the south. The 1973 Vientiane Agreement and its Protocol of September 1973, provided for a cease-fire; a timetable for the withdrawal of foreign forces; a halt to U.S. bombing and the "neutralization" of Vientiane and of the Royal capital, Luang Prabang. The agreement also made provisions for a Provisional Government of National Union and for a Political Consultative Council (eventually formed on April 5, 1974) with equal representation from the *Pathet Lao* (now known as the Lao Patriotic forces) and the Vientiane Government, which would hold office until new elections could be held. After the fall of Saigon in April 1975, internal resistance to the *Pathet Lao* crumbled; Communist troops occupied the whole country and, though still paying lip-service to the 1973 Agreement and maintaining a façade of coalition, the *Pathet Lao* took over the government and began to implement an authoritarian régime with policies of austerity and economic self-sufficiency. On December 2, 1975, following the abdication of the King, Laos was declared a People's Democratic Republic and the *Pathet Lao* assumed full charge of the country.

Finance.—Budget estimates for the fiscal year 1976/77 are not available. The unit of currency is the Kip (K). In July 1976 the official exchange rate was 60 Kip to US\$.

CAPITAL.—Vientiane population (estimated 1973) 174,000.

FLAG.—Blue background with a central white circle, framed by 2 horizontal red stripes.

NATIONAL DAY.—December 2.

Attaché (Tourism), Mounir El-Sheikh.

Military Attaché, Col. Fouad El-Houssami.

Consular Section, 15 Palace Gardens Mews, W.8 (01-229 8485).

Area and Population.—Lebanon forms a strip about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Israel frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses. The total area of Lebanon is about 4,300 sq. miles, population (U.N. estimate, 1969), 2,645,000. (For MAP, see p. 882.)

Government.—Lebanon became an independent State on Sept. 1, 1920, administered under French Mandate until Nov. 26, 1941. Powers were transferred to the Lebanese Government from Jan. 1, 1944, and French troops were withdrawn in 1946.

Suleiman Franjich was elected President in 1970, for a term of six years. In April 1975, serious fighting broke out in Beirut between members of the predominantly Christian Phalangist Party and Palestinian guerrillas based in Lebanon. On May 15, the Government of M. Rashid Solh resigned, and the President appointed a military government led by Brig. Nouredin Rifai on May 23, which lasted only three days. After a renewed outbreak of violence on June 24, the country was on the verge of civil war. On June 30, a new cabinet was formed with the sole intention of restoring peace. It was led by Rachid Karamé, and contained a representative of each of the main religious communities.

However, the government was powerless to stop the fighting, which continued and increased throughout 1975 and 1976. In April 1976 a constitutional amendment facilitated the resignation of President Frangie. On May 8, the Lebanese Parliament elected Mr. Elias Sarkis President.

Production.—Fruits are the most important products and include citrus fruit, apples, grapes, bananas and olives. There is a small but growing industry, geared mainly to the production of consumer goods. The most important industries are foods and drinks (confectionery, jams, sugar, wines and beer, etc.), textiles, chemicals, furniture, plastics, leather, clothing and footwear, refrigerators, cast and forged metal products, and building materials. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with a branch of the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Beirut to Tripoli.

Archæology, etc.—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of first to third century Roman temples and Jubail (Biblos), one of the oldest continuously inhabited towns in the world, and ancient Tyre which is in course of excavation.

Language and Literature.—Arabic is the principal

language (see Arabia), and French is also widely used. The use of English is increasing. About 40 daily papers are published, including 2 in French, 1 in English and 4 in Armenian; and a further 30 periodicals.

Education.—There are four universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University and the Arab University which are recent foundations in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

Finance.—Revenue and Expenditure, 1974 (Estimated) £L1,385,300,000. The monetary unit is the Lebanese £(L). (See also p. 84.)

Principal Imports.—Gold and precious metals, machinery and electrical equipment, textiles and yarns, vegetable products, iron and steel goods, motor vehicles, mineral products, chemicals and chemical products, pharmaceuticals, prepared foods, beverages, tobacco products, live animals and animal products.

Principal Exports.—Gold and precious metals, fruits and vegetables, textiles, building materials, furniture, plastic goods, foodstuffs, tobacco and wine.

Trade with U.K.

	1974	1975
Imports from U.K.	£60,800,000	£69,528,000
Exports to U.K.	28,600,000	8,025,000

There is also a considerable transit trade through Beirut, including gold, crude oil and a wide range of machinery and consumer goods. Lebanon is the terminal for two oil pipe lines, one belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at the end of each pipeline which can supply Lebanon's needs.

CAPITAL.—Ψ Beirut (population, excluding suburbs, about 600,000). Other towns are Ψ Tripoli (210,000), Zahlé (45,000), Ψ Sidon (42,000), Aley (14,500), Ψ Tyre (12,000).

FLAG.—Horizontal bands of red, white and red with a green cedar of Lebanon in the centre of the white band.

NATIONAL DAY.—November 22.

[01-589 9405]

Ambassador Extraordinary and Plenipotentiary, His
 Excellency Herbert Richard Wright Brewer
 (1975).

1st Secretary and Consul, W. E. Greaves.

2nd Secretary and Vice-Consul, J. D. Moulton.

An independent republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. The population at the Census of 1974 was 1,481,524.

The executive power is vested in a President elected for 4 years (8 years in the first instance) assisted by a Cabinet; there are two houses of Legislature, the Senate and the House of Representatives. The Senate is composed of 19 members elected from each of the nine Counties. They hold office for a period of six years. The House of Representatives is composed of 70 members, each member holding office for four years. William V. S. Tubman, President of Liberia since 1944, died on July 23, 1971, and was succeeded by Dr. Tolbert (see above). The Army of Liberia consists of one division of 2 brigades of militia, three regular infantry battalions, one engineer battalion and a small coastguard. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S. A.I.D. (successor to I.C.A.), and technicians have been sent from U.S.A. to advise on various projects. Technical assistance is also being provided by several other countries, including the United Kingdom. UNESCO, WHO and FAO have missions in the country providing technical assistance. The U.S.A. and more recently I.B.R.D., has also made loans for the improvement of power and water supplies, roads and hospitals.

FINANCE

	1974	1975
Revenue.....	\$96,000,000	\$117,000,090
Expenditure.....	96,000,000	117,200,000
\$ = U.S. Dollar.		

TRADE

	1973	1974
Imports.....	\$193,468,586	\$288,400,000
Exports.....	324,039,251	400,200,000

Trade with U.K.

	1974	1975
Imports from U.K....	£13,990,000	£23,752,000
Exports to U.K.....	6,494,000	6,085,000

The principal exports are iron ore, crude rubber, uncut diamonds, palm kernels, cocoa and coffee. The chief imports are manufactured goods of all kinds, transport and iron-ore mining equipment and foodstuffs.

The language of the Republic is English. American weights and measures are used.

CAPITAL, Ψ Monrovia. Est. Pop. 201,600. Other ports are Ψ Buchanan, Ψ Greenville (Sinoce) and Ψ Harper (Cape Palmas).

FLAG.—Alternate horizontal stripes (5 white, 6 red), with 5-pointed white star on blue field in upper corner next to flagstaff.

LIBYAN EMBASSY IN LONDON

58 Prince's Gate, S.W.7

[01-589 5235]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mahmood Suleiman Maghribi (1973). Minister Plenipotentiary, Suleiman M. Grada.

Counsellors, Ahmed I. Al Fakih; Khalifa A. Bazelya; Sayed M. Gadafeddad.

2nd Secretaries, Fawzi T. Hamza; Salah Eddin M. Msallem.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three former provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population (1973 Census preliminary results) of 2,257,037. The people of Libya are principally Arab with some Berbers in the West and aboriginal tribes in the Fezzan. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers, and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Jaghub, Gadames, Jofra, Sebha, Murzuch, Brach, Gat, Jalo and the Kufra group in the South-East. Exports from Libya are dominated by crude oil, but some wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins

are also exported. Principal imports are food-stuffs, including sugar, tea and coffee and most constructional materials and consumer goods. The major producing companies are Esso, Oasis, Mobil, Um Al Jawabi (formerly Amoseas), A.G.I.P., Occidental, Aquitaine and Libyan National Oil Co. In September 1973, the Libyan Government announced that it would be taking a 51 per cent. share in all foreign-owned companies. A few companies have been completely nationalized. In addition to the Esso main pipeline from Zelten to the terminal at Mersa Bregha and the Oasis Company's pipeline from Dahra to Ras-es-Sider, Mobil operates a 176-mile pipeline from Amal to Ras Lanuf and the Occidental line from Intisar field to Zuetina. A new gas liquefaction plant run by Esso was opened at Mersa Bregha in June 1970. Production of crude oil in 1973 was approximately 105 million tons (2.1 million barrels per day) which was a decrease of 4.6 per cent. over 1972.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. An Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 5,000 years old. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area where a motor road (of international standards) runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, in the Fezzan, was completed in Oct. 1962. A Czech-built road between Nalut and Ghadames was completed in 1972. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. There are airports at Tripoli and Benghazi (Benina), Tobruk, Mersa Bregha, Sebha, Ghadames and Kufra regularly used by commercial airlines and military airfields at Jamal Abdul Nasser (formerly El Adem near Tobruk) Okba ben Nafi (formerly Wheelus Field near Tripoli) and at Al Watiyah south of Zuara.

Government.—Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War,

and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations. The monarchy was overthrown by a revolution on Sept. 1, 1969, and the country was declared a republic. In 1971 a Libyan Arab Socialist Union was created as the country's sole political organisation. In January 1976 the General People's Congress was designated the supreme constitutional authority.

Local Government.—Until the amendment of the Constitution in 1963, Libya was a Federal State, each of the three Provinces, Tripolitania, Cyrenaica and Fezzan, being administered by a Governor assisted by Executive and Legislative Councils. In April 1963, however, comprehensive unity was proclaimed and the Federal system (together with the Governors and the Executive and Legislative Councils) abolished. The country is now divided into ten divisions, each administered by an Inspectorate (*Muraqib*).

Currency.—The Libyan pound was abolished in August, 1971, and a new currency the Libyan *dinar* of 1,000 *dirham* was introduced. *Dinar*=£1.90 sterling (see also p. 83).

Technical assistance is being provided by the United Nations to foster Libya's economic and educational development.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953, but terminated at the Libyans' request in January, 1972.

Trade with U.K.

	1974	1975
Imports from U.K....	£62,500,000	£107,041,000
Exports to U.K....	390,132,000	127,000,000

CAPITAL.—Tripoli.

The principal towns with the latest available estimates of population are: Ψ Tripoli (551,477); Ψ Misurata (103,302); Ψ Benghazi (282,192); Homs-Cussabat (88,695); Zawia (72,207); Gharian (65,439); Ψ Tobruk (58,869).

FLAG.—Libya uses the flag of the Confederation of Arab Republics (Libya, Egypt, Syria) which is a red, white and black tricolor with an eagle in gold in the centre. **NATIONAL DAY.**—Sept. 1.

BRITISH EMBASSY

30 Trigal Fatah, Tripoli.

Ambassador Extraordinary and Plenipotentiary, His Excellency Donald Frederick Murray, C.M.G. (1974).

Counsellor, R. L. Balfour, M.V.O.

1st Secretaries, D. J. Easton; G. H. Boyce; I. S. Lockhart, M.B.E. (Commercial); C. O. Wood (Consul).

2nd Secretaries, K. Farnworth (Administration); T. Millson (Commercial).

There is a British Consular Office at Tripoli.

LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., b. Aug. 16, 1906; *suc.* July 26, 1938; *married* March 7, 1943, Countess Gina von Wilczek. *Heir*, Crown Prince Hans Adam,

b. Feb. 14, 1945; married July 30, 1967, Countess Marie Kinsky.

Prime Minister, Dr. Walter Kleber.

Liechtenstein is represented in diplomatic and consular matters in the United Kingdom by the Swiss Embassy, *q.v.*

At the General Election on Feb. 1 and 3, 1974, the Progressive Citizens' Party won 8 seats and Patriotic Union Party 7. Dr. Walker Kleber was asked to form a new Government.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 65 square miles and a population in 1974 of 23,745. The main industries are metal goods, cotton spinning and weaving, measuring instruments, coating of lenses, manufacture of vacuum apparatus, electronic microscopes, ceramics, artificial teeth and sausage casings, textiles, various apparatus, foodstuffs, leatherware and woodwork. The chief products are cotton yarn, cotton material, screws, bolts and bolt-shooting apparatus, needles, knitting machinery, ceramics, artificial teeth, precision measuring instruments, vacuum pumps, coated lenses, shoes, leather gloves, bed down, conveyor belts, boilers, preserves, damask cloth, socks and stockings, and furniture. Revenue 1974, *Swiss francs* 114,763,727. Expenditure 1974, *Swiss francs* 114,734,931.

The language of the Principality is German.

CAPITAL, Vaduz. Pop. (1974), 4,382.

FLAG.—Equal horizontal bands of blue over red; gold crown on blue band near staff.

British Consul General, James Ernest Reeve (office at Dufourstrasse 56, 8008 Zürich) *Consul*, O. E. Goddard (office at Bellerivestrasse 5, 8008 Zürich).

LUXEMBURG

(Grand-Duché de Luxembourg)

Grand Duke, H.R.H. Jean, born Jan 5, 1921, married, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, 3 sons and 2 daughters; succeeded (on the abdication of his mother) Nov., 1964. *Heir Apparent*, Prince Henri, born April 16, 1955.

Prime Minister and Minister for Foreign Affairs and Sport, M. Gaston Thorn.

Deputy Prime Minister and Minister of Finance, of the Budget and of Planning, M. Raymond Vouel.

Minister of Economic Affairs, of the Middle Classes, of Transport, of Energy and of Tourism, M. Marcel Mart.

Minister of Employment and Social Affairs, M. Benny Berg.

Minister of Public Health, of the Environment, of the Civil Service and of the Armed Force, M. Emile Krieps.

Minister of Agriculture, of Viticulture and of Public Works, M. Jean Hamilius.

Minister of the Interior, M. Jos. Wohlfart.

Minister of Justice and of National Education, M. Robert Krieps.

State Secretaries, M. Maurice Thoss; M. Guy Linster; M. Albert Berchem.

EMBASSY AND CONSULATE
27 Wilton Crescent, S.W.1
(01-235 6961)

Ambassador Extraordinary and Plenipotentiary, His Excellency André Philippe, G.C.V.O. (1972).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein". In 1867 the

Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the *Treaty of Versailles*, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (B.L.E.U.). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Communities.

Besides B.L.E.U., Luxemburg is also a member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux, 1960). The Court of the European Communities has its seat in Luxemburg, as does the Secretariat of the European Parliament, the European Investment Bank and the European Monetary Co-operation fund.

The area is 1,000 square miles; the population (Jan. 1975) 357,300, nearly all Roman Catholics. There is a Chamber of 59 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity over 6,000,000 tons. Government revenue for 1975 was estimated at L.F. 30,510,318,000, expenditure L.F. 30,781,613,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy, Approximate Exchange Rate, 70 Francs=£1 (June 1, 1976). There are 170 miles of railway.

Trade with U.K.

	1972	1973
Imports from U.K. . . .	£8,030,000	£8,580,000
Exports to U.K.	6,363,000	7,847,000

The capital, Luxemburg, pop. (1972), 78,300, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; all speak German and many English.

FLAG.—Three horizontal bands, red, white and blue. NATIONAL DAY.—June 23.

Youth, Christian R. Richard.
Foreign Affairs, Jean Bemananjara.
Art and Revolutionary Culture, Gaston Lahy.

Madagascar lies 240 miles off the east coast of Africa and is the fifth largest island in the world. It has an area of 228,000 sq. miles and a population of about 8,000,000. It became a French protectorate in 1895, and a French colony in 1896 when the former queen was exiled. Republican status was adopted on October 14, 1958. Independence was proclaimed on June 26, 1960, when agreements confirming Madagascar's membership of the French community and co-operation with France on defence, monetary, judicial, educational and other matters were signed.

Following demonstrations in Tananarive on May 13, 1972, the Parti Social Démocrate (PSD) Government which had been in power since independence under Monsieur Tsiranana (President 1959-1972) was replaced by a military government under General Ramanantsoa who resigned in January 1975. His successor, Col. Ratsimandrava, was assassinated on February 11 after only 6 days in office. A mutiny in a police camp in the capital was put down with about 20 casualties. A *Directoire Militaire* under General Andriamihazo then took over and martial law was declared. The *Directoire* was replaced by a Supreme Council of the Revolution of 8 members of the armed forces under Capitaine de Frégate Didier Ratsiraka on June 15, 1975. Twelve civilian ministers whose activities are coordinated and directed by the Supreme Council were also appointed. The first act of the new Government was to nationalise insurance and banking.

Both houses of the Malagasy Parliament, and the activities of political parties were suspended.

In December 1975 a new constitution was approved in a referendum, and Lt. Cdr. Ratsiraka was appointed President.

Revised agreements with France were signed on June 4, 1973, providing for the withdrawal of the French forces stationed in the country since independence. The French naval base at Diégo Suarez has been turned into a civilian ship repair yard and French influence has been greatly reduced. Madagascar has also withdrawn from the Franc Zone and has announced a claim to the Islands of Juan de Nova, Glorieuses, Isle de l'Europe, Bassa da India and Tromelin which had remained integral parts of the French Republic after independence.

The people are of mixed Polynesian, Arab and Negro origin. The languages spoken are Malagasy and French. There are sizeable French, Chinese and Indian communities.

The island's economy is still almost wholly based on agriculture, which accounts for three-quarters of its exports. Development plans have placed emphasis on increasing agricultural and livestock production, the improvement of communications and the creation of small industries.

Total exports in 1973 amounted to FMG 44.7 million. The principal exports in order of value were coffee (25 per cent. of total), cloves (10 per cent.), vanilla, rice, meat and meat products, sugar and butter beans. Minerals exported include chrome ore, graphite and mica.

Total imports in 1973 amounted to FMG 45.1 million compared with FMG 51 million in 1972.

The main imports are manufactures, petroleum, fertilizers, cement and rice.

TRADE WITH U.K.

	1972	1973
Imports from U.K.	£817,000	£763,000
Exports to U.K.	1,213,000	1,902,000

The rate of exchange is about Malagasy francs (FMG) 460 = £1 (June 1975).

CAPITAL.—Tananarive (population about 400,000). Other main towns are the chief port Tamatave (55,000); Majunga (50,000); Fianarantsoa (47,000); Diégo Suarez (41,000).

FLAG.—Equal horizontal bands of red (above) and green, with vertical white band by staff.

NATIONAL DAY.—June 26 (Independence Day).

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Mervyn Brown, C.M.G., O.B.E. (1975) (resides at *Dar-es-Salaam*).
1st Secretary and Consul, R. B. Hammond.
Commercial Officer and Vice-Consul, A. J. Marcelin.

THE MALDIVES

President, His Excellency Amir Ibrahim Nasir.

Area, etc.—The Maldives are a chain of coral atolls, some 400 miles to the south-west of Sri Lanka, stretching from just south of the equator for about 600 miles to the north. There are 12 clearly defined atolls, separated from each other by deep channels through which the currents run strongly. No point in the entire chain of islands is more than 8 feet above sea-level. The total number of islands is over 2,000, some being very small; about 220 of them are inhabited. The population of the islands (estimated, 1975) is 123,000. The people are Moslems and the Maldivian language is akin to Elu or old Sinhalese. They are highly civilized and are great navigators and traders.

Government.—The Maldives form a Republic which is elective. There is a Parliament (the *Citizens' Majlis*) with representatives elected from all the atolls. The life of the Majlis is 5 years. The Government consists of a Cabinet, which is responsible to the Majlis. By the agreement signed with the British Government in 1965, the Maldives form a composite sovereign and fully independent state, free to conduct their own external relations with other countries.

On March 6, 1975, the Prime Minister, Ahmed Zaki, was arrested and exiled, and presidential rule was imposed.

With the agreement of the Maldivian Government, the R.A.F. maintain a staging post on Gan Island, in Addu Atoll, the most southerly atoll, lying just south of the equator.

Production, etc.—The islands are thickly covered with coconut palms, and coir and ropes are exported. The principal industry is fishing and considerable quantities of fish are exported to Japan. Dried fish is exported to Sri Lanka, where it is a delicacy. The tourist industry is expanding very rapidly.

CAPITAL.—Malé (population, estimated 1970, 13,610). There is an air strip on Hulule Island about 1 mile from Malé.

FLAG.—Green field bearing a white crescent, with wide red border.

BRITISH REPRESENTATION

Ambassador Extraordinary and Plenipotentiary, His Excellency Harold Smedley, C.M.G., M.B.E. (1973) (concurrently British High Commissioner to Sri Lanka).

MALI

(Republic of Mali)

Chairman, National Liberation Committee, Col. Moussa Traore, born 1937, assumed office Nov. 20, 1968.

The Republic of Mali, an inland state in north-west Africa has an area of 465,000 square miles and a population (U.N. estimate, 1969) of 4,929,000.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Senegal. The title of the Republic of Mali was adopted on Sept. 22, 1960. The Republic is no longer a member of the French Community. On July 1, 1962, a Mali franc equal in value to the Franc CFA was introduced and a new State bank set up. The Franc Malien now has a fixed rate of exchange of 2FM=1 CFA Franc.

The régime of Moukoko Keita was overthrown on Nov. 19, 1968, and the President arrested by a group of Army officers, who formed a National Liberation Committee and appointed a Prime Minister. Lieut. Traore assumed the functions of Head of State. A new civil constitution to come into being in 1979 was approved in a national referendum on June 21, 1974.

Mali's principal exports are groundnuts (raw and processed), cotton fibres, meat and dried fish. The principal rivers are the Niger and the Senegal. Goods to the value of £1,697,000 were imported from the United Kingdom in 1975 (1974 £1,436,000). Exports to U.K. 1975 £576,000 (1974 £2,505,000).

CAPITAL.—Bamako (170,000). Other towns are Gao, Kayes, Mopti, Sikasso and Segou (all regional capitals), and Timbuktu.

FLAG.—Vertical stripes of green (by staff), yellow and red. **NATIONAL DAY.**—September 22.

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency John Ernest Powell-Jones, C.M.G. (resident at Dakar).

MAURITANIA

(Islamic Republic of Mauritania)

President and Prime Minister, Moktar Ould Daddah, assumed office Nov. 28, 1958; re-elected for 5 years, 1966, 1971 and 1976.

Mauritania lies on the north-west coast of Africa immediately to the north of Senegal. It is bounded on the south and on the east by the Republic of Mali. To the north it is bounded by the territory formerly known as Spanish Sahara. (Mauritania and Morocco took possession of that territory in February 1976 when Spain formally relinquished all right to it and in April 1976 agreed on a new frontier dividing the territory between them). Area 419,000 sq. miles. The population was estimated at 1,200,000 in 1972. (For MAP, see p. 868). The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic. It became fully independent on Nov. 28, 1960. In 1972 Mauritania broke with the franc zone and established its own unit of currency, the *Ougiyá*, equal in value to 5 francs CFA. Mauritania's main source of potential wealth lies in rich deposits of iron ore around Fort Gouraud, in the north of the country. Exports began in 1963, via a railway laid for the purpose from the mine to the port of Nouadhibou. The deposits are being exploited under the aegis of the *Société Nationale Industrielle Minière* following the nationalisation on November 28, 1974 of the internationally based company MIFERMA. There are copper deposits at Akjoujt which are being exploited by SOMIMA, a company which had an international base but was nationalised on Feb. 25, 1975.

	1974	1975
Imports from U.K.	£4,554,000	£3,950,000
Exports to U.K.	13,303,000	15,238,000

FLAG.—Yellow star and crescent on green ground
NATIONAL DAY.—November 28.

CAPITAL.—Nouakchott (30,000).
British Ambassador, His Excellency John Ernest Powell-Jones, C.M.G. (Resident at Dakar).

MEXICO

(Estados Unidos Mexicanos)

President (1976–82), Lic. José López Portillo, born 1916, elected July 4, 1976; to assume office, Dec. 1, 1976.

MEXICAN EMBASSY IN LONDON

8 Halkin St. S.W.1

[01-235 6393]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Hugo B. Margain, C.C.V.O.
Minister-Counsellors, Sr. Donaciano Gonzalez Gómez; Sr. Horacio Flores-Sánchez.*

Consul-General, Sr. Mario Tapia Ponce.
Naval Attaché, Rear Adm. Carlos López Sotelo.
Counsellors, Sra. Francisca Celis-Campos, M.V.O. (Information); Sr. Lic. Oliver Farrés (Commercial); Sr. Lic. Andrés Rozental; Sr. Lic. José Gurria Treviño; Sr. Lic. Guillermo Guevara Botello; Sr. Manuel de Araoz, C.V.O.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from $14^{\circ} 33'$ to $32^{\circ} 43'$ N. lat. and $86^{\circ} 46'$ to $117^{\circ} 08'$ W. long., and comprising one of the most varied zones in the world. It contains 31 states and the federal district of Mexico, making in all 32 political divisions, covering an area of 761,604 square miles. At the Mexican General Census taken on Jan. 28, 1970, the total population was 48,313,000, but a present day estimate is 61,000,000.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltépetl ("El Pico de Orizaba") on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 ft.), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 ft.), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 ft.). The only considerable rivers are the *Rio Grande del Norte* which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas". The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from A.D. 500 to 1100 and A.D. 1300 to 1500 and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archaeological remains; the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in Yucatán and Chlapas (Maya); Teotihuacan, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacán); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Veracruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to the war of 1845-48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency led to invasion by French forces which installed Archduke Maximilian of Austria as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Díaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of a Senate of 64 members, elected for six years, and of a Chamber of Deputies, at present numbering 213, elected for three years. Presidents, who wield full executive powers, are elected for six years; they cannot be re-elected.

There are four political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the governing party.

Communications.—Veracruz, Tampico and Coatzacoalcas are the chief ports on the Atlantic, and Guaymas, Mazatlán, Puerto Lázaro Cárdenas, Acapulco, Salina Cruz and Puerto Madero on the Pacific. The total tonnage of registered merchant marine in May, 1976, was 1,053,679 tons. There were 25,864 kilometres of railway track open in Mexico in 1974. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system; help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. The railways were completely nationalised in 1970.

The total length of road at the end of 1974 was 175,540 kilometres, of which 53,140 were paved,

68,900 dressed and 53,500 graveled. Mexico City may be reached by at least three excellent highways (with 14 entry points) from the United States, and work is complete on roads southward from Mexico City to Yucatán as well as on two principal highways to the Guatemalan border (with three entry points).

At the end of February 1976, the national telegraph system had a network of 58,215 kilometres. The total length of lines within the network was 220,422 kilometres. International telegraph services to the United States frontier are provided by the government-owned Mexican Telegraph Company and then through the United States to Canada and Europe.

Teléfonos de México, a state-controlled company, controls about 98 per cent. of all telephone services; there were slightly more than 3.5 million telephones in service in mid-1975 and installations are expanding at an annual rate of 15 per cent. In 1976 there were 9,708,000 kilometres of long distance lines. *Satélite Latinoamericano, S.A. (SATELAT)* is a joint government/private sector venture disseminating television programmes to Latin America through Intelstat IV satellite facilities leased by the Mexican Government.

There is a good national and international network of air services. There are 1,113 airports and landing fields in Mexico, of which eighteen are equipped to handle long-distance flights. There are 166 airline companies, including two of the major national airlines—*Mexicana de Aviación* and *Aeroméxico*. Passenger traffic is growing by about 18 per cent. yearly, while cargo increases by some 14 per cent. a year.

Production.—The principal agricultural crops are maize, beans, rice, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, chick-peas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus, yields several fermented drinks, mezcal and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

The volume of the fishing industry has grown from 187,922 tons in 1965 to 451,330 tons in 1975 for human consumption and 26,446 tons in 1965 to 157,795 tons in 1975 for industrial use.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries. The mining industry has shown a growth of 20 per cent. in two years. The steel industry has expanded rapidly and produced 5,077,000 tons of steel in 1975. The mineral wealth is great, and principal minerals are gold, silver, copper, lead, zinc, quicksilver, iron and sulphur. Substantial reserves of uranium have been found. Production in 1974 amounted to: gold, 4,182 kilograms; silver, 1,200 tons; lead, 218,021 metric tons. In the non-metals sector, Mexico continues to produce 25 per cent. of the world's supply of fluor spar with a yearly output of 1.1 million metric tons. Sulphur production rose 70.3 per cent. in 1973 and jumped an additional 44.3 per cent. in 1974 to a total of 2.32 million metric tons.

The total proven petroleum reserves were 7,000 million barrels in 1975. Crude oil production in 1975 was 39,403,000 cubic metres and current daily production is 895,000 barrels. Daily production of natural gas is 223,577 cubic metres. Oil reserves were increased substantially due to very important new discoveries in Tabasco and Chiapas

states. A new refinery at Tula, State of Hidalgo, is the nation's largest; and new refineries in Monterrey, State of Nuevo Leon, and Salina Cruz, State of Oaxaca, will be in operation by the end of 1977.

Paper production is growing about 9 per cent. per year and reached 1.2 million metric tons in 1974, but imports are still necessary to meet domestic demand.

Textile production is led by the artificial fibres sector, which is growing by about 9 per cent. each year, and produced 160,000 tons in 1974. The natural fibre textile industry has not registered dynamic growth in the past two years and continues to lose its share of the market to the synthetics, but is being re-structured to make it more efficient and competitive.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 3,048 thousand kilowatts in 1960 to 9,629 thousand kilowatts in 1974. It is estimated that electric energy production increases by about 11 per cent. yearly and generating capacity will be at least 13.3 million kilowatts by the end of 1976 and 15.7 million kilowatts in 1978.

Defence.—The regular army has a strength of 58 infantry battalions, one infantry brigade and a Presidential Guard of three battalions, 20 cavalry regiments, 3 parachute battalions and a small number of artillery and engineer units. There is also a conscript army of about 250,000 men organized into National Service divisions, each 6,000–7,000 strong. The Navy has some 60 ships of all kinds and the Air Force some 200 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 95 per cent. of the population. In addition to Spanish, there are five basic groups of Indian languages spoken in Mexico. The 1970 Census showed that of the 3,111,415 inhabitants speaking an Indian language, 25.7 per cent. spoke Náhuatl; 14.6 per cent. Maya; 9.1 per cent. Zapotec; 7.1 per cent. Otomí; 7.5 per cent. Mixtec and 36 per cent. one or other of the 59 dialects derived from these basic languages. The National Library in the capital contained 1,034,000 volumes in 1976 and has a yearly increment of 30,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary, preparatory and university. Primary education is free, secular and nominally compulsory. Total school population at all levels rose to 16,000,000 in 1975–76, from 11,500,000 in 1970–71. There were 53,489 kindergarten and primary schools in 1974–75 and 12,700,000 pupils at these levels at the end of 1975; 5,900 secondary schools with an estimated 2,024,042 pupils in 1976. Preparatory, vocational and technical schools in 1974–75 numbered 1,326 with 590,089 students, while there were 299 teacher training colleges with 89,865 students and 507 professional schools, including universities, with 452,000 students.

The National Autonomous University of Mexico (1533) had 238,300 students in 1975. In 1975, illiteracy had fallen to 10.5 per cent. of the population above 6 years of age from 21 per cent. in 1965. Between 1971 and 1976, the number of schools increased by 137 per cent. and the number of pupils by 38 per cent.

The prevailing religion is Roman Catholic.

Finance. (Pesos).

The proposed budget expenditure for 1976 amounts to 392,389,000,000 pesos, 209,510,000,000 from the Federal Government and 182,879,000,000

from the decentralised agencies. 29.7 per cent. is allotted to the industrial sector, 22.9 per cent. to social welfare programmes, 20 per cent. to agricultural development, 16.8 per cent. to general administrative expenses, 10.2 per cent. to transportation and communication projects. It was record budget and represented a 10 per cent. increase over the 1975 budget.

As from April 19, 1954, by agreement with the International Monetary Fund, the Rate of Exchange has been fixed at 12.50 pesos = 1 \$U.S. (See also p. 84).

Total Imports.....	1975
	Pesos 82,251,950,000
Total Exports.....	1975
	Pesos 35,732,810,000

Trade with U.K.

	1974	1975
Imports from U.K....	£60,012,000	£111,734,000
Exports to U.K.....	17,868,000	10,889,000

Imports consist largely of machinery and implements for industry, mining and agriculture, and raw materials for industry. Principal exports are cotton, coffee, sisal (henequen), sugar, tomatoes and shrimps, lead, silver, zinc and other metals, tobacco, sulphur and heavy fuel oil.

CAPITAL.—Mexico City, est. pop. 1976-77 8,941,912; metropolitan area 12,578,420. Other cities (est. pop. 1976-77) are: Guadalajara (1,725,107); Monterrey (1,350,000); Ciudad Juárez (570,401); León (557,030); Puebla (516,197); Mexicali (360,556); Chihuahua (386,645); San Luis Potosí (303,571); and Mérida (250,206).

FLAG.—Three vertical bands in green, white, red, with the Mexican emblem (an eagle on a cactus devouring a snake) in the centre.

NATIONAL DAY.—September 16 (Proclamation of Independence).

BRITISH EMBASSY

(Calle Río Lerma 71, Colonia Cuauhtémoc, Mexico 5, D.F.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir John Edgar Galsworthy, K.C.V.O., C.M.G. (1972).

Counsellors, A. J. Payne; I. P. Alinutt, O.B.E. (Cultural).

Defence, Naval, Military and Air Attaché, Lt.-Col. B. D. O. Smith, M.V.O.

1st Secretaries, P. J. Streams (Head of Chancery); E. V. Nelson, M.V.O. (Information); P. G. Harborne (Commercial); Dr. I. Baker (Scientific).

2nd Secretaries, A. C. W. Culbert (Consul); M. J. Peart; A. S. Green, M.V.O. (Administration); P. J. Smith (Commercial); G. Thomas (Cultural).

Assistant Information Officer, Mrs. M. Jolly.

Vice-Consul, A. D. Morales.

There are British Consular Offices at Mexico City, Guadalajara, Acapulco, Mérida, Monterrey, Tampico and Veracruz.

British Council Representative.—I. P. Alinutt, O.B.E., Calle M. Antonio Caso 127, Mexico 4, D.F.

BRITISH CHAMBER OF COMMERCE, Calle Tiber 103, 6th Floor, Mexico 5, D.F.—*Manager, T. D. Thornton.*

Transit from London to Mexico City:—By air, 13 hours; By sea, U.K.—New York, 5 to 10 days; New York—Mexico City, by rail, 3 days; by air, 4 hours. There is a direct freight service from Liverpool to ports on both the Mexican Gulf and the Pacific Coast.

MONACO

(Principauté de Monaco)

Sovereign Prince, H.S.H. Rainier III-Louis-Henri-Maxence Bertrand, born May 31, 1923, succeeded

his grandfather (H.S.H. Prince Louis II), May 9, 1949; married April 19, 1956, Miss Grace Patricia Kelly and has issue Prince Albert Alexandre Louis Pierre, born March 14, 1958, Princess Caroline Louise Marguerite, born January 23, 1957; and Princess Stephanie Marie Elisabeth, born Feb. 1, 1965.

President of the Crown Council, M. Pierre Blanchy.

President of the National Council, M. Auguste Medecin.

Minister of State, André Saint-Mieux, appointed 1972.

CONSULATE-GENERAL IN LONDON

4 Audley Square, W.1

[01-629 0734]

Consul-General, I. S. Ivanović.

Consul, A. J. Hucker, 3 Gray's Inn Square, W.C.1 [01-242 5323].

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long (area approx. 467 acres), with 24,500 inhabitants (est. 1975) and a yearly average of over 600,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are some notable public and private gardens. Monaco has a small harbour (30 ft. alongside quay) and the import duties are the same as in France. The National Council consists of 18 members and the Council of Government of the Minister of State, as President, and three State Counsellors. There is a local police force of 160 men.

A new constitution was promulgated by Prince Rainier on Dec. 17, 1962, which is subject to modification only with the approval of the elected National Council. It maintains the traditional hereditary monarchy and gives guarantees for the right of association, trade union freedom and the right to strike.

CAPITAL.—Monaco-villier (2,422).

FLAG.—Two equal horizontal stripes, red over white.

H.M. Consul-General, D. J. Swan, M.V.O. (Resident at Marseilles).

(OUTER) MONGOLIA

MONGOLIAN EMBASSY

7 Kensington Court, W.8

[01-937 0150]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dzenzngiin Tserendondov (1973).

Area and Population.—The Mongolian People's Republic (Outer Mongolia) is a large and sparsely populated country to the north of China. Its area is over 600,000 square miles. Its population, 1976 is about 1,450,000. However, this total

constitutes only part of the Mongolians of Asia, a number of whom are to be found in China and in the neighbouring regions of the Soviet Union (especially the Mongolian Buryat Autonomous Region). This country, which is almost nowhere below 1,000 feet above sea level, forms part of the Central Asiatic Plateau and rises towards the west in the high mountains of the Mongolian Altai and Khangai Ranges. The Khentai Mountain Range, situated to the north-east of the capital Ulan Bator, is less high. The Gobi region covers the southern half of the country. It contains some sand deserts, but between these less hospitable areas there is steppe land which provides pasture for great numbers of cattle, sheep, goats, camels and horses (the latter is still the characteristic means of transport for the population). There are several long rivers and many lakes, but good water is scarce since much of the water is salty. The climate is hard, with a short mild summer giving way to a long winter when temperatures can drop as low as minus 50° Centigrade.

History.—Mongolia, under Genghis Khan the conqueror of China and much of Asia, was for many years a buffer state between Tsarist Russia and China, although it was under general Chinese suzerainty. The outbreak of the Chinese Revolution in 1911 was the signal for a declaration of independence which was confirmed by the Sino-Russian Treaty of Kiakhta (1915), but cancelled by a unilateral Chinese declaration in 1919. Later the country became a battleground of the Russian Civil War, and Soviet and Mongolian troops occupied Ulan Bator in 1921: this was followed by another declaration of independence. However, in 1924 the Soviet Union in a Treaty with China again recognized the latter's sovereignty over Mongolia; but this was never properly exercised because of China's pre-occupation with internal affairs, and later by the anti-Japanese war. The Mongolian People's Republic was formally established in 1924. Under the Yalta Agreement, Chiang Kai-shek agreed to a plebiscite, held in 1945, in which the Mongolians declared their desire for independence; this was granted. The country entered the United Nations in 1961. The heroes of Mongolian history during the earlier part of the century were Sukhehator, who died in 1923, and the Communist Choibalsang (died 1952), who did much to turn the country into the Communist state it is today, and carried out a systematic destruction of the power of the Lamas and the old princely houses which had previously been the dominant force in both the economy and the government.

Production, etc.—The total of Mongolia's livestock was planned to reach 25 million in 1975. Traditionally the Mongolian is a herdsman, tending his flock of sheep, goats and horses, cows and camels and leading a totally nomadic life. With the coming of the Communist régime (under the Mongolian People's Revolutionary Party) and especially since 1952, great efforts have been made to settle the population, but a large proportion still live nomadically or semi-nomadically in the traditional *ger* (circular tent). The pastoral population was collectivized at the end of the 1950s into huge *negdels* (co-operatives) and State farms which have hastened the process of settlement, but within these the herdsmen and their families still move with their *gers* from pasture to pasture as the seasons change. The country, except for the capital, is today divided into 18 *aimaks* (provinces) and beneath these into 259 *somons* (counties), and these form the basis of the State organization of the country, parallel with which runs the apparatus of the Revolutionary Party.

Membership of the Communist bloc has brought

Mongolia considerable quantities of aid from other Socialist countries, especially the Soviet Union and China, both of which supplied many thousands of workers to help with various construction projects. Mongolia's support of the Soviet Union in the Sino-Soviet dispute resulted in the cessation of Chinese aid and a halt in the supply of Chinese workers. Mongolia is now relying on eastern European, especially Czech, Polish and East German aid to supplement the massive assistance from the Soviet Union. Soviet and Bloc aid is hastening the process of industrialization; for although the economy remains based on the herds of animals, and the principal exports of the country are still animal by-products (especially wool, hides and furs) and cattle, factories serving the needs of the country have been started up and the coal and electricity industries are being developed to provide an industrial base. A joint Mongolian/Soviet enterprise for copper and molybdenum mining has been started in northern Mongolia. In 1976 a major geological survey is being carried out by the CMEA countries, in order to prepare for the extraction of the considerable mineral deposits known to exist in Mongolia. Coal production is expected to rise to 4.5-4.9 million tons by 1980.

Ulan Bator, which contains a quarter of the country's population, is the main seat of industry. Under the third 5-year plan, a new industrial centre was founded at Darkhan, north of the capital near the Soviet frontier. This was being continued in the fourth 5-year plan (1966-70), and a start has been made with the development of Choibalsan in the east as a third industrial town (mostly for the processing of animal and agricultural products). Agriculture, formerly little practised, is now being extended. By the end of the sixth 5-year plan (1976-80), total cereal production is expected to be 500,000 to 530,000 tons. Communication is still difficult in the country as there are virtually no roads. The trans-Mongolian railway, following the line of the old north-south trade route, was opened in 1955 and links Mongolia with both China and Russia. Mongolia's fundamental difficulty is its very small population and labour force.

Foreign trade is dominated by the Soviet Union, with the eastern European countries taking most of what is left. Trade with western countries is developing slowly.

CAPITAL.—Ulan Bator. (Pop. 334,000.)

FLAG.—Vertical tri-colour red, blue, red and in the hoist the traditional Soyombo symbol in gold.

NATIONAL DAY.—July 11 (Anniversary of the Mongolian People's Republic).

ROYAL MOROCCAN EMBASSY AND CONSULATE 49 Queen's Gate Gardens, S.W.7

[01-584 8827]

Ambassador Extraordinary and Plenipotentiary, His Excellency M. Abdellah Chorfi.

Military, Naval and Air Attaché, Col. Ahmed Benomar Sbay.

Area and Population.—Morocco is situated in the north-western corner of the African continent between latitude $27^{\circ} 40'$ – 36° N. and longitude 1° – 13° W. with an area estimated at approximately 80,000 sq. miles, and a population (1971) of 15,379,259. It is traversed in the north by the Rif Mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Tangier which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the *Pillars of Hercules*, the western gateway of the Mediterranean.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast, (where a high degree of humidity is, however, prevalent) the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

Government.—Morocco became an independent sovereign state in 1956, following joint declarations made with France on March 2, 1956, and with

Spain on April 7, 1956. The Sultan of Morocco, Sidi Mohammad ben Youssef, adopted the title of King Mohammad V.

A constitution, adopted by referendum on December 7, 1962, was in force from December 14, 1962, until June 7, 1965.

Following serious disturbances in Casablanca in March, 1965, attempts were made by King Hassan, in consultation with all political parties, to form a government of national union. These efforts were unsuccessful and on June 7, 1965, the King proclaimed a "state of exception" and suspended Parliament. Assuming himself the office of Prime Minister, he announced the formation of a new government and indicated that constitutional changes were to follow. A revised Constitution was approved by a national referendum on July 24, 1970 and brought into effect soon after. It was superseded by another constitution, also approved by a national referendum, on March 1, 1972. This provides that not only political parties, but trade unions, chambers of commerce and professional bodies will participate in the organization of the State and representation of the people; specifies that the King is the supreme representative of the people; makes changes in the composition of the Regency Council and the Sovereign's rights; establishes a unicameral legislature in which members' tenure of office is six years. The new Chamber is to have 240 members, 180 elected by direct universal suffrage and 60 members elected by electoral colleges representing local government, industry, agriculture and working class groups. However the election expected in April 1973 did not take place. Parliamentary elections have now been promised for early 1977, so that Parliament will be able to meet in April 1977.

Defence.—The Moroccan army, formed in 1956, is about 50,000 strong. A Moroccan air force was formed in 1959 and a navy in 1960. The armed forces possess quantities of French, Soviet and American equipment, including aircraft.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The current Five Year Plan (1973–77) for economic development places particular emphasis on social improvement. Other priority sectors are industrial development, agriculture and tourism.

Agriculture employs more than 70 per cent. of the working population and accounts for about 40 per cent. of Morocco's exports. The main agricultural products are cereals, citrus fruits, olives, grapes, tomatoes and vegetables. Dates and figs are

also grown and exported. Cork and wood-pulp are the most important commercial forest products. Esparto grass is also produced. There is a fishing industry and substantial quantities of canned fish, mainly sardines, are exported. Livestock in 1972 included about 11,900,000 sheep, 4,600,000 goats, 2,785,000 horned cattle and smaller numbers of donkeys, camels, horses and pigs.

Morocco's mineral exports are phosphates, anthracite, manganese, iron ore, lead and zinc, while the following are also produced: petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates totalled 17,800,000 tons in 1975. There are oil refineries at Mohammedia and Sidi Kacem, and oil sold in Morocco in 1975 amounted to 2,270,117 cu. metres. Production of crude oil in 1974 amounted to 25,159 tons.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France, the U.S.A., W. Germany, Italy, the United Kingdom and Spain, was valued in 1974 at Imports, DH 4,683,587,000; Exports, DH 3,745,948,000 (both involving very small variations on 1973).

Trade with U.K.

	1974	1975
Imports from U.K.	£28,127,000	£35,500,000
Exports to U.K.	52,506,000	51,900,000

There is a British Chamber of Commerce at Casablanca (c/o B.B.M.E., 80 Avenue Lalla Yacout).

Finance and Currency.—The unit of currency is the dirham. Exchange rate (see p. 84).

The 1976 Ordinary Budget amounted to DH 8,213,000,000 (1975: DH 8,849,000,000).

Communications.—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due south from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,250 miles and traction is electric or diesel. An extensive network of well-surfaced roads covers all the main towns in the kingdom.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea. Royal-Air-Moroc and British Caledonian Airways operate services between Casablanca and London. There are air services between Tangier, Agadir, Marrakesh (seasonal) and London, and also between Tangier and Gibraltar connecting with London. Royal Air Inter operates internal services. There are also regular services by many airlines with many parts of the world.

Language.—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The foreign population is estimated at 112,000 (1971). The national daily press consists of 3 Arabic and 4 French newspapers.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a secular university at Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

CAPITAL.—ψ Rabat (population 565,000). The other chief towns are: ψ Casablanca (1,638,000);

Marrakesh (407,000); Fez (399,000); Meknes (376,000); Oujda (323,000); Tetuan (285,000). ψ Tangier (187,894), ψ Kenitra (139,105). The towns of Fez, Marrakesh and Meknes were capitals at various times in Morocco's history.

FLAG.—Red, with green pentagram (the Seal of Solomon). **NATIONAL DAY.**—March 3 (Anniversary of the Throne).

BRITISH EMBASSY Rabat

Ambassador Extraordinary and Plenipotentiary, His Excellency John Spenser Ritchie Duncan, C.M.G., M.B.E. (1975).

1st Secretary, P. K. Williams (*Head of Chancery and Consul*).

Defence Attaché, Lt.-Col. J. R. Nias.

2nd Secretaries, Mrs. A. Massouh, M.B.E.; C. P. M. Griffith.

Vice-Consul, J. S. Taylor.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Tangier and Casablanca.

British Council Representative, W. E. N. Kensdale, P.O. Box 427, 6 Avenue Moulay Youssef, Rabat.

MOZAMBIQUE (Moçambique)

President, Samora Moisés Machel.

Area and Population.—The People's Republic of Mozambique lies on the east coast of Africa, and is bounded by South Africa in the south and west, Rhodesia in the west, Zambia and Malawi in the north-west and Tanzania in the north. It has an area of 297,657 square miles, with a population (census 1970) of 8,233,834.

Government.—Mozambique, discovered by Vasco da Gama in 1498, and colonized by Portugal in 1505, achieved complete independence from Portugal on June 25, 1975. The date had been agreed in September 1974 by Portugal and *Frelimo*, (*Frente da Libertação de Moçambique*) the Marxist liberation movement. A transitional government, containing Portuguese and *Frelimo* elements, had been sworn in on Sept. 20, 1974.

A constitution was published on June 25, 1975, which stated, *inter alia*, that the President of *Frelimo* would be President of the People's Republic of Mozambique, and head of state. The legislative body would be the People's Assembly, consisting of 210 members.

It was announced that the basis of the economy would be collectivised agriculture. Main exports are sugar, cashew nuts, copra, cotton, tea and sisal.

CAPITAL.—ψ Maputo (pop. 441,363). Other main ports are Beira and Nacala.

FLAG.—Red, green, black and yellow diagonals, divided by white stripes; motif in top left-hand corner of a rifle crossed with a hoe, on a book inside a cog-wheel.

BRITISH EMBASSY

Av. Augusto Castilho, 310, Maputo.

Ambassador Extraordinary and Plenipotentiary, His Excellency John Henry Lewen (1975).

2nd Secretaries, C. R. L. de Chassiron; A. Vitery.

3rd Secretary, J. E. Kingsbury, M.B.E., B.E.M.

(NEJD. See Saudi Arabia)

NEPAL

Sovereign, King Birendra Bir Bikram Shah Deva, born 1945; succeeded January 31, 1972; crowned Feb. 24, 1975.

COUNCIL OF MINISTERS

Prime Minister and Minister for Private Affairs and Defence, Dr. Tulsī Gīrī.

Food, Agriculture and Irrigation, and Land Reforms, Khadga Bahadur Singh.

Foreign Affairs, Krishna Raj Aryal.

Home Affairs and Panchayat, Bhoj Raj Ghimlre.

Law and Justice and Communications, Jog Meher Shrestha.

Finance and General Administration, Dr. Bhekh Bahadur Thapa.

Ministers of State.—Harischandra Mahat (Water and Electricity); Mrs. Sushila Thapa (Health); Balamanghri Magar (Works and Transport); Bola Nath Jha (Forests); Dr. Harka Bahadur Gurung (Industry and Commerce and Education).

There are also four Assistant Ministers.

ROYAL NEPALESE EMBASSY IN LONDON

12A, Kensington Palace Gardens, W.8.

[01-229 6231]

Ambassador Extraordinary and Plenipotentiary, His Excellency The Rt. Hon. General Kiran Shumshere J. B. Rana, K.C.V.O., K.B.E. (1974).

1st Secretary, Bhanu Prasad Thapliya.

Military Attaché, Lt.-Col. Madan Krishna Kharel.

Attaché, Khadga Bahadur Khadka.

Nepal lies between India and Tibet on the slopes of the Himalayas, and includes Mt. Everest (29,028 ft.). It has a total area of 54,362 sq. miles and a population (1971 census) of 11,280,000. Amid the mountains lie many fertile valleys. The lower hills and Terai Plains are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. (For MAP, see p. 744.) Kathmandu, the capital, is connected with India by a road, the mountain section of which was built by India under the Colombo Plan, and to Tibet by a road from Kathmandu to Kodari on the border, which was built by the Chinese and opened on May 26, 1967. The Indian-aided Sunauli Pokhara road (128 miles) was inaugurated in April, 1972, and construction by the Chinese of a road between Kathmandu and Pokhara was opened in 1973. The East-West Highway (Mahendra Raj Marg) to run the length of the country, is now under construction. The road is complete from the Eastern border to Butwal except for two major bridges (which will restrict traffic during the monsoon). Work is in progress from Butwal westwards. Sections of the highway have been, or are being built, with aid from India, Great Britain, U.S.S.R., America and the Asian Development Bank.

Nepal exports rice and other grains, hides, oilseeds, ghi, cattle, jute, large quantities of timber, etc., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, etc. Nepalese imports from U.K. were valued at £1,485,000 in 1974 (1973, £1,532,000); exports to U.K., £452,000 (1973, £221,000).

Finance.—Revenue for the fiscal year 1975-76, mainly from land rent and taxes, is estimated at N.Rs.2,146,900,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. Since the sterling pound was floated, the exchange rate has fluctuated. On June 23, 1976, it was N.Rs.22-10 Buying Rate and N.Rs.22-60 Selling Rate=£1. There are three commercial banks with branches throughout Nepal.

The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Hinduism and Buddhism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha, whose ruler founded the present Nepalese dynasty, became predominant in 1768.

During the 1914-18 and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary movement in 1950 and 1951 achieved the aim of breaking the hereditary power of the Ranas and of restoring to the monarchy the powers which it had lost 104 years before. After ten years, during which various parties and individuals tried their hand at government, the late King Mahendra resumed direct powers on December 16, 1960, with the object of leading a united country to basic democracy.

The state of emergency ended on April 13, 1963, the King appointing a Cabinet consisting of a Prime Minister and seven other ministers, all of whom have seats in the indirectly elected *Rastriya Panchayat* (Parliament). A State Council (*Raj Sabha*) of 69 members, to advise the King on state affairs, constitutional matters and on the choice of the heir to the throne was also appointed on April 2, 1963. An Act was passed at the same time maintaining the existing ban on political parties.

CAPITAL.—Kathmandu, population (1971) 353,756. Other towns of importance are Morang (301,557), Lalitpur (154,998) and Bhaktapur (110,157). These population figures include some adjacent rural areas.

FLAG.—Double pennant of crimson with blue border on peaks; white moon with rays in centre of top peak; white quarter sun, recumbent in centre of bottom peak. NATIONAL DAY.—February 18.

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency Michael Scott, M.V.O. (1974).

1st Secretaries, R. E. Holloway (Head of Chancery and Consul); D. A. Spain, O.B.E. (Aid).

Defence Attaché, Lt.-Col. P. T. Bowring.

2nd Secretary, M. H. Connor.

Vice-Consul, P. H. Chase.

British Council Representative, D. M. Waterhouse, P.O.Box 640, Kanti Path, Kathmandu.

NETHERLANDS (or HOLLAND)

(Koninkrijk der Nederlanden)

Queen of the Netherlands, Her Majesty JULIANA, K.G., born April 30, 1909; married January 7, 1937, Prince Bernhard of Lippe-Biesterfeld, G.C.B., G.C.V.O., G.B.E. (THE PRINCE OF THE NETHERLANDS), born June 29, 1911; succeeded, September 4, 1948, upon the abdication of her mother Queen Wilhelmina who died Nov. 28, 1962. Issue:

- (1) H.R.H. Princess Beatrix Wilhelmina Amgard, G.C.V.O., born Jan. 31, 1938; married March 10, 1966, H.R.H. Prince Claus George Willem Otto Frederik Geert of the Netherlands, Jonkheer van Amberg; and has issue, Prince Willem Alexander, b. April 27, 1967; Prince Johan Friso, b. Sept. 25, 1968; Prince Constantijn Christof, b. Oct. 11, 1969.
- (2) H.R.H. Princess Irene Emma Elisabeth, born Aug. 5, 1939; married April 29, 1964, Prince Carlos Hugo of Bourbon-Parma and has issue, Prince Carlos, b. Jan. 27, 1970; Princess Margarita and Prince Jaime, b. Oct. 13, 1972; and Princess Maria Carolina Christina, b. June 23, 1974.
- (3) H.R.H. Princess Margriet Francisca, born (at Ottawa, Canada), Jan. 19, 1943; married Jan. 10, 1967, Mr. Pieter van Vollenhoven;

and has issue, Prince Maurits, b. April 17, 1968; and Prince Bernhard, b. Dec. 25, 1969; and Prince Pieter-Christiaan, b. March 22, 1972; and Prince Floris, b. April 10, 1975.
(4) H.R.H. Princess Maria Christina, born Feb. 18, 1947, married June, 28, 1975, Jorge Guillermo.

CABINET

Prime Minister and Minister of General Affairs, J. M. den Uyl (Labour).
Deputy Prime Minister and Minister of Justice, A. A. M. van Agt (Catholic).
Foreign Affairs, M. van der Stoep (Labour).
Home Affairs, W. F. de Gaay Fortman (Anti-Revolutionary).
Education and Sciences, J. A. van Kemenade (Labour).
Finance, W. F. Duisenberg (Labour).

Without Portfolio in charge of Science Policy, F. H. P. Trip (Radical).

NETHERLANDS EMBASSY IN LONDON

38 Hyde Park Gate, S.W.7
[01-584 5040]

Ambassador Extraordinary and Plenipotentiary, His Excellency Robbert Fack (1976).
Ministers Plenipotentiary, H. T. Schaapveld; C. H. A. Plug.
Counsellors, A. U. W. van Werven; A. P. van Walsum; D. J. van Wijnen, c.v.o.
1st Secretaries, R. de Beaufort, c.v.o.; J. Schoen; J. A. Krijgsman; J. A. van Alphen; J. Huisman.
Naval Attaché and Air Attaché, Capt. J. R. Roel.
Assistant Naval Attaché and Assistant Air Attaché, Cdr. H. Prinselaar.
Military Attaché, Col. W. Epke.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces plus Eastern and Southern Flevoland (reclaimed parts of the Ysselmeer) and containing a total area of 13,500 sq. miles (34,830 sq. km). The population in Jan. 1976 was estimated at 13,700,000. The live birth rate in Jan., 1975 was 13 per 1,000 of the population, and the death-rate was 8.3.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, Yssel and Scheldt.

The chief agricultural products are potatoes, wheat, rye, barley, corn, sugar beet, cattle, pigs, milk and milk products, cheese, butter, poultry, eggs, beans, peas, flax seed, vegetables, fruit, flower bulbs, and cut flowers and there is an important fishing industry. Among the principal industries are engineering, both mechanical and electrical, electronics, nuclear energy, petro-chemicals and plastics, shipbuilding, steel, textiles of all types, leather goods, electrical appliances, metal ware, furniture, paper, cigars, sugar, liquors, beer, clothing, rubber products, etc.

Production of crude oil (1975) 14,190,000,000,000 K.cal and refined oil 439,920,000,000,000 K.cal; steel 4,823,000,000 Kgs. and gas 90,853,000,000 cubic metres. Diamond cutting, though still an important industry, has declined considerably in importance.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I, a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Council; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 18 years and upwards. Members of the *Tweede Kamer* are paid.

General elections were held on Nov. 29, 1972 for the Second Chamber of the States-General. Party Representation is: Labour Party, 43; Catholic People's Party, 27; Liberal, 22; Anti-Revolutionary, 14; Democrats '66, 6; Christian Historical Union, 7; Democratic Socialists '70, 6; Communists, 7; Radicals, 7; Political Reformed, 3; Reformed Political Union, 2; Pacifist Socialists, 2; Farmers' Party, 3; Roman Catholic National Party, 1.

The First (Upper) Chamber of the States-General was elected by the Provincial Councils in June, 1974. Party Representation is: Labour, 21; Catholic People's Party, 16; Liberal, 12; Christian Historical Union, 7; Anti-Revolutionary, 6; Radicals, 4; Communists, 4; Democrats '66, 3; Political Reformed, 1; Farmers' Party, 1.

Defence.—The armed forces are almost entirely committed to NATO. As a result of a far-reaching defence review, completed in 1974 and revised in 1976 the three services are expected to be reduced in size but to be re-equipped over the next decade with new ships, aircraft and Army vehicles. Under this plan, the Royal Netherlands Navy is to be modernized to provide three escort groups, each consisting of a Command ship and six frigates, for use under NATO Command in the Atlantic and North Sea. The Royal Netherlands Army is to be reorganized into two active and one reserve Divisions each containing three Brigades. These units are fully integrated into the NATO Central Army Command. The Royal Netherlands Air Force comprises nine squadrons of jet aircraft, the principal roles of which are offensive support, air defence,

and reconnaissance. All these squadrons are assigned to the NATO Central Region. In addition there are various missile units stationed in Germany, also assigned to NATO.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used in the Netherlands Antilles. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eight national papers, four of which are morning papers, and there are many regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools are numerous, well equipped and well attended. The principal Universities are at Leiden, Utrecht, Groningen, Amsterdam (2), Nijmegen (R.C.) and Rotterdam, and there are technical Universities at Delft (polytechnic); Eindhoven (polytechnic); Enschede (polytechnic) Wageningen (agriculture).

Communications.—The total extent of navigable rivers including canals, is 4,359.9 km. and of metalled roads 86,354 km. In 1975 the total length of the railway system amounted to 3,832 km., of which 1,719 km. were electrified. The mercantile marine in 1975 consisted of 915 ships of total 3,223,000 gross registered tons. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the course of April, 1974, to April, 1975, was 369,232 km.

FINANCE

Estimates, 1976

Aggregate Budget Revenue. . . . *Fls.* 71,940,000,000

Aggregate Budget Expenditure. . . . *Fls.* 87,011,000,000

TRADE

The Dutch are traditionally a trading nation. *Entrepôt* trade, banking and shipping are of particular importance in their economy. The geographical position of the Netherlands, at the mouths of the Rhine, Meuse and Scheldt, brings a large volume of transit trade to and from the interior of Europe to Dutch ports.

Principal trading partners are the Federal Republic of Germany and Belgium/Luxemburg. Britain supplied 6.4 per cent. of Netherlands imports in 1975 (*Fls.* 5,096,679,000) and took 10.4 per cent. of Netherlands exports (*Fls.* 8,120,932,000).

In common with other members of the European Economic Community, the Netherlands on July 1, 1968, removed remaining duties on imports from EEC countries and brought down duties on imports from other countries into line with the Common External Tariff of the EEC.

Excluding the building industry, the index of industrial production in the Netherlands (1970=100) fell from 121 in 1974 to 115 in 1975 and the index of industrial production per worker (1970=100) fell from 132 in 1974 to 129 in 1974. In 1975 Dutch imports amounted to *Fls.* 76,500,000,000 and exports to *Fls.* 76,375,000,000 (excluding Belgium and Luxembourg).

Trade with U.K.

	1974	1975
Imports from U.K.	£982,300,000	£1,113,460,000
Exports to U.K.	£1,637,000,000	£1,872,819,000

SEAT OF GOVERNMENT, The Hague (Den Haag or, in full, 's-Gravenhage). Pop. (1975) 479,369.

PRINCIPAL TOWNS.— Ψ Amsterdam, 770,805; Ψ Rotterdam, 625,361; Utrecht, 269,574; Eindhoven, 191,842; Haariem, 168,243; Groningen,

167,571; Tilburg, 152,500; Nijmegen, 148,219; Enschede, 142,851; Arnhem, 126,585; Leiden, 97,154; Breda, 119,186; Maastricht, 111,314; Dordrecht, 101,279; Apeldoorn 131,979; Hilversum, 96,841.

FLAG.—Three horizontal bands of red, white and blue. **NATIONAL DAY.**—April 30 (The Queen's Birthday).

BRITISH EMBASSY

(Lange Voorhout, 10, The Hague)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir John Barnes, K.C.M.G., M.B.E. (1972).
Counsellors, J. A. Sankey; D. F. Ballentyne (Commercial).

Defence and Naval Attaché, Capt. J. R. Hill, R.N.

Air Attaché, Wing-Comdr. D. B. Hives.

Military Attaché, Lt. Col. P. G. Duffield.

1st Secretaries, D. J. Moss (Head of Chancery); J. D. B. McKibbin (Chancery); A. D. F. Findlay (Agriculture); W. K. Prendergast (Economic); K. H. Jones (Commercial); Miss P. M. Kelly (Information).

BRITISH CONSULAR OFFICES

Amsterdam, Johannes Vermeerstraat 7.—Consul-General, T. J. Trout, M.B.E.

Rotterdam, Parklaan 18.—Consul-General, W. F. B. Price.

There is an Honorary British Consul at Aruba, Netherlands Antilles.

British Council Representative, C. N. P. Powell, D.S.O., O.B.E., Keizersgracht 343, Amsterdam (Library).

OVERSEAS TERRITORIES

The Netherlands West Indies formerly comprised Surinam in South America and certain islands in the West Indies known as the *Netherlands Antilles* (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of the Netherlands Antilles is 394.1 sq. miles with a population of 234,400. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs as parts of the Netherlands Realm under the Crown. The statute was amended in 1975 to provide for the full independence of Surinam on November 25, 1975. Henceforth the Realm comprises the Netherlands and the Netherlands Antilles only.

Governor

Netherlands Antilles, Dr. B. M. Leito (1970).

Trade with U.K.

	1974	1975
Imports from U.K.	£8,684,000	£12,044,000
Exports to U.K.	£3,760,000	£3,219,000

The capital of Curaçao is Ψ Willemstad (pop. 154,928), of Aruba, Ψ Oranjestad; of Bonaire, Ψ Kralendijk; of St. Martin, Philipsburg; of Statius (St. Eustatius), Oranjestad; and of Saba, Bottom.

NICARAGUA

(República de Nicaragua)

President of the National Emergency Committee and Supreme Chief of the Armed Forces, Gen. Anastasio Somoza Debayle, assumed office, Dec. 1, 1974.
Foreign Affairs, Dr. Alejandro Montiel Arguello.

NICARAGUAN EMBASSY AND CONSULATE GENERAL

8 Gloucester Road, S.W.7

[01-584 3231]

Ambassador Extraordinary and Plenipotentiary (vacant).
Minister-Counsellor, Dr. José Rizo Castellón.

Area and Population.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between 10° 45'–15° N. lat. and 83° 40'–87° 38' W.

long., containing an area of 57,145 English square miles (see MAP, p. 872). It has a population of 2,400,000 of whom about threequarters are of mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent and the remaining 10 per cent. are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. From 1972 the country was headed by a three-man National Governing Council. A new Constitution, adopted in April 1974, provided for presidential elections to be held on Sept. 1, 1974. General de Division Anastasio Somoza Debayle was re-elected President (formerly in office, 1967–72) of the Republic, and took office on December 1, 1974 for a term expiring on April 31, 1981. Nicaragua is now a democratic representative republic divided into sixteen Departments and the National District, which includes Managua and its surroundings. The Government is divided into four branches: Legislative, Executive, Judicial and Electoral. Legislative power is vested in a Senate of 30 members and the ex-President, and a chamber of Deputies with not less than 70 members.

Agriculture and Industry.—The country is mainly agricultural. The major crops are cotton, coffee, sugar, sesame and bananas. Beans, rice, maize and ipecacuanha are also important. Livestock and timber production, already considerable, are expanding. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications.—There are 252 miles of railway, all on the Pacific side and approximately 5,500 miles of telegraph. There are 27 radio stations and two television stations in Managua. An automatic telephone system has been installed in the capital and extended to the provincial towns of León, Granada, Matagalpa, Chinandega, Diriamba and Jinotepe. The system in the capital, however, suffered heavy damage as a result of the earthquake in December 1972. A ground station for satellite communication was inaugurated in 1973. Transport except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway runs from the Corinto on the Pacific coast via Managua to Rama, where there is a natural waterway to Bluefields on the Atlantic. The country's main airport is at Managua. It is used by several airlines, including Panam and Lanica, the Nicaraguan national airline.

Language and Literature.—The official language of the country is Spanish. There are 2 daily newspapers published at Managua, apart from the official Gazette (*La Gaceta*) and 4 in the provinces. About 40 per cent. of the population are illiterate. There are universities at León and Managua.

Trade with U.K.

	1974	1975
Imports from U.K.	£7,706,000	£5,247,000
Exports to U.K.	1,385,000	9,980,000

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. The chief exports are cotton, coffee, beef, gold, sugar, cottonseed, bananas, copper and solubie coffee.

CAPITAL, Managua, population post-earthquake,

400,000. The centre was almost totally destroyed in the earthquake of December 1972, and reconstruction will take several years. León, 119,347; Granada, 100,334; Masaya, 96,830; Chinandega, 95,437; Bluefields, 17,706; Matagalpa, 65,928; Jinotepe, 15,957. Corinto (9,650), on the Pacific is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Somoza on the E. coast are mainly concerned in the fish, banana and timber trade to the United States.

FLAG.—Three horizontal bands, blue, white, blue (the arms of the Republic on the white band, displaying five volcanoes surmounted by a cap of liberty under a rainhow).

BRITISH REPRESENTATION

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Keith Hamylton Jones (resides at San José).

NIGER

(République du Niger)

President, Lt.-Col. Seyni Kountché, assumed power April 15, 1974.

Minister of Foreign Affairs, Capt. Moumouni Djermakoye Amadou.

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad, Nigeria, Benin, Mali and Upper Volta.

It has an area of about 459,000 square miles with a population (U.N. estimate, 1972) at 4,030,000. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djerma in the south-west and the nomadic Touaregs in the north.

The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961.

The constitution of Niger, adopted on November 8, 1960, provided for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly. In April 1974 Lt.-Col. Seyni Kountché seized power, suspended the Constitution, dissolved the National Assembly, and suppressed all political organizations. He then set up a Supreme Military Council with himself as President and eleven other officers together with a temporary Government in which all the major portfolios are held by military officers. Niger is a member of the United Nations, the *Conseil de l'Entente*, O.C.A.M., O.A.U. and C.E.A.O. (see Ivory Coast). The official language is French.

Finance.—The currency of Niger is the *franc CFA* (*Francs CFA* 50 = 1 French Franc). In 1975 the total budget amounted to *Francs CFA* 16,670,000,000.

Trade.—The cultivation of ground-nuts and the production of livestock are the main industries and provide the two main exports. A company formed by the Government, the French Atomic Energy Authority and private interests is exploiting uranium deposits at Arlit. Total value of trade in 1974 was: Imports, *Francs CFA* 23,144,000,000; Exports, *Francs CFA* 12,621,000,000. Imports from U.K. (1975)—£2,667,000; exports to U.K. (1975)—£1,485,000.

CAPITAL.—Niamey (100,000).

FLAG.—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe. **NATIONAL DAY.**—December 18. *British Ambassador, His Excellency Joe Booth Wright (resident at Abidjan).*

NORWAY

(Norge)

King, Olav V, K.G., K.T., G.C.B., G.C.V.O., b. July 2, 1903; succeeded, Sept. 21, 1957, on death of his father King Haakon VII; married March 21, 1929, Princess Marthe of Sweden (born March 29, 1901; died April 5, 1954); having issue, Harald (see below) and two daughters.

Heir-Apparent, H.R.H. Prince Harald, G.C.V.O., b. Feb. 21, 1937; m. Aug. 29, 1968, Sonja Haraldsen, and has issue Princess Märtha Louise, b. Sept. 22, 1971; and Prince Haakon Magnus, b. July 20, 1973.

ROYAL NORWEGIAN EMBASSY IN LONDON

Offices: 25 Belgrave Square, S.W.1
 [01-235 7151]

Ambassador Extraordinary and Plenipotentiary, His Excellency Frithjo Halfdan Jacobsen (1975).

Minister-Counsellor, Olav Sole.
Counsellors, Herman Pedersen (Press and Information), Semund Remøy (Fisheries); Øivind Johnsen (Consular); Hans Hoegh Henriksen (Commercial); Nils Oskar Dietz (Economic).

1st Secretaries, Jan Wessel Hegg; Sven Smaalund; Oscar Torgersen (Consular); D. R. Nielson (Commercial).

Defence Attaché, Lt.-Col. Jørgen Mørtvedt.
Asst. Defence Attaché, Maj. B. Schaathun.
2nd Secretaries, Ole F. Knudsen (Commercial); Arne Walther (Political).
Attachés, Sigfred Hungnes (Consular); Karl Foldøy (Welfare).

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,531 km. (Sweden 1,619 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 19 counties (*fylker*) and comprises an area of 323,877 sq. km. (125,016 sq. miles) with a population (estimated, Dec., 1973) of 3,972,990. In 1972 there were for every 1,000 inhabitants: 16.1 live births; 10.0 deaths; 11.8 deaths during first year of age (per 1,000 live births); 7.2 marriages.

The Norwegian coastline is extensive, deeply indented with numerous fjords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia.

Production.—The cultivated area is about 10,000 sq. km. (3.4 per cent. of total surface area); forests cover nearly 25 per cent.; the rest consists of high-land pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are manufactures, agriculture and forestry, fisheries, mining and shipping. In the fourth quarter of 1973, 1,660,000 persons were employed in Norwegian industry. Manufactures are aided by great resources of water power, estimated at 14,120 MW. Actual production in 1972 amounted to 67.8 GW*. Oil was discovered on the Norwegian continental shelf in 1968. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1973 the total catch amounted to 2,692,392 metric tons. In 1972 herring oil production amounted to 189,549 metric tons.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late

* Gigawatt = 1,000 million watts.

King Haakon was able to return from Great Britain to Oslo.

On October 14, 1973, Mr. Trygve Bratteli, leader of the Labour Party, formed his second minority Government since March 1971, in succession to the three-party coalition of Mr. Lars Korvald, which resigned on October 12.

Defence.—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. The period of compulsory national service is 15 months (without refresher training) in the Navy and Air Force, and 12 months (with refresher training) in the Army.

Education from 7 to 16 is free and compulsory in the "basic schools" maintained by the municipalities with State grants-in-aid. From 1976 all schools catering for the 16-19 age groups will be organised along comprehensive lines, the aim being to offer facilities for some 85-90 per cent. of the age groups. In 1971 47.4 per cent. of all 18 year olds received full time schooling. In addition to the many specialized schools and industrial and technical institutes, there are 29 colleges of education and 7 new regional colleges. There are 4 universities and 7 state colleges of university level, with a total in autumn 1973 of 36,694 students, 32.4 per cent. of them women. Oslo University (founded 1811) had 19,367; Bergen University (1948) 7,351, and Trondheim University (created in 1968 by merging the State Institute of Technology, the State College for Teachers, and the Royal Norwegian Society of Science Museum) 6,230; the newest, Tromsø University, started teaching in 1972 with 871 students in science, the humanities and medicine.

Language and Literature.—Norwegian is one of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludvig

Holberg (1684-1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Henrik A. Wergeland (1805-1845). Some of the famous names are Henrik Ibsen (1828-1906) the dramatist, Bjørnstjerne Bjørnson (1832-1910) journalist, dramatist and novelist and Nobel Prizewinner in 1903, Jonas Lie (1833-1908) novelist, Knut Hamsun (1859-1952) novelist and Nobel Prizewinner in 1920, and Sigrid Undset (1882-1949), champion of Norwegian womanhood and herself a Nobel Prizewinner in 1928. In 1973 there were 67 daily newspapers in the country with a total circulation of 1,555,000, and 77 newspapers published 1 to 5 times a week with a total circulation of 331,000.

Communications.—The total length of railways open at the end of 1971 was 4,242 km., excluding private lines. The extension of the main line from Fauske to Bodø, 60 miles north of the Arctic Circle, was completed in 1962 and opened on June 7 by King Olav. The number of telephones at the end of 1972 was 1,262,254 which is 32 telephones per 100 inhabitants. There are 74,796 km. of public roads in Norway (including urban streets). At the end of 1973, 1,468,517 road motor vehicles were registered.

Civil Aviation.—Scheduled airlines are operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartsselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerøes Flyveselskap A.S.

Mercantile Marine.—The Mercantile Marine, December 31, 1972, consisted of 2,117 vessels of 23,328,000 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

SVALBARD

(Spitsbergen and Bear Island)

By Treaty (Feb. 9, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, Norway assumed sovereignty. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantling of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. 873,406 metric tons of coal were shipped from Norwegian and Russian mines in Svalbard in 1973 (Norwegian mines, 411,503 metric tons).

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 355 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour 2 to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'–71° 9' N. lat. and 7° 53'–9° 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 48' S. lat. and 90° 35' W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNHILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

OMAN

(The Sultanate of Oman)

Sultan, Qaboos bin Said, succeeded on deposition of Sultan Said bin Talmur, July 23, 1970.

COUNCIL OF MINISTERS

Personal Adviser and Governor of the Capital, Sayyid Thuwaini bin Shihab.

Minister without Portfolio, Shaikh Braik bin Hamud al-Chafari.

(The Sultan acts as his own Minister of Foreign Affairs and Defence.)

OMAN EMBASSY IN LONDON

64 Ennismore Gardens, S.W.7.

[01-584 6782]

Ambassador, His Excellency Nassir Seif Ei Buaiy.

The independent Sultanate of Oman lies at the eastern corner of the Arabian Peninsula. Its seaboard is nearly 1,000 miles long and extends from near Tibet on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast which belongs to Sharjah and Fujairah of the United Arab Emirates. Ras Darbat Ali marks the boundary between the Sultanate and the People's Democratic Republic of Yemen. The Sultanate extends inland to the borders of the Rub al Khali, or "Empty Quarter" as the South Eastern Arabian Desert is called.

Physically and historically modern Oman can be split into two main parts, the North and the South, divided by a large tract of desert. Northern Oman has three main sections. The *Bahin*, the coastal plain, varies in width from 30 miles in the neighbourhood of Suwaiq to almost nothing at Muscat where the mountains descend abruptly to the sea. The plain is fertile, with date gardens extending over its full length of 150 miles. The dates, which ripen in early July, well before the Basra product, are famous for their flavour. The *Hajjar*, a mountain spine running from North East to South West, reaching nearly 10,000 feet in height on Jabal Akhdar. For the most part the mountains are barren, but numerous valleys penetrate the central massif of Jabal Akhdar and in these there is considerable cultivation irrigated by wells or a system of underground canals called *falaj*s which top the water table. The two plateaus leading from the western slopes of the mountains, the *Dhahirah* or back, in the north and the *Sharqia* in the south east also have centres of settlements and cultivation. They fall from an average height of 1,000 feet into sands of the Empty Quarter. Camels

raised in this area are prized throughout Arabia. The *Wahiba Sands* separate the North from the South with nearly 400 miles of inhospitable country crossed by one motorable track, the only land link. *Dhofar*, the Southern Province, is the only part of the Arabian Peninsula to be touched by the South West Monsoon. Temperatures are more moderate than in the North and sugar cane and coconuts are grown on the coastal plain, while cattle are bred on the mountains.

Muscat is the original capital of Oman, but Matrah, 3 miles away, where a new port has been built and where there is more room for expansion, is the commercial centre, and government offices and private houses are moving out to Ruwi and Qurum along the road to Seeb Airport. The other main towns on the northern coast are Sur, Khaburah and Sohar, all of which are ports but without sheltered anchorage. In the interior Nizwa and Rostaq, both former capitals, are the centres of population. The main town of Dhofar is Salalah, and Raysut and Murbat are the ports.

The area of Oman has been estimated at 120,000 sq. miles and the population at 750,000 (1973). The inhabitants of the North are for the most part Arab but along the coast there is a strong infusion of negro blood, while in the Capital Area which stretches from Muscat to Seeb there are large communities of Hindus, Khojas and Baluch, in addition to Zanzibaris of Omani origin. In Dhofar there is also an infusion of negro blood around Salalah, but in the mountains the inhabitants are either of pure Arab descent or belong to tribes of pre-Arab origin, the Qarra and Mahra, who speak their own dialects of semitic origin.

Since 1972 ships have been using Port Qaboos at Matrah, where 8 deep water berths have been constructed as part of the new harbour facilities (£20m.). In 1974, 361 vessels entered the port. 169 tankers called at the oil company port at Mina al Fahal and carried away over 106 million barrels of crude oil.

The telegraph office, an automatic telephone service in Muscat and Matrah and an international telephone service have been operated since January 1975 by OMANTELE. The Sultanate of Oman and Cable & Wireless share in the company in the ratio of 60/40. There are cleared or graded motorable tracks linking most main population centres of the country with the coast and with the towns of the United Arab Emirates. Over 300 miles of tarmac road are now open linking the capital area with the new international airport at Seeb and the town of Sohar and others are being built, for example to link Muscat and Nizwa.

Finance.—On May 7, 1970, a new currency was brought into circulation. The main unit is the *Rial* Oman RO 0.770 = £1 (July 1975). Each *Rial* is divided into 1,000 new *Baiza*. There are notes of *Rials* 10, 5, 1, $\frac{1}{2}$, $\frac{1}{4}$ and 100 *Baiza* and coins of *Baiza* 100, 50, 25, 10, 5 and 2. The Indian External Rupee ceased to be legal tender from May 21, 1970. The metric system was introduced in 1975 but there is also a local system in which one *kiyas* = the weight of six dollars or 5.9375 oz.; 24 *liyas* = one Muscat *maund*; 10 *maunds* = one *Farasala*; 200 *maunds* = 1 *Bahar*. Rice is sold by the bag, other cereals by the following measurement: 40 *Palis* = one *Farrah*; 20 *Farrahs* = one *Khandi*.

Trade with U.K.

	1974	1975
Imports from U.K.	£42,900,000	£97,994,000
Exports to U.K.	32,800,000	113,997,000

Commerce and Trade.—Trade is mainly with the United Kingdom, Japan, the Netherlands, U.S., West Germany and India. Imports for the year 1975 exceeded RO 231m. Chief imports were

machinery, cars, building materials, refined petroleum and food and telecommunications equipment.

Petroleum Development (Oman) Ltd. (owned 60 per cent. by Oman Government and 34 per cent. by Shell) began exporting oil on Aug. 1, 1967. Exports are currently at a rate of 368,000 barrels a day. Wintershall A.-G., Sun Oil and ELF-ERAP have off-shore concessions and Elf-Aquitane Sumitomo has a new inland oil concession.

Development.—For many years the Sultanate was a poor country with a total annual income of less than £1,000,000. The advent of oil revenues since 1967 and the change of régime in 1970 have improved prospects and have enabled the initiation of a wide-ranging development programme, especially concerned with health, education and communications. New hospitals have been completed in the main provincial centres. 180 primary schools were in operation in Sept. 1974. At Salalah, the main coastal town of the southern province of Dhofar, a new civil airport is planned. A metalled road joins Salalah to Taqa and the port of Raysut and several housing schemes have been completed. A thermal power station and desalination plant is under construction near Muscat and work has recently begun on a flour mill. There are also plans to build a cement factory near Muscat.

CAPITAL.—Muscat, population (estimated), 7,000.

FLAG.—Red, green and white with crossed daggers in red sector.

1st Secretary, Muhammad Abdul Wasay Faruqi.

Area and Population.—The Islamic Republic of Pakistan consists of country situated to the north-west of the Indian sub-continent, bordered by Iran, Afghanistan, the disputed territory of Kashmir and India. It covers a total area of 310,403 sq. miles. The Government of Pakistan census in 1972 showed a population figure of 64,892,000. (A mid-1976 estimate was 72,400,000.) Of these, about 88 per cent. are Moslems, about 6 per cent. Scheduled Caste Hindus, 5 per cent. Caste Hindus, under 1 per cent. Christians, and $\frac{1}{2}$ per cent. Buddhists.

Running through Pakistan are five great rivers, the Indus, Jhelum, Chenab, Ravi and Sutlej. The upper reaches of these rivers are in Kashmir, and their sources in the Himalayas.

Government.—Until April 17, 1972, when the Republic of Bangladesh seceded and was formally created to replace East Pakistan, Pakistan consisted of two geographical units, West and East Pakistan, which were separated by about 1,100 miles of Indian territory. Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received Royal Assent on July 18, 1947.

In terms of the Act the Dominion of Pakistan consisted of former territories of British India. The States of Bahawalpur and Khairpur (in Punjab and Sind), with a Muslim population of almost 80 per cent. and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) were defined by a Boundary Commission presided over by Sir Cyril Radcliffe, K.B.E., Q.C. (now Viscount Radcliffe). The following States also acceded to Pakistan: the Baluchistan States of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. (All these States have since been merged in the relevant Provinces of what is now Pakistan). The States of Junagadh and Manavadar which had acceded to Pakistan were occupied by India on November 8, 1947.

Pakistan became a Republic on March 23, 1956, when a Parliamentary Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law. General (later Field Marshal) Mohammed Ayub Khan, Commander-in-Chief of the Pakistan Army, was appointed the Chief Martial Law Administrator. On October 28, 1958, General Ayub Khan also became President of Pakistan. Following a period of unrest in both East and

West Pakistan, marked by rioting and massed strikes, President Ayub Khan on March 24, 1969, announced his resignation and handed over control of the country to the armed forces. The Commander-in-Chief, General Yahya Khan, proclaimed martial law on March 25 and appointed military governors for East and West Pakistan. The Constitution was abrogated, National and Provincial Assemblies dissolved and Provincial Governors dismissed. Law and order were rapidly restored. On March 31, 1969, Gen. Yahya Khan assumed the Presidency and formed a Council of Administration.

A Legal Framework Order, published by the President in March, 1970, laid down the principles on which a new Constitution for Pakistan would be based, including the division of West Pakistan into four provinces—The Punjab, Sind, Baluchistan and the North-West Frontier Province.

The first general elections ever held in Pakistan on a basis of "one man, one vote", were held on Dec. 7, 1970, with a postponement until January 17, 1971, in 9 East Pakistan constituencies which had been severely affected by the cyclone disaster in the Ganges delta. The Awami League in East Pakistan, led by Sheikh Mujibur Rahman, and the Pakistan People's Party in West Pakistan, led by Zulfikar Ali Bhutto, won large majorities, the latter party in Punjab and Sind. Following the elections there was total disagreement between the two main parties on the question of a new Constitution for Pakistan, Sheikh Mujib insisting on complete autonomy for East Pakistan. The proposed opening of the National Assembly at Dacca on March 25, 1971, was postponed by the President. Civil war broke out.

The unofficially styled "Bangladesh" seceded from the Government of Pakistan by unilateral declaration on March 26, 1971, and Sheikh Mujibur Rahman was flown to West Pakistan where he was in due course tried for treason. Meanwhile, in East Pakistan, fierce and brutal fighting continued between West Pakistan forces and Bengali guerrillas. Several million Bengali refugees fled to India. Fighting in East Pakistan intensified towards the end of the year and on December 3 it spread to West Pakistan where Pakistan and Indian forces were engaged. On December 16 the Pakistan forces on the eastern front surrendered, and the following day Pakistan accepted a cease-fire in the West. Following the resignation of Gen. Yahya Khan as President and the succession of Mr. Bhutto on December 20 Sheikh Mujibur Rahman was released from detention and flown to London on January 8, 1972. From there he proceeded to Dacca where he reasserted that Bangladesh was an independent country and that all ties with West Pakistan were severed. "The Democratic Government of Bangladesh" was formally proclaimed on April 17, 1972.

The United Kingdom had recognized Bangladesh on February 4; but already, on January 30, 1972, President Bhutto announced that Pakistan had left the Commonwealth as a protest against the decision by Britain, Australia and New Zealand to recognize Bangladesh. His decision, taken with regret, was, he said, "final and irrevocable" and "essential to Pakistan's self-respect".

A new Constitution was adopted by the National Assembly on April 10, 1973. It was enforced on Aug. 14, 1973 and provides for a federal parliamentary system with the President as constitutional head and the Prime Minister as chief executive.

Education.—Formal education in Pakistan is organized into five stages. These are five years of primary education (5-9 years), 3 years of middle or

lower secondary (general or vocational), 2 years of upper secondary, 2 years of higher secondary (intermediate) and 2 to 5 years of higher education in colleges and universities. Education is free to upper secondary level.

Examinations for the first two stages are conducted by the Provincial Education Departments for the award of certificates. Public examinations are conducted at secondary and higher secondary/intermediate levels by the concerned Boards of Intermediate and Secondary education. Public examinations are also held for scholarships and conducted by the Directorates of Education. Examinations at higher levels of education are conducted by the universities.

Provincial Governments are responsible for the total financial support of the government institutions and for grants to non-government institutions. But policy making is authorized by the national Government, which makes annual grants. The Government of Pakistan announced in March, 1972, the Education Policy, 1972-80, the main objects of which are to promote ideological solidarity and eradicate illiteracy. According to the Policy, education in classes I-VIII has been made free since Oct. 1, 1972. It is anticipated that primary education will become universal for boys and girls by 1984.

Education in classes IX and X has been made free in all schools from 1973. The present rate of increase in enrolment at secondary and intermediate levels is about 10 per cent. per annum. By 1980, it is estimated that the enrolment will be more than double, rising from 400,000 to 850,000 in classes IX and X and from 160,000 to 360,000 in classes XI and XII.

The number of existing school teachers is about 160,000. It is estimated that an additional 235,000 elementary and secondary school teachers and an additional 300,000 adult and further education teachers, men and women, will be needed by 1980. The number of primary schools in 1970 was 39,000. There were 3,435 secondary schools and 300 general colleges.

Production.—Pakistan's economy is chiefly based on agriculture which, following the secession of East Pakistan, is the occupation of about 54.8 per cent. of the labour force. The principal crops are cotton, rice, wheat, sugar cane, maize and tobacco. There are large deposits of rock salt. Pakistan has one of the longest irrigation systems in the world. The total area irrigated is 33 million acres.

Other Products.—Pakistan also produces hides and skins, leather, wool, fertilizers, paints and varnishes, soda ash, paper, cement, fish, carpets, sports goods, surgical appliances and engineering goods, including switchgear, transformers, cables and wires.

Trade.—Pakistan imported manufactured goods and raw materials to the value of \$2,13.7 million in 1974-75 and exported mainly agricultural products valued at \$1,039 million. Principal imports are listed as: machinery, food grains, iron and steel manufactures, transport equipment, electrical goods, mineral oils, chemicals, fertilizers, drugs and medicines, and vegetable oils. Principal exports are raw cotton yarn and cloth, carpets, sports goods, rice, raw skins and fish.

Trade with U.K.

	1974	1975
Imports from U.K....	£45,808,000	£77,203,000
Exports to U.K.....	39,779,000	38,012,000

Finance.—The unit of currency is the Rupee of 100 Paisa (1 crore = 10 million Rupees). For rate of exchange, see p. 83.

The State Bank has a capital of about

Rs.30,000,000 and is wholly owned by the Government. Total bank deposits in Pakistan in Dec. 1975, were Rs.2,793 crores.

The 1976-77 Budget anticipated Revenue receipts of Rs.1819.87 crores and expenditure (excluding development expenditure) of Rs.1614.71 crores.

Communications.—The main seaport is Karachi (annual handling capacity 6,000,000 tons of cargo). The main airport at Karachi occupies an important position on international trunk routes and is equipped with modern facilities and equipment. Pakistan International Airlines (P.I.A.) operates air services between the principal cities within the country as well as abroad.

Post and telegraph facilities are available to every country in the world.

CAPITAL.—Islamabad, pop. 235,000. Ψ Karachi (pop. 1972, 3,469,000) is the largest city and seaport; Lahore had a population of 2,148,000 at the 1972 Census.

FLAG.—The National Flag of Pakistan is dark green, with white vertical stripes at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star.

NATIONAL DAYS.—March 23 (Pakistan Day), August 14 (Independence Day).

BRITISH EMBASSY

Diplomatic Enclave, Ramna 5,

P.O. Box 1122, Islamabad.

Ambassador Extraordinary and Plenipotentiary, His Excellency John Christopher Wyndowe Bushell, C.M.G. (1976).

Counsellors, A. W. B. Strachan, O.B.E. (Economics); C. H. Imray (Head of Chancery).

Defence and Military Attaché, Brig. G. N. Powell.

PROVINCES OF THE ISLAMIC

REPUBLIC OF PAKISTAN

The Establishment of West Pakistan Act, 1955, came into force on October 3, 1955, and incorporated: (1) the former Governors' Provinces of the Punjab, North-West Frontier and Sind; (2) the former Chief Commissioners' Provinces of Baluchistan and Karachi; (3) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (4) the Tribal Areas of Baluchistan, the Punjab and the North-West Frontier and the States of Amb, Chitral, Dir and Swat, into the Province of West Pakistan with effect from October 14, 1955. The Province was reorganized with effect from July 1, 1970, into the four separate Provinces of Punjab (including Bahawalpur), Sind (including Karachi), North West Frontier Province and Baluchistan together with Islamabad Capital Territory and the Tribal Areas.

PANAMA

(República de Panama)

President of the Republic, Ing. Demetrio Lakas, appointed, Dec. 18, 1969, re-appointed, Oct. 11, 1972, for a term of six years.

Vice-President, Lic. Gerardo González Vernaza.

CABINET

Interior and Justice, Lic. Jorge E. Castro.

Foreign Affairs, Lic. Aquilino Boyd.

Finance, Sr. Miguel Sanchiz.

Commerce and Industry, Lic. Julio Sosa.

Public Works, Sr. Néstor T. Guerra.

Agricultural Development, Lt. Col. Rubén Darío Paredes.

Health, Sr. Abraham Saied.

Education, Sr. Aristides Royo.

Labour and Social Affairs, Lic. Adolfo Ahumada.

Planning, Sr. Nicolás Ardito Barletta.

Housing, Lic. Tomás Altamirano Duque.

Controller General, D. Castillo.

Minister to the Presidency, Lic. Fernando Manfredo.

PANAMANIAN EMBASSY IN LONDON

39 Montpellier Square, Knightsbridge, S.W.7

[01-589 8751]

Ambassador Extraordinary and Plenipotentiary, His Excellency Roger Decerega (1976).

Minister-Counsellor, Sr. Miguel Chavez-Boyd.

1st Secretary, Sra. Carlina Roquebert (Consular).

Attachés, Sr. Fernando Perez Bedolla; Srta. Nitzia

Eugenia Martín; Sr. Hugo Torrijos Richa; Sra.

Brunhilda de García-Navarro; Sra. Cecillia G.

Revilla de Prudhoe; Sr. Marcos A. Villareal; Sr.

Carlos Domingo de Puy.

CONSULATE—Wheatshaf House, 4 Carmelite Street, E.C.4 [01-353 4792/3].

There are also Consular Offices of the Republic at Glasgow and Liverpool.

Panama lies on the isthmus of that name which connects N. and S. America (see MAP, p. 842). After a revolt (Nov. 3, 1903) it declared its independence from Colombia and established a separate Government.

Since 1968 control of Panama has been increasingly taken over by Gen. Omar Torrijos, Commander of the National Guard, following a military coup. On October 11, 1972, at an assembly of representatives from the 505 electoral districts, the President and Vice-President were installed for a six-year term, and General Torrijos was designated as "Leader of the Revolution" with wide overriding powers.

The area of the Republic is 31,890 sq. m., the population (1975 est.) 1,678,000. The soil is moderately fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, sugar, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years. In 1972 there were 1,906 official primary schools and 65 private primary schools; 69 official secondary and 138 private secondary schools. Primary students numbered 273,324 in official and 14,241 in private schools in 1971; secondary students, 60,352 official and 26,443 private. The average number of students at Panama University in 1973 was 21,216 and at the Catholic University (Universidad Santa María Le Antigua) about 718.

Language and Literature.—The official language is Spanish. There are 4 Spanish language and 2 English language newspapers published daily in the capital.

Finance.—Budget estimates for 1976 showed revenue and expenditure in balance at B.463,000,000.

The monetary unit is the *Balboa* (= \$1 U.S.); no Panamanian paper currency is issued, and U.S. dollar bills of all values are in circulation in the Republic and in the Canal Zone.

Trade with U.K.†

	1973	1974
Imports from U.K....	£13,654,000	£12,196,000
Exports to U.K.....	773,000	2,092,000

† Including Colon Free Zone.

The imports are mostly manufactured goods, machinery, lubricants, chemicals and foodstuffs; exports are bananas, petroleum products, shrimps, sugar, meat and fishmeal.

CAPITAL, Panamá City. Population (1970 Census, preliminary), 418,000.

FLAG.—Four quarters; white with red star (top, next staff), red (in fly), blue (below, next staff) and white with red star. NATIONAL DAY.—November 3.

Dependencies of Panama.—Taboga Island (area 4 sq. miles) is a popular tourist resort some 12 miles from the Pacific entrance to the Panama Canal. Tourist facilities are also being developed in the Las Perlas Archipelago in the Gulf of Panama. There is a penal settlement at Guardia on the island of Coliba (area 19 sq. miles) in the Gulf of Chiriqui.

BRITISH EMBASSY

(120 Via España, Panama)

Ambassador Extraordinary and Plenipotentiary, His Excellency Robert Michael John (1974).

President of Central Bank, Dr. César Romeo Acosta.

PARAGUAYAN EMBASSY IN LONDON

Braemar Lodge, Cornwall Gardens, S.W.7

[01-937 1253]

Ambassador Extraordinary and Plenipotentiary, His Excellency Numa Alcides Mallorquin (1969).

Minister-Counsellor and Consul General, Bernardo Galeano.

1st Secretaries, Jorge A. Colmán; Mrs. G. S. de Jauregui.

There is a Paraguayan Consulate in Liverpool.

Area and Population.—Paraguay is an inland sub-tropical State of South America, situated between Argentina, Bolivia and Brazil.

The area is computed at 157,000 square miles, with a population (est. 1975) of 2,500,000.

Eastern Paraguay consists of a series of plains, intersected by abrupt ranges of hills, none of which exceeds 2,300 feet above sea level. The Paraguay and Alto Paraná rivers are normally navigable for vessels of 6 to 7 feet draught. Some of the tributary streams are also navigable. The Pilcomayo river is navigable for small craft for 180 miles from Asunción. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests.

TRADE

	1973 Balboas	1974 Balboas
Imports.....	448,881,000	767,800,000
Exports.....	135,655,000	203,100,000

The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucú," or "endless," is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is a flat plain, rising uniformly towards its western boundary to a height of 1,140 feet; it suffers much from floods and still more from drought, but the building of dams and reservoirs has converted part of it into good pasture for cattle raising.

Government.—In 1535 Paraguay was settled as a Spanish possession. In 1811 it declared its independence of Spain.

The 1967 constitution provides for a two-chamber parliament consisting of a 30-member Senate and a 60-member Chamber of Deputies. Two-thirds of the seats in each chamber are allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18.

The President is elected for 5 years and may be re-elected for a further term. He appoints the Cabinet, which exercises all the functions of government. During parliamentary recess it can govern by decree through the Council of State, the members of which are representative of the Government, the armed forces and various other bodies.

The first elections under the new constitution were held on Feb. 11, 1968.

Production.—About three-quarters of the population are engaged in agriculture and cattle raising. Canned and frozen beef, timber, tobacco, cotton, soya, edible oils and essential oils are the main exports. The forests contain many varieties of timber which find a good market abroad. Paraguay's hydroelectric power station at Acaray produces 90,000 kW. of which a surplus is exported to Argentina and Brazil.

Brazil and Paraguay are carrying out a project to develop the potential of the River Paraná—annual output is planned at 10.7 million kWh. Similarly, Paraguay and Argentina are to develop the hydroelectric complex at the Yacyretá rapids. This has a potential annual output of 3.5 million kWh. Work on the Itaipú hydroelectric scheme began early in 1976 and work on the Jacyretá scheme is scheduled to begin in 1977.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). This service is liable to cancellation without warning when the river is low or in flood. There are direct shipping services between Hamburg, Antwerp, Amsterdam and Asunción; New York, Philadelphia, Baltimore and Asunción; and Liverpool, London and Asunción. Eight airlines operate services from Asunción.

There are 810 km. of asphalted roads in Paraguay, connecting Asunción with São Paulo (26 hrs.) via the Bridge of Friendship and Foz de Yguazú and with Buenos Aires (24 hrs.) via Puerto Pilcomayo, and about 4,050 miles of earth roads in fairly good condition, but liable to be closed or to become impassable in wet weather. A 1000 km. unpaved road links Asunción with the Bolivian border. There are services to Buenos Aires, São Paulo and Paranaguá, a port on the Brazilian coast.

Defence.—There is a permanent military force of about 14,000 all ranks, most of whom are conscripts doing their military service; and about 6,500 armed police (again mostly conscripts). Three gunboats and a number of small armed launches patrol inland waters.

Language and Literature.—Spanish is the official language of the country but outside the larger towns *Guarani*, the language of the largest single unit of original Indian inhabitants, is widely spoken. Three morning, one afternoon and three weekly newspapers are published in Asunción.

Education.—In 1976 there were 2,850 primary schools. They had 15,100 teachers and 458,000 students. The National University in Asunción had in 1976 a teaching staff of 1,125 and 9,280 students. The Catholic University had 4,560 students and about 438 teachers.

	FINANCE	
	1975	1976
	Guaranies	Guaranies
Revenue.....	50,481,591,141	61,655,000,000
Expenditure.....	49,259,984,666	59,175,000,000

Currency.—A free exchange system was introduced in August, 1957. The rate of exchange in June 1976 was Gs.225=£1. (See also p. 84.)

Trade.—The imports are chiefly articles of food and drink, consumer goods, textiles, vehicles and machinery. Main exports: Meat and by-products, tobacco, seeds, yerba maté, maize, fruit (lemons, grapefruit, oranges), coffee, cotton fibre, essential oils, vegetable oil, castor seed oil, and timber.

	Trade with U.K.	
	1974	1975
Imports from U.K.....	£4,452,000	£6,484,000
Exports to U.K.....	2,466,000	6,837,000

CAPITAL. Ψ Asunción, about 1,000 miles up the River Paraguay from Buenos Aires. Pop. (census, 1970), 437,000; other centres being Ψ Encarnación, 47,333; Concepción, 52,826; and Villarica 38,052.

FLAG.—Three horizontal bands, red, white, blue with the National seal on the obverse white band and the Treasury seal on the reverse white band.

NATIONAL DAY.—May 14.

PERUVIAN EMBASSY AND CONSULATE

52, Sloane Street, S.W.1

[01-235 1917]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Don Adhemar Montagne (1969).

Minister, Sr. Dr. Don Alejandro San Martín Caro.
Naval Attaché, Rear-Adm. Daniel Masías Abadía.

Air and Military Attaché, Maj. Gen. José Aste.

Area and Population.—Peru is a maritime Republic of South America, situated between $0^{\circ} 00' 48''$ and $18^{\circ} 21' 00''$ S. latitude and between $68^{\circ} 39' 27''$ and $81^{\circ} 20' 13''$ W. longitude. The area of the Republic including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles with a total population (census, 1972) of 14,121,564.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being Huascarán (22,211 feet), Huandoy (20,855 feet), Ausangate (20,235 feet), Misti volcano (18,364 feet), Hualcan (20,000 feet), Chachani (19,037 feet), Antajasha (18,020 feet), Pichupichu (17,724 feet), and Mount Meigs (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population.

In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quechua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The Constitution provides for the election for six years of a President by direct vote of the people and of a Congress composed of a Senate and Chamber of Deputies.

Presidential and Congressional elections on a basis of proportional representation were held on June 9, 1963, and a new President, Sr. Belaúnde Terry, held office from July 28 until deposed by a revolutionary junta on Oct. 3, 1968, and sent out of the country. The junta appointed a Cabinet composed of officers from the three armed services and named General Velasco as President. In a bloodless coup on August 29, 1975, Gen. Velasco was replaced by Gen. Francisco Morales Bermúdez.

Production.—Agriculture employing 46 per cent. of the labour force accounted for only about 14.5 per cent. of the Gross Domestic Product in 1973. The chief crops are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat, barley, grapes and coffee. Mineral exports in 1974 were valued at U.S.\$562,103,000 and included lead, zinc, copper, iron ore and silver.

Peru is normally the world's largest exporter of fishmeal. The value of fishmeal exports dropped from U.S.\$267,000,000 in 1971 to U.S.\$233,254,000 in 1972 and U.S.\$135,894,000 in 1973 because of adverse climatic conditions, but is now recovering.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, via Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout.

The first railway was opened in 1850 and the 2,400 miles of track are now administered by the Government. There is also steam navigation on the Ucayali (see Andean Highway above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription (2 years), and numbers about 45,000 of all ranks. Armoured units are equipped with American, Russian and French vehicles. Engineer units are employed on the construction of roadways in Peru using American equipment. **Navy.**—The Navy consists of 3 cruisers; 4 destroyers; 2 frigates; 2 corvettes; 6 U.S. submarines and 2 German submarines, the latter added to the fleet in 1974 and 1975; 4 LST's; 5 river gun-boats; 4 fleet oilers; 4 fleet auxiliaries; 2 river transports; 14 patrol boats; 2 patrol launches; 1 floating dock and 2 tugs. The main Naval base is

in Callao and supports all ships of the Fleet. There are training establishments in Callao and La Punta. The Naval Air Arm consists of U.S. and French helicopters; U.S. anti-submarine aircraft and DC3's. *Air Force*.—The Air Force is equipped with British Hunter and Canberra aircraft; American training, fighter and transport aircraft plus helicopters; French Mirage aircraft and Alouette helicopters. There are military airfields at Talara, Piura, Chiclayo, Lima, Pisco, Joya, Iquitos and Arequipa plus a seaplane base at Iquitos. There are also a Civil Guard and a Republican Guard whose members number respectively 30,000 and 5,000.

Education.—Education is compulsory and free for both sexes between the ages of 6 and 15. In 1972 a new Law of Education radically changed the structure of the system. There are to be three levels: Initial (up to 6 years), Basic (6–15 years) and Higher (over 15 years). Basic education corresponds approximately to the former Primary and Secondary level pupils. In 1975 there were 3,729,028 pupils attending in the normal basic level of education. State basic education schools numbered 19,167 with 106,496 teachers. Technical education numbered 250,788 pupils, 377 schools and 10,320 teachers. Private basic schools numbered 3,517, teachers 11,535 and pupils 376,169. A new system of Higher Schools of Professional Education is being developed to cater for pupils from 15 years to 18 or 19 years. In 1975 there were 9 such schools, with 234 teachers and 5,523 pupils. These schools will replace the top three classes of the former secondary school (16–18 years) and from them pupils may enter University. In 1975 there were 22 state (134,979 students) and 11 private (51,532 students) Universities in Peru: 14 of the universities are located in Lima: the oldest, San Marcos, was founded in 1551.

Language and Literature.—Spanish, the language of the original Spanish stock from which the governing and professional classes are mainly recruited, was formerly the only official language of the country. However, in May 1975, the Quechua language was declared by Decree Law as the second official tongue. Quechua and Aymara are widely spoken by more than half the population of the country. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879–1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1976 there were 7 main morning papers, including the official gazette *El Peruano*, one afternoon paper daily and about 50 provincial papers.

Finance.—The unit of currency is the *Sol* of 100 centavos. For rate of exchange, see p. 84.

	1973–74 (two years)
Public revenue.....	Soles 143,219,000,000
Public expenditure.....	146,219,000,000

In 1975, Peru's balance of payments deficit was U.S.\$565,077,000.

Trade.—Import trade of Peru in 1975 totalled U.S.\$2,491,000,000 and exports U.S.\$1,378,460,000.

Trade with U.K.

	1974	1975
Imports from U.K....	£21,884,000	£51,034,000
Exports to U.K.....	35,788,000	28,794,000

The principal imports are machinery, foodstuffs, metal and manufactured metal goods, chemicals and pharmaceutical products. The chief exports are minerals and metals, fishmeal, sugar, cotton and coffee.

9a Palace Green, W.8

[01-937 3646]

Ambassador Extraordinary and Plenipotentiary (vacant).

Minister-Counsellor, Pablo A. Araque.

Armed Forces Attaché, Capt. Artemio Tadiar.

3rd Secretary, Hector K. Villarreal.

Area and Population.—The Philippines are situated between 21° 20'–4° 30' N. lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon.....	40,422	Mindoro.....	3,759
Mindanao.....	36,538	Leyte.....	2,786
Samar.....	5,050	Cebu.....	1,703
Negros.....	4,906	Bohol.....	1,492
Palawan.....	4,550	Masbate.....	1,262
Panay.....	4,446		

Other groups in the Republic are the Sulu islands (Capital, Jolo), Babuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines was estimated in 1975 at 42,517,300.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Moslems, in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish, American and Indian.

The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas", after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946 with a presidential form of government based on the American system. On January 17, 1973, a revised constitution, providing for a parliamentary form of government with a unicameral legislative, was proclaimed after its ratification in a national referendum. Since September 21, 1972, however, the country has been under martial law: the President, who has also assumed the position of Prime Minister under the new constitution, has postponed indefinitely elections for the new National Assembly, while he attempts to carry out a programme of social reforms. In the meantime government functions by presidential decrees.

Language and Literature.—The official languages are Pilipino and English. Pilipino, the national language, is based on Tagalog, one of the Malay-Polynesian languages which according to the 1960 census is spoken by 44 per cent. of the population. English, which is the language of government and

of instruction in secondary and university education, is spoken by at least 40 per cent. of the population. Spanish, which ceased to be an official language in 1973, is now spoken by only 2 per cent. 73 per cent. of the population are literate. There is a National Library in the capital with branches in other urban centres and a flourishing press. Education accounts for about 30 per cent. of local expenditure in the national budget. Secondary and higher education is extensive and there are 37 private universities recognized by the Government, including the Dominican University of Santo Thomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there are also 6 State-supported universities, including the University of the Philippines, founded 1908. It is estimated that students at private and state colleges and universities in 1975-76 will number 1,234,170.

Roads and Railways.—Communications suffered

serious damage during the War of 1941-45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system is undergoing rehabilitation and extension and, including all types of services, covered 74,768 kilometres in 1972. In 1974 there were 792,253 road vehicles registered. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 740 miles are still operated. The Philippine National Railway, on Luzon Island, has been converted to diesel traction.

Shipping.—There are 92 ports of entry in the Philippines and 3,377 vessels of various types, totalling 591,443 tons, are engaged in inter-island traffic. There are 154 ocean-going vessels registered in the Philippines, totalling 740,233 gross tons.

Civil Aviation.—Air transport plays a key part in inter-island travel and an important one in communications overseas. Philippine Air Lines have regular flights to Hong Kong, Taipei, Sydney, Singapore, Saigon, and Tokyo and operate four trans-Pacific flights a week to San Francisco, in addition to inter-island services. Air Manila (Inc.) also operate charter international and local air services.

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber. There is, however, an increasing number of manufacturing industries and it is the policy of the Government to diversify its economy.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, bananas, embroderies and tobacco.

CAPITAL.— Ψ Manila, In the island of Luzon: population (1975): City area, 1,438,252; Manila with suburbs (incl. Area and Population.—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles. In 1975, it was estimated to be 34,186,000. Roman Catholicism is the religion of 95 per cent. of the inhabitants.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795.

in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznań and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17,

1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952, and was modified in February 1976. It changed the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion were recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński. Dissatisfaction with the régime and conditions of

life led to riots in Poznań in June, 1956, and subsequently M. Władysław Gomułka, who had been expelled from the Party in 1949, was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszyński was allowed to resume his functions. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government, still led by M. Cyrankiewicz, took office. Elections to the *Sejm* have been held in 1961, 1965, 1972 and 1976. The expression of severe popular discontent in December 1970, in the form of rioting in the northern parts of Gdansk, Gdynia and Szczecin led to the ousting of Gomułka, and substantial Government and Party changes followed. Edward Gierk succeeded as First Secretary.

Education.—Elementary education (ages 7-15) is compulsory and free. Secondary education is optional and free. There are universities at Kraków, Warsaw, Poznań, Łódź, Wrocław, Lublin and Toruń and a considerable number of other towns.

Language and Literature.—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being used. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism, whose chief Polish exponent was Adam Mickiewicz, was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prize-winner for literature in 1905, Bolesław Prus (1847-1912), and Stanisław Reymont (1868-1925), Nobel Prize-winner in 1924. There are now 42 daily papers published in Poland, 11 of them in Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 99 per cent. of Polish industry is stated to be "socialized", but 74.1 per cent. of agricultural land is privately farmed.

EMBASSY IN LONDON

11 Belgrave Square, S.W.1

[01-235 5331]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Albano Pines Fernandes Nogueira.
Counsellor, Sr. J. D. N. Barata, O.B.E.
1st Secretary, Sr. F. A. Guimarães.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, covering an area of 34,000 square miles. It lies between 36° 58'–42° 12' N. lat. and 6° 11' 48'–9° 20' 45' W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The population (including the Azores and Madeira) of 8,611, 125 (1970 census) has been swollen by the arrival since 1974 of approximately 600,000–700,000 refugees from the former colonies.

New statutes granted greater autonomy to the North Atlantic islands of the Azores and Madeira in 1976.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government.

After the fall of the monarchy in 1910, a period of great political instability ensued until eventually the military stepped in. In 1928 Dr. Salazar was appointed Finance Minister, with very wide powers, and in 1932 he became Prime Minister. The Constitution of 1933 gave formal expression to the corporative "Estado Novo" (New State) which he came to personify. Dr. Caetano succeeded Salazar as Prime Minister in 1968 but his failure to

liberalize the régime or to provide any alternative to continuing the wars in the African colonies resulted in his government's overthrow by a military coup on April 25, 1974. The next two years were characterized by great political turmoil. No fewer than 6 provisional governments held office between April 1974 and July 1976. The first post-coup President, General Spínola, resigned in September 1974, and was succeeded by General Costa Gomes, who remained in office until a presidential election was held in 1976.

During 1975 Communist and other extreme left elements, both civilian and military, made determined and repeated attempts to control the Government. The political situation was confused and unstable for most of the year, but with the failure of an attempted coup by the extreme left in November 1975 the situation began to become more stable. Elections for a Constituent Assembly were held on April 25, 1975, and for the Assembly of the Republic on April 25, 1976. Both showed that the Communists and the extreme left generally lacked wide support among the population. The results of the 1976 elections were:

Socialist Party	106 seats (34.87%)
Popular Democratic Party	73 „ (24.38%)
Centre Social Democrats	42 „ (16%)
Communist Party	40 „ (14.35%)
Popular Democratic Union	1 „ (1.67%)

General Ramalho Eanes was elected President on June 27, 1976, with 61.54% of the vote.

Defence.—All physically fit males are liable for military service, but conscription is becoming increasingly selective as the armed forces are being greatly reduced following the end of the colonial wars, and reorganized and re-equipped for a conventional national defence rôle. The present strength of the Army is about 33,000. One brigade is earmarked for N.A.T.O. service. The Navy consists of about 12,000 officers and men, including 2,000 marines, manning about 70 craft of various types, many of which are obsolete. The present serving strength of the Air Force is about 9,000, (including paratroops) and about 200–300 aircraft of various types.

Education is free and compulsory for six years from the age of 7. Secondary education is mainly conducted in State lycées, commercial and industrial schools, but there are also private schools. There are also military, naval, technical and other special schools. There are old established Universities at Coimbra (founded in 1290), Oporto and Lisbon. Three new Universities have been established at Lisbon, Braga and Aveiro.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil, and is the *lingua franca* of Angola, Mozambique and Guinea-Bissau.

Portuguese language and literature reached the culminating point of their development in the *Lusiadas* (dealing with the voyage of Vasco da Gama) and other works of Camões (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is flourishing.

Newspapers and Broadcasting.—Many new newspapers have sprung up since 1974 and there are now 10 main daily newspapers in Lisbon and 3 in Oporto, and 3 main weekly newspapers. Most have been losing money and the Government has announced plans for a radical reorganization of the newspaper industry. There are 2 TV channels (both black and white) and 5 radio stations (3 state controlled) broadcasting nationwide.

Civil aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There are direct flights between London and Faro in the Algarve.

Agriculture.—The chief agricultural products are cork, maize, wheat, rye, rice, oats, barley, potatoes, beans, onions, olives, oranges, lemons, figs, almonds, tomatoes, timber, port wine and table wines. There are extensive forests of pine, cork, eucalyptus and chestnut covering about 20 per cent. of the total area of the country.

Industry.—The country is so far only moderately industrialized, but is fairly rapidly extending its industries. The principal manufactures, some of which are still protected by high tariffs, are textiles, clothing and footwear, machinery (including electric machinery and transport equipment), foodstuffs (tomato concentrates and canned fish), chemicals, fertilizers, wood, cork, furniture, cement, glassware and pottery. There is a modern steelworks, and two modern and very large shipbuilding and repair yards at Lisbon and Setúbal working mainly for foreign ship-owners. There are several hydro-electric power stations and a new thermal power station. *Minerals*.—The principal mineral products are pyrites, wolfram, tin, iron ores, copper and sodium and calcium minerals.

Finance.—Portugal is a member of the European Monetary Agreement, the World Bank, the International Monetary Fund and the International Finance Corporation. The country has substantial, but declining, gold and foreign exchange reserves. The 1976 Budget showed a deficit of *Escudos* 34,778 million. Total revenue, *Escudos* 105,521 million; expenditure *Escudos* 70,743 million.

Currency.—*Escudo* (of 100 *Centavos*). *Conto* consists of 1,000 *escudos*. The rate of exchange (July 1976) was *Escudos* 55.50 = £1 (see also p. 83).

Trade.—Total trade of Portugal in 1975 amounted to imports valued at *Escudos* 97,692 million and exports valued at *Escudos* 49,310 million. The British share of the Portuguese import market amounted to 8.7 per cent. and the United Kingdom imported 21.1 per cent. of all Portuguese exports.

Portugal is a member of EFTA, GATT and OECD. Portugal has signed a Trade Agreement with EEC and the Government has announced its intention of achieving full membership of the E.E.C. The principal imports are cereals, meat, raw and semi-manufactured iron and steel, industrial machinery, chemicals, crude oil, motor vehicles, dried cod fish and raw materials for textiles.

The principal exports for 1975 were textiles, foodstuffs, timber, cork, diamonds, electrical and other machinery, and chemicals.

Trade with U.K.

	1974	1975
Imports from U.K....	£185,637,000	£157,600,000
Exports to U.K.....	236,176,000	201,081,000

CAPITAL, Ψ Lisbon. Population (estimated, 1970), 783,000. Ψ Oporto 310,000; Ψ Setúbal 100,000.

Lisbon distance 1,110 miles; transit 50 hours; by air, 2½ hours.

FLAG.—Vertical band of green (next staff) and square of red, bearing arms of the Republic, framed. **NATIONAL DAY**.—April 25.

BRITISH EMBASSY

Lisbon

Ambassador Extraordinary and Plenipotentiary, His

Excellency The Hon. (Richard) John (McMoran) Wilson, C.M.G. (1976).

Counsellors, J. B. Urc, M.V.O.; L. E. Hanham (Consul-General).

Defence and Military Attaché, Lt. Col. C. A. S. Hinton.

Naval and Air Attaché, Cdr. P. B. Reynolds, O.B.E., R.N.

1st Secretaries, G. E. Clark (Head of Chancery); G. C. Gullan (Commercial); Lt. Col. F. G. E. Walford, O.B.E. (Economic); D. Dawson (Labour); R. P. Ralph (Information).

2nd Secretaries, R. Mowforth (Commercial); D. W. Fitzwilliam (Administration); C. H. Woodland (Consul); S. A. Brooks.

British Council Representative, M. G. Elterton.

MADEIRA AND THE AZORES

Madeira and The Azores are two administratively autonomous provinces of Portugal, having locally elected Assemblies and Governments.

Madeira is a group of islands in the Atlantic Ocean about 520 miles south-west of Lisbon, and consist of Madeira Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles with a population of 253,220 (1970). Ψ Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 54,068; Machico (10,905). Trade with U.K., 1972: Imports from U.K., £1,745,000; Exports, £866,000.

The Azores are a group of 9 islands (Flores, Corvo, Terceira, São Jorge, Pico, Faial, Graciosa, São Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 291,028 (1970). Ψ Ponta Delgada, the capital of the group, has a population of 21,347. Other ports are Ψ Angra, in Terceira, (16,476) and Ψ Horta (2,509). Trade with U.K., 1972: Imports from U.K., £609,000; Exports, £63,000.

PORTUGUESE OVERSEAS PROVINCES

The former Portuguese overseas territories of Guinea-Bissau, Mozambique and Angola achieved independence in 1974, 1975 and 1976 respectively.

Ψ MACAU, in China, on an island in the Canton River, has an area of 5 square miles and a population (1970) of 248,316.

After some months of confused fighting between rival indigenous factions, PORTUGUESE TIMOR (the eastern part of the island) was incorporated into Indonesia in July 1976. Situated in the Malay Archipelago, it has an area of 7,329 square miles, with a population (1970), 610,541. Capital, Ψ Dili, pop. 7,000.

QATAR

Amir of Qatar, H.H. Sheikh Khalifa Bin Hamad Al-Thani; assumed power February 22, 1972 (also Prime Minister and Minister of Defence).

COUNCIL OF MINISTERS

Minister of Education, Shaikh Jassem Bin Hamad Al-Thani.

Foreign Affairs, Shaikh Suhaim Bin Hamad Al-Thani.

Finance and Petroleum Affairs, Shaikh Abdul Aziz bin Khalifa Al Thani.

Municipal Affairs, Shaikh Mohamed Bin Jabir Al-Thani.

Economy and Commerce, Shaikh Naser Bin Khaled Al-Thani.

Justice (vacant).

Electricity and Water, Shaikh Jassem Bin Moh'd Al-Thani.

Industry and Agriculture, Shalkh Falsal Bin Thani Al-Thani.
Health, Sayed Khalid Bin Mohammed Al-Mana.
Public Works, Sayed Khaled Bin Abdullah Al-Attiah.
Labour and Social Welfare Affairs, Sayed Ail Bin Ahmed Al-Ansari.
Communications and Transport, Sayed Abdullah Bin Naser Al-Suwaidi.
Information, Sayed Issa Ghanim Al-Kawari.

EMBASSY IN LONDON
 10 Reeves Mews, W.1.
 [01-499 8831]

Ambassador Extraordinary and Plenipotentiary, His Excellency Shaikh Ahmed Bin Saif Al-Thani.
Counsellor, Ahmed Abdullah Al-Khal.

Until 1971, Qatar was one of the nine independent Emirates in the Arabian Gulf in special treaty relations with the Government of the United Kingdom. In that year, with the withdrawal of H.M. Forces from the area, these special treaty relations were terminated. On April 2, 1970 a Provisional Constitution for Qatar was proclaimed, providing for the establishment of a Council of Ministers and for the formation of a 20-member Consultative Council to assist the Council of Ministers in running the affairs of the State. The first Cabinet was formed of 10 members on May 29, 1970. A permanent constitution will be formulated in the light of experience gained during the current transitional stage to supersede the Provisional Constitution. Qatar is a member of the Arab League as well as of the United Nations.

The state of Qatar covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 4,000 sq. miles, with a population estimated in 1975 at about 180,000.

The great majority of the population is concentrated in the urban district of the capital Doha. Only a small minority still pursue the traditional life of the semi-nomadic tribesmen and fisherfolk. There are townships on the coast at Khor, Dukhan, Wakra and Umm-Said. There are many gardens and farms near Doha and to the North and encouragement is being given to the development of agriculture.

Doha is an expanding town with good shopping facilities and services and an airport built to international standards. Regular air services connect Qatar with Bahrain and the United Arab Emirates, Kuwait, Muscat, Iran, Saudi Arabia, Jordan, Lebanon, Egypt, the Indian sub-continent and Europe.

In April, 1973, the new Qatar Riyal was introduced.

Current industrial development projects include a fertilizer plant, a cement factory, and a natural gas liquids plant. In addition the government is developing an iron and steel and ore reduction plant, and a petrochemical complex. The township of Umm-Said is being developed as an industrial area. Qatar is also rapidly expanding its infrastructure including electrical generation and water distillation, roads, ports, hotels, houses, and Government buildings.

The Qatar Broadcasting Authority transmits on medium, shortwave, and V.H.F. Regular television transmissions in colour began in 1974 and a second channel is planned.

Oil deposits on land are being exploited by the Qatar Petroleum Company who first shipped oil on December 31, 1949. An offshore concession is held by the Shell Company of Qatar which is exporting oil from its terminal on Haiul Island at a rate of about 7,000,000 long tons per annum.

Further offshore concessions are held by a consortium headed by Wintershall, who also hold an on-shore concession. On January 1, 1975, the Amir signed an act establishing the Qatar General Petroleum Corporation, empowering it to establish subsidiaries, offices or agencies inside or outside Qatar. It will be responsible for all oil production in the country once current negotiations for a 100 per cent. takeover of Q.P.C. and Shell Company of Qatar are completed.

Trade with U.K.

	1974	1975
Imports from U.K.	£22,100,000	£55,700,000

RUMANIAN EMBASSY IN LONDON

4 Palace Green, W.8

[01-937 9666]

Ambassador Extraordinary and Plenipotentiary, His Excellency Petrot Popa (1973).

Counsellors, Ioan Amariei (Political); Adrian Gheorghiu; Nicu Bujor (Political).

Military Attaché, Col. Cornel Popa.

Area and Population.—Rumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* under the *Treaty of Paris* (April, 1856). The area of Rumania is 237,500 sq. km. and the population in July, 1973 was 20,827,525.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality

was recognized as an independent State, and part of the *Dobruja* (which had been occupied by the Rumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914-18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crisana-Maramures, these additions of territory being confirmed in the *Treaty of St. Germain*, 1919, and the *Treaty of Petit Trianon*, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Rumania ceded to Bulgaria the portion of Southern Dobruja (about 3,000 sq. miles) taken from Bulgaria in 1913. Rumania became "The Rumanian People's Republic" in December, 1947, on the abdication of King Michael.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in February, 1957; in March, 1961, and in March, 1965. A new Constitution was approved by the Grand National Assembly in 1965 when the name of the state was changed to The Socialist Republic of Rumania. The Constitution states (Art. 3) that the leading political force of the whole society is the Rumanian Communist Party. The Constitution was modified in March, 1974.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax and hemp. Agriculture and sheep and cattle raising are the principal industries of Rumania, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive, and the timber industry is important.

Socialization of agriculture was completed when plans for collectivization were fulfilled in the spring of 1962, some three years ahead of the planned date.

Natural Resources and Industry.—Before the war petroleum and agriculture were the backbone of the Rumanian economy. Though the production of both industries has increased, they no longer hold the same dominant position. Rumania's oil resources enabled her to produce 14,287,000 tons of crude oil in 1973 and there are plentiful supplies of natural gas, together with various mineral deposits including coal, iron ore, bauxite, lead, zinc, copper and uranium in quantities which allow a substantial part of the requirements of industry to be met from local resources. Since 1948 industrialization has proceeded rapidly and the State is well on the way to establishing a mixed industrial economy. Heavy investments have been made in electrical power, the chemical industry, the metallurgical industry and the engineering industry and growing attention is being paid to light industry. The economy is certainly organized on the basis of Five-Year Plans which cover all branches of national activity including investment and production.

1973 production figures were: crude oil, 14,287,000 tons; coal, 26,664,000 tons; electric power, 46,779 million kWh; methane gas, 23,639 million cu. metres; steel, 8,161,000 tons; pig iron, 5,713,000 tons; wheat, 5,528,500 tons; maize, 7,397,200 tons; sugar-beet, 4,380,200 tons.

Language and Literature.—Rumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the Council for Socialist Culture and Education, which has the status of a Ministry. In 1972, 75 daily newspapers were published. The leading religion is that of the Rumanian Orthodox Church; the Roman Catholics and some Protestant denominations are of importance numerically. The Jewish community has declined through emigration.

Education is free and nominally compulsory, with 3,308,381 in attendance in 1973-74, including 143,656 in higher education. There are Universities at Bucharest, Iasi, Cluj, Timisoara, Craiova and Brasov. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galati and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

Communications.—In 1972 there were 11,023 km. of railway open for traffic. The mercantile marine, as a result of war losses, seizure and reparations, was reduced to a few moderate-sized sea-going steamers and a number of coastal and river craft. The principal ports are Constanta (on the Black Sea), Sulina (on the Danube Estuary), Galati, the most important, Braila, Giurgiu and Turnu Severin. Rumania is a member of the Danube Commission whose seat is at Budapest.

FINANCE

	1971 Lei	1973 Lei
Revenue.....	153,382,200,000	175,972,100,000
Expenditure....	145,432,300,000	168,090,700,000

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Rumanian *Lei* (of 100 *Bani*) had been revalued three times since the war by Feb. 1, 1954. With a 189.33 per cent. premium on all "capitalist" currencies for non-commercial transactions, the effective exchange rate on May 1975 was *Lei* 28.08 = £1. (See also p. 84.)

TRADE

	1972 Lei	1973 Lei
Imports.....	14,465,200,000	17,417,700,000
Exports.....	14,373,000,000	18,575,000,000

No complete figures for foreign trade have been published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber, cattle, machines and industrial equipment. Trade with U.K., although relatively small, has increased notably since the signature of an Anglo-Rumanian trade arrangement in 1960. External trade with Communist countries dropped from 80 per cent. in 1960 to 50 per cent. in 1970.

Trade with U.K.

	1973	1974
Imports from U.K.....	£34,160,000	£33,485,000
Exports to U.K.....	31,710,000	34,252,000

CAPITAL, Bucharest, on the Dimbovitza, population (1975), 1,528,562. Other large towns are: Cluj (212,690); Timisoara (204,687); Iasi (202,052); Brasov (193,089); Ψ Galati (191,111); Craiova (188,333); Ploiesti (171,668); Ψ Braila (161,057); Oradea (148,587); Arad (142,960); Sibiu (127,146); Tirgu-Mures (109,873); Baia Mare (86,602).

FLAG.—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band. NATIONAL DAY.—August 23 (Liberation Day, 1944).

BRITISH EMBASSY

24 Strada Jules Michelet, Bucharest 22
Ambassador Extraordinary and Plenipotentiary, His Excellency Jeffrey Charles Petersen, C.M.G. (1975).
Counsellor, R. B. Dorman (Commercial).
Defence, Naval and Military Attaché, Lt.-Col. B. A. Allum.

RWANDA

(Republic of Rwanda)

President, Major General Juvenal Habyarimana, assumed office, July 5, 1973.

Rwanda became an independent republic on July 1, 1962. Formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, it has an area of 10,169 sq. miles and a population of 4,000,000, mainly of the Bahutu tribe, with Batutsi and Batwa minorities. Coffee, cotton and tea are grown and there is some mineral production. Hides, extract of quinine and pyrethrum flowers are also exported.

A University was opened at Butare in 1963.

The currency is the *Rwanda franc*. In 1975 total imports were valued at *Rw.Fr.* 8,3662,00,000; total exports, *Rw.Fr.* 5,640,000,000; imports from U.K. 1974, *Rw.Fr.* 226,700,000; exports to U.K., *Rw.Fr.* 91,100,000. Revenue in 1975 totalled: *Rw.Fr.* 13,213,000,000; Expenditure *Rw.Fr.* 14,447,000,000.

At a referendum held in September, 1961, under supervision of the United Nations, a large majority voted against the retention of the monarchy which was accordingly abolished on Oct. 2, 1961. Elections for a new Legislative Assembly were also held in September, 1961, and the Assembly elected M. Kayibanda as President of the National Council, to hold office as Head of State and Head of the Government. He was deposed in 1973, and replaced by a military government under Maj.-Gen. Juvenal Habyarimana. Admission of Rwanda to membership of the United Nations was approved on July 26, 1962.

CAPITAL.—Kigali (7,000).

FLAG.—Three vertical bands, red, yellow and green with letter R on yellow band.

NATIONAL DAY.—July 1.

British Ambassador, His Excellency James Patrick Ivan Hennessy, C.M.G., O.B.E. (resident at Kampala).

EL SALVADOR

(República de El Salvador)

President, Col. Arturo Armando Molina; elected February 20, 1972; assumed office July 1, 1972, for a five-year term.

Vice-President, Dr. Enrique Mayorga Rivas.

Minister of Foreign Affairs, Ing. Mauricio Borgo-novo.

SALVADOREAN EMBASSY AND CONSULATE

9B Portland Place, W.1.

[01-636 9563]

Ambassador Extraordinary and Plenipotentiary, His Excellency Alvaro Ernesto Martinez (1974).

1st Secretary and Consul, Señor Lic. Oscar Manuel Gutiérrez-Rosales.

Attachés, Dr. David Castro-Escobar; Dr. Rafael Lemus-Corleto.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an area of 7,722 square miles with a population (July 1973) of 3,863,793. El Salvador is therefore a densely populated country with some 500 persons per square mile. It is divided into 14 Departments. (For MAP, see p. 84.)

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 3, 1965, when considerable damage was done to San Salvador.

The principal river is the Río Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Cotepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

Government.—El Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. Under a new Constitution adopted in 1950, the President is elected for six years and the Legislature for two. In the legislative elections under proportional representation held in March, 1974, the result was, 36 deputies of the Official party, and 16 opposition deputies. In the presidential elections held on February 20, 1972, the candidate of the Official Party, Col. Arturo Armando Molina, secured a narrow margin over his closest opponent, Ingeniero José Napoléon Duarte, therefore his election had to be confirmed by the National Assembly.

Agriculture.—The principal cash crops are coffee, which is grown under shade-trees principally on the slopes of the volcanoes, cotton, which is cultivated on the coastal plains, and cane sugar. Also cultivated are maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags. Diversification and modernization of agriculture are in progress, including the exportation of meat, principally to the U.S.A.

Industry.—There is growing industrialization and existing factories make textiles, constructional steel, furniture, cement and household items. El Salvador is a leading exporter to the Central American Common Market, of which she is a member. The first trade zone was inaugurated in November 1974 and the National Assembly approved a new Export Development Law. The free-trade scheme has already attracted several industries.

Education.—The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

Communications.—The former El Salvador Railways and the Salvadorean Section of International Railways of Central America have been merged under the Executive Autonomous Port Commission (CEPA) which will also administer the previously foreign-owned port of Cutoco. The new railroad organization is styled FENADESAL. There is continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The roads are paved and in good condition. There are good motor roads between Acajutla, the principal port, and the capital (23 miles), and between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. Pan American Airways, TACA, LANICA, COPA, AVIATECA, SAM, Iberia and LACSA connect El Salvador with the rest of the world. British Airways, SABENA, Iberia and other important airway companies are represented in San Salvador. The Ilopango international airport can receive jet aircraft. The new Cascatlán Airport is expected to be finished in 1977.

There are post and telegraph offices throughout the country. There are many broadcasting stations and six television stations.

SAN MARINO

(Repubblica di San Marino)

Regents, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON

Saxone House, 74A Regent St., W.1.

Consul General, Sir Charles Forte.

Vice-Consul, R. E. Rudge.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious stonecutter of Dalmatia in the 4th century. The Republic always resisted the Papal claims, and those of neighbouring dukedoms, during the 15th-18th centuries, and its integrity and sovereignty is recognized and respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Heads of State. The Great and General Council, a legislative body of 60 members, is elected by a universal suffrage for a term of 5 years. A Council of Twelve forms in certain cases a Supreme Court of Justice. The area is approximately 23 square miles, the population (June, 1973) is 21,000. The city of San Marino, on the slope of Monte Titano, has three towers, a fine church and Government palace, a theatre and museums. The principal products are wine, cereals, and cattle, and the main industries are ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

FLAG.—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

SÃO TOMÉ AND PRÍNCIPE

President and Minister of Agriculture, Land Reform and Defence, Dr. Manuel Pinto da Costa.

Prime Minister, Economic Co-ordination and Tourism, Sr. Miguel Trouvoadá.

Cultural Counsellor, Abdul Azl Mansour Al-Turki.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd becoming also King of the Hijaz.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hijaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with a population (U.N. estimate, 1969) of 7,200,000.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hijaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Nejd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at about 3,500,000, the majority being Muslims of the Wahhabi persuasion. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa, in 1938, and in 1973 total production of crude oil for the whole country, including off-shore concessions, averaged some 8,000,000 barrels per day. Exports other than oil are negligible. The capital is Riyadh (666,840), and the principal trading centres are Hofuf (the chief town of the Hasa province) (101,271). Ψ Al Khobar (44,817) and Ψ Dammam (127,844) on the Persian Gulf littoral, Anaiza, Buralda, Hail and Jauif. The old ports (Persian Gulf) were Ψ Qatif, Ψ Uqair and Ψ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ψ Ras Tannura, and a civil deep-water port, with a pier seven miles long, was brought into use at Ψ Dammam in 1950. A railway is in operation from Dammam through Hofuf to Riyadh.

The Hijaz ("The Boundary"—between Nejd and Tihamah) extends from Asir in S. to Jordan in N., and from the Red Sea and the Gulf of 'Aqaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of Al-Wajh, Yanba'u, Raabigh and Jizzan. Jeddah contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Saudi-Arabian section of the Hijaz Railway. The Oasis of Khaiibar, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at

Kast al Yahudl. The importance of the Hijaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (al Madinah al Munawwarah, "The City of Light"), once the terminus of the Hijaz Railway, 820 miles from Damascus, has a permanent population of about 137,000 and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birth-place of the Prophet, is 45 miles east of the seaport of Jeddah, and about 200 miles south of Medina, and has a population estimated at 301,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muslim religion, in which is the black stone "given by Gabriel to Abraham", placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. 1,557,867 Muslim pilgrims visited Mecca during the ten day "Haj" period in 1975. Ψ Jeddah (561,104) is the principal port and commercial centre of Saudi Arabia. A new deep-water port was completed in 1971.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hijaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meidi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. Capital, Abha (30,150).

Finance and Trade.—Oil is the main source of the country's wealth, though customs revenues and other taxes, as well as the foreign exchange accruing from the annual Pilgrimage to Mecca, also bring in a significant income. In the fiscal year 1974-75 the budget was balanced at SR 98,247,000,000, of which 96 per cent. was derived from oil. 57.7 per cent. of total Government expenditure was allocated to development projects. The rate of exchange was SR 7.60 = £1 (June 1976). (See also p. 84.) The currency is strong, and backed by gold and foreign exchange reserves, second only to West Germany, of more than £14,000,000,000. With few exceptions, such as the ban on alcohol, there are no restrictions on trade or payments including foreign exchange transactions. There is no public debt. Imports in 1974 were valued at SR 15,286,000,000, the United States of America being the leading supplier followed by Japan, West Germany and the United Kingdom.

Trade with U.K.

	1974	1975
Imports from U.K. . . .	£119,608,000	£109,700,000
Exports to U.K.	£1,178,149,000	856,600,000

Communications.—The railway from the port of Dammam to the oilfields at Abqaiq and through Hofuf to Riyadh was opened late in 1951. Metalled roads connect all the main cities in the northern half of the country, and a road linking Abha, in the south, to this network will shortly be opened. The Government-owned Saudi Arabian Airlines, in association with Transworld Airlines operate Lockheed Tristars, Douglas DC3, Conqair 340, and Boeing 707, 720 and 737 aircraft. Scheduled services are flown to all the main towns of the country. There are first class airports at Dhahran, where a new airport was opened in 1962, and at Jeddah. A new airport is under construction at Jeddah and a new airport is planned for Riyadh; other airports, for internal flights, are also in the planning stage. Saudi

Arabian Airlines have an extensive overseas operation including 15 flights to London per week. A large number of international airlines operate into Jeddah and Dhahran.

Education.—With four exceptions, all schools are Government-run. In 1974 there were (including schools for both boys and girls) a total of 2,675 primary, 589 intermediate, 160 general secondary and 11 vocational secondary schools. There are Islamic Universities in Medina and Riyadh and Universities in Jeddah (with a branch at Mecca), Riyadh and Dammam. There is a University of Petroleum and Minerals at Dhahran. Education at all levels is free.

CAPITAL.—Riyadh, population about 666,840. **SAUDI ARABIAN FLAG.**—Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

SENEGAL EMBASSY IN LONDON

11 Phillimore Gardens, W.8.

[01-937 0925]

Ambassador Extraordinary and Plenipotentiary (vacant).

Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea in the south. (For MAP, see p. 871.) It has an area of 77,814 sq. miles and a population (estimated, 1970) of 3,800,000.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. Foundation

of a Federation of Mali, to consist of the State of Senegal, (French) Soudan, Benin and Upper Volta, was announced in January, 1959, and the Federation came into existence on April 4, consisting of Senegal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20, 1960. However, these arrangements proved short-lived as on August 22, 1960, the Senegal Legislative Assembly formally approved measures to secede from the Federation and continue as an independent state. In March, 1963 (after an attempted *coup d'état* by the then Prime Minister in the previous December) a new constitution was approved giving executive powers to the President, on the lines of the present French constitution. Senegal's principal exports are ground-nuts (raw and processed) and phosphates.

Trade with U.K.

SOMALIA

(Somali Democratic Republic)

President of the Supreme Revolutionary Council, Maj.-Gen. Mohamed Siyad Barre, assumed office Oct. 21, 1969.

EMBASSY

60 Portland Place, W.1

[01-580 7148]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ahmed Mohamed Adan (1975).

1st Secretary, Abdi Haji Ahmed Liban.

The Somali Democratic Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Cape Guardafui (12° N.); and on the Gulf of Aden to the boundary with the Territory of the Afars and Issas. Somalia is bounded on the west by the Territory of the Afars and Issas, Ethiopia and Kenya and covers an area of approximately 246,000 sq. miles. The population, of which a large proportion is nomadic, is estimated (June, 1969) at 2,730,000. Livestock raising is the main occupation in Somalia and there is a modest export trade in livestock on the hoof, skins and hides. Italy imports the bulk of the banana crop, the second biggest export under agreement with the Somali Government. Imports from U.K. in 1973 totalled £2,050,000.

Government.—The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July 1, 1960. British rule in Somaliland lasted

from 1887 until June 26, 1960, with the exception of a short period in 1940-41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 1941 until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to an end on July 1, 1960, when Somalia became independent and united with the former British Somaliland Protectorate under the title of the Somali Republic. Aden Abdulle Osman was returned to office as the first substantive President of the Republic in 1961, after a year as provisional President. Following national elections on June 10, 1967, Dr. Shermarke succeeded to the Presidency and on July 6 appointed Mr. Egal as Prime Minister. On October 15, 1969, the President was assassinated and Army commanders assisted by the police took over the Government without resistance. A Revolutionary Council under Major. Gen. Siad assumed full control of the state. The Somali Socialist Revolutionary Party became the only legal political organization following its inaugural congress in June 1976. The Government thenceforth comprised a Political Bureau, of five members including the President, 17 Departmental Ministers and a Minister of State.

CAPITAL.—Mogadishu (Mogadiscio), population (estimated 1971), 220,000. Other towns are Hargeisa (50,000), Kisimayu (18,000), ΨBerbera (19,000) and Burao (10,000).

FLAG.—Five-pointed white star on blue ground.

NATIONAL DAY.—October 21.

Air Attaché, Col. A. J. S. Van der Lith.

Area and Population.—The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Molopo and Orange Rivers (34° 50' 22" South latitude) to the Cape of Good Hope, with the exception of the Transkei, Lesotho, Botswana and Swaziland, and part of Mozambique. It has a total area of 1,180,042 square kilometres (455,616 square miles) and the Transkei has an area of 41,000 sq. km. (15,830 sq. miles) and a total population (census of May, 1970) of 22,469,000 (White 3,835,000; African, 15,918,000; Coloured, 2,074,000 and Asian, 642,000). Mid-year estimates for 1974 show a total population of 24,920,000 (White, 4,160,000; African, 17,745,000; Coloured, 2,306,000 and Asian, 642,000). Populations of the Provinces at the 1970 census were: Cape Province (278,380 sq. miles), 4,293,000; Natal (33,578 sq. miles), 2,164,000; Transvaal (109,621 sq. miles), 6,478,000; Orange Free State (49,866 sq. miles), 1,682,120; African Homelands, 7,138,197.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the ex-Portuguese possessions; and on the west by the districts of Babanango, Vryheid and Ngotshe and by Swaziland. In 1951, the appointment was confirmed of Cyprian Bekuzulu, grandson of Dinizulu and great-grandson of Cetewayo, as Paramount Chief of the Zulus in Natal.

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Table Mountain (3,582 feet), while the Great Swartberg and Langeberg run in parallel lines from west to east of the Cape Province. Between these two ranges and the Roggeveld and Nieuwveld ranges to the north is the Great Karroo Plateau, which is bounded on the east by the Sneeuwberg, containing the highest summit in the province (Kompasberg, 7,800 feet). In the east are ranges which join the Drakensberg (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occa-

sional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Bankenveld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces. The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between the Territory of South West Africa and the Cape Province. The *Limpopo*, or *Crocodile River*, in the north, rises in the Transvaal and flows into the Indian Ocean through Mozambique (Portuguese East Africa.) Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

Government.—The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, under the South Africa Act, 1909, in a legislative union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as a member of the British Commonwealth until 1961. A referendum held among white voters on October 5, 1960, decided by a narrow majority in favour of Republican status. 1,633,772 votes were cast—a poll of 90.73 per cent.—with 52.05 per cent. in favour. The Union of South Africa became a republic on May 31, 1961, and withdrew from the Commonwealth. On October 26, 1976, the Transkei became the first of the Bantu homelands to be given independence.

The *Senate* as reconstituted by the Senate Act, 1960, consists of 54 members, appointed or elected for a term of five years. Eleven are appointed by the Government (8 for the Republic, 2 for South West Africa and a Coloured representative). Forty-three are elected (Transvaal, 14; Cape Province, 11; Natal and Orange Free State, each 8; and South West Africa, 2). The Act of 1960 reintroduced proportional representation at elections to the Senate and excluded Native representation.

The *House of Assembly* consists of 171 elected members, 55 of whom represent the Cape of Good Hope, 20 Natal, 76 Transvaal, 14 the Orange Free State, and 6 South West Africa. Members of both Houses must be South African citizens of white descent. White female franchise was introduced under the provision of Act No. 18 of 1930. Cape Bantu voters ceased to be entitled to elect 3 members in Nov. 1959.

In July 1976 the party representation in the House of Assembly was as follows: Nationalist Party, 123; United Party, 36; Progressive Reform Party, 12.

Defence.—The South Africa Defence Act, 1957, became law on Nov. 1, 1958. This Act, as amended in 1961, provides that every citizen between the ages of 17 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of peace training with the Citizen Force or Commandos spread over a period of four consecutive years. Thereafter citizens are required to serve with the Reserve for a prescribed period of time.

Education.—The Provinces have been relieved of all vocational education (technical and industrial), and the Departments of Cultural Affairs and Higher Education under the Minister are concerned with

universities, technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools. State-aided vocational schools and State and State-aided special schools for the physically handicapped.

Communications.—The total open mileage of Government-owned railway lines at the end of March 1975 was 22,149 km., of which 4,650 km. were electrified. Working expenditure (excluding depreciation) amounted to R.1,540,924,918 (railways, harbours, airways, pipelines and road transport). Internal air services are operated between all the major centres in South and South West Africa.

Production and Trade.—Final figures for the principal crops produced in 1974-75 were: Wheat, 1,596,000 metric tons; Maize, 9,100,000 mt.; Barley, 50,000 mt.; Oats, 103,000 mt.; ground nuts, 179,050 mt.

Mineral production is of the greatest importance in the South African economy. Value of mineral production in 1975: gold, R.2,560,395,000; diamonds, 7,295,133 metric carats; silver, R.10,012,472. Production in 1975: coal, 67,848,885 metric tons; copper, 178,927 metric tons; tin, concentrates and metallic, 6,432 metric tons; asbestos, 354,710 metric tons.

Value of trade in 1975. Imports, R.5,568,471,716; Exports, R.3,906,945,372.

Trade with U.K.

	1974	1975
Imports from U.K.	£526,291,000	£684,769,000
Exports to U.K.	465,194,000	540,289,000

Currency.—The South African £ reached parity with the £ sterling in 1946. A new decimal currency the *Rand* (R.) was introduced in South Africa on Feb. 14, 1961, with a par value of 10s(50p). Sterling. Rate of exchange (July 1975) R.1:55=£1.

Finance.—Estimated revenue for the year ended March 31, 1977, was RM6,455 (1976 RM5,909); total estimated expenditure RM7,792 (1976 RM6,679). The total government debit as at December 31, 1975 was RM10,094.

CAPITAL.—The administrative seat of the Government is PRETORIA, Transvaal; population (census 1970), 563,384; the seat of the Legislature is CAPE TOWN, population (1970), 1,107,764. Cape Town is 5,979 miles from Southampton; transit by mail steamship 11 days, and by air mail two days. There is a modern and well-equipped aerodrome seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance. Other large towns are Johannesburg, Transvaal (1,441,335); Ψ Durban, Natal, the largest seaport (350,935); Ψ Port Elizabeth, Cape (475,869); Germiston, Transvaal (221,972); BLOEMFONTEIN, capital of Orange Free State (182,329); Springs, Transvaal (142,812); Benoni Transvaal (151,204); Ψ East London, Cape (124,763); Welkom, O.F.S. (210,629); and PIETERMARITZBURG, capital of Natal (160,847).

FLAG.—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full.

NATIONAL DAY.—May 31.

Cultural Attaché and British Council Representative, D. J. Sharp, 170 Pine Street, Pretoria.

There are British Consular Offices at Cape Town, Johannesburg, Durban, East London and Port Elizabeth.

South West Africa

Administrator, B. J. van der Walt.

South West Africa stretches from the southern border of Angola (lat. 17° 23' S.) to part of the northern (Orange River) and north-western borders of the Cape Province of the Republic of South Africa; and from the Atlantic Ocean in the west to Botswana in the east.

The territory has an area of 328,261 sq. miles, including the area of Walvis Bay (434 sq. miles) which, although part of the Republic of South Africa, is for convenience administered as part of South West Africa. The population was 746,328 in 1970 (Census) and the main population groups are: Ovambo (342,455), Whites (90,658), Damara (64,973), Kavango (49,577), Herero (49,203), Nama (32,853), Coloured (28,275), East Caprivians (25,009), Bushmen (21,909), Rehoboth Baster (16,474), Kaokovelders (6,457), Tswana (3,719) and others (14,766).

Government.—A German protectorate from 1880 to 1915, South West Africa was administered until the end of 1920 by the Union of South Africa. In terms of the Treaty of Versailles the Territory was declared a "C" Mandate and entrusted to South Africa with full powers of administration and legislation over the Territory. After the dissolution of the League of Nations and in the absence of a trusteeship agreement, South Africa informed the United Nations that she would continue to administer South West Africa in the spirit of the Mandate. Since the establishment of the United Nations, South West Africa has been the subject of dispute.

The South African Government announced on Oct. 2, 1968, the formation of a Legislative Council of 42 members for Ovamboland, six members nominated by each of the seven tribal authorities in the territory and a nominated Executive Council of seven members, with a Chief Councillor elected by the Legislative Council. Certain administrative powers held in South West Africa were in February, 1969, transferred to the South African Government.

On June 21, 1971, the International Court of Justice at The Hague delivered an advisory opinion as requested by the U.N. Security Council on the legal consequences for States of the continued presence of South Africa in "Namibia" (South West Africa). The Court decided by 13 votes to 2, that (*inter alia*) "the continued presence of South Africa being illegal, South Africa is under obligation to withdraw its administration from Namibia immediately and thus put an end to its occupation of the Territory". Dissenting opinions were submitted by the British and French judges; several other judges issued separate opinions in respect of parts of the Court's advisory opinion. A member of the South African legal team had contended at the hearings that South Africa had no obligation to

submit to general international supervision of its administration of South West Africa, as the Mandate by the League of Nations had come to an end at the dissolution of that organization. The South African Prime Minister rejected the Court's majority opinion in a statement also made on June 21, 1971. In September 1975 constitutional talks were begun in Windhoek between delegates from the 11 ethnic groups of the territory in order to determine the future of South West Africa.

Production and Education.—Mining, agriculture and fisheries are important. Animal husbandry accounts for 99 per cent. of the total gross output of commercial agriculture. The average rainfall over 70 per cent. of the Territory is below 400 mm. per annum. In 1970 there were 480 native schools, with 2,649 teachers and 107,572 Native pupils. For the Whites there were 83 schools with 1,155 teachers and 22,253 pupils.

101-235 5555

Ambassador Extraordinary and Plenipotentiary, His Excellency The Marqués de Perinat (1976).

Minister-Counselor, Sr. Don Manuel Gómez Acebo.

Area and Population.—A National State in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E. - 9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 square miles, with a population (1970) of 34,032,801. Returns for 1970 gave 656,102 births, 281,777 deaths and 247,492 marriages.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro and the Minho.

Government.—In April, 1931, the last monarch of Spain, Alfonso XIII, left the country; a Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the popular Front Governments in Madrid and Barcelona surrendering to the Nationalists (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo (Leader) of the Empire and Chief of the State*. In the Civil War of 1936-39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the

reinstitution of the *Cortes de España*. This was reorganized by an Organic Law of 1966 and is composed of approximately 564 members—ministers, 19; members of the National Council of the Movement, 109; Presidents of various State bodies, 5; representatives of the national syndicates, 150; 100 members elected by heads of families and married women; university rectors, 12; representatives of professional, academic and scientific bodies, 28; representatives of local administration, 116; and 25 members directly appointed by the Head of State.

A referendum held in 1967 approved an Organic Law of the State introducing a number of changes in state institutions. The offices of Head of State and Head of Government were separated, but General Franco continued to hold both offices until June 1973.

On July 22, 1969, General Franco nominated Prince Juan Carlos (Alfonso) of Bourbon (born Jan. 5, 1938; grandson of the late King Alfonso XIII) to succeed him as head of state at his death or retirement. The nomination was approved in the *Cortes* by a large majority. Following the death of General Franco, on November 20, 1975, Juan Carlos acceded to the throne on Nov. 22, 1975.

Defence.—*Army*: There are in Spain one armoured, one mechanized, one motorized, and two mountain divisions; one cavalry brigade, two artillery brigades, one air-transportable brigade, 1 parachute brigade, 11 infantry brigades, 2 artillery brigades, 1 mountain brigade (Independent) and 1 battalion surface to air missiles. The *Guardia Civil* also forms part of the Army though it operates as a gendarmerie in the rural areas under the control of the Ministry of the Interior.

The active Spanish Navy consists of 1 cruiser, 1 helicopter carrier, 20 destroyers, 11 frigates and corvettes, 3 anti-submarine launches, 23 minesweepers, 6 submarines, 14 landing craft, 4 squadrons of helicopters, and a large number of auxiliary and small craft.

The Air Force is divided geographically into 3 Regions covering Spain plus an Air Zone for the Canaries. There are also separate functional Air Defence, Tactical and Transport Commands. The Air Force consists of 11 fighter-bomber squadrons, one anti-submarine squadron, and one search and rescue squadron. There are also a variety of training and miscellaneous aircraft and some helicopters.

Education.—A new law of education (1970) providing free education for all children aged 6 to 13 is now in the process of implementation. 30 per cent. of primary schools and 80 per cent. of secondary schools are still run privately, although state spending on education multiplied fourfold between 1960 and 1970. There are eighteen state universities, the oldest of which, Salamanca, was founded in 1230. Other ancient foundations are Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Zaragoza (1474), Santiago (1501), Seville (1502), Granada (1526), and Madrid (1590). Private universities are Deusto in Bilbao, and Navarra in Pamplona. Student numbers in the universities have risen to over 200,000.

Language and Literature.—Castilian is the language of more than three-quarters of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provençal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden

age are those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922) and Juan Ramón Jiménez (1956).

FINANCE

	1974	1975
	million	million
	Pesetas	Pesetas
Estimated Revenue.....	653,400	782,400
Estimated Expenditure....	642,700	766,300

Public Debt (Dec. 31, 1964) excluding parastatal organizations and State-guaranteed issues: *Pesetas* 186,928,600,000.

The rate of exchange for the *peseta* in July, 1976 was 121 *pesetas* = £1 sterling (see also p. 83).

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—olives, oranges, lemons, almonds, pomegranates, bananas, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. The orange crop is exported mainly to Germany, France and the United Kingdom. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced.

Spain's mineral resources of coal, iron, wolfram, copper, zinc, lead and iron ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1970 the coal output amounted to 13,150,000 metric tons. 4,150,000 metric tons of iron ore and 7,366,000 metric tons of steel were produced in 1970. Other production figures included ('000 metric tons): cement, 16,500; sulphuric acid, 2,015; cotton yarn, 117 and wool yarn, 37. Production of electric power was 56,484 million kWh. The fishing industry is important.

The principal goods produced are manufactured goods, textiles, chemical products, footwear and other leather goods, ceramics, sewing machines and bicycles. 24,105,000 tourists visited Spain in 1970 and spent £700,000,000. The Gross National Product was approximately £13,400 million.

Communications.—In 1970 there were over 13,402 km. of railways in service and 138,670 km. of paved roads. The sea-going mercantile marine in 1970 (excluding fishing boats) registered a total on 3,338,190 gross tons. Civil aviation is under the control of the Air Ministry; there are several inland and international services in operation.

TRADE

	1974	1975
	\$ million	\$ million
Imports	14,287	15,067
Exports	7,241	7,789

The balance of payments on current account showed a deficit of \$3,477 million in 1975 and reserves stood at \$5,799 m. at the end of the year.

Trade with U.K.

	1974	1975
Imports from U.K....	£296,000,000	£332,000,000
Exports to U.K.....	301,000,000	308,000,000

Inclusion of the Canary Islands trade with U.K. raises the 1974 figures to: Imports from U.K., £294,519,000; Exports, £301,143,000.

The principal imports are cotton, tobacco, cellulose, timber, coffee and cocoa, fertilizers, dyes, machinery, motor vehicles and agricultural tractors, wool and petroleum products. The principal exports include iron ore, cork, salt, vegetables, citrus fruits, wines, olive oil, potash,

mercury, pyrites, tinned fruit and fish, bananas and tomatoes.

CAPITAL, Madrid. Population 3,146,071. Other large cities are Ψ Barcelona (1,750,000), Valencia (648,000), Ψ Seville (546,000), Zaragoza (470,000), Ψ Málaga (361,000), Bilbao (410,000); Murcia (244,000).

The BALEARIC ISLES form an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Ibiza and Formentera), and seven smaller (Aire, Aucanada, Botofoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 558,287. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. 234,098; Ψ Mahon (Minorca), pop. 16,547.

THE CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 1,170,224. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote (38,500), Fuerteventura (19,500) and the islets of Aleganza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at Ψ Las Palmas (pop. 287,038) in Gran Canaria, where major oil companies have installations for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma (76,000), Gomera (31,829), and Hierro (10,000)), with seat of administration at Ψ Santa Cruz in Tenerife, pop. 151,361.

Trade with U.K.

	1973	1974

ISLA DE FAISANES is an uninhabited Franco-Spanish condominium, at the mouth of the Bidassoa in La Higuera bay.

Ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population (1970) of 67,187.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. Population (1970) 64,942. Ceuta and Melilla are parts of Metropolitan Spain.

OVERSEAS TERRITORIES

The former provinces of Spanish Guinea, Fernando Póo and Rio Muni achieved independence on October 12, 1968, under the title of Equatorial Guinea.

Ifni, the former enclave in Morocco, was incorporated in the latter state by treaty, on June 30, 1969, and the Spanish Sahara came under joint Moroccan and Mauritanian control in November 1975.

SPANISH MOROCCO.—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

Alhucemas, the bay of that name includes six islands: population 366.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

The *Chafarinas* (or *Zafarinas*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

SUDAN

(Democratic Republic of the Sudan)

President, Major-General Gaafar Mohamed El

Nimeri, assumed office May 25, 1969.

Prime Minister, Sayed Al Rashid Tahir.

Defence, Field Marshal Bashir Mohammed Ali.

Minister of Foreign Affairs, Mahgoub Makawy.

SUDANESE EMBASSY IN LONDON

3 Cleveland Row, S.W.1.

[01-839 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Amir El Sawi (1976).

Area and Population.—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from the Republic of Chad about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Ethiopia in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea and Ethiopia; on the South lie Kenya, Uganda and Zaire; and on the west the Central African Republic, Chad, and Libya.

The *White Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as

the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the *White Nile* at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa lie five of the six *Cataracts*.

The estimated area is about 967,500 sq. miles with a population (estimated, 1974) of 16,900,000, partly Arabs, partly Negroes, and partly of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs are Moslems. The Nilotics of the Bahr el Ghazal and Upper Nile Valleys are generally animists, but some have been converted to Christianity and others are Moslems.

Government.—The Anglo-Egyptian Condominium over the Sudan which had been established in 1899 ended when the Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state. A Republic was proclaimed on Jan. 1, 1956, and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. The Sudan was under military rule from Nov., 1958, until 1964 when a new civilian Cabinet was appointed. Following a crisis in the coalition Cabinet of Mr. Mahgoub, the Prime Minister resigned on April 23, 1969, and was unable to form a new coalition. Government of the country was taken over on May 25, 1969, by a ten-man revolutionary council headed by Col. Gaafar Mohamed El Nimeri. A *coup d'état* by a Communist group on July 19, 1971, was short-lived. The leader of the group, Lt.-Col. Babikr al Noor, had been in London for medical treatment when power was seized by Maj. Hashem Atta. The B.O.A.C. plane in which the former was returning to Khartoum on July 22 was forced down at Benghazi by Libyan fighter aircraft and Lt.-Col. Noor and an aide were arrested. They were later returned to the Sudan and executed. Maj.-Gen. Nimeri was overwhelmingly elected President in an uncontested election in October 1971. In February 1972 an agreement was signed at Addis Ababa which brought to an end nearly 17 years of insurrection and civil war in the three southern provinces, and which recognized southern regional autonomy within a unified Sudanese State.

Education.—School education is free for most children, but not compulsory, beginning with Primary School (of which there are 4,000) which continues for 6 years. The final examination at Primary School is highly competitive and selects children for General Secondary Schools (of which there are 700) which continues for 3 years. The Higher Secondary Stage comprises 80 academic Higher Secondary schools (3 years); 15 vocational schools—Technical (4 years); Agricultural and Commercial (3 years) and 15 Primary Teacher Training Colleges (4 years). The medium of instruction is Arabic. English is taught as the principal foreign language in all schools.

Teacher Training is carried out in 15 Primary Teacher Training Colleges, 2 General Secondary Teacher Training Institutes and 1 Higher Teacher Training Institute.

Khartoum University is the largest educational institution and had 9 faculties and 5,478 students in 1971-72. There is an Islamic University at Omdurman.

Selection for higher education is normally based on the Sudan School Certificate.

In addition to the three universities there are various technical post-secondary institutes as well as professional and vocational training establishments.

Production.—The principal grain crops are wheat and *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (mainly Egyptian type) cotton of which the Sudan is a major producer, but increasing quantities of short and medium staple (American) type cotton are being grown. Production in 1974-75 totalled 1,200,000 bales. Much of the high quality, long-staple cotton is provided by the Sudan Gezira Scheme (a Government-controlled project irrigated from the Sennar Dam on the Blue Nile) and its extension, the Managil Scheme. The Sudan also produces the bulk of the world's supply of gum arabic. Sugar is an increasingly important crop. The Sudan aims to be self-sufficient in sugar by 1976 and then to produce an exportable surplus; Live-stock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South. A new dam at Khashm el Griba began to store water in May, 1964, and will eventually provide irrigation to about 500,000 acres, most of which is being used to resettle the population of the Wadi Halfa area which has been flooded by the reservoir of the Egyptian High Dam. Another dam at Roseires on the Blue Nile will enable new or increased irrigation on a further 3,000,000 acres as well as providing hydro-electric power.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branches out southwards to Wau from the Sennar/Nyala western line. Regular rail and Nile steamer services connect Khartoum with Juba in Equatoria Province which in turn is connected by a bus service with Nimule on the Uganda border. Port Sudan is a well-equipped modern seaport. Sudan Airways fly regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, the United Kingdom, Ethiopia, Uganda and W. Germany, Iraq and Bahrain and are equipped with 2 Boeing 707's and 4 Fokker F27 aircraft as well as some smaller machines; they have contracted to buy 2 Boeing 737.

FINANCE

The principal exports are cotton and cotton seed, ground-nuts and gum arabic. The chief imports are cotton piece goods, base metals, vehicles and transport equipment, machinery, petroleum products, sugar, tea, coffee, chemicals and pharmaceuticals.

CAPITAL, Khartoum (est. pop. 194,000). The town contains many mosques, a Catholic cathedral and an Anglican cathedral, which is no longer open for worship, and the University with extensive government buildings. Khartoum North and Omdurman have estimated populations of 58,000 and 167,000 respectively.

FLAG.—Three horizontal stripes of red, white and black with a green triangle next to the hoist. **NATIONAL DAY.**—January 1 (Independence Day).

BRITISH EMBASSY

Khartoum

Ambassador Extraordinary and Plenipotentiary, His Excellency John Fleetwood Stewart Phillips, C.M.G. (1973).

1st Secretary, R. E. Palmer (*Head of Chancery*).

British Council Representative, D. D. Reld, Gama'a Avenue, P.O. Box 1253, Khartoum. There are British Council libraries at Khartoum, El Fasher, El Obeid, Omdurman and Wad Medani.

SURINAM

President, Dr. J. H. E. Ferrier.

Prime Minister, Henck Arron.

Surinam is situated on the north coast of South America and is bounded by French Guiana in the east, Brazil in the south and Guyana in the west. It has an area of 63,250 square miles, with a population of 480,000 (December, 1971).

Formerly known as Dutch Guiana, Surinam remained part of the Netherlands West Indies until November 25, 1975, when it achieved complete independence. Surinam had received autonomy in domestic affairs under the Realm Statute which took effect on December 29, 1954.

Surinam has large timber resources. Rice and sugar cane are the main crops. Bauxite is mined, and is the principal export.

TRADE

Ambassador Extraordinary and Plenipotentiary, His Excellency Olof Rydbeck (1976).

Minister Plenipotentiary, L. Bergquist.

Counsellors, Baron C. G. von Platen, C.V.O. (*Economic and Financial*); D. Winter (*Press*); G. Westin, M.V.O. (*Consular*).

1st Secretaries, N. G. Revellus, M.V.O.; L. G. Carlsson (Consular); Miss K. Rosenstrom (Administration); Mrs. W. Tornberg (Consular); T. Westlund (Commodities).

Naval Attaché, Capt. L. Jedeur-Palmgren.

Air and Military Attaché, Col. J. Winqvist, M.V.O.

Trade Commissioner, S. Widenfelt, M.V.O. (73 Welbeck St., W.x.)

Area and Population.—Sweden occupies the eastern area of the Scandinavian peninsula in N.W. Europe and comprises 24 local government districts, "Län", with an area of 173,436 sq. miles, and population Jan. 1, 1975 of 8,177,000. In 1975 there were 103,421 births (12.62 per 1,000 inhabitants); death rate was 10.75 per 1,000 inhabitants and infant mortality rate (under one year of age) 0.9 per cent. of all live births.

Government. Under the Act of Succession of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte. Jean-Baptiste Jules Bernadotte, Prince of Ponte Corvo, a Marshal of France, was invited to accept the title of Crown Prince, with succession to the throne. He landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII in 1818. There is a unicameral Diet (*Riksdag*) of 349 members elected for 3 years. The Council of Ministers (*Statsråd*) is responsible to the *Riksdag*.

Production and Industry.—Since the end of the First World War Sweden has become one of the leading industrial nations of Europe. Agriculture is still one of the main activities, but its relative importance is declining and in 1975 less than 6 per cent. of the working population was engaged in farming and forestry. The country's industrial prosperity is based on an abundance of natural resources in the form of forests, mineral deposits and water power. The forests are very extensive, covering about half the total land surface, and sustain flourishing timber, pulp and paper milling industries. The mineral resources include iron ore of excellent quality, lead, zinc, sulphur, granite and marble. There are also extensive deposits of low grade uranium ore. Important industries based on mining include iron and steel, aluminium, and copper. The engineering industry has expanded largely on the basis of products invented or developed by Swedish engineers. Sweden has now one of the most important shipbuilding industries in the world. Motor car manufacturing is a major industry. The establishment of a petrochemicals industry has led to a rapid expansion in the output of chemicals and plastics.

Communications.—The total length of Swedish railroads is about 7,500 miles. At the end of 1974 there were 633 telephones for every 1,000 of the population, and in January, 1976, the number of broadcast receiving licences issued had reached 2,909,000. The number of private cars in use on December 31, 1975 was 2,761,000.

The Mercantile Marine amounted on December 31, 1975 to 7,731,000 gross tonnage, of which 3,494,000 comprised the tanker fleet. The Board of Civil Aviation under the control of the Ministry of Communications handles civil aviation matters. Regular domestic air traffic is maintained by the Scandinavian Airlines System and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained by the Scandinavian Airlines System.

Defence.—Based on the policy of non-alignment in peace leading to neutrality in war Sweden maintains a Total Defence intended to make any attack on her costly. Total Defence includes peacetime organizations for civil, economic and psychological defence as well as compulsory national service for

all acceptable males. Some 50,000 National Servicemen are called up for up to 11 months training each and all are recalled every fourth year for refresher training. On mobilization the Army strength totals 600,000 men including 50 tank, artillery and infantry battalions, 6 tank brigades and 20 infantry brigades. The Navy has 8 destroyers, 4 frigates, 20 submarines, 35 torpedo boats, a large number of minor craft and auxiliaries and 65 coast artillery units. The Air Force has modern supersonic aircraft of Swedish manufacture forming a standing force of 300 air defence, 150 attack and 100 reconnaissance aircraft supported by a modern air defence radar system. Facilities exist for rapid dispersal from main bases in war.

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people officially adhere.

Language and Literature.—Swedish belongs, with Danish and Norwegian, to the North Germanic language group. Swedish literature dates back to King Magnus Eriksson, who codified the old Swedish provincial laws in 1350. With his translation of the Bible, Olaus Petri (1493-1552) formed the basis for the modern Swedish language. Literature flourished during the reign of Gustavus III, who founded the Swedish Academy in 1786. Swedish literature is studded with names such as Kellgren (1751-1795), Atterbom (1790-1855), Almqvist (1795-1866), Rydberg (1828-1895), Levertin (1862-1906), Strindberg (1849-1912) and Lagerlöf (1858-1940), Nobel Prize Winner in 1909. Contemporary authors include Lagerquist (1891-1973), Nobel Laureate in 1951, Martinson (b 1904) and Johnson (b. 1900), Nobel Laureates jointly in 1974. The Swedish scientist Alfred Nobel (1833-1896) founded the Nobel Prizes for Literature, Science and Peace. In 1975 there were 146 daily newspapers with a total circulation of 4,677,800 copies, 4 major papers being published at Stockholm, 2 at Göteborg and 4 at Malmö.

Education.—Well developed and recently reorganized to provide (i) 9 years' compulsory schooling from the age of 7 to 16 in the *Grundskolan*; (ii) further education from 16 to 18/19 in the *Gymnasia*, which offer a number of courses preparing for entry to the universities, other centres of higher education, the professions, etc.; (iii) the universities. There are six universities—Uppsala (founded 1477); Lund (founded 1668); Stockholm (founded 1878); Gothenburg (founded 1887); Umeå (founded 1963) and Linköping (founded 1967); three affiliated university branches, empowered to grant first degrees only in the humanities, social sciences and natural sciences, at Örebro, Växjö and Karlstad; and three universities of technology, at Stockholm, Gothenburg and Luleå. Another institution of university status is the Karolinska Institute, which specializes in medicine and dentistry. Tuition within the State system, which is maintained by the State and by local taxation, is free.

Area and Population.—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of 22 Cantons, 3 subdivided, making 25 in all, and comprises a total area of 15,950 square miles with a population (estimated Jan. 1, 1973) of 6,385,000. In 1972 there were 91,342 (1973, 84,187) live births, 56,489 deaths and 43,081 marriages. The infant mortality rate was 13 per 1,000 live births. In 1970, out of a total of 6,169,800, 47.8 per cent. of the population was Protestant, 49.4 per cent. Roman Catholic and 0.3 per cent. Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior;

and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are at crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest white Swiss peaks are Dufourspitze (15,203 ft.), Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun Zug, Lugano, Brienz and the Walensee. There are also many artificial lakes.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

Government.—The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 200 members, and a Council of States (*Ständerat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. Each year the Federal Assembly elects from the Federal Council the President and the Vice-President. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—All Swiss males must undertake military service in the Army. *Elite* (ages 20 to 32) initial training, 118 days. Subsequently 8 training periods of 21 days; then *Landwehr* (33-42) and *Landsturm* (43 to 50). Flying personnel of the Air Force, which is part of the Army (ages 20-36): Initial training 1 year, totalling 200 hours of flying. 6 weeks with squadron each year and completion of 80 to 100 hours of flying. After 36 revert to ground duties with Air Force or Army. Swiss Army equipment includes many British items, notably Centurion tanks, Bloodhound missiles, and Venom, Vampire and Hunter aircraft.

Communications.—By the end of 1974 there were 4,992 km of railway tracks (Swiss Federal Railways, 2,926 km; Swiss privately owned railways 2,066 km); the whole system is electrified. At the end of 1973, there were 89,940 km of telegraph and telephone lines. By December 1974 the number of telephone subscribers amounted to 2,390,852 and

the network was fully automatic throughout the country. In 1974 there were 2,036,431 licensed radio receivers and 1,714,336 television receivers.

At the end of 1975 the total length of motorways was 916 km. The number of motor vehicles licensed at the end of 1974 was 2,011,378.

A merchant marine established in 1940, consisted in 1975 of 27 vessels with a total displacement of 211,201 tons (gross). In addition 496 vessels with a total tonnage of 588,121 were engaged in Rhine shipping. In 1974 goods handled at the Basle Rhine ports amounted to 9,340,192 tons. 121 lake vessels transported 9,733,000 passengers and 236,362 tons of freight in 1973. The national airline, Swissair, has a network covering 230,769 km and in 1973 carried a total of 5,152,106 passengers. Its fleet of 45 aircraft includes 2 Jumbojets, with 5 aircraft on order (5 DC9's). It flies to and from the Swiss airports at Zürich, Geneva and Basle.

Education.—Control by cantonal and communal authorities. No central organization. Illiteracy practically unknown. (i) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii) *Secondary*: Age 12-15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii) *Special schools* make a feature of commercial and technical instruction. (iv) *Universities*: Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansh in parts of the Grisons.

Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845-1924) and Hermann Hesse (1877-1962) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1946.

There is a Consular Section at H.M. Embassy, Berne; Consulates-General at Zürich and Geneva, a Consulate in Basle and Consular offices at Lugano and Montreux. The Directorate of British Export Promotion in Switzerland is in the Consulate-General Office in Zürich.

British Council Representative (vacant).

BRITISH-SWISS CHAMBER OF COMMERCE FOR SWITZERLAND, Dufourstrasse, 51, 8008 Zürich (Branch at 1 Galeries Benjamin Constant, 1,000 Lausanne).

SWISS-BRITISH SOCIETY, Berne.—President, Dr. Th. von Mandach.

SWISS-BRITISH SOCIETY, Zürich.—President, Dr. R. Schneebeli.

SWISS-BRITISH SOCIETY, Basle.—President, Mr. Simons.

SYRIA

(Syrian Arab Republic)

President, Lt.-Gen. Hafez el Assad, b. 1930, assumed office March 14, 1971, for a term of 7 years.

Prime Minister, Maj.-Gen. Abdul Rahman Khleifawi.

SYRIAN EMBASSY IN LONDON 5 Eaton Terrace, S.W.1.

[01-730 0384]

Ambassador Extraordinary and Plenipotentiary, His Excellency Adnan Omran (1974).

Area and Population.—Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (Census of 1970) of 6,294,000, Arabic speaking and mainly Moslems. (For Map, see p. 883.) The Orontes flows northwards from the Lebanon range across the northern boundary to Antakya (Antioch, Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archæology, etc.—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the oldest continuously inhabited city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert

which stretches to the Euphrates. The city contains the Omayed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix. 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrlit are ruins of the Phœnician town of Marath, where the *well* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the 12th and 13th centuries has been restored as a museum.

Hittite cities dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

Government.—Syria, which had been under French mandate since the 1914-18 war, became an independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic. It seceded from the United Arab Republic on Sept. 28, 1961.

A new Constitution was promulgated in March 1973; this declared that Syria is a "democratic, popular socialist State", and that the Ba'ath Party, which has been the ruling party since 1963, is "the leading party in the State and society". Elections to the 186-seat Peoples' Council in May 1973 resulted in a large majority for the Ba'ath Party.

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebbleh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil, glass, soap, sugar, plastics and copper and brass utensils are locally produced. Large new areas are coming under irrigation and cultivation in the north-east of the country as a result of the Tabqa dam. There are also some light assembly plants. Mineral wealth is modest but oil has been found at Karachuk and other parts in the north-eastern corner of the country and drilling is continuing. A pipeline has been built to the Mediterranean port of Tartous, *via* Homs. An oil refinery is in production at Homs, and revenue is derived from the Kirkuk-Banias oil pipeline and the pipeline from the oilfields of Saudi Arabia to Sidon in Lebanon (Tapline). Oil production in 1975 was estimated at about 8 million tons per annum. Syria also has deposits of phosphate and rock salt.

Language and Literature.—Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 2 daily newspapers and several periodicals in Arabic published in Damascus and one daily newspaper in Aleppo.

Education.—Education in Syria is under State control and, although a few of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts, commerce, agriculture, divinity, fine arts, and a Higher Teachers' Training College. The number of students has risen from a few hundred in 1943 to about 20,000. There are

also over 4,500 students at Aleppo University (founded 1961). Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Beirut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Beirut and Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kutchik. From Damascus the Hejaz railway runs southwards to Jordan. Railway lines are under construction to link the ports of Latakia and Tartous with Aleppo and Qamishli. All the principal towns in the country are connected by roads of varying quality. An internal air service operates between Damascus and Aleppo, and between Aleppo and Qamishli. There are also flights from Damascus to Palmyra and Deir-az-Zor. Damascus is also an international air routes.

Currency.—The monetary unit is the Syrian paper pound (£Syr.). Exchange rate, see p. 84.

Trade.—The principal imports are foodstuffs (fruit, vegetables, cereals, meat and dairy products, tea, coffee and sugar), mineral and petroleum products, yarn and textiles, iron and steel manufactures, machinery, chemicals, pharmaceuticals, fertilizers and timber.

Principal Exports.—Raw cotton, cereals, fruit, livestock and dairy products, other foodstuffs, textiles and raw wool.

Trade with U.K.

	1973	1974
Imports from U.K.	£11,630,000	£20,854,000
Exports to U.K.	1,154,000	20,572,000

CHIEF TOWNS.—Damascus (population (estimate, 1971), 557,252) is the capital of Syria. Other important towns being Aleppo (population 425,467), Homs (137,217) and Hama (97,390), and the principal port is Latakia (67,604).

FLAG.—Red over white over black horizontal bands, with three green stars on central white band. **NATIONAL DAY.**—April 17.

BRITISH EMBASSY

(Quartier Malki, 11 rue Mohammad Kurd Ali, Imm. Kotob, Damascus.)

Ambassador Extraordinary and Plenipotentiary, His Excellency Albert James MacQueen Craig, C.M.G. (1976).

THAILAND (Siam)

King, His Majesty Bhumibol Adulyadej, born 1927; succeeded his brother, June 9, 1946; married Princess Sirikit Kitiyakara, April 28, 1950; crowned May 5, 1950; daughter born, April 6, 1951; son and heir born, July 28, 1952; second daughter born April 2, 1955; third daughter born July 4, 1957.

CABINET

(April 1976)

Prime Minister, Seni Pramoi.

Deputy Prime Minister and Agriculture and Co-operatives, Maj. Gen. Pramarn Adireksarn.

Deputy Prime Minister and Finance, Sawet Piamphongsant.

Deputy Prime Minister and Public Health, Air Chief Marshal Dawce Chuilasapya.

Ministers to Prime Minister's Office, Surin Masdit; Chuan Leekpai.

Defence, Gen. Tawit Seniwong Na Aynthaya.

Foreign Affairs, Bhichai Rattakul.

Communications, Tavich Klinpratoom.

Commerce, Damrong Lathaplat.

Justice, Prasit Kanchananat.

Education, Maj. Gen. Siri Sriyodhin.
Industry, Maj.-Gen. Chatchai Choonhavan.
State Universities, Nibonh Sasidhorn.

There are also 17 Deputy Ministers.

ROYAL THAI EMBASSY IN LONDON

30 Queen's Gate, S.W.7

[01-589 0173]

Ambassador Extraordinary and Plenipotentiary, His Excellency Konthl Suphamongkhon, G.C.V.O. (1970).

Area and Population.—The Kingdom of Thailand, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1975) of 42,000,000. For position, see MAP, p. 744. It has a common boundary with Malaysia in the south, is bounded on the west by Burma and on the north-east and east by the People's Democratic Republic of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is separated from the Thai northern border only by a narrow stretch of Burmese and Laotian territory.

The capital, Bangkok, with a population of about 4,500,000, is situated in the south of the central plain area. To the north-east there is a plateau area and to the north-west mountains. The south of Thailand consists of a narrow mountainous peninsula. The principal rivers are the Chao Phraya with its tributary the Meping and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a Constitutional Monarchy. The Constitution promulgated in October 1974 provides for a bicameral National Assembly, consisting of an elected House of Representatives, currently with 279 members and an appointed senate of 100 members.

Following the dissolution of parliament in January 1976, a general election was held on April 4, 1976, resulting in the coalition government of Mom Rachawongse (M.R.) Kukrit Pramoi being replaced by the present coalition government led by M. R. Seni Pramoi.

Language, Religion and Education.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family, but its vocabulary especially has been strongly influenced by Sanskrit and Pali. It is written in an alphabetic script derived from ancient Indian scripts. The principal religion is Buddhism. In 1973 93.6 per cent. of the population were Buddhists, 3.9 per cent. Moslems, 0.6 per cent. Christians and 1.9 per cent. other religions. Primary education is compulsory and free and secondary education in Government Schools is free. In 1974 there were 33,448 schools of all kinds with 7,321,797 pupils and 250,300 teachers. There are 10 Universities attended by 136,349 students, 34 training colleges and 196 vocational schools (all types). New universities were opened at Chulengmai and Khon Kaen in 1966 and a further university has subsequently been opened at Songkhla in the south. In 1972 an open university (Ramkhamhaeng) was established in Bangkok with some 45,000 students.

Production and Industry.—The agricultural sector provides just under half the national income and employs about 70 per cent. of the working population. Rice remains the most important crop, accounting for 63 per cent. of the area planted. After rice (14,700,000 tons est. in 1975) the main crops are cassava (7,430,000 tons of roots), maize (2,540,000 tons), and rubber (435,000 tons). Other crops of some importance are sugar cane, kenaf,

groundnuts, tobacco, and coconuts. There is also a substantial forest extraction industry, the most valuable product of which is teak.

Mineral resources are mainly tin, antimony, tungsten, gypsum and fluorite. The most important of these, tin, is seeing something of a decline, mainly because of the exhaustion of reserves. The importance of lignite as a source of energy increased with higher oil prices.

Before the war, industry was mainly confined to the basic processing industries—sawmilling, rice-milling, etc. After the war, the Government set up a number of factories run by the Civil Service or the Armed Forces. The Government still has a sizeable stake in industry—notably the tobacco monopoly and factories for the manufacture of cement, glass, paper, jute, textiles, sugar and beer and spirits.

The then Government in 1962 instituted a policy of encouraging the private sector to invest in industry, by means of tax reliefs and other incentives. The private sector industries are almost entirely of a secondary nature; soap products, gunny bags, textiles, car assembly, pharmaceutical preparations and packaging, dry batteries, etc. Over the last decade the size of the manufacturing sector has grown rapidly and now provides 18 per cent. of national income.

Communications.—Rivers and canals provide the traditional mode of transport for much of the country. Navigable waterways have a length of about 1,100 km. in the dry season and 1,600 km. in the wet season. About 3,830 km. of State-owned railways were open to traffic in 1974. The track is metre gauge. Main lines run from Bangkok to Aranya Prathet, on the Cambodian border (160 miles E.); via Korat to Ubol (about 352 miles E.) and to Nongkhal (415 miles N.E.) the ferry terminal on the River Mekong opposite Vientiane, capital of Laos; to Chiangmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malay Peninsula, via Sungai Golok and Penang respectively, to Singapore.

Thailand has some 18,000 km. of highways and provincial roads, of which 63 per cent. are paved.

Bangkok has an international airport of importance, and services connect it direct with cities in Europe, America, and Australia, as well as countries in Asia. Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. Domestic routes are operated by Thai Airways Corporation. A private airline, Air Siam, operates a limited number of services to Hong Kong, Japan, Singapore and the West Coast of the United States. There are some 22,000 km. of telegraph lines and improvements are being made to an already extensive micro-wave communications system. The harbour at Bangkok, which can take vessels up to 10,000 tons dead weight is congested, but six new berths are presently being constructed. A new deep-water port has been constructed on the east side of the Gulf of Thailand, but is not yet in full use.

FINANCE

	1974	1975
	millions of Baht	
Total revenue.....	43,800	42,000
Total expenditure.....	41,800	52,100

The exchange rate for the Baht was officially fixed at Baht 20.0 = \$1 U.S. (See also p. 84.)

TRADE

	1974	1975†
	millions of Baht	
Total imports.....	64,044	50,399
Total exports.....	50,245	36,195

† Jan.-Sept.

Trade with U.K.

	1974	1975
Imports from U.K....	£57,000,000	£55,800,000
Exports to U.K.....	18,300,000	13,600,000

Thailand's main exports in 1975 (in millions of Baht) were: rice, 5,773, maize 5,614, tapioca products 4,589, rubber 3,451 and tin 2,240. Other exports include ready-made garments, textiles, shrimps, tobacco, cement, beans, sorghum and teak. Main imports for the same period were machinery 23,075, petroleum products 11,160, manufactured goods 10,461, chemicals 9,143 and raw materials 3,948.

CAPITAL. Ψ Bangkok (population 4,300,000); in the delta of Chao Phraya. Other centres are Chiangmai, Nakorn Sawan, Korat and Haadyai, but no other town approaches Bangkok in size or importance.

FLAG.—Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others). **NATIONAL DAY.**—December 5 (King's Birthday).

BRITISH EMBASSY (Bangkok)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir David Lee Cole, K.C.M.G., M.C. (1973).

Counsellors, H. A. J. Staples; J. P. Law, Q.P.M. *Defence and Military Attaché*, Col. I. T. C. Wilson, M.B.E., M.C.

Naval and Air Attaché, Cdr. G. C. Roberts, O.B.E., R.N.

1st Secretaries, R. Goring-Morris, O.B.E. (*Head of Chancery*); O. H. Robinson; J. N. Howard (Consul); P. B. Cormack; J. L. Brooke; G. D. Quinn; Miss C. Swan.

British Council Representative, I. LI. Watts.

TOGO (Republic of Togo)

President and Minister of Defence, Gen. Gnassingbé Eyadéma, born 1937, assumed office as *Head of State*, April 14, 1967.

Minister for Foreign Affairs, M. Houenou Hunlédé.

The Republic is situated in West Africa between 0°-2° W. and 6°-11° N., with a coastline only 35 miles long on the Gulf of Guinea, and extends northward inland for 350 miles. It is flanked on the west by Ghana, on the north by Upper Volta and in the east by Benin (see MAP, p. 953). It has an area of 21,000 sq. miles and a population (estimate, Dec. 1972) of 2,089,900, including people of several African races.

The first President of Togo, Sylvanus Olympio, assassinated on January 13, 1963, was succeeded by Nicolas Grunltzky, who was himself overthrown by an army coup d'état on January 13, 1967. On April 14, 1967, the Commander-in-Chief of the Togolese army, Lt. Colonel (later promoted General) Eyadéma named himself President. Togo is a member of the *Conseil de l'Entente*, the *Organisation Commune Africaine et Malgache* (O.C.A.M.), and the *Organisation of African Unity* (O.A.U.). The official language is French.

Finance.—The currency of Togo is the *Franc C.F.A.* (Francs C.F.A. 50 = 1 French Franc) (Francs C.F.A. 450 = £1, at June, 1975).

Production and Trade.—Although the economy of Togo remains largely agricultural exports of phosphates have superseded agricultural products as the main source of export earnings, being 75 per cent. of the total in the first 10 months of 1974 compared with 11 per cent. for cocoa and 6 per cent. for coffee. Other exports include palm

kernels, copra and manioc. The production of phosphates entirely for export was begun by a Franco-American consortium in 1958 but the Togolese Government has increased its participation in recent years and took over completely in February 1974.

Trade with U.K.

	1973	1974
Imports from U.K.	£3,008,958	£3,333,933
Exports to U.K.	173,896	542,210

CAPITAL.—Ψ Lomé, population (1974), 214,200.

FLAG.—Five alternating green and yellow horizontal stripes; a quarter in red at top next staff bearing a white star. NATIONAL DAY.—April 27 (Independence Day).

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Frank Mills, C.M.G. (resides at Accra).

Relations with National Assembly, Moncef Belhadj Amor.

In addition there are 5 Secretaries of State.

TUNISIAN EMBASSY IN LONDON

29 Princes Gate, S.W.7

[01-584 8117]

Ambassador, His Excellency Ibrahim Turki (1974).

Counsellor, Mohamed Maherzi.

Assistant Military Attaché, Lt. Habib El Helmi.

Attachés, Azouz Rafrari; Mahmoud Slim; Bel-gacem Gabchoug.

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 63,380 sq. miles and the estimated population in 1975 was 5,600,000.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956.

Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. On June 1, 1959, the

Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

In March 1975 the National Assembly proclaimed M. Bourguiba as President for life.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 13 regions (*gouvernorats*) each administered by a Governor. In 1972, the number of regions was increased to 14 by the division of the Tunis region into two regions. By 1974, the number increased to eighteen.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated.

The chief exports are crude oil, olive oil, phosphates and wine. The chief imports are machinery, food-stuffs, iron and steel, textiles and crude petroleum, etc. Some oil has been discovered in Tunisia and production was 4,500,000 tons in 1975. In 1975 Tunisia's total imports were equal in value to *Dinars* 572,815,000 and total exports *Dinars* 345,580,000. France remains Tunisia's main trading partner, supplying 34 per cent. of the country's imports and purchasing 19 per cent. of Tunisia's exports.

Trade with U.K.

	1974	1975
Imports from U.K.	£11,465,000	£26,729,000
Exports to U.K.	6,192,000	2,968,000

Currency.—The Tunisian *dinar* was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. Although Tunisia remains in the Franc Zone the *dinar* is not tied to the French franc. The current rate of exchange is *dinars* 0.75 = £1 (June, 1976).

So far as trade is concerned Tunisia was effectively part of metropolitan France until September, 1959, when she abrogated the Customs Union with the latter and a new trade and payments agreement was negotiated. This reduced or eliminated the tariff advantages enjoyed by certain French goods. Under commercial agreements concluded in November, 1962, and February, 1964, import quotas were established for certain French goods. In June, 1964, however, following Tunisian measures regarding the take-over of foreign-owned lands in Tunisia, France gave notice that she would not renew the 1959 Trade Agreement, due to expire on Sept. 30, 1964. In May 1966, France opened import quotas for a wide range of Tunisian goods (but excluding wine). Within these quota limits these goods can be admitted into France customs-free. In 1966 a policy of severe import restriction was adopted in order to reduce the country's chronic imbalance of trade. An ambitious programme of co-operative schemes for most areas of the economy was reversed in September, 1969, and gave way to a more orthodox economic policy. Tunisia became an associate member of EEC early in 1969, and signed a new agreement with the E.E.C. in 1976.

CAPITAL, Ψ Tunis, connected by canal with La Goulette on the coast, has a population of 1,127,000. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are: Ψ Sfax (482,000); Ψ Bizerta (316,000); Ψ Sousse (586,000); Kairouan (302,000).

FLAG.—Red crescent and star in a white orb, all on a red ground. NATIONAL DAY.—June 1.

TURKISH EMBASSY IN LONDON

Chancery: 43 Belgrave Square, S.W.1

[01-235 5252]

Ambassador Extraordinary and Plenipotentiary, His Excellency Turgut Menemencioğlu (1972).

Area and Population.—Turks are to be found scattered throughout a wide belt extending from China through the Soviet Union, Afghanistan and Iran to the present day Turkish State.

Turkey itself extends from Edirne (Adrianople) to Transcaucasia and Iran, and from the Black Sea to the Mediterranean, Syria and Iraq. Total population at the Census of October, 1975 was estimated at 40,197,669.

Turkey in Europe consists of Eastern Thrace, including the cities of Istanbul and Edirne, and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west. Population (Census, 1975), 3,773,705.

Turkey in Asia comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Iran, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. Population (Census, 1975), 36,423,964.

Government.—On October 29, 1923, the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. Following the introduction of a multi-party régime in 1945, the Democrat Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, a body of military officers. The committee ruled from January to November, 1961, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly.

At elections held in October, 1969, the Justice Party obtained 256 seats, the People's Republican Party 143 and the Reliance Party 15. Mr. Demirel's Justice Party Government (in office since Oct., 1965) resigned on March 12, 1971, following a memorandum to the President by the Chiefs of Staff of the Armed Forces. Three all-party governments, two under Prof. Erim and the third under Senator Ferit Melen were in office between March 26, 1971 and April 1973. After the resignation of the latter Senator Naim Talu formed a further government drawn mostly from the Justice and

Republican Reliance Parties. Elections were held in October 1973 and PRP obtained 185 seats, JP 149 seats, DP 45 seats and NSP 48 seats. After several unsuccessful attempts to form a government, a coalition under PRP party leader Mr. Bülent Ecevit with NSP as minority partner was formed on January 25, 1974.

However, this coalition collapsed in September, but continued to rule Turkey on a caretaker basis until a new administration was formed by Senator Prof. Sadi İrmak in November. This largely technocratic government was denied a vote of confidence by Parliament, but continued in office until March 31, 1975, when a right-wing coalition of the Justice, National Salvation, Republican Reliance and Nationalist Action Parties was formed, under the Premiership of Süleyman Demirel, Chairman of the Justice Party.

Turkey is divided for administrative purposes into 67 *vilayet* with subdivisions into *kaza* and *nahiye*. Each *vilayet* has a governor (*vahi*) and elective council.

Religion and Education.—98.99 per cent. of the population are Moslems. The main religious minorities, which are concentrated in Istanbul and on the Syrian frontier, are: Orthodox, 107,000; Armenian Apostolic, 71,000; Catholic, 25,000; Protestant, 17,000; others, 10,000 (Total Christians, 230,000); Jewish, 44,000. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1975 there were 41,060 primary schools, with 5,354,593 pupils. There are two universities at Istanbul (one being a Technical University), three in Ankara, one each at Izmir, Erzurum and Trabzon. There is also a Faculty of Agriculture at Adana, a Faculty of Veterinary Science in Elazığ, and Faculties of Economics in Bursa and Eskişehir. The expenditure allocated to education in the 3rd Five Year Plan (1973-77) is TL14,000,000,000, compared with TL7,002,000,000 actually spent from 1968-72, but past experience has shown that targets in this field are not always met.

Language and Literature.—Until 1926, Turkish was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the number of Turks who can read and write is rising steadily, from about 10 per cent. in 1927 to nearly 80 per cent. by 1970. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek, Armenian and English and numerous magazines and weeklies on various subjects, but few trade commercial publications.

Agricultural Production.—1975 was a year of significant growth in several sectors. Agricultural production rose to 28.8 per cent. of the gross domestic product at constant factor prices, while exports of agricultural commodities represented 56.6 per cent. of the total exports. Over 9,000,000, about 70 per cent. of the working population, are in the rural

sector, but agriculture is still primitive in many areas and agricultural productivity is low. Estimated production figures for the principal crops in 1975 were ('000 tons): Wheat, 14,750 (a record); barley, 4,500; rice, 165; pulses, 684.3; cotton, 480; tobacco, 200; olives 588.2; sugar beet, 7,000; peaches, 170; apples, 800; citrus fruits, 750; sultanas, 110; hazelnuts, 350. With the important exception of wheat, which is mostly grown on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred around Izmir, where substantial quantities of cotton are also grown. The main cotton area is in the Cukurova Plain around Adana. In 1974 it was estimated that there were 76,427,000 head of livestock, including sheep, 40,539,000; goats, 18,746,000; and cattle, 13,387,000. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Industry.—After agriculture, Turkey's second most important industry is based on her considerable mineral wealth which is, however, as yet comparatively unexploited. Coal production in 1975 amounted to 8,361,000 tons, and 11,759,000 tons of lignite. The main export mineral is chromite. Production of iron ore in 1975 was 2,238,108 tons; chrome ore, 933,240 tons; manganese, 35,928 tons; sulphur, 83,832 tons; blister copper, 26,952 tons and boracite, 970,920 tons. The research and exploitation of the principal mineral deposits are mainly in the hands of the Mineral Research and Exploration Institute of Turkey and the State-owned Etibank respectively. The latter controls directly, on behalf of the Government, all the copper, sulphur and pyrite output of Turkey, as well as much of the colemanite and chrome production. Since State-sponsored industrialization began in 1935, industry has played an increasing part in the Turkish economy. Here, also, as in the case of minerals, much of the industry of the country is controlled by the Government.

The progress made in the manufacture of sugar, cotton, woollen and silk textiles, and cement, has been such that the bulk of the country's requirements can now be produced locally, while other industries contributing substantially to local needs include vehicle assembly, paper, glass and glassware, iron and steel, leather and leather goods, sulphur refining, canning and rubber goods, soaps and cosmetics, pharmaceutical products, prepared foodstuffs and a host of minor industries. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to promote the exploitation of Turkey's petroleum resources by foreign countries. Local production of crude petroleum in 1975 totalled 3,095,486 tons, a decrease of 6.9 per cent. from 1974.

In common with other developing countries, Turkey's economy was adversely affected by the steep rises in oil prices from 1973 onwards. Remittances from workers overseas, which had risen to \$1.2 billion in 1973, flattened out and declined owing to the recession in Western Europe. Exports at \$1,401m. fell in 1975 by 8.6 per cent. compared with 1974. At the same time, industrial growth continued at a high level (8.6 per cent.).

Since the Second World War the United States Government has given Turkey financial aid totalling over 5 billion dollars, half of which has been for military and half for economic purposes. The other main official sources of foreign aid have been

the O.E.C.D., and more recently the I.B.R.D., while the I.M.F. has made medium term loans for balance of payment support. The United Kingdom has pledged nearly £66,000,000 of aid to Turkey since 1963.

The third of Turkey's three Five Year Development Plans, for the years 1973-77, began in January 1973. The basic economic objective of the third plan is to achieve an average growth rate of 7.9 per cent. per annum in the gross national product.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length of lines in operation at the end of 1974 was 8,141 kilometres. In 1974, the railways carried 128,424,000 passengers and 13,770,000 metric tons of freight.

Roads.—At the end of 1974 there were 34,918 km. of national roads (32,696 of which were surfaced). Total all-weather roads, both national and provincial, amounted to 51,176 km. The estimated number of motor vehicles in use at the end of 1974 was 735,033 of which there were 303,845 motor cars, 34,421 minibuses, 21,287 buses, 175,014 trucks and 200,466 tractors.

Posts.—In 1974 the number of telephone subscribers in Turkey was over 599,000. There is a considerable shortage of telephone lines in some of Turkey's major cities.

Shipping.—At the end of 1973, the Turkish Merchant Navy consisted of 2,516 cargo ships of 18 tons gross and over totalling 1,023,261 gross tons, 117 passenger ships of a gross tonnage of 114,850 tons and 99 tankers with a gross tonnage of 253,036 tons.

Civil Aviation.—The State airlines (T.H.Y.) operate all internal services and have services to London, Paris, Athens, Beirut, Brussels, Amsterdam, Zürich, Frankfurt, Munich, Rome, Milan, Geneva, Copenhagen, Nicosia, Tel Aviv and Vienna. Most of the leading foreign airlines, including British Airways, operate services to Istanbul and some also to Ankara. The T.H.Y. fleet is composed of D.C.10's, D.C.9's, Fokker Friendships, Fokker Fellowships and Boeing 707's.

FINANCE

(Financial year, March 1 to February 28)

	1975-76	1976-77
	TL'000,000	
Estimated Expenditure.....	106,888	151,520
Estimated Revenue.....	99,442	142,264

Currency.—The Turkish Lira (TL) is divided into 100 Kuruş. The official rate of exchange is TL 29.90 = £1 (June 1976) and TL 16 = U.S.\$1. (See also p. 84.)

TRADE

	1974	1975
Total imports....	\$3,778,000,000	\$4,739,000,000
Total exports....	1,532,000,000	1,401,000,000

All imports are subject to licence and the issue of licences is limited to goods considered necessary for the country's economy. Lists of permitted imports are published annually at the beginning of January. The main imports are machinery, crude oil and petroleum products, iron and steel, vehicles, medicines and dyes, fabrics and yarns. The principal exports are cotton, tobacco, fruits, nuts, minerals, livestock and textiles.

Trade with U.K.

	1975
Imports from U.K.....	£344,600,000
Exports to U.K.....	701,000,000

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asla Minor, about 275 miles E.S.E. of Istanbul, with a population (1975) of 1,668,542. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city was laid out on modern lines, with parks, statues and avenues. Ψ **ISTANBUL** (2,534,839), the former capital, was the Roman city of Byzantium. It was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328 and renamed Constantinople. Istanbul contains the celebrated church of St. Sophia, which, after becoming a mosque, was made a museum in 1934; it also contains Topkapı, former Palace of the Ottoman Sultans, which is also a museum. Other cities are Ψ **Izmir** (636,078); **Adana** (467,122); **Bursa** (346,084); **Gaziantep** (300,801); and **Eskişehir** (258,266).

FLAG.—Red, with white crescent and star.
NATIONAL DAY.—October 29 (Republic Day).

UNITED ARAB EMIRATES

President, Sheikh Zayed bin Sultan Al Nahayyan (Abu Dhabi).

Vice-President, Sheikh Rashid bin Sa'id Al Maktum (Dubai).

Prime Minister, Sheikh Maktum bin Rashid Al Maktum (Dubai).

Minister of Finance, Economy and Industry, Sheikh Hamdan bin Rashid Al Maktum (Dubai).

Minister of Interior, Sheikh Mubarak bin Mohammed Al Nahayyan (Abu Dhabi).

Minister of Defence, Sheikh Mohammed bin Rashid Al Maktum (Dubai).

Minister of Foreign Affairs, Sayed Ahmed Khalifa Al Suwaidi (Abu Dhabi).

EMBASSY IN LONDON

30 Prince's Gate, S.W.7

{01-581 1281}

Ambassador Extraordinary and Plenipotentiary, His Excellency Sayed Mohammed Mahdi Al-Tajir.

The United Arab Emirates (formerly the Trucial States) is composed of seven Emirates (Abu Dhabi,

Ajman, Dubai, Fujairah, Ras al Khaimah, Sharjah and Umm al Qaiwain) which came together as an independent state on December 2, 1971, when they ended their individual special treaty relationships with the British Government (Ras al Khaimah joined the other six on February 10, 1972).

The British Government, by virtue of a treaty made in 1892, had been responsible for the external affairs of the states through the British Political Resident in the Arabian Gulf and the British Political Agents in each state but on independence the Union Government assumed full responsibility for all internal and external affairs apart from some internal matters that remained the prerogative of the individual Emirates. Six of the Emirates lie on the shore of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West while the seventh, Fujairah, lies on the Gulf of Oman.

Area and Population

The approximate area of the U.A.E. is 32,000 square miles and the population (according to a census in December 1975) is 655,937, more than double the 1972 estimate. Security in the area is maintained under one central command by the Union Defence Forces (formerly the Trucial Scouts). Until May 1976 Abu Dhabi, Dubai, Sharjah and Ras al Khaimah had their own separate defence forces, of which the Abu Dhabi Defence Force was the largest, but they were then merged with the Union Defence Forces. Some of the separate police forces have also been merged.

Revenue is chiefly derived from oil and from customs dues on imports. Other formerly important sources of revenue, such as the export of dried fish and pearling, are now almost negligible. A substantial amount is spent on overseas aid, where commitments in 1975 reached a quarter of the gross national product, and on agriculture where more than half of the cultivable area of more than 50,000 acres has already been brought into use.

TRADE WITH U.K.

	1974	1975
Imports from U.K. . . .	£103,800,000	£198,650,000
Exports to U.K.	220,300,000	159,161,000

Abu Dhabi is the largest Emirate of the U.A.E. in area, stretching from Khor al Odaid in the west to the borders with Dubai in the Jebel Ali area. It includes six villages in the Buraimi oasis, the other three being part of the Sultanate of Oman, and a number of settlements in the Liwa Oasis system. Following negotiations with Saudi Arabia, some adjustment of the border has now been made in the Khor al Odaid region, but the agreement has not yet been ratified.

The Abu Dhabi Government owns a sixty per cent. interest in oil operations in the Emirate, through the Abu Dhabi National Oil Company. Several companies are operating; the two most important are the Abu Dhabi Petroleum Co. Ltd., on land and Abu Dhabi Marine Areas Ltd. in the offshore concession area. The most important offshore field is near Das Island where Abu Dhabi Marine Areas has its headquarters and which began production in 1962. Production from the on-shore Murban field began in December 1963. Abu Dhabi's oil revenues for 1975 are estimated at £1,650 million.

With its oil wealth the Emirates are expanding rapidly, not only in Abu Dhabi, now a fast growing modern town, but also elsewhere such as at Al Ain in the Buraimi Oasis. There are airfields at Abu Dhabi and Das Island, and an airstrip at Al Ain, and a new harbour, Port Zaid, at Abu Dhabi. The population of the Emirates is 235,662 (1975 census).

Dubai is the second largest Emirate both in size and in population, which was 206,861 at the last census. The town of Dubai is the main port for the import of goods into the U.A.E. and the interior of the Sultanate of Oman, and there is also a lively entrepôt trade. Oil was discovered offshore in 1966 and production began in September 1973. A second offshore field was discovered in September 1973. The main operator is the Dubai Petroleum Company.

Development is proceeding fast. A new deep water harbour was completed in 1972 and is now being expanded, while a major dry dock has also been built. An international airport opened in May 1971, served on a schedule basis by ten international airlines and by two regular freight services. More than thirty banks are now operating in Dubai and telegraphic and telex communications, managed by Cable and Wireless, are good.

Sharjah, with a present population of 88,188, has declined from its position 50 years ago as principal town in the area. It became the third oil producing Emirate in the summer of 1974, following the discovery of oil offshore by the Crescent Petroleum Company, a consortium of six companies from the United States headed by Buttes Oil and Gas. The offshore concessions on Sharjah's west coast, in the Arabian Gulf, are held by Shell Hydrocarbons, while Shell Minerals hold both the offshore and on-shore concessions for Sharjah's eastern dependencies on the Gulf of Oman coast. Linked by metalled roads to Dubai and Ras al Khaimah on the Arabian Gulf coast, Sharjah is centrally placed within the U.A.E., and is now experiencing a construction and business boom. More than a dozen banks are already in operation. Sharjah harbour has been deepened and expanded, while construction of a new port at Khor Fakkan, on the Gulf of Oman coast, is under way. A small airport is in use while a new one, which will be the biggest in the Middle East, is approaching completion.

Ras al Khaimah has a population of 57,282 of whom more than half live in the town. An ancient sea-port, near which archaeological remains have been found, Ras al Khaimah is the most agricultural of the Emirates, producing vegetables, dates, fruit and tobacco. The offshore oil concession is held by Vitol Exploration and the on-shore concession by Shell Hydrocarbons. Some oil has been found off the coast, but not in commercial quantities.

Fujairah, with a population of 26,498, is the poorest and most remote of the seven Emirates, lying on the Gulf of Oman coast, and only connected by a metal road to the rest of the country since the end of 1975. Largely agricultural, its population is spread between the slopes of the inland Hajar mountain range and the town of Fujairah itself, together with a number of smaller settlements on the comparatively fertile plain on the coast. Shell Minerals hold the on-shore concession and offshore drilling by Reserve Oil and Minerals was due to begin by the end of 1976.

Ajman and Umm al Qaiwain are the smallest Emirates having populations of 21,566 and 16,879 respectively. Both lie on the Arabian Gulf coast although Ajman has two inland enclaves at Manama and Masfut. Both are beginning to benefit from the rapid development taking place in their neighbours, Sharjah and Ras al Khaimah. Occidental of Ajman Incorporated hold both the major on-shore and offshore oil concessions, while in Umm al Qaiwain the on-shore concession is held by Shell Hydrocarbons and the offshore by Occidental of Umm al Qaiwain Incorporated and by a consortium headed by Zapata Exploration who made a non-commercial oil find early in 1975.

BRITISH EMBASSY
(Abu Dhabi)

Ambassador Extraordinary and Plenipotentiary, His Excellency Daniel John McCarthy, C.M.G. (1973). British Council Representative, M. A. Evans, P.O. Box 1636, Dubai.

UPPER VOLTA
(République de Haute Volta)

President, Gen. Sangoulé Lamizana, assumed power in 1966.

Foreign Affairs, Alfred Kabore.

Justice, François-Xavier Zongo.

Finance, Capt. Léonard Kalmogo.

Information and Posts and Telecommunications, Capt. Koulidiati.

Interior and Security, Maj. Gabriel Some Yorgman.

Public Service and Labour, Zoumana Traore.

Planning, Boubar ar Soumana.

Tourism, Emile Bassano.

Upper Volta is an inland savannah state in West Africa, situated between 9° and 15°N and 2°E and 5°W with an area of about 100,000 square miles and a population estimated in 1972 at 5,514,000. It has common boundaries with Mali on the west, Niger and Benin on the east and Togo, Ghana and the Ivory Coast on the south. The largest tribe is the Mossi whose king, the Moro Naba, still wields a certain moral influence.

Upper Volta was annexed by France in 1896 and between 1932 and 1947 was administered as part

of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, etc., were signed in Paris on April 24, 1961. Upper Volta is a member of the *Conseil de l'Entente*, OCAM, OAU and C.E.A.O. (see Ivory Coast). The official language is French. The 1960 constitution provided for a presidential form of government with a single chamber National Assembly, but in January, 1966, the Army assumed power after popular demonstrations in Ouagadougou against the régime of the former President Yaméogo. A new constitution allowing for a partial return to civilian rule but with the Army still in effective control was adopted by a referendum held on June 14, 1970. Following internal political manoeuvring the President suspended the constitution on Feb. 8, 1974 and dissolved the National Assembly. A Government of National Renewal was formed, with a majority of military members.

Finance and Trade.—The currency of the Republic is the *Franc CFA* (Francs CFA 50=1 French Franc). The 1974 Budget totalled Francs CFA 12,490,000,000.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea-nuts and cotton. Small deposits

of gold, manganese, copper, bauxite and graphite have been found. Value of trade in 1973 amounted to: Imports, francs CFA 21,897,000; Exports, francs CFA 5,598,000. Imports from U.K.—£299,000 (1975); Exports to U.K.—£718,000 (1975).

CAPITAL.—Ouagadougou (125,000). Other principal town: Bobo-Dioulasso (80,000).

FLAG.—Three horizontal stripes, black over white over red.

NATIONAL DAY.—December 11.

BRITISH REPRESENTATION

Ambassador Extraordinary and Plenipotentiary, His Excellency Joe Booth Wright (resident in Abidjan).

URUGUAY

(República Oriental del Uruguay)

President, Dr. Aparicio Méndez (1976).

CABINET

Minister of Interior, General Hugo Linares Brum.

Foreign Affairs, Dr. Juan Carlos Blanco.

Economy and Finance, Col. Valentín Arismendi

Public Health, Dr. Antonio Cañellas.

Labour and Social Security, Dr. José Enrique Etcherverry Stirling.

Agriculture and Fishing, Ing. Agr. Julio Aznarez.

Education and Culture, Dr. Daniel Darracq.

National Defence, Dr. Walter Ravenna.

Industry and Energy, Ing. Quím Luis Meyer.

Director of Planning and Budget, Sr. Juan José Anichini.

Secretariat of Planning, Coordination and Diffusion, Brig. José D. Cardozo.

URUGUAYAN EMBASSY AND CONSULATE

48 Lennox Gardens, S.W.1

[01-589 8835]

Ambassador Extraordinary and Plenipotentiary (vacant).

Minister-Counsellor, Sr. Ramiro Piriz Ballón.

1st Secretary, Señor Alfredo Cazes.

Area and Population.—The smallest Republic in South America, on the east coast of the Rio de la Plata situated in lat. 30°-35°S. and long. 53° 25'-57° 42' W., with an area of 72,172 square miles, and a population of 2,763,964, almost entirely white and predominantly of Spanish and Italian descent. Many Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet.

The principal river is the *Rio Negro* (with its tributary the *Yi*), flowing from north-east to south-west into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the *Negro* is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Mcrin.

The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the *Uruguay Ríver* was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726 to 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

Elections were held on Nov. 28, 1971, which gave the Colorado Party a narrow majority.

According to the Constitution the President appoints a council of 11 ministers and the Vice-President presides over Congress. The legislature consists of a Chamber of 99 deputies and a Senate of 30 members (plus the Vice-President), elected for five years by a system of proportional representation. Voting is obligatory and extends to all citizens of good repute and certain long standing residents who are not citizens, from the age of 18. However, since February, 1973 the country has been governed by presidential rule with military support.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasture, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1970 livestock census showed figures of 8,563,747 cattle, 19,892,758 sheep, 420,972 horses, 418,709 hogs. It was estimated that in 1973 the number of cattle rose to 11,000,000. In addition to the meat packing industry, other foodstuffs, wine, beer and textiles are of importance.

The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, plastics, household consumer goods, edible oils and the refining of petroleum and petroleum products.

Mineral Deposits.—Iron is now being quarried; estimated yearly production is 1,000,000 tons of first quality pellets.

Communications.—There are about 7,820 km. of national highways, and about 12,083 km. of telegraph, with 48,375 miles of telephones.

There are about 2,398 km. of standard gauge railway in use in Uruguay. A State Autonomous Entity was formed to administer the railway systems purchased by the Government from four British companies in 1948.

An airline, PLUNA, which is owned by the State, runs a limited daily service to southern Brazil, Paraguay and Argentina. The principal capitals of the interior and a limited freight service are connected to Montevideo by TAMO, another State owned airline, using principally military aircraft and personnel. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, and technical and trade schools and evening courses for adult education are state controlled. There are about 322,053 pupils in the 2,362 state schools. In 1969 there were 140,700 pupils in secondary schools. The University at Montevideo (founded in 1849) had, in 1969, 18,000 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Four daily newspapers are published in Montevideo with an estimated total circulation of 200,000. Most of them are distributed throughout the country.

Finance.—No recent figures of revenue and expenditure are available. The national debt at Dec. 31, 1972 amounted to \$Ur. 61,597,140,427.

Currency.—The monetary unit is the *peso*. In May, 1963, the gold content of the *peso* was fixed at 0.059245 grammes of pure gold. After several devaluations the commercial exchange rate stood at June 8, 1976, at UrN \$3.63 = \$U.S.1. Sterling exchange stood at June 8, 1976, at \$UrN 6.40 = £1. The quotations of the U.S. dollar and pound sterling in the financial (fluctuating) market as at the same date were 1:360 and 3:280 Uruguayan pesos respectively. Sterling exchange, see p. 84.

	TRADE	
	1974	1975
Total exports	\$U.S. 381,182,000	\$U.S. 381,197,781
Total imports	481,259,000	516,197,876

Trade with U.K.

	1974
Imports from U.K.	£6,604,000
Exports to U.K.	9,211,000

The major exports are meat and by-products, wool and by-products, hides and bristle and agricultural products. The principal imports are raw materials, construction materials, oils and lubricants, automotive vehicles, kits and machinery.

The principal export item to the U.K. is wool and the main imports are automotive vehicles, kits, machinery, raw materials and metals.

CAPITAL. Ψ Montevideo. Population (1975 census 1,229,748). Other centres (with 1967 estimates) are Ψ Salto (60,000), Ψ Paysandu (60,000), Ψ Mercedes (34,000), Minas (34,000), Melo (30,000), and Rivera (40,000).

FLAG.—Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff. **NATIONAL DAY.**—August 25 (Declaration of Independence, 1825).

Time of transit from London to Montevideo, by air, 20–22 hours.

BRITISH EMBASSY Montevideo

Ambassador Extraordinary and Plenipotentiary, His Excellency Peter Richard Oliver, C.M.G. (1972).

1st Secretary, E. J. Sharland.

2nd Secretary, R. Backhouse.

Naval Attaché, Capt. J. Thomas, R.N. (resident at Buenos Aires).

Defence and Air Attaché, Gp. Capt. R. W. Millo (resident at Buenos Aires).

BRITISH CONSULAR OFFICES
There is a British Consular Office at Montevideo.

ANGLO-URUGUAYAN CULTURAL INSTITUTE, San José 1426, Montevideo.

There are branch Institutes at Saito, Paysandú, Fray Bentos, Rivera, Las Piedras, Melo, Mercedes, Trinidad and Treinta y Tres.

BRITISH-URUGUAYAN CHAMBER OF COMMERCE, Avenida Agraciada 1641, Pls 2º, Montevideo.

U.S.S.R.

Soyuz Sovetskikh Sotsialisticheskikh Respublik = Union of Soviet Socialist Republics
THE COMMUNIST PARTY OF THE SOVIET UNION

(K.P.S.S. = Kommunisticheskaya Partiya Sovetskogo Soyuza)

Constitutionally, the highest executive organ of the C.P.S.S.U. is its *Central Committee*, as elected by the *Party Congress*. The present *Central Committee* (elected at the XXVth Party Congress in March, 1976) consists of 287 full members; there are also 139 candidate members with a consultative voice and 85 members of the *Central Revision Commission*. The real power in the Party is vested, however, in the *Politbureau*, the *Secretariat* and the permanent *Departments of the Central Committee*.

Politbureau, Yu. V. Andropov; L. I. Brezhnev; V. V. Grishin; A. A. Gromyko; A. P. Kirilenko; A. N. Kosygin; F. D. Kulakov; D. A. Kuryayev; K. T. Mazurov; A. Ya. Pel'she; N. V. Podgorny; G. V. Romanov; V. V. Shcherbitsky; M. A. Suslov; D. F. Ustinov; (full members); G. A. Aliev; P. N. Demichev; P. M. Masherov; B. N. Ponomarev; Sh. R. Rashidov; M. S. Solomentsev (candidates for membership).

Secretariat, Leonid Ilyich Brezhnev (*General Secretary*) (since October 14, 1964); K. U. Chernenko; V. I. Dolgikh; I. V. Kapitonov; K. F. Katushev; A. P. Kirilenko; F. D. Kulakov; B. N. Ponomarev; M. A. Suslov; D. F. Ustinov; M. V. Zimyanin.

Committee of Party Control, A. Ya. Pel'she (*Chairman*).

Komsomol (Young Communist League). Ye. M. Tyazhelnikov (*1st Secretary*).

GOVERNMENT OF THE U.S.S.R.

The Presidium of the Supreme Soviet of the U.S.S.R.

Chairman (= President of the U.S.S.R.), Nikolay Viktorovich Podgorny (since December 9, 1965).

Secretary, M. P. Georgadze.

The Supreme Soviet (= Parliament) consists of two chambers.

Chairman (= Speaker) of the Council of the Union, A. P. Shitikov.

Chairman (= Speaker) of the Council of Nationalities, V. P. Ruben.

The Council of Ministers of the U.S.S.R.
Chairman (= Prime Minister), Alexei Nikolayevich Kosygin (since October 14, 1964).

1st Vice-Chairmen, K. T. Mazurov; N. A. Tikhonov.
Vice-Chairmen, I. V. Arkhipov; N. K. Baybakov; V. E. Dymshits; V. A. Kirillin; M. A. Lesechko; I. T. Novikov; V. N. Novikov; Z. N. Nuriyev; L. V. Smirnov.

Ministries.—There are three groups of departmental ministries, with a total of 76 ministers—31 All Union Ministries, i.e. federal ministries, 31 Union Republican Ministries (co-ordinating ministries of individual republics) and 14 Chairmen of State committees, etc., ranking as Ministers. The more important posts are occupied by:

Foreign Affairs, A. A. Gromyko.

Defence, D. F. Ustinov.

Foreign Trade, N. S. Patolichev.

Internal Affairs, N. A. Shchelokov.

Planning, N. K. Baybakov.

Science and Technology, V. A. Kirillin.

Buildings, I. T. Novikov.

State Security, Yu V. Andropov.

The Prime Ministers of the 15 constituent republics belong to the Council *ex officio*.

EMBASSY OF THE U.S.S.R. IN LONDON

13 Kensington Palace Gardens, W. 8.

[01-229 2666]

Ambassador Extraordinary and Plenipotentiary, His Excellency Nikolai M. Lunkov (1973).

AREA AND POPULATION

The U.S.S.R. is composed of 15 Union Republics (*see below*). Before the outbreak of the Second World War (1941-45 in U.S.S.R.), the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmen, Uzbek, Tadzhik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Rumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of *Bessarabia*, including the Danube estuary port of Izmail, and *Northern Bukovina*, also ceded by Rumania, became part of the Ukraine. The new Soviet-Rumanian frontier was confirmed by the 1947 Peace Treaty with Rumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.S. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the Second World War a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* and, in 1961, the Autonomous Republic of *Tuva*, within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (Karelian) Republic within the R.S.F.S.R.

Area and population (January 1, 1975 estimate) of the constituent Republics of the U.S.S.R. with their capitals:—

Republic (Capital)	Sq. miles	Population
I. R.S.F.S.R. (Moscow).....	6,593,391	133,741,000
II. Ukraine (Kiev).....	252,066	48,817,000
III. Belorussia (Minsk) ..	80,300	9,331,000

IV. Uzbekistan

(Tashkent)..... 157,181* 13,689,000*

V. Kazakhstan

(Alma-Ata)..... 1,064,980* 14,168,000*

VI. Georgia (Tbilisi).... 26,911 4,923,000

VII. Azerbaidjan (Baku).... 33,436 5,607,000

VIII. Lithuania (Vilnius).. 26,173 3,290,000

IX. Moldavia (Kishinev) 13,912 3,812,000

X. Latvia (Riga)..... 24,695 2,478,000

XI. Kirghizia (Frunze).. 76,642 3,298,000

XII. Tadzhikistan

(Dushanbe)..... 54,019 3,387,000

XIII. Armenia (Erevan).. 11,306 2,785,000

XIV. Turkmenistan

(Ashkhabad).... 188,417 2,506,000

XV. Estonia (Tallinn).... 17,413 1,429,000

* (Adjusted to include transfer of 3 border regions—888 sq. miles and 162,000 inhabitants—by Uzbek S.S.R., Kazakh S.S.R. and U.S.S.R. decrees of May-June 1971.)

The total area of the U.S.S.R. is 8,620,822 sq. miles; the total population: 253,261,000.

A striking demographic feature is the rapid urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total, in 1975 it reached 60 per cent., owing to migration to the towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 36 towns with over 500,000 (11 in 1939).

The proportion of women to men is 53·6 to 46·4. (In 1973 the birth-rate was 17·6; the mortality rate, 8·6; the natural increase, 9·0 per 1,000.

More than four-fifths of the people were born after the 1917 Revolution.

Main Nationalities

(1970 Census)

The most numerous national groups of U.S.S.R. are: Russian, 129 m and Ukrainian, 41 m. There are between 5 and 9 million Belorussians, Uzbeks, Kazakhs, and Tatars respectively. Azerbaidjani, Armenians and Georgians number between 3 and 5 million each group. There are some 2·5 million Lithuanians, Jews, Moldavians and Tadzhiks respectively. In each of the following nationality groups the population numbers between 1·05 and 1·8 million: Germans, Chuvashes, Latvians, Poles, Mordovians, Turkmen, Kirghizians, Bashkirs and Estonians.

The 1970 census revealed a remarkable difference between the growth rates of individual nationalities: while the Slav nations showed an annual increase of roughly one per cent., certain Central-Asian and Caucasian (mostly Moslem) nations recorded an annual net growth of three to four per cent.

CONSTITUTION

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual

peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33-35). At elections held on June 16, 1974, for the two Chambers, approximately 161 million persons voted for candidates (99.82 per cent. of voters) and under 400,000 against. The *Supreme Soviet* which, as a rule, meets twice a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its *Presidium* (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118-121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state." The new Party programme, adopted in November, 1961, envisages a great increase of the economic capacity of the country and promises the transition to "full Communism" some time after 1980.

A special committee was set up in November, 1961, to draft a new constitution.

Local Government.—The State power in regions, provinces, autonomous provinces, territories,

districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§ 94), elected by the working people of the respective administrative units for a term of two years (§ 95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§ 99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57-63 and 79-88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February, 1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries and/or the *Gosplan*. Nominally, the Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939-1945. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by Patriarch Alexius (d. 1970). A new Patriarch, Pimen, was elected in 1971.

The proselytizing successes of the religious communities have become of great concern to the authorities; there has been a great increase of anti-religious articles in the press since 1959, and a number of religious institutions were once again closed or banned. Harassment of individuals active in all religions and denominations continues.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast government-controlled pool of scientists. *President, A. Paleksandrov.*

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the

clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE, LITERATURE AND ARTS

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). The 20th century produced great poets like Alexander Blok (1880-1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890-1960), Vladimir Mayakovsky (1893-1930) and Anna Akhmatova (1888-1966). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekhov (1860-1904), Maxim Gorky (1868-1936), Ivan Bunin (1870-1953) and Alexander Solzhenitsyn (b. 1918).

Great names in music include Glinka (1804-1857), Borodin (1833-87), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikovsky (1840-1893), Rakhmaninov (1873-1943), Scriabin (1872-1915), Prokofiev (1891-1953), Stravinsky (1882-1971) and Shostakovich (1906-1975). Performers include Igor Oistrakh, M. Rostropovich, and S. Richter and the famous conductor Rozhdestvensky.

FINANCE

A new "heavy" Rouble was introduced on January 1, 1961. Prices and wages have been changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The official exchange rate is now approx. £1=R.1.33. It bears little relation to the actual purchasing power of the two currencies. Banknotes in circulation are those valuing R. 1, 3, 5, 10, 25, 50 and 100. There are also coins valuing Kopecks 1, 2, 3, 5, 10, 15, 20 and R. 1.

DEFENCE

Defence expenditure in the U.S.S.R. for 1975-76 is put officially at 17.4 billion roubles (or 7.8 per cent. of total budget). It is believed, however, that this does not represent the total spent on defence in the U.S.S.R. Much of this is concealed in estimates for other ministries. The general trend is a continuing emphasis on nuclear weapons while improving the levels and capabilities of conventional arms.

The basic military service is two years in the Army and Air Force and two to three years in the Navy and Border Guards.

The total size of the Soviet regular forces is now estimated to be about 3,525,000.

Operational ICBMs, i.e. Inter-Continental Ballistic Missiles, now total about 1,575. SLBMs number 720. The number of MRBMs and IRBMs appears to be fixed at about 600. The operational personnel of the Strategic Rocket Forces totals about 350,000.

The Air Forces comprise about 11,790 operational aircraft (including about 8,250 combat aircraft). The total strength of the Air Forces, excluding the Naval Air Force, is about 550,000 men. The total personnel of the separate Air Defence Command is estimated at 500,000 men.

The total size of the Soviet Army is estimated at 1,800,000 men. It is thought to be organized in 167 divisions, distributed as follows: 63 divisions in European U.S.S.R., 28 in Central and Southern U.S.S.R., 45 in the Sino-Soviet border area, 31 in Eastern Europe.

The total strength of the Soviet Navy and Naval Air Force is 475,000 men. In total tonnage, it is the second largest navy in the world, and its main strength lies in the submarine fleet. There are now 130 nuclear-powered and 250 diesel-powered submarines.

The Soviet Navy will soon have its first two aircraft-carriers; the first one was expected to enter service in mid-1976. The land-based Naval Air Force comprises about 650 bombers and 420 other aircraft. The surface ships comprise 35 cruisers and 100 destroyers.

The para-military forces number some 130,000 security and 180,000 border troops. There are also about 2½ million DOSAAF members who participate in such activities as athletics, shooting and parachuting.

Minister of Defence, D. F. Ustinov (with rank of Army General).

Chief of General Staff, Army General V. G. Kulikov. *Chief, Political Administration, Soviet Armed Forces*, Army Gen. A. A. Yepishev.

On May 14, 1955, a Treaty of Friendship, Mutual Assistance and Co-operation was signed in Warsaw between the Soviet Union and its European associates (Bulgaria, East Germany, Hungary, Poland, Rumania, and Czechoslovakia) (and Albania which left the Pact in Sept. 1968) to serve as a counterpoise to NATO. A united military command was set up in Moscow (*Secretary-General*, N. P. Firyublin; *C-in-C*, Marshal I. I. Yakubovsky; *Chief of Staff* (vacant)).

INDUSTRY AND AGRICULTURE

One of the most remarkable aspects of the Soviet economy has been the transformation of an essentially agricultural country into the second-strongest industrial power in the world. The 1975 output amounted to 103,900,000* tons of pig-iron, 141,000,000* tons of steel, 115,000,000* tons of rolled metal, 701,000,000* tons of coal, 482,000,000* tons of crude oil, 122,000,000* tons of cement, 1,038,000 million kW/h of electricity and 1,964,000 motor vehicles.

Agricultural development has been far slower, mainly owing to lack of incentives among peasants organized in *kolkhozy* (collective farms). Repeated droughts, such as in 1975, were a contributing factor to a permanent shortage of grain. Stock breeding has also suffered from the general mismanagement of farming. The livestock at Jan. 1, 1976 included 110,000,000 cattle, including 41,900,000 cows, and 146,900,000 sheep and goats. The level of productivity remains very low. It remains to be seen whether new incentives for peasants introduced in 1966 and 1970 and a variety of administrative reforms recently introduced in Moldavia and elsewhere will bring about a radical change in the situation. *Forests* cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

* Metric.

Trade with U.K.

	1974	1975
Imports from U.K.	£110,016,000	£210,297,000
Exports to U.K.	395,457,000	408,421,000

COMMUNICATIONS

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia *via* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektynaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line (the Baikal-Amur Railway) is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batumi, Taganrog, Rostov, Kerch, Sevastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, ice-bound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are ice-bound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carried about 419,000,000 tons of freight in 1973. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don Canal* linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May 1952.

FLAG OF THE U.S.S.R.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY OF THE U.S.S.R.—November 7 (Commemorating the October Bolshevik Revolution of 1917).

BRITISH EMBASSY

(Naberezhnaya Morisa Toreza 14, Moscow)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Howard Frank Trayton Smith, K.C.M.G. (1975).

Minister, I. J. M. Sutherland, C.M.G.
Counsellors, K. J. Uffen (*Commercial*); Dr. J. C. J.

Thynne (*Scientific*); C. L. G. Mallaby (*Head of Chancery*); B. Spencer (*Admin.*).

Defence and Air Attaché, Air Cdre. P. D. Thorne, O.B.E., D.F.C.

Military Attaché, Brig. D. H. Bush.

Naval Attaché, Capt. R. J. F. Turner, R.N.

British Council Representative, A. A. Edmondson (*Asst. Cultural Attaché*).

There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)
Chairman of the Presidium of the Supreme Soviet, M. A. Yasnov.

Chairman of the Council of Ministers, M. S. Solomen-tsev.

The R.S.F.S.R. has no Communist Party Central Committee of its own.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 53 per cent. of the total population. It consists of 16 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Osetian, Tatar, Tuva, Udmurt and Yakut A.S.S.R.s); 6 regions (Aital, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Vorenezh and Yaroslavl).

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. extends over all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Obi with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern

Caucasus, in the area between the Volga and the Ural (the so-called "Second Baku") and in Western Siberia. The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khopper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk-Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. An extensive programme of land improvement mainly involving this zone, announced early in 1974, aims to double its total agricultural output by 1990. In the eastern part of this zone, between the Volga and the Urals, cericulture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.S.R.—the Bashkir and Tatar Autonomous Republics. All industries are represented in the R.S.F.S.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Novokuznetsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Volgograd, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, MOSCOW. Population 7,466,000 (Jan. 1, 1975). Moscow, founded about A.D. 1147 by Yuri Doigoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914-1924 "Petrograd") has a population of 3,853,000 (Jan. 1, 1975).

Other towns with populations exceeding 500,000 are:—

Gorky (Nizhny-Novogorod).....	1,283,000
Novosibirsk (Novonikolayevsk).....	1,265,000
Kuibyshev (Samara).....	1,164,000
Sverdlovsk (Yekaterinburg).....	1,147,000
Chelyabinsk.....	969,000

Omsk.....	968,000
Kazan.....	946,000
Perm (Molotov).....	939,000
Volgograd (Stalingrad; Tsaritsyn).....	900,000
Ufa.....	895,000
Ψ Rostov-on-Don.....	888,000
Saratov.....	834,000
Voronezh.....	746,000
Krasnoyarsk.....	748,000
Yaroslavl.....	568,000
Novokuznetsk.....	524,000
Krasnodar.....	532,000

Ψ Seaport.

About 83 per cent. of the population are Russians.

II.—UKRAINE

First Secretary of the Party Central Committee,
V. V. Shcherbitsky.

Chairman of the Presidium of the Supreme Soviet,
A. F. Vatchenko.

Chairman of the Council of Ministers, A. P. Lyashko.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkassy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Donetsk, Ivano-Frankovsk, Kharkov, Kherson, Khmelnitsky, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Voroshilovgrad, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Dnister (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1970, the Ukraine provided 40 per cent of the total Soviet steel, 40 per cent. of metal goods and 33 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donetsk Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in the U.S.S.R. founded in the 9th century A.D., was the capital of the Russian State from 865 to 1240. Population (Jan. 1, 1975), 1,947,000. Other towns with population over 500,000 are:—

Kharkov.....	1,357,000
Ψ Odessa.....	1,002,000
Dnepropetrovsk (Yekaterinoslav).....	958,000
Donetsk (Stalino; Yuzovka, i.e. Hughes-ovka).....	950,000
Zaporozhye (Aleksandrovskaia).....	744,000
Krivoy-Rog.....	628,000
Lvov (Lviv; Lwow; Lemberg).....	617,000

III.—BELORUSSIA

(White Russia)

First Secretary of the Party Central Committee, P. M. Masherov.

Chairman of the Presidium of the Supreme Soviet,
F. A. Surganov.

Chairman of the Council of Ministers, T. Ya. Kiselev.

The Belorussian S.S.R., lying in the western part of the European area of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina. CAPITAL, Minsk. Population 1,133,000 (Jan. 1, 1975).

Belorussians make up four-fifths of the population, with Russians and Poles coming next.

IV.—UZBEKISTAN

First Secretary of the Party Central Committee, Sh. R. Rashidov.

Chairman of the Presidium of the Supreme Soviet, N. M. Matchanov.

Chairman of the Council of Ministers, N. D. Khudayberdiyev.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 11 provinces (Andizhan, Bokhara, Dzhizak, Ferghana, Kashka-Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya, Syr-Darya and Tashkent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include gold, natural gas, oil, copper, lead, zinc and coal.

The Uzbeks, a Turkic people, make up 65.5 per cent. of the population, the Russians (12.5 per cent.), Tatars (5 per cent.) and Kazakhs (4 per cent.) come next.

There are major agricultural and textile machinery plants and several chemical combines. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population 1,595,000 (Jan. 1, 1975). Samarkand contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulugbek, Tamerlane's astronomer-grandson, and a 15th-century observatory. Heavy damage was done to Tashkent by the series of earthquakes in April and May, 1966.

V.—KAZAKHSTAN

First Secretary of the Party Central Committee, D. A. Kunayev.

Chairman of the Presidium of Supreme Soviet, S. B. Niyazbekov.

Chairman of the Council of Ministers, B. A. Ashimov.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tienshan in the east and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic

in 1936. It consists of the 19 Provinces: Aktyubinsk, Alma-Ata, Chirchikent, Dzhambul, Dzhelkazgan, East-Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanay, Kzyl-Orda, Mangyshlak, Semipalatinsk, Taldy-Kurgan, Tselinograd, North-Kazakhstan, Pavlodar, Turgay and Uralsk.

Kazakhstan is a country of arid steppes and misdeserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tienshan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan is very rich in minerals: copper in Kounrad and Dzhelkazgan, lead and zinc in the Altai and Karatau mountains, iron ore in Radryg and Isakovsk, coal in Ekibastuz and Karaganda and oil and natural gas in the Mangyshlak peninsula. Major centres of metal industry exist now in the Altai Mountains, in Chirchikent, north of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the north and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 33 per cent. of its population. Russian settlers make up 42 per cent. and Ukrainians 7 per cent.

CAPITAL, Alma-Ata (formerly Verny). Population, 837,000 (Jan. 1, 1975). Karaganda, a major mining centre, has a population of 565,000 (Jan. 1, 1975).

VI.—GEORGIA

First Secretary of the Party Central Committee, E. A. Shevardnadze.

Chairman of the Presidium of the Supreme Soviet, P. G. Gilashvili.

Chairman of the Council of Ministers, Z. A. Pataridze.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjara) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Surz Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are subtropical in their climatic character. The most important mineral deposits are manganese (Chiatura), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viniculture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up 67 per cent. of the population, the remainder being composed of Armenians, Russians, Azerbaidjani and Osetians.

CAPITAL, Tbilisi (Tiflis), population 1,006,000 (Jan. 1, 1975).

VII.—AZERBAIDJAN

First Secretary of the Party Central Committee, G. A. Aliyev.

Chairman of the Presidium of the Supreme Soviet, K. A. Khaïlov.

Chairman of the Council of Ministers, A. I. Ibragimov.

The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shore of the Caspian Sea, and borders on Iran. It was formed in 1920. Between 1922 and 1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the lower reaches of its tributary Araks. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. Industry is dominated by oil and natural gas extraction and related chemical and engineering industries centred on Baku and Sumgait. A large power station on the Kura (Mingechaur) was completed in 1954. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up three-quarters of the population of the Republic, Armenians, about 9 per cent., and Russians, 10 per cent.

CAPITAL, Ψ Baku. Population 929,000 (Jan. 1, 1975).

VIII.—LITHUANIA

First Secretary of the Party Central Committee, P. P. Grishkyavichus.

Chairman of the Presidium of the Supreme Soviet, A. K. Barkauskas.

Chairman of the Council of Ministers, I. A. Manyshis.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 8–9 per cent. each.

CAPITAL, Vilnius (Vilna), restored to Lithuania by U.S.S.R. after the collapse and partition of Poland in 1939, and recaptured by Soviet forces in 1944). Population 433,000 (Jan. 1, 1975).

IX.—MOLDAVIA

First Secretary of the Party Central Committee, I. I. Bodyul.

Chairman of the Presidium of the Supreme Soviet, K. F. Ilyashenko.

Chairman of the Council of Ministers, P. A. Paskar.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Rumania with the Pruth forming the frontier. In 1918, Rumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Rumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Rumanians from 1941 to 1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viticulture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. Moldavians make up 64 per cent. of the population, with Ukrainians, and Russians next.

CAPITAL, Kishinev (Chisinau). Population, 452,000 (Jan. 1, 1975).

X.—LATVIA

First Secretary of the Party Central Committee, A. E. Voss.

Chairman of the Presidium of the Supreme Soviet, P. Ya. Strautmanis.

Chairman of the Council of Ministers, Yu. Ya. Ruben.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

The Latvians make up 57 per cent. of the Republic's population, Russians 30 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940–41 and again after 1944.

CAPITAL, Ψ Riga. Population, 796,000 (Jan. 1, 1975).

XI.—KIRGHIZIA

First Secretary of the Party Central Committee, T. U. Usubaliyev.

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, A. S. Suyumbayev.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936 a Union Republic. It contains three provinces, Issyk-Kul, Naryn and Osh. The Kirghiz Republic is a mountainous country, the major part being covered by the ridge of the Central Tianshan, while mountains of the Pamir-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Crops include sugar beet and cotton, and sheep are important in the mountains. Industry is being developed and some mining is done. The Kirghiz constitute 44 per cent. of the population, the Russians 29 per cent. The Uzbeks (in Eastern Ferghana) amount to 11 per cent.

CAPITAL, Frunze (formerly Pishpek). Population, 486,000 (Jan. 1, 1975).

XII.—TADJIKISTAN

First Secretary of the Party Central Committee, D. Rasulov.

Chairman of the Presidium of the Supreme Soviet, M. Kholov.

Chairman of the Council of Ministers, R. N. Nabiev.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Kulyab and Leninabad Provinces.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., Pik Kommunizma (24,500 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syrdarya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fifty-six per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), 23 per cent. Uzbeks, the rest Russians and others.

CAPITAL, Dushanbe (formerly Stalinabad; Dyushambe). Population, 436,000 (Jan. 1, 1975).

XIII.—ARMENIA

First Secretary of the Party Central Committee, K. S. Demirchyan.

Chairman of the Presidium of the Supreme Soviet, B. E. Sarkisov.

Chairman of the Council of Ministers, G. A. Arzumanyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia: it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is Mount Ararat (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population, 899,000 (Jan. 1, 1975).

XIV.—TURKMENISTAN

First Secretary of the Party Committee, M. Gapurov.

Chairman of the Presidium of the Supreme Soviet, A.-M. Klychev.

Chairman of the Council of Ministers, B. Yazkuliev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and

Afghanistan. It was formed in 1924 and contains five Provinces: Ashkhabad, Chardjou, Knasnovodsk, Mary and Tashauz. The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The cultivation of cotton, stock-raising and mineral extraction are the principal industries. The republic produces 16 per cent. of the Soviet Union's natural gas, as well as astrakhan furs and carpets. Most of the land under plough is artificially irrigated. The oil and silk industries are of old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up two-thirds of the population, Russians 15 per cent., and Uzbeks eight per cent.

CAPITAL, Ashkhabad (formerly Askhabad, Poltoratski). Population, 289,000 (Jan. 1, 1975).

XV.—ESTONIA

First Secretary of the Party Central Committee, I. G. Kebin.

Chairman of the Presidium of the Supreme Soviet, A. P. Vader.

Chairman of the Council of Ministers, V. I. Klauson.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941 and 1944, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, wood-working, etc.

The population consists of Estonians (68 per cent.) and Russians (25 per cent.).

CAPITAL, Tallinn (formerly Reval). Population, 399,000 (Jan. 1, 1975).

THE VATICAN CITY STATE

(Stato della Città del Vaticano)

Sovereign Pontiff, His Holiness Pope Paul VI (Giovanni Battista Montini), born at Concesio (Brescia), Sept. 26, 1897, elected Pope (in succession to John XXIII), June 21, 1963.

Secretary of State, Cardinal Jean Marie Villot, appointed April 30, 1969.

The office of the ecclesiastical head of the Roman Catholic Church (Holy See) is vested in the Pope, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX (1846-1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying

the treaty were conventions regulating the condition of religion and the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City in 1975 was 1,000.

FLAG.—Square flag; equal vertical bands of yellow (next staff), and white; crossed keys and triple crown device on white band.

BRITISH LEGATION

(91 Via Condotti, Rome)

Envoy Extraordinary and Minister Plenipotentiary to the Holy See, His Excellency Dugald Malcolm, C.M.G., C.V.O., T.D. (1975).

Attaché, O. Senior (Education).

Consulate-General: 71A Park Mansions, S.W.1.

General Consul, Roberto Erwin Lascano.

There is also a Consulate-General at Liverpool.

Area and Population.—A South American Republic, situated approximately between 0° 45' S. lat. and 12° 12' N. lat. and 59° 45'–73° 09' W. long. It consists of one Federal District, 20 states and 2 territories. Venezuela has a total area of 353,894 sq. miles and a population (estimate, 1975) of 11,992,700 increasing annually at a rate of 3.4 per cent.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia,

east by Guyana, and south by Brazil. Included in the area of the Republic are 72 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the State of Nueva Esparta. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of Patos (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Pico Bolívar (16,411 feet) and Picacho de la Sierra (15,420 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Pacaraima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guyana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the Orinoco, with innumerable affluents, the main river exceeding 1,600 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claimed to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15' W. long., 2° 18' N. lat., and about 1,100 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 40 ft. draft, as far as

Puerto Ordaz (about 150 miles up-stream), which with the adjacent town of San Felix is now officially known as Ciudad Guayana. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Río Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. A British scientific expedition travelled in April-May, 1968, by Hovercraft from Manaos in Brazil *via* the Río Negro, Casiquiare canal and Orinoco River to Trinidad. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area of 8,296 square miles, is the largest lake in South America. Other lakes are *Zulia* (290 square miles), south-west of Maracaibo, and *Valencia* (216 square miles) about 1,400 ft. above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler season from November to March.

Government.—On January 23, 1958, the military dictatorship of Maj-Gen. Marcos Pérez Jiménez, which had lasted since 1953 and covered a period of remarkable economic expansion due to the Venezuelan oil boom, was overthrown by a popular and military uprising. Since 1958 Venezuela has had a freely-elected democratic government. In elections in December, 1958, *Acción Democrática* (A.D.) gained a clear majority and Sr. Rómulo Betancourt of A.D. was elected President. For most of his five-year term of office Sr. Betancourt governed in coalition with the Christian Socialist Party, *Copei*. Further national elections were held on December 1, 1963, in which A.D. retained a reduced majority. Dr. Raúl Leoni of A.D. was elected President. The inauguration of the new Government took place on March 11, 1964. Formation of a broad-based coalition government composed of A.D., U.R.D. (*Unión Republicana Democrática*) and F.N.D. (*Frente Nacional Democrático*) was announced on Nov. 5, 1964. The F.N.D. left the Government in 1965 and U.R.D. in April, 1968. A general election held in Dec., 1968, was narrowly won by *Copei* and Dr. Rafael Caldera assumed the Presidency in March, 1969. *Copei*, however did not have a majority in Congress, and to some extent governed with the consensus of A.D., who were returned to power with a Congressional majority in the General Election of Dec. 1973. President Carlos Andrés Pérez's term of office lasts until March 1979.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 44 daily newspapers in Venezuela, of which ten are published in Caracas, and about 60 to 70 weekly news magazines. There are also a large number of fortnightly, monthly and quarterly publications.

Education is free and primary education compulsory from the age of 7 years. There are ten universities in Venezuela, five in Caracas and the others in Maracaibo, Mérida, Valencia, Cumaná and Barquisimeto.

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka

beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, ground-nuts, potatoes, tomatoes, other vegetables, sisal and tobacco. There is an extensive beef and dairy farming industry. The country does not produce all the grain it requires but is practically self-sufficient for its other food requirements.

The principal industry is that of *Petroleum*, which last year contributed 97 per cent. of Venezuela's foreign exchange income. Daily production of the oilfields was reduced by direct government policy in 1974, and this policy of reduction in offtake is to continue until 1976 as a conservation measure. Before the war of 1939-45 over 80 per cent. of the crude oil was exported to Netherlands Antilles refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Both companies have invested heavily in desulphurization plant to satisfy anti-pollution measures in Eastern U.S.A., whither most of their product goes in the form of fuel oil. Other refineries are being operated at Caripito, San Lorenzo, Puerto La Cruz, Tucupeido, El Chaure and El Palito. New contracts have been signed for exploitation of petroleum resources in parts of the Maracaibo region. The Venezuelan Government has unified income tax on firms involved in mining and petroleum at 60 per cent., and reformed the basis on which tax is calculated.

Rich iron ore deposits in Eastern Venezuela have been developed and production was 17,000,000 metric tons in 1972. Secondary processes for pelletizing and briquetting ore for export have been installed. The government-owned steel mill at Matanzas in the Guayana uses local iron ore and obtains its electric power from hydro-electric installations on the Caroni River. It produces seamless steel tubes, billets, wire and profiles. The production of more steel products is planned over the next few years. A new mill at Ciudad Guayana for the production of centrifugally-cast iron pipe came into operation at the end of 1970, with an annual capacity of 30,000 tons. It is planned to increase steel production to 15,000,000 tons a year by 1985.

Other industries include petrochemicals, gold, diamonds and asbestos; textiles and clothing; plastics; manufacture of paper, cement, glass and plate glass; beer and other alcoholic beverages; tyres, cigarettes, soap; animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly; preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing, sanitary ware, electric home appliances, pumps, aluminium and aluminium products, toys, agricultural machinery, bicycles, electronic components, cosmetics and many others.

Communications.—There are about 39,563 km. of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 372 kilometres. Road and river communications have made railways of negligible importance in Venezuela except for carrying iron-ore in the south-east. However, the government now plans a new railway from Guayana to the industrial zones round Valencia for carrying steel. British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive

network of internal lines and also connect Caracas with the United States, Central America, South America, the Caribbean and Europe. In 1972 the Venezuelan state-owned merchant fleet had 16 ships with a total deadweight tonnage of 115,950. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled, 96 commercial and one cultural, FM, broadcasting stations. There are three television stations in Venezuela, all in Caracas. One is government controlled.

FINANCE

	1972 (in millions of Bs.)	1973
Revenue.....	12,450	16,440
Expenditure.....	12,618	14,036

National income per head in Venezuela in 1973 was \$U.S.1260, the highest in Latin America.

Currency.—The unit of currency is the gold *Bolívar* of 100 centimos. The selling rate for foreign exchange for all purposes is Bs. 4.30=U.S. \$1. The rates for other currencies fluctuate according to their quotations against the U.S. dollar. The Government still subsidises the imports of certain basic commodities.

TRADE

	1972	1973†
Imports.....	Bs.9,301,000,000	Bs.10,895,000,000
Exports.....	13,060,000,000	23,418,000,000

† Estimate.

The principal imports are machinery, foodstuffs, durable and non-durable consumer goods, iron, steel and chemicals. The principal exports are petroleum and petroleum products, iron ore, coffee and cocoa, and diamonds.

Trade with U.K.

	1974	1975
Imports from U.K.....	£50,311,000	£91,630,000
Exports to U.K.....	135,226,000	165,425,000

CAPITAL.—Caracas (3,000 ft.). Population, 1971, 2,183,935. Other principal towns are Ψ Maracaibo (650,000), Barquisimeto (330,000), Valencia (360,000), Maracay (250,000), San Cristobal (150,000), Cumaná (120,000) and Ciudad Guayana (150,000).

FLAG.—Three horizontal bands, yellow, blue, red (with seven white stars on blue band and coat of arms next staff on yellow band). **NATIONAL DAY.**—July 5.

Vietnam, with an area of 129,000 square miles, and an estimated population of 43,700,000, is bordered on the north by China and the west by Laos and Cambodia.

Government.—Following the end of the war in Vietnam in 1975, and the establishment of a Provisional Revolutionary Government to administer South Vietnam, a National Assembly representing the whole of Vietnam was elected on April 25, 1976. The Assembly met in Hanoi on June 24, and on July 2 approved the reunification of North and South Vietnam under the name of the Socialist Republic of Vietnam. The national flag, anthem and capital of North Vietnam were unanimously adopted for the Socialist Republic, and Saigon was renamed Ho Chi Minh City.

A committee was elected to draft a constitution, pending the introduction of which the 1959 Constitution of North Vietnam applied to the whole country.

The President of North Vietnam since 1969, Ton Duc Thang, was elected President and Pham Van Dong was elected Prime Minister.

CAPITAL.—Hanoi (1,378,335).

FLAG.—Red, with yellow five-point star in centre.

NATIONAL DAY.—September 2.

YEMEN

(Yemen Arab Republic)

Chairman of Command Council, Lieutenant-Colonel Ibrahim Mohammed al Hamdi, *assumed office*, June 13, 1974.

Prime Minister, Abdul Aziz Abdul Ghani.

YEMENI EMBASSY

41 South Street, W.1

[01-499 5246]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mohammed Abdullah al-Eryani (1974).

Minister-Plenipotentiary, Abdul Wahab Mohammed Al-Shami.

Yemen, the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between the kingdom of Saudi Arabia and the People's Democratic Republic of Yemen, with an estimated area of 75,000 square miles and a population of about 6,500,000 including about 1,250,000 emigrant workers in the Arabian peninsula and elsewhere, including the U.K. The highlands and central plateau of Yemen, and the highest portions of the maritime range, form the most fertile part of Arabia, with an abundant but irregular rainfall.

Trade.—The main exports are cotton, hides and skins, and cotton seeds. Imports from U.K. in 1975 were valued at £9,000,000.

The ruins of Marib, the ancient Sabæan capital and its dam are in the Yemen.

Government.—Following a bloodless military coup in Sana'a on June 13, 1974, a Military Command Council seized power. The Presidential Council resigned; the Constitution and the Consultative Council were suspended. On Oct. 23, 1974 the Constitution was revived, but the Consultative Assembly, whilst in theory reconvened, remained in suspense. The Command Council, no longer exclusively formed of military members, replaced the Republican Council as the supreme Constitutional body. In October 1975, by Constitutional Decree, the Chairman of the Command Council became Head of State and Commander in Chief.

CAPITAL, Sana'a (pop. 135,000). Other main cities are Taiz (80,000) and Hodeida (80,000).

FLAG.—Horizontal bands of red, white and black, with 5-point green star in centre of white band. (Adopted Dec., 1962).

BRITISH EMBASSY

Vice-Consul, S. N. Lee.

British Council Representative, C. K. Smith.

YEMEN

(People's Democratic Republic of Yemen)

Presidential Council, Salim Rubi' Ali (Chairman); Ali Nasser Muhammed; Abdul Fattah Isma'il.

Prime Minister and Minister of Defence and Education, Ali Nasser Muhammed.

Foreign Affairs, Mohammed Saleh Yafai Muti.

There are 13 other departmental Ministers.

EMBASSY

57 Cromwell Road, S.W.7

[01-584 6607]

Ambassador Extraordinary and Plenipotentiary, His Excellency Muhammad Hadi Awad.

Minister-Plenipotentiary, Abdullah Ahmed Muhelrez.

Area and Population.—The Democratic Republic of Yemen lies at the southern end of the Arabian peninsula, having a frontier with the Yemen Arab Republic, and a coastline extending 700 miles from the Red Sea eastwards along the Gulf of Aden. The area is largely composed of mountains and desert. Rainfall is generally scarce and unpredictable. The population outside Aden is concentrated in the fertile districts. In the more extensive desert and near-desert areas nomadic communities depend on their livestock for a livelihood.

Included in the State are the offshore islands of Perim (in the Bab al-Mandeb Straits) and Socotra, formerly part of the sultanate of Qishn and Socotra, now merged in the People's Republic. Sovereignty over the island of Kamaran (area 70 sq. miles) in the Red Sea is under dispute following its occupation by forces of the Yemen Arab Republic during border conflicts in October, 1972. The area of the People's Democratic Republic is 180,000 sq. miles, with a population of 1,598,275 (Census, May 1973). The population of Aden alone (75 sq. miles) is about 250,000. The principal districts of Aden township are: Crater, Khormaksar, Tawahi, and Ma'alla. Neighbouring communities are at Sheikh Othman, Medinat al-Shaab, and Little Aden, which is linked to the main town by a

sandy strip of coastline, and is the site of a British Petroleum oil refinery. The other major coastal town is Mukalla.

Government.—The People's Republic of South Yemen was set up on Nov. 30, 1967 when the British government ceded power to the National Liberation front, thus bringing to an end 129 years of British rule in Aden and some years of protectorate status in the hinterland. Its name was changed to People's Democratic Republic of Yemen on Nov. 30, 1970. Territory of the Republic is that of the former Federation of South Arabia and the Aden Protectorates, consisting of the State of Aden and some 17 sultanates and emirates. It is now divided into six Governorates. Negotiations held between the British Government and representatives of the N.L.F. at Geneva from Nov. 21-29, 1967, ended in agreement on financial aid to South Yemen for civil and military purposes for a period of six months from the date of independence. Evacuation of British military forces which had begun in April, 1967, was completed on Nov. 29.

The Secretary-General of the National Liberation Front, Mr. Qahtan as-Shaabi, who had been appointed President from Nov. 30, 1967, held office until June 22, 1969, when he was deposed in a bloodless coup d'état and replaced by a Presidential Council led by Salim Rubi' al Ali. Under a constitution promulgated on Nov. 30, 1970, a Supreme People's Council of 101 members was appointed in May, 1971.

The Government receives substantial development and other aid from China, U.S.S.R. and other Socialist Bloc countries.

Kuria Muria Islands.—The Kuria Muria Islands, which had been administered by Gt. Britain from Aden although 200 miles distant from Yemen territory, were retroceded to the Sultanate of Oman on Nov. 30, 1967.

Production.—Agriculture is the main occupation of the inhabitants of the 60,000 square miles of the Republic, outside Aden town. This is largely of a subsistence nature, sorghum, sesame and millets being the chief crops, with wheat and barley widely grown at the higher elevations. Of increasing importance, however, are the cash crops which have been developed since the Second World War, by far the most important of which is long-staple cotton, which is now a major export, and revenue from which averages about £1,500,000 annually.

Under the Five Year Development Plan 1974-79 much importance is attached to the development of agricultural and fisheries projects. It is expected, that together, there will be a production increase of 54.1 per cent. by 1978-80 over the base year 1972-73. Light industries are being established which will replace imports and use locally produced raw materials.

Trade with U.K.

	1974	1975
Imports from U.K.	£5,968,000	£8,394,000
Exports to U.K.	8,118,000	3,630,000

Following the closure of the Suez Canal in 1967 the once prosperous trading economy of Aden fell into a steady decline, which has not been reversed by the re-opening of the Canal. The British Petroleum refinery exports almost 2,500,000 tons of petroleum products annually. In the main harbour, cargo handling for larger vessels is by lighter, but wharves at Maalla can accommodate alongside vessels up to 300 feet in length and 18 feet in draught.

Finance and Currency.—In the financial year 1974-75 revenue was estimated at about £18,000,000 and expenditure £38,000,000. Currency is the South

Yemen dinar (SYD), the total circulation of which is about £48,000,000.

Communications.—There are no railways in the Republic. Aden has 400 miles of good roads and construction of a further 300 miles will proceed under the Five Year Plan. A system of undeveloped but motorable roads links the towns and villages outside Aden. There is an international airport at Aden (Khormaksar) into which a limited number of international airlines operate.

CAPITAL.—Aden (population, 250,000).

FLAG.—A tricolour, red, white and black horizontal bands, with a triangle of light blue at the hoist pointing towards the fly and charged with a five pointed red star.

NATIONAL DAYS.—Independence Day, Nov. 30; Revolution Day, Oct. 14.

YUGOSLAV EMBASSY IN LONDON

5-7 Lexham Gardens W.8.

[01-370 6105]

Ambassador Extraordinary and Plenipotentiary, His Excellency Gen. Bogdan Orescanin (1973).

Minister-Counsellor, Vladislav Jovanović.

Minister Plenipotentiary, Branko Komatina (Economic).

Counsellors, Dušan Bogdanović (Press and Culture); Momčilo Bajcetić (Consular); Petar Bosković (Scientific).

Defence Attaché, Col. Miloš Surlan.

Asst. Defence Attaché, Lt.-Col. Miroslav Ribner.

First Secretary, Jovan Cvejić (Consular).

2nd Secretaries, Radoslav Maksimović (Press and Culture); Jovica Prodanović.

3rd Secretary, Miss Sonja Biserko.

Consulate, 7 Lexham Gardens, W.8.

Area and Population.—Yugoslavia is a Federation comprising the Socialist Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the Socialist Autonomous Provinces of the Vojvodina and Kosovo. In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. The area of Yugoslavia is estimated at 255,804 square kilometres (98,725 square miles) and the population in June, 1975, at 21,352,000. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Government.—On Nov. 29, 1945, the Constituent Assembly of Yugoslavia at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

On April 7, 1963, a new Constitution was proclaimed under which the official name of the country was changed to "The Socialist Federal Republic of Yugoslavia". The existing two Councils of the Federal Assembly were replaced by five Chambers of 120 members each (Federal Chamber, Economic Chamber, Educational-Cultural Chamber, Social Welfare and Health Chamber, and Organizational/Political Chamber), plus a Chamber of Nationalities of 70 members. A Constitutional Court was created. Elections to the new Federal Assembly were held in 1963 and in April, 1967.

In 1969 the Federal Assembly was reconstructed by the abolition of the Federal and Organizational/Political Chambers and the addition of one new chamber, the Social/Political. All Chambers continued to have 120 members each except the Chamber of Nationalities which doubled its size to 140. Elections to this Assembly were held in April, 1969. Several amendments to the Constitution were made in 1971. The most important formed a new ruling body called the Presidency. The intention is that its members will take it in turns to become President of the Republic for a period of 12 months each. President Tito will however have the title of Life President. A new Constitution was proclaimed in 1974 followed by the reconstitution of the Federal Assembly, after elections based on the new delegatory system, into two chambers consisting of the Federal Chamber (220 delegates) and the Republican Provincial Chamber (88 delegates). A new Federal Executive Council (i.e. government) was also formed.

Defence.—The Army, Navy and Air Force on a peace footing consist of 222,000 officers and men.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. The 1953 Census revealed that 2,127,875 of the population were without religion, 6,984,686 were Orthodox, 5,370,760 Catholic, 157,702 Protestant, 61,274 other Christians, 2,090,380 Moslem, 2,565 Jews, 495 other non-Christians, 10,066 undecided and 130,740 unknown. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in

churches. Eight years' elementary education is compulsory and all education is free. In 1969-70 there were 14,043 elementary schools with 116,895 teachers and 2,854,579 pupils and 2,974 secondary schools (including adult and special schools) with 33,702 teachers and 801,169 pupils. In addition, in the 1970-71 academic year there were 13 art academies with 483 teachers and 2,225 pupils, 10 high schools with 557 teachers and 7,456 pupils, and 119 higher schools with 3,986 teachers and 79,325 pupils. There are nine universities: Belgrade, Zagreb, Ljubljana, Sarajevo, Skopje, Novi Sad, Nis, Pristina and Titograd.

Language and Literature.—The languages of the country are Serbo-Croat, Slovenian and Macedonian, all South-Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Turkish, Rumanian, Albanian, Italian, Slovak and Ruthenian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 4

respectively. The forest areas produced 17,430,000 cubic metres of cut timber in 1973. According to Yugoslav official estimates, the livestock population in 1974 was approximately as follows: cattle, 5,681,000; sheep, 7,852,000; pigs 7,401,000; poultry, 54,685,000. Minerals are an important source of wealth particularly in the central and south-eastern regions. Estimated production in 1974 included the following ('000 tons): coal 33,583; coke 1,315; electrolytic copper 150; pig iron 2,126; steel (total) 2,833; aluminium 147; zinc 56; mercury 546 and crude petroleum 3,458.

Communications.—In 1973 there were approximately 10,400 kms of standard and narrow gauge railway and approximately 98,400 kms of classified roads. The 476 km. Belgrade-Bar railway was opened in June 1976. In 1974 there were 1,143,000 telephones in use in the country. The principal ports on the long Adriatic seaboard of Yugoslavia are Rijeka, Šibenik, Split, Zadar, Ploče, Dubrovnik, Bar, Kotor (Carraro) and Koper. A new port is still under construction at Bakar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

FINANCE

	1973	1974
	million Dinars	
Revenue.....	59,314	82,302
Expenditure.....	58,742	81,492

The rate of exchange is variable and in mid-1976 was 32/33 dinars = £1 (see also p. 84).

Trade with U.K.

	1974	1975
Imports from U.K.	£83,100,000	£94,200,000
Exports to U.K.	30,600,000	24,300,000

The chief exports to the United Kingdom are meat and meat products, textiles, furniture and timber. The main imports from the United Kingdom are machinery of all kinds, chemicals, wool tops and metal manufactures.

CAPITAL.—Belgrade, population (Greater Belgrade, 1971), 1,204,000. Other towns are Zagreb (602,000); Skopje (388,000); Ljubljana (258,000); Sarajevo (292,000); Novi Sad (214,000); Pristina (153,000); Ψ Split (152,000); Ψ Rijeka (133,000); Titograd (99,000).

FLAG.—Five-point red star outlined by narrow yellow stripe, on a ground of three horizontal bars, blue, white and red. **NATIONAL DAY.**—November 29.

BRITISH EMBASSY

Generala Ždanova 46, Belgrade.
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Dugald Leslie Lord Stewart, K.C.V.O., C.M.G. (1971).

Counsellors, C. L. Booth; L. J. Middleton (*Economic and Commercial*).

Defence Attaché, Col. T. Holloway.

Naval and Air Attaché, Wing-Cdr. I. Scott.

1st Secretaries, A. M. Wood; G. D. G. Murrell (*Information*); S. T. Corcoran (*Labour*) (*resident at Athens*); D. J. Young (*Admin. and Consular*).

2nd Secretary, P. L. Thomas.

3rd Secretaries, A. Marshall; N. A. S. Jones.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Belgrade, Zagreb and Split.

British Council Representative, Dr. D. S. Coombs, Generala Ždanova 34, Belgrade. *British Council Reading Room* Knez Mihajlova 45, Belgrade. There are also a centre and library at Zagreb.

Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana (Laibach), 2 Croat dailies in Zagreb, 2 dailies in Novi Sad, one in Hungarian, 2 dailies in Rijeka, one in Italian and daily papers at Skopje, Sarajevo, Pristina, Split, Maribor and Osijek.

Production and Industry.—About 47 per cent. of the population is engaged in agriculture, although in recent years industry has expanded rapidly and industrial production has grown sevenfold since 1939. Recent emphasis has been on the integration of small industrial enterprises into more efficient complexes. In agriculture the main emphasis is on increased investment in mechanization and fertilizers in the large socially-owned agricultural combines but now the private sector is being encouraged to mechanize and become more efficient and small size tractors, farm machinery and implements are being supplied.

The main crops are wheat and maize, of which the yields in 1974 were 6,282,000 and 7,989,000 tons

ZAIRE

(The Republic of Zaire)

President of the Republic and Minister of Defence, Gen. Mobutu Sésé Seko, born Oct. 30, 1930; assumed office November 25, 1965; elected for 7-year term, Nov. 5, 1970.

CABINET

(As at Feb. 1976)

Political Affairs, Engulu Baangampongo Bakokele Lokanga.

Foreign Affairs and International Cooperation, Nguza Karl-I-Bond.

National Orientation, Mandungu Bulu Nyati.

Environment, Conservation of Nature and Tourism, Citoyenne Lessedjina Kiaba Lema.

State Portfolio, Mambu Ma Nkenzu Makwala.

ZAIRE EMBASSY

26 Chesham Place, S.W.1.

[01-235 6137]

Ambassador Extraordinary and Plenipotentiary, His Excellency Kaninda Mpumbua Tshingomba, G.C.V.O.

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960, when it became the Democratic Republic of the Congo. In October 1971 the name changed to the Republic of Zaire. Situated between long. 12°–31° E. and lat. 5° N.–13° S., the Zairian Republic comprises an area of 905,582 sq. miles, with a population (Census, 1970) of 21,637,000, including 932,000 foreigners. The State is divided into 8 provinces (see below).

Government.—On June 30, 1960, the Belgian Congo became an independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the *Loi Fondamentale*, drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the Independence of the State of Katanga although he failed to obtain international recognition. Katanga did not come under the Government at Leopoldville until January 14, 1963.

The constitutional and political situation remained unsettled, the United Nations having mixed forces in the country until 1964. By the middle of 1965, the Congolese Government formed by M. Tshombe in July, 1964, had succeeded in gaining control of all the towns from the rebels and depriving them of military aid from outside the Congo. At elections held in the spring of 1965 the Government party won an overall majority of 86, but the

elections in three provinces were annulled on the grounds that they had been irregularly conducted. Following fresh elections held in these provinces in August, 1965, M. Tshombe's Government was dismissed by the President. A new Cabinet was formed by M. Evariste Kimba on October 19 and held office until the deposition on Nov. 25 of the President.

General Joseph-Desiré Mobutu, Commander-in-Chief of the Congolese National Army, announced on November 25, 1965, that he had assumed the Presidency. After re-organizations in Dec. 1966, and Oct. 5, 1967, a new Cabinet, with the President again as Prime Minister, took office on Mar. 5, 1969.

The office of Prime Minister was later dropped and a Presidential régime instituted. The *Mouvement Populaire de la Révolution*, formed in 1967, was made the sole political party. With its deliberative assembly, the Party Congress, it is the supreme political institution of the country. Its executive body, the 15-man Political Bureau, is headed by the President and takes precedence over the single-chamber 420-person National Assembly as well as over the Government. The President changed his name to Mobutu Sésé Séko Kuku Ngbendu Wa Zabanga in 1972, but is usually known by the first three of these names only.

Climate.—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. There has been some increase in sleeping-sickness since independence. Malaria, formerly under control in Leopoldville (now Kinshasa) and Matadi, has also begun to increase.

Extensive forest covers the central districts.

Provinces.—On December 24, 1966, the number of provinces was reduced from 21 to 8, each under a Governor and provincial administration. They have recently been redesignated as "regions" and are now as follows with names of capitals in brackets: Bas-Zaire (*Matadi*); Bandundu (*Bandundu*); Equateur (*Mbandaka*); Haut-Zaire (*Kisangani*); Kivu (*Bukavu*); Shaba, formerly Katanga (*Lubumbashi*); East Kasai (*Mbuji-Mayi*); West Kasai (*Kananga*).

Production.—The cultivation of oil palms is widespread, palm oil being the most important agricultural cash product. Rubber, coffee, cocoa and timber are the next most important agricultural exports. The production of cotton, pyrethrum and copal fell sharply on Independence but is now

increasing. The country is rich in minerals, particularly Shaba (ex-Katanga) province. Copper is widely exploited and is the country's major source of foreign exchange earnings. Extensive radium deposits exist near Lubumbashi and reef-gold exists in the north-east of the country.

There is a wide variety of small but flourishing secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint, sugar, furniture, metal goods and tyres, and local assembly of motor vehicles is now beginning. There are very large reserves of hydro-electric power and the huge Inga dam on the river Zaire is now supplying electricity to Matadi and Kinshasa.

The chief exports are copper, palm oil and palm-kernels, coffee, diamonds, rubber, cobalt, cassiterite, zinc and other metals.

Currency.—The present unit of currency, the Zaire, was introduced in 1967, replacing 1,000 Old Congolese francs. In March 1976 it was divorced from the U.S. dollar and devalued to a parity of 1 Zaire = 1 S.D.R. Rate against Sterling, £1 = 1'60 Zaire.

Trade with U.K.

	1974	1975
Imports from U.K.	£20,428,000	£23,609,000
Exports to U.K.	36,496,000	29,933,000

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue.

EUROPEAN FREE TRADE ASSOCIATION (EFTA)

Member States: Austria, Iceland, Norway, Portugal, Sweden, Switzerland. Associate Member: Finland.

Following the unsuccessful attempt to create a European Free Trade Area linking the E.E.C. with other members of the O.E.E.C., seven European States above came together in 1959 to form the European Free Trade Association. The seven were Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom. The EFTA Convention became effective on May 3, 1960, and just over a year later, on June 26, 1961, Finland became an associate member. Iceland applied for full membership in November, 1968, and acceded to the Association and to the Finland-EFTA Agreement on March 1, 1970.

In 1973 all the EFTA Member States entered into a new relationship with the EEC. Two—Denmark and the United Kingdom—withdraw from EFTA at the end of December 1972 to become members of the EEC on January 1, 1973. Agreements establishing industrial free trade between five of the other EFTA Member States (Austria, Iceland, Portugal, Sweden and Switzerland) and the EEC came into force on that same date. Similar agreements with Norway and Finland came into force on July 1, 1973, and January 1, 1974, respectively.

The Convention defines the objects of the Association as (1) to promote economic expansion in the area of the Association and in each member state; (2) to ensure that trade between member states takes place in conditions of fair competition; (3) to avoid significant disparity between member states in the condition of supply of raw materials produced within the area; and (4) to contribute to

Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, while Lingala is the language of Kinshasa, and of a large area along the river and in the north. It is estimated there are 5,000,000 African Christians in the Republic (Roman Catholic 4,200,000, Protestant 800,000). The local Kimbanguist religion has over a million adherents. The National University of Zaire has campuses in Kinshasa, Kisangani and Lubumbashi, with approximately 12,000 students.

CAPITAL, Kinshasa (formerly Leopoldville), population (estimated, 1971) 1,300,000. Principal towns, Lubumbashi (formerly Elisabethville) (182,638); Kisangani (formerly Stanleyville) (79,941); Likasi (74,478); Kananga (59,935); Matadi (59,184); Kolwezi (47,712); Mbandaka (37,587); and Boma (31,598).

FLAG.—Dark brown hand and torch with red flame in yellow roundel on green background. **NATIONAL DAY.**—June 30.

BRITISH EMBASSY

Kinshasa.

Ambassador Extraordinary and Plenipotentiary, His Excellency Richard James Stratton, C.M.G. (1974).

Counsellor, D. J. Reld (Consul General).

Defence, Naval, Military and Air Attaché, Col. R. C. Wigglesworth.

1st Secretaries, J. D. Massingham (Head of Chancery); T. E. Martin (Commercial); E. K. Green (Vice Consul).

the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Members agreed to reduce progressively their tariffs on imports of industrial goods originating in the Area with a view to their complete elimination by January 1, 1970. They also undertook to abolish quantitative restrictions on imports of goods from the free trade area. Provision was made for alterations in these timetables and in May, 1963, when tariffs had been reduced to 50 per cent. of the original rates, members agreed to bring forward the date when tariffs and quotas would be finally eliminated to December 31, 1966. Since that date therefore the member countries of the Association have constituted a virtually complete industrial free trade area. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. The Convention includes rules governing the origin of goods manufactured in the area. It also contains provisions relating to the "rules of competition"—government subsidies, restrictive business practices, etc. There are special provisions relating to trade in agricultural and fish products.

The Council of EFTA consists of one ministerial or official representative from each member country. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries.

Secretary-General, Charles Müller, 9-11 rue de Varembe, 1211 Geneva 20.

EUROPEAN COMMUNITY

The nine member states: Belgium, Denmark, France, Germany, Ireland, Italy, Luxembourg, The Netherlands, the United Kingdom.

The beginnings of the European Community date from May 9, 1950, when Robert Schuman, France's Foreign Minister, proposed that France and Germany should pool their coal and steel in-

dustries under an independent ("supranational") High Authority, in a Community open to the membership of any other European country wishing to join. Not only Germany, but also Italy,

Belgium, the Netherlands, and Luxemburg accepted this invitation.

The Coal and Steel Community (ECSC), Common Market and Euratom share a single institutional framework: a Commission, Council of Ministers, Parliament and Court of Justice. The core of the Community policymaking process is the "dialogue" between the Commission, which initiates and implements policy, and the Council of Ministers, which takes major policy decisions. The beginnings of democratic control are exercised by the European Parliament, while the Court of Justice ensures the rule of law and is the final arbiter in all matters arising from the Community Treaties.

Since the start of the Common Market and Euratom in 1958, the Parliament and Court of Justice have been common to all three Communities. Up to July, 1967, each Community had its own executive body (the EEC and Euratom Commissions, and the ECSC High Authority) and its own Council of Ministers.

In April, 1965, the Six signed a treaty providing for the merger of the three executive bodies in a single Commission and the three Councils in a single Council, with a view to the eventual merger of the three Communities themselves. The merger treaty came into force on July 1, 1967; the single Commission and single Council then took office. They enjoy the same powers under the three Community Treaties as did their predecessors.

On December 1 and 2, 1969, the Heads of State or Government of the Six met at the Hague and decided on the completion, strengthening, and, provided that other European countries wished to accept the Treaties of Rome, enlargement of the Community. They instructed the Commission to draw up a plan for economic and monetary union, and the Foreign Ministers to report by the end of July on possible moves towards political unification. They also resolved to intensify the co-ordination of research and development programmes.

In accordance with the Hague decisions the Council of Ministers agreed in April, 1970, that as from 1975 the Community would have its own revenue, independent of national contributions. The Foreign Ministers agreed (May, 1970) to hold formal political consultations twice a year.

In June, 1970, the Six invited Britain, the Irish Republic, Denmark and Norway to open negotiations on June 30 at Luxemburg on their applications to join the Community. Negotiations continued in 1971 and were concluded with the United Kingdom Government for all major questions by the end of June; on July 8, H.M. Government issued a White Paper on the results. On Jan. 22, 1972, the four applicant countries signed the Treaty of Accession in Brussels. Norway conducted a referendum on its Common Market entry and as a result withdrew its application. The enlarged Community of the Nine came into existence on Jan. 1, 1973.

With the advent of a Labour Government in the U.K. in 1974, there followed a period of renegotiation of the terms of Britain's entry into the Community, culminating in a referendum on June 5, 1975, as to whether or not the country should remain a member of the E.E.C. The result of the referendum showed two to one in favour of staying in. British Labour Party representatives who had hitherto boycotted the European Parliament now took up their 18 allotted seats.

In January 1976 the European Parliament approved a Report urging direct elections to the Parliament in 1978. On July 12-13, 1976, the Heads of Government or State, meeting in European Council, decided to approve a 410 member Parliament with Britain, France, West Germany and Italy allocated

81 seats each; the Netherlands 25, Belgium 24, Denmark 16, Ireland 15 and Luxemburg 6. Mr. Roy Jenkins was expected to be appointed President of the European Commission in 1977.

The "European Council", an addition to the institutionalized meetings provided under the Treaties, evolved from the "summit" conference of December 1974, when the Heads of Government decided to meet at least three times a year in order to deal with Community problems and with matters requiring political co-operation.

At the end of 1975 Mr. Leo Tindemans, the Belgian Prime Minister, who had been invited to prepare a report on *European Union* submitted his conclusions. The Report was discussed by the European Council during 1976, but no immediate action was taken on it.

OFFICE OF THE UNITED KINGDOM PERMANENT REPRESENTATIVE TO THE EUROPEAN COMMUNITIES
Rond-point Robert Schuman 6, 1040 Brussels
Ambassador and U.K. Permanent Representative, Sir Donald Maitland, C.M.G., O.B.E. (1975).

The Commission

On July 1, 1970, the Commission was reduced from 14 members to nine, two each from Germany, France, and Italy, and one each from Belgium, the Netherlands and Luxemburg. After the three new countries joined, the number rose to 13, with two seats each from Britain, France, Germany, and Italy and one each for the other members.

The members of the Commission are appointed by agreement among the nine member governments for a four-year renewable term; the president and vice-presidents are appointed from among the members for a two-year term, also renewable.

The members of the Commission are pledged to independence of the governments and of national or other particular interests. They accept joint responsibility for their decisions, which are taken by majority vote.

In addition to being the initiator of Community action and having specific powers, the Commission acts as a mediator between the member governments in Community affairs and is the guardian of the Community Treaties.

Commission of the European Communities

200 Rue de la Loi, Brussels 1049
President, François-Xavier Ortoli (French).
Vice-Presidents, Wilhelm Haferkamp (German); Carlo Scarascia Mugnozza (Italian); Sir Christopher Soames (British); Patrick Hillery (Irish); Henri Simonet (Belgian).

The Commission maintains information offices in London (20 Kensington Palace, Gardens, W.8), Washington (Suite 707, 2100 M Street, N.W.), Washington, D.C. 20037), New York (277 Park Avenue, New York, N.Y. 10017) and other cities.

The new 13-member Commission was appointed by the Government of the Nine and was sworn in on Jan. 9, 1973.

The Council of Ministers

170 Rue de la Loi, 1040 Brussels
This consists of ministers from each member government, the ministers concerned depending on the subject under discussion. It is the Community's main decision-taking body but its authority is not as great in ECSC matters as in those relating to the European Economic Community and Euratom. The powers of the Commission are proportionately greater under the ECSC Treaty. For coal and steel, decisions are usually by majority vote; on E.E.C. and Euratom matters decisions usually had to be unanimous in the early stages but many decisions can now be taken by a qualified majority vote. For certain important questions,

however, unanimity is still required. (Admission of new members is not decided by the Council, but by a unanimous decision of the member governments.) Although the Council is the Community's ultimate decision-taking body, in almost all cases it can act only on the basis of proposals submitted by the Commission. The Council acts by issuing (a) "regulations" which are generally and directly binding throughout the Community; (b) "directives" which set out the aims of policy but leave national governments to implement; (c) "decisions" which bind only those addressed (normally member states); (d) "recommendations" and (e) "opinions", which have no binding force. The meetings of the Council are prepared by a Committee of Permanent Representatives of the member states.

The Presidency of the Council is held in rotation for periods of six months.

European Parliament

Secretariat: Centre Européen, Kirchberg, Luxembourg.

The first direct elections to the European Parliament are due to be held in mid-1978. Of 410 seats, the United Kingdom, France, Germany and Italy will have 81 each, the Netherlands 25, Belgium 24, Denmark 16, Ireland 15 and Luxembourg 6. At present the Parliament which meets in Luxembourg and Strasbourg has 198 members nominated by the national parliaments of the nine European Community member countries—the United Kingdom, France, Germany and Italy have 36 each, Belgium and the Netherlands 14 each, Denmark and Ireland 10 each and Luxembourg 6. Set up under the European Coal and Steel Community Treaty of 1952, the Parliament's authority was extended by the 1952 Treaty of Rome to cover the European Economic Community and Euratom. It must be consulted on all major issues and has the right to dismiss the Commission by a vote of censure. Apart from general powers of supervision and consultation, it questions the Commission and the Council of Ministers and has a large measure of control over the Community's annual budget including its final adoption. It can reject the budget as a whole and can amend items of non-obligatory expenditure (i.e. expenditure not specified in the original treaties—amounting to some 20 per cent. of the total budget). The Members of the Parliament serve on a dozen specialised committees and currently sit in six political groups—Socialists, Christian Democrats, Liberals, European Conservatives, European Progressive Democrats and Communists. There are also six independents.

President, Georges Spénale (Socialist, France).

European Court of Justice
Boite postale 1406, Luxembourg

The European Court superseded the Court of Justice of ECSC and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide on the legality of decisions of the Council of Ministers or the Commission and to determine violations of the Treaties. Cases may be brought to it by the member States, the Community institutions, firms or individuals. Its decisions are directly binding in the member countries. The nine judges of the court are appointed by the member Governments in concert and are partially replaced every three years, being eligible for re-appointment.

Judges, R. Lecourt (President); H. Kutscher; A. O'Keefe; A. M. Donner; J. Mertens de Wilmars; P. Pescatore; M. Sørensen; Lord Mackenzie Stuart; F. Capotorti.

*Advocates-General, H. Mayras; A. Trabucchi; J.-P. Warner; G. Reischl.
Registrar, A. Van Houtte.*

The European Investment Bank 2 Place de Metz, Luxembourg

The European Investment Bank (EIB) was set up in 1958 under the terms of the Treaty of Rome with the essential function that of contributing to the balanced development of the Common Market.

It grants long-term loans to enterprises, public authorities and financial institutions to finance projects which assist the development of less advanced regions and areas where the conversion or modernisation of older, exhausted industries is required. Another important role of the EIB is that of helping to finance projects which serve the interests of the Community as a whole or more than one member country (such as motorways, railways and telecommunications, development and diversification of the EEC's energy sources).

The members of the European Investment Bank are the nine member countries of the Community, who have all subscribed to the Bank's capital, which currently stands at 3543.75 million units of account.* The funds required to carry out its tasks are borrowed on the capital markets of the Community and non-member countries, and on the international markets.

As it operates on a non-profit-making basis, the interest rates charged by the E.I.B. are therefore close to the average rates charged on the markets where it obtains its funds.

The Board of Governors of the European Investment Bank consists of Ministers nominated by the member countries, usually the Finance Minister, who lay down general directives on the policy of the Bank and appoint members to the Board of Directors, which takes decisions on the granting and raising of loans and the fixing of interest rates.

A Management Committee, also appointed by the Board of Governors, is responsible for the day-to-day operations of the Bank.

President, Yves Le Portz.

Vice-Presidents, Sjoerd Boomstra; Horst-Otto Steffe; Sir Raymond Bell; Giorgio Bombassei Fraseani de Vettor.

(The President and Vice-Presidents also sit as Chairman and Vice-Chairmen at meetings of the Board of Directors.)

Secretary General, Henri Lenaert.

* The financial statements of the European Investment Bank are drawn up in terms of the European Unit of Account which in June 1976 was equivalent to £0.58.

EUROPEAN COAL AND STEEL COMMUNITY

This, the first of the European Communities, was established in 1952. Since then, for coal, iron ore and scrap, it has abolished customs duties, quantitative restrictions, the dual pricing system whereby prices charged on exported coal or steel differed from those charged to home consumers, currency restrictions and discrimination in transport rates based on the nationality of customers and the special frontier charges which made international transport of these goods within the Community dearer than transport within national frontiers. It has applied rules for fair competition and a harmonized external tariff for the whole Community.

In the period 1952 to 1968 Community steel production rose rapidly from 41.9 to 99 million tons. The coal industry, however, after expanding initially in conditions of acute energy shortage, found that a growing share of the energy market

was being won by oil. The task of the ECSC thus came to be to ensure the orderly retreat of coal at a price which would avoid social or economic dislocation. So far, since the start of the crisis, in 1957, the Community's coal industry has lost a third of its labour force. The ECSC has been especially active in meeting the social problems raised by such changes.

Between 1954 and 1973 joint expenditure in re-training and resettling or assisting the retirement of workers came to over £228 millions. ECSC loans in the same period helped to provide over 120,000 new jobs. New priorities, for avoiding further rundown in the coal industry and enhancing its status, have been put forward since 1973. The ECSC also conducts its own housing programme for coal and steel workers.

Decisions of the European Commission in ECSC matters are directly binding on the industries concerned. The Commission now supervises the smooth working of the common market in ECSC products, ensures that the Treaty rules of fair competition are observed, stimulates investment and research, and aids workers threatened with unemployment. The Paris Summit of 1972 recognized the need for the EEC to prepare an energy policy covering all sources. Attempts to formulate such a policy have become a dominant issue in EEC affairs since the energy crisis. Of the various forms of energy, coal falls within the competence of the ECSC, nuclear energy within that of Euratom and all others within the EEC.

The United Kingdom, Ireland and Denmark joined the ECSC on Jan. 1, 1973.

EUROPEAN ECONOMIC COMMUNITY (THE COMMON MARKET)

Discussions were held at Messina, Sicily, in 1955 between the foreign ministers of the six member states of ECSC (Belgium, France, Germany, Italy, Luxembourg and The Netherlands) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. The Common Market was established during a transition period of twelve years which ended on Dec. 31, 1969. The Treaty provides for the elimination of customs duties and quotas in trade between member states; the establishment of a common customs tariff and a common trade policy towards third countries; the abolition of the obstacles to free movement of persons, services and capital between member states; the inauguration of common policies for agriculture and transport; the establishment of a system ensuring that competition shall not be distorted in the Common Market; the co-ordination of economic policies; the harmonization of social and economic legislation to the extent necessary in order to enable the Common Market to work; the creation of a European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living; the establishment of an Economic and Social Committee which must be consulted on major proposals, consisting of representatives of employers, workers, consumers and other groups; the establishment of a European Investment Bank intended to aid investment in underdeveloped areas and help to finance modernization; and the association of overseas countries and territories with the Community with a view to increasing trade and to

pursuing jointly their effort towards economic and social development.

To date, this programme has been put into effect as follows:

Reduction of trade barriers.—A first 10 per cent. reduction in customs duties between member countries took place on January 1, 1959. Decisions taken by the Council of Ministers in May, 1960, and July, 1963, resulted in a speeding up of the rate of tariff cutting. On May 11, 1966, the Council of Ministers agreed that the abolition of internal duties should be completed on July 1, 1968, and this advanced target date was met. Quota restrictions on trade within the Common Market were completely removed on January 1, 1962. Customs tariffs between the three new member states and the original Six will be phased out by three stages ending in July 1977. A determined effort is being made to speed up the removal of non-tariff barriers to trade, e.g. different safety regulations and technical specifications.

Common external tariff.—The Common Market has a common external tariff (CET) which came into effect in July 1968 along with the abolition of customs duties among the Six, thus forming a customs union. The CET is based on the arithmetical average of those national tariffs it replaced, and after two international tariff-cutting rounds now stands at an average of 6 per cent. The three new members are gradually aligning their industrial tariffs up or down towards the CET and should join in full customs union by 1977.

In international tariff and trade negotiations in the GATT framework, the Community is represented by the Commission, which negotiates under a mandate from the Council of Ministers.

Trade between the six member countries of the E.E.C. increased from 6,864 million u.a. equivalent (unit of account=pre-1971 U.S. \$) to 112,251 million u.a. in 1972. Community exports to the rest of the world increased from 15,911 u.a. equivalent in 1958 to 56,681 million u.a. in 1972; imports rose to 52,526 million u.a. in 1972.

Although the Community was enlarged in 1973, the oil crisis of that year affected the trading pattern with the onset of economic recession in some of the member States. Levelling off of demand during 1975 reduced overall imports by 3 per cent., while exports rose by only 2 per cent. over 1974 to 225 bn. u.a. The Community's trade with the rest of the world, however, was marked by a 6 per cent. decline in imports (mainly oil) to 117.8 bn. u.a., while exports rose by 5 per cent. to 113.98 bn. u.a.

The deficit in the overall trade balance of the Community contracted to about 2.89 bn. u.a. in 1975 from 14.5 bn. u.a. in 1974. Excluding internal E.E.C. trade, the Community's 1975 external trade deficit shrank to 3.82 bn. u.a. from 15.8 bn. u.a. in 1974.

Free movement of labour.—Freedom of movement for workers was achieved within the Common Market in July 1968, and those who work in member countries other than their own are ensured of rights equal to those of local workers, and of full transferability of social security benefits. They enjoy equal treatment in applying for jobs and receive priority over workers from non-member countries.

Services.—The right of Community firms to establish business in member countries other than their own is being progressively freed, as is the right of Community citizens to engage in professional activities in member countries other than their own. In parallel with this programme, the mutual recognition of professional qualifications is being achieved. Freedom of establishment for a number

of liberal professions was delayed for years, but with provision by the end of 1976 for doctors to practise throughout the Community, progress elsewhere may improve.

Capital.—So far unconditional and complete freedom of movement has been achieved for direct investments, transfers of personal funds and emigrants' remittances, short and medium term commercial loans and the buying and selling of stocks and shares. For other transactions, such as capital issues, there is conditional liberalization. Progress is being made towards equalizing access to domestic capital markets within the Nine.

Rules for Fair Competition.—The Common Market Treaty bans agreements which prevent, restrain or distort competition and, in particular, price-fixing, market-sharing, restriction of production or of technical development and discriminatory supply conditions if they are likely to affect trade between member states. The abuse of a dominant position in the market by a firm or firms is also banned. Implementing regulations adopted by the Council have caused some 36,000 restrictive agreements to be registered with the Commission. Decisions banning or authorizing particular agreements have begun to be taken, and a body of case-law is being established.

Agriculture.—The basic machinery for a common organization of agricultural markets throughout the Community was established by decision of the Council of Ministers in January 1962. It involved the setting of target prices, support buying, levies on imports, and export rebates. Community funds can be allotted for the modernization of farming and the improvement of agricultural productivity in the Community.

Under a decision reached in December, 1964, common price levels throughout the Community came into effect in July, 1967, for grains, pigmeat, and eggs and poultry. Further decisions taken on July 24, 1966, established common marketing regulations and common price levels for fruit and vegetables, sugar, dairy produce and fats and oils; to come into force between July 1, 1967, and July 1, 1968. On July 24, also, common price levels were fixed for beef and veal, milk and other dairy produce.

On July 1, 1967, grains, pigmeat, eggs and poultry reached the full single-market stage, thus bringing half the Community's farm production under the common agricultural policy's marketing and financial provisions. On May 29, 1968, the Six agreed on the pricing system for dairy produce and beef and veal in the single-market stage from July 1, 1968, having failed to agree by the original planned date of May 1. The policy has developed and changed along the lines of the 1975 "stock-taking" of the common agricultural policy, which aimed to reduce the cost of the policy and tailor it to changing priorities.

Firm proposals accepted in principle in March, 1971 and formally adopted in March, 1972 provided for Community part-financing of pensions for farmers retiring between the ages of 55 and 65 and other measures to reduce the number of small, scattered farms and to improve agricultural efficiency by offering modernization aid. The Community has now adopted a hill farming policy which applies to difficult farming areas throughout the Nine.

Economic Policy.—Member States are required by the Treaty to consider their economic policies as a matter of common concern and to consult their partners and the Commission in the concertation of these policies. From 1959 regular discussions

took place in the Monetary Committee (senior officials from the national treasuries and Central Banks), the Central Bank Committee and others devoted to economic policy (later, in 1974, replaced by a single committee, the Economic Policy Committee). Regular finance ministers' meetings were held.

Following the currency crisis of 1969 and the Hague Summit, a short-term reserve fund of \$2,000 millions was set up. Then, in 1971, the Six embarked on the first steps towards Economic and Monetary Union. The Werner Plan (named after the Luxemburg Prime Minister who chaired the Committee) laid down the path to be followed in the first phase up to 1973; establishment of a \$2,000 million medium-term reserve pool; intensification of short-term monetary policy co-ordination; concertation in international affairs; the progressive harmonisation of taxes and budgetary affairs; and the centrepiece, the narrowing of the permitted margin of fluctuation of members' currencies from the central rate from 4.5 per cent. (world margin) to 2.25 per cent.

The goal of economic and monetary union was affirmed by the 1972 Summit of the Nine, and the target date of 1980 affixed. But by this time (long before the Nine were due to move towards the second phase in December 1973) the international monetary crisis, devaluation of the dollar and floating of the EEC currencies in 1971 had curtailed further progress towards EMU. The floating, first of the Pound Sterling and then of the Lira in 1972, outside the joint float of EEC currencies, left only six countries effectively coordinating their monetary policies. Between January 1974 when France allowed the franc to float separately and July when the franc rejoined the "snake" or fluctuation margin, there were only five.

During 1973 the Nine set up the embryonic Monetary Cooperation Fund but at the end of the year failed to consolidate this action by a significant pooling of reserves. By this time they were faced with the impact of quadrupling oil prices on their economies and prospects of world-wide recession. During 1974 and 1975 inflation, balance of payments deficits and their financing through "recycling", the coordination of policies internationally and structural economic problems occupied the centre of discussions. On October 21, 1974, the Finance Ministers agreed to launch an initial \$3,000 million EEC loan to assist member states in balance of payments difficulties and help recycle "petrodollars" accumulating to the oil-exporting countries. The Nine heads of Government reaffirmed the goal of Economic and Monetary Union at the September 1974 Summit, but the weakness of sterling and the Lira and consequent wide fluctuations in the value of Community currencies hindered any practical move in that direction.

Industrial Policy.—The Council of Ministers has adopted a number of directives aimed at removing technical barriers to trade in foodstuffs and industrial products.

The Commission has put forward proposals for harmonizing company law and taxation and the creation of a European Company Statute, as well as proposals for the improvement, greater independence and cohesion of the Community aircraft, shipbuilding, paper and data-processing industries.

Transport.—The Treaty aims to establish a common policy on transport, with common rules for international transport within the Common Market, covering road, rail and inland water transport. Rates for freight which discriminate as to the national origin or destination of goods trans-

ported are to be eliminated within the transitional period. In June, 1965, the Council adopted a Commission proposal setting out the principles of a common policy to be put into force by the end of the transition period. The member governments did not agree on the implementation of these principles, but late in 1967 and early in 1968 a number of steps were agreed, on controlling social and economic conditions in intra-Community transport, especially road-haulage. Other measures covering railways were agreed by the Commission later in 1968 and early in 1969. In December, 1974, the Council agreed to lay down a uniform basis for calculating costs and financing railways. In the middle of 1974 substantial new road haulage quotas were agreed for the three new Member States.

Social Policy.—Under the Treaty, member states agree upon the necessity to promote improvement of the living and working conditions of labour so as to permit the equalization of such conditions in an upward direction. They also cooperate closely on matters relating to employment, labour legislation and working conditions, occupational training, social security, industrial accidents and diseases, industrial hygiene and trade union law. The main instrument for social policy is the Social Fund, established under the Treaty and reformed in 1972. Since then, the Nine's agreement in 1974 on the principles of a social action programme has enlarged the scope for the Fund's operation, which now includes special provisions for migrants, the handicapped, young and redundant workers. In the two years since the Programme was initiated in 1974 the Council has adopted a directive, due to come into effect by February 1977, seeking to ensure that no firm or public authority can dismiss or make redundant 10 or more employees without proper consultation with the trade unions; two directives require member States to introduce pay and equity of treatment for men and women; pilot schemes have been introduced to test and develop new methods of helping the poor; and special help has been allocated from the Social Fund to offset unemployment among young people, as well as extra aid to the handicapped and migrant workers. The total budget for the Social Fund for 1976 is 440 million u.s. (approx. £183m). Under the rules of the Fund the Commission can assist in training and retraining schemes by reimbursing 50 per cent. of the cost financed by a public authority.

In 1975 a European Centre for the Development of Vocational training was established in West Berlin; in May 1976 the new European Foundation for the Improvement of Living and Working Conditions held its first meeting in Dublin, the first Community Institution to be set up in Ireland.

Regional development policy.—On December 10, 1974, the Summit of the Nine meeting in Paris approved a Regional Development Fund of 1,300 million units of account (£540 million) to be spent over the three years (1975-77). The money will be used to help to provide or maintain jobs in the poorer areas of the Community; during the three years the Community will seek to coordinate the regional development policies of the Nine. By April 1976 the R.D.F. had committed 460 m.u.s. (£192m.) since it made its first grants in October 1975.

The Community's external relations.—Under its common external trade policy the EEC has trade agreements of varying kinds with the following countries: Argentine, Brazil, Uruguay, Mexico, India, Pakistan, Bangladesh, Thailand, Sri Lanka, Philippines, Spain, Yugoslavia, Egypt, Lebanon, Israel, Malta, Cyprus, Morocco and Tunisia. Some of these arrangements are being remade and new trade agreements being considered or negotiated

with other countries including Syria, Jordan and Algeria in the context of the EEC's Mediterranean policy which will lead to links with 14 countries bordering on the Mediterranean. The first of these was concluded with the Maghreb countries of Algeria, Morocco and Tunisia at the end of April 1976.

In January 1975 the EEC completed negotiations for a trade, aid and cooperation agreement (Lomé Convention) with 46 developing countries of Africa, the Caribbean and the Pacific, among them 22 ex-Commonwealth countries. (Protocol 22 of Britain's accession Treaty had held out the offer of a relationship with the enlarged Community for these countries equivalent to that associating the 18 African French-speaking countries with the EEC under the Yaoundé Convention.) The convention came into force on April 1, 1976. A different kind of association—holding out the possibility of eventual membership—with Greece and Turkey dates back to 1961 and 1963.

Separate agreements, leading to an industrial free trade area by 1977, were concluded in 1972 with those members of the European Free Trade Association which did not seek candidature for EEC membership when Britain, Denmark and Norway filed their applications: Sweden, Finland, Iceland, Austria, Switzerland, Portugal. These were joined by Norway when the referendum went against entry in the autumn of 1972.

Member states' bilateral agreements with the East European state-trading countries (which was officially due to expire at the end of 1974) are still due to be reshaped into a common commercial policy. The first steps have been made towards this with agreement among the Nine on the draft outlines, or models, for agreements with each of these countries.

Political cooperation.—Cooperation on general foreign policy questions began through the machinery set up in 1970 (Davignon Committee), and takes the form of frequent meetings of the foreign affairs ministers of the Nine. They worked closely together at ministerial level and committee level during the years of preparation and the final summit at Helsinki of the Conference on Security and Cooperation in Europe. Actual military matters are not within the scope of political cooperation: all the members of the EEC except for Ireland are members of the Atlantic Alliance, although France is no longer a member of NATO's integrated military organization. Consultation on foreign affairs is exemplified by the EEC's joint positions on the Middle East, Cyprus and United Nations matters. The Community is also to participate as an entity in the Conference on International Economic Co-operation (North-South Dialogue) that is due to take place in Paris on December 16-18, 1976.

Scientific and technical collaboration.—In March, 1970, Britain and eight other European countries accepted an invitation by the Six to start discussing concrete projects for Europe-wide scientific and technical collaboration. Seven working parties have so far been set up covering data-processing, telecommunications, new forms of transport, metallurgy, pollution, meteorology and oceanography. The Paris Summit of October 1972 affirmed the aim of increasing collaboration in the fields of scientific research and advanced technology. In May 1976 the Commission proposed a four-year rolling programme of research for the Joint Research Centre (JRC) centring on nuclear safety and the environment.

Enlargement.—The question of possible enlargement of the Community played an important part in its development from the autumn of 1961

when Britain, the Irish Republic, Denmark and Norway first sought membership, and Austria, Sweden, Switzerland, Spain and Cyprus sought association with the Community. The negotiations were vetoed by France in January, 1963. In May, 1967, Britain, the Irish Republic and Denmark formally submitted applications for Community membership. In July Norway followed suit and Sweden announced that it would seek to participate in the enlargement of the Community on terms compatible with its neutrality. These applications made very slow progress and appeared to come to a standstill when in December, 1967, France declared that Britain's economy would have to be strengthened before negotiations could begin. But shortly after taking office as President of France, Georges Pompidou stated in July, 1969, that there was no objection in principle to the admission of Britain to the Community. At the Hague "summit" meeting in December, 1969 (*see above*) the Six decided that provided that the completion of the Community was not prejudiced, and provided that the Community was strengthened to provide for enlargement, then the entry of other European countries would be desirable. After deciding on a common negotiating position, the Six invited Britain and the other applicants to begin negotiations for membership, and these were opened in Luxembourg on June 30, 1970, and settled in outline, as far as Britain is concerned, on June 23, 1971.

The Entry Terms.—A single overall transitional period of five years, during which the Three were to adopt Community rules and regulations, started on January 1, 1973, giving time for the gradual integration of the economies of the Three with the Six. The five-year period covers both agriculture and industry. The industrial tariff reductions take the form of five moves of 20 per cent., the first on April 1, 1973, a further three on January 1 of 1974,

1975 and 1976, and the final reduction on July 1, 1977.

The first 40 per cent. alignment on the Community's Common External Tariff (CET)—i.e. 40 per cent. of the difference between the new members' tariffs and the CET—was made at the beginning of 1974, and three further alignments of 20 per cent. each will follow the same rhythm as internal tariff-cutting, so that from July 1, 1977, the Three will apply the same tariffs as the Six on goods from non-member states.

EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM)

A second treaty, arising from the Messina discussions between the ECSC powers on additional means of co-operation, was signed in Rome on March 25, 1957, settling up the European Atomic Energy Community. The task of *Euratom*, defined in detail in the Treaty, is to create within a short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on a large scale. Other sections of the Treaty cover the establishment and growth of nuclear industries, the procurement, ownership and control of nuclear materials, matters affecting health and safety, including training, and external relations, the stimulation of scientific research and the training of specialists, to assure through a Supply Agency adequate supplies of nuclear fuels, the supervision of the nuclear common market, inspection and control of the use of fissile material, and the safeguarding of both workers and the population at large by laying down basic standards for the protection of health. The United Kingdom, Denmark and Ireland joined *Euratom* on Jan. 1, 1973.

THE COUNCIL OF EUROPE

Headquarters: 67006 Strasbourg, France.

Secretary-General, G. Kahn-Ackermann.

A European organization founded in 1949 whose aim is to achieve greater unity between its Members to safeguard their European heritage and to facilitate their economic and social progress. The aim of the Council is pursued through discussion and common action in economic, social, cultural, educational, scientific, legal and administrative matters and in the maintenance and furtherance of human rights and fundamental freedoms.

The following 18 countries belong to the Council: Austria, Belgium, Cyprus, Denmark, France, the Federal Republic of Germany, Greece, Iceland, the Republic of Ireland, Italy, Luxemburg, Malta, Netherlands, Norway, Sweden, Switzerland, Turkey and the United Kingdom.

The organs are the Committee of Ministers, consisting of the Foreign Ministers of member countries; and the Parliamentary Assembly of 147 members, elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties. There is also a Joint Committee of Ministers and Representatives of the Parliamentary Assembly.

The Committee of Ministers is the executive organ of the Council. Certain of its conclusions take the form of international agreements or recommendations to governments. On certain major matters the Committee votes by unanimity but abstentions are permitted. Decisions of the Ministers may also be embodied in partial agreements to which a limited number of member governments are party. The Committee of Ministers meets twice yearly. All Ministers have appointed Deputies to act on their behalf. The Committee of Deputies meets monthly to transact business and to take decisions on behalf of Ministers. Member governments accredit Permanent Representatives to the Council in Strasbourg, who are also the Ministers' Deputies.

The Committee is a forum for discussion between member governments on political and other matters, supervises the work of the technical expert committees and considers recommendations received from the Parliamentary Assembly. The Assembly's conclusions may take the form of recommendations to the Committee of Ministers

or resolutions. Ministers, including Ministers other than those for Foreign Affairs, may address the Assembly and take part in its debates.

The Parliamentary Assembly holds three week-long sessions a year. It debates reports on, *inter alia*, political, economic, agricultural, social, educational, legal and regional planning affairs. The Chairman in office of the Committee of Ministers presents a report at each session. The Assembly also debates reports received annually from the O.E.C.D., other European organizations and certain specialized agencies of the United Nations. It holds an annual joint meeting with the members of the European Parliament of the "Nine". Matters of mutual interest to the Committee of Ministers and the Assembly are discussed in the joint Committee. The Council's budget is voted annually in December and is met by agreed contributions of member countries.

One of the principal achievements of the Council of Europe is the European Convention on Human Rights (1950) under which was established the European Commission and the European Court of Human Rights. These organs have built up a valuable system of European jurisprudence in the field of Human Rights. Other major achievements of the Council of Europe are the European Cultural Convention (1953) and the European Social Charter (1960). Eighty-seven conventions and agreements have been concluded by the Council covering matters in all the fields of its competence, such as social insurance, equivalence of European diplomas for university entrances, equivalence of university degrees, public health patents, extradition, etc.

The Council's cultural and educational programme is administered by the Council for Cultural Co-operation to which in addition to members of the Council of Europe belong Finland, Portugal, Spain and the Holy See. A European Committee for Legal Co-operation administers the Council's legal programme. A few non-member states take part as observers in several of the Council's inter-governmental activities.

Permanent U.K. Representative, His Excellency Peter John Foster, C.M.G. (1974) £6,475

RETROSPECT OF SPORT 1975-76

OLYMPIC GAMES

The XXist Olympic Games took place in Canada from July 17 to August 1, 1976. The Main Events were held in Montreal, and the Yachting in Kingston, Ontario. The following 21 Sports were included: Archery, Athletics, Basketball, Boxing, Canoeing, Cycling, Equestrian, Football, Gymnastics, Handball, Hockey, Judo, Modern Pentathlon, Rowing, Shooting, Swimming, Volley Ball, Water Polo, Weight-lifting, Wrestling, and Yachting.

Previous Games have been held as follows: I, 1896, Athens; II, 1900, Paris; III, St. Louis, 1904;

IV, London, 1908; V, Stockholm, 1912; VII, Antwerp, 1920; VIII, Paris, 1924; IX, Amsterdam, 1928; X, Los Angeles, 1932; XI, Berlin, 1936; XIV, London, 1948; XV, Helsinki, 1952; XVI, Melbourne, 1956; XVII, Rome, 1960; XVIII, Tokyo, 1964; XIX, Mexico, 1968; XX, Munich, 1972; XXI, Montreal, 1976.

The VIth Games scheduled for Berlin in 1916, the XIth for Tokyo and then Helsinki in 1940, and the XIIIth did not take place owing to World Wars. The XXIInd Games will be held in Moscow in 1980.

WORLD'S ATHLETIC RECORDS

(All the world records given below have been accepted by the International Amateur Athletic Federation up to August 1976.)

At the Congress of the International Amateur Athletic Federation held in Montreal in July 1976 it was decided that in future (a) with the exception of the one mile both the men and women world records should be accepted only at metric distances (b) up to 400 metres only records timed by fully automatic timekeeping apparatus should be accepted, (c) records up to 400 metres should be accepted to 1/100 sec. and (d) all other records should be accepted to 1/10 second.

Running

Distances	Time	Name	Nation	Year
	hr. min. sec.			
100 metres	9' 9.0	J. Hines	U.S.A.	1968
200 metres (turn)	19' 7.8	T. Smith	U.S.A.	1968
400 metres	43' 8.1	L. Evans	U.S.A.	1968
800 metres	1 43' 5	A. Juantorena	Cuba	1976
1,000 metres	2 13' 9	R. Wohlhuter	U.S.A.	1974
1,500 metres	3 32' 2	F. Bayi	Tanzania	1974
1 mile	3 49' 4	J. Walker	New Zealand	1975
2,000 metres	4 51' 4	J. Walker	N.Z.	1976
3,000 metres	7 35' 2	B. Foster	G.B.	1974
5,000 metres	13 13' 0	E. Puttemans	Belgium	1972

THE DERBY, 1966-1976

For particulars of the Derby from 1780-1965 see 1921-66 editions.

The Distance of the Derby course at Epsom is 1½ miles. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

British Grand Prix (Brands Hatch).—1, J. Hunt (McLaren); 2, N. Lauda (Ferrari); 3, J. Scheckter (Tyrrell). (Hunt was later disqualified and the race awarded to Lauda).
German Grand Prix.—1, J. Hunt (McLaren), 1 hr. 41 m. 42.7 s. (117.17 m.p.h.); 2, J. Scheckter (Tyrrell), 1 hr. 42 m. 10.4 s.; 3, J. Mass (McLaren), 1 hr. 42 m. 35.1 s.
South African Grand Prix.—1, N. Lauda (Ferrari), 1 hr. 42 m. 18.4 s.; 2, J. Hunt (McLaren), 1 hr. 42 m. 19.7 s.; 3, J. Mass (McLaren), 1 hr. 43 m. 40.3 s.

Brazilian Grand Prix.—1, N. Lauda (Ferrari), 1 hr. 45 m. 16.78 s. (113.42 m.p.h.); 2, P. Depailler (Tyrrell), 1 hr. 45 m. 38 s.; 3, T. Pryce (Shadow), 1 hr. 45 m. 40.62 s.
Swedish Grand Prix.—1, J. Sheckter (Tyrrell), 1 hr. 46 m. 53.72 s. (100.86 m.p.h.); 2, P. Depailler (Tyrrell), 1 hr. 47 m. 13.49 s.; 3, N. Lauda (Ferrari), 1 hr. 47 m. 27.59 s.
Italian Grand Prix.—1, R. Peterson (March), 1 hr. 30 m. 35.6 s. (124.11 m.p.h.); 2, C. Regazzoni (Ferrari), 1 hr. 30 m. 37.9 s.; 3, J. Lafitte (Ligier Matra), 1 hr. 30 m. 38.6 s.
Austrian Grand Prix.—1, J. Watson (Penske), 1 hr.

30 m. 7.8 s. (131.99 m.p.h.); 2, J. Lafitte (Ligier Matra), 1 hr. 30 m. 18.65 s.; 3, G. Nilsson (JPS), 1 hr. 30 m. 19.84 s.
Belgian Grand Prix.—1, N. Lauda (Ferrari), 1 hr. 42 m. 53.13 s. (108.10 m.p.h.); 2, C. Regazzoni (Ferrari), 1 hr. 42 m. 56.9 s.; 3, J. Lafitte (Ligier Matra), 1 hr. 43 m. 28.61 s.
U.S. Grand Prix West.—1, C. Regazzoni (Ferrari), 1 hr. 53 m. 18.47 s. (85.51 m.p.h.); 2, N. Lauda (Ferrari); 3, P. Depailler (Tyrrell).
Canadian Grand Prix.—1, J. Hunt (McLaren); 1:16.70 m.p.h.; 2, P. Depailler (Tyrrell); 3, M. Andretti (Lotus).

THE WINTER OLYMPIC GAMES, 1976

The Games took place in Innsbruck from February 4 to 15. The following is a list of the gold medallists:

Alpine Skiing

Men's Downhill.—F. Klammer (Austria).
Men's Slalom.—P. Gros (Italy).
Men's Giant Slalom.—H. Hemmi (Switzerland).
Women's Downhill.—R. Mittermaier (West Germany).
Women's Slalom.—R. Mittermaier (West Germany).
Women's Giant Slalom.—K. Kreiner (Canada).

Ski Jumping

90 Metres.—K. Schnabl (Austria).
70 Metres.—H.-G. Aschenbach (East Germany).

Biathlon

Individual.—N. Kruglov (U.S.S.R.).
Relay.—U.S.S.R.

Nordic Skiing

Men's 15 km.—N. Bajukov (U.S.S.R.).
Men's 30 km.—S. Savilev (U.S.S.R.).
Men's 50 km.—I. Formo (Norway).
Men's Relay.—Finland.
Combined.—U. Wehling (East Germany).
Women's 5 km.—H. Takalo (Finland).
Women's 10 km.—R. Smetanina (U.S.S.R.).
Women's Relay.—U.S.S.R.

Ice Hockey

Winners.—U.S.S.R.

Speed Skating

Men's 500 m.—E. Kulikov (U.S.S.R.).
Men's 1,000 m.—P. Mueller (U.S.A.).
Men's 1,500 m.—J. E. Storhof (Norway).
Men's 5,000 m.—S. Stenson (Norway).
Men's 10,000 m.—P. Kleine (Netherlands).
Women's 500 m.—S. Young (U.S.A.).
Women's 1,000 m.—T. Averina (U.S.S.R.).
Women's 1,500 m.—G. Stephanskaya (U.S.S.R.).
Women's 3,000 m.—T. Averina (U.S.S.R.).

Ice Skating

Men's Figure.—J. Curry (G.B.).
Women's Figure.—D. Hamill (U.S.A.).
Pairs.—I. Rodnina and A. Zaitsev (U.S.S.R.).
Ice Dancing.—L. Pakhomova and A. Gorshkov (U.S.S.R.).

Bobsleigh

Two-man.—East Germany.
Four-man.—East Germany.

Tobogganing

Men.—D. Guenther (East Germany).
Two-man.—H. Rinn and N. Hahn (East Germany).
Women.—M. Schumann (East Germany).

SPORTS REPRESENTATIVE BODIES

ASSOCIATION FOOTBALL.—The Football Association.
Sec., E. A. Croker, 16 Lancaster Gate, W.2.

ATHLETICS.—Amateur Athletic Association. **Hon. Sec.**, B. E. Willis, 70 Brompton Road, S.W.3.
British Amateur Athletic Board. **Hon. Sec.**, A. Gold, C.B.E., 70 Brompton Road, S.W.3.
Women's Amateur Athletic Association. **Hon. Sec.**, Miss M. Hartman, M.B.E., 70 Brompton Road, S.W.3.

BADMINTON.—Badminton Association of England.
Sec., J. B. H. Bisseker, 44/45 Palace Road, Bromley, Kent.

BASKET BALL.—English Basketball Association.
Sec., K. K. Mitchell, Dept. of Physical Education, The University, Leeds.

BILLIARDS.—Billiards and Snooker Control Council.
Chairman, W. H. Cottier, Alexandra Chambers, 32 John William Street, Huddersfield.

BOBSLEIGH.—British Bobsleigh Association. **Hon. Sec.**, G. Renwick, 515 Watford Way, N.W.7.

BOWLS.—English Bowling Association. **Sec.**, J. F. Elms, 4 Lansdowne Crescent, Bournemouth, Hants.

BOXING.—Amateur Boxing Association, 70 Brompton Road, S.W.3.—**Hon. Sec.**, W. S. Cox.
British Boxing Board of Control, Ramillies Buildings, Hills Place, W.1.—**Gen. Sec.**, R. L. Clarke.

CANOING.—British Canoe Union, 70 Brompton Road, S.W.3.—**Dir.**, G. Richards, M.B.E.

CLAY PIGEON SHOOTING.—Clay Pigeon Shooting Association. **Dir.**, A. P. Page, 107 Epping New Road, Buckhurst Hill, Essex.

CRICKET.—Marylebone Cricket Club, Lord's Ground, N.W.8. **Sec.**, J. A. Bailey.

CYCLING.—British Cycling Federation, 70 Brompton Road, S.W.3.—**Sec. L.** Unwin.

FENCING.—Amateur Fencing Association. **Sec.**, Cmdr. F. A. Booth, R.N., 83 Perham Road, W. Kensington, W.14.

GOLF.—Royal and Ancient Golf Club, St. Andrews. **Sec.**, K. R. T. Mackenzie, M.C.

—English Golf Union. **Sec.**, I. R. H. M. A. Erskine, 12A Denmark Street, Wokingham, Berks.

—Ladies' Golf Union, 2 Fairways, Sandwich Bay, Kent.—**Sec.**, Mrs. G. Anderson.

- GYMNASTICS.**—British Amateur Gymnastics Association. *Gen. Sec.*, Lt. Cdr. B. W. C. Middleton, R.N. (*ret.*), 23A High Street, Slough, Bucks.
- HOCKEY.**—Hockey Association.—*Sec. Col.* D. M. R. Eagan, 70 Brompton Road, S.W.3.
- All England Women's Hockey Association, 160 Great Portland Street, W.1. *Sec.*, Miss P. A. Brooker.
- JUDO.**—British Judo Association, 70 Brompton Road, S.W. 3. *Gen. Sec.*, A. C. G. Johnson.
- LACROSSE.**—English Lacrosse Union. *Hon. Sec.* R. Balls, 64 Broad Walk, Hockley, Essex.
- LAWN TENNIS.**—Lawn Tennis Association. *Sec.*, P. M. Johns, Barons Court, West Kensington, W.14.
- International Lawn Tennis Federation, *Gen. Sec.* D. Gray, International Lawn Tennis Federation, Barons Court, West Kensington, W.14.
- MOTOR CYCLING.**—Auto-Cycle Union, 31 Belgrave Square, S.W.1. *Sec. Gen.*, K. E. Shierston.
- MOUNTAINEERING.**—British Mountaineering Council, Crawford House, Precinct Centre, Booth Street East, Manchester. *Gen. Sec.*, D. D. Gray.
- NETBALL.**—All England Netball Association. *Organising Sec.*, Mrs. B. Thomson, 70 Brompton Road, S.W.3.
- ORIENTEERING.**—British Orienteering Federation, Lea Green, near Matlock, Derbyshire. *Professional Officer*, A. Walker.
- RACING.**—The Jockey Club (incorporating National Hunt Committee), 42 Portman Square, W.1. *Sec.*, S. M. Weatherby.
- RIFLE SHOOTING.**—National Rifle Association, *Sec.*, Air Commodore A. B. Riall, C.B.E., R.A.F. (*ret.*), Bisley Camp, Brookwood, Woking, Surrey.
- National Small-bore Rifle Association. *Sec.*, R. C. Russell, Codrington House, 113 Southwark Street, S.E.1.
- ROWING.**—Amateur Rowing Association. *Dir.-Sec.*, M. C. Stamford, 6 Lower Mall, W.6.
- RUGBY FIVES.**—Rugby Fives Association. *Sec.*, T. Wood, Fairbourne Lodge, Epping Green, Essex.
- RUGBY FOOTBALL.**—The Rugby Football Union, Whitton Road, Twickenham, Middx. *Sec.*, Air Commodore R. H. G. Welghill, C.B.E., D.F.C.
- The Rugby Football League, *Sec.-Gen.*, D. S. Oxley, 180 Chapeltown Road, Leeds.
- SKATING.**—National Skating Association of Great Britain. *Gen. Sec.*, A. R. Drake, Charterhouse, E.C.1.
- SKI-ING.**—National Ski Federation of Great Britain. *Sec.*, Maj. Gen. I. R. Graeme, C.B., O.B.E., 118 Eaton Square, S.W.1.
- SQUASH RACKETS.**—Squash Rackets Association. *Sec.*, E. P. Woods, 70 Brompton Road, S.W.3.
- Women's Squash Rackets Association. *Sec.*, Miss C. Myers, 345 Upper Richmond Road West, East Sheen, Surrey.
- SWIMMING.**—Amateur Swimming Association, Harold Fern House, Derby Square, Loughborough, Leics.
- TABLE TENNIS.**—English Table Tennis Association, *Gen. Sec.*, A. W. Shipley, 21 Claremont, Hastings, East Sussex.
- TBOGANNING.**—British Racing Tobogganning Association.—*Pres.*, Dr. R. Liversedge, 82 Flitree Road, Banstead, Surrey.
- UNDERWATER SWIMMING.**—British Sub-Aqua Club, *Dir.-Gen.*, R. L. Vallintine, 70 Brompton Road, S.W.3.
- WATER SKI-ING.**—British Water Ski Federation, 70 Brompton Road, S.W.3.—*Sec.*, G. Hill.
- WEIGHT-LIFTING.**—British Amateur Weight Lifters Association. *Hon. Sec.*, W. W. R. Holland, 3 Ilfley Turn, Ilfley, Oxford.
- WRESTLING.**—English Olympic Wrestling Association.—*Chairman*, H. Jacob, O.B.E., 2 Huxley Drive, Bramhill, Stockport, Cheshire.
- YACHTING.**—Royal Yachting Association, Victoria Way, Woking, Surrey. *Sec.-Gen.*, J. Durie.

DUKE OF EDINBURGH'S AWARD SCHEME

The Duke of Edinburgh's Award Scheme is meant to provide an incentive and a challenge to young people to reach certain standards in leisure-time activities with the voluntary help of adults. Entrants in the United Kingdom and in other Commonwealth countries, must be between their 14th and 23rd birthdays and can enter through their school, the firm where they work, a youth organization, or on their own. Bronze, Silver and Gold Awards can be gained by those who qualify in four of the five sections of the Scheme: Service, Expedition, Interest, Design for Living, and Physical Activity. The qualifying standards are expressed in terms of proficiency, perseverance or sustained effort, participants being assessed on the use they make of their personal abilities and aptitudes and not in competition with others.

In 1975, there were 73,767 new entrants from the United Kingdom and 25,522 from overseas; a total of 30,195 Awards were gained in the U.K. and 10,832 overseas. There have now been more than a million entrants since the Scheme began.

Head Office: 5 Prince of Wales Terrace, W.8. Director: A. Blake, C.V.O., M.C.

TOPICS OF THE DAY

THE AMERICAN BICENTENNIAL

In 1976 The United States of America celebrated its 200th year of independence from Britain. Events were held all over the world to mark the occasion and Britain, especially, although the defeated party in 1776, took the opportunity to remember the constructive aspects of Anglo-American friendship and also simply to enjoy herself. The following give some idea of the range of activities which resulted from the Bicentennial: A jazz festival was held in New Orleans; John Wayne, the film star, made a record singing the praises of his homeland; the South Korean, Mr. Sun Myung Moon and his Unification Church put on a £½m "God Bless America" extravaganza in New York's Yankee Stadium; trees were ceremonially planted in literally hundreds of parks and in Kent (Britain's not America's) three were laid down by descendants, respectively, of Cornwallis, Lord North and Lafayette in a symbolic act of reconciliation; a plaque to the anglophile American author, Henry James, was unveiled at Poets Corner in Westminster Abbey; an attempt, as it turned out unsuccessful, was made to recover the bones of Pocahontas, the famous Indian girl, from her tomb at Gravesend in order to transport them to Jamestown, Virginia; Michael Foot gave a major address on Tom Paine; the Mormons sang their hearts out in a festival of music in Utah; the London Hilton organised a Festival of American Culinary Heritage.

B.P. donated a statue of Captain Cook, greatly admired in America, to the new Resolution Park, (in Anchorage, Alaska), named after the explorer's ship; Leonard Bernstein's musical on the theme of America's Presidents "1600 Pennsylvania Avenue", opened in Broadway (and flopped); American money (£200,000) was contributed towards the £690,000 spent by the British Government on buying the site of the Battle of Hastings, the assistance being rendered as "a tangible token of the enduring link between the U.K. and U.S. in this bicentennial year"; American money was also forthcoming to help in the restoration of Washington Old Hall near Gateshead, the ancestral home of America's first president.

In Ulster an Irish-American folk park was opened which included the restored cottage of the Mellon family; in January, there took place the first performance in Europe for 35 years of Benjamin Britten's operetta, *Paul Bunyan* (with libretto by W. H. Auden) about the founding of America; Richard Rodney Bennett's *Zodiac* and Malcolm Arnold's concerto, both composed for the bicentennial, were also given their first performances; in late May, Britain presented a golden replica of the Magna Carta in Westminster Hall to 25 members of Congress which would reside permanently in the Capitol, to symbolise the shared political origins of the two democracies. It is to be set in a two-ton piece of stone taken from a remote shore of the Outer Hebrides, which is the nearest point in Britain to the New World. This permanent gift is in lieu of the original copies of the Great Charter which were temporarily lent to America; a huge Indian Pow-Wow was held with 10,000 representatives from 40 Indian tribes, including the few surviving Aztecs, where the Red Indians were able to mark not only the 200th year of America but the 200th since Custer's last stand (in 1876); in a special series of football matches "Team America" represented the host; the bicentennial wing of the Metropolitan Museum of Modern Art in New York was opened specifically to hold American art, including a complete room designed by Frank Lloyd Wright.

In England discussions were held on restoring 36 Craven Street off the Strand, which was occupied by Benjamin Franklin, perhaps as a museum to the great man; in Boston, Massachusetts, where the firm has a new 40 storey office block, Commercial Union helped in the restoration of the Old State House, the scene of the 1770 Massacre; throughout the country the American Freedom Train made a slow trek by rail—24 carriages pulled by an old steam engine and containing such mementoes as Washington's personal copy of the Constitution, the first Bible printed in America, Will Rogers' rope, Judy Garland's dress from *The Wizard of Oz* and a collection of moon rocks. It was due to travel 16,000 miles and reach 10 million people. Similarly a Bicentennial Wagon Train rolled its way along the legendary Oregon Trail entertaining thousands as it went; a folklife festival with displays from 34 nations also toured 90 American cities; Britain produced a special 11p stamp depicting Franklin, who among his many accomplishments was a postmaster in Philadelphia; coins and medals were cast—the Washington Crown, for example, the first British legal tender to portray the Queen and an American president on the same coin. A series of plates, designed by Annigoni, also portraying Queen Elizabeth and President Ford, was put on the market. Similarly the wealthy consumer was offered "American Royal Family" spoons showing the 10 colonial monarchs who were the American Heads of State before the Revolution. Wedgwoods sent ½m pieces to America including basalt busts of Washington, one copy of which was given to the U.S. National Portrait Gallery, very appropriately, for the first Wedgwood had bravely backed American independence in 1776; 1976 also saw many books, TV programmes and exhibitions, in Britain and America. The biggest exhibition here, visited by many Americans, and opened by the Queen, was held at Greenwich and was impressive in its use of full-scale mock-ups, of a Georgian coffee house, and American colonial inn and life-size statues, for example, of George III receiving John Adams as the first ambassador of the new nation.

Several very ambitious plans failed to materialise: among them was the intention of holding the Winter Olympics for 1976 in Denver which was also celebrating its own single centenary. However the taxpayers revolted.

The highlight of the year was the Queen's six-day visit to America (her second in fact), designed to express the complete reconciliation between the former belligerents, as well as our common ideology. As the Queen told her hosts: "Both our peoples believe in the world of the individual and the family, in freedom of religion and expression, and the right to change a government by the ballot box, rather than the gun, perhaps the best definition of democracy." The Queen and the Duke of Edinburgh's first port of call (literally for they came in the Royal yacht, *Britannia*, rather than the supersonic airliner, *Concorde*, as originally planned) was Philadelphia, "cradle of the Revolution". There she presented to America a new "Liberty Bell" cast by the same Whitechapel foundry that made the original in 1752, which was cracked in 1855. In Washington, the royal party was met by the president on the White House lawn and while in the city, attended a Scottish military tattoo and the consecration of the nave of the cathedral, among many engagements. In Boston, scene of the Tea Party, the Queen received as warm a welcome as she received all over the country, despite the city's Irish Republican presence. In Virginia, the oldest English settlement on the

continent, the Queen deliberately made her trip a tribute to the state's greatest son, Jefferson. From America Her Majesty went to Canada to open the Olympics.

Throughout the year, other Heads of State also came to participate in America's celebrations, including the King of Spain. More aptly, in view of the vital military help France had given the youthful nation in its fight for Independence, in May President Giscard d'Estaing spent six days in America and among his official visits was one to Yorktown, where Britain surrendered.

All in all, this sizeable foreign role in the Bicentenary (and some 40 nations held events) was itself very appropriate given that America is the world's quintessential "nation of immigrants". The immigration rate is still running at 350,000 a year—in 1975 some 125,000 South Vietnamese arrived. Part of the great July 4th celebrations this year was a moving mass pledging of allegiance by immigrants to their new land, and like Britain, America's most noble role in history has been as a haven for the oppressed or restless.

Of course the climax of the Bicentennial was July 4th (when the Queen was in the country); the day annually celebrated by Americans but never so grandly as this year. Plans to land *Viking II*, the unmanned spaceshot, on Mars, 400m miles away, on July 4th did not come off (for the landing was delayed till the 20th) but other events took place as planned. The Parade of Tall Ships in New York harbour was a glorious display involving scores of ships from several dozen nations, including some from behind the Iron Curtain. Britain sent her largest sailing ship, *Sir Winston Churchill* (named after a man with an American mother), and this vessel was one of the 225 ships which took part in the Transatlantic Tallships Race beforehand. The parade was the largest assemblage of sailing ships for 150 years and took its theme from sail's role in bringing settlers to America and that of the clippers in developing U.S. trade. On the same day "the biggest birthday cake in the world" was unveiled in Baltimore and liberty bells rang out across the continent from Independence Hall, Philadelphia to the Alamo in Texas.

America celebrated its first centenary, in 1876, fairly modestly. Only one major city, rather than the whole country, was chosen as the forum for the festivities. This was Philadelphia, where the Declaration of Independence was signed. Here a large exhibition was mounted which attracted millions and one of the exhibits was a 50 foot statue of William Penn. Much larger of course was the most famous product of the celebrations, the Statue of Liberty, designed by Eiffel and Bartholdi and finally dedicated in 1886. It was the gift of France and given in expression of the Franco-American "Love of Liberty". (It is being restored in 1976.) Germany's main contribution was an overture composed by Wagner, and Britain also marked the event—an important Congregational church just south of the river in London, for example, put up a "Lincoln Tower and Spire".

If the celebrations of 1876 were large and those of 1976 much larger, what can we expect in 2076? The Americans of that time will not be short of inspiration for all over the great country children have been burying time capsules containing instructions for their great grandchildren to be read 100 years from now on the tercentenary. Perhaps the greatest wish is that the reverence for "Life, Liberty and The Pursuit of Happiness", so eloquently enunciated in 1776, will still be deep in the hearts of America (and Britain).

THE DROUGHT OF 1975-76 OVER ENGLAND AND WALES

"Drought" and "partial drought" were formally defined in *British Rainfall* in 1887; "drought" as a given number of consecutive days on none of which more than a stated, tiny amount of rain fell (at a selected location) and "partial drought" as a larger number of consecutive days over which the total rainfall, shared over the whole period, did not exceed a slightly larger amount per day. These definitions were later recognized as being artificial and misleading and a new system, based on the shortfall of rain in relation to the local average, was introduced in the 1961 issue of *British Rainfall*.

This new system of looking at drought is very meaningful since it rates dry weather in a normally dry area as a commonplace but highlights the occurrence of prolonged dry weather in an area where the rainfall is usually both frequent and abundant.

To the water supply industry a dry winter half-year (October to March) gives cause for concern. Two or more dry "winters" in succession or in close proximity present very serious problems. To the farmer, the horticulturalist and the gardener unusual dryness in the growing season (which corresponds more or less to the other half-year, April to September) may be merely a nuisance or an expensive disaster. Some crops are too expensive to irrigate and must rely on rainfall; for others irrigation is cost-beneficial and the grower relies upon some form of water storage. After a dry winter and a dry spring these reserves are likely to be slender or to fail altogether. Thus after a dry winter the water suppliers fear a dry summer and high demands on their dwindling water stocks, and in a dry summer the grower is poorly placed if the previous winter was also dry.

Those who are neither water suppliers nor growers of fruit, flowers and vegetables may welcome prolonged fine weather until called upon to pay the price in terms of heath and forest fires, closed canals, dried-up lakes and rivers more than usually polluted and offering poor angling, factories reduced to short-time, poor crops and high food prices and, finally, the severe inconvenience or even misery of water restrictions and trips to standpipes in the streets.

In winter the soil normally becomes fully moistened without being waterlogged; this state is technically described as "field capacity". The energy received in Great Britain from the winter sun is low and hence there is not much winter evaporation. Only a small amount of all winter rainfall evaporates and the rest goes to stock up the water-holding layers below ground (aquifers) and to feed lakes, reservoirs and rivers. Summer rainfall is normally all used up by plant life; some being evaporated as the plants transpire and some contributing to plant bulk. Only a very wet spell in the summer half-year can make any worthwhile contribution to water storage, since this requires the soil to be moistened to "field capacity" status first. A knowledge of the frequency with which high and low rainfalls and high and low river flows occur is essential for water management and for long-term planning. Frequency is often expressed as "return period"; the return period of any event is the number of years which elapse, on average, between successive occurrences of the event. In the present context an "event" would be unusually low rainfall or river flow.

In the 1931 issue of *British Rainfall*, F. J. Nicholas and J. Glasspoole published general monthly and annual rainfall values for England and Wales for the period 1727 to 1931. This series of general values

has been extended up to the present by the Meteorological Office. In 1971, B. G. Wales-Smith published monthly and annual totals of rainfall representative of Kew, Surrey, from 1697 to 1970. Observations have been made at Kew since the 1850s and rainfall is still measured there. Thus some 250 years of general values for England and Wales and some 280 years of values and estimated values (from measurements made elsewhere) for Kew are available for analysis. The once in 25 year event occurs, on average, only 10 times in 250 years and rarer events proportionately less frequently. Accepted statistical methods can be used to obtain estimates of the sizes of events corresponding to large return periods. It is important, however, to interpret such estimates sensibly. So far as rainfall deficiency is concerned, it is prudent to accept a return period of 200 years as meaning somewhere between 100 and 400 years (i.e. as lying between half and twice the estimated value).

Droughts can be studied in many ways. A fairly comprehensive picture can be built up using totals of measured rainfall, estimates of the evaporative demand (potential evapotranspiration) and estimates of the proportion of rainfall which has contributed to the recharge of water storage in the aquifers and to increasing the levels of rivers, lakes and reservoirs. Some meteorologists have called this "hydrologically effective rainfall"; hydrologists and water engineers often call it "residual rainfall".

Estimates of potential evapotranspiration can be calculated from measurements of sunshine duration, temperature, humidity and wind speed, using a formula published by H. L. Penman in 1948. Estimates of effective rainfall can be calculated from rainfall and potential evapotranspiration values, provided that the rooting characteristics of the vegetation which is transpiring the moisture from the soil to the air are known. Broadly speaking, the deeper the root systems the more soil moisture can be reached and extracted from the soil.

Considering, first, rainfall alone we can add up measured totals over various periods and compare them with what happened in the past. In the 16-month period May 1975 to August 1976, for instance, the general value for England and Wales, 759 mm (just under 30 inches) was only 64.2 per cent of the 1916-50 average. It was the driest 16-month spell in the whole series right back to 1727, the earliest date from which records are available. One technique for estimating the probability of occur-

rence of such rare deficiencies of rainfall suggests that such a low 16-month total, starting in May, has a return period of 1,000 years or more; perhaps somewhere between 500 and 2,000 years.

In Table 1 winter and summer half-year and annual rainfall totals from the England and Wales series and at Kew Observatory, Surrey, for the period 1971-6 are expressed as per cent. of average and are given tentative return periods. The averages are as follows:

	Year mm	Apr-Sep mm	Oct-Mar mm
England and Wales	904	414	490
Kew Observatory..	608	395	303

1916-50 averages are used here because averages for the new standard period 1941-70 are not quite ready. In the table " %" stands for per cent. of the averages given above. The estimated return periods are given in years. Negative signs indicate values below average and positive signs show that values were above average. Return periods of 5 years and less are preceded by the "less than" symbol <. Values given in brackets are provisional and may be amended, slightly, after careful scrutiny of the data. The significance of the winter and summer half-years in hydrometeorological studies has been clearly established. Examination of the annual totals, percentages and return periods shows that analyses based on annual data alone can be misleading. It is essential to consider accumulated deficiencies of rainfall over any period.

In Table 2 the lowest winter half-year rainfalls for England and Wales and for Kew and the lowest summer half-year rainfalls at Kew are set out. Percentages are given to the nearest whole figure.

Each table has been extended far enough to contain either the 1975 winter half-year or the 1976 summer half-year. It is of interest to examine the summer half-year recently ended in more detail.

Rainfall at Kew accumulated through the summer half-year:

April	9.5 mm
April and May	36.7 mm
	a once in 20 year low total
April to June	44.6 mm
	a once in 200 year low total; 3rd lowest since 1697
April to July	68.6 mm
	over once in 500 year low total; 2nd lowest since 1697

Table 1

	England and Wales			Kew Observatory		
	mm	%	Return period	mm	%	Return period
APR 1971-SEP 1971.....	387	93	- < 5	359	118	+ < 5

April to August 82.1 mm
over once in 500 year low total; lowest since 1697
April to September 188.7 mm
close to a once in 20 year low total; joint 7th lowest since 1697

Considering, next, potential evapotranspiration (the evaporative demand, which can only be satisfied if water is sufficiently available) the 1916-50 averages for green vegetation completely covering the ground (e.g. a lawn) at Kew were:

Year	Apr-Sep	Oct-Mar
mm	mm	mm
543	460	83

Approximate values for evaporation from lakes, reservoirs, etc. may be obtained by multiplying these figures by 1.2 giving some 652 mm for the year, 552 mm for the "summer" and 100 mm for the "winter".

The six winter half-years having the highest evaporative demand since 1871 and perhaps even since 1698 (although this is not certain) were 1966, 1964, 1959, 1965, 1884 and 1911 with between 109 and 102 mm. These figures would have to be multiplied by 1.2 to give estimates for open water. The 1975 value for a vegetated surface was a mere 93 mm. The seven summer half-years with the highest evaporative demand were 1959, 1911, 1975, 1957, 1846, 1893 and 1899 with between 565 and 516 mm for a vegetated surface. It has not been possible to complete the 1976 summer computations yet but the evaporative demand this summer can be studied on a progressive basis.

The April value was 63 mm; a once in 20 year high value

the May value was 100 mm; the total 163 mm is the 4th highest calculated so far and is assessed as a 1 in 80 year high

the June value was 119 mm; the 282 mm total is the 2nd highest calculated so far and is assessed above 200 years
the July value was 138 mm; the 420 mm total is the highest calculated so far and is assessed well above 200 years

It can be seen that a reservoir in the west London area might have lost 76 mm in April, 120 mm in May, 143 mm in June and 166 mm in July, a total of 540 mm (or nearly 20 inches). These losses would have been compensated a little by rain falling directly into the reservoir; if totals were the same as measured at Kew this would have amounted to only some 69 mm (or only 2.7 inches).

Finally we can consider the estimated effective rainfall for a grassed surface at Kew since 1871. The 1916-50 averages are 156 mm for October to March and only 10 mm for April to September; estimated value below 50 mm are as follows for 6-month periods beginning in October in the years listed:

1890, 1933, 1964 and 1972 Nil
1897 7, 1943 34, 1901 37, 1921 43, 1908 45, 1873 46, 1900 47, 1948 48 and 1947 49 mm i.e. between 0 and 31 per cent of average.

Of summer half-years since 1871 60 years (out of 105) had no effective rainfall under grass at Kew and only 3 summers had more than 50 mm.

Although no forecasting value should be ascribed to the fact, it is interesting to note that of the 13 winter half-years estimated to have had less than 50 mm of effective rainfall (for a grassed surface at Kew) two were followed by even drier winter half-years but the remaining 11 were followed by winter half-years yielding amounts of effective rainfall 65 to 70 mm greater, although only three of these exceeded the average value of 156 mm.

A study was carried out to see whether extremely dry 16-month periods beginning in May are followed by wet or dry winter half-years over England and Wales as a whole; the results showed no statistically significant bias.

Table 2
Rainfall in Winter half-year (October-March)

England and Wales			Kew Observatory		
Year	Rain mm	% of average	Year	Rain mm	% of average
1739	244	50	1724	141	47
1784	270	55	1879	148	49
1879	270	55	1890	156	51

DRAMATIC SUMMARY, 1975-76

Among London productions between October 1, 1975 and September 30, 1976, were the following:

ADELPHI: (1976) June 15. *Irene*.

ALBURY: (1975) Oct. 2. Wendy Hiller and Michael Aldridge in *Lies by Trevor Baxter*. Nov. 20. *A Month in the Country* (Dorothy Tutin, Timothy West, Derek Jacobi, John Turner). Nov. 27. *A Room With a View* (Jane Lapotla, Timothy West, Pauline Jameson, Lynn Farleigh). (1976) Apr. 20. *Equus* by Peter Shaffer, directed by John Dexter (Colin Blakely).

ALDWYCH: (1975) Oct. 23. George Bernard Shaw's *Too True To Be Good* (Ian McKellen, Anna Calder-Marshall, Judi Dench, directed by Clifford Williams). Dec. 4. Denholm Elliot and Paul Rogers in *The Return of A. J. Raffles* by Graham Greene. (1976) Jan. 20. Alan Howard as Shakespeare's Henry V. Jan. 29. *Henry IV Part 1* and *Henry IV Part 2* (Alan Howard, Emrys James, Brewster Mason). Mar. 26. *The Merry Wives of Windsor*. Apr. 28. Mla Farrow in *The Zykous* by Maxim Gorky. May 25. *The Iceman Cometh* by Eugene O'Neill (Ian Holm, Patrick Stewart, Norman Rodway). July 5. *The Devil's Disciple* by Bernard Shaw (Royal Shakespeare Company.) Sept. 7. Royal Shakespeare Company in Chekhov's *Ivanov* (in repertoire with *The Devil's Disciple*).

APOLLO: (1976) Mar. 16. Barry Humphries in *Housewife-Superstar!* May 19. *Confusions* by Alan Ayckbourn (Pauline Collins, John Alderton).

CAMBRIDGE: (1976) June 23. *The Black Mikado*. Jonathan Miller's production of *The Three Sisters* with Janet Suzman, Nigel Davenport, June Ritchie, Angela Down, Peter Eyre, Susan Engel, John Shrapnel, Peter Bayliss and Sebastian Shaw.

COMEDY: (1976) Mar. 4. Adam Faith in *City Sugar* by Stephen Pollakoff. May 24. *Dimetos* by Athol Fugard (Paul Scofield). June 23. Kenneth Williams, Peggy Mount, Brian Pringle in *Signed and Sealed*. July 21. *Getting Away with Murder* by J. Lee Thompson (Barry Foster, Anthony Bate, Hildegard Neil, Ernest Clark).

CRITERION: (1976) Mar. 24. *Gastlight* (Nicola Pagett, Anton Rogers, Peter Vaughn). June 5. Alec McCowan, Michael Bryant, Judy Parfitt and Annette Crosbie in *The Family Dance* by Felicity Browne.

DRURY LANE: (1976) July 22. *A Chorus Line*.

DUKE OF YORK'S: (1975) Nov. 3. Roger's *Last Stand* (Leslie Phillips and Roy Kinnear). (1976) Apr. 14. Elizabeth Seal and Sheila Steafel in *Salad Days*. Aug. 11. Alan Bates in *The Seagull*.

FORTUNE: (1975) Nov. 6. The Charles Pierce Show. (1976) Feb. 3. *The Lady or the Tiger*. May 5. *Gigi* by Colette and Anita Loos (Lila Kedrova, Simon Williams, Veronica Quilligan).

GLOBE: (1976) Mar. 10. Tony Britton in *The Chairman* by Philip Mackie. July 15. Peter Barkworth, Penelope Kelth, Peter Jeffrey in *Donkeys' Years* by Michael Frayn.

HAYMARKET: (1975) Oct. 22. Herbert Lom and Nigel Stock in William Douglas Home's *Betzi*. Dec. 16. *On Approval* by Frederick Lonsdale (Edward Woodward, Geraldine McEwan, Jennie Linden, Edward Hardwicke, Stephanie Beacham and Geoffrey Palmer).

HER MAJESTY'S: (1975) Oct. 16. Richard Johnson, James Smilie, Dilys Hawlett & Caroline Villiers in *Thomas and The King*. Nov. 19. Ipi Tombi.

JEANETTA COCHRANE: (1976) Aug. 16. National Youth Theatre. *Here Comes The Sun* by Barry Keefe. Aug. 31. National Youth Theatre in *Stag Night* by Willis Hall.

LYRIC: (1975) Oct. 28. Anton Chekhov's *The Seagull*, directed by Lindsay Anderson (Joan Plowright, Helen Mirren, Peter McEnery, John Moffatt, Frank Grimes). Dec. 9. Anderson's production of the Ben Travers farce *The Bed Before Yesterday* (Joan Plowright, Frank Grimes, John Moffatt).

LYTTLETON: (1976) Mar. 15. *Plunder* by Ben Travers, transferred from the Old Vic. Also transferred were *Hamlet*, John Gabriel Borkman, *Happy Days*, *No Man's Land*, *Watch It Come Down* and *Playboy of the Western World*. June 19. *Blithe Spirit* by Noel Coward. July 1. *Weapons of Happiness* by Howard Brenton.

MAYFAIR: (1976) May 22. *What's A Nice Country Like U.S. Doing In A State Like This?* Aug. 16. Libby Morris in a new musical revue, *Just Libby*.

MERMAID: (1976) Jan. 22. Richard Beckinsale in *Funny Peculiar* by Mike Stott. May 4. *Side by Side*, by Sondheim (Millicent Martin, Julia McKenzie, David Kernan, Ned Sherrin). July 9. Patrick Cargill, Moira Redmond, Hugh Paddick, in *Some of My Best Friends are Husbands* by Hugh Leonard. Aug. 4. Michael Rothwell in *Crocodiles in Cream*. Sept. 2. *The Worst of Kenneth Robinson*.

NEW LONDON: (1976) June 2. Brian Protheroe in *Leave Him to Heaven*.

OLD VIC: (1975) Oct. 29. *Playboy of the Western World* by J. M. Synge (Stephen Rea). Dec. 10. Albert Finney, Angela Lansbury, Denis Quilley in *Hamlet*, directed by Peter Hall. (1976) Jan. 14. *Plunder* by Ben Travers, directed by Michael Blakemore. Feb. 24. *Watch It Come Down* by John Osborne. July 12. Glenda Jackson, Patrick Magee, Jack Shephard in *The White Devil* by John Webster, directed by Michael Lindsay-Hogg.

OPEN AIR, REGENT'S PARK: (1976) June 9. Shakespeare's *Othello* (Robert Stephens and Edward Fox). July 21. *Love's Labours Lost*.

PALLADIUM: (1976) Feb. 2 for 2 weeks, and May 17-June 5, Shirley Maclaine. June 9. Julie Andrews. July 8-28. Australian Ballet in *The Merry Widow*. Aug. 2. Johnnie Ray, Billy Daniels, Francis Faye, *The Ink Spots*.

PHOENIX: (1975) Oct. 15. *Tarantara! Tarantara!* (1976) Jan. 21. *I Do! I Do!* (Rock Hudson and Juliet Prowse). Mar. 17. Glynis Johns and Louis Jourdan in *13 Rue de L'Amour*. May 12. Lee Remick, Keir Dullea, Alfred Marks and Miriam Karlin in *Bus Stop*. July 7. Douglas Fairbanks Jr, Dinah Sheridan, David Langton and Wilfred Hyde White in *The Pleasure of His Company*. Sept. 30. *Carte Blanche*.

PRINCE OF WALES: (1975) Oct. 8. Harry Secombe in *The Plumber's Progress*. (1976) Mar. 18. *Mardi Gras*.

ST. GEORGE'S: (1976) Apr. 21. *Twelfth Night* (Eric Porter, Lynn Farleigh). June 2. *Romeo and Juliet* (Peter McEnery and Sarah Badel). July 8. *Richard III* (Alan Badel).

SAVOY: (1976) July 19. Robert Morley and George Cole in Ben Travers' *Banana Ridge*.

SHAFTESBURY: (1975) Oct. 2. Arthur Lowe, John Le Mesurier and Clive Dunn in *Dad's Army*. June 8. Somerset Maugham's *Liza of Lambeth*, musical.

SHAW: (1976) Jan. 26. *The Ginger Man* by J. P. Donleavy. Apr. 6. Fulton Mackay in Pinter's *The Caretaker*. June 28. Timothy Dalton, Maggie Fitzgibbon in *Black Comedy* and *White Lies* by Peter Shaffes. Aug. 18. National Youth Theatre. *The Bread and Butter Trade* by Peter Terson.

VAUDEVILLE: (1975) Nov. 5. *Double Edge* (Margaret Lockwood, Paul Danceman and Barrie

Ingham). (1976) June 17. *Baggage* (Gerald Harper, Hannah Gordon, Una Stubbs, Prunella Gee).

VICTORIA PALACE: (1976) Apr. 8. Terry Scott and Jane Whitfield in *A Bedful of Foreigners*.

WHITEHALL: Aug. 26. Brian Rix, Terence Alexander and Jane Bonns in *Fringe Benefits*.

WYNDHAMS: (1976) May 26. *Teeth 'N' Smiles* written and directed by David Hare (Helen Mirren, Dave King, Martin Shaw).

On March 15, 1976 a Charity Preview of the Ben Travers farce *Plunder* introduced the first repertory season at Britain's new £15 million National Theatre. It was performed in the Lyttelton Theatre, the first of the three stages to become available. The Theatre, designed by Denys Lasdun, is built on a South Bank site of almost five acres and can accommodate up to 2,500 people. The list of playwrights whose plays opened the first season is very impressive—Shakespeare, Ibsen, Beckett, Travers, Pinter, Osborne and Synge—but it must remain so to be able to attract an audience that can cover the vast commercial requirements the cost of building put on the Theatre.

It seems a fairly remarkable achievement to have the National actually open at last. As long ago as the 1840s a national theatre based on London was suggested, albeit tentatively. Then in 1946 a council was appointed and three years later an Act of Parliament was passed allowing the spending of up to one million pounds on a theatre. In 1951 a foundation stone was laid by the Queen Mother but work on the site was not started until 1969. Now in 1976 we have 3 stages housed in one massive complex. The Olivier Theatre, named after Lord Laurence Olivier who created the National Company at the Old Vic in 1963 and was its artistic director for ten years. This theatre has a capacity of 1,160 and its stage is built on a drum-revolve 40 feet in diameter and 45 feet high and split into halves which are on lifts that can bring up complete stage sets in 30 seconds if necessary. The Lyttelton Theatre is named after Oliver Lyttelton, Lord Chandos, chairman of the National Theatre Board from

1963-1971 and holds 890 people. This is to be used exclusively for new plays once the Theatre is in full swing. Finally there is the smaller Cottesloe Theatre named after the chairman of the South Bank Theatre Board, in which it is possible to adapt the seating arrangements to suit almost any style of acting space a director may require.

So the nation's theatre is now open to everybody to watch a choice of three plays a night or to enjoy the facilities—bars, buffets or restaurant—or simply to look round and have a sit down. Peter Hall hopes to introduce other spectacles including some plays at lunch-time, late-night events, music, poetry-readings and street-theatre shows on the terraces. He hopes to concentrate on attracting a wider range of people who have been put off attending West End theatre in recent years by high ticket prices, and a limited and non-committal fare of entertainment that has more to do with the profit motive than art.

The Theatres Trust Bill received the Royal Assent on July 22 in the House of Lords. This Act, as it now is, sets up a Theatres Trust aimed at protecting Britain's theatres from planners and demolition men. The Trust, members of which will be appointed by the Education Secretary, will have to be consulted before planning authorities allow any changes to be made to theatre buildings.

The Act was designed to make it more difficult to add to the demise of live theatres by demolishing them or radically altering their nature. Lord Harmor-Nicholls said that there was much more to this Bill than just rescuing a theatre or two from bankruptcy; the one thing in which this country truly led the world was British theatre and British acting. Viscount Norwich's view was that in the present, rather grim period through which they were passing, it was marvellous to think that the theatre had in the past few years gone from strength to strength. The Arts Minister (Lord Donaldson of Kingsbridge) said that the Government agreed with the aims of the Bill and hoped it would turn out to be one more weapon in the armoury they had to defend the theatre.

THE ARTS COUNCIL OF GREAT BRITAIN 105 Piccadilly, W.1

The Arts Council of Great Britain is incorporated under Royal Charter with the following objects, (a) to develop and improve the knowledge, understanding and practice of the arts; (b) to increase the accessibility of the arts to the public throughout Great Britain; and (c) to advise and cooperate with Departments of Government, local authorities and other bodies on any matters concerned directly or indirectly with the foregoing objects.

The members of the Council, who may not exceed twenty in number, are appointed by the Minister responsible for the Arts after consulta-

tion with the Secretary of State for Scotland and the Secretary of State for Wales. With the approval of the two latter the Council appoints separate committees for Scotland and Wales known as the Scottish Arts Council and the Welsh Arts Council respectively.

The Council receives a grant-in-aid from the Government, and for the year 1975-76 the amount was £28,850,000.

Chairman, The Lord Gibson.
Secretary-General, R. Shaw.

LITERATURE OF THE YEAR

Alexander Solzhenitsyn, the exiled Russian author, has further enhanced his already formidable reputation, and his position as the dominant figure in modern world literature. At the end of 1975, the second volume of his work on the Soviet prison camps was published. *The Gulag Archipelago, Vol. II* contains the third and fourth parts of the seven that comprise the whole. Solzhenitsyn attributes the whole concept of forced labour to Lenin, and not, as is popularly supposed, to Stalin, who merely inherited the system and perfected and expanded it. *Lenin in Zurich*, published this year, forms part of Solzhenitsyn's major project, which is to rescue Russian history for the people from the distortions of Soviet propaganda. The first volume of this work was *August 1914*, published when the author was still resident in Russia, and Chapter 22 was omitted from it at his request. The reason for this is now apparent, as it concerned Lenin. It now forms part of this volume; further chapters from the as yet unpublished *October 1916* and *March 1917* have been added, and expanded since Solzhenitsyn's researches in the West to make a compelling psychological portrait of the architect of the revolution during the crucial period of his frustrating exile in Switzerland. The work is a skilful blend of history, biography and novel.

MALORY.—The only extant manuscript of Sir Thomas Malory's *Morte d'Arthur* was sold by Winchester College to the British Library in March for a reported fee of £150,000. Little is known of Malory, but it is believed that he was a member of parliament, fought on both sides in the Wars of the Roses, and spent some time in prison for various offences, where he may well have written his great Arthurian romance. Malory gave coherence to the many Arthurian legends, and constructed a continuous narrative around the two main themes of the reign of Arthur and the Knights of the Round Table, and the quest for the Holy Grail. He worked from a combination of sources, including French, and finished it in about 1469. Caxton printed an edition of it in 1485, and may well have worked from the Winchester manuscript, but it contains much material omitted from Caxton's edition. The manuscript was identified in Winchester College Library in 1934 by Dr. W. F. Oakeshott, and published under the title *The Works of Sir Thomas Malory*, edited by Professor Eugene Vinaver, in three volumes in 1947. A facsimile of the manuscript is to be published.

BYRON.—In the words of Lady Caroline Lamb, he was "Mad, bad and dangerous to know", yet his life and works continue to attract authors and readers. Two more volumes of Byron's letters and journals have now been published, admirably edited as before by Leslie A. Marchand. In "*So Late Into the Night*": *Byron's Letters and Journals, Vol. V, 1816-17* the principal event is Byron's separation from his wife, Anne Isabella Milbanke, an attractive heiress whom he had married in 1815. Following the birth of their daughter, she had, on a visit to her parents, resolved not to return to Byron. The real reason for her departure has never been established, and is not revealed in these letters, but it is known that Byron had given her ample cause, by his abominable behaviour towards her. Between February and April of 1816 he wrote frequently, seeking a reconciliation, but she would not be swayed, and he eventually agreed to a separation to keep his half-sister Augusta out of the proceedings "although they had no business with anything previous to my marriage with that infernal fiend". So to escape the social stigma, Byron went abroad, where he eventually recaptured his old gaiety, and, with Canto IV of *Childe Harold's Pilgrimage*, *Beppo* and eventually *Don Juan*, produced his finest

poetry. In *The Flesh is Frail: Byron's Letters and Journals, Vol. VI, 1818-19*, Byron is ensconced in Venice for much of the time, leading a life of extravagant debauchery, in love with the Countess Teresa Guiccioli and writing the first cantos of *Don Juan*.

Lady Longford has written in *Byron* a sympathetic and informative biography, which provides a useful accompaniment to the Letters and Journals by providing the essential background details, for those not familiar with Professor Marchand's own three volume work. Lady Longford establishes the fine balance between his greatness in writing, and weakness in character, and shows that his poetry has to be considered in relation to his life for full appreciation. Byron also features in a fascinating account of the Greek War of Independence by David Howarth entitled *The Greek Adventure: Lord Byron and Other Eccentrics in the War of Independence*.

Also published were *Selected Letters of James Joyce*, edited by Richard Ellman, which provide valuable background material for an understanding of the man and his work, and *Dante Gabriel Rossetti and Jane Morris, Their Correspondence* edited by John Bryson in association with Janet Camp Troxell.

PEPYS.—The final volume of the complete edition of *The Diary of Samuel Pepys* has now appeared in the much-praised edition edited by Robert Latham and William Matthews. Volume IX covers the years 1668 and 1669 until, at the age of 35, Pepys closed it on May 31 with the famous words, "And so I betake myself to that course, which is almost as much as to see myself go into my grave, for which, and all the discomforts that will accompany my being blind, the good God prepare me"; this was perhaps premature, as he retained his sight until his death at the age of 70. This volume sees Pepys becoming increasingly important and wealthy, and includes a great personal triumph for him, when on March 5, 1668, he defended the Navy Board in a speech to the House of Commons against charges of irregular payments to seamen, and spoke "most acceptably and smoothly" for three hours, fortified with claret and brandy. His private life was as complex as ever, and Pepys found the attractions of his wife's maid, Deborah Willett, too much for him. However, Pepys was caught by his wife in a compromising situation, and "was at a wonderful loss upon it and the girl also", and his wife made him dismiss her, and promise not to see her again, an injunction he immediately ignored. It is this combination of domestic trivia, and the politics of the day as seen by an original and inquiring mind, that make the diary such an enduring masterpiece, and when the two concluding volumes, of commentary and index, are published, the whole will stand as the definitive edition of the classic example of the art of keeping a diary.

The Diaries of Evelyn Waugh were published during the year. Extracts first appeared in *The Observer* newspaper three years ago, when no complete edition was anticipated, but they have now been edited by Michael Davie and appear all but complete. Since they amount to some 340,000 words, the editor removed some of Waugh's *Lancing Diary*, for being too tedious, and other passages, have been excised for being libellous, or "intolerably offensive or distressing". Waugh kept a diary throughout most of his life, except for some periods of emotional crisis; the diary of his Oxford days he later destroyed as the events described were too depraved, and he did not keep a diary during the breakdown of his first marriage, or during the period of "lunacy", described in *The Ordeal of Gilbert Pinfold*, in 1954. The Diaries will add nothing to Waugh's literary reputation, and

should not be considered in relation to the novels, but they do add to the portrait of a remarkable figure, albeit not favourably.

Albert Speer, Hitler's architect and armaments minister, served twenty years in Spandau Prison for his part in the Second World War. During that time, he secretly kept a diary, written on any available scraps of paper, which he managed to smuggle out of the prison. His first book, *Inside the Third Reich*, has now been followed by the publication of these fragments as *Spandau: The Secret Diaries*. Of them, Speer says that "Diaries are usually the accompaniment of a lived life. This one stands in place of a life". They provide a fascinating insight into the Nazi régime, through Speer's vivid recollections of the period, and into life in Spandau.

The other six inmates included Admiral Dönitz, Nazi Chancellor after Hitler's suicide, and Hitler's deputy Rudolf Hess, sentenced to life imprisonment, and sole occupant of Spandau for the last ten years. Speer's relationship with the others was often strained, as Speer was the only defendant at Nuremberg to plead guilty, and the description of how he kept his sanity, with his imagined walk around the world in the prison garden and his remarkable resilience, make these thoughts of a repentant Nazi leader a unique and valuable post-script to the Second World War.

Memoirs of William Hickey first appeared in Peter Quennell's abridged edition in 1960, and they have now been republished. They were written by Hickey from memory after his retirement in 1808, and are an entertaining and enthralling account of the full life of this remarkable lawyer with his numerous travels abroad, to India, China and the West Indies, and his weakness for wine and women. They first appeared in four volumes between 1913 and 1925.

LITERARY LIVES.—T. E. Lawrence, archaeologist, soldier, leader of the Arab revolt, and author of *Seven Pillars of Wisdom* was a complex and intriguing figure, who has been frequently, if not always well, served by biographers. However, in *A Prince of Our Disorder: The Life of T. E. Lawrence*, Dr. John E. Mack, a distinguished American psychiatrist, has well utilised his professional skills in writing a convincing analysis of Lawrence's genius in an absorbing, thoroughly researched account of the legendary "Lawrence of Arabia".

Oscar Wilde said to André Gide before his trial that the drama of his life was that "I've put my genius into my life; I've only put my talent into my works." H. Montgomery Hyde has already written *The Trials of Oscar Wilde* and *Oscar Wilde: The Aftermath*, and now, in *Oscar Wilde: a Biography* he presents the complete picture of that tragic genius. A brilliant talker and wit, playwright, novelist, essayist and poet, Wilde had attracted attention with his founding of the aesthetic movement, caricatured in the Gilbert and Sullivan opera *Patience*, and thenceforth until his exile was seldom out of the public eye. Yet he brought about his own downfall, and seemed to court disaster. If any good came of the affair, it was surely in the *Ballad of Reading Gaol* and *De Profundis*, both produced during his imprisonment. Also published was *Oscar Wilde* by Sheridan Morley, which contains many excellent illustrations, and *The Cleveland Street Scandal*, also by H. Montgomery Hyde, about another Victorian cause célèbre, involving misdoings in high places.

The tragedy of Mervyn Peake was that he was struck by a crippling illness, which dominated his later years until it gradually destroyed him. Peake was a great book illustrator and a novelist with a

rare and original talent, which was not universally appreciated during his lifetime. It is only in comparatively recent years that his marvellous, gothic *Gormenghast* trilogy has reached the audience it deserves. John Watney's *Mervyn Peake* is a sound and very moving account of his life, and his drawn-out death.

It is perhaps appropriate that Mrs. Winifred Gérin, who has herself written a distinguished biography of Charlotte Brontë, should now turn her talents to a life of Charlotte's first biographer, Mrs. Gaskell. Besides her novels, it is for her classic *Life of Charlotte Brontë* that she is best known, and in *Elizabeth Gaskell: A Biography*, her full and varied life, as minister's wife and crusading novelist, is well evoked.

Catherine Dupré has written a fine biography in *John Galsworthy* of the Nobel Laureate for Literature in 1932, whose works, in particular *The Forsyte Saga*, have recently enjoyed a resurgence of popularity. Mrs. Dupré sees Galsworthy's relationship with his wife Ada as the dominant influence on his life and work, and she examines it in depth. Ada had married Galsworthy's cousin Major Arthur Galsworthy in 1891. She had met John in 1893, and they lived together openly following the death of his father, thus forcing her husband to divorce her. They married in 1905. The relationship of Soames and Irene is based on that of Arthur and Ada, and Ada provided the model for many of Galsworthy's heroines. His first novel, *Jocelyn*, has now been reprinted with an introduction by Mrs. Dupré. First published pseudonymously in 1898, it is an immature work, and largely autobiographical, but it contains many of the themes which were to recur throughout Galsworthy's writings.

THE ZOO.—The Zoological Society of London was founded in 1825, and its 150th anniversary has been marked by the publication of several books. In its early days, the public were not admitted, but the increasing animal population in Regent's Park, and the cost of maintaining them, caused the Society to open its gates to the public in 1847, thus hastening its development to the Institution we know today, a place not so much of entertainment, but of serious research. Among the books published were *The Ark in the Park: the Zoo in the Nineteenth Century*, an entertaining account of the Zoo in the first half of its existence by Wilfrid Blunt; *London's Zoo* by Gwynne Vevors, Curator of the Aquarium in the Zoo and son of a former Superintendent of the Society, an excellent anthology covering the whole history; *Golden Days: Historic Photographs of the London Zoo*, a marvellous collection of pictures, with a foreword by Lord Zuckerman, present Secretary of the Society; and *The London Zoo* by Sally Holloway.

Among the remarkable occurrences noted in WHITAKER, 1883 for the previous year was the following item for March 24th; "Jumbo, the Zoological Society's large African Elephant, shipped to New York". This was undoubtedly a black day in the annals of the Zoo, and caused immense resentment at the time. In *Jumbo*, W. P. Jolly relates the whole sad business. Jumbo had been the zoo's star attraction for 17 years, but his behaviour had become erratic, and when the impresario Phineas T. Barnum agreed to pay £2,000 for him, the zoo must have felt relief at disposing of their irascible old inmate. The public however were loath to see him go, and when Jumbo several times refused to be packed up in a crate for the voyage, the uproar increased. Jumbo eventually died in Canada, knocked down by a train.

OXFORD.—The sixth edition of *The Concise Oxford Dictionary of Current English*, edited by

J. B. Sykes, is, the publishers state, "the most radical revision yet undertaken of a dictionary that for over sixty years has held its place as the most widely accepted authority on current English". Drawing on the material assembled for the *Supplement to the Oxford English Dictionary*, which is now in preparation, it contains entries for nearly 40,000 headwords, with a total of 74,000 vocabulary items. There has as usual been some controversy over the inclusion of the modern usage or abusage of words and phrases, but a language is inevitably the sum of its words at any given time, and *The Concise Oxford Dictionary* is an invaluable list of those ingredients, at the reasonable price of £4.75. Also published was *The Oxford Companion to Film*. Edited by Liz-Anne Bawden, it contains some 3,000 entries on all aspects of the cinema, with entries on some 700 individual films, and is illustrated with frame enlargements taken from the films themselves.

THEATRE.—Edmund Kean was one of the great tragic actors on the English stage, and one of the great dissolutes off it. He made his reputation at Drury Lane in 1814 with his *Shylock*, and enhanced it with his passionate and powerful performances as *Hamlet*, *Richard III* and *Othello*. The London Stage was an undignified place in those days. Actors and theatres were supported much as football teams are now; rivalries were intense, notably between Covent Garden and Drury Lane, and audiences would applaud an actor his points in a play as if a goal had been scored. It is thus appropriate that Kean should have collapsed on stage after speaking the words "*Othello's* occupation's gone", a phrase he had made his own, and died soon afterwards. Raymond Fitzsimons relates the story of this flawed genius of the stage in his *Edmund Kean: Fire from Heaven*, which is complemented by Christopher Murray's *Robert William Elliston: A Theatrical Biography*, for Elliston was manager of the Drury Lane Theatre. He was also one of the great impresarios and innovators of the age, and apparently as drunk and debauched as Kean, with whom he was in frequent conflict. Also published was *Theatre in the Age of Kean*, an admirable survey of the period by Joseph Donohue.

MONTY.—Soon after his death this year, the biography of *Montgomery of Alamein* by Alun Chalfont was published. Montgomery had told Lord Chalfont that he would have to find out what made him tick, as this was "the hub of the whole thing", and the author has delved deep into his past, from his unhappy childhood, to his school and Sandhurst days, in order to do just that. Although Montgomery was prepared to give his biographer frequent interviews, and to answer his questions, he refused him any access to his diaries or papers, and so this is by no means an official biography. The portrait that emerges is of a flamboyant, eccentric personality, an undoubtedly brave soldier, but not perhaps the military genius that he himself would have us believe.

AMERICA.—No significant literary works have so far appeared on this side of the Atlantic in response to the American Bicentennial. However, a work by the American author Gore Vidal entitled *1876* can inevitably be taken as a comment on the present through his treatment of the people and events surrounding the Philadelphia Centennial Exposition of that year. *1876* complete's Vidal's trilogy of historical novels on America, the other volumes being *Washington, D.C.* and *Burr*. Written as the journal of Charles Schuyler, who in *Burr* discovered that he was the illegitimate son of the third Vice-President, Colonel Aaron Burr, the book is a marvellous account of the period, notably the disputed

election, won by Rutherford Hays with a quarter of a million votes less than his opponent. The present contest for that office pales in comparison.

That enduring symbol of America, the Statue of Liberty Enlightening the World on New York Harbour, was finally unveiled on October 28, 1886. The hand of the statue holding the torch had already been exhibited in Philadelphia ten years earlier to mark the Centennial. The intriguing story of this monument is related by Marvin Trachtenberg in *The Statue of Liberty*. Conceived in the 1870s to commemorate Franco-American friendship, it was the work of Frederic Auguste Bartholdi. It was made from sheets of copper hammered into shape on wooden battens, on a framework of steel supports designed by Gustave Eiffel. The statue was completed in France in 1884, dismantled and shipped to New York in over 200 packing cases. Eiffel's engineering masterpiece, the huge tower that bears his name in Paris, which was designed to mark the Paris Exposition of 1889, is similarly commemorated in a well-illustrated volume by Joseph Harriss, *The Eiffel Tower*.

FIRST OF THE YEAR.—One of the most readable books of the year was *The First Cuckoo: Letters to The Times 1900-1975*, a selection of some 250 letters from *The Times* edited by Kenneth Gregory. Among the many delights in this volume is a letter from P. G. Wodehouse discoursing on the Wooster chin, and a letter on the inevitable "First Cuckoo", which was later explained away as an uncommonly fine imitation by a labourer. Correspondents include Thomas Hardy, A. P. Herbert, John Galsworthy, G. B. Shaw, Winston Churchill and many more in an informative, provocative and often amusing compilation, well introduced and annotated by its editor.

POLITICS.—Among the many books published during the year by or about politicians, were the following: *The Way the Wind Blows*, the autobiography of Lord Home; *Another World, 1897-1917*, by Anthony Eden, who having written three volumes of memoirs now turns to his early life; *Stanley Baldwin*, by Kenneth Young, about the man whom Churchill called "the most formidable politician I have ever known in public life"; *The Making of Lloyd George* by his nephew W. R. P. George, which relates his life up to his election to Parliament in 1890, based on family papers; *The Elder Pitt* by Stanley Ayling; *Castlereagh* by John W. Derry; *Canning: Politician and Statesman* by Peter Dixon; *Lord North* by Peter D. G. Thomas; *Sir Robert Walpole* by Betty Kemp; *Asquith* by Stephen Koss; *Peel* by Norman Gash, and *Melbourne* by Philip Ziegler.

NOVELS.—Among novels published were *The Alteration* by Kingsley Amis; *Sleeping Murder* by Agatha Christie; *In the Frame* by Dick Francis; *The Death of the King's Canary* by Dylan Thomas and John Davenport; *The Malacia Tapestry* by Brian Aldiss; *A Fringe of Leaves* by Patrick White.

BIOGRAPHIES.—Other biographies published included *Bismarck* by Alan Palmer; *The Black Prince* by Barbara Emerson; *Julian Grenfell: His Life and the Times of His Death, 1885-1915* by Nicholas Mosley; *Albert Schweitzer* by James Brabazon; *A. P. Herbert* by Reginald Pound; *Edward VII* by Christopher Hibbert.

OTHER BOOKS.—Other books published included *Lyndon Johnson and the American Dream* by Doris Kearns; *The Tolkien Companion* by J. E. A. Tyler, edited by S. A. Tyler; *The Thirteenth Tribe* by Arthur Koestler; *Hitler's Decision to Invade Russia, 1941* by Robert Cecil; *Peking Man* by Harry L. Shapiro; *Infants of the Spring* by Anthony Powell.

SCIENCE, DISCOVERY AND THE ENVIRONMENT 1975-76

BREAKUP OF A COMET.—One of the most predictable things one can say about comets is that their behaviour cannot be predicted. The splitting of a comet into two or three fragments has been recorded on about a dozen occasions but splitting into four or more components is relatively rare. This has been observed only on three occasions—the famous sun-grazing comet of 1882, Comet Brooks 2 in 1889 and lastly Comet West, visible in the spring of 1976.

Comet West was discovered in November 1975 on photographic plates taken at the European Southern Observatory at La Silla, Chile. Initially it could only be seen from the southern hemisphere and it behaved in a fairly normal manner, steadily brightening as it approached the Sun. Towards the end of February 1976, it could be seen with the naked eye from latitudes such as those of the southern United States. It reached perihelion (point nearest to the Sun) on February 28 and reappeared as a morning object next day. It was observed from the British Isles in early March but was relatively low in the morning sky at dawn. It was during this period that the comet behaved in an extraordinary manner.

At the beginning of March, it was a brilliant object with a very long tail. The structure of the tail was complex, photographs showing a delicate fibrous structure. The comet had in fact two distinct tails, one slender and straight about 5 to 10 degrees long, gaseous in composition with a distinct bluish colour. The other, a broad white fan curving northwards consisted of dust particles expelled from the head and measured about 30° in length. The head of the comet consisted of an apparently bright starlike nucleus surrounded by a fairly bright coma, although detailed studies showed a complex cluster of tightly packed nuclei. This split into two separate parts on about March 8 and then four days later into four parts. One component faded rapidly and by the end of the month there were only three parts visible, separating from each other at a slow rate. The motion, brightness and structure of each component have been studied in detail, thus providing for the first time interesting information on the structure and bonding forces existing in comets.

In addition to the wealth of information gained from the study of the breakup of the head, the tail provided interesting information. The fibrous structure mentioned earlier originated not from the head but from the edge of the dust tail nearest to the Sun. Zdenek Sekanina, of the Harvard-Smithsonian Center for Astrophysics, said that these bands were caused by particles released during the perihelion passage breaking down into a very fine dust, this dust then being dissipated by solar radiation pressure. (Source: *Sky and Telescope*.)

CONTINENTAL DRIFT.—The majority of geologists in recent years have been unanimous in assigning the distribution of the continents to a process known as "continental drift". Research into this process, however, which involves determining when and how continents have separated and joined, is by no means over and developments are frequently publicised. The most obvious evidence pointing to a different arrangement of the continents in the past is the similar shape of the Atlantic coast lines of South America and Africa, two continents or "plates" which figure largely in research into the process. Recent enlightenment has come from studies into orogenic belts and past glacial conditions; palaeomagnetism, which acknowledges that iron bearing rocks betray their position in relation to the pole at the time they were laid down (or solidified, in the case of igneous magma), is also an accurate source of information.

As well as providing evidence for continental drift, palaeomagnetic directions have also provided "proof" of seafloor spreading, and have shown that ridges in ocean floors are seismically active. So far from being inactive and old, ocean floors are regions where new material from the earth's mantle rises and becomes new crust, spreading slowly away from the ridges.

Recently a British geophysicist, Dr. Girdler of Newcastle University, has suggested that the East African Rift Valley represents an early stage of continental drift. The feature is marked by low gravity values, known as a negative Bouguer anomaly, which run from Southern Ethiopia southwards to Lake Malawi and then turns westwards to the Angolan coast. Until now the western extent of this feature had remained undetected.

The low gravity values in such areas arise when two surface lithographic plates stretch apart, for then underlying lighter material wells up underneath. The light material gives lower gravity values than ideal theoretical values. Dr. Girdler has found evidence in existing seismic data and with the coincidence of the extension with surface volcanic rock to support his view. It is therefore reasonably certain that the rifting of Eastern Africa continues in a western branch and it should be interesting to see the results of further experiments.

EXCAVATION OF WRECK.—Sir William Hamilton British Minister to the Court of the Two Sicilies, from 1764 to 1800, formed two large and important collections of classical antiquities during his life at Naples. In 1772, his first collection was acquired by the British Museum and included vases which formed the nucleus of what is today one of the best collections of Greek vases to be found anywhere in the world.

By 1796, Hamilton had amassed a second collection: it included one thousand vases and was in his own judgement "finer than the first". In 1798 when, during the Napoleonic war, Italy faced the threat of invasion, Sir William and his second wife, Emma, fled Naples when the court evacuated the city. Hamilton's collection was hastily packed and part of it put on board *HMS Colossus* which set sail for England in November. On December 20, 1798, the *Colossus* sank in a fierce storm off the Scillies and Hamilton, who believed that eight cases of his best vases were on board—"all the cream of my collection"—was heartbroken at their loss. He was to some extent mollified in 1801 by the arrival of the rest of his vases on the *Foudroyant*. The number of vases on board has never been known, but the quality of the pieces had fortunately been captured in elegant outline drawings of selected specimens by Wilhelm Tischbein.

In July, 1976, an experienced team of divers at Penance were granted a licence under the Protection of Wrecks Act 1973 to excavate the site of the wrecked ship. Excavation was supervised by Dr. Ann Birchall of the British Museum. The results of the first season far exceeded expectation: 7,400 fragments of Greek pottery from painted vases dating from the seventh to the fourth centuries B.C. have already been raised from the sea bed. The majority of the finds come from Athens in the fifth century B.C. or in the Greek colonies of southern Italy in the fourth. There are handles, rims, bases and body fragments, from cups, bowls, jars, pitchers, jugs and oil flasks. A high proportion is decorated. An outstanding set of fragments is a group of nineteen which depict the drunken Hephaestus with Dionysus, god of wine, and

revelling satyrs. The pieces were readily put together with the aid of one of Tischbein's drawings. The excavation is to continue this year and the British Museum hopes to acquire the fragments eventually.

EXPLODING BLACK HOLES.—The 1976 British Association Meeting was held at Lancaster University and it was not surprising that the inevitable lecture on black holes was included, especially in the light of the very interesting facts that had been published earlier in the year. The lecture was given by one of Britain's leading theoretical physicists, Dr. Dennis Sciama.

Black holes are postulated as the end product of a collapsing star, in which the gravitational forces are so great that nothing, not even light, can escape from them. With such properties, it is virtually impossible to identify them directly and much effort has been made in recent years in trying to find evidence for their existence. Indirect observational evidence has indicated that they might exist as components in some binary stellar systems.

Dr. Sciama said that recent work by Dr. Stephen Hawking had shown theoretically that black holes are not necessarily completely black. Although not capable of radiating energy from its interior, it could radiate heat from its surface. This implies that black holes are losing mass in the process. The rate at which heat could be radiated depends, according to Hawking, on the inverse square of the mass of the black hole. This means that with time the rate of emission would increase and eventually reach an explosive condition. The black hole would flash into extra-ordinary brilliance and in its last one tenth of a second of its life, when the diameter was one ten-thousandth of that of an electron, it would emit high energy X-rays with an energy of a billion billion megawatts.

The predicted time to reach this catastrophic condition turns out to be longer than the age of the universe except in cases where the black hole is smaller than 10^{-13} cm. It is therefore possible that such an event from very small objects could be observed, in which case much information would be gained on the behaviour of matter at exceedingly high temperatures and conditions existing in the universe at early times.

FIRST ARTIFICIAL GENE SYNTHESISED.—It was announced at the annual meeting of the American Chemical Society in August 1976 that scientists at the Massachusetts Institute of Technology had synthesised the first man-made gene which was fully functional in a living cell. In 1973, Dr. Khorana reported that the structural part of the gene had been synthesised but now he and his research team have succeeded in synthesising the "start and stop signals" for the gene.

The gene is the basic unit of all heredity and consists primarily of a long double stranded molecule of deoxyribonucleic acid (DNA) the two strands twisting to form a double helix. The units of DNA are called nucleotides, of which there are various types, adenine, thymine, guanine and cytosine. In the double stranded DNA molecule, each adenine on one strand pairs with thymine on the other, and guanine and cytosine acting similarly. They bond naturally because of their mutually attractive chemical properties.

When information from the gene is to be transmitted into protein molecules in a cell, enzymes begin transcribing information by building a complementary strand of ribonucleic acid (RNA) along one strand of the DNA. When the synthesis is complete, the RNA strand breaks away and is used to synthesise protein molecules. There are basi-

cally three types of RNA synthesised on the DNA. The first, messenger RNA, represents the cell's method of transmitting information from the gene to the protein. The second, ribosomal RNA, folds up after leaving the gene to form ribosomes which are used to provide a holder which the messenger RNA uses to translate its information into the protein. The third type, transfer RNA, locates and grabs the amino acids (the building blocks of the protein) and carries them to the ribosomes.

Dr. Khorana and his team have synthesised the gene that codes for a particular kind of transfer RNA, the type that grabs the amino acid tyrosine. The name given to this gene is tyrosine transfer RNA gene.

The start and stop signals, consisting of additional sequences of nucleotides, direct the enzymes to form the RNA strand. In the tyrosine transfer RNA gene, the start signal consists of 59 and the stop signal 23 nucleotides. The new synthesised gene and its controls have functioned correctly in test-tube experiments as well as in a bacterium. The method developed allows completely controlled manipulation of the gene structure. Dr. Khorana stated that with chemical analysis it is possible to alter specific parts of the gene, carry out deliberate mutations in order to study their influence on the gene function.

FISH IN THE THAMES.—In 1957 a survey by Dr. Alwyne Wheeler of the British Museum showed that, with the possible exception of eels, there were no fish whatsoever in the thirty miles of London Thames. This was attributed to the high toxic content of the water which, even had dissolved oxygen been in the water, which is doubtful, was effectively inhibiting all forms of fish life. Since then pollution has been severely countered and the toxic content of the water, and dissolved oxygen level, have taken corresponding changes for the better. The Thames Water Authority, in rebuilding sewage works and thereby improving the quality of effluent discharged into the river, is to a large extent responsible for the re-establishment of fish fauna in the lower Thames.

Since 1964 ninety-four species of fish and one hybrid have been found in a forty mile stretch of the Thames between Brentford, where fresh water is to be found, and Northfleet, where the water is brackish. Six of these species are new to the river since September, 1975. Worthy of particular mention is a salmon weighing 8lbs. 4½ ozs. which was caught at West Thurrock Power Station in 1975. The last catches of salmon in the Thames are said to have been in 1833, though at one time Thames salmon was a common enough dish in London.

FOSSIL METEORITIC CRATER.—Photographs of the Moon, Mercury, Mars and its satellites all show abundant evidence of craters, the majority of which are currently thought to have been caused by meteoritic bombardment. Although we cannot see the surface of Venus, radar studies also indicate a heavily cratered surface. It is thought that intensive cratering occurred during the early days of the formation of the solar system and that the present rate of formation is relatively low. The reason why the Earth, the other major body in the inner region of the solar system has not a heavily cratered surface is that such formations would be eroded away in a relatively short time by the wind and rain. Therefore any feature currently visible is thought to be of a relatively young age, geologically speaking.

Recent work has shown that there are in fact many features on the Earth's surface which in the past were large circular meteoritic craters. Even

the British Isles, a very small land mass, has two such features, both in the Shetland Isles. The most famous crater is of course the one in the Arizona Desert. Its diameter of approximately 1,200 metres is dwarfed by the huge crater known as the Poppingay depression in the Soviet Union, which is 75 km. in diameter and thought to have been formed about 300 million years ago.

Until recently, there has been no evidence of craters existing in rocks lying beneath the present surface of the Earth, i.e. fossil craters. Information given in a recent Novosti Press release gives details of such a discovery made by geologists drilling in the Minsk region of the Soviet Union. A large conical depression was located at a depth of 80 to 140 metres in which the overlying sedimentary rocks and the lower granitic material were damaged. The bottom of the cone was bounded by partially remelted rocks. Studies of the rock fragments within the disturbed region indicate that the rocks have been subjected to intense shock. The conclusion reached by the geologists is that a large meteorite exploded there about 70 million years ago. With the amount of drilling going on at the present time, it is quite likely that more of these fossil craters will be identified.

GRIBBLES DEVOUR BOATS.—Bridlington Harbour, North Humberside, has been attacked by vast numbers of gribbles. These small mites, a quarter of an inch long, have derived a lively pleasure from eating the wooden craft on the harbour since the summer of 1975, and no treatment of the timber has yet succeeded in spoiling their appetite. *Linnoria Lignorum* thrives in salt water and it seems that their recent abundance may originally have been caused by the hot summer of 1975 when the salinity of the harbour water would have been increased by a reduction in the inflow of fresh water. At the time of the report scientists from ICI were working at possible ways in which to end the danger. It is to be hoped that a cure will have been found soon since a succession of dry summers could prove very expensive to boat owners.

HADRIAN'S WALL WESTERN EXTENSION.—Professor G. D. B. Jones of Manchester University has never been satisfied with the conventional view of the western termination of Hadrian's wall, whatever may have been the precise nature of the Morecambe estuary before extensive flooding in the thirteenth century. He states that the termination of the elaborate wall and vallum system at Bowness and its replacement there by an apparently far weaker system dependent on isolated milefortlets and towers has always been against the dictates of both common sense and topography, as there is no natural change in the Solway coastline until the Wampool estuary further west, whatever form it took. Professor Jones found that parallels from linear defensive systems in Germany show that it is unlikely that this system depended entirely on isolated towers. He therefore predicted that under suitable crop conditions evidence of a more integrated system would appear.

In the drought of June to July, 1975, close study of Milefortlet 1 at Biglands revealed, under parching, the evidence of two parallel ditches forty-six metres apart approaching the front and rear of the site from the north-east, some thirty metres from the present edge of the coastal moss. Further evidence was forthcoming at Campfield where the site of Tower 2B was clearly recognised from the air, with indications of an unbroken ditch seven metres in front of the tower. Further west, near Cardurnock, parallel ditches (thirty metres apart)

were traced for over a kilometre which, like the other ditches, have been tested by excavation.

The northern ditch of the two parallel ditches near Biglands proved to have been cut into the gravel sub-soil to a depth of eighty centimetres. As the exposed face dried it became evident that the ditch had been recut on at least two, and probably three, occasions. The southern ditch comprised a simple cut into similar sub-soil with the "ankle breaker" sump well defined. The middle part of the ditch had filled with fine silt in which a fragment of pottery was found. This single sherd derived from a wide-mouthed jar of a type unusual in North Britain, which was identified as Severn Valley fabric. This ware occurs only in installations of Hadrian's Wall in Period 1, and thus the newly discovered Solway system probably belongs to the initial establishment of the wall.

The site of Tower 2B had been noted earlier in the century but photographs in July 1975 showed the tower plan complete with doorway, and even with traces of what may have been a service track to either side. Photographs taken earlier in the same month revealed that at the foot of the raised beach on which the tower sat there was probably a ditch. On excavation a ditch system appeared that had undergone three modifications.

A final section was cut near Cardurnock. A forward ditch was located running on the brow of the first raised beach south of the present coastline, and it was flanked to the north by evidence of a continuous slot for stakes pointing upwards at about seventy to eighty degrees. This ditch had been recut at least once with major changes to its shape. Thirty metres to the south the rearward trench was located in great detail. The primary ditch sump was clearly preserved below the top-soil level and had twice been recut.

In addition to these discoveries it is thought that the success of this barrier lay in creating a hinterland of farmsteads, of which 154 examples were located in 1975 where only some twenty were previously known.

"HIDDEN" LEONARDO DRAWINGS.—Sir Robert Mackworth-Young, librarian at Windsor Castle, has used a lamp purchased for £28 to show up details in drawings by Leonardo da Vinci that have faded away over the centuries. On thirty drawings the ultraviolet light has caused shapes to appear, whole figures in some cases, which for many years have been invisible. The process operates because Leonardo, who worked before pencils existed, prepared his papers with a special ground on which he scratched his drawings with a metal point; the metal deposit left in the paper absorbs ultraviolet light and shows up in black lines. The first public exhibition of the drawings was expected to be held at the Royal Academy in the autumn of 1976.

"HOMO ERECTUS" DISCOVERY.—In August, 1975, Mr. Richard Leakey found a human skull almost identical to that of Peking Man. It was discovered near Lake Turkana (formerly Rudolph) in North Kenya, and is said to be the oldest and most complete fossil skull of *Homo Erectus* yet brought to light. It was given a dating of one and a half million years which, if correct, would mean that Peking Man is considerably more ancient than has been suspected. Mr. Leakey, who is director of the National Museum of Kenya, is unsatisfied with Chinese methods for dating archaeological sites.

In June, 1976, a fossilised skeleton was discovered imbedded in a stalagmite in a cave in Greece. It was reported to be 400,000 years old. The discovery was made by the Greek Anthropological Society in the Halkidiki peninsula, south-east of

Salonka. In dating the skeleton to the lower Mindel-Riss Interglacial period tools and other evidence in the locality were considered.

HOURS OF THE VIRGIN.—A formerly unknown early sixteenth century illuminated manuscript on vellum, *Hours of the Virgin*, was sold at Sotheby's in July, 1976, for £407,000, the highest ever price for a manuscript. The manuscript came from a German collection and contains eighty-four perfectly preserved miniatures from Europe's leading workshop of the time, which operated in Ghent and Bruges. The Flemish manuscript throws a new light on the Grimaldi Breviary from the same workshop, for it is apparent that a number of miniatures were copied from the former to the latter. Two English dealers and a Brussels dealer were outbid by H. P. Kraus of New York, the world's foremost dealer in this field.

INCREASE IN EARTHQUAKE ACTIVITY.—During the last twelve months there has been a significant increase in the number of major earthquakes. Scientists at the International Earthquake Center at Golden, Colorado, have reported that the number of events of magnitude 8 or more on the Richter scale average at one per year, but already in the first seven months of 1976 four such events have been recorded, Kermadec Islands (Jan. 14), Guatemala (Feb. 4) China (July 27) and Philippine Islands (Aug. 17). In addition to these there have been many quite severe events, nine occurring in the last three months of 1975 and 28 in the first eight months of 1976, in addition to those mentioned above. This increase in activity is a continuation of a trend reported over the last few years. Earthquakes have occurred along all the major zones of activity but there is no evidence to connect events in one zone with those in another. Even within a single belt, the events are random and not connected.

To the general public the severity of an earthquake is not measured by the intensity of the shock waves produced but by the damage caused and the number of people killed. The largest earthquake ever recorded took place in Alaska in 1964 but because it occurred in a not too densely populated area, only 300 people lost their lives. It should be pointed out that on an average about 10,000 people are killed every year by earthquakes. If the centre of the earthquake lies out at sea, the production of tsunamis often cause considerable loss of life as was the case in the Philippines on August 17, when over 8,000 people were killed. On this occasion a 5 metre high tsunami was reported. The severe earthquake which occurred in the Tangshan area of China must have killed many thousands of people because the area is densely populated. No casualty figures have yet been published. In addition to that event, several other shocks have been reported in the area. Another region hit by a series of shocks has been northern Italy. A strong foreshock was recorded one minute before the main quake and during the two hours following, 14 strong after shocks were reported. The casualties included nearly 1,000 killed and over 2,000 injured. Approximately 100,000 people were made homeless. The main tremor was the strongest recorded in that part of the world this century. The Guatemala Earthquake of February 4 was the worst event in central America this century. Over 22,000 people were reported killed, 74,000 people injured and over 1 million made homeless. The strongest quake to hit Hawaii since 1868 occurred on November 29, 1975. Although by no means as severe as those in Italy and China, it caused ex-

tensive damage. It is thought that it was responsible for the eruption of the volcano Kilauea. Lava flowed in the floor of the caldera less than one hour after the main shock.

Earthquakes generally occur at the edges of lithospheric plates and are caused by the readjustment of the crustal rocks to relieve the stresses caused by the movement of the plates.

INDUSTRIAL ARCHAEOLOGY AWARDS.—Nine industrial archaeology groups received cash awards under the B.P. Industrial Heritage scheme announced in July, 1975, by B.P. industrial division. The scheme was devised in conjunction with the Association for Industrial Archaeology and it gives support to industrial archaeological work, particularly in those fields not eligible for grant aid from official sources.

The award winning projects were selected from 130 applications by a joint committee from the Association for Industrial Archaeology and B.P. Of the awards announced on November 24, 1975, the most valuable were: £500 to the Arkwright Society in Cromford, Derbyshire, to assist in the development of local history trails at Cromford, Belper and Shardlow; £500 to the Tyne and Wear Industrial Monuments Trust, to help make a cine film record of the surviving glass industry in the North East; and £400 to the Veteran Steamship Society Ltd., Essex, to help restore the *Resolute*, a steam-driven river steamer. Other awards ranged from £325 to £50, and similar assistance from industry to the A.I.A. will be forthcoming in the future.

JUPITER'S MAGNETIC TAIL.—In December 1973, *Pioneer 10* passed close to the planet Jupiter and whilst doing so sent back to Earth many interesting facts about its magnetic field and also pictures of its surface in greater detail than was possible from Earth-based observatories. The probe then carried on its journey towards the outer regions of the solar system, passing the orbit of Saturn early in 1976. It will eventually become the first man-made object to leave the solar system completely.

During March 1976, the probe's solar wind instrument suddenly fell to zero for a period of about 24 hours. Because of the unlikelihood of this being due to solar conditions, another explanation had to be found. Analysis of the orbital parameters showed that at that particular time, the probe was in a position which suggested it was passing through Jupiter's magnetic tail and was hence shielded from the solar wind. If this explanation is found to be correct, it implies that the magnetic tail of Jupiter extends well beyond the orbit of Saturn and is at least 700 million kilometres in length.

Experiments on the Earth's magnetic tail have indicated a length of about 6.5 million kilometres, so the Jovian tail makes that of the Earth very insignificant. One interesting feature is that at the time of encounter with the tail, the probe was 6° above the plane of Jupiter's orbit. The width of the magnetic envelope in the region of Jupiter is about 18 million kilometres and this will increase with increasing distance from the planet. The solar wind blows radially outwards from the Sun and hence the tail should remain in the orbital plane. Even at distances of the outer planets, it is known to be very turbulent and so a position well above the orbital plane does not present too big an objection.

If the above explanation for the solar wind cut-off is correct, it means that Saturn itself will pass through the tail about every 20 years. This will next occur in 1981 and the appearance of the planet will be watched with very great interest.

LARGEST STONY METEORITE.—The number of meteorites falling on the Earth every year is far higher than is generally imagined but the number that are actually located and studied is very low. As far as the British Isles is concerned there have been three such cases since the last war, the largest fall known to have taken place in the British Isles occurring at Barwell, Leicestershire in December, 1965. On that occasion about 50 kg. of meteorite were collected. It was classed as one of the commonest types of stony meteorite. Stony meteorites make up about 96% of all falls, the rest being mostly "iron" meteorites consisting of virtually 100% mixture of iron and nickel. The stony types have in the region of about 7% iron and nickel.

On March 8, 1976, a very large number of such stones fell in northern China near Kirin City, rivaling and possibly surpassing the previously accepted largest fall which took place in Mexico in 1969. At 1502 hrs. local time, a brilliant fireball crossed the Kirin Province travelling in a southwesterly direction and exploded above the outskirts of Kirin City. Most of the fragments were scattered over a fairly wide area but three large pieces continued along the flight path and fell much further away. By April 21, more than 100 meteorites had been recovered from an area larger than 500 sq km. Three of the stones weighed more than 100 kg., the largest weighing 1,770 kg. The largest individual stone prior to this fall was found in Kansas, U.S.A. and weighed 1,078 kg.

The local population have been intimately associated with the collection of the stones and information relating to the event. Although only provisional information is currently available, studies of the stones show that they contain mainly augite and olivine, with smaller amounts of kamacite, taenite, magnetite and other metals. The stones have a typical chondritic structure and have been classed as an olivine bronzite chondrite. The whole event lasted for 37 seconds and the last fragment to reach the ground penetrated through 1.7 metres of frozen soil to a depth of 6.5 metres, forming a crater 3 metres deep and 2 metres across. Clumps of earth were thrown 100 metres from the crater.

Depending on the size and number of fragments ultimately collected, the Kirin fall may prove to be bigger than the Hidalgo de Parral fall in Mexico, but regardless of this, it is certainly assured of a place in the list of major falls.

MAPPING THE OCEAN FLOOR.—We are all familiar with the very detailed maps of the continents and land masses in general. We are also quite conversant with the extremely detailed maps of the Moon and more recently, of Mars. It comes as a shock when it is realised that apart from a few very selected areas, detailed maps of the ocean floor are virtually non-existent. Even on the continental shelves, detail is scanty. Unfortunately, one cannot use normal photographic or television cameras because of the lack of light. Consequently it is necessary to use techniques involving sound waves, but even so sea floor mapping is in its very early stages. Echo sounders are relatively inefficient since they do not give a high resolution and even then it is a very slow process.

A technique involving scanning the sea bed with a narrow sound beam and which had previously been used on the continental shelves, has been successfully used on the deep ocean bed, according to Dr. A. S. Laughton, when he addressed the British Association this year. Dr. Laughton is head of the Marine, Geology and Geophysical Group at the Institute of Oceanographic Sciences.

The extension of this technique to the deep ocean bed has been achieved using long range

sonar, called *Gloria*, housed in a streamlined shell and towed behind a ship. Speeds of up to 7 knots have been used with success. Strips of the ocean bed are scanned and a picture of the contour obtained. By combining the strips, a mosaic of large areas can be built up. So far, 30,000 square kilometres of parts of the Mid-Atlantic Ridge and ocean basin in the north east Atlantic have been scanned, revealing complex fault patterns. This information should provide the data on which can be built a better understanding of the origins of the sea floor.

METALLIC HYDROGEN.—Theoretical work over the last half century has forecast that under certain critical conditions, hydrogen, the simplest of all the elements and normally non-metallic in properties would exist in metallic form. Much effort and research has taken place in trying to produce this metallic phase. In the United States, the main line of attack has been to use shock waves to produce very high pressures of the order of 100 megabars (100 million atmospheres) but it has been reported that success has been achieved in the Soviet Union using static pressures.

Theory has predicted that all substances will be transformed into a metallic state if the pressure is high enough. Soviet workers have converted diamond and silica into the metallic phase using pressures in the region of 1 megabar. Further studies showed that the critical pressure for hydrogen lay in the range of 1 to 10 megabars. The apparatus used in their experiments consisted of two diamond anvils, one flat and the other very slightly conical, which were capable of being brought very close together, thus producing very high pressures on any substance trapped between them.

The diamond anvils were cooled to a temperature of 4.2° K. and the hydrogen trapped between the anvils became frozen. The shape of the anvils was such that although a very high pressure could be produced in the central region, it fell off rapidly towards the edges, thus reducing the problems of the surrounding equipment having to support and contain these pressures. The anvils were connected electrically and when the hydrogen turned into the metallic state, a current flowed. This took place when the pressure was in the region of 1 to 3 megabars. When the current flowed the electrical resistance of the circuit dropped from 100 million to just 100 ohms. It was therefore concluded that metallic hydrogen had at last been produced.

The production of metallic hydrogen is, of course, not the end of the road. It is necessary to learn something of the crystalline structure of this new metal. Evidence suggests that it should have a body centred cubic structure, the system with the lowest energy. This is in line with the structure of the metals lying below hydrogen in the periodic table. The determination of the structure of metallic hydrogen however presents many problems which so far have nowhere near been solved. (Source: *New Scientist*.)

METEOROID IMPACTS ON THE MOON.—We on Earth are protected from the continual bombardment from space of small meteoroids by our atmosphere. However, such bodies as our Moon, having no atmosphere, are at the mercy of these interplanetary fragments. Impacts of masses greater than about 50 g can be recorded by the seismometers left on the lunar surface by the various *Apollo* missions. This provides a source of information as to the spatial distribution and masses of these particles. The seismic network set up by the *Apollo* astronauts consists of 3 stations located at the corners of an equilateral triangle of sides about

1,100 km, with a fourth about 180 km from one of them.

Analysis of the records have shown that the number of impacts varied considerably with time and it has been concluded that for the more massive objects there exist clouds of meteoroids superimposed on the random impacts. These clouds are very diffuse and are detectable only because of the large catchment area. Typical size of a cloud is 0.1 astronomical units with impact rates of the order of one every three days over an area of 100 square kilometres.

They cannot be linked with the well-known meteor showers seen on Earth at specific times in the year because these latter particles are much smaller and the clouds detected so far show no periodicity. They appear to be sporadic. Most lie close to the plane of the ecliptic and their orbits have aphelia between 2 and 5 astronomical units.

Over two and half years, from January 1973 to July 1975, 815 impacts were recorded and peaks of activity were noted in November and December 1974 and January 1975. For the last event, calculations have been made as to the possible mass of the cloud, about 10^{13} grams confined to a sphere 17 million kilometres in diameter. If concentrated into a single body it would be equivalent to a mass of a body about 300 metres in diameter. However, to put this into real perspective, it is estimated that spacecraft would have to travel through a cloud for 9,000 years before being hit by a fragment.

The discovery of these clouds is of fundamental importance to solar system astronomers, but it is felt that one will have to wait some time before it is found how they fit into the overall picture and the links if any with the meteor showers, comets, minor planets and random meteoroids. (Source: *Science*.)

METHANE ICE ON PLUTO.—The planet Pluto is so far away that the amount of energy it receives from the Sun is so small that temperatures on its surface must be exceedingly low and could be only a little above absolute zero. It is difficult to determine any reliable facts about the planet because of its distance, faintness and size, currently thought to be about 6,000 km in diameter. In the spring of 1976, astronomers from the University of Hawaii, using the 4 metre reflector at Kitt Peak National Observatory in Arizona, showed that the surface was covered, at least partially, with methane ice.

They observed Pluto in infra-red light by passing the light through two very narrow band filters, one selected to admit a bright reflection from water ice and the other from methane ice and these were then compared with the results from earth bound sources. The response was exactly as expected from methane ice. To check the technique, the experiments were repeated using Saturn's satellites as targets with results indicating water ice, a result in accordance with previous knowledge. So far, only Pluto has given methane ice. The existence of this means that the surface must be colder than 50° K, the temperature at which pure methane condenses at low pressures.

Although methane has been detected in the atmosphere of the major planets and also in the atmosphere of Titan, Saturn's largest moon, this is the first time in which solid methane has been identified. It is too early to say that the whole of the surface is covered with it but the information collected has provided evidence that suggests that Pluto is even smaller than was previously thought, it having a diameter possibly as low as 3,500 km, roughly the size of our own Moon.

Based on the discovery of methane ice, several

theories have been proposed for the structure of the planet but much will depend on the obtaining of reasonably accurate values for the diameter and mass. (Source: *Science*).

NESSITERAS RHOMBOPTERYX.—Just as G. K. Chesterton says that "The rolling English drunkard made the rolling English road", so a great many men claiming to be sober say that it is pure Scotch that has created the Loch Ness Monster. Apparently the monster rolls in an equally fetching manner. The problem until recently has been that the rolling roads have been rather more in evidence than the monster, but during the last forty years, and especially in the summer of 1975, the monster has made a number of seemingly genuine appearances (and the roads are being straightened).

The first recorded appearance of the Loch Ness monster was in A.D. 565 by St. Columba, whose biographer recorded that the monster "rushed up with a great roar and open mouth". St. Columba, evidently not in the mood for such frivolity, commanded the "beastie" to retreat, and it obeyed, "going faster than it had approached". One of the latest books on the subject, *The Loch Ness Story* by Nicholas Witchell, thoroughly recounts the many subsequent appearances, and gives a critical appraisal of the vast quantity of material in a remarkably lucid fashion. Mr. Witchell is only one person out of thousands who seriously believe in the existence of a species generally thought to be extinct. He finds it puzzling, as does Gerald Durrell, who wrote the foreword to his book, that the witness of so many intelligent people of spotless repute should be flippantly set aside by both scientists and the media.

Since 1934 many sightings of unidentified animate objects have been reported; statements have been made under oath and photographs have been developed under strict security procedures. The Russians may compare the Loch Ness monster with flying saucers and the abominable snowman, but scientists have been urged many times to examine the evidence without prejudice. In 1972 an underwater photograph was taken and developed showing a recognisable flipper, about eight foot long, attached to a roughly textured body. The British Museum of Natural History states the photograph was genuine and that a large moving object was visible in it, but they were not prepared to try to identify the object.

The climax of the monster hunt came in 1975 when, after years of unsuccessful underwater photography, it was claimed that close-up photographs showed the neck, head and body of one of the animals, which bore a resemblance to plesiosaurs. The authorities are obviously not convinced by the evidence as yet.

Meanwhile, scientific explanations of the monster are in spate. One of the latest says that an atmospheric phenomenon known as a water-devil could explain many sightings. This occurs when warm air on a loch surface is covered by a layer of cooler air, causing the water to rise from the surface.

To solemnise the new interest in the monster, it has been given a new name: *Nessiteras Rhombopteryx*. That this is an anagram of "Monster hoax by Sir Peter S." should not be allowed to discourage believers!

NEW SUB-ATOMIC PARTICLES.—If the results recently announced from California's Lawrence Berkeley Laboratory and the Stanford Linear Accelerator Center are confirmed, this is the first discovery of a fundamental sub-atomic particle for about 25 years. The new particle, as yet unnamed, has a large mass, nearly twice that of the proton and survives for a

relatively long time before decaying into lighter more common particles. These properties and the way in which it decays, are in line with theoretical ideas associated with a whole family of sub-atomic particles referred to as "charmed" particles. Charmed particles have been predicted and are described as a new property of matter analogous to an electric charge. Although none have so far been isolated, there have been many claims that such particles have been identified. Until all the properties of these new particles have been determined, a direct link with the predicted charmed particles cannot be confirmed.

The existence of charmed particles has been based on the results from experiments carried out at the world's leading laboratories. Generally the particles detected showed many of the features expected of charms but vital information on their manner and mode of decay has not been established. In the LBL/SLAC experiments, beams of electrons collide head-on with their anti-particles, positrons. Both particles are annihilated producing a state of energy from which sub-atomic particles are formed. Many of these particles are involved in nuclear binding forces and are termed hadrons. When the energy of the electron-positron colliding beam is raised above 4,000 million volts, the rate of hadron formation was found to increase markedly. Using improved sensitivity techniques, the scientists found that in about 0.5% of the cases, there was evidence of the existence of a new particle which decayed into two hadrons. Subsequent work showed particles decaying into four hadrons.

It is fairly certain that it will not be long before the main problems associated with charmed particles will be sorted out and only time will tell how much significance will be attached to this new discovery.

PARTHENON EXHIBITION AT BRITISH MUSEUM.—A new gallery at the British Museum completes the Museum's permanent exhibition on the Parthenon, displaying for the first time since the war some splendid fragments of the sculptures as well as architectural elements of the building itself. An important feature of the exhibition is the detailed explanation of the objects, accompanied by a wide range of illustrations, including casts, photographs and copies of drawings and engravings from the 17th and 18th centuries. This approach was dictated by the fragmentary state of many of the objects shown. The Parthenon was severely damaged by an explosion in 1687, when a Venetian shell touched off the gunpowder that the beleaguered Turks had stored there. The side walls and colonnades of the temple were blown down and many of its sculptures were destroyed or badly broken. The sculptures suffered further deterioration as the result of neglect and deliberate damage.

Among the slabs of the frieze that were still substantially intact when the architect James Stuart visited Athens in 1752 was one showing a group of horsemen. When Lord Elgin's party arrived half a century later, all that survived of this slab was a small fragment some two feet square. Fortunately Stuart had drawn the slab and published an engraving of it, which makes it possible to appreciate the surviving detail.

This fragment was among those brought to England by Lord Elgin and acquired for the British Museum in 1816. Other fragments were purchased from H. Inwood in 1843, some came from France and Germany in the nineteenth century, and a head that had found its way to Chatsworth was presented by the Duke of Devonshire in 1854. This head joins a torso from the Elgin collection and the whole figure may be seen in a drawing made before the explosion by an artist who is usually identified

as Jacques Carrey. His drawings are now preserved in Paris and, made in 1674, they remain our only source of knowledge for pieces that did not survive the explosion. Carrey's drawing of the whole metope is here exhibited beside the surviving fragments, enabling the visitor to reconstruct the whole action in his mind's eye. One imposing item in the exhibition is a complete Doric capital resting on the topmost drum of one of the columns of the colonnade; the capital was carved from a single block of marble weighing about five tons. Regrettably it was sawn in two to facilitate its voyage to England.

QUASAR DISTANCES CONFIRMED.—One of the big problems that have puzzled astronomers since the discovery of quasars in the early 1960s has been the difficulty in deciding how far away they are. The core of the trouble has been that they have a star-like appearance. If they are very distant objects, the energies emitted are comparable with that of galaxies and therefore their small size immediately suggests physical processes not capable of explanation in the light of current knowledge. On the other hand, if they are relatively near, the energy outputs are much lower but their large red shifts of the spectral lines cannot be explained by the Doppler shift, and must therefore be due to some other physical process. Until recently the solution to this problem has eluded astronomers.

Astronomers at the National Radio Astronomy Observatory in West Virginia and at the Arecibo Observatory in Puerto Rico have investigated a quasar called 3C 286 (3C stands for the third Cambridge catalogue and 286 is the number in that list) and have shown that this quasar at least is a very distant object. They have deduced this by searching for a quasar which lies exactly in the same line of sight as part of an independent galaxy. Quasar 3C 286 is partially obscured by a hydrogen cloud that is thought to be associated with a nearby galaxy. The red-shift measurement of the galaxy gives a distance of 17,000 million light years. The red-shift distance relationship for galaxies is generally accepted by astronomers. The quasar is therefore thought to be at a greater distance. This is in line with the red-shift given by the quasar, a value indicating that it is about 5,000 million light years farther away than the galaxy.

It is therefore concluded that the red-shifts given by the spectral lines from quasars is a measure of their distances from the Earth. The acceptance of such distances creates many problems relating to the methods of generating such vast amounts of energy and so these objects will be the centre of study for many years to come.

RADAR STUDIES OF VENUS.—Until recently photography of the surface of the planet Venus has not been possible, but radar studies have provided much detailed information about the general surface features. This has been predominantly the work of scientists at the Goldstone tracking station of the Jet Propulsion Laboratory, Pasadena, California and the Arecibo Observatory in Puerto Rico. Earlier radar maps had shown a few bright spots but by using the 64-metre steerable dish at Goldstone and the fixed 330-metre dish at Arecibo, sufficient data has been obtained to start a study of the geology of the planet.

Features identified include a 1,500 km. long linear trough near to the equator, comparable with the East African Rift on the Earth and Coprates Canyon on Mars. These features are interpreted as evidence of crustal movement. There is also a long arc of mountains crossed by another linear feature. At another place, a region covering an area 300 by

400 km. and rising to a height of 1 km., has been identified as a huge volcano having a crater 80 km. in diameter at its centre. Although this by no means rivals the Olympic Mons on Mars, it is comparable in size with other Martian volcanoes and is indeed larger than the Earth's Hawaiian volcanic complex.

Other circular features ranging in size from 30 to several thousand kilometres in diameter have also been recorded, the larger ones being comparable in size with the lunar Mare Imbrium and the martian Hellas basin, both of which are currently thought to have been formed by impact. The Arcibo pictures also show a circular feature about 1,000 km. in diameter and having a bright sharp rim, but the shape of the basin does not suggest an impact origin.

The Arcibo dish is being refitted to permit improved radar studies and it is hoped that the resolution will be reduced from 20 to 5 km. Being a fixed dish, observations can only be made for two hours each day, whereas the Goldstone dish, designed specifically for deep space tracking, can follow the planet for about 8 hours with a current resolution in the region of 10 km.

So far the radar maps cover only a small portion of the surface of the planet, that near to the equator, but they have provided a picture which shows that, in spite of its thick cloud cover, underneath it is basically similar to the other inner planets. (Source: *Science*.)

RAINFALL FORECASTS.—The preliminary results of a long-term research study called the Dee Weather Radar Project, indicate that rainfall forecasts could be improved. Over the last fifteen years there have been many investigations into the technique of using radar to measure surface rainfall, and during the last three years comparisons have been made between estimates of areal rainfall using radar and estimates derived from a network of rain gauges over the River Dee catchment area in North Wales. These comparisons show that many conditions prevail in summer and winter which are at present incorrectly forecast, and the research aims at showing how to improve the system.

Meanwhile, the drought of 1975 and 1976 has been so severe that even with average rainfall it will probably take two years before natural underground reservoirs are filled again. When they are filled it will probably be to no more than the low level of the last decade, to which they have been reduced by the high water consumption of industry. Shortage of water is a problem that will outlive a few months of low rainfall.

SATURN'S FOURTH RING.—When Galileo first turned his telescope on Saturn, he thought it was three stars in line. Later observations, made at a time when the Earth lay in the plane of the rings, showed a single object. With the advent of better optical systems, it was realised that the planet had a ring system consisting of two rings separated by what is known as the Cassini Division. Later on, a third ring, now known as the Crepe Ring because of its relative faintness, was discovered lying inside the bright rings.

During the last ten years there have been several claims to have discovered a fourth ring, by some, outside the three main ones, and yet by others, inside the Crepe ring. The existence of an inner ring was claimed by Pierre Guérin of the Institut d'Astrophysique in Paris in 1970 and since then Guérin has confirmed his original observation by scanning the rings with a point microphotometer. The results show quite distinctly a faint but definite ring separated from the Crepe ring by a distinct gap. The signal to noise ratio obtained using this

photometer is about 5 times better than that obtained in earlier photometric measurements. Even the very clear results obtained by Guérin are not universally accepted. Many planetary astronomers are still reluctant to believe that the presence of this ring is a fact, their suspicions being centred on the difficulties of observing a faint object so near to the brilliant planet.

John Murray, of the University of London, has however observed the ring visually on four occasions using the 107 cm telescope at the Pic du Midi Observatory in the Pyrenees. The measurements made were in complete agreement with those of Guérin. Murray is also of the opinion that the equatorial band on the planet could be the shadow of the Guérin ring on the disc and he contends that observational evidence supports this theory.

A very interesting and exciting situation will arise in 1979 when *Pioneer 11*, now on its journey across the solar system after providing a fund of data on Jupiter, is due to fly by Saturn, passing in between the planet and the Crepe Ring. If the probe is still fully functional, the question of the existence of this rather elusive ring could be solved.

SILICA GLASS IN LIBYA.—Following up an earlier discovery, P. A. Clayton and L. J. Spencer embarked on an expedition into the Libyan Desert in 1934, and identified a well defined oval area measuring 130 by 53 km, in which was found many specimens of silica glass. The largest weighed 7.25 kg. The presence of silica glass makes the region of even greater interest because of the presence nearby of two circular structures, now thought to have been caused by impact. A recent investigation carried out by geologists from universities in Texas, V. E. Barnes (University of Texas, Austin, Texas) and J. R. Underwood (West Texas State University, Canyon, Texas) concentrated on the collecting of further specimens and on the problems associated with the origin of the glass.

The glasses collected were found in the sandy desert floor scattered amongst pebbles and cobbles of quartz, chert and petrified wood. No glass was found in direct contact with the local bedrock consisting of sandstone. Many fragments were found but most were retained by the University of Libya. Based on the ten specimens kept by the American geologists, it has been concluded that they originated from the Nubian sandstone, the country rock found in the region where the glass was found. In the glass, included minerals were found to be partially altered through shock and temperature effects. Both the glass and the sandstone were found to contain zircon and elbaite, a variety of tourmaline. The specimens ranged from transparent and colourless to milky translucent and they had a wide range in colour. The degree to which the specimens contained bubbles varied between samples and, in a particular sample, from layer to layer.

One of the circular features, known as the Oasis Circular Structure, was visited by the team but no decision was reached as to whether this and the other feature, 80 km to the NNW, are related to the silica glass. The nearest glass to the Oasis Structure was found at a distance of 140 km. The age of the glass, determined by fission track methods, has been given as 28.5 million years.

Silica glass is normally found only in locations close to and associated with meteoritic craters, e.g. Arizona, Wabar, Henbury. Volcanic processes are generally thought to be incapable of producing temperatures high enough to form the glass. (Source: *Planetary and Space Science*.)

SOFT TISSUE X-RAYS.—The Albert and Mary Lasker Foundation has awarded a prize to Mr. Godfrey Hounsfield for developing a machine capable of photographing soft tissues, including the brain. Mr. Hounsfield, who is head of E.M.I.'s medical systems section at Hayes, Middlesex, has said that various organs of the body which were previously transparent to X-ray, such as the liver and the kidney, can now be clearly seen. The development of this machine is said to be one of the most important contributions in this field since the discovery of X-ray in 1895, and means that a number of conditions can be recognised more quickly at early stages.

SOLAR ENERGY.—An analysis published by the International Solar Energy Society, *Solar Energy: A U.K. Assessment*, states that a fifth of energy supplies could derive from solar energy. The report was compiled by seven teams of specialists, including scientists, engineers, economists and industrialists, who express concern at the dwindling reserves of fossil fuels. Although the United Kingdom has only half the solar radiation of, for example, the United States, it is pointed out that such a source of energy has the value of being inexhaustible, and that fossil fuel reserves of the earth are not renewable and are equivalent to only about a week's supply of solar energy.

In America, where £35 million was spent in 1976 on research into solar energy, machines have already been developed for heating and cooling buildings while the next phases envisage the design of electrical generators and water pumps. In Japan, £18 million was spent in 1976, in West Germany £3 million, and in France £3 million. In the Japanese and German research programmes industrial machinery figures more prominently than in America. The sun's irradiation of the British Isles has already been systematically analysed, but the annual British expenditure in this field is estimated at not more than £500,000. Already solar water heaters are economically attractive compared with "on peak" electricity at the standard domestic rate, and it is hoped that before long solar energy will be harnessed on a much larger scale.

SOVIET UNION CONTINUES LUNAR STUDIES.—After the close of the Apollo project, lunar exploration seemed to fall into the background with planetary missions taking the lead. The Soviet Union has however continued its systematic study of the Moon, the latest probe, *Luna 24*, successfully achieving its objectives in August 1976.

The station was placed in selenographic orbit on August 14. On August 16 and 17, adjustments were made in its orbit so that its height above the lunar surface ranged between 12 and 120 km. The following day, braking rockets were fired and six minutes later, the probe soft landed in the south-eastern corner of Mare Crisium (12° 45' N, 62° 12' E). On command from the Earth, the lunar surface was drilled to a depth of 2 metres, samples collected and placed in containers which were then sealed. On August 16th, a capsule was launched from the landing stage, making its way back to the Earth, where it landed successfully, 200 km south-east of Surgut in Western Siberia. The lunar rock was then handed over to the Academy of Sciences for study.

The *Luna 24* experiment is one of a series of lunar probes which started in 1970 when *Luna 16* brought back a core of material from Mare Foecunditatis. In 1972, *Luna 20* obtained samples from the mountainous region lying between Mare Crisium and Mare Foecunditatis, but an attempt by *Luna 23* in 1974 to sample the rocks from Mare

Crisium failed due to a damaged drill. This was designed to penetrate to a depth of 7.5 metres and consequently it is felt that the mere two metre penetration by *Luna 24* did not achieve its full design potential.

"SPOT THE HOMER."—Professor David West of Newcastle University, talking at the Classical Association's conference in Aberystwyth in April, 1976, said that a German scholar examining Virgil's debt to Homer had turned the *Aeneid* into a literary game called "Spot the Homer". During the last decade lists of Homeric material found in Virgil's *Aeneid* have been systematically drawn up, showing better than ever the extremely close linguistic connections between the two. Professor West, while discussing borrowings from the *Odyssey* in *Aeneid* 1, made it clear that he thought that Knauer, an authoritative German classicist, had taken the comparisons too far.

Professor Milman Parry had in fact found in the late 1920s that recurrent expressions in the Homeric epic were not accidental, nor amateurish, but the result of a long-established tradition, and from this point of view Virgil is seen as a respectable vehicle of that same tradition. In Hebrew poetry the same characteristics are to be found as in Greek poetry—"Spot the Deuteronomist". Typical of this is parallelism, in which pairs of words and phrases recur in different contexts and by different authors. Again this is neither accidental nor indicative of a lack of imagination. The phenomenon of dependence on a fixed poetic diction is particularly a feature of oral poets, but modes of composition do not change rapidly, and Virgil's borrowings show the intentional perpetuation of old techniques.

STABILITY BEYOND URANIUM.—Until recently one has always been led to believe that uranium was the heaviest of the naturally occurring elements. Over the last few decades there has been a gradual extension of the list of elements using synthetic processes but all have been unstable and subject to fairly rapid radio-active decay. So far, fourteen elements have been made reaching an atomic number of 106. Recently, however, physicists have suspected that there may be a group of elements, well beyond number 92 (uranium) which would be relatively stable, i.e. having lifetimes comparable with that of the Earth. Proof of the existence of such elements came to light during the study of the mineral monazite, found in Madagascar.

These new nuclei were located as trace elements in small inclusions in monazite, a form of calcium phosphate. The intrusions themselves were trapped between layers of the Madagascar mica. Alpha particles (helium nuclei) ejected during the decay of the heavy nuclei penetrated the mica to distances depending on their emission energies. Within this range the mica is discoloured giving rise to spherical haloes which can be readily identified. The mica is easily cleaved into flat plates and on them can be seen the haloes as rings surrounding the radio-active source. Such haloes have been the target of much research during recent years and during these studies haloes were found having radii far too large to correspond to any known source. A team of U.S. scientists, headed by Dr. Robert Gentry, studied the X-ray taken from these extra large haloes and found evidence for new super heavy but stable elements. They have atomic numbers 116 and 126 and the preliminary results suggest the existence of other elements in the atomic number range 114-127. The results of these investigations were announced in Canada and at a seminar in Oxford in June, 1976.

The possibility of the existence of these stable super heavy elements has been of considerable in-

terest to the nuclear physicist for some time. It has been shown that the nucleus of an atom arranges its constituent neutrons and protons into shells, somewhat analogous to the periodic classification of the elements by their electron configuration. Theory had shown that nuclei with atomic numbers such as those just discovered should be stable. In fact it has been suggested that further stable elements of even higher mass could exist. Some of the team think they have found evidence of these but there are many problems to be sorted out before a categorical identification can be made.

SURFACE OF VENUS REVEALED.—The fact that Venus has a surface pressure in the region of 100 bars (100 times that of the Earth's sea level pressure) and a temperature in the region of 450°C suggested that it would be virtually impossible for automated probes to reach the surface of the planet, carry out experiments and transmit the information back to Earth. One major problem would be the difficulty of sophisticated electronic systems to survive such hostile conditions. However, the Soviet Union have successfully softlanded two spacecraft on the planet, taken photographs of the surrounding landscape and transmitted the information back.

On 22 October, 1975, *Venus 9* entered the atmosphere and by aerodynamic braking slowed down from 10.7 km sec^{-1} to 250 m sec^{-1} , when a parachute system was brought into action. At a height of 50 km, the parachute was discarded and the probe continued to descend by free fall. It impacted the surface at a speed of about 7 metres per second, the impact being cushioned by a ring of crushable metal supported by shock-absorbing trusses. During the descent and for 53 minutes after landing, information was sent back on the atmosphere and conditions existing on the surface. At the landing site, estimated to be 2,500 m above the Venusian "sea level", the temperature was 485°C and pressure 90 bars.

Venus 10 behaved in a similar way on arrival at the planet and reached the surface on 25 October 1975 at a point 2,300 km from the earlier landing site. At this new site the temperature was 465°C and pressure 92 bars. A wind speed of 33 metres per second was recorded. It transmitted information on the surface for 65 minutes.

At the *Venus 9* site, the surface was fairly level and strewn with sharp edged, unweathered rocks. It was considered that these rocks were debris from tectonic activity or meteoritic impact. The *Venus 10* site, on the other hand, showed rocks resembling huge pancakes with sections of cooled lava or debris of weathered rocks in between. A surprising fact which emerged was that the surface of the planet is relatively dust free. No dust cloud was sent up when the probes landed and the atmosphere appears to be free of dust absorption, since the horizon could be seen as a very sharp line.

After releasing the capsules which descended through the atmosphere, the spacecraft went into orbit round the planet and sent back photographs of the upper cloud surface in ultraviolet light. This information, together with that collected by the capsules, has provided some clues to the structure and composition of the atmosphere. The clouds extend over a height range of 30 to 40 km not as a single thick belt but as a series of layers. The lower layers are about 35 km from the surface. The uppermost layers have been found to be composed of droplets of concentrated sulphuric acid with hydrochloric and hydrofluoric acids also present.

The information given is provisional. Subsequent analysis of the data will no doubt give a more accurate picture.

SYNTHETIC TOBACCOS.—Cigarette smoking during pregnancy has for some years been considered dangerous for the foetus, resulting in a smaller baby and reducing the grown child's intelligence by as much as ten per cent., according to some estimates. The ingredient in tobacco which is responsible for these effects has not been identified with certainty, but the Nuffield Institute for Medical Research in Oxford has now produced strong evidence that nicotine is the cause. The breathing pattern of a foetus is known to be a reasonably good indication of health, and it has been shown that smoking two consecutive cigarettes of the normal kind reduces the time occupied by foetal breathing activities from seventy per cent. to fifty per cent. Chewing gum containing nicotine had the same results, whereas smoking herbal tobacco had no effect on breathing. The conclusion drawn from the experiments is that regular smoking during pregnancy deprives the foetus of some oxygen, thereby constricting growth.

A different substitute for tobacco, New Smoking Material (NSM), appears to reduce the health hazard in smoking without affecting satisfaction. The substitute is manufactured from cellulose and for the experiments, conducted at the Royal Postgraduate School, cigarettes were made up with thirty per cent. NSM. As with the herbal tobacco, the effect of NSM was to reduce the nicotine content.

THESE TREELESS DAYS.—In Warwickshire alone some 400,000 trees have been ravaged by Dutch elm disease, nearly half of the elms in the country. This presents a challenge which must be met with careful deliberation. Some reports have been made of suckers appearing from the root systems of felled trees and it has been suggested that these should be given a chance to grow. However, an authority on trees, Mr. G. D. Roper of Forde Abbey in Dorset, has said that many diseased trees will not regenerate and that any that do will be in extreme danger of a similar fate. He considers it would be unwise to plant elms in the neighbourhood of diseased trees for the next ten years. The best thing to do is to plant either beech or oak on the site of felled trees; a beech particularly recommended is a fast-growing Chilean tree, *nothofagus obliqua*.

Man, however, is the most hostile and widespread enemy of trees. Reports during 1976 show that tropical rain forest is being so heavily cut that rainfall is considerably lessened, while in North Africa desert is moving over previously fertile land at the rate of twenty miles a year. In England it is common for trees to be felled without thought of restocking; alternatively, quick-growing softwoods replace oaks that have stood for nearly two centuries. Certainly the *Andredsweald*, the impenetrable Sussex Forest of Saxon days, is something which today is very difficult to imagine; and Sherwood forest hardly provides cover for outlaws nowadays. Mr. Roper, who has plantations in which two rows of oak alternate with three rows of Norway spruce, points out that if eighty per cent. conifers are cultivated the planting should pay and every fifth tree could be a hardwood such as oak: "You must plant ahead; someone has done it for you."

The best trees are not the product of haphazard planting and forgetfulness. Seeds must come from trees of good provenance, known as "plus trees", and must be planted in suitable soil conditions. In plantations trees should not be more than six feet apart (five feet for some conifers) to avoid excessive bottom growth. The growth on a tree should always be under careful control: up to

twenty feet high only the top half of a tree should be in growth; after twenty feet only a third. If care is taken trees need not be a profitless use of land, but whatever the financial aspect of plantations may be, the slight of dwindling woodlands should encourage any landowner with a spare corner to plant trees rather than let it waste.

UNUSUAL METEORITE.—Apart from the material brought back from the Moon, the only extra-terrestrial rocks available for study are meteorites. Since the time of their formation they will have remained almost unaltered and this gives scientists the opportunity to study the various conditions which have existed in the past. Of special interest is a relatively rare type of stony meteorite, the ureilites. Their composition is very similar to that of the ultra basic terrestrial rocks called dunites, the material forming the Earth's mantle. The ureilites are also of particular interest because they are the only type in which are found diamonds.

Only seven ureilites are known, the last, the Haverø meteorite, falling in Finland on 2 August 1971. It was a relatively small stone weighing only 1.5 kg and fell on a farm, penetrating through a tiled roof and three wooden floors. Recently a detailed account of the research on the meteorite has been published in *Space Science Review* and this certainly confirms the special place filled by these objects.

The total carbon content is high (2%) in line with the others of this class of meteorite. This carbon is found in the form of large diamond-graphite inclusions up to 4 mm in diameter and fairly evenly distributed. The meteorite is strongly recrystallised, the chief mineral olivine having been transformed into a mosaic of small grains amongst which kamacite with a low nickel content is distributed. The meteorite is penetrated by a system of cavities, all elongated in a common direction. In some of these cavities are found kamacite plates containing a much higher percentage of nickel. These facts all indicate an origin similar to that of the other ureilites in that they were formed at a time when conditions were very turbulent and that shock waves generating pressures in the region of 300-600 kilobars existed. One possible explanation is that these shock waves originated from solar flares in the early days of the solar system.

Detailed analysis has shown that 60 per cent of the material ablated during the passage through the atmosphere. Isotope studies have shown that before Earth encounter, the orbit had an eccentricity of at least 0.25 and an aphelion of about 4.3 astronomical units (the distance between the Earth and the Sun).

VIKING'S VIEW OF MARS.—After each visit by a spacecraft to Mars, there has been a drastic modification of our ideas of the conditions existing there. Incorrect ideas however started centuries before the space age. In 1659, Huygens made a sketch of the most prominent feature and called it Syrtis Major (giant quicksand). In the 17th and 18th centuries it was widely accepted that Mars was inhabited. These ideas were strengthened by the identification of the polar caps and their fluctuation in size with the seasons. The peak of the belief was reached by the work of Schiaparelli and Lowell, who made detailed maps of the "canali", but it was Lowell who was convinced that these canals were constructed by Martians.

The first fly-by in 1964 by *Mariner 4* showed a cratered surface similar to that of the Moon. This was strengthened by the results sent back by *Mariners 6* and *7* in 1969. Only 10 per cent of the surface had been photographed in detail but they showed a relatively uniform cratered surface. *Mariner*

9, in 1971, gave a completely different picture. In addition to the cratered highlands of the southern hemisphere, it revealed gigantic volcanoes, a rift valley many thousands of kilometres long and evidence of dried up river beds. The probe thus revealed a dynamic, evolving Mars, not at all like the Moon. It also showed the non-existence of the canals or even extensive linear markings. All the probes so far had carried out experiments to study conditions on the planet to see if life was possible. No experiment was included to try to detect life.

The purpose of the *Viking* missions was to extend and pursue the study of the planet, with a special emphasis on the search for evidence of life there. The prime targets for examination were therefore the atmosphere, the surface and its physical evolution and the question of any possible biological evolution. Of paramount importance was the question of the presence, either now or in the past, of water.

It was known that water existed in small quantities in the atmosphere but with a surface atmospheric pressure of only about 1 per cent of that of the Earth, the Martian atmosphere could not sustain large quantities of liquid water. The principal question was whether there were large amounts locked in the permafrost. The presence of braided channels had suggested that water had existed in large quantities in the geologic past.

The contrasting surface features of Mars are of special interest. Geologists would like to learn more about the high concentration of huge volcanoes near Tharsis, the great rift valley, Valles Marineris, and the stratified terrain of the polar regions. This last feature suggests a marked precession of the polar axis over a long period. Another mystery that it is hoped can be clarified is the fate of the gas nitrogen, not identified by the previous probes. Was it lost by outgassing or is it locked up in the surface in the form of nitrates? The answer to this question is vital if one is to investigate the possibility of life on the planet.

It was with this background knowledge that two *Viking* spacecraft were launched from the United States with the aim of softlanding on the planet and carrying out a complex series of experiments. *Viking 1* went into orbit round Mars on June 14 and immediately went into action, photographing the various possible landing sites. All earlier photographs had a resolution of about 100 metres and before a landing could take place, far greater detail of the landing sites was required. Analysis of the pictures showed that the sites were far rougher than had been hoped but it was finally decided to choose a position about 900 km southwest of the primary site in the Chryse Basin. The orbit of the spacecraft was modified accordingly and on July 20, the landing capsule was detached from the orbiter and landed successfully at the desired place.

During its descent, *Viking 1* showed that the atmosphere consisted of about 2 per cent argon, 3 per cent nitrogen and some oxygen, the main constituent being carbon dioxide. Mars skies were found to be a faint pink due to the scattering of sunlight by dust. The surface of the planet is decidedly red, the result of oxidation of iron. It is not possible at this stage to determine whether the oxidation has been due to a rapid process early on in the planet's history or a continual process of photooxidation by ultraviolet light in an atmosphere deficient in oxygen, as it is today.

The first pictures transmitted back to Earth were in the low resolution mode and showed just a rock strewn landscape, but later transmissions in higher resolution revealed a wealth of detail. Early on, three distinct types of rock were identified, rough

textured igneous rocks which appeared to have cooled slowly, finely textured rocks (indicating rapid cooling) and very smooth light coloured material. Most of the loose rocks seemed to be associated with the rocky outcrops, with dark rocks near to the dark outcrops and the lighter coloured material near to the light outcrops. The coloured pictures released were in fact transmitted back to Earth as black and white scans of an area seen through three separate filters and these were then combined together at the Jet Propulsion Laboratory at Pasadena, California.

The first weather report from Mars was quite interesting. The meteorological team leader, Seymour Hess, commented that at the landing site there were light winds from the east in the late afternoon, changing to light winds from the south-west after midnight. Maximum wind speed was 15 miles per hour. Temperatures ranged from -122°F just after dawn to -22°F . The pressure was steady at 7.70 millibars.

On July 28, the lander scooped up a sample of the martian soil and began the search for microscopic life. The soil was cooked in an incubator for 5 days. One biological experiment was designed to detect any microorganism that lived by photosynthesis. The second, labelled the release experiment, was designed to look for signs of metabolism, evidence that organisms in the soil are maintaining and reproducing themselves. A third biological experiment was designed to detect any exchange of gases between microorganisms in the soil and the atmosphere in the test chamber. Like all experimental work, the results were not as clear cut as expected. In the gas exchange test, large amounts of oxygen were given off when the soil was exposed to the laboratory conditions. In the labelled release experiment, large amounts of radio-active carbon 14 were released from the soil. Unfortunately in the early stages it was not possible to decide whether this was a biological reaction or a chemical one between active ingredients. With the information gleaned during the first few days, American scientists are endeavouring to duplicate martian soil back in the laboratory but many difficulties are being encountered.

Whilst the lander has been busy with studying conditions at the surface, the orbiter was studying large scale weather conditions. It revealed turbulent swirls around the giant volcanoes, with clouds forming over areas up to 600 km across and others streaming away from the mountain tops at speeds up to 200 km per hour. In the huge canyon near to the equator, clouds formed below the rims obscuring the canyon floor. The onset of winter in the southern hemisphere is being monitored in detail.

Viking 2, following in the footsteps of its predecessor, successfully arrived in the vicinity of the planet and on September 3, its orbiter made a perfect soft landing in an area called Utopia, about 1,400 km farther north than the Chryse region and on the other side of the planet. The preliminary results from this probe showed that the rocks in this region were very similar to those at the other site.

VOLCANIC ACTIVITY (1975-76).—Although volcanoes have been active in all the well-known regions, including the famous names of Etna and Cotopaxi, the most severe and dangerous eruptions have taken place in Alaska and the Central-America West Indies regions.

La Soufrière, a strato volcano at the southern end of Basse Terre, Guadeloupe, has erupted frequently over the last 300 years but this time local volcanologists came to the conclusion that this

latest round of activity could be catastrophic. Activity increased suddenly on July 8, 1976, when a surface fracture opened on the southeast flank and solfataric gases and old ash began to be ejected from the fracture. The authorities evacuated residents living in the area. Activity intensified again on August 12 with a sudden increase in seismic phenomena. This build-up continued as can be shown by the number of seismic events reported on consecutive days: August 20, 26; 21, 88; 22, 156; 23, 116; 24, 1162; 25, 471 and the next few days about 200 per day. For the whole of August 5,989 tremors were recorded. On the 30, continuous tremors accompanied volcanic emission for the first time. On the same day, a roaring sound, like a jet engine, gradually increased in intensity and the volcano started to eject blocks up to a metre across as well as considerable quantities of ash. Activity has since died down considerably. Scientists had however predicted a very high probability of an eruption on the same scale as that, in 1902, of Mt. Pelée on the neighbouring island of Martinique, when 28,000 people were killed.

WATER MILL CONSERVATION.—Two Cornish water mills have recently gone into operation and it has been reported that "astronomical savings have been made" since they have been used. At one time there were twenty tide mills, filled at flood tides, on Cornish creeks and inlets; in addition to these there was a great number of tidal and wind-and-tide mills on rivers and streams in the Duchy. The two mills in question are near Liskeard and Lanivet; with technical innovations it would apparently be possible to re-establish many other mills that would prove highly efficient. Mr. John Pardoe, M.P. for North Cornwall, who has demanded a "tough and brutal programme of energy conservation", is also involved in a tidal barrage scheme for the Severn Estuary. This scheme has already been investigated by Bristol University and pronounced feasible.

WHO FOUND AMERICA?—For some years now people have searched for evidence in a variety of places to support the theory that Bristol men discovered America before Columbus. Oscar Wilde, who always enjoyed a harmless jibe at the Americans, said that "Of course America had often been discovered before, but it had always been hushed up", and it is almost certain that he was right.

In the harbour of Louisbourg in the "Baie des Anglais", Nova Scotia, a primitive cannon was dredged up of a type in use about A.D. 1500. It is not altogether certain that this was discarded ballast from an Elizabethan or later ship, which is how it has normally been explained.

Mr. Forbes Taylor of Bristol has recently found peculiarities in the customs accounts of Bristol imports and exports from 1479 onwards. Certain ships, reported to have been trading with Ireland, took up to three times as long for their voyages as the distance merited, and it has been suggested that in reality a secret of rich trans-Atlantic fishing grounds was being jealously guarded. This suggestion has been meticulously backed up with analyses of patterns of cargoes and sailings.

Though there is little information which serves as definite proof of these ideas, the chances are fairly high that at some time British or Portuguese fishermen, and Bretons and Basques as well, were in a position to be taken to Newfoundland by unexpected winds. The Basques, who were in the majority, would probably have been among the first to have landed there. Whatever the relationship of probability and fact, the discussion is so vigorous that if further evidence is available it will not remain hidden for long.

ARCHÆOLOGY IN 1975-76

Sir Mortimer Wheeler

In July, 1976, Sir Mortimer Wheeler, who has been described as "the outstanding British archaeologist of his generation", died at the age of 85.¹ From 1913, apart from distinguished service in both the World Wars, Sir Mortimer (as he became in 1952) held a succession of posts beginning in the Royal Commission on Historical Monuments, moving to the National Museum of Wales and the London Museum, culminating in 1944 with his appointment as Director-General of Archaeology to the Indian Government. He held many offices, including that of President of the Society of Antiquaries from 1954 until 1959 and also the Secretaryship of the British Academy from 1949 to 1968; he was a Trustee of the British Museum from 1963 and was Chairman of the Ancient Monuments Board for England from 1964 to 1966; in 1968 he was elected a Fellow of the Royal Society.

His archaeological excavations were not only carried out with great technical expertise but were also publicised in such a way as to catch the public imagination; especially notable were those at Caerleon, Verulamium and, perhaps above all, at Maiden Castle in Dorset; his investigations into the pre-history of the Great Indus Valley civilisation added very greatly to the knowledge of the archaeology of the Indian sub-continent.

Apart from his skills as an archaeologist, there is no doubt that Sir Mortimer will be remembered as the person above all others who has made archaeology popular in the 20th century; not only did his great interest in furthering the education of the public cause him to argue for the establishment of the Institute of Archaeology at London University, which opened in 1937, but he also understood the potentiality of television; his appearances especially on "Animal, Vegetable, or Mineral?" contributed to him being declared in 1954 "Television Personality of the Year". Sir Mortimer Wheeler will long be remembered as one of the most influential figures in British archaeology.

Ancient Monuments Board

The 22nd Annual Report of the Ancient Monuments Board for England, covering the year 1975, was ordered to be printed in June, 1976. The Report includes a description of a tour by the Ancient Monuments Board based on Chester; in that city a number of buildings restored under the Chester Conservation Scheme were inspected, and of the Agricola Tower, the only part of the Castle held by the Department of the Environment, the Board notes "we consider that the monument could be made more intelligible to the public if certain later buildings were removed from the site and we therefore urged the Department to try to enlarge the area under their control." Norton Priory was then visited; this was an Augustinian foundation of 1134 which is now within the confines of Runcorn New Town; the Development Corporation in consultation with the Department of the Environment has been undertaking excavation and consolidation over the last six years and the Board "congratulate all concerned in this work, which has received a Civic Trust Heritage Year Award in the conservation category." It had also noted that some thirteen thousand people were present at the public opening on May 1, 1975.

Visits were also made to the Roman fortress at Abbey Green, Chester, ("in our view, the remains are eminently suitable for display"), Wroxeter, the fourth largest city of Roman Britain, of which the Department of the Environment has acquired over two hundred acres, Beeston and Whitington Castles, at the latter of which members of the Board were told about the new single-span concrete bridge to the inner ward; it is remarked that "it was the hope of your Board that in future the Department would bring to their attention any such major departure from current practice before it was put into effect". At Baguley Hall, described as "one of the series of great timber-framed hall-houses of Cheshire and South Lancashire", the Board was "concerned by the quality of some of the repairs so far undertaken," and recommended "that the most careful consideration be given both to the method of repair and to the detailed recording

of the building in its present state and during the course of the Department's work". Two very different types of monuments also engaged the Board's attention, namely the two Anglo-Saxon Sandbach Crosses, which are deteriorating through the action of the weather at their present, but not original, position on a large stepped base in the Market Place; by contrast, the Board inspected Marple Aqueduct, which is noted as being "one of the few surviving structures built by Samuel Oldknow and was one of the earliest industrial monuments to be scheduled"; now considerably restored, the Aqueduct was reopened for boats in 1967.

In the section on individual cases, it is reported that three monuments have been removed from the list, namely a Fairbairn crane at Hartlepool Docks which was demolished before an alternative site for it could be found, part of the site of the Royal Palace at King's Langley, which was excavated prior to redevelopment, and part of the wall of Hyde Abbey, Winchester, which had collapsed.

Twelve cases of the use of compulsory powers by the Secretary of State are recorded; sites range in date from Neolithic to medieval times and include the three Thornborough Circles which are described as being "among the finest henge monuments in the North of England and are an important focus for the extensive late Neolithic settlement of North Yorkshire". For the Roman period, sites included the Brancaster Roman fort in Norfolk, which was one of the Saxon shore forts which formed part of a defensive system stretching from Brancaster to Portchester; streets and sites of buildings have been found by aerial photography and field work in the vicinity of the fort indicates an extensive civil settlement. An Interim Preservation Notice was served to encourage the protection of the Roman site at Chesterton, Huntingdon and Peterborough, which "is of exceptional importance, since it is known to contain extensive Roman buildings"; the Board recommended that the whole of the scheduled area north of the A1 road should be preserved under grass for all time because finds of gold and silver indicate that the Roman levels are very near the surface. "As well as affording legal protection, this course of action would make looting by 'treasure-hunters' using metal-detectors more difficult. This is a most destructive practice because it disturbs valuable archaeological evidence within the superimposed soil strata." Planning permission for housing given by Stratford-upon-Avon District Council covering six acres of the Roman town of Alcester in Warwickshire, where the fourteen acre scheduled site contains stone buildings, some of them having frescoed walls, led to the Secretary of State serving an Interim Preservation Notice "in order to save the site from destruction and to allow time for its future to be further considered." Compulsory

powers were also used by the Secretary of State in connection with some eight medieval sites, including the twenty foot high motte at Yockleton Hall at Westbury in Shropshire which was threatened with levelling for the cultivation of sugar beet, the motte of Eardisley Castle in Herefordshire threatened with infilling by a flood alleviation scheme and the motte at Bampton in Devon, which the Town Council wished to level to improve the area for recreation; two threats of particular importance were that arising from the intention of the Dean and Chapter of St. Albans Cathedral and Abbey to seek planning permission to build a three storey pilgrim centre on the site of the chapter house; an Interim Preservation Notice was served and the full excavation of the chapter house site is recommended should planning permission for the pilgrim centre be granted; the second particularly noteworthy threat arose from the recommendation of the Diocesan Parsonages Board to demolish the tower and adjoining lengths of wall, the only standing remains of the former summer palace of the Bishops of Exeter, at Bishop's Palace, Torquay in Devon, on the grounds of the expense of repairs and maintenance; an Interim Preservation Order was served and a recommendation made that the permanent preservation of the monument should be ensured.

The Ancient Monuments Board advised on some twelve cases during the year, including the threat of total destruction by quarrying of the Palaeolithic site at Westbury-sub-Mendip in Somerset, described as "possibly the earliest Palaeolithic site in Britain"; in 1949 part of a cave system was found and the roofs of caves had been blasted by the quarry owners in 1974, thereby destroying four of the most important levels from an archaeological point of view; the Board recommended the immediate excavation of the remaining top layers, which because of their condition were very difficult to preserve. The very important Neolithic site of Grimes Graves flint mines in Norfolk also claimed the attention of the Board, which was consulted as to whether or not an excavated pit should be left open for specialist inspection or whether it ought to be filled in again to preserve the contents; the Board recommended that the pit should be kept open if this could be done without damage.

Threats to four Roman sites were considered by the Board, the first being the Beaufront Red House military site at Corbridge in Northumberland, which was discovered in the course of excavations in advance of road construction; the east and western military ditches were located together with the remains of some fifteen timber-framed buildings between them, and the indications are that the whole fort covered perhaps some thirty acres; it was decided to schedule the remainder of the site immediately. So far as the Vindolanda Roman fort and civil settlement at Chesterholm in Northumberland is concerned, the Board considered the Report of a monitoring team which it had set up to review the development of the excavation and post-excavation work. The Board supported the Department of the Environment's proposed excavation of the Romano-British settlement at Hibaldstow, Humberside, in advance of the construction of a dual carriageway link with the M.180, which would affect a five mile stretch of Ermine Street; excavations during 1975 showed the settlement to be quite extensive and the Board asked the Department to consider urgently the possibility of re-routing the new road. At Verulamium at St. Albans in Hertfordshire ploughing is adversely affecting large areas of the Roman town and the Board "recommended that the Department should take steps to have these areas taken out

of arable cultivation in order to protect the Roman remains from further damage".

For the medieval, period the Board's advice was sought over the bulldozing by Swale District Council of the site of the fourteenth century Queenborough Castle at Queenborough in Sheppey in Kent; the Board recommended that the site should remain scheduled despite the damage and "were pleased to hear that at a meeting with senior officers of the Department the Chief Executive had given an assurance that his Council would co-operate with the Department in preserving archaeological sites in his district and displaying them more effectively to the public". Unauthorised bulldozing also took place at a motted site north of Park Barn Farm at Boughton Aluph in Kent; another threatened castle was Wallingford in Oxfordshire, where it is proposed to build a retirement home on a site below which are the remains of medieval buildings buried by the levelling up of the area in the early thirteenth century to form an extension to the Norman castle; the cob walls of these buildings had been preserved to a height of about six feet and it was believed that the remains of the Saxon town would lie beneath them; the planning application concerning this site has been called in by the Secretary of State.

Two later buildings were brought to the Board's attention, namely Witley Court in Worcestershire and The Grange at Northington in Hampshire; the former is now a ruin, having suffered for thirty five years from fire, neglect and vandalism; this ruined mansion was taken into the guardianship of the Department of the Environment in 1973 and the Board recommended that "all worthwhile parts of the ruins including interior features should be preserved in such a way as to permit the eventual opening of at least some of the interior to the public". The necessary arrangement for the Department of the Environment to take over the remains of the late seventeenth century Grange at Northington were made this year; it was designed by William Samwell and later encased within a neo-classical skin by Wilkins; it is intended to consolidate the remains of the building and possibly to add a new roof; the Board "accepted that as the house is internally totally ruinous it would be impracticable to allow the public inside".

In July 1974 the Ancient Monuments Board set up a Committee for Rescue Archaeology "to advise the Department on policies and priorities for surveys and excavations, on allocation of grants and on bank-up facilities to aid early completion and publication of reports"; the Committee met three times in 1974 and five times in 1975. In its Report on its work the Committee reviews the present position and recent developments, and draws attention to where improvements are needed. "There are two major problems in providing for satisfactory processing and storage of excavated material. These are the need to improve laboratory and museum storage facilities in the provinces and the need to train more conservators." The Committee, realising that these were matters largely beyond the responsibility of the Secretary of State for the Environment, has had discussions with the Standing Commission on Museums and Galleries on these subjects. At its October meeting the Committee set up a working party to consider in detail how conservation and scientific back-up facilities could be improved. Similar concern was expressed with regard to the field of scientific investigations, while "funds for improving conservation facilities throughout the country are a major problem. At the meeting with the Standing Commission on Museums and Galleries... it was agreed to approach the Department of Education and

Science, which is responsible for museums, to ask them to consider contributing towards the cost of improving conservation facilities... there is an acute shortage of trained personnel at present. At the end of 1974 it was estimated that less than 100 (probably nearer 80) conservators were engaged, as part of their duties, on the conservation of material from past and present excavations in England. Furthermore only approximately one-third of this number were believed to hold a conservation qualification". The Committee was also concerned over the years in question with the "serious backlog" of unpublished reports on archaeological excavations; a working party was set up and a report entitled "Principles of Publication in Rescue Archaeology" was produced and the Ancient Monuments Board recommended that it should be published for the guidance of excavators throughout the country and this was done in November, 1975.

Rescue Archaeology

Rescue Archaeology was also the theme of a paper presented by the Chief Inspector of Ancient Monuments and Historic Buildings, who considers it "opportune to consider the relationship between the traditional role of the Department as an agency for the preservation for posterity of surviving sites and monuments of national importance and its developing role as the principal agency for preserving, by means of survey, excavation and record, the archaeological evidence contained within selected sites also of national importance whose destruction cannot be prevented. Essentially there is a single factor linking these two facets of the Department's work in terms of the Ancient Monuments Acts: Preservation." Although preservation is the ideal, economic circumstances dictate that selection is the order of the day, "cost effectiveness is now a fashionable term in archaeological circles", and the conclusion is reached that "what is needed is a strategy for rescue archaeology in terms of its potential contribution to current and long-term research needs". The Chief Inspector summarises the position thus: "Excavation should be regarded more and more as a selective though essential weapon in the battle to save the archaeological heritage... in order to dispose of the Department's resources in the most economical way and to further the long-term objective of saving the nation's past for the future, greater attention needs to be focused on the policy and practice of preservation. The future lies with a clearer definition of long-term aims, the better management of available resources including the co-ordination of excavation, conservation and publication and the achievement of a satisfactory balance between conservation and development, particularly agricultural, which will respect the interest of everyone concerned with the exploitation of the land."

It is recorded in the Report that thirteen monuments have been taken into the care of the Department of the Environment during the year under review, and these include Nympsfield Long Barrow, Frocester, Gloucestershire, Piercebridge Roman Bridge, Manfield in North Yorkshire; Bramber Castle, Sussex; The Iron Bridge, Shropshire and Landguard Fort, Felixstowe, Suffolk. Some 321 monuments were recommended for scheduling by the Ancient Monuments Board during 1975, of which 51 are in Cornwall, 22 in both Devon and Cornwall and 20 in Cumbria. These 321 monuments are divided up into the following categories: caves, 3; burial mounds or groups of mounds, megalithic monuments and ritual and ceremonial sites, 50; camps and settlements, 53; Roman remains, 32; Saxon remains, 3; linear

earthworks, 5; ecclesiastical buildings, 15; crosses, 5; castles and fortifications, 25; deserted villages, settlements and mottled sites, 45; industrial monuments, 37; other secular sites, 38; bridges, 10.

Archaeological Excavations 1975

The Department of the Environment published a summary of pre-historic Roman and medieval sites excavated in advance of destruction under the title of *Archaeological Excavations in 1975*. In the introduction it is stated that in the financial year 1975/76 money made available for rescue archaeology in England, Scotland and Wales was increased by £566,000 to a total of £1,629,000; in the calendar year 1975 £906,191 was made available towards the cost of surveys and excavations in England, £281,782 for post-excavation work and £34,055 towards publication costs; for Scotland £23,289 was provided in grants and £81,587 in Wales; further, fees for supervisors and assistants working on direct and sponsored excavations totalled £50,123, £14,653 going to those engaged on post-excavation work; £16,416 was spent on central excavation in England, £37,443 in Scotland and £4,622 in Wales. To help to spread more fairly the available resources, some fourteen major projects of national importance have been removed from area funding and now have their grants allocated centrally; these major projects include very important urban excavations in London, York, Hull and Lincoln, as well as rural sites such as the Somerset levels, the route of the M.3 Motorway through the Wessex Chalk and the important group of sites in the area of Peterborough New Town. It did not prove possible to constitute or expand archaeological rescue units as had been intended, because most extra funds during 1975 were allocated to post-excavation work. "This period of retrenchment and financial restriction, which will continue through 1976/77 and beyond, gives an opportunity to concentrate on survey work. It is intended to have at least one Field Officer, on a three year contract, in each of the English counties, where there is no one already employed by other agencies, with the aim of basic coverage for survey and general intelligence on the rescue situation. By the end of 1975 there were only a few counties where this had not been achieved."

Central Excavation Unit

A significant innovation was that the Inspectorate of Ancient Monuments set up its own Central Excavation Unit, a mobile organisation designed to complement archaeological rescue work being done by a number of bodies with grant-aid from the Department of the Environment. "The purpose of the unit is to operate a flexible programme of excavations in England: (1) in areas where no suitable organisation exists (2) in areas where units have insufficient resources (3) on special sites of national importance and (4) on sites which the DOE becomes committed to excavate with three months' notice." The report considers the executive organisation region by region, giving details of the current administrative arrangements. The attention to survey work is stressed and is summarised thus: "the emphasis has therefore been on establishing what antiquities exist, relating these to specific areas and assessing their relative importance. The Field Officers are also playing an increasingly important part in the conservation of sites." It is noted that despite the economic situation, requests for excavation grants for threatened sites were for double the amount of money which it was possible to allocate; the principal threat to archaeological sites have come from urban

rebuilding, mineral extraction, road construction and intensive agriculture. "Broadly speaking, the year has been one in which many archaeological organisations have 'marked-time', concentrating on post-excavation work and on general survey work. This, while undoubtedly desirable, has resulted in a drop in the number of excavations carried out."

Among the more important pre-historic sites noted in the Report were a Mesolithic occupation at Monk Moors at Eskmeals in Cumbria, where four hearths and some probable stake-holes have been excavated, and a Neolithic causewayed camp excavated at Orsett in Essex; the investigation of the causewayed camp on Hambledon Hill in Dorset continued as did the Somerset Levels Project, which has led to the discovery of quantities of pre-historic timber. The investigation of Neolithic barrows continues and a particularly interesting one at Callis Wold, Humberside, known as Mortimer's barrow 275, was finished, having revealed a Neolithic mortuary enclosure, structure and façade, associated with a large amount of Neolithic Towthorpe ware. Moving on in time, three beaker burials were excavated at Smeeton Westerby in Leicestershire and a Late Bronze Age cemetery being excavated at Long Benington in Lincolnshire has led to the discovery of at least thirty bucket urns; at Burton Fleming, Humberside, the excavation of the major La Tène cemetery has revealed more square barrows and four additional sword-burials; at Barnack in Cambridgeshire a barrow of three periods was excavated, the primary phase of which produced a beaker, dagger and gold-studded wrist guard. For the period of the hill-forts, the most important excavation was at Danebury in Hampshire, where excavations within the rampart revealed remains of stratified timber buildings, while the investigation of the Iron Age landscape at Mucking in Essex, revealed a further nine roundhouses. An interesting multi-period site was on downland at Bishopstone in Sussex, which on completion was found to consist of Iron Age and Romano-British settlements as well as twenty timber structures of Anglo-Saxon date.

Under the heading Roman military sites, the Report notes that a new section of the Turf Wall, ditch and vallum was recorded at Appletrees in Cumbria where a gas-pipe trench cut through the Roman frontier; the first milefortlet at Biglands in Cumbria beyond the west end of Hadrian's wall was found to have three periods of second century occupation, while an investigation of the east end of the fort of Wallsend in Northumberland showed a succession of structures beginning with a timber building but no evidence of violent destruction by fire in any period; at Hyton, Humberside, the Flavian fort found by aerial photography was investigated and the excavation was undertaken of the north-west and south-east gates, as well as two corner towers and barrack blocks; traces of early Saxon occupation were also found in the central area of the fort. Work also continued on the two legionary fortresses of York and Chester, at the latter place an internal tower, rampart building and parts of the centurion's quarters of barrack blocks being examined. Among excavations in Roman towns those at Leicester are noted as having revealed a large cemetery on the west side of the town overlying earlier industrial development, which includes, possibly, a pottery kiln site; at Colchester in Essex, the excavation of the extra-mural settlement to the west led to the discovery of a complex system of wooden water pipes which is taken to

imply the existence of some form of water tower, while at St. Albans in Hertfordshire a bath house dating to the second century A.D. was investigated. At Southwark, the bridge-head suburb of Londinium is starting to appear, while in the City of London, major excavations are revealing more of the Roman waterfront and its history; a defensive wall along the river bank was found and it had in it many sculptured stones from earlier monuments. At Poundbury in Dorset another 155 graves were recorded in the late Roman Christian cemetery and another 3 in the nearby pagan cemetery, bringing the total for the two cemeteries to 960.

From sites of the earlier medieval period described in the Report may be noticed the excavation of Anglo-Saxon cemeteries at, for example, Elsham, Humberside, where a large cremation cemetery was investigated and at Wigber Low, Derbyshire, where five secondary inhumation burials were found in a much earlier Bronze Age barrow. The excavations at Mucking in Essex continue to be of the greatest importance, and particular mention must be made of a Norse farmstead excavated at Ribbleshead in North Yorkshire which produced four ninth-century coins, including some of Aethelred II and Wylfhere. The remains of industrial activity in Lincoln in the ninth and tenth centuries have been found on the Flaxengate site and important discoveries have been made in the urban sites of Northampton and Norwich. For the later medieval period, an interesting discovery was made in York where a fifteenth-century pit was found containing debris from a glazier's workshop; in Hull, excavations in advance of major roadworks led to the discovery of traces of medieval and post-medieval properties, the earliest of which can be identified in the Hull Rental of 1347. The most significant excavation of a castle was undertaken at Stanford, Lincolnshire, where the complex series of halls discovered in 1974 was investigated and an early kitchen complex was found below the first stone wall. Compared to the extensive number of medieval ecclesiastical, urban, castle and village excavations that were undertaken during the year, the Report draws attention to the only specifically post-medieval investigation that took place, which was of a water-powered industrial site at Ardingly in Sussex.

Council for British Archaeology

The Council for British Archaeology's 25th Annual Report for the year ended 30th June, 1975, was published during the winter of that year, and in it is noted that the year under review had been dominated by two major issues—the publication of *Archaeology and Government* and the proposal to set up a professional Institute for archaeologists. *Archaeology and Government: A Plan for Archaeology in Britain*, a publication produced jointly by the Council for British Archaeology and the organisation known as Rescue, was widely circulated and promoted much discussion, culminating in a delegation being received by Baroness Birk, Minister of State in the Department of the Environment, whose responsibilities include archaeology, on January 15, 1975; one of the results of this meeting was the publication of a memorandum by the Department of the Environment for distribution to local authorities; the memorandum treated archaeology under a number of heads—what it is, why it has developed, how it is financed, existing organisations, the resources of the Department of the Environment, departmental staff, local organisations and the role of local authorities, and training.

EDUCATION IN THE UNITED KINGDOM

There are nearly 12 million pupils and students in full-time attendance at schools and institutions of further and higher education in Britain. In 1974-75 estimated total public expenditure on education was over £4,500 million, about 13 per cent of all public expenditure (includes school meals, milk, local libraries and museums).

ENGLAND AND WALES

Department of Education and Science

Those responsibilities of the Secretary of State for Education and Science that relate to civil science and the arts and (exercised through the University Grants Committee) the universities cover the whole of Great Britain, but her functions in connection with schools, further education and teachers relate to England and Wales only, except that responsibility for nursery, primary and secondary education in Wales is in the hands of the Secretary of State for Wales. Most of the work of the 520 H.M. Inspectors (who inspect schools and other educational establishments apart from universities, and provide the Secretary of State with information and advice) is in the local education authority areas. The Department of Education and Science does not run any schools or colleges, or engage any teachers, or prescribe textbooks or curricula, but it does set minimum standards of educational provision; control the rate, distribution, nature and cost of educational building; and control the training, supply and distribution of teachers. The Secretary of State's requirements under the Act are issued, and guidance is given, mainly in the form of regulations, orders and circulars addressed to local education authorities and other bodies, and in booklets. A report and six volumes of statistics are published annually.

Local Education Authorities

The educational service is a national service locally administered. Among its main features are:—

(a) Its administration is decentralized, the responsibility for providing state primary, secondary and further education (but not university education) to meet the needs of their areas being that of the 162 local education authorities (L.E.A.'s).

These elected councils appoint education committees consisting of some of their own members (a majority of the committee) and other people with experience in education and knowledge of the local education situation. The L.E.A.'s maintain schools and colleges and build new ones, employ teachers and provide equipment. Most of the public money spent on education is disbursed by the local authorities. Education is the largest item of their expenditure. L.E.A.'s are financed by rate support grants from the Department of the Environment and from the rates; and employ more than one million people, half of them teachers, whose salaries account for almost half of the national expenditure on education.

Voluntary Agencies

(b) Voluntary agencies play an important part in educational provision often in co-operation with the State. Some indication of its nature and extent is given below.

SCHOOLS AND PUPILS

Schooling is compulsory for all children between 5 and 16 years. No fees are charged in any publicly maintained school.

There are four main categories of school: (a) those maintained by local education authorities, the authorities meeting their expenditure partly from local rates and partly from grants made by the Department of the Environment; (b) *direct grant grammar schools* which have been assisted by grants from the Department of Education and Science (in 1975 the Secretary of State announced the government's intention to withdraw financial support from these schools by stages from 1976 unless, by the end of 1975 they indicated an intention to seek entry to the maintained sector); (c) *recognized independent schools*, i.e. independent schools which have sought and obtained recognition as efficient after inspection by H.M. Inspectors of Schools; (d) *other independent schools*.

County and Voluntary Schools

Maintained schools are of two types: (i) *county schools* (19,000) which are built, maintained and staffed by local education authorities. Their managers (primary schools) and governors (secondary schools) are appointed by the L.E.A.'s. (ii) *Voluntary schools* (8,600) which although built by voluntary bodies (mainly religious denominations) are maintained by an L.E.A. About two-thirds of the voluntary schools are Church of England schools and about 2,600 are Roman Catholic. Voluntary schools are of three kinds: controlled, aided, and special agreement. In *controlled* schools the L.E.A. nominates two-thirds of the managers or governors (the rest are nominated by the voluntary body), bears all costs and appoints the teachers.

In *aided* schools the managers or governors (two-thirds appointed by the voluntary interest and one-third by the L.E.A.) are responsible for repairs to the outside of the school building and for improvements and alterations to it though the Department of Education and Science may reimburse up to four-fifths of approved capital expenditure. The L.E.A. meets all running costs. The managers or governors control the appointment of teachers. *Special agreement* schools are those where the L.E.A. may, by special agreement, pay between one-half and three-quarters of the cost of building a new, or extending an existing, voluntary school, almost always a secondary school. Two-thirds of the governors are appointed by the voluntary body and the remainder by the L.E.A. Expenditure is normally apportioned between the authority and the voluntary body as for an aided school.

Direct Grant Schools

Direct grant grammar schools are being phased out starting from 1976. By the end of 1975, 51 of these schools had said they intended to seek entry to the maintained sector as comprehensive schools; others announced their intention of becoming independent.

Public Schools

By the term *public schools* is usually meant the independent schools in the membership of the Headmasters' Conference, the Governing Bodies Association or the Governing Bodies of Girls' Schools Association.

Independent schools charge fees and do not receive grants from the State. *Preparatory schools* are mainly for boys from about 8 to 13 years who wish to enter public schools. All independent schools are open to inspection and must register with the Department of Education and Science which lays down certain minimum standards and can make

schools remedy any unacceptable features of their building or instruction and exclude any unsuitable teacher or proprietor. To be designated "recognized as efficient", an independent school must satisfy the D.E.S. that its standards are broadly comparable with those of grant-aided schools.

The State System

Nursery Education is for children under 5 years who may attend a nursery school or a nursery class attached to a primary school. In the public sector there are some 580 nursery schools accommodating about 46,000 children two-thirds of whom attend part-time. In addition there are 270,000 boys and girls under compulsory school age who attend maintained primary schools full-time.

Primary Stage.—This begins at 5 years and the transfer to secondary school is generally made at 11 years. Over half the primary schools take 5 to 11-year olds; about a quarter are schools for infants (up to 7 years only); and most of the rest take juniors only (7 to 11 year olds). Most primary schools take both boys and girls. More than half have between 100 and 300 children each; most of the rest are smaller.

First Schools.—In some areas, first schools cater for ages from 5 to 8, 9 or 10; they are the first stage of a three-tier system.

Middle Schools.—Middle schools (which take children from first schools) cover the age-ranges 8 to 12, 9 to 12, 9 to 13, 10 to 13 or 10 to 14.

Secondary Stage.—Secondary Schools are for children aged 11 to 16 and over. The largest have over 2,000 pupils but more than half the schools take between 300 and 600 pupils. In January, 1974, when there were 3,550,598 full-time pupils in maintained secondary schools the main types were: (a) *comprehensive schools* (2,136,958 pupils), whose admission arrangements are without reference to ability or aptitude and cater for the secondary education of all pupils in an area; (b) *secondary modern schools* (856,749 pupils) providing mainly a general education with a practical bias, with an increasing number of pupils staying on after the school-leaving age; (c) *grammar schools* (411,195 pupils) providing an academic course from 11 to 16-18 years; and (d) *technical schools* (21,144 pupils) providing an integrated academic and technical course.

By 1976, 70% of the maintained secondary school population were in comprehensive schools. The policy of the Government is to develop a fully comprehensive system of secondary education and to end selection at eleven plus or at any other stage.

The *Further Stage* is treated separately below.

Primary and Secondary Schools

There was a slight drop in the number of full-time primary school-children in 1974. This was the first time that there has been a reduction in numbers since 1962 and reflects the continuous decline in the birthrate since 1964. But the number of full-time pupils in all schools—primary and secondary—rose by 370,000, 250,000 of this increase being due to the raising of the school-leaving age.

In January 1974, there were 33,100 schools, of which 30,365 were maintained by local education authorities, 302 were direct grant schools, 1,379 were independent schools recognized as efficient, and 1,054 were other independent schools. There were at school in 1974, 9,560,015 children (4,907,014 boys and 4,653,001 girls) of whom 9,009,988 were in maintained schools, 130,880 in direct grant schools, 324,326 in recognized independent schools and 94,821 in other independent schools. Of those in maintained schools, 4,971,994 were in primary,

347,697 in middle, and 3,550,598 in secondary schools and the rest in nursery (15,431) or special (122,990) schools including hospital or immigrant centres (2,278). Almost all maintained primary schools, and about 70 per cent. of the maintained secondary schools, are for both boys and girls. At secondary level most recognized independent schools are for boys only or girls only.

Class sizes.—Between January 1973 and January 1974 the pupil/teacher ratio in primary schools dropped from 25.5:1 to 24.9:1, but in secondary schools, it rose from 17.0:1 to 17.3:1. In primary schools the average size of class as registered dropped from 30.8 to 30.3 while in secondary schools the average size of class as taught rose from 22.3 to 22.7.

School Meals.—L.E.A.'s must provide school dinners to all maintained school pupils who require them. In October 1975, 5,552,000 or 70.3 per cent. of pupils at maintained schools took the school dinner; 13.1 per cent. of the dinners were free of charge. Free school milk is available to pupils in special schools, children in other maintained schools up to the end of the summer term after they become seven, and other junior children for whom it is recommended on health grounds by a school medical officer.

Work Experience.—Many schools provide opportunities for pupils in their later secondary years to see something of the work and other activities of their neighbouring communities, as part of their curriculum. In recent years there has been a marked growth in the provision of "work experience" schemes which involve the participation of pupils in the work of industrial, commercial and other firms.

Educational Disadvantage. As part of a policy of special educational help to children suffering from particular social difficulties, including immigrants, the Government in 1974 established an Educational Disadvantage Unit and a related non-government advisory committee. Both work in co-operation with an Assessment of Performance Unit with the wider brief of finding out why some children of all ranges of ability fall below their potential. In addition a government grant of about £1 million has been allocated to promote measures to reduce adult illiteracy.

Examinations.—Secondary school pupils (and others) can take the General Certificate of Education (G.C.E.) or the Certificate of Secondary Education (C.S.E.). The examinations for the G.C.E., which are conducted by eight examining bodies (most connected with universities) are set at two levels: Ordinary level ("O") and Advanced level ("A"). "A" level is usually taken after two years in the sixth form following "O" level, which is normally taken at 16 years (earlier only if the head teacher agrees). The G.C.E. is not a "grouped subject" examination and candidates at either level may take one or more subjects as they wish. At "A" level passes are awarded in five grades. "A" level candidates may take Special papers which are usually set on the same syllabus as the basic "A" level papers but contain more searching questions.

Under a new grading system for "O" level, attainment in an "O" level subject is indicated by a grade A, B, C, D or E of which grade A is the highest and grade E the lowest. Candidates awarded grade A, B or C have reached the standard of the former subject pass at "O" level. Grades D and E indicate lower levels of attainment.

Like the G.C.E. the Certificate of Secondary Education (C.S.E.) can be taken in one or more subjects. It is open to boys and girls in any school completing five years of secondary education, and is meant for pupils of about 16 years who are

around the average in terms of ability for their age groups. Five grades are awarded. The C.S.E. can be examined in a number of ways, internal and external, and is controlled largely by serving teachers sitting on the 14 regional examining boards. More than a quarter of a million candidates take the C.S.E. examinations each summer.

Co-ordinating the work of the G.C.E. and C.S.E. examining boards, and advising them, is the *Schools Council for the Curriculum and Examinations* which was established in 1964 by the Secretary of State for Education and Science as an independent advisory body financially supported by the D.E.S. and the L.E.A.'s and representing all educational interests with teachers forming a majority of its members. The Council is particularly concerned with promoting and encouraging curriculum study and development. It carries out research and development work on curricula, teaching methods and examinations in primary and secondary schools. It is also concerned *inter alia* with maintaining comparability of standards between boards and also between the two examinations (grade 1 in the C.S.E. is intended to indicate a standard such that a candidate achieving it might reasonably have been expected to obtain a pass at "O" level in the G.C.E. had he followed a course leading to that examination).

School-leavers. There were (provisional figure) 692,000 school-leavers in 1975, 10,000 more than in 1974. In 1974-75, for the first time, just over 80 per cent of school-leavers achieved some graded examination results. The increase came mainly at junior levels of attainment with nearly 400,000 leavers gaining one to four "O" levels or C.S.E. grades. Leavers gaining one or more "A" level passes in the G.C.E. numbered 106,000, 1,000 more than the previous year. Over a period of five years, about one in five leavers has continued direct to full-time further or higher education.

TEACHERS

Although it is the duty of each Local Education Authority to ensure that there is efficient education to meet the needs of the local population, what is taught in the schools is normally decided on their behalf by the head teachers of schools.

Teachers are appointed by local education authorities, school governing bodies or managers. Those in maintained schools must (except student teachers and instructors) be approved as "qualified" by the Department of Education and Science. Most teachers become qualified by successfully completing a course at a college of education or at a university department of education.

In Transition. Colleges of education are in a transitional period. The profession is moving towards an all-graduate entry and some of the colleges are extending their work beyond teacher training into other forms of higher education. Some are amalgamating with other institutions and still others will close. Under present plans, 18 colleges are expected to close by 1981 and four to amalgamate with universities. There would then be some 25 education departments in polytechnics, 40 institutions combining teacher and further education, and 30 colleges engaged almost wholly in teacher training, a reduction from 163 establishments to about 100. The 1977 intake to initial teacher training will be limited to 12,000 non-graduate students and 10,000 postgraduate students.

In the next ten years or so the number of newly trained teachers required to meet the needs of the schools will decline substantially because of the expected drop in pupil numbers. This expected fall in school population could, in the long term,

allow continued improvement in the pupil-teacher ratio (about 20 to one) without further expansion of the teacher force.

There are, however, still shortages of graduate teachers in certain subjects—in particular, in mathematics, the physical sciences, handicrafts, French, German, and business studies.

An *Advisory Committee on the Supply and Training of Teachers* was set up in 1973 to advise the Secretary of State on the supply and training of teachers for maintained schools and establishments of further education. It met seven times in 1975.

Training to be Teachers. In autumn 1975, the estimated number of students in courses of initial teacher training (excluding universities) was 100,198 compared with 106,295 a year earlier. Estimated admissions to full-time courses of initial teacher training in 1975 (1974 figures in brackets) were: non-graduate entrants to colleges and departments of education: 28,138 (31,666); colleges of education (technical): 1,620 (1,526); art teacher training centres: 788 (667); graduates taking one-year course of professional training in university departments of education: 4,989 (4,670); graduates taking one-year course of professional training in colleges or departments of education: 5,638 (4,800).

The non-graduate intake in 1976 to initial training is being reduced to 20,000 compared with 30,000 in 1975.

Training Institutions. Teachers are trained in institutions of various types. In October 1973, there were 121 colleges maintained by local education authorities and 52 by voluntary bodies, and 33 departments of universities. These included 30 university departments of education providing mainly one-year courses for graduates; 152 colleges of education providing mainly three- and four-year courses; 7 departments of education in polytechnics, which also offered mainly three- and four-year courses; 13 art teacher training centres offering one-year specialist courses; and 4 colleges of education (technical) providing one-year and four-term specialist courses and initial training courses for serving teachers.

Serving Teachers. There were 508,516 full-time teachers in maintained schools and colleges in January 1975 compared with 488,993 a year earlier and 463,948 in January 1973.

The 508,516 full-time teachers were employed thus:—in secondary schools 212,866; primary schools 202,130; miscellaneous primary and secondary schools 4,427; further education 64,541; special schools 14,967; colleges of education 7,173; nursery schools 1,519; others 890.

Salaries. There are national salary scales for teachers in schools and other educational institutions maintained from public funds. There is a superannuation scheme administered by the Department of Education and Science.

HIGHER EDUCATION

"Higher Education" consists of the education provided by universities, polytechnics, colleges of education and in the advanced courses offered by colleges of further education. For details, see under "Universities", "Teachers" and "Further Education".

FURTHER EDUCATION

The term "Further Education" usually means all post-school education except that provided by universities.

Local Education Authorities are responsible for providing full-time and part-time courses of post-secondary education (other than university education) in their areas. There are ten Regional Advisory Councils which co-ordinate further education in

their regions and nominate a majority of the members of the National Advisory Council on Education for Industry and Commerce which advises the Secretary of State for Education and Science on national educational policy relating to industry and commerce.

The 7,523 further education establishments (November 1973 enrolment: 3,534,370 students, more than half of them women) other than the colleges of education, may be grouped in the following main categories of which all, except the last, are grant-aided:—

1. *Polytechnics*.—Thirty major centres in which a wide range of full-time, sandwich and part-time courses are provided for students at all levels of higher education, and entirely or almost entirely for those of 18 years or more. They have governing bodies with a large measure of autonomy and are mainly teaching institutions though provision is made for certain research where it is essential to the proper fulfilment of teaching functions and the maintenance of close links with industry. They complement the universities and colleges of education. By November 1973 there were 156,704 students (23% of them women) enrolled in polytechnics, 116,496 of them taking advanced courses.

2. *Other Maintained and Assisted Major Establishments* (566).—Including all major establishments, other than polytechnics, maintained or assisted by local education authorities and providing courses in art, agricultural, commercial, technical and other subjects. 1,626,528 students.

3. *Direct-Grant Establishments* (16) which receive financial aid direct from the D.E.S. 4,407 students.

4. *Evening Institutes* (6,812) offering a wide range of courses, many of them recreational, for evening students, and often housed in premises used by day for other educational purposes.—1,730,059 students.

5. *Independent Establishments* which may apply to the Department of Education and Science for recognition as efficient; in 1973 there were 99 such recognized establishments with 16,672 students.

For Colleges of Education, see under "Teachers" above.

The number of students taking advanced courses in 1973 (full-time, part-time, sandwich, or evening only) leading to recognized qualifications at grant-aided establishments was 208,320 of whom 20 per cent were women. Of the 208,320, 66,490 were on full-time courses, 33,570 were sandwich course students, 72,600 were taking part-time day courses and 35,660 were attending evening only classes. 8,580 of the total were working for a university first degree, 37,220 for a C.N.A.A. first degree (see below), 2,440 for a university or a C.N.A.A. higher degree, and 52,790 for an H.N.D. or H.N.C. qualification.

In 1973 there was set up a *Technician Education Council* to develop a unified national system of courses for technicians in England, Wales and Northern Ireland; and in 1974 the *Business Education Council* which is concerned with the development of policies for a uniform national system of courses, in further and higher education, for people in business and commerce.

An important body with few, if any, parallels in other countries is the *Council for National Academic Awards* (C.N.A.A.) which awards degrees to students taking courses approved by it in non-university institutions. Following a recommendation of the Robbins Committee it was established by Royal Charter in 1964 as an autonomous body. More than 100 colleges in Britain conduct courses leading to its degrees: B.A., B.Ed., B.Sc., and the higher degrees of M.A. and M.Sc. (for post-graduate course work) and M.Phil. and Ph.D. (for re-

search which may be undertaken jointly in industry and college). In 1975–76, 77,548 students were working for C.N.A.A. qualifications. Of these, 72,627 (44,687 full-time, 23,291 sandwich and 4,649 part-time) were studying for first degrees in: science and technology 30,422; arts and social studies 25,712; art and design 10,699; education 4,725; and modular courses 1,069. Of the 77,548, 1,451 were working for an M.A. or M.Sc. and 2,122 for a research degree (M. Phil. or Ph.D.).

The new *Diploma of Higher Education* (Dip.H.E.) is a two-year diploma intended to serve as either a terminal qualification or as a stepping stone to a degree or other further study; it has a normal entry requirement of two "A" levels. The Dip. H.E. is awarded by either the Council for National Academic Awards (see above) or by a university. Courses leading to it are offered by nearly 40 polytechnics and colleges. At present the emphasis in most Dip. H.E. courses is on the humanities and social sciences but many colleges offer scientific options.

Adult Education.—"Adult Education" is generally taken to mean courses of post-school education outside the main areas of higher, professional and technical education. A wide variety of such courses for the education and recreation of adults is provided by local education authorities, the Workers' Educational Association and other voluntary bodies, the extra-mural departments of universities and certain residential colleges. In 1974 nearly 3 million people registered for these courses.

The Youth Service.—Provides for the spare-time activities of young people. The Local Education Authorities co-operate with voluntary bodies in their areas and may maintain their own youth clubs. There are various national voluntary youth organizations which receive grants from the Department of Education and Science. There are about 3,000 full-time youth leaders on the Department's register. In addition there are many thousands of part-time paid and unpaid workers.

A *Further Education Information Service* is provided each summer by the local education authorities in cooperation with the polytechnics and other colleges offering full-time degree and higher national diploma courses, and the Department of Education and Science. Its purpose is to provide up-to-date information and advice about full-time degree, H.N.D. and Dip.H.E. courses in the colleges for those who find themselves, late in the summer, without a place on a course. A list of local advisory officers is available from the D.E.S.

SCOTLAND

The educational system of Scotland has developed independently of that of England and has a number of distinctive features. The general supervision of the national system of education, except for the universities, is the responsibility of the Secretary of State for Scotland acting through the Scottish Education Department. The duty of providing education locally rests with the nine regional councils and three island councils. Educational facilities of various kinds are also provided by the governing bodies of grant-aided schools, independent schools, "central institutions", and national voluntary organizations in the field of informal further education.

Schools in Scotland fall into three main categories, viz. *education authority schools* which are managed by education authorities and financed partly from local rates and partly from rate support grant; *grant-aided schools*, conducted by voluntary managers who receive grants direct from the department; and *independent schools* which receive no direct grant, but which are subject to inspection and registration.

As at January 1974 there were 3,541 education authority and grant-aided schools and departments of which 301 were nursery, 2,524 primary, 478 secondary and 174 special, together with 64 occupational centres catering for the most severely mentally handicapped. There were also 105 registered independent schools. The total number of pupils in education authority and grant-aided schools and departments (including special) was 1,060,439 (541,807 boys, 518,632 girls) of which 19,832 (10,152 boys, 9,680 girls) received nursery education.

Schooling normally starts at the age of 5, and the primary school course lasts for 7 years. Primary schools usually take both boys and girls. Pupils transfer from the primary course to secondary courses about the age of 12.

Over 98 per cent of secondary pupils in education authority schools attend schools with a comprehensive intake to the first year. The majority of these schools provide a full range of courses appropriate to all levels of ability from first to sixth year, although a decreasing number offer only 2- and 4-year courses, on completion of which children may continue their secondary education at the nearest 6-year comprehensive. There are also a few schools which are selective in that they admit only the less able pupils and which offer only non-certificate courses or courses leading to the Ordinary grade in the Scottish Certificate of Education examinations. Pupils from these schools wishing to continue their education to the Higher grade of the S.C.E. may also transfer to the fifth and sixth year local comprehensive.

The Scottish Certificate of Education examination is conducted by the S.C.E. Examination Board. Pupils may attempt as many of a wide range of subjects as they are capable of, on either the Ordinary grade which corresponds to the Ordinary level of the General Certificate of Education, or on the Higher grade which is normally taken a year earlier than the G.C.E. Advanced level and is therefore not of so high a standard. The Board grants a Certificate of Sixth Year Studies designed to give direction and purpose to sixth-year work by encouraging pupils who have completed their main subjects at Higher grade to study a particular subject in depth.

Further Education.—Facilities for further education are provided by 14 Central Institutions (grant-aided colleges administered by independent Boards of Governors) and by 69 further education day centres managed by education authorities. The Central Institutions provide mainly advanced courses in science and technology, commerce, art, music, domestic science, and other subjects, leading to their own diplomas, to professional qualifications or, in certain cases, to C.N.A.A. degrees.

The further education centres normally provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects, but a few offer courses of degree level. Courses are offered in a wide variety of subjects but to make the most economic use of resources, provision of certain courses is made on a regional or even a national basis.

Teachers.—All teachers in permanent posts in public or grant-aided schools in Scotland are required to be registered with the General Teaching Council for Scotland (which is independent of the Scottish Education Department) and normally to hold a teaching qualification awarded by a Scottish college of education. There are ten of these colleges, seven of which provide both one- and three-year courses leading to a Teaching Qualification (Primary Education) or a Teaching Qualification (Secondary Education). Of the remaining

three colleges, one is a residential college of physical education for women and the other two provide only courses leading to a Teaching Qualification (Primary Education). Nine of the colleges, in conjunction with local universities or the Council for National Academic Awards, also provide four-year combined courses leading to the degree of B.Ed.

The basic scales of teachers' salaries are for primary and secondary levels, with additional payments for qualifications and for posts of special responsibility.

NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly comparable to that in Great Britain. Under the 1947 Act (and later amendments) primary education is provided for children up to about 11½ years of age when they are transferred to secondary school. The main types of secondary school are: grammar and secondary (intermediate). Selection for secondary education is based on verbal reasoning tests at eleven-plus combined with teachers' assessments of performance in school subjects. Fees are charged at grammar schools but qualified pupils there receive scholarships from their local education authority.

In January 1975 there were 26 nursery schools with 1,192 pupils and 39 full-time teachers; 1,123 primary schools with 212,510 pupils and 7,908 full-time teachers; 261 secondary schools with 154,322 pupils and 8,683 full-time teachers; 27 special schools with 2,349 pupils and 239 full-time teachers.

In 1974-75, 36,902 students were enrolled in institutions of further education; of these 4,390 were taking advanced courses, 12,190 were full-time, 11,765 were on day-release, 739 were on block release, and 12,208 were other part-time. The training of teachers is carried out in 5 colleges, and in the department of education of the Queen's University of Belfast and the education centre of the New University of Ulster.

Expenditure from public funds on education in Northern Ireland during 1973-74 was £121,231,000.

UNIVERSITIES

There are 44 universities in the United Kingdom (see pp. 501-10). Of these, 33 are in England, eight in Scotland, two in Northern Ireland and one (a federal institution) in Wales. In addition, there is the "Open University" which provides courses leading to degrees by a combination of television, radio, correspondence, tutorials, short residential courses and local audio-visual centres. The Open University offers undergraduate (no qualifications needed for entry), post-experience and post-graduate courses. It is grant-aided directly by the Department of Education and Science and does not come within the University Grants Committee system. More than 5,000 students graduate each year from the Open University.

A University College at Buckingham, the nucleus of an Independent University, admitted its first students in February 1976; it provides a two-year course leading to a Licence and its tuition fees were £1,500 for its first year (which consisted of 4 terms of 10 weeks each).

In December 1973 there were 251,226 full-time students enrolled at universities in the United Kingdom; of these, 80,396 were women, and 24,880 from overseas. For postgraduate students. The number of new undergraduate entrants (full-time) in 1972-73 was 68,998; the corresponding figures for 1958-59 and 1965-66 were 29,054 and 52,446. The full-time total of 251,226 in 1973-74 compares with just over 50,000 in 1938-39. In 1971-72, 52,477 first degrees (including

honours degrees) and 13,085 higher degrees were awarded by universities. In 1973-74 there were 37,069 full-time teaching and research staff in U.K. universities; 3,944 of them were professors, 7,408 readers or senior lecturers, 23,549 lecturers or assistant lecturers.

By October 1975 the full-time student population had risen to about 263,200.

In 1975 the new Universities' Superannuation Scheme (U.S.S.) was introduced. It provides for retirement benefits based on terminal salary.

Students applying for admission to a first degree course at a university do so through the Universities Central Council on Admissions (U.C.C.A.) which was set up by the universities in 1961 on the initiative of the Committee of Vice-Chancellors and Principals. All universities participate fully in the U.C.C.A. Scheme except certain Scottish universities. The U.C.C.A. office is in Cheltenham.

The requirements for entry to first degree courses may vary somewhat from one university to another but the universities publish co-operatively an annual Compendium which describes these requirements in detail.

Students who are normally resident in Britain, have certain minimum qualifications and have been admitted to a university in the United Kingdom are entitled to an award from public funds; the amount varies according to the financial circumstances of the students and their parents. Tuition fees for first degree courses in 1977-78 will be £650.

In 1973-74 the total income of universities in the U.K. was £598,606,000 of which £468,337,000 was recurrent income. The largest items of recurrent income were £349,734,000 of recurrent exchequer grant, £52,626,000 of research grants and £23,437,000 of fees income. Payments for

buildings and other non-recurrent grant were £51,536,000 and the furniture and equipment grant was £38,926,000.

The University Grants Committee advises the Secretary of State for Education and Science on university matters. Most of its members are academics or businessmen.

Although the universities have freedom in academic matters, the Government, through the U.G.C., determines the total size of the university student population, strongly influences its distribution between arts, science, medicine, etc., and determines the part which the university sector plays in the whole higher education system.

The Comptroller and Auditor General has access to the books and records of the U.G.C. and of the universities.

SCHOOLS COUNCIL FOR CURRICULUM AND EXAMINATIONS 160 Great Portland Street, W.1

Established in 1964, the Schools Council is an independent body representing all sections of the education service in England and Wales—with a majority of teacher members on its main committees. It undertakes research and development in the curriculum and keeps under review teaching methods and examinations in schools, including aspects of school organization in so far as they affect the curriculum.

The Schools Council is jointly financed by the Department of Education and Science and local education authorities.

Chairman, Sir Alex Smith.

Joint Secretaries, V. H. Stevens; J. G. Raitt; P. M. Dines.

THE STOCK EXCHANGE IN THE UNITED KINGDOM AND IRELAND

THE STOCK EXCHANGE

Broker Members of the Stock Exchange buy and sell shares for members of the public. This is done for individual investors, for their advisers such as bank managers, solicitors and accountants, and for investing institutions like insurance companies, pension funds, unit trusts and merchant banks. For this the stockbroker is paid a fixed scale of commission based on the value of the securities. In addition to this service, brokers advise their clients, according to their particular circumstances and needs, on how to invest their money to greatest advantage. In addition, they will undertake to review periodically the portfolios of their clients.

The Stock Exchange provides facilities for raising capital for industry. Any Broker will give advice on how a company can finance its growth by getting a listing. For companies already listed, other methods are possible—such as rights issues and debenture or loan stocks—for obtaining additional funds. Brokers' advice is also available to industrialists on matters such as mergers and acquisitions.

All listed British companies are incorporated under the Companies' Acts, which contain stringent regulations for their management and control. They are limited liability companies, which means that if you are a shareholder in such a company you cannot be called upon to pay any part of its debt or liabilities if it gets into difficulties, unless, in quite exceptional cases, you are a holder of partly-paid shares, in which event your liability is limited to the amount required to make the shares fully paid. The Stock Exchange serves investors, whether inexperienced or expert, big or small, and the authorities of the Stock Exchange insist on compliance with stringent regulations to ensure that the

public are fully informed of the constitution and record of every company whose securities are admitted to the market.

In London the foundation stone of the building was laid in 1801, but the building was almost entirely reconstructed in 1854 from the designs of Thomas Allason. The Stock Exchange has now been rebuilt as a large tower block, 331 feet high with a new Trading Floor to the west of the block.

There are other Trading Floors in Liverpool, Manchester, Birmingham, Glasgow, Belfast and Dublin.

The Stock Exchange provides a market for the purchase and sale of about 9,000 securities valued at over £250,000,000,000, and also securities listed on overseas Exchanges. At present, the Members of the Stock Exchange, consisting of Brokers (agents for clients) and jobbers (dealers as principals in specific securities), number about 4,100. Visitor's Gallery in London is open between 10 a.m. and 3.15 p.m. from Monday to Friday. Admission free and without ticket. Film show.

The Stock Exchange

Chairman, N. P. Goodison; *Deputy Chairmen*, J. W. Robertson; F. T. Powell, M.B.E.; G. R. Simpson, D.S.O., T.D.; *Chief Exec.*, R. Fell, C.B.E.
Administrative Units

The Stock Exchange, London, E.C.2; the Stock Exchange, Margaret Street, Birmingham; the Stock Exchange, Norfolk Street, Manchester; the Stock Exchange, 69 St. George's Place, Glasgow; the Stock Exchange, 28 Anglesea Street, Dublin 2; the Stock Exchange, Northern Bank House, 10 High Street, Belfast; the Stock Exchange, Melrose House, 3 St. Sampson's Square, York.

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology or Medicine; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Sciences: (a) Physics—(b) Chemistry; the Royal Caroline Institute, Stockholm—(c) Physiology or Medicine; the Swedish Academy—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of five members and three deputy members. The Swedish Government appoints a chairman and a deputy chairman, the remaining members being appointed by the awarding authorities.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentina; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia; (ff) Yugoslavia; (gg) Greece; (hh) Israel; (ii) Guatemala. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901-1964, see earlier editions of WHITAKER'S ALMANACK.

In 1969 a Nobel Prize for Economic Sciences was instituted. Prize-winners have been: 1969, J. Tinbergen (h) and R. Frisch (x); 1970, P. A. Samuelson (b); 1971, S. Kuznets (b); 1972, Sir John Hicks (a) and K. J. Arrow (b); 1973, W. Leontief (b); 1974, F. von Hayek (x) and G. Myrdal (d); 1975, Prof. L. V. Kantorovich (f) and Prof. T. C. Koopmans (b).

BRITISH ARCHITECTURE OF 1975-76

EDDINGTON STREET CHILDREN'S
DAY CENTRE, LONDON, N.4

The site for the children's day centre lies behind a group of shops on the south side of Tollington Park. Originally it was intended that the single storey building, within an open space, should be built as part of a new housing scheme, but the council subsequently decided to rehabilitate the existing properties.

The architects' brief required a 60 place nursery to Department of Health and Social Security standards with six group rooms for eight or nine children and two babies rooms for five children each; with adjacent lavatories and lockers, laundry room and kitchen.

The day centre is located near the northern corner of the site to provide a maximum open area to be seen from the group rooms. These group rooms are ranged along the southern and eastern side of the plan with staff rooms and a kitchen to the north. The babies rooms are separated from the other group rooms by the main entrance, to reduce the chance of disturbance by the older children. The walled garden area for the babies is separated for the same reason. Parents arriving with their prams reach the shelter of the roof canopy and can either take their pram to the store and then directly in to the babies room, or in through the main entrance to see the matron. The flooring in the central lavatory/nursing area is of washable vinyl tiles, whereas the play area is carpeted.

The group rooms are arranged in pairs with integral coat hanging and lavatory area, bed and toy stores. A sliding door links the paired rooms to ease supervision and to provide one large room when required. These doors have been introduced to reduce the risk of accidents and to make maximum use of the space available. Children therefore have direct access to a sheltered outside play area while being supervised by their own nursery nurse. The door to the coat hanging area has been glazed to allow the children a sight of their coats, providing security by suggesting to them that they will be collected at the end of the day. The children have an after lunch sleep in their group rooms on camp beds which are kept in the adjoining store.

The outdoor play area has been subdivided by shrubs and trees to allow different activities to take place simultaneously, without fear of disturbance to one another. Instead of the various parts of the building being linked on a corridor system, a central play area has been created. This is the focal point where parents, children and staff meet.

To overcome the disadvantage of the northern location of the staff accommodation, high level windows pierce the partition to the central play area and allow sunlight into the matron's and staff rooms, cloakroom, laundry and kitchen. In addition, the matron's and staff rooms have windows opening on to the courtyard garden. The kitchen in the northern corner of the layout has direct access from the service area and parking space. It is equipped for the preparation of all meals, including a special milk preparation area for the babies. The children eat their meals in the group rooms.

It is rarely easy to achieve satisfactory massing for a single storey building but in this instance the pitched roof, deeply overhanging eaves and large areas of glazing have given the centre a clear form and a strong identity. Window sills are low to be at a suitable height for the children to see out. The underside of the roof is stained bright red and the rafters and ties dark brown; with the clerestory lights above the external walls the roof takes on the character of an all-enveloping tent.

There can be little doubt that the building is most successful. It is clearly enjoyed by the children, who find it a resource which they can explore and use with pleasure, and is equally appreciated by the staff, who can develop their relationships with the children in congenial surroundings. The building is highly practical, and the strong visual stimulus that it provides seems valuable for the children and staff. The detailing is robust, straightforward and entirely in keeping with the character of a building which will clearly be required to take on much of the imprint of personality of those who use it.

The jury who awarded the 1976 Royal Institute of British Architects Award for the London Area to the architects of the day centre, Darbourne and Darke, was most impressed with this small scheme, on the design of which, much thought, care and skill had been exercised. They state in their report that, "It had clearly been designed for its principal users, the children, and the architects had succeeded in producing a building which not only satisfied the needs of the adult supervisors but was giving much pleasure to the young children. ... With an economy of means they had produced a building which should improve with age rather than deteriorate."

HOUSING, POTTERNEWTON GARDENS,
LEEDS

This housing development stands on a site in North Leeds formerly occupied by a disused laundry and some old back to back houses. The site is surrounded on four sides by existing roads and is situated in the centre of a densely populated urban area consisting of two and three storey domestic property of all types and ages.

The site was planned with the objectives of providing a high density development with low rise house types, using low occupancy dwellings to redress the balance in the area, and using new designs of patio type dwellings produced by Yorkshire Development Group as additions to their existing range of houses. The scheme retains the surrounding existing streets for vehicular access, but pedestrian areas have been created in the centre of the development with seats in sheltered positions where people can meet and talk. The character of these areas is clean and severe with hard surfaces of smooth buff brick and concrete paving slabs relieved at carefully selected points with restrained planting using low shrubs, creepers and the occasional specimen tree.

Integral with the plan of each dwelling is an outdoor space which is sited and screened to give a small private garden where young children can play in safety and the occupants can sit in complete seclusion. Some rooms in each dwelling have been designed to overlook this outdoor space, thus ensuring privacy for these rooms and effectively preventing a feeling of overcrowding and being overlooked on this densely developed site.

All dwellings are of traditional construction with smooth buff brick walls, timber window frames and a pitched roof covered with concrete slates. The heating is by low pressure hot water radiators supplied by gas boilers. The twenty-eight dwellings include five bungalows, four ground floor flats, four first floor flats and fifteen houses.

The scheme was designed by the Director of Architecture and Landscape, Leeds City Council. The development was given the 1976 Architecture Award for the Yorkshire Region. "The careful solution to the problem of infill housing, with three dimensional effect of hanging gardens, walled

patios, hard landscaping with accent planting" the judges stated, added up "to a considerable achievement." It was felt that the scheme demonstrated a "socially and environmentally acceptable development which answers the adverse criticism of the high-rise residential buildings."

CIGARETTE FACTORY, BRISTOL

This industrial complex consists of two main buildings, an office building and a low spreading factory. The buildings stand on a prominent undulating 56 acre site south of the city centre, adjacent to a bypass, which provides the principal access. There are hills in the distance and the surroundings are built up with suburban housing. As the impact of the project on the adjoining residential community would be considerable, landscaping assumed exceptional significance. The architects' response has been to exploit the character of the site by damming a small stream to form a lake, providing the main entrance *via* an underpass and planting over one thousand semi-mature trees.

The plan of the factory clearly indicates the manufacturing process being carried out. Tobacco is delivered into a bonded store from where it is taken into the "Primary" area for preparation and blending. From here the tobacco is transferred to stores which are provided with exact environmental conditions controlled by computer. The next stage in the production is the "Secondary" process, which involves the making and packing of up to 2,500 cigarettes per minute, giving a total output of 380-400 million cigarettes per week. The final stage is the transfer of cigarettes into the warehouse ready for dispatch.

The concept of the factory to house this process is a single level manufacturing floor. The central area is occupied by the "Secondary" operation in a "great" production room uninterrupted by columns. It is marked externally by nine large "Warren" trusses of bridge-building scale. The "Primary" area is on one side of this vast room and the warehouse is on the other, both separated from it by two storey high spines containing offices, lavatories, tea bays and other ancillary accommodation. The tobacco stores are in the basement between the two main production areas. The basement also contains services which supply the machines above. A power house containing four gas-fired boilers is located to the north west of the factory building.

The clients' head offices are sited to the south west and linked to the factory by a subway. The office building sitting astride the artificial lake is made up of an "L" shaped podium of two storeys containing a restaurant, with a five storey tower block rising above it.

The factory building is basically a single storey steel structure sitting on a concrete podium which contains the basement service zone, tobacco stores and car parking. Externally all the steelwork is in "Cor-ten" steel which undergoes limited oxidizing process during its first two or three years, i.e., rusting, giving it a deep red-brown colour. Infill panels between stanchions are in "earth" colour ribbed metal sheeting. The office tower is finished in a similar manner with exposed steelwork but infilled with bronze tinted glazing, the podium being clad in precast concrete panels.

The interiors of the office block are simply treated, with brown-beige carpet and near white walls. Colour is provided by the furnishings and art work. The theme is followed through in the factory area with beige painted walls and light beige floor tiles.

The building is considered by many to be the most ambitious "Cor-ten" building in England.

The Chicago architects Skidmore, Owings and Merrill, in conjunction with the London architects Yorke, Rosenberg, Mardell, have developed a cool, underplayed architecture based on a clear structure and on careful detailing which won them the 1976 RIBA Award for the South West Region.

CEFNDY HOSTEL, RHYL, WALES

This scheme which won the 1976 Royal Institute of British Architects Award for Wales provides residential accommodation for 24 mentally handicapped adults. The buildings house three home units accommodating eight people in each on both a permanent and semi-permanent basis. The lounge and recreation rooms are shared with a central kitchen serving the living/dining rooms with accommodation included for resident staff.

The design philosophy was to create a domestic and non-institutional character with small scale units using familiar domestic materials. The design of the workshop closely follows that of the Home.

Honey coloured facing brickwork and brown concrete tile roofs, with low eaves lines and exposed stained timber, have been used, with traditional constructional methods. Earth moulding and generous shrub and tree planting have been employed about the building to develop the domestic idiom, and to serve as foils to the man-made form.

The Hostel, which was designed by the Bowen, Dann, Davies Partnership in association with the Clwyd County Architect was praised by the RIBA jury: "using a traditional vocabulary of brown brickwork and single pitch tiled roofs together with stained timber creates an environment of great unity.... On a site otherwise featureless the imaginative landscaping, both soft and hard, combines to make this an outstanding scheme."

HOUSING, PERSHORE, WORCESTERSHIRE

Architectural romanticism is not at all what it was thought to be at the beginning of the Modern Movement. It is not a casual, inappropriate taste lightly worn, but is to be thought of as a serious return to an older wisdom which the march of modern life has inadvertently trampled underfoot. Behind its charming and whimsical form is an iron will powered by a strong and perceptive intellect.

The rustic idyll at Pershore, which won for the architects, Darbourne and Darke, a 1976 RIBA Award, is a fine example of modern romanticism.

The redevelopment area of about 6.22 acres is near the historic centre of the town, and is to provide housing (70 per cent. family dwellings) with provision for both local Authority and private sale. 150 per cent. car spaces per dwelling were required along with a high degree of safety for pedestrians.

It was decided that the existing character of the town should be retained, deriving architectural scale and materials for the new buildings from the old. Dwellings were designed to allow the maximum possible flexibility of use, from a basic plan providing a good sized second living room in addition to a kitchen which can act as a dining room. There are also two person dwellings suitable for older people, which retain as far as possible a "house" quality with a small garden. There is an unusual variety of house and flat types and the architects have eschewed the more usual (and easy) practice of lumping like with like—the elderly together, the flats together—and have jumbled them up. This has the advantage of giving the semblance of a "real" piece of town: a locality which has grown over a period as a result of diverse pressures, not one which has been dumped down all at one time.

The jury of the RIBA found "the development delightful, full of character and appropriate."

"The layout is sensitive, the retention of mature trees and the varying roof line, the type of railings, footpath and road surfaces all contribute to achieving a specific atmosphere of homeliness. The architects have shown great skill in relating the character of the new development to that of Pershore. There is consistency of character, materials and detailing and the whole should mature gracefully."

WINE AND SPIRIT STORE, BURY ST. EDMUNDS

The architects' brief was to design a building of approximately 4,000 square metres to house a centralized storage and distribution unit for wines and spirits, close to the clients' main offices and brewery in Bury St. Edmunds. The warehouse was to replace a number of existing cellars dispersed about East Anglia.

The site selected was a southward facing slope of disused allotments adjoining the clients' main offices. The clients' need for possible future expansion and the local river authority's requirement that no part of the building should be within the 1968 flood plane restricted the building to the north east corner of the site. This siting necessitated considerable earth moving and the construction of retaining walls. To minimize the effect which such a large building would have on adjacent housing and the backcloth of traditional buildings, the lowest possible ground floor level was chosen, an extensive perimeter planting scheme was incorporated and a muted colour scheme of dark brown cladding and framing adopted.

The structure for the building comprises an exposed steel frame of columns and beams with exposed diagonal tubular steel braces supporting a felt covered metal deck roof. The building is clad between the columns with a double skin of profiled sheet steel, P.V.C. coated externally and galvanized internally, with a central layer of fibreglass insulation. A matching P.V.C. coated curtain walling system is used for the associated offices. Heating and ventilation are by means of high level oil-fired heaters and fresh air intakes with localized roof extractors. With the exception of the office area it is artificially lit throughout by means of fluorescent light fittings. Fire protection is provided by smoke vents and fire compartment doors activated by gas and heat detectors.

The building, which was designed by Lyster, Grillet and Harding, was given a Structural Steel Design Award. The judge commented: "large warehouses on backland sites are often crude eyesores. This building is outstanding with sophisticated and simple steelwork. Its excellent proportions and subtle colouring reduce its apparent bulk and enhance its setting."

AGNEW HOUSE, CAMBRIDGE

Agnew House is the first stage in the up-grading and extension of the Evelyn Nursing Home, Cambridge. The new building is a hostel for nurses which replaces a converted Victorian house.

The Home is situated off the Trumpington Road within a mile of the city centre of Cambridge and stands in delightful gardens, which most of the patients' rooms overlook. The building consists of twelve bed sitting rooms and two single bedrooms, two persons flats providing accommodation for sixteen nurses. In addition there are four kitchenettes, four bathrooms and a utility room. A communal lounge is provided within the main home. The building was required to be separate from the Home and to have if possible its own

garden. This latter requirement has been only partially solved in order to gain good orientation.

The new hostel is faced externally with brick colour washed white and roofed with "Eternit" asbestos slates. Recessed dormer windows and screens are set in the roof with slatted duckboard balconies in front. Purpose made timber, horizontal sliding and top hung windows perforate the building. Internally the building is finished with painted blockwork, plastered ceilings and carpeted floors. The entrance hall is floored with quarry tiles. The building is heated by a gas fired low pressure hot water boiler serving various radiators and convector heaters.

Agnew House won the Royal Institute of British Architects' 1976 annual award for the best new building in the Eastern Region. The RIBA jury reported that "this is an excellent and very human building, displaying a fresh and relevant approach to the use of traditional materials. Money has been spent in the right places and the building has a refreshing quality and clarity which make it not only a cheerful place in which to live, but one that will survive a lot of knocks and changes. Particularly successful are the sitting-out spaces at first floor level, the bright clerestory-lit corridors and the use of colour and natural lighting." The Hostel was designed by the local architectural practice, Cambridge Design Group.

ICI PETROCHEMICALS DIVISION HEADQUARTERS, WILTON

The building is designed to accommodate the headquarters and research department of the Petrochemicals Division of I.C.I. Located directly opposite the main production site at Wilton, it provides offices, laboratories and drawing offices with catering and other facilities for 1,200 people.

The buildings, which use red rustic bricks externally with stained cedar windows, are generally three storeys, with an additional storey where the ground falls. Designed to be flexible, the complex can be extended by adding further wings creating more courtyards.

The entire building complex, from the main approach on the west, forms a broad background to the natural shape of the newly-formed lake and contoured landscaping. In contrast, within the main building, the formal courtyards contain soft landscaping. Enclosed on all sides and visible from the interior of the building, the courtyards provide a constant source of interest as well as linking the various parts of the building through a series of pathways passing under the wings at the lower ground floor level.

The architects, Building Design Partnership, received one of the Royal Institute of British Architects coveted awards for this scheme. The jury considered it to be "a building excellent in its type, making full use of a fine site."

THE OLD GAOL, ABINGDON

The conversion of a gaol into a community centre for public use is in itself an unusual task to undertake but to commission the Project Office of the Royal College of Art in London added a further ingredient to make this project an interesting and novel one.

In 1804 the Town Clerk of Abingdon put his name to plans for a new "House of Correction to be built on the site of White Hart Inn where the London Road crosses the Thames". During the following eight years 3,000 tons of stone were made into what is still one of the largest buildings in Abingdon. The gaol was one of the first to be built under the Prison Reform Act of 1771, which decreed that all

prison cells should be built above ground level and close to a running stream or river for sanitation.

Abingdon Gaol was to be an object of civic pride putting the town one step ahead of its old rival Reading. The new building was not only a gaol but also a court and lodgings for the travelling judges. The architect who prepared the earliest drawings (possibly Wyatville, who later rebuilt Windsor Castle for George IV) followed the most up to date examples. Three wings containing single stone vaulted cells radiated from a central octagonal block. The gaol served for roughly 50 years until 1861 when Reading became the centre of local government and the new Reading Gaol took over. The building passed into private hands. A range of meagre tenements was crammed into one wing and the rest became a cornmill.

In recent years a growing number of local residents came to recognize the qualities of the Old Gaol and in particular its position facing south over the Thames close to the heart of Abingdon. In 1971 Abingdon Council approached the Royal College of Art and subsequently schemes to develop the Old Gaol for the community were prepared by ten students.

The schemes which they suggested were put to the local community by means of a questionnaire for discussion. Once a scheme had been selected the same group of students worked on the drawings and supervised the site with the help of the staff of the College.

The building provides a sports hall with four badminton courts, swimming pool, combat room

for fencing and judo, cinema/lecture/recital hall, viewing galleries to the sports room including a bar, special exhibition room, four teaching rooms, two rehearsal rooms and supporting changing rooms, cloakrooms, offices, kitchen and an administrative wing. Most of the accommodation has been housed in the existing building, two new extensions being added to contain the swimming pool and sports hall.

The existing Old Gaol is a listed building. New extensions were planned so that they did not obscure the river views of and from the old building nor dominate its rich and forbidding character. Stone which was saved from the demolition work on the original boundary wall was used in the external walls and flooring of the new buildings.

The scheme overcomes a number of structural difficulties. The entire interior of the existing building was demolished and the foundations and external walls were strengthened before the construction of new floors.

The original builders of the gaol built with an eye to economy and durability. They used common materials very simply but with generosity and good sense. This example has been followed, using a wider vocabulary of materials, such as steel, glass, concrete, timber and stone.

The Old Gaol, Abingdon, was the only rehabilitation project to win an RIBA Award in 1976. The jury commenting that "the Architects had successfully used a significant old building which was strongly linked to the social and historical centre of the town."

THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Behring Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago. Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms. The total area of the Arctic Sea is about 5.5 million square miles, of which 2.3 million square miles are probably covered with floating ice.

THE COST OF LIVING

The first cost-of-living index to be calculated in Great Britain was the one which took July, 1914, as 100 and was based on the pattern of expenditure of working class families in 1904. Since 1947 the Index of Retail Prices has superseded the cost-of-living index, although the older term is still often popularly applied to it. This index is designed to reflect the month-by-month changes in the average level of retail prices of goods and services purchased by the "majority" of households in the United Kingdom, including practically all wage-earners and most small and medium salary-earners. For spending coming within the scope of the index, a representative list of items is selected and the prices actually charged for these items are collected at regular intervals. In working out the index figure, the price changes are "weighted"—that is, given different degrees of importance—in accordance with the pattern of consumption of the average family.

A more widely used guide when considering changes in the average level of prices of all consumer goods and services, particularly over a number of years, is the consumer price index, now renamed the consumers' expenditure deflator. This index, which has been calculated back to 1938, covers the expenditure of all consumers as defined for national income purposes, and compares the price of goods and services actually purchased in a given year with the prices of the same goods and services in a base year.

During 1973 the Central Statistical Office constructed an annual index of prices of consumer goods and services over the period 1914 to 1972. This index has been constructed by linking together the pre-war cost of living index for the period 1914-1938, the consumers' expenditure deflator for the period 1938 and 1946-62* and the General Index of Retail Prices for the period 1962-1972.

In 1974 the index was rebased taking January 1974 = 100. Using this index the following table has been constructed:

Price Index
Jan. 1974 = 100

Comparable
Purchasing
power of
£1 in 1975

1914.....	11.1	12.14
1915.....	13.7	9.84
1920.....	27.7	4.87
1930.....	17.6	7.66
1938.....	17.4	7.75
1946.....	29.4	4.59
1950.....	35.6	3.79
1955.....	44.1	3.06
1960.....	49.6	2.72
1961.....	51.0	2.64
1962.....	53.0	2.54
1963.....	54.0	2.50
1964.....	55.8	2.42
1965.....	58.4	2.31
1966.....	60.7	2.22
1967.....	62.3	2.16
1968.....	65.2	2.07
1969.....	68.7	1.96
1970.....	73.1	1.84
1971.....	80.0	1.69
1972.....	85.7	1.57
1973.....	93.5	1.44
1974.....	108.5	1.24
1975.....	134.8	1.00

By employing this table an annual purchasing power of the pound index may be derived by taking the inverse of the price index. So, for example, if the purchasing power of the pound is taken to be 100p in 1955, then its comparable purchasing power in 1975 would be:

$$100 \times \frac{44.1}{134.8} = 33p$$

It should be noted that these figures can only be approximate.

*There are no official figures for 1939-45.

TEMPERATURE AND RAINFALL RECORDS

WORLD: The maximum air temperature recorded is 57.8° C. (136° F.) at San Louis, Mexico on Aug. 11, 1933; the minimum air temperature recorded is -88.3° C. (-127° F.) at Vostok Antarctica on Aug. 24, 1960. The greatest rainfall recorded in one day is 1870 mm. (73.62 ins.) at Cilaos, Ile de Réunion on Mar. 16, 1952; the greatest rainfall in one calendar month is 9,300 mm. (366.14 ins.) at Cherrapunji, Assam in July 1861; the greatest annual total being 22,990 mm. (905.12 ins.) also at Cherrapunji in 1861.

UNITED KINGDOM: The maximum air temperature recorded is 38.1° C. (100.5° F.) at Tonbridge, Kent on July 22, 1868; the minimum air temperature recorded is -27.2° C. (-17° F.) at Braemar, Aberdeen on Feb. 11, 1895. The greatest rainfall recorded in one day is 280 mm. (11 ins.) at Martins-town, near Dorchester on Jul. 18, 1955; the greatest annual total is 6,528 mm. (257 ins.) at Sprinkling Tarn in 1954.

THE QUEEN'S AWARDS FOR EXPORT AND TECHNOLOGY

The Queen's Award for Export Achievement and The Queen's Award for Technological Achievement were instituted by Royal Warrant in 1976, the two separate Awards taking the place of The Queen's Award to Industry which had been instituted in 1965. This was the major change made as a result of a number of recommendations by a committee chaired by the Duke of Edinburgh that reviewed all aspects of the Award scheme in 1975 after its second 5-year period of operation; all the recommendations were accepted by the Government. The reports of the 3 committees that have considered the scheme, in 1965, 1970, and 1975—under the chairmanship of the Duke of Edinburgh, Lord McFadzean and the Duke of Edinburgh respectively—are available from Her Majesty's Stationery Office.

The Awards are designed to recognize and encourage outstanding achievements in exporting goods or services from the United Kingdom and in advancing process or product technology. They differ from a personal Royal honour in that they are given to a unit as a whole—management and employees working as a team.

They may be applied for by any organization within the United Kingdom, the Channel Islands or the Isle of Man producing goods or services which meet the criteria for the Awards. Eligibility is not influenced in any way by the particular activities of the unit applying, its location, or size. Units or agencies of central and local government with industrial functions, as well as research associations, educational institutions and bodies of a similar character, are also eligible, provided that they can show they have contributed to industrial efficiency.

The criteria on which recommendations for the Awards are based are:

1. Export Achievement

A substantial and sustained increase in export earnings to a level which is outstanding for the products or services concerned and for the size of the applicant unit's operations. Account will be taken of any special market factors described in the application. Applicants for the Award will be expected to explain the basis of the achievement (e.g. improved marketing organization or new initiative to cater for export markets) and this will be taken into consideration. Export earnings considered will include receipts by the applicant unit in this country from the export of goods produced in this country, and the provision of services to non-residents. Account will be taken of the overseas expenses incurred other than marketing expenses. Income from profits (after overseas tax) remitted to this country from the applicant unit's direct investments in its overseas branches, subsidiaries or associates in the same general line of business will be taken into account, but not receipts from profits on other overseas investments or by interest on overseas loans or credits.

2. Technological Achievement

A significant advance, leading to increased efficiency, in the application of technology to a production or development process in British industry or the production for sale of goods which incorporate new and advanced technological qualities.

Each award is formally conferred by a Grant of Appointment and is symbolized by a representation of its emblem cast in stainless steel and encapsulated in a transparent acrylic block. Presentations are usually made on behalf of The Queen by Her Majesty's Lord Lieutenants at the principal place of business or production of the unit. A reception is

given annually by The Queen at Buckingham Palace for representatives of the winners of the Awards.

Awards are held for five years and holders are entitled to fly the appropriate Award flag and to display the emblem on the packaging of goods produced in this country, on the goods themselves, on the unit's stationery, in advertising and on certain articles used by employees; units may also display the emblem of any previous current Awards during the 5 years.

Awards are announced on April 21 each year—the actual birthday of Her Majesty the Queen—and published formally in a special supplement to the London Gazette.

All enquires about the scheme and requests for application forms should be made to:

The Secretary,
The Queen's Awards Office,
Williams National House,
11-13 Holborn Viaduct,
Telephone: 01-222 2277

Exports Achievement Awards

In 1976, the Queen's Award was conferred on the following concerns for export achievement: Acrow Ltd., London, W.2; The Angus Fire Armour Division of George Angus & Co. Ltd., Thame, Oxfordshire; Aquascutum and Associated Companies Ltd., London, W.1; Associated British Maltsters Ltd., Newark-on-Trent, Nottinghamshire; The Associated Oetel Co. Ltd., London, W.1; Avery Export Ltd., Warley, West Midlands; BOC Ltd., London, W.6; Barbour Threads Ltd., Lisburn, Co. Antrim; Barr & Murphy Ltd., London, N.W.1; The Bemrose Transfer Prints Division of Bemrose Spondon Ltd., Derby; Bibby Line Ltd., Liverpool; British Aircraft Corporation Ltd., Weybridge, Surrey; British Engine, Boiler & Electrical Insurance Co. Ltd., Manchester; E. Brown (Leathers) Ltd., London, N.3; Brush Switchgear Ltd., Loughborough, Leicestershire; James Burn Bindings Ltd., Esher, Surrey; James Burrough Ltd., London, S.E.11; Cambridge Analysing Instruments Ltd., Royston, Hertfordshire; Caterpillar Tractor Co. Ltd., Glasgow; Chivas Brothers Ltd., Paisley; Contractors Plant (London & Midland) Ltd., London, N.3; Cook Bolinders Ltd., Leighton Buzzard, Bedfordshire; Costain International Ltd., London, S.E.1; Courtaulds Ltd., London, W.1; Crosfield Electronics Ltd., London, N.19; The Darlington Division of Cummins Engine Co. Ltd., Darlington, Co. Durham; Davy Ashmore International Ltd., Stockton-on-Tees, Cleveland; Decca Ltd., London, S.E.1; C. H. Dexter Ltd., Duns, Berwickshire; Druce & Co. Ltd., London, W.1; The Oil and Marine Division of Dunlop Ltd., Grimsby, South Humberside; EMI Medical Ltd., Hayes, Middlesex; Engineering Laboratory Equipment Ltd., Hemel Hempstead, Hertfordshire; The Military Products Division of Fairey Engineering Ltd., Stockport, Greater Manchester; S. W. Farmer & Son Ltd., London, S.E.13; The Fertilizer Division of Fisons Ltd., Felixstowe, Suffolk; Ford Motor Co. Ltd., Brentwood, Essex; Gestetner Holdings Ltd., London, N.17; A. Grantham Ltd., Brighton, East Sussex; Guest, Keen & Nettlefolds Ltd., Warley, West Midlands; Guinness Peat Group Ltd., London, E.C.3; Sir William Halcrow & Partners, London, W.11; Harris-Intertype Ltd., Slough; T. S. Harrison & Sons Ltd., Heckmondwike, West Yorkshire; Henley Forklift Group Ltd.,

Blackwood, Gwent; Hield Brothers Ltd., Bradford, West Yorkshire; R. G. Holland & Co. Ltd., Sheffield.; Howard Rotavator Co. Ltd., Bury St. Edmunds, Suffolk; The Plant Protection Division of Imperial Chemical Industries Ltd., Haslemere, Surrey; Inductotherm Europe Ltd., Droltwich, Hereford and Worcester; International Computers Ltd., London, S.W.15; Dick James Music Ltd., London, W.C.1; Johnston Brothers (Engineering) Ltd., Dorking, Surrey; Lancer Boss Group Ltd., Leighton Buzzard, Bedfordshire; P. Leiner & Sons (Encapsulations) Ltd., Treforest, Mid-Glamorgan; Lindsay & Williams Industries Ltd., Manchester; R. A. Lister & Co. Ltd., Dursley, Gloucestershire; Sir M. MacDonald & Partners, Cambridge; Manchester Liners Ltd., Manchester; Martin-Black Ltd., Coatbridge, Lanarkshire; The Mercantile & General Reinsurance Co. Ltd., London, E.C.2; The Royal Ordnance Factories of the Ministry of Defence, London, W.C.2; The Monotype Corporation Ltd., Redhill, Surrey; Munton & Fison Ltd, Stowmarket, Suffolk; The Manufacturing Division of NCR Ltd., Dundee; Newell Dunford Engineering Ltd., Surbiton, Surrey; P.M.C. (Sheffield) Ltd., Sheffield; Pauling & Co. Ltd., London, S.W.1; Penlon Ltd., Abingdon, Oxfordshire; Petbow Ltd., Sandwich, Kent; Edgar Pickering (Blackburn) Ltd., Blackburn, Lancashire; Victor Pyrate Ltd., South Ockendon, Essex; Racial Communications Ltd., Bracknell, Berkshire; Racial-Mobilcal Ltd., Reading, Berkshire; John Ratcliff & Sons Ltd., Leeds; Charles Richards Fasteners Ltd., Wednesbury, West Midlands; The Ryvital Co. Ltd., Poole, Dorset; Saunders Valve Co. Ltd., Cwmbran, Gwent; The Serck Tubes Division of Serck Industries Ltd., Birmingham; Silverline Caravan Co. Ltd., Full Sutton, Nr. York; 600 Services Ltd., Colchester, Essex; David Skellon Yachts Ltd., Hamble, Hampshire; The Aviation Division of Smiths Industries Ltd., Cheltenham, Gloucestershire; Standard Chartered Bank Ltd., London, E.C.4; The Large Cylinder Division of TI Chesterfield Ltd., Chesterfield, Derbyshire; TI Desford Tubes Ltd., Leicester; The International Division of Thorn Lighting Ltd., London, W.C.2; The International Trade Finance Division of Tozer, Kemsley & Millbourn (Holdings) Ltd., London, E.C.3; Transprints (UK) Ltd., Manchester; Viking Engineering Co. Ltd., Stockport, Greater Manchester; Viking Marine Co. Ltd., Gosport, Hampshire; Vogt & Maguire

Ltd., London, E.C.3; John Walker & Sons Ltd., London, S.W.1; Josiah Wedgwood & Sons Ltd., Stoke-on-Trent, Staffordshire; The Wellcome Foundation Ltd., London, N.W.1.

Awards for Technological Achievement

In 1976, the following concerns received the Queen's Award for technological achievement: The A.P.V. Co. Ltd., Crawley, West Sussex (*Computer control of beverage and liquid food processing*); Chas. A. Blatchford & Sons Ltd., Basingstoke, Hampshire (*A modular system for the production of artificial limbs*); The Guided Weapons Division of British Aircraft Corporation Ltd., Stevenage, Hertfordshire (*The "Rapier" guided weapon system*); The Forties Project Team of British Petroleum Co. Ltd., London, E.C.2 (*Development of the North Sea Forties oilfield*); Central Research Laboratories of EMI Ltd., Hayes, Middlesex (*The "EMI Whole Body Scanner" X-ray machine*); Ecko Instruments Ltd., Southend-on-Sea, Essex (*Automatic safe load indication systems for cranes*); Ford Motor Co. Ltd., Brentwood, Essex (*A "sonic idle" carburettor for motor vehicles*); Froude Engineering Ltd., Worcester (*Hydraulic dynamometers for programmed engine testing*); The Hatfield Unit of Hawker Siddeley Aviation Ltd., Hatfield, Hertfordshire (*Aerodynamic design of a wing for the European Airbus aircraft*); Instron Ltd., High Wycombe, Buckinghamshire (*The Model 1122 material testing instrument*); Marconi Communication Systems Ltd., Chelmsford, Essex (*The B3404 integrated telecine unit*); The Tobacco Machinery Division of Molins Ltd., London, S.E.8. (*Tobacco machinery*); The Optoelectronics and Microwave Unit of the Microsystems Division of The Plessey Co. Ltd., Towcester, Northamptonshire (*Callium arsenide microwave devices*); Rothamsted Experimental Station, Harpenden, Hertfordshire (*Highly active safe insecticides*); The Pump Division of William R. WEATHER IN THE UNITED KINGDOM, 1975-1976

(1975) July.—Monthly rainfall totals were generally near or above average in the central highlands, parts of northern and central England, southwest England and in Wales but below average elsewhere. A few places in Northern Ireland and southeast England had less than a quarter of the average amount. Until the 20th and again towards the end of the month fog was reported from time to time along southwestern and western coasts and more frequently on Scottish coasts. Fog became widespread for a short time in the Midlands and eastern England on the 9th. The first week of the month was mainly dry apart from some thundery outbreaks on the 3rd and 4th. Most districts had periods of rain between the 7th and 24th, thunderstorms being reported in many areas. Gales were reported in the English Channel on the 15th and on the 18th a violent whirlwind lifted a heavy grain-storage bin to a height of about 12 metres (39·4 feet) near St. Boswells (Borders Region). The storms were particularly violent in northern and eastern England and the Midlands where they were accompanied by squalls and large hail. Hailstones 3 to 4 cms. (1 to 1½ ins.) in diameter were reported from several places in the north Midlands. During these storms two men lost their lives and several people were injured. Property and crops were severely damaged by lightning, hail and torrential rain. Public services were disrupted. On the 14th 104·9 mm. (4·14 ins.) of rain fell at Inverbeg (Strathclyde Region) and 31·5 mm. (1·24 ins.) fell in 15 minutes at Wiser-ton (Nottinghamshire). On the 22nd gales were reported in northern England when a gust of 72 knots (83 m.p.h.) was recorded at Snaefell (Isle of Man) and 156 mm. (6·15 ins.) of rain fell at Honister Pass (Cumbria). Gales were reported on western coasts on the 23rd. From the 25th most of England and Wales became sunny and very warm. Several places in eastern, southeastern and central England recorded maxima of at least 30° C. (86° F.) on the 30th whilst 32° C. (89·6° F.) was recorded at Bromley (Greater London). Scattered thunderstorms occurred in southern England on the 31st. Monthly mean temperatures were mostly above average in all areas except Shetland and it was the warmest July in Northern Ireland for 20 years. Monthly sunshine totals were generally near or above average but parts of eastern and northern Scotland were less sunny than normal. Lerwick (Shetlands) had its dullest July since 1962.

August.—Rainfall was generally below average except for a few scattered places. It was less than half the average in parts of Northern Ireland, central and southern Scotland, west Wales, south Devon and central England. Eastern England had less than a quarter of the normal amount in places. Thunderstorms were fairly frequent between the 4th and 15th. On the 5th a tornado with very heavy rain and hail occurred near Coventry (Warwickshire) and 5 major roads into the City were blocked by fallen trees. On the 8th a whirlwind in Derbyshire caused the main road to be blocked by trees between Bakewell and Rowsley. Thunderstorms were widespread on the 8th and 9th. On the 10th three people were killed in a collision in fog near Alnwick (Northumberland) and on the 13th two coasters collided in thick fog off the Norfolk coast. On the 14th thunderstorms occurred over eastern districts of England and an unusually severe storm struck northwest London. A total of 170·8 mm. (6·72 ins.) of rain, most of which fell in 2½ hours on the evening of the 14th was measured at Hampstead on the morning of the 15th. This is the largest daily total ever recorded in London and severe flooding resulted. One man was drowned and two people were struck by lightning. There

was considerable damage and public services were disrupted. Occasional rain or showers occurred in many places in the second half of the month but southern and central parts of England and Wales were mostly dry between the 24th and 29th. Scattered thunderstorms were reported on the last few days. Monthly mean temperatures were above average everywhere. Maximum temperatures occurred mainly between the 3rd and the 8th and exceeded 33° C. (91·4° F.) in the Midlands, East Anglia and southern England. On the 4th a temperature of 31·2° C. (88·16° F.) at Glasgow was the highest recorded in any month since 1868 whilst at London/Heathrow Airport a temperature of 34·2° C. (93·56° F.) was the highest temperature since records began in 1946. In central England it was probably the warmest August for 300 years and in England and Wales as a whole and in Scotland it was the warmest since 1947. Nights were often warm and on the night of the 4th/5th the temperature at the London Weather Centre did not fall below 22·2° C. (71·96° F.). Monthly sunshine totals were slightly below average in Cornwall, the western part of Northern Ireland, the Western Isles and parts of west Scotland. Most other districts had above average sunshine. In the north Midlands, parts of east and northeast England and eastern Scotland sunshine exceeded 150 per cent of average. Braemar (Grampian Region) had its sunniest August since 1947.

September.—Rainfall was below average in parts of northeast Scotland, the west of Northern Ireland, parts of west Wales and in a wide belt extending from Cheshire and Salop to the east coast from the Tees to the Wash. Elsewhere monthly totals were above normal. The coast of east Kent received over three times the average amount. Except in western Scotland and Northern Ireland the month started dry but became increasingly unsettled. Gales were reported on exposed coasts from the 9th onwards. Showers and thunderstorms between the 10th and 12th brought the first significant rain for several weeks to parts of southern England. On the 10th funnel clouds were reported over the sea west of Alderney (Channel Isles). Waterspouts were observed over the Irish Sea on the 11th when whirlwinds were reported in Blackpool (Lancashire) and Swansea (West Glamorgan). On the 13th and 14th rain and gales swept across southern counties causing loss of life when a small boat foundered in the Severn Estuary. Southampton (Hampshire) had its wettest day of the century on the 13th when 54·4 mm. (2·15 ins.) of rain were recorded. On the 14th a whirlwind caused extensive damage to glasshouses and crops in a nursery garden at Barnham (West Sussex). From the 20th gales became more frequent in the west and north. Many places in Scotland recorded gusts exceeding 50 knots (57 m.p.h.) between the 20th and 24th. 101 mm. (3·98 ins.) of rain fell at Honister Pass (Cumbria) on the 24th. Heavy rain and gales reached most areas on the 27th and snow fell in the Scottish mountains, heavy falls being reported in the Cairngorms. Gales were severe in places and gusts reached at least 70 knots (81 m.p.h.) on exposed coasts in the southwest. Monthly mean temperatures were below average almost everywhere but at a few places along the coast of East Anglia and around the Thames Estuary they were a little above average. On the 8th temperatures exceeded 24° C. (75·2° F.) at several places in central, southern and eastern districts of England. Temperatures were exceptionally low in southern England on the 14th. 10° C. (50° F.) at London Weather Centre was the lowest September day temperature there since 1940. Monthly sunshine totals were

near average over most of Scotland but were above average in the Isle of Lewis and the extreme south-west. Sunshine was generally above average in Northern Ireland, Wales and England but a little below average along the south coast of England. The sunniest places were in the North Midlands and Merseyside.

October.—Rainfall was below average in all districts except for a few places in Northern Ireland and Kent. North and east Scotland, most of England and much of Wales had less than half the average amount whilst a number of places from central southern England through the south Midlands to East Anglia had only about a quarter of the average. Although dry there were some outbreaks of heavy rain and at Pickering (North Yorkshire) 35 mm. (1.38 ins.) were recorded in 100 minutes on the 2nd. A marked feature of the month was the absence of snowfall particularly in northern areas. In northern and western districts winds and gales occurred until the 6th. On the 2nd a gust of 84 knots (97 m.p.h.) was recorded at Snaefell (Isle of Man) and on the 5th gusts of 68 and 74 knots (78 and 85 m.p.h.) were recorded at Lerwick (Shetland) and Cairngorm (Highland Region) respectively. On the 15th a funnel of cloud was observed over the sea near Alderney (Channel Islands). From the 16th onwards fog affected many parts of the country persisting all day in places, as in the Forth and Clyde valleys on the 17th and 18th. After the 18th eastern districts were mainly dry but there was rain at times in the west and north. Gales again affected the western coasts of Scotland from the 19th. On the 24th fog was widespread in southern England and extended north-eastwards across the Midlands to eastern areas. Yorkshire and Humberside had a foggy day on the 27th. On this day 19 lorries and 11 cars were involved in three collisions near Huddersfield (West Yorkshire) and 25 people were taken to hospital. Fog was also slow to clear in eastern areas on the 29th, persisting all day in parts of Lincolnshire and Yorkshire. Monthly mean temperatures were below average almost everywhere in England and Wales, southern and central Scotland. In Northern Ireland and northern Scotland they were near or above normal. On the 1st the temperature rose to 19.9° C. (67.82° F.) at Newton Rigg (Cumbria). From the 10th to the 13th many areas had a cold spell and at Bâstrec (Cornwall) the temperature fell to -3.7° C. (25.34° F.) on the 13th. The cold weather lasted longer in northern districts and on the 18th the temperature fell to -6.5° C. (20.3° F.) at Lagganlia (Highland Region). Many places had their highest temperatures during the last week and on the 27th 22.0° C. (71.6° F.) was recorded at Loggerheads (Clwyd). At Balmacara (Highland Region) 19.4° C. (66.92° F.) was recorded on the 28th. Monthly sunshine totals were below average along the coasts of Sussex, Kent and eastern England, parts of northern England, Northern Ireland, the east coast of Scotland and parts of western Scotland. Elsewhere sunshine was above average.

November.—Rainfall was near or above average in the Channel Islands, extreme southwest and southeast England, parts of East Anglia, west Wales, the west of Northern Ireland and much of western Scotland. Elsewhere the month was drier than usual, less than half the average amount falling in the west and north Midlands, southeast Scotland and a few places in northern England. Apart from the beginning of the month, when most places had some rain, the first two weeks were mostly dry. On the night of the 10th/11th extensive fog, dense and freezing in places, developed in central and eastern England. The fog became persistent and widespread on the 14th before clearing on the 16th. From the 15th onwards the weather became less

settled, rain spreading to all areas at times, but most persistently in the west and north where there were gales. Most stations recorded their highest gusts on the 16th, 17th or 27th, 60 knots (69 m.p.h.) being recorded at a few places. Whitland in southwest Wales had 57.4 mm. (2.26 ins.) of rain in 16 hours on the 23rd. On the 22nd fog lingered in the Severn Valley for much of the day. Hail showers were more frequent in the second half of the month and thunderstorms, which were occasionally reported earlier, occurred during the last few days. Snow or sleet showers fell in northern areas and in the Welsh mountains during the third week and again towards the end of the month. Depths of about 10 cms. (3.94 ins.) were measured in the Grampians. Reports of snow or sleet were few in other areas although there were slight falls in Devon between the 25th and 30th. On the 29th and 30th dense, freezing fog occurred in central, east and southeast England affecting coastal shipping and disrupting road and air traffic. On the evening of the 29th 10 people were killed when two light aircraft crashed on landing in fog, one at Elstree and the other at Birmingham. Monthly mean temperatures were near average everywhere. The highest temperatures recorded during the month being 16.7° C. (62.06° F.) at Aldenham (Hertfordshire) on the 1st, 15.5° C. (59.9° F.) at Nettlecombe (Somerset) on the 15th and 15.7° C. (60.26° F.) at Perth (Tayside Region) on the 19th. Minimum temperatures were -7.3° C. (18.86° F.) at Lagganlia (Highland Region) on the 21st and -7.1° C. (19.22° F.) at Aylesbury (Buckinghamshire) on the 22nd. Monthly sunshine totals were below average in northwest Scotland, the west of Northern Ireland, Cornwall and parts of the east coast of Kent and Suffolk but totals were above average everywhere else. Manchester Airport and Liverpool Airport with 89 and 95 hours respectively had almost twice their normal sunshine for November.

December.—Rainfall was below average except in some places in northern Scotland, a part of Lincolnshire and around the Humber. Most of southern England, south Wales and the extreme north of England had less than half the average amount and many places in Devon, Cornwall, Northern Ireland and eastern Scotland had only about a quarter of the average amount. Perth (Tayside Region) with a monthly total of 7 mm. (0.28 ins.) and the Edinburgh area with a similar amount had their driest December since 1908. The month began with rain in all districts, a number of places in Wales recording amounts well in excess of 50 mm. (2 ins.) on the 1st., 99.5 mm. (3.92 ins.) were recorded at Moel Cynnedd (Powys) in 18 hours. There were showers of hail, snow and sleet in the north. Gales swept across many areas on the 1st and gusts exceeding 50 knots (57 m.p.h.) were recorded widely in southern districts. Six cross-channel ferries rode out the storm on the night of the 1st/2nd before entering port. Also on the 1st there was freezing fog in central and southern England. After the 2nd the month was generally dry although there was rain on every day in parts of north and west Scotland. Many districts had rain on the 12th. Fog was reported fairly often between the 4th and 21st and in southern England persistent freezing fog on the 15th and 16th disrupted road, rail and air traffic. Thirty people were taken to hospital following a series of 70 road accidents near Bexley (Greater London). Gales blew around northern coasts from the 21st. Many districts had rain on the 23rd and 24th and again during the last few days of the month when wintry showers and thunder occurred in the north. Monthly mean temperatures ranged from 1 deg. C. below average at a few places along the southern coasts of England to 2.5 deg. C. above average in parts of eastern

Scotland. On the 5th the temperature rose to 14.4° C. (57.9° F.) at Banchory (Grampian Region) and fell on the night of the 12th/13th to -8.5° C. (16.7° F.) at Dalwhinnie and Dall (Grampian Region) and to -9.1° C. (15.6° F.) at Moor House (Cumbria). Ground frost was reported at a number of places during the month. Monthly sunshine totals were near or above average in southeast England, in much of northern and central England and in southeast Scotland. Totals were more than 150 per cent of average in northeast England and in the Forth/Clyde area. All other districts had less sunshine than normal.

Year (1975)—Annual rainfall was near or a little above average in most of southeast England, parts of Essex and some places in northwest Scotland. It was less than normal in all other areas. The most notable feature of the rainfall was the exceptional dryness of the months October to December inclusive. There has been no drier corresponding period in England and Wales since 1879, in Northern Ireland since 1922 and in Scotland since 1937. January was windy, wet and very mild. Gales were severe at times. Shipping ran aground and lives were lost on several occasions. Heavy rain caused flooding in Wales and southern England towards the end of the month. The weather changed suddenly at the beginning of February and became dry and much less windy. Fog often formed, freezing at times, but the month was generally mild. After the first week March became much colder. It was dry and sunny in the north but wet elsewhere with some widespread flooding in eastern England and the Midlands. There were gales in southern districts. Cross-Channel services were affected and a stretch of sea-wall collapsed at Lowestoft. A man was killed in Essex. The cold weather continued into April and there were blizzards in Scotland. A skier lost his life at Aviemore. After mid-month it was generally milder with rain at times and fog on the coasts. May brought cool conditions to all areas. There were gales at times and a tree blown into a bus in Wiltshire killed the driver. Western and northern districts were very dry and sunny but eastern England was rather wet. Northern Ireland had its driest May this century. June started cold with snow and heavy rain in places and gales in the north. Scattered showers of snow or sleet spread even as far south as London. Within a few days most districts became dry, sunny and very warm and continued like this through the first week of July. During the next two weeks heavy rain and thunderstorms occurred in which two men lost their lives and property and crops were severely damaged. Sunny and very warm weather then returned and during the first fortnight of August it was often very hot. Glasgow recorded its highest temperature since 1868 and it was the warmest August in central England for over 300 years. Thunderstorms were frequent and the highest daily rainfall ever recorded in London occurred in an exceptionally severe storm. Flooding followed and one man was drowned. Two people were struck by lightning. Damage to property was considerable. Lives were lost in fog in Northumberland and whirlwinds caused roads to be blocked by trees in Warwickshire and Derbyshire. The rest of August was cooler and September was cool and wet with gales at times. Southampton had its wettest day of the century. The remaining months were rather changeable but rainfall amounts were small. As in the early months snow or sleet occurred less frequently than normal but fog was sometimes persistent. Three multiple accidents occurred in fog in October injuring 25 people. Two light aircraft crashed in fog in November killing 10 people and in December 30 people were injured in no less than 70 accidents in fog near Bexley. Annual mean temperatures were above average in all districts.

Annual sunshine totals were generally above normal. Only the summer of 1911 sunnier was this century in England and Wales. Manchester had its sunniest summer since 1877 and in Paisley the combined May and June total was the highest since 1885.

(1976) January.—Rainfall was above average in Northern Ireland and most of Scotland. It was up to $2\frac{1}{2}$ times the average in northern Scotland. Parts of north Wales and much of northern England were also wetter than usual. In general, however, rainfall decreased southwards and was less than half the average in southern counties. The month started wet everywhere and at Ysppyty-lfan (Gwynedd) 124 mm. (4.88 ins.) were recorded on the 2nd. One of the most severe gales this century swept across the British Isles on the 2nd causing at least 23 deaths. Public services were widely disrupted and the total national damage was estimated at up to £100 million. At Lawther Hill (Strathclyde Region) a gust of 116 knots (133 m.p.h.) was recorded and at Wittering (Cambridgeshire) a gust of 91 knots (105 m.p.h.) was reported. The gale was followed by a tidal surge along the east coast which breached the sea defences at a few places, mainly in Humberside and Norfolk. Precipitation occurred on almost every day of the month in north and northwest Scotland but southern districts of England and Wales were often dry between the 7th and 17th. Gales returned to many areas between the 19th and 22nd and were severe in places. Most areas had rain or showers from the 18th to 26th but the rest of the month, except in the southwest was mainly dry. It became very cold from the 24th to the 26th. Heavy falls of snow in Scotland and northeast England on the 24th soon spread southwards, affecting eastern counties until the 26th. Heavy snowfall occurred on Dartmoor on the 30th. Monthly mean temperatures were above average almost everywhere in spite of the cold spell. Only in Shetland and the extreme northwest of Scotland were mean temperatures below average. At Braemar (Grampian Region) a temperature of -13° C. (8.6° F.) was recorded on the night of the 1st/2nd but on the 11th the temperature rose to 15.1° C. (59.2° F.) at Stonehaven (Grampian Region). On the night of the 27th/28th the temperature fell to -10.6° C. (12.92° F.) at Honington (Suffolk). Monthly sunshine totals were near or above average in southeast England, in much of central and eastern England and in southwest Scotland and the central lowlands. The London area with 180 per cent of average had the most sunshine. Elsewhere, sunshine was below average and the Northern Isles, one or two places on western coasts and the Channel Islands had only about half the average amount.

February.—Rainfall was near or above average in parts of northern, western and southern Scotland and in a few scattered places in Wales, the western half of England and the Channel Islands. Rainfall was below normal elsewhere and in England and Wales this was the fifth successive month with less than average rainfall. Some eastern districts of England were particularly dry with several places having monthly totals of less than 10 mm. (0.39 ins.). Snow or sleet fell in many areas until the 6th and fog was extensive and slow to clear in eastern, central and southern districts of England on the 7th. Some rain fell between the 9th and 12th and at Winstitchen (Somerset) 75.3 mm. (2.96 ins.) fell in 16 hours 6 minutes on the 12th. Snow or sleet showers from the 10th to the 12th mainly affected northern districts. Gales were reported on eastern coasts on the 13th. Fog was reported from the 10th to the end of the month and was extensive and slow to clear in eastern, central and southern districts on the 20th and 21st. There was further

rain from the 21st to the 24th. On the 24th a gust of 90 knots (103 m.p.h.) was recorded at Cairngorm (Highland Region) and a gust of 74 knots (85 m.p.h.) was recorded at Lerwick (Shetland) on the 29th. On the night of the 24th/25th the Hastings lifeboat rescued the crew of a coaster which had collided with another vessel in fog off Beachy Head. Monthly mean temperatures were above average almost everywhere but near normal in coastal districts of southern England, in south Wales and in the Channel Islands. This is the sixth successive year in which monthly mean temperatures for February have been above normal in Scotland and in England and Wales together. On the night of the 1st/2nd the temperature at Lagganlia (Highland Region) fell to -14.9°C . (5.18°F .) and in parts of southern England and south Wales temperatures occasionally remained below freezing all day until the 6th. The last week was very mild in many districts and the temperature rose to 16.6°C . (61.88°F .) at Aberdeen Airport on the 25th, a temperature which has only been exceeded in Scotland on two previous Februarys this century. Monthly sunshine totals were above average in parts of northern Scotland and west Wales and in an arc from north Wales to Cheshire to the northwest Midlands. They were below normal everywhere else.

March.—Rainfall was above average almost everywhere in Scotland and Northern Ireland, in extreme northern England, north west and south west England and in parts of the west Midlands and southern Wales. Parts of west Cornwall and eastern Scotland had almost twice the average amount. Remaining districts had less rain than normal and most of the eastern half of England had less than half the average amount. The month was dry at first with night frosts. From the 6th it became much colder and snow and sleet fell in the north and east. The snow continued intermittently in the north until the 17th. Many areas had rain at times from the 9th to the end of the month. Gales affected much of England, Wales and eastern Scotland on the 12th and there were many distress calls from shipping in the western approaches to the English Channel. Some lives were lost. Avalanches were reported in the Cairngorms on the 12th and seven climbers were taken to hospital. On the 21st, 125.0 mm. (4.92 ins.) of rain were recorded at Spigla Dam (Co. Down) and on the 22nd 81.7 mm. (3.22 ins.) were measured at Bugle (Cornwall). Snowfall was much more general on the 21st and 22nd blocking roads and mountain passes in Scotland, Cumbria and northern Wales and affecting roads in southwest England. It remained generally cold until the 24th with rain or drizzle and hill fog. Milder weather then reached most districts and although rain fell at times and there were wintry showers and gales in the north sunny periods also occurred and the southeast became warm. On the 28th a gust of 94 knots (108 m.p.h.) was recorded at Cairngorm (Highland Region). Heavy snow was reported in Shetland on the 31st. Monthly mean temperatures were below normal in all areas. On the night of the 8th/9th the temperature fell to -10.5°C . (13.1°F .) at Alwen (Clwyd) and on the 28th it rose to 17.1°C . (62.78°F .) at Gillingham (Kent). Monthly sunshine totals were near or above average in parts of northern Scotland, northern England, the north Midlands, East Anglia and in most of southeastern and central England. Elsewhere monthly totals were a little below average. Eskdalemuir (Dumfries and Galloway Region) had its dulllest March since 1936.

April.—Rainfall was near or above average in a few places in northwest and southern Scotland and in an area round the Firth of Forth but below normal in all other areas. Parts of northeast Scotland, Northern Ireland and most of England and

Wales had considerably less than half the average amount. A number of places in southernmost counties had less than 10 per cent of average and Callington (Cornwall) had no rain at all. Although it was a mostly dry month there were outbreaks of rain or showers in many areas on the 1st and 2nd and a man was killed by lightning on the Isle of Lewis. The heavy snow at the end of March in Shetland continued to the 1st of April and snowdrifts were up to 1 metre (3.3 ft.) deep. Snow or sleet showers fell in other northern and some western districts at the beginning of the month. There were gales at times during the first half of the month and on the 6th a gust of 85 knots (98 m.p.h.) was recorded at Snaefell (Isle of Man). Rain or showers, wintry in the north, continued to occur at times during the first two weeks and affected many districts on the 13th and 14th, 55.7 mm. (2.2 ins.) of rain was measured at Braithwaite (Cumbria). A little snow or sleet fell on Dartmoor on the 14th and 15th. The second half of the month was dry over England and Wales but Scotland had occasional outbreaks of rain. Fog occurred frequently around Scottish coasts and islands and was persistent on southern coasts of England on the 17th and 18th and on eastern coasts of England and Scotland on the 20th. Widespread frost occurred towards the end of the month. Monthly mean temperatures were below average in Shetland, a few places in northern and southeastern Scotland and almost everywhere in England and Wales. They were above normal in Northern Ireland, the Isle of Man and most of Scotland. At Achnashellach and Lock Oich (Highland Region) the temperature rose to 21.6°C . (70.88°F .) on the 20th and central London had its warmest Easter (16th to 19th) since 1952. Monthly sunshine totals were near or above average in East Anglia, southern England, west Wales, Northern Ireland and parts of northern England and western Scotland. Values were below average elsewhere and Fortrose (Highland Region) had its dulllest April since 1910.

May.—Rainfall was generally below average in extreme north and northeast Scotland, southern Wales and in England south of a line from the west Midlands to the Wash. Totals were above average elsewhere. Less than half the average fell in southern England with some places along the south coast recording less than a quarter of the average amount. By contrast some places in Humberside and North Yorkshire recorded more than 2½ times the average. Outbreaks of rain or showers reached most areas on the 1st and on the 2nd Honister Pass (Cumbria) had 76.2 mm. (3.0 ins.) of rain. Fog, which was reported from time to time throughout the month in coastal areas, particularly affected northeast coasts of England on the 6th. Thunderstorms occurred fairly frequently but were particularly widespread from the 7th to the 10th. Gales occurred occasionally around mid month and on the 16th a gust of 78 knots (90 m.p.h.) was recorded at Edinburgh. Fog affected the northeast coast of England on the 24th and extended along the English Channel from the southwest on the 31st. Monthly mean temperatures were slightly below average in the Hebrides, the Glasgow area, Northern Ireland, the Isle of Man, southwest Wales and most of Cornwall. In other areas mean temperatures were near or above average. On the 1st at Bastree (Cornwall) a temperature of -5.0°C . (23.0°F .) was recorded and on the night of the 4th/5th -3.0°C . (26.6°F .) was recorded at Fyvie Castle (Grampian region). At Ulcombe (Kent) and at Waddon (Greater London) the temperature rose to 29.0°C . (84.2°F .) on the 7th. The difference between the night minimum and the day maximum at several places in the southeast on the 7th was 22°C . (39.6°F .). Monthly sunshine totals were near or above average in southeast and central south-

ern England, parts of southwest England, parts of East Anglia and in Caithness and the Northern Isles. Sunshine was below normal elsewhere and Onich (Highland Region) had its dullest May since 1929.

June.—Rainfall was above average in west and northwest Scotland but everywhere else rainfall was below average. Parts of the east and much of the south coasts of England had less than a quarter of average. Exmouth (Devon) and Guernsey (Channel Islands) had only 4 per cent of normal. It was the driest June in England and Wales since 1925 and following the previous dry months 17 counties had a serious shortage of water. The month started unsettled but by the 3rd it had become dry over much of the country and many central and eastern districts stayed dry until the middle of the month. On the 19th rain spread over the whole of England and Wales as far north as Lancashire and Yorkshire. At Fulla-ford (Devon) 68 mm. (2.68 ins.) were recorded and 62.4 mm. (2.46 in.) fell at Blackpits Gate (Somerset). There were gales in the English Channel on the 19th. From the 21st most of England and Wales stayed dry although there were a few thunderstorms on the southeast coast on the 23rd and in parts of the south-west on the 27th and 28th. Monthly mean temperatures were above average in all areas except the

Western Isles. The night of the 24th/25th was the warmest June night in London since 1947, the minimum temperature never falling below 21.3° C. (70.3° F.). On the 25th, 26th, 27th and 28th temperatures exceeded 32° C. (90° F.) over much of London, the first occasion in at least 135 years that 32° C. (90° F.) has been reached on 4 consecutive days. On the 26th and 28th temperatures over much of southern England were up to 14° C. (25° F.) above normal and at Plumpton (East Sussex) the temperature reached 36° C. (96.8° F.) on the 28th, the highest June temperature ever recorded in Britain. On the 30th, 30.8° C. (87.4° F.) at Knockaraven (Co. Fermanagh) was the highest temperature ever recorded in Northern Ireland. The hot spell from the 23rd onwards caused traffic congestion, industrial troubles, heat exhaustion, etc., and fires. Towards the end of the month large fires were reported in Norfolk, Suffolk, Surrey, Essex, Hampshire and North Yorkshire. The army were called in to control the moor fires near Whitby (North Yorkshire). Sunshine was above normal in most areas but in much of central and western Scotland and west coast regions of England and Wales it was less than normal. It was the dullest June on record at Benbecula (Western Isles).

TEMPERATURE, RAINFALL AND SUNSHINE
IN THE UNITED KINGDOM

The following table gives mean air temperature (°C.) total monthly rainfall (mm.) and mean daily bright sunshine (hrs.) at a representative selection of climatological reporting stations in the United Kingdom during the year July 1975 to June 1976 and the calendar year 1975. The heights (metres) of the reporting stations above mean sea level are also given. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office.

BOOK PRODUCTION AND BOOK EXPORTS

These figures for book production and exports are issued by the Department of Industry. The totals for the years 1964 to 1975 are shown below:

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.	Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1964	£98,480,220	£43,225,649	1970	£153,676,000	£67,842,000
1965	104,876,998	46,123,190	1971	179,099,000	77,856,000
1966	119,578,145	51,417,786	1972	205,266,000	81,207,000
1967	125,782,262	53,838,418	1973	230,106,000	95,855,000
1968	137,748,324	61,741,160	1974	281,508,000	119,359,000
1969	145,893,000	68,523,000	1975 (Provisional)	350,648,000	143,460,000

BOOKS PUBLISHED IN GREAT BRITAIN IN 1975

This table, from *The Bookseller* of December 27, 1975, shows the books published in 1975 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 12½p have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property and Copyright Dept., Department of Trade, 25 Southampton Bldgs., W.C.2.*

Subject to the provisions of the Copyright Act, 1956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. No registration nor other formalities are required in order to obtain the protection of the Act. Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films and television and sound broadcasts. Libraries

entitled, under a provision still in force of the Copyright Act, 1911, to receive free copies of books published in the United Kingdom are the British Library, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall was terminated by the Copyright Act of 1911, but in 1924 the Stationers' Company established a *new Register* in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being £5 for a Book, or a Fine Art; certified copies £3 in either case. The fee for a search is £2.50.

THE PRESS COUNCIL

1 Salisbury Square, E.C.4.

[01-353 1248]

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. This constitution was materially amended in 1963 by the introduction of an independent chairman and up to 20 per cent. lay membership. In 1973, the Council was increased to 30 (excluding the Chairman) of whom one-third are lay members. The objects of the Council are (1) to preserve the established freedom of the British press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to consider complaints about the conduct of the Press or the conduct of persons and organizations towards the Press; to deal with these complaints in whatever manner might seem practical and appropriate and record resultant action; (4) to keep under review developments likely to restrict the supply of information of public interest and importance; (5) to report publicly on developments that may tend towards greater concentration or monopoly in the Press (including changes in ownership, control and growth of Press undertakings) and to publish statistical information relating thereto; (6) to make representations on appropriate occasions to the Government, organs of the United

Nations and Press organizations abroad; and (7) to publish periodical reports recording the Council's work and to review, from time to time, developments in the Press and the factors affecting them.

The membership of the Council consists of editorial and managerial nominees of The Newspaper Publishers Association Ltd. (5), The Newspaper Society (3), The Periodical Publishers Association Ltd. (2), The Scottish Daily Newspaper Society (1), Scottish Newspaper Proprietors' Association (1), The Guild of British Newspaper Editors (2), The National Union of Journalists (4), The Institute of Journalists (2) plus (10) lay members appointed by the Press Council Appointments Commission. In addition each constituent body nominates one official as a non-voting member.

Chairman, The Lord Shawcross, P.C., G.B.E., Q.C.

Vice-Chairman, D. R. W. Greenslade.

Professional Members, W. J. Bailey; M. Bower; W. R. A. Breare; C. N. D. Coie; T. H. Cooke; H. R. Douglas; H. French; Sir Denis Hamilton, D.S.O.; The Hon. A. V. Hare, M.C.; W. Heald; F. P. M. Johnston; I. McColl; A. J. Milles; F. Owens, O.B.E.; K. J. Peters; E. Pickering; M. Randolph; R. J. P. Swingle; G. Withy.

Lay Members, Capt. G. C. Baldwin, C.B.E., D.S.C.; Dr. A. C. Copisarow; Dame Mary Green, D.B.E.; R. M. Harrold; T. Jackson; Prof. C. H. Lawrence; Mrs. J. Martin; Sir Ian Morrow; Dame Jean Rivett-Drake, D.B.E.; Rt. Rev. W. J. Westwood.

Secretary, N. S. Pauli.

THE CIVIC TRUST

17 Carlton House Terrace, S.W.1
 [01-930 0914]

Founded in 1957 with the object of improving the appearance of town and country. The Trust is a recognized charity, supported by voluntary contributions. Four Associate Trusts are linked with it in Scotland, Wales, the North West and the North East.

The Trust gives support and advice to over 1,200 local civic and amenity societies throughout Britain. It has initiated hundreds of schemes to brighten and tidy up drab streets. It has promoted new techniques for moving semi-mature trees as part of a wider campaign to plant more trees. It stimulates voluntary action to remove eyesores

which mar town and countryside. It makes awards annually for good development of all kinds. Its proposals led to the creation of the Lee Valley Regional Park Authority. It was closely associated with the drafting of the Civic Amenities Act 1967 and of the Town and Country Amenities Act 1974. It makes available on hire films, photographs, slides and exhibitions. By conferences, projects and reports, it focuses attention on major issues in town planning and architecture. The Trust also provided the central Secretariat for the United Kingdom campaign for European Architectural Heritage Year, 1975.

LOCAL ARCHAEOLOGICAL SOCIETIES

England and Wales

Anglesey.—ANGLESEY ANTIQUARIAN SOCIETY. *Hon. Sec.*, D. O. Jones, 22 Lôn Ganol, Menal Bridge, Anglesey.

Price £5.75 net.

TRADES UNION CONGRESS (T.U.C.)

Congress House, 23-28 Great Russell Street, W.C.1.

[01-636-4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the representatives of which meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliated fees are paid. Affiliated unions (in 1975/6) totalled 113 with an aggregate membership of 11,036,326.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with motions from affiliated societies on questions of policy and organization. Some of these unions, especially in cotton, are themselves federal bodies including over 100 more unions.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the trade union movement, with authority to promote common action on general questions, and to assist trade unions in the work of organization. The General Council is elected by Congress and is composed of 38 members (36 representing 18 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group and with the number of representatives each group is entitled to have on the General Council. *Women Members.*—In 1976, a total of 3,033,591 women were members of unions in the T.U.C. The largest groups were members of the National Union of General and Municipal Workers (289,283), National Union of Public Employees (382,638), Transport and General Workers' Union (289,582), National Union of Teachers (211,894), National and Local Government Officers' Association (267,221), and Union of Shop, Distributive and Allied Workers (223,649).

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such cases being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the trade union movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council, the trade union movement maintains systematic relations with the Government and Government Departments, with

the Confederation of British Industry and with a large number of other bodies. The General Council is represented on the National Economic Development Council, established to examine problems associated with faster economic growth. The Council includes Ministers dealing with economic and industrial affairs, representatives of public and private industry and independent members. The General Council nominates members to serve on numerous other bodies, e.g., Manpower Services Commission, Health and Safety Commission and the Council of the Advisory, Conciliation and Arbitration Service.

Chairman (1976-77), D. McGarvey, C.B.E.

General Secretary, Rt. Hon. L. Murray, O.B.E.

SCOTTISH TRADES UNION CONGRESS

16 Woodlands Terrace, Glasgow

The Congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. In 1976 it consisted of 75 unions with a membership of 962,499 and 45 directly affiliated Trades Councils. The majority of the unions organize throughout Britain and affiliate on their membership in Scotland.

The Annual Congress in April elects a 20-member General Council on the basis of 11 industrial sections. Congress has been prominent in pressing for economic expansion and full employment in Scotland and the development of the social services, most of which are separately organized in Scotland.

Chairman (1976-77), H. D'Arcy.

General Secretary, J. Milne.

TRADE UNIONS AFFILIATED TO T.U.C.

A list of the Trade Unions affiliated to the Trades Union Congress in September, 1976. The number of members of each Union is shown in parenthesis.

- ACTORS' EQUITY ASSOCIATION, BRITISH (22,373).—***Gen. Sec.*, P. Plouviez, 8 Harley St, W.1.
- AGRICULTURAL AND ALLIED WORKERS, NATIONAL UNION (85,000).—***Sec.*, R. N. Bottini, C.B.E., 308 Gray's Inn Road, W.C.1.
- ASPHALT WORKERS, THE AMALGAMATED UNION OF (3,018).—***Sec.*, H. M. Wareham, Jenkin House, 173A Queen's Road, Peckham, S.E.15.
- BAKERS UNION (52,676), Stanborough House, Great North Road, Stanborough, Welwyn Garden City, Herts.—***Gen. Sec.*, S. Maddox.
- BAKERS AND ALLIED WORKERS, SCOTTISH UNION OF (8,780).—***Sec.*, A. H. Mackie, Baxterlee, 127 Fergus Drive, Glasgow 20.
- BANK EMPLOYEES, NATIONAL UNION OF (101,922).—***Sec.*, L. A. Miles, Sheffield House, Portsmouth Road, Esher, Surrey.
- BEAMERS, TWISTERS AND DRAWERS (HAND AND MACHINE), AMALGAMATED ASSOCIATION OF (955).—***Gen. Sec.*, F. Sumner, 27 Every Street, Nelson, Lancs.
- BLASTFURNACEMEN, ORE MINERS, COKE WORKERS AND KINDRED TRADES, THE NATIONAL UNION OF (16,328).—***Sec.*, H. C. Smith, 93 Borough Road West, Middlesbrough, Cleveland.

- TEXTILE CRAFTSMEN, YORKSHIRE SOCIETY OF (1,014).—*Sec.*, C. Hall, Textile Hall, Westgate, Bradford 1.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1917. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Department of Trade and Industry kept a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations. The Department of Industry's Research Requirement Boards, now offer work to the Research Associations in a contractual capacity, this system having replaced general purpose grants.

Brushes.

BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, 90 Cowcross Street, E.C.1.—*Dir.*, D. I. Fothergill.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.*, H. Morrogh, C.B.E., F.R.S.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, A. Dinsdale, O.B.E.

Civil Engineering.

CONSTRUCTION INDUSTRY RESEARCH AND INFORMATION ASSOCIATION, Old Queen Street House, 6 Storey's Gate, S.W.1.—*Dir.*, A. R. Collins, M.B.E., D.Sc., Ph.D.

Coke and Tar.

BRITISH CARBONIZATION RESEARCH ASSOCIATION, Research Centre, Wingerworth, Chesterfield, Derbyshire.—*Dir.*, J. P. Graham.

Cotton, Silk, etc.

COTTON, SILK AND MAN-MADE FIBRES RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester, 20.—*Dir.*, L. A. Wiseman, O.B.E.

Cutlery.

CUTLERY AND ALLIED TRADES RESEARCH ASSOCIATION, Henry Street, Sheffield, 3.—*Dir.*, E. A. Oldfield.

Drop Forging.

DROP FORGING RESEARCH ASSOCIATION, Shepherd Street, Sheffield, 3.—*Director*, S. E. Rogers, Ph.D.

Electrical.

ELECTRICAL RESEARCH ASSOCIATION, Cleeve Road, Leatherhead, Surrey.—*Man. Dir.*, B. C. Lindley, Ph.D.

Flour Milling and Baking.

FLOUR MILLING AND BAKING RESEARCH ASSOCIATION, Research Station, Chorleywood, Rickmansworth, Herts.—*Dir.*, C. T. Greenwood, D.Sc., Ph.D.

Food Manufacture.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.*, A. W. Holmes, Ph.D.

Fruit and Vegetable Canning.

CAMPDEN FOOD PRESERVATION RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.*, H. R. Hinton.

Furniture.

FURNITURE INDUSTRY RESEARCH ASSOCIATION, Maxwell Road, Stevenage, Herts.—*Dir.*, D. M. Heughan.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Northumberland Road, Sheffield 10.—*Dir.*, C. Thorpe.

Heating and Ventilating.

BUILDING SERVICES RESEARCH & INFORMATION ASSOCIATION, Old Bracknell Lane, Bracknell, N. S. Billington, O.B.E.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION (Hatra), Thorneywood, 7 Gregory Boulevard, Nottingham.—*Dir.*, W. A. Dutton.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, Cranfield, Bedford.—*Dir.*, G. F. W. Adler.

Industrial Powders, Chalk & Lime.

WELWYN HALL RESEARCH ASSOCIATION, Edgeworth House, Arlesey, Beds.—*Dir.*, R. R. Davidson.

Instrumentation.

SIRA INSTITUTE LTD., South Hill, Chislehurst, Kent.—*Man. Dir.*, S. S. Carlisle.

Leather.

BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.*, R. L. Sykes, Ph.D.

Linen.

LAMBEG INDUSTRIAL RESEARCH ASSOCIATION, Research Institute, Lambeg, Lisburn, Co. Antrim, N. Ireland.—*Dir.*, H. A. C. Todd, O.B.E.

Machine Tools.

MACHINE TOOL INDUSTRY RESEARCH ASSOCIATION, Hulley Road, Hurdsfield, Macclesfield, Cheshire.—*Dir.*, A. E. De Barr, O.B.E.

Motor Vehicles.

MOTOR INDUSTRY RESEARCH ASSOCIATION, Watling Street, Nuneaton, Warwickshire.—*Dir.*, R. H. Macmillan.

Mycology.

COMMONWEALTH MYCOLOGICAL INSTITUTE, Ferry Lane, Kew, Surrey.—*Dir.*, A. Johnston.

Non-Ferrous Metals.

BRITISH NON-FERROUS METALS TECHNOLOGY CENTRE, The Grove Laboratories, Denchworth Road, Wantage, Berks.—*Dir.*, A. J. Kennedy, D.Sc., Ph.D.

Paint.

PAINT RESEARCH ASSOCIATION, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—*Dir.*, G. de W. Anderson, Ph.D.

Paper, Board, Printing and Packing.

RESEARCH ASSOCIATION FOR THE PAPER AND BOARD, PRINTING AND PACKAGING INDUSTRIES (Pira), Randalls Road, Leatherhead, Surrey.—*Dir.*, N. K. Bridge, Ph.D.

Production Engineering.

PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Milton Mowbray, Leics.—*Dir.*, D. F. Galloway, C.B.E., Ph.D.

Rubber and Plastics.

RUBBER AND PLASTICS RESEARCH ASSOCIATION OF GREAT BRITAIN, Shawbury, Shrewsbury, Shropshire.—*Dir.*, W. F. Watson, D.Sc., Ph.D.

Ships.

BRITISH SHIP RESEARCH ASSOCIATION, Research Station, Wallsend, Northumberland.—*Dir.*, R. Hurst, G.M., C.B.E., Ph.D.

Shoes.

SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Road, Kettering, Northants.—*Dir.* (vacant).

Springs.

SPRING RESEARCH ASSOCIATION, Henry Street, Sheffield 3.—*Dir.*, J. A. Bennett.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 372):—

Unit Of Animal Genetics, Institute of Animal Genetics, West Mains Road, Edinburgh 9.—*Director*, Prof. D. S. Falconer, Sc.D., F.R.S.

Unit of Developmental Botany, 181A Huntingdon Road, Cambridge.—*Director.*, Prof. P. W. Brian, Sc.D., F.R.S.

Unit of Invertebrate Chemistry and Physiology, University of Sussex, Falmer, Brighton.—*Hon. Director*, Prof. A. W. Johnson, F.R.S.

Unit of Invertebrate Chemistry and Physiology (Subgroup), University of Cambridge, Zoology Dept., Downing Street, Cambridge.—*Associate Director*, J. E. Treherne, Ph.D., Sc.D.

Unit of Muscle Mechanism and Insect Physiology, Dept. of Zoology, University of Oxford, South Parks Road, Oxford.—*Hon. Dir.*, Prof. J. W. S. Pringle, M.B.E., Sc.D., F.R.S.

Unit of Nitrogen Fixation, University of Sussex, Brighton.—*Director*, Prof. J. Chatt, Ph.D., Sc.D., F.R.S.

Unit of Reproductive Physiology and Biochemistry, 307 Huntingdon Road, Cambridge.—*Director*, Prof. T. R. R. Mann, C.B.E., M.D., Sc.D., Ph.D., F.R.S.

Unit of Soil Physics, 219c Huntingdon Road, Cambridge.—*Dir.*, E. G. Youngs, Ph.D. (*acting*).

Steel Castings.

STEEL CASTINGS RESEARCH AND TRADE ASSOCIATION, East Bank Road, Sheffield 2.—*Director* J. C. Wright, Ph.D.

Timber.

TIMBER RESEARCH AND DEVELOPMENT ASSOCIATION, Hughenden Valley, High Wycombe, Bucks.—*Dir.*, J. S. McBride.

Toxicology.

BRITISH INDUSTRIAL BIOLOGICAL RESEARCH ASSOCIATION, Woodmansterne Road, Carshalton, Surrey.—*Dir.*, R. F. Crampton, Ph.D.

Water.

WATER RESEARCH CENTRE, Ferry Lane, Medmenham, Marlow, Bucks.—*Dir.*, R. G. Allen, O.B.E., Ph.D.

Welding.

WELDING INSTITUTE, Abington Hall, nr. Cambridge.—*Dir.-Gen.*, R. Weck, C.B.E., Ph.D.

Wool.

WOOL INDUSTRIES RESEARCH ASSOCIATION (Wira), Headingley Lane, Leeds 6.—*Dir.*, B. E. King, Ph.D.

Unit of Statistics, University of Edinburgh, 21 Buccleuch Place, Edinburgh 8.—*Hon. Director*, Prof. D. J. Finney, Sc.D., F.R.S., F.R.S.E.

Statistics Group, Dept. of Applied Biology, Downing Street, Cambridge.

Systemic Fungicide Unit, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, C.B.E., D.Sc., Ph.D., F.R.S.

Institute for Research on Animal Diseases, Compton, Newbury, Berks.—*Director*, J. M. Payne, Ph.D.

Institute of Animal Physiology, Babraham, Cambs.—*Director*, B. A. Cross, Ph.D., Sc.D., F.R.S.

Animal Breeding Research Organisation, West Mains Road, Edinburgh 9.—*Director*, J. W. B. King, Ph.D., F.R.S.

Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, T. C. Carter, O.B.E., Ph.D., D.Sc., F.R.S.E.

Letcombe Laboratory, Letcombe Regis, Wantage, Oxon.—*Director*, R. Scott Russell, C.B.E., D.Sc., Ph.D.

Weed Research Organisation, Begbroke Hill, Sandy Lane, Yarnton, Oxford.—*Director*, J. D. Fryer.

Food Research Institute, Colney Lane, Norwich.—*Director*, Prof. S. R. Elsdon, Ph.D.

Meat Research Institute, Langford, nr. Bristol.—*Director*, J. R. Norris, Ph.D. (also Weston Laboratory, Bridge Road, Weston-super-Mare).

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture and Fisheries for Scotland.

Long Ashton Research Station, Bristol.—*Director*, Prof. J. M. Hirst, D.Sc., Ph.D., F.R.S.

Animal Diseases Research Association (Scotland), Moredun Institute, 408 Gilmerton Road, Edinburgh.—*Dir.*, J. T. Stamp, D.Sc., F.R.S.E.

Animal Virus Research Institute, Pirbright, Surrey.—*Director*, J. B. Brooksby, C.B.E., D.Sc., F.R.S.E.

East Malling Research Station, Maidstone, Kent.—*Director*, A. F. Posnette, C.B.E., Ph.D., Sc.D., F.R.S.

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, D. Rudd-Jones, Ph.D.

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, Prof. E. K. Woodford, O.B.E., Ph.D.

Hannah Research Institute, Ayr.—*Director*, Prof. J. A. F. Rook, Ph.D., D.Sc.

Hill Farming Research Organisation, Bush Estate, Penicuik, Midlothian.—*Director*, J. M. M. Cunningham, Ph.D.

Hop Research Centre, Wye College, Ashford, Kent. *Head of Dept.*, R. A. Neve, Ph.D.

Houghton Poultry Research Station, * Houghton, Huntingdon.—*Director*, P. M. Biggs, Ph.D., F.R.S.

John Innes Institute, Coiney Lane, Norwich.—*Director*, Prof. R. Markham, Ph.D., F.R.S.

Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, R. L. Mitchell, Ph.D., F.R.S.E.

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Bedford.—*Director*, C. J. Moss.

Scottish Institute of Agricultural Engineering, Scottish Station, Bush Estate, Penicuik, Midlothian.—*Director*, W. J. West, F.R.S.E.

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Prof. B. G. F. Weltz, O.B.E., D.Sc.

National Vegetable Research Stn. Wellesbourne, Warwick.—*Director*, Prof. D. W. Wright.

Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, Prof. R. Riley, D.Sc., F.R.S.

Welsh Plant Breeding Station, Plas Gogerddan, nr. Aberystwyth.—*Director*, Prof. J. P. Cooper, Ph.D., D.Sc.

Scottish Plant Breeding Station, Pentlandsfield, Roslin, Midlothian.—*Director*, J. H. W. Holden, Ph.D. (acting).

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, K. L. Blaxter, D.Sc., F.R.S.

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, L. Fowden, Ph.D., F.R.S.

Scottish Horticultural Research Institute, Invergowrie, Dundee.—*Director*, C. E. Taylor, Ph.D.

*Financed jointly by the Agricultural Research Council and the Animal Health Trust.

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The following alphabetical list comprising 29 women and 22 men shows the principal charitable bequests since our last issue. Legacies and certain other charges are deductible from gross estates before the amounts for charity can be arrived at.

Barbara Hepworth, the sculptor, who was found dead after a fire at her Cornwall studio, left £10,000 to Westminster Hospital, London, for cancer research, to be known as "The Dame Barbara Laboratory of Tumor Biology", and three cancer charities share the whole of Mrs. Jeanne O. J. Western's estate—she died in hospital after jumping from a first-floor window to escape a fire in Peter Street, Soho.

The Friends Service Council receive half the estate of Peter R. Selwood, of Southampton, who left £978,077, and St. Mary's Parish Church Council, Petworth, Sussex, are left a £10,000 legacy under the will of Donal W. Morphy.

A retired engineer from Bournemouth—Ernest W. Davies—and Reginald F. Gard, of Bristol, both left the whole of their estates to the Salvation Army, and Oxfam inherit £44,000, the whole of Miss Violet E. Olney's property.

The National Trust benefit under certain wills—Leslie Forder left them all his property to purchase coastal land in the West Country and Edward D. Jackson, of Bellister Castle, Haltwhistle, left the Bellister Castle Estate, other than endowment land, to the Trust, provided they pass a resolution declaring that the estate "is proper to be held for the benefit of the nation and shall be inalienable", and the said endowment land held as a source of income for the estate.

Oswald Claus and the Rt. Rev. Ronald O. Hall both left varying amounts for such general charitable purposes as their respective trustees select, whereas James J. Hancock, left all his £179,649 estate for such charities for the welfare of old aged and lonely people as his executor selects.

Wilson P. Grant, a caretaker, left all his property to Chertsey and Walton Constituency Labour Party, and the RAF Benevolent Fund receive most of Mrs. Miriam E. M. Lousada's £248,852 estate, in memory of her son Ormond, an Air Gunner in the RAF, killed on active service on air operations on November 13, 1944.

The principal figure in the list below is that of the gross estate.

Miss Mildred Dorothy Bellamy, of Shirley, Solihull, £75,463
(Residue equally between RSPCA, PDSA, and St. Dunstan's.)

Mr. Leslie Birkett, of Chigwell, Essex... £429,607
(Residue to Imperial Cancer Research Fund.)

Mrs. Bertha Bradbury, of Wembley... £104,271
(Residue equally between the Greater London Fund for the Blind, Dr. Barnardo's and the RSPCA.)

Mrs. Edith Bragg, of Sittingbourne, Kent. £30,684
(Residue equally between the PDSA, Dr. Barnardo's, The Poplar Mission, and Royal National Mission to Deep Sea Fishermen.)

Mr. Oswald Claus, of Blackburn... £33,294
(Residue to such charities as his executors select.)

Mr. John Solomon Cohen, of London... £194,821
(£50,000 each to the John S. Cohen Foundation and the Friends of the Hebrew University of Jerusalem.)

Mr. Herbert Samuel Jared Cook, of Weston super Mare... £32,265
(Residue equally between the Imperial Cancer Research Fund and Arthritis and Rheumatism Council.)

Mr. Edward Owen Crosse, of Reading... £73,359
(All property equally between RNIB, British Sailors Society and RNLI.)

Grace Marion Davidson, of Bristol... £24,777
(All property to Bristol Dogs Home.)

Mr. Ernest William Davies, of Bournemouth
£41,814
(All property to the Salvation Army.)

Miss Gertrude Jane Dickinson, of Washington, Tyne and Wear... £25,998
(All property to the RSPCA.)

Mr. John Emmott, of Kelghley, Yorks... £35,443
(All property to the Yorkshire Naturalists Trust.)

Miss Edith Winifred Evans, of Epsom, Surrey
£102,201
(Residue equally between the PDSA and Cats Protection League.)

Mr. Leslie Forder, of London... £47,325
(All property to the National Trust.)

Mr. Reginald Frederick Gard, of Bristol... £20,461
(All property to the Salvation Army.)

Mr. Wilson Phelps Grant, of Ottershaw, Surrey
£28,164
(All property to Chertsey and Walton Constituency Labour Party.)

Rt. Rev. Ronald Owen Hall, of Lewknor, Oxon... £214,818
(£50,000 for such charitable purposes in the UK or the Diocese of Hong Kong as his trustees select.)

Mr. James James Hancock, of Brighton... £179,649
(All property to such charities for the welfare of old aged and lonely people as his executor selects.)

Miss Annie Dewar Henderson, of London. £65,835
(Residue equally between the RNLI, Dr. Barnardo's and Bank Clerks Orphans Fund.)

Mr. William Henry Horden, of Bournemouth
£104,712
(£25,000 to RNLI, £500 to RSPCA, and residue equally between the Imperial Cancer Research Fund and Cheshire Homes.)

Mr. George Newman Horne, of Bidborough, Kent... £301,893
(£50,000 to the Cophall Trust Fund.)

Mr. Percy Henry Horsford, of Rushden, Northants... £21,535
(Half property to the National Society for Mentally Handicapped Children, and half property equally between RNIB and Wellingborough and District Chest Care Association.)

2nd Baron Inverforth of London... £532,362
(£10,000 each to Salvation Army, Wildfowl Trust, Imperial Cancer Research Fund, and Distressed Gentlefolks Aid Association, and £5,000 to the Baltic Exchange Benevolent Fund.)

Mr. Edward Donaldson Jackson, of Haltwhistle, Northumberland... £395,299
(Bellister Castle Estate, other than endowment lands, to National Trust.)

Deana Kurlander, of London... £22,619
(All property to Jewish Blind Society.)

Mrs. Miriam Evelyn Mary Lousada, of Todenham, Gloucs... £248,852
(Residue to RAF Benevolent Fund.)

Miss Mollie Marsden, of Skellow, near Doncaster
£35,859
(Residue equally between Marie Curie Memorial Foundation, Imperial Cancer Research Fund and Royal Commonwealth Society for the Blind.)

- Mr. Herbert Miller, of Chelmsford.....£633,878
(£600 and two thirds of residue to USPG and a third of residue to British and Foreign Bible Society.)
- Mr. Donal Willam Morphy, of Byworth, Petworth, Sussex.....£280,669
(£10,000 to St. Mary's Parish Church Council, Petworth.)
- Dame Barbara Hepworth-Nicholson, of St. Ives, Cornwall.....£2,970,049
(£10,000 to Westminster Hospital, London, for cancer research.)
- Miss Violet Elizabeth Olney, of Rhos on Sea, N. Wales.....£44,322
(All property to Oxfam.)
- Mrs. Diana Margaret Pannett, of Basingstoke, Hants.....£74,557
(All property to the National Trust.)
- Mrs. Olga Parbury, of Bexhill, Sussex....£52,146
(All property to the Imperial Cancer Research Fund.)
- Mrs. Ethel Elizabeth Pepper, of Ashtead, Surrey £213,746
(Residue equally between NSPCC, Dr. Barnardo's, Children's Society, National Childrens Home, Shaftesbury Society, Save the Children Fund, and Cheshire Homes.)
- Miss Annie Perry, of Clayton le Moors, Lancs. £28,767
(All property equally between Marie Curie Memorial Foundation and Accrington and District Institution for the Blind.)
- Doris Beatrice Pink, of Wallington, Surrey £41,157
(All property to the PDSA.)
- Miss Emily Matilda Potter, of Burgess Hill, Sussex.....£24,113
(All property to St. Dunstan's.)
- Mr. John Reach, of Westcliff on Sea.....£82,794
(£2,000 to National Art Collection Fund, £1,000 each to Imperial Cancer Research Fund and British Heart Foundation, and residue to Jewish National Fund.)
- Mr. Christopher Herbert Renny Reeves, of Podington, Beds.....£3,620,914
(£20,000 to his executors "to be given by them on my behalf as they may in their absolute discretion decide".)
- Miss Vera Muriel Robertson, of Godalming, Surrey.....£30,167
(Residue to PDSA.)
- Miss Esme Dorothy Theresa Roe, of Southsea, Hants.....£59,204
(£10,000 each to CMS, London City Mission and London Embankment Mission, £3,000 to the Commonwealth and Continental Church Society, £1,000 to two churches in Southsea, £500 to the Bible Flower Mission, and residue to British and Foreign Bible Society.)
- Mrs. Agnes Eveline Rowland, of Seaton Delaval, Tyne and Wear.....£31,681
(All property to Imperial Cancer Research Fund.)
- Mrs. Mary Jocelyn St. Barbe, of Falmouth, Cornwall.....£393,643
(£42,000 and some effects to National Trust, and £4,000 each to Guide Dogs for the Blind Association, Distressed Gentlefolks Aid Association, Help the Aged and the Samaritans.)
- Mr. Peter Richard Selwood, of Bassett, Southampton.....£97,077
(Half property to Friends Service Council.)
- Mrs. Martha Ellen Spedding, of Barnsley..£86,453
(£100 to Kendray Hospital, Barnsley, and residue equally between RNIB and Royal Association in Aid of the Deaf and Dumb.)
- Miss Marjorie Helen Victoria Strong, of Trowbridge.....£57,187
(Residue to Musicians Benevolent Fund.)
- Mrs. Bertha Thompson, of Manchester...£46,436
(Residue to PDSA.)
- Miss Sarah Witham Thompson, of Ingleton, Yorks.....£447,428
(£50,000 to RNLI, £5,000 to Thornton in Lonsdale Parish Church, and £2,000 each to RUKBA and Salvation Army.)
- Mrs. Elsie Turner, of Sheffield.....£28,105
(All property equally between RNLI, RSPB and RSPCA.)
- Miss Alice Annie Webb, of London.....£59,426
(All property equally between Salvation Army, Cancer Research Campaign, Save the Children Fund, National Association for Mental Health, RNIB and NSPCC.)
- Mrs. Jeanne Odette Juliette Western, of London £32,258
(All property equally between Cancer Research Campaign, Imperial Cancer Research Fund and Institute of Cancer Research.)

BRITISH INSURANCE COMPANIES IN 1975

In 1975, the worldwide general business premium income of the insurance companies increased by £712 million to £4,641 million, an increase of 18% over 1974.

The general insurance funds and the shareholders' capital and free reserves held as security for policyholders at the end of 1975 amounted to £6,507 million and represented 140% of premium income, compared with £5,272 million (134% of premiums) at the end of 1974.

Investment income earned on these funds was £465 million. Against this, companies sustained an underwriting loss on general worldwide business of £180 million (4.0% of premiums) compared with a loss of 2.9% of premiums (£107.0 million) in 1974.

RESULTS IN MAJOR TERRITORIES

United Kingdom

There was a small motor underwriting loss of £4.6 million (0.7% of premiums). Claims costs were increased by factors which included increases in the cost of spare parts (18%), garage charge out rates (21%), car prices (over 20%) and payments for bodily injuries (30%).

The outturn of fire and accident (non motor) business was a modest profit of £20.3 million (2.1% of premiums).

United States

The loss on underwriting in the U.S.A. was £117.5 million (£46.1 million in 1974). Motor results deteriorated with a loss of £74.7 million (£11.3 million in 1974). Fire and accident (non motor) underwriting losses were £42.8 million (£34.8 million in 1974).

British companies operating in the U.S.A. are intensifying their policy of very selective underwriting to counteract the poor experience in that territory, especially in motor business.

Rest of the World

The deterioration in the motor account was seen also in other overseas territories, where there was a loss in this class of business of £70.5 million or 12% of premiums (£41.6 million, 8.6% of premiums in 1974).

There was a marked improvement in fire and

accident classes which produced a marginal loss of £2.7 million, compared with a £52.3 million loss in 1974.

Factors particularly influencing this improvement included much reduced losses in Australia and Canada. Experience in South Africa became generally unfavourable.

MARINE, AVIATION AND TRANSPORT

Worldwide premium income for marine and aviation rose by 8.6% to £408 million and transfers from profit and loss accounts totalled £5.0 million.

Towards the end of the year, two of the largest tankers, "Kriti Sun" and "Burge Istra", blew up in the Far East. Each was insured for over £10 million, more than 70% covered by British insurers. Since then, these losses have been overshadowed by the "Olympic Bravery" which went aground on its maiden voyage. Two wide-bodied jet aircraft were destroyed in 1975 and two others severely damaged although fewer people were killed in aviation accidents.

OVERSEAS EARNINGS

60% of general premium income relates to overseas operations and a major contribution is made to foreign currency earnings. The most recent figures put the annual invisible earnings, from all insurance activities (comprising companies, Lloyd's and brokers), at £372 million.

INVESTMENTS

Invested funds arising from long term insurance totalled £21,877 million at book values at 31st December 1975. Income from these funds was £1,727 million.

As already stated, invested funds arising from general business totalled £6,507 million at book values at 31st December 1975. Income from these funds was £465 million.

Market values for both long term and general funds were some 8% above the corresponding book values.

NOTE: Insurance company figures refer to British Insurance Association members who transact some 95% of the world-wide business of the British insurance company market.

WORLDWIDE GENERAL PREMIUMS 1974 AND 1975

	1974	1975	Increase
	£m	£m	%
Fire and Accident (non-motor)	2,271	2,687	18.3
Motor	1,282	1,546	20.6
Marine, Aviation and Transport	376	408	8.6
TOTAL	3,929	4,641	18.1

NOTE: 1. These tables are compiled from worldwide figures provided by those members of the BIA which have head offices in the U.K. and U.K. premiums for those members with head offices outside the U.K.

2. The above figures include business transacted by specialist reinsurers, and business written on a 3 year account basis which is not included in later tables.

WORLDWIDE UNDERWRITING RESULTS 1974 AND 1975

LLOYD'S OF LONDON

Lloyd's of London is an international market for almost any type of insurance. Ships, aircraft, oil rigs, cargo of all descriptions, motor cars, civil engineering projects, fire, personal accident and third party liability are a few random examples of the everyday risks placed at Lloyd's which bring some £750 million of premiums to underwriters each year. Two thirds of this business comes from outside Great Britain and makes a valuable contribution to the country's balance of payments.

Today, as it was three centuries ago, a policy is subscribed at Lloyd's by private individuals with unlimited liability. Now that Lloyd's members are numbered in their thousands, however, the method of underwriting is the same only in principle. The merchant of the past, signing policies in a coffee house as a sideline to his main business, has long since given way to the specialist underwriter who accepts risks at Lloyd's on behalf of members grouped in a syndicate. There are currently about 270 syndicates of varying sizes, some with up to several hundred names and each managed by a full-time underwriting agent.

Lloyd's membership today is drawn from many sources. Industry, commerce and the professions

are strongly represented while many members are, of course, actively engaged at Lloyd's either on the broking or the underwriting side.

Underwriting membership of Lloyd's is open to men and women of any nationality provided that they meet the stringent financial requirements of the Committee of Lloyd's. Assets of at least £75,000 have to be shown and a minimum deposit of £10,000 must be lodged with the Corporation of Lloyd's as security for underwriting liabilities.

Lloyd's also provides the most comprehensive shipping intelligence service available in the world. The enormous volume of shipping information received from Lloyd's agents, radio stations, ship-owners and other sources is collated and distributed to newspapers, radio and television services, and throughout the marine and commercial communities in general.

This information is edited, printed and published at Lloyd's and sent all over the world. "Lloyd's List" is London's oldest daily newspaper and contains news of general commercial interest as well as shipping information. "Lloyd's Shipping Index" also published daily, lists some 18,000 ocean-going vessels in alphabetical order and gives the latest known report of each.

LLOYD'S UNDERWRITERS

SUMMARY OF ACCOUNTS AS AT DECEMBER 31, 1973

In the summaries: (1) Premiums include the reinsurance premium (if any) received from a previous closed account; and (2) Claims include the reinsurance premium paid or amount placed to reserve at close of third year.

LIFE ASSURANCE IN 1975

These figures take into account all forms of ordinary and industrial life assurance, including business written under occupational pension schemes, and business written overseas by U.K. offices and their subsidiaries.

In 1975 the total of yearly premiums for life assurance and annuities rose to £2,760 million from £2,420 million in 1974, an increase of 14%. Single premiums decreased from £890 million to £640 million, this reduction being mainly due to a fall in the issue of guaranteed income bonds.

Benefits paid to policyholders, including amounts paid on death and maturity and payments to annuitants, totalled £2,190 million.

Investment income earned on life assurance and annuity funds totalled £1,830 million in 1975, against £1,570 million the previous year.

Amounts put aside to meet future claims totalled £2,560 million, representing new money made available for investment in 1975 through life assurance savings.

The total value of life funds increased from £19,600 million to £23,000 million, reflecting both new money put aside and also the recovery in

market values of assets from the low levels existing at the end of 1974.

LIFE ASSURANCE NEW BUSINESS 1975

	1975 £m	1974 £m
New yearly premiums	943	746
Single premiums and considerations for immediate and deferred annuities	248	546
Benefits secured by these premiums		
New sums assured	34,100	26,000
New annuities, deferred and immediate	1,100 p.a.	941 p.a.

INDUSTRIAL LIFE ASSURANCE 1975

The following figures are based on returns from 18 "home service" insurance offices, which together transact over 99% of all industrial assurance business. While they, unlike all other insurers, transact industrial life assurance, they also carry on a very considerable volume of ordinary life and general insurance business, much of it in policyholders' homes.

THE LIFE ASSURANCE COMPANIES

The list on the following pages contains the names of all the more important British life offices, and of Commonwealth offices (marked C) which transact life business in this country.

Class of business. The second column shows whether the company is conducted on the mutual system whereby the whole of the divisible profit is allotted to participating policyholders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profits received (P). Life offices transacting other business are marked (O) in this column. In such cases the life funds are kept separately, and are not liable for the claims of other departments. The share capital is usually liable for the claims of all branches. Those having an industrial branch are indicated by letter (I).

Figures. These are taken from the latest annual accounts available at date of going to press and in the majority of cases refer to annual reports for the financial year ended December 31, 1975.

Life funds. The amounts of these funds, though of interest, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actually compared with assets.

Premium income. The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risk.

Consideration for annuities.—These are the amounts received to provide various types of annuities.

Interest.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source bonus declaration. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

Valuation.—The valuation returns which are required to be made by the companies to the Department of Trade and Industry indicate liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used) and that interest will be earned at a certain rate. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced

liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

Types of policy.—Although there are scores of life offices in Britain each offering their own particular products under a wide variety of labels, there are really only four basic types of contract. These are:

1. "Term" assurance (sometimes called "temporary" assurance). With this type of policy the assurer, in return for a regular premium agrees to pay the sum assured if the person assured should die within the term of years stated by the policy.

Such policies take care of the temporary need for protection of the family while the children are growing up, and the family is therefore most vulnerable. The commonest and most popular forms are to cover the mortgage on the family home or to assume a regular tax-free income for the family over so many years should the breadwinner die. This is much the cheapest form of life assurance because the majority of policies invariably do not result in claims.

2. "Whole-life" assurance is one under which the assurer undertakes to keep the assurance in force provided the premiums are paid for the whole life of the assured. They will then pay the agreed sum whenever death takes place.

This costs a good deal more than term, naturally. All policies end in claims.

3. "Endowment" assurance. This contract really is one which uses a fund for saving to a particular target sum by a particular future date and at the same time secures payment of the sum assured should the saver die before that date arrives. In return for the continued payment of a regular premium over a fixed number of years, the assurer agrees to pay the sum assured at the end of that time, or earlier if the assured person should die. The bulk of an endowment assurance premium is savings; consequently the premium of such a contract is a lot higher than that for a whole life assurance.

4. "Annuities". Life assurance can be divided broadly speaking into death or survival benefits. Death benefits are paid to a policyholder's dependants if and when he dies. Survival benefits are paid to the policyholder himself either in the form of a cash sum when he reaches a certain age or in the form of a guaranteed annual income for life, which is known as an annuity. Pensions are annuities of a kind and a very large proportion of the pension due to people are being and will be paid by funds run by life offices.

POLICYHOLDERS PROTECTION BOARD

Aldermay House, Queen Street, London E.C.4

The Policyholders Protection Act 1975 put into effect the scheme whereby private policyholders of companies in liquidation will normally be granted 90 per cent. (100 per cent. in the case of compulsory insurance) of the benefits promised under their policies. The scheme will be financed mainly by a compulsory levy on insurance companies limited to a maximum of 1 per cent. of their annual net premium income. The Board consists of five members, of whom three are drawn from the management of insurance companies and at least one must be qualified to represent the interests of policyholders.

DIRECTORY OF INSURANCE COMPANIES

The class of Insurance undertaken is shown in the second column as follows: A—Accident (which includes Motor, Employers' Liability, etc.); F—Fire (including Burglary); L—Life; and M—Marine. A number of offices are now included in a Group—the initials of which appear after the name. The main Groups are as follows—E.S.—Eagle Star; C.U.—Commercial Union; G.R.E.—Guardian Royal Exchange; G.A.—General Accident; N.U.—Norwich Union; R—Royal; S.A.—Sun Alliance & London.

NORTH ATLANTIC TREATY ORGANIZATION

Headquarters: Brussels 1110, Belgium.

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany in 1955. The North Atlantic Council is the highest authority of the Alliance and is composed of permanent representatives of the fifteen member countries. It meets at ministerial level at least twice per year. The permanent representatives head national delegations of advisers and experts.

Permanent U.K. Representative, His Excellency Sir John Killick, K.C.M.G. (1975)

The senior military authority in NATO is the Military Committee composed of a Chief-of-Staff of each member country except France. The Military Committee, which is assisted by an international military staff, functions in permanent session with permanent military representatives and is responsible for higher strategic direction throughout the North Atlantic Treaty area.

Secretary-General, J. M. A. H. Luns (Netherlands). Deputy Secretary-General, P. Pansa Cedronio (Italy).

Assistant Secretaries-General, Dr. E. F. Jung (Fed. Republic of Germany) (Political Affairs); D. C. Humphreys (U.K.) (Defence Planning and Policy); Dr. W. B. LaBerge (U.S.) (Defence Support); Prof. Nimet Ozdas (Turkey) (Scientific Affairs).

Supreme Allied Commander, Europe, Gen. Alexander M. Haig (U.S.).

Supreme Allied Commander, Atlantic, Admiral Isaac C. Kidd (U.S.).

Allied Commander-in-Chief, Channel, Admiral Sir John Treacher, K.C.B. (U.K.).

Chairman, Military Committee, Admiral of the Fleet Sir Peter Hill-Norton, G.C.B. (U.K.).

SOUTH-EAST ASIA TREATY ORGANIZATION

Headquarters: Bangkok, Thailand.

The South-East Asia Collective Defence Treaty (The Manila Pact) was signed on September 8, 1954, by representatives of Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the United States. Pakistan withdrew from the Treaty and ended its participation in SEATO on November 7, 1973. France, which had ceased to participate in the military activities of SEATO in 1967, terminated financial contributions on June 30, 1974, and ended its limited participation in the Organization's civil activities. France nevertheless remains a party to the Manila Pact.

At their Twentieth Annual Meeting in New York City on September 26, 1975, the SEATO Council of Ministers announced that while the Organization had over the years made a useful

contribution to stability and development in the region, they had decided that in view of the changing circumstances it should now be phased out in an orderly and systematic manner. The phasing-out process is now under way.

The Manila Pact consists of eleven Articles, with the Parties undertaking mutual defence responsibilities in the Treaty Area. Other articles deal with mutual economic assistance, including technical assistance, designed to promote economic progress and social well-being; the rights and obligations of the parties under the Charter of the United Nations; and the area to which the Treaty applies. The United States executed the Treaty with the understanding that its recognition of the effect of aggression and armed attack apply only to Communist aggression, but agreed to consult with the other signatories in the event of any other armed attack.

In an accompanying declaration of principles, The Pacific Charter, the Treaty powers uphold the principle of equal rights and self-determination of peoples. They state that they will earnestly strive by every peaceful means to promote self-government and to secure the independence of all countries whose people desire it and are able to undertake its responsibilities. They state that they will continue to co-operate in the economic, social and cultural fields in order to promote higher living standards, economic progress and social well-being in the region. They express their determination to prevent or counter by appropriate means any attempt in the Treaty Area to subvert their freedom or destroy their sovereignty or territorial integrity.

Member countries are represented on a Council of Ministers which normally meets annually to review and determine policy. The Council Representatives, composed of the Ambassadors to Thailand of the member countries and a Thai Foreign Ministry official of ambassadorial rank, meet periodically in Bangkok to supervise the work of the Organization.

Secretary-General, Sunthorn Hongladarom (Thailand).

Deputy Secretary-General, Commodore Rachel R. Cruz (Philippines).

CENTRAL TREATY ORGANIZATION

Headquarters: Ankara, Turkey.

A mutual security and defence treaty was concluded between Turkey and Iraq at Baghdad on Feb. 24, 1955. Three further states, the United Kingdom, Iran, and Pakistan signed the *Baghdad Pact* later in the same year. The United States, although not a full member of the Council, participates in an observer capacity, is a member of all major committees, and contributes an equal share to the international staff and budget, as well as a large share of economic and military assistance. Iraq formally withdrew from the Pact on March 24, 1959, and the title Central Treaty Organization (C.E.N.T.O.) was adopted on Aug. 21, 1959.

Secretary-General, U. Haluk Bayülken (1975).

† Gifts of special money distributed by the Sovereign annually on Maundy Thursday to the number of aged poor persons corresponding to the Sovereign's own age.

Gold Coin.—Gold ceased to circulate during the First World War. An Order of April 27, 1966, made it illegal for U.K. residents to continue holding more than 4 gold coins minted after 1837, or to acquire such coins unless they had been licensed as genuine collectors by the Bank of England. This Order was revoked on April 1, 1971, by the Exchange Control (Gold Coins Exemption) Order, 1971, whereby residents of the United Kingdom, Channel Islands and the Isle of Man may freely buy and sell and hold gold coins.

The 1971 order was revoked on April 15, 1975, by the Exchange Control (Gold Coin Exemption) Order, 1975. Under this Order Section 1 of the Exchange Control Act 1947 (which prohibits dealings in gold or foreign currency except with Treasury permission) is exempted for gold coins minted in or before 1837. But in relation to gold coins minted after 1837, the Order exempts from Section 1 the following transactions only:

- Buying and selling such coins if held in the U.K. and if the seller is resident in the U.K. and is not selling on behalf of a non-resident.
- Borrowing and lending such coins if held in the U.K. and if the borrower and lender are resident in the U.K.

Accordingly any other transactions in gold coins minted after 1837 (if prohibited by Section 1) now require Treasury permission.

The English sovereign, however, is still used as currency in certain Middle East countries and to meet foreign demand during the years 1958–1968 the Royal Mint struck some 44.5 million sovereigns.

Silver.—Prior to 1920 our silver coins were struck from standard silver—an alloy of which 925 parts in 1,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. From January 1, 1947 all 'silver' coins, except Maundy money, have been struck from cupro-nickel—in alloy of copper 75 parts and nickel 25 parts. Maundy coins since 1947 have been struck from standard silver.

Bronze, introduced in 1860 to replace copper, is an alloy of copper 97 parts, zinc 2½ parts and tin ½ part. These proportions are subject to slight variation.

The 'Remedy' is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Mint.

Legal tender of coin.—Gold, dated 1838 onwards, if not below least current weight, is legal tender to any amount. Since Decimal Day (Feb. 15, 1971) cupro-nickel (silver) coins with values up to and including the 10p have been legal tender up to £5. The 50p coin has been legal tender up to £10 from

the date of its introduction. Bronze coins are legal tender for amounts up to 20p. Farthings ceased to be legal tender on December 31, 1960, the halfpenny on August 1, 1969, the halfcrown on January 1, 1970, and the threepence and penny on August 31, 1971.

THE WORK OF THE ROYAL MINT
DURING 1975

During the year under review, the Royal Mint produced some 1671 million coins, almost all of which were struck at Llantrisant. Tower Hill concentrated on the manufacture of sovereigns, coinage blanks, official and commercial medals and the production of embossing seals and revenue dies until these operations too were transferred to Llantrisant at the end of October 1975.

The domestic coinage production in 1975 was made up as follows:

Sovereigns.....	4,000,000
UK 50p.....	41,500,000
10p.....	166,075,000
5p.....	83,850,000
2p.....	111,199,000
1p.....	241,800,000
½p.....	209,200,000

UK Decimal Proof Coin.....	22,158
Maundy Money.....	4,594
Overseas Coin.....	813,252,839
Overseas Proof Coin.....	638,053

Coinage for overseas governments accounted for nearly 49% of the year's total production. In addition, some 458 million coins for export were struck by sub-contractors working under Royal Mint supervision. Countries and territories to which coins have been supplied include:—

Afghanistan, Bahamas, Bahrain, Belize, Bermuda, Brunei, Cayman Islands, Costa Rica, Dominica, Eire, Eastern Caribbean, Ecuador, El Salvador, Equatorial Guinea, Ethiopia, The Gambia, Ghana, Gibraltar, Guyana, Guernsey, Hong Kong, Iceland, Iraq, Jamaica, Jersey, Jordan, Kenya, Kuwait, Liberia, Libya, Malawi, Malta, Mauritius, Morocco, Nepal, New Zealand, Nicaragua, Oman, Papua New Guinea, Seychelles, Sierra Leone, Swaziland, Tanzania, Thailand, Uganda, United Arab Emirates, Venezuela, Yemen Arab Republic, Zaire and Zambia.

The output of medals during the year totalled 107,891. Among medals of new design were:—

Dictionary of International Biography 10th Anniversary: FAO "Ceres" (Dame Margot Fonteyn de Arias, Kathleen Kenyon, Iris Murdoch, Mother Teresa, Matsuyo Yamamoto): International Who's Who in Music: International Who's Who in Poetry: New Zealand Queen's Service Medal, New Zealand Queen's Service Order: Numismatic Society: Royal Observatory Tercentenary and Tower Hill Closure Medal.

Among the seals manufactured were a number for various British Embassy posts and for Government Departments in this country.

BANK NOTES

Bank of England notes are currently issued in denominations of £1, £5, £10 and £20 for the amount of the Fiduciary Note Issue, and are legal tender in England and Wales. Only £1 notes are legal tender in Scotland and Northern Ireland.

The last of the old white £5 notes dated up to September 20, 1956, and the £5 notes issued between 1957 and 1963, bearing a portrait of Britannia, ceased to be legal tender on March 14, 1961, and June 27, 1967, respectively. The next series of £5 notes—the first to bear a portrait of the

Queen—were first issued in 1963 and ceased to be legal tender on September 1, 1973. The old series of £1 notes issued during the years 1928 to 1960 and the 10s. notes of the same type issued from 1928 to 1961—those without the royal portrait—ceased to be legal tender on May 29 and October 30, 1962, respectively. The 10s. note was replaced by the 50p coin in October 1969, and ceased to be legal tender on November 21, 1970. Bank notes which are no longer legal tender are payable when presented at the Head Office of the Bank of England in London.

The old white notes for £10, £20, £50, £100, £500 and £1,000, which were issued until April 22, 1943, ceased to be legal tender in May 1945. However, on February 29, 1976 the value of these notes still outstanding amounted to some £881,000.

The £10 note—after an interval of 21 years was reissued on February 21, 1964. This completed the original series bearing portraits of the Queen, plans for which were announced in November 1959.

In 1968 the Bank announced that a new series of Bank notes generally smaller in size than the notes they replace, would be issued in the 1970's. First of the series was a £20 note, which the Bank of England introduced on July 9, 1970. This was followed by the new £5 note introduced on November 11, 1971, and the new £10 note introduced on February 20, 1975. A new £1 note will be introduced in due course to complete the series.

Note circulation is highest at the two peak spending periods of the year—around Christmas and the Summer holiday period. On December 24, 1975 it reached a peak of £6,514 million which was £555 million more than the previous peak of £5,959 million reached on July 30, 1975.

£5 notes continue to enjoy popularity and now represent over 54 per cent of the total value of notes in circulation as against 14 per cent in 1956. On the other hand, the proportion of £1 notes has dropped from 76 per cent to a fraction over 13 per cent. The percentage of £10 notes in circulation has increased steadily since 1965 and now represents over 19 per cent of the total. The proportion of £20 notes in circulation now amounts to 8 per cent of the total compared with just over 2 per cent in 1971. On February 29, 1976 the values of notes in circulation were:—£20: £499,977,000; £10: £1,157,022,000; £5: £3,261,425,000; £1: £831,173,000; 10s: £12,923,000.

Partly because of the rapidly growing preference by the public for new notes rather than used ones, the demand for new bank notes has increased greatly in recent years. Between 1957 and 1975 the average life of a £1 note fell from 19 months to 9, and consequently it has been necessary for the Bank of England to print more notes per head of the population than in comparable countries abroad. To alleviate the high cost of the note replacement, the 50p coin was introduced in October, 1969, in place of the 10s. note. The Bank of England has been conducting a campaign, in conjunction with the commercial banks, to encourage the public to accept more used but clean notes and this has been successful in reducing the public's requirements of new notes.

Other Bank Notes.—Bank Notes are issued by three Scottish banks—Bank of Scotland, Clydesdale Bank Ltd., Royal Bank of Scotland Ltd. Notes of the latter's constituent banks—Royal Bank of Scotland and National Commercial Bank of Scotland Ltd.—are being withdrawn from circulation, as are those of the former British Linen Bank. These banks issue notes for £1, £5, £10, £20 and £100. Scottish notes are not legal tender, but in Scotland they enjoy a status equal to that of the Bank of England note.

Channel Isles and the Isle of Man.—The States of Jersey and Guernsey issue notes for £10, £5 and £1. The Government of the Isle of Man issues notes for £10, £5, £1 and 50 new pence. These are legal tender only in their respective islands.

Although none of the series of notes specified above is legal tender in the United Kingdom they are generally accepted by the banks irrespective of their place of issue. At one time English banks made a small commission charge for handling Scottish and Irish notes but this was abolished some years ago.

Currency Notes.—Under the provision of the Currency and Bank Notes Act 1928, Currency Notes (popularly known as Treasury Notes) of the value of 10s and £1 were replaced by the issue of Bank of England Notes of the same denominations as from November 22, 1928. Although no longer legal tender, Currency Notes are payable on presentation at the Head Office of the Bank of England.

ROADS

On April 1, 1975, the provisional total mileage of public roads in Great Britain, including green lanes, was 213,687 of which 162,372 were in England, 30,031 in Scotland and 21,284 in Wales.

Highway Authorities.—The powers and responsibilities of highway authorities in England and Wales are set out in the Highways Act 1959-1971. They are concerned mainly with the construction, improvement and maintenance of highways. The Secretaries of State for the Environment and for Wales are the highway authorities for the trunk roads in England and in Wales respectively. (Trunk roads constitute the national system of routes for through traffic and include most motorways.) Under the Local Government Act 1972, from April 1, 1974, the new county councils are the highway authorities for all highways in England (outside Greater London) and Wales, other than trunk roads. However, the new district councils have a right to maintain unclassified urban roads, footpaths and bridleways and may under agency arrangements carry out other highway functions on behalf of the county councils. In Greater London the most important non-trunk roads are metropolitan roads, for which the Greater London Council is highway authority. The Common Council of the City of London and the London borough councils are highway authorities for all other non-trunk roads in their areas.

For Scotland there is separate legislation under which the Secretary of State for Scotland is the highway authority for trunk roads. The highway authorities for non-trunk public roads are the town councils of large burghs for all such roads and the town councils of small burghs for unclassified roads in their respective areas (under the Roads and Bridges (Scotland) Act 1878), and county councils for all other non-trunk public roads (under the Local Government (Scotland) Act 1889). Under the Local Government (Scotland) Bill the highway authorities for all non-trunk public roads would, after May 15, 1975, be the councils of the proposed new regions and island areas who will have general powers of delegation which will enable them, if they wish, to delegate road functions to district councils.

The system of grant-aiding local authority expenditure on highways has recently been revised. From April 1, 1975, the GLC and all county councils in England and Wales became eligible for an annual grant towards their total transport needs. The grant, known as the transport supplementary grant, represents about one-third of Central Government's aid towards all local transport services; the remaining two-thirds is assisted through the rate support grant along with other rate-borne expenditure. For the financial year beginning April 1, 1976, local authorities received a total of £295,000,000 in transport supplementary grants.

Motorways

The network in England and Wales is based on six main routes—London-Yorkshire (M1), London-South Wales (M4), Birmingham-Bristol-Exeter (M5), Birmingham-Carlisle (M6), London-Folkestone (M20) and Lancashire-Yorkshire (M62). Other motorways in use or under construction

include M2 Medway Towns, M3 London-Basingstoke, M18 Rotherham-Goole, M40 London-Oxford, M53 Mid-Wirral, M56 North Cheshire, M73 Maryville, (M74)—Mollisburn (A80), M74 Draffen-Stonehouse (A74)—Glasgow, M9 Edinburgh-Stirling and M90 Inverkeithing-Perth.

At the end of March 1975, 1212·1 miles of motorway were open to traffic in England and Wales and 113·9 miles were under construction, with a further 313·9 miles in the firm programme.

Motor Vehicles.—The number of vehicles in Great Britain with current licences in 1975 totalled 17,489,000; cars 13,746,000; motor cycles, scooters and mopeds 1,160,000; public transport vehicles 112,000; goods vehicles 1,774,000; agricultural tractors 414,000. There were 167,000 vehicles exempt from licensing.

Driving Tests.—The number of driving tests conducted in Great Britain in the year 1975 was 1,825,032, of which 54·6 per cent. resulted in failure.

Expenditure on roads in Great Britain rose from £1,042,500,000 in 1973-74 to about £1,149,500,000 in 1974-75. The expenditure during 1974-75 may be broken down as follows: New Construction and Improvement, £687,000,000 (Trunk roads, £336,000,000; Principal roads, £270,000,000; Other roads, £81,000,000); Maintenance £292,000,000 (Trunk roads, £44,000,000; Principal roads, £166,000,000; Other roads, £182,000,000); Cleansing, Gritting and Snow-Clearing, £52,000,000 Other roads, £43,000,000); Administration £118,000,000 (Non-trunk roads) £110,000,000. In addition to the 1974-75 total of expenditure on roads, the cost of road lighting was £60,000,000, and of vehicle parks £51,000,000 (gross).

Expenditure on new construction and improvement of trunk roads in England during 1974-75 was £285,000,000. In Scotland and Wales, the figures were £31,000,000 and £20,000,000 respectively. Grants made to local highway authorities for the improvement of principal roads in the same financial year were: England, £101,000,000; Scotland, £24,000,000; Wales £9,000,000.

Road Casualties

In 1975 there were 82 vehicles for every mile of road or one vehicle for every 21 yards. Seventeen road users were killed and 873 injured on an average day.

Year	Killed	Injured	Year	Killed	Injured
1958	5,970	293,797	1967	7,319	362,659

Aircraft Fleet

The following types of aircraft were in service with British Airways: Tristar, 7; Boeing 747, 17; Boeing 707-336, 11; Boeing 707-436, 14; Super VC10, 15; Standard VC10, 4; Trident Three, 26; Trident Two, 15; Trident One, 10; Trident 1E, 3; Super 1-11, 18; 1-11/400, 7; Merchantman, 4; Viscount, 29; Concorde, 2; HS 748, 2. On order: Concorde, 3; Tristar, 8; Boeing 747, 4.

BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the Journal of that Society entitled "Interruptions in the regular rise and fall of temperature in the course of the year". Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7-14, April 11-14, May 9-14, June 29-July 4, August 6-11, November 6-13, and the warm periods July 12-15, August 12-15, and December 3-14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold or warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularities". Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5-17 stormy; Jan. 18-24 anticyclonic; Jan. 24-Feb. 1 stormy; Feb. 8-16 anticyclonic; Feb. 21-25 cold; Feb. 26-Mar. 9 stormy; Mar. 12-19 anticyclonic; Mar. 24-31 stormy; April 10-15 stormy; April 23-26 unsettled; June 1-21 summer monsoon; July 10-24 warm; Aug. 20-30 stormy; September 1-17 anticyclonic; Sept. 17-24 stormy; Sept. 24-Oct. 4 anticyclonic; Oct. 5-12 stormy; Oct. 16-20 anticyclonic; Oct. 24-Nov. 13 stormy; Nov. 15-21 anticyclonic; Nov. 24-Dec. 14 stormy; Dec. 18-24 anticyclonic; Dec. 25-Jan. 1 stormy.

BRITISH RAILWAYS IN 1975

The British Railways Board was set up, along with our other separate nationalized transport undertakings, by the terms of the Transport Act, 1962. This Act dissolved the British Transport Commission and shared its assets between the new bodies which assumed their responsibilities on January 1, 1963. Under the Act the finances of the railways were reconstructed and previous restrictions were modified to give them greater commercial freedom than they had enjoyed in the past.

The Transport Act of 1968 reduced the railways' commencing debt from £1,562,000,000 to £300,000,000. The Act also enabled the Secretary of State for the Environment to make grants for the maintenance of unremunerative passenger services.

The Railways Act of 1974 introduced a new system of financial support in accordance with EEC regulations and from January 1 1975 the Board's capital debt was reduced to £250,000,000 and their borrowing limit, including commencing debt, was increased to £600,000,000 extendable to £900,000,000.

The power to make grants for unremunerative passenger services is withdrawn. The Secretary of State is authorised to impose general obligations on the Board in respect of passenger services and is empowered to compensate the Board for providing adequate transport services. Aggregate compensation is limited to £900,000,000 extendable to £1,500,000,000, subject to Parliamentary approval.

For the purposes of management and operation the railways are divided into Regions. They cover the following areas:

1. London Midland Region—bounded by a line joining Carlisle, Oldham, Nottingham, Bedford, London, Banbury, Kidderminster, Aberystwyth.

2. Western Region—west of a line joining Yeovil, Westbury, Reading, London and the southern border of the L.M. Region.

3. Southern Region—south of a line joining Rochester, Salisbury, London and the Thames.

4. Eastern Region—east of a line joining London, Peterborough, Sheffield, Bradford and Carlisle.

5. Scottish Region—north of a line joining Carlisle and Berwick.

Staff.—On Dec. 31, 1975, British Rail employed a total staff of 189,931, compared with 194,891 on Dec. 31, 1974.

Financial Results, 1975.—The balance sheet for 1975 showed a deficit of £60,800,000, compared with a deficit of £157,800,000 for 1974 while the railway working loss (before taking interest charges or revenue from other activities into account) was £42,339,000, compared with £96,914,000 for the previous year.

OPERATING STATISTICS

At the end of 1975, British Rail had 28,872 miles of standard gauge lines and sidings in use, representing 11,258 miles of route of which 2,271 miles were electrified. Standard rail on main line has a weight of 110 lbs. per yard. British Rail had 3,860 locomotives (diesel and diesel electric, 3,508 and electric, 352); 3,412 diesel multiple-unit vehicles, 7,225 electric multiple-unit vehicles and 6,826 locomotive-hauled passenger carriages with a capacity of 1,099,391 seats or berths in 1975. Loaded train miles run in passenger service totalled 198,193,000. 714,695,000 passenger journeys were made during the year, including 282,136,000 made by holders of season tickets. The average distance of each passenger journey on ordinary fare was 28.6 miles; and on season ticket, 18.4 miles. Passenger stations in use in 1975 numbered 2,358 and freight stations 515.

Freight.—There were 216,367 freight-vehicles and 5,439 other vehicles in the non-passenger-carrying stock. 97,231,000 tonnes of coal and coke were carried in 1975, 25,727,000 tonnes of iron and steel and 53,490,000 tonnes of other traffic. Loaded train miles run in freight service totalled 47,248,000.

FUEL AND POWER

ELECTRICITY SUPPLY

England and Wales

In the year ended March 31, 1976, the electricity industry sold 189,438 million units to all consumers, a decrease of 3.3 per cent. over 1974-75. Average price per unit to consumers was 1.718p compared with 1.243p in 1974-75. At the end of the year there were 19,526,000 consumers, 1.2 per cent. more than at March 31, 1975.

75,307 million units were supplied to industry (a decrease of 3.5 per cent.), 75,063 million to domestic users (5.5 per cent. less) and 31,132 million to commercial users (2.9 per cent. more), 19,495 million units were sold on off-peak tariffs, a decrease of 10.1 per cent. over 1974-75.

On March 31, 1976, the Central Electricity Generating Board had 161 power stations (1975, 168) with a maximum output capacity of 58,677 MW, an increase in capacity of 0.3 per cent. over 1975. In 1975/76 1,165 MW of new plant was commissioned. C.E.G.B. power stations supplied 204,623 million kWh in 1975-76, 3.0 per cent. less than in 1974-75. Maximum simultaneous demand met during the year was 41,353 MW (1974-75, 40,973).

Transmission lines in service at the end of the year totalled 13,820 circuit km. and distribution lines 581,059 circuit km.

The industry employed 166,826 persons at March 31, 1976, 5,657 less than in 1974-75.

The following results are those of the Electricity Council and Boards in England and Wales, the figures being rounded off.

ADMINISTRATION OF THE NATIONAL HEALTH SERVICE

Since its inception in 1948 the N.H.S. has been administered according to its three main branches—the hospital and specialist services, the general practitioner services and the local health authority services. These have now been unified under the provisions of the National Health Service Reorganization Act 1973 which came into force on April 1, 1974. The services which were brought together are:

- (a) the hospital and specialist services previously administered by Regional Hospital Boards, Hospital Management Committees and Boards of Governors of undergraduate Teaching Hospitals;
- (b) the family practitioner services previously administered by Executive Councils;
- (c) the personal health services (e.g. ambulance services, epidemiological work, family planning, home nursing and midwifery, maternity and child health care, etc.) previously administered by local authorities through their health committees;
- (d) the school health service previously administered by local education authorities.

Under the new structure all these services are administered by Regional and Area Health Authorities.

Regional Health Authorities

There are 14 Regional Health Authorities in England based on the former Hospital Regions. The R.H.A. develops strategic plans and priorities based on a review of the needs identified by the Area Health Authorities and on its judgement of the right balance between individual areas' claims on resources. It is also responsible for identifying in consultation with the A.H.A.s, services which need a regional approach rather than an area approach and arranging for their provision. The R.H.A. allocates resources between the A.H.A.s, after having agreed area plans with them, and monitors their performance. One of the R.H.A.s executive functions is the design and construction of new buildings and works. The R.H.A. will itself undertake the more important projects on behalf of the A.H.A.

Area Health Authorities

There are 90 Area Health Authorities in England whose boundaries generally match those of the non-metropolitan counties and metropolitan districts of local government, or of one or more London boroughs. The A.H.A. is the operational health authority, responsible for assessing needs in its area and for planning, organizing and administering area health services to meet them. The day-to-day running of the services for which the A.H.A. is responsible is based on health districts. These normally contain a district general hospital or a number of hospitals providing the services of a district general hospital and usually have a population of between 150,000 and 300,000. There are 205 Health districts in England, including 34 single district areas.

Under the new N.H.S. the status of general medical and dental practitioners, ophthalmic medical practitioners, opticians and pharmacists as independent contractors remains unchanged. Each A.H.A. is required to set up a Family Practitioners Committee to administer family practitioner services.

Community Health Councils have been established for each health district. The Council's basic job is to represent to the Area Health Authority the interests of the public in the health services in its district. Councils have power to secure

information, to visit hospitals and other institutions, and have access to the A.H.A. and in particular to its senior officers administering the district services. The A.H.A. is required to consult the Community Health Council(s) on its plans for health service developments and the full A.H.A. will meet representatives of all its Community Health Councils at least once a year. The Council will publish an annual report and the A.H.A. is required to publish replies recording action taken on the issues raised.

Complaints

One of the most important innovations in the reorganized N.H.S. is the establishment of a Health Service Commissioner to investigate complaints against N.H.S. authorities. The Commissioner began work on October 1, 1973, and since April 1, 1974 his jurisdiction has covered the whole of the unified N.H.S. Further details of the Commissioner's work and the procedure for making complaints can be obtained from the Office of the Health Service Commissioner, Church House, Great Smith Street, London S.W.1.

NAUTICAL MEASURES

Distance is measured in nautical (or sea) miles. The nautical mile is traditionally defined as the length of a minute of arc of a great circle of the earth; but as this length varies in different latitudes (owing to the fact that the earth is not a perfect sphere), 6,080 feet, a "rounded off value" of the mean length, has been adopted in British practice as the standard length of the nautical mile. On this basis 33 nautical miles exactly equal 38 statute miles; the statute (land) mile contains 5,280 feet. A *cable*, as a measure used by seamen, is 600 feet (100 fathoms) approximately one-tenth of a nautical mile. *Soundings at sea* are recorded in fathoms (6 feet).

6 feet = 1 fathom.

100 fathoms = 1 cable length.

10 cables = 1 nautical mile.

Note.—Some other countries, including the United States in 1954, have adopted the nautical mile of 1,852 metres as recommended by the International Hydrographic Bureau in 1929.

Speed is measured in *nautical miles per hour*, called *knots*. A knot is a measure of speed and is not used to express distance. A ship moving at the rate of 30 nautical miles per hour is said to be "doing 30 knots" and as the nautical mile is longer than the land or statute mile this represents a land speed of over 34½ miles per hour.

Knots	m.p.h.	Knots	m.p.h.	Knots	m.p.h.
1	1·1515	15	17·2727	29	33·3939

14	16·1212	28	32·2424	42	48·3636

Net tonnage.—The gross tonnage less certain deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

Gross tonnage.—The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.

Friendly Societies—Great Britain

Act 1974

Friendly societies are mutual insurance societies in which the members subscribe for provident benefits, in particular sickness, death, endowment and old age benefits. Those friendly societies that are known as "collecting societies" because they collect members' premiums for life assurance by house-to-house visits of collectors or agents are subject to the provisions of the Industrial Assurance Acts as well as the Friendly Societies Act. The totals in ordinary type in the table below relate to registered friendly societies proper (including both centralized societies and the Orders with their branches); those in italics relate to collecting societies.

End of Year	No. of Societies on Register		Member-ship	Assurances or Policies	Total Funds	
			Thousands		£000	
1974.....	5,490	64	4,354	24,423	399,741	582,225
1938.....	19,600	149	8,491	25,738	151,613	84,837
1913.....	25,475	71	6,783	7,481	51,489	11,165

The first column headed "No. of Societies on Register" in the above table includes (for 1974) 559 societies without branches and 28 societies with branches ("Orders"), the remainder being the separately registered branches of the Orders.

Although recent years have seen the growth of societies registered for such specific purposes as the provision of Institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1974 Friendly Societies proper paid out £4.5 millions in sickness benefit and £2.3 millions in death benefit.

As compared with the previous year the number of societies without branches decreased in 1974 by 25 and the number of branches by 330. Total membership fell to under 4.4 millions.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The latest available figures of membership and funds set out below indicate the relative strength of several leading old established societies, including the three largest Orders which operate through registered districts and branches subject to a central body:—

membership ran to under 4·4 millions.			
FRIENDLY Socs.—Name with (in brackets) Year Established		Membership	Total Funds

Scottish Legal Life Assurance Society (1852).....	1,533,000	1,074,000	30,583

Long before the term "Friendly Society" came into use, the seeds of voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution to insure relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the oldest, operating in Scotland, being the "Incorporation of Carters in Leith" established as long ago as 1555.

The first Act for the encouragement and promotion of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration or sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians.

Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The Friendly Societies Act 1974, which came into force in April, 1975, consolidated the nine Acts which comprised the Friendly Societies Acts 1896 to 1971 and a few other minor enactments relating

to societies to which those Acts applied. The Act allows various specific classes other than "Friendly Societies" to be registered thereunder, but tax exemption (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

Industrial and Provident Societies—Great Britain

Acts 1965-1968

The familiar "Co-op" societies are amongst the wide variety which are registered under the Industrial and Provident Societies Act 1965. This consolidating Act, which like the Friendly and the Building Societies Act is administered by the Chief Registrar of Friendly Societies, provides for the registration of societies and lays down the broad framework within which they must operate. Internal relations of societies are governed by their registered rules.

Registration under the Act confers upon a society corporate status by its registered name with perpetual succession and a common seal, and limited liability. A society qualifies for registration if it is carrying on an industry, business or trade, and it satisfies the Registrar that either (a) it is a bona fide co-operative society or (b) in view of the fact that

its business is being, or is intended to be, conducted for the benefit of the community there are special reasons why it should be registered under the Act rather than as a company under the Companies Act.

During 1975 the number of registered societies decreased by 93 to 9,583, the first decrease since 1957. The largest single group was the 4,101 housing societies which accounted for most of the new registrations in 1975. The largest group in terms of turnover was that consisting of the retail, wholesale and productive societies which includes the "co-ops" with sales in 1975 of £1,929 million and the Co-operative Wholesale Society Limited with 1975 sales of £1,070 million. The principal statistics at the end of 1975 are given in the table below.

	Retail	Wholesale and Productive	Social and Recreational Clubs	General Service	Housing	Agricultural	Fishing	Total
Number of Societies	313	73	3,576	228	4,104	1,204	85	9,583
Number of Members	000's 10,402	000's 40	000's 2,531	000's 428	000's 140	000's 442	000's 10	000's 13,993
Funds of Members	£000's 264,723	£000's 163,635	£000's 82,996	£000's 663,130	£000's 62,380	£000's 70,048	£000's 867	£000's 1,307,778
Total Assets	£000's 650,624	£000's 308,800	£000's 133,653	£000's 794,987	£000's 905,713	£000's 145,184	£000's 2,179	£000's 2,941,141

Building Societies—Great Britain

Act 1962

Building Societies are associations incorporated with limited liability under the Building Societies Act. All Building Societies are required to register their rules and file their accounts with Registry of Friendly Societies. The following particulars showing the growth of Building Societies (as also that of Friendly and Industrial and Provident Societies) are based on the Chief Registrar's Annual Reports.

The year 1975 was one of unparalleled achievement for building societies, with record progress being made in practically every department of their affairs. Assets increased by 20.5 per cent. and totalled £24,204 million at the end of the year.

Share and deposit receipts at £9,154 million were 44 per cent more than in 1974, but withdrawals increased by only 14 per cent to £5,920 million. The ratio of withdrawals to receipts fell to 65 per cent. from the high level of 82 per cent. in 1974.

The amount advanced on mortgage reached a new peak in 1975 and totalled £4,908 million compared with £2,945 million in 1974. 798,000 advances were made compared with 546,000 in 1974.

Despite the substantial increase in their lending, societies added £1,281 million to their cash and investment holdings in 1975. At the end of the year, cash and investments represented 20.9 per cent. of total assets and amounted to £5,064 million.

In view of the growth of assets in the year, and the small margins on which societies were operating it was inevitable that the ratio of reserves to assets should fall. The amount added to reserves was more in 1975 than in 1974, £100 million compared with £73 million, but the average reserve ratio fell from 3.43 per cent. to 3.26 per cent. Working margins, which had been eroded by successive rises in the composite rate at which societies pay income tax on investors' interest, were improved to some extent in June 1975 when the recommended rate on shares was reduced to 7.0 per cent. However, 1975 also saw a notably sharp increase in management expenses reflecting both the growth of business and the effect on costs of inflation over the year. Margins were also affected in some cases by the issue of term shares at rates above the ordinary share rates.

Societies co-operated with the Department of the Environment during the year to establish a scheme whereby societies set aside £100 million to be advanced by them to assist in making good the shortfall in local authority lending for owner occupation which had been curtailed in 1975. The year also saw the introduction on a fairly wide scale of differential mortgage rates. A majority of the 30 largest societies now operate schemes which in varying ways are based on the practice of charging a higher rate for advances above a certain size—usually in the region of £13,000 to £15,000. The average advance in 1975 amounted to just under £7,500.

The number of societies merging in 1975 was very much in line with the 1974 experience, but the indications are that the numbers in 1976 will be smaller. 31 societies transferred engagements to other societies and two united to form a new society in 1975. In 1974 30 societies transferred their engagements. At the end of 1975 there were 382 building societies on the register.

Under sections 48 and 51 of the Building Societies Act 1962 the Chief Registrar, with Treasury consent, exercises power of control over the activities of building societies. Under section 55 there is further power to control in relation to small societies. His report for 1975 discloses that orders

prohibiting or restricting investment were in force against 13 societies at the end of 1975, whilst directions controlling advertising were in force in respect of four societies.

A society meeting certain basic requirements as to assets and liabilities, liquid funds, reserves and other matters may be designated by the Chief Registrar under section 1 of the House Purchase and Housing Act 1959 for the purposes of trustee status. The requirements are set out in The Building Societies (Designation for Trustee Investment) Regulations 1972. The shares and deposits of a society so designated become authorised investments for trustee subject to the provisions of the Trustee Investments Act 1971. Designated societies are identified in the list below by a letter "D" in the first column.

Nearly 70 per cent. of all building societies have an accounting year which ends on 31st December, the remainder at various dates. Statistics in the tables below are taken from accounts made up to dates between 1st February and the following 31st January. References in the tables below to years or to the financial year should be understood accordingly. In a very few cases the latest information available at the time of compilation has been included in the list of societies.

WATER AUTHORITIES

The Water Act 1973, which provided for the re-organisation of the water services in England and Wales, resulted in the disappearance of 29 river authorities, 157 water undertakings and 1,393 sewerage and sewage disposal authorities and the creation of ten autonomous multi-purpose water authorities (nine regional authorities in England and the Welsh National Water Development Authority). The Act also created the National Water Council and the Water Space Amenity Commission.

The water authorities are responsible for water supply, water conservation, sewerage and sewage disposal, prevention of river pollution, fisheries, land drainage and the recreational use of their waters. Between them the new authorities employ about 65,000 people, have an annual revenue of about £850 million and an investment budget of about £500 million a year.

The National Water Council is the national

consultative and advisory body for the water services and consists of a chairman appointed by the Secretary of State for the Environment, the chairmen of the regional water authorities and ten other members appointed by the Secretary of State and the Minister of Agriculture, Fisheries and Food.

The Council advises water authorities and the Government on national water policy and promotes and assists the efficient performance by water authorities of their functions in research and planning.

To undertake this work the Council has manpower and training divisions, and sections dealing with technical services, testing of appliances, public relations, information, legal and financial matters and a secretariat.

THE NATIONAL WATER COUNCIL, 1 Queen Anne's Gate, London, S.W.1.—*Dir.-Gen.*, P. F. Stott.

Regional Water Authorities

THAMES WATER AUTHORITY, New River Head, Rosebery Avenue, London, E.C.1.—*Chief Executive*, A. Morrison.

SOUTHERN WATER AUTHORITY, Guildborne House, Worthing, Sussex.—*Chief Executive*, B. R. Thorpe.

SEVERN TRENT WATER AUTHORITY, Abelson House, 2297 Coventry Road, Sheldon, Birmingham.—*Chief Executive*, J. E. Beddoe.

WESSEX WATER AUTHORITY, Techno House, Redcliffe Way, Bristol.—*Chief Executive*, K. F. Roberts.

ANGLIAN WATER AUTHORITY, Diploma House, Grammar School Walk, Huntingdon.—*Chief Executive*, P. H. Bray.

SOUTH WEST WATER AUTHORITY, P.O. Box 22, 3-5 Barnfield Road, Exeter.—*Managing Director*, H. R. Slocombe.

NORTHUMBRIAN WATER AUTHORITY, Northumbria House, Regent Centre, Gosforth, Newcastle-upon-Tyne.—*Chief Executive*, A. S. Robertson.

NORTH WEST WATER AUTHORITY, Dawson House, Great Sankey, Warrington.—*Chief Executive*, J. G. Lloyd.

YORKSHIRE WATER AUTHORITY, West Riding House, 67 Albion Street, Leeds.—*Chief Executive*, A. B. Baldwin.

WELSH NATIONAL WATER DEVELOPMENT AUTHORITY, Cambrian Way, Brecon, Powys.—*Chief Executive*, Dr. H. H. Crann.

UNIT TRUSTS

Arrangements for Children

In general, units cannot be registered in the name of a child but they can be registered in the name of a parent or any other adult, and the registered holding can be designated with the initials of the child. Alternatively, money can be settled on a child under one of the various children's gift plans operated and the units held in trust. Income distributions, less income tax, are invested in further units, and additional units may be purchased at any time. When the child reaches 18 or some chosen later age, the units become his property.

Unit Trust Association

The unit trust industry has been in operation for some forty-five years.

The Unit Trust Association of Park House, 16, Finchbury Circus, EC2M 7JP, was formed on October 13, 1959, and membership is open to any management company of an authorized unit trust scheme. The associations' main object is to act as a consulting body amongst its members in order to agree strict standards of unit trust practices for the protection of the interest of unit holders and to maintain the good name of the Unit Trust industry.

At December 31, 1975, the Association represented 328 of the 395 trusts in existence (83%); 97 per cent of all unit holdings being in these trusts.

The total value of all funds under management was £2.51 billion, and out of a total of 95 management groups five had funds in excess of £100 million; 23 between £10 million and £100 million and 46 between £1 million and £10 million.

The following details relating to the management groups operating in Great Britain and Northern Ireland have been extracted from the *Unit Trust Year Book 1976*, published by Fundex Ltd. (Addresses correct to March 1, 1976.)

Unit Trusts 1975-1976

(With value of funds managed and number of unit holdings as at December 31, 1975.)

A Unit Trust is a method of investment by which money subscribed in varying amounts by individual investors is pooled in a fund, the investment and management of which is subject to the strict legal provisions of a Trust Deed. The fund is invested in carefully-selected stocks and shares by a management company and the investments so acquired are held by a Trustee (usually a bank or insurance company). The management company and the Trustee, who must be effectively independent of each other, are parties to the Trust Deed which must be authorized by the Department of Trade (or the Ministry of Commerce in Northern Ireland) before any public offer of units for sale may be made.

Units are readily marketable, being bought or sold at the price (based on the value of the underlying securities) ruling at the time the order for sale or repurchase is received by the Management Company. The Department of Trade regulates the charges which Unit Trust managers may make. These charges are taken by way of an initial service charge (which is included in the sale price unit), and a semi-annual management fee levied on the value of the fund and taken out of either income or capital. Over a 20-year life of a Trust, the initial service charge, together with management fees, may not total more than 13½ per cent. In order to avoid the need for quoting unit prices with awkward fractions of a penny the managers are also entitled to round off the price of a unit by 1.25p or 1 per cent., whichever is the lower.

Through his subscription to the Trust Fund each subscriber acquires a fractional interest in the block of securities in which the fund is invested, while the dividends received from the investments form the income of the trust. The net income is paid to all investors in the Trust Fund in proportion to the size of their holdings. The dividend income is either paid directly to the investor every six months, or can be used by arrangement to purchase further units for his account. In either case any unit-holder who is not liable to tax at the basic rate of tax deducted can claim appropriate relief from the Inland Revenue.

The past performance of unit trusts has generally been better than direct investment in stocks and shares but being an investment in equities they cannot escape stock market trends. A unit trust investment neither guarantees an increasing income nor ensures continual capital appreciation. They are essentially a long-term form of investment.

Savings Schemes

Most management companies operate savings schemes whereby an investor is able to make contributions at intervals which are utilized to purchase units at the current price, the cash balance remaining from any such purchase being carried forward and added to the next contribution. Savings schemes can be for a direct purchase of units or linked with life assurance. The latter have provided one of the most rapid growth sectors of the Unit Trust movement in recent years. The unit linked schemes enable a person to accumulate a sum of money for retirement, etc., with the protection of life assurance cover for the duration of the planned period of saving. At the end of this period, the investor receives all the units acquired or their cash value. If death occurs beforehand, the dependents receive all the units bought up to date, plus a cash sum equivalent to the total remaining contributions necessary to have completed the savings programme. Tax relief is available on these contributions as with other life assurance premiums.

Legal Notes

IMPORTANT

The Purpose of these notes is to outline some of the more common parts of the law as they may affect the average person, and they are, of course, believed to be correct at the time of going to press. The law is constantly developing and changing, however, and it is dangerous for the layman to seek to be his own lawyer—he may not have access to completely up to date books and his case may, because of its special facts, come within an exception to the general rules set out herein.

It is always best to take expert advice, and if you have a Solicitor who has acted for you in the past you should take any legal problems you have to him. If you do not have a Solicitor a friend may be able to recommend one. Failing this your local Citizens' Advice Bureau (whose address can be obtained from the Telephone Directory or from any Post Office or Town Hall) has a list of Solicitors in your area who deal with that particular type of problem which you have. If you are not able to find a Solicitor in any of these ways you should ask for help in doing so from The Law Society, 113 Chancery Lane, London, W.C.2 or 27 Drumsheugh Gardens, Edinburgh.

The Legal Aid and Legal Advice and Assistance schemes (see pages 1178-9) exist to make the help of the trained lawyer available to everyone whatever their means as of right. The best policy is if in doubt go to a Solicitor without delay—timely advice will set your mind at rest but sitting on your rights can mean that you lose them.

Remember also that it is not necessary for a dispute to have arisen before you go to a Solicitor—the Legal Advice and Assistance Scheme enables him to advise you on your rights say under a tenancy agreement, the estate of a deceased person or in connection with matrimonial and consumer matters, and to write letters or take other steps on your behalf. He can also act for you where there is no question of a dispute at all, e.g. in the making of a will.

Your entitlement to take advantage of the Scheme depends on your means (see below) but a Solicitor will be able to tell you whether you are covered by it.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act 1948, which came into force on Jan. 1, 1949.

The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Southern Rhodesia, Sri Lanka, Ghana, Malaysia, Cyprus, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho, Singapore, Barbados, Mauritius, Swaziland, Tonga, Fiji, The Bahamas, Bangladesh and Grenada (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject and may be known either as a British subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act 1950, potential citizens of Newfoundland under the British Nationality Act 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Aliens Acts 1914-1943, though these Acts did not affect the status of any person born before Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act 1949, styled the Republic of Ireland).

By the Ireland Act 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition, by the British Nationality Act 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. Birth on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

- (a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;
- (b) children born to fathers who are enemy aliens in enemy occupied territory.

2. Descent, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:—

- (a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or
- (b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or
- (c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or
- (d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. Registration by the Home Secretary upon application by:—

- (a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period so ending as the Home Secretary may in the special circumstances of any particular case accept; or, in certain circumstances, if he is

serving under an international organization of which the United Kingdom government is a member, or is in the employment of a body established in the United Kingdom;

By the provisions of the Immigration Act 1971, registration as of right in these circumstances is restricted to Commonwealth citizens who are "patrials", i.e. born to or legally adopted by a parent who at the time of the birth or adoption had citizenship of the United Kingdom and Colonies by his birth in the United Kingdom. In the case of non-patrials, there are additional conditions and the Home Secretary has a discretion whether or not to register.

- (b) a woman married to a United Kingdom, etc. citizen. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

A person in respect of whom a recommendation for deportation or a deportation order is in force is not entitled to be registered, although the Home Secretary may register such a person.

4. *Naturalization*.—In order to be eligible for a certificate of naturalization an alien must:—

- (a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and
- (b) be of good character and have a sufficient knowledge of the English language; and
- (c) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period as the Home Secretary may in any particular case accept.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

- (i) (a) he would, if born after that date, have qualified for citizenship by birth; or
- (b) he is a person naturalized in the United Kingdom and Colonies; or
- (c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or
- (ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or

- (iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
- (iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or
- (v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act 1958 an adopted child becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost—

- (i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war. Under the British Nationality Act 1964 a person who has ceased to be a citizen of the United Kingdom and Colonies as a result of a declaration of renunciation is entitled to registration as a citizen of the United Kingdom and Colonies if he can satisfy the Home Secretary on a number of matters;
- (ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;
- (iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:—

- (a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
- (b) in time of war, traded with the enemy; or
- (c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months' imprisonment; or
- (d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.

- (v) Under a series of Acts, 1958-1973, which contain special provisions relating to Ghana, Cyprus, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, Malaysia, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho, Barbados, Aden, Perim and Kuria Muria Islands, Mauritius, Swaziland, Fiji, The Bahamas and Bangladesh.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act 1949 declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference to an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CONSUMER LAW

1. THE SUPPLY OF GOODS

- (a) The Sale of Goods Act 1893 as amended by the Supply of Goods (Implied Terms) Act 1973 provides protection to the purchaser of goods, by implying certain terms into every contract for the Sale of Goods. These implied terms are:—

(i) A condition that the seller will pass good title to the buyer (unless the seller agrees to transfer only such title as he or his principal has) and warranties that the goods will be free from undisclosed encumbrances, and that the buyer will enjoy quiet possession of the goods.

(ii) Where there is a sale of goods by description, a condition that the goods will correspond with that description, and where the sale is by sample and description, a condition that the bulk of the goods shall correspond with both sample and description.

(iii) Where the seller sells goods in the course of a business, a condition that the goods will be of merchantable quality, unless before the contract is made, the buyer has examined the goods and ought to have noticed the defect, or the seller has specifically drawn the attention of the buyer to the defect. Merchantable quality means fit for the purpose for which goods of the kind are commonly bought, taking into account any description applied to them, the price and other relevant circumstances.

(iv) A condition that where the seller sells goods in the course of a business, the goods are reasonably fit for any purpose made known to the seller by the buyer, unless the buyer does not rely on the seller's skill and judgment, or it would be unreasonable for him to do so.

(v) Where there is a sale of goods by sample, conditions that the bulk of the goods shall correspond with the sample in quality, that the buyer will have a reasonable opportunity of comparing the bulk with the sample, and that the goods are free from any defect rendering them unmerchantable, which would not be apparent from the sample.

For these purposes, the broad difference between a condition and a warranty is that the remedy for a breach of an implied condition may enable the buyer to reject the goods and recover damages if he has suffered loss whereas the remedy for a breach of war-

ranty will only enable the buyer to recover damages.

It is possible for a seller to exclude some of the above terms from a contract, subject to restrictions imposed by the 1973 Act given below. These restrictions give more protection to a consumer sale than a non-consumer sale. A consumer sale is a sale by a seller in the course of a business where the goods are of a type ordinarily bought for private use or consumption, and are sold to a person who does not buy or hold himself out as buying them in the course of a business. A sale by auction or competitive tender is never a consumer sale.

The 1973 Act prohibits the exclusion of the implied terms given in (ii) to (v) above, in consumer sales. In non-consumer sales, terms purporting to exclude these implied terms, may be relied upon only to the extent that it would be reasonable to allow reliance. The Act provides guidelines for determining whether it would be reasonable to allow reliance. The implied terms in (i) above cannot be excluded in consumer or non-consumer sales.

(b) *Trading Stamps.*—The 1973 Act provides protection for a person taking goods in exchange for trading stamps, and implies warranties as to title, freedom from encumbrances, quiet possession and merchantable quality, similar to those implied by the Sale of Goods Act.

(c) The Trade Descriptions Act 1968 provides that it is a criminal offence for a trader or businessman to apply a false trade description to any goods, or to supply or offer to supply any goods to which a false trade description has been applied. A trade description includes a description as to quantity, size, method, place and date of manufacture, other history, composition, other physical characteristics, fitness for purpose, behaviour or accuracy, testing or approval. Prosecutions are brought by Inspectors of Weights and Measures.

(d) The Fair Trading Act 1973 is also designed to protect the consumer. It provides for the appointment of a Director General of Fair Trading, whose duties include keeping under review commercial activities in the U.K. relating to the supply of goods or services to consumers, and to collect information to discover practices that may adversely affect the economic interests of the consumer. He may refer certain consumer trade practices to the Consumer Protection Advisory Committee, or, of his own initiative take proceedings against firms that are trading unfairly. He may also publish information and advice to consumers. Examples of practices with which he may be concerned include the use of void exclusion clauses, double pricing, false bottoms in bottles, and the size or complexity of print and wording.

Scotland

The Sale of Goods Act, 1893, as amended by the Supply of Goods (Implied Terms) Act 1973, the Trading Stamp Act, 1964, the Trade Description Act, 1968, and the Fair Trading Act, 1973, all apply with some modification to Scotland. For example, it is not necessary in Scotland to distinguish between the words condition and warranty. The remedies of the buyer in both cases are the same, that is, he can either within a reasonable time reject the goods and treat the contract as repudiated, or retain the goods and treat the failure to perform such material

part as a breach which may give rise to a claim for compensation or damages.

2. HIRE PURCHASE

England and Wales

At present, protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act, 1965, which applies to hire-purchase agreements under which the hire-purchase price, *i.e.*, the total sum payable by the hirer to complete the purchase of the goods, does not exceed £2,000. The Act also provides that where the hirer is a body corporate, the Act is not to apply at all.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and the agreement must be in writing signed by the hirer himself and by or on behalf of the owner and any guarantor. The agreement must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his rights to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*). If the agreement is complete as soon as the hirer signs it he must be given a copy there and then; in all other cases he must be given one copy when he signs and another within seven days of the completion of the agreement. There are also Department of Trade and Industry regulations dealing with such matters as the size of the print. In breach of any of these conditions the owner can neither recover the goods from the hirer nor enforce the agreement or any security given, although the Court can dispense with any of the conditions save that as to the signed agreement. The same results ensue (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 12½p for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he remains liable for any instalments already due, he will be under no further obligation *under the agreement*. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due he must pay the difference to the owner unless the court considers that a lesser sum is sufficient to compensate the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

An important new provision in the Act gives the hirer the right to cancel the agreement and recover all sums paid if he signed it at a place other than trade premises. This right (which was designed to cover the activities of door-step salesmen) must be exercised within 4 days of receiving the second copy.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

The Trade Descriptions Act, 1968, further protects the consumer by making it a criminal offence for traders falsely to describe or advertise the quantity or price of goods or services; prosecutions are brought by Inspectors of Weights and Measures. The Act provides no civil remedies.

An important new provision is the Supply of Goods (Implied Terms) Act 1973 which applies to agreements made on or after 18th May 1973. Sections 8-12 which apply to all hire-purchase agreements whether governed by the 1965 Act or not provide that clauses purporting to exclude the owner from liability for defects in the goods shall be void in the case of consumer agreements, and in non-consumer agreements are valid only if they are fair and reasonable in the circumstances.

Consumer Credit Act. This Act has received the Royal Assent, but most of its provisions are not yet in force. It provides a new system for the protection of the consumer, of licensing and control of all matters relating to the provision of credit, or the supply of goods on hire or hire-purchase, administered by the Director-General of Fair Trading. The Act takes the place of previous Acts of Parliament relating to moneylenders, pawnbrokers and hire-purchase traders, and the protection provided by the Trade Description Act 1968 and Supply of Goods (Implied Terms) Act 1973 will be retained. The Act extends to the United Kingdom.

Scotland

The Hire Purchase (Scotland) Act 1965 provides a Scots code corresponding to, but not identical with English law. The Supply of Goods (Implied Terms) Act 1973 also applies to Scotland.

The Sale of Goods Act, 1893, as amended by the Supply of Goods (Implied Terms) Act, 1973, the Trading Stamp Act, 1964, the Trade Description Act, 1968, and the Fair Trading Act, 1973, all apply with little modification to Scotland. The Consumer Credit Act (see above) also extends to Scotland, and goes far in assimilating the Scots law on this topic with English law.

3. RECEIPTS

The law on receipts in Scotland is governed by the Prescription and Limitation (Scotland) Act 1973, which for this purpose came into force on July 25 1976. Now, receipts need only be kept for a period of five years and if a creditor does not make a relevant claim within that period no action can be raised.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (*i.e.*, civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now however, by the Crown Proceedings Act 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Exceptions to the Act include the immunity of the Crown and any member of the armed forces from liability in tort in respect of death of, or personal injury to, another

member of the armed forces on duty, provided that the death or injury is certified as attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of National Savings Bank deposits. Section 2 (1) of the Law Reform (Miscellaneous Provisions) (Scotland) Act 1966 removes the privilege whereby the wages of Crown servants, other than serving members of the armed forces, are exempt from arrestment in execution.

DEATHS

REGISTRATION, BURIAL AND CREMATION

REGISTRATION

(For Certificates, see under FAMILY LAW—CERTIFICATES)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons: (1) A relative of the deceased present at the death, or in attendance during the last illness. If they fail (2) some other relative of the deceased. In default of any relatives (3) a person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail (4) an inmate of the house. A person (other than a relative) registering the death must be causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the Registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the Registrar. It is essential that a certificate for disposal should be obtained from the Registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of ten pounds. The registration of a death is free of charge. After twelve months no death can be registered without the Registrar General's consent.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act 1926, s. 1*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.*, s. 3).

"Still-born" child (see under Births (Registration), p. 1169).

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act 1957.

Deaths (Registration) in Scotland.—New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act 1965 which amends and re-enacts provisions in former Acts.

Personal notification within 8 days must be given to the registrar of (a) the registration district in which the death took place or (b) any registration district in which the deceased was ordinarily resident immediately before his death, and (c) when a body is found and the place of death is not known, either the registration district in which the body was found or any other registration district appropriate by virtue of the preceding paragraph. When a person dies (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the body is conveyed therein to any place in Scotland the death shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by one of the following: (a) any relative of the deceased; (b) any person present at the death; (c) the deceased's executor or other legal representative; (d) the occupier, at the time of the death, of the premises where the death took place; (e) if these fail, any other person having knowledge of the particulars to be registered. Failure to comply involves a penalty not exceeding £20.

The medical practitioner who attended the deceased during the last illness must sign a certificate of the cause of death. If there is no such medical practitioner, any medical practitioner who is able to do so, may sign the certificate. At the time of registering the death the registrar shall, without charge, give the informant a certificate of registration, and the person to whom the certificate is given must hand it to the undertaker previous to cremation. A body may, however, be interred before the death is registered, in which case the undertaker must deliver a certificate of burial to the Registrar within three days.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In

populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, *see above*.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016), as amended by the Cremation Regulations 1965 (No. 1146).

INTESTACY ENGLAND AND WALES

As regards deaths on or after July 1, 1972, the position is governed by the Administration of Estates Act, 1925, as amended by the Testates' Estates Act, 1952, the Family Provision Act, 1966 and Orders made thereunder. The 1952 and 1966 Acts and S.I. 1972/916 increased the benefits of a surviving spouse of an intestate. These notes deal with the present position, so that if the death occurred before July 1, 1972 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £15,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £40,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £15,000 or £40,000, as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) children (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents

(equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain eighteen or marry under that age, their shares going to the persons (if any) within the same group who do attain eighteen or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate, who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

By the Family Law Reform Act, 1969, the position of an illegitimate child is equated with that of a legitimate child in respect of all deaths occurring on or after January 1, 1970. In respect of deaths after March 1976 the provisions of the Inheritance (Provision for Family and Dependents) Act 1975 may allow other persons to claim provision out of the estate. *See post* under "Wills".

For personal application for Letters of Administration—*see p. 1168*.

SCOTLAND

The Succession (Scotland) Act, 1964, provides that the whole estate of any person dying intestate shall devolve without distinction between heritable and moveable property. By that Act the surviving spouse of an intestate may, as a prior right (in addition to legal rights, *see below*), claim the matrimonial home to a maximum of £30,000, or a choice of one matrimonial home if more than one (or in certain circumstances the value thereof), with its furniture and plenishings not exceeding £8,000 in value, plus the sum of £4,000 if the deceased left issue or, if no issue, the sum of £8,000. These figures may be increased from time to time by order of the Secretary of State.

The Act has been modified by the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1968, which provided that an illegitimate child had exactly the same rights of succession in the estate of his parents as a legitimate child. However, the position still remains that an illegitimate child has no succession rights in the estate of a grandparent even though such would have fallen to his predeceasing parent.

Legal rights, referred to above, are:—

Jus relict (æ): the right of a surviving spouse to one half of the deceased's net moveable estate after satisfaction of prior rights if there are no surviving children, or to one third if there are any surviving children.

Legitim: right of surviving children to one-half or one-third of the net moveable estate of deceased parents after satisfaction of prior rights. There are no legal rights in heritage.

In general, the lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals, and so on in the ascending scale. The Crown is *ultimus haeres*. The right of representation, i.e., the right of the issue of a person, who

would have succeeded if he had survived the intestate, is open to any line of succession where previously it was limited to apply only when there were next of kin or the issue of predeceasing next of kin. The surviving mother of an intestate now has equal rights of succession with the surviving father, where formerly these were restricted. The intestate's maternal relations, who prior to the Act had no rights of succession, are now on an equal footing with his paternal relations. Where the intestate is survived only by parents, and by brothers and sisters (collaterals) half of the estate is taken by the parents and the other half by the brothers and sisters, those of the whole blood being preferred to those of the half blood; where, however, succession opens to collaterals—which expression can include the brothers and sisters of an ancestor of the intestate—of the half blood, they shall rank equally amongst themselves, whether related to the intestate (or his ancestor) through their father or their mother.

WILLS

IMPORTANT NOTE.—The following notes and those on Intestacy must be read subject to the provisions of the Inheritance (Provision for Family and Dependents) Act 1975 which can affect the estate of anyone dying domiciled in England and Wales after March 1976. Very broadly a spouse, former spouse who has not remarried, a child of the deceased himself or one treated by him as a child of his family, or any person maintained by him at his death may apply to the Court under the Act. If the Court thinks that the will or the law of intestacy or both do not make reasonable provision for the applicant it may order payment out of the net estate of maintenance or a lump sum. It may also order the transfer of property, vary certain trusts and the powers can affect property disposed of by the deceased in his lifetime intending to defeat the Act. It is up to the applicant to take the initiative, and the application must generally be made within six months of the grant of Probate or Letters of Administration.

In respect of earlier deaths, earlier Acts apply with a narrower class of applicants and less ample powers for the Court.

REASONS FOR MAKING A WILL.—Every person over the age of 18 should make a will. However small the estate the rules of Intestacy (see above) may not reflect a person's wishes as to his property; in any case a will can do more than just deal with property—it can in particular appoint executors, give directions as to the disposal of the body and appoint guardians to take care of children in the event of the parents' death. For the wealthier person an appropriately drawn will can operate to reduce the burden of Capital Transfer Tax.

It is considered desirable for a will to be properly drawn up by a Solicitor, and the making of a will is one of the services which he can provide under the *Legal Advice and Assistance Scheme* (see above).

In no circumstances should one person prepare a Will for another person where the former is to take any benefit under it—this can easily lead to a suggestion of undue influence which may cause the will to be held bad.

Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If

in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. A will should be written in ink and very legibly, on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1973] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence Thomas Smith and in the presence of each Signature of other have hereunto set our Testator;

William Jones (signed) of Green Gables, South Street, Reading, tailor.
Henry Morgan (signed) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and/or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to — of — the sum of £ — and to — of — the sum of £ — and to — of — all my books (or as the case may require).

3. All the residue of my property real and personal I give to — of —.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual real money. The expression "goods and chattels" should not be used. In giving particular property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

RESIDUARY LEGATES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in

his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

Where there is any suspicion that the Testator is not, by reason of age or infirmity, fully in command of his faculties it is desirable to ask his Doctor to act as a witness (see Testamentary capacity below).

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one or two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee dies in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee predeceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A person under the age of 18 cannot make a will (except for soldiers, sailors and airmen and then only in exceptional circumstances).

So far as mental capacity is concerned the Testator must be able to understand and appreciate the nature and effect of making a will, the property of which he can dispose and the claims to which he ought to give effect. If a person is not mentally able to make a will provision exists under the

Mental Health Act, 1959 as amended) for the Court to do this for him.

REVOCATION.—A will is revoked by a subsequent will (but if it does not expressly revoke former wills, only so far such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise *destroying* the will with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made in person at the Personal Application Dept. of the Principal Registry of the Family Division, a district probate registry or sub-registry, or a probate office by the executors or persons entitled to a grant of administration. Applications should bring (1) the will, if any; (2) a certificate of death; (3) particulars of all property and assets left by the deceased; and (4) a list of debts and funeral expenses.

Intending applicants, before attending at a registry or probate office, should write or telephone to the nearest probate registry or sub-registry for the necessary forms. Postal or telephone applications cannot be dealt with at the local probate offices, which are part-time only.

Certain property can be disposed of on death without a grant of probate or administration, or in pursuance of a nomination made by the deceased, provided the amount involved does not exceed £1,500. See the Administration of Estates (Small Payments) Act, 1965.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read. In the latter case, the original will proved in the District Registry, is kept there, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

RECENT DEATHS.—A newly introduced system enables a person to discover when a grant of Probate or Letters of Administration is made which may be invaluable to a creditor of the deceased or applicant under the Inheritance (Provision for Family and Dependents) Act 1975—see above. A "standing search" may be made by sending a request in the form set out below to the Record Keeper at the Principal Registry of the Family Division with £1 fee. The

searcher will receive particulars of any grant made in the previous 12 months or the following 6 months, including names and addresses of the executors of administrators and the Registry in which the grant was made.

FORM OF SEARCH

In the High Court of Justice

Family Division

The Principal Registry (Probate)

I/We apply for the entry of a standing search so that there shall be sent to me/us an office copy of every grant of representation in England & Wales in the estate of:—

Full name of deceased:

Alternative or alias name

Full address

Exact date of death

Which either has issued not more than 12 months before the entry of this application or issues within 6 months hereafter

Sgd.—(full address).

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose effectively of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share of the estate. The remaining portion is known as the *dead's part*. A surviving husband and children have comparable rights (*jus relicti* and *legitim*) in the wife's estate. It should be noted that the amount of any claim of *jus relicti*, *jus relictae* or *legitim* out of an estate on intestacy, shall be calculated by reference to so much of the net moveable estate as remains after the satisfaction of any prior claims under the Succession (Scotland) Act, 1964—see illegitimacy, Scotland and Intestacy, Scotland, *supra*. The *dead's part* is the only portion of which the testator can freely dispose. All debts are payable out of the whole estate before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Formerly a minor could dispose only of movables but since the passing of the Succession (Scotland) Act, 1964 he has a like capacity to test on heritable property. A will must be in writing and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e. written and subscribed by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e. signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. The Conveyancing and Feudal Reform (Scotland) Act, 1970 whilst altering generally the rules for the description of deeds, specifically (s. 44 (2)) makes no change in the rules applying to wills which must still be signed by the testator on every page. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish.

Wills are registered in the Books of the Sheriffdom in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will may be revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect. If a subsequent will is revoked, the earlier will is revived.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of the Region in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will or, where such person has predeceased the testator, by the residuary beneficiary. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £1,000 nett and under £3,000 gross confirmation is obtained under a simplified procedure at reduced fees.

Presumption of Survivorship.—The Succession (Scotland) Act, 1964, referred to above provides that where two persons die in circumstances indicating that they died simultaneously or if it is uncertain which was the survivor, the younger will be deemed to have survived the elder unless the elder person left testamentary provision in favour of the younger, whom failing in favour of a third person, the younger person having died intestate (partially or wholly); but if the persons so dying were husband and wife, neither shall be presumed to have survived the other.

EMPLOYMENT

WAGES AND HOLIDAYS

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to manual workers, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, e.g., by cheque, money order, postal order or into a banking account.

The Equal Pay Act 1970, which extends to Scotland, and which came into force on December 29, 1975, prevents discrimination, as regards terms and conditions of employment between men and women.

PARTICULARS OF TERMS OF EMPLOYMENT

Under the Contracts of Employment Act 1972, an employer must give each employee within 13 weeks of the beginning of the employment a

written statement containing the following particulars of the contract between them:

- (1) the date when the employment began with an indication whether previous work counts as continuous with this job;
- (2) The rate of remuneration (or how it is calculated);
- (3) the intervals at which wages are paid;
- (4) the hours of work;
- (5) the employee's entitlement to holidays (including public holidays) and holiday pay;
- (6) the title of the employee's job;
- (7) terms relating to sickness, injury and sick pay;
- (8) the length of notice which the employee should give and receive in order to terminate the contract.

In addition, the written particulars must identify the person to whom the employee can apply to seek redress of any grievance and what further steps may ensue.

TERMINATION OF EMPLOYMENT

An employee may be dismissed without notice if he is guilty of gross breach of contract, such as disobedience to a lawful order or dishonesty. He is then only entitled to wages accrued due at the date of dismissal.

In other cases, the employee is entitled to reasonable notice which, under the contracts of Employment Act 1972, as amended by the Employment Protection Act 1975, must not be less than one week when he has been continuously employed for up to 2 years; then it is one week for each full year worked with a maximum of 12.

An employer who wrongfully dismisses an employee (i.e. with less than the length of notice to which he is entitled) is generally liable to pay wages for the period of proper notice.

An employee who has a fixed term contract has no claim against his employer for wrongful dismissal if his contract is not renewed when it expires. He may, however, have a claim for a redundancy payment or compensation for unfair dismissal. If he is wrongfully dismissed before his contract expires, he is generally entitled to remuneration payable over the full period of the contract.

Unless the employee has been guilty of misconduct, he may be entitled to a redundancy payment or to compensation for unfair dismissal if he has been continuously employed for at least certain periods and the employment has been terminated by the employer (with or without proper notice) or he has a fixed term contract which expires without being renewed.

Under the Redundancy Payments Act 1965, an employee who satisfies the foregoing conditions and is dismissed by reason of redundancy may be entitled to a redundancy payment calculated by reference to his age, pay and length of service.

The Trade Union and Labour Relations Act 1974 enables an employee who is unfairly dismissed to complain to an Industrial Tribunal (generally within 3 months of dismissal). The onus will then be on the employer to prove that the dismissal was due to capability, conduct, redundancy, illegality or some other substantial reason justifying dismissal, and that he acted reasonably in dismissing the employee. If the tribunal finds that the employer did not act reasonably the dismissal will be unfair, in which case the tribunal can

- (a) recommend re-engagement or
- (b) award compensation consisting of a basic or compensatory award.

For an employee to bring himself within the unfair dismissal provisions, he must have been continuously employed for a period not less than 26 weeks.

All complaints of unfair dismissal are referred to a conciliation officer or the Department of Employment and a very high proportion of complaints are disposed of in this way.

OFFICES, SHOPS AND RAILWAY PREMISES

The Offices, Shops and Railway Premises Act, 1963, which extends to Scotland with minor modifications, applies to office premises, shop premises and railway premises being, in each case, premises where persons are employed to work. Shop premises include a building which is not a shop but of which the main use is the carrying on there of a retail trade or business; a building occupied by a wholesaler where goods are kept for sale wholesale (except a warehouse belonging to the owner of a dock, wharf or quay); and a building to which the public can resort for the purpose of having goods repaired. However, the Act does not apply to premises if the only employees are the spouse, parent, grandparent, child, grandchild or brother or sister of the employer, and it does not apply to premises if the period of time worked there during each week does not normally exceed 21 hours.

The following is a very brief summary of the main provisions affecting premises to which the Act applies—

1. The premises and all furniture etc., must be kept clean, and no dirt or refuse must be allowed to accumulate.
2. No overcrowding so as to cause risk of injury to health is permitted.
3. Provisions must be made for maintaining a reasonable temperature in rooms, and a thermometer must be provided on each floor of a building.
4. Provision must be made for securing adequate ventilation.
5. Provision must be made for securing sufficient and suitable lighting.
6. Suitable and sufficient sanitary conveniences and washing facilities (including a supply of clean, running hot and cold or warm water and, in addition, soap and clean towels or other suitable means of cleaning or drying) must be provided at accessible places; and also an adequate supply of wholesome drinking water.
7. Accommodation must be provided for clothing which is not in use.
8. For each sedentary worker there must be provided a seat of a design, construction and dimensions suitable for that worker.
9. Where persons employed to work in shop premises eat meals there, suitable and sufficient facilities for eating them must be provided.
10. All floors, stairs and passages must be of sound construction and properly maintained.
11. Every dangerous part of any machinery must be securely fenced, unless it is in such a position or of such construction as to be as safe as if it were fenced. No person under 18 can clean machinery if he is thereby exposed to risk of injury from a moving part.
12. No person can be required to lift or carry a load so heavy as to be likely to injure him.
13. A first-aid box or cupboard must be provided.
14. Means of escape in case of fire must be provided, as must appropriate fire-fighting equipment.
15. Where an accident occurs which causes death to an employee or disables him from working for more than 3 days, the occupier of the premises must at once send notice of the accident to the appropriate authority.

FAMILY LAW

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1958. Further changes are contained in the Children Act 1975 though these are not yet fully in force. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1958 that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition made, after the date of the adoption order. Applications are made to the High Court (Family Division), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and the applicant must be either:—

- (a) Twenty-five years of age or over; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1958) of the infant; or
- (c) the mother or father of the infant.

Two spouses may jointly adopt an infant, but unless one of them is the mother or father of the infant, condition (a) or (b) above must be satisfied in respect of one of the applicants and the other spouse must have attained the age of twenty-one.

Except in relation to an infant who is not a United Kingdom national (where special provisions apply), the consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g., where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1958 Act places restrictions on societies which make arrangements for the adoption of children; when the 1975 Act takes effect only Local Authorities and ministry approved societies will be able to arrange adoptions.

The Adoption Act, 1964, provides for effect to be given to adoption orders made in Northern Ireland, the Isle of Man and the Channel Islands.

The Adoption Act 1968 (which applies to Scotland) enables an adoption order to be made on the application of a person who is either habitually resident in Great Britain or possesses British nationality. The Act also provides for the recognition of certain overseas adoptions.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1958, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. The Children Act 1975 also applies to Scotland. Applications are made to the Court of Session or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1958, which is a consolidating Act, also applies, with modifications to Scotland, and reference is also made to the Adoption Act, 1960, which amends the law with respect to revocation of adoption orders and to the Adoption Act, 1968 (see above). The Succession (Scotland) Act, 1964, gives the adopted child the same rights of succession as a child born to the adopter in wedlock, but deprives him of any such rights in the estates of his natural parents.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the

Registrars General in London and Edinburgh respectively. Certificates from these registers including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates, (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail;
2. the occupier of the house in which the birth happened;
3. a person present at the birth; or,
4. the person having charge of the child.

The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of twenty pounds. The registration of a birth is free. In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. Under the Public Health Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy. A stillbirth may only be registered within 3 months of the birth.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953. When the Children Act 1975 takes effect special provisions will apply to the registration and re-registration of births of abandoned children, and the re-registration of births of illegitimate children showing the father's name; the mother must be party to the latter application and if the child is under 16 must show the father's formal admission or a court's finding of paternity.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's Office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act, 1957, applicable also to Scotland.

SCOTLAND

New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act, 1965, which amends and re-enacts provisions in former Acts. Personal notification within 21 days of any birth, must be given to the registrar of (a) the registration district in which the birth took place, or (b) any registration district in which the mother of the child was ordinarily resident at the time of

the birth and (c) in the case of a founding child, dead or alive, when the place of birth is not known, the registration district in which the child, or the body was found. When a child is born (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the child is conveyed therein to any place in Scotland, the birth shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by the father or mother of the child, and if they fail, by one of the following: (a) any relative of either parent who has knowledge of the birth; (b) the occupier of the premises in which the child was, to the knowledge of that occupier, born; (c) any person present at the birth; (d) any person having charge of the child. Failure without reasonable cause involves a penalty not exceeding £20.

The name of the father of an illegitimate child may be entered in the register of births at the time of registration if jointly requested by the mother and father, and the latter's name may also be recorded at a later date on declaration by both parents. A free abbreviated certificate of birth will be issued to the informant at the time of registration. Provision is made for the re-registration of the birth of a person made legitimate by the subsequent marriage of the parents or whose birth entry is affected by any matter respecting status or paternity, or has been so made as to imply that he is a foundling.

A still-birth must be registered and a certificate, signed by the doctor or certified midwife present at the birth or who has examined the body of the child, must be produced.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the Office of Population Censuses and Surveys, St. Catherine's House, 10, Kingsway, W.C.2 or from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriage can also be obtained from the incumbent of the church in which the marriage took place; or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (see, *post*, under Marriage).

Where the certificate is issued by the Local Register Office the fee payable for standard Death and Birth certificates is £1.25 at the time of registration, or until the completed register is handed over to the Superintendent Registrar. Thereafter the fee is £2.50. Where the certificate is issued by the General Register Office the fee is also £2.50, if applied for in person or £4.50 if applied for by post. Certificates at lower rates may be issued under certain statutes, and in particular (under the Births and Deaths Registration Act 1953) a short form of birth certificate showing name, sex and date of birth, but not parentage, may be obtained on payment of a fee of £1.25 from the Registrar General (when £2.75 handling charge is also payable) or from the Superintendent Registrar or Registrar.

It is considered desirable when a certificate is required to consult the nearest Register Office who, if told the exact or approximate date and place of registration, will be able to advise on the best way of obtaining it.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the Office of Population Censuses and Surveys, St. Catherine's House, 10, Kingsway, W.C.2. The Society of Genealogists 37 Harrington Gardens, S.W.7, possess many records of Baptisms,

Marriages and Deaths prior to 1837, including copies, in whole or in part of about 4,000 Parish Registers.

Scottish Registers of Births, Deaths and Marriages.—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained personally at the General Register Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of £1 for a full extract entry of birth, death, or marriage, and 50p for a short certificate of birth. When the period searched is over 20 years additional fees are payable. A short certificate of registration of deaths is issued free of charge for National Insurance purposes in certain cases.

There are also available at the General Register Office old parish registers of the date prior to 1855, which were formally kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of £1. A fee of £1.50 per day is payable for a general search of all the Scottish registers.

DIVORCE, SEPARATION AND ANCILLARY MATTERS

Preliminary.—Matrimonial Suits may be conveniently divided into two classes, viz. (1) those in which it is sought to annul the marriage because of some defect; and (2) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it. By virtue of the Matrimonial Causes Act, 1967, all matrimonial causes are now commenced in one of the divorce county courts designated by the Lord Chancellor. If they remain undefended, they are tried by a county court judge in one of these courts which has also been designated as a court of trial, or in the Royal Courts of Justice in London. If the suit becomes defended, it must be transferred to the High Court.

(1) *Nullity of Marriage.*—This is now mainly governed as to England and Wales by the Matrimonial Causes Act 1973. A marriage is void *ab initio* if the parties were within the prohibited degrees of affinity, or were not male and female, or if it was bigamous or if one of the parties was under the age of consent, i.e. 16, or in the case of a polygamous marriage entered into outside England and Wales, that either party was at the time of the marriage domiciled in England and Wales. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage.

A marriage is voidable (i.e. a decree of nullity may be obtained but until such time the marriage remains valid) on the following grounds—(a) incapacity of either party to consummate; (b) respondent's wilful refusal to consummate; (c) that either party did not validly consent to the marriage, whether in consequence of duress, mistake, unsoundness of mind or otherwise, (d) that either party at the time of marriage was a mentally disordered person; (e) that at the time of marriage the respondent was suffering from communicable venereal disease; (f) that at the time of the marriage the respondent was pregnant by another man. In cases (e) and (f) the petitioner must have been ignorant of the grounds at the date of the marriage and in (c), (d), (e) and (f) proceedings must be instituted within 3 years of the marriage. In all cases the court shall not grant a decree where the petitioner has led the respondent to believe that he

would not seek a decree and it would be unjust for it to be granted.

The 1973 Act provides that a decree of nullity in a voidable marriage only annuls the marriage from the date of the decree. The marriage remains valid until the decree, and any children of the marriage are legitimate. Children of a void marriage are illegitimate unless the father was domiciled in England and Wales at the child's birth (or father's death, if earlier) and at the time of conception (or marriage if later) both or either of the parents reasonably believed the marriage was valid.

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (b) above, even though there has been no normal intercourse, but it may in certain circumstances constitute unreasonable behaviour for the purpose of divorce (as to which see below). Further it has been allowed as a defence to a charge of desertion against the aggrieved party.

(2) *Judicial Separation and Divorce*.—The second class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation. It is not necessary to prove that the marriage has broken down irretrievably and the five facts listed (a) to (e) under divorce (below) are grounds for judicial separation.

Divorce.—The sole ground on which a divorce is obtainable by either husband or wife is the irretrievable breakdown of the marriage. However, the court is precluded from holding that a marriage has irretrievably broken down unless it is satisfied of one or more of the following facts: (a) that the respondent has committed adultery since the marriage and the petitioner finds it intolerable to live with the respondent; (b) such behaviour by the respondent that the petitioner cannot reasonably be expected to continue co-habitation; (c) desertion by the respondent for 2 years immediately before the petition; (d) 5 years separation immediately before the petition (but only 2 years where the respondent consents to the decree). Matrimonial Causes Act 1973.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

Provisions designed to encourage reconciliation.—The 1973 Act requires the solicitor for the petitioner to certify whether he has or has not discussed the possibility of a reconciliation and whether or not he has given the petitioner the names and addresses of persons qualified to help effect a reconciliation.

A total period of less than six months during which the parties have resumed living together is to be disregarded in determining whether the prescribed period of desertion or separation has been continuous. Similar provision for effecting a reconciliation exists in relation to the other proofs of break-down, but a petitioner cannot claim that it is intolerable to live with the other party if they have lived together for more than six months after discovery of the respondent's adultery.

Hearing the Petition.—Except in cases based on the

respondent's behaviour (fact (b) above) the Court may, where there are no relevant children and the suit is undefended pronounce a decree nisi of divorce or judicial separation without either party attending Court; the petitioner's evidence is in the form of a sworn statement filed with the Court.

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree nisi is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree nisi. The marriage subsists until the decree is made absolute, usually six weeks after decree nisi. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, p. 1175. Under the 1973 Act, a decree nisi cannot normally be made absolute until the court is satisfied that arrangements have been made for the welfare of every child of the family who has not attained the age of sixteen which are satisfactory or the best which can be devised in the circumstances or that it is impracticable for the parties before the court to make any such arrangements.

Maintenance, etc.—The court has wide powers to order either party to the marriage to make financial provision (e.g. periodical payments, a lump sum, the transfer of property) for the other party or any child of the family, having regard to the party's means, the recipient's needs and all the important aspects of the case. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs.

The court may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the court may also deal with custody of and access to the children.

CUSTODY OF CHILDREN ETC.

The Court may make orders in respect of access to and the custody, maintenance and education of children in connection with a suit for divorce, nullity or judicial separation (above) or with an application to the Magistrates (below) whether the suit succeeds or not. In addition, if there is no other matrimonial suit involved a parent may apply for custody under the Guardianship of Minors Acts 1971 and 1973, and any person may apply to the High Court for the child to be made a ward of court.

In all cases the welfare of the child is the first and paramount consideration. The categories of child who may be covered by any particular type of proceedings differ according to the nature of those proceedings and to the nature of the particular relief sought, but it should be borne in mind that in connection with divorce, nullity and judicial separation a child which has been treated by the spouses as a child of the family may be included as well as the children of the spouses themselves. In the case of a Magistrates' order the child must be that of at least one of the spouses which has been accepted by the other as a child of the family.

When the Children Act 1975 comes into effect a new procedure called "Custodianship" will be introduced, basically allowing long term foster parents to apply for custody of the foster child.

Any dispute relating to the above matters should be placed in the hands of a Solicitor without delay (see Legal Aid, etc. below) and in particular it should be borne in mind that where there is finan-

cial need (because of, e.g. continuing education or disability) maintenance may be ordered for children even beyond the age of majority.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATES' SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or has been convicted of certain assaults or has deserted his wife, or has been guilty of persistent cruelty to her or to an infant child of the family, or of wilful neglect to maintain her or such a child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on similar grounds, so far as they are applicable to him. In particular a wife can sometimes be guilty of the offence of wilful neglect to provide reasonable maintenance for her husband or children and an order can be made against her. The court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum in its discretion to the wife and may order her to make a similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or both of the spouses of a weekly sum to the person entrusted with legal custody in respect of each child of the family up to the age of 16. If the court thinks the child would still be a dependent although over that age, similar payments may be ordered for support of the child up to the age of 21. The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct condoned to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wilful neglect or misconduct condoned to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

SCOTLAND DIVORCE

Actions of divorce can only be raised in the Court of Session which has jurisdiction to entertain such actions only if either of the parties to the marriage in question (a) is domiciled in Scotland on the date when the action is begun; or (b) was habitually resident in Scotland throughout the period of one year ending with that date.

The Scots Law of Divorce is now governed by the Divorce (Scotland) Act 1976, which for the purposes of divorce comes into force on January 1, 1977. As from that date the sole ground of divorce will be irretrievable breakdown of the marriage. This can only be established in one of the following ways:

(a) The defending spouse has committed adultery since the date of the marriage. Here it is not necessary for the pursuing spouse to prove that the fact of adultery made it intolerable to live with the defending spouse.

(b) The defending spouse has behaved in such a way that the pursuing spouse cannot reasonably be expected to cohabit with him or her. It is immaterial whether or not the conduct founded upon is active or passive.

(c) The defending spouse has deserted the pursuing spouse for a continuous period of two years. There must be no question of the pursuing spouse having refused a genuine and reasonable offer to adhere. Nor is irretrievable breakdown established if cohabitation is resumed for a period of more than three months, after the two year period has expired.

(d) There has been no cohabitation at any time during a continuous period of two years immediately preceding the action between the parties to the action, and the defending spouse consents to the divorce being granted.

(e) There has been no cohabitation at any time during a continuous period of five years, as in (d) *supra*, except that on the expiry of the five year period, the consent of the defending spouse is not required.

The facts of desertion and separation are not interrupted by the parties cohabiting for a period or periods not exceeding six months. However such a period or periods of cohabitation would not be included in the calculation of the two-year or five-year periods.

Encouragement of Reconciliation: The burden of promoting a reconciliation between spouses in a divorce action in Scotland falls upon the Court by virtue of the 1976 Act. Where an action of divorce has been raised, it may be postponed by the Court to enable the parties to seek to effect a reconciliation, if the Court feels that there may be a reasonable prospect of such reconciliation. If the parties do cohabit during such postponement, no account shall be taken of such cohabitation if the action later proceeds.

Maintenance, etc.: The 1976 Act also provides that either party to a marriage can apply to the Court at any time prior to decree being granted for (a) an order for a periodical allowance (b) an order for a capital sum or (c) a variation of a marriage settlement. The Court in granting or refusing such an order takes into account the respective means of the parties, and also all the circumstances of the case.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

Under the Divorce (Scotland) Act 1976 *supra*, a decree of Judicial Separation can be obtained by proof of the same facts necessary to obtain decree of divorce—except that for the principle of irretrievable breakdown there is substituted that of grounds justifying separation.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody. The Children Act 1975 (*supra*) also applies to Scotland.

ILLEGITIMACY AND LEGITIMATION
ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of an illegitimate child, or by the Supplementary Benefits Commission where benefit has been paid for the requirements of the child, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum in their discretion. The woman is not bound to give evidence in every case but if she does so it must be corroborated in some material particular. The mother has the custody of her illegitimate children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence. However, under the Family Reform Act, 1969, any presumption of law as to the legitimacy (or illegitimacy) of any person may in civil proceedings be rebutted by evidence showing that it is more probable than not that the person is illegitimate (or legitimate) and in any proceedings where paternity is in question, blood tests may be ordered. If however the husband and wife are separated under an Order of the Court, a child conceived by the wife during such separation is presumed not to be the husband's child.

LEGITIMATION.—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Under the Act of 1959, marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar-General information for re-registration of the birth of a legitimate child.

Declarations of Legitimacy.—A person claiming that he, his parents, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

Property Rights of Illegitimate Children.—By the Family Law Reform Act, 1969, the rights of an illegitimate child on an intestacy are now broadly equated with those of a legitimate child. Also, in any deposition made after January 1, 1970, any reference to children and other relatives shall, unless

the contrary intension appears, be construed as including references to, and to persons related through, illegitimate children.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen.

By Scots Law an illegitimate child is legitimated by and on the date of the subsequent marriage of its parents and there is no objection to there having been an impediment to the marriage of the parents at the time of the child's conception—see the *Legitimation (Scotland) Act, 1968*, which came into operation on June 8, 1968, on which date thousands of existing illegitimate children were regarded as legitimated. By the *Registration of Births, Deaths and Marriages (Scotland) Act, 1965*, a child so legitimated, who has already been registered as illegitimate, may be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

The Law Reform (Miscellaneous Provisions) (Scotland) Act, 1968, gives an illegitimate child full rights of succession (including legitm) in the estate of both parents, while the father and mother share equally in the estate of their illegitimate child. Unless expressly excluded, a reference in a deed executed on or after 25th November, 1968, to a relationship, e.g., "issue" or "children" is presumed to include illegitimate children.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES
OF THE CHURCH OF ENGLAND

1. MARRIAGE BY BANNS.—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the

parties must either obtain a licence (*see below*), or submit to the republication of banns.

2. **MARRIAGE BY LICENCE.**—Marriage licences are of two kinds:—

- (i) *A Common Licence*, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 The Sanctuary, S.W.1), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to six pounds. *No previous notice is required and the licence is available as soon as it is issued.* Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

- (ii) *A Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. **MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.**—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which *see below*) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman may be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (*e.g.*, a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (*see above*—in this case the marriage can only be *without licence*).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (*without licence*)—if both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
- (ii) Marriage by certificate (*with licence*)—one notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (*see below*) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

- (i) *Without licence.*—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With licence.*—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of

the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building*.—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

- (ii) *In a Register Office*.—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar or a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Register Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

- (iii) *Other Cases*.—If both parties are members of the Society of Friends (Quakers), or if, not

being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has certificate marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

FEES OF SUPERINTENDING REGISTRARS

For entering notice of a marriage by certificate (with or without licence) in the marriage notice book.....	£2
For a licence for marriage.....	£8
For a marriage by certificate (with or without licence) in the presence of a Registrar (including cost of certificate)....	£3

C.—MARRIAGE UNDER REGISTRAR GENERAL'S LICENCE

The main purpose of the Marriage (Registrar General's Licence) Act, 1970, which came into force on January 1, 1971, is to enable non-Anglicans to be married in unregistered premises where one of the persons to be married is seriously ill, is not expected to recover and cannot be moved to registered premises. A fee of £15 is payable to the Registrar General for the licence, though he has power to remit this in whole or in part to avoid hardship.

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

Minors.—Persons under 18 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and 2nd Schedule as amended by the Family Law Reform Act, 1969). Where both parents are living, both must consent, where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.

D.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOT- LAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, i.e., if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

Regular Marriages

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the proclamation of banns or publication by the Registrar, or by a Sheriff's licence. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must either have his or her usual residence in the Registration District, or have resided there for at least 15 days before the ceremony or have a parent so residing there. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns, or (b) notice by the Registrar. Banns must be proclaimed in a parish church situated within the registration district of the qualifying address of each party. It is ordered that the proclamation of banns should be made twice, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 75p. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, amended by the Marriage (Scotland) Act, 1956, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons with qualifying residence in Scotland or having parents so residing. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate. Such certificate of publication is only valid for three months. Regulation made under the

Births, Deaths and Marriages (Scotland) Act, 1965 provide that the cost of publication is 75p, which includes the issue of a certificate by the Registrar (any subsequent extract costs £1). The Naval Marriages Act, 1908, regulates the publication of banns or of notice on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. The fee for the ceremony is £2. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal method of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence (valid for ten days) which is otherwise deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, viz. marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

JURY SERVICE

Every local or parliamentary elector between the ages of eighteen and sixty-five who has resided in the United Kingdom, Channel Islands or Isle of Man for at least five years since he attained the age of thirteen will be qualified to serve on a jury unless he is "ineligible" or "disqualified".

Ineligible persons include those who have at any time been judges, magistrates and certain senior court officials, those who within the previous ten years have been concerned with the law (such as barristers and solicitors and their clerks, court officers, coroners, police, prison and probation officers); priests of any religion and vowed members of religious communities; and certain sufferers from mental illness.

Disqualified persons are those who have at any time been sentenced by a Court in the United Kingdom, Channel Islands or Isle of Man, to a term of imprisonment exceeding five years, or who have in the previous ten years served any part of a sentence exceeding three months or been sentenced to Borstal.

Some others are excusable as of right. These include members and officers of the Houses of Parliament, full-time serving members of the forces (including Women's forces) and registered and practising members of the medical, dental, nursing, veterinary and pharmaceutical professions and any person who has served on a jury in the two years before he is summoned. In other cases the court may excuse a juror at its discretion (e.g., where the service would be a hardship to the juror).

If a person serves on a jury knowing himself to be disqualified or ineligible he is liable to be fined up to £400 or £100 respectively.

A juror is entitled to subsistence and travelling expenses, compensation for other expenses incurred in consequence of attendance for jury service, loss of earnings and loss of national insurance benefits but certain maximum figures (which are revised from time to time) are laid down.

A verdict of a jury must normally be unanimous but after two hours consideration (or such longer period as the Court thinks reasonable), a majority verdict is acceptable if ten jurors agree to it (or nine if the size of the jury has been reduced to ten, e.g., by illness during the trial).

Jury trial is now very unusual in civil cases but a person charged with any but the least serious crimes is entitled to be tried by a jury. The defendant may object to any jury if he can show that that juror ought not to be on the jury (e.g., because he is ineligible or is biased against him) and may object to seven jurors without giving any reason.

JURY SERVICE IN SCOTLAND

It is the duty of the sheriff principal of each sheriffdom, in respect of each sheriff court district in his sheriffdom, to maintain a book, known as the "general jury book", containing the names and designations of persons within the district who are qualified and liable to serve as jurors. The book, which is compiled from information which every householder is required to provide, is kept open for the inspection by any person, upon payment of a nominal fee, at the sheriff clerk's office for the district. Part II of the Juries Act 1949 (amended by the Juries Act 1954 with regulations following thereon) applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors and for loss of earnings.

The number of a jury in a civil cause in the Court of Session is twelve and in the Sheriff Court seven. In a criminal trial the number is fifteen, and in inquiries by Sheriff and jury under the Fatal Accidents Inquiry (Scotland) Act 1895 or the Fatal Accidents and Sudden Deaths Inquiry (Scotland) Act 1906 the number is seven. In Scotland there is no Coroner's Inquest.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 Sterling, is qualified to serve on a jury.

Exemptions.—The following persons are exempt from serving on juries: peers, judges of the supreme courts, sheriffs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and other officers of any court of justice, prison officers, university professors, practising physicians, surgeons, registered veterinary surgeons or midwives, registered dentists (if they wish to be exempt), officers in the Army, Navy or Air Force on full pay, officers of the Customs and Excise, messengers at arms, police and other officers of law, commissioners and other officers and employees of the Inland Revenue, lighthouse keepers and their assistants, soldiers of the regular Army or Air Force, officers and men of the Territorial Army and Royal Auxiliary Air Force, factory inspectors and airport police. Officers of the Post Office will not be compelled to serve.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the position is complicated by numerous statutory provisions. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important provisions include:—

(1) As to agricultural holdings—the Agricultural

Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—the Landlord and Tenant Acts, 1927 and 1954, and the Law of Property Act 1969, Pt. I. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to dwelling houses. The complicated mass of legislation is now mainly embodied in the Rent Acts 1968 and 1974, which does not extend to Scotland or Northern Ireland. If the house is within the Act, a tenant has a personal right to reside there, and he may only be ousted on certain grounds.

Such tenancies may be either controlled or regulated. A controlled tenancy is one which has been in existence since July 6, 1957; had at that time the protection of the Rent Acts and is of a house or part of a house the rateable value of which did not exceed £40 in London or £30 elsewhere on November 7, 1956. A regulated tenancy is one which is not controlled, and which falls within the following limits:—

- (a) Rateable value on March 23, 1965 (or when first rated, if later)—not in excess of £400 in Greater London or £200 elsewhere OR
- (b) Rateable value on March 22, 1973 (or when first rated, if later)—not in excess of £600 in Greater London or £300 elsewhere OR
- (c) Rateable value on April 1, 1973 (or when first rated, if later)—not in excess of £1500 in Greater London or £750 elsewhere.

The essential difference between controlled tenancies and regulated tenancies is in the maximum rent recoverable. Under controlled tenancies, the maximum rent is ascertained by taking an appropriate multiple of the gross value for rating purposes of the property on November 7, 1956, whereas the maximum rent under a regulated tenancy is the rent agreed between the landlord and tenant, unless a fair rent has been registered, in which case that is the maximum rent recoverable. Application for the registration of a fair rent may be made by either the landlord or tenant, to the Local Rent Officer, and appeal against his decision lies to the Rent Assessment Committee.

S27 of the Housing Finance Act 1972 provides for the conversion of a controlled tenancy into a regulated tenancy on the issue of a certificate by the Local Authority that the house is provided with all standard amenities. The Housing Rents and Subsidies Act 1975 has repealed the former provision for conversion by reference to rateable value on a specific date. This Act also provides for the phasing of rent increases in the private sector.

(4) As to dwelling houses with resident landlords. The Rent Act 1974 gives tenants of furnished dwellings the same security of tenure as those of unfurnished dwellings unless the landlord lives in part of the house. In the latter case, and in the case of a tenancy of an unfurnished dwelling granted by a resident landlord after 13th August 1974, the tenancy may fall within Part VI of the Rent Act 1968, and the tenant may be granted relief from eviction by application to the Rent Tribunal after a notice to quit has been served, but before it has expired. The Rent Tribunal is empowered to delay

the operation of the notice to quit by 6 months, and by the end of that period, the tenant may apply for a further delay of 6 months. The landlord or the tenant may also apply to the Rent Tribunal for a reasonable rent to be registered, and once registered, this is the maximum rent recoverable.

(5) The Rent Act 1965 Act also provides that if any person with intent to cause the residential occupier of any premises to give up the occupation thereof does any act calculated to interfere with the peace or comfort of the residential occupier or members of his household, he shall be guilty of an offence. A further provision prevents a landlord enforcing a right to possession against a tenant (who is not already protected by any security of tenure legislation) without a court order, and there are special rules in such cases relating to agricultural employees.

(6) A notice to quit *any* dwellinghouse must be given at least four weeks before it is to take effect, and must be in writing and in the prescribed statutory form.

(7) Part I of the Landlord and Tenant Act, 1954, applies to most tenancies of houses for over twenty-one years at a ground rent. Where it applies, the contractual tenancy is continued until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on limited grounds.

Further, under the Leasehold Reform Act, 1967, tenants of houses under leases for over twenty-one years at rent less than two-thirds of the rateable value of the house are in most cases given a right to purchase the freehold or to take an extended lease for a term of fifty years, provided the tenant at the time when he seeks to exercise the right has been occupying the house as his residence for the last five years or for periods amounting to five years in the last ten years.

(8) Under the Housing Act, 1961 (which does not extend to Scotland), in a lease of a dwelling-house granted after October 24, 1961, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949 (amended by the Agriculture Act, 1958), which is a consolidating Act applicable to Scotland, contains provisions similar to those in the English Act,

alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Acts, 1949 and 1964 give a measure of security to tenants of shops. These Acts enable the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the 1949 Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Acts apply to premises held by the Crown or Government Departments, either as landlord or tenant.

The Housing (Scotland) Act 1966 and the Rent (Scotland) Act 1971, as amended by the Rent Act 1974, define controlled tenancies and regulated tenancies, both furnished and unfurnished, and lay down the system by which a landlord or tenant may obtain from the Rent Officer registration of a fair rent. The Acts also give to the tenants either of furnished or unfurnished lets a substantial degree of security of tenure. There are, however, certain exceptions; thus, they do not apply to tenancies where the interest belongs to the Crown, or to a local authority, a development corporation the Housing Corporation of new towns. There must be a true tenancy for the Acts to apply. They do not apply to licensees such as lodgers or persons allowed to occupy houses on a grace and favour basis or to service occupiers. The Acts define the circumstances under which a landlord may apply for increased rent as a consequence of having carried out improvements to his property and also lay down the system of phasing of such rent increases. On the death of a statutory successor to a tenancy the tenancy may pass for a second time to a member of the family or a relative who has been in residence in the house for a period of at least six months. The Acts also lay down the duties and functions of Rent Officers and Rent Assessment Committees with regard to unfurnished accommodation and of Rent Tribunals for furnished accommodation.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid Act 1974, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the service is contained in the Act itself and the Regulations made thereunder, administered by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, Lands Tribunal, Restrictive Practices Court, before the Commons Commissioners, and civil proceedings in Magistrates' Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation are excepted from the scheme, as are also relator actions and election petitions.

Where a person is concerned in proceedings only in a representative, fiduciary or official capacity, his personal resources are not to be taken into account in considering eligibility for legal aid. Apart from this, eligibility in civil proceedings depends upon

an applicant's "disposable income" and "disposable capital". Legal aid cannot be granted if the former exceeds £1,790 per annum, and a person may be refused assistance if he has a disposable capital of more than £1,200 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to one third the excess of his disposable income above £570, together with the whole excess of his disposable capital above £250. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital part of the value of the house in which the applicant resides, of furniture and household possessions; allowances are made in respect of dependants. Except in cases where the spouses are living apart, or have a contrary interest, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the Department of Health and Social Security, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere application should be made to a Local Committee for London. However, if the application is made in respect of proceedings in an appellate court and the applicant is resident in England or Wales, application should generally be made to any Area Committee—if resident elsewhere, to an Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel from a panel. The costs of the assisted person's solicitor and counsel will be paid out of the legal aid fund. The court may order that the costs of a successful unassisted party shall be paid out of the legal aid fund.

LEGAL ADVICE AND ASSISTANCE

The Scheme is governed by the Legal Aid Act 1974.

Under this legal advice and assistance scheme a client may obtain such advice or assistance as is normally provided by a solicitor and if necessary the advice of a barrister may be obtained, but the scheme does not extend to taking any step in any proceedings before any court or tribunal. Where legal aid is available for civil proceedings (see above) or in criminal cases (see below) the scheme covers work done in making application for such legal aid.

A person is eligible for advice or assistance under the scheme provided his disposable capital does not exceed £250 and his disposable income does not exceed £30.00 per week or if he receives Supplementary Benefit or Family Income Supplement. For a married man or person with children or other dependants deductions will be made from gross income and capital and allowances are made in respect of income tax, National Insurance contributions, etc. It is intended that the financial limits shall approximate to those applying for legal aid in civil proceedings (see above). Except when they are separated or have conflicting interests the means of husband and wife will be aggregated for the purpose of determining financial eligibility. If a person's disposable income exceeds £15.00 per week he will be required to pay a contribution as follows:—

Disposable income over—			
£16.00 but not over	£17.00 contribution	£1.50	
£17.00 " " "	£18.00 " "	£3.00	
£18.00 " " "	£20.00 " "	£6.50	
£20.00 " " "	£22.00 " "	£9.00	
£22.00 " " "	£24.00 " "	£12.00	
£24.00 " " "	£26.00 " "	£15.00	
£26.00 " " "	£28.00 " "	£18.00	
£28.00 " " "	£30.00 " "	£21.00	

Solicitor's costs and expenses, which should not together exceed £25 (V.A.T. exclusive) without leave of the Area Legal Aid Committee, will be paid out of the client's contribution and any monies recovered in respect of costs or damages from another party and the balance will be paid by the Legal Aid Fund.

The Act also extends the scheme to cover the costs of a solicitor who is present within the precincts of a magistrates' court or county court and is requested by the court to advise or represent a person who is in need of help.

LEGAL AID IN CRIMINAL CASES

The Legal Aid Act 1974 Part II provides for legal aid in criminal proceedings. A criminal court (e.g., magistrates' court, Crown Court) has power to order legal aid to be granted where it appears desirable to do so in the interests of justice. The court shall make an order in certain cases, e.g., where a person is committed for trial on a charge of murder. However, the court may not make an order unless it appears to the court that the person's means are such that he requires assistance in meeting the costs of the particular proceedings in question. Application should be made to the appropriate court where proceedings are to take place.

An applicant may be required to make a contribution towards the costs of the action. In order to ascertain the amount of this contribution he will have to produce written evidence of his means. Any assessment of means will be carried out by the Supplementary Benefits Commission, which will report to the court. No contribution will be required from a person who has insufficient means.

Any practising barrister or solicitor may act for a legally aided person in criminal proceedings unless excluded by reason of misconduct. In general where legal aid is given it will normally include representation by both counsel and solicitor. However, in connection with magistrates' courts, representation will be by solicitor alone unless it is a serious offence.

Where any doubt arises about the grant of a legal aid order that doubt is to be resolved in favour of the applicant. The court also has power to amend or revoke a legal aid order. Legal aid may also be granted in connection with appellate proceedings, e.g., on appeal to the Criminal Division of the Court of Appeal under the Criminal Appeal Act, 1968.

SCOTLAND Civil Proceedings

The Legal Aid (Scotland) Act, 1967 and the Legal Advice and Assistance Act, 1972 form the basis of a scheme to provide legal advice in most civil actions in the House of Lords on appeals from the Court of Session, in the Court of Session, the Lands Valuation Appeal Court, the Scottish Land Court, the Sheriff Court, the Restrictive Practices Court and Lands Tribunals for Scotland.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who

is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. In a case where litigation is not immediately necessary, the client can seek advice under the Legal Advice and Assistance Act 1972 which is similar to the legal advice and assistance provisions of the Legal Aid Act 1974 (see above). In an instance where litigation is expected, application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the Supplementary Benefits Commission after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action. The Legal Aid (Scotland) Act, 1967 provides for the payment (to a limited extent) out of the legal aid funds of expenses incurred by successful opponents of legally aided litigants.

LEGAL ADVICE

Legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England—the Scottish scheme being administered under the Legal Advice and Assistance Act 1972.

Criminal Proceedings

Legal Aid (Scotland) (Criminal Proceedings) Regulations, 1964, which came into operation in October 1964, provide for the administration of criminal legal aid.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act 1971 (consolidating earlier Acts) contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after November 18, 1952. By the Land Commission (Dissolution) Act 1971, betterment levy, which was formerly payable on the realization of the development value of land, is not chargeable on any transactions carried out after July 23, 1970. This Act extends to Scotland. A Development Land Tax is proposed which will be charged from August 1, 1976, in respect of the realization of development value of land in the U.K.

What is Development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not deemed Development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior, with the exception that since January 1, 1969, any expansion of a building below ground level constitutes development.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will,

however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Secretary of State may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1973 specifies a number of types of development for which no permission is required, e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 50 cubic metres or one-tenth, whichever is greater, subject to a maximum of 115 cubic metres.

Appeal against refusal of permission lies to the Secretary of State and from his decision, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement notice lies to the Secretary of State.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the most important of which are the Act of 1949 (as amended) and the Act of 1969. Those entitled to vote as electors at a parliamentary election in any constituency are all persons resident there on the qualifying date who, at that date are British subjects or citizens of the Republic of Ireland of at least 18 years of age and not subject to any legal incapacity to vote. In addition, a person who is of voting age on the date of the poll at a parliamentary or local government election is entitled to vote, whether or not he is of voting age on the qualifying date. Accordingly, a qualified person will be entitled to be registered in a register of parliamentary electors or a register of local government electors if he will attain voting age within twelve months from the date on which the register is required to be published. Since the Electoral Registers Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register (of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors) is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration

officer determines the claims and objections which must generally be lodged by December 16 in each year. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters" (and persons employed by the British Council in posts outside the United Kingdom), who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g., those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or

in some cases, by proxy as "absent voters". Section 5 of the 1969 Act extends to certain married persons the right to vote by proxy or by post.

The local government franchise now depends solely upon residence in the area, the previous non-resident qualification for owners of property having been abolished by the Representation of the People Act, 1969, with effect from February 16, 1970. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only. The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

INCOME TAX 1976-77

Income Tax is chargeable on the income of all individuals and persons other than bodies corporate.

Income Tax is a tax on annual income, represented by money or money's worth. In general, the charge to tax is on the full amount of income arising for the year of assessment, the fiscal year which runs from April 6 in one year to April 5 in the next, subject to the deductions authorized in the Income Tax Acts. Under Schedule D, however, the assessment is made on the profits or gains of a continuing trade or profession for the year preceding the year of assessment, which is called the "basis year". The profits are arrived at on ordinary accountancy principles and then adjusted for tax purposes. The profits for the accounting year of the trade or profession which ends in the fiscal year preceding the year of assessment are the profits of the "basis year".

Broadly, the charge to tax is on income arising in the United Kingdom, or on income derived from home or abroad by residents in the United Kingdom. An individual is resident and ordinarily resident in the United Kingdom if he is living here in the ordinary course of his life or for an extended period; also, though normally he lives here, if he is abroad for occasional residence only; or if he visits the United Kingdom year by year and, over a period of four years he spends an average of three months or more in this country, even though his main home is abroad.

The income of a married woman living with her husband is aggregated with his income although, with effect from the year of assessment 1976/77, this does not apply for the year of assessment in which the marriage occurs. Where the income falls to be aggregated, separate assessment (which divides the liability between husband and wife) may be claimed but the total tax due remains the same. The earned income of a married woman may be assessed as if she were not married provided that on the balance of their joint income the husband is assessed as a single man.

Income Tax is imposed at the rates specified by the annual Finance Acts. From April 1973 a single graduated tax replaced the separate income tax and surtax which operated in earlier years. After deducting personal allowances and reliefs the balance of income is now taxed at a basic rate of 35 per cent. Where the balance of income exceeds £5,000 the excess is charged at higher rates which start at 40 per cent. and reach a maximum of 83 per cent.

Where investment income exceeds £1,000 an investment income surcharge at 10 per cent. is

payable on the first £1,000 of the excess and at 15 per cent. on the balance of the excess so that where income is sufficiently large to attract the maximum rate of 83 per cent. the top slice of investment income will be charged at 98 per cent. However, if the taxpayer or his wife living with him is sixty-five years of age the 10 per cent. surcharge is not payable on the first £500 of the excess over £1,000.

The enactments relating to Income Tax were consolidated in the Income and Corporation Tax Act 1970 as amended by subsequent Finance Acts.

The tables which follow show the tax payable for 1976/7 by an individual on the amount of income specified, after deduction of the personal allowance and children's allowance (where appropriate). The taxpayer may, however, be entitled to further reliefs which would reduce the tax payable below the amounts shown in the tables.

The income and profits of bodies corporate are subject to Corporation Tax which is outside the scope of this article. Some important changes in the system of Corporation Tax which came into effect in 1973/74 are, however, dealt with in a special article (see Index).

Assessment.—The Income Tax Acts provide for tax to be assessed and collected under a number of Schedules which deal with separate sources of income:

Schedule A.—Under this schedule are assessed those receipts previously dealt with under Case VIII of Schedule D, viz.: ground rents, certain other receipts from land (other than mineral rents and royalties), rents (less expenditure on maintenance, insurance and repairs) and premiums on leases for less than fifty years. Such premiums are assessed on the amount received less 2 per cent. for every year after the first year. "Lease" includes any tenancy. Furnished letting income is normally assessed under Case VI, Schedule D without distinguishing the receipts as between the space let and the furniture hire, but rent for the space can be distinguished and assessed under Schedule A, the profit on the hire of furniture being assessed under Case VI, Schedule D.

Under Schedule B.—Assessment under this Schedule is now restricted to woodlands in the United Kingdom managed on a commercial basis with a view to the realization of profits. The assessment of woodlands will be based on one third of the annual value of the land arrived at on the normal rating basis on the assumption that the lands were let and occupied in their natural and unimproved state. The taxpayer has the option to be assessed under Case I, Schedule D on the results shown by the accounts instead.

(1) Single Persons (under 65 years of age)

Income		Income all Earned		All Investment Income	
		Income Tax	Average Rate per cent.	Income Tax and Investment Income Surcharge	Average Rate per cent.
Ann.	(Wkly.)

Under Schedule C.—Assessed on the paying agent. Not of concern to the individual taxpayer.

Under Schedule D.—This schedule is divided into six cases as follows: Cases I and II—Profits of trades, business, commercial activities on land including farming, professions or vocations.

Case III.—Interest on Government Stocks not taxed at source (e.g., War Loan, British Savings Bonds), bank deposit interest, discounts, etc. Interest on ordinary National Savings Bank and Trustee Savings Bank up to £40 is exempt from Income Tax. This exemption applies to both husband and wife separately. Interest on National Savings Bank and Trustee Savings Bank Special Investment Accounts is not exempt.

Cases IV and V.—Interest from foreign or Commonwealth securities, rents, dividends and all other unearned income; assessed on full amount arising, whether remitted or not, where person domiciled and ordinarily resident in the U.K. but on amount remitted only where person not domiciled in the U.K. or a British subject not ordinarily resident. Prior to April 1974 overseas pensions and profits from trades, business and professions exercised abroad were subject to tax if remitted to the U.K. by a person resident in the U.K. From April 6, 1974, persons who are resident and domiciled in the U.K. will be subject to U.K. tax on overseas pensions whether remitted to the U.K. or not, subject to a deduction of one tenth. Residents who are domiciled and ordinarily resident in the U.K. will be subject to U.K. tax assessment on profits from trades, businesses or professions

exercised abroad whether remitted or not, subject to a deduction of one quarter.

Case VI.—Sundry profits and annual receipts not assessed under any other case, e.g., insurance commission, post cessation receipts, certain premiums paid to persons other than landlords and numerous other receipts treated as income and specifically charged hereunder. As to furnished lettings, see under Schedule A.

Losses.—Under Cases I, II, V and VI losses can in general be carried forward against corresponding income or profits of subsequent fiscal years without time limits. Losses under Cases I and II (and from overseas activities to the extent that a profit would be assessable under Case V) may alternatively be set off against other income of the same year or the year next following.

Capital Gains.—A separate long-term gains tax was introduced in the Finance Act 1965 and this applies to gains realized on chargeable assets disposed of after April 6, 1965. In the case of assets owned on April 6, 1965 and disposed subsequently only the proportion of the gain attributable to the period after that date is chargeable. The detailed rules of this tax are outside the scope of this article.

From 1970/71 to 1975/76, both inclusive, where the combined sales of husband and wife do not produce more than £500, such sales will not attract capital gains tax. With effect from the year 1976/77 the limit is increased to £1000.

The calculation of gains and losses on quoted securities held at April 6, 1965, which are disposed of after March 19, 1968, may be made solely by

reference to the market value at April 6, 1965, if the taxpayer elects to deal with all holdings in this way. Separate elections may, however, be made in relation to fixed interest stocks and preference shares and/or other quoted shares.

To the extent that capital gains from disposals after December 1973 of interests in land in the United Kingdom were development gains, computed under complicated provisions found in the 1974 Finance Act, they were chargeable to income tax under Case VI of Schedule D, only the balance of the gain being charged to capital gains tax. Development gains accruing from disposals on or after August 1st 1976 are not subject to income tax but may be chargeable to development land tax under the Development Land Tax Act 1976.

The rate of Capital Gains Tax payable by an individual is 30 per cent. but if the total of an individual's chargeable gains in any year of assessment does not exceed £5,000, one half the net gains may be charged at the taxpayer's marginal rate of tax, treating one half the gain as ordinary investment income. The effect of this is that the 30 per cent. rate is only used where the taxpayer's income is such as to attract a top rate (including where appropriate, investment income surcharge) in excess of 60 per cent. On sales of holdings in authorized unit trusts and approved investment trusts the capital gains tax payable is reduced by a credit equal to whichever is least of—

- (i) the amount of the capital gains tax;
- (ii) 17'5 per cent. of the chargeable gains on disposal of the units;
- (iii) 17'5 per cent. of all chargeable gains accruing to the individual in the year.

From April 15, 1960, gains on the disposal of securities issued or guaranteed by the British

Government are not subject to Capital Gains Tax. This exemption does not apply, however, where such stocks are sold within twelve months after being acquired.

Under Schedule E.—Income from all offices, employments and pensions, including salaries, wages, emoluments, director's fees, etc. Assessed on the actual earnings for the year of assessment. Foreign earnings of this type which prior to April 1974 would have been subject to the "remittance" basis of assessment are now assessable on the amount arising but subject to a deduction of 25 or 100 per cent., depending on the circumstances, viz: where the taxpayer is resident, ordinarily resident and domiciled in the U.K. and the employment is carried on wholly outside the U.K. for 365 days or more continuously the deduction will be 100 per cent. Similar earnings where the taxpayer is absent for a period less than 365 days will attract a deduction of 25 per cent.

There are special more complex rules to cover the emoluments received by persons resident but not domiciled in the U.K. from foreign employers. In general, where the duties are performed in the U.K. such earnings will be assessable subject to a deduction of 50 per cent. for and from 1974/75 but from 1976/77 the deduction will be reduced to 25 per cent. where the taxpayer has been resident in the U.K. for at least nine out of the last ten preceding tax years.

In arriving at the amount to be assessed under Schedule E all expenses incurred wholly, exclusively and necessarily in the performance of the duties of the office or employment may be deducted, including fees and subscriptions to certain professional bodies and learned societies and, within strict limits, depreciation allowances.

Expenses allowances and payments in kind (less expenses incurred in performance of duties) to directors and employees enjoying emoluments of £5,000 (£2,000 before 1975/76) or more are assessable. From 1965/6 onwards expenses incurred in providing business entertainment (including hospitality of any kind and gifts) are not allowable except when provided for an overseas customer. Where any person has premises available for his use by reason of his employment and either pays no rent or pays less than the annual value he will be charged to tax on the annual value less any rent paid. Provision is also made for charging directors and employees to tax on the value of benefits obtained from the issue or transfer of shares on advantageous terms and from subsidized medical insurance schemes. Certain payments made on retirement or removal from a person's office or employment (in excess of £5,000) are assessable to tax on him.

Exemptions.—Unemployment, sickness and maternity benefit and grant, and death grant payable under the National Insurance Acts are not assessable to income tax, but (retirement, widows, etc.) pensions and child benefits (family allowances) are included in the charge under this schedule. Under Finance Act 1966 statutory redundancy payments are exempt from tax.

Where the emoluments are paid by an employer in the U.K., deduction of income tax is made by the employee's code number. As to P.A.Y.E. (pay as you earn) see further below.

Under Schedule F.—From April 6, 1966, onwards income tax was charged on all dividends and distributions made by a U.K. resident company. From April 1973 a U.K. resident company paying a dividend must account to the Revenue for advance

corporation tax on the amount of the dividend paid. A shareholder who is resident in the U.K. and who receives such a dividend is taxable under Schedule F on the amount of the dividend plus the advance corporation tax appropriate to it, but is entitled to a credit against tax liability equal to the amount of the advanced corporation tax.

ALLOWANCES.—The following allowances and deductions are given in calculating the income tax payable; this serves to give relief thereon at the highest rate of tax paid but in general the allowances do not affect the investment income surcharge payable.

Personal Allowance.—To single person £735
To married man living with or normally maintaining his wife (but in year of marriage allowance is reduced by 1/12 of £350 for each fiscal month (i.e. ending May 5, June 5, etc.) which ended before the date of marriage) £1,085

When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. A married woman permanently separated from her husband is treated as a single woman.

Children.—For each child under 16 (or over that age at the beginning of the fiscal year and receiving full time instruction at a recognized educational establishment, or who is articulated or apprenticed) and who does not have income in that year exceeding £350 in his own or her own right, the allowances are:

- (a) Child over 16 at commencement of fiscal year £365
- (b) Child over 11 at commencement of fiscal year £335
- (c) Other children (each) £300

(4) Married Couples with Two Children

50,000	35,044'61	70'1	34,986'51	70'0	34,893'55	69'8
100,000	76,544'61	76'5	76,486'51	76'5	76,393'55	76'4

If a child who is under the age of eighteen years and is unmarried at the end of the year of assessment has earned income not exceeding £235, the full allowance will only be given if his investment income does not exceed £115. Scholarship or bursary does not count as income for this purpose. Marginal relief is given where a child's income exceeds £350 or, when appropriate, the investment income exceeds £115. The child relief will then be reduced by £1 for each £1 by which the child's income exceeds the relevant limit. "Child" includes step-child and adopted child. Child allowance is due to the person who has the custody of and maintains the child. If more than one person could claim the allowance, e.g., if a husband and wife are divorced or separated, the allowance will be apportioned between them as necessary. These allowances are reduced by £52 for each child for whom Child Benefit (Family Allowance) is due for the whole year 1976/7 and by an appropriately smaller amount where the allowance is received for only part of the year.

Dependent Relatives.—The maximum deduction for each dependent relative is normally £100 but an increased allowance of £145 may be claimed where the claimant is a woman (other than a married woman living with her husband). These allowances are reduced by £1 for every £1 by which the relative's own income (excluding voluntary allowances) exceeds the basic National Insurance Retirement Pension. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband or whose marriage has been

dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided *pro rata*.

Daughter.—A person who by reason of his or his wife's old age or infirmity has to retain the services of a daughter resident with him or her is entitled to an allowance of £55.

Housekeeper or Person looking after children.—An allowance to:

- Widows and Widowers: Housekeeper allowance of £100 in respect of a housekeeper employed as such or a female relative of his or hers or of the deceased spouse acting as housekeeper. These females must be resident.
- Unmarried man: Housekeeper allowance of £100 in respect of a female relative living with and maintained by him to look after brothers or sisters for whom he is entitled to child allowance.
- If widow or widower entitled to the child allowance is also entitled to an allowance of £350. The relief is also available to a married man whose wife is totally incapacitated by physical or mental infirmity throughout the year. This relief cannot be claimed in addition to the housekeeper allowance of £100.

Blind Persons.—An allowance of £180 less the amount of any tax-free disability payment receivable may be claimed by a registered blind person provided that the Daughter's Allowance of £55 is not also claimed. Where both spouses are blind the maximum allowance is £360 less any tax-free disability receipts. The reliefs quoted are for a full year and must be scaled down where a person is registered as blind for only part of the year.

OTHER TAXES AND STAMP DUTIES

The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed *abroad*, the period begins to run from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

Instruments presented after the proper time (subject to special provisions in some cases and subject to the commissioner's power to mitigate) a penalty equal to the duty..... £10

AGREEMENT for Lease, *see* LEASES.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale with certain exceptions, *e.g.* agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT under seal subject to exemptions 50p

APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed..... 50p

ASSIGNMENT:

By way of sale—*see* Conveyance.

By way of gift—*see* Voluntary Disposition.

ASSURANCE—*see* Insurance Policies.

BEARER INSTRUMENT:

Inland bearer instrument, *i.e.* share warrant, stock certificate to bearer or any other instrument to bearer by which stock can be transferred, issued by a company or body formed or established in U.K. Duty of an amount equal to three times the transfer duty (usually £6% of the market value).

Overseas bearer instrument, *i.e.*, such an instrument issued in G.B. by a company formed out of the U.K. Duty equal to twice the transfer duty (usually £4% of the market value). Even if issued out of G.B. the instrument must be stamped before transfer in G.B. The issue or transfer of a bearer instrument relating to stock expressed in the currency of a territory outside the Scheduled territories is exempt from duty.

BILL OF SALE, Absolute, *see* CONVEYANCE ON SALE.

CAPITAL DUTY.—Where a *chargeable transaction* of a *capital company* takes place after July 31, 1973, duty of £1 is payable on every £100 or fraction of £100 of the actual value of the assets contributed by the members (as opposed to the previous duty of 50p per £100 of the nominal capital), provided the place of effective management of the company is in G.B. or its registered office is in G.B. but the place

of its effective management is outside the E.E.C. (Finance Act 1973).

A statement containing prescribed particulars must be delivered to the Commissioners within one month of the transaction unless there is an obligation under the Companies Act 1948 (*e.g.*, on the formation of a limited liability company) or the Limited Partnerships Act 1907 (*e.g.*, on the registration of a limited partnership) to send a statement to the registrar of companies as a result of the transaction.

Capital company includes a company incorporated with limited liability under U.K. law, a limited partnership under the Limited Partnerships Act 1907, a company incorporated according to the law of any other member of the E.E.C. and any other corporation or body of persons whose members have the right freely to dispose of their shares and whose liability for debts is limited.

Chargeable transaction includes the formation of a capital company, an increase in its capital by the contribution of assets of any kind, the transfer to G.B. of its place of effective management from a country outside the E.E.C. if its registered office is in such a country, and the transfer to G.B. of its registered office from a country outside the E.E.C. if its place of effective management is in such a country.

CAPITAL TRANSFER TAX

A new tax on the transmission of wealth, made by way of gift during a person's lifetime and on death, has been introduced by the Finance Act 1975. It applies retrospectively to March 27, 1974, unless the donor dies before March 13, 1975 (when Estate Duty or modified Estate Duty will apply).

Tax is charged at progressive rates on the cumulative totals of chargeable gifts made during a person's lifetime, with a final cumulation of the value of a person's estate on his death. The rates of tax for lifetime transfers are those shown in Table 1. For transfers on death, or within 3 years of death, the rates applicable are those in Table 2.

In calculating the value transferred on lifetime

TABLE 1

Value transferred		Rate of tax
Lower limit £	Upper limit £	Per cent.
0	15,000	Nil
15,000	20,000	5
20,000	25,000	7½
25,000	30,000	10
30,000	40,000	12½
40,000	50,000	15
50,000	60,000	17½
60,000	80,000	20
80,000	100,000	22½
100,000	120,000	27½
120,000	150,000	35
150,000	200,000	42½
200,000	250,000	50
250,000	300,000	55

60,000	80,000	40
80,000	100,000	45
100,000	120,000	50
120,000	150,000	55
150,000	500,000	60
500,000	1,000,000	65
1,000,000	2,000,000	70
2,000,000	—	75

Certain exemptions and reliefs are given, including:

(1) The first £2,000 of gifts made in each tax year (April 6 to the following April 5) are exempt. Only the balance over £2,000 is taxable. There is provision for the carry forward of this relief for one year only, in so far as it has not been used in the previous year.

(ii) Gifts not exceeding £100 to any one donee in the tax year are exempt. The excess only is taxable. This relief is in addition to the £2,000 relief.

(iii) Gifts which are normal expenditure out of income are exempt, provided the donor is left with sufficient income to maintain his standard of living.

(iv) Gifts in consideration of marriage are exempt up to £5,000 if made by a parent; £2,500 if made by a grandparent or some other lineal ancestor, or by one party to another; and £1,000 in any other case.

(v) Gifts of certain types of property, including works of art, are exempt if made to a body not established or conducted for profit.

(b) *For lifetime transfers and on death:*

(i) Transfers between spouses are exempt to the extent that the gift increases the value of the donee spouse's estate.

(ii) Lifetime gifts to Charities and certain Political Parties are exempt without limit. If made on death or within one year of death, gifts are exempt up to £100,000 only.

(iii) Gifts to listed heritage bodies, including National Gallery, British Museum, and Government Departments, are exempt.

(iv) **Agricultural relief:** Provided certain conditions are satisfied, on a transfer of Agricultural land, the value is reduced to half the actual value. To satisfy the conditions, *inter alia*, the transferor must be a working farmer (as defined) and must have occupied the

Conditional exemptions exist for works of art, timber and for death on active service.

Tax must be paid within 6 months of the end of the month in which the chargeable event occurs unless the event is a lifetime transfer, made between April 5 and October 1 in any year, when tax is due at the end of the next following April. In certain circumstances, tax may be payable by instalments.

Interest on unpaid tax runs from the date the tax is due, at 6% p.a. on death and 9% p.a. otherwise.

The normal rules for Estate Duty apply for deaths up to November 12, 1974 (see post, p. 1189). For deaths after that date and before March 13, 1975, Estate Duty is levied, but at the rates given in Table 2 above, and, *inter alia*, transfers between spouses are totally exempt (and not limited to £15,000). No Capital Transfer Tax is payable on lifetime gifts where death occurs before March 13, 1975.

For deaths after March 12, 1975, Capital Transfer Tax only, applies.

CONTRACT NOTE for the sale or purchase of any stock or marketable security; where the value of the stock or marketable security—

Exceeds £100 and does not exceed £500...	10p
" £500 and " " " £1,500..	30p
" £1,500.....	60p

(Special adhesive stamps)

Option Contract Notes are chargeable with half the above rates only, unless the option is a double one.

Contract Note following a duly stamped option contract note chargeable with half the above rates only.

CONTRACT OR GRANT FOR PAYMENT OF A
SUPERANNUATION ANNUITY: for every £10
or fractional part of £10..... 5p

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, *see* below, p. 1194) of any property (*except* stock or marketable securities for which, *see* above), where the Conveyance or Transfer contains a certificate of value certifying that the transaction does not form part of a larger transaction or a series of transactions in respect of which the aggregate amount or value of the consideration exceeds £15,000.

Exceeds £20,000 (for every £50 or fraction of £50).....	25p
Exceeds £25,000 (for every £50 or fraction of £50).....	50p
Exceeds £30,000 (for every £50 or fraction of £50).....	75p

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

However, if the consideration does not exceed £300, and the instrument does not contain a certificate of value, then:

Where the consideration:

Does not exceed £5.....	10p
Exceeds £5 but does not exceed £100, 20p per £10 or part.	
Exceeds £100 but does not exceed £300, 40p per £20 or part.	

If in such a case the instrument is certified at £20,000 it is stamped at 25% of the above rates with a minimum of 5p; if certified at £25,000 it is stamped at 50% of the above rates; if certified at £30,000 it is stamped at 75% of the above rates with a minimum of 10p.

CONVEYANCE OR TRANSFER of any other kind fixed duty 50p
Included under this head are Transfers for nominal consideration within any of the following categories:

- (a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.
- (b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor; (ii) from a mere nominee of the transferee; (iii) from one nominee to another nominee of the same beneficial owner.
- (c) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.
- (d) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (Note.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)
- (e) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.
- (f) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.
- (g) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.
- (h) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 50p should take the form of a certificate setting forth the facts of the transaction. In cases falling within (1) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909-10) Act 1910." A certificate in other cases should be signed by a solicitor or other person (e.g., a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marketing Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 50p fixed duty is duly stamped.

COVENANT—For original creation and sale of any annuity, *see* CONVEYANCE.

Separate Deed of, made on occasion of sale, but not being an instrument chargeable with *ad valorem* duty as a Conveyance: same duty as a Conveyance on sale, but not to exceed..... 50p

DEATH DUTIES, *see* ESTATE DUTY.

DECLARATION OF TRUST, not being a Will or Settlement..... 50p

DEED of any kind not charged under some special head..... 50p

DEMISE, *see* LEASE.

DUPLICATE OR COUNTERPART
Same duty as original, but not to exceed.. 50p

GIFT (see VOLUNTARY DISPOSITION, p. 1194).

GUARANTEE:
If under seal..... 50p

HIRE-PURCHASE AGREEMENTS:
Under seal..... 50p
(Finance Act 1907, s. 7)

N.B.—If the agreement amounts to a "credit-sale" the position is the same.

INSURANCE POLICIES:

Life:—

Exc. £50 and not exc. £1,000, for every £100 or part of £100..... 5p

Exc. £1,000, for every £1,000 or any fractional part of £1,000..... 50p

Made after 1 August 1966 for period not exceeding 2 years..... 5p

LEASES:—Lease or tack for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £250, £1; of any lands, tenements, etc., in consideration of any rent, according to the following table:—

Annual rent not exceeding	*Term not exceeding			Term exceeding 100 years
	7 years	35 years	100 years	
£	£ p	£ p	£ p	£ p
5	Nil	0·10	0·60	1·20
10	Nil	0·20	1·20	2·40
15	Nil	0·30	1·80	3·60
20	Nil	0·40	2·40	4·80
25	Nil	0·50	3·00	6·00
50	Nil	1·00	6·00	12·00
75	Nil	1·50	9·00	18·00
100	Nil	2·00	12·00	24·00
150	Nil	3·00	18·00	36·00
200	Nil	4·00	24·00	48·00
250	Nil	5·00	30·00	60·00
Exceeding £250 for every £50 or fraction of £50	0·05	1·00	6·00	12·00

*If the term is indefinite the same duty is payable as if the term did not exceed 7 years.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £30,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £150 a year.

MORTGAGES are exempt.

POWER OF ATTORNEY, etc., for receiving certain prize-money or wages 5P
For the receipt of any money, or bill, or note, not exceeding £20, or of any periodical payments not exceeding £10 annually..... 25P

For the receipt of dividends or interest of any stock, if for one payment only..... 5P
Ditto in any other case 25P
Power of attorney of any other kind 50P

PROCURATION, Deed, etc., of..... 50P

RECEIPTS FOR SALARIES, Wages and Superannuation, and other like allowances are exempt.

REVOCATION of any TRUST of Property not being a Will 50p

TRANSFER OF STOCK AND SHARES by way of gift or sale—for each £50 or part of £50 £1

UNIT TRUST INSTRUMENT—Any trust instrument of a unit trust scheme—For every

£100, and also for any fractional part of £100, of the amount or value of the property subject to the trusts created or recorded by the instrument..... 25P

VOLUNTARY DISPOSITION *inter vivos*:—

On any instrument being a voluntary disposition (*inter vivos*) of any property (except stock or marketable securities, *see ante*, under Conveyance or Transfer) where the value of the property conveyed or transferred does not exceed £15,000..... nil

Exceeds £15,000 but does not exceed £20,000 for every £50 and fraction of £50 25P

Exceeds £20,000 but does not exceed £25,000, for every £50 and fraction of £50 50p

Exceeds £25,000 but does not exceed £30,000 for every £50 and fraction of £50 75P

Exceeds £30,000, for every £50 and fraction of £50..... £1

The instrument must contain similar certificates of value as a Conveyance or Transfer on Sale (*see p. 1192*), with the substitution of the words "property conveyed or transferred" for the word "consideration."

If the value of the property does not exceed £300 the same graduated rates apply as under Conveyance or Transfer on Sale (except Stock or marketable securities).

NATIONAL HEALTH SERVICE (and Local Authority Personal Social Services)

The National Health Service came into being on July 5, 1948, as a result of the *National Health Service Act 1946*. The Act placed a duty on the Secretary of State for Social Services to promote the establishment in England of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people and the prevention, diagnosis and treatment of illness. The Secretary of State for Wales administers the National Health Service in Wales. There are separate Acts for Scotland and Northern Ireland, where the Health Services are run on very similar lines. The Secretaries of State are responsible to Parliament for seeing that Health Services of all kinds of the highest possible quality are available to all who need them. They are advised by the Personal Social Services Council and the Central Health Services Council (and certain Standing Advisory Committees), appointed after consultation with the various interested bodies.

The National Health Service covers a comprehensive range of hospital, specialist, general practitioner (medical, dental, ophthalmic and pharmaceutical), artificial limb and appliance, ambulance, and community health service. Everyone normally resident in this country is entitled to use any of these services, there are no contribution conditions and the charges made (except those for amenity beds) are reduced or waived in cases of hardship. In addition the Secretary of State for Social Services is responsible under the Local Authority Social Services Act 1970 for the provision by local authorities of social services for the elderly, the handicapped, the disabled and also for families and children. Most of the cost of running the service is met from the Consolidated Fund—that is, from taxes. Other sources of finance are: (1) the weekly National Health Service contributions (since September 1957), which are estimated to produce about £225 million. (For convenience these are collected with the National Insurance contribution in a single combined weekly contribution); (2) local taxation, excluding Consolidated Fund grant to local authorities personal social services; (3) partial charges to patients for drugs and dressings, spectacles, dentures and dental treatment and amenity beds in hospital. The cost of the Health and Personal Social Services in England and Wales rose from £860 million in 1960-61 to an estimated total of £4,262 million in 1974-75. In Scotland the National Health Service vote totalled £535 million (estimate) in 1974-75 compared with a revised estimate of £390 million in 1973-74.

The NHS Reorganization Act 1973 placed a duty on the Secretary of State to provide an ambulance service to meet all reasonable requirements. As from April 1974 the ambulance service, which was formerly provided by the local authorities in England and Wales, was transferred to the control of the new Health Authorities and organized in England as 6 Metropolitan Services administered direct by Regional Health Authorities, whose areas were co-terminous with those of the Metropolitan Counties; 38 Area Services administered by Area Health Authorities and the London Ambulance Service. The NHS Ambulance Service operates approximately 6,000 vehicles, employs about 16,000, mainly uniformed, staff and carries over 20 million passengers annually.

THE HEALTH SERVICES

Family Doctor Service

In England and Wales the Family Doctor Service is organized by 98 Family Practitioner Committees which also organize the General Dental, Pharmaceutical and Ophthalmic Services for their areas. There is a Family Practitioner Committee for each Area Health Authority; members, who serve voluntarily, are appointed by local doctors, dentists, pharmacists and opticians (15), the Local Authority (4) and the Area Health Authority (11). Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 23,000 general practitioners do so. They may at the same time have private fee-paying patients. Family doctors are paid for their Health Service work in accordance with a scheme of remuneration which includes *inter alia* a basic practice allowance, capitation fees, reimbursement of certain practice expenses and payments for "out of hours" work.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the Family Practitioners Committee (in which case 14 days must elapse before the other doctor can accept him). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents", and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the Doctor's surgery or, when necessary, at home. Doctors may prescribe for their patients all drugs and medicines

which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About 11,000 of the dentists available for general practice in England have joined the National Health Service. They are responsible to the Family Practitioners Committee in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and cannot register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (e.g. fillings), provision of dentures in some cases, emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the extraction of teeth and the provision of dentures (in some cases); extensive and prolonged treatment of the gums; inlays and crowns (in some cases); special appliances and oral surgery and certain other items.

A dentist may, with the approval of the Dental Estimates Board, charge his patients a prescribed sum for such types of treatment as crowns, inlays or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures; these were increased in May, 1961, to £2 5s.—£2 15s. for the supply of one

denture or up to £5 for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. This charge was increased to £1 10s. from May 1, 1968. From Aug. 11, 1969, the charge for a set of dentures was increased to £6 5s., with proportionate increases for partial dentures. From April 1, 1971, the system of charges was changed so that patients became liable for a proportion of the cost of treatment, including the supply of dentures, if required, up to a maximum charge of £10 for one course of treatment, unless they were exempt from charges or entitled to remission on income grounds. A revised system of charges was introduced on January 1, 1976, so that the patient pays the full cost of each item of treatment (excluding dentures) up to a maximum charge of £3.50 for one course of treatment. In addition, the charges for the supply of a denture are as follows:—

for a denture bearing 1, 2 or 3 teeth	—£5.40
for a denture bearing 4 to 8 teeth	—£6.00
for a denture bearing more than 8 teeth	—£6.60
Maximum charge for course of treatment for more than one denture	—£12.00

Where a course of treatment includes both treatment and the supply of a denture(s) the overall charge is the total of the cost of treatment (subject to the £3.50 maximum) and the appropriate fixed charge for the denture(s) but subject to an overall maximum of £12.

No charge is made for clinical examination of a patient's mouth. Expectant mothers or mothers who have had a child during the preceding twelve months, children under 16, or 16 or over, but still in full-time attendance at school, do not pay charges. Other patients between 16 and 21 years of age pay the statutory charge for dentures and for alterations and additions to them.

Pharmaceutical Service

Patients may obtain drugs, medicines, appliances and oral contraceptives prescribed under the NHS from any pharmacy whose owner has entered into arrangements with the Family Practitioner Committee to provide this service. Almost all pharmacy owners have done so and display notices that they dispense under the NHS: the number of these pharmacies in England and Wales at the end of 1975 was about 10,000. There are also some appliance suppliers who only provide special appliances. In country areas where access to a pharmacy may be difficult patients may be able to obtain drugs etc. from their doctor.

Except for contraceptives (for which there is no charge), a charge of 20p is payable for each item supplied (25p or 50p for each piece of elastic hosiery) unless the patient is exempt and the declaration on the back of the prescription form is completed. Exemptions cover children under 16, people of pension age, expectant mothers and mothers of a child under one year of age, people suffering from certain medical conditions, people on low income, and war pensioners for their accepted disabilities.

General Ophthalmic Service

General Ophthalmic Services, which are administered by Family Practitioner Committees, form part of the ophthalmic services available under the National Health Service and provide for the testing of sight and supply of glasses to meet more normal needs only. Diagnosis and specialist treatment of eye conditions is available through the Hospital Eye Service as well as the provision of glasses of a special type. Testing of sight may be carried out by any ophthalmic medical practitioner or ophthal-

mic optician, and glasses supplied by any ophthalmic optician or dispensing optician taking part in the Services. On the first occasion a person wishes to use the Services he must obtain a medical recommendation from his doctor that his sight needs testing. No further recommendation is required subsequently and the Services may be used direct.

Sight testing is free. The charges for lenses are on a flat rate basis and are £2.25 for each single-vision lens and £4.25 or £5 for each bifocal lens, according to type. The cost of the frame must also be paid. Children up to the age of 16 or older children attending school full-time may be supplied free of charge with standard lenses in children's standard frames. Additionally, school-children aged 10 years or over may be supplied with standard lenses without charge if any other type of NHS frame is used. The charge for the frame must then be paid.

Hospitals and Other Services

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health (now Secretary of State for Social Services). The Secretary of State has a duty to provide, to such extent as he/she considers necessary to meet all reasonable requirements, hospital and other accommodation; medical, dental, nursing and ambulance services; other facilities for the care of expectant and nursing mothers and young children, facilities for the prevention of illness, and the care and after-care of persons suffering from illness and such other services as are required for the diagnosis and treatment of illness. Convalescent treatment may also be provided for those who need it and surgical and medical appliances are supplied in appropriate cases.

Specialists and consultants who take part in the Service (and most of them do so) hold hospital appointments on a whole or part-time basis. Those who have part-time appointments can engage in private practice, including the treatment of their private patients in N.H.S. hospitals.

In a number of hospitals accommodation is available for the treatment of private in-patients who undertake to pay full hospital maintenance costs and (usually) separate medical fees to a specialist as well. The amount of these fees is a matter for agreement between doctor and patient.

Hospital charges for private resident patients are determined annually, on a national basis for classes of hospitals, by the Secretary of State in accordance with the Health Services and Public Health Act 1968. These charges are revised annually from April 1 each year to reflect the average cost for each class of hospital, which it is estimated will be incurred during the current financial year in the treatment of in-patients. They may also include a contribution towards capital costs.

For in-patients paying specialists' fees separately, the hospital daily charges from April 1, 1975 for accommodation and services in each class of hospital are as follows:

Class A. Long stay hospitals (other than hospitals in classes D and E).	
Single Room	Other Accommodation
£14.80	£13.40
Class B. Psychiatric hospitals (other than hospitals in classes D and E)	
Single Room	Other Accommodation
£9.30	£8.50
Class C. Acute and other hospitals (other than hospitals in Classes D and E)	
Single Room	Other Accommodation
£26.28	£24.30

Class D. London Teaching hospitals as at 31/3/75.

Single Room

Other Accommodation

£37'10

£33'70

Class E. Provincial teaching hospitals and University hospitals as at 31/3/75.

Single Room

Other Accommodation

£31'20

£28'30

Certain hospitals have accommodation in single rooms or small wards which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are at present £3 per day in single rooms and £1.50 per day in small wards. In such cases the patients are treated in every other respect as National Health patients. There is no charge for drugs supplied to National Health hospital in-patients but out-patients pay 20p per item unless they are exempt.

With certain exceptions, hospital out-patients have to pay fixed charges for dentures and glasses. The charge for glasses will be related to the type of lens prescribed; and for dentures will be up to £6.60 per denture, subject to an overall maximum charge of £12.00.

Local Authority Personal Social Services

Local authorities are responsible for the organization, management and administration of the personal social services and each authority has a Director of Social Services and a Social Services Committee responsible for the social services functions placed upon them by the Local Authority Social Services Act 1970. The "personal social services" are broadly speaking as follows: The services for children, including the care of children and young persons received into care, the provision of treatment for young offenders and adoption; family services, including the day care of pre-school children in day nurseries and by child minders, the care of unsupported mothers both in the community and in mother and baby homes, and the home help and meals on wheels services; services for the elderly and physically handicapped, including day centres, luncheon clubs and residential accommodation; services for the mentally ill and mentally handicapped, including day centres, clubs, adult training centres, workshops and residential accommodation.

POSTAL REGULATIONS

For full conditions, exceptions, etc., see Post Office Guide. Associated volumes are London Post Offices and Streets, Postal Address and Index to Postcode Directions, and Post Offices in the United Kingdom.

CHIEF POSTAL SERVICES

LETTERS AND CARDS

Inland (U.K., Channel Islands and Irish Republic):—

Not over	First Class	Second Class
60 g.....	8½p	6½p
100 g.....	11½p	9p
150 g.....	15p	11p
200 g.....	18½p	14p
250 g.....	22p	17p
300 g.....	25½p	20p
350 g.....	29p	23p
400 g.....	32½p	26p
450 g.....	36p	29p
500 g.....	39½p	32p
750 g.....	57p	47p
1 kg.....	74½p	Not admissible
Each extra 250 g or part thereof	17½p	over 750 g

Overseas:

(a) Surface mail. Not over 20 g. 10p; 50 g. 18p; 100 g. 24p; 250 g. 48p; 500 g. 92p; 1 kg. 160p; 2 kg. 260p.

WEIGHT LIMITS:—Inland, First Class, none. Second Class 750 g. Elsewhere, 2 kg.

SIZE LIMITS: (A) If in roll form:—Inland and elsewhere (900 mm. for the greatest dimension); length+twice diameter, 1040 mm. (B) not in roll form:—(i) United Kingdom, Irish Republic; 610 mm×460 mm×460 mm. (ii) Overseas, length 600 mm. length+width+depth, 900 mm. Envelopes weighing under 60 g. should be oblong in shape, with the longer side at least 1.414 times the shorter side—minimum size 90 mm×140 mm, maximum 120 mm×235 mm. Envelopes outside these sizes and weighing under 60 g. will eventually be charged extra. Within the Inland Service envelopes or cards less than 100 mm×70 mm must not be used. The standard of thickness for cards is 250 micrometres (0.01 in.) with a tolerance to an absolute limit of 230 micrometres (0.009 in.). To all overseas destinations the minimum limits for letters in the form of a roll are 170 mm for the length and twice the diameter combined (at least 100 mm for the greatest dimension), unless provided with a strong address label at least 100 mm in length and 70 mm in width. For letters other than in the form of a roll the minimum limits are one surface 140 mm in length, 90 mm in width, unless provided with a strong address label of 100 mm×70 mm.

POST CARDS

To all destinations overseas:—7p.

Limit of size for destinations abroad: maximum, 148 mm in length, 105 mm in width; minimum, 140 mm in length, 90 mm in width.

PRINTED PAPERS, BOOKS

Overseas:—

Single packets

Not over 20 g, 6p; not over 50 g, 10p; not over 100 g, 13p; not over 250 g, 24p; not over 500 g, 43p; not over 1000 g, 72p; not over 2000 g, 101p. Normal weight limit 2000 g; but consignments of books or booklets weighing up to 5000 g may be sent as Printed Papers, as follows: not over 3000 g, 151p; not over 4000 g, 202p; not over 5000 g, 252p.

Posted in bulk as Direct Agents Bags.

Direct Agents Bags:—

Full rate: 50p per kg.

Max rate (bags 30 kg max.) £15.

Min rate (bags (up to 23 kg) £11.50.

Reduced rate: 32p per kg.

Max. rate (bags up to 30 kg max.) £9.60.

Min. rate (bags up to 23 kg) £7.36.

Exceptionally, newspapers, periodicals, books, pamphlets, maps and musical scores which comply with the conditions shown in the Post Office Guide under Printed Papers at Reduced Rates may be sent abroad by surface mail only at the postage rate of:

Single packets

Not over 100 g, 13p; not over 250 g, 24p; not over 500 g, 43p; not over 1000 g, 72p.

Posted in bulk as Direct Agents Bags.

NEWSPAPERS

Inland (Newspapers "Registered at P.O."):

Not over: 60 g, 6½p; 100 g, 9p; 150 g, 11p; 200 g, 14p; 250 g, 17p; 300 g, 20p; 350 g, 23p; 400 g, 26p; 450 g, 28p; 500 g, 32p; 750 g, 47p.

Publications registered at the P.O. as newspapers will be given First Class service at the newspapers postage rate, but only if posted by publishers or their agents, and prominently marked *Newspaper Post*. All other newspapers are transmitted as first or second class letters. Limit of weight 750 g. Limit of size as Letters.

Overseas: See printed papers.

SMALL PACKETS (See also p. 1201).

Overseas:

Not exceeding 100 g, 13p; 250 g, 24p; 500 g, 43p; 1 kg, 72p.

LIMITS: Maximum size, as for letters A and B fl. Minimum limits of size as for letters; Weight 1 kg in general but some countries only accept Small Packets weighing up to 500 g.

PARCELS

Should be marked "Parcel Post," and must be handed over the counter; postage must be prepaid by stamps, affixed by the sender.

Posters of over 2,500 parcels per annum may sign contracts to which special conditions apply.

The name and address of sender should be inside and (not too prominent) on the outside of every parcel and preferably be to the left of and at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas letters intended for insurance or any parcels for abroad; but if on foot or cycle not more, without notice, than 10 kg from one person. Maildrivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is., or I. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay a clearance fee if any duty be payable. Senders can undertake to pay customs charges of Irish Republic, Channel Islands and some overseas countries (a deposit is required).

Inland:—(Limit of size: length, 1.070 m.; length and girth combined, 2 m.):—

U.K. and Irish Republic:—

Not over	Ordinary	Local	Note: The Local Parcel Delivery Area comprises all places which have in their postal address the same post town name as that of the office of posting. For further details consult your local post office. Local parcel rates are not available in London Postal Districts.

2 kg	70p	60p	
3 kg	85p	75p	
4 kg	100p	90p	
5 kg	110p	99p	
6 kg	120p	109p	
7 kg	130p	119p	
8 kg	140p	129p	
9 kg	150p	139p	
10 kg	160p	149p	

Air Mail Services

For mode of packing, prohibitions, limits of size, &c., see Post Office Guide

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe, for which no special air mail marking is required. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet PL(B)3116)

AIR LETTER FORMS, postage 10½p and 11p, may be sent to all countries. Enclosures are not permitted. You may get the special forms at post offices or use privately-manufactured forms which bear a statement that they have been approved by the Post Office, with the approval number. Unapproved forms will be treated as ordinary air mail letters.

PRINTED PAPERS. Small Packets and Newspapers may be sent by air to countries outside Europe at the rates shown in col. 3 below. NEWSPAPERS: Publications registered at the P.O. as newspapers may be sent at the reduced rates indicated in col. 4

below. There is no air mail service to Europe for these items. If the quickest transmission is desired the letter post rate should be paid.

European Countries (and The Azores)

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offer; earlier delivery. The rates are:—

Letters—Not over 20 g. 10p; 50 g. 10p; 100 g. 13p; 250 g. 24p; 500 g. 43p; 1000 g. 72p; 2000 g. 101p.

Postcards, 7p.

Air mail labels are not necessary.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1205-8.

Countries Outside Europe

Rates for letters, postcards and printed papers etc. appear below; for air parcel rates see pp. 1205-8.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above; Air Parcel Rates, pp. 1205-8.

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Department of Trade and Industry regulations the exportation of some goods by post is prohibited except under Department of Trade licence. Enquiries in the matter should be addressed to the Export Data Branch, Export Services and Promotions Division, Department of Trade and Industry, Export House, 50 Ludgate Hill, London, EC4M 7HU.

PROHIBITED ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement.

CERTIFICATE OF POSTING.—For non C.F. parcels the fee is 1p each (maximum 10p). May also be obtained for unregistered letters and unregistered postal packets (fee 1p).

RECORDED DELIVERY (inland, *not to Irish Republic*). Charge: 8p.—This service provides for a record of posting and delivery. Advice of delivery, a further 10p at time of posting, 20p after time of posting. Money and jewellery are not allowed. The service does not apply to parcels, rail or railway letters. Ask at the post office for full details.

UNPAID PACKETS, are charged *double postage on delivery*; **UNDERPAID PACKETS**, *double the deficiency*.

UNDELIVERED POSTAL PACKETS.—Undelivered postal packets are returned to the sender without charge provided the return address is indicated either on the outside of the envelope or inside. If the sender's address is not available, items not containing property are destroyed; however, if the packet contains something of intrinsic value, it is retained for up to three months pending reclaim before being disposed of. Perishable items within this category are dealt with as requisite. Exceptionally, items in the minimum weight step on which a rebate of postage has been allowed are destroyed unopened unless there is a return address shown on the outside of the cover. In addition, undeliverable second class mail in the minimum weight step, which, upon opening, is found to consist only of newspapers, magazines or commercial advertising material is also destroyed. (These rules are currently under revision: for the up-to-date position, consult the nearest post office.) *British packets undelivered abroad*; instructions for disposal are required if parcel is undeliverable and must be given at the time of posting.

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum surface mail letter rate from the country concerned to the U.K. International Reply Coupons (valid in most countries) 20p. Sold at chief offices.

POSTE RESTANTE (solely for the convenience of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper person. Redirection from a Poste Restante is not undertaken for more than 1 month unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels, business reply and Freepost items* may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be redirected free of charge within the same time limits, only if the original and the substituted address are both within the same local parcel delivery area (or within the London Postal Area). *Registered packets*, which must be taken to a Post Office, are *re-registered* free only up to day after delivery. (2) By the Post Office: Requests for redirection of letters, etc., should be on printed forms, obtainable from any post office, and must be signed by the person to whom the letters are to be addressed. The fees for redirection are as follows:—Redirection for a period not exceeding one month £1; redirection or renewal for a period not exceeding three months £2.50; redirection or renewal for a period not exceeding twelve months £6. A fee is payable for each different surname on the application form. Additional postage is generally due on redirected parcels (*see above*). Separate forms must be filled in for the forwarding of telegrams.

REGISTRATION, INLAND (First Class letters only).—All packets intended for registration should be marked "Registered" in bottom left-hand corner, and *must be handed to an officer of the Post Office, and a receipt taken*. The packets must be made up in a reasonably strong cover appropriate to their contents. Packets and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, etc. Minimum fee: 45p, exclusive of postage. Advice of delivery, a further 10p at time of posting, 20p after time of posting. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any letter packet apparently meant for registration and wrongly posted (minimum fee less any prepaid excess postage); (b) letter packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, etc., in each case £2 or more in value. Ask at the post office for full details.

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are set out in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters, (ii) though not as a legal right, for loss of or damage to recorded delivery packets, parcels on which a compensation fee has been paid and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters (including items sent to the Irish Republic and the Channel Islands)*: The fees for registration are : 45p covering compensation up to £200; 50p, £400; 55p, £600 (maximum). (No legal right to compensation exists in respect of registered letters sent to and from Irish Republic or the Channel Islands.) *Compensation Fee (C.F.) parcels*, fees: 7p for compensation up to £10; 12p up to £50; 20p up to £100. *Recorded delivery packets*: maximum compensation £2 provided no

contents inadmissible. *Unregistered packets* conveyed by Express Messenger all the way: Maximum compensation £5.

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter* post in one of the special envelopes sold officially and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, will not exceed £5 except in a case where the value of each coin exceeds its face value, i.e. numismatic coins. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care". No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic, whether registered or not.

REGISTRATION, OVERSEAS (except for parcels and printed paper items posted in bulk), is in force to all countries with the exception of Chagos Islands, British Indian Ocean Territory, Republic of Maldives or North Vietnam. No compensation is payable for the loss of or damage to valuable articles or other items sent in an unregistered letter. Fee 45p. If claimed within a year compensation is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions. Compensation is also payable for the partial or complete loss of or damage to the contents of registered items in the service with certain countries (see Post Office Guide for list).

INSURANCE, OVERSEAS, may be effected on packets to many countries at the following rates:—50p for up to £72 cover; 5p for each additional £35 up to £115 for £500. For H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses (e.g., British Forces Post Office followed by a number) only parcels are insurable, up to £100. Packets containing valuable papers, (bank-notes, etc.), documents (press, etc.) and, in some cases, valuable articles such as jewellery, can be insured as letters, or as parcels if the country of origin does not accept durable goods in the letter post.

INSURED BOX POST.—Jewellery and precious articles (not letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

The Post Office Guide should be consulted for details of the conditions of Insurance.

COMPENSATION up to a maximum of £8.20 may be given for loss or damage in the U.K. to uninsured parcels to or from most overseas countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

CASH ON DELIVERY SERVICE, INLAND (not to or from Irish Republic, nor to H.M. Ships).—A sum (Trade Charge) up to £50 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office. Fee (extra to normal postage and registration charges): 40p.

CASH ON DELIVERY, OVERSEAS.—Applicable to parcels only, but not all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. A fee of £1 per parcel must be prepaid in addition to the postage. The Trade Charge (amount to be collected) may not exceed £50, but to some countries the limit is lower. Addressee

has also to pay on delivery, besides Customs, if any a further fee (20p in U.K.) not prepayable. If Trade Charge cannot be collected, special rules for undeliverable C.O.D. parcels apply.

EXPRESS AND SPECIAL SERVICES (INLAND).—In general the express service are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. (1) *All the way*, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 50p per mile, or part of a mile, with 3p on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on addressee's application (50p per mile, or part of a mile, and 21p for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (60p.+ postage). This service is restricted to First Class letters and to parcels. Packets must be marked "Special Delivery," and letters bear a broad blue or black vertical line back and front. A similar line must be drawn completely round a packet or parcel. (4) *Special delivery on Sunday of postal packets (except parcels) handed in on Saturdays.* Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available only: (1) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (2) Good Friday: to London only from towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:—The London Chief Office, King Edward St., London EC1A 1AA, W. and S.W. District Offices, and Camberwell Green, Clapham Common, Hammersmith, Holloway, Trafalgar Sq., Stratford, and Swiss Cottage (Branch Delivery). Packets marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London 12.45 p.m.—5.0 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is £1.50 in addition to postage. Not available for parcels. (5) (*Raillex*.) Postal packets which cannot be registered are despatched by rail, met, and specially delivered in Great Britain, Northern Ireland (Belfast, Larne and Londonderry only). Inclusive charges irrespective of weight but not exceeding 450 g. £4, but packets handed in in Northern Ireland for destinations in Great Britain or Northern Ireland may not exceed 60 g. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey. It should be marked "Railway Parcel, to be handed to Post Office messenger at Station."

RAILWAY LETTERS, &c.—A First Class letter, not liable to registration, may be handed in at the parcel or passenger booking office of a railway station of British Rail and certain other minor railway companies, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage) are charged by British Rail or the minor railway companies on which railway letters travel. Enquiries about these fees should be made at the station at which railway letters are handed in. For

other combinations of rail and express, *see* preceding paragraph, Services (5) and (6).

AIRWAY LETTERS.—On certain internal air routes operated by the British Airways Corporation, First Class letters may be handed in at the airport or town terminal for conveyance by the next available direct air service to be transferred to the post at the distant airport or town terminal or to be called for at the airport or town terminal. Fee (besides postage) 55p, maximum weight 450 g. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. This service is not available to the Irish Republic, Isle of Man or to any country overseas. Full information can be obtained from any office of British Airways (European Division).

INTERNATIONAL EXPRESS SERVICE.—From the office of delivery by special messenger is available to or from certain countries. In some countries the service is restricted to certain towns. 60p is paid by the sender, the rest, if any, by addressee, according to the local regulations. (*See* P.O. Guide.)

DATAPOST.—This service offers a door-to-door overnight service to most parts of the country on a contract basis. Charges are negotiated with individual customers and reflect the services performed. Head Postmasters will provide full information on request.

This service is also available to the U.S.A., Brazil, Belgium, France, Japan, the Netherlands and Hong Kong.

BUSINESS REPLY AND FREEPOST (Inland, excluding Irish Republic).—These services enable a person or firm to receive replies to advertisements, letters from clients, etc. without prepayment of postage, the addressee paying the postage together with a handling charge of 1p per item delivered. A licence costing £15 p.a. must be obtained to use either service and these are available from Head Postmasters who will also provide any further information required.

POSTAGE FORWARD PARCEL SERVICE.—This service enables a person or firm to receive parcels from clients without prepayment of postage. A special label is used for this service. A licence costing £15 p.a., to use the service must first be obtained from the local Head Postmaster.

ARTICLES FOR THE BLIND (Inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Postage free.

BLIND LITERATURE, OVERSEAS (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind (Cécogrammes)", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

SMALL PACKETS POST (OVERSEAS).—For the transmission of goods (including trade samples) in the same mails as Printed Papers up to 1 kg. Registration is allowed; not insurance. Available to all countries, but to some countries there is a limit of 500 g. A customs declaration is required.

NEWSPAPER POST (INLAND).—For newspapers "registered at the P.O." (p. 1195).

Copies of registered newspaper may be posted by the publishers or their agents in wrappers open at both ends,

in unsealed envelopes approved by the Post Office for the purpose or without covers and tied with string which can be removed without cutting. Wrappers and envelopes must be prominently marked **NEWSPAPER POST** in the top left-hand corner and be easily removable for the purpose of examination. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undeliverable and a reference to a page.

Newspapers posted by the public or supplements to registered newspapers despatched apart from their ordinary publications are transmitted under the conditions governing the First or Second Class Letter Services.

STAMPS, ENVELOPES, POSTCARDS, &c.

£sd stamps are no longer valid for postage.

POSTAGE STAMPS (used also for receipts, telegrams and certain Inland Revenue duties) are sold for the respective values of ½p, 1p, 1½p, 2p, 2½p, 3p, 4p, 5p, 6p, 6½p, 7p, 7½p, 8p, 8½p, 9p, 9½p, 10p, 10½p, 11p, 20p, 50p, £1. Books containing 2 at ½p, 3 at 1p, 1 at 6p, 10p; 10 at ½p, 65p; 10 at 8½p, 85p. Rolls of 6½p and 8½p stamps are sold. There are also mixed value rolls made up of strips of 2p, ½p, 1p, 1p (5p) and 6p, 2p, 1p, ½p, ½p (10p).

REGISTERED LETTER ENVELOPES printed with a 53½p stamp (45p for registration and 8½p for postage) are of three sizes: G, 156 mm × 95 mm, 56½p each; H, 203 mm × 120 mm, 57p each; K, 292 mm × 152 mm, 60½p each.

FORCES AIR LETTER FORMS issued against purchase of 6½p stamp.

LETTER CARDS printed with 6½p stamp, 8½p each; 8½p stamp, 10½p each.

POSTCARDS printed with 8½p stamp, 9½p each.

ENVELOPES printed with 6½p stamp: Size 1 (146 mm × 95 mm) 8p each; Size 2 (235 mm × 120 mm) 8½p each. With 8½p stamp; Size 1 (146 mm × 95 mm) 10p each; Size 2 (235 mm × 120 mm) 10½p each.

AIR LETTER FORMS printed with 10½p or 11p stamp, 10½p and 11p each.

Printed postage stamps cut out of envelopes, postcards, lettercards, air letter forms or newspaper-wrappers may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated or defaced in any way.

MONEY ORDERS

There is no Inland Ordinary Money Order Service. *Overseas Service.* Advice of Payment: 7½p (to certain countries). Payment may be stopped (fee 7½p).

Inland Telegraph Money Orders (and to Irish Republic, Channel Islands and Isle of Man).

Money may be transmitted by this means from most offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day, Boxing Day and Good Friday special arrangements apply (*see* Post Office Guide).

The fee is £2 per order (maximum value £100) plus cost of official Telegram of Advice, £1.40 minimum for Inland Orders (including orders to Channel Islands and Isle of Man) and £1.50 minimum for Irish Republic Orders and where applicable the charge for any private message sent with the order, 7p per word. (All charges for telegrams are subject to Value Added Tax in addition to the charges shown above).

Ordinary Money Orders for Abroad

The fee is £3 per order. Limits of amount of each order vary according to destination but in any case may not exceed £50; validity varies between one and twelve months (*see* Post Office Guide).

Telegraph Money Orders for Abroad

The fee is £3 per order, plus cost of official

Telegram of Advice (at Letter Telegram rate, if desired, to certain countries).

Application to remit money orders to countries outside the Scheduled Territories (formerly known as the Sterling Area) must be made on a special declaration form upon which the purpose of the remittance must be stated. This form is obtainable at any money order office, where it may be ascertained whether any particular country with which a money order service is in operation is outside the Scheduled Territories.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and/or paid in many countries within the Commonwealth and in a few other countries. Transmission of postal orders to overseas countries is restricted under Exchange Control Regulations and is prohibited to any country outside the British Postal Order Area, except to members of H.M. Forces under special arrangements (particulars of Exchange Control restrictions may be obtained at any post office transacting Postal Order business). British postal orders are paid and issued in the Channel Islands and the Isle of Man, and paid in the Irish Republic. They are printed with a counterfoil, for 10p and every multiple of 2½p up to 25p, then 30p and every multiple of 5p up to £1, then in £1 steps to £10. Adhesive unmarked current British Postage Stamps not exceeding two in number, if affixed in the two spaces provided, may increase the value of the order by not more than 4½p. Fees 10p up to £1, 7p; £2, £3, £4, £5, £6, £7, £8, £9, or £10, 9p. The name of the payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster to ascertain whether the order may still be paid.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone or telex at all times. All charges for telegrams are subject to Value Added Tax in addition to the charges shown below. Rate, 70p per telegram, plus 7p for each word. (To Irish Republic 80p per telegram plus 7p for each word.) Greetings telegrams on appropriately designed forms in decorative envelopes cost the rate of an ordinary telegram plus a surcharge of 40p. Greetings telegrams may be tendered by telephone or handed in in advance for delivery on a specified day. On Mondays to Fridays, if the Greetings telegram is handed in at any time before noon of the day before delivery is required, the surcharge is reduced to 20p. (Greetings service not available to and from Irish Republic.)

Overnight Telegram

An Overnight telegram may be tendered between 8 a.m. and 10.30 p.m. for delivery, normally by first post, the following morning. On days when there is no postal delivery, Overnight telegrams are held until the next postal delivery. The charge is 50p per telegram plus 4p for each word. The Overnight service is not available to the Irish Republic. A redirection charge of 50p per telegram is made if the original and new addresses are in the same delivery area or London Postal District. Overnight telegrams are normally redirected by post free of charge. In all other cases

the redirection charge is at the ordinary inland rate. In England, Wales and Northern Ireland a telegram tendered on Sundays, Good Friday and Christmas Day is charged 45p extra; in Scotland this surcharge applies to a telegram tendered on Sundays and on New Year's Day. Replies may be prepaid within the limits of 70p (minimum) and £3.50 (maximum), Irish Republic 70p (minimum) and £3.60 (maximum); the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph, telex or telephone account rendered by the Post Office, or its value refunded to sender, the addressee or person applying on behalf of the sender of the original telegram, on completion of the declaration on the back of the voucher. Receipt for charges on telegrams accepted at post office counters free on request. Certified copy 45p; application to the local Head Postmaster must be within 3 months of the date of sending. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that any necessary charge will be collected on delivery.

TELEGRAPH OFFICE ALWAYS OPEN IN LONDON: —
Trafalgar Sq., 24–28 William IV Street, WC2N 4DL.

INTERNATIONAL TELEGRAMS

The per word charges for ordinary or Full Rate telegrams from the United Kingdom to places abroad are shown on pp. 1205–8. Urgent Telegrams may be sent to many countries at double the ordinary per word rates.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service at half the ordinary per word rates is available to Commonwealth countries. The service indicator GLT will be counted as a chargeable word.

Letter telegrams to certain countries are admitted at half the ordinary per word rates for messages in plain language of a lengthy though less urgent character for which the minimum charge is as for 22 words including the indicator LT. Full particulars as to which countries this facility is available can be obtained from any Post Office or International Telegraph Office.

In addition to these per word charges, the following fixed charges per telegram apply, irrespective of destination.

Ordinary.....	70p
Urgent.....	£1.40
GLT.....	70p
LT.....	70p

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in facsimile to many places in the world. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Post Office or International Telegraph Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The charge for radiotelegrams is 15p per word (standard rate). Radiotelegrams at the standard rate should be addressed Portishead Radio unless the sender nominates another coast station. The address should contain (1) the name or rank of the addressee, (2) the name of the ship and (3) the name of the coast station in the British Isles if the sender knows that the ship is within range of that station.

The charge for messages to H.M. Ships is 10p a word. The address should contain (x) the name

of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine"), (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio".

In addition to the per word charges quoted a fixed charge of 70p per radiotelegram applies. There is a surcharge of 45p for radiotelegrams tendered on Sundays, Good Friday and Christmas Day. In Scotland, this surcharge is applied to radiotelegrams tendered on Sundays and New Year's Day.

Radiotelegrams may also be sent to R.A.F. vessels. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words "R.A.F. Vessel" before the name of the ship.

RADIOTELEPHONE SERVICE

Radiotelephone services are available between telephone subscribers (but not from coin-box telephones or call offices unless the caller is a holder of a telephone credit card) in Great Britain, Northern Ireland, the Channel Islands and the Isle of Man and suitably equipped ships. The service is generally available at all hours of the day and night, but the periods of communication with a particular ship vary with the ship's position and are dependent on radio conditions.

Calls are normally made through the coast stations, listed below, and callers should ask the local exchange telephone operator for SHIPS' TELEPHONE SERVICE adding, if known, the telephone number and name of the coast station through which the call should be made. If the name of the coast station is not known, the caller will be connected to Portishead Radio. When connected to the coast station operator, the caller should ask for SHIPS' RADIO TELEPHONE CALL giving the name of the ship and the name (or designation) of the person required.

Anglesey Radio.....	0407 83 0541
Bacton Radio (restricted short range VHF services)	Mablethorpe 3447
Clyde Radio (restricted short range VHF services)	Portpatrick 311
Cullercoats Radio.....	089 44 31318
Humber Radio.....	Mablethorpe 3447
Ilfracombe Radio.....	Ilfracombe 3453
Land's End Radio.....	0736 77 493
Niton Radio.....	0983 730495
North Foreland Radio.....	0843 20592
Oban Radio.....	0631 2059
Portishead Radio.....	027 878 3291
Portpatrick Radio.....	0776 81 311
Stonehaven Radio.....	0569 2 2917
Thames Radio (restricted short range VHF services)	0843 20592
Wick Radio.....	Wick 2271
Shetland Radio (restricted short range VHF services)	Wick 2271

Charges vary according to the position of the ship. The rates are (for minimum of 3 minutes) Short range (within 50 miles of VHF station) 81p for 3 minutes. 27p for each additional minute.

Medium range (within 250 miles of U.K.). £1.35 for 3 minutes. 45p for each additional minute.

Long range (dependent on position of ship). £3.15 for 3 minutes, 90p or £1.05 respectively for each additional minute.

The service is available, for calls to and from H.M. Ships, subject to the approval of the Duty Commander M.O.D. Navy, through whom all calls to H.M. Ships should be booked. The charges are the same as those for merchant ships but as H.M. Ships do not normally keep watch for private radiotelephone calls from the shore, no

attempt should be made to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on the ship. The caller must be able to give the name of the coast station through which the call is to be made, or the approximate position of the ship at the time the call is required.

The holder of a telephone credit card issued in Great Britain, Northern Ireland, the Channel Islands or the Isle of Man may use it to make radiotelephone calls to ships at sea from any telephone in this country (including coin-box telephones and call offices) and have the charges debited to his own account.

INLAND TELEPHONES

The quarterly rental for an exclusive business exchange line is £9.75 and £8.25 for any other exclusive exchange line. For shared service, in which two subscribers share one line but have practically the same facilities as those provided by individual lines, each customer pays £4 per annum less than for exclusive line service. A condition of telephone service is that all new and removing residential customers since January, 1948, are liable to share their lines if called upon to do so. Subscriber trunk dialling (STD) facilities are provided at an increasing number of exchanges. Local and dialled trunk calls from these exchanges are charged in 3p units, 2p units from pay on answer coin-box lines. Charges from coin-box lines are Value Added Tax included whereas from ordinary lines Value Added Tax is not included on individual call charges but an 8 per cent. charge is made on customer's total bill to cover Value Added Tax. The length of time per unit depends on the distance of the call, from two minutes for a local call to ten seconds for distances over 56 kilometres. Additional time is allowed during the cheaper rates period.

From other exchanges local calls are charged 3p from ordinary lines and 2p from a call office or coin-box line. All trunk calls are obtained via the operator. Operator-controlled trunk calls from any exchange have a three minute minimum charge which varies with the distance but does not exceed 60p (75p to Irish Republic from non-coin-box telephones). Operator-controlled calls made from coin-box lines are charged in 3 minute periods at the coin-box tariff. All trunk calls are cheaper if made after 6 p.m. or at weekends. Personal calls (to specified person) 24p extra, if the person cannot be found nothing further is charged. For fuller information see Preface to Telephone Directory, Dialling Instruction Booklet (where appropriate) and Post Office Guide.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is from £380 per annum (depending upon the equipment required). The minimum call charge for International calls via the operator is three minutes. For subscriber-dialled calls to some Inter-Continental countries, the minimum call charge is one minute, and subscriber-dialled calls to the Continent are charged in 2½p units (see Post Office Guide for rates). Automatic equipment allowing messages to be sent at the maximum speed of 400 characters (60-70 words) per minute can be rented in addition. Descriptive leaflet available from all Telephone Area Offices; for local address see Telephone Directory.

DATA COMMUNICATIONS SERVICES

Data communications services provide for data transmission at speeds ranging from 50-50,000 bits per second (bit/s) over telegraph, speech and wide-band circuits. They accommodate a number of additional facilities such as automatic calling and

answering, Dataplex and midnight line service. The services can be described briefly as follows: Data over telegraph equipment. Data transmission over telegraph type circuits either on the public switched telex network or privately rented circuits at speeds up to 110 bit/s. PO terminals at 50 bit/s are provided on telex. On telegraph circuits either PO or privately supplied terminals which have been granted permission for connection may be used.

Datel 200 provides for duplex data transmission over speech type circuits either privately rented or on the public switched telephone network (PSTN) at up to 300 bit/s using PO modems and privately supplied terminal equipment which has been permitted for connection to the network.

Datel 600 provides for duplex data transmission over speech type circuits either privately rented or on the PSTN at up to 1200 bit/s using PO modems or privately supplied terminal equipment which has been permitted for connection to private circuits.

Datel 2400 provides for synchronous duplex data transmission over speech type private circuits at up to 2400 bit/s using PO modems or privately supplied terminal equipment which has been permitted for connection to private circuits.

Datel 2400 Dial-Up provides for synchronous duplex data transmission over the PSTN at up to 2400 bit/s using PO modems.

Datel 48K provides for data transmission at 40-8K, 48K or 50K bit/s over specially engineered wide-band circuits using PO modems or privately supplied terminal equipment which has been permitted for connection to the network.

Data Control Equipment enables terminal to automatically originate and answer calls over the switched network.

Dataplex allows the data from a number of low speed terminals to be sent over a single high speed link, resulting in reduced user costs.

Midnight Line Service provides for unlimited subscriber dialled inland calls between midnight and 6 a.m. for a fixed annual rental.

INTERNATIONAL DATA TRANSMISSION SERVICES

(i) *Datel Services*

In the International context the term *Datel* has been adopted to refer to data transmission over the public switched telephone (or telex) networks.

Datel 100

This service provides for serial transmission of data at 50 bits per second using the telex network and is available to most European countries.

Datel 200

This service provides full duplex (simultaneous both way) serial transmission of data at speeds up to 200 bits per second using the public telephone network. Service is available to most of Europe, Bahrain, Dubai and the U.S.A. Note: Non European traffic is connected on a manual basis via the international exchange.

Datel 600

This service provides half duplex (bothway, but not simultaneous) serial transmission of data within the speed range of 600 to 1200 bits per second. Telephone networks, although designed for speech transmission are usually capable of carrying data transmissions at 600 bits per second and on some connections, 1200 bits per second should be obtainable. Service is available to most European countries and Australia, Bahrain and Dubai,

Canada, Hong Kong, New Zealand, Singapore and the U.S.A. (Note: Non-European traffic is connected on a manual basis via the international exchange.)

Datel 2400 (expected to be available the latter half of 1976). This service will allow serial transmission of digital data at 2400 bits per second using the public telephone network. A new Post Office modem, which will be obligatory in this service, is expected to be available in the latter half of 1976. Until that time the Post Office is prepared to allow the use of permitted non-Post Office modems by customers with a need for 2400 bits per second data transmission facilities over the international public telephone network subject to the agreement of the foreign administration(s) concerned.

The Post Office can give no guarantee of the rate or quality of data transmission in the case of facilities using non-Post Office modems.

Customers wishing to use non-Post Office modems to establish a facility must obtain permission to proceed from the Post Office.

(ii) *Leased Circuits*

International leased circuits are available for data transmission and are provided in accordance with the Recommendations of the International Telephone & Telegraph Consultative Committee (CCITT). Depending on the modulation method used, higher transmission rates than those offered by the *Datel* services are usually obtainable over voice bandwidth circuits.

In addition, high speed data transmission, e.g. 48K bits per second, may be achieved over wide-band leases (telephone circuits grouped together to give 48KHz bandwidth) or by using special facilities provided via the INTELSAT satellite.

INTERNATIONAL TELEPHONES

The same charges apply for calls originating in any part of Great Britain, Northern Ireland and the Isle of Man. Callers with STD in many parts of this country can dial direct to numbers on many exchanges on the continent and in some other countries. Access to this facility (International Subscriber Dialling—ISD) is progressively being made available to more places in this country, and the number of places abroad to which calls may be dialled is also increasing, callers should consult their dialling codes booklet for information on how to make calls.

Directly dialled calls are charged in units of time costing 3p. Cheap rates apply from 8 p.m. to 6 a.m. nightly, and at any time on Saturdays and Sundays. Where access to ISD is not yet available, callers should ask the local operator for the International Exchange, specifying the country required.

The charges for calls via an operator are based on a three minute minimum. Transferred charge (collect) calls are available with some countries, and British Post Office telephone credit cards can be used in many countries for calls to the U.K.; charges for such calls incoming to this country may be higher than those for outgoing calls. A personal call service is available. (In many cases with an additional surcharge.)

Calls to Ships

For calls to ships at sea, see p. 1202.

SUNDAY ARRANGEMENTS

(For Express Services see p. 1199).

On SUNDAY THROUGHOUT THE U.K. there is no general delivery of letters and parcels.

BRITISH PASSPORT REGULATIONS

Applications for United Kingdom passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Main Post Office.

London.—Clive House, 70-78 Petty France, S.W.1.

Liverpool.—India Buildings, Water Street, Liverpool, 2.

Newport, Gwent.—Olympia House, Upper Dock Street.

Peterborough.—Passport Office, 55 Westfield Road, Peterborough.

Glasgow.—1st Floor, Empire House, 131 West Nile Street, Glasgow, C.1.

Hours. The above offices are open Mon.-Fri. 9 a.m. to 4.30 p.m. The Passport Offices are also open for cases of special emergency (e.g. death or serious illness) arising outside normal office hours between 4.30 p.m. and 5.30 p.m. (6.00 p.m. in London); and in London on Saturdays between 10 a.m. and noon.

Completed forms of application should be sent to one of the five Passport Offices, with photographs, supporting documents and the fee of £8, in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office.

Persons resident in Northern Ireland may apply in person to the Foreign and Commonwealth Office Passport Agency, 1st Flr., Marlborough House, 30 Victoria Street, Belfast, or by post to the Passport Office, Glasgow.

A Passport cannot be issued or renewed by the Foreign and Commonwealth Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest British Passport issuing authority.

United Kingdom Passports are granted:—

- (i) To citizens of the United Kingdom and Colonies.
- (ii) To British subjects without citizenship.
- (iii) To British Protected Persons.

A passport granted to a child under 16 will normally be valid for an initial period of five years, after which it may be extended for a further five years with no extra charge. A passport granted to a person over 16 will normally be valid for 10 years and will not be renewable. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the holder's spouse is not available for his/her use when he/she is travelling alone. A spouse's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. Their applications must be signed by one of their parents.

Passport applications must be countersigned by a Member of Parliament, Justice of the Peace, Minister of Religion, Doctor, Lawyer, Bank Officer, Police Officer or any person of similar standing who has been personally acquainted with the applicant for at least two years. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by one of the parents on form (B).

If the applicant for a Passport be a citizen of the United Kingdom and Colonies by naturalization or registration, the Certificate of Naturalization or

registration must be produced with the application.

British Passports are generally available for travel to all countries. The possession of a Passport does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *thin* paper and must not be glazed on the reverse side. A coloured photograph should not be submitted unless the supplier advises that the type is "passport approved". They should measure not more than $2\frac{1}{2}$ in. by $2\frac{1}{2}$ in. (63 mm. by 50 mm.), or less than $2\frac{1}{2}$ in. by $1\frac{1}{2}$ in. (50 mm. by 38 mm.), and should be taken full face without a hat.

RENEWAL OF PASSPORTS

Applications for the renewal of United Kingdom passports must be made on Form D.

94-PAGE PASSPORTS

On May 1, 1973, a new type of passport became available. Intended to meet the needs of frequent travellers who fill standard passports well before the ten-year validity has expired, it contains 94 pages, is valid for ten years and costs £16.

British Visitors' Passports

A simplified form of travel document is available for British subjects (Citizens of the United Kingdom and Colonies) wishing to pay short visits (not exceeding three months) to certain foreign countries, viz.

ANDORA; AUSTRIA; BELGIUM; DENMARK; FINLAND; FRANCE (incl. CORSICA); GREECE (& THE GREEK ISLANDS); W. GERMANY (incl. West Berlin by air only); ICELAND; ITALY; LIECHTENSTEIN; LUXEMBURG; MONACO; NETHERLANDS; NORWAY; PORTUGAL (incl. MADEIRA & AZORES); SAN MARINO; SPAIN (incl. BALEARIC & CANARY ISLANDS); SWEDEN; SWITZERLAND; TURKEY.

A fee of £4.00 is charged for the issue of a British Visitors' Passport, which is valid for 12 months, cannot be amended and is not renewable; on expiry application should be made for a new passport if required. Particulars of an applicant's spouse and/or children under 16 years can be included at the time of issue only at no extra cost. A child of 8 years of age and over is eligible to hold a British Visitors' Passport. Applications for, or including, a person under 18 years of age (unless married or serving in H.M. Forces) must be countersigned by the legal guardian.

British Visitors' Passports are obtainable by application on Form VP (from any Main Post Office). Applicants in England, Scotland and Wales should take the completed form in person to any Main Post Office which will normally issue the passport without further delay; applicants in Northern Ireland to Foreign and Commonwealth Passport Agency, Belfast. *British Visitors' Passports* are not obtainable from the Passport Offices. Two recent passport photographs will be required of the applicant and three of his/her spouse, if to be included; photographs of children are not required. Size of photographs must be $2\frac{1}{2}$ in. \times $1\frac{1}{2}$ in. (50 mm. by 38 mm.) (see also PHOTOGRAPHS above). No visas are required on British Visitors' Passports.

Applicants must also produce for the purpose of identification a N.H.S. Medical Card, birth certificate or retirement pension book.

Hall-marks are the symbols stamped on gold or silver articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold or silver articles are required by law to be hall-marked before they are offered for sale. Hall-marking was instituted in 1300 under a statute of Edward I.

Normally a complete modern hall-mark consists of four symbols—the maker's mark, assay office mark, standard mark and date letter. Additional marks have been authorized from time to time.

Maker's Mark.—Instituted in 1363, the maker's mark was originally a device such as a bird or *fleur-de-lys* and now consists invariably of the initials of the Christian and surnames of the maker or of the firm.

Assay Office Mark.—The existing assay offices and their distinguishing marks are:—

LONDON (Goldsmiths' Hall).

A leopard's head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From

1697-1720 this mark was used in London for gold only and not for silver.

BIRMINGHAM.....An anchor
SHEFFIELD.....A crown for silver and a
York rose for gold

EDINBURGH.....A castle
Offices formerly existed in other towns, e.g. Chester, Glasgow, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

Standard Mark.—Instituted in 1544. The current legal standards and their marks are as follows:—

SILVER.—Sterling silver (92.5 per cent. silver) is marked by English assay offices with a *lion passant* and by the Edinburgh Assay Office with a *thistle*. A full-length figure of *Britannia* was impressed on

silver of a higher standard (95.84 per cent. silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

GOLD.—22 carat articles (91.6 per cent. gold) are marked by English offices with a crown followed by the figure 22; by the Edinburgh office with the figure 22 following the standard mark as for sterling silver (see above).

18 carat articles (75 per cent. gold) are marked by English assay offices with a crown followed by the figure 18.

All British assay offices mark 14 carat gold (58.5 per cent. gold) with the figures 14.585 and 9 carat gold (37.5 per cent. gold) with the figures 9.375.

Date Letter.—Instituted in 15th Century. The date letter denotes the year in which an article was assayed or hall-marked. Each alphabetical cycle

has a distinctive style of lettering or shape of shield. The date letters are different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. The date letter is changed at the London Office in May each year and at Birmingham and Sheffield in July. Specimen shields and letters used by the London Office in each period from 1438 to date are shown on p. 1212.

OTHER MARKS

Duty Mark.—In 1784 an additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty in 1890.

Silver Jubilee and Coronation Marks.—Voluntary marks were authorized to be used at manufacturers' request to commemorate the silver jubilee of King George V and Queen Mary and the

Coronation of Her Majesty Queen Elizabeth II. The Jubilee Mark was used on silver made in 1933, 1934 and 1935 and the Coronation Mark on gold and

silver with date letter 1952/3 or 1953/4.

Foreign Wares.—Since 1842 foreign wares imported into Great Britain have been required to be hall-marked before sale. The marks consist of the Importer's mark, a special assay office mark (see below), the decimal figures denoting fineness (together with the carat figure in the case of gold) and the annual date letter. The current assay office marks for foreign wares are as follows:—

LONDON.—The sign of the Constellation Leo.

BIRMINGHAM.—Equilateral triangle.

SHEFFIELD.—The sign of the Constellation Libra.

EDINBURGH.—St. Andrew's Cross.

CLOSE TIMES

Wild Birds.—The *Protection of Wild Birds Act*, 1954, lays down a close season for wild birds (other than Game Birds) from February 1 to August 31 inclusive, each year. Exceptions to these dates are made for—

Capercaillie and (except Scotland) *Woodcock*, Feb. 1—Sept. 30.

Snipe, Feb. 1—Aug. 11.

Wild Duck and Wild Goose (in or over water areas), Feb. 21—Aug. 31.

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, wigeon) and certain wild geese (bean, Canada, pink-footed and white-fronted).

Certain wild birds may be killed or taken at any time by authorized persons—cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, starling, stock-dove and wood pigeon; and, in Scotland only, goosander, red-breasted merganser and rock-dove. The sale of Wild Birds' Eggs is prohibited, except that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. 1—

April 14 inclusive.

Game Birds.—In each case the dates are inclusive:—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

**Grouse*—Dec. 11 to Aug. 11.

**Partridge*—Feb. 2 to Aug. 31.

**Pheasant*—Feb. 2 to Sept. 30.

**Ptarmigan*—(Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in England and Wales) to kill the game marked * on a Sunday or Christmas Day.

Hunting and Ground Game.—There is no statutory close-time for fox-hunting or rabbit-shooting, nor for hares; but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The First of November is the recognized date for the opening of the fox-hunting season, which continues till the following April. *Other-hunting* lasts from mid-April to mid-September.

Deer.—The Deer Act, 1963, effective from Nov. 1, 1963, imposed the following close times.

Red Deer and Sika Deer: Stags, May 1-July 31; Hinds, March 1-Oct. 31. *Fallow Deer and Roe Deer:* Buck, May 1-July 31; Doe, March 1-Oct. 31. Under the Act it is an offence to take or wilfully kill deer of any species from one hour after sunset to one hour before sunrise.

WEIGHTS AND MEASURES

The Weights and Measures Act of 1963 enacts the legal measures for Great Britain, basing them upon "United Kingdom primary standards" in the custody of the Standards Department of the Dept. of Trade. The primary standards are the yard, pound, metre and kilogramme. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1963 defines the GALLON as the space occupied by 10 pounds weight of distilled water of density 0.998 859 gramme per millilitre weighed in air of density 0.001 217 gramme per millilitre against weights of density 8.136 grammes per millilitre. The METRE and the LITRE have the meanings assigned by order of the Dept. of Trade to reproduce in English the international definition of these measures in force at the time of making of the orders.

New definitions for an *international yard* and *pound* were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States:

international yard = 0.914 4 metre.

international pound = 0.453 592 37 kilogramme.

The following list shows the definitions of measures set out in the Weights and Measures Act, 1963 and some useful conversions. See also Conversion Tables, p. 1218.

Measurement of Length

Imperial Units

Mile = 1,760 yards
Furlong = 220 yards.
Chain = 22 yards.
YARD = 0.914 4 metre.
Foot = $\frac{1}{3}$ yard.
Inch = $\frac{1}{36}$ yard.

1 mil = $\frac{1}{1000}$ inch.
12 inches (in.) = 1 foot (ft.).
3 feet = 1 yard (yd.).
6 feet = 1 fathom.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
8 furlongs = 1 mile = 1,760 yards.

Metric Units

Kilometre = 1,000 metres.
METRE (see above) = 1.094 yards.
Decimetre = $\frac{1}{10}$ metre.
Centimetre = $\frac{1}{100}$ metre.
Millimetre = $\frac{1}{1000}$ metre.

10 millimetres (mm.) = 1 centimetre (cm.) = 0.393 701 inch.
10 centimetres = 1 decimetre (dm.) = 3.937 011 inches.
10 decimetres = 1 METRE (m.) = 1.093 614 yards.
10 metres = 1 dekametre (dam.) = 10.936 143 yards.
10 dekametres = 1 hectometre (hm.) = 109.361 43 yards.
10 hectometres = 1 kilometre (km.) = 0.621 371 mile.

A kilometre is approximately five-eighths of a mile, so that 8 kilometres may be regarded as 5 miles.

Measurement of Area

Imperial Units

Square mile = 640 acres.
Acre = 4,840 square yards.
Rood = 1,210 square yards.
SQUARE YARD = a superficial area equal to that of a square each side of which measures one yard.
Square foot = $\frac{1}{9}$ square yard.
Square inch = $\frac{1}{144}$ square foot.

144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
4 roods = 1 acre.
10 square chains = 1 acre = 4,840 sq. yards.
640 acres = 1 square mile.

Metric Units

Hectare = 100 ares.
Dekare = 10 ares.
Are = 100 square metres.
SQUARE METRE = a superficial area equal to that of a square each side of which measures one metre.
Square decimetre = $\frac{1}{100}$ square metre.
Square centimetre = $\frac{1}{100}$ square decimetre.
Square millimetre = $\frac{1}{100}$ square centimetre.

1 sq. centimetre = 0.155 sq. inch.
1 sq. METRE = 10.763 9 sq. feet = 1.195 99 sq. yds.
1 are (a.) = 0.098 8 rood.
1 hectare (10,000 sq. metres) (ha.) = 2.471 05 acres.
1 sq. kilometre = 0.386 102 sq. mile.

Measurement of Volume

Imperial Units

CUBIC YARD = a volume equal to that of a cube each edge of which measures one yard.
Cubic foot = $\frac{1}{27}$ cubic yard.
Cubic inch = $\frac{1}{1728}$ cubic foot.

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Metric Units

CUBIC METRE = a volume equal to that of a cube each edge of which measures one metre.
Cubic decimetre = $\frac{1}{1000}$ cubic metre.
Cubic centimetre = $\frac{1}{1000}$ cubic decimetre.

1 cubic metre (cbm. or m³.) = 35.314 7 cu. ft. = 1.307 95 cu. yds.
(1 stere (= 1 cu. metre) is used as a unit of measurement of timber.)
1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

Measurement of Capacity

Imperial Units

GALLON (see above).
Quart = $\frac{1}{4}$ gallon.
Pint = $\frac{1}{2}$ quart.
Gill = $\frac{1}{4}$ pint.
Fluid ounce = $\frac{1}{20}$ pint.

4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 1 GALLON.
1 gallon = 160 fluid ounces.
= 277.274 cubic inches.

Bushel = 8 gallons.
Peck = 2 gallons.

2 gallons = 1 peck.
4 pecks = 1 bushel.
8 bushels = 1 quarter.
A chaldron is 36 bushels = 4 $\frac{1}{2}$ quarters.

1 hectolitre = 2.749 69 bushels.
1 hectolitre per hectare = 1.11 bushels per acre.
1 quintal = 3.674 3 bushels.
1 quintal per hectare = 1.49 bushels per acre.

Measurement of Capacity—continued

Fluid drachm = $\frac{1}{8}$ fluid ounce.
Minim = $\frac{1}{60}$ fluid drachm.

See Apothecaries' Weight (below).

Metric Units

Hectolitre = 100 litres.

LITRE = The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under a pressure of one standard atmosphere (14.696 lb. per sq. inch).

Decilitre = $\frac{1}{10}$ litre.

Centilitre = $\frac{1}{100}$ litre.

Millilitre = $\frac{1}{1000}$ litre.

1 centilitre (cl.) = 0.070 4 gill.

1 LITRE* ($\frac{1}{1,000}$ cubic metre) (lit.) = 1.759 8 pints = 0.88 Imp. quart = 0.22 Imp. gallon = 61.025 5 cu. inch = 0.035 315 7 cu. ft.

1 hectolitre (hl.) = 21.997 5 Imp. gallons = 26.417 1 U.S. gallons = 2.749 Imp. bushels = 2.837 7 U.S. bushels.

Measurement of Mass or Weight

Imperial Units

Ton = 2,240 pounds.

Hundredweight = 112 pounds.

Cental = 100 pounds.

Quarter = 28 pounds.

Stone = 14 pounds.

POUND = 0.453 592 37 kilogram.

Ounce = $\frac{1}{16}$ pound.

Dram = $\frac{1}{16}$ ounce.

Grain = $\frac{1}{7,000}$ pound.

7,000 grains (gr.) = 1 pound (lb.).

16 drams (dr.) = 1 ounce (oz.).

16 ounces = 1 POUND (lb.).

14 pounds = 1 stone.

28 pounds = 1 quarter (of a cwt.).

4 quarters (112 lb.) = 1 hundredweight (cwt.).

20 hundredweight (2,240 lb.) = 1 ton.

20 pennyweights (dwt.) = 1 Troy ounce.

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. A Troy POUND (= 5,760 grains) is legalized in the United States.

Ounce Troy = 480 grains

Pennyweight = 24 grains

Ounce apothecaries' = 480 grains.

Drachm = $\frac{1}{8}$ ounce apothecaries'.

Scruple = $\frac{1}{3}$ drachm.

See Apothecaries' Weight (below)

Metric Units

Metric ton = 1,000 kilograms.

Quintal = 100 kilograms.

1 centigram (cg.) = 0.154 32 grains.

1 decigram (dg.) = 1.543 2 grains.

1 gramme (gm.) = 15.432 4 grains.

1 dekagram (dag.) = 5.643 8 drams.

1 hectogram (hg.) = 3.527 4 oz.

1 KILOGRAM (kg.) = 32.150 7 oz. Troy = 35.273 4 oz. Avoirdupois = 2.204 62 lb. Avoirdupois.

1 myriagram = 22.046 2 lb. Avoirdupois.

1 quintal (q.) = 100 kg. = 220.5 lb. Avoirdupois = 1.968 4 cwt.

1 tonne (t.) = 0.984 207 U.K. or long ton = 1.102 31 U.S. or short ton

Measurement of Electricity

Units of measurement of electricity, the AMPERE (unit of electrical current), the OHM (unit of electrical resistance), the VOLT (unit of difference of electrical potential) and the WATT (unit of electrical power) have the meanings assigned to them respectively by order of the Dept. of Trade, to reproduce in English the international definitions in force at the date of the making of the order.

Kilowatt = 1,000 watts.

Megawatt = 1,000,000 watts.

Apothecaries' Weight

Measures of Weight.

20 grains = 1 scruple ($\frac{1}{3}$).

3 scruples = 1 drachm ($\frac{1}{3}$).

8 drachms = 1 ounce.

Measures of Capacity.

60 minims (min.) = 1 fluid drachm.

8 fluid drachms = 1 fluid ounce.

5 fluid ounces = 1 gill.

4 gills = 1 pint.

8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois drachm, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to TWO Avoirdupois drams.

Angular or Circular Measure

60 seconds (") = 1 minute (').

60 minutes = 1 degree (°).

90 degrees = 1 right angle or quadrant.

Diameter of circle $\times 3.141 6$ = circumference.

Diameter squared $\times .7854$ = area of circle.

Diameter squared $\times 3.141 6$ = surface of sphere.

Diameter cubed $\times .523$ = solidity of sphere.

One degree of circumference $\times 57.3$ = radius.*

Diameter of cylinder $\times 3.141 6$; product by length or height, gives the surface.

Diameter squared $\times .7854$; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures

Cubic inch..... = 252.458 grains.

Gallon (277.274 cu. in.).... = 10 lb. (distilled).

Cubic foot..... = 62.321 lb.

35.943 cubic ft. (224 gals.)... = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

THERMOMETER COMPARISONS

Comparison between Scales of Fahrenheit,
Réaumur and Centigrade.

28	82.4	22.4	47	52.6	37.6
27	80.6	21.6	48	54.4	38.4
26	78.8	20.8	49	56.2	39.2

NOTE.—The normal temperature of the human body is 98.4° F., or 37° (38.9°) C., or 29.6° R. Freezing point = 32° F. = 0° C. = 0° R.; Boiling point = 212° F. = 100° C. = 80° R.
 * Absolute Zero. Temperature is reckoned from 0° F., and is denoted by the letter "A."
 * Below 32° F. subtract 32.

CONVERSION
 Let F = Fahr.
 " C = Cent.
 " R = Réaumur.

$$\begin{aligned} *F &= \frac{9C}{5} + 32 \\ C &= \frac{5(F-32)}{9} \end{aligned}$$

$$\begin{aligned} F &= C + R + 32 \\ R &= \frac{4(F-32)}{9} \end{aligned}$$

An Inch of Rain on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100.992 tons.
 Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lbs. in addition to its own weight.

Million, Billion, etc.

Value in the United Kingdom

Million.....thousand × thousand (10⁶)
 Billion.....million × million (10¹²)
 Trillion.....million × billion (10¹⁵)
 Quadrillion.....million × trillion (10¹⁸)

Value in U.S.A.

Million.....thousand × thousand (10⁶)
 Billion.....thousand × million (10⁹)
 Trillion.....million × million (10¹²)
 Quadrillion.....million × billion U.S. (10¹⁵)

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

PAPER AND BOOK MEASURES

Writing Paper

480 sheets = 1 ream
 24 sheets = 1 quire
 20 quires = 1 ream

Printing Paper

516 sheets = 1 ream
 2 reams = 1 bundle
 5 bundles = 1 bale

Sizes of Writing and Drawing Papers

Emperor..... = 72 × 48 inches
 Antiquarian..... = 53 × 31 "
 Double Elephant..... = 40 × 26½ "
 Grand Eagle..... = 42 × 28½ "
 Atlas..... = 34 × 26 "
 Colomblor..... = 34½ × 23½ "
 Imperial..... = 30 × 22 "
 Elephant..... = 28 × 23 "
 Cartridge..... = 26 × 21 "
 Super Royal..... = 27 × 19 "
 Royal..... = 24 × 19 "
 Medium..... = 22 × 17½ "
 Large Post..... = 21 × 16½ "
 Copy or Draft..... = 20 × 16 "
 Demy..... = 20 × 15½ "
 Post..... = 19 × 15½ "
 Pinched Post..... = 18½ × 14½ "
 Foolscap..... = 17 × 13½ "
 Sheet and ½ Foolscap..... = 22 × 13½ "
 Sheet and ¼ Foolscap..... = 24½ × 13½ "
 Double Foolscap..... = 26½ × 16½ "
 Double Post..... = 30½ × 19 "
 Double Large Post..... = 33 × 21 "
 Double Demy..... = 31 × 20 "
 Brief..... = 16½ × 13½ "
 Pott..... = 15 × 12½ "

Sizes of Printing Papers

Foolscap..... = 17 × 13½ inches
 Double Foolscap..... = 27 × 17 "
 Crown..... = 20 × 15 "
 Double Crown..... = 30 × 20 "
 Quad Crown..... = 40 × 30 "
 Double Quad Crown..... = 60 × 40 "
 Post..... = 19½ × 15½ "
 Double Post..... = 31½ × 19½ "
 Double Large Post..... = 33 × 21 "
 Sheet and ½ Post..... = 23½ × 19½ "
 Demy..... = 22½ × 17½ "
 Double Demy..... = 35 × 22½ "
 Quad Demy..... = 45 × 35 "
 Music Demy..... = 20 × 15½ "
 Medium..... = 23 × 18 "
 Royal..... = 25 × 20 "
 Super Royal..... = 27½ × 20½ "
 Elephant..... = 28 × 23 "
 Imperial..... = 30 × 22 "

SIZES OF BROWN PAPERS

Casing.....	=	46	×	36	inches
Double Imperial.....	=	45	×	29	"
Elephant.....	=	34	×	24	"
Double Four Pound.....	=	31	×	21	"
Imperial Cap.....	=	29	×	22	"
Haven Cap.....	=	26	×	21	"
Bag Cap.....	=	24	×	19½	"
Kent Cap.....	=	21	×	18	"

SIZES OF BOUND BOOKS

Demy 16mo.....	=	5½	×	4¾	inches
Demy 18mo.....	=	5½	×	3½	"
Foolscap Octavo (8vo).....	=	6½	×	4½	"
Crown 8vo.....	=	7½	×	5	"
Large Crown 8vo.....	=	8	×	5½	"
Demy 8vo.....	=	8½	×	5½	"
Medium 8vo.....	=	9½	×	6	"
Royal 8vo.....	=	10	×	6½	"
Super Royal 8vo.....	=	10½	×	6½	"
Imperial 8vo.....	=	11	×	7½	"
Foolscap Quarto (4to).....	=	8½	×	6½	"
Crown 4to.....	=	10	×	7½	"
Demy 4to.....	=	11½	×	8½	"
Royal 4to.....	=	12½	×	10	"
Imperial 4to.....	=	15	×	11	"
Crown Folio.....	=	15	×	10	"
Demy Folio.....	=	17½	×	11½	"
Royal Folio.....	=	20	×	12½	"
Misc.....	=	14	×	10½	"

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. *Octavo* books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

INTERNATIONAL PAPER SIZES

Simplification of the large number of stock paper sizes in use in the United Kingdom has been proceeding since publication of British Standard 730 in 1937. Recommendations made by the International Organization for Standardization were accepted by the United Kingdom in 1959 and it is considered that general adoption of the international or A size will bring great economies to users of paper.

The basis of the international series of paper sizes is a rectangle having an area of one square metre, the sides of which are in the proportion of $1 : \sqrt{2}$. In other words, taking one side as X and the other as Y, the basic size provides the equation— $X : Y = 1 : \sqrt{2}$; and $X \times Y = 1$. It may be noted that the proportions $1 : \sqrt{2}$ have a geometrical relationship, the side and diagonal of any square being in this proportion. As the basic size is one square metre in area, this means that $X = 841$ millimetres and $Y = 594$ millimetres. The effect of this arrangement is that if the short side is doubled or the longer side is halved, *i.e.*, if the area of the sheet is doubled or halved, the shorter side and the longer side of the new sheet are still in the same proportion $1 : \sqrt{2}$. This feature is particularly useful where photographic enlargement or reduction is used, as the proportions remain the same.

Description of the A series is by capital A followed by a figure. The basic size has the description A0 and the higher the figure following the letter, the greater is the number of sub-divisions and therefore the smaller the sheet. Half A0 is A1 and half A1 is A2. Where larger dimensions are required the A is preceded by a figure. Thus 2A means twice the size A0; 4A is four times the size of A0.

It is an essential feature of these series that the dimensions are of the trimmed or finished size.

'A' SERIES OF TRIMMED SIZES

Designation	SIZE	
	mm	inches
A 0	841 × 1189	33.11 × 46.81
A 1	594 × 841	23.39 × 33.11
A 2	420 × 594	16.54 × 23.39
A 3	297 × 420	11.69 × 16.54
A 4	210 × 297	8.27 × 11.69
A 5	148 × 210	5.83 × 8.27
A 6	105 × 148	4.13 × 5.83
A 7	74 × 105	2.91 × 4.13
A 8	52 × 74	2.05 × 2.91
A 9	37 × 52	1.46 × 2.05
A 10	26 × 37	1.02 × 1.46

Subsidiary Series.—A series of B sizes has been devised for use in exceptional circumstances when sizes intermediate between any two adjacent sizes of the A series are needed.

'B' SERIES OF TRIMMED SIZES

Designation	SIZE	
	mm	inches
B 0	1000 × 1414	39.37 × 55.67
B 1	707 × 1000	27.83 × 39.37
B 2	500 × 707	19.68 × 27.83
B 3	353 × 500	13.90 × 19.68
B 4	250 × 353	9.84 × 13.90
B 5	176 × 250	6.93 × 9.84
B 6	125 × 176	4.92 × 6.93
B 7	88 × 125	3.46 × 4.92
B 8	62 × 88	2.44 × 3.46
B 9	44 × 62	1.73 × 2.44
B 10	31 × 44	1.22 × 1.73

In addition there is a series of C sizes which is used much less. A is for magazines and books, B for posters, wall charts and other large items, C for envelopes particularly where it is necessary for an envelope (in C series) to fit into another envelope. The size recommended for business correspondence is A4.

Long Sizes.—Long sizes are obtainable by dividing any appropriate sizes from the two series above into three, four or eight equal parts parallel with the shorter side in such a manner that the proportions mentioned in paragraph 2 (above) are not maintained, the ratio between the longer and the shorter sides being greater than $\sqrt{2} : 1$. In practice long sizes should be produced from the A series only.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

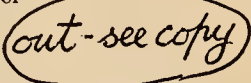

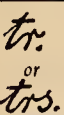

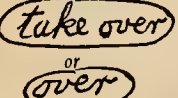

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples:—1 centimetre = 0·394 inch and 1 inch = 2·540 centimetres. 1 metre = 1·094 yards and 1 yard = 0·914 metre. 1 kilometre = 0·621 mile and 1 mile = 1·609 kilometres.

Length			Area			Volume			Weight (Mass.)					
Centi- metres		Inches	Square Centi- metres		Square Inches	Cubic Centi- metres		Cubic Inches	Long Tons		Short Tons	Metric Tonnes		Short Tons

SYMBOLS FOR CORRECTING PROOFS

Supplied by WILLIAM CLOWES & SONS LTD, Beccles, Suffolk, Printers of "WHITAKER"

Letter(s) or word(s) requiring alteration should be struck through IN INK in the text and the substitution should be written in the nearest margin followed by / (the symbol used to denote that the marginal mark is concluded). Insertions should be indicated by \wedge or \wedge at the conclusion of the marginal mark and at the desired place in the text.

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Delete (take out)	 or 	/ or — Vertical stroke to delete one or two letters; horizontal line to delete more	Take letter(s) or word(s) from beginning of one line to end of preceding line	 or 	
Delete and close up	 or 	Strike out letter(s) not required and add "close up" mark above and below	Begin a new paragraph		 before first word of new paragraph
Close up: delete space between letters		 linking letters or words	No new para. here or run on previous matter with later matter		 between paras. or other matter
Use ligature (fi, fl, ffi, etc.) or diphthong (æ, œ)	 enclosing ligature or diphthong required	 enclosing letters to be altered	Spell out in full the abbreviation, contraction, or figure		Encircle words, etc., or figures concerned
Insert space between letters or words			Insert omitted portion of copy		\wedge Attach the relevant copy to the proof, indicating omitted portion
Leave as printed (i.e. a cancellation of previous marking)	 under letter(s) or word(s) crossed out but to be retained	Inserted or substituted letter(s), figure(s), or sign(s) under which this is placed to be superscript (i.e. high alignment) ¹	 (see footnote)	\wedge for insertions For substitutions encircle letter(s), figure(s), or sign(s) to be altered
Invert type (of letter(s) upside down)		Encircle letter(s) to be altered	Inserted or substituted letter(s), figure(s), or sign(s) over which this is placed to be subscript (low alignment) ₂	 (see footnote)	\wedge for insertions For substitutions encircle letter(s), figure(s), etc., to be altered
"Battered" letter(s) to be replaced by similar but undamaged characters		Encircle letter(s) or word(s) to be replaced and write the correct letter(s) in the margin	Change to lower case		Encircle letter(s) to be altered
Push down space or "high" letter(s) or word(s)		Encircle space, letter(s), or word(s) affected	Replace "wrong fount" by letter(s) of correct fount		Encircle letter(s) or word(s) to be altered
Transpose	 or 	 between letters or words, numbered when necessary	Change to capital letters		 under letter(s) or word(s) to be altered
Take letter(s) or word(s) from end of one line to beginning of next line	 or 		Change to small capitals		 under letter(s) or word(s) to be altered

 indicates a superior (superscript) figure one

 indicates an inferior (subscript) figure two

Correcting for the Press

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Use capital letters for initial letter(s) (as desired) and small capitals for rest of word(s)	<i>caps</i> & <i>s.c.</i>	≡ under initial letter(s) and ≡ under the remainder of the word(s)	Move lines to the left		at right side of group of lines to be moved (indicating approx. position)
Change to bold type	bold	~~~~~ Draw wavy line under letter(s) or word(s) to be altered	Move portion of matter so that it is positioned as indicated		at limits of required position
Change to roman type	<i>rom.</i>	Encircle letter(s) or word(s) to be altered	Raise lines	<i>raise</i>	↑ over lines to be raised
Change to italic type	<i>italic</i>	— Draw this straight line under letter(s) or word(s) to be altered	Lower lines	<i>lower</i>	↓ under lines to be lowered
Letter(s) or word(s) to be underlined	<u>underline</u>	— under letter(s), word(s), etc., to be underlined	Correct the vertical alignment		
Equalize space between words	<i>eq. #</i>	⌋ between words	Straighten lines	==	== through lines to be straightened
Reduce space	<i>less #</i>	⌋ between words	Insert parentheses (round-shaped brackets)	<i>(/)</i> or <i>(/)</i>	⋈ ⋈
Space to be inserted between lines or paragraphs	<i># ></i>	<i>Amount of space should be indicated</i>	Insert [square] brackets	<i>[/]</i> or <i>[/]</i>	⋈ ⋈
To be placed in centre of line, etc.	<i>centre</i>	Position to be indicated by	Insert hyphen	<i>-/</i>	⋈
Indent one en (approx. space occupied by n of type in use)	<i>en</i> 	indicating approximate position	Insert en (= half-em) rule (see above)	<i>en/</i>	⋈
Indent one em (approx. space occupied by M of type in use)	<i>em</i> 	Ditto	Insert one-em rule (see above)	<i>em/</i>	⋈
Indent two ems (approx. space occupied by MM of type in use)		Ditto	Insert two-em rule (see above)	<i>2em/</i>	⋈
Move to the left		Ditto	Insert apostrophe	<i>'</i>	⋈
Move to the right		Ditto	Insert single quotation marks	<i>' '</i>	⋈ ⋈
Move lines to the right		at left side of group of lines to be moved (indicating approx. position)	Insert double quotation marks	<i>" "</i>	⋈ ⋈
			Insert ellipsis	<i>.../</i>	⋈
			Insert leader (visual guide to alignment in contents pages, etc.)		⋈ (three, two, or one dot)
			Insert shilling stroke (oblique)	<i>/</i>	⋈

Punctuation
