Education.-In 1974 there were 868,19x pupils in primary schools and 65,764 in secondary schools.
Full-time university enrolment 1974 was 2,612.
Production and Emplopment.-Principal products are tobacco, maize, groundnuts, cotton, livestock and vegetables.
Mineral production was valued at $K_{504,356,000}$ in 1975. The production of copper totalled 630,000 tonnes valued at $K_{465,252,000 \text {. In } 1973}$ an oil refinery at Ndola came into operation and the pipeline running through Zambia to Ndola was switched over to the transportation of crude oil.
In June, 1974, 368,150 persons were estimated to be in full employment. Included in this figure are: mining and quarrying, 63,630 : agriculture, forestry and fishery, 31,700 ; construction, 68,630 ; manufacturing, 40,820 .
Finance and Currency.-Zambia adopted decimal currency um Jan. 16, 1968, the unit being the Kwacha.

## GRENADA

Grenada is situated between the parallels of $12^{\circ} 13^{\prime}-8 x^{\circ} 58^{\prime} \mathrm{N}$. lat. and $6 \mathrm{I}^{\circ} 20^{\prime}-6 \mathrm{I}^{\circ} 35^{\prime} \mathrm{W}$. long., and is about 22 miles in length and 12 miles in breadth; it is about 80 miles north of Trinidad, miles S.S.W. of St. Vincent, and about 120 miles S.W. of Barbados. Area, including the Grenada

Grenadines about 133 square miles; estimated population (including some of the Grenadines), 104,000 (1976). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498 , and named Conception. It was originaliy colonized by
the French, and was ceded to Great Britain by the Treaty of Versailles in $\mathbf{2 7 8 3}$. It became an Associated State in 1967 and independent nation on Feb. x, 1974.

The soil is very fertile, and cocoa, bananas, nutmeg and other spices, coconuts, sugar cane and fruit are grown. The imports are chiefly dry goods, wheat flour, dried fish and rice.
$\Psi$ St. George's (population 8,600) on the southwest coast, is the chief town, and possesses i good harbour.

Trade
Total imports (x973).
.......... 842,537.790 Includes Colonial Development and Welfare Grant.

## Government

Grenada's legislature is bicameral consisting of Her Majesty (represented by m Governor-General), - Senate and a House of Representatives. The 13 Senators are appointed by the Governor-General,

7 on the advice of the Prime Minister, 3 on the advice of the Leader of the Opposition, and 3 on the advice of the Prime Minister after he has consulted interests which he considers Senators should be selected to represent. The Cabinet consists of the Prime Minister, the other Ministers, and at any time when his office is a public one, the Attorney-General. Governor-General, Sir Leo de Gale (1974).
Premier, Rt. Hon. Sir Eric Gairy.
The Grenadines are a chain of small islands lying between Grenada and St. Vincent, within which Governments they are included. The largest island is Carriacou, attached to the Government of Grenada, with area of 13 sq . miles and population of about 8,000 .

## REPUBLIC OF NAURU

The Republic of Nauru is an island of $8 \cdot 2$ sq. miles in size, situated in $166^{\circ} 55^{\prime} \mathrm{E}$. longitude and $32^{\prime} \mathrm{S}$. of the Equator. It has - population (estimated June, 1972) of 6,768 , of whom two-thirds are Nauruans or other Pacific Islanders. There are Chinese and European minorities. About 43 per cent. of Nauruans are adherents of the Nauruan Protestant Church and there is $\square$ Roman Catholic Mission on the island.

Until 1968 Nauru was administered by Australia under an international trusteeship agreement which on Nov. I, 1947, superseded = former League of Nations Mandate. It became an Independent State from February $\mathrm{I}_{1} 1968$. It was announced in November, 1968 , that a limited form of membership of the Commonwealth had been devised for Nauru at the request of its Government. The Cabinet is chosen by the President and comprises not fewer than five nor more than six members including the President.

President and Minister for External Affairs and Justice,
His Excellency Bernard Dowlyogo.

## Cabinet

Minister for Finance, Hon. K. Clodumar.
Health and Education, Hon. L. Stephen.
Works and Community Services, Hon. R. Kun.
Internal Affairs and Island Development and Industry. Hon. K. Aroi.

Chief Justice, I. R. Thompson.
Legislature.-Parliament has eighteen members including the Cabinet and Speaker. Voting is compulsory for all Nauruans over 20 years of age, except in certain specified instances. Elections are held every three years.

Judiciary.-A Supreme Court of Nauru is presided over by the Chief Justice. The District Court, which is subordinate to the Supreme Court, is presided over by $\quad$ Resident Magistrate. Both the Supreme Court and the District Court are Courts of Record. The Supreme Court exercises both original and appellate jurisdiction.

Education and Welfare.-Nauru has a hospital service and other medical and dental services.

There is also maternity and child welfare service. Education is a vailable in oprimary and a secondary schools on the island with a total enrolment of about $x, 600$ pupils receiving primary education and 500 secondary education.

Production, etc.-There are valuable deposits of phosphates on the island which were purchased from the Pacific Phosphate Company in 1919 by the Governments of Australia, New Zealand and the United Kingdom for $£ 3,500,000$ and vested in the British Phosphate Commissioners. Royalties on phosphate exports (about $\mathcal{L} 5,000,000$ annually) have been paid partly to the Nauruans and partly into $I$ trust fund which used income from investments abroad to pay for Nauru's administrative and social services. Phosphate mining employs $x, 369$ persons out of a labour force of 2,208 .

The assets on Nauru of the British Phosphate Commissioners have been purchased by the Nauruans, control of mining and marketing passing to the Nauru Phosphate Corporation [a] July $x$, 1970.

Flag. -Twelve-point star (representing the 12 original Nauruan tribes) below $\quad$ gold bar (representing the Equator), all on |l blue ground.

## SEYCHELLES

The Republic of Seychelles, in the Indian Ocean, consists of two distinct collections of islands-the Mahé group, 45 islands in all, granitic with high hills and mountains (highest point about $2,990 \mathrm{ft}$.) and the outlying islands, the Coralline group, numbering 49 more and, for the most part, only a little above sea-level. Proclaimed $E$ French territory in 5756, the Mahe group began to be settled as a dependency of Mauritius from 1770, was captured by British ship in 1794 and was finally assigned to Great Britain in 18 xo . By Letters Patent of September, 1903, these islands, together with the Coralline group, were formed into separate Colony. On June 28, 1976, the Islands became in independent republic within the Commonwealth.

The total area of the Granitic group is $1 g 0$ square miles, of which Mahé, the largest island and the seat of Government, claims 57 . The next largest island is Praslin, home of the unique double coconut, Coco de Mer. Islands of the Coralline group lie at distances from Mahé varying between 60 and $6 x_{2}$ miles and have a total area of approximately 8x sq. miles. In 1965 the islands of Farquhar, Desroches and Aldabra were detached from Seychelles and with the Chagos Islands, formerly of Mauritius, formed the new British Indian Ocean Territory, but returned to Seychelles on independence. The coralline islands have no permanent population and, where worked, are supplied by contract labour from the Granitic group. The population in 1977 was 59,200 (4x per cent are under

15 years old). Although only $4^{\circ} \mathrm{S}$. of the Equator, the islands are healthy. There are $3^{6}$ primary schools, 14 secondary schools, five vocational training centres and a teachers' training college.

A new Constitution is in the process of being drafted.

1975 12,900,000

The principal imports are rice, mineral oils, cotton piece goods, vehicles, manufactured items and building materials. The chief exports are tourism, cinnamon bark and copra; others include cinnamon leaf oil, guano, vanilla, patchouli oil and tortoise shell.

CAPITAL, $\Psi$ Victoria (population, $197 \%$ 13,736), on the N.E. side of Mahé.
President, France Albert Rene.
Letters to and from London-5 to so days.

The Tongan or Friendly Islands, $\square$ British-protected state for 70 years, became independent on June 4 , 1970.

These islands are situated in the Southern Pacific some 450 miles to the E.S.E. of Fiji, with ${ }^{\text {E }}$ area of 270 sq. miles, and population (x976 Census) of 90,128 . The largest island, Tongatapu, was discovered by Tasman in 1643 . Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between $55^{\circ}$ and $23^{\circ} 30^{\prime} \mathrm{S}$., and $173^{\circ}$ and $177^{\circ} \mathrm{W}$. Nuku'alofa, on the island of Tongatapu, is the seat of government. The present King Taufa'ahau Tupou IV, G.C.M.G., G.C.V.O., K.B.E., succeeded his mother, the late Queen Salote Tupou III, on December 16, 1965. The constitution provides for a Government consisting of the Sovereign, il privy council and cabinet, legislative assembly and indiciary. The legislative assembly has 22 members, with $\because$ Speaker, and includes the Ministers of the Crown, the two Governors of Island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially.

Premier, Minister of Foreign Affairs and of Agriculture,
H.R.H. Prince Fatafehi Tu'ipelehake, K.B.E.

Soil generally is fertile, the principal exports are copra and bananas. Revenue July 1976-June 1977 T $\$ 6,080,152$; expenditure $T \$ 6,685,384$ (estimated). The national debt is $T \$ 3,200,000$ ( 5976 ). Total imports (x976) T81I,700,000. Total exports ( 5976 ) $T \$ 3,200,000$. The total shipping cleared in 1974 was 6Ix,28I tons. Tongan currency is at parity with Australia.

## WESTERN SAMOA

Head of State, H. H. Malietoa Tanumafili II, с.B.е. (April 15, 1963).

## Prime Minister, Hon. Tupuola Efi.

Formerly administered by New Zealand (latterly with internal self-government), Western Samoa became, on January 1, 1962, the first fully-independent Polynesian State.

The State was treated as $\quad$ member country of the Commonwealth until its formal admission on August 28, 1970.

Western Samoa consists of the islands of Savai'i ( 662 sq. miles) and of Upolu, which with seven other islands, has an area of 435 sq. miles. All islands are mountainous. Upolu, the most fertile, contains the harbours of $\Psi$ Apia and $\Psi$ Saluafata and Savai'i the harbour of $\Psi$ Asau. The islanders are

Christians of different denominations. In 1976 the population was estimated to be 151,300 .
The chief exports are copra, cocoa, bananas and timber.
Total exports 1975 were $\$ 4.500,000$.
Total imports 1975 were $\$ 20,600,000$.
Trade with U.K.
 CAPITAL- $\Psi$ Apia (population 35,000). Robert Louis Stevenson died and was buried at Apia in 1894.

Flag. -Five white stars (depicting the Southern Cross) on 』 quarter royal blue at top next staff, and three quarters red.

## Associated States, Colonies, Protectorates, etc.

Flags of the Dependencies.-Generally the dependencies use the Union Flag ("Union Jack ") or Blue Ensign bearing a badge of arms of the Dependency (with surrounding garland when used with the Union Flag). In a few cases, e.g. Bermuda, the Red Ensign is used with badge. (See also ANTIGUA (W. Indies); Bruner; St. Kitts (W. Indies); St. Lucia (W. Indies).)

## ASCENSION See ST. Helena BELIZE

British Honduras, in Central America, was officially renamed Belize on June $\mathrm{x}, 1973$. It lies within $18^{\circ} 29^{\prime} 50^{\prime \prime}$ to $55^{\circ} 53^{\prime} \mathrm{N}$. latitude and $89^{\circ} 13^{\prime} 28^{\prime \prime}$ to $87^{\circ} 2 x^{\prime} 30^{\prime \prime} \mathrm{W}$. longitude. Its extreme length and breadth are approximately $x 86 \mathrm{~m}$. and x 8 m . respectively; it is bounded on the north and northwest by Mexico, on the west and south by Guatemala; and on the east by the Caribbean Sea. The total win (including offshore islands) is about 8,867 sq. miles, with we estimated population ( $\mathbf{r 9 7 4}$ )
of 140,000 . The climate generally is damp and warm, but not unhealthy. The temperature ranges from $47^{\circ}$ to $94^{\circ} \mathrm{F}$. The average lies between $75^{\circ}$ and $80^{\circ}$, but this is considerably tempered by the prevailing sea-breezes.
The greater part of the country is covered by forest, of which 50 per cent. is high rain forest, $15 \cdot 5$ pine forest and dry savannah, $5^{\circ} 5$ wet savannah and mangrove forest, the remaining 20 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasturage for cattle. The north of the territory and the southern coastal plain
( 8 to zo miles wide) are nearly flat. Near the sea the plain is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 20 per cent. of the area of the territory is over $x, 000$ feet in elevation above mean sea-level.

The staple products are obtained from the forests, and include mahogany, cedar, and chicle (the basis of chewing-gum), Santa Maria, pine and rosewood. Agricultural crops which grow readily include sugar cane, coconuts, citrus fruit, plantains, pineapples, mangoes, maize, cucumbers, rice, varieties of beans and peas. Bananas also grow well in certain localities. All varieties of citrus fruits flourish, and in particular grape-fruit, of which very high grade is exported. Lobster tails and shrimps are also exported.

In 1974 there were 18x Government and grantaided primary schools and unaided private elementary schools in the country, the total enrolment being 35,000 . There are also 21 secondary schools with a total enrolment of 6,000 .

There are 50 post offices in the country. A new transmitting and receiving station at Ladyville has been completed. External telegraph and radio telephone and telex services are operated by Cable and Wireless Ltd. Air services are scheduled 7 times weekly to and from the capitals of Panama, Honduras, Mexico, Salvador, Guatemala, Nicarague, Costa Rica and once weekly to and from Jamaica. There is a six times weekly service from and to New Orleans, I seven times weekly service from and to Miami and a weekly service to Mexico City. A local scheduled air service links the six districts into which the country is divided.

CAPITAL, Belmopan (estimated population, Dec. 32, 1975, 4,000). The largest city and the former capital is $\Psi$ 'Belize City (population, estimated, 1975 43,000 ), which was badly damaged by a hurricane in October, r961. It was announced in 1965 that a new capital would be built, 50 miles inland. Construction is proceeding on the new city, Belmopan, with U.K. aid of $\$ 24,000,000$. The first phase was completed in 1970. Other towns are $\Psi$ Corozal
 Orange Walk $(13,266)$, Toledo $(9,804)$.

GOVERNMENT
Under the Constitution introduced on Jan. $x$, 1964, the Governor retains special responsibility for defence, external affairs, internal security and the safeguarding of the terms and conditions of service of public officers. For so long as the Government continues to receive grant-in-aid from the U.K. Government, the Governor also has special responsibility for maintaining or securing financial and economic stability and for ensuring that any condition attached to any financial grant or loan made by the U.K. Government is fulfilled. The Governor appoints as Premier the person who appears to him to be likely to command the support
of a majority in the House of Representatives. Ministers are appointed by the Governor on the advice of the Premier.
The National Assembly comprises I House of Representatives and a Senate. The House of Representatives consists of 18 members elected by universal adult suffrage. The Speaker may be elected by the House from among its own members, or from outside; the Deputy Speaker is elected by the House from among its own members. The Senate consists of 8 members appointed by the Governor ( 5 on the advice of the Premier, $z$ on the advice of the leader of the Opposition and I after consulting such persons as he considers appropriate).

Belize is distant from London about 4,700 miles; transit, 17 days by sea, 14 hours by air via Miami.

## BERMUDA

The Bermudas, or Somers Islands, are a cluster of about zoo small islands (about zo only of which are inhabited) situated in the west of the Atlantic Ocean, in $32^{\circ} \pm 8^{\prime} \mathrm{N}$. lat. and $64^{\circ} 46 \mathrm{r} \mathrm{W}$. long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The total area is now approximately 20.59 sq. miles which includes 2.3 sq. miles leased to, or reclaimed by, the U.S. authorities between 194 I and 1957 under the terms of the 99 year lease. The civil population was 53,000 at the Census taken in October, 1970. The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1515, but no settlement was made until 1609 , when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding, but since 1943 almost entirely destroyed by blight. At one time the islands enjoyed a flourishing export in onions, potatoes, and green vegetables, but the imposition of tariffs in U.S.A. and the growing shortage of arable land made further growing for export unprofitable. The lily bud trade with Canada and U.S.A. and locally manufactured concentrates and pharmaceuticals are now the Colony's leading exports. Little food is produced except vegetables and fish, other foodstuffis being imported.

The Colony's economic structure is based on tourism, which continues to be the major industry and source of revenue. In I976 a total of 558,874 visitors arrived in Bermuda. The airport is used by B.O.A.C., Pan-American Airways, Air-Canada, Eastern, North-East and Qantas air lines and most cruise ships dock at Hamilton.

Free elementary education was introduced in May, 1949. Free secondary education was introduced in 9965 for those children in the aided and maintained schools who were below the upper limit of the statutory school age ( r 6 from 1969 onwards).

There are 4 radio and 2 television stations, one daily and 3 weekly newspapers and overseas telephone and telegraph services are maintained.

## Government

Internal self-government was introduced on June 8, 1968. There are a Legislative Council of ix Members and an elected House of Assembly of 40 Members. The Governor retains responsibility for external affairs, defence, internal security and the police.

Voters must be British subjects of twenty-one years of age or older at the time of registration, and if they do not possess Bermudian status, they must have been ordinarily resident in Bermuda for the whole of the period of three years immediately before registration. Registration is held every year during the month of February. Candidates for election must qualify as electors and must possess Bermudian status.

## THE BRITISH VIRGIN ISLANDS

The Virgin Islands are group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 42 , of which II are uninhabited, and have a total area of about 59 square miles. The principal are Tortola, the largest (situate in $x 8^{\circ} 27^{\prime} \mathrm{N}$. Jat. and $64^{\circ} 40^{\prime}$ W. long., area, in sq. miles), Virgin Gorda ( $8+$ sq. miles), Anegada ( 5 sq. miles) and Jost Van

Dyke ( $3 \frac{1}{2}$ sq. miles). The 1970 Census of Population showed total population of 10,030 (Tortola (8,676); Virgin Gorda (904); Anegada (269); Jost Van Dyke ( 123 ): and other islands 68). Apart from Anegada, which is 5 flat coral island, the British Virgin Islands are hilly, being an extension of the Puerto Rico and the U.S. Virgin islands archipelago. The highest point is Sage Mountain on Tortola which rises to a height of 1,780 feet. The islands are very picturesque and form one of the finest sailing areas in the world on account of their sheltered waters. The sea is rich in gamefish and there are said to be over 400 wrecks off Anegada. Tourism is the main industry, but there is some cattle raising and fishing. Other products are vegetables, fruit, charcoal and $\quad$ small amount of rum.

The islands lie within the Trade Winds belt and possess $\quad$ pleasant and healthy sub-tropical climate. The average temperature varies from $7 x^{\circ}$ to $8 z^{\circ} \mathrm{F}$. in winter and $78^{\circ}-88^{\circ} \mathrm{F}$. in summer. The summer heat is tempered by sea breezes and the temperature usually falls by about $10^{\circ}$ at night. Average rainfall is 53 inches. Hurricanes are very rare-the last occurrence being in 1928.

The principal airport is on Beef Island, linked liy bridge to Tortola, and extended runway of 3,600 feet, opened in 1969, enables larger aircraft to call. There is a second airfield on Virgin Gorda and $w$ third on Anegada. There are direct shipping services to the United Kingdom and the United States and fast passenger services connect the main islands by ferry.

The British Virgin Islands are partially internally self-governing, with ministerial system. The Governor, appointed by the Crown, remains responsible for defence and internal security, external affairs, the civil service, administration of the courts and finance, and acts in accordance with the advice of the Executive Council. The Executive Council consists of the Governor as Chairman, one ex officio member (the Attorney-General), the Chief Minister and two other ministers. The Legislative Council consists of $\quad$ Speaker chosen from outside the Council, one ex officio member (the Attorney-General), one nominated member appointed by the Governor after consultation with the Chief Minister and nine elected members returned from nine one-member electoral districts. The islands are proud of their tradition of stable government.

## BRUNEI

Sultan, H. H. Hassanal Bolkiah Mu'izzadin Waddaulah, G.C.M.G., acceded 1967, crowned Aug. I, 1968.

Brunei is situated on the north-west coast of the island of Borneo, total area about 2,226 sq, miles, population (estimated 1975 ), 162,200, of whom $7 x^{\circ} 7$ per cent. are of Malay or other indigenous race and 23.4 per cent. Chinese. The chief town, Bandar Seri Begawan, with its nearby water village (groups of houses on stilts on the Brunei River) has population of about 42,000 . The country has a humid tropical climate.

In 1959, the Sultan of Brunel promulgated the first written Constitution, which provides for a Privy Council, a Council of Ministers and a Legislative Council. Under the 2959 Agreement, as amended in 1971, Britain is responsible for external affairs, and has an obligation to consult the Brunei Government on the defence of the State. The post of British Resident was abolished in 1969 and many of his functions were transferred to the Sultan in Council. A Mentri Besar (Chief Minister) is appointed by the Sultan, and is responsible to him for the exercise of executive authority. The Sultan presides over the Privy Council and the Council of Ministers.

Imports from the U.K. in 1975 totalled © $9,642,000\left(1974, £_{5,113,000)}\right.$.

## FALKLAND ISLANDS

The Falkland Islands, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between $52^{\circ} 15^{\prime}-53^{\circ} \mathrm{S}$. lat. and $57^{\circ} 40^{\circ}-62^{\circ}$ W. long. They consist of East Falkland (area $2,6 \mathrm{x} 0$ sq. miles), West Falkland ( 2,090 sq. miles) and upwards of roo small islands in the aggregate, the estimated population at the Census of Dec. 31, 1975 being $\mathbf{x}$,905. Mount Usborne, the loftiest peak, rises 2,322 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764 ; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to a part at least of the group in $177 x$. The settlement was destroyed by the Americans in 283 x . In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly
organized colony of the British Empire. The climate is cool. At Stanley the mean monthly temperature varies between $49^{\circ} \mathrm{F}$. in January and $35^{\circ} 5^{\circ} \mathrm{F}$. in July. The air temperature has never been known to exceed $77^{\circ} \mathrm{F}$. or to fall below $12^{\circ} \mathrm{F}$.; it is notably windy. The islands are chiefly moorland. The population is almost totally British, and is principally engaged in sheep-farming to which practically all the land in the colony is devoted, 644,819 sheep being carried in 1975/6. Wool, hides and sheepskins are exported. The only town is $\Psi$ Stanley on the coast of East Falkland.

## Government

The Governor is assisted by $\quad$ Legislative Council of 8 members, with the Governor as President, 2 ex officio (Chief Secretary and Financial Secretary), - non-official members (nominated by the Governor), and 4 representatives elected by the people. Governor and Commandey-in-Chief, His

Excellency James Rowland Walter Harper,
O.B.E. (1976). (1977) ( + duty allce. £ 936 ) £4,500 Chief Secretary, A. J. P. Monk, O.B.E. $\quad \AA 4,170$ Financial Secretary, H. T. Rowlands (+allce. ©540)

Falkland Islands and Dependencies Trade with U.K.

Imports from U.K.... $£_{1,33_{5}, 146 ~ £ 1,063,116}$ Exports to U.K...... $1,172,73^{2}$

Chuep Town, $\Psi$ Stanley, estimated population x,079. Stanley is distant from England about 8,103 miles. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Islands can be accomplished in 4 to 5 days travelling to Comodoro Rivadavia, via Buenos Aires, thence by air to Stanley.

Dependencies.-South Georgia, $[1 I$ island 800 miles east-south-east of the Falkland group, with an area of $i, 450$ sq. miles. Some 22 persons reside at the British scientific base which has been established at King Edward Point. The South Sand wich Islands group, which is uninhabited and lies some 470 miles S.E. of South Georgia, is the only other dependency.

## GIBRALTAR,

a rocky promontory, $3^{\frac{3}{4}}$ miles in length, $\frac{3}{4}$ of - mile in breadth and 3,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by low isthmus. It is about 14 miles distant from the opposite coast of Africa. In a total area of $2 \frac{1}{4} \mathrm{sq}$. miles, the population at the census of Oct. I $977^{\circ}$ was 26,833 . The estimated civilian population at the end of 1976 was $30,117$.

Gibraltar is anaval base of strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in $1779-83$, when General Eliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar enjoys the advantages of :
extensive shipping trade and is $\quad$ popular shopping centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on consumer items. The free port tradition of Gibraltar is still reflected in the low rates of import duty. The gradual change from a fortress city to an attractive holiday centre has led to $\quad$ flourishing tourist trade.

A total of 2,553 merchant ships ( $x 9,1 \times 3544$ net tons) entered the port during 1976 . Of these $x, 892$ were deep-sea ships ( $18,895,942$ net tons). In addition 2,758 yachts ( 35,965 net tons) called at the port. There are $26 \cdot 75$ miles of roads.

Education is compulsory and free between the ages of 5 and 15 and scholarships are available for university or further education in Britain. There are $\equiv$ Government, $\quad 1$ private and a Services primary schools, with 3,868 pupils in Dec. 1976. The two government secondary schools had $\mathrm{x}, 587$ pupils in 1976. Government expenditure on education in 1976 was $£ x, 010,384$.

British Airways operate regular direct air services to the U.K. (Some services are via Madrid.) Transit times average 3 hours.

## GILBERT ISLANDS

Until October x , 1975, the Gilbert Islands formed part of the Gilbert and Ellice Islands Colony.

On the recommendation of a Commissioner appointed by Her Majesty's Government to consider requests by the Ellice leaders to have their island group separated from the Gilberts, a referendum of Ellice Islanders was held in the autumn of 1974. This showed an overwhelming support for separation and this was effected on October $\equiv$ r975. The Ellice Islands became a separate Colony known as Tuvalu and the remainder of the original Gilbert and Ellice Islands changed its name to the Gilbert Islands. Separation of the Administration took place on January $\mathbf{~}$, x976.
The Gilbert Islands which includes Ocean Island,
the Phoenix Islands and the Line Islands is situated in the South West Pacific around the point at which the International Date Line cuts the Equator. The Colony consists of 33 coral atolls (of which $2 x$ are permanently inhabited) with $n$ total land area of 264 square miles spread over some a million square miles of ocean. Few of the atolls are more than 12 feet above sea level or more than half a mile in width. The vegetation consists mainly of coconut palms, breadfruit trees and pandanus. The total population based on a census in 1973 is approximately 48,000 . The Phoenix and Line Islands now have no indigenous populations. Christianity is widespread, roughly half of the population being Protestant and the other half Roman Catholic. Most people still practice a subsistence economy, the main staples of their diet being coconuts and fish.

The Colony has been internally self-governing since Jan. I, 1977. There is an elected House of Assembly which elects the Chief Minister, who presides over a Council of Ministers of seven other Ministries and an ex officio Attorney-General.

Local Government services are provided by elected Island Councils. Under an agreement reached in I939, Canton and Enderbury islands in the Phoenix Group are jointly administered by the United Kingdom and the United States.

The unit of currency is the Australian dollar. Estimated revenue for 1977 was $\$ A_{11,771,430}$. Some \$Az,000,000 of this was set aside for the development and reserve funds. The rest was required for recurrent expenditure. The principal imports are foodstuffs, consumer goods and building materials. The only exports are phosphates from Ocean Island, and copra, most of which is produced by small landowners. There are three copra plantations in the Line Islands.

Communication between the islands is mainly by small ships operated by the Development Authority, a non-government organisation. There is a plane service twice $\quad$ week to Nauru. Nine islands are served by minternal air service.

The Government maintains a teacher training college and secondary school. Four junior secondary schools are maintained by missions. Throughout the Colony there are about a hundred primary schools. The total enrolment of children of school age is about 14,000 . The Marine Training School at Tarawa trains seamen for service with overseas shipping lines. There is a general hospital at Tarawa and the British Phosphate Commissioners maintain a general hospital on Ocean Island. The other inhabited islands have dispensaries, the larger ones being in the charge of qualified medical officers.
CAPITAL.-Tarawa. Estimated population, 17,000.
Governor, His Excellency John Hilary Smith, C.b.e.
(1973).

## HONG KONG

The Crown Colony of Hong Kong, consisting of - number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between $22^{\circ} 9^{\prime}$ and $22^{\circ} 37^{\prime} \mathrm{N}$. lat. and $113^{\circ} 52^{\prime}-154^{\circ} 30^{\prime} \mathrm{E}$. long.

The capital city, Victoria, situated on the island of Hong Kong, is about 8r miles S.E. of Canton and 40 miles $E$. of the Portuguese province of Macau at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland; the harbour ( 23 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with I population equalling that of Victoria. The total area of the territory is
403.8 sq. miles (including recent reclamation) with - population which has varied considerably during recent years owing to unsettled conditions in China: at the end of 1976 it was $4,447,600$.

The island of Hong Kong is about in miles long and from 3 to 5 miles broad, with $I$ total area of 29 square miles; at the eastern entrance to the harbour it is separated from the mainland by $\quad$ narrow strait (Lei Yue Min), 500-900 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842 ; Kowloon was subsequently acquired by the Peking Convention of $\mathbf{8 6 6 0}$; and the New Territories, consisting of I peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99 -year lease signed June $9,1898$. Hong Kong Island is now linked to the Kowloon peninsula by $\quad$ mile-long underwater road tunnel opened in 1972.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is $\mathrm{x}, 805$ feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3, 140 ft .

Climate.-Although Hong Kong lies within the tropics it enjoys unusually varied weather for a tropical area. The illaill monthly temperature ranges from $15^{\circ} \mathrm{C}$. in February to $28^{\circ} \mathrm{C}$. in July. Spring is cloudy and humid, often with spells of fog and drizzle. Summer days are hot with temperatures exceeding $33^{\circ} \mathrm{C}$. several times in most years. The average annual rainfall is $2,168.8 \mathrm{~mm}$., of which nearly 80 per cent. falls between May and September. Tropical cyclones passing at various distances from Hong Kong sometimes cause high winds and heavy rain, particularly in July, August and September. Autumn and early winter are the most pleasant seasons, with sunny, dry and mild weather. In late winter there is more cloud and strong northerly winds can cause temperatures to drop below $x 0^{\circ} \mathrm{C}$.

Communications.-Hong Kong, one of the world's finest natural harbours, possesses excellent wharves at which vessels $u p$ to 800 ft . in length and 36 ft . draught can be berthed. An ocean terminal pier with overall length of $1,250 \mathrm{ft}$. can accommodate large liners and cargo vessels. A recent addition is the Kwai Chung container terminal which opened in 1972. It has six berths, each $1,000 \mathrm{ft}$. in length, capable of berthing container ships drawing 40 ft . draught. Excellent dockyard facilities are available and include two floating drydocks, one of which can accommodate vessels up to 100,000 deadweight tons. The net tonnage of ocean-going shipping which entered the port in the year to December 3x, 1976, amounted to 23,340,94 I.
Hong Kong International Airport, Kai Tak, situated on the North shore of Kowloon Bay, is an important link on the main air routes of the Far East. It is regularly used by 30 scheduled airlines and many charter airlines, providing frequent services throughoat the Far East, to Europe, North America, Africa, Australia and New Zealand.

British Airways operate 19 passenger services per week to Britain, Australia, Africa and Japan. Cathay Pacific Airways, the Hong Kong based airline, operate 62 passenger and cargo services from Hong Kong weekly to points in the Far East, Australia and the Middle East. A total of 900 services is operated weekly to and from Hong Kong by scheduled airlines.

During the year ending Dec. 31, $2976,50,194$ aircraft on international flights arrived and departed, carrying $4,162,000$ passengers, 163,235 tonnes of freight and 4,998 tonnes of mail.

Education.-In Sept. 1976 there were 2,814 schools with $x, 323,098$ pupils. About $60 \cdot 9$ per cent. of the pupils are financed wholly or in part by the Government. The University of Hong Kong has a fulltime student strength of 3.760 in Faculties of Arts, Science, Medicine, Engineering and Architecture, and Social Sciences and Law. There is also $\#$ Centre of Asian Studies and $n$ Department of Extra-Mural Studies. The Chinese University of Hong Kong, inaugurated in Oct. 1963, has $\quad$ full time enrolment of 3.906 students in Faculties of Arts, Science, Social Science and Business Administration. There is also - Department of Extra-Mural Studies. The Hong Kong Polytechnic has min enrolment of $\mathbf{2 3 , 5 5 9}$ fulltime and part-time students.

## Trade

Hong Kong is now established - ini industrial territory with an economy based on exports rather than the domestic market. Domestic industry, producing mainly light manufactures, has grown rapidly in recent years and now provides the bulk of goods for the export trade; but the secondary role as an entrepôt, has also been sustained. In 1976 the value of the re-export trade was $2 x$ per cent. of total exports.

Hong Kong produces $\quad$ wide range of articles, including cotton yarn, cotton piece-goods, garments of all types, woollen and man-made fibre knitwear, electronic products, watches and clocks, footwear, wigs, transistor radios, household enamel and aluminium ware, plastic articles (including household ware, toys and artificial flowers), iron and steel bars, photographic equipment, foodstuffs and beverages, cigarettes, jade, ivory, jewellery and goldsmiths' and silversmiths' ware, and extensive range of metal products.
Diversification of manufacture continues to be major feature of recent industrial development, as are industrial partnerships with foreign companies in a wide and varied field of manufactures. New products include quartz watches, shipping containers, air conditioners, automatic telephone dialling equipment, electric household appliances such as rice cookers and toasters, T.V. receiving sets and T.V. tuners and antennae, high grade semiconductors, electronic modules, electronic flash bulbs, electronic desk calculators and other electronic components, steel pipes, rigid P.V.C. tubes and corrugated sheeting, P.V.C. covered fabrics, mixed cotton-synthetic fabrics, extruded aluminium sections, watches and clocks and fibreglass pleasure craft. Modern manufacturing processes have also been introduced to local industry; these include the permanent press for ready-made garments, soil release processing for garments and the manufacture of polyester fabrics. The marked improvement in both quality and output of items for which precision engineering is required, has continued.
The adverse balance on visible trade is offset by a favourable balance on invisible account-remittances from overseas Chinese, investments, exchange, shipping and insurance profits, and the spending of tourists, etc. In $197^{6}$ Hong Kong's priacipal customers for its domestic products, in order of value of trade, were U.S.A., the Federal Republic of Germany, the United Kingdom, Japan, Canada, Australia, Singapore, the Netherlands, Sweden and Switzerland. Japan was its principal supplier, followed by China, U.S.A.,

South Korea, Taiwan, Singapore, the United Kingdom, the Federal Republic of Germany, Switzerland and Australia.

## THE NEW HEBRIDES

The New Hebrides Group, in the South Pacific Ocean, situated between the r3th and aist degrees of South latitude and the 166 th and 170 th degrees of East longitude. It includes $r_{3}$ large and some 70 small islands, including the Banks and Torres Flidy in the North, and has a total liunt area of
about 6,050 square miles. The principal islands are Vanua Lava and Gaua (Banks), Espiritu Santo, Maewo, Pentecost, Aoba, Maleku, Ambrym, Epi, Efate, Erromango, Tanna and Aneityum.

The Territory is administered by unique British-French Condominium Government. The British Resident Commissioner, exercising powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have staffs of national officers to assist them in general administrative work and the running of social services (health and education) financed from national funds. In addition they control the - joint "public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The Resident Commissioners are advised regarding policy and legislation by the Advisory Council, a composite body of New Hebrideans, French and British Nationals, some appointed and some elected, which meets twice a year.

The 1967 Census showed a population of 77,988 of whom $\mathbf{7 z}_{2,243}$ were New Hebrideans. There were 3,841 French Nationals and 1,6z9 British Nationals but only $x, 773$ of these were of European ethnic origin. Estimated population (Dec. 3x, 1972), 89,031.

Principal products are frozen fish, copra, timber, frozen and canned meat, coffee, cocoa and manganese. Two currencies are in use; the New Hebrides Franc and the Australian dollar. They may be converted at the official rate of exchanges laid down by the Resident Commissioners.

Seat of New Hebrides Administration- $\Psi$ Vila, Efate, population of Greater Vila, estimated, $197^{2}$ 12,715.
British Resident Commissioner, J. S. Champion, C.M.G. French Resident Commissioner, R. Langlois.

## PITCAIRN ISLANDS

Pitcairn, a small volcanic island of less than two square miles in area, is the chief of a group of Islands situated about midway between New Zealand and Panama in the South Pacific Ocean at longitude $\times 30^{\circ} 06^{\prime} \mathrm{W}$. and latitude $25^{\circ} 04^{\prime} \mathrm{S}$.

The island rises in cliffs to a height of $x$, roo feet and access from the sea is possible only at Bounty Bay, 1 small rocky cove, and then only by whaleboats. Mean monthly temperatures vary between $66^{\circ} \mathrm{F}$. in August and $75^{\circ} \mathrm{F}$. in February and the average annual rainfall is 80 inches. Moderate easterly and north-easterly winds predominate but short easterly and south-easterly gales occasionally occur from April to September. With an equable climate, the island is very fertile and produces both tropical and sub-tropical trees and crops.

The small community, descendants of the Bounty mutineers and their Tahitian companions who did not wish to remain an Norfolk Island (see p. 7 15) and returned here, numbers about 70 ( 1977 ). The Islanders live by subsistence farming and fishing, and their limited monetary needs are satisfied by the manufacture of wood carvings and other handicrafts which are sold to passing ships and to few overseas customers. Other than small fees charged for gun and driving licences there are no taxes and Government revenue is derived almost solely from the sale of postage stamps. Communication with the outside world is maintained by cargo vessels travelling between New Zealand and Panama which call at irregular intervals in each direction; and by, means of a telegraphic link with Fiji.

The other three islands of the group (Henderson lying 105 miles E.N.E. of Pitcairn, Oeno lying 75 miles N.W. and Ducie lying 293 milies E.) are all uninhabited. Henderson Island is occasionally visited by the Pitcairn Islanders to obtain supplies of "miro" wood which is used for their carvings. Oeno is visited for excursions of about - week's duration every two years or so.

Under a scheme of co-operation, New Zealand supplies Pitcairn with I teacher for the one-teacher primary school on the Island. Education is compulsory between the ages of five and fifteen. Secondary education in Fiji and New Zealand is encouraged by the Administration which provides scholarships and bursaries for the purpose. Medical care is provided by a registered nurse and additional help is obtained when required from the surgeons of passing ships. Since $\mathbf{1 8 8 7}$ the islanders have all been adherents of the Seventh Day Adventist Church.
Pitcairn became a British Settlement under the British Settlement Act, 7887, and was administered by the Governor of Fiji from $195 z$ until 1970, when the administration was transferred to the British High Commission in New Zealand and the British High Commissioner was appointed Governor. The local Government Ordinance of 1964 provides for a Council of ten members of whom four are elected.
Governor of Pitcairn, Ducie, Henderson and Oeno Islands, H. Smedley, C.M.G. (British High Commissioner to New Zealand).

Commissioner, R. J. Hicks (British Consulate-General, Auckland, New Zealand).
Island Magistrate and Chairman of Island Council, I. Christian.

Education Officer and Government Adviser, T. Whiu.

## RHODESIA

Rhodesia, comprising Matabeleland, Mashonaland, Manicaland, Midlands and Victoria, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Zambia and Portuguese East Africa on the N.: the Transvaal and Botswana on the S. and W.; and Portuguese East Africa on the E. Rhodesia has a total area of 150,820 square miles and a population (estimated, 1975) of 6,310,000 (Europeans, 274,000; Africans, $5,900,000$; Asians and Coloured, 29,800).

The majority of Africans of Rhodesia (members of the so-called Bantu race) are known as Mashona. In the Western portion of the territory are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Rhodesia was administered by the British South Africa Company from the date of occupation ( $\mathbf{I} 890$ ) to 1923 , when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of R hodesia except in those estates which it was already developing on July io, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Under the Land Tenure Act, operative from March 2, 1970, Rhodesia is divided into three areasEuropean Area ( $44,950,000$ acres), African Area ( $44,950,000$ acres) and National Area ( $6,600,000$ acres).

EDUCATION
African education comes under the Minister of Education in the Rhodesian Government. In 1974 there were 3,217 primary schools, 108 secondary schools, zo teacher training schools, 6 special schools for the physically handicapped, 9 home-craft schools and 60 part-time classes. The total enrolment in African schools, exclusive of evening and part-time schools and study groups, was 835,760 . The total enrolment of non-African pupils was 60, 107.

Government
Rhodesia (then Southern Rhodesia) obtained selfgovernment in 1923 and has legislative Assembly of 66 members and $\quad$ Cabinet of 14 members.
Municipal self-government has been established in the cities of Salisbury, Bulawayo, Umtali and Gwelo and the towns of Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged.

Ministry
On March 2, 1970, the Government of Mr. Ian Smith declared Rhodesia a republic and adopted a new constitution. The British Government has declared the assumption of republican status to be illegal.
Prime Minister, Hon. I. D. Smith.
Minister for Defence and Combined Operations, Hon. R. Hawkins.

Agriculture, Hon. M. Partridge.
Foreign Affairs, Hon. P. K. van der Byl.
Internal Affairs, Hon. R. Hayman.
CAPITAL.-SALISBURY, situated on the Mashonaland plateau, altitude $4,850 \mathrm{ft}$., population (Dec. 1973), 503,000 (European, 122,100; Asian and Coloured, 10,840; African, 370,000). BULAWAYO, the largest town in Matabeleland, altitude $4,450 \mathrm{ft}$., population (Dec. 1973), 308,000 (European, $5^{8,200}$; Asian and Coloured, 9,730 ; African, 240,000). Other centres are Umtali, Gwelo, Gatooma, Que Que, Fort Victoria and Wankie.
Salisbury is 5,600 miles from London (air route) transit iz hours; by sea, via Cape Town, 17 days (approx.).
Flag.-Vertical stripes of green, white, green; Rhodesian coat of arms in centre of white stripe.

## ST. HELENA

Probably the best known of all the solitary islands in the world, St. Helena is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, $x, 800$ from the coast of S. America, $\mathbf{x , 6 9 4}$ from Cape Town and 4,477 from Southampton (transit $3^{\frac{1}{2}}$ days and 9 days respectively), in $15^{\circ} 55^{\prime} \mathrm{S}$. lat. and $5^{\circ} 42^{\prime} \mathrm{W}$. long. It is roㄹㄹㄹ miles long, $6 \frac{1}{2}$ broad, and encloses an area, of 47 square miles, with a population in 1975 of 5.058 .

St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in ryoz (probably on St. Helena's Day) and remained unknown to other European nations until 1588 . It was used as $\begin{aligned} & \text { port }\end{aligned}$ of call for vessels of all nations trading to the East
until it was annexed by the Dutch in $\mathbf{1 6 3 3}$. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 882 r the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, $\mathbf{8 2 2 1}$. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. Since the collapse of the New Zealand flax (phormuim tenax) industry in 1965, there have been no significant exports, but five year development plan, launched in 1974, secks primarily to increase the island's productivity in its limited land and sea resources. $\Psi$ St. James's Bay, on the north-west of the Island, possesses $\begin{aligned} & \text { good } \\ & \text { god }\end{aligned}$ anchorage.

## Government

The government of St. Helena is administered by © Governor, with the aid of a Legislative Council, consisting of the Governor, two ex-officio members (Government Secretary and Treasurer) and twelve elected members. Five committees of the Legislative Council are responsible for general oversight of the activities of Government Departments and have in addition = wide range of statutory and administrative functions. The Governor is also assisted by an Executive Council of the two ex-officio members and the Chairmen of the Council committees.

## ASCENSION

The small island of Ascension lies in the South Atlantic ( $7^{\circ} 56^{\prime} \mathrm{S}$., $14^{\circ} 22^{\prime} \mathrm{W}$.) some 700 miles north-west of the island of St. Helena. It is said to have been discovered by João de Nova, on Ascension Day, x50I, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. It was uninhabited until the arrival of Napoleon in St. Helena in 1815 when a small British naval garrison was stationed on the island. The population at December 3x, 1975, was x, 13 I of whom 698 were St. Helenian. The island remained under the supervision of the Board of Admiralty until 1922, when it was made a dependency of St. Helena by Royal Letters Patent and came under control of the Secretary of State for the Colonies.

Ascension is rocky peak of purely volcanic origin, the highest point (Green Mountain) some $2,817 \mathrm{ft}$. is covered with lush vegetation, which with each rainy season is slowly creeping down to the lower areas. Cable \& Wireless Ltd., main-
tains a farm of some 10 acres on the mountain, permitting the production of vegetables and livestock. The island is famous for Turtles, which land on the beaches from January to May to lay their eggs. It is also breeding area for the sooty tern, or wideawake, large numbers of which settle on the southwestern coastal section every eighth month to hatch their eggs. Other wild life on the island includes feral donkeys and cats, rabbits and francolin partridge. All wild life except rabbits and cats is protected by law. The ocean surrounding the island abounds with shark, barracuda, tuna, bonito and many other fish.

Cable \& Wireless Ltd. owns and operates a cable station which connects the Dependency with St. Helena, Sierra Leone, St. Vincent, Rio de Janeiro and Buenos Aires. A B.B.C. relay station was opened on the island in 1966.
Admintistrator, C. B. Kendall (acting).
TRISTAN DA CUNHA
Tristan da Cunha is the chief of group of islands of volcanic origin lying in lat. $37^{\circ} 6^{\prime} \mathrm{S}$. and long. $12^{\circ} z^{\prime}$ W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles. The main island, with a peak rising to $6,760 \mathrm{ft}$., is about $x, 500$ miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18 th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816 , the group was annexed to the British Crown and Cunha, but this force was withdrawn in 1817, William Glass, a corporal of artillery (died 1853), remaining at his own request, with his wife and two children. This party, with five others, formed a settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined the party.

The isfands form dependency of St. Helena, being administered by the Foreign and Commonwealth Office through a resident Administrator, with headquarters at the settlement of Edinburgh. Under a new constitution introduced in 1969, he is advised by an elected Island Council of 8 members of whom one must be a woman, and three appointed members, with universal suffrage at 18 . The population numbered 292 persons in 1974, plus 7 expatriate Government officers and their families.

In October, 196x, $\quad$ volcano, believed to have been extinct for thousands of years, erupted and lava was thrown up in some cases to a height of 75 feet. In view of the danger of further volcanic activity, the inhabitants were evacuated and reached the United Kingdom on Nov. 23, 196x, where they remained for nearly two years. An advance party returned to Tristan da Cunha in the spring of 1963 and the main body of the islanders has now returned to the island. Some went back to England in 1966, but most returned in August, 1967.

A boat harbour was completed in 1967 . The first freezing factory was re-established in 1966. There are no taxes on Tristan, income being derived from royalties paid by the fishing company and from the sale of stamps. The new Camogli Hospital was opened early in 297 x and a new school was opened in 1975.
Administrator, S. G. Trees, M.V.O., O.B.E.
Inaccessible Island is a lofty mass of rock with sides $a$ miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937, but has been abandoned.

The Nightingale Islands are three in number, of which the largest is a mile long and $\frac{3}{4}$ mile wide, and rises in two peaks, 960 and $3,105 \mathrm{ft}$. above sea-level respectively. The smaller islands, Stoltenhoft and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

Gough Island (or Diego Alvarez), in $40^{\circ} 20^{\prime} \mathrm{S}$. and $9^{\circ} 44^{\prime}$ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been $■$ British possession since 1816 . The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

## SOLOMON ISLANDS

Governor, His Excellency Sir Colin Hamilton Allan, K.C.M.G., O.B.E. (1976).

The Protectorate (officially called the Solomon Islands since June 1975), established in 1893 , includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Isabel, the Shortlands Group, Vella Lavella, Kolombangara, Ranongga, Gizo, the New Georgia Group, the Florida Group, Guadalcanal, the Russell Islands, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikolo, Tikopia. Swallow (or Reef Isiands) and Duff Groups, the Stewart Islands and the Ontong Java Atoll.
The Solomons, are situated between $5-13^{\circ} \mathrm{S}$. lat. and $x 55-170^{\circ} 20^{\prime}$ E. long. They have a total land area of about Ix,500 sq. miles. Distribution of population at the Census of 1970 was: Melanesian 149,667; Polynesian 6,399; Micronesian 2,362; European 1,280; Chinese 577; Others 733. Total 160,998.

Caprtal, Honiara (population 14,993).
Finance and Trade
Estimated revenue ( $\mathbf{1 9 7 6}$ ), $\$$ Ax $8,420,000$ (incl. British Development Aid $\$ A_{5,750,000}$ and grant in aid of recurrent expenditure from the United Kingdom \$Ax,600,000).

The main imports are foodstuffs, consumer goods, machinery and building materials. Principal exports are copra, timber, fish. Other exports include cocoa, marine shells, tobacco and scrap metal.

## GOVERNMENT

The British Solomon Islands Order 1974 came into effect in August 1974, thereby revoking the 1970 Order. The new constitution was drafted in accordance with the recommendations of a special select committee on constitutional development appointed by the former governing council, and established a new office of Governor of the Protectorate (replacing the High Commissioner so far as the Solomon Islands was concerned) and redesignating the Governing Council as the Legislative Assembly, with no increase in membership.
The first Chief Minister was elected from the Legislative Assembly and he in turn chose his Council of Ministers, the equivalent of the Cabinet, The British Solomon Islands (Amendment) Order r975 increased the number of Ministers from six to eight, and replaced the Financial Secretary by an elected Minister of Finance. The Council of Ministers also includes two ex officio members (the Deputy Governor and the Attorney General).

Under the Solomon Islands (Amendment) Order 1975, the territory received a major measure of
internal Self Government on January 2,1976 . The Chief Minister became the President of the Council of Ministers in place of the Governor, who is bound under the amended constitution to act in accordance with the advice of the Council. Responsibility for defence, external affairs, internal security and the public service remains however with the Governor.

A general election was held in June 1976 and returned $3^{8}$ members of the Legislative Assembly, the Legislative having been increased from 24 seats under the Solomon Islands (Amendment) Order 1976. The new Government will negotiate the Independence constitution at a constitutional conference to be held with the British Government before Independence, scheduled for 1977.

JUDICIARY
The High Court of the Solomon Islands constituted by the Solomon Islands Court Order, consists of a Chief Justice and such number of Puisne Judges as may be prescribed by the Governor.

The Court is a Superior Court of Record and possesses all the jurisdiction which is vested in Her Majesty's High Court of Justice in England.

## EdUCATION

In consequence of the withdrawal of some of the Churches from primary education, new primary and secondary structure, with a national teaching service, is now being set up. Government participation in technical and teacher training and further education overseas continues.

## COMMUNICATIONS

An internal air service, Solair, serves ig airstrips, but the bulk of the inter-island traffic is by small ships. There are two air connections weekly each to Brisbane, Papua New Guinea, Fiji and Nauru. There are 283 miles of main roads in the country of which 14 miles are in Honiara. Guadalcanal has some 73 miles of main road along the north coast, with a further roo miles of feeder roads; Malaita has 98 miles of main roads around the north of the Island; a coastal road is being built along the north coast of San Cristobal, of which some 34 miles has been completed. Except for timber roads, other islands only have short minor roads. All the main islands have transceivers (HF) to maintain communications with Honiara District Headquarters, and there is a VHF link between Honiara and Auki. There are telegraph and radio telephone links with the international networks via Fiji and Australia, and there are overseas airmail services on four days a week.

## TUVALU

Tuvalu, formerly the Ellice Islands, formed part of the Gilbert and Ellice Islands Colony until October $\mathbf{x}$, 1975.

On the recommendation of $\quad$ Commissioner appointed by Her Majesty's Government to consider requests by the Ellice leaders to have their island group separated from the Gilberts, a referendum was held in the autumn of 1974. This showed an overwhelming support for separation, which was formally implemented on October I 1975. The Ellice Islands then became a separate Colony known as Tuvalu. The remainder of the former Gilbert and Ellice Island Colony became known as the Gilbert Islands. Separation of the Administration took place on January 1 , 1976.

Tuvalu comprises nine coral atolls situated in the South West Pacific around the point at which the International Date Line cuts the Equator. The total land area is only about to square miles. Few of the atolls are more than 12 feet above sea level or more than half a mile in width. The vegetation
consists mainly of coconut palms. The total population, based on a census in 1973, is approximately 10,000 , of whom about $x, 500$ work in the phosphate industry in Nauru or serve in overseas ships. The entire population is Christian and is predominantly Protestant. Most people still practice a subsistence economy, the main staples of their diet being coconuts and fish.

Tuvalu came into being at the same level of constitutional development as that reached in the former joint Colony. The constitution provides for a Chief Minister and two other Ministers. The Queen's representative, who is responsible direct to the Secretary of State in London, is styled Her Majesty's Commissioner. He is chairman of the Cabinet which consists of the three Ministers and two ex officio members-the Attorney-General and Financial Secretary. The House of Assembly has eight elected members and the two ex officio members. Local Government services are provided by elected Island Councils.

The unit of currency is the Australian dollar. The main imports are foodstuffs, consumer goods and building materials.

The only export is $\quad$ small amount of copra.
The capital, Funafuti, has grass strip airfield from which a twice fortnightly service operates. There is no internal air service.

There are eight primary schools in Tuvalu and a church secondary school run jointly with the Government. The total of enrolled children of school age in 1975 was 1,728 . There are no training institutes of any kind in the territory.

There is a new 3 -bed hospital at Funafuti. All islands (except one which has no permanent population) are served by a dispensary.

CAPITAL-Funafuti. Estimated population r,000.
H.M. Commissioner, His Excellency Thomas H. Layng.

## VIRGIN ISLANDS, see BRITISH

## THE WEST INDIES

The West Indies are a number of islands and islets, some of them mere rocks, situated between $10^{\circ}$ to $27^{\circ}$ North and $59^{\circ} 30^{\prime}$ to $85^{\circ}$ West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezucla (South America), and is divided into three main groups: I. Greater Antilles, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (Haiti and the Dominican Republic) ( 30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which is now independent. III. Lesser ANTILLES, which are variously divided; the British islands in the Lesser Antilles are the Leeward and Windward Islands. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are Independent, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and go Venezuelan.

The West India Islands which lie nearest the East have been called the Windward Islands; the others the Leeward Islands, on account of the winds which in this area generally blow from the east.

## COMmission for the Eastern Caribbean Governments Io Haymarket, S.W. 3 <br> Commissioner, Dr. Claudius C. Thomas.

The British West Indies were governed under series of federal arrangements, the last of which, a federation of the Leeward and Windward Islands with Barbados, was abandoned in 1g66. The islands of Antigua, Dominica, Grenada, St. Kitts-Nevis-Anguilla and St. Lucia became States in
association with Britain in February and March 1967. St. Vincent became an Associated State in October, 1969. Grenada became independent on Feb. 7, 1974. Britain's power and responsibilities are limited to defence and external affairs.

## West Indies Associated States

The Associated States are described individually in the following sections. The Office of the British Government Representative is at George Gordon Building (P.O. Box 227), Castries, St. Lucia.
British Government Representative, E. G. Le Tocq, C.M.G.

Deputy do., C. G. Mortlock.
Development Adviser, Sir Bruce Greatbach, K.C.V.O.,
C.M.G., M.B.E. (Resident at Bridgetown, Barbados).

## Supreme Court

Established by Order in Councll (1967), which gives the Court additional jurisdiction in Montserrat and the British Virgin Islands. There are two constituents, Court of Appeal and a High Court. The Chief Justice is appointed by Her Majesty and puisne judges by the Judicial and Legal Services Commission. Expenses of the Supreme Court, after allowing for contributions from Montserrat and the Virgin Islands, are met by the States in cqual shares.
Chief Justice, Sir Maurice Davis, O.B.E., Q.C.
Justices of Appeal, E. L. St. Bernard; N. Peterkin (acting).
Puisne Judges, N. A. Berridge (St. Vincent); E. A. Bishop (Antigua); W. A. Bruno (Dominica); E. F. Glasgow (St. Kitts-Nevis); C. E. Hewlett (Montserrat and British Virgin Islands); R. A. Nedd (Gyenada); J. D. B. Renwick (St. Lucia).

## ANTIGUA

Antigua lies in $17^{\circ} 6^{\prime} \mathrm{N}$. lat. and $61^{\circ} 45^{\prime} \mathrm{W}$. long., and is nearly ro8 square miles in area with a coastline of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. Population in 5970 totalled 65,000. Antigua is much less hilly and wooded than the other Leeward Jslands. Cotton and rum are exported. Tourism is the most important industry, with a good choice of resort hotels mostly built to take advantage of the many fine white sand beaches. There are frequent air services to Canada, U.S.A. and the United Kingdom.

Flag.-Inverted triangle (centred on red field) divided horizontally into three bands of black over blue over white; rising sun device in gold on black band.

Finance and Trade

Trade with U.K.
Imports from U.K. . $\underset{\sim}{\text { I } 6,303,000 ~} \quad \begin{gathered}1975 \\ £ 9,283,000\end{gathered}$
Imports from U.K. . $\underset{\sim}{\text { I } 6,303,000 ~} \quad \begin{gathered}1975 \\ £ 9,283,000\end{gathered}$
Exports to U.K...... 2,532,000 $4,483,000$
Barbuda, formerly $=$ possession of the Codrington family, is situated 30 miles N. of Antigua, in lat. $17^{\circ} 35^{\prime} \mathrm{N}$. , long. $65^{\circ} 42^{\prime} \mathrm{W}$. Area, 62 square miles. Population, $x, 000$. The island is flat and mostly stony, producing cotton, corn and ground-nuts. Wild deer are found, and there is good tarpon and other fishing.

Redonda is uninhabited.
CApITAL. $-\Psi$ St. John's. Population 22,000 .

THE CAYMAN ISLANDS
The Cayman Islands, between $79^{\circ} 44^{\prime}$ and $8 \mathrm{I}^{\circ} \mathbf{2 6} 6^{\prime}$ W. and $19^{\circ} 15^{\prime}$ and $19^{\circ} 46^{\prime} \mathrm{N}$., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. Population (Census, 1970), 30,652. The constitution provides for a Governor, Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Governor, three official members and $x z$ elected members. The Executive Council consists of the Governor and three official members appointed by the Governor, and four elected members, chosen by the elected members of the Assembly from among their own number. The normal life of the Assembly is four years.

The principal town is $\psi$ George Town, in Grand Cayman, population ( 9970 census) 3,000 .

Finance

* Estimated.

## MONTSERRAT

Situated in $16^{\circ} 45^{\prime} \mathrm{N}$. lat. and $65^{\circ} 15^{\prime} \mathrm{W}$. long., 27 miles S.W. of Antigua, the island is about II miles long and 7 wide, with an area of 39 square miles; population (1972), 12,905. Discovered by Columbus in 1493, it was settled by Irishmen in 1632, conquered and held by the French for some time, and finally assigned to Great Britain in 1783 . It is justly considered one of the most healthy and beautiful of the Antilles; it contains two active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest capable of cultivation. The chief exports are sea island cotton, tomatoes and other fruits and vegetables. Real estate development and tourism have done much to aid the island's economy. Revenue ( 1976 ) EC $\$ 10,155,000$; Expenditure EC $\$ 8,983,000$.

Cabinet government was introduced in Montserrat in 1960. The Executive Council is composed of 4 elected members (the Chief and 3 other Ministers) and two official members (the AttorneyGeneral and the Financial Secretary). The 4 Ministers are appointed from the members of the political party holding the majority in the Legislative Council. The present composition of the Legislative Council consists of the Speaker, two official members, one nominated unofficial member and 7 elected members.
Governor, His Excellency Gwilym Wyn Jones, C.b.e.

## Executive Council

Chairman, The Governor.
Chief Minister and Minister of Finance, Hon. P. A. Bramble.
Minister of Education, Health and Welfare, Hon. Mrs. M. R. Tuitt.

Agriculture, Trade, Lands and Housing, Hon. W. H. Ryan.
Communications and Works, Hon. E. A. Dyer. Attorney-General, Hon. J. S. Weekes.
Financial Secretary, Hon. J. O. Whittaker, o.b.E.

[^28]ST. KITTS-NEVIS-ANGUILLA
Governor, His Excellency Sir Probyn Ellsworth Inniss, M.B.E. (1975).
The State of St. Kitts-Nevis-Anguilla is located at the northern end of the Eastern Caribbean. It comprises the islands of St. Kitts ( 65 sq. miles, population about 35,000 ), Nevis ( 36 sq. miles, 13,000), and Anguilla ( 35 sq. miles, 6,200 ).

St. Kitts, lat. $17^{\circ} 18^{\prime} \mathrm{N}$. and long. $62^{\circ} 48^{\prime} \mathrm{W}$. was the first island in the British West Indies to be colonised ( 5623 ). Its economy has been based ant sugar for over three centuries. Tourism and light industry is being developed. The central area of the island is forest-clad and mountainous, rising to the $3,792 \mathrm{ft}$. Mount Misery. The capital, Basseterre, is a port of registry. Golden Rock airport -i take large jet aircraft.

Nevis, lat. $17^{\circ}$ ro N . and long. $62^{\circ} 35^{\prime} \mathrm{W}$. is separated from the southern tip of St. Kitts by strait two miles wide. The sea ferry route from Basseterre, St. Kitts to Charlestown, Nevis is II miles. Newcastle airstrip can take small aircraft, e.g. Islanders: no night landing facilities are available. The economy of Nevis centres on small peasant farmers. The island is dominated by the central Nevis Peak, $3,232 \mathrm{ft}$. The chief town, $\Psi$ Charlestown, is a port of entry.

The Territory of St. Kitts-Nevis-Anguilla became a State in Association with Britain on Feb. $\mathbf{2 7}$, 1967. The State became responsible for internal affairs, while Britain became responsible for defence and external affairs. Her Majesty the Queen is represented by a Governor, appointed by her. There is a Cabinet Government with a Ministerial system.

CAPITAL: Basseterre (St. Kitts), population about 17,000. FLAG: Tricolor of green (next staff), yellow and blue vertical stripes; palm tree device on yellow stripe.

## ANGUILLA

Anguilla is coralline island about 70 miles N.W. of St. Kitts. The island is rather less than 16 miles in length, $3^{\frac{\pi}{2}}$ miles in breadth at its widest point and its area is about 35 sq. miles. The population is 6,500 ( x 974 ). Salt and lobster are the principal products.
The island is covered with low scrub and fringed with some of the finest white coral-sand beaches in the Caribbean. The climate is pleasant and healthy with temperatures in the range of $75-85^{\circ} \mathrm{F}$. throughout the year.
Three months after the Associated State of Saint Christopher (St. Kitts)-Nevis-Anguilla came into being in 1967 the Anguillans repudiated government from St. Kitts. A Commissioner, who is appointed by Her Majesty The Queen, installed in 1969 and additional powers were conferred upon him in 1971 by the Anguilla (Administration) Order in Council under the provisions of the Anguilla Act 197x. On February 10, 1976 the Anguilla (Constitution) Order came into effect giving a new status and a separate constitution to Anguilla but it remains formally a part of the Associated State of St. Kitts-Nevis-Anguilla. H.M. Commissioner for Anguilla, D. F. B. Le Breton (1974).

## TURKS AND CAICOS ISLANDS

The Turks and Caicos Islands are situated between $25^{\circ}-72^{\circ}-30^{\circ}$ West, about roo miles north of Haiti and 50 miles West of the Bahamas of which they are geographically an extension.
There are over 30 islands of which eight are inhabited covering an estimated area of 192 square miles. The principal is Grand Turk. The present population is over 7,000 (Grand Turk 2,686 ). The
most important industry is fishing but tourism is of increasing importance with over 8,000 visitors in 1975.

The Islands lie in the Trade Wind but with excellent climate. The average temperature varies from $75^{\circ}-80^{\circ} \mathrm{F}$. in the winter and $85^{\circ} \mathrm{F},-90^{\circ} \mathrm{F}$. in the summer and humidity is generally low. Average rainfall is $2 x$ inches per annum. Hurricanes are rare, the last occurring in 1960.

The principal airports are on the islands of Grand Turk, South Caicos and Providenciales. There are direct shipping services to the U.S.A.(Miami). There is a twice weekly air service between Miami, Florida and Grand Turk and weekly air service between Nassau, Bahamas and South Caicos. An internal air service provides a twice daily service between the principal islands. A comprehensive telephone and telex service is provided by Cable and Wireless (W.I.) Ltd.

## Trade

$1975 \quad 1976$
Imports. ......... U.S. $\$ 4,246,240$ U.S. $\$ 4,939,725$ Exports. ........... $8 \times 3,798$ 1,608,548

A new Constitution was agreed for introduction in 1976, providing for an Executive Council and Legislative Council, and for the appointment of a Chief Minister and three other Ministers from elected members of the Legislative. Governor, His Excellency A. C. Watson, c.m.G.

## The Windward Islands

The Windward Islands consist of Grenada, now independent, and the three Associated States of St. Vincent, St. Lucia and Dominica with their dependencies. Since March 1967 , with the attainment of Associated Statehood, there has been a Governor in St. Lucia and Dominica and in St. Vincent since October, 1969. Each island has its own elected Parliament and a Premier. St. Vincent, St. Lucia and Dominica operate under single-chamber Parliaments, known in each case as the House of Assembly. The ministerial form of government was introduced in 1956. Grenada became independent in 1974.

## ST. LUCIA

St. Lucia, the second largest and the most picturesque of the Windward group, situated in $13^{\circ} 54^{\prime} \mathrm{N}$. lat. and $60^{\circ} 50^{\prime} \mathrm{W}$. long., at a distance of about go miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises area of 238 square miles with an estimated population (1976) of 1 I2,500. About 56,000 acres are devoted to agriculture. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are bananas, copra, coconuts, cocoa, edible oil. Over 40,400 tons of bananas, valued at $\$ 21,072,000$, were exported to the U.K. in 1976. The chief imports are flour, machinery, cotton piece goods, building materials and fertilisers.

CapITAL.- $\Psi$ Castries (estimated population, 47,000 ) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. Flag.Blue, bearing in centre - device of yellow over black over white triangles having a common base.

## Governmens

There is a Cabinet of Ministers presided over by the premier and consisting of five other Ministers and the Attorney-General. There is $=$ Legislature which consists of Her Majesty and House of Assembly, of which the normal life is five years. The House of Assembly consists of a Speaker who may be elected from within or without the House, 17 elected and three nominated members and the Attorney-General. The Constitution provides for a political Attorney-General if the Legislature or the Premier so decides.
Governor, Sir Allen Montgomery Lewis, Q.C. Premier, J. G. M. Compton.

## ST. VINCENT

St. Vincent achieved Associated Statehood with the United Kingdom on October 27, 1969. The territory of the State of St. Vincent includes certain of the Grenadines, group of islands set across the Caribbean sea, stretching 40 miles south, some of the larger of which are Bequia, Canouan, Mayreau, Mustique, Union Island, Petit St. Vincent and Isle-a-Quatre. The territory extends 150 square miles ( 96,000 acres).

The main island, St. Vincent, is situated between $13^{\circ} 6^{\prime}$ and $14^{\circ} 35^{\prime} \mathrm{N}$. Latitude and $6 \mathrm{I}^{\circ} 6^{\prime}$ and $6 x^{\circ} 20^{\prime} \mathrm{W}$. Longitude approximately 21 miles South West of St. Lucia and roo miles West of Barbados. The island is 18 miles long and 10 miles wide at its extremities comprising an area of 133 square miles and an estimated population of 100,000 (1976). St. Vincent was discovered by Christopher Columbus in 1498 . It was granted by Charles I to the Earl of Carlisle in 1627 and after subsequent grants and a series of occupations alternately by the French and English, it was finally restored to Britain in 1783 . The capital and principal port is $\psi$ Kingstown, population approximately 30,000 .

The economy is based mainly on agriculture but the tourist industry has been expanding. The main products are bananas, arrowroot, coconuts, cocoa, spices, and various kinds of food crops. The main imports are foodstuffs (meat, rice, sugar, flour, butter and pickled and salted fish), textiles, lumber, cement and other building materials, fertilizers and motor vehicles.

The territory's education system provides a general primary and secondary education. Primary education is free but not compulsory. In 1972 there were 61 primary schools with a total enrolment of 27,609 ; and 16 secondary schools with $I$ total enrolment of 4,015 .

Government.-As an Associated State St. Vincent has constitution under which there is a Governor who is Her Majesty's Representative. Except where otherwise provided, the Governor is required to act in accordance with the advice of the Cabinet. Statehood allows St. Vincent the full self-governing control of its internal affairs including the right to amend its own constitution and the power to end the Association and declare itself independent. The United Kingdom Government accepts the responsibility for the State's external affairs and defence.
Govemor, His Excellency Sir Sydney Douglas Gun-Munro, m.B.E. Premier, Hon. R. M. Cato.

The House of Assembly consists of 13 elected members, three nominated members and the Attorney-General. It is presided over by a Speaker elected by the House from within or without it.

## DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. I, 1940. It is situated between
$15^{\circ}$ - $^{\prime}$ and $15^{\circ} 45^{\prime} \mathrm{N}$. lat. and $6 \mathrm{I}^{\circ} 13^{\prime}$ and $6 \mathrm{x}^{\circ} 30^{\prime} \mathrm{W}$. long., 95 miles S . of Antigua, and is about 29 miles long and 15 broad comprising an area of 290 sq. miles, of which about 41,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from $55^{\circ}$ to $85^{\circ} \mathrm{F}$. The climate is healthy, and during the winter months is very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra, ground provisions, grapefruits, coconut oil and washing soap. Population (estimated, 1976, 78,000 ). The principal towns are $\Psi$ Roseau, on the south-west coast population, Io, 157 and Portsmouth, population, 2,379.

Education.-There are 57 elementary schools providing primary and post-primary education, with a total enrolment of 20,821 pupils and seven secondary (grammar) schools, including one for boys and two for girls, with intal enrolment of a,269 pupils. The othet secondary schools are co-
educational. Primary education is free. There are 63 pre-schools in Dominica for the 3 to 5 year age group. There are also two post-secondary institutions and $\quad$ Nursing School.

## Government

On March 1, 1967, Dominica became Associated State of the United Kingdom. The Queen's Representative was redesignated the Governor.

The House of Assembly now comprises $2 x$ elected and 3 nominated members, one nominated on the advice of the Leader of the Opposition. The Cabinet (Executive) presided over by the Premier, consists of 7 other Government Ministers and the Attorney-General (Official Member). The Premier is appointed by the Governor from the elected members of the House of Assembly. The other Ministers are appointed by the Governor the the advice of the Premier. The Speaker is elected from among the members of the House or from outside.
Governor, His Excellency Sir Louis Cools-Lartigue, O.B.E. (I967).

Premier, Hon. Patrick John.

## DISTANCES FROM LONDON BY AIR

A list of the distances in statute miles from London to various places abroad. Distances given are Great Circle distances from London Heathrow Airport to destination airports. They have been supplied by International Aeradio Ltd., a Division of British Airways.

ZAMBIA ( $\mathbf{r} 665$ ), Lusaka. (Full-time students, 2,469). -Vice-Chancellor, J. M. Mwanza. Ph.D.

## H.M. COASTGUARD

The eleven Divisions of Her Majesty's Coastguard are administered by the Department of Trade, and co-ordinate civil marine search and rescue (SAR) operations around the 2,500 -mile coastline of Great Britain and Northern Ireland. Approximately 600 regular and 8,000 Auxiliary Coastguard initiate and co-ordinate all SAR measures for vessels or persons in need of assistance; between January $x$ and December 3r, 1976 they took part in 4,36 incidents and were responsible for the rescue of 7,684 persons.

Each Coastguard Division has three or four Districts within its boundaries, and each District comprises a number of Stations and Lookouts, of which there are four types. Constant Watch stations are
manned at all times and keep a 24 -hour watch. Day Watch Stations are manned by three or four Coastguards each keeping a four-hour watch in daylight, additional watch being kept in times of casualty risk (strong winds or poor visibilty). Auxiliary Lookouts and Auxiliary Rescue Stations are manned by Auxiliaries as and when the need arises. All are comprehensively equipped for rescue work.

From these stations, frequently located on bleak clifftops and headlands, the Coastguard are on the alert for oil slicks, shipping hazards, and vessels or people in distress. At the first sign of trouble, using their own modern telecommunications equipment and the extensive facilities provided by the Post

Office Coast Radio Stations, they are in position to alert the most appropriate rescue facilities: the lifeboats of the Royal National Lifeboat Institution, Coastguard rescue companies, ships in the vicinity, Navy or RAF helicopters, fixed-wing aircraft, or Naval Vessels.
For those who regularly sail in local waters, or make longer passages, the Coastguard Yacht and Boat Safety Scheme provides an invaluable free service. Its aim is to give the Coastguard a record of the movements of craft, information invaluable in an emergency. Yacht and Boat Safety Scheme Cards are available from all Coastguard Stations, Harbourmaster's Offices, and most yacht clubs and marinas.
From St. Margaret's Bay, Kent, Coastguards keep - constant watch on shipping traffic in the Dover Strait, providing a Channel Navigation Information

Service for all shipping in one of the buslest sea-lanes in the world.

Vital warning of mpending bad weather is given to local shipping through the gale warning service. Most Coastguard stations hoist cones on their flagmasts, the direction of the gale being indicated by the positions of the cone; point upwards indicating a gale from the northern half of the compass, point downwards indicating a gale from the southern half.
Founded in $x 822$ to guard our coasts against smuggling, the Coastguard's role today is a very different one-that of complete dedication to the guarding and saving of all life at sea. Members of the public who see an accident or a potentially dangerous incident on or around the coast should without hesitation dial " 999 " and ask for the Coastguard. They will be connected to the nearest Coastguard Rescue Centre.

## THE ZODIAC

The Zodiac is an imaginary belt in the heavens within which lie the apparent paths of the Sun, Moon and major planets. It is bounded by two parallels generally taken as lying $8^{\circ}$ on either side of the ecliptic or path of the Sun in its annual course. The Zodiac is divided into twelve equal parts of $30^{\circ}$ called Signs, which are not used by astronomers, but have some import in astrology, for which the division of the Zodiac was probably made originally. The Signs of the Zodiac take their names from certain of the constellations with which they once coincided. They are assumed to begin at the vernal equinox or intersection of the plane of the ecliptic with that of the equator. This point is still called the First Point of Aries, although the Sign of Aries now lies in the constellation of Pisces,
some $30^{\circ}$ to the west. This retrograding of the equinox by about $50^{\prime \prime}$ a year is due to precession; the signs no longer coincide with the constellation; whose names they bear.

A catalogue has been made (Grimaldi, 1905) of all, so far as is known, sculptured or incised representations on ancient monuments or tablets of the traditional constellation figures, either Zodiacal or otherwise, together with many modern pictures of the Zodiac. The first in the list is a roughly shaped upright, black stone about $2 \frac{1}{2}$ feet high and $\frac{1}{2}$ feet broad in the Babylonian room of the British Museum on the front of which are lightly incised ten out of the twelve Signs and other constellation figures. This was found near Baghdad and its date is estimated to be about $1 \times 87-1175$ B.C.

Position and Extent.-Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between $51^{\circ} 26^{\prime}$ and $55^{\circ} 21^{\prime} \mathrm{N}$. latitude and from $5^{\circ} 25^{\prime}$ to $10^{\circ} 30^{\prime} \mathrm{W}$. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of Achill Island (CO. Mayo) are the highest cliffs in the British Isles, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the Central Plain, with elevation 50 to 350 ft . above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the Sperrin Mountains (Sawel $2,240 \mathrm{ft}$.) of County Tyrone; the Mountains of Moume (Slieve Donard $2,796 \mathrm{ft}$.) of County Down, and the Wicklow Mountains (Lugnaquilla 3,039 ft.); the Derryveagh Mountains (Errigal 2,466 ft.) of County Donegal; the Connemara Mountains (Twelve Pins $2,695 \mathrm{ft}$.) of County Galway; Macgillicuddy's Reeks (Carrantuohill $3.4 \mathrm{I4}$ ft., the highest point in Ireland); and the Galtee Mountains ( $3,018 \mathrm{ft}$.) of County Tipperary, and the Knockmealdown ( $2,609 \mathrm{ft}$. .) and Comeragh Mountains ( $2,470 \mathrm{ft}$.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the Shannon (z40 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The Slaney flows into Wexford Harbour, the Liffey to Dublin Bay, the Boyne to Drogheda, the Lee to Cork Harbour, the Blackwater to Youghal Harbour, and the Suir, Barrow and Nore, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the Loughs, of which Lough Neagh ( 550 sq . miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of Allen, Boderg, Forbes, Ree and Derg, and the Erne Chain of Gowna, Oughter, Lower Erne, and Eme; Melvin, Gill, Gara and Conn in the north-west; and Corrib and Mask (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous Lakes of Killarney. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from $2^{\circ} \mathrm{F}$. to $90^{\circ} \mathrm{F}$. (compared with $-17^{\circ} \mathrm{F}$. to $\mathbf{x} 0^{\circ} \mathrm{F}$. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than roo inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.-Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; II grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17 th century B.C. In the later Bronze Age a Celtic race of Goidels appears to have invaded the island, and in the early Iron Age Brythons from South Britain are believed to have effected settlements in the south-east, while Picts from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the Scoti, who afterwards established themselves in Scotland.

History.-According to Irish legends, the island of Ierne was settled by Milesian race, who came from Scythia by way of Spain, and established the Kingdom of Tara, about 500 B.C. The supremacy of the Ardri (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the Giant's Causeway, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of Northmen (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall " and " MacDowell," while the name of the island itself is held to be derived from the Scandinavian Ira-land (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laiginstir, Mumans-tir and Kunnak-tir). The outstanding events in the encounters with the Northmen are the Battle of Tara ( 980 ), at which the Hy Neill
king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the Battle of Clontarf (rox4) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diarmit MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as Strongbow, who landed at Waterford (Aug. 23, 1170) with 200 knights and $x, 000$ other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII, Sir Edward Poynings, as Lord Deputy had passed at the Parliament of Drogheda (x494) the act later known as Poynings' Law, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in $\mathbf{x} 534$, Henry VIII began the reconquest of Ireland. Parliament in $154 x$ recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity,-Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later escaping to Gaul at the age of 22 . In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

## Republic of Ireland

Area and Population.-The Republic has $m$ land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Laoighis, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the Census held on April 18, 1971, was 2,978,248 (males, $\mathbf{x , 4 9 5 , 7 6 0}$; females $\mathrm{x}, 482,488$ ), $=$ density of 112 persons per-sq. mile (Census, $1966,2,884,002$ ). Provisional figures showed 68,167 births, 20,431 marriages and 33,284 deaths in the year 1976 .

## THE PRESIDENT

Uachtaran-na-hEireann (President), Pádraig Ó hIrighile (Patrick J. Hillery), born 1923, assumed office, Dec. 3,1976.

A new Irish Government took office on July 5, 1977. Following the victory of the Fianna Fail Party in the general election held on June 16, the leader of that party, Mr. John Lynch, was elected Taoiseach (Prime Minister) when the new Dail (Lower House of Parliament) met for the first time on July 5 . Later that evening, following his formal appointment by the President, Dr. Hillery, the new Taoiseach, Mr. Lynch, announced his Cabinet to the Dáil.

## Members of the Government

Taoiseach, Seán Ó Loinsigh (John Lynch).
Tanaiste, Minister for Finance and Minister for the Public Service, Seoirse Ó Colla (George Colley). Minister for Health and Social Welfare, Cathal Ó hEochaidh (Charles J. Haughey).
Fisheries, Brian Ó Luineacháin (Brian J. Lenihan),
Transport, Power, Posts and Telegraphs, Pádraig ó Fachtna (Pádraig Faulkner).
Agriculture, Séamus Mac Giobuin (James Gibbons).
Industry and Commerce, Deasún Ó Mảille (Desmond J. O'Malley).

Defence, Roibeárd Ó Maoildhia (Robert Molloy). Justice, Gearóid Ó Coileáin (Gerard Collins).
Foreign Affairs, Mícheál Ó Cinnéide (Michael O'Kennedy).
Local Government, Salbhastar Bairéad (Sylvester Barrett).
Labour, Eoghan Mac Gearailt (Gene Fitzgerald).
Minister for the Gaeltacht, Donncha Ó Gallchobhair (Denis Gallagher).
Education, Seán P. Mac Uilliam (John Patrick Wilson).
Economic Planning and Development, Máirtín Ó Donnchadha (Martin O'Donoghue).

Parliamentary Secretaries
Parliamentary Secretary to the Taoiseach and to the Minister for Defence, Pádraig Ó Leathlobhair (Patrick Joseph Lalor).
Do. to the Minister for Foreign Affairs, Dáthí Mac Aindriú (David Andrews).
Do. to the Minister for Education, Séamus Ó Tonnaí (Jim Tunney).
Do. to the Minister for Transport and Power and to the Minister for Posts and Telegraphs, Tomás Mac Giolla Phádraig (Tom Fitzpatrick).
Do. to the Minister for Finance, Piaras de Uidheas (Pearse Wyse).
Do. to the Minister for Agriculture, Tomás Ó hEodhusa (Thomas Hussey).
Do. 10 the Minister for Industry and Commerce, Maire Nic Eochagán Ui Chuinn (Maire GeogheganQuinn).
Attorney-General, Antoine Ó hEadromáin (Anthony Hederman).
Secretary to the Government, Dónal Ō Súilleabháin (Daniel O'Sullivan).
Assistant Secretary to the Goverrment, H. S. O Dubha (H. J. Dowd).

First Secretaries, P. J. Goulden (Head of Chancery); R.W. James (Agriculture); J. Plant (Commercial); E. A. Townsend (Administration).

## GOVERNMENT

The Constitution.-The constitution approved by a plebiscite on July $x$, x937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the reintegration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.-The President-Uachtarán na hEireann-is elected by direct vote of the people for ■ period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Eireann on the advice of the Taoiseach (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.-The National Parliament-Oireachtas-consists of the President and two Houses: a House of Representatives-Dail Eireann -and a Senate-Seanad Eireann.

Dáil Eireann is composed of 144 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom II are nominated by the Taoiseach and 49 are elected; three by the National University of

Ireland three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

Members of Dáil Éireann are paid an allowance of $\mathcal{£} 6,273$ per annum (and members of Seanad Eireann $£ 3,693$ ); are allowed free travelling facilities between Dublin and their constituencies and are, subject to certain restrictions granted free telephone and postal facilities from Leinster House and allowances for overnight stays in Dublin.

The Executive.-The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Eireann, meets and acts as collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dail Eireann. The Taoiseach appoints a member of the Government to be the Tanaiste who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the Tanaiste and the Minister for Finance must be members of Dail Éireann. The other members of the Government must be members of Dail Éireann or Seanad Eireann, but not more than two may be members of Seanad Éireann.

## THE LEGISLATURE

The Legislature (Oireachtas) consists of the President and two Houses-a House of Representatives (Dail Eireann) and a Senate (Seanad Eireann). Dáil Eireann has 244 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 18 years and are not disqualified by law have the right to vote. Each Dail may continue for a period not exceeding five years from the date of election.

The result of the general election on June 16,1977 was as follows: Fianna Fäil, 84; Fine Gael, 43 ; Labour, 17; Independent, 4. Total membership including the Ceann Comlairle (Chairman), $14^{8 .}$

## THIE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court-Cuirt Uachtarach. The Courts of First Instance include $\quad$ High Court-Ard-Chúirt-invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, with such exceptions and subject to such regulations as may be prescribed by law. No law may, however, be enacted excepting from the appellate jurisdiction of the Supreme Court the question of the validity of any law, having regard to the provisions of the Constitution.
Chief Justice. Hon. Thomas F. O'Higgins $£_{17,462}$ President of the High Court, Hon. Thomas
A. Finlay. ......................... 15,204 Judges, Supreme Court, Hon. Brian Walsh;

## DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. To aid and counsel the Minister for Defence there is a Council of Defence consisting of the Parliamentary Secretary to the Minster, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 25,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending Dec. 3r, 1977, provide for approximately 22,800 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force or three years in the Permanent Defence Force and nine years in the Reserve Defence Force. For the Naval Service, enlistment is for four years in the Permanent Defence Force or six years in the Permanent Defence Force and six years in the Reserve Defence Force. The Naval Service has three coastal minesweepers and a patrol vessel. Another patrol vessel is under construction and delivery was expected towards the end of 1977: The equipment of Air Corps includes Marchetti SF260 W, Chipmunk, Dove and Cessna aircraft, Fouga Magister CMx 70 jet trainers and Alouette helicopters. The Defence Estimates for the year ending Dec. 31,1977 provide for an expenditure of $\mathcal{C} 85,223,000$.

|  | $\begin{gathered} \text { FINANCE } \\ \text { I976 } \\ \text { (Actual) } \end{gathered}$ | $\begin{gathered} 1977 \\ \text { (Estimated) } \end{gathered}$ |
| :---: | :---: | :---: |
| Reven | £ 1,470,200,000 | ¢1,811,300,000 |
| Expenditure. | 1,671,640,000 | 2,029,100,000 |

In addition to the Expenditure figures shown above there were certain services of $\quad$ capital nature regarded as proper to be met from borrowing. Issues for these services in 1976 amounted to $£ 380,240,000$, and for 1977 are estimated at ட432,790,000.
The estimated Revenue for 1977 includes Customs Duties, $230,000,000$; Excise Dutics, £.460,000,000; Estate etc. Duties, $£ 4,500,000 ;$ Income Tax, $£ 544,000,000$; Corporation Tax, C82,000,000; Motor Vehicle Duties, f.42,000,000; Stamp Duties, $£^{20,800,000 ; \text { Post Office Services, }}$ £125,500,000; Value-added Tax, £334,000,000; Agricultural Levies, $£ 7,000,000$; Capital Taxes, £ $9,500,000$. Total (including other items), fir $811,300,000$.
The principal items of estimated current Expenditure for 1977 are Debt Service, $£ 448$, roo,000; Agriculture, $£ \times 33,100,000 ;$ Defence, $\mathcal{L} 86,400,000 ;$ Gardai (Police) and Justice, $£ 66,900,000$; Education, £253,100,000; Social Welfare, $£ 288,400,000 ;$ Health, $£ 299,700,000 ;$ Transport, $\mathcal{C 6 6 , 7 0 0 , 0 0 0 ;}$ Post Office, $£ 84,700,000$ : Superannuation, £ $52,700,000$; Industry, $£ 65,000,000$. Total (including other items), $£ 2,029$, roo.
The Gross Debt on December 31, 1976 was $£_{6,3,622,000,000}$ with capital assets of $\mathcal{L}, 259,000,000$ at that date.

## EDUCATION

Primary education is directed by the State, with the exception of approximately 120 private primary schools with an enrolment of about 21,500 in $1975-76$.
There were 3,53 I State-aided primary schools with an enrolment of 528,398 in $1975-76$.
In 1975-76 there were 539 recognized secondary schools with 182,639 pupils under private management (mainly religious orders). Also, 66,390 fulltime pupils (and approximately as many part-time pupils) received secondary education in 247 permanent secondary vocational schools (and a number of temporary centres), and a the 8 Regional Technical Colleges-all these schools and colleges are controlled by some 38 statutory local Vocational Education Committees. There were 14 State comprehensive schools in 1975-76 with a total enrolment of 7,280 students, and 18 community schools with an enrolment of 8,243 students. There were also other miscellancous second-level schools and the total full-time enrolment at second-level for 1975-76 was 270,955 .

Third-level education is catered for by five University Colleges, a National Institute for Higher Education, and also by third-level courses offered by the Technical Colleges and Regional Technical Colleges and other miscellaneous thirdlevel institutions. There were 33,148 full-time third-level students in 1975-76, of whom 21,317 were attending university courses.

The estimated State expenditure on education in the period Jan. 1, 1977 to Dec. 31, 3977, excluding administration and inspection, is Primary Erio,353,000; Secondary £r26,274,000. The vote for Universities and third-level Colleges amounted to $£_{31,710,000, ~ w h i l e, ~ i n ~ a d d i t i o n, ~}^{\text {, }}$ grants of $£ 5,870,984$ were provided in respect of the Facilities of General Agriculture, Veterinary Medicine and Dairy Science.

## PRODUCTION AND INDUSTRY

Agriculture and Livestock.-In 1975 there were 836,400 acres under corn crops, 297,000 under root and green crops, 8,800 under fruit and $2,570,500$ under hay, a total of $3,702,700$ acres. The principal produce in 1975 was: oats, 165,000 tons; wheat, 204.000 tons; barley, 971,000 tons; turnips, r,060,000 tons; potatoes, 976,000 tons; sugar beet, $x, 407,000$ tons; and hay, $3.539,000$ tons. The livestock included, $6,927,300$ cattle, 3,796,000 sheep, 843,600 pigs and 99,100 horses and ponies.

Minerals. -400 persons were employed in the coal mines in 1976 and 48,000 tons of coal won.

Sea Fisheries.- $7.3^{8} 4$ persons were employed in the fisheries in 1976 . Total value of all fish (excluding salmon) landed in 1975 was £ $12,435,7 \times 3$ (provisional).

## COMMUNICATIONS

Railways.-In the year ended Dec. 3 3, 1975, there were $x, 247$ miles of railway all of standard ( 5 ft .3 in .) gauge; $13,897,000$ passengers and $3,334,000$ tons of merchandise were conveyed; the receipts were $£ 20,270,940$ and expenditure $£_{3} 8,4 \times 2,520$. These figures are in respect of railway working by Coras Iompair Eireann, the national transport undertaking which is now the only concern operating Ir rail service in the State.

Road Motor Services.-In 1976 road motor (omnibus) vehicles carried $277,097,6 \mathrm{xz}$ passengers, the gross receipts being $£_{31,315,503 .}$
Shipping. - In 1976 the number of ships with cargo and in ballast in the foreign trade which arrived at Irish ports was 21,780 ( $18,960,765$ net registered tons); of these $x, 358$ ( $2,299,073$ net registered tons) were of Irish nationality.

## CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1976 the airport handled $x, 098,409$ passengers, 45,684 tonnes of cargo and $x, 873$ tonnes of mail.

Dublin Airport, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline Aer Lingus and other airlines. In 1976 the airport handled $2,203,876$ passengers, 44,273 tonnes of cargo and $i, 829$ tonnes of mail.

Cork Airport, 5 miles S. of Cork, serves the crossChannel and European services operated by Aer Lingus and other airlines. In 1976 the airport handled $27^{2,676}$ passengers and 2,001 tonnes of cargo and 17 tonnes of mail.
There are 24 private aerodromes.

## PHYSIOGRAPHY

The coterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude $25^{\circ} 07^{\prime}-49^{\circ} 23^{\prime}$ North and longitude $66^{\circ} 57^{\prime}-124^{\circ} 44^{\prime}$ West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of $7 \mathrm{I}^{\circ} 23^{\prime} \mathrm{N}$., at Point Barrow ( 2,502 miles from the U.S. geographic centre).

The general coastline of the 50 States has length of about 2,069 miles on the Atlantic, 7,623 miles on the Pacific, 1,060 miles on the Arctic, and 1,631 miles on the Gulf of Mexico.
The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of $3,7 \pm 0$ miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, Roanoke and Savannah; of the latter, the ColumbiaSnake, Sacramento, and Colorado. The Nueces, Brazos, Trinity, Pearl, Mobile-Tombigbee-Alabama, Apalachicola-Chattahoochee, Suwannee and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:-Rivers flowing to the Pacific, 647,300 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, x,683,325 square miles, of which 1,234,600 are drained by the Mississippl-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Mountains in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, pine, tupil-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The mineral kingdom produces ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include large quantities of coal, petroleum, stone, phosphate rock, and salt. The highest point is Mount McKinley (Alaska), $20,320 \mathrm{ft}$. above sea level and the lowest point of dry land is in Death Valley (Inyo, California), 282 ft . below sea-level.

THE PRESIDENTS OF THE UNITED STATES OF AMERICA

## GOVERNMENT

The United States of America is $\quad$ Federal Republic consisting of 50 States and $x$ Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of organized Territories. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternatively. July 4 (Independence Day) is observed as the National Day.

The Constitution.-By the Constitution of Sept. 17,1787 (to which ten amendments were added on Dec. 15, 179x, and eleventh to twenty-sixth, Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 195I, March 29, 196I, Jan. 23, 1964, Feb. 10, 1967 and June 30, 1971), the government of the United States is entrusted to three separate authorities-the Executive, the Legislative, and the Judicial.

## THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for reelection for one additional term. The mode of electing the President is as follows:-Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for $\quad$ President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice-President end at noon on the zoth day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice-President, I statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives taxable salary of $\$ 200,000$ with a taxable expense allowance of $\$ 50,000$ and a non-taxable travelling allowance not exceeding $\$ 100,000$. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:-( 1 ) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all otficers therein. (z) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials. (3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President is invoked. (4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress. (5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objection of the President. President of the United States, James Earl Carter, born Oct. I, 1924, sworn in January 20, 1977. Democratic. Vice-President, Walter Frederick Mondale, born Jan., 5, 1928, swom in Jan. 20, 1977.

THE CABINET
(Sworn in on Jan. 23-27, 1977)
Secretary of State, Cyrus Robert Vance.
Secretary of the Treasury, W. Michael Blumenthal.
Secretary of Defence, Dr. Harold Brown.
Attorney-General, Griffin Bell.
Secretary of the Interior, Cecil D. Andrus.
Secretary of Agriculture, Robert Bergland.
Secretary of Commerce, Mrs. Juanita Morris Kreps.
Secretary of Labour, Dr. F. Ray Marshall.
Secretary of Health, Education and Welfare, Joseph A. Califano.
Secretary of Housing and Urban Development, Mrs. Patricia Roberts Harris.
Secretary of Transportation, Brockman Adams.

## UNTTED STATES EMBASSY

Grosvenor Square, W.I [or-499 9000]
Ambassador Extraordinary and Plenipotentiary, His Excellency the Hon. Kingman Brewster (1977). Minister, Hon. Ronald I. Spiers.
Minister for Economic and Commercial Affairs, Hon. William K. Miller.
Counsellors, Michael T. F. Pistor (Public Affairs); Michael M. Conlin (Administration); Loren E. Lawrence (Consular Affairs); Borrie I. Hyman (Commercial); William M. Woessner (Political Affairs); John W. Holmes (Economic Affairs).

Defence Attaché, Naval Attaché and Naval Altaché for Air, Rear Admiral Frances T. Brown, U.S.N. Army Altaché, Col. Robert B. Osborn, U.S.A. Air Attaché, Col. Robert G. Jenks, U.S.A.F. ist Secretaries, Robert E. Kaufman; H. Clay Black; (Economic); George H. Thigpen; William G. Hamilton, (Public Affairs); Lucien L. Kinsolving (Political); Larry C. Williamson (Commercial); Elwood J. McGuire (Administration); Raymond G. H. Seitz; Samuel Karp (Consular); Bruce R. Koch (Public Affairs); Leonard L. Lefkov; Frank M. Schroeder (Administration); Lenard R. Clarke (Administration); John J. Degan; Sunao Sakamoto;

Don E. Bean (Consular); Charles T. Prindeville; Douglas G. Hartley; John R. Savage (Commercial) ; Pratt Byrd; Gerald A. Friedman; Jack R. Binns (Political); Irving L. Sablosky; Allan B. Croghan (Cultural Affairs); Alvin Perlman; James M. Ascher (Public Affairs); Robert D. Blackwill; Richard A. Kahane (Political); Thomas E. O'Conner; James R. Tarrant (Cultural Affairs) ; Lewis Z. Cohen (Financial).

## CAPITAL OF THE UNTTED STATES

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 179x it was decided to name the capital Washington and in 1793 the foundationstone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as 1 city in 1802. In 1846 the Virginia portion was retroceded and the present area of the District of Columbia (with which the City of Washington is considered co-extensive) is 6 x square miles, with a population at the Census of 1970 of 756,510.
The District of Columbia has hitherto been governed by a Commissioner and assistant and a 9 -member City Council, all appointed by the President. From Nov. 5, 1974, this body has been replaced by an elected mayor and City Council.
The City of Washington is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

## THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The average number of persons represented by each Congressman is I for 469,088 . The Senate consists of $x 00$ members. The salary of a Senator is $\$ 42,500$ per annum, with mileage at a cents per mile each session. The House of Representatives consists of 435 Representatives, 1 resident commissioner from Puerto Rico and a delegate from the District of Columbia, Guam and the Virgin Isalnds. The salary of a Representative is $\$ 42,500$ per annum, with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On Nov. I, 1972, there were $139,642,000$ persons of voting age, excluding members of the armed forces overseas.

## The Ninety-Fifth Congress

President of the Senate, Walter F. Mondale (Vice President of the United States).
Speaker of the House of Representatives, Thomas P. O'Neill, Jr., Massachusetts.
Secretary of the Senate, J. S. Kimmitt, Montana.
Clerk of the House of Representatives, Edmund L. Henshaw, Jr., Virginia.
Members of the 95th Congress were elected on Nov. 2, 1976.

The 95th Congress is constituted as follows:
Senate.-Democrats 62; Republicans, 38; Total, 100. House of Representatives.-Democrats, 290; Republicans, 345 . Total, 435.

## THE JUDICATURE

The Federal Judiciary consists of three sets of Federal Courts: ( $x$ ) The Supreme Courl at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, etc., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the judgments of the highest Courts of the States. (2) The United States Courls of Appeals, dealing with appeals from District Courts and from certain federal administrative agencies, and consisting of all the Circuit Judges within the circuit. (3) The 94 District Courts served by 490 District Court Judges.

## THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C. Chief Justice, Warren E. Burger Va., born Sept. 17 , 1907, appointed June 23, 1969.

## DEFENCE

## Department of Defence

Secretary of Defence (in the Cabinet), Harold Brown. Secretary of the Army, Clifford L. Alexander, Jr. Secretary of the Navy, W. Graham Claytor, Jr. Secretary of the Air Force, John C. Stetson.
Chairman, Joint Chiefs of Staff, Gen. George S. Brown, U.S.A.F.
The Department of Defence includes the Secretary of Defence as its head, the Deputy Secretary of Defence, the Defence staff offices, the Joint Chiefs of Staff and the Joint Staff, the three military departments and the military services within those departments, the unified and specified commands, and other Department of Defence agencies as the Secretary of Defence establishes to meet specific requirements. The Defence staff offices and the joint Chiefs of Staff, although separately organized function in full coordination and cooperation. They include the offices of the Director of Defence Research and Engineering, the Assistant Secretaries of Defence, the General Counsel of the

Department of Defence and such other staff offices as the Secretary of Defence may establish. The Joint Chiefs of Staff, as $\quad$ group, are directly responsible to the Secretary of Defence for the functions assigned to them. Each member of the Joint Chiefs of Staff, other than the Chairman, is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary and functions under the direction, authority and control of the Secretary of Defence.

The Department of Defence maintains and employs armed forces: $(x)$ to support and defend the Constitution of the United States against all enemies, foreign and domestic; (z) to insure, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; (3) to uphold and advance the national policies and interest of the United States; and (4) to safeguard the internal security of the United States. All functions in the Department of Defence and its component agencies are performed under the direction, authority and control of the Secretary of Defence.

Commanders of unified and specified commands are responsible to the President and the Secretary of Defence for the accomplishment of military missions assigned to them.

## Unified Defence Commands

## Commanders-in-Chief

U.S. European Command, Brussels.-Gen. Alexander M. Haig, Jr. (U.S.A.) (concurrently N.A.T.O. Supreme Allied Commander).
U.S. Southern Command, Quarry Heights, Panama Canal Zone.-Gen. Dennis P. McAuliffe (U.S.A.).

Atlantic, Norfolk, Virginia.-Adm. Isaac C. Kidd (U.S. Navy) (concurrently N.A.T.O. Supreme Allied Commander, Atlantic).
Pacific, Hawaii.-Adm. Maurice Weisner (U.S. Navy).
North American Air Defence Command, Colorado Springs.-Gen. Daniel James (U.S.A.F.).
$\star$ Sirategic Air Command, Omaha.-Gen. Richard H. Ellis (U.S.A.F.).
Military Air Lift Command, Gen. William G. Moore, Ir. (U.S.A.F.).
U.S. Readiness Command, MacDill, Florida,-Gen. John J. Hennessey (U.S. Army).

* A Specified Command.

Army.-The Army of U.S. had a strength of $8,293,766$ (including $2,310,436$ Air Force) on V.E. Day, reduced by June 30, 1959, to 861,964 (excluding Air Force). The strength on March 31, 1977, was 778,547 . Stationed in Germany were four divisions. There was one division in Korea.
Chief of the Staff of the Army, Gen. Bernard W.
Rogers.
Navy.-The peak strength of the Navy (including Marine Corps in 3945, was $3,855,497$. The strength of the U.S. Navy in 1976, was 524,700 . Strength of the Marine Corps, 192,400 .

The U.S. Navy had in service in 1976,476 active fleet ships, including $x_{3}$ attack carriers, 26 cruisers, 69 destroyers, 64 frigates, 115 submarines ( 64 nuclear, 4 I SSBN and 10 diesel), 62 amphibious, 3 mine warfare, Ix6 auxiliaries and 8 patrol craft. Chief of Naval Operations, Adm. James Holloway.

Air.-The United States Air Force was established as a separate organization on September 18 , 1947. On May 3I, 1977, there were $583,28 \mathrm{I}$ officers and airmen on active duty, with 261,784 civilian employees. Air Force Reserve and Air National Guard numbered $\mathbf{2 4 1 , 4 2 0}$ on May 3I, 1977 .

To deter aggression the Air Force has about x40 strategic bombers maintaining constant alert in well as 1,054 inter-continental ballistic missiles in hardened silos. In addition, the Air Force maintains the capability to carry out limited war and special warfare operations. In March, 196I, the Air Force was assigned primary responsibility for the Department of Defence space development programmes and projects. By June $\mathbf{I 3}_{3}$, 1976, the United States had placed $=$ total of 3,901 space-craft into earth orbit or deep space. These included Air Force, Army and N.A.S.A. shots.
Chief of Staff of the U.S. Air Force, Gen. David C. Jones.

## NATIONAL ORIGINS OF THE POPULATION

About 102,200,000 of the approximately 205 million persons in the United States reported on sample survey conducted in March, 1972, that they were of one of eight specific origin categories. Approximately 25.5 million persons reported German origin; 29.5 million, English Scottish or Welsh; 16.4 million Irish; 9.2 million, Spanish; 8.8 million, Italian; $5^{\circ}$ I million, Polish; and $2 \cdot 2$ million, Russian. About ix million persons living in the United States at the time of an earlier survey of 1969 were foreign born, Germany, Italy, Mexico and the United Kingdom were the major contributing countries. Two-thirds of them reported English as the language usually spoken in their homes. They were 23 years older on the average than the native population.

Countries of birth of the foreign-born population (1969) were: Austria ( 236,000 ), Cuba (504,000), Germany ( $\mathrm{I}, 004,000$ ), Ireland ( 277,000 ), Italy ( $x, 353,000$ ), Mexico ( 938,000 ), Poland ( 550,000 ), Russia ( $4 \times 2,000$ ), Sweden ( $x 66,000$ ), United Kingdom ( $\mathrm{I}, 006,000$ ); other countries, $4,434,000$.

## SOCIAL WELFARE EXPENDITURE

The total value of government expenditure on social welfare (federal, state and local government) in 1976 was $\$ 331,400,000,000$ compared with $\$ 286,547,000,000$ in 1975 and $\$ 239,302,600,000$ in 1974. In 1976 expenditure per person (of the total population of U.S.A.) was $\$ 1,5 \Sigma_{3}-$-social insurance, \$668; education, $\$ 395$; public aid, $\$ 224$; health and medical services, $\$ 87$; veterans' welfare, $\$ 86$; other services, $\$ 36$ per person. Total expenditure by programmes was:

$\dagger$ Beginning in calendar year 1976, the Federal Fiscal year was converted from $\mathbb{I}$ July $\mathbf{r}$ - June 30 basis to an Oct. 1-Sept. 30 basis.

## PUBLIC DEBT

On June 30, 1977, the total gross Federal Debt of the United States stood at $\$ 674,425,000,000$; the equivalent debt for 1976 was $\$ 620,433,000,000$.

## COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical workers-single persons and familiesin 50 cities representative of all cities in the United States) showed a monthly average during the calendar year 1976 of $170 \cdot 5$ (the basic figure of 100 being the 1967 average). The Consumer Price Index rose $12^{\cdot 2}$ per cent. in 1974, $7^{\circ}$ o per cent. in 1975 and 4.8 per cent. in 1976. From May 1975 to May 1976 the index rose 6.5 per cent. for all items, 6.3 per cent. for food, $5 \% 7$ per cent. for commodities and 7.4 per cent. for services.

The Wholesale Price Index of all commodities averaged 174.9 in 1975 (compared to the base of 100.0 in 1967) and was 182.9 in 1976. From May, 1975 to May, 1976 the index rose $7_{7}$ I per cent. for all items, $5^{\prime 8}$ per cent. for farm products, 6.8 per cent. for processed foods and feeds and 7.3 per cent. for industrial commodities.

## PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from $\$ 1,052^{\circ} 4$ billion in 1973 to $\$ 1,153 \cdot 3$ billion in 1974 ,
$\$ \mathrm{x}, 249^{\circ} 7$ billion in 1975 and $\$ x, 375^{\circ} 3$ billion in 1976. In the latter period, labour income was $\$ 960^{\circ} 5$ billion, $10 \cdot 5$ per cent. above the level of the previous year. Business proprietors, professional and farm income totalled \$ro3'3 billion in the first quarter of 1977 (ro. 8 per cent. increase on previous year) and dividends, interest, and rent totalled $\$ 194^{\prime 2}$ billion (up ir. 4 per cent.). Transfer payments were $\$ 203^{\circ} \mathrm{O}$ billion and personal contributions to social insurance, which are offsets to income, were $\$ 59 \cdot 7$ billion.

Disposition of personal incomes.-Personal taxes were $\$ 217^{\circ} 3$ billion in the first quarter of 1977 , leaving households with $\$ \mathrm{I}, 245 \cdot 5$ billion of disposable income. Consumption expenditures were $\$ 1,156.8$ billion; $\$ 173.4$ billion for durable goods, $\$ 463^{\circ} 7$ billion for non-durable goods and $\$ 519.6$ billion for services. Personal saving was $\$ 6 \mathrm{I} \cdot 8$ billion. Disposable income per capita was $\$ 5,762$ in the first quarter of 1977 .

Private domestic investment.-The total gross private domestic investment rose from \$183.7 billion in 1975 to $\$ 260^{\circ} 2$ billion in the first quarter of 1977. Fixed investment in residential construction increased to $\$ 67 \% 7$ billion in 1976 ( 1975 $\$ 5 \mathrm{I}^{\circ} \mathrm{z}$ billion) and other construction rose to $\$ 160^{\circ} \circ$ billion ( $1975 \$ 147 \cdot$ I billion). Investment in producers' durable equipment rose from $\$ 96.4$ billion in 2975 to $\$ 106 \cdot 3$ billion in 1976 .

## AGRICULTURE AND LIVESTOCK

Agriculture.-The total land surface, including Hawaii and Alaska, is $2,263,591,000$ acres of which about 50 per cent. is in farms. The total number of farms in 8977 was $2,752,080$. The cash income from crops in 1976 was $\$ 47,802,000,000$, and in 1975, $\$ 46,661,000,000$. Cash income from livestock and livestock products in 1976 was $\$ 46,991,000,000$ and in $1975 \$ 42,902,000,000$.

Combined production of all crops in 1976 was about I per cent. greater than in I975. Increased acres harvested accounted for the large outturn as few crops established new yield levels. There was, however, a record output of wheat. Farm output of livestock and livestock products was up 5 per cent. due largely to record high pouitry and egg production.

## MINERALS

The value of mineral production in the United States in 1976 totalled an estimated $\$ 677$ billion compared with $\$ 2 \cdot 3$ billion in 1975 and $\$ 55 \cdot x$ billion in 1974.
The value of processed minerals and mineral materials increased in per cent. to about $\$ 300$ billion. Imports and exports or minerals and mineral materials totalled $\$ 49$ billion and $\$ 18$ billion respectively.
Lead refinery production increased 6 per cent. over that of 1975 and aluminium primary production at $4^{\circ 2}$ million tons increased 8 per cent. over that of r975. Mine production of zinc rose 2.0 per cent. and iron ore remained about the same; uranium concentrate mill production increased by x6 per cent.

About 77 per cent. of the mineral production of the United States (in value) consists of fuels. In I976 U.S. production of crude petroleum amounted to 2.9 billion barrels. Total demand (domestic plus exports) averaged $13^{\circ} 2$ million barrels daily, a 5.6 per cent. increase from 1975 .

The 1976 average daily production in the three principal oil producing States declined: in Texas by 82,000 barrels (total average daily production $3,266,000$ barrels); in Louisiana by $\mathbf{3 4 7 , 0 0 0}$ barrels
(total average daily production $5,636,000$ barrels); and in California by 8,000 barrels (total average daily production 875,000 barrels).

Anthracite production in 1976 totalled 6.2 million tons.

Bituminous coal and lignite output in 1976 rose to a record high of 665 million tons. Exports declined 9 per cent. to 60 million tons.

## LABOUR

Organized Labour.-On December 5, 1955, the American Federation of Labour (AFL), founded in I88ı, and the Congress of Industrial Organizations (CIO), formally established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership in 1974 was $16,938,000$. There are also $4,705,000$ members of unions not affiliated to the AFL-CIO. Of the $21,643,000$ members of national and international unions with headquarters in U.S.A., $x, 444,000$ were employed in Canada.

Approximately 25.8 per cent. of the nonagricultural labour force of the United States is estimated to be organized.

Work Stoppages. -There were 5,031 stoppages recorded in 1975. There were $31,237,600$ man-days of idleness, representing o. 16 per cent. of estimated working time of all non-agricultural workers.

Employment and Unemployment.-The civilian labour force (working population) was $97,158,000$ in May, 1977. This includes self-employed, wage and salary-earners, and unpaid family workers,

employed and unemployed. Unemployment was estimated at $6,750,000$ in May 1977 ( 6.9 per cent.)

Wages.-In April, 1977, gross average weekly earnings in industry ranged from $\$ 366 \cdot 52$ per week in malt liquors to $\$ 79.20$ in eating and drinking places ( 27.5 hours and $\$ 2.88$ average hourly earnings). The average for all manufacturing was $\$ 220 \cdot 80$ compared with $\$ 205 \cdot 82$ in May, 1976.

On Jan. x, 1976, the minimum wage set by federal law became $\$ 2 \cdot 30$ an hour for most nonagricultural employees subject to the Fair Labour Standards Act. This law covers employees engaged in or producing goods for interstate commerce and employees of certain large enterprises. The law requires at least time and half of employee's regular rate of pay for all hours over 40 a week for most covered workers.

Other non-agricultural employees employed in enterprises or occupations made subject to the minimum wage provisions on or after February $x$, 2967, becamd subject to a $\$ 2.30$ minimum wage on Jan. 1, 1977. The minimum wage for hired farmworkers was increased to $\$ 2 \cdot 20$ on Jan. 1, 1977, and will become $\$ 2.30$ an hour on Jan. $x, 1978$.

There are certain exemptions from these requirements in specific occupations and industries.
In addition to cash wages, most workers receive some type of " fringe "benefits-the most common forms being paid vacations, and public holidays, various types of insurance and health benefits financed by the employer or by employer and employees jointly.

ROADS
In 1975 there were 3,838, r46 miles of roads and streets in the United States, of which $3,198,596$ miles were in rural areas and 639,550 miles were in municipal areas. Surfaced roads and streets account for $3,700,704$ miles of the total; 737,442 miles were unimproved or graded and drained. State primary roads, including extensions in municipal
areas, total 477,892 miles ( 475,345 surfaced). Other roads and streets under State control total $3 \times 6,997$ miles ( 287,601 surfaced), $2,8 \times 6,002$ miles are under local control ( $2,264,845$ surfaced); and 227,255 miles ( 72,913 surfaced) are under Federal control (in national forests and parks).

An estimated total of $\$ 26,660,000,000$ was spent in 1975 for roads and streets in the United States. Of this total $\$ 17,282,000,000$ was spent for State highways, $\$ 3,853,000,000$ was spent for county and local rural roads, $\$ 4,892,000,000$ was spent for city streets and $\$ 633,000,000$ was spent roads in Federal areas. Capital outlay accounts for 53.5 per cent. of the total expenditure; 26.5 per cent. was spent for maintenance, and $7 \cdot 5$ per cent. for administration; 8.3 per cent. for highway police and safety; and 4.2 per cent. for interest on highway bonds.

Motor Vehicles and Taxation.-The number of motor vehicles registered in 1975 in the United States was $13^{2}, 950,410$, an increase of 2.3 per cent. over the r974 total of $\pm 29,993,169$. The State governments received $\$ 13,460,139,000$ in 1975 from motor fuel, motor vehicle and motor-carrier taxes. In 1975 the Federal Government received $\$ 5,602,676,000$ from excise taxes on motor vehicles and parts, tyres and tubes, petrol, diesel and special fuels and lubricating oils.

Accidents.-In 1975 there were 46,000 deaths caused by motor vehicle accidents. The death rate per $100,000,000$ vehicle-miles of travel was 3.5 in 1975, compared with 3.6 in 1974 .

## SHIPPING

The ocean-going Merchant Marine of the U.S. on April 1 , 1975, consisted of 910 vessels of 1,000 gross tons and over, of which 553 were privately owned and 357 were government-owned ships. Of the 553 privately owned active vessels, 168 were freighters, 6 were combination passenger and cargo, 223 were tankers, 16 were bulk carriers and 140 were intermodal types. There were 310 ships in the National Defense Reserve Fleet of inactive government-owned vessels, of which 78 were to be sold for scrap.

## AIR TRANSPORT

United States domestic and international scheduled airlines in 1976 were estimated to have carried $223,313,000$ passengers over $178,987,543,000$ revenue passenger miles. The freight flown by the scheduled airlines during 1976 totalled $5,074,175,000$ ton miles and express $22,003,000$ ton miles. In addition, the airlines flew $1,114,243,000$ ton miles of mail, an increase of $1 \cdot 5$ per cent. over r975.

Total operating revenues of all U.S. scheduled airlines reached the record figure of $\$ \mathbf{1 7 , 5 0 1 , 2 1 5 , 0 0 0}$ in 1976, an increase of $\mathbf{1 4} 4^{\circ}$ o per cent. over 1975. Similarly, total operating expenses rose to record high total of $\$ 16,779,282,000$ last year, or $=10.2$ per cent. increase over 1975. The net operating income (i.e. before deduction of taxes, interest, etc.). was $\$ 721,933,000$, resulting in a profit of $\$ 451,229,000$ compared with loss of $\$ 84,204,000$ in 1975 .
Ten principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines ( x ); (b) Local Service Carriers, operating routes of lesser traffic density between the smaller traffic centres and between small and large centres (8); (c) The International and Territorial Carriers, including all U.S. flag air carriers authorized to operate between the
U.S.A. and foreign countries, other than Canada, and over international waters; also between foreign countries and into Mexico, the Caribbean (xo); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Intra-Alaskan Carriers, providing service within Alaska (4); (f) All Cargo Carriers
(3); (g) Helicopter Carriers (3); (h) Suppiemental Air Carriers ( $\mathbf{x 4}$ ); (i) Air Freight Forwarding Companies ( $\mathbf{y} 8 \mathrm{r}$ ) and Air Taxi operators; and ( $j$ ) Intra-State Carriers, with operations limited to State boundaries.

## EDUCATION <br> State School Systems

All of the 50 States and the District of Columbia now have compulsory school attendance laws. In general, children are obliged to attend school from 7 to 16 years of age. Officers of local administrative units, usually known as truant or attendance officers, are charged with enforcing the compulsory attendance laws.
As of autumn 1975, $50,138,000$ children were enrolled in regular elementary and secondary day schools in the United States, of which $5,300,000$ or ro' 6 per cent., attended non-public schools.

The following percentages of the school-age population are estimated to be enrolled in school in the autumn of 1976: of 5 -year-olds (the usual kindergarten age), 87 per cent.; of 6 - to 13 -year olds (grades r through 8), 99 percent.; of 14- to ${ }^{17}$-year-olds (grades 9 through 12), 94 per cent.; and of 18 - to 24 -year olds (college age), 30 per cent.

Preliminary data for the $1976-77$ school year for public elementary and secondary regular day schools were as follows: enrolment of $44,393,000$; $2,208,000$ classroom teachers with an average salary of $\$ 13,270 ; \$ 64,300,000,000$ for current expenditures; $\$ 6,300,000,000$ for sites, buildings, furniture and equipment expenditures; and $\$ 2,100,000,000$ expended for interest on school debt.

Revenue for public school purposes comes from the Federal State, and local governments. Total estimated revenue receipts of $\$ 67,137,000,000$ for the $1975-76$ school year consisted of $\$ 5,346,000,000$ ( 8.0 per cent.) from the Federal government, $\$ 29,322,000,000$ ( 43.7 per cent.) from the State governments, and $\$ 32,469,000,000$ from local governments ( 48.3 per cent.).

During the $1975-76$ school year, the average daily attendance in public elementary and secondary schools was $41,373,473$ and high school graduates numbered $2,825,000$ (more than 99 per cent. are graduates of regular day schools).

## Institutions of Higher Education

In the autumn of 1975 enrolment in institutions of higher education numbered an estimated 9,800,000.

Institutions of higher education include universities, colleges, professional schools, and two-year colleges. The 1976 survey of enrolments covered 3,047 institutions classified as follows: $x, 9 \times 3$ universities, colleges and professional schools enrolling $7,161,15$ I students; and $\mathrm{x}, \mathrm{I} 34$ two-year colleges enrolling $3,944,772$ students. Publicly controlled institutions of higher education enrolled
78.7 per cent. $(8,741,548)$ of the students and privately controlled $2 x \cdot 3$ per cent. ( $2,364,375$ ).

During the school year 1974-75, an estimated 922,933 bachelor's degrees were conferred, 504,843 to men and 458,092 to women; $55,9 \times 6$ firstprofessional degrees, 48,956 to men and 6,960 to women; 292,450 master's degrees ( 162,570 to men and $\pm 30,880$ to women), and 34,083 doctorates, 26,817 to men and 7,266 to women. There were 166,969 bachelor's degrees in Education, $\mathbf{x 3 5}, 674$ in Social Sciences and 133,822 in Business and Management. The three leading fields of study for the master's degree were Education ( $x 99,77^{8}$ ), Business and Management $(36,364)$ and Social Sciences ( $\mathbf{1 6 , 9 2 4 \text { ). The most popular fields of study }}$ on the doctorate level were Education ( 7,433 ), Social Sciences $(4,209)$ and Physical Sciences $(3,626)$.

Particulars of some of the Universities (with opening autumn enrolment figures, 1976) are: Harvard ( 20,185 students, including $7,62 \mathrm{I}$ women), founded at Cambridge, Mass. Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and asum of money in 1638 ; Yale ( 9,860 students, including $3,5 \times 6$ women), founded at New Haven, Connecticut, in 170x; Bowdoin, Brunswick, Me. (founded 1794; 1,369 , including 504 women); Brown, Providence, R.I. (founded 1764; 6,785 students, including 2,768 women); Columbia, New York, N.Y. (founded 1754 ; 23,215 students, including 11,465 women); Comell (founded at Ithaca, N.Y., $1865 ; 17,697$ students, including 6,517 women); Dartmouth, Hanover, N.H. (founded $1769,4,188$ students, including r,086 women); Georgetowm, Washington, D.C. (founded 1789; 11,234 students, including 4.552 women); North Carolina, Chapel Hill, N.C. (founded in 1789 ; $\mathbf{x 9 , 9 3 0}$ students, including 9,378 women); Pennsylvania, Philadelphia, Pa. (founded 1740; 20,060 students, including 8,080 women); Pittsburgh, Pa. (founded 1787; 29,444 students, incl. 13,255 women); Princeton, N.J. (founded 1746; 5.915 men and x,839 women); Tennessee, Knoxville, Tenn. (founded 1794; 29,710 students, including 13,152 women); William and Mary, Williamsburg, Va. (founded $1693 ; 6$,orx students, including 2,910 women); New York University, founded in $183^{1}$ at New York, $30,38 \mathrm{I}$ students, including 54,048 women.

WEIGHTS AND MEASURES
The weights and measures in common use in the United States are of British origin. They date
back to the American Revolution when practically all the standards were intended to be equivalent to those used in England at that period. The principal units were the yard, the avoirdupois pound, the gallon, and the bushel. More or less authentic copies of the English standards of the denominations mentioned had been brought over and adopted by the different colonies. Divergencies in these weights and measures were, however, quite common, due no doubt to the fact that the system of weights and measures in England was not itself well established, and hence the copies brought to this country were often adjusted to different standards.
Because of these discrepancies, the system of weights and measures in the United States (U.S. Customary System) is not identical with the British system. The U.S. bushel and the U.S. gallon, and their subdivisions differ from the corresponding British units. Also the British ton is 2,340 pounds, whereas the ton generally used in the United States is the short ton of 2,000 pounds. The American colonists adopted the English wine gallon of $23 x$ cubic inches. The English of that period used this wine gallon and they also had another gallon, the ale gallon of 282 cabic inches. In 1824 these two gallons were abandoned by the British when they adopted the British Imperial gallon, equivalent to $277 \cdot 42$ cubic inches. At the same time, the bushel was redefined $=8$ gallons. In the British system the units of dry measure are the same as those of liquid measure. In the United States these two are not the same, the gallon and its subdivisions being used in the measurement of liquids, while the bushel, with its subdivisions, is used in the measurement of certain dry commodi-
ties. The U.S. gallon is divided into 4 liquid quarts and the U.S. bushel into 32 dry quarts. All the units of capacity mentioned thus far are larger in the British system than in the U.S. system. But the British fluid ounce is smaller than the U.S. fluid ounce, because the British quart is divided into 40 fluid ounces, whereas the U.S. quart is divided into 32 fluid ounces.

The rapidly diminishing world-wide use of the U.S. Customary and British Systems of measurement and the corresponding rise in metric usage, promoted the passage of Public Law 90-472. Pursuant to this law, the National Bureau of Standards conducted a programme of investigation, research and survey to determine the impact on U.S.A. of such increasing world-wide and domestic use of the metric system (SI), reporting back to Congress in July, 1975. The study recommended concerted, co-ordinated, but voluntary national effort to make the SI the predominant form of measurement in the United States. Legislation to effect this recommendation has been introduced in Congress. In December 1975, Public Law 94-168, the Metric Conversion Act of 1975, was passed. It declared "that the policy of the United States shali be to coordinate and plan the increasing use of the metric system in the United States, and to establish a United States Metric Board to coordinate the voluntary conversion to the metric system."
The International System of Units-officially abbreviated SI-is a modernized version of the metric system. It was established by international agreement to provide a logical and interconnected framework for all measurements in science, industry and commerce.

## TERRITORIES, ETC. OF THE UNTTED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about I sq. mile); Johnston (or Cornwallis) Island and Sand Island (about I sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam, Howland, Baker and Jarvis Islands (about 3 sq . miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other islands of the Samoan group east of longitude $x 75^{\circ}$ west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa lsland (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and $=$ population of 10t,592 in 1970. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes are considered appertaining to the United States. Responsibility for territorial affairs generally is centred in the Director, Office of Territorial Affairs, Dept. of the Interior, Washington, D.C.

## CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. yo, 1938, Canton and Enderbury (of the Phoenix

Island Group in the Central Pacific) were declared to be for the common use of Great Britain and U.S.A. for aviation and communication. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

Canton Island was successively used for aviation support activities and as a missile tracking station by the U.S. National Aeronautics and Space Administration. These activities have been terminated. Enderbury has been uninhabited since World War II.

## GUAM

Guam, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in $x 3^{\circ} 26^{\prime} \mathrm{N}$. lat. and $144^{\circ} 39^{\prime}$ E. long., at a distance of about x,506 miles east of Manila. The area of the island is estimated at 209 square miles, with m estimated civilian population (1974) of $105,000$.

The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941 but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August I , 1950 (Public Law 630 of the 8 Ist Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. The Governor is popularly elected. In 1972 a non-voting delegate was elected to serve in the U.S. House of Representatives. A

2x-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law. Governor, Ricardo J. Bordallo; elected Nov. 1974*
Lt. Governor, Rudolph G. Sablan; elected Nov. 1974.
Capital, Agaña. Port of entry, $\Psi$ Apra.

## WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 8898 , has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese, Dec. 27, 194x; it was re-occupied by U.S. on Sept. 15, 1945. Population (1970), 1,647.

Midway Islands, with I total area of 28 sq. miles and - population ( 1970 ) of 2,220 , lie in the N. Pacific about $\mathbf{x}, 300$ miles from Hawaii. There is no indigenous population.

## PUERTO RICO

Puetto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50^{\circ}-18^{\circ} 30^{\prime} \mathrm{N}$. lat. and $65^{\circ} 30^{\prime}-67^{\circ} 15^{\prime}$ W. long., with $=$ total area of 3,435 square miles and a population (1976) of $3,212,000$. The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about InI miles from west to east, and $3^{6}$ miles from north to south at the western end, narrowing towards the eastern extremity. The capital is $x, 600$ miles distant from New York, and 1,000 miles from Miami. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de Léon in 150 . In continued a Spanish possession until Oct. 18, 1808, when the United States took formal possession as $\quad$ result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified mit April Ix, 1899. Sugar is grown along the coastal plain and tobacco and coffee int the slopes of the hills; fruits, cotton, maize, sweet potatoes and yams are also grown. The trade is principally with the U.S. In 1976 there were 4 , 19 I miles of highway under maintenance. There are good harbours at San Juan, Mayaguez and Ponce.

The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members ( 2 from each of 1 senatorial districts and II at large) and the House of Representatives of 5 members ( $x$ from each of 40 representative districts and II at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for 1 term of 4 years. A Supreme Court of 9 members is appointed by the Governor, with the advice and consent of the Senate. The Governor appoints all Judges. There are 13 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. Puerto Rico is represented in Congress by a Resident Commissioner, elected for term of 4 years, who has a seat in the House of Representatives, but not a vote, although he has a right to vote on those committees of which he is a member. Great improvement has been made in the progress, industrialization and welfare of the island during the last two decades. A programme of tax exemption has raised income from industry to - level higher than that from agriculture. Public
and private schools are established throughout-enrolment in 1976 was 715,000 .

CAPITAL.- $\Psi$ San Juan, population 982,730 ; Other major towns are: $\Psi$ Ponce ( $\mathbf{x} 75,690$ ) ; Bayamón ( 183,690 ); $\Psi$ Mayagüez ( 99,010 ): and $\Psi$ Arecibo ( 86,690 ).

## AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of $76^{\prime} 5$ square miles and a population of 27,769 in 1970 .

Tutuila, the largest of the group, has an area of 52 square miles and contains a magnificent harbour at $\Psi$ Pago Pago (pop. 1960, $1,25 \mathrm{x}$ ). The constitution of American Samoa designates the village of Fagatogo as the seat of government. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July $x$, I95I, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces or other naturalization procedure.
Governor, Earl B. Ruth.

## TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude $\Sigma^{\circ}$ to $20^{\circ}$ north and from longitude $130^{\circ}$ to $172^{\circ}$ east. They cover an ocean area of $3,000,000$ square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1970 was 101,592. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary considerably among island groups and even more among islands and atolls in the same geographic area. Nine different languages are spoken in the territory.
The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947, administration being under the general jurisdiction of the Secretary of the Interior.

For administrative purposes, the territory is divided into six districts: The Marianas, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.
High Commissioner, Adrian P. Winkel.
Depuly High Commissioner, (vacant)
Capital (Provisional).-Saipan, Mariana Islands.

## VIRGIN ISLANDS

Purchasel by the United States from Denmark for the of $\$ 25,000,000$, and proclaimed, January 25 , 1917. The total area of the islands is 133 sq. miles, with a population (estimated 1972), of 90,000 . St. Thomas ( 28 sq . miles) had a population of 29,565 ; St. Croix ( 84 sq. miles) had a population of 3 r,892; St. John (zo sq. miles) had a population of $\mathbf{x , 7 4 3}$.

Capital, $\Psi$ Charlotte Amalie contains one of the finest harbours in the West Indies. The government of the Virgin Islands is organized under the provisions of the Revised Organic Act of the Virgin Islands, enacted by the Congress of the United States nil July 22, 1954. Legislative power is vested in the Legislature of the Virgin Islands, a unicameral body composed of 15 senators popularly elected for two-year terms. Virgin Islanders are citizens of the United States. From the elections of November, 1970 , the Governor has been popularly elected. In 1972, a non-voting delegate was elected to serve in the U.S. House of Representatives. The Virgin Islands are now $\quad$ favourite tourist area in the Caribbean. The climate of the islands is delightful at all times, and particularly so during the winter months.
Governor, Cyril E. King, elected Nov. 1974. Lieut.-Governor, Juan F. Luis, elected Nov. 1974.

## THE PANAMA CANAL

The Panama Canal, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July $x$, 195x, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General H. R. Parfitt, U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

The Canal Zone has an area of 647 sq . miles (about I per cent. of the total area of Panama) (land area, 372 sq. miles) and a population in 1970 of 51,000 .

Chief Towns.-Balboa Heights, Balboa, Ancon, Gamboa and Margarita.

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last so fiscal years (see table in col. 1). In 1974 the 14,033 vessels using the canal carried the highest tonnage so far recorded.

| Fiscal <br> Year | No. of <br> Transits | Canal, <br> Net Tons | Cargo <br> Tons |
| :---: | :---: | :---: | :---: |
| 1965 | 11,835 | $74,853,264$ | $76,573,071$ |
| 1966 | 11,926 | $78,518,013$ | $81,712,940$ |
| 1967 | 12,413 | $88,266,343$ | $86,193,430$ |
| 1968 | 13,199 | $96,487,843$ | $96,550,165$ |
| 1969 | 13,150 | $100,603,265$ | $101,391,132$ |
| 1970 | 13,658 | $108,141,640$ | $114,257,260$ |
| 1971 | 14,020 | $111,006,363$ | $1 \times 8,626,906$ |
| 1972 | 13,766 | $112,971,058$ | $109,233,725$ |
| 1973 | 13,841 | $126,203,549$ | $126,104,029$ |
| 1974 | 14,033 | $135,715,628$ | $147,906,914$ |
| 1975 | 13,609 | $135,053,680$ | $140,101,459$ |

The canal is fifty statute miles long ( 44.08 nautical miles), and the channel is from 500 to $x, 000$ feet wide at the bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, x step at Pedro Miguel and 2 at Mirafores on the Pacific side. Each lock chamber is $x, 000$ feet long and iro feet wide. Transit from sea to sea takes on average 8 to xo hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging.

The Panama Canal Company is engaged in Canal improvement programme. The widening of Gaillard Cut from 300 to 500 feet was completed in August, 1970. The maximum draft allowable for ships using the Panama Canal is determined by the level of Lake Gatun, which is average of 85 feet above sea level. During dry season, from December to April, the lake level drops, imposing draft restrictions. The all-time high maximum tropical fresh water draft was 40 feet for certain types of vessels in $\mathbf{1 9 6 7}$.

## BRITISH EMBASSY

$3^{100}$ Massachusetts Avenue, N.W.
Washington, D.C. 200008

## The United Nations

## CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers w Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 2x-Oct. 7; 1944. The design was discussed and criticized at San Francisco from April 25 to June $\mathbf{2 6}$, $\mathbf{1 9 4 5}$, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York. October 24 has been designated " United Nations Day ".
The following 147 states are members of the United Nations:-
Afghanistan, Albania, Algeria, Angola, Argentina,* Australia,» Austria, Bahamas, Bahrain, Bangladesh, Barbados, Belgium,* Benin, Bhutan, Bolivia,* Botswana, Brazil,* Bulgaria, Burma, Burundi, Byelorussian Soviet Socialist Republic,* Cambodia, Cameroon, Canada, ${ }^{\star}$ Cape Verde, Central African Empire, Chad, Chile,» China,» Colombia,* Comoros, Congo (Pop. Repub.), Costa Rica,* Cuba,* Cyprus, Czechoslovakia,* Denmark,* Dominican Republic,* Ecuador,* Egypt,* El Salvador,* Equatorial Guinea, Ethiopia,* Fiji, Finland, France,* Gabon, Gambia, Germany (East), Germany (West), Ghana, Greece,* Grenada, Guatemala,* Guinea, Guinea-Bissau, Guyana, Haiti,* Honduras,* Hungary, Iceland, India, » Indonesia, Iran, * Iraq, » Republic of Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Kampuchea, Kenya, Kuwait, Laos, Lebanon,* Lesotho, Liberia, $\star$ Libya, ${ }^{\text {TL }}$ Luxemburg, $\star$ Madagascar, Malawi, Malaysia, Maldive Islands, Mali, Malta, Mauritania, Mauritius, Mexico, $\star$ Mongolia, Morocco, Mozambique, Nepal, Netherlands,* New Zealand,* Nicaragua,* Niger, Nigeria, Norway,» Oman, Pakistan, Panama,* Papua New Guinea, Paraguay,» Peru,» Philippines,» Poland,» Portugal, Qatar, Rumania, R wanda, Sao Tome and Principe, Saudi Arabia,* Senegal, Seychelles, Sierra Leone, Singapore, Somalia, South Africa,* Spain, Sri Lanka, Sudan, Surinam, Swaziland, Sweden, Syria,* Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey,* Uganda, Ukrainian Soviet Socialist Republic,* Union of Soviet Socialist Republics,* United Arab Emirates, United Kingdom,* United States of America,* Upper Volta, Uruguay, ${ }^{\star}$ Venezuela,» Yemen (Arab Repub.), Yemen (P.D.R.), Yugoslavia,* Zaire, Zambia.

* Original member (i.e. from 1945). (From October 25, 1971, "China " was taken to mean the People's Republic of China.)

The principal organs of the United Nations are:(x) The General Assembly; (z) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

## 1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once $\quad$ year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided among seven Main Committees, on each of which every Member has the right to be represented:(x) Political and Security (including the regulation
of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committeesa General Committee and a Credentials Committee; and three standing committees-an Advisory Committee on Administrative and Budgetary Questions, Committee on Contributions and Disarmament Commission.

The General Assembly appoints such ad hoc committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission. In 1964 the General Assembly set up the United Nations Conference on Trade and Development (UNCTAD) as a permanent body.

The United Nations Industrial Development Organization (UNIDO) was set up on Jan. $x, 1967$ to promote industrialization and co-ordinate United Nations activities in this field.
President of the United Nations General Assembly,
H. S. Amerasinghe (Sri Lanka) (x976).

## 2. The Security Council

The Security Council consists of fifteen Members, each of which has one representative and one vote. There are five permanent Members (China, France, U.K., U.S.A., U.S.S.R.) and ten non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of sever Members. On all other matters the affirmative vote of nine Members must include the concurring votes of the permanent Members, and it is this clause which makes the Veto possible. The only exception to this rule is that with regard to measures for peaceful settlement party to a dispute may refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A nonmember State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A Committee on the Admission of New Members was set up by the Security Council on May 17 , r946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes ad hoc committees and commissions which may be required from time to time for special purposes.

## 3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Pacific, Western Asia, Latin America and Africa. The Council also supervises and co-ordinates the work of fourteen related agencies.

United Nations Children's Fund (UNICEF).UNICEF embraces all aspects of child welfare and assists the governments of the developing countries in developing maternal and child health services, the prevention and treatment of disease, nutrition and the preparation of children for adult life. It is financed by voluntary contributions from Governments and from the public and its work is carried out in co-operation with the relevant technical members of the United Nations.
4. Trusteeship Council

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and one other country elected by the General Assembly for three-year term.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

## 5. Intermational Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are ipso facto parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to - case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

President, Eduado Jimenez de Arechaga (Uruguay)

## THE SECRETARIAT

Secretary-General (x972-77), Kurt Waldheim (Austria).

Under-Secretaries-General
Inter-Agency Affairs and Co-ordination, C. V. Narasimhan (India).
Special Political Affairs, B. E. Urquhart (U.K.); Roberta Guyer (Argentina).
Conference Services, B. Lewandowski (Poland).
Economic and Social Affairs, Gabriel Van Laetham (France).
Political Affairs and Decolonization, Ming-Chao Tang (China).
Political and Security Council Affairs, A. Shevchenko (U.S.S.R.).

Director-General, U.N. Office, Geneva, V. Winspeare Guicciardi (Italy).
Office or Administration and Management, G. Davidson (Canada).
Legal Counsel, E. Suy (Belgium).
U.N. Information Centre, $\mathbf{I 4}^{\mathbf{1 5} 5, \text {, Stratford Place, W.x. }}$ BUDGET OF THE UNITED NATIONS
The budget is now approved for periods of two
years, and the appropriation for the biennium

1976-77 is U.S. $\$ 783,932,900$ (gross). The scale of assessments for $1974-76$ includes: Australia, $1 \cdot 52$ per cent.; Canada, $2 \cdot 96$ per cent. ; India, o 70 per cent.; New Zealand, $0 \cdot 28$ per cent.; United Kingdom, 4.44 per cent. The United States contribution is 25 .00 per cent.; U.S.S.R. is 11 ' 33 per cent.; France is 5.66 per cent.; Italy is 3.30 per cent and Japan is 8.66 per cent.

## UNITED KINGDOM REPRESENTATIVES 845 Third Avenue, New York

Permanent Representative to the United Nations and Representative ill the Security Council, Ivor Seward Richard, Q.C. (1974).
Minister and Deputy Permanent Representative, James Murray, C.M.G.
Minister (Economic and Social Affairs), P. H. R. Marshall, C.M.G.
Counsellors, R. A. C. Byatt (Head of Chancery); P. R. N. Fifoot (Lagal Adviser); A. S. Donkin (Administration); M.F.H. Stuart (Tyeasury Adviser). 1st Secretaries, C.C.R.Battiscombe; A. D. Brighty; A. D. Cordery; R. J. Dalton; J. B. Donnelly; R. J. S. Edis; S. W. J. Fuller; Miss S. E. Harden, M.B.E.; A. J. C. E. Rellie; T. L. Richardson; Miss E. C. Wallis, M.B.E.

## INTERNATIONAL ATOMIC ENERGY AGENCY <br> Kärntnerring II-13, P.O. Box 590, Vienna

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it or under its supervision is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and some of the specialized agencies. In June, 1977, 110 states were members.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (34 members) carries out the functions of the Agency and meets usually four times a year. The Budget in 1977 amounted to $\$ 43,501,000$.
Director-General, Sigvard Eklund (Sweden).

## INTERNATIONAL AGENCIES

Fourteen other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organization (ILO) Geneva (London Branch Office, $87-9$ N New Bond Street, W.I.). Established with the League of Nations in 1919 under the Treaty of Versailles, the ILO became in 1946 the first specialized agency associated with the United Nations. In June, 1977, the Organization had 135 member States. The aim of the ILO is to promote lasting peace through social justice, and to this end it works for better economic and social conditions everywhere. It was awarded the Nobel Peace Prize in 1969.

The ILO establishes international labour standards, which set guidelines for improving working conditions and protecting basic human rights; runs a world-wide programme of technical assistance to developing countries (with funds from all sources amounting in $1977-78$ to about $\$ 86$ million); conducts research and disseminates information on the human aspects of economic activity, with a view to improving social and economic well-being. Through its World Employment Programme, the $\Pi 0$ is attacking unemployment and its associated
ills by aiding national and international efforts to provide productive work for the world's fastgrowing population. It is also developing an international programme for the improvement of working conditions and the working environment.

The International Labour Conference, composed of national delegations of two government delegates, one worker delegate and one employer delegate, meets at least once a year. It formulates international labour standards and broad policies of the Organization, provides a forum for discussion of world labour and social problems, and approves the LLO's work programme and budget, which is financed by member States.
A 56 -member Governing Body, composed of 28 government members, 14 worker members and 14 employer members, acts as the Organization's executive council. Ten governments hold seats on the Governing Body because of their industrial importance. These are Canada, China, France, the Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States of America.
The International Labour Office, the secretariat of the Organization, collects and distributes information, assists governments on request in drafting legislation on the basis of international labour standards, directs technical co-operation activities, and issues publications.
Director-General, Francis Blanchard (France).
Food and Agriculture Organization of the United Nations (FAO), Viale delle Terme di Caracalla, Rome.-Established on October 16, r945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy and ensuring man's freedom from hunger. Among its many activities the Organization promotes the global exchange of information in the fields of agriculture, forestry and fisheries, facilitates international agreement in these fields and provides technical assistance in such subjects as nutrition and food management, soil erosion control, re-afforestation, the establishment of paper industries, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. As well as its work as an intergovernmental agency the Organization also mobilizes the efforts of private individuals and associations through the world-wide Freedom from Hunger Campaign. Jointly with the United Nations it administers $\$ 1 \mathbf{1}, 000,000,000$ World Food Programme using food as capital backing for development programmes in developing countries. The I975 session of the governing Conference approved budget of $\$ 167,000,000$ for the two years 1976-77. In addition FAO is carrying out field programmes involving expenditure of about $\$ 100,000,000$ under the U.N. Development Programme and other aid programmes. Through its co-operative programme with the World Bank it is helping to increase international investment in agriculture and allied fields.

The policy of the Organization is directed by two-yearly Conference of the 136 member countries. A council ( 42 members) acts for the Conference between its sessions.
Director-General, Edouard Saouma (Lebanon).
United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris 75700.--Under its constitution, the Organization makes its contribution to peace
and security by promoting collaboration among its Member States in the fields of education, science, culture and communications. It aims at furthering a universal respect for justice, for the rule of law and for human rights, without distinction of race, sex, language or religion, in accordance with the Charter of the United Nations.
Unesco continues to work for the advancement of mutual knowledge and understanding of peoples ... to give fresh impulse to popular education and to the spread of culture . . . to maintain, increase and diffuse knowledge.
The Organization is composed of three organs: (i) the General Conference, consisting of representatives of Member States, which meets biennially to decide the programme and budget; (ii) the Executive Board, composed of 45 members elected by the General Conference to supervise the execution of the approved programme and (iii) the Secretariat, which is responsible for Unesco's day-to-day functioning and the execution of the programme. In most Member States National Commissions serve as a link with Unesco and help carry out the programme. The broad objectives of Unesco: in education, its democratization and regeneration; in science, the development of science policy, the application of science and technology to development and the intensification of international programmes of scientific co-operation; in culture, the evolution of cultural policy; in communication, the improvement and development of the mass media in Member States as a means of increasing the flow of information. Member States in July, 1977, 142 and one Associate Member (the British Eastern Caribbean group).
Director-General, Amadou-Mahtar M'Bow(Senegal).
U.K. National Commission for UNESCO, Ministry of Overseas Development, Stag Place, S.W.I.

Secretary, D. Church.
World Health Organization (WHO), 121 I Geneva 27. Established on April 7, 1948, the aim of the World Health Organization is the attainment by all peoples of the highest possible level of health. It provides expert assistance for its member governments in their efforts to develop health manpower, streamline health services, control communicable diseases, promote family health-including mother and child care, family planning, nutrition and health education-and strengthen environmental health. It promotes biomedical and health services research through some 500 collaborating research centres in different parts of the world. Its other services include the International Pharmacopocia, drug evaluation and monitoring, biological standardization, epidemiological surveillance and scientific publications. - Approved budget for $1978, \$ 165,000,000$. Membership (June 1977), 150.

Organs are a World Health Assembly meeting annually to frame policy, an Executive Board ( 30 members), meeting at least twice $\quad$ year, and I Secretariat.
Director-General, H. T. Mahler (Denmark).
International Bank for Reconstruction and Development (The World Bank), 1818 H Street, Washington, D.C.; European office, 66 Ave. d'Iéna, 75 116, Paris, France. - Established on Dec. 27,1945, to assist in the reconstruction and development of territories of member countries by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other
resources. The $x, 452$ loans made by the Bank since its inception to June 30, 1977, totalled $\$ 38,610,400,000$. Subscribed capital, June 30 , 1977, \$30,869,253,000.

The Board of Governors consists of one Governor and one alternative appointed by each of the 129 member countries.

Twenty Executive Directors exercise all powers of the Bank except those reserved to the Board of Governors. The President, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff.

## President, Robert S. McNamara (U.S.A.).

International Development Association (IDA), 18 x 8 H Street, Washington, D.C.; European office, 66 Ave. d'léna, 75 I16 Paris, France.-an affiliate of the World Bank established in September 1960. Its purposes are to promote economic development, increase productivity and thus raise standards of living in the less developed areas of the world included within the Association's membership, in particular by providing finance to meet their important developmental requirements on terms which are more flexible and bear less heavily on the balance of payments than those of conventional loans, thereby furthering the objectives of the World Bank and supplementing its activities. IDA's Board of Governors and Executive Directors are the same as those holding equivalent positions in the World Bank, serving ex officio in IDA. By June 30, 1977, DA had extended 753 development credits totalling $\$ 11,298,000,000$ in 69 countries for improved transportation, agriculture, electric power facilities, industry, education and municipal water supplies. The credits were for terms of 50 years, free of interest.

International Finance Corporation (IFC), $18 \times 8$ H Street, Washington, D.C.; European representative, New Zealand House, Haymarket, S.W.r.The IFC was established in 1956 as an affiliate of the World Bank to assist less developed member countries by promoting the growth of the private sector of their economies. IFC's share capital of $\$ 108,342$,000 at June 30, 1977, had been subscribed by 106 countries. In addition, IFC is empowered to borrow up to approximately $\$ 780,000,000$ from the World Bank for use in its lending programme. At the end of June, 1977, IFC had made commitments totalling more than $\$ x, 712,000,000$ in 62 countries.
President, Robert S. McNamara (U.S.A.).
International Monetary Fund, 19 th and $H$ Streets, N.W. Washington, D.C.-Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of 1 multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. $\mathrm{I}^{\mathrm{x}}$ countries were in membership of the Fund in June, 1977.

The Fund's financial assistance takes the form of a foreign exchange transaction. The member pays to the Fund an amount of its own money equivalent to the amount of foreign currency it wishes to purchase. The member is expected to "repurchase" its own currency from the Fund within three, or at the outside five years, with a payment of gold or dollars or convertible currency acceptable to the Fund. These arrangements are subject to certain charges which rise in proportion to the amount of foreign exchange involved, and the length of time it is held.

Currencies drawn from the Fund may be used in a flexible way to relieve the member's payments difficulty, but its assets are not intended to be used for military purposes, or for programmes of economic development.

Each member of the Fund is assigned a quota which approximately determines its voting power and the amount of foreign exchange that it may draw from the Fund. The subscription of each member is equal to its quota, and is payable in the member's own currency.
Managing Director, H. Johannes Witteveen (Netherlands).
International Civil Aviation Organization (ICAO), International Aviation Square, $\mathbf{x , 0 0 0}$ Sherbrooke Street, W., Montreal, Quebec, Canada. In existence since April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations or operation, and simpler procedures at international airports. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. I40 states are now members of ICAO.
An Assembly of delegates from member states meets at least once every three years. A Council of 30 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.
President of Council, Assad Kotaite (Lebanon). Secretary-General, Yves Lambert (France).

Universal Postal Union (UPU), Weltpoststrasse 4, 3000 Berne 15. - Established on October 9, r874, by the postal Convention of Berne and in operation from July $\mathrm{x}, \mathrm{I8} 75$, UPU exists to form $\quad$ single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union includes almost all the countries of the world. Budget, 1977, \$U.S.6,363,825. A Universal Postal Congress meets at five-yearly intervals, the last Congress was held at Lausanne in 1974. The next is due to be held in Brazil in 1979.
Director-Ceneral, Mohamed I. Sobhi (Egypt).
International Telecommunication Union (TTU), Place des Nations, Geneva.-Founded at Paris in 1865 as the International Telegraph Union. ITU became II U.N. Specialized Agency in 1947 and as from Jan. I, I975, is governed by the Convention adopted by the Torremolinos Conference held in 1973. ITU exists to set up international regulations for telegraph, telephone and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio
frequency assignments. It studies, recommends, collects and publishes information on telecommunication matters, including space radio communications. The Budget for 1977 is $74,034,000$ Swiss francs.

Secretary-Geneval, M. Mili (Tunisia).

World Meteorological Organization (WMO), Geneva.-Came into existence in-195I. The present membership is 139 States and Territories. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology and hydrology, and to promote the establishment and maintenance of centres providing meteorological and related services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, water problems, agriculture, and other human activities; to promote activities in operational hydrology and to further close cooperation between meteorological and hydrological services; to encourage research and training in meteorology and to coordinate their international aspects. Budget (1976-79), \$U.S.40,542,000. A World Meteorological Congress meets at least once every four years. An Executive Committee ( 24 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six Regional Meteorological Associations (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), eight technical commissions and a Secretariat. Secretary-General, D. A. Davies (U.K.).

Inter-Governmental Maritime Consultative Organization (IMCO), 1or-104 Picadilly, W.. A United Nations Specialized Agency established on March 17, 2958, to provide means for co-operation
and exchange of information among governments on technical matters related to international shipping, especially with regard to safety at sea and preventing marine pollution caused by ships. IMCO is responsible for calling maritime conferences and drafting maritime agreements, e.g. Load Line Convention, 1966 and Convention on Tonnage Measurement of Ships. It has produced International Maritime Dangerous Goods Code; Code of Safe Practice for Bulk Cargoes; Code for the Construction and Equipment of Ships carrying Liquified Gases in bulk; revised International Code of Signals, and fire safety measures for ships. In June, $x 977,103$ nations were in membership. Budget, 1976 -77, \$1 $, 249,000$.
Secretary-General, C. P. Srivastava (India).
International Trade. General Agreement on Tariffs and Trade (GATT), Centre William Rappard, Rue de Lausanne 154, CH-12ix, Geneva 21. A multilateral treaty, in operation since 1948 , to which 83 countries are parties; a further 28 countries apply GATT de facto. Its rules thus govern over fourfifths of the world trade. Objectives of GATT are to expand international trade and promote economic development. GATT provides a permanent forum for discussion and solution of particular international trade problems, and for multilateral negotiations to reduce tariffs and other obstacles to the expansion of international trade. In September 1973, 102 countries agreed in Tokyo to launch comprehensive new negotiations in GATT, known as the "Tokyo Round", aimed at further reductions in both tariff and nontariff barriers to industrial and agricultural trade. Special attention is given to trade problems of developing countries. An International Trade Centre, set up by GATT in Ig64 to aid developing countries in export promotion is now operated jointly by GATT and UNCTAD.
Director-General, O. Long (Switzerland).

## Foreign Countries

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Capitals, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies and Consulates-General in London for various corrections and additions.

Salaries and Allowances
The Salaries of Officers of H.M. Diplomatic Service are shown below. In addition foreign allowances are assigned to officers serving abroad:-
$\star$ Grade 1 - $£ 18,675$.
*Grade $2-£_{14,000}$.
*Grade $3-£ 12,465$.
*Grade 4 - $£ 9,115$ to $£$ IIr,465.
*Grade ${ }^{5}$ - $£ 8,515$
tGrade $5-\AA 6,145$ to $£ 7,915$.
$\dagger$ Grade $6-£ 5,365$ to $£ 6,365$.
$\dagger$ Grade $7 \mathrm{~A}-\mathrm{E}_{4,869}$ to $£ 5,898$.
$\dagger$ Grade $7 \mathrm{E}-\mathcal{C}_{4,365}$ to $£ 5,165$.
tGrade 8-£2,860 to $£ 4,135$.
†Grade $9-£ 2,350$ to $£ 4,135$.
tGrade $10-£ 1,665$ to $£ 3,005$.
*Plus supplement of $£ 208$
$\dagger$ Plus supplement of up to $\mathcal{L}_{5} 22$
NOTE.-Salaries of Ambassadors and of Ministers plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each ab the maximum salary for the post and exclude Frais de Représentation.

Ambassador Extraordinary and Plenipotentiary, His Excellency Abdur-Rahman Pazhwak.
zst Secretary, Mohammed Aziz Naim.
Afghanistan lies to the N. and W. of Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the ast century B.c. The estimated area is 250,000 sq. miles, and the population (U.N. estimate, 1969 ) $\times 6,5 \times 6,000$. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the
main divisions being the Durranis, from whom the Royal Family came, and the Ghilzais. Then come the Tadjiks, an Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Iran (boundary fixed 1857 and 1904), ca the $S$. by Baluchistan (now Pakistan) (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed $1886-7$ and $1893-5$ ), and on the E. by the N.W. Frontier Province (now Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Iran frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Mary and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission 11 1948. An Afghan-Chinese border treaty was signed in r963 and the border demarcation in 1964. The PakistanAfghan frontier was settled by the Durand agreement of 1893.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into 26 provinces each under a Governor.

Government.-The Constitutional Monarchy, introduced by the 1964 Constitution, was overthrown by a coup d'etat on July 17 1973. The country was ruled by Presidential decree until February 1977 when 1 constitution was approved by a Loya Jirgah (Grand Assembly). Mohammad Daoud was elected President of the Republic for - term of six years.

By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Judiciary. - Hitherto Afghanistan has been ruled on the basis of Shariat or Islamic law. However, the Constitution introduced in 1965 provided for the creation of a legal code, and for a new structure of courts, consisting of lower court in each wuluswal (sub province), and a court of appeal in each province, with a Supreme Court in Kabul. The complete separation of executive and judiciary in this constitution was abolished by Presidential Decree in July, 1973. In late 1976 and early 1977 new Penal and Civil Codes were published.

Defence.-The Army has been reorganized and is recruited by yearly calls. Service is for one year for officers and $z$ years for other ranks. The peace strength is about $\mathbf{x} 00,000$. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern.

Production.-Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, ar lentils, the other of rice, millet, maize, and dal. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, fron, lead, rubies, lapis lazuli, gold, chrome and talc are found.
The following main roads are open to motor traffic. (a) Internal: Kabul-Kandahar (3ro miles); Kandahar-Herat ( 350 miles); Herat-Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif-Kabul ( 380 miles). Also Kabul-Khanabad-Faizabad ( 450 miles) ; Kabul-Gardez ( 80 miles); Kabul-Bamian ( 140 miles). The road from Kabul to the North has now been shortened by the completion in 1964 of the Salang pass. (b) Roads to the frontiers: Kabul-Khyber ( 175 miles); Kandahar-Chaman ( 70 miles) and roads from Herat to the Russian and Iranian borders. Five of the major roads in Afghanistan have been surfaced by U.S. and Soviet Aid. The Kabul-Khyber, Kandahar-Spin Baldak and Kabul-Kunduz-Qizil Qala roads are also surfaced. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Motor transport has taken the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (rgo miles), and the road from Kandahar to Chaman ( 70 miles). Internal air services between the main towns are being developed.
Language and Literature.-The languages of the country are Persian and Pushtu, and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pushtu. The Government is encouraging the spread of Pushtu, the language of the Pathans. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, 1 grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have become eligible for income-tax.

Trade with U.K. 1975
 Exports to U.K..... 8,645,000 18,508,000
Exports mie mainly Persian lambskins (Karakul), fruits, cotton, raw wool, carpets, spice and natural gas, while the imports are chiefly oil, cotton yarn and piece goods, tea, sugar, machinery and transport equipment.

Capital, Kabul (about 500,000 ). The chief commercial centres are Kabul and Kandahar ( 125,000 ). Other provincial capitals Herat ( 86,000 ), Mazar-i-Sharif(42,000), Jalalabad ( 22,000 ).

Flag.-Vertical stripes of black, red and green, with gold emblem.

National Day.-July 27.

## British Embassy <br> (Kabul)

Ambassador Extraordinary and Plenipotentiary, His
Excellency Kenneth Roy Crook (1976). ist Secretary, A. J. Ramsay (Consul).
and Secretary, E. J. W. Lensh (Commercial).
Oriental Secretary, H. A. P. Tesorière (Vice Consul).

British Council Representative.-P. A. Connell, P.O. Box 453, 855 Shehabuddin Wat, Kabul (British library).
Kabul is distant 5,000 miles from London, transit 21 days; by air 12 hours.

## ALBANIA

Head of State, Haxhi Lleshi, assumed office, July 24, 1953.

Chairman, Council of Ministers, Mehmet Shehu. Labour (= Communist) Party Politbureau of the Central Committee, R. Alia; A. Carcani; K. Hazbiu; Enver Hoxha; H. Isai; H. Kapo; S. Koleka; R. Marko; P. Miska; M. Myftiu; M. Shehu; H. Toska (full members); L. Gegprifti; Q Mihali; P. Peristeri; L. Cuko; S. Stefani (candidate members). Secretariat of the Central Committee, Enver Hoxha (First Secretary); R. Alia; H. Isai; H. Kapo; P. Mutta.
Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1975) of $2,432,000$.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under ColonelGeneral Enver Hoxha as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945 : on Jan. II, 3946, the Constituent Assembly declared Albania an independent Republic. It admitted to the United Nations in 1955. United Kingdom diplomatic relations with Albania ceased in 1939 and have so far not been restored.

Although Albania was almost entirely magricultural country (staple crops are wheat and maize), industrial expansion of her natural resources is now in process.

CAPITAL, Tirana (pop. 200,000).
FLAG. - Black-two-headed eagle surmounted by yellow outline star, all on a red field.

## ALGERIA

President of State, President of the Council of Revolution and Minister of National Defence, Houari Boumedienne, assumed office June 19, 1965.

Cabinet
Secretary General of the Presidency, Abdelmadjid Allahoum.
Secretary of the Government, Smail Hamdani.
President of the National and Popular Assembly, Rabah Bitat.

## Ministers:

Foreign Affairs, Abdelaziz Bouteflika.
Interior, Abdelghani Mohamed Benahmed.
Finance, Mohamed Seddil Benyahia.
Heavy Industry, Mohamed Liassine.
Light Industry, Belaid Abdesselam.
Energy and Petrochemicals, Sid Ahmed Ghozali.
Information and Culture, Redha Malek.
Primary and Secondary Education, Mustefa Lacheraf.
Higher Education and Scientific Research, Abdelatif Rahal.
Transport, Ahmed Draia.
Labour and Occupational Training, Mohamed Amir.
Agriculure and Agrarian Reform, Mohamed Larbi Tayebi.
Justice, Abdelmalek Benhabyles.
Tourism, Abdelghani Akbi.
Youth and Sports, Djamel Houhov.
Commerce, M'hamed Hadj Yulu.
Ex-Servicemen, Mohamed Said Mazouzi.

Housing and Building Construction, Abdelmadjid Aouchiche.
Public Health, Said Ait-Messaoudene.
Posts and Telecommunications, Mohamed Zerguini.
Water, Land Use and Environment, Ahmed Benoherif.
Public Works, Boualem Benhamouda.
Secretariat of the Plan, Kamel Abdellah Khodja.

## Algerian Embassy in London 6 Hyde Park Gate, S.W. 7 [0I-584 9502]

Ambassador Extraordinary and Plenipotentiary, His Excellency Lakhdar Brahimi (1971).
Minister Plenipotentiary, Abdelkrim Chitour.
Attaches, Abdelhamid Terki; Belgacem Zeguidi; Amar Argueb; Mourad Bousalem.
Algeria lies between $8^{\circ} 45^{\prime} \mathrm{W}$. to $1 z^{\circ} \mathrm{E}$. longitude $27^{\circ} 6^{\prime} \mathrm{N}$. to southern limit about $19^{\circ} \mathrm{N}$. Area, 855,200 sq. miles (estimated). The population is estimated at about $\pm 7,000,000$.

Govermment.-Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 288 I the three northern departments of Algiers, Oran and Constantine formed integral part of France. Between 1955 and 1960 these were reorganized to form 13 departments. The Southern Territories of the Sahara, formerly 1 separate colony, became an integral part of Algeria on the attainment of independence. In June 1974 there was a further administrative reorganisation resulting in $3 x$ departments. An armed rebellion led by the Moslem Front de Liberation Nationale (F.L.N.) against French rule broke out on Nov. 1, 1954. French control of Algeria came to an end when President de Gaulle declared Algeria independent on July 3, 1962; by October, 1963, all agricultural land held by foreigners had been expropriated and by 1965 more than 80 per cent. of the French population had left Algeria. More have left since.

Ben Bella was elected President of the Republic in Sept., 1963, but was deposed and a Council of the Revolution presided over by Col. Boumedienne assumed power on June 19, 1965.

A new constitution was established by referendum on Nov. 19, 1976, and on Dec. 10, 1976 President Boumediène was elected for a six-year term of office. Elections for $\quad$ national popular
assembly were held in Feb. 1977. The present government was appointed in April 1977.
Development in Algeria is regulated by a series of national development plans. The $1970-73$ plan provided for expenditure of approximately C 3,200 million, with particular emphasis being placed on industrial development. The 1974-77 Plan provides for expenditure of the order of f, $_{3}, 000$ million, and places greater emphasis on infrastructure development, and the social services.

Trade with U.K.

$$
1975 \text { 1976 }
$$

Imports from U.K.. £ $88,700,000 £$ rox,800,000 Exports to U.K..... $87,500,000 \quad 80,200,000$

Algeria's main exports are crude oil and liquefied natural gas. Principal imports from the United Kingdom are capital plant and equipment for industrial use.

Algeria's main industry is the hydrocarbons industry. Oil and natural gas are pumped from the Sahara to terminals on the coast before being exported; the gas is first liquefied at liquefaction plants at Skikda and Arzew.

Other major industries being developed include - steel industry, motor vehicles, building materials, paper making, chemical products and metal manufactures. All major industrial enterprises are now under State control.

Algeria has a rapidly expanding network of roads and railways. Considerable sums are also being spent on the development of the State airline, the national shipping company and telecommunications.

Capital.- $\Psi$ Algiers, population $2,000,000$ (approx). It is one of the principal ports of the Mediterranean as well as an important industrial centre. Other towns include $\Psi$ Oran; Constantine; $\Psi$ Annaba; Blida; Setif: Sidi-Bel-Abbès; Tlemcen; Mostaganem: $\Psi$ Skikda; $\Psi$ Bejaia and Tizi Ouzou.

FIAG.-Red crescent and star on a vertically divided green and white background.

National Day.-November .
Britise Embassy
Résidence Cassiopée, 7 Chemin de Glycines, Algiers.
Ambassador Extraordinary and Plenipotentiary, His Excellency John Armstrong Robinson, C.M.G. (1974).

Cultural Attaché, British Council Representative, K, R. Hunter, 6 Avenue Souidani Boudjemaa, Algiers. There is a British Council library in Algiers.

## ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrences, between Spain and France, with an approximate area of 180 square miles and population of about 30,000 , one quarter of whom are native Andorrans. It is surrounded by mountains of 6,500 to 10,000 feet. Historians place the origin between the eight and ninth centuries. Andorra is divided into six Parishes, each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twentyfour. Constitutionally, the sovereignty of Andorra is vested in two " Co-Princes ", the President of the French Republic and the Spanish Bishop of Urgel. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. They are represented by Permanent Delegates of whom one is the French Prefect of the

Pyrenees Oriental Department at Perpignan and the other is the Spanish Vicar-General of the Diocese of Urgel. They are in turn represented in Andorra la Vella by two resident "Viguiers" known as the Viguier Français and the Viguier Episcopal, who have joint responsibility for law and order and overall administration policy, together with judicial powers as members of the Supreme Court.

The official language of the country is Catalan, but French and Spanish are also spoken. Spanish pesetas and French francs are the accepted currency and the Budget is expressed in pesetas. A good road crossing the Valleys from Spain to France is open all year. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that $2,250,000$ tourists visit the Valleys during the year.

There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

Capital: Andorra la Vella (population 11,750).
Flag.-Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.
H.M. Consul-General, L. J. Evans, C.B.E. (Resident at Barcelona).

## ANGOLA

President, Dr. Agostinho Neto.
Angola, which has an area of 488 ,ooo square miles lies on the western coast of Africa; its population in $197^{2}$ was estimated at 5,798,000 although in the wake of fighting between the rival liberation movements the white population formally of several hundred thousand has been greatly reduced, by $\quad$ mass exodus.

After a Portuguese presence of at least four centuries, and an anti-colonial war since 196 x , Angola became independent on Nov. 11, 1975 in the midst of civil war. Soviet-Cuban military assistance to the Popular Movement for the Liberation of Angola (M.P.L.A.) enabled it to defeat its South African-assisted rivals early in 1976. Cuban troops remain in Angola which has entered in period of reconstruction.

Angola exports diamonds, iron ore, oil and coffee.

Capital. - $\Psi$ Luanda (Est. $480,61_{3}$ in 1972).
Flag.-Red and black with $■$ yellow star, machete and cog-wheel.

## ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between $30^{\circ} 30^{\circ}$ $-60^{\circ} \mathrm{E}$, long. and $12^{\circ} 45^{\prime}-34^{\circ} 50^{\circ} \mathrm{N}$. lat. The north-western limit is generally taken from 'Aqaba at the head of the Gulf of 'Aqaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea,
and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad southeastern promontory, which encloses the Persian Gulf, contains $\quad$ coastal range in Oman.
The total area is estimated at $1,200,000 \mathrm{sq}$. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.
Language and Literature.-Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night'), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

## ARGENTINE REPUBLIC

## (República Argentina)

Junta.-Lt.-Gen. Jorge Rafael Videla (also President of the Republic, acceded March 29, 1976); Adm. Emilio Eduardo Massera and Brig.-Gen. Orlando Ramón Agosti.

Cabinet
Interior, Brig.Gen. Albano Eduardo Harguindeguy. Foreign Affairs, Vice-Adm. Oscar A. Montes. Labour, Brig.-Gen. Horacio Tomâs Liendo.
Treasury and Finance, Sr. José Alfredo Martinez de Hoz.
Education, Dr. Juan José Catalán.
Defence, Brig.-Maj. José María Klix.
Justice, Brig. Julio Arnaldo Gómez.
Social Welfare, Vice-Adm. Julio Juan Bardi.
Embassy in London. 9 Wilton Crescent, S.W.I. [oI-235 3717]
Ambassador Extraordinary and Plenipotentiary, (vacant). Minister Plenipotentiary, Rafael M. Gowland (Chargé d'Affaires).
Minister Plenipotentiary, Sr., Carlos L. Blanco.
Naval Attaché, Rear Adm. Edgardo J. Segura.
Counsellors, Oscar Fernandez; Alejandro $H$. Piñeiro (Consular).
Military and Air Attaché, Cdre. Rodolfo A. Guerra.
Economic and Commercial Counsellor, Antonio E. Seward.
Senior Asst. Naval Attaché, Capt. Norberto M. Couto.
Asst. Naval Attachés, Cdr. Juan Arturo Dover; Cdr. Miguel José Guruceaga.
ist Secretaries, Horacio R. Basso; César M. Gondra.
and Secretaries, Pascual Adolfo Rossellini (Consular); Domigo S. Cullen; Luis D. Mendiola.
Consulate-General, 53 Hans Place, S.W.I (ox-584 1701).

There is also a Consulate in Liverpool. Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South

American Continent, and exterding from Bolivia to Cape Horn, a total distance of nearly $\mathbf{2 , 3 0 0}$ miles; its greatest breadth is about $93^{\circ}$ miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known as $E l$ Gran Chaco, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Rio Negro; and south of the

Río Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Córdoba by the San Luis and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the soithern portion of the Province of Buenos Aires by the Tandil Hills (about r,ooo ft.) and the Sierra De La Vetana, near Bahia Blanca (about 3,000 ft.) The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, fows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confiuence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of provinces, one
territory (Tierra del Fuego) and one federal district (Buenos Aires), comprising in all uII area of x,079,965 square miles, with a population (Census of 1970) of $23,360,000$ (male 11,600,000; female 3x,760,000).

Government.-The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580 . In 18 ro (May 25) Spanish rule was defied, and in I816 (July 9), after a long campaign of liberation conducted by General José de San Martin, the independence of Argentina was declared by the Congress of Tucumán.
Following months of crisis, marked by political and economic uncertainty, and continuous violence from guerilla forces, President Maria Estela Perón temporarily relinquished her powers on September 14, 1975, and handed over power to her constitutional successor, Sr. Italo Argentino Luder, speaker of the Senate.
President Perón resumed her powers on October 16, x975, but continuing political and labour unrest, together with increased terrorist activity and the lack of any effective Government, led inevitably to a reluctant coup d'etat by the Armed Forces Commanders, which took place bloodlessly on March 24, 1976; President Perón and many of her senior advisers and officials of her Government were arrested. A Junta, consisting of the three commanders of the Armed Forces, was established and one of their number, Lt.-General Videla, was also sworn in as President on March 29, 1976.

Agriculture.-Of a total land area of approximately 700,000,000 acres, farms occupy about $425,000,000$. About 60 per cent. of the farmland is in pasture, Io per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar, fruit and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export trade in many others. Pastoral and agricultural products provide about 85 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Rios, Córdoba and La Pampa.

The following table shows the yield of some of the more important crops:

$$
1975-76
$$

metric tons

| Maize | 5,855,000 |
| :---: | :---: |
| Wheat | 8,570,000 |
| Linseed. | 377,000 |
| Oats. | 432,000 |
| Barley | 522,000 |
| Rye | 273,000 |
| Rice | 309,000 |
| Sunflower seed | 1,085,000 |
| Cotton (gross bulk production) | 430,000 |
| Sugar cane. | 14,310,000 |
| Millet. | 293,700 |
| Tobacco | 94,600 |
| Soya. | 695,000 |
| Livestock. Livestock popula | 1976 was: |
| cattle, $60,000,000$; sheep, 35,0 | and pigs, |
| 4,526,740. Meat exports to | sed fro | 4,526,740. Meat exports to UK increased from 21,363 tons in 1975 to 34,705 tons in 1976.

13,700,000 cattle were slaughtered in 1976 ( $\mathbf{1 9 7 5}$, 11,975,602).

Mineral Production.-Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquen), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also In natural gas pipeline from the same source to the outskirts of Buenos Aires. Another project of importance was the construction of the natural gas pipeline between Neuquén and Bahia Blanca, completed in 1970. The production of oil is of first importance to Argentina's industries and, to some extent, to her economic and financial development. Total petroleum output for 1976 was 23,142,300 cubic metres compared with $22,968,300$ cubic metres in 1975.

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold, silver and tin. Coal production in 1976 was $6 \times 4,585$ tons, compared with 502,300 tons in 1975; this is produced at the Rio Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural resources, especially copper for which the Government and private companies are carrying out exploration.

Industries.-Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile, plastic and machine tool industries and engineering, especially in the production of motor vehicles and steel manufactures.

Communications.-There are 25,386 miles of railways of which 14,000 miles are broad gauge ( $5^{\prime} 6^{\prime \prime}$ ), 2,000 miles standard ( $4^{\prime} 8 \frac{1}{2} \frac{1}{\prime \prime}^{\prime \prime}$ ), 8,720 miles of narrow I metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. Plans are in hand for complete re-organization of the railways in order to improve their operating efficiency and reduce a very large financial deficit. The combined national and provincial road network totals approximately 137,000 miles of which $\mathbf{2 3}, \mathbf{8} 80$ miles are surfaced. There are air services between Argentina and all the neighbouring republics, Europe, Asia, Canada, the U.S.A. and South Africa. Total tonnage entering Argentine ports in 1975 was $x$ I, 055,686 .

There are 16 short-wave broadcasting stations, 150 medium wave (of which 65 are official). In addition there are 65 television stations, of which 4 are in Buenos Aires. About $3 \cdot 8$ million television receivers are in use.

Defence. -The Army consists of four corps organized into ten brigades, including mountain, jungle, airborne and armoured troops. It numbers about 5,000 officers, 15,000 N.C.O.s and $65-70,000$ conscripts who serve I year.

The Navy consists of 2 cruisers, $x$ aircraft carrier, 9 destroyers, 4 frigates/corvettes, 4 submarines, 4 minesweepers, I minehunter and ancillary craft. Strength is about 3,000 officers and 30,000 ratings, including 1 I,000 conscripts.

The Air Force consists of 7 brigades and a training force, with $\llbracket$ strength of $x, 600$ officers, 15,000 other ranks and 20,000 civilians. Aircraft total over 300, including Skyhawk A.4s, Lockheed Cr3os, Fokker $\mathrm{F}_{27}$, Fokker F28s, Mirage IIIs, Canberra

B6as, Sabre F86Fs, Pucará IA-58s and a variety of helicopters.
Education-Primary and Secondary. The educational reform programme has been frozen since early 1975: The government is formulating a new education policy. At the moment, education is compulsory for the 7 grades of primary school ( 6 to 13). Secondary schools ( 14 to $17+$ ) are available in and around Buenos Aires and in most of the important towns in the interior of the country. Most secondary schools are administered by the Central Ministry of Education in Buenos Aires, while primary schools are administered by the Central Ministry or by Provincial Ministries of Education. Private schools, of which there are many, are also loosely controlled by the Central Ministry. Teacher-Training now takes place at post school level, courses lasting from a to 5 years. Universities-Many new universities have been created over the last two years. The total is now over 50 with 24 national (including the Federal Technological University), 25 private and $\quad$ small number of provincial universities.

Language and Literature.-Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the first Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. About 450 daily newspapers are published in Argentina, including 7 major ones in the city of Buenos Aires. The English language newspaper is the Buenos Aires Herald (daily). There are several other foreign language newspapers.

Brtish Council
Representative in Argentina, F. M. Beatty, M.b.E., Marcelo T de Alvear, 590 Buenos Aires.

## British Chamber of Commerce <br> in the Argentine Republic (inc.)

Calle 25 de Mayo 444, ( $5^{\circ}$ Piso), Buenos Aires. Manager, R. L. Briant.
Buenos Aires is 7,160 miles from Southampton; transit, 19 days by steamship; 18 hours by air.

## AUSTRIA

President of the Austrian Republic, Dr. Rudolf Kirchschläger, born $19 \times 5$; elected june 23, 1974.

Cabinet
Chancellor, Dr. Bruno Kreisky.
Vice-Chancellor and Minister of Finance, Herr Hannes Androsch.
Minister for the Interior, Erwin Lane.
Justice, Dr. Christian Broda.
Transport, Dr. Karl Lausecker.
Foreign Affairs, Dr. Willibald Pahr.
Agriculture, Dip. Ing. Günter Haiden.
Defence, Otto Rösch.
Education, Dr. Fred Sinowatz.
Trade and Irdustry, Dr. Josef Staribacher. Building, Josef Moser.
Science and Research, Frau Dr. Hertha Firnberg.
Health and Environment, Frau Dr. Ingrid Leodolter.
Social Affairs, Dr. Gerhard Weissenberg.

## Austrian Embassy in London 18 Belgrave Square, S.W.I [or-235 3731]

Ambassador Extraordinary and Plenipotentiary; His Excellency Dr. Kurt Enderl (1975).
Minister-Counsellor, Dr. Peter Klein.
Counsellor, Dr. Helga Winkler-Campagna. rst Secretary, Dr. P. Lang.
Defence Attaché, Col. Lothar Brosch-Fohraheim.

Counsellor, Dr. B. Stillfried (Cultural).
Attachés, Dr. Ernst Menhofer (Press); Dr. P. Marginter (Cultural); Mrs. A. Schmidt, Mrs. D. Baldwin (Administration): Mrs. T. Stockert (Social Welfare).
Austria is $m$ country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population ( $\mathbf{1 9 7 5 \text { ), 7,519,900. }}$

Government. -The Austrian Federal Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the AustroHungarian Empire. In March 13 , 1938, as $\approx$ result of the Anschluss, Austria (Oesterreich) was incorporated into the German Reich under the name Ostmark. After the liberation of Vienna in r945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely-elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January $\mathrm{x}, 193^{8}$. It entered into force on July 27, 1955 .

There is a National Assembly of 183 Deputies. In the elections of October, 1975, the Socialists won an overall majority of the votes.

The state of the parties in June 1977, was:
Socialist Party............................ 93
People's Party. ......................... 8o
Freedom Party (right wing)......... . 10
Religion and Education.-The predominant religion is Roman Catholic. Elementary education

is free and compulsory between the ages of 6 and 15 and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz, Innsbruck, Salzburg, Linz and Klagenfurt.

Language and Literature. - The language of Austria is German, but the rights of the Slovene- and Croatspeaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are 6 daily papers in Vienna and 16 in the provinces, as well as numerous weeklies and monthlies.

Communications.-Internal communications in Austria are partly restricted because of the mountainous nature of the country, and road and rail routes must, of necessity, follow the river valleys. The railways in Austria are state-owned and have $5,90 \mathrm{x} \mathrm{km}$. of track of which $2,72 \mathrm{~km}$. had been electrified by June, 1976. While road surfaces in many cases are not up to British standards, the main roads linking the major towns are generally good and relatively fast. The Westautobahn, completed in 1967, links Munich, Salzburg, Linz and Vienna. A second major autobahn (Intal Autobahn) is now complete between Kufstein, Innsbruck and the Brenner Pass, thus linking the West German and Italian autobahn networks through Austria. A third major autobahn (Sidautobahn) linking Vienna with Graz, Klagenfurt and Villach is under construction and about half of it is already open for use.

Tourism.-Ir, 600,000 tourists visited Austria in 1976, a small increase over 1975. Net receipts from tourism were 26,348 million Schillings-a major contribution to the balance of payments.

Production and industry.-Agriculture and forestry account for about $5.5 \%$ of the National Product. The arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms valuable source of Austria's indigenous wealth, about 39 per cent. of the total land area consisting of forest areas. Coniferous species predominate.

Austria has important heavy industries. Production figures for 1976 include (in thousands of metric tons): pig iron 3.318 , steel 4,477 , rolled products 3,375 . Raw magnesite, nitrogenous fertilizers, paper, chemical pulp and synthetic fibres are produced in quantity. In addition, motor cycles, scooters, buses, tractors and motor lorries are produced. Manufactures provided $37 \% \%$ and construction $9.8 \%$ of the total National Product in 1976.

Energy.-Of Austria's energy requirement in 1976, 31 ${ }^{-91}$ per cent. was supplied from internal sources. Production of crude oil in Upper and Lower Austria amounted to $1 \cdot 9$ million metric tons in 1976, $2 x$ per cent. of annual consumption. Imports of crude oil were $7 \cdot 3$ million tons, of which 2.6 million came from Iraq, $I^{\circ} 5$ million from the U.S.S.R., $I^{\prime} 7$ million from Libya and $=$ million from Iran. Austria produced 2 II billion cubic metres of natural gas in 1976 and imported $2 \cdot 6$ billion cubic metres from the U.S.S.R. Production of electric power in 1976 amounted to 35 million mwh and net exports of electric power were $2 \cdot 2$ million mwh. A 700 mw nuclear power station is under construction, due to commence operation in late 1977 and tenders have been issued for second.

Minerals.-Production of iron and magnesite ore in 1976 was 3.8 million metric tonnes; of lead
and zinc ore 488,000 tons; crude and magnesite 926,000 tons; Gypsum 770,000 tons and brown coal 3.2 million tons. In addition there are useful deposits of salt and limited deposits of copper, antimony and tungsten.

## Bahrain Embassy in London 98 Gloucester Road, S.W. 7 [or-370 5132]

Ambassador Extraordinary and Plenipotentiary, His
Excellency Ali Ebrahim Al-Mahroos.
Minister Plenipotentiary, Dr. Wasfi Nimer. ist Secretary, Mustafa Kamal Mohamed (Consul). 2nd Secretary, Fahud Al-Wazzan.

Area and population.-Bahrain consists of a group of low-lying islands situated about half-way down the Gulf, some 20 miles off the east coast of Arabia. The largest of these, Bahrain island itself, is about 30 miles long and ro miles wide at its broadest. The capital, Manama, is situated on the north shore of this island. The next largest, Muharraq, with the town and airfield of the same name, is connected to Manama by 1 causeway $1 \frac{1}{2}$ miles long.

The Population (1971) is 216,000 . There are about 5,000 British, 2,500 other Europeans and Americans, and 30,000 other resident foreigners, of whom about half are Iranians, Indians and Pakistanis. The Bahrainis are about equally divided between Sunnis and Shias; the ruling family and many of the most prominent merchants are Sunnis.

Climate.-The climate is humid all the year round, with rainfall of about 3 in., concentrated in the mild winter months, December to March; in summer, May to October, temperatures can exceed z10 ${ }^{\circ} \mathrm{F}$.

Economy.-The largest source of revenue is oil. The Bahrain field, discovered in 1932, is now owned 60 per cent. by the Government, represented by the Bahrain National Oil Co., and 40 per cent. by the Bahrain Petroleum Co. (BAPCO), a Caltex subsidiary, which operates the field. Production in 1976 was $21 \cdot 3$ million barrels. BAPCO owns the Sitra refinery, which derives about 70 per cent. of its crude by submarine pipeline from Saudi Arabia. Bahrain also has a half share, with Saudi Arabia in the profits of the offshore Abu Sa'afa field. A reservoir of unassociated gas has recently been developed on Bahrain island.

Heavy industry is limited to the Aluminium Bahrain smelter, with an annual capacity of 120,000 tonnes of ingots, billets and slabs; it uses alumina from Australia and the local natural gas. The Bahrain Government owns 77.9 per cent. of the shares. A dry dock built for a consortium of the OAPEC countries and capable of taking tankers of up to $500,000 \mathrm{dwt}$ is to open by the end of 1977 .

The pearling industry, once the basis of the economy, has virtually ceased to exist. There is however a variety of light industries, and construction is thriving.

The state is being developed as a financial centre. Apart from commercial banks, led by the National Bank of Bahrain, the Chartered Bank, the British Bank of the Middle East and the Bank of Bahrain and Kuwait, many international banks are being licensed ait offshore banking units"; there are also money brokers and merchant banks.

The currency is the Bahraini Dinar (BD) divided into $x, 000$ fils. In June 1977 it was worth approximately US $\$ 2.53$.
Trade with U.K.

Ministey Counsellors, M. Henri J. Perdieus; M. A. Vokaer (Economic Affairs).
Counsellors, M. C. Fellens (Culture) ; M. A. Adam; M. Maurice Cammaerts (Agyiculture).

A Kingdom of Western Europe, with a total area of $I x, 775$ square miles and a population, (Dec., 1970) of $9,650,944$. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.
Belgium has a frontier of 898 miles, and $\quad$ seaboard of $4 x$ miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally-level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against foods, cover an area of 193 sq. miles. The highest hill, Signal de Botranges, rises to a height of 2,276 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of $49^{\circ} \mathrm{F}$. (summer $65^{\circ}$, winter $37^{\circ}$ ).

Belgium is divided linguistically between those Who speak Dutch (the Flemings, who occupy the North) and those who speak French (the Walloons, who occupy the South) with small Germanspeaking region east of Liège. Nearly all Belgians are Roman Catholics.

Government.-The kingdom formed part of the "Low Countries" (Netherlands) from 18 I5 until Oct. 14, 1830 , when $\llbracket$ National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the Treaty of London (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 4, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of $183 x$ the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or coopted) for 4 years. 106 members out of 18 s are directly elected. The Chamber of Representatives consists of not more than I per 40,000 inhabitants and is elected directly by all adult nationals.

The last election for the Chamber of Deputies was held on April 17, 1977. It was a personal success for M. Tindemans, and his Social Christian Party, together with the Socialists both made gains at the expense of the Liberals and some of the smaller nationalist parties. The results were as follows (seats): C.V.P. (Social Christian), 56; P.S.C. (Social Christian), 24; P.S.B.-B.S.P. (Socialist), 62 ; P.V.V. (Liberal), 17 ; P.L. (Liberal), 2 ; P.R.L.W. (Liberal Walloon), 14 ; R. W. (Walloon), 4 ; F.D.F. (Brussells francophones), 1x; V.U. (Flemish), zo; Communists, 2.

Senate elections were also held with the following results (percentage of votes): Social Christians, $35 \cdot 76$; Socialists, $27 \cdot 22$; Liberals, $8 \cdot 6$; ; Liberal Walloons, 6.95; Walloons and Brussells francophones, 7.24; Flemish Nationalists, 10.24; Communists, 2.86. Besides these directly elected representatives, the Senate includes smaller number of members chosen by Provincial Councillors and also some coopted by the existing membership. H.R.H. Prince Albert is co-opted member of the Senate.

M . Tindemans formed his new government on June 2, 1977, a coalition of Social Christians and Socialists in place of the previous Social Christian/ Liberal coalition. His Cabinet includes Flemish Nationalists (V.U.) and, for the first time since the party's formation in 1968, representatives of the Brussells francophone party (F.D.F.).

Production.-Belgium is essentially manufacturing country. With no natural resources ex-
cept coal, annual production of which formerly averaged some $30,000,000$ tons but which dropped to 7,479,000 metric tons in 1975 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. In 19743.7 per cent. of the active population tin engaged in agriculture and forestry, the former supplying four-ifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass nitrogen, heavy chemicals, sugar, breweries, etc. Crude steel output in 1975 was $\times 1,587,000$ metric tons.

Education.-The budget for education (over 100,000,000,000 Belgian francs) represents approximately quarter of the national budget and does not include the amount spent by the Communes, provinces and the church in subsidized schools. The nursery schools provide free education for the $2 \frac{1}{3}$ to 6 age group. There are over 8,000 primary schools (6 to 12 years) of which approximately 5000 are administered by the State, province or commune and the remainder are free institutions (predominantly Roman Catholic). There are more than $x, 100$ secondary schools offering a general academic education slightly over half of which are free institutions (predominantly Roman Catholic but subsidized by the State) and the remainder official institutions. The official school leaving age is 14 .

Language and Literature.-Dutch is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxemburg, Liege and the southern half of Brabant. Dutch is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. Brussels is officially bi-lingual.

In July, 197x, the Belgian Parliament passed three Bills together implementing the constitutional amendments introduced in December 1970, to ease friction between the French-speaking and Dutch-speaking communities. The first Bill established a cultural council for each linguistic group, in operation from Dec. $x$, $197 x$, all members of the Chamber of Representatives and the Senate being members of one council or the other. A Cultural Council for the German-speaking community also has since been established. The second Bill defined the powers of the cultural councils, providing that the councils would be responsible for certain aspects of cultural life; commissions for co-operation with the other council would be set up, with a statutory obligation to hold at least two meetings with the other council in each Parliamentary session. The third Bill provided for the establishment of five "agglomerations " of municipalities centred on Antwerp, Brussels, Charleroi, Ghent and Liège and the federation of small municipalities, with special provision in respect of the border boroughs of Brussels (which have a predominantly Flemish population) designed gradually to reduce the influence of the French speakers in that area. Regional councils for Flanders, Wallonia and Brussels were established in 1974.

The literature of France and the Netherlands is supplemented by an indigenous Belgian literary activity, in both French and Dutch. Maurice Maeterlinck ( 8862 -1949) was awarded the Nobel Prize for Literature in 19ys. Emile Verhaeren ( $\mathbf{1 8 5 5 - 1 9 1 6 \text { ) was }}$ poet of international standing. Of contemporary Belgian writers,
perhaps the most celebrated is Georges Simenon (bom at Liège in 1903). There une 45 daily newsm papers (French, Dutch and some German) in Belgium.

| Finance |  |
| :---: | :---: |
| Budget | $1974 \quad 1975$ <br> B. Fr. (millions) |
| Revenue. | 489.500 585,100 |
| Expenditure | 548,800 694,400 |

The unit of currency is the Belgian franc. Since June 1972 there has been no fixed rate (See also p. 83) but the average rate for 1975 against the U.S. dollar was 36.78 B.Fr. External trade figures relate to Luxembourg well as Belgium since the two countries formed an Economic Union III 192 .

## Trade

1974
('000 Francs)
Total Exports. . . . $\quad 1,099,825,000$
$x 975$
('ooo Francs)
CO . . $1,09,025,000$ 1,057,008,000
COMmunications.-On Dec. 33, 2972, there were 4,080 kilometres of normal gauge railways operated by the Belglan National Railways, of which $x, 232$ kilometres were electrified; the length of regional railways operated in 1973 was 215.8 kilometres. Belgian National Railways also operate 4,425 kilometres of regular bus routes. Other operators run $14,179 \mathrm{~km}$. of bus routes. On Dec. 3x, 1973, there were $x, 625,726$ telephone subscribers in Belgium.

Ship canals include Ghent-Terneuzen ( $\mathbf{x} 8$ miles, of which half is in Belgium and half in the Netherlands: constructed 1825-27 $^{2}$ ) which permits the passage to Ghent of ships up to 60,000 tons; the Canal of Willebroek Rupel-Brussels ( 20 miles, by which ships drawing 18 ft reach Brussels from the sea; opened in 19z2); and Bruges (from Zeebrugge on the North Sea to Bruges, $6 \frac{2}{2}$ miles; opened in 1923). The Albert Canal ( 79 miles), which figured prominently in the fighting (Sept. 1944) for the relief of Belgium and the Netherlands and for the invasion of Germany, links Llège with Antwerp; it was completed in 1939 and accommodates barges up to x,350 tons. The modernization of the port of Antwerp begun in 1956 is well advanced. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal are being widened or deepened to take barges up to x,350 tons.
In 1973 there were $12,830 \mathrm{~km}$. of trunk roads of which about $x, 030 \mathrm{~km}$. are motorways. Most of the maritime trade of Belgium is carried in foreign shipping, the mercantile marine consisting (2973) of 89 vessels ( $x, 09 x, 984$ metric tons), in addition to which there were 268 fishing boats.

The Belgian National Airline Sabena operates regular services between Brussels and London, and many continental centres, as well overseas services to the United States, Zaire, Canada, Mexico, Guatemala, Middle East, Far East, India, etc. Many foreign airlines call ${ }^{-1}$ Brussels.

## Crties and Towns

The Capital, Brussels, had an estimated population (Dec. 3x, 297x) of $x, 075,000$ (with suburbs). Other towns are $\Psi$ Antwerp, the chief port $(67,259)$; $\Psi$ Ghent ( 229,687 ), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows [ice famous; Liège ( 446,990 ), the centre of the iron industry, and Charleroi ( 218,089 ), the important coal-mining and metallurgical centre; $\Psi$ Bruges
( $x \times 8,000$ ); $\Psi$ Ostend ( 47,230 ): Malines ( 67,730 ). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, : hr.

National Flag.-Three vertical bands, black, yellow, red.

National Day.-July 22 (Accession of King Leopold I, 1831).

## BRITTSH Embassy.

 28 Rue Joseph II, 1040 Brussels.Ambassador Extraordinary and Plenipotentiary, His Excellency Sir David Muirhead, K.C.M.G., C.V.o. (1974).

Counsellors, I. S. Winchester (Commercial); The Viscount Dunrossil; C. P. H. T. Isolani, C.B.E., M.V.O. (Information).

Defence (Military and Naval) Attaché, Col. E. W. Nicoll.
Air Attache, Wing Cdr. J. D. Evans.

## British Consular Offices

There are British Consular Offices at Brussels, Antwerp, Ostend, Ghent and Liege.

British Courcil Representative to Belgium and Luxembourg, C. H. Whistler, Galilée Building, Avenue Galilée 5,1030 , Brussels (Council Library at Brussels).
British Chamber of Commerce for Belgium and Luxembourg (INC.), 30 Rue Joseph II, 1040 Brussels.

## BENIN

(People's Republic of Benin)
President of the Military Revolutionary Government and Head of State, Lt.-Col. Mathieu Kerekou; assumed office, October 26, 1972.
A republic situated in West Africa, between $2^{\circ}$ and $3^{\circ} \mathrm{W}$. and $6^{\circ}$ and $x 2^{\circ}$ N., Benin (formerly known as Dahomey) has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by Upper Volta and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population (estimate, 1973) of $2,948,000$. Although poor in resources, Benin is one of the most thickly populated areas in West Africa, with $=$ high level of education. It is divided into four main regions running horizontally: I narrow sandy coastal strip, a succession of inter-communicating lagoons, I clay belt and a sandy plateau in the north.
The first treaty with France was signed by one of the kings of Abomey in 185 I but the country was not placed under French administration until 1892. Benin became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. In October, 1963, popular revolution led to the fall of the government of the first President of Benin, Hubert Maga. The Army held power until Sourou-Migan Apithy was elected President and Justin Ahomadegbé Chief of Government in January, 1964, after a new constitution had been agreed. This government was overthrown in November, 1965, following a long-standing disagreement between Maga and Apithy. It was replaced by President Tahirou Congacou, who was in turn dismissed in December of the same year by the Army. Christophe Soglo then assumed control and dismissed the Assembly. Soglo was in his turn overthrown by an Army coup d'état on December 17, 1967. Seven months later Dr. Zinsou was installed, with the support of the Army, as President, an appointment which was confirmed by national referendum on July 28, 1968.

Dr. Zinsou was overthrown by a military coup
om December 10,1969 and for five months the country was ruled by a military "Directoire". Following abortive elections in March, 1970, Presidential Council was set up in May, 1970 consisting of MM. Maga, Ahomadégbé and Apithy, with M. Maga as President of the Council and Head of State. He was succeeded in May, 1972 by M. Ahomadégbé, who in turn would have been succeeded in May 1974 by M. Apithy, but for the coup d'étal of October 26, 1972 which brought the Military Revolutionary Government, headed by Lt.-Col. Kerekou, to power.

Benin is a member of the Conseil de l'Entente, the Organisation Commune Africaine et Malgache (OCAM) and the Organization of African Unity (O.A.U.). The official language is French.

Finance.-The currency of Benin is the Franc CFA (Francs CFA $50=x$ French Franc) (Francs CFA $425=$ CI May, 1977).

Trade.-The principal exports are palm products ( 80 per cent.) followed by ground nuts, shea-nuts and coffee. Small deposits of gold, iron and chrome have been found.

Trade with U.K.
$1975 \quad 1976$
Imports from U.K.... $£ 7,144,067 \quad £ 6,859,606$ Exports to U.K....... $\quad$ 182,8ro $2,813,774$

Capital.-Porto Novo $(85,000)$. Principal commercial town and port, $\Psi$ Cotonour ( 120,000 ).

Flag.-Green, with five pointed red star in the top left corner.

NATIONAL DAY. - November 30.
British Embassy (see Lagos, Nigeria).

## BHUTAN

King of Bhutan, Jigme Singye Wangchuck, borm 1955; succeeded his father, July, 1972; crowned, June $2,1974$.
Bhutan, with $n$ area of about 18,000 sq. miles and an estimated population (1972) of $1,010,000$, mainly Buddhists, is ㅍil independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a State of the Indian Union. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains independence, issues its own passports and has diplomatic representatives at the United Nations, India and (non-resident) in Bangladesh. It also receives from the Government of India an annual payment of Rs.500,000 as compensation for portions of its territory annexed by the British Government in India in $\mathbf{8 6 4}$. India provides $90 \%$ of the budget. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. A motor road runs so7 miles from Paro, the winter capital, to Phuntsholing in W. Bengal. Three other roads linking Bhutan with India are under construction or projected. The Government of India has a diplomatic representative in Bhutan.

Capital. Thimphu. Flag.-Orange and crimson divided diagonally, with dragon device in centre.

## BOLIVIA <br> (República de Bolivia)

President, Col. Hugo Banzer, assumed office Aug. 23, 1975.

> BoLivian EmbaSSY IN LONDON
> co6 Eaton Square, S. W.x.
> [or-235 42481

Ambassador Extraordinary and Plenipotentiary, His Excellency General Rogelio Miranda Baldivia (x974).

Consulate, 106 Eccleston Mews, S.W.x.

Minister Counsellor, Sr. Fernando Caneda. 1st Sectetary, Srta. Marta Bosacoma Bonel. Mining Attaché, Sr. H. Zannicr.
There are Bolivian Consular Offices in Liverpool, Birmingham and Hull.

The Republic of Bolivia extends between lat. $10^{\circ}$ and $33^{\circ} \mathrm{S}$. and long. $57^{\circ} 30^{\prime}$ and $69^{\circ} 45^{\prime} \mathrm{W}$. It has an area estimated at 415,000 square miles with a population (1976) of $4,700,000$. (Foy MAP, see Index.) The Republic derives its name from its ilberator, Simon Bolivar (born 1783, died 1830 ).
The chief topographical feature is the great central plateau ( 65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in llampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenez, Beni, Mamore and Madre de Dios.

President Barrientos, who had held office since his election on July 3 , 1966, was killed in a helicopter accident on April 27, 1969, and in accordance with the Constitution was succeeded by Vice-President Dr. Luis Adolfo Siles Salinas. On Sept. 26, 1969, the armed forces overthrew the constitutional Government and set up a civilian-military government under the Presidency of General Ovando. On October 7, 1970, Gen. Torres assumed the Presidency after defeating the right-wing military group which had overthrown the Government of Gen. Ovando only the day before, and held office until August 22, 1971.
A coup d'état occurred in August 197x, when, after heavy fighting, the President was ousted by Army leaders headed by Col. Hugo Banzer, Gen. Florentino Mendicta and Col. Andres Selich. Col. Banzer was proclaimed President in La Paz on Aug. 22, and subsequently formed a national front embracing the Armed Forces and the two leading political parties. However, from 1974 political parties have been excluded, and no elections will be held until 1980.
Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaysia, the largest in the world. Copper, antimony, lead, zinc, asbestos, wolfram, bismuth salt and sulphur are found. 30,000 tons of tins are produced, and together with other minerals provide over half of Bolivia's exports.
Bolivia currently produces a little less than 40,000 barrels of oil per day and this will increase to about 60,000 barrels per day in early 1978 . Domestic consumption is about 20,000 barrels per day, so the rest is exported. Gas is piped to Argentina and there are plans for a similar pipeline to Brazil. Altogether hydrocarbons are now providing nearly third of Bolivia's exports. Bolivia's agricultural produce consists chiefly of rice, barley, oats, wheat, sugar-cane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts etc. The development of manufacturing industry progresses with an ambitious 5 year Plan including cement, American Free Trade Area, and the Andean Pact. Total exports (F.O.B.) in 1976 were U.S. \$555 million.

Transport and Communications.-There are 2,200 miles of railways in operation including the lines from Corumbá to Santa Cruz ( 312 miles). There are about 10,950 miles of telegraphs, and microwave telephone communications between La Paz,

Santa Cruz, Cochabamba, Oruro and Sucre; there are plans to include other cities in the network soon. Most other towns of any size have radio/telephone communication with the main cities. There is direct railway communication to the sea at Antofagasta ( 32 hours), Arica ( Io hours), and Mollendo - days), and also to Buenos Aires ( $3 \frac{\frac{1}{2}}{\frac{2}{2}}$ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi, and from Potosí to Sucre, the legal capital. The Antofagasta (Chile) and Bolivia Railroad was formerly an all-British concern, but the Bolivian sector has now been nationalised. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railhead at Puno.
Commercial aviation in Bolivia is conducted by Braniff International Airways (American), Lufthansa, Iberia, Aerolineas Argentinas, Cruzeiro do Sul (Brazil), and Lloyd Aereo Boliviano (Bolivian), providing international connections with U.S.A., West coast South American countries, Canal Zone, Europe, Brazil and Argentina; local flights provided by Lloyd Areo Boliviano and Transporte Aereo Militar link La Paz, Oruro, Cochabamba, Santa Cruz, Tarija, Sucre, Trinidad and other towns.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones and Antofagasta by the "Pacific War" of 1879-1884.
Language and Literature.-The official language of the country is Spanish, but many of the Indian inhabitants (about two-thirds of the population) speak Quechua or Aymará, the two linguistic groups being more or less equal in numbers.

The Roman Catholic religion was disestablished in 196x but relations between it and the State are good. Elementary education is compulsory and free and there are secondary schools in urban centres. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are six other universities, the largest being the University of San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are four principal daily newspapers in Bolivia.

## Finance

The economy generally has been in good shape since the oil and mineral price rises of 1974 . The Bolivian currency, after remaining stable for 15 years at $x 2$ pesos to the U.S. dollar, was devalued in October 1972 to a new rate of zo pesos where it has remained ever since. The inflation rate for the last three years has been kept to the comparatively low level of $10-15$ per cent.

> Trade with U.K.

Imports from U.K.... $£ 8,300,000 £{ }^{195,000,000}$ Exports to U.K....... $19,007,000$

The principal exports are tin ( 35 per cent.), other minerals (zo per cent.), oil and gas ( 30 per cent.), and agricultural products ( 15 per cent.). Until recently the majority of Bolivia's minerals were shipped to U.K. for smelting and re-export, but Bolivia is now developing her own smelters and will in future be exporting metals. The chief imports are wheat and flour, iron and steel products, machinery, vehicles and textiles.

Seal of Government.-La Paz. Population (census 1976) 654,700. Other large centres are Cochabamba ( 194,000 ), Oruro ( 124,000 ), Santa Cruz $(237,000)$, Potosi $(77,000)$, Sucre, the legal capital and seat of the judiciary $(63,000)$ and Tarija $(38,500)$.
Flag: Three horizontal bands; Red, yellow, green.

NAtional Day.-August 6 (Independence Day).

## BRITISH Embassy. <br> Casilla 694, La Paz.

Ambassador Extraordinary and Plenipotentiary, (vacant) ast Secretary, M. S. Green (Commercial and Head of Chancery).
2nd Secretaries, B. A. Barrett (Administration and Consul): J. H. Culver (Technical Cooperation and Information) ; H. Kershaw (Commercial).

British Consular Offices
There are British Consular Offices at La Paz and Cochabamba.

BRAZIL
(The Federative Republic of Brazil)
President, General Ernesto Geisel, born, August 3, x908; appointed, Jan. 15, 1974; acceded, March 15, 1974.

Vice-President, General Adalberto Pereira dos Santos.

## Ministry

(Feb. 21, 1974)
External Relations, Sr. Antônio F. A. da Silveira. Interior, Sr. Mauricio Rangel Reis.
Finance, Sr. Mário E. Simonsen.
Justice, Sr. Armando Falcão.
Planning, Sr. João P. dos R. Velloso.

Mines and Energy, Sr. Shigeaki Ueki. Education, Sen. Ney Braga.
Agriculture, Sr. Alysson Paulinelli.
Labour, Sr. Arnaldo da C. Prieto.
Communications, Cdr. Euclides Q. de Oliveira.
Health, Dr. Paulo de A. Machado
Industry and Trade, Sr. Angelo Calmon de Sá.

Minister, Marcello Raffaelli (Economic Affairs).
Minister, S. de C. Weguelin Vieira (Consular).
Air Attaché, Colonel J. L. M. de Fonseca.
Naval and Military Altaché, Capt. M. H. B. de Carvalho.

## Consular Section, 6 Deanery Street, W.I (or-499 744x).

Commercial Section, 15 Berkeley Street, W.I (01-499 6706).
There are also $\quad$ Brazilian Consulate-General at Liverpool and honorary consular offices at Cardiff, Newcastle upon Tyne, and Glasgow.

## Position and Extent

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. $5^{\circ} 26^{\prime} \mathrm{N}_{\text {. }}$ and $33^{\circ} 45^{\prime} \mathrm{S}$. and long. $34^{\circ} 45^{\prime}$ and $73^{\circ} 59^{\prime} 22^{\prime \prime}$ W., being 2,685 miles from north to south, and 2,690 from west to east, with a cor it-line on the Atlantic of 4,604 miles. The Republic comprises an area of $3,289,440$ square miles, with a population (1975) of $107,145,168$.

The northern States of Amazonas and Para are mainly wide, low-lying, forest-clad plains. The central state of Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are Serra do Mar in São Paulo; the Serra Geral (Caparao 9,393 feet) between Minas Gerais and Espirito Santo, the Serra da Mantiqueira (Itatiaia, 9,563 feet) and the Serra do Espinhaco (Itacolumi, 5.748 feet), in the south-east of Minas Gerais; the Serra do Paraná, between Goiás and Minas Gerais, the Serra dos Aimorés, which divide Espirito Santo from Minas Gerais; and the Serra do Gurgueia, Branca and Araripe, which envelop Piaui.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with - total length of some 4,000 miles. Its principal northern tributaries are the Rio Branco, Rio Negro, and Japurd; its southern tributaries are the Juruá, Purus, Madeira and Tapajós, while the Xingú meets it within mos miles of its outflow into the Atlantic. The Tocantins and Araguaia flow northwards from the Plateau of Mato Grosso and the mountains of Goiás to the Gulf of Pará. The Pamaiba flows from the encircling mountains of Piaui into the Atlantic. The Säo Francisco rises in the South of Minas Gerais and traverses Bahia is way to the eastern coast, between Alagoas and Sergipe. The Paraguai, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the Parand, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguacú or Iguassú, which unites with the Upper Paraná at the Brazil-ArgentineParaguay boundary, are the majestic Falls of the Iguacu (zooft.), and on the São Francisco are the no less famous falls of Paulo Afonso ( 260 ft .).

Government.-Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King Joao VI. of Portugal. On Nov. 15, 1889, Dom Pedro III., second of the line, was dethroned and a republic was proclaimed.

In October 1969, Congress confirmed the appointment of General Emilio Media as President for five years. A series of amendments to the Constitution came into effect on October 3o, which codified the powers assumed by the regime, and which laid down that subsequent Presidents should be elected by an electoral college; previously the President had been chosen by the military, and approved by Congress. In January 1974, 66

Senators, 310 Deputies, and 127 delegates from the State Legislatures elected General Ernesto Geisel, the candidate of the Government party, to succeed President Medici, whose term of office was due to expire in March 1974.

Production.-There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is being exploifed to an increasing extent. The iron ore deposits of Minas Gerais and the untapped ones of the Amazon region are particularly rich and plans for mining them are advanced. Production is increasing all the time.
In 1974 10,174,294 cubic metres of oil was produced; $7,504,000$ tons of steel ingots and almost 23,000,000 cubic metres of refined petroleum (including refining of imported oil); 59,000,000 tons of iron ore were exported at a value of U.S. $\$ 571,000,000$.

Total foreign private investment in Dec. 1974 was estimated at almost U.S. $86,027,000,000$.
In I974 the Brazilian automobile industry produced 858,500 vehicles.
The main exports of agricultural produce in 1974 were:

|  | Metric tons | Value <br> U.S. 8 |
| :---: | :---: | :---: |
| Coffee | 731,000 | 1,002,000,000 |
| Sugar | 2,249,000 | 1,259,000,000 |
| Soya | 4,754,000 | 888,000,000 |
| Coff | ainly in | States of São |
| Paulo a | to a lesse | ent in Minas |
| Gerais a |  |  |

Defence. - The peace-time strength of the Army is 180,000 of which some 70 per cent are doing military service, with an immediate reserve of 250,000 . The Navy consists of I Aircraft Carrier, 34 Destroyers and Escorts, Submarines, 6 Minesweepers, 6 Survey Vessels, 10 Corvettes (tugs), 45 other vessels and 3 helicopter squadrons. The strength of the Navy is 57,000 including 13,000 marines. The Air Force, with $=$ strength of 44,000 , including approximately $\mathbf{r}, 600$ pilots and aircrew, has 650 aircraft and is the largest in South America.

Education.-Primary education is compulsory and is the responsibility of State governments and municipalities. At this level approximately 10 per cent. attend private schools. Secondary education is largely the responsibility of the State and Municipal Governments, although a small number of very old foundations (the Pedro II Schools) remain under direct Federal control. Over 50 per cent. of all pupils at this level attend Private Schools. Higher education is available in Federal State, Municipal and private universities and faculties.

Language and Literature.-Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is flourishing national press with widely circulated daily and weekly newspapers.

Communications.-In 1973 there were about 30,394 kilometres of railways in service, largely of metre gauge, but including 3,880 kilometres of other gauges. During 1974, the ports of Brazil were used by $3 x, 33$ I vessels, shipping 1 total of $110,348,000$ tons. There are 7,800 kilometres of navigable inland waterways.
Varig of Brazil and 3 foreign airlines operate services between Brazil and Europe, 3 between Brazil and U.S.A.d and there are connections with all Latin American countries. Four major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country.

## Trade with U.K. (1975)

Imports from U.K. ................. §x60,890,000 Exports to U.K. ..................... $174,883,000$
The principal imports in 1972 and 2972 were machinery and aircraft, foodstuffs, raw materials, oil and chemicals, and manufactured goods. Principal exports were coffee, manufactured goods, iron ore and other minerals, foodstuffs and fruits.

Capital.-Brasilia (inaugurated on April 2x, 1960). Population (estimated 1970), 544,862. Other important centres are São Paulo ( $5,901,553$ ); the former capital $\Psi$ Rio de Janeiro ( $4,296,782$ ); $\Psi$ Belo Horizonte ( $x, 232,708$ ); $\Psi$ Recife $(x, 078,819)$ ) $\Psi$ Salvador ( $\mathrm{x}, 000,647$ ); $\Psi$ Porto Alegre $(885,567$ ); and $\Psi$ Fortaleza $(842,23$ ) .
Flag.-Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.
National Day.-September 7 (Independence Day).

British Embassy
Avenida das Nacóes, Lote 8, Brasilia, D.F.

Naval Attaché, Capt. G. M. A. James, R.N.
Air Altaché, Wing Cdr. J. Cheesbrough.

## British Consular Offices

There are British Consulates-General at Rio de Janeiro and São Paulo.

British Council.-Representative in Brazil, P. B. Naylor, P.O. Box ${ }^{142336 \text {, Brasilia D.F. Regional }}$ Directors in Rio de Janeiro, Curitiba, Recife and Sao Paulo. Book supply to libraries of Sociedade Brasiliera de Cultura Inglesa at Rio de Janeiro and Sao Paulo.

British and Commonwealth Chamber of Commerce in São Paulo, Rua Barão de Itapetininga 275, Caixa Postal 1621, São Paulo. (Correspondents at Santos and Porto Alegre.)

Rio de Janeiro, 5,750 miles distant from London: transit, 15 days.

## BULGARIA <br> (Bulgariya)

## Council of State

Chairman of the Council of State, Todor Zhivkov, elected July 7, 197x; re-elected, June 1976 (Head of State).
First Deputy Chairmen, Petur Tanchev; Krustyu Trichkov.
Deputy Chairmen, Peko Takov; Georgi Djagarov; Mitko Gregorov; Sava Dulbokov.
Secretary, Nikola Manolov.
Chairman of the Committee for State and Popular Control, Krustyu Trichkov.

## Council of Ministers

Chairman and Prime Minister, Stanko Todorov.
First Deputy Prime Minister, Tano Tsolov.
Deputy Prime Ministers, Krustyu Trichkov iChairman of the Committee for State and People's Control); Kiril Zarev (Chairman of the State Planning Committee); Mako Dakov; Anrei Lukanov.
Finance, Brlcho Belchev.
Interior, Dimiter Stoyanov.
Defence, Dobri Djurov.
Foreign Affairs, Peter Mladenov.
Education, Nencho Stanev.
Mineral Resources, Stamen Stamenov.
Supply and State Reserve, Sava Dulbokov.
Power, Hikola Todoroev.
Chemical Industry, Georgi Pankov.
Mechanical Engineering and Metallurgy, Toncho Chakurov.
Electronics and Electro Technics, Yordan Mladenov.
Light Industry, Stoyan Zhulev.
Agriculture and Food Industry, Gancho Krastev.
Building and Building Materials, Ivan Sakarev.
Transport, Vassil Tsanov.
Internal Trade and Services, Georgi Karamanev.
Foreign Trade, Khristo I. Khristov.
Forests and Forest Industry, Yanko Markov.
Communications, Pando Vanchev.
Health, Prof. Radoy Popivanov.
Justice, Svetla Daskalova.
Ambassador to the U.S.S.R., Dimiter Zhulev.
Chairmen of the Committees, Ludmila Zhivkova (Art and Culture); Nacho Papazov (Science, Technical Progress and Higher Education).
Chairman of the Bulgarian National Bank, Vesselin Nikiforov.

The Communist Party
The Politbureau of the Central Committee, A. Lilov; G. Filipov; I. Mihailov; P. Kubadinski; S. Todorov: T. Tsolov; T. Zhivkov; T. Dragoicheva
(full members); K. Trichkov; P. Takov; D. Dzhurov; D. Vulcheva; P. Mladenov; T. Stoichev (candidate members).
The Secretariat of the Central Committee. Todor Zhivkov (zst); A. Lilov; I. Primov; G. Filipov; O. Doinov.

Bulgarian Embassy and Consulate in london 12 Queen's Gate Gardens, S.W.7. [ox-584 9400]
Ambassador Extraordinary and Plenipotentiary, His Excellency Vladimir Velchev (1976).
Minister-Counsellor, Valeri Borisov Pchelintsev.
Counsellors, Petko H. Kassarov (Commercial); Dimiter Kendimenov (Economic).
Milliary, Naval and Air Attaché, itt-Col. Dimitar Petkov Toskov.
Deputy Commercial Counsellor, Guenko Gulev. Ist Secretary, Mladen Galabov.

The Republic of Bulgaria is bounded on the north by Rumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population in December, 1972 of $8,594,493$. The largest religion of the Bulgarians is the Eulgarian Orthodox Church. The Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principailty. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with $\pm$ population of $4,337,500$. In $1912-13$ a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Rumania. On Oct. 12, x9x5, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29. 1918, made unconditional surrender to the Allied Powers. On Nov. 29, x9x9, she signed the Treaty of Neulily, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.
Nazi troops entered the country on March 3 . 194I, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. yo. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 coup d'ctat gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

On Sept. 8, 1946, 1 referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic.

On Oct. 27, general election to a Grand National Assembly (with power to make constitution) was held; the Opposition won rox seats out of 465 .
On May 16, 197x referendum was held, at which new Constitution was adopted. According to the Constitution the legislature is a single chamber National Assembly of Subranie elected by adult suffrage for a maximum term of 5 years and consisting of 400 deputies representing constituencies of equal size. The 197x Constitution also established the Council of State, being the supreme permanent body of the National Assembly with both legislative and executive functions. The opposition Agrarian Party was suppressed in 1947, but its remnant was later revived as the Agrarian Union which now constitutionally shares power with the Communist Party.
Production.-Until 1939 Bulgaria was $■$ predominantly agricultural country, but has since pursued an elaborate programme of industrialization. About go per cent. of the country's agriculture has been turned over to co-operatives, and $a$ smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The livestock includes cattle, sheep, goats, pigs, horses, asses, mules and water buffaloes.
There is now substantial engineering industry producing inter alia machine tools, electric trucks of all kinds, agricultural machinery, cranes, electric motors and electronic components, which accounts for about two-thirds of Bulgaria's exports; and considerable production of ferrous and non-ferrous metals. In 1975 production of electricity was $25,23^{2}$ million kilowatt-hours, of steel $2,265,000$ tons and of coal $28,920,000$ tons (of which about one-quarter was soft coal).
There are mineral deposits of varying importance. Bulgaria's heavy industry includes the Kremilkovski Steel Plant near Sofia and the Lenin steel mill at Pernik, the chemical complex at Devnia, the petro-chemical plant at Bourgas with an annual capacity of 6 million tons of processed oil and various other chemical and metallurgical works situated around the country. The Soviet-designed nuclear power station at Kozodui will have four reactors, each with a capability of producing 800 million kilowatt/hours; at present in 1976 two are in operation.

Defence.-Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but $i t$ is believed at present to be at least 152,000 strong.
Education.-Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, $\mathbf{1 9 5 0}$, and in 1975 there were 7.553 kindergartens, and a total of 4,485 educational establishments for primary and secondary education including vocational, technical and other specialized schools for secondary age pupils. The total number of pupils attending these establishments was $x, 529,857$. There are three Universities (at Sofia, Plovdiv and Veliko Turnovo) and 22 higher educational establishments whose pupils total 106,055.

Language and Literature.-Bulgarian is a Southern Slavonic tongue, closely allied to Serbo-Croat and Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is modern literature chiefly educational and popular. The alphabet is Cyrillic. In 1967 there were 8 daily newspaper in Sofia.
Finance.-Estimated budget revenue for 2976 is $8,778,000,000$ levs, expenditure 8,757,000,000 levs.

Currency in Bulgaria is the lev. Rate of exchange (June 1976) was $x .65$ levs $=£$ r.

Trade
The principal imports are industrial and agricultural machinery, industrial raw materials, machine tools, chemicals, dyestuffs, pharmaceuticals, rubber, paper. The principal exports are non ferrous metals, electric trucks and motors, pumps, ships, accumulators and machine tools, cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals and oils including attar of roses. In 1975, 80 per cent. of Bulgaria's foreign trade was with the Soviet bloc, including about $5^{\circ}$ per cent. with the Soviet Union.

## BURMA

(The Socialist Republic of the Union of Burma) Government of the Union
President, U Ne Win.

Burmese Embassy and Consulate 19A Charles St., Berkeley Square, W.x. [ox-499 884x]
Ambassador Extraordinary and Plenipotentiary, His Excellency U Tha Kyaw (x975). Counsellor, U Maung Maung Gyi. Military Attaché, Lt.-Col. Than Lwin. Cultural Attaché, U Mg Mg Soe Tint. and Secretary, U Soe Thinn.

Area and Population.-Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between $9^{\circ} 58^{\prime}$ and $28^{\circ} \mathrm{N}$. latitude and $92^{\circ} \quad x^{\prime}$ and $10 x^{\circ} 9^{\prime}$ E. longitude, with an extreme length of approximately $x, 200$ miles and mextreme width of 575 miles. It has $m$ sea coast on the Bay of Bengal to the south and west and a frontier with Bangladesh along the Naaf River, defined in 1964 by a Memorandum of Agreements, and India to the north-west defined in 1967 , in the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and has since
been demarcated; there is $=$ short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. (For Map, see Index). The total area of the Union is about 262,000 square miles, with an officially estimated population of $30,834,000$ in 1975-about 18 persons to the square mile.

Political Divisions.-The Socialist Republic of the Union of Burma is comprised of fourteen States and Divisions. Amongst the former are the Kachin State ( 34,000 sq. miles), Kayah State ( 4,500 sq. miles) ; Karen (formerly Kawthoolei) State ( $\mathbf{2}, 000$ sq. miles), Chin State ( $\mathbf{1 4 , 0 0 0}$ sq. miles), Mon State, Arakan State and the Shan State ( 60,000 sq. miles).

Physical Features.-Burma falls into four natural divisions, Arakan (with the Chin Hills region) the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi ( $19,296 \mathrm{ft}$.) in the northern Kachin hills. Mt. Popa, $4,98 \mathrm{xt}$., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the IrrawaddyChindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.-The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Thai groups. The three important non-indigenous elements are Indians, Chinese and those from the former East Pakistan. Numbers of resident foreigners have shown a sharp decline in recent years. Burmese is the official language, but minority languages include Shan, Karen, Chin, and the various Kachin dialects. English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.-Burma became an independent republic outside the British Commonwealth on January 4, 1948, and remained parliamentary democracy for 14 years.

On March z, 1962 the army took power, and suspended the parliamentary Constitution. A Revolutionary Council of senior officers under General Ne Win took measures to create $\quad$ Socialist State in accordance with their policy statement "The Burmese Way to Socialism". The Burmese Socialist Programme or Lanzin Party was founded to provide political leadership for the country.

In January 1974 new Constitution was adopted after national referendum. In February elections to the People's Asssembly and local councils were held. On March the Revolutionary Council transferred power to the bodies elected under the new Constitution. The highest authority is the People's Assembly ( 450 representatives) which is expected to meet twice $I$ year. When the Assembly is not in session the Council of State ( 29 members) is vested with wide powers. The senior executive body is the Council of Ministers. The Chairman of the Council of State ( U Ne Win) is also President of the Socialist Republic of the Union of Burma.
Education. -The literacy rate is high compared with other Asian countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade.

Under the University Education Law of 1964 , the Government reorganized the higher education system to encourage the expansion of medical and technical studies. The two existing Universities (Rangoon and Mandalay) retain their separate role but decentralisation has enhanced their faculties (at present there are two Medical Institutes in Rangoon and one in Mandalay, and $\quad$ Institute of Dental Medicine in Rangoon), two independent institutes for medicine, technology, agriculture, economics, education and veterinary science. Under the two Universities are colleges at Bassein, Moulmein, Magwe, Akyab, Taunggyi and Myitkyina and the Workers' College (Rangoon).

There are teachers' training colleges in Rangoon, Moulmein and Mandalay which train junior assistant teachers and 13 State Teachers Training Institutes for primary assistant teachers. The Institute of Education in Rangoon trains senior assistant teachers and awards degrees. There are five Government technical institutes at Inseln (near Rangoon), Mandalay, Kalaw, Chauk and Prome. There are 6 technical high schools, $z$ in Rangoon, in Mandalay, $\square$ in Maymo, $I$ in Taunggyi and $=$ in Moulmein. British aid to Burma under the Colombo Plan amounts to some $£^{300,000}$ annually, over half of this being devoted of technical assistance awards.

Finance.-The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1976 -7 were: Revenue, K $55,923,200,000$; Expenditure, $K 16,726,300,000$. The monetary unit is the Kyat of 100 Pyas. (For rate of exchange, see p. 83.)
Production, Industry and Commerce.-Threequarters of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat, grain, tea, sugarcane, Virginia and Burmese tobacco, jute and rubber. Rice has traditionally been the mainstay of Burma's economy but the poor harvest of $197^{2-73}$ and increased home consumption have greatly reduced the quantity of exported rice. Exports in 1975 amounted to 283,500 tons, including by-products.
The net area sown to all crops in $2975-76$ was $23,490,000$ acres and reserved forests covered 37,655 square miles. The principal export after rice is teak, of which some 200,000 tons were exported annually before the war. The 2975 figure was 88,400 cubic tons.
Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum products are the most important. Oil is now being produced from oilfields in Myanaung, Prome and Shwepyitha and at Chauk, Yenangyaung, Mann, and Letpando. Production of crude oil in 1975 totalled $236,233,000$ gallons. There is a refinery at the main oilfield, Chauk, and another at Syriam near Rangoon. Their combined output of petroleum products is almost sufficient for most of Burma's needs. The production and distribution of petroleum and the importation of oil products is a monopoly of Myanna Oil Corporation (formerly Burmah Oil Company (1954), Ltd.) which is owned by the Government of Burma.

Under the Government's development plan, a cement plant, $\square$ brick and tile factory, a steel rolling mill, I jute bag and twine mill, four cotton spinning and weaving mills, a pharmaceutical plant, - large hydro-electric scheme, five sugar factories, II paper factory and plywood factory are in operation. West German soft loans have been made available
to finance construction of - glass factory, a fertilizer plant, il textile mill, natural gas liquefying plant, a soda ash factory and a formaldehyde plant, in well $^{\text {w }}$ a seismic survey for crude oil sources and technical assistance in the general field of mineral exploitation.

The Japanese Government has approved a third commodity loan of US $\$ 22,000,000$. Loans amounting to US $\$$ ro2,500,000 have been extended by the World Bank follows: forestry, US \$24 million; telecommunications US \$2x million; railways, US $\$ 16.7$ million; inland water transport, US $\$ 16.3$ million; irrigation, US $\$ 17$ million; livestock development, US 87.5 million. The Asian Development Bank has loaned US $\$ 4 \mathrm{x}, 600,000$ for the fishing (US $\$ 9.8$ million), rice products (US $\$ 6.5$ million) (and jute mill (US $\$ 25.3$ million) industries. The UNDP Governing Council has approved US $\$ 35,000,000$ towards the Second Country Programme for Burma covering 1974 to x978, and consisting of 52 large scale and 25 small scale projects. British grants in 1975 were f. 2 million for equipment, spare parts and commodities and $\mathrm{f}_{1} \cdot 9$ million for on-shore oil exploration.
Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries and through the specialized agencies of the United Nations.

Trade with U.K.
Imports from U.K... 1974 1975 Exports to U K Exports to U.K..... $4,099,000 \quad 2,510,000$
Communications.- The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo ( 900 miles from its mouth) and carrying much traffic.
$\Psi$ The chief seaports are Rangoon, Moulmein, Akyab and Bassein. Transit from London to Rangoon: by sea, 35 days; by air, 16 hours.

The Burma Railways network covers 2,780 route miles, extending to Myitkyina, am the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and there are now 164 diesel locomotives in service, as well as 229 steam. There were 2,452 miles of Union highways and 1r,429 miles of other main roads in $1975-76$. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 13 miles north of Rangoon, has been reconstructed and handles international traffic.
CapITAL.-The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1973), 3, 286,886 .
Mandalay, the chief city of Upper Burma, had a population of $78 \mathrm{r}, 819$ in 1973, Moulmein of 679,484 and Bassein of 335,588 . Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.
Flag. - The Union flag is red, with a canton of dark blue, inside which are a cogwheel and two rice ears surrounded by 14 white stars.
National Day.-January 4.
British Embassy
(80 Strand Road, Rangoon.)
Ambassador Extraordinary and Plenipotentiary, His Excellency Terence John O'Brien, C.M.G., M.C. (1974).

Defence and Military Attaché, Lt.-Col. J. D. F. Alexander.

## BURUNDI

(Republic of Burundi)
President, Col. Jean-Baptiste Bagaza, assumed office Nov. $\mathbf{x}, 1976$.

## Cabinet

(Nov. 1976)
Prime Minister and Planning, Lt.-Col. Edouard Nzambimana.
Agriculture, Livestock and Rural Development, Maj. Philibert Kayibigi.
Justice, Jean-Baptiste Manwangwari.
Foreign Affairs and International Co-operation, Albert Muganga.
National Education, Ladislas Ndaye.
Public Works and Housing, Jsidore Nyaboya.
Natural Resources, Mining and Industry, Gaspard Karenzo.
Posts and Communications, Remy Nkengurutse.
Public Health, Maj. Jean Bandusha.
Civil Service, Damien Barakanfitiye.
Labour and Social Welfare, Joseph Nzeyimana.
Information, Capt. Tharcisse Ruhwikira.
Youth, Sport and Culture, Emile Mworohu.
Formerly a Belgian trusteeship under the United
Nations, Burundi was proclaimed an independent
State on July $x, 1962$. Situated on the east side of
Lake Tanganyika, the State has an area of ro,747
sq. miles and $\|$ population (estimated, 1969) of
$3,475,000$. There are some 2,500 Europeans and $x, 500$ Asians. The majority of the population are of the Bahutu tribe, but power rests in the hands of the minority Batutsi tribe.
Burundi became independent $\pm$ a Constitutional monarchy but this was overthrown on November 28, 1966. Since Nov. 3, 1976, when the government of President Micombero was overthrown, the country has been ruled by a Supreme Revolutionary Council.
The chief crop is coffee, representing about 80 per cent. of Burundi's export earnings, some 87 per cent. of which is exported to the United States. Cotton is the second most important crop. Minerals and hides and skins exports are also important. Joint economic arrangements of Burundi with Rwanda ended in 1964 and each country now has its own national bank, coffee organization, etc.

Trade with U.K.
$1975 \quad 1976$

Information and Propaganda, Hou Nim.
Health, Thiounn Thioeunn.
Social Affairs, Ieng Thirith.
Public Works, Toch Phoeun.
Education and Culture, Yun Yat.
Area and Population.-Situated between Thailand and the south of Vietnam and extending from the border with Laos on the north to the Gulf of Thailand, Cambodia covers an area of some 70,000 square miles. It has a population (March, 1976) of 7,735,279. (For MAP, see Index.)

History. - Once $\quad$ powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated constitution providing for parliamentary government. Full independence was proclaimed on November 9, 1953. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955 the Kingdom of Cambodia became financially and economically independent not only of France but also of Laos and Vietnam. For the next fifteen years the political life of the country was dominated by Prince Norodom Sihanouk, first as King, then as Head of Government after he had abdicated in favour of his father and finally (following his father's death in 1960) as Head of State. Although the Sangkum Reastr Nyum or Popular Socialist Community, which he set up to embody his political views still won all the seats in the National Assembly elections of September, 1966, his initial popularity was, towards the end of the sixties, increasingly dimmed by criticism both of his management of the economy and of the procommunist slant of the neutralist policy he proclaimed, which condoned extensive use of Cambodian territory by the North Vietnamese in their military operations against South Vietnam.

On March 18, 1970, during his absence from the country, Prince Sihanouk was deposed as Head of State by vote of the National Assembly. A Republic was declared am October 9, 1970, and the name of the country changed to the Khmer Republic. A constitution was adopted by referendum on April 30, 1972 and Marshal Lon Nol elected President. A bicameral parliament was elected in September i972. Prince Sihanouk however maintained $\quad$ rival government-in-exile in Peking (Royal Government of National Union of Cambodia-GRUNC).

In April 1970 widespread fighting developed between communist Viet-Namese and Khmer forces which gradually developed into a general civil war with republican forces controlling the major centres of population and large areas of the country falling under the control of the Khmer Rouge supported by North Viet-Namese. With large-scale assistance from the United States the armed forces of the Republic were increased from 35,000 in 1970 to 250,000 in 1973 .
In March 1973 . State of National Emergency was declared, various clauses of the constitution were suspended and a coalition "government of exception" formed under the premiership of In Tam. Following In Tam's resignation in December 1973, Long Boret, formerly Foreign Minister, was appointed Prime Minister.
In April 1975 Phnom Penh fell to the Khmer Rouge. Khieu Samphan ran the government and Prince Sihanouk returned to Cambodia on September 9 , to resume hils role as Head of State. How-
ever, a new Constitution was promulgated in Jan. 1976 and elections to People's Representative Assembly were held in March. Prince Sihanouk resigned as Head of State in April, and when the Assembly met on April ir Khieu Samphan was elected President of the State Presidium. A Government led by Pol Pot was appointed.

Geography, Economy and Communications.Cambodia has an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber used to be the main exports though rubber production was brought to a standstill by the hostilities, and rice exports ceased in 1972, the country becoming for the first time a substantial importer. Cambodia has restarted exporting rice. Following the Khmer Rouge victory, the populations of Phnom-Penh and other towns were forcibly evacuated to the country to work on the land. It was announced that the 1975 rice crop amounted to $2,200,000$ tons, which was twice the amount needed to feed the population for year. Subsequently, when the roads and railways had been repaired after war damage, many more of the population were redeployed to work on the land, and re-establish the plantations producing such crops as cotton, rubber and bananas. Factories, in particular textile mills, iron smelting works and cement works were put back in production.

Fifty per cent. of the total land area is forest or jungle, abounding in wild life of all kinds, including big game. The climate is tropical monsoon with II rainy season from May to October.

The country has over 5,000 kilometres of roads, of which nearly half are hard-surfaced and passable in the rainy season. There are two railways. One runs from Phnom-Penh to the Thai border; the other from Phnom-Penh to Kampot and on to Kompong Som. Phnom-Penh is on a river capable of receiving ships of up to 2,500 tons all the year round. The deep water port at Kompong Som on the Gulf of Thailand can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway.

Religion and Education. -The state religion was Buddhism of the "Little Vehicle". The new constitution guaranteed religious freedom, but "reactionary religion which is detrimental to Democratic Cambodia and the Cambodian People" was forbidden. There are also small Muslim and Christian communities. The national language is Khmer. In the years preceding the civil war considerable efforts were devoted to the development of education and new schools, colleges and technical institutes had been established. Until April 1975 there was a Buddhist University in Phnom-Penh, where there were also Faculties of Arts, Medicine and Law and Technological Institute. Several residential teachers' training colleges were in operation.

Capital, Phnom-Penh.
Flag.-Red, with a yellow three-towered temple in the middle.

National Day.-April 17.

## CAMEROON REPUBLIC

## (United Republic of Cameroon)

President, Ahmadou Ahidjo, elected for 5 years, May 5. 1960; re-elected for 5 years, May 7, 1965 ; Mar. 20, 1970 and April 5, 1975.

## Cameroon Embassy <br> 84 Holland Park, W.ix. <br> [0x-727 077x]

Ambassador Extraordinary and Plenipotentiary, His
Excellency Michel Koss Epangué (x975). and Counsellor, Nkuo Thaddeus. zst Secretary, Abdoulaye Sadou.
The United Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west, Chad and the Central African Republic to the east and Congo and Gabon and Equatorial Guinea to the south. It has an area of $183,38 \mathrm{x}$ sq. miles ( $43^{2,000}$ sq. km .) and a population estimated ( 3976 ) at about $7,000,000$. Principal products are cocoa, coffee, bananas, cotton, timber, ground-nuts, aluminium, rubber and palm products. There is 15 aluminium smelting plant at Edéa with an annual capacity of 50,000 tons. Annual trade of the United Republic is approximately, Exports, FCFA $107,000,000$; Imports, FCFA $132,000,000$.
Rate of Exchange, July 1975 , 426 Francs CFA= fis (floating).

Imports from U.K...... $£ 7,730,000 £ 8,089,000$
Exports to U.K. . . ....... ${ }_{5,377,000} 8,991,000$
The whole territory was administered by Germany from 1884 to 1916. From 1916 to 1959, the former East Cameroon was administered by France as a League of Nations (later U.N.) trustecship. On Jan. $x, 1960$ it became independent as the Republic of Cameroon. The Republic was joined on October 1 , 2961 , by the former British administered trust territory of the Southern Cameroons, after a plebiscite held under United Nations auspices. Cameroon became Federal Republic governed by a President, Vice-President and $x 9$ Federal Ministers, with separate East and West Cameroon state governments. Subsequently in a plebiscite held in May, 1972, there was an overwhelming vote in favour of the proposal that Cameroon should become a United Republic and on July 3. 1972, the President appointed the first government of the United Republic.

Cameroon is the only country in Africa where French and English are both official languages enjoying equal status, and the government's declared long-term objective is to achieve complete "bilingualism " and " biculturalism".

Unlike in neighbouring Nigeria and Gabon, oil has not yet been discovered in commercially significant quantitles. The main economic emphasis is on agricultural development, both through encouraging small-scale peasant agriculture, and through the development of large-scale agroindustrial complexes, with the aim of making the country agriculturally self-sufficient and ${ }^{-1}$ major food exporter.

Captral.-Yaoundé ( $\mathbf{8 8 0 , 0 0 0 \text { ). } \quad \Psi \text { Douala } ~}$ ( 250,000 ), is an important commercial centre.
Flag.-Vertical stripes of green, red and yellow with two five-pointed stars in upper half of green band.

NATIONAL DAY.-January ! (Independence Day). British Embassy Yaoundé
Ambassador Extraordinary and Plenipotentiary, His Excellency Albert Edward Saunders, C.M.G., O.B.E. (I975).
ist Secretary, J. Ayres (Head of Chancery and Consul). 2nd Secretaries, C. A. Gregg; D. Wyatt. British Council Representative, H. F. Grant.

## CAPE VERDE ISLANDS

President, Aristides Pereira born 2924, assumed office, July 5, 1975.
The Cape Verde Islands, off the west coast of

Africa, consist of two groups of islands, Windward (Santa Antâo, São Vicente, Santa Luzia, São Nicolau Boa Vista and Sal) and Leeward (Maio, São Tiago, Fogo and Brava) with I total area of $x, 516$ sq. miles and Praia (1970,6,000).
The Islands colonised in c. 1460 achieved independence from Portugal on July 5,1975 , after the decision of the Armed Forces Movement to give up the Portuguese colonies. Elections for a constituent assembly were held on June 30. President Pereira favours an eventual political union of the islands with ncighbouring Guinea-Bissau and Article I of the latter's constitution expresses n similar wish. (Till 1879 Guinea-Bissau and the Islands were a single administrative unit.)

## CENTRAL AFRICAN EMPIRE

Head of State, Emperor Bokassa I, assumed office of President, Jan r, 1966, and assumed title of Emperor, Dec. $4,1976$.
Formerly the French colony of Ubanghi Shari, the Empire lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has common boundary with the Republic of Chad in the north and with Zaire in the south. The Empire has an area of about 234,000 sq. miles and a population of $3,200,000$ (est. 1975). On December x, x958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African

Republic. It became fully independent on Ausust 17,1960. The first President of the Central African Republic, M. David Dacko, held office from 1960 until Jan. $\mathbf{x}, \mathbf{1 9 6 6}$, when he was replaced by the then Col. Bokassa after 1 coup d'état. On Dec. 4, 1976, President Bokassa proclaimed himself Emperor and new constitution (Parliamentary Monarchy) was introduced. The country was henceforth to be known as the Central African Empire. Imports from U.K. 1976 £312,000; Exports to U.K., $£_{1,635,000 .}$

Capital.-Bangul, near the border with Zaire (350,000).

FLAG.-Four horizontal stripes, blue, white, green, yellow, crossed by central vertical red stripe with yellow five-pointed star in top lefthand corner.

## CHAD REPUBLIC

Head of State, Gen. Felix Malloum, assumed office, May, 1975.
Situated in north-central Africa, the Chad Republic extends from $23^{\circ} \mathrm{N}$. latitude to $7^{\circ}$ N . latitude and is flanked by the Republics of Niger and Cameroon on the west, by Libya in the north, by the Sudan on the east and by the Central African Republic on the south. (For Map, see Index.) It has area of 488,000 sq. miles and a population now estimated at $4,000,000$. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed

fully independent on August 1x, 1960. On April 14, 1962, a new Constitution W adopted involving i presidential-type regime. This was suspended on April 13, 1975 when President Tombalbage was killed in military coup. Since then the country has been run by a Supreme Military Council. Trade with U.K.

|  | 1975 | 1976 |
| :---: | :---: | :---: |
| Imports from Ux. | C823,000 | ¢430,000 |
| Exports to U. | 85,000 | 911,000 |

Caprral.-Ndjaména (formerly known Fort Lamy) south of Lake Chad ( 550,000 ).

Flag.-Vertical stripes, blue, yellow and red.

## CHILE

(República de Chile)
Head of State, General Augusto Pinochet (Ugarte), bom, November 25, 1915, Army Commander-in-Chief and President of the Military Junta that took power on September 12, 1973.
Other Junta Members, Admiral José Toribio Merino (Castro), C.-in-C. Navy: General Gustavo Leigh (Guzmán), C.-in-C. Air Force; General César Mendoza (Durán), Director-General of Carabineros.

Asst. Naval Attaché, Cdr. Kenneth W. Pugh.
Cultural and Press Attaché, Sr. Igor Entralá.
Civil Attaché, Sr. Guillermo Santa Cruz.
A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. $17^{\circ}$ 15 and $55^{\circ} 59^{\prime} \mathrm{S}$. and long. $66^{\circ} 30^{\prime}$ and $75^{\circ} 48^{\prime} \mathrm{W}$. Extreme length of the country is about 2,800 miles, with an average breadth, north of $4 \mathrm{I}^{\circ}$, of 100 miles. The great chain of the Andes runs along its eastern limit, with I general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of Christ the Redeemer, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of boundary dispute in sgoz. There are no rivers of great size,
and none of them is of much service as a navigable highway. In the north the country is anid. (For MAP, see p . 815.)

Among the island possessions of Chile are the Juan Fernandez group (3 islands) about 360 miles distant from Valparaiso, where I wireless station has been erected. One of these islands is the reputed ncenv of Alexander Selkirk's (Robinson Crusoe) shipwreck. Easter Istand ( $27^{\circ} 8^{\prime}$ S. and $109^{\circ} 28^{\prime}$ W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 12 regions and the Metropolitan Area and the total area of the Republic is estimated at 290,000 square miles, with 1 population (estimated, 197x) of x0,000,000. Two of these regions, Arica and Antofagasta, were annexed from Peru and Bolivia respectively after the War of the Pacific ( $\mathrm{I} 879-84$ ). The province of Tacna was also annexed but under a treaty signed in 1929 was returned to Peru which at the same time received payment of $£ x, 200,000$ for Arica The Chilean population has four main sources: (a) Spanish settlers and their decendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants. Only the few remaining indigenous Indians and some originally Bolivian Indians in the north are racially separate. Following extensive intermarriage there is no effective distinction among the remainder.

Goverument.-Chile was discovered by Spanish adventurers in the 16 th century, and remained under Spanish rule until 18 yo , when a revolutionary war, culminating in the Battle of Maipu (April 5. 1818), achieved the independence of the nation. Chilean women obtained equal voting rights with II a in on Dec. 21,1948 , before which they only participated in municipal elections

At a general election held on Sept. 4, 1970, the Marxist candidate Dr. Allende was elected President by a narrow margin. A new Cabinet took office on Oct. 30, 1970.

Severe industrial unrest, notably arippling strike by the National Confederation of Lorry Owners, which began in July 1973, led to sympathy strikes in other occupations; there were widespread violent incidents and $\boldsymbol{x}$ congressional vote of censure against the Government, with resultant resignations from the Cabinet. The Government of Dr. Salvador Allende was overthrown on September 1x, 1973, by 1 coup planned, and carried out within few hours, by leaders of the Armed Forces and National Police. President Allende was said to have committed suicide.

Although the Constitution of 1925 is still notionally in force, the National Congress has been dissolved, all political parties have been banned, as have all political activities. As I temporary expedient the Government has assumed wide-ranging civil powers. Inflation is still the main problem; revaluation of the Peso (against the U.S. $\$$ ) takes place continuously, approximately in line with the variation in the internal value of the currency (i.e. cost of living index).
Production.-Wheat, maize, barley, oats, beans, peas, rice, lentils, wines, tobacco, hemp, chilipepper, potatoes, sugar beet, onions and melons are grown extensively and livestock accounts for nearly 40 per cent. of agricultural production. The vine and all European fruit trees flourish in the central zone and fruit is a fairly important export item. Good wines are produced and exported and are becoming more widely known in world markets. Sheep farming predominates in
the extreme south (Province of Magallanes). There are large timber tracts in the central and southern zones of Chile, some types of which are exported, along with wood derivatives such as cellulose, to Europe and the Argentine and other markéts. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. Copper production in 1975 totalled 836,955 metric tons. Copper provides over 70 per cent. of Chile's exports earnings, the remainder of which are derived mainly from other minerals, wool, fruit, fish and forestry derivatives. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural resources in the world. Production in 1975 (including potassium nitrate) was $\boldsymbol{7}^{26,449}$ metric tons. Chile also produces iodine, manganese ore, coal, mercury, molybdenum, zinc, lead and a small quantity of gold. $x, 459,854$ metric tons of coal were produced in 1975. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities, but reached 96,323 metric tons in 1972. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945. Production in 1975 was $x, 422,200 \mathrm{cu}$. metres of crude oil and $7,096,900,000 \mathrm{cu}$. metres of natural gas-all in the Magallanes area. This total production, and imported crude oil, amounting in 1975 to about 75 per cent. of the input, is refined at Concon and San Vicente in the central part of the country. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepción. Current production capacity is about 600,000 metric tons of steel ingots per year, to be increased to one million metric tons per year.

Most consumer goods are manufactured locallycopper, steel and oil derivatives, pulp and paper, cement and other building materials, tobacco, cutlery, food products and beverages, sugar refining, textiles, clothing and footwear, plastic products, household equipment, tyres and other rubber products, radio and television sets, chemicals, pharmaceutical products, soaps, detergents and cosmetics. New classes of manufacture being developed are in the fields of motor-vehicle assembly, chemicals and petrochemicals, cellulose, metallurgy and some electrical, electronic and mechanical equipment.

Communications.-Chilean ships have a virtual monopoly in the coastwide trade, though, with the improvement of the roads, $I 1$ increasing share of internal transportation is moving by road and rail. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or viâ the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine numbers about $6_{3}$ vessels (of over 100 tons gross) with a total deadweight tonnage of 678,556 ( $\mathbf{1 9 7 6}$ ). Under a law promulgated in June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels with the intention of this figure eventually reaching 100 per cent. of bulk and refrigerated cargoes.

The first rallway was opened in 185 x and there are now 6,575 miles of track. A metre-gauge line (the Longitudinal) runs from La Calera, just north of Santiago, to Iquique. The wide gauge railway ( $x \cdot 676$ metres) runs from Valparaiso through La Calera, 60 miles inland, and after passing through Santiago ends at Puerto Montt.

With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Boliva, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the TransAndine Railway connects Valparaiso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft.
Chile is served by $x 5$ international airlines. The domestic traffic is carried almost exclusively by the State-owned Linea Aerea Nacional, which also operates internationally. Chile has an extensive system of airports which are being modernized with international financial assistance.

Chile's road system is about 65,000 kilometres in length, but only an estimated 7,000 kilometres are first-class paved highways. At the end of 1974 there were registered $2 \times 6,122$ cars, 15,682 buses and taxis and $\mathbf{2 6 6 , 3 0 8}$ goods vehicles, excluding about 15,000 tractors.
Defence.-Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. The Army's total strength is 50,000 , which includes 3,000 officers and 25,000 conscripts ( 2 years). In addition there is police force of "Carabineros " of 30,000 officers and men. The Air Force has 800 officers and 8,700 other ranks with a strength of aircraft. The Navy consists of 3 cruisers, 12 destroyers, frigates and escorts, some patrol vessels and FPBs and 3 submarines. There is a support force of transports, tankers, x submarine depôt ship and ancillary small craft. The strength of the Navy is 1,000 officers and 14,000 men, plus a Marine Force of 60 officers and $2,000 \mathrm{men}$.

Education.- Elementary education is free, and has been compulsory since $\mathbf{x 9 2 0}$. There are 8 Universities ( 3 in Santiago, 2 in Valparaiso, x in Antofagasta, $x$ in Concepción and $■$ in Valdivia). The religion is Roman Catholic.
Language and Literature.-Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose, and in $197 x$ to the poet Pablo Neruda. There are over ioo newspapers and - large number of periodicals, including some devoted to professional, scientific and social subjects.

Finance.-Total revenue for 1975 was estimated at Pesos $18,725,666,000$ and expenditure at Pesos $\mathbf{1 7 , 5 4 0 , 9 6 6 , 0 0 0 \text { . Foreign debt in December }}$ 1975 was estimated at some U.S. $\$ 4,802,000,000$.

The official rate of exchange, (July 1976), was about Pesos (\$) $23=£$.

External Trade
(Final figures)

1975 Total exports $2,043,400,000 \times, 548,000,000$ Trade with U.K.

$$
1974
$$

Imports from U.K. . $\quad £^{\mathbf{~} 36,878,000} £^{1966,195,000}$ Exports to U.K.. .... $86,5 \times 6,000 \quad 62,095,000$

The principal exports are metallic and nonmetallic minerals (refined copper, ingots and bars, iron ore, etc.), wood derivatives, some metal products, fish products, vegetables, fruit and wool. The principal imports are wheat and other food products, industrial raw materials, machinery, equipment and spares, oil fuels, lubricants, transportation equipment and raw cotton.

Capital, Santiago, 4,000,000 (Greater Santiago), Other large towns are: $-\psi$ Valparaiso ( 500,000 ),

Concepción ( $x 70,000$ ), Temuco ( $x 10,000$ ), $\Psi$ Antofagasta ( $1 \times 0,000$ ), Chillán ( $79,46 \mathrm{x}$ ), $\psi$ Talcahuano ( 75.643 ), Talca $(75,354)$; $\psi$ Valdivia $(70,000)$, $\psi$ Iquique ( 50,000 ), $\Psi$ Punta Arenas ( 50,000 ). Punta Arenas, on the Straits of Magellan, is the southernmost city in the world.

Flag. - 2 horizontal bands, white, red; in top sixth a white star on blue square, next staff. NATIONAL DAY.-September i8 (National Anniversary).

Area and Population.-The area of China is about $3,700,000$ square miles. Estimates of the present population vary considerably, but the U.N. estimate for 1974 gave afigure of $827,850,000$. The Chinese also now make public reference to a population of $800,000,000$. According to figures published in 1957 by the National Bureau of Statistics, the total population of China was $656,630,000$, not including Chinese living in Hong Kong, Macau or abroad. In 1953 the percentage distribution of the population was as follows:

Han, $94 \cdot \times 3$; Mongolian, 0.26 ; Tibetan, 0.48 ; Manchu, $0 \cdot 4 x$; Tribal, $3 \cdot 57$; Others, $1 \cdot 15$. There is no reason to suppose that the proportions have significantly changed.

The Provinces of China.
Population figures made public in $1973^{-77}$ were as follows:

Sinkiang is the largest region or province in area (about $\mathbf{y} / 6$ th of the whole area of the country) and Szechuan the most populous.

Government.-On October 10, 1911, the party of reform forced the Imperial dynasty to " "voluntary" abdication, and Republic was proclaimed at Wuchang.

On September 30, 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C.) met in Peking and appointed the National People's Government Council under the Chairmanship of Mao Tse-tung. On October I, Mao proclaimed the inauguration of the Chinese People's Republic. The Soviet Union broke off relations with the Nationalists and established relations with the new régime on October 2 . The régime was recognized by all the Communist bloc countries in quick succession, and soon after by the Asian countries of the Commonwealth, the United Kingdom and by a number of other countries. France recognized the Chinese People's Republic on January 27, 1964. Canada agreed to recognize the People's Republic in October 1970. From 1970 to mid-1977 the Chinese People's Republic has established or renewed diplomatic relations with over 60 countries. The United States and certain other countries continue to recognize the Nationalist régime in Formosa.

The C.P.P.C.C. continued to be the supreme legislative body of the new state until September $\mathbf{z o}$, I954, when new constitution was adopted. It was then replaced as the highest organ of state power by the National People's Congress which exercised legislative power.

With the adoption of the 1954 Constitution, the National People's Government Council was replaced by the State Council, composed of the Premier, I6 Vice-Premiers and the heads of ministries and commissions. This body was the supreme administrative body, responsible for the day-to-day running of the country.

In January 1975 a new Constitution was adopted by the Fourth National People's Congress, which established the leading role of the Chinese Communist Party in all spheres of national life. Institutions such as the National People's Congress and the State Council and the system of People's Congresses remain, but their powers are less clearly defined under the new Constitution, or are curtailed. The post of State Chairman has been abolished, and the Standing Committee of the National People's Congress now appears to act as $\quad$ I kind of collective Head of State. Among its powers is that of acting for the country in its dealings with foreign states, i.e. in the despatch and recall of Chinese representatives abroad and the reception of foreign diplomatic envoys. The National People's Congress, which is supposed to hold one session a year, is empowered to amend the Constitution, make laws, appoint and remove the Premier and members of the State Council on the recommendation of the Party Central Committee, and to approve the national economic plan, the state budget and the final state accounts. Command over the armed forces is now vested in the Chairman of the Chinese Communist Party.

The system of elections to local People's Congresses and to the National People's Congress is maintained under the new Constitution; but there is no reference to deputies to congresses at the primary level being "directly elected by the voters ". Deputies to congresses at all levels are now to be elected "through democratic consultation". Deputies to the National People's Congress are, as before, elected by provinces, autonomous regions, municipalities directly under the Central Govern-
ment and by the armed forces, but no longer by Chinese resident abroad.

Local government is now entrusted to local Revolutionary Committees. These bodies, which emerged during the Cultural Revolution to replace the former People's Councils, were firmly established under the new Constitution as the permanent organs of the local people's congresses by which they are elected and to which they are accountable, in each instance at the corresponding level. They are also accountable to the "organ of state at the next higher level" (this would appear to mean the people's congress at the next higher level).

Autonomous regions, prefectures and counties continue to exist for national minorities and are described as self-governing. The system prevailing is that found elsewhere, i.e. people's congresses and revolutionary committees. Peking, Shanghai and Tientsin continue to come directly under the central government.

It is only in the 1975 Constitution that the leading role of the Chinese Communist Party is spelt out; but its complete dominance over the Government has always been achieved by ensuring that all the really important positions at whatever level have been filled by Party members. Current membership of the Party stands at $30,000,000$.

During the Cultural Revolution both Party and State organs were disrupted. The system of "Revolutionary Committees" was devised to replace the People's Councils at provincial level and below. Party Committees have been reconstituted at all levels. The leadership in both Party and Revolutionary Committees is for the most part identical, thus providing for an interlocking relationship between the two bodies. Until April, 1959, Mao Tse-tung was Chairman both of the Republic and the Communist Party. When he stood down from his position as Head of State his place was taken by Liu Shao-ch'i who was then First Vice-Chairman of the Party. In October 1968, the Party's Central Committee resolved to strip Liu of all his posts both in the Party and in the State. The roth Congress of the Chinese Communist Party was held in Peking from August 24 to 28,1973 .

1976 was marked by the deaths of both Premier Chou En-lai (in January) and Chairman Mao Tse-tung (in September), and by the rise of Hua Kuo-feng who was appointed first Acting Premier, the Premier and First Vice-Chairman of the Party's Central Committee and finally Chairman of the Central Committec. Four members of the Politbureau, Chiang Ching (Mao's widow), Chang Chun-chiao, Wang Hung-wen and Yao Wen-yuan, were accused in October of having sought to seize power after Mao's death and have since been the subjects of a campaign of criticism. Vice-Premier Teng Hsiau-ping, widely expected to succeed Chou En-lai as Premier, was dismissed from all his posts in April 1976, following demonstrations two days before in Tien An Men Square in Peking which started as ceremonies to mourn Chou En-lai. Teng was held responsible for the disturbances. Following demands for his rehabilitation he was subsequently reinstated.
Armed Forces.-All three military arms in China are parts of the People's Liberation Army (P.L.A.) The size of this body has not been formally given, but it is estimated that China has between $2 \frac{1}{\frac{1}{2}}$ and 3 million men under arms, with $\quad$ further 12 million (or perhaps many more) reserves who take part in militia activities. Until r955 the P.L.A. did not have a rank structure, but one was introduced in that year similar to that of the Russian Army. In the same year compulsory military service was introduced

for all men between the ages of 18 and 40 . This service was on a selective basis. In January, I965, the length of service for those conscripted was increased by one year, to four years for the Army, five years for the Air Force and six years for the Navy; and with effect from June I, x965, the rank structure was abolished, together with all marks of distinction of branch of service (although members of the services may still be distinguished from one another by the colour of their uniforms). This means a reversion to the previous system by which members of the armed forces are known only by their appointment.

China exploded her first experimental nuclear device on October 16, 1964 and made further tests in 1965 and in May, October and December, 1966. Her first hydrogen bomb was tested in June, 1967. Further tests of nuclear devices and hydrogen bombs have since been announced, the latest being in November 1976. China embarked on a programme of earth-satellite launchings in April $\mathbf{1 9 7 0}$, the latest being made in December 1976 .

Religion.-The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than religion) and, since its introduction in the first century of the Christian era, Buddhism. There are also Chinese Moslems and Christians. Since 1949, the practice of all religions has been severely curtailed, although not actually prohibited.

Education.- Although primary education was compulsory under the Nationalists, mass education did not become a fact until after the Communists had taken over. All major educational establishments closed down at the start of the Great Proletarian Cultural Revolution in $\mathbf{9 6 6 6}$. Primary and middle
school education was interrupted and it was announced that the entire education system was to be reformed. School classes have been resumed, and, among the reforms observable are a reduction in the number of years in primary and middle schools, and the incorporation of spells of manual work into school activities. In the summer of 1970 some of the maior institutes of higher education started to enrol new students, and new courses, of $2-3$ years duration, started in the autumn. Students are now selected primarily from among workers, peasants, soldiers and also middle-school graduates who have had $2-3$ years experience of manual labour in factories or in the rural areas.

Language and Literature.-The Chinese language has many dialects, Cantonese, Hakka, Amoy, Foochow, Changsha, Nanchang, Wu (Shanghai) and the northern dialect. The Common Speech or Putonghua (often referred to as "Mandarin ") which is being taught throughout the country is based on the northern dialect. The Communists, when they came into power, continued the Kuomintang policy of promoting it as the national language and made much more intensive efforts to propagate it throughout the country. Since the most important aspect of this policy is the use of the spoken language in writing, the old literary style of writing has fallen into disuse.

Chinese writing is ideographic and not phonetic. While the number of sounds in Putonghua is limited, the use of four tones expands the variety of meanings that a sound may have. These meanings are distinguished visually by different characters. Whereas originally the language was monosyllabic and confusion was avoided by the use of different characters, thus producing texts
which were visually clear but ambiguous to the ear, with the increasing use of the spoken language for writing people are increasingly making use of polysyllabic compounds both in speech and writing in order to avoid confusion. In 1956, after some 4 years of study, the Government decided to introduce 230 simplified characters with a view to making reading and writing easier. The list was enlarged; there are now about 2,000 simplified characters in use. In January, 1956, all Chinese newspapers and most books began to appear with the characters printed horizontally from left to tight, instead of vertically reading from right to left, as previously.

In February 1958 The National People's Congress adopted a system of Romanization, known as pinyin, using 25 of the letters of the Latin alphabet (not v). This has been used within the country largely for assisting school children and others to learn the pronunciation of characters in Putonghua.

Chinese literature is one of the richest in the world. Paper has been employed for writing and printing for nearly 2,000 years. The Confucian classics which formed the basis of the traditional Chinese culture date from the Warring States period (4th-3rd centuries B.C.) as do the earliest texts of the rival tradition, Taoism. Histories, philosophical and scientific works, poetry, literary and art criticism, novels and romances survive from most periods. Many have been translated into English. In the past all this considerable literature was available only to very small class of literati, but with the spread of literacy in the zoth century, a process which has received enormous impetus since the Communists took over in 1950, the old traditional literature has been largely superseded by modern works of a popular kind and by the classics of Marxism and modern developments from them.

Three daily (and one monthly) newspapers are published in Peking of which the most important is the People's Daily, the organ of the Chinese Communist Party Central Committee.

Currency.-The yuan was revalued with effect from March x , 1955, on the basis 10,000 old yuan for one new yuan. (See also p. 83.)

Production and Industry.-China is essentially agricultural and pastoral country: peasants constitute about 80 per cent. of the population. After the establishment of the Chinese People's Government at which time land for the most part was privately owned, there occurred several stages of land reform culminating in the formation of the people's communes in 1958. With the exception of a few State farms, the communes embrace the whole rural population. In all there are 50,000 communes and each is sub-divided into production brigades and teams. Work is assigned on a collective basis and the production team (of about 45 families) is the normal unit of accounting and labour. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities. The mineral wealth of the country is very great. Coal of excellent quality is produced. Iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundant. Oil is produced in Kansu, Sinkiang, Chinghai and at oilfields located in the northeast and east of the country, of which Taching oilfield in Heilungkiang is the foremost. No
reliable figures for industrial production have been published since 1959. The figures given below are those estimated for 1975.

Steel, 25,000,000 tons; Pig Iron, 33,000,000 tons; Coal, $420,000,000$ tons; Electric Power, 121,000,000,000 kWh.; Crude oil, 76,000,000 tons; Cement, $40,000,000$ tons; Timber $36,000,000$ cubic metres; Chemical Fertilizers, 30,000,000 tons; Cotton Cloth, $7,600,000,000$ metres; Machine Cotton Cloth, 7,600,000,000 metres; Trucks, 145,000; Machine Tools, 90,000.
Following the Great Leap Forward in 1958 and during three subsequent years of difficult conditions for agriculture, there was a cut back in both agricultural and industrial production which then recovered to its pre-1958 level. During the Cultural Revolution there was some economic dislocation. The violent earthquake of July 1976 that centred on the industrial city of Tangshan in Hopei (north China) caused considerable damage and dislocation to China's industrial production. Industrial policy is governed by the need to build up agriculture, and some branches of industry, especially those such as machine tools and chemical fertilizers which have a direct relevance to agriculture have gone ahead more quickly. China is now selfsufficient in petrol and oil.

A new (third) Five Year Plan began in 1966. The Fourth Five Year Plan ran from 197x to 1975; as with the Third Plan, no details of it were published, but it has been announced that it has been successfully completed. The Fifth Five Year Plan, due to begin in 1976, is said to be undergoing reformulation.

The principal articles of export are animals and animal products; oils; textiles; ores, metals and tea. The principal imports are raw cotton, cotton yarn and thread; motor vehicles; machinery; chemical fertilizer plants; wheat; aircraft; books, paper and paper-making materials; chemicals; metals and ores; and dyes.

Trade with U.K.
$1975{ }^{1976}$
Imports from U.K... $£ 80,368,000 \quad £ 68,2 \times 6,000$ Exports to U.K..... $59,423,000 \quad 88,995,000$

Communications.-Of the total area of China over half consists of tableland and mountainous areas where communications and travel are generally difficult. By r949, the communications system, as a result of years of neglect and civil war, was more or less completely paralysed. In any case such roads and railways as did exist were largely confined to the eastern plains. After the Communists achieved complete control they devoted much attention to restoring and improving the communication system. The country now has about 47,000 kilometres of railway trunk and branch ifines (as compared to 21,000 kilometres in r949) and some 800,000 kilometres of highway (as compared with 70,000 kilometres in 1949). In addition, internal civil aviation has been developed, with routes totalling more than 68,000 kilometres in 1974. Domestic air services now stand at about 120 , with some 328 weekly flights. As a result the communications network now covers most of the country. In the past where roads did not exist the principal means of communications east to west was provided by the rivers, the most important of which are the Yangtze ( 3,400 miles long), the Yellow River ( 2,600 miles long) and the West River ( $x, 650$ miles). These, together with the network of canals connecting them are still much used, but their overall importance is less than it was. Coastal port facilities are being improved and the merchant fleet expanded. In the past 10 years great progress has been made in developing
postal services and telecommunications. It is now claimed that 95 p.c. of all rural communes are on the telephone and that postal routes reach practically every production brigade headquaters.

## SPECIAL TERRITORY

Tibet, a plateau seldom lower than yo,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population of $1,400,000$ (1973).

From igir to 1950, Tibet was virtually an independent country but its status was never officially so defined. In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby the Chinese army was allowed entry into Tibet. A Communist military and administrative headquarters was set up. In 1954 the Government of India recognized that Tibet was an integral part of China, in return for the right to maintain trade and consular representation there.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government. In its place the 16 -member Preparatory Committee for the Tibetan Autonomous Region, originally set up in 1955 with the Dalai Lama as Chairman, was to administer Tibet under the State Council. The Preparatory Committee was to have the Panchen Lama as Acting Chairman and also to include 4 Chinese Officials. Elections were held to choose local People's Congresses in Tibet, thus indicating that the government organization there no longer differed significantly from that of any ordinary province in China. The Dalai Lama, now exiled in India, announced " new constitution " in March, 1963.

In December, 1964, the Dalai Lama, although absent, was declared to be a traitor, and both he and the Panchen Lama were dismissed. The position of Acting Chairman of the Preparatory Committee was assumed by Jigme, who had long been the most prominent secular figure in Tibet. This move marked the end of the period of co-operation by the Chinese Government with the traditional religious authorities, and the eclipse of the latter. The Preparatory Committee completed its work with the setting up of Tibet as an Autonomous Region of China on Sept. 9, 1965.
Capital.-Peking, population (Chinese official figure, 1976), 8,000,000. The population of $\Psi$ Shanghai (Chinese official figure, 1976) is given as 10,000,000; Nanking (estimate, 1974) $2,400,000$; Tientsin (Chinese official figure, 1976) 7,000,000; Shenyang (Chinese official figure, $\mathbf{x 9 7 5 \text { ) } 4 , 4 0 0 , 0 0 0 \text { ; } ; ~}$ Wuhan (Chinese official figure, 1976) $3,500,000$; Chungking (Chinese official figure, 1976) 6,000,000; $\Psi$ Canton (estimate, 1973) 5,000,000; Harbin (estimate, 1974) 2,100,000; Luta (Lushun and Talien) (estimate, 1973) 4,200,000.
Flag.-Red, with large gold five-point star and four small gold stars in crescent, all in upper quarter next staff.
National Day.-October i (Founding of People's Republic).

## TAIWAN <br> (Formosa)

President, Dr. C. K. Yen (Yen Chia-kan), sworn in, April 6, 1975.
Premier, Gen. Chiang Ching-kuo (June $\mathbf{x}$, 1972).
An island of some 13,800 sq. miles in the China Sea, Taiwan lies 90 miles east of the Chinese mainland in latitude $21^{\circ} 45^{\prime} \mathrm{N}$. $-25^{\circ} 38^{\prime} \mathrm{N}$. The population ( $16,508,190$ in March, 1976), is almost entirely Chinese in origin and includes about $2,000,000$ mainlanders who came to the island with Chiang Kai-Shek in 1947-49. The territory of Taiwan includes the Pescadores Islands ( 50 sq . miles), some 35 miles west of Taiwan, as well as Quemoy ( 68 sq . miles) and Matsu (ix sq. miles) which are only a few miles from the mainland. Settled for centuries by the Chinese, the islandwas administered by Japan as a province from 1895 to 1945. General Chiang Kai-Shek withdrew to Taiwan in 1949, towards the end of the war against the Communist régime accompanied by 500,000 Nationalist troops, since when the territory continued under his presidency. Gen. Chiang Kai-Shek died on April 5 , 1975 and was succeeded by the Vice-President, Dr. C. K. Yen. A mutual defence treaty between the United States and Taiwan Governments was signed in 1954.

The eastern part of the main island is mountainous and forest covered. Mt. Morrison (Yu Shan) ( $53,035 \mathrm{ft}$.) and Mt. Sylvia (Tzu'ukaoshan) ( $\mathbf{2} 2,972 \mathrm{ft}$.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, tea, bananas, pineapples and tobacco. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports $\Psi$ Keelung ( 305,545 ) and $\Psi$ Kaohsiung ( 724,222 ) are situated in the northern and southern sections of the island.

## British Consulates

The British Consulate was withdrawn from Taiwan on March 31, 2972.

## COLOMBIA

(República de Colombia)
President (x974-78), Alfonso López Michelsen, elected April 21, 1974; assumed office, August 7, 1974.

## Colombian Embassy in London 3 Hans Crescent, S.W. $I$ [ox-589 9177]

 Ambassador Extraordinary and Plenipotentiary, His Excellency Alfredo Vázquez-Carrizosa (I975). Counsellors, Srta. N. Millán; Dr. F. Corredor (Economic).ist Secretary, Dr. A. Arango.
and Secretary, Dr. J. M. Santos (Coffee Affairs). There are Consulates-General in London and Liverpool.

The Republic of Colombla lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between $4^{\circ} 13^{\prime} \mathrm{S}$. to $12^{\circ} 30^{\prime} \mathrm{N}$. lat. and $68^{\circ}$ to $79^{\circ} \mathrm{W}$. long., with - approximate area of 440,000 square miles, and I population (estimated 1973) of $23,500,000$.

The Colombian coast was visited in 1502 by Christopher Colombus, and in 5536 . Spanish expedition under Jimenez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the SpanishAmerican colonies of 1815 - 1824 . In 1819 Simón Bolivar (born 1783 , died 1830 ) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1835 the remaining territories were formed into the Republic of New Granada. In ${ }^{2} 858$ the name was changed to the Granadine Confederation and in 186 r to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and became II separate Republic.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the most important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic. The highest mountain in Colombia is Cristobal Colon ( 18,946 feet) in the Sierra Nevada de Santa Marta on the Caribbean coast.
The principal rivers are the Magdalena, Guaviare, Cauca, Atrato, Caquetà, Putumayo and Patia. The Patia flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or Inca's Bridge, of natural stone. On the Rio Bogota is the great Fall of Tequendama, 482 ft . in height.

Government.-During the carly nineteenth-fifties Colombia suffered a period of virtual civil war between the supporters of the traditional political parties, the Conservatives and the Liberals. The dictatorship of Gen. Rojas Pinilla (r953-57) put m end to the worst of the violence and on May ro, 1957, following Pinilla's summary dismissal, a military junta took over, preparing the way for a return to democratic government. Congressional elections were held on March 16,1958 , which yielded Liberal majority. This led, the same year, to the institution of the National Front system, to run for a period of 36 years. The Presidency alternated every four years between the Liberals and Conservatives while parity of appointment was maintained between the two parties in Congress, the Government and all Government Departments.

During the presidency of Dr. Carlos Lleras (May, 1966 to April, 1970) the country made considerable economic advances, but the National Front system was nearly overthrown at the 1970 presidential election, when Gen. Rojas, with his political movement, the National Popular Alliance,
almost defeated the Government candidate, Dr. Misael Pastrana.

In 1974 the first election not subject to the National Front system for the Presidency and Congress was won by the Liberal candidate, Alfonso Lopez Michelsen; parity in administrative appointments between the traditional parties will continue, however, until 1978.
Production.-The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead and coal. In 1977 the country was producing 146,000 barrels of oil per day after a peak production figure of 218,000 in 1970. Measures have recently been taken to encourage exploration for new reserves, but since early 1975 Colombia has exchanged its rôle of netexporter for that of net-importer of crude oil. The principal agricultural products are coffee (which accounts for over 60 per cent. of total exports by value) cotton, bananas, rice, cocoa, sugar, tobacco, maize, cut flowers, wheat and other cereals. Manufactures (mainly for home consumption, but with an increasing export trade) consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery cigarettes, beer, cement, glass containers and steel. The Government, backed by massive international finance and technical aid, has continued to encourage the development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery. The importation of many consumer goods is restricted although there has recently been a slight relaxation of controls.

Defence.-The Army peace effective strength is 54,800 ; war effective 300,000 . The Navy consists of 5 destroyers, 4 frigates, $=$ submarines, some gunboats and other small craft, with personnel about 5,800 including units of marines; a battalion of the Colombian army and elements of the Navy served with the United Nations forces in Korea. The Air Force, with 4,000 personnel, has jet trainers and $\quad$ front-line squadrons equipped with Mirage fighters.

Communications.-The first railway was opened in 1855 , about 1,914 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Marta, was opened in July, 196x. There are about 2,200 miles of rail in use at present. The total road network ( 1973 ) consists of $39,900 \mathrm{~km}$. of roads of all types, of which $7,000 \mathrm{~km}$. are classified as main trunk and transversal roads. A programme of road improvement and construction is under way, financed by tax on petrol. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, and services to London daily via Miami, via Paris and once a week by British Caledonian direct to London. Air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to most parts of the country.

Roman Catholicism is the established religion.
Language and Literature.-Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 70 per cent. of those over to years of age read and write. In addition to the National University with headquarters at Bogotà there are 26 other universities. There is in flourishing press in urban areas and I national literature supplements the rich inheritance from the time of Spanish rule.

Finance.-For rate of exchange, see p. 83.

British Council Representative, R. S. Newberry, Calle 1x, No. 5-i6, Bogotá.

## CONGO

## (People's Republic of the Congo)

President, Col. Joachim Yhombi-Opango. Prime Minister, Head of Government, President of the Committee for the Plan, Louis Sylvain Goma.
The Republic lies on the Equator between Gabon on the west and Zaire on the east, the River Congo and its tributary the Ubanghi forming most of the eastern boundary of the state. The Congo has short Atlantic coastline. Area of the Republic of Congo is $\mathbf{x 2 9 , 9 6 0}$ sq. miles, with population of approximately 2, roo,000. Formerly the French colony of Middle Congo, it became member state of the French Community on November 28, x958, and was proclaimed fully independent on August 17,1960 .
M. Fulbert Youlou held office as President of the Republic from Aug. 7, 1960. Growing discontent with the régime culminated in riots in Brazzaville and led to the President's resignation on Aug. 15 , 1963, and the dissolution by the Army of the National Assembly. A provisional Government led by M. Alphonse Massemba-Débat took office on Aug. 16, and a new constitution, giving the
provisional Government full powers, came into operation in December, 1963.
On Jan. 12, 1968, the President dismissed the Prime Minister, M. Noumazalay, with three other members of his Cabinet and himself assumed office - Prime Minister with reformed Ministry. He was himself arrested after heavy fighting during the last few days of August and resigned on Sept. 4 1968. Conduct of affairs was assumed by $\quad$ National Council of Army officers.

Commandant Marien Ngouabi became President of the Republic on December 3x, 1968. The Parti Congolais du Travail (PCT) was created by the Congress of December 29-31, 1969. The People's Republic of the Congo was established, and a new Constitution was promulgated. Following the Second Extraordinary Congress of the Party in December $\mathrm{x972}$, a new Constitution and a reorganization of the structures of the Party and the State were submitted to a people's referendum, in July x973. President Ngouabi was assassinated on March 18, 1977 allegedly by hirelings of former President Mussamba-Debat, who was shortly afterwards executed. During the period of confusion, the Cardinal Archbishop of Brazzaville was also shot. Col. Joachim Yhombi-Opango took over as President of the Party Military Commitee, President of the Republic, Chief of State and President of the Council of Ministers.

COSTA RICA
(República de Costa Rica)
President ( $\mathbf{x} 974-78$ ), Lic. Daniel Oduber Quirós, bom x923, elecled February 8, 1974; assumed office. May 8, 1974.

Costa Rican Embassy a Culross St., W.z. [ $\mathrm{or}-286$ 7898]
Ambassador Extraordinary and Plenipotentiary, His Excellency Sr. Dic. Fernando Soto-Harrison ( 1977 ). Minister-Counsellor, Sr. Rodrigo Castro (Economic and Consular).
ist Secretary, Srta. Ana María Aranaz.
The Republic of Costa Rica, in Central America extends across the isthmus between $8^{\circ} 17^{\prime}$ and $x x^{\circ} 10^{\prime} \mathrm{N}$. lat. and from $83^{\circ} 30^{\prime}$ to $85^{\circ} 45^{\prime} \mathrm{W}$. long., contains an area of 19,653 English sq. miles, and if population (mid 1976) of $2,000,000$. The population is basically of European stock, in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries ( $\mathbf{5 5 3 0 - 1 8 2 x \text { ) Costa }}$ Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country obtained its independence, although from 1824 to 1839 it was one of the United States of Central America.

On Dec. $x$, 1948, the Army was abolished, the President declaring it unnecessary, at the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have - tropical climate but the interior plateau, with I mean elevation of 4,000 feet, enjoys temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific by rail.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Meat is now Costa Rica's fourth largest export.
The chief ports are $\Psi$ Limón, on the Atlantic coast, through which passes most of the coffee exported, and $\Psi$ Puntarenas on the Pacific coast. A new Pacific port, Caldera, currently under construction with Japanese aid, is likely to divert traffic from Puntarenas within a few years.

Bananas are exported from Golfito, on the Pacific Coast, by the United Fruit Co., and from Limón by the Standard Fruit Co. In 1975, 1,605 ships entered Costa Rican ports handling imports of approximately $\mathrm{x}, 193,000$ tons of goods. About 500 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, Iberia, Viasa, TACA, SAHSA, SAM and COPA call at San José, while feeder services link the main centres of population with the capital. LACSA is the national airline with BAC-six flights to Miami, Mexico, Central American capitals and Caracas, Barranquilla and Maracaibo in South America, besides internal flights to local airports.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

GNP.- 1976 \$U.S. 2,279,625,000.

## Cuban Embassy in London 57 Kensington Court, W. 8 [ox-937 8zz6]

Ambassador Extraordinary and Plenipotentiary, His Excellency Licenciado Jorge A. Bolaños ( 1977 ). Cuba (the largest of the "West India " Islands) lies between $74^{\circ}$ and $85^{\circ} \mathrm{W}$. long., and $19^{\circ}$ and $23^{\circ}$ N. lat., with total area of 44,178 sq. miles and a population at the Census of 1970 of $8,553.395$.

The island of Cuba was visited by Christopher Columbus during his first voyage, an October 27 , 1492, and was then bclieved to be part of the Western mainland of India. Early in the 6 th
century the island was conquered by the Spaniards, to be used later a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, $3762-1763$, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the xgth century in $\mathbb{I}$ fierce and blood-thirsty war. In $x 898$ the government of the United States intervened and despatched the battleship Maine to Havana harbour, where in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April zo, $\mathbf{x 8 9 8}$, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short SpanishAmerican war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. $x^{2}$ z899, to May 20 , $\mathbf{y 9 0 2}$, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., $\mathbf{x g o 6 ,}$ when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated. In $1933 \|$ revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940 , but its operation was suspended for various periods until February 24, 1955, when the Government elected on November $x$, 9954 , took office.
A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January $x$, 1959. A provisional government was set up and elections were promised within four years. Dr. Castro has since proclaimed the revolution to be Socialist and himself to be a Marxist-Leninist.
In October, 1965 , the Communist Party of Cuba was formed to succeed the United Party of the Socialist Revolution. It is the only authorized political party. Elections are no longer to be held. The First Congress of the Communist Party of Cuba was held in December 1975. The new Socialist Constitution came into force on February 24, 2976 .
The Revolutionary Government has carried out programmes of land and urban reform and of nationalization of the means of production and distribution. By June, r963, 90 per cent. of industrial production, all foreign trade and about 50 per cent. of small commercial companies were in state hands. In March, 1968, virtually all remaining private commercial enterprises were nationalised, About 70 per cent. of the cultivated land is in state farms or co-operatives. Private smallholders, who own the remainder, also come under a measure of Government control.
Although efforts are being made to diversify the economy, sugar is still its mainstay and Cuba's principal source of foreign exchange. It stiil accounts for some 80 per cent. in value of total Cuban exports. The largest sugar harvest ever was produced in 1969/70, when total production reached about $8,500,000$ tons. This was achieved at considerable expense to the rest of the economy, however, and the declared target of ro million tons, which was to have been reached in $\mathbf{x 9 7 0}$, has been delayed. Cuba's other main exports are nickel, tobacco and rum, while increases are expected shortly in the availability of fish, meat and citrus fruit.
Despite increased trade with Western Europe and Japan, the Communist countries, particularly the Soviet Union, form Cuba's main trading partners.
covering about 60 per cent. of imports and exports. In addition, the U.S.S.R. offers substantial aid from an imbalance in the annual trade profits in Cuba's favour which has recently been in the region of 250 to 350 million roubles.

11,915 miles of railway are open (public service 4,880 ; sugar plantations and mining areas 7,035) and about 12,000 miles of telegraph line. There about $8,29 \mathrm{I}$ miles of road. At present scheduled international air services run to Mexico City, Moscow, Prague, Madrid, Rabat, Algiers, Georgetown, Kingston, Montreal, Panama, Lima, Berlin and Brussels.
Language and Literature.-Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 , but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. There are universities at Santiago de Cuba and Santa Clara. Public libraries have been established. The daily press and broadcasting and television EE under the control of the Government.
Finance. The public revenue rose from 10 estimated $\$ 365,247,946$ in 1958 to $\$ 2,399,006,000$ for 1964 , including profits from State trading concerns, etc. No up-to-date figures are available for the public debt-at the end of $195^{8}$ this stood at $8760,300,000$.

Currency-Average, Pesos $1 \cdot 45=£$ I, U.S. currency ceased to be legal tender in Cuba mane 30, 1951 (see also p. 83).
Trade-Exports in 1973 were valued at Pesos $1,550^{\circ} 8 \mathrm{~m}$, compared with Pesos $770^{\circ} 9 \mathrm{~m}$, in 1972; imports, 1973, Pesos $1,390 \cdot 6 \mathrm{~m}$ (1972, Pesos $\mathrm{I}, \mathbf{1} 89 \cdot 8 \mathrm{~m}$ ).

## Trade with U.K. <br> 1974

Imports from U.K... $\AA^{23,926,000} \AA^{6} 6,977,000$ Exports to U.K .... $19,952,000$ 6,318,000
The exports um principally sugar and tobacco; flut imports are mainly machinery.
CAPITAL, $\Psi$ Havana ( $\mathrm{pop}_{\text {. }}$ Census 1970), x,755,360; other towns are $\Psi$ Santiago (292,251), Santa Clara ( 213,296 ), Camagüey ( 196,854 ), Holgüin ( 183,115 ), and $\Psi$ Cienfuegos ( $\mathbf{1} 64,06 \mathrm{I}$ ).

3rd Secretary, Dr. Miloslav Ježil.
Attaché, Milan Pokorný.
Area and Population.-Czechosiovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory affected having an area of 53,700 square miles, reduced, by the cession of Ruthenia to U.S.S.R. in 2945 , to 49,400 square miles. The population of Czechoslovakia was $14,686,255$ in 1974.

Government.-The Communist Party, with the aid of Action Committees, seized power in Czechoslovakia in February, 1948, and Communist control of the country is now unqualified. On July $1 x$, r960, a new constitution was proclaimed, replacing that of 2948 . Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic ".
In January, 1968, pressures for reform of the system were realized with the removal of the First Secretary of the Communist Party, Novotny, and his replacement by Alexander Dubček. They were translated into $\quad$ Party Action Programme adopted in April. Shortly afterwards the country's supreme legislative body, the National Assembly, began work on Der legislation, which envisaged the democratisation of the country's political life, greater guarantees of fundamental liberties and the establishment of a federal system.

The speed of events and their implications for the internal development of the other communist regimes in Eastern Europe and the Soviet Union, as well as for the system of alliances among these countries, alarmed the Soviet Union. On the night of August 20, Czechoslovakia was invaded by Soviet, Polish, East German, Hungarian and Bulgarian troops, the capital and all major towns being occupied.

The Russians were unable to depose the Czechoslovak leadership, but forced them to sign on August 26 an Agreement modifying their policies and, on October 18 , a treaty legalising the presence of Soviet troops on Czechoslovak territory.

On April $\mathbf{7}$, 1969, Gustáv Husák took over the leadership of the Communist Party, and the reforms of 1968 were abandoned with exception of the Federil system of government, which had been set up in October 1968. Czechoslovakia now consists of the Czech Socialist Republic and the Slovak Socialist Republic, each of which has its own government responsible to its legislative body-the National Council. Areas such as the Constitution, Defence, Foreign Affairs, State Material Reserves and Currency are the responsibility of the Federal Administration. The Federal Government is responsible to the Federal Assembly, which is composed of two Chambers, the Chamber of the People, whose duties are elected throughout the Federation, and the Chamber of the Nations, consisting of an equal number of Czech and Slovak Deputies. The federal system was not extended to the organization of the Communist Party.

The Economic System.-Czechoslovakia has long been one of the most highly-industrialised countries of Central Europe. Under the present political system industry is state-owned, while nearly all agricultural land is cultivated by state or co-operative farms. Economic planning is centralised, and state economic plans have the force of law. In 1965 the system was reformed to allow for a greater devolution of responsibility to enterprises and factories, and greater emphasis was placed on profitability and competition within a centrally planned economy. After the events of 1968-69 there was sharp swing back to the present highly centralised system. There are at present no signs of substantial economic reform.

Language diterature.-Czech and Slovak are the official languages, each having its own literature. The Reformation gave a wide-spread impulse to

Czech literature, the writings of Jan Hus (who was martyred in 1415 as a religious and social reformer) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the 17 th century when Jan Amos Komensky or Comenius ( $\mathbf{r} 59 z-1670$ ) was expelled from the country. He is still recognized an outstanding educationist and - thinker of first magnitude. Under Austrian repression and with the persistent pursuit of Germanization, there was a period of stagnation until the national revival in the first half of the 19th century. Modern prose, drama and fiction, penned between the Wars, are represented by several authors, of international reputation, notably K. M. Capek-Chod ( $\mathbf{8 6 6 0 - 1 9 2 7 \text { ), Viktor Dyk (1877-1931), }}$ Jaroslav Hasek ( $1883^{-1923 \text { ) Karel, Capek ( } 1890-1000}$ 1938), Vladimír Vančura ( $x 891-1942$ ), and Ivan Olbracht ( $1882-1952$ ). Liberty of the press ceased with the loss of independence and the Nazi occupation in 1939. It was temporarily restored on the liberation of the country. After the Communist take-over of February, 1948, however, freedom of the press was curtailed. All papers and periodicals were forced to follow the Party line and a number of publications were banned. Following the thaw of 1956 and after the relapse into dogmatism after the Hungarian Revolution, the new wave of freedom started in 1962-1963 and led to increased recognition of Czech and Slovak literature in the world. Greater international recognition is hampered by translation difficulties. In 1966 nearly 250 Czech and Slovak books were published abroad, including roughly one-third in non-Socialist countries. The prominent writers include František Hrubin (b. 19ェo), Bohumil Hrabal (b. 19×4), Václav Havel (b. 1936), Ladislav Mñaćko (b. 1919), Ladislav Novomesky (b. I904), Arnošt Lustig (b. 1926), Jirí Mucha (b. I915), and others. Poetic writing ranges from traditional lyric (Jaroslav1 Seifert) to "concrete " and typographic modernism (Jirií Kolař, Jošef Hiršal). In the present political conditions few of these writers are published in Czechoslovakia.

Education.-Education is compulsory and free for all children from the ages of 6 to 55 . The number of pupils in basic nine-year schools is $x, 890,08 \mathrm{I}$ (1973-74). There are $127,45 \mathrm{I}$ students in the secondary grammar schools and the number given for technical schools of all kinds is 277,945. There are five universities in Czechoslovakia of which the most famous is Charles University in Prague
(founded 1348 ), the others being situated at Bratislava, Brno, Olomouc and Kosice. In addition there are a considerable number of other institutions of university standing, technical colleges, agricultural colleges, etc. In 1973-74, there were 135,874 students in centres of higher education of which $23,8 \mathrm{Ir}$ were part-time.

Finance.-The Czechoslovak currency is the Czechoslovak Koruna (Kc̆s=Czechoslovak crown) of roo heller. The present Czechoslovak rate of exchange is Kčs. $10 \cdot 45=£ I$ (June 1976) with bonus of 75 per cent. for non-commercial travellers (see also p. 83).

Commercial Counsellor, J. Marcussen.
Area and Population.-A Kingdom of Northern Europe, consisting of the islands of Zeeland, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic, the Faroes and Greenland. Denmark is situated between $54^{\circ} 34^{\prime}-57^{\circ} 45^{\prime} \mathrm{N}$. lat., and $8^{\circ} 5^{\prime}-15^{\circ}$ E. $12^{\prime}$ long., With area of 17,000 square miles, and - populam tion estimated ( 1976 ) of $5,065,3{ }^{13}$ - In 1976 there there were 65,277 live births, and 54,090 deaths.

Government. - Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the Folketing, of not more than 779 members, including $\square$ for the Faröes and 2 for Greenland. Voting age has been 18 since 1971.

A Social Democrat minority Government was formed in February 1975. The representation in the Folketing following the 1977 election was as follows: Social Democrats 65; Progress Party 26 ; Venstre 2I; Conservatives 15; Centre Democrats II: Socialist People's Party 7; Communists 7 ; Radicals 6; Christian People's Party 6; Retsforbund 6; Left Socialists 5; Greenland 2; Faroes 2.

In 1973 Denmark joined the European Economic Community. Denmark is also a member of NATO, and the Nordic Council.

Education is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen

(founded in 1478), Aarhus (r933), Odense ( x 966 ), Roskilde (1972) and Aalborg (r974). A further University at Esbjerg is planned.

Language and Literature.-The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian
 1855) and Georg Brandes (1842-1927), with Henrik Pontoppidan ( $\mathbf{x} 857$-1943) and Karl Gjellerup ( 1857 -1919). who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen ( 1873 -1950), who received the same award in 1944. Among recent authors of note are Klaus Rifbjerg (b. 1935) and Leif Panduro (b, 2923). Some 52 newspapers are published in Denmark. so daily papers are published in Copenhagen.

Production and Industry.- Nine per cent. of the labour force is engaged in agriculture, fishing, forestry, etc.; 35 per cent. in manufacturing, building and construction; 17 per cent. in commerce and 28 per cent. in administration, the liberal professions, etc. The chief agricultural products are pigs, cattle, dairy products, poultry and eggs, seeds, cereals and sugar beet; manufactures are mostly based on imported raw materiai but there are also considerable imports of finished goods.

Communications.-Mercantile marine (ships above roo gross tonnage) at end of $1974,1,603$ ships, with I gross tonnage of $4,682,782$. On March 31, 1973, there were $2,522 \mathrm{~km}$. of railway. In 1975 the capacity of the telecommunications network in circuit km. was $\times 5,839,000$.
Finance
Revenue (Budget estimate) ..... Kr. $\begin{gathered}\text { 197,700,000,000 }\end{gathered}$ Expenditure (Budget estimate)... $\begin{array}{ll}\text { xpenditure (Budget estimate).... } & 87,000,000,000 \\ \text { Denmark's balance of payments on current ac- }\end{array}$ count showed adeficit for 1976 of $\mathrm{Kr} .11,530,000,000$ ( $1975, \mathrm{Kr} .3,050,000,000$ ).

Rate of Exchange. $-\mathrm{Kr}, 10 \cdot 4 \mathrm{I}=$ £I $(2 \mathrm{I}$ June, 1977) (see also p. 83).
 Trade with U.K.
 Exports to U.K..... 443,122,000 654,856,000 The principal imports are petroleum and its products, machinery, vehicles and textile products. The chief exports are agricultural and dairy products and machinery.

CAPITAL, $\Psi$ Copenhagen, pop. (1977), 620,432; Greater Copenhagen, $x, 251,226$. Other centres are: $\Psi$ Aarhus, 245,866 ; $\Psi$ Odense 167,616 ; $\Psi$ Aalborg, 154,563; $\Psi$ Esbjerg, 79,354; $\Psi$ Randers, 63,662; Roskilde, 49,397; $\Psi$ Kolding, 54,617; $\Psi$ Horsens, 54,or8; $\Psi$ Fredericia, 45,226; $\Psi$ Vejle, 49,013.

Flag.-Red, with white cross
National Day.-June 5 (Constitution Day).
Copenhagen, distant from London 728 miles;
transit 26 hours by rail and sea.

## British Embassy

Offices, Kastelsvej 36-40, Copenhagen. Residence, Bredgade 26, Copenhagen.
Ambassador Extraordinary and Plenipotentiary, Her Excellency Anne Marion Warburton, C.M.G., C.v.o. ( 1976 ).

Counsellor, R. J. T. McLaren.
Counsellor (Commercial), G. L. Simmons, M.v.O.
Defence, Naval, Miliary and Air Attache, Cdr. D. F. Brown, R.N.
rst Secretaries, J. P. Davies; W. E. W. Mattey (Administration and H.M. Consul) ; F. S. Napier (Information); T. D. J. Miles (Commercial); P. S. Astley; G. L. Jones (Agric. and Fisheries); C. Marshall (Labour) (resident in Stockholm).
Asst. Military Attaché, Major R. N. L. Denyer. Asst. Air Attaché, Sqn. Ldr. C. P. Russell-Smith. and Secretaries, D. G. Parker (Commercial); D. A. Rogers.
Attaché, Miss P. A. Terry (Consular).
Chaplain, Rev. D. H. T. Picton.
There are Consulates at Aabenraa, Aalborg, Esbjerg, Aarhus and Odense; and at Thorshavn and Klaksvig (Faröes).

British Council Representative and Cultural Attaché, D. B. Pickersgill, Montergade x, Copenhagen.

Outlying Parts of the Kingdom
The outlying parts of Denmark have about $8 x, 000$ inhabitants. The FARÖES, or Sheep Islands ( 540 sq. m.; pop. (r975) 40,44 r), capital, Thorshavn, are governed by Lagting of 26 members, a Landstyr of 4 members which deals with special Faröes affairs, and send a representatives to the Folketing at Copenhagen. On Sept. 14, 1946, the Lagting, with the consent of the Danish Government, for its own guidance held - plebiscite on the Faröes. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At subsequent general election for the Lagtime a great majority voted in favour of remaining part of the Kingdom of Denmark with - certain measure of home rule and in 1948 the Faröes received this. Greenland (ice-free portion about $\mathrm{I}_{3} 2,000$ sq. m., total area about 840,000 sq. m., population, $1975,49,602$ ) is divided into 3 provinces (West, North and East). Greenland (capital, Godthaab) has a Landsraad of 17 members and sends z representatives to the Folketing at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department. Mineral and oil prospecting revealed deposits of lead, zinc, iron ore, oil, gas and uranium. Commercial exploitation of these resources has already begun. The United States of Amercia has acquired certain rights to maintain air bases in Greenland.

## DOMINICAN REPUBLIC <br> (República Dominicana)

President, Joaquin Balaguer, born Sept. 1, 1907 ; elected June 1, x966; re-elected May 16 , 1970 ; re-elected, May $16,1974$.

## Embassy and Consulate

4 Braemar Mansions, Cornwall Gardens, S.W. 7 [or-937 192x]
Ambassador Extraordinary and Plenipotentiary, His Excellency Alfredo A. Ricart (1975). Cultural Attaché, Mrs. N. Barletta.

There are also Consular Offices at Liverpool, Birmingham, Manchester, Grimsby, Southampton, Plymouth, Cardiff, Ldinburgh, Glasgow and Belfast.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America. The western part of the island forms the Republic of Haiti. (For Map, see p. 87o.)

The island lies between Cuba on the west and Puerto Rico on the east and the Republic covers an area of about 19,322 square miles, with ㅍ population (U.N. estimate, 1970) of $4,012,000$. The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes.

Government.-Santo Domingo was discovered by Christopher Columbus in December, x492, and
remained a Spanish Colony until $182 x$. In 1822 it was subjugated by the neighbouring Haitians who remained in control until 1844 when the Dominican Republic was proclaimed. The country was occupied by American marines from I9I6 until the adoption of new Constitution in 1924. In July, 1924, - properly elected Constitutional Government was installed. From $193^{\circ}$ until May 30, 196I (when he was assassinated) Gencralissimo Rafael Trujillo ruled the country.

A Council of State headed by Rafael F. Bonnelly was set up in 1962 , and Professor Juan Bosch, elected President in December 1962 , held office until September, 1963 , when he was deposed by military junta. A revolt in favour of ex-President Bosch in April, 1965 , developed into civil war lasting until September the same year when - provisional President was elected. At a further election on June I, 1966, Dr. Joaquin Balaguer was elected President; re-elected May 16, 1970 and again on May $16,1974$.

Communications.-According to local classification there are 2,932 miles of first class and 1,392 miles of second class and inter-communal roads in the Republic. There is direct road from Santo Domingo to Port-au-Prince, the capital of Haiti, but that part of it in the border area has fallen into disuse and although road travel is possible, it is preferable to travel direct between the two capitals by air. The frontier has been closed since Sept., 1967, except for that section crossed by the main road linking the two capitals. A telephone system connects practically all the principal towns of the republic and there is telegraph service with all parts of the world. There are more than 90 commercial broadcasting stations and there is - television station operated by Radiotelevision Dominicana, which with the help of relay stations provides receptions of its programmes in the major cities. Three other television stations in Santo Domingo-Rahintel, Tele-Inde and Color-Vision -transmit to the local area.

Spanish is the language of the Republic.
The Republic is served by two national and six foreign airlines, and international airport 18 miles to the east of the capital is in operation. Another is being constructed near Puerto Plata on the north coast.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, ferronickel, bauxite, gold, silver, cattle, sisal products, honey and chocolate. There is a growing number of light industries producing beer, tinned foodstuffs, glass products, nylon and cotton textiles, soap, cigarettes, construction materials, plastic articles, shoes, papers, paint, rum, matches, peanut oil and other products.

There is one consulate at Liverpool.
Area and Population.-Ecuador is an equatorial State of South America, the mainland extending from lat. $I^{\circ} 38^{\prime} \mathrm{N}$. to $4^{\circ} 50^{\prime} \mathrm{S}$., and between $75^{\circ} 20^{\prime}$ and $81^{\circ} \mathrm{W}$. long., comprising an area reduced by boundary settlements with Peru (Jan. 29,1942 ) to about 226,000 sq. miles. (For MAP, see Index.)

The Republic of Ecuador is divided into 20 provinces. It has a population estimated (1973) at 7,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector ( $22,976 \mathrm{ft}$.), the highest peaks in Ecuador being Chimborazo ( $20,408 \mathrm{ft}$. ), Llinza ( $17,405 \mathrm{ft}$.), Carihuairazo ( $16,515 \mathrm{ft}$.), Cotocachi ( $\mathbf{5 6}, 302 \mathrm{ft}$.), and Pichincha ( $\mathbf{x} 6,000 \mathrm{ft}$.) in the Western Cordillera; and Cotopaxi ( $x 9,6 \mathrm{xz} \mathrm{ft}$.), Antisana ( $\mathbf{8 8}, 864 \mathrm{ft}$.), Cayambe ( $\mathbf{~} 9, \mathrm{I} 60 \mathrm{ft}$.), Altar ( $\mathbf{~} 7,730 \mathrm{ft}$.),

Sangay ( $17,464 \mathrm{ft}$.), Tungurahua ( $x 6,690 \mathrm{ft}$.), and Sincholagua ( $x 6,365 \mathrm{ft}$.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The Galápagos (Giant Tortoise) Islands forming the province of the Archipelago de Colón, were annexed by Ecuador in 8832 . The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1973) of 4,000 . The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The province consists for the most part of National Park Territory, where unique marine birds, iguanas, and the giant tortoises are conserved. There is some local subsistence farming; the main industry, apart from tourism, is tuna and lobster fishing.

Government. - The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in revolutionary war which culminated in the battle of Mount Pichincha (May 24, x8z2). On Jan. 1x, 1976, a military junta assumed power from President Guillermo Rodriguez Lara.

Production and Industry.- The chief products are petroleum, bananas, cocoa, coffee, sugar, rice, straw hats, pyrethrum, xanthophyll, scopolamine, vegetable ivory and balsa wood. The oil deposits in the Oriente are estimated at between ro15,000,000,000 barrels. The oil is evacuated by trans-Andean pipeline to the port of Balao (near Esmeraldes). The Ecuadorean Government issued a decree approving the takeover as from Jan. 19, 1977 of the Gulf Oil concession in Ecuador. In the highlands the principal crops are maize, wheat, potatoes and other temperate products. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found. A Five-Year industrialisation programme was introduced in 1973, and industry is being rapidly diversified; textiles have traditionally been predominant.
Communications.-There are $23,256 \mathrm{~km}$. of permanent roads and $5,044 \mathrm{~km}$. of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. Nine commercial airlines operate international filghts, linking Ecuador with New York, Miami, Panama, Lima, Santiago, Rio de Janeiro, Paris, Frankfurt, Madrid, etc. There are internal services between all important towns.
Defence.-The standing Army has a strength of about 15,000 . There is an Air Force of some 90 aircraft of various kinds and a small Navy.
Language and Literature.-Spanish is the language of the country. The electorate is confined to adult male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 dally newspapers are published at Quito and 4 at Guayaquil. Elementary education is free and compulsory. In 1973 there were 8,062 primary schools with $\mathrm{x}, 09 \mathrm{r}$, io2 pupils and 894 high schools with 278,400 pupils. The 9 Universities, at Quito (2), Guayaquil (3), Cuenca, Machala, Loja and Porto-
viejo, the Polytechnic Schools at Quito and Guayaquil and the technical colleges in other provincial capitals had 70,138 students in the same year.

Revenue(Budget Estimates) . . . . Sucres 9,427,000,000 Expenditure (Budget Estimates)..... 9,427,000,000 Internal Debt (Sept. 30, 1967)...... 4,516,570,000 External Debt (Dec. 31, 1972) . . U.S. $\$ 343,295,000$
The official rate of Exchange: Sucres $57=\mathfrak{f i r}$, is used for most legal imports and exports. There is also a free rate of exchange. See also p. 83 .

Trade
Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador. 1975

1972
Imports.... \$U.S.289,793,000 \$U.S.279,128,000 Exports.... 221,544,000 279,783,000 Trade with U.K. 19741975 Imports from U.K..... $£ 13,600,000$ £ $7,307,000$ Exports to U.K......... 2,170,000 2,065,000
The chief exports are petroleum, bananas, cocoa, coffee and sugar. Other exports are rice, balsa wood, castor-oil seeds, hats, pharmaceuticals, fish, ivory, nuts and pyrethrum. Manufactured goods and machinery are the main imports.
Capital.-Quito. Population (estimated 1972), 700,000; $\Psi$ Guayaquil ( $x, 000,000$ ) is the chief port; other centres are Cuenca ( 100,000 ); (est. 1968) Ambato ( 69,766 ); Riobamba ( 50,7 I0) ; $\psi$ Esmeraldas ( 51,573 ); and $\psi$ Manta ( 42,750 ). The foregoing figures of urban populations have been revised by the Census and Statistics Office to exclude from I 968 figures for rural areas of the cities (i.e. areas not supplied by city fuel or water services).
FLAG.-Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others); emblem in centre.

National Day.-August io (Dia de la Independencia).

## British Embassy

> Calle G. Suarez, $\operatorname{iri}$ (P.O. Box No. 314), Quito.

Ambassador Extraordinary and Plenipotentiary, His
Excellency Norman Ernest Cox, C.M.G. (r974). ist Secretary, D. V. Thornley (Comntercial, Head of Chancery).
There is a British Consular Office at Guayaquil.

## EGYPT

Scientific Research and Atomic Energy, Dr. Abdel Mabud AI-Gucbeily.
Foreign Relations, Development and Administrative Affairs, Dr. Aly Abdel Meguid.

## Embassy in London 26 South Street, W. 1 [02-499 240x]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mohammed Samih Anwar (1975). Minister-Counsellor, Magdy Sabry (Consular).
Counsellors, Gamal Mohamed Said; Mohie Eldin Youssef El-Attar; Dr. Mohamed Mahmoud Soliman; Emad El Din Aly El-Kadi; Mohamed Salah El-Din Mohamed Abboud; Nabil Rihan; Farouk Mohammed Youssef El-Kady. ist Secretaries, Mohammed Abdel Rahim Mohamed (Consular); Nabil Rihan (Consular); Dr. Farouk El-Sadek Aly El-Sayed; Hamdi Mohamed Nada. Area and Population. -The total area of Egypt is estimated at $x, 000,000$ square kilometres ( $3^{85}$, iro square miles), the inhabited area being only 35, 168 square kilometres ( 13,578 square miles), with population (estimated May, 197x) of $34,000,000$. There are three distinct elements in the native population. The largest, or "Egyptian" element, is Hamito-Semite race, known in the rural districts as Fellahin (fellah-ploughman, or tiller of the soil). The Fellahin have been mainly of the Moslem faith since the conquest of the country

In the 7 th century. A second element is the Bedouin, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayum. The third element is the Nubian of the Nile Valley between Aswân and WadiHalfa of mixed Arab and Negro blood. The Bedouin and Nubians are Moslems.

The territory of Egypt comprises (1) Egypt Proper, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) The Peninsula of Sinai, forming part of the continent of Asia; and (3) number of Islands in the Gulf of Stuez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between $22^{\circ}$ and $3 z^{\circ} \mathrm{N}$. lat. and $24^{\circ}$ and $37^{\circ} \mathrm{E}$. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the coast yo kilometres N.W. of Sollum to the latitude of Siwa and thence due $S$. along the 25th meridian to the parallel of $2 z^{\circ} \mathrm{N}$. (the N . boundary of the Sudan) at 'Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean ( $34^{\circ} 15^{\prime} \mathrm{E}$. long.) to the head of the Gulf of 'Agaba, from which point the remainder of the $E$. boundary is washed by the waters of the Gulf of "Agaba and the Red Sea. The "settled land area" is stated officially at $7,667,000$ feddâns ( $12,43 x$ square miles) and the area of lakes at 641,000 feddàns ( $x, 039$ square miles), a total of $8,308,000$ feddâns ( $\mathbf{x}, 4,470$ square miles).
Physical Features.-The Nile valley varies in width from less than half $=$ mile in the southern granitic region to over to miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soll in the country.
The Nile has total length of $4, \mathrm{r} 60$ miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river formerly had $\|$ regular yearly rise and fall of about $\mathrm{I}_{3}$ feet Cairo, but since the commencement of storage in the reservoir of the Aswan High Dam in 1965, there has been no flood downstream of the Dam and the water level remains almost constant throughout the year. Westward from the Nile Valley into Tripolitania stretches the Libyan Desert, an arid region, containing some depressions, whose springs irrigate small areas known as Oases, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia and Siwa.

On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Gizeh, of which the highest, the Great Pyramid, is 45 feet high. Close to the pyramids is the Great Sphinx, 189 feet long. In the Eastern Desert . great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Surez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well, and
here and there are to be found small encampments of wandering Arabs.

Religions.-The predominant religion is Islam but there are about $3,000,000$ Christians (mainly Copts). By 1968 neariy all the Jews had left the country. The chief Moslem religious authorities in Egypt are the Sheik el Gami el Azhar and the Mufti Gumhuriya Miss al Arabiya.

Govermment.-From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian Inhabitants were subjugated by Moslem invaders and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire under which it remained until early in the egth century.

A British Protectorate over Egypt declared on Dec. 18, 1914, lasted until Feb. 28, 1922, when Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the Anglo-Egyptian Treaty was signed in London (Aug. 26, 1936) and the military occupation by British troops was terminated.
In July, 1952, following a military coup d'état, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 2956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

A union with Syria was affected in 1958 and lasted until September, 2961, when Syria seceded after moup d'etat. The title and flag of the United Arab Republic were, however, retained for Egypt until Sept. 2, 197 x.
President Nasser died suđdenly on Sept. 28, 1970, and the duties of Head of State were assumed by Mr. Anwar Sadat who was elected President in a referendum on Oct. 15 and re-elected for a further six-year term on Sept $16,1976$.
Agriculture.-Despite increased industrialization and the discovery of new oil fields, agriculture continues to provide the most substantial contribution to the national economy. Cotton (zo million kanbars in 2974) is the most important export, but sugar cane, onions, potatoes and citrus fruits are also sold extensively to overseas markets. Nearly all cultivation is carried out by peasant farmers whose operations are funded and generally controlled by co-operative organizations. Productivity is usually good. Irrigation and land reclamation schemes have contributed to a small increase in the cultivable area, and a $\$ \times 47$ million drainage project, financed partly by the International Bank for Reconstruction and Development, is intended ultimately to irrigate nearly one million acres.
Railways.-The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for $\|$ distance of 554 miles to a new port being constructed upstream of the High Dam. At this point $\begin{aligned} & \text { steamer connection runs to New }\end{aligned}$ Halfa, connecting Egypt with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollum, thus joining Libya to Egypt. The gauge is standard ( $4 \mathrm{ft} .8 \frac{1}{2} \mathrm{in}$.).

Roads and Caravan Routes.-A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollam and thence to connect with the coast road in Libya. A bitumen road leads to Kharga and Dakhla, from the former
of which there is a route, known $\square$ the Darb el 'Arbain, leading to Dar Fur and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir, a metalled road, being probably the most frequently used.

Shipping.- $\Psi$ Apart from the three great seaports of Alexandria, Port Said and Suez, the last two of which are now undergoing reconstruction following several years of disuse after the 1967 war, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

Currency.-The monetary unit of Egypt is the Egyptian pound of 100 piastres. Exchange Rate: 66 piastres $=\mathrm{L} \mathbf{x}$.

Trade with U.K.
Imports from U.K. ............... $£ \times 108,000,000$ Exports to U.K............................. 4r,000,000
The principal imports are metals, and manufactures thereof, chemicals and pharmaceuticals, machinery and transport equipment, foodstuffs, beverages and textile fibres. The exports are principally raw cotton, textile yarns, rice, fruit and vegetables, petroleum products and $\quad$ growing list of secondary exports, many of them manufactured roods.

Capital.-Cairo (population, estimated in 1975 at $8,143,000$ ), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643 , and the most conspicuous is the Citadel, built by Saladin towards the end of the rath century and containing in its walls the Mosque of Mohamed Ali built in the rgth century.
$\Psi$ Alexandria (estimated population, $x, 900,000$ ), founded $33^{2}$ B.C. by Alexander the Great, for over x,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great pharos (lighthouse), 480 feet high, with lantern burning resinous wood, was one of the "Seven Wonders of the World". Other towns are: Ismailia; $\Psi$ Port Said; Mansura ( $\mathbf{x} 20,000$ ) : Asyût (300,000); Faiyûm ( 380,000 ); Tanta ( 150,000 ); Mahalla el Kubra ( ${ }^{2} 30,000$ ); $\Psi$ Suez; $\Psi$ Damietta ( 100,000 ).

Carro is 2,520 miles from London: transit via Trieste, 5 days; via Marseilles, 6 days.
Flag.-Horizontal bands of red, white and black, with two 5 -point green stars in white band. National Day.-July 23 (Anniversary of Revolution in 1952).

## Britisu Embassy

Kasr el Doubara, Garden City, Cairo
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Willie Morris, K.C.M.G. (I977). Counsellor, P. J. S. Moon.
Defence and Military Allaché, Col. P. D. Blyth. H.M. Consul, Miss M. Hankins.
xst Secretaries, D. J. Blatherwick (Head of Chancery); K. T. Gullick (Information); A. P. a'C. Bergne; D. H. Parker (Aid); M. Dougall (Commercial): D. J. Plumbly.
and Secretaries, K. J. Passmore; I. W. Brodhurst (Commercial).

British Consulate-General, Alexandria
Consul-General, F. W. Hall.
Vice-Consul, Miss M. McGlone.
British Council Representative, Dr. N. A. Daniel, C.B.E., 192 Sharia el Nil Agouza, Cairo.

## EQUATORIAL GUINEA

President, Masie Nguema Biyogo Negue Ndong, elected October $x 2,1968$.
Formerly the territory of "Spanish Guinea", Equatorial Guinea consists of the Island of Macias Nguema (formerly known as Fernando Póo), an island in the Bight of Biafra about zo miles from the west coast of Africa, Pagalu Island (formerly Annobon) in the Gulf of Guinea, the Corisco Islands (Corisco, Elobey Grande and Elobey Chico) and Rio Muni, a mainland area between Cameroon and Gabon. It has a total area of about $x, 000$ sq. miles and a population (U.N. estimate, 1969) of 286,000.

Macias Nguema is a mountainous island with forests of oil palm, ebony, mahogany and oak, and sugar-cane, cotton and indigo. Cocoa, coffee, sugar, tobacco, vanilla nut and kola nut are cultivated and cocoa and other products are exported.

Government.-Former colonies of Spain, the territories now forming the Republic of Equatorial Guinea were from April 1, 1960 , constituted as two provinces of Metropolitan Spain, the inhabitants having the same rights as Spanish citizens. As result of a plebiscite held on Dec. 15, 1963, watonomous régime was instituted on June 2, 1964, with the approval of the Spanish Government. Equatorial Guinea became fully independent on October I2, 1968 , after a referendum on the new constitution held in August, 1968, and presidential elections on Sept. 22, 1968. The latter were supervised by, a U.N. Mission. The first President, Señor Francisco Macias, assumed office on Independence Day.

Severe disorders occurred during February and March, 1969 , following incidents at the town of Bata (in Rio Muni). Spanish residents left Equatorial Guinea in large numbers, having had to seek the protection of residual Spanish forces while awaiting evacuation to Spain. Some 600 Spanish civilians elected to remain in Macias Nguema and about 80 in Rio Muni, but most of these have subsequently left. Following Nigerian allegations of continuing mistreatment, most of the Nigerian labour force, on whom cocoa production largely depended, were repatriated in late 1975 and early 1976. The economy is now mainly dependent on outside aid, mostly from Communist countries.

Capital, $\Psi$ Malabo (formerly known as Santa Isabel) on the island of Macias Nguema (population 9,000 ). $\Psi$ Bata is the principal town and port of Rio Muni. Flag. -Three horizontal bands, green over white over red; blue triangle next staff; coat of arms in centre of white band.
British Ambassador, His Excellency, Albert Edward
Saunders, C.M.G., O.B.B. (1975) (Resident at
Yaoundé, Cameroon).

## ETHIOPIA <br> The Derg

President, Lt.-Col. Mengistu Haile Mariam.
First Vice-President, Lt.-Col. Atenafu Abate.
Minister of Foreign Affairs, Col. Feleke GedleGhiorgis.

> EMBASSY IN LONDON
> If Prince's Gate, S.W. 7
> [01-589 7212$]$

Ambassador Extraordinary and Plenipotentiary, (vacant). Charsé d'Affaires, Ato Msmaku Asrat.
ist Secretaries, Ato Tesfaye Demeke; Ato Aklilu Gebre Kidan.
$3^{\text {rd }}$ Secretary, Ato Getahun Dessalegn.
Altaché, Ato Demelesh Teshome.
Position and Extent.-Ethiopia, with which Eritrea was federated from $x 952$ to 1962 when

it was incorporated as a province, is in NorthEastern Africa, bounded on the north west by the Sudan; on the south by Kenya; on the east by Afars and Issas Territory and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles, with a population of $27,946,000$ (mid-1975) of whom about one-third are of the ruling race of Semitic origin (Amharas and Tigres) and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.
Ethiopia is mainly mountainous country. volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed ro,000 ft. Eritrea consists of a mountainous hogsback range up to $x 0,000 \mathrm{ft}$., interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges are very hot; the higher plateaux are well watered, with genial climate. On the high plateaux there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of small rains "occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

Those of Semitic origin (Amharas and Tigres). who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojiam, parts of Shoa, and many of the Gallas, are Christlans of the Ethiopian Orthodox Church, which was formerly led by the head of the Coptic Church, the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous and the new Patriarch, Abuna Theophilos, was enthroned by the Ethiopian archbishops in May, 197x. Moslems predominate in some areas, notably northern Eritrea, Harar and Jimma and Arussi, the Moslem centre being Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

Following considerable military and civil unrest in early 1974 the Emperor Hailé Selassié I announced - March 5 the convening of $\quad$ commission to revise the Constitution, and the setting up within six months of 1 conference to consider the commission's proposals. It appeared likely that more power would devolve on to Parliament. Internal
unrest continued through the summer, however, and at the end of June, the armed forces assumed effective control of the country by establishing an "Armed Forces Committee" now entitled the Provisional Military Administrative Council. Their demands for far-reaching reforms were acceded to by the Government, with the agreement of the Emperor, who was finally deposed on Sept. 12, 1974.

Following the killing of Brig.-Gen. Teferi Benti, the Ethiopian head of state, and other leading officers on Feb. 3. 1977, the structure of the Government was modified under a proclamation issued on Feb. Ir. This laid down that the Provisional Military Administrative Council would henceforth be known $=$ the Derg.

Eritrea.-Eritrea $n$ administered by Great Britain from the end of the Second World War untill September 15,1972 , when in accordance with resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown, becoming a province of Ethiopia in $x 96 z$. An armed campaign for independence has accompanied the collapse of the imperial régime.

Production and Industry. - The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, \&c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 64 per cent. of the country's total exports by value in 1974 . The forests are potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, tyres, beer and cement. Hydro-clectric power production and telecommunications are expanding rapidly, however, mainly with loans from the World Bank, which in 197x had approved $\|$ number of loans for agricultural development.

Communications.-A railway links Addis Ababa, the capital, via Dire Dawa, with Djibouti, 486 miles away. In Eritrea narrow gauge line runs from Massawa to Asmara and on to Agordet. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with a branch from Dessie to Assab on the Red Sea Coast. Addis Ababa and Asmara are linked by a road running through Gondar and along Lake Tana. Others run from Addis Ababa west to Lekempti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East to Dire Dawa, Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to many provincial towns. External services are operated to Athens, Frankfurt, Rome, Paris, Aden, Djibouti, Sana'a, Taiz, Jedda, Cairo, Khartoum, Nairobi, Dar-es-Salaam, Entebbe, Lagos, Accra, Douala, Kigali, Kinshasa, Bombay, New Delhi, Peking and London.

Defence-Under the Ministry of Defence the armed forces comprise the Army, the Air Force and the Navy. The Army consists of four infantry divisions, including one mechanized brigade with armour, with normal artillery, engineer units and supporting including parachute battalion.

An American Military Advisory and Assistance Group (MAAG) assists the forces, mainly the Army, with training and advice, under an agreement signed with the Ethiopian Government. There is a military academy at Harar and a military training centre at Holleta with a specialist training wing. The Air Force comprises I transport squadron, $\boldsymbol{\|}$ bomber squadron, three fighter squadrons, a training squadron, a jet conversion squadron, and in elementary training unit. The Air Force Headquarters in situated at Debre Zeit. The aircraft are mostly of American manufacture but also include Canberras.
The Navy has a headquarters in Addis Ababa with a main base at Massawa and $n$ smaller one at Assab. The principal units are an ex-U.S. seaplane tender (Ethiopia), a patrol craft squadron of 5 , an MTB squadron of 4 , and mex-Dutch minesweeper.
Education.-Elementary education is provided without religious discrimination by Government schools in the main centres of population; there Also Mission schools, and cadet-schools for the Army, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. In 196x the Haile Selassié I University was founded to coordinate the existing institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.) and to provide framework for future development. There is also a Catholicrun university in Asmara. Amharic is the official language of instruction, with English a the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa. In $197 x$ the International Development Agency granted a loan of U.S. \$95 million for the development of secondary education.

Finance.-Total revenue for 1974-75 was estimated at $£ 180 \mathrm{~m}$. . while expenditure was expected to reach $£ 888 \mathrm{~m}$. The Ethiopian dollar has a value of 5.52 grains of fine gold and is divided into 100 cents. At Jan. $3^{1,}$ 1975, the combined note and coin issue amounted to $£ 128,000,000$. Foreign exchange and gold reserves of the National Bank amounted to $£ 115,000,000$ at the same date. Eth. $\$ 4 \cdot 90=$ CI (May 1975). (See also p. 83.)

Trade.-The chief imports by value are machinery and transport equipment, manufactured goods, chemicals, beverages and tobacco (from U.K.) ; the principal exports by value being coffec, oilseeds, hides and skins, and pulses.

Trade

Capital. Addis Ababa (population, estimated 912,000 ), also capital of the province of Shoa; Asmara (population 250,000) is the capital of the Province of Eritrea. Dire Dawa is the most important commercial centre after Addis Ababa and Asmara, $\Psi$ Massawa and $\Psi$ Assab (recently enlarged) are the two main ports. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIORIAN FLAG.-Three horizontal bands; green, yellow, red; bearing crowned lion at centre.

NATIONAL DAY.-July 23.

## BRITISH Embassy

(Addis Ababa)
Ambassador Extraordinary and Plenipotentiary, His Excellency Derek Malcolm Day, C.M.G. (1975).
There are British Consular Offices at Addis Ababa and Asmara.

British Council Representative, E. C. Pugh, Artistic Building, Adua Avenue, Addis Ababa.

## FINLAND <br> (Suomi)

President, Dr. Urho Kaleva Kekkonen, G.C.B., borm 1900, elected Feb. 15, 1956; re-elected 2962 and 1968; term extended until $197^{8}$ by Act of Parliament ( 1973 ).

## Finnish Embassy and Consulate <br> 38 Chesham Place, S.W.x <br> [0x-235 953x]

Ambassador Extraordinary and Plenipotentiary, His Excellency Richard Björnson Tötterman, K.C.V.O., O.B.E. (x975).

Minister Counsellor, Olli Mennander. ist Secretary, Juhani Muhonen.
and Sectetaries, Erkki Palmqvist; Esko Hamilo.
Press Counsellor, Tom Christian Süderman.
Cultural Counsellor, Henrik Antell.
Defence Attaché, Lt.-Col. Pertti Nykänen.
Area and Population. - A country situated the Gulfs of Finland and Bothnia, with a total area of 130,265 square miles, of which 70 per cent. is forest, so per cent. cultivated, $\quad$ per cent. lakes and Ix per cent. waste and other land, population (1976), $4,727,000$. In 1975 the birth rate was $54 \cdot 0$, death rate 9.4 per 1,000 . The infant mortality rate was $30 \cdot 2$ per 1,000 live births. $92 \cdot 6$ per cent of the people are Lutherans, $\mathbf{x} \mathbf{2}$ per cent. Greek Orthodox and 6.2 per cent. others.

The Aland Archipelago (Ahvenanmaa), group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1973) of 2 I,800 ( $95^{\circ} 4$ per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.-Under the Constitution there is single Chamber (Eduskunta) for which women are eligible, composed of members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

The present government came into office on May 15, 1977. The five parties in the coalition are the Social Democratic Party, the Centre Party, the Finnish People's Democratic League (which includes the Finnish Communist Party), the Swedish People's Party and the Liberal People's Party.

Defence.-By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the Army is limited to force not exceeding 34,400 . The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000 . Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8 -Ix months. None of the Defence Forces has the full complement permitted.

Education.-Primary education is compulsory for children from 7 to 16 years, and free in certain State and municipal schools. In the autumn of 1977, there were 634,700 in comprehensive schools, and 100,800 in gymnasiums. There are 15 Higher Schools and 6 Universities (1976); Helsinki Unlversity ( 1976 ), 20,641 students. Combined enrolment at Higher Schools and Universities was 73.522.

Language and Literature.-Most Finns are bilingual. $93^{.2}$ per cent. speak Finnish as their first language, 6.6 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1937 Finnish has slowly been displacing Swedish. In literature also, until the close of the cighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 183 II gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was
awarded the Nobel Prize for Literature in 1939. There are 60 daily newspapers in Finland which appear on 4 or more days per week (53 Finnish language, and 7 Swedish).
Production and Industry.-Finland is whighly industrialised country producing a wide range of capital and consumer goods. Timber and the products of the forest-based industries remain the backbone of the economy, accounting for about half of her export earnings, but the importance of the metal-working, shipbuilding and engineering industries is growing. This sector in 1976 accounted for over a quarter of Finland's exports. The textile industry is well developed and Finland's glass, ceramics and furniture industries enjoy international reputations. Other important industries are rubber, plastics, chemicals and pharmaceuticals, footwear, foodstuffs and electronic equipment.

Communications.-There are 5,900 kilometres of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden and U.S.S.R., passenger boat connection with Britain, Sweden, Denmark and West Germany. Vessels on the London to Leningrad route call at Helsinki. There are also passenger/ cargo services between Britain and Helsinki, Kutka and other Finnish ports. External civil air services are maintained by British Airways, Air France, Austrian Airlines, Finnair, Kar Air, Scandinavian Airlines, Malev, Lufthansa, Interfug, LOT (Polish Airlines), Aerofot, Chechoslovak Airlines and Swissair. The merchant feet at the end of 1976 totalled 442 vessels ( $2,090,456$ tons gross); 23 steamers (zo,301 tons gross); 363 motor vessels $(977,763)$ and 56 tankers ( $(1,102,392)$.

Government.-Following the death of President Pompidou in 1974, M. Giscard d'Estaing was elected President. He assumed office on May 27. After the most recent parliamentary elections held on March 4 and 11, 1973, the strengths of the party groups in the National Assembly were established as follows:-

Union of Democrats for the Republic (Gaullist). ......................................... $18_{3}$
Socialists and left-wing Radicals. . . . . . . . . . . 102
Communists. . . .................................. . . 73
Independent Republicans (Government
Supporters)..................................... . . . 55
Reformers.......................................... . . . . 34
Central Union (Government Supporters)..... 30
Others. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 13
Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to $5 \frac{1}{2}$ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The Prime Minister is appointed by the President, - is the Cabinet on the Prime Minister's recommendation. They are responsible to Parliament. But the executive is constitutionally separate from the legislature and Ministers may not sit in Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session.

A Constitutional Council is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the Economic and Social Council gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

Production.-The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, \&c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, \&cc.

The harvest in 1974-75 was:-
(Quintals)
Wheat . . . . . . . . . . . . . . . . . $159,685,000$ ( $1974-75$ )
Oats 36,868,000 (1975)
Barley.......................6x,803,000(1974-75)
Rye....................... 3,892,000 (1975)
Maize. $52,206,900$ (1975)

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chlefly of oak, birch, pine, beech, elm, chestnut and the corktree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, \&cc., universally testify. Production of wine in 1974 was $62,100,000$ hectolitres. Cidermaking is also an important industry. The mineral resources include coal, natural gas, pig iron, bauxite, lead, silver, antimony and salt. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, caryets, linen, silk and lace.

Language and Literature.-French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzer-

Land, Tunisia, Algeria, Mauritius, Haiti and the Province of Quebec, Canada, to whom the almost inexhaustible literature of France is I treasured heritage. The work of the French Academ $\gamma$, founded by Richelieu in $\mathbf{x 6 3 5}$, has estabilished le bon usage, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 11 occasionsR.F.A. Sully-Prudhomme ( x 901 ), F. Mistral (1904), Romain Rolland (x915), Anatole France (192I), Henri Bergson (1927), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952), Albert Camus (9957), St. John Perse (Alexis Léger) ( 1960 ) and Jean Paul Sartre ( x 964 ).

Defence. -The personnel of the Defence Forces in September 1975 totalled: ARMY 331,500; AIR FORCE 102,000; NAVY 69,000; GENDARMERIE 70,000. National nuclear forces include medium-range ballistic missiles, submarine-launched ballistic missiles and Mirage IV medium bombers. The Army has - variety of new French-made equipment in service, including medium tanks, field and antiaircraft SP guns, trucks and radio equipment. Defence Budget for $1974,38,221,000,000,000$ francs.

Education.-The educational system is highly developed and centralized. It is administered by the Ministry of National Education, comprising (a) the Direction des Enseignements Supericurs; Direction de la Pédagogie, des Enseignements Scholaires et de l'Orientation; Direction des Personnels d'Enseignement Général Technique et Professionnel; Direction des Services Administratifs ef Sociaux; Direction de l'Equipement Scolaire, Universitaire el

Sportif; Direction des Bibliothèques et de la Lecture Publique; Direction de la Coopération; (b) the Superior Council of National Education (consultative); and (c) the Inspectorate. Local Administration comprises 25 Territorial Academies, with inspecting staff for all grades, and Departmental Councils presided over by the Préfet, and charged especially with primary education.

Primary and secondary education are compulsory, free and secular, the school age being from 6 to 16. Schools are for boys, for girls, or mixed. (i) Primary education is given in ecoles maternelles (nursery schools), écoles primaires élémentaires (primary schools) and collèges d'enseignement genéral ( 4 -year secondary modern course); (ii) Secondary education in collèges d'enseignement technique, collèges d'enseignement secondaire and lycées (7-year course leading to one of the five baccalauréats). Baccalauréat $A$ consists largely of philosophy and languages with a little mathematics, and provides entry into the faculties of Letters and Law. Baccalauréal $B$ groups languages, mathematics and economics with philosophy classes oriented towards psychology and sociology. It provides entry to the faculties of Letters for the social sciences and to the faculty of Law for economics. Baccalauréal C, consisting of mathematics and physics with some languages, provides entry to the faculty of Sciences for those studying for a degree in mathematics and physics. Baccalauréat $D$ has the same language component as Baccalaureat C, but its main feature is the natural sciences. It provides entry to the faculty of Sciences for natural science degrees, and also to the Medicine and Pharmacy Faculties. Baccalaureat $E$ is largely scientific and technical with a language element, and provides entry to engineering schools and the Faculty of Science. (iii) Special schools are numerous. (iv) There are numerous Grandes Ecoles in France which award diplomas in many subjects not taught at university, especially applied science and engincering. Most of them are State institutions but have I competitive system of entry, unlike the universities. (v) The reform of the French university structure continues, and there are now universities in twenty-four towns in France. In the major provincial towns the existing university has been reorganized to form two, or three universities, and in Paris and the immediate surrounding district there are, since autumn 1970, thirteen universities.

Archeology, etc.-There are dolmens and menhirs in Brittany, prehistoric remains and cave drawings in Dordogne and Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cxsar found Gaul "divided into three parts" and described three political groups-Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgae from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, $\& c$., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and the XVIIth and XVIIIth century châteaux survived the French Revolution.
Roads. - The length of the Routes Nationales at the end of 2974 was $73,306 \mathrm{~km}$. and of motorways $2,628 \mathrm{~km}$. The principa rivers of France are the

Seine, Loire, Garonne, and Rhône, the navigable waterways in general use in $x 975$ were $8,623 \mathrm{~km}$.
Railways. - The system of rallroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic at the end of 1974 was $34,870 \mathrm{~km}$., of which $9,325 \mathrm{~km}$. were electrified. Traffic at the end of 1974 totalled $47,100,000,000$ passenger- km . and 77,054,000,000 ton-km.

Shipping.-The French mercantile marine consisted in Jan. 1973, of 531 ships of $7,440,004$ tons gross, of which 26 were passenger vessels ( 229,696 tons gross), 829 tankers ( $4,658,995$ tons gross) and 376 cargo vessels ( $2,551,3$ 3 3 tons gross).

## Finance

Whereas the country's gross domestic product (GDP) fell by 3 per cent in real terms in 1975 an overall growth rate of 5 per cent. was achieved in 1976. The O.E.C.D. forecast for growth in 1977 was of a 3 per cent. increase, with economic activity slowing down in the latter half of the year.

At the end of March 2977 , French gold and currency reserves stood at $£ 92,314$ million.

France's trade deficit in April 1977 stood at $F_{3} 83,000,000$.
Currency.-The unit of currency is the franc of noo centimes, which was devalued on Aug. 10, 1969. Bank notes in 10, 50, 100 and 500 franc denominations and coins in $x, 5$, yo and zo francs are issued. On April 27, 1977 the frane stood at $\mathrm{F}_{4} \cdot 960=\$ 3$.

## Commerce

The principal imports are machinery, mineral fuels, chemical products, automobiles, iron, electrical equipment, minerals and non-ferrous metals, textile and leather goods, meat, fish, poultry and other agricultural products and precision instruments. The principal exports are automobiles, chemical products, iron and steel, textile and leather goods, machinery, electrical equipment, cereals and flour, wine and other agricultural products.

## OVERSEAS DEPARTMENTS

With effect from Jan $x$, 1947 , the colonies of Guyane (French Guiana), Martinique, Guadeloupe and La Réunion with its dependencies have been theoretically administered in exactly the same way as the Metropolitan Departments, but in practice somewhat greater discretion is allowed to the Prefects and the locally elected bodies.

La Réunion.-Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been French possession since 1643 . Area, about 1,000 sq. miles. Population (1974), 476,675 . Capital, St. Denis (ro4,603). Assigned to the administration of Réunion are the distant islands of St. Paul ( 3 sq . miles), New Amsterdam ( 27 sq . miles) and Kerguelen containing whaling and fishing stations 1, roo sq. miles). The Crozet Islands (zoo sq. miles) and Adélie Land in the Antarctic Continent are also dependencies of Réunion. Imports from U.K., $\mathbf{1 9 7 5}$, $£ x, 138,000$.

Martinique.-An island situated in the Windward Islands group of the West Indies, between Dominica in the north and St. Lucia in the south. Population 324,832. Capital $\Psi$ Fort de France ( $\mathbf{x} 00,576$ ). Other towns are $\psi$ Trinité ( $12,2 \times 4$ ) and $\psi$ Marin $(6,204)$.

Guadeloupe.-In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Population 324,530. Capital $\Psi$ Pointe a Pitre 23,889). Other towns are $\Psi$ Basse Terre $\left(15,77^{8}\right.$ ) in Guadeloupe and $\psi$ Grand Bourg $(6,6 I I)$ in Marie Galante.

French Guiana.-Area, 35,000 sq. miles. Population (U.N. estimate, 1909), 48,000. Capital, $\Psi$ Cayenne ( 20,000 ). Situated on the north-eastern coast of South America, French Guiana is flanked by Surinam on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, De Royal and Ile du Diable), known - Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894 to $\mathbf{x 8 9 9 .}$. Imports from U.K. in 1975 were valued at $£_{422,000 .}$

Capital of France. Paris, on the Seine.
Population (estimated, 1975), $2,317,227$ (town); 6,293,958 (incl. suburbs).

District of Paris.- Created by legislation promulgated on August 10, 1966, the District consists of 8 Departments one of which is the City of Paris (see list of Departments, p. 855).

Paris is administered by the Council of Paris which is composed of 90 members elected for six years by popular vote within the city/Department. The President and four Vice-Presidents of the Council are elected for one year by the members. The President presides over the meetings of the Council and is the representative of Paris on all official occasions. The administrative functions exercised in all other towns by the Mayor are exercised in Paris by two Government nominees: the Prefect of Paris, and the Prefect of Police. But Mayors are elected in each of the 20 arrondissements of Paris to carry out local civil duties.

The following towns have - population of over 150,000 inhabitants:- Paris ( $2,317,227$ ); $\Psi$ Marselles ( 914,356 ); Lyons ( $452,84 \mathrm{x}$ ); Toulouse ( 383,176 ); $\Psi$ Nice ( 346,620 ); $\Psi$ Nantes ( 263,689 ); Strasbourg ( 257,303 ); $\Psi$ Bordeaux ( $226,28 x$ ); Saint-Etienne ( 221,775 ); $\Psi$ Le Havre ( $219,55^{5} 3$ ) ; Rennes ( 205,733 ); Montpellier ( 295,603 ); $\Psi$ Toulon ( 185,050 ); Reims ( $183,6 \times 0$ ); Lille ( 177,218 ); $\psi$ Brest ( 172,176 ); Grenoble ( $\mathbf{x} 69,740$ ); Clermont-Ferrand ( $\mathbf{1 6 x , 2 0 3 \text { ); }}$ Dijon ( $x 56,787$ ); Le Mans ( $\mathbf{1 5 5}, 245$ ).

The chief towns of Corsica are $\psi$ Ajaccio $(44,659)$ and $\Psi$ Bastia ( 51,022 ).

Paris is distant from London 267 miles; transit by air, $\mathrm{I} h$.

FLAG. -The "tricolour", three vertical bands, blue, white, red (blue next to flagstaff).

National Day.-July I4.

## British Embassy

(35 rue du Faubourg St. Honoré, Paris 8e)
(35 rue du Fabourg
Amassador Extraordinary and Plenipotentiary, His
Excellency Sir Nicholas Henderson, G.C.M.G.,
Excellency Sir Nicholas Henderson, G.c.M.G.,
(1975).

Minister, C. M. James, C.M.G.
Minister (Economic), (vacant).
Defence Attaché, Air Cdre. W. J. Herrington.
Counsellor and Consul-General, The Hon. E. H. B. Gibbs.

British Consular Officks
There are British Consulates-General in Metro-
politan France at Paris, Bordeaux, Lille, Lyons, Marseilles and Strasbourg.

## British Chamber of Commerce

6 Rue Halévy, Paris ge
President, O. G. Longley, M.C.
Vice-Presidents, D. H. Goodchild; K. G. W. Bartell.

British Council
Representative in Paris, R. M. Auty, O.B.E., 9 rue de Constantine, 75007 Paris.
There are British Council libraries at Paris, Bordeaux, Lille, Lyons and Strasbourg.

## THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 958 , envisaged the establishment of $\quad$ French Community of States closely linked with common institutions. A number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally ${ }^{i}$ members of the French Community. The Community Institutions in fact never operated envisaged. Nevertheless, with the exception of Guinea, which opted out of the Community in the $195^{8}$ referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements.

## Francophone Countries.

In the following countries French is either the official or national language or the language of instruction; where there is another national language the name of it is shown after the name of the country:-Algeria (Arabic); Belgium (Flemish); Benin; Burundi (Kirundi); Cambodia (Khmer); Cameroon (English); parts of Canada (in Quebec, parts of Ontario and New Brunswick) (English); Central African Republic (Sangho); Chad; Congo (P.D.R.); France; Gabon; Guinea; Haiti (Creole); Ivory Coast; Laos (Laotian); Lebanon (Arabic); Luxembourg (German and Letzeburgesch); Madagascar (Malagasy); Mali; Morocco (Arabic); Mauritania (Arabic); Niger; Rwanda (Kinyarwanda); Senegal; Switzerland ( $\mathbf{x}, 000,000$ French speaking); Togo; Tunisia (Arabic); Upper Volta; Vietnam (Vietnamese); Zaire. French is also spoken in the Overseas Departments (see above).

## Other Territories

French Territory of the Afars and Issas.Situated on the north-east coast of Africa, the Territory has an area of $9,000 \mathrm{sq}$. miles with population (estimate, 1970) of about $8 \mathrm{x}, 200$.
Formerly French Somaliland, the Territory was renamed win July 6, 1967 , to emphasize the existence of the two main ethnic groups in the population. A renamed Chamber of Deputies succeeded the former territorial assembly to which - governing council is responsible for the administration of the territory. The French High Commissioner retains responsibility for foreign policy, defence, currency, credit, citizenship and law, other than traditional civil law. Capital, $\Psi$ Djibouti $(62,000)$.
New Caledonia.-Area, 7,200 sq. miles. Population (estimate, 1971), 100,600. Capital $\Psi$ Noumea $(x 2,000)$. A large island in the Western Pacific, 700 miles E . of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc., the Huon islands and Alofis). New Caledonia was discovered in 1774 and annexed by France in 1854 ; from 1875 to 1896 it was a convict settlement. It is the world's third largest producer of nickel, after Canada and U.S.S.R.

Wallis and Futuna Islands.-Following a request from local kings and chiefs, decided by
referendum (Dec. 27, 2959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 8,550 , mostiy Polynesians.
French Polynesia_-Area, 2,500 sq. miles. Population (estimate, 1971), 1 19,200. Capital, $\Psi$ Papeete ( $\mathbf{x} 5,220$ ), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-oa, etc., 500 sq. miles, population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.) ; the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raivavae, Rimatara and Rapa Island; and Maiao Island).
Comoro Archipelago.-Area, 800 sq. milles. Population (estimated 1970), 275,227. Capital, Moroni Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean. Except for Mayotte, the islands voted in favour of independence in a referendum in December, 1974.

St. Pierre and Miquelon-Area, 93 sq. miles. Population (1968), 5,200. Two small groups of Islands off the coast of Newfoundland.

## GABON

(Gabonese Republic) (For MAP, see Index).
President, Omar Bongo, assumed office, December, 1967.

## Embassy in London <br> 48 Kensington Court, W.8. [ox-937 5285/9]

Ambassador Extraordinary and Plenipotensiary, His Excellency Edouard Teale.
Gabon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by Equatorial Guinea and Cameroon and on the east and south by the People's Republic of Congo. It has an area of rox,400 sq. miles and a population (estimated 1972) of 500,000 . Gabon elected on Nov. 28, 1958 , to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960 .

Over the past decade Gabon has known one of the fastest economic growth rates in Africa, based almost entirely on oil, production of which attained $1 \times \cdot 5$ million tonnes in 1975, making Gabon the fourth largest oll producer in Africa. Other wealth includes okoumé wood, manganese, uranium and iron.

The budget increased by 575 per cent. between 1970 and 1975 , and for 1975 stands at $£ 424,000,000$. Gabon became an associate member of OPEC in 1973 and a full member in 1975.

$$
\begin{aligned}
& \text { GERMANY } \\
& \text { * Deutsches Reich (German Realm) }
\end{aligned}
$$

THE HISTORY OF GERMANY from $1863^{-1945}$ is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 8866, as |result of
war with Austria (the Seven Weeks' War), Prussla acquired the hegemony of the North Germanic Confederation from Austria. After the FrancoPrussian War of 1870 , when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 187 x .

At the outbreak of the War of 1914-1918, Germany was - Confederate League bearing the Ewis German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 5863 , including all her colonies.

THE WAR OP 1939-1945.-After concluding II Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. I, 1939), thus precipitating war with France and Great Britain, which had (March 3x) given a pledge to support Poland against aggression.
On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.
THE POST WAR PERIOD.-After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Com-manders-in-Chief, each in his own of occupation and jointly in matters affecting Germany a whole through $\quad$ Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15. 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. x, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazifi-

[^30]cation, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by $\|$ Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provislons in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in March, 1948.

## FEDERAL REPUBLIC OF GERMANY

President, Walter Scheel, born July 8, x919, elected July $x$, 1974, for five years.

Vital Statistics.-There were 9.8 live births per x,000 inhabitants in the Federal Republic in 1976, compared with 19.5 per 3,000 for the mme area in 1938.

Government.-The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone wiw later joined by the French zone and in 1948-49 Parliamentary Council, elected by the Diets of the three zones, drafted ${ }^{\text {p }}$ provisional democratic federal constitution for Germany. This Basic Law in into force in the three western il on May 23, 1949. It provides for a President, elected for a five-year term, Lower House, with a four-year term of office, elected by direct universal suffrage, and composed of delegates of the Länder, without a fixed term of office.

The preliminary results of the elections held for the lower House (Bundestag) on October 3, 1976, were follows:

with an additional $=1$ representatives of Berlin elected by the Berlin Chamber of Deputies (Social Democrats, ro; Christian Democrats, 13; Free Democrats, 1). The Soclal Democrats form a coalition with the Free Democrats. The Christian Democratic and the Christian Social Unions the Parliamentary Opposition.

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the Linder governments in June, 3977, were:-

Ministers-President
Baden-Württemberg.-Dr. Hans Filbinger.
Bavaria.-Dr. Alfons Goppel.
Berlin.-Dietrich Stobbe (Governing Mayor).
Bremen.-Hans Koschnick (Mayor).
Hamburg.-Hans Ulrich Klose (Mayor).
Hessen.-Holger Börner.
Lower Saxony.-Dr. Ernst Albrecht.
North Rhine-Westphalia.-Heinz Kühn.
Rhineland-Palatinate.-Dr. Bernhard Vogel.
Saarland.-Dr. Franz-Iosef Röder.
Schleswig-Holstein.-Dr. Gerhard Stoltenberg.
Economic position.-Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing -1. Of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948 . As result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product ${ }^{-1}$ current prices in 2976 was estimated il $D M .1,323^{\prime 3}$ milliard, a increase of DM.92.9 milliard or $9 \cdot 0$ per cent. over 2975.

Agriculture.- In 2976 total area of farmland was $\mathbf{x}, 269,8$ ro hectares, of which $7,532,191$ hectares were arable land. Forest areas cover $7,164,574$ hectares. The 1976 harvest yielded $8,890,375$ metric tons of bread grains, $9,808,122$ metric tons of potatoes. The livestock population at the end of 3976 included $14,496,377$ cattle, 354,969 horses, x,091,26x sheep, $30,589,208$ pigs and $90,46 x, 162$ fowl.

Industrial Production.-The index of industrial net production adjusted for irregularities of the calendar ( $1970=100$ ) has developed in the Federal Republic, including Berlin, as follows:

|  | 1974 |  | 8976 |
| :---: | :---: | :---: | :---: |
| M | 9 S 4 | 84.8 | 83.3 |
| Manufacturing industr | $110 \cdot 6$ | 303.2 | 180 |
| (i) Basic materials | 116 | 103.6 | III'9 |
| (ii) Capital goods | 107.2 | 102 | 109: |
| (iii) Consumer good | 1077 | 101.9 | 109 |
| (iv) Foodstuff | 113.7 | 114.0 |  |
| Power (electricity an | 159.8 | 155.7 | 71 |
| Building Industry. | 104.8 | 93.8 |  |

Total industry........ 115.5 104.5 112.0
Productivity of labour in industry (excluding electricity, gas and building industries) per manhour: 1969, $96 \cdot 5$; 1970, 100; 1971, $106 \cdot 1$; 1972, 114.6; 1973. 122.7; $1974,128.3$; $1975, ~$ 134; 2976 , 144.7 per cent.

Some production figures are shown below (monthly averages):

|  | ${ }^{9975}{ }_{\text {Number }}^{1976}$ |

Finance.-As from January $\mathbf{x}$, 1975, the distribution of taxes in the Fed. Rep. of Germany between Federation, Länder, communities and local authorities has been regulated by an amendment of the Basic Law (Constitution) as follows:-
( x ) Of the yields of wage tax and assessed income tax, Federation and Länder receive 43 per cent. each, and the communities 14 per cent. The yields of capital yield tax and corporation tax are distributed to Federation and Länder with 50 per cent. each.
(2) The turnover taxes have been made joint taxes of which the Federation obtains $68 \cdot 25$ per cent. and
the Länder $3{ }^{\prime \prime} 75$ per cent, after deduction of the E.C. share.
(3) Of the trade tax which so far had been fully allocated to the communities, the Federation and the Länder receive equal shares (about 20 per cent. of the trade tax receipts).
(4) The yields of capital transactions taxes, insurance and bill taxes accrue to the Federation.

Excise duties, other than the beer tax, accrue to the Federal Government, all other taxes (with the exception of local taxes, i.e. particularly taxes on land and buildings) to the Länder.
Preliminary figures of budgetary expenditure in 1976 are: total expenditure DM.164,047,000,000 ( $1975,156,262,000,000$ ); Defence DM. $33,384,000,000$ (1975, 32,101,000,000); Social expenditure, DM.6x, $47^{8,000,000 ~(1975,57,051,000,000) ~(a b o u t ~}$ 37 per cent.); Agriculture and food, DM. 2,465,000,000 ( $1975,2,255,000,000$ ) (about $\times \cdot 5$ per cent.): Transport, DM.15,750,000,000 (土975, 11,468,000,000).

Currency.-The currency of the Federal Republic is the Deutsche Mark of 100 Pfennig, the rate of exchange with sterling being at April 29, 1977, $D M .4 \cdot 056=\mathcal{E}$ I. The rate of exchange of the pound sterling has been floating since 23 June 1972. (See also p. 83.)

Foreign Trade.-In 1976, imports were valued at DM. $222,173,136,000$ ( $1975,184,312,510,000$ ); and exportsat $D M .256,641,838,000 ; 16.2$ per cent. of imports consisted of foodstuffs and 16.2 per cent. of industrial raw materials; $4^{\circ} \cdot \mathbf{2}$ per cent. came from the Common Market* countries; 8.9 per cent. from the E.F.T.A. $\dagger$ and 8.9 per cent. from the United States and Canada. The Common Market countries took $45^{\circ}$ per cent. of all exports, the E.F.T.A. $15^{\circ} 0$ per cent. and the United States and Canada 6.4 per cent.

## Trade with U.K.

1974
1975

Communications.-In December, 1976, the stateowned railways of the Federal Republic measured 77,759 miles of which 6,426 miles were electrified, and the privately owned railways 1,906 miles, total of 19.665 miles. In 1976 the railways handled $342,706,565$ tons of goods and the inland waterways $230,032,58$ r tons. Railway rolling stock (Deutsche Bundesbahn) included, in 1976, 59 steam locomotives, 2,688 electric locomotives, 3 , 107 diesel locomotives, $x 6,7^{83}$ passenger coaches, 57 x rail buses and 288,184 goods waggons. Classified roads measure 105,365 miles. On Jan. $\mathbf{x}, 1977$, there were registered $19,580,469$ cars, $1,320,491$ commercial vehicles (incl. buses) and $1,452,661$ tractors. Ocean-going shipping under the German flag in Dec., r976, amounted to $9,036,209$ tons gross ( $x, 757$ ships). Civil aircraft in service at the same date totalled 182 aircraft.
Social Welfare. - There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the second and subsequent children. Pension schemes for widows and orphans of public servants
*Common Market: Belgium and Luxembourg, Denmark, France, Italy, Netherlands, Rep. of Ireland, U.K., W. Germany.
$\dagger$ E.F.T.A. (European Free Trade Association): Austria, Iceland, Norway, Portugal, Sweden, Switzerland.
and in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a decent standard of living.

Law and Justice.-Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the Länder. Judges independent and subject only to the law. The death sentence has been abolished.

Language and Literature.-Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great nana occur in all branches, notably philosophy, from Leibnitz ( $x 646-1716$ ) to Kant ( $1724-1804$ ), Fichte ( $1762-1814$ ), Schelling ( $1775^{-}$ 8854) and Hegel ( $1770-183 x$ ); the drama from Goethe ( $1749-1832$ ) and Schiller ( $\mathbf{1 7 5 9 - 1 8 0 5 \text { ) to }}$ Gerhart Hauptmann (x862-1946); and in poetry, Heine (1797-1856). German authors have received the Nobel Prize for Literature on seven occasions-Theodor Mommsen (rgoz), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (19x2), Thomas Mann (1929), N. Sachs (1966) and Heinrich Böll (1972). In 1974 there were 373 daily papers.
Education.-School attendance is compulsory for all children and juveniles between the ages of 6 and x8. Compulsory education comprises 9 years of schooling at primary schools (Volksschulen)-fulltime compulsory education-and 3 years of compulsory vocational education on a part-time basis. Preliminary figures showed that in autumn, 1976, there were in the Federal Republic $\mathbf{1 8 , 2 5 5}$ primary and main schools (Grund-und Hauptschulen) with 6,287,642 pupils. Secondary modern schools (Realschulen) numbered 2,450 with $x, 2 \times 8,653$ pupils. There were 2,639 other general secondary schools (Gymnasien including Gesamtschulen) with x,xx2,506 pupils.

There were also 2,696 special schools (Sonderschulen) for retarded, physically and mentally handicapped and socially maladjusted children in the Federal Republic with 398 , 190 pupils.

The secondary school leaving examination (Abitur) entitles the holder to a place of study at university or another institution of higher education. The number of examinations passed in 1975 was 812,655.

Juveniles below the age of 18 who are not attending a general secondary or ${ }^{-1}$ full-time vocational school (Berufsfachschule) are obliged to take a three-year course (part-time) at a vocational school. III November, 1976, there were 1,990 part-time vocational schools (Berufschulen) and 440 vocational extension schools (Berufsaufbauschulen) with 1,649, 858 pupils, 2,837 full-time vocational schools with 316,039 pupils, 1,199 advanced vocational schools (Fachschulen) with 91,446 pupils; 967 schools for secondary technical studies (Fachoberschulen/Fachgymnasien) with $\mathbf{1 2 2 , 7 8 \mathrm { x }}$ students and $x, 730$ Health Schools with $90,39 z$ pupils. [State expenditure for primary schools per annum amounted to DM.2,100 per pupil, for intermediate schools DM.2,300 and for grammar schools DM.3,300. State expenditure per pupil for part-time vocational, full-time vocational and advanced vocational schools per annum amounted to DM. x,500.] According to preliminary results, in the winter term 1976/77 there were $6 x$ universities-including a college for physical education (Sporthochschule)( 630,136 students), 12 colleges of theological philosophy (Theologische Hochschulen) ( $\mathbf{1}, 994$ students), 30 teachers' training colleges (Pädagogische Hochschulen) ( 72,833 students), 26 colleges of arts (Kunsthochschulen ( 55,272 students) and $55 x$ voca-
tional colleges (Fachhochschulen) ( 557,093 students); a total of 279 institutions of higher education with $8_{72,328}$ students. The largest universities were in Munich, Berlin, Hamburg, Münster (Westf.), Cologne, Bonn, Bochum and Frankfurt am Main. Religion.-In 1970 there were $29,696,57 \mathrm{x}$ Protestants in the Republic, 27,060,826 Roman Catholics, $3 x, 684$ Jews and $3,86 x, 518$ others.

Capital, Bonn, in North Rhine Westphalia, 15 miles distant from Cologne. Population 285,000 (Dec. 31, 1976).

Minister and Deputy Commandant, F. R. MacGinnis.
Counsellor, D. A. S. Gladstone (Political Adviser and Head of Chancery).

## GERMAN <br> DEMOCRATIC REPUBLIC

Area and Population.-The German Democratic Republic comprises the five former German Länder of Brandenburg, Mecklenburg, Saxony, SaxonyAnhalt and Thuringia (an area of $4 \mathrm{I}, 768 \mathrm{sq}$. miles). The seat of Government is East Berlin (156 sq. miles). The population of the Republic, including East Berlin (end of 1974) is $\mathbf{x 6 , 8 0 0 , 8 0 0}$. In 1953 the former Länder were replaced by fourteen Bezirke (regions) : Potsdam, Cottbus and Frankfurt (formerly Brandenburg); Rostock, Schwerin and Neubrandenburg (formerly Mecklenburg); Karl-Marx-Stadt. Dresden and Leipzig (formerly Saxony);

Halle and Magdeburg (formerly Saxony-Anhalt); Erfurt, Gera and Suhl (formerly Thuringia.)

The present Constitution, which defines the GDR as a Socialist state, came into force on April 9 , 3968 after endorsement by a referendum. It replaced the first Constitution of October 7, 1949. Among items of the 1949 Constitution omitted from that of 1968 were the rights of trade unions to strike, of citizens to emigrate and of newspapers to publish without censorship. Further amendments came into force on October 7, 1974 after adoption by the Volkskammer on September 27. 1974. They mainly involved (a) the deletion of all references to the German nation and to the possibility of reunification, and (b) the recording of the transfer of certain governmental functions from the State Council to the Council of Ministers which had their origin in the Law on the Council of Ministers of October $\mathbf{1 6 , 1 9 7 2 \text { . The supreme organ of }}$ State power is the Volkskammer, which has power to elect and dismiss the State Council, the Council of Ministers, the Chairman of the National Defence Council, the Supreme Court and the ProcuratorGeneral. The State Council retains the presidential powers which it has exercised since the abolition of the office of President on September 12, 1960, together with responsibility for the organization of defence with the help of the National Defence Council. The Council of Ministers is responsible to the Volkskammer for the conduct of State policy. The present Volkskammer is that elected on November 14, x971.
As with other communist countries, effective power lies with the ruling Marxist-Leninist Party, in this case the Socialist Unity Party of Germany (SED). The other parties and mass organizations are members of the SED-controlled National Front.

## Council of State

## Chairman, Herr Erich Honecker.

Deputy Chairmen, Herr Friedrich Ebert; Herr Gerald Götting; Dr. Heinrich Homann; Dr. Manfred Gerlach; Herr Hans Rietz.
Members, Herr K. Anclam; Herr H. Sinchermann; Prof. E. Correns; Herr W. Grandetzka; Herr K. Hager; Frau B. Hanke; Prof. Lieselott Herfurth; Herr E. Honecker; Herr F. Kind; Frau M. Müller: Herr B. Quandt; Herr A. Norden; Herr K. Sorgenicht; Herr P. Strauss; Frau I. Thiele; Herr P. Verner; Frau R. Walther; Herr H. Tisch.

## Council of Ministers

Prime Minister, Herr Willi Stoph.
rst Deputy Prime Ministers, Dr. Günter Mittag; Herr Alfred Neumann.
Total membership of the Council is 4 x , including 9 other Deputy Prime Ministers, 13 holding principal portfolios and 15 holding portfolios of mainly technical nature.

Socialist Unity Party of Germany. Politbureau of the Central Committee, H. Axen; F. Ebert; W. Felfe; G. Grüneberg; K. Hager; Gen. H. Hoffman; E. Honecker; W. Krolikowski; W. Lamberz; E. Mielke; G. Mittag; E. Mückenberger; K. Naumann; A. Neumann; A. Norden; H. Sindermann; W. Stoph; H. Tisch; P. Verner (full members); H. Dohlus; J. Herrmann; W. Jarowinsky; G. Kleiber; E. Krenz; Frau I. Lange; Frau M. Mueller; G. Schürer; W. Walde (candidate members).
Secretariat of the Central Committce, E. Honecker (General Secretary); H. Axen; G. Grüneberg; K. Hager; J. Herrmann; W. Jarowinsky; W. Lamberz; A. Norden; P. Verner; G. Mittag; I. Lange: H. Dohlus (secretaries).

## Embassy in London <br> 34 Belgrave Square, S.W.I <br> [01-235 994x]

Ambassador Extraordinary and Plenipotentary, His
Excellency Karl-Heinz Kern. Minister Plenipotentiary, H. Birch.
Counsellozs, H. Schieferdecker; H. Nebel (Commercial).
rst Secretaries, M. Rudolph; W. Zielke; W. Klötzer; Dr. L. Buschendorf.
Economic Position.-Before the 1939-45 war, the economy of the area at present occupied by the GDR was largely devoted to agriculture and light industry, most heavy industry being concentrated in other parts of the Reich. In spite of this imbalance, compounded by severe war damage, a declining population, a shortage of labour and a lack of basic raw materials, G.D.R. has made considerable economic progress and is now in the world's top ten industrial nations in terms of G.N.P., and is second to the U.S.S.R. in Eastern Europe as a major producer of industrial goods. G.D.R. has a number of highly developed industries including basic chemicals and petro-chemicals, machine tools and industrial plant, ship-building and transport equipment, electronic and engineering equipment, precision tools and optical instruments.
The G.D.R. economy, including the control of industry and foreign trade, is centrally planned and administered. The State Planning Commission, which is subordinate to the Council of Ministers, is responsible for drawing up the $5^{-}$and r-Year Plans. The 5 -Year Plans determine the future development and structure of the economy; the $x$-Year Plans have to achieve these aims. The implementation of these plans is the responsibility of the State Production Enterprises under the supervision of the economic and industrial Ministries.

The economy is very closely integrated with those of other member countries of C.M.E.A. and particularly with the U.S.S.R.

Trade with U.K.

Ambassador Extraordinary and Plenipotentiary, His Excellency Stavros Georgiou Roussos (1974). Minister, N. E. Athanassiou.
Counsellors, L. Mavromichalis (Consular Affairs); M. Ghikas; G. Protonotarios (Commercial); C. Kondoyiannis (Agricultural); M. Dragoumis (Press).
Armed Forces Altaché, Capt. N. Pappas.
Tourist Adviser, C. Analytis.
There are Honorary Consulates at Birmingham, Bradford, Bristol, Falmouth, Hull, Immingham, Leeds, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Southampton, Cardiff, Edinburgh and Glasgow, and at Belfast.

A maritime State in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian and Mediterranean seas, and on the E. by Turkey, with an estimated area of $5 \mathbb{1}, 182$ sq. miles. A census held throughout the country on March 14, 1971, recorded a population of $8,768,64$ r.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: Macedonia (which includes Mt. Athos and the island of Thasos), Thrace (including the island of Samothrace), Epirus, Thessaly, Continental Greece (which includes the island of Euboea and the Sporades, or "scattered islands," of which the largest is Skyros), the Peloponnese (or Morea), the Dodecanese
or Southern Sporades ( $x$ islands occupied by Italy in rgII during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the Cyclades (a circular group numbering about 200 , with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the Ionian Islands (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the Aegean Islands (Chios, Lesbos, Limnos and Samos). In Crete there was for over 1,500
 which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afforded evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the ro-year struggle between the Achacans of Greece and the Phrygians of Troy (x $194-1184$ B.C.).
Government.-A military coup on April 21, 1967, suspended parliamentary government and, following an unsuccessful royal counter coup on December 13, 1967, King Constantine went into voluntary exile in Rome. A new constitution was approved in 1968 in a national referendum. On June $x, 1973$, following allegations of plot within the Navy to overthrow the government, the monarchy was abolished and a republic established under the Presidency of Mr. George Papadopoulos.
A referendum held on July 29, 1973, confirmed the new presidential Constitution with Mr. Papadopoulos as President until 198r. In early October a civilian government, headed by Mr. Markezinis, was appointed. Following student demonstrations in early November the Army, on November 17, was called in to restore order and martial law was declared. On November 25, following an Army coup, the Markezinis Government was overthrown and General Gizikis was sworn in as President of the Republic.

The overthrow of Archbishop Makarios, President of Cyprus, on July 15, by 1 military coup led by Greek Officers of the Cypriot National Guard caused an international crisis, in the wake of which the heads of the Greek armed forces decided, on July 23 , to relinquish power. President Gizikis called upon Mr. Konstantinos Karamanlis, Prime Minister between 1955 and 1963 , to return from his self-imposed exile in Paris and form a provisional Government. On August r, Mr. Karamanlis announced that the Constitution of 1952 would be reintroduced, pending a new Constitution.

The first elections for ten years were held on November 17, 1974. Mr. Karamanlis' New Democracy Party polled 54.3 per cent. of the vote and gained 220 out of the 300 seats in Parliament (this was later reduced in by-elections to 215 seats). Mr Karamanlis formed a new Government on November 21.

The constitutional position of the King, however, remained unsettled until December 8, when by a referendum, the Greek people rejected "crowned democracy" by 69.2 per cent. to 30.8 per cent. and Greece became a republic.

On December 18, 1974 Mr. Michael Stassinopoulos was elected by Parliament President of the Heilenic Republic untila new constitution should be passed. The draft of the new constitution was presented by the Government to Parliament in January 1975 and was formally passed on June 7 , coming into force on June II, 1975.

On June 19 the Greek Parliament elected Mr. Constantine Tsatsos President of the Hellenic Republic under the new constitution. He assumed office on June 20, 1975.

Defence.-The Navy consists of $\mathbf{3 7 , 5 0 0}$ men and is equipped with a balanced fleet of destroyers, submarines, fast patrol boats and amphibious warfare vessels, mostly of U.S., French and German origin. The strength of the Army is 140,000 . The Air Force consists of 23,000 men and is equipped with a modern inventory of aircraft disposed in 12 combat squadrons supported by the necessary transport, training, helicopter and reconnaissance squadrons.

Communications.-The 2,650 kilometres of Greek railways are State-owned with the exception of the Athens-Piraeus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Greek roads total somewhat over 35,500 kilometres, of which about 25 per cent. are classified as national highways and just under $30,000 \mathrm{~km}$. are classified as provincial roads.

On Dec. 31, 1976, the Greek Mercantile fleet numbered $3,3^{22}$ ships with a total tonnage of $29,024,333$ tons gross. On the same day Greekowned ships registered under foreign flags numbered $x, 294$ with a total tonnage of $22,074,339$ tons gross. (N.B. These figures exclude Greek-owned vessels under yoo tons gross). Athens has direct airline links with Australasia, North America, most countries in Europe, Africa and the Middle East.

Religion.-Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the CEcumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Cecumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Eecumenical Patriarch.
Education is free and compulsory from the age of 6 to 15 and is maintained by State grants. There are five Universities, Athens, Salonika, Patras, Thrace and Joannina. There are several other institutes of higher learning, mostly in Athens.

Language and Literature. -The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Katharevousa, a conservative literary dialect cvolved by Adamantios Corais (Diamant Coray), who lived and died in Paris ( $1748-1833$ ) and used for official and technical matters, is to be phased out over the next few years. Novels and poetry are mostly composed in dimotiki, a progressive literary dialect which owes much to John Psycharis (1854-1929). The poets Solomos, Palamas, Cavafis, Sikelianos and Seferis have won a European reputation.

Production.-Though there has in recent years been substantial measure of industrialization, Greece is still largely an agricultural country. Agriculture employs about a quarter of the working population, the most important product and export being tobacco, which accounts for about one-tenth of the value of total visible exports from Greece. Since the war the production of wheat, cotton, sugar and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, peach, almond, pomegranate and currant-vine. and considerable efforts have lately been made to
develop exports of Greek fresh fruit and vegetables as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.
The principal minerals mined in Greece are nickel, bauxite, iron ore, iron pyrites, manganese, magnesite, chrome, lead, zinc and emery, and prospecting for petroleum is being carried on. Oil refineries are in operation near Athens and at Salonika, where there is also a petro-chemical plant. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. In recent years new factories have been opened for the production of aluminium, nickel, iron and steel products, tyres, chemicals fertilizers and sugar (from locally-grown beet). Food processing and ancillary industries have also grown up throughout the country. The development of the country's electric power resources, irrigation and land reclamation schemes and the exploitation of Greece's lignite resources for fuel and industrial purposes are also being carried out, and the television network is being expanded. Tourism is developing rapidly. Greece has announced her intention of becoming a full member of the E.E.C., but has yet to negotiate transitional arrangements.

Currency.-The Greek drachma has a floating exchange rate of about $\sigma_{3}=\mathcal{C I I}^{\text {(July 1976) and }}$ $37=\$$ U.S.

National Day.-March 25 (Independence Day).

## British Embassy

(Ploutarchou I, Athens)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir (Francis) Brooks Richards, K.C.M.G., D.S.C. (1974).

Counsellors, R. O. Miles (Political and ConsulGeneral); T. J. Everard (Commercial).
ist Secretaries, P. W. M. Vereker; G. C. Duncan; M. S. R. Heathcote (Information); R. J. Ross (Labour); Miss M. R. McIntosh (Commercial); J. K. B. Davenport (Administration).

2nd Secretaries, J. W.Forbes-Meyler (Consul); M. C. Clements.
$3^{\text {rd }}$ Secretary, M. D. Hanman (Commercial).
Defence and Military Attaché, Brigadier Sir Gregor MacGregor of MacGregor, Bt.
Naval and Air Attaché, Capt. P. J. Williams, o.b.e. R.N.

Attachés, E. C. Duckworth, M.B.E. (Commercial); E. Tragoutsi, O.B.E.; H. Byatt, M.B.E. (Press).

Embassy Chaplain, Ven. S. R. Skemp.
Hon. Attaché, H. W. Catling, D.phil. (Director, British School of Archarology).

British Consular Offices
There are British Consular Offices at Athens, Corfu, Samos, Rhodes, Salonika, Heraklion, Kavalla and Patras.

British Council
${ }_{77}$ Philikis Etairias Street, Kolonaki Square, Athens $1_{3} 8$
Representative, P. G. Lloyd, C.b.e.
There is also an office at Salonica and British Council libraries at both centres.

## GUATEMALA

(República de Guatemala)
President, Gen. Kjell Eugenio Laugerud Garcia, elected, March, 1974; assumed office, July 1, 1974.
Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from $13^{\circ} 45^{\prime}$ to $x 7^{\circ} 49^{\prime}$, and in W. long. from $88^{\circ} 12^{\prime} 49^{\prime \prime}$ to $92^{\circ} 13^{\circ} 43^{\prime \prime}$, and has an area of 42,042 square miles, and a population of $5,400,000$ (for MAP, see p. 872 ). The constitutionally elected president, Gen. Miguel Ydigoras Fuentes, who had taken office on March 3, 1958, was overthrown on March 3I, I963, by the Army, which handed executive and legislative powers to the Minister of Defence, Col. Enrique Peralta Azurdia. Important changes were included in new constitution promulgated on Sept. 35,1965 , including the reduction of the presidential term from 6 to 4 years and the establishment of 1 Council of State under the chairmanship of Vice-President. Elections for a new Congress and for President and Vice-President took place on March 6, 1966 . Dr. Mendez was chosen as President at the first meeting of the new Congress and was succeeded by Col. Arana in 1970.

The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of $4,800 \mathrm{ft}$.) was destroyed by an upheaval in Dec. 1917. An earthquake in Feb. 1976 killed about 25,000 people, and caused considerable damage to property and the infrastructure. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Santo Tomás de Castilla and Puerto Barrios on the Atlantic side.
Language and Literature.-Spanish is the language of the country, and since the establishment of the University in the capital education has received marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

Finance,-Actual revenue and expenditure in 1975 were Quetzales 351,371,800 and Quetzales ${ }_{36} 6,588,400$ respectively, compared with Quetzales 282,245,200 and Quetzales 322,912,800 in 1974.

At par 1 Quetzal = \$I U.S. (See also p. 84).

## Trade

> 2974

The principal export is coffee, other articles being manufactured goods, sugar, bananas, cotton, beef and essential oils. The chief imports are petroleum, vehicles, machinery and foodstuffs.

CAPITAL, Guatemala. Population: $x, 200,000$. Quezaltenango (second city of the Republic), has a pop. of 54,487 . Other towns are $\Psi$ Puerto Barrios ( 29,435 ), Mazatenango ( 23,932 ), and Antigua ( $\mathbf{x} 7,270$ ).

Flag.-Three vertical bands, blue, white, blue; coat of arms on white stripe.

British Embassy
(Diplomatic relations suspended, July 3x, $196_{3}$ ).

## GUINEA

(Republic of Guinea)
President, Ahmed Sékou Touré, elected for seven year terms, January x96x, 9968 and on Dec. 27 , 1974.

President of National Assembly, Léon Maka. SUper Ministers
Prime Minister, Dr. Lansara Beavogui.
Interior and Security, Moussa Diakite.
Culture and Education, Mamady Keita.
Social Domain, El Hadj Sayfoulaye Diallo.
Exchanges Domain, El Hadj Abdoulaye Touré.
Economy and Finance, Ismael Touré.
Rural Promotion, N’Famara Keita.
As from the Government changes of May $\mathbf{z z}$, 1975, there were ${ }^{11}$ Ministers in the domains of the Super Ministers, including the President.

Formerly part of French West Africa, Guinea has coastline on the Atlantic Ocean between Guinea-Bissau and Sierra Leone and in the interior is adjacent to Senegal, Mali, Ivory Coast, Liberia and Sierra Leone (see below). Area, 96,865 sq. miles. The population (U.N. estimate, 1969), is $3,890,000$, mostly the Fullah, Malinke and Soussou tribes. It is estimated that there are about 2,000 Europeans in the country.

Government. -Guinea was separated from Senegal in 189 x and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28 , it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 2958 , Guinea became an independent republic governed by a Constituent Assembly. M. Sékou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.
A provisional constitution, adopted on Nov. Iz, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, s96x and re-elected in 1968 . General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March x, 3960, and established her own currency, the Guinea franc (now the Syli.). This led to the rupture of commercial relations with France, hither-

to her most important supplier and purchaser. Guinea is in receipt of economic aid and technical assistance from $\quad$ number of countries, including the United States, Federal Republic of Germany, Yugoslavia, the Soviet Union and China. The Government's forcign policy is one of "positive neutralism" and non-alignment. In January 1977 Guinea signed an agreement with France settling the outstanding claims between the two countries. Diplomatic relations with U.K., suspended in December, 1965 , were resumed on Feb. 20, 1968.

Production, etc.-The principal products of Guinea are alumina, iron-ore, palm kernels, millet, rice, coffee, bamanas, pincapples and rubber. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. In the mountains in the hinterland of Guinea (Fouta Djalon, 4,970 feet), where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminlum) are worked and alumina is produced for export. Bauxite has been worked and exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on. There are $\quad$ British-built cotton mill and a Chinesebuilt cigarette and match factory. Guinea imported goods to the value of $£ 4,508,000$ from U.K. and
exported to U.K. goods to the value of $£ 54,000$ in 3976.

Capital. - $\Psi$ Conakry ( 120,000 ). Other towns are Kankan $(29,000)$, which is connected with Conakry by a railway, Kindia ( 25,000 ), N'Zérékoré, Mamou, Siguiri and Labé.

FLAG.-Three vertical stripes of red, yellow and green.

NATIONAL DAY.-October : (Anniversary of Proclamation of Independence).

## British Embassy

Ambassador Extraordinary and Plenipotentiary, His Excellency John Ernest Powell-Jones, C.M.G. (1976) (resident at Dakar).

## GUINEA-BISSAU

President of the Council of State, Sr. Luis Cabral.
Guinea-Bissau, formerly Portuguese Guinea, lies in western Africa, between Senegal and Guinea; it has area of $14,000 \mathrm{sq}$. miles and had a population in 1972 of 544,000 (est. 1975-600,000)

Guinea-Bissau achieved independence on Sept. 10, 1974.

Currency, the escudo was replaced by the peso in March 1976.

Economy, the country produces rice, coconuts and ground-nuts. Cattle are raised, and there are bauxite deposits in the south.

The Capital and Chief Port is $\Psi$ Bissau.
Britise Embassy
Ambassador Extraordinary and Plenipotentiary, His Excellency John Ernest Powell-Jones, c.M.G. (x976) (resident at Dakar).

## HAITI <br> (République d'Haiti)

President, Jean Claude Duvalier, bom 195x, installed as President for life, April 2x, 197 I.

## Cabinet

Interior and Defence, Aurélien C. Jeanty.
Agriculture and Rural Development, Edouard Berrouet.
Labour and Social Affairs, Dr. Achille Savant.
Public Health and Population, Dr. Willy Verrier.
Public Works, Transport and Communications, Pierre Saint-Comé.
National Education, Dr. Raoul Pierre-Louis.
Finance and Economic Affairs, Emmanuel Bros. Justice, Michel Fièvre.
Co-ordination and Information, Pierre Gousse.
Foreign Affairs, Edner Brutus.
Commerce and Industry, Albert Charlot.

> Embassy and Consulate i7 Queen's Gate, S. W. 7 [ox-58is o577]

Ambassador Extraordinary and Plenipotentiary, (vacant).
The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.
The area of the Republic, including off-shore islands, is about ro,700 sq. miles with a population (estimated, 1069) of 4.768 .000 . The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood. About 250 British subjects, many of West Indian origin, reside in Haiti.
A French colony under the name of SaintDomingue from r697, the slave population, estimated at 500,000 , revolted in $179 x$ under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in $\mathbf{8 0 2}$ and died in captivity in 1803 . Resistance was continued by Jean Jacques Dessalines, also - former negro slave, who, on January $x, 1804$, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by I force of U.S. marines. The occupation came to an end in r934, and U.S. control of the revenue of Haiti offictally ended on October $1,1947$.
Dr. Duvalier was installed as President in 1957 and was re-elected as President for life on June 15 , 1964. He died on April 21, 1971. He was succeeded as President for life on the same day by his son, Jean Claude Duvalier, whom he had nominated as his successor under Article 102 of the Constitution of 1964 as amended on January 14, 197r.
Production, Industry, etc.- In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion.

In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of productivity. The main project is : scheme for the irrigation of more than 70,000 acres of the Artibonite valley. In May 1977 it was recorded that the country was undergoing an unprecedented famine, which had been caused by protracted drought and which had resulted in the deaths of hundreds of people.

The principal products are coffee, sugar, essential oils, sisal, cocoa and cotton. Coffee accounts for about one third of total exports and is still a mainstay of the country's economy though exports now rarely exceed 300,000 bags (of 60 kg .) Exports of bauxite began in 2957 . Production of copper in the Terre Neuve area started in 1960 , but was suspended as uneconomic at the end of 1971. Industry is still on a small scale but the last few years have seen steady and considerable expansion of light industry (the so-called transformation industries) taking advantage of cheap local labour (minimum wage \$U.S.I.30 per day) to assemble or manufacture labour-intensive goods for the U.S. market (baseballs, brassieres, electronic equipment, etc.). Exports of manufactures now rank second after coffee at about 40 per cent. of total exports. The tourist industry is again expanding and many French Canadians are now attracted to Haiti for winter holidays. The country is one of the most beautiful in the Caribbean.

Communications.-There are very few asphalted roads and internal communications are bad although the situation is improving. Air services are maintained between the capital and the principal provincial towns. The principal towns and villages are connected by telephone and/or telegraph. The telephone company is now state owned ( 5 x per cent.) and the service both in Port-au-Prince and Inter-urban has been greatly improved. External telegraph, telephone and postal services are normal. There are several commercial radio stations and 1 television station at Port-arPrince.

Haiti is very well served by air from New York, Miami and Kingston to the North and fromi Martinique, Puerto Rico and other points to the South, with daily services by one line or another in both directions. The airlines touching Port-auPrince International Airport include Pan American, Air France, American Air Lines, Eastern Airlines, and A.L.M. Regular passenger liner services to New. York have ceased, but cruise ships call regu-
larly, one Norwegian line operating a weekly cruise service to Kingston and Miami. Freight sailings are frequent for the U.S.A., Canada, Europe, Latin America (except Cuba) and the main Caribbean ports. (Airmail: U.K./Port-au-Prince, 4-14 daysextremely variable.)

Climate. The climate is tropical with comparativeiy little difference in the temperatures between the summer (March-Oct.) and the winter (Nov,-Feb.). The temperature at Port-au-Prince rarely exceeds $95^{\circ} \mathrm{F}$., but the humidity is high, especially in the autumn.

Language and Literature. -French is the language of the government and the press, but it is only spoken by the educated minority. The usual language of the people is Creole. Education is free but estimates of illiteracy are as high as 75 per cent. There are 3 French daily newspapers and one monthly in English. The total circulation is very small.

Finance.-The International Monetary Fund has granted Haiti $■$ stand-by credit of \$U.S.4,000,000 $\begin{array}{cc}\text { 1974-75* } & \text { 1975-76* } \\ \text { \$U.S. } & \$ \text { U.S. } \\ 38,916,000 & 43,300,000 \\ 38,916,000 & 43,300,000\end{array}$

| R | 38,916,000 | 43,300,000 |
| :---: | :---: | :---: |
| Expen | 38,916,000 | 43,300 |

* Haitian budget figures: there is also non-fiscal revenue-e.g. from the Tobacco Monopoly.
Exchange Rate: 5 Gourdes $=\$$ I (U.S.). (See also p. 84.)

Trade.-Value of imports 1974 SU.S. $119,900,000$ (est.): exports 1974 \$U.S. $100,800,000$ (est.)

Trade with U.K.
1974 1975
Imports from U.K. ..... $£_{2,000,000}^{1} £_{2, I 43,000}^{2,015}$ Exports to U.K......... 199,000 139,000

The principal exports are listed above; the principal imports are foodstuff, machinery, vehicles, chemicals and miscellaneous manufactured goods.

Capital, $\Psi$ Port-all-Prince. Population (estimated, 1974), 400,000. Other centres are: $\Psi$ Cap Haitien (24.957); $\Psi$ Gonaives (13.534); $\Psi$ Les Cayes ( $\mathbf{1 r}, 835$ ): Jérémie ( $\mathrm{xr}, 138$ ); $\Psi \mathrm{St}$. Marc $(x 0,485) ; \Psi$ Jacmel $(8,545)$; $\Psi$ Port de Paix $(6,309)$ ( 1960 Census figures).

Flag.-Two vertical bands, black (next staff) and red; arms in centre on I white background.

NATIONAL DAY.-January $x$.

## Honduras Embassy in London <br> 48 George Street, W.x. [0I-486 3380]

Ambassador Extraordinary and Plenipotentiary, His Excellency Licenciado Ricardo Pineda-Milla.
Honduras, one of the five Republican States of Central America, lies between lat. $13^{\circ}$ and $16^{\circ} 30^{\prime} \mathrm{N}$. and long. $83^{\circ}$ and $89^{\circ} 41^{\prime} \mathrm{W}$. with a seaboard of about 375 miles on the Carribbean Sea and an outlet, consisting of a small strip of coast 63 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains a total area of approximately 43,278 sq. miles ( $112,088 \mathrm{~km}$ ) and a population (preliminary, March 1974, census) of 2,646,828, of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, with peaks rising to 5500 and 2400 metres above sea level. Most of the soil is poor and acid, except for few acres along the North coast and in the interior. Rainfall is seasonal, May to October being wet and November to April dry. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands. Threequarters of the territory is covered by pine forests which contribute to much of the country's wealth in natural resources.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century Honduras formed part of the Spanish American Dominions for nearly three centuries until 3821 when independence was proclaimed.

On December 4, 1972, General López Arellano took over the Government from the previous National/Liberal Coalition headed by Dr. Ramón Ernesto Cruz, in a bloodless coup, and set up military régime. President López Arellano was removed on April 22, 1975, and replaced by Colonel Juan Alberto Melgar Castro. The coup followed allegations of corruption, involving bribes alleged to have been paid by the American banana concern, United Brands, to obtain $\llbracket$ reduction in a banana export tax.

Following the cancellation of special privileges and concessions to forcign banana companies, the establishment of the Honduran Banana Corporation was decreed, the Corporation taking control of all operations concerned with bananas as well as ports and railways owned by the banana companies. The Republic is divided into 18 departments, the newest of which, Gracias Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, tobacco, beans, maize, rice, cotton, sugar cane, cement and tropical fruits. Cattle raising and the exporting of frozen meat is becoming an increasingly important industry. Honduras being a timber producing country, the most important woods are pine, mahogany and cedar, most of which are first converted into
board form for export. There are large tracts of uncultivated land.
Agriculture is mainly confined to the large and fertile valleys on the wide Caribbean plain, and the extensive valleys found in the Comayagua and Olancho regions of the interior. Reaching inland from the Caribbean towards the eastern border with Nicaragua a vast tropical forest area called the Mosquitia constitutes an untapped reserve of precious timber.
The country is also rich in silver, gold and iron ore.
There are about 730 miles of rallway in operation, chiefly to serve the banana plantations and the Caribbean ports. There are $5,943 \mathrm{~km}$. of roads, of which 5,228 are paved, excluding some 250 kms of new major highways recently inaugurated. Improvements are being made and new roads built. There are 33 unpretentious airports and three international airports Teguclgalpa, San Pedro Sula and La Ceiba. There are four international air services (AVIATECA, SAHSA, PAN AM and TAN) and 3 domestic air services (SAHSA, Aero Servicios and LANSA).

The language of the country is Spanish. Primary and secondary education is free, primary education being compulsory, and, although there is still great deal of illiteracy, it is gradually diminishing.
$\Psi$ The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in
the Gulf of Fonseca, on the Pacific side. A new deep-water port is being constructed near Amapola at San Lorenzo, which is on the mainland.
The unit of currency is the Lempira (named after a native chief), value of 50 cents, U.S. and Lps 3.40 to the $£$. (See also p. 84.)

## Hungarian Embassy and Consulate 35 Eaton Place, S.W. I [ox-235 4048, 7 Igr: Consulate: ox-235 4462]

 Ambassador Extraordinary and Plenipotentiary, His Excellency János Lörincz-Nagy (1976). Counsellors, M. E. Kovács (Commercial); Dr. E. Simonyi; Mrs. E. Ábri (Cultural Affairs). Military and Air Altaché, Lt. Col. Imre Mózsik. ist Secretaries, M. Dezso Takacs; M. F. Szekeres; Miss Piroska Szögyéni (Administration); Dr. F. Somos; M. Géza Kollár (Commercial). and Secretary, M. Károly Kovács (Press). $3^{\text {rd }}$ Secretaries, M. Laszlo Merklin (Consul); Dr. György Bánlaki (Press); Dr. Istvan Fôldesi (Economic).Area and Population.-The area of Hungary may be stated as approximately 36,000 sq. miles with II population (1977) of 10,631,000.

Government.-Hungary was reconstituted a kingdom in 1920 after having been declared I republic on Nov. 17, 3918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939-45 War on the side of Germany in 1941. On Jan. 20, 1945. a Hungarian provislonal government of liberation, which had been set up during the preceding December, signed an armistice under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

After the liberation, coalition of the Smallholder, National Peasant, Social Democrat and Communist parties carried out major land reform and mines, heavy industry, banks and schools were nationalized. By 1949 the Communists had succeeded in gaining monopoly of power. A campalgn opened to collectivize agriculture and by

$195^{2}$ practically the entire economy had been "socialized ".
In mid-1953 Mr. Imre Nagy became Prime Minister, replacing Mr. Rákosi, who remained as First Secretary of the Party. Mr. Nagy introduced more moderate policy based largely on the development of agriculture rather than heavy industry. However, in April 1955 he was removed from his position Prime Minister and subsequently expelled from the Party. But opposition to Mr. Rákosi within the Hungarian Communist Party mounted will on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerö, who had been one of his closest associates.

The period from July to the outbreak of the national revolution Oct. 23, 1956, was marked by growing ferment in inteliectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward $3 y$ students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out En the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed uin all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Sovict forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerö's successor mirst Secretary of the Party, was announced. The trial and execution of Imre Nagy and three of his associates was announced on June $17,1958$.
Industrialization has made considerable progress in the last decade and now produces 68 per cent. of national income. Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, considerable deposits of natural gas (some not yet under full exploitation), some iron ore and oil. Output figures in 1976 (x,000 tons), coal, 25.300; bauxite, 2.918; steel
3.652; crude oil, 2,142; cement, 4,298. Natural gas production totalled 6,083 million cubic metres.

Agriculture still occupies an important place in the Hungarian economy. 10.6 per cent. of the entire land area is owned by State farms and a further 63.8 per cent. is within co-operative farms. Production of the most important crops in 1976 was slightly down on the previous year: figures ( $x, 000$ tons); wheat, 5,138 ; rye 156 ; barley 746 ; maize 5,819: rice 55 ; oats 86 ; sugar beet 3.923 ; green maize and silage maize 5,232 ; lucerne $x, 740$.

In 1976 plan targets for the first year of the Fifth Five Year Plan (1976-80) were not fulfilled. National income grew by 3 per cent., while agricultural production actually fell by 3 per cent. The retail price index rose by just over 5 per cent.

Since 1968 the Hungarian economy has been run according to $\quad$ system which allows more decentralized decision-making than in some other Eastern European countries. More difficult economic circumstances have led to some slight moves to more central control in vital areas such as the allocation of fuels and raw materials.

Religion and Education.-About two-thirds of the population are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education-kindergartens $3^{-6}$, general schools 6-14 (compulsory). vocational schools ( $\mathbf{1 5}^{-18}$ ), secondary schools ( $\mathbf{x 5}$ 18), universities and adult training schools (over 18). In the academic year 1974-75 there were $\mathbf{x 0 3 , 3 9 0}$ students at higher education institutions, 374,569 (incl. 209,646 attending day courses) at secondary schools, and $x, 039,600$ at general schools.

Language and Literature.-Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty ( $1800-1855$ ), Sándor Petöfi ( x 823 - 1849 ), János Arany ( $\mathrm{x} 8 \mathrm{~s} 7-$ 1882), Imre Madach ( $1823^{-1864}$ ), Kálmán Mikszáth (1847-1910), Endre Ady ( $\mathbf{1 8 7 7 - 1 9 1 8 \text { ), Attila }}$ József ( 1905 -1937), Mihály Babits ( $1883^{-1941 \text { ) and }}$ Dezsö Kosztolănyi ( $\mathbf{8 8 8 5 - 1 9 3 6 \text { ). }}$

Finance.-The budget estimates for the year 1976 were: Revenue, Forints 320,400,000,000: Expenditure, Forints 322,900,000,000. The tourist rate of exchange for the Forint (of roo Filler) was $3_{3}^{8 \cdot 89}$ Forints $=\mathcal{L}_{\mathrm{I}}$ (July, 1977).

## Embassy m London <br> x Eaton Terrace, S.W.I [ox-730 513 x]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sigurdur Bjarnason (2976). Minister-Counsellor, M. Eirikur Benedikz. Counsellor, M. Thórdur Einarsson.
Iceland is I large volcanic island in the North Atlantic Ocean, extending from $63^{\circ} 23^{\prime}$ to $66^{\circ}$ $33^{\prime} \mathrm{N}$. lat., and from $13^{\circ} 22^{\prime}$ to $24^{\circ} 35^{\prime} \mathrm{W}$. long., with an estimated of 40,500 square miles,

about one-sixth greater than that of Ireland. The population was 220,545 on Dec. $x, 3976$.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading nien called the Althing, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to $\quad$ serious fall in the standard of living and to decline in the population to little more than 40,000 . In the nimeteenth century struggle for independence began which led first to home-rule for Iceland under the Danish Crown (xg18), and later to complete independence under republican form of rule in 1994.

The Icelandic Cabinet normally consists of seven Ministers, responsible to the Althing, Parliamentary assembly of 60 members. A coalition of Progressives, Left Wing Liberals and members of the People's Alliance (Communists) held office from $197^{1}$ until the general election of June 30 , 1974, in which government and opposition parties obtained an equal number of seats. After prolonged discussions between the party leaders, a new coalition of members of the Independence Party ( 25 seats) and Progressives ( 17 seats) took office on Aug. 28, 1974.

The principal exports are frozen fish fillets, salt fish, stock fish, fresh fish on ice, frozen scampi, fishmeal and oil, skins and aluminium; the imports consist of almost all the necessities of life, the chief items being petroleum products, transport equipment, textiles, foodstuffs, animal feeds, timber, and alumina.

At January $x, 1977$, the mercantile marine consisted of 629 vessels of under 100 gross tons and 358 ships of 100 gross tons and over; a total of 987 vessels ( 175,207 gross tons), of which 882 were fishing boats and trawlers and $5^{\circ}$ were coasters. There is a regular shipping service between Reykjavik and Felixstowe and between Reykjavik and Weston Point on the Mersey and the Continent.

In the period since Iceland attained independence in 2944, relations between Britain and that country have come under strain on several occasions as a result of unilateral action by Iceland to extend the . of her exclusive fishery jurisdiction. In 1952, Iceland extended her fishing limits from 3 miles to 4 miles from new base lines across bays and estuaries, and the consequent dispute with Britain lasted until 1956. In $195^{8}$, Iceland extended her fishing limits from 4 to 12 miles. The ensuing dispute with Britain (and West Germany) was settled in March $196 x$ by an Exchange of Notes in which it was agreed, inter alia, that Iceland would give Britain 6 months' notice of any further extension of her fisheries jurisdiction and that in the event of a dispute about such extension the matter could be referred to the International Court of Justice at the request of either party.

The Icelandic Government which came to power in July 197x, declared their intention of extending the fishing limits to 50 miles from September 1 , 1972, and on February 15, 1972, passed legislation purporting to have this effect. Britain then referred the matter to the International Court. As interim measure, the Court granted Britain an injunction restraining Iceland from enforcing the 50 mile limit against British vessels and at the same time ordered Britain to limit her catch in the area to $x 70,000$ tons a year (the average for 1967-1971). The Court subsequently decided that it had jurisdiction, but the Icelandic Government refused to recognize the Court's competence in
the matter and sought to apply the new fishing limit by force. After September 1,1972, British trawlers were subjected to warp cutting and harassment by Icelandic Coastguard vessels. On May 19, 1973, the British Government ordered naval vessels into the disputed zone to provide protection for British trawlers. An interim settlement recorded in an Exchange of Notes dated Nov. 13, 1973, established maximum numbers for British trawlers fishing off Iceland and a system of rotating areas around the coast in which it was agreed that they should fish, with certain other areas reserved for conservation purposes. This agreement was valid for a years.

Negotiations failed to produce a further agreement before its expiry. Iceland extended her fishing limits to 200 miles on Oct. 15,1975 and the sequence of warp-cutting and naval protection once again ensued, this time leading to a breach of diplomatic relations on Feb. 19, 1976. Informal contacts within NATO subsequently prepared the way for an agreement signed in Oslo on June $x_{3}$ 1976, which provided for daily average of 24 trawlers to fish in designated areas for period of 6 months, at the end of which British vessels would fish only to the extent provided for in arrangements agreed with the Government of Iceland. On the expiry of the Oslo agreement on December $\mathrm{x}, 1976$, British trawlers withdrew from the 200 mile Extended Fishing Zone claimed by Iceland. No agreement for the resumption of fishing by British vessels in these waters has been reached.

A regular air service is maintained between Glasgow and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A., Germany, France and Luxemburg.

Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres and a few key highways are metalled the rest being of gravel, sand and lava dust. The climate and terrain make first-class surfaces for highways out of the question. Total number of vehicles licensed is about 75,000 (private cars, 65,000).

Language and Literature.-The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

Situated between latitudes $6^{\circ}$ North and $1 x^{\circ}$
South and between longitudes $95^{\circ}$ and $145^{\circ}$ East,

Indonesia comprises the islands of Java and Madura, the island of Sumutra, the Riouw-Lingga Archipelago which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the province of Riau), the islands of Bangka and Billiton, part of the island of Borneo (Kalimantan), Sulawesi (formerly Celebes) Island, the Molucca Islands (Ternate, Halmahera, Buru, Seram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of Timor Island, the islands of Bali and Lombok and the western half of the island of New Guinea (Irian Jaya), with a total area of 735,000 sq. miles, and a population of about 129,000,000.

From the early part of the 17 th century much of the Indonesian Archipelago wh under Netherlands rule. Following the World War r939-45, during which the Archipelago was occupied by the Japanese, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands of all the former Dutch East Indies except W. New Guinea took place on December 27, 1949.

Dr. Sukarno was elected President of Indonesia and held office until his deposition in 2967 . He died on June 21, 1970.

Following the establishment of Malaysia (including Sabah and Sarawak) in 1963, President Sukarno pursued - policy of "confrontation" against it, involving border incursions in both West and East Malaysia. Commonwealth forces assisted Malaysian resistance. Western New Guinea became part of Indonesia in 1963 under the name West Irian (now Irian Jaya), this interpretation being confirmed in an "Act of Free Choice" in July, 1969, of which the United Nations took note in November 1969.

On Sept. 30 , 1965 , an attempted coup d'etat assisted by the Palace Guard resulted in the murder of six generals. The Indonesian Communist Party was charged with plotting to destroy the power of the Army and to set up a Peking-oriented régime, nominally under President Sukarno. The coup W swiftly crushed and a widespread massacre of Communists and their supporters followed. Sukarno remained in office but his Foreign Minister, Dr. Subandrio, among others, was arrested and later sentenced to death. The sentence had not been carried out by the summer of 1976 .

Following a three-week period of unrest and violent student demonstrations the Minister of the Army, General Soeharto, took over effective political power in March, 1966, and announced the banning in Indonesia of the Communist Party. The new régime concluded an agreement ending the "confrontation" with Malaysia on Aug. II, 1966, and Indonesia resumed membership of the United Nations Organization which it had left in x965. General Soeharto was made Acting President with full powers, ce March 11, 1967.
Using his powers as Acting President. General Soeharto revised the membership of the two Houses of Parliament, and on March 28, 3968 , the MPRS (Provisional People's Consultative Congress), the highest constitutional body, appointed him full President for a period of five years. The 397 I elections resulted in the Government faction Golkar (functional groups) achieving a large majority.
In accordance with another instruction General Soeharto on June 6 replaced the Ampera Cabinet with the Development Cabinet, i.e. one which wa intended to reflect the emphasis to be placed henceforward on the development of the country, economic affairs, efficiency and expertise in general, and to reduce the direct influence of the military in the Government.

From March 12-24, 1973, the M.P.R. (Peoples' Consultative Assembly) met at Jakarta, the first time that it had assembled in its proper form during Indonesian independence. The primary outcome was the re-election of President Soeharto for a further term of 5 years, the election of Hamengku Buwono IX, Sultan of Yogyakarta, as VicePresident, and the determination of the broad lines of State policy. In March new Cabinet, called the Second Development Cabinet, was sworn in. Elections were held again in May 1977 and produced for the Government faction (Gulkar) the same large majority as in 297\%. The M.P.R. will meet again in March 1978.

Finance.-Following measures introduced by the Government in October, 1966 , inflation deciined from the rate of 600 per cent. in 1966 to about $=$ per cent. in 1975. At the end of 1972, a rice shortage, followed by a rise in other prices, increased inflationary pressure on the economy and inflation rose to 27 per cent. in 1973 and 40 per cent. in early 1974 but special measures reduced this to about a per cent. for the year. Following the agreement on the re-scheduling of Indonesia's debts in 1066, Western creditor nations agreed to make available aid amounting to $\$ 200,000,000$ as balance of payments support. Commitments undertaken by these countries in May 1974 amounted to over $\$ 900,000,000$.

The new measures adopted by the Government in October, 1966, included the abolition of State controls and the introduction of a free market policy with more realistic exchange rates geared to a floating rate for the purchase of foreign exchange in the form of bonus export certificates for essential imports. The rate had risen to 1 peak of Rps. $480=\$ \mathrm{I}$ by mid-3968, but fell to $R p s=37^{8}$ $=\$ \mathrm{I}$ by mid-rg69. It has remained stable since then even though on April 17, 1970, the Government abolished the bonus exports certificate system and introduced a free market for foreign exchange. Rps. 415 =U.S. $\$ \mathrm{I}$ (July 1974).

Production.-Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg, pepper and cloves are produced, mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estates. Rubber, tea, coffee and tobacco are also produced by both in large quantities. Tim-
ber is now the second largest foreign exchange earner after oil. Rice is I traditional staple food for the people of Indonesia and the islands of Java and Madura are important producers, but production is only gradually rising and up to 1977 has been insufficient to meet home demands.
Oil is the most important asset with production in $1976-7$ earning some U.S. $\$ 3,660,000,000$ in foreign net exchange.
Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits. Aid to Indonesia is channelled through the InterGovernmental Group on Indonesia (IGGI), which pledged U.S. $\$ 1,200,000,000$ in April 1977.

The first five-year development programme announced on Dec. 30, 1968, concentrating particularly on agriculture and communications, was inaugurated on April I, 1969 . The second fiveyear plan began in April 1974 and envisages a fivefold increase in the Government's development expenditure and a $7 \frac{7}{3}$ per cent. annual rate of growth in Gross National Product.

Trade with U.K.
There was a progressive decline in British exports to Indonesia after 1960 . This became more marked during Indonesia's policy of "confrontation" against Malaysla which resulted in disruption of normal commercial relations and stringent import controls due to lack of foreign currency, but exports have improved markedly since the restoration of normal commercial relations in 1967.

$$

$$

Direct Imports from U.K. $£ 59,500,00080,600,000$ Exports to U.K... ........ 15,100,000 22,300,000

Principal exports to the United Kingdom are rubber, tea, coffee, spices and sugar. Imports from the United Kingdom are mainly of machinery, chemicals, electrical equipment, motor vehicles, cycles, lubricating and heavy oils, and metal goods
Language.-The National Language is Bahasa Indonesia; common spelling for Malay and Bahasa Indonesia was introduced in August 1972.

Transport.-In Java ॥ main line connects Jakarta
with Surabaya in the East of Java and there are several branches, including a line from Semarang cir the North coast to Yogyakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago are maintained by the State-run shipping companies Djakarta-Lloyd (ocean-going) and Pelni coastal and inter-island) and other smaller concerns. Transport by small craft on the rivers of the larger islands plays an important part in trade. Air services in Indonesia are operated by Garuda Indonesian Airway and other local airlines, and Jakarta is served by various international services. There are approximately 50,000 miles of roads.

The Shah married (Feb. I2, 195x) Suraya Esfandiari Bakhtiari (marriage dissolved, April 6, 1958); married Dec. 2I, 1959, Farah Dibah (Empress Farah Pahlevi) and has issue Crown Prince Reza, born Oct. 3r, 1960; Princess Farahnaz, b. March 12,1963 ; Prince Ali Reza, $b$. April 28, 1966; Princess Leila, b. Mar. $27,1970$.

Prime Minister, Dr. Jamshid Amouzegar.

## Iranian Embassy in London 16 Princes Gate, S.W. 7 [or-584 8IOI]

Ambassador Extraordinary and Plenipotentiary His Excellency Dr. Parviz Radji (1976).
Area and Population.-Iran has an $m=$ of 628,000 sq. miles, with a population of $25,78 x, 090$ (Census of 1966); U.N. estimate, March, 1970 $28,448,000$. It is mostly an arid table-land, encircled, except in the east, by mountains, the highest in the north rising to $18,934 \mathrm{ft}$. The central and eastern portion is $\square$ vast salt desert.

The Iranians are mostly Shi'ah Moslems but among them are a few hundred thousand Zoroastrians, Bahais, Sunni Moslems and Armenian and Assyrian Christians. There is also $1 \begin{aligned} & \text { substantial }\end{aligned}$ Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government. -Iran was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of roi4-18, the subsequent troubles and the signature of the Soviet-Iranian Treaty of y92I, is vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 33, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi.

Owing to Nazi German penetration before and during the early part of the war of $1939-45$, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 194x, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 194x, and expelled the agents of the Axis. On September 16, 194x, Reza Shah abdicated and left the country, nominating the Crown Prince his successor.

The Prince ascended the throne under the title of Mohammed Reza Shah Pahlavi.

In March 1949, the Shah issued an Imperial Farman convoking © Constituent Assembly to make certain revisions to the Constitution and the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On February 26, 1963 , the Shah announced his six point "White Revolution". The six points are: I. A land reform designed to redistribute land and place it in the hands of the peasants. 2 . Nationalization of all forest land. 3. The sale of government shares in factories and industrial enterprises to raise money for the implementation of the land reform. 4. The distribution of factory profits among the factory employees. 5. The granting of the vote to women. 6. The creation of a Literacy Corps to bring basic education to the rural areas. Six additional points have since been added.

On March 2, 1975, the Shah dissolved the twoparty system, and announced the formation of the Rastakhiz (National Resurrection) Party, which would be the only political party. On June 20, general elections were held for the Majhs (Chamber of Deputies) and the Senate.
For the purposes of local government the country is divided into 14 Provinces (Ustans) and 8 Countries (Farmandariye Kol), comprising 147 SubProvinces (Shahristans), under Governors-General and Governors, respectively.

Defence. -The Army has strength of about 175,000 men, in 3 armoured divisions, 2 infantry divisions and 4 independent brigades. Two years' military service is compulsory. The Air Force has $\square$ strength of about 50,000 , with over 200 aircraft. The Navy, with personnel of about 13,000 , consists of 3 destroyers, 4 frigates, 4 corvettes, 6 minesweepers, and patrol boats, landing craft and hovercraft. The Gendarmerie is ${ }^{-1}$ all regular, paramilitary force of about 70,000 men which provides frontier guards and mans small posts throughout the country.

Education.-Since 1943 primary education has been compulsory and free, but there is large scale absenteeism, particularly outside the towns. The establishment in 1963 of the Literacy Corps (a body of National Servicemen who are seconded to the Ministry of Education to work as Primary School teachers in rural districts) has brought schooling to hitherto deprived villages and is making $\square$ valuable contribution in increasing educational opportunities for country people. There are in Iran eight universities (Tehran 3, Tabriz, Meshed, Isfahan, Shiraz, Rezayeh and Ahwaz).
Language and Literature.-Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, or Firdausi (A.D. 939zozo), Omar Khayyám, the astronomer-poet (died A.D. Ir2a), Muslihu'd-Din, known as Sa'di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hatiz (died A.D. x389). $^{\text {a }}$

Finance.-The budget for the Iranian year beginning March 2x, 1976, including development expenditure, balanced at Ris. 3,159,938,000,000. The unit of currency is the Rial of 100 Dinars (for rate of exchange, see p. 84).

Production and Industry.- While petroleum is the principal product and by far the greatest export Iran, except for its desert areas, is primarily an agricultural country and more than half of the inhabitants depend of their living on the land.

Wheat is the principal crop, using about half the area under cultivation. Other important crops $m$ ix barley, rice, cotton, sugar beet, fruits and vegetables. Wool is also produced-sheep, as well w goats, being numerous. There are extensive forests in the north and west, the conservation of which is in urgent problem. Rapid progress has been made in the development of industry. Apart from oil, the principal industrial products are carpets, textiles (mainly cotton), sugar, cement and other construction materials, ginned cotton, vegetable oil and other food products, leather and shoes, metal manufactures, pharmaceuticals, automobiles, fertilizers, plastics, matches and cigarettes. A steel mill at Isfahan began the production of pig iron at the end of 197x. There are now three petrochemical plants in operation, producing fertilizers plastics, detergents, sulphur and liquid petroleum gas. Large-scale copper deposits have been found in the south-eastern part of the country.

The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. $3^{\mathrm{x}}$, 1946. Production had risen to a total of $35,000,000$ metric tons in 1950, the last full year before nationalization. Oil shipments ceased in 195I and were not resumed until Oct. 30, 1954.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Iran were taken over for initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Iran $£ 25,000,000$ cash in the 10 years from Jan. x. 1957, in compensation for its oil assets in Northern Iran and in settlement of losses since 1957; and from the other members of the consortium for their shares, about $£ 224,000,000$ payable over $20-25$ years. The consortium is responsible for the production, refining and sale of Iranian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Oilfields outside the Consortium area are being developed by several oll companies formed jointly by N.I.O.C. with western oil companies, notably S.I.R.P., I.P.A.C., L.A.P.C.O. and I.M.I.N.C.O. Production from offshore oil wells in the Persian Gulf developed by these companies is increasing rapidly.

Recent oil production figures are (in long tons): 1966, 105, 100,000 ; $1967,129,300,000$; 1968, 142,200,000; 1969, $168,100,000$; 1970, 194,000,000; 1976, 268, 185,000.

Communications.-The principal roads are from the frontier of Iraq at Khosravi to Tehran; from Tehran via Saveh and Hamadan to Ahwaz and Khorramshahr; from Tehran via Qum, Isfahan and Shiraz to Bushire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with a branch road into Turkey; from Tehran to Meshed; three roads through the Elbruz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, via Yezd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Meshed is connected by road with Herat (Afghanistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. The Trans-Iranian Railway, from Bandar Shah, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has $\quad$ total length of 872 miles, the total cost, after eleven years' work, being approximately $£ 30,000,000$. The branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and thence to Quetta and branch lines from Ahwaz to Khor-
ramshahr and Khorramshahr to Tanuma in Iraq (on the Shatt al Arab, opposite Basrah) were opened during the war. An extension from Qum to Yezd via Kashan is now in operation as is one from Bandar Shah to Gorgan. Extensions from Yezd to Kerman and from Tabriz to Van (Turkey) are being built. It is hoped to connect the Iranian rail system with the Turkish and with the Pakistan systems, thereby offering a through route from Europe to Pakistan.

Civil Aviation.-In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. The Iranian National Airlines Corporation was formed from the former Iranian Airways and Persian Air Services in February, 1962. The Company is 5 I per cent. Government-owned and operates internal and international routes. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, British Airways, Qantas, P.I.A., Aeroflot, Alitalia, Aryana Airways and El Al operate services to Tehran.

These figures are calculated at the commercial rate of exchange and exclude oil exports. Total exports, inchuding oil exports for $1969-70$, Rials 6 I2,357,000,000.

## Trade with U.K.

1975
Imports from U.K $£ 494,621,000 \quad \mathcal{L} \begin{gathered}1970,901,000\end{gathered}$
Exports to U.K.... 700,933,000 1,049,263,000
Imports into Iran consist mainly of industrial and agricultural machinery, iron and steel (including manufactures), electrical machinery and goods, sugar, chemicals and pharmaceuticals, motor vehicles and certain textile fabrics and yarns. The principal exports, apart from oil, are cotton, carpets, dried fruits and nuts, hides and skins, mineral ores, wool, gums, caviare, cummin seed and animal casings. West Germany, the U.S.A. and the U.K. are Iran's three leading suppliers. West Germany, the U.S.S.R., the U.K. and the U.S.A. are the main customers for non-oil exports.

Capital: Tehran, population (1970), 3,150,000. Other large towns are Tabriz ( 388,000 ), Isfahan ( 340,000 ), Meshed ( 312,000 ), Shiraz ( 206,000 ), Resht ( $x 19,000$ ), Kerman ( 73,000 ), Hamadan ( 115,000 ), Yezd ( 74,000 ), Kermanshah ( 152,000 ), $\Psi$ Abadan ( 273,000 ), Ahwaz ( $\mathbf{x} 45,000$ ).

Flag.-Equal horizontal bands of green, white and red; with arms (lion and sun) in centre.

NATIONAL DAY.-October 26 (Anniversary of Birthday of the Shahanshah).

## British Council

Representative, J. G. Hanson, Kh. Ferdaussi 58 and $3^{8}$ Tehran. Centres and libraries at Ahwaz, Isfahan, Meshed, Shivaz, Tabriz and Tehran.

## IRAQ <br> Revolutionary Command Council

Chairman, President of the Republic, and Supreme Commander of the Armed Forces, Field Marshal Ahmad Hasan al Bakr, assumed office July $\mathbf{x 7}$, 1968.

Members, Saddam Hussain (Vice-Chairman); General Sa'dun Ghaidan (Minister of Communications); Sd Izzat Ibrahim (Minister of the Interior); Sd Taha Yasin Ramadhan (Minister of Works and Housing).
In addition to those members of the R.C.C. holding departmental portfolios listed above, there are 34 other ministers, including 17 ministers of State.

## Embassy of the Rebublic of Irap 21-22 Queen's Gate, S.W. 7 [OI-584 7x4I]

Ambassador Extraordinary and Plenipotentiary, H. E. Taha Ahmed Al-Dawood.
Area, etc. Traversed by the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Gulf on the S. and S.E. and from Iran on E. to Syria and Arabian Desert on W. the approximate position being between $37 \frac{1}{}^{\circ}$ to $48 \frac{1_{2}^{\circ}}{}{ }^{\circ}$ E. long, and from $37 \frac{1^{\circ}}{}{ }^{\circ}$ to $30^{\circ} \mathrm{N}$. lat. (see MAP, p. 878). The area of Iraq is officially estimated at $\mathrm{r72,000} \mathrm{sq}$. miles of which 37 per cent. is desert land. About 35 to 40 per cent. of the remainder E potentially cultivable either by rainfall or by irrigation.

Population--At the Census of 1965 Iraq had a total population of $8,097,230$; estimated 1977 , 11,500,000.
The Euphrates (which has a total length of $x, 700$ miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su ( 415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzurum, and flows westwards to a junction with the Kara Su , or Frat Su ( 275 miles); the other arm rises in the north-west of Erzurum in the Dumlu Dagh. The Tigris has a total length of $x, 550$ miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Antiquities.-In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C. Excavations in 1948 in Tel Abu Shahrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world. Hillah, the ancient city on the left bank of the Shatt el Hillah, 1 branch of the Euphrates, about 70 miles south of Baghdad, is me the site of Babylon and of the "house of the lofty-head " or "gate of the god " (Tower of Babel). Mosul Liwa covers - great part of the ancient kingdom of Assyria, the ruins of Ninevah, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the Garden of Eden. The "Tree of Knowledge," which had stood there " from time immemorial," withered and died in December, 1946. It has been replaced by 1 shoot said to be from the original tree.

Government.-Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., r9ar, the Emir Faisal m elected King of Iraq. The country was a monarchy until July, 1958, when King

Faisal II was assassinated. From $195^{8}$ Iraq has been under Presidential rule.

Diplomatic relations with the United Kingdom were broken in June 1967 and resumed in May 1968 They were again broken in Dec. $197 x$ and resumed once more in April 1974.

Language.-The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts.

Education.-In 1974-75 Iraq had 6,194 primary schools, with $57,6 \mathrm{ar}$ teachers and $1,523,955$ pupils: 583 intermediate schools, with 328,450 pupils; and 426 secondary schools, with 16,862 teachers. There were 5 universities and 4 other public institutes of higher education, with 2,669 teachers and lecturers and 58,351 students. In 1974 there were 64 vocational schools (agriculture, commerce and industry, home economics).

Communications and Trade. - New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. The port of Basrah has had difficulty in handling the upsurge in traffic since r974, but port expansion is in hand. Continuous dredging of the Shatt-al-Arab has provided navigable channel of $22 \frac{1}{2}$ feet at low water (as compared with feet before dredging was begun). The port of Um Qasr near the Kuwaiti border has been developed for freight and sulphur handling and container terminal is expected to be in operation by 1978 . Road routes from Turkey and the Mediterrancan are well used, and carry through traffic to Kuwait and the south.

There is an international airport at Baghdad. Iraqi Airways and British Airways provide flights between Baghdad and London in each direction almost daily, and other international airlines operate frequently. There are Iraqi services to Mosul and Basrah. Iraqui Republican Railways provide regular passenger and goods services on a standard gauge line between Basra, Baghdad and Mosul, which links up through Syria and Turkey with the Mediterranean and the Bosphorus. There is also a metre gauge line connecting Baghdad with Khanaqin, Kirkuk and Arbil.

Agriculture and Industry.-Iraq is capable of supporting considerably greater population if irrigation is developed and extended. The Government's concern with agricultural development is shown in the large financial allocations made to the sector. Apart from the valuable revenues to be derived from oil, agricultural development makes a valuable contribution to the wealth of the country and two harvests can usually be gathered in the year. Production fluctuates from year to year according to rainfall. In 1975 barley and wheat production totalled, $x, 282,400$ tons, cotton and maize production 272,820 tons and tobacco production $6,295,796$ kgs. Salinity and soil erosion, caused by a high water table, inadequate irrigation and drainage and traditional farming methods, are the major problems now being tackled by development planners.

Few industries with the exception of the oil industry are yet established on any scale, but increasing industrialization is taking place, mainly in the public sector. Priority is being given to petrochemicals, food industries, construction industries and engineering. Existing industries include cement, building materials, four milling, cigarettes, soap, beer, steel fabrications, furniture, tanning, textiles, footwear and vegetable oils. In 1974 there were $\mathbf{r}, 256$ industrial establishments employing an average number of 109.525 persons. Turnover of these establishments was ID.307,300,000. Iraq's major industry is oil production, and this
accounts for approximately 98 per cent. of the country's foreign exchange receipts, 90 per cent. of total government revenue and 45 per cent. of the Gross National Product. Production was some $2 \cdot 3$ million barrels per day in 1976.

Total revenues from exports of crude oil have not been published since 2972 , but they are believed to have been worth some $\$ 8,500,000,000$ in 1976. The Iraq Petroleum Company vin nationalized on June I, I972, and its associate, Basrah Petroleum Company, was nationalized on Dec. 8, 1975. Following nationalization, Iraq's oll production fell to estimated $65,000,000$ long tons in 2972. However, a result of ill agreement reached between the Iraq Petroleum Company and the Government in March 1973 Iraq's oil production has since risen to meet market requirements and reached some 97,800,000 long tons in 1973.

## Embassy in London

- Palace Green, Kensington, W. 8
[0x-937 8050]
Ambassador Extraordinary and Plenipotentiary, His Excellency Abraham Kidron (1977).
Area and Population.-Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. $29^{\circ} 30^{\circ}-$ $33^{\circ} 15^{\prime}$ N. and longitude $34^{\circ} 15^{\prime}-35^{\circ} 40^{\prime}$ E. Its political neighbours are Lebanon on the North. Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South-West.

The area is estimated at 7,992 square miles out of the 20,429 square miles which comprised the pre- $294^{8}$ mandated territory of Palestine (the remainder being occupied by Israel since the Six Day

War in June, 1967 , together with the Sinai Peninsula and the Golan Heights in Syria). The population was estimated in 1973 at $3,230,000$. Jewish immigration has made rapid progress since the establishment of the State in 1948. In 1912 there were only 83.790 Jews in Palestine out of a total population of 752,048 . During the upheavals of 1948-49 large number of Arabs left the country as refugees and settled in neighbouring countries. Since 1948 the population of Israel has more than quadrupled.

Hebrew and Arabic are the official languages of Israel. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the Knesset for the simultaneous translation of all speeches into Arabic.

Physical Features.-Israel comprises four main regions: (a) the hill country of Galilee and Judæa and Samaria, rising in places to heights of nearly 4.000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region: (c) the Negev. semi-desert triangular-shaped region, extending from a base south of Beersheeba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals

which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 936 ft . in xx miles and becomes a turbulent stream. Lake Tiberias is 696 ft . below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 59r ft. The other principal rivers are the Yarkon and Kishon. The largest lake is the Dead Sea (shared between Israel and Jordan); 393 sq. miles, $\mathbf{x , 2 8 6}$ feet below sea-level, $5 \times \cdot 5$ miles long, with it maximum width of Ix miles and a maximum depth of $x, 309 \mathrm{ft}$.; it receives the waters of the Jordan and of six other streams, and has moutlet, the surplus being carried off by evaporation. The water contains is extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3.963 feet above sea-level, near Safad, Upper Galilee.

Climate.-The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but tempered in most parts by daily winds from the Mediterranean. The winter is the rainy cill lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.-The following are among the principal historic sites in Israel: Jerusalem: the Church of the Holy Sepulchre; the Al Aqsa Mosque and Dome of the Rock, standing on the remains of the Temple Mount of Herod the Great, of which the Western (wailing) Wall is a fragment; the Church of the Dormition and the Coenaculum on Mount Zion; Ein Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and medixval days, such as Ascalon, Casarea, Atlit, Massada, Megiddo and Hazor. Other antiquities in the West Bank of Jordan, Sinal or the Golan Heights at present occupied by Israel - now be visited from Israel.

Government.-There are a Cabinet and a singlechamber Parliament (Knesset) of 120 members. A general election is held at least once every four years. The last took place on May 17,1977 ;,

A "Government of National Unity" was formed on December 15, 1969, headed by Mrs. Golda Meir. It was $\pm$ broad coalition and, with one exception, embraced the same parties as were in the two previous governments formed in June 1967 and March 1969 by the late Mr Levi Eshkol and Mrs Meir respectively. In August 1970 the Gahal bloc left the Government because they were opposed to a resumption of the Jarring negotiations.

The election of $3^{1}$ December 1973 (postponed from 30 October because of the outbreak of war) returned the Labour Alignment as the biggest single party in the Knesset, but it was not until June 3 1974 that Mr. Itzhak Rabin was able to receive a vote of confidence in the Knesset for his Government. (The aftermath of the war had led to Mrs. Golda Meir's resignation on April ro.) In December, 1976 Mr Rabin called for new General Elections after differences with the National Religious Party, Labour's coalition partner.

The election was brought forward from October, when it would normally have been held, to May ${ }^{17}$, 1977; the campaign was heated and vituperative, the major arguments being about Israel's defence policy, relations with the United States, her economic situation and allegations of corruption

In the establishment. The largest single party in the final results was Mr Menahem Begin's Likud, while the Labour Alignment lost ig seats over 1973; not least because of the success of new party, Professor Yigael Yadin's Democratic Movement for Change. On 20 June Mr. Begin presented to the Knesset a coalition government, the Cabinet of which consisted of members of the Likud, the National Religious Party, Shlomzion and Mr Moshe Dayan (who had seceded from Labour), and which also enjoyed the support of the small, orthodox religious party Agudat Isracl. Although negotiations were held the Democratic Movement for Change did not at first join the coalition; 3 ministerial posts were held open for them. The present coalition has 62 seats in the Knesset, as follows: Likud, 43; National Religious Party, 12; Shlomzion, 2; Agudat Israel, 4; Mr Moshe Dayan, x. Other parties in the Knesset, with 58 seats, are: Alignment (Labour and Mapam), 31; Democratic Movement for Change, 15 ; Poalei Agudat Israel, x; Democratic Front for Peace and Equality (Communists), 5; Shelli, 2; Flatto Sharon, x; Independent Liberals, x; Citizens' Rights, 1; United Arab List, 1.
Immigration.-The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the Knesset on July 5, 1950, provides that im immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. From the establishment of the State until April 1975, more than $\frac{1}{\frac{1}{2}}$ million immigrants had entered Israel from over roo different countries.
Education.-Elementary education for all children from 5 to 15 years is compulsory. The Law also provides for working youth, age $x 5-18$, who for some reason have not completed their primary education, to be exempted from work in order to do so.
In 1975-76 enrolment in all educational establishments was $\mathbf{x , 0 3 4 , 4 8 0 \text { : kindergartens } 1 6 1 , 7 1 0}$ elementary education, 498,932 ; teacher's training colleges, $99,32 \mathrm{I}$; secondary education, 150,766 ; academic instutions, 51,500 .
Finance.-Government expenditure for the fiscal year $1975-76$ totalled $I £ 74,864,000,000$.
The unit of account is the Israel pound of 300 agorot. Exchange rate, see p. $8_{4}$.

COMMUNICATIONS
Railways and Roads.-Israel State Railways started operating in August I949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lod, Nahariya, Beersheba, Domona, Oron, Ashdod and intermediate stations. In March 1973 the total railway network amounted to 795 km . There were $10,657 \mathrm{~km}$. of paved road and 375,340 licensed vehicles in 1974.
Shipping.-Israel's merchant marine had reached a total of $4,474,8 \times 3$ tòns deadweight by December, $x 975$.

The chief ports are Haifa, modern harbour, with - depth of 30 ft . alongside the main quay; the harbour on the Red Sea at Eilat, inaugurated in September 1965, has a capacity of 10,000 tons day; Acre has anchorage for small vessels; the deep-water port at Ashdod, 20 miles south of Tcl Aviv, which started operations at the end of 1965 , handled $5,46 \mathrm{r}, 000$ million tons of cargo in 1975. In I975 Israel's three main ports handled 5,46x,000,000 tons of cargo (excluding petroleum).
Civil Aviation.-In 2975, El Al carried 649,000 passengers. El Al operates Boeing jets exclusively and has bought three Boeing 747's. Arkia, the internal airline, has had $\begin{gathered}\text { steep increase in trafic since }\end{gathered}$
the Six-Day War and in 1975 carried 363,000 passengers. Arkia BAC $\mathbf{x r}$ 's, five Heralds, five Viscounts and other smaller aircraft.

Production and Industry
Agriculture--The country is generally fertile and climatic conditions vary so widely that a large variety of crops be grown, ranging from temperate crops, such w wheat and cherries, to subtropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities mostly in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1974-75 season was $\mathbf{x , 5 0 6 , 0 0 0}$ tons. Of this total, 926,800 tons were exported, of which 182,000 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes be grown in autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 22,200 tons in 1975. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production. The area under cultivation during 1972-73 was $4,320,000$ dunams, of which $1,830,000$ were under irrigation. The largest of these is the Kin-neret-Negev Project. Much of the dairy industry 1 dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the dunam, equivalent to $x, 000$ square metres (approximately - quarter of an acre).

Industry.-In value polished diamonds now account for more than one-third of Israel's total exports. Amongst the most important of her exporting industries are textiles, foodstuffs, chemicals (mainly fertilisers and pharmaceuticals). Her metal-working and science-based industries have been developed to a highly sophisticated and technologically advanced level. These include the aircraft and military industries. Other important manufacturing industries include plastics, rubber, cement, glass, paper and oil refining.

## Trade

| Imports. Exports. | 1974 | $\begin{gathered} 1975 \\ \text { \$U.S.4,228,524,000 } \\ 2,201,090,000 \end{gathered}$ |
| :---: | :---: | :---: |
|  | U.S.4,339,910,000 |  |
|  | 2,129,214,000 |  |
| Trade with U.K. |  |  |
|  | 1975 | 3976 |
| Imports | om U.K. . $\chi^{237,243}$ | ¢249,000 |
| Exports | to U.K..... 98,253 | .000 $228,400,000$ |

The principal imports foodstuffs, crude oll, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

Capital.-Most of the Government departments are in Jerusalem (population, 1974, 380,000). A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950. It is not, however, recognized the capital by the United Nations. Other principal towns $\Psi \mathrm{Tel}$ Aviv and district $(947,000)$;
$\psi$ Haifa and district ( 514,000 ) and Beersheba and district ( 228,000 ).

Flag.- White, with two horizontal blue stripes, the Shield of David in the centre. National Das (2977)-April 2 .

## Jerusalem

Until 1967 Jerusalem was divided between Israel and Jordan, two of the 36 recognized Christian Holy Places (in the New City) being under Jewish administration, the remainder under Arab administration in the Old City. At the conclusion of hostilities between Israel and the surrounding Arab countries in 1967 the entire city was under Israeli control.

## British Embassy

192 Hayarkon Street, Tel Aviv.
Ambassador Extraordinary and Plenipotentiary His Excellency, J. C. M. Mason, C.M.G.
Counsellor, M. J. Newington (Head of Chancery and Consul-General).
Defence and Air Attaché, Group Capt. A. Musker. Counsellor, E. V. Vines, O.B.E. (Commercial).

British Council Representative, Miss M. A. J. Swinley, I40 Hayarkon Street, Tel Aviv. There is office and library in Tel Aviv and libraries in Jerusalem and Haifa.

ITALY
(Repubblica Italiana)
President of the Italian Republic, Giovanni Leone, born 1 Naples in 1908. Elected December 24, 197I.

## Council of Ministers

Prime Minister, Giulio Andreotti (CD).
Foreign Affairs, Arnaldo Forlani (CD).
Interior, Francesco Cossiga (CD).
Grace and Justice, Paolo Bonifacio.
Budget and The Regions, Tommaso Morlino (CD).
Finance, Filippo Pandolfi (CD).
Treasury, Gaetano Stammati.
Defence, Vito Lattanzio (CD).
Education, Franco Malfatti (CD).
Public Works, Antonino Gullotti (CD).
Agriculture, Giovanni Marcora (CD).
Transpont and Civil Aviation, Attilio Ruffini (CD).
Posis and Telecomrnunications, Vittorino Colombo (CD).

Industry, Commerce and Arts and Crafts, Carlo Donat Cattin (CD).
Labour and Social Security, Sra. Tina Anselmi (CD).
Foreign Trade, Rinaldo Ossola.
Merchant Marine, Francesco Fabbri (CD).
State Participation, Antonio Bisaglia (CD).
Health, Luciano Dal Falco (CD).
Tourism and Entertainment, Dario Antoniozzi (CD). Culture, Mario Pedini ( $C D$ ).
Minister without Portfolio:
South, Ciriaco de Mita (CD).
$C D=$ Christian Democrat.
Itallan Embassy in London
${ }_{4}$ Three Kings Yard, Davies Street, W. $x$ [0x-629 8200]
Ambassador Extraordinary and Plenipotentiary, His Excellency Signor Roberto Ducci ( $\mathbf{1} 975$ ).
Minister, Signor L. Incisa Camerana.
Minister (Commercial), vacant.

First Counsellor, Sig. G. Borga.
Counsellors, Sig. C. Civiletti (Press) ; Sig. G. Lenzi. rst Secretary, Sig. E. Barbarani. and Secretaries, Sig. del Balzo di Presenzano; Sig. F.

Trupiano.
Defence and Naval Altaché, Capt. G. Benini. Asst. Defence and Naval Attaché, Car. V. Milillo.
Military Attaché, Lt.-Col. A. Bonizzi.
Asst. Military Attaché, Lt.-Col. M. Congedo.
Air Attaché, Col. G. Batazzi.
Asst. Air Altaché, Capt. T. Lusi.
Financial Attaché, Sig. F. Anzilottt.
Cultural Attaché, Prof. M. Montuori.
Italian Consulate General, $3^{8}$ Eaton Place, S.W.I. (ox-235 483x).
Consul General, Sig. M. Manca.
Italy is a Republic in the South of Europe, consisting of peniusula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands. Italy is bounded on the N . by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area is about $324,000 \mathrm{sq}$. kilometres ( $\mathbf{3} 3 \mathrm{x}, 000 \mathrm{sq}$. miles).

The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy.
dividing it from France, Switzerland, Austria and Yugoslavia. Mont Blanc ( $\mathbf{5} 5,782$ feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are Monte Rosa ( 15,217 feet), Matterhorn ( $\mathbf{~ 4 , 7 8 0}$ feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po ( 405 miles), which flows through Piedmont, Lombardy and the Veneto, and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The Rubicon, a small stream flowing into the Adriatic near Rimini formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Casar did in 49 B.C., thus "invading " Italy in arms) is used to indicate definite committal to some course of action.

Population.-Italy has 1 resident population estimated at $56,024,000$ at the end of 1975 about 428 persons per sq. mile. Live births in 1970 totalled $9 \times 7,496$, deaths, 528,622 and marriages 395,321 (estimated).

Government.-Italian unity was accomplished under the House of Savoy, after um heroic struggle from 1848 to 2870 , in which the great patriots Mazzini ( $\mathrm{I} 805-72$ ), Garibaldi ( $8807-82$ ) and Cavour ( $\mathrm{I} 8 \mathrm{ro}-6 \mathrm{~s}$ ) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 5870.

In 5878 the King of Italy entered Rume, and that city declared to be the capital.

Benito Mussolini, known as Il Duce (The Leader) was born July 29, 1883, and was continuously in office as Prime Minister from Oct. 30, 1922, until July 25, x943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April z8, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5 , 1944, by the late King Victor Emmanuel $\amalg 1$ under which Prince Umberto, the King's son, became = Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with referendum on the question of Republic or Monarchy. The Referendum resulted in $\times 2,7 \times 7,923$ votes for Republic and xo,719,284 for i Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President wir elected.

Constitution.-The constitution of the Republic of Italy, approved by the Constituent Assembly m December 22, 1947, provides for the election of the President by an electoral college which consists of the two Houses of Parliament (the Chamber of Deputies and the Senate) sitting in joint session together with three delegates from each region (one in the case of the Valle d'Aosta). The President, who must be over 50 years of age, holds office for 7 years. He has numerous carefully defined powers, the main one of which is the right to dissolve one or both Houses of Parliament, after consultation with their Speakers.

The elections for the sixth President began on December 9, 1971 and Senator Leone was elected President at the twenty-third ballot on December 34 with 518 votes (the required majority was 505). The new President was sworn in before Parliament in joint session on December 29, 1971.

Since the General Election of $\mathbf{x 9 4 8}$, governments have been formed by Signor de Gasperi (x948-53, coalition); Signor Pella ( $1953-54$, Christian Democrat); Signor Scelba (1954-55, coalition); Signor Segni (July, 1955-May, 1957, coalition); Signor Zoll (June, 1957-May, 1958, Christian Democrat); Signor Fanfani (May, 1958-Feb., 1959, coalition); S. Segni (Feb., 1959-Feb., 1960, Christian Democrat, with Liberal support). Signor Tambroni (March 25-July 1960, Christian Democrat, with Neo-Fascist support); Signor Fanfani (July 37, 1960-Feb., 1962, Christian Democrat); Signor Fanfani (Feb. 1962-June, r963, coalition); Signor Leone (June-Nov., 1963 , Christian Democrat): Signor Moro (coalitions formed, Nov., 1963; July, 1964; Feb., 1966); Sen. Leone (May, x968-December, x968, Christian Democrat); Sig. Rumor (December, 1968-June, 1969, Centre Left coalition); Sig. Rumor (second Government) (August, 1969-April, 1970, Christian Democrat); Sig. Rumor (third Government, AprilAug., 1970, Centre Left coalition); Sig. Colombo (Aug., 1970-Feb., 1972, Centre Left coalition); Sig. Andreotti (Feb., 1972, Christian Democrat); Sig. Andreotti (June, 1972-June, 1973, Christian Democrat, Social Democrat and Liberals); Sig. Rumor (July, 1973-March, 1974, Centre Left Coalition); Sig. Rumor (March 1974 -Oct. 1974, Centre Left Coalition); Sig. Moro (Nov., 1974-Jan. 1976, Christian Democrat and Repubitian); Sig. Moro (Feb.June, 1976, Christian Democrat); Sig. Andreotti (July, 1976, Christian Democrat).

Sig. Rumor's fifth government (Centre-Left Coalition) was forced to resign on Oct. 3, 1974, owing to differences among the coalition parties. After an unsuccessful attempt by Sig. Fanfani to form |r Government, Sig. Moro (CD) formed a two-party coalition of Christian Democrats and Republicans, supported in Parliament by the Socialists and Social Democrats, which recelved its final vote of confidence in the National Assembly in December, 1974.

This government survived throughout 1975, but resigned on Jan. 7, 1976 after the Socialists had withdrawn their parliamentary support, mainly because of disagreements over economic policy. Following the usual consultations, Sig. Moro formed his fifth government on Feb. 1 1, consisting only of Christian Democrats, with non-parliamentarians $=$ ministers of Justice and Finance. Dependent on the abstention of the Socialists in Parliament, this government was weakened by a serious financial crisis. The refusal of the Socialists (and of the Communists, who were consulted) to agree to an emergency economic programme proposed by the government, led Sig. Moro to tender his resignation on April 30. After consultations, President Leone dissolved Parliament on May 1, and general elections were held on June 20, 1976.

In the Chamber of Deputies, the Christian Democrats won 262 seats, the Communists 228 , Socialists 57, Republicans 14, Social Democrats 55 , Italian Social Movement 35, Liberals 5, Radicals 4 , Democratic Proletarians 6, South Tirol Party 3 and mixed left (PCI/PSI/PDUP) $x$. In the Senate the Christian Democrats won 135 seats, the Communists 116, Socialists 29, Republicans 6, Social Democrats 6, Liberals 2, Italian Social Movement x5, Lay Alliance (PSDI/PRI/PLI) 2, mixed left (PCI/PSI/PDUP) I and others 3 .

Consequently, Sig. Andreotti formed a minority Christian Democrat government, which received a vote of confidence on Aug. Ix, through Communist abstentions.

Defence--The period of conscription is 12 months for the Army and Air Force and 18 months for the Navy. The Army consists of 233,000 men including 22,000 officers. It has two armoured divisions, five infantry divisions, four independent infantry brigades, five Alpine brigades, mili independent armoured brigade, one missile brigade, nim parachute brigade and one amphiblous regiment. There is also a para-military force, the Carabinieri, about 84,000 strong. The Navy consists of 3 cruisers, 37 escorts including four G.W. destroyers, 10 submarines, 60 minesweepers and also coastal craft and fleet auxiliaries. Approximate strength: 42,000 uniformed personnel. The Air Force consists of 500 aircraft; approximate strength: 66,000 men.

## Regions or Italy

Rome and Central Italy.-Rome wa founded, according to legend, by Romulus in the year now known as 753 B.C. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire and became the capital of Italy when the Kingdom was established in 187 I . With a metropolitan population of $2,842,6 \times 6$, Rome has been recreating herself as major capital in the yoo years since Italy's reunification. The capital is concerned mainly with tourism and government, but owing partly to the fact that the power of the Central Government is increasingly felt by industry, and that the headquarters of
the glant State and parastatal companies are located there, Rome's importance $\quad$ business centre, although far from rivalling that of Milan, is steadily increasing.

Lombardy and Milan.-In the small area around Milan, which has a metropolitan population of $\mathrm{x}, 724,8 \mathrm{x}$, in ti to be found | ill per cent. of Italy's commercial and banking services and some 30 per cent. of her industry. Here too, a market for consumer goods greatly exceeds of any other comparable win in Italy. Lombardy's population of some 8.3 million is growing fast, both naturally and by immigration, and enjoys a per capita incomm some 40 per cent. above the national average. The whole range of Italian industry is there. Most important wine steel, machine tool and motor car factories.

Turin and Pledmont.-Turin between 886 x and 1865 Bin Italy's first capital as the home of the Piedmontese Royal Family. Now with a metropolitan population of $x, 187,833$ it $\|$ famous as the headquarters of Europe's largest manufacturer of motor cars, produces 75 per cent. of Italy's motor vehicles and over 80 per cent. of its roller bearings. Turin is also Italy's second largest steel producing city. Piedmont is the centre of the Italian textile industry based mainiy on Biella.

Genoa and the Ligurian Riviera.-Genoa, with a metropolitan population of $842,1 \times 4$, is Europe's fourth largest port and handles one-third of Italy's foreign trade. About 80 per cent. of the goods handled are imports. Anglo-Genoese trade goes back to the x3th century and 20 per cent. of Genoa's imports still come from Britain. Genoa is Italy's third most important industrial city.

Venice and the North-East.-Venice, with in metropolitan population of 367,528 is primarily 1 tourist attraction of unique beauty. It was founded in the middle of the 5th century by refugees from the mainland fleeing from Barbarian attacks. At the beginnin of the r6th century it was one of the strongest and richest states of Europe, dominating Eastern Mediterranean trade. It lost its independence in 1797 when Napoleon handed it over to Austria. Industry is now developing in the Venice area, particularly on the autostrada linking Venice with her historical and now developing rivals, Verona, Vicenza, Padua and in the areas around Pordenone. Padua is known for mechanical equipment, Verona for paper and stationery, Treviso for consumer goods, and Valdagno for its woollen industry. An important electrical appliance industry is based near Treviso and at Pordenone. Near Trieste, which has a population of 277,135 , is the modern Monfalcone shipyard. A Free Territory of Trieste was established in the Italian Peace Treaty of 1947 and was composed of Zone A, which included the city of Trieste and was administered by the Allied Military Government, and Zone B which was administered by Yugoslavia. In 1954 Zone A was handed over to the Italian authorities and Zone B to Yugoslavia. A treaty was signed in 1975 between Italy and Yugoslavia under which each country abandoned its residual claims to the others zone. The Treaty was ratified in April 1977.

Tuscany, Emilia and Romagna.-Before the last war this in was the agricultural centre of Italy and there was little industry. Now there are large industrial centres at Bologna (metropolitan population, 493,700), Florence (metropolitan population, 460,944 ), Modena, Pistoia and Ravenna. Most of the new firms are small or medium-sized. In Prato there are about 1,000 textile firms. The footwear industry is based on Florence, reproduc-
tion furniture il Cascina and Poggibonsl, ceramics at Sassuolo, and glass and pottery at Empoli ulal Montelupo. Bologna is III important centre for the food industry. Florence, the capital of Tuscany was one of the greatest and most creative cities in Europe from the 1 xth to the 16 th centuries. Under the Medici family in the 15 th century flourished many of the greatest newm in Italian art, including Filippo Lippi, Botticelli, Donatello and Brunelleschi. In the s6th century the tide turned to Rome where great Florentine artists like Michelangelo and Leonardo da Vinci flourished.

Naples and the Toe of Italy.-Naples (metropolitan population $x, 258,721$ ), formerly the capital and administrative centre of the Kingdom of Naples and Sicily, remains the dominant city in the area, but it II beset with great problems of unemployment and the need for modernization. Around it, however, helped by Government incentives, industry is slowly developing, northwards to Caserta, southwards to Salerno and eastwards to Benevento.

Puglia.-Bari (metropolitan population, 356,250 ) has always been - commercial centre. Fairly rapid industrial development is now taking place in the areas of Taranto, Bari, Brindisi and Foggia. At Taranto there i. ir highly-mechanized steel-works and a modern oil refinery. The Bari industrial nim has factories producing electronic and pneumatic valves, specialized vehicle bodies and tyres, etc. The main industry of Brindisi is a petro-chemical plant. At Foggia there is I textile factory.

Sicily.-The main source of income lil agriculture, particularly citrus fruits, almonds and tomatoes, but this faces severe competition. Oil and oil products have recently supplanted citrus fruits as Sicily's main exports. The island is the scene of intense activity in the fields of oil, natural gas and petrochemicals. Small and medium sized industries, benefiting from the Government's incentives, are developing. Of the island's 279 factories, some 90 are in the Catania area and 60 around Palermo (metropolitan population, $657,3^{26}$ ), the capital of the island. Tourism is bringing an increasing amount of revenue to Sicily.

Sardinia.-Sardinia is another autonomous region, with its capital at Cagliari (metropolitan population, $225,8 \mathrm{zz}$ ). Six main industrial development areas have been officially designated; they are II Cagliari, Porto Vesme, Oristano, Sassari, Olbia and Arbatax. Lead and zinc mining are important. At Porto Vesme, a large smelting plant has been constructed. In the same area, company is investing some $\mathrm{E}_{6} 60$ million in miluminium plant. There is I flourishing tourist industry.

## The Economy

Italian gross domestic product in 1976 was $8863,600,000$, as compared with $\$_{272,100,000}$ in 1975. The economy developed fast in the fifties and early sixtles with an average real annual increase in the gross national output of about 7 per cent. But its recovery after a setback caused by labour unrest in the last quarter of 1969 , has been slower than was expected. After a partial recovery came the energy crisis of 1973/74. In 1975 the balance of payments deficit was reversed and inflation halved but this was accompanied by stagnation and increasing unemployment.

Currency.-The market rate of exchange on June 37, 1977, stood at lire $\mathbf{x , 5 2 2 =}$ К 1 .

Industry. -The general index of industrial production ( $1970=100$ ) stood at 121.9 in 1976 . The State-owned sector of Italian industry is important, dominated by the holding companies IRI (mechanical, steel, airlines), ENI (petro-chemicals) and ENEL (electricity).

Mineral Production.-Italy is generally poor in mineral resources but since the war deposits of natural methane gas and smaller deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Other minerals produced in significant quantities include iron ores and pyrites, mercury (over one-quarter of the world production), lead, zinc and aluminium. Marble is a traditional product of the Massa Carrara district. Tobacco is still I Government monopoly.
Agriculture.-Agriculture accounted for 8.5 per cent. of gross domestic product in 1975, and at the end of 1976 employed about $14: 7$ per cent. of the working population. Some three-quarters of the $3,785,000$ farms and small holdings are privately owned and operated. In the period 1964-75 Italy was I net exporter of rice, vegetables, fresh and dried fruit and wine, but the rising standard of living has increased imports of foodstuffs, particularly meat and animal food.

Tourist Traffic.-About $32,910,000$ visitors entered Italy in $\mathbf{x} 974$, a decline of 9 per cent. from 2973.

Communications.-The main railway system is State-run by the Ferrovia dello Stato. A network of motorways (autostrade) covers the country, built and operated mainly by the IRI State-holding company and ANAS the State highway authority. The autostrada network covered $5,176 \mathrm{kms}$. in 1974. Alitalia, the principal international and comestic airline, is also State-controlled by the IRI group. Other smaller companies, including ATI (an Alitalia subsidiary) and Ilavia operate on domestic routes. The Italian mercantile marine total of $8,378,000$ tons in December, 8972 , compared with $3,500,000$ tons before the War.

## Foreign Trade

Total Italian imports in 1976 were lire 36,3 ro milliards (an increase of 44.7 per cent. over 1975). Exports were lire 30,903 milliards (an increase of $35 \cdot 8$ per cent. over 1975).

The main markets for Italian exports in 1976 were West Germany ( 19 per cent.), France ( 85.1 per cent.) and U.S.A. ( 6.5 per cent.). The U.K. accounted for 4.8 per cent. of Italian exports. The main commodities exported were: machinery, motor vehicles, iron and steel, footwear, textiles and clothing, plastic and artificial resins and materials. The main commodities imported were petroleum products, iron and steel, meat, copper and motor vehicles. The E.E.C. provides the largest share in Italy's imports ( $43^{\circ} 6$ per cent. in 1976). The U.K.'s share has increased from 3.3 per cent. in 1975 to 3.5 per cent. in 1976.

Trade with U.K.

$$
\text { x975. } 1976
$$

Imports from U.K. . $£ 56_{3,258,000}^{1975} \quad £ 826,403,000$ Exports to U.K. .... 809,641,000 $\mathbf{1 , 6 0 6 , 1 6 5 , 0 0 0}$ Language and Literature.-Italian is $\mid$ Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 13041374; and Boccaccio, 1313 -1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 14691527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni ( $1785-1873$ ), Carducci ( $5835-1907$ ) and Gabriele d'Annunzio ( $3864-\mathrm{x93} 8$ ). The Nobel

Prize for Literature has been awarded to Italian authors on four occasions-G. Carducci ( 1906 ), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1971, there were 85 daily newspapers published in Italy, of which 22 were published in Rome and xo in Milan.

Education.- Education is free and compulsory between the ages of 6 and 24 ; this comprises five years at primary school and three in the "middle school ", of which there are about 8,000 . Pupils who obtain the middle school certificate may seek admission to any "senior secondary school", which is roughly equivalent to UU.K. grammar school but may be a lyceum with scientific or artistic bias, or may be an institute or school for teacher training, or may be an institute directed at technology (of which there are eight different types) or trade or industry (including vocational schools). Courses at the lyceums and technical institutes usually last for five years and success in the final examination qualifies for admission to university. There are 35 State and 14 private universities, some of ancient foundation; those at Bologna, Modena, Parma and Padua were started in the 12 th century. Univeraity education is not free, but entrants with higher qualifications are charged reduced fees according to $m$ sliding scale. In general, schools, lyceums and universities are financed by local taxation and central government grants.

Capital, Rome. Metropolitan population (estimated Oct. 1971), 2,842,616.

Oct. 197z estimates of the metropolitan population of the principal cities and towns are Milan, x,724,829; $\Psi$ Naples $x, 258,72 x$; Turin, $x, 287,832$; $\psi$ Genoa, 842,114 ; Bologna, 493,007; Florence, 460,944; ${ }^{2}$ Venice, 367,528 ; ${ }^{*}$ Bari, 356,250 ; $\Psi$ Trieste, 277,135 ; Verona, $262,0,14$; Padua, 228,854; $\Psi$ Taranto, 223,392 ; Brescia, 209,659; Modena, 170,450; $\psi$ Reggio Calabria, 167,087; $\Psi$ Salerno, 152,780 ; and Bergamo, 126,504 ; in Sicily; $\Psi$ Palermo, 657,326; $\Psi$ Catania, ${ }^{414,619 \text {; }}$ $\Psi$ Messina, 274,740; in Sardinia; $\Psi$ Cagliari, $225,8 \mathrm{xz}$.

ISLANDS.-Pantelleria Island (part of Trapani Province) in the Sicilian Narrows, has an area of 3 sq . miles and a population of 9,60x. The Pelagian Islands (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of sq. miles, pop. 4,8Ix. The Tuscan Archipelago (including Elba), area 293 sq. km., pop. $3 x, 86 x$; Pontine Archipelago (including Ponza, area 10 sq. km., pop. 2,515) ; Flegrean Islands (including Ischia, area 60 sq. km ., pop. 5I,883); Capri; Eolian Islands (including Lipari, area II6 sq. km., pop. 18,636) ; Tremiti Islands (area 3 sq. km., pop. 426 ).

FLAG.-Vertical stripes of green, white and red.
National DAY.-June 2.

## British Embassy

Via XX Settembre 8oa, Rome.
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Alan Hugh Campbell, x.C.M.g. (1976).

Minister, A. C. Goodison, C.m.G.
Minister, A. A. W. Landymore, C.B.E. (FAO).
Defence and Military Attaché, Col. D. H. W. Brown, M.C.
Naval Attaché, Capt. M. A. George, R.N. Air Attaché, Group-Capt. J. G. Greenhili.
Counsellors, M. R. Morland (Head of Chancery); R. C. Fisher, (Commercial); K. Kenney, O.B.E. (Labour); T. Beattic.
rst Secretaries, A. M. Layden; M. E. Pellew (Information); B. S. Grinstead (Administration); H . McMillan; Miss W. Calmels (Consul): A. A. C. Nash M.B.E. (Commercial); P. M. Scola (Agriculture); A. C. Galsworthy.
and Secretaries, J. Smith; C. P. P. Baldwin. Asst. Defence Attaché, Maj. N. Boggis-Rolfe. $3^{3}$ d Secretaries, H. R. Mortimer; J. M. G. Freeman. Chaplain, Rev. D. Palmer.

## British Consular Ofrices

There are British Consular Offices at Milan, Rome, Naples, Genoa, Florence, Patermo, Turin, Venice, Tieste, Messina and Cagliari and a trade representative at Bari.

British Council Representative, M. J. Ward, Palazzo del Drago, Via delle Quattro Fontane 20, oor 84, Rome.
There are British Council Institutes at Milan and Naples, each with a library.

## IVORY COAST

## (République de Côte d'Ivoire)

President, Félix Houphouët-Boigny, elected for five years in 1960; re-elected 1965, 1970 and 1975. President of National Assembly, Philippe Yacé.
President of Economic and Social Council, Mamadou Coulibaly.
President of Supreme Court, Alphonse Boni.
Ministers of State, Auguste Denise; Mathieu Ekra; Jean-Baptiste Mockey; Nanlo Bamba.
Minister for Foreign Affairs, Siméon Ake.

> IvORY COAST EmbasSY IN LONDON Upper Belgrave Street, S.W.I [ox-235 699$]$

Ambassador Extraordinary and Plenipotentiary, His Excellency Louis-Antoine Aduko (1973). ist Counsellor, M. Patrice K. Anoh.
Counsellors, M. J. M. Kacou Gervais (Head of Commercial Section); M. Benjamin Amuah. and Secretary, M. Raymond T. Diecket. Attaché, M. Nestor Kuffi Kouakou. Financial Attaché, M. N. Gnigoli Ehouman. The Ivory Coast is situated on the Gulf of Guinea between $5^{\circ}$ and $10^{\circ} \mathrm{N}$. and $3^{\circ}$ and $8^{\circ} \mathrm{W}$. and is flanked on the West by Guinea and Liberia, on the North by Mali and Upper Volta and on the East by Ghana. It has an area of about 127,000 square miles-tropical rain forest in the southern half and savannah in the northern-and a population of $5,400,000$ ( 5972 estimate) divided into a large number of ethnic and tribal groups.

Although official French contact was made in the first half of the 19th century, the Ivory Coast became $\quad$ Colony only in $\times 893$ and was finally paciffed in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 196x. The Ivory Coast was a founder member of the Conseil de l'Entente, established on May 29, 1959, as a loose union embracing also, without abrogation of sovereignty, Dahomey, Niger and Upper Volta. Togo also adhered in June, 1966. The Ivory Coast is also an Associated State of E.E.C. and a member of the Organisation Commune Africaine et Malgache (O.C.A.M.), the Organization of African Unity (O.A.U.), the Communauté Economique des Etats de l'Afrique de l'Ouest (C.E.D.E.A.O.) and the Communauté Economique de l'Afrique de l'Ouest (C.E.A.O.). The official language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 120 members was elected in 1975 for five years. The defence of the Constitution which was promulgated on Nov. 3, 1960, is vested in a Supreme Court.
Finance.-The unit of currency of the Ivory Coast is the Franc CFA (Francs CFA $50=1$ French franc). In 1976, the Ivory Coast Budget totalled Francs CFA 205,000,000,000.

Trade.-The principal exports are coffee, cocoa, timber and bananas all of which are exported to the U.K. Diamonds are exported. There are a few deposits of minerals including manganese and iron. Trade in 1976 was valued at: Imports, Francs CFA 311,607,333,500; Exports, Francs CFA $392,500,967,140$.

Trade with U.K. $1975 \quad 1976$
Imports from U.K.... $£ x 2,288,000 £ 17,848,000$ Exports to U.K....... $18,836,000 \quad 45,105,000$ CAPITAL, $\Psi$ Abidjan (population, $1,100,000$ ) which is also the main port.
FLAG. 3 vertical stripes, orange, white and green. National Day.-December 7 .

## British Embassy

Immeuble Shell, Abidjan, B.P. 2581.
Ambassador Extraordinary and Plenipotentiary, His Excellency Joe Booth Wright (1975).
(also Ambassador to Niger and Upper Volta). xst Secretary, F. M. A. Cargill (Commercial). and Secretary, P. J. Wilson.
$3^{\text {rd }}$ Sectetary, G. B. Anderson (Admin. and ViceConsul).

## JAPAN <br> (Nihon Koku-Land of the Rising Sun)

Emperor of Japan, His Majesty Hirohito, born April 29. 1901; succeeded Dec. 25, 1926; married (1924) Princess Nagako (born March 6, 1903), daughter of the late Prince Kuniyoshi Kuni, and has issue two sons and four daughters.
Heir-Apparent, His Imperial Highness Prince Akihito, Crown Prince, born Dec. 23, 1933; married April 10, 1959, Miss Michiko Shoda and has issue Prince Naruhito Hironomiya, born Feb. 23, 1960, Prince Fumihito, born Nov. 30, 1965 and Princess Sayako, born April 28 , 1969 . Cabinet
Prime Minister, Takeo Fukuda.
Justice, Hajime Fukuda.
Foreign Affairs, Tichiro Hatoyama.

Counsellors, Masanuri Ito (Consular), Jutaro Sakamoto (Press and Information); Makoto Hata (Agricullure); Kogechika Matano, Masaaki Tsuchida (Financial); Yasuo Yashima (Labour).
Defence Attaché, Capt. Hideo Sato.
ist Secretaries, Miss Moto Uwano (Press and Information); Ryusuke Sakai; Yasuo Shimizu; Akihiko Hayashi (Commercial); Hiroyuki Jeda; Kenji Ogawa (Transport); Masaharu Wakasa (Scientific); Shigeo Takenaka (Commercial); Michio Hamano: Ukeru Magosaki; Shoji Mori (Financial); Hideo Kunieda.
Area and Population.-Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude $x 28^{\circ} 6^{\prime}$ East and $145^{\circ} 49^{\circ}$ East and between latitude $26^{\circ} 59^{\prime}$ and $45^{\circ} 3 \mathbf{x}^{\circ} \mathrm{N}$., with a total area of $142,8 \times 2$ square miles and a population ( $\mathbf{1 9 7 4}$ ) of 110,050,000.

Japan Proper consists of Honshū (or Mainland), 230,448 sq. K. ( 88,839 sq. m.), Shikoku, 18,757 sq. k. ( $7,23^{\text { }}$ sq. m.), Kyūshü, 42,079 sq. K. ( $\mathbf{1 6 , 1 7 0}$ sq. m.), Hokkaido, 78,508 sq. k. ( 30,265 sq. m.). Formosa and the Kwangtung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the Allied Nations (Aug. 14, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15 , 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

British participation in the occupation of Japan was virtually over by May, 1950. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces, from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure. On July x, 1956, the base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of $1957^{\circ}$

Under the terms of the Japan-U.S.A. Security Treaty of Sept. 8, 195 x , United States forces remained to assist in the defence of Japan. However, Japan's own Self Defence Forces have been built up, U.S. ground troops have been withdrawn. A revised version of the security treaty, which went into effect on June 23,1960 , was the subject of considerable controversy in the summer of that year.

Vital Statistics.-The birth rate in 1973 was 19.4 per $x, 000$ ( $x 947,34$ per $x, 000 ; 1967,19.7$ per $x, 000$ ). It has been stated that a considerable part in reducing the birth rate to its present level was played by drastic methods, induced abortion and sterilization, the legal grounds for which had been extended by the Eugenics Law, 2948 , to include economic and social hardships. The improving standard of living has also played an important part in keeping the birthrate down.

The death rate in 1973 was 6.6 per $\mathrm{x}, 000$, compared with 17 per x,000 in pre-war years, natural increase of the population beling $1,382,500$ in 1973 .

Physiography.-The coastline exceeds $\mathbf{1 7 , 0 0 0}$ miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is agroup of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is $x 2,370 \mathrm{ft}$. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyushū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical in the south to cool temperate in the north. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing offering abundant opportunities for the supply of hydro-electric power.

Government.-According to Japanese tradition, Jimmu, the First Emperor of Japan, ascended the throne on Feb. 1r, 660 b.C. Under the constitution of Feb. 13, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "Meiji Constitution" of 1889 , and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France.

The new constitution came into force on May 3, 1947. Legislative authority rests with The Diet, which is bicameral, consisting of a House of Representatives and $\quad$ House of Councillors. both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Conservatives have governed Japan almost without interruption since World War II. Since 1955, when it was formed, the Liberal Democratic Party has maintained $I I$ absolute majority in the House of Representatives, though it has gradually declined. The present strength of the parties in
the House of Representatives is: Liberal Democratic Party, 259; Japan Socialist Party, 124; Komeito, 56; Democratic Socialist Party, 29; Japan Communist Party, 19; New Liberal Club, 18; Independents, 5 -

The House of Councillors whose powers are subordinate to the House of Representatives, re-elects half of its members every three years. Following the latest election, on July 10, 1977, the strength of the Parties is: Liberal Democratic Party, 126; Japan Socialist Party, 56; Komeito, 28; Japan Communist Party, 16; Democratic Socialist Party, 11; New Liberal Club, 4; Minor Parties and Independents, 9.

Agriculture and Livestock.-Owing to the mountainous nature of the country not more than onesixth of its area is available for cultivation. The forest land includes Cryptomeria japonica, Pinus massoniana, Zeikowaskeaki,and Pawloniaimperialis, in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. The tobacco plant, tea shrub, potato, rice, wheat and other cereals are all cultivated: rice is the staple food of the people, about $13,165,000$ metric tons being produced in 3975. The floral kingdom is rich, beautiful and varied. Fruit is abundant, including the mandarin, persimmon, loquat and peach; European fruits such as apples, strawberries, pears, grapes and tigs are also produced.

Minerals.-The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

Industry.-Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1976 (average) was $53,780,000$, of which $x, 080,000$ were unemployed. Of the total labour force, some $46,700,000$ were engaged in non-agricultural industries, $6,010,000$ in agriculture, forestry and fisheries.

Communications.-There were 26,867 kilometres of Government and private railroad (steam and electric) in March, 1977. The merchant fleet (oceangoing ships over 3,000 tons gross) consisted of 1,087 vessels totalling $33,560,000$ tons gross in July, 1975.

Armed Forces.-After the unconditional surrender of August, r945, the Imperial Army and Navy were disarmed and disbanded.

Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into belng in August, 1950, and a Maritime Safety Force was established in April, 2952. In August, 1952, these Forces were renamed the National Safety Force and the Coastal Safety Force and were placed under a National Safety Agency. In July, 1954, the Agency was renamed the Defence Agency, the Forces under it the Ground Sclf Defence Force and the Maritime Self Defence Force respectively, and $\quad$ new arm, the Air Self Defence Force, was created. At the same time the mission of the forces was extended to include the defence of Japan against direct and indirect aggression.

A Treaty of Mutual Co-operation and Security between Japan and the U.S.A. was signed in January, rg6o, replacing an earlier Security Treaty
signed in 195 x at the same time as the Peace Treaty. By this Treaty each country recognised that in armed attack against either in the territories under the administration of Japan would be dangerous to its own safety and declared that it would act to counter the danger.

The defence budget allocated for the fiscal year x977/78 amounted to Yen 1,69 I billion, equivalent to 0.88 per cent. of Japan's Gross National Product, or 5.93 per cent. of the tetal budget. The authorised uniformed strength was: Ground Self-Defence Force (GSDF) 880,000 (Reserve 36,000 ); Maritime Self-Defence Force (MSDF) 42,278 (Reserve 300); Air Self-Defence Force (ASDF) 45,492 (Reserve 490).

In 1976 the GSDF was organised into five Armies of thirteen Divisions. In addition, in the Northern Army there were one Artillery Brigade, one AntiAircraft Artillary Brigade and one Tank Brigade; the Eastern Army had one Airborne Brigade and all five Armies had one Engineer Brigade, Under the Ground Staff Office there were one Helicopter Brigade and one Signal Brigade, Seven divisions had an authorised strength of almost 9,000 (four combat groups) and the remainder of about 7,000 (three combat groups). Major equipment included 790 tanks, 640 APCs, 80 self propelled guns, 8 groups of Hawk AA missiles, and 439 aircraft. Equipment is now largely manufactured in Japan.

The MSDF has 150 warships totalling 193,000 tons and including two DDH, two TARTARequipped GMDs, 49 destroyers, $x 2$ submarines and 96 others. The MSDF has a total of 325 aircraft (93 helicopters, $44 \mathrm{~S} 2 \mathrm{~F}-\mathrm{x}, 19 \mathrm{P} 2 \mathrm{~V}-7,69 \mathrm{P} 2 \mathrm{~J}-\mathrm{I}, 16$ PSI A/S fying boats and 8 I others).

The ASDF has 97 x aircraft ( 174 Fro4], ${ }_{22 \text { I }} \mathrm{F} 86 \mathrm{~F}, 89 \mathrm{~F}_{4} \mathrm{EJ}, \mathrm{I}_{4}$ RF4E; 375 trainers $\mathrm{T}_{34}$, Fuil T-I, T-2, T-33, Fio4DJ; 44 transports and about 54 search and rescue and communications). The principal fighter is the Fro4J augmented by the $\mathrm{F}_{4} \mathrm{EJ}$. Domestically designed and built supersonic Tz trainers and Cx cargo planes have entered service. There are 5 groups of Nike AA missiles.

Religion.-All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has I Cardinal, $I$ archbishop and 14 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has Ix Japanese bishops ( x 688 ) and is an autonomous branch of the Anglican communion. There is also - United Protestant Church.

Education.-Under the Education Law of 1948 education at elementary ( 6 year course) and lower secondary ( 3 year course) is free, compulsory and co-educational. They have courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. $3^{2 \cdot 2}$ per cent. of upper secondary school leavers went on to higher education in 1973. There are or 3 year junior colleges and 4 year universities. Some of the 4 year universities have graduate schools. In May 1974 there were 915 universities and junior colleges, 104 state maintained, 8o local authority maintained and $13 x$ privately maintained. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaido (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Kelo and Waseda.

Language and Literature.-Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when Chinese characters came into use. Japanese who have received school education ( 99.8 per cent. of the population) can read and
write the Chinese characters in current use (about $\mathrm{x}, 800$ characters) and also the syllabary characters called Kana. English is the best known foreign language. It is taught in all middle and high schools. By r973, the number of public libraries was 915 , with $33,587,084$ volumes. In addition there are $x, 059$ university libraries with $66,485,099$ volumes. There are I23 daily newspapers in Japan. Japan's total newspaper circulation was estimated at $39,847,332$ copies and $\pi \cdot 25$ per household at the end of 1973. The National Diet Library contained in 1973 2,866,956 books: 335,602 atlases; 140,098 public records; 47,382 items of microfilm; and 26,695 periodicals.

## Finance

The Budget for the financial year 1977-78, ending on March 3 r, was initially estimated at Yen $28,514,270,145,000$ for revenue and expenditure on the general account, an increase of 17.4 per cent. over the preceding financial year.

The market rate of exchange with Sterling in June 1977 was Yen $450=$ £. . (see also p. 83 ).

Production and Trade
Being deficient in natural resources, Japan has had to develop $\quad$ complex foreign trade. Principal imports in 1976 consisted of mineral oils ( $3^{\circ} 7$ per cent.), raw materials ( $20 \cdot 3$ per cent.) e.g. metal ores, $7^{\prime}$ I per cent., timber, $5 \cdot 5$ per cent.; raw cotton, $r^{\prime} 4$ per cent.; and soya beans, ( $\mathbf{r} 6$ per cent.), foodstuffs ( $\mathbf{x} 4.5$ per cent.) (e.g. wheat and sugar) machinery ( 7.1 per cent.), chemicals ( $4 \cdot I$ per cent.) and textiles ( $2 \cdot 6$ per cent.). Principal exports consist of steel ( 15.6 per cent.), ships ( x 0.5 per cent.), automobiles ( $\mathbf{I}_{3} .2$ per cent.), electric machinery and appliances ( 14.3 per cent.), non-electric machinery (ix'5 per cent.), chemicals ( 7.0 per cent.) and textile goods ( $6 \cdot 3$ per cent.).

Newton (Economic) ; A. C. Thorpe (Economic); Dr. P. E. Roe (Scientific); P. B. Preece; S. J. Gomersall; R. W. Irving, M.B.E. (and Consul General); J. W. MacDonald (Commercial); J. A. Towner.
and Secretaries, T. Havey (Administration); D. F. Bleakley (Vice-Consul); A. G. Julian (Commercial); S. D. M. Jack (Economic); J. A. McLaren; G. H. Fry (Commercial); R. J. O. Lavery (Commercial); F. Connor (Information); N. L. Churchill; C. E. A. Ripley (Commercial).
$3^{\text {red Secretaries, Miss R. M. Marsden; T. C. Holmes. }}$ Attachés, N. K. Hook (Commercial); R. A. Rayner (Information); K. Mutter.
Defence and Military Attaché, Col. D. F. Ryan, о.B.E.

Air Altaché, Group Captain K. G. Hunter, о.в.e.
Naval Attaché, Captain G. A. F. Hitchens, R.N.
Financial Attaché, L. F. T. Smith.
Assistant Defence Attaché, Squadron Leader J. S. R. Hicks.
There is a British Consulate-General at Osaka and m Honorary Consulate at Kita Kyushu.

## JORDAN

## (The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.v.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May z, 1953, on coming of age.
Crown Prince, Prince Hassan, third son of King Talal of Jordan, born 1948, appointed Crown Prince. April x, 1965.

[^31]Jordanian Embassy and Consulate 6 Upper Phillimore Gardens, W. 8 $\left[\begin{array}{lll}\text { [01-937 } & 3685\end{array}\right]$
Ambassador Extraordinary and Plenipotentiary, His Excellency Salah Abuzeid.

Counsellor, Hassan Abu Nimah.
Counsellor, Miss Zein Samir Rifai (Press).
Military, Naval and Air Attaché, Brig. Riad Kat Khuda.
Service Office: 16 Upper Phillitmore Gardens, W.8. (oI-937-96II).
Area and Population.-The Kingdom, which covers $37,700 \mathrm{sq}$. miles, is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by lraq. Since the hostilities of June, r967, that part of the country lying to the west of the Jordan River has been under Israeli occupation. The majority of the population are Sunni Moslems and Islam is the religion of the State. Total population (1974) is $2,660,000$, of whom $x, 890,000$ live in East Jordan and the remainder on the West Bank and in East Jerusalem. (For MAP, see p. 882).

History and Government.-After the defeat of Turkey in the First World War the Amirate of Transjordan was established in the area east of the River Jordan as state under British mandate. The mandate was terminated after the Second World War and the Amirate, still ruled by its founder, the Amir Abdullah, became the Hashemite Kingdom of Jordan. Following the 1948 war between Israel and the Arab States, that part of Palestine remaining in Arab hands (but excluding Gaza) was incorporated into the Hashemite Kingdom. King Abdullah was assassinated in 195x; his son Talal ruled briefly but abdicated in favour of the present King, Hussein, in 1952 . All of Jordan west of the River has been under Israeli occupation since 1967 . As a result of the wars of 1948 and 1967 there are about 750,000 refugees and displaced persons living in East Jordan, about 200,000 of whom live in refugee and displaced persons camps established by the U.N. Relief and Works Agency (UNRWA). In addition there are some 300,000 entirely self-supporting Palestinian members of the East Jordanian community. It was largely among the refugee population that the Palestinian fedayeen (commando) movement which had come into existence some years carlier grew considerably in strength during 1969 and 1970 . The fedayeen organizations conducted a number of operations against Israel but during 1970 came more and more into conflict with the Jordanian Government. After the civil war between the Jordan Army and the fedayeen the Jordan Government re-established its authority. The fedayeen were finally expelled from Jordan in the summer of 197 r . In March 1972 King Husscin put forward a plan for the "United Arab Kingdom" which was to be implemented after liberation of the West Bank. The plan provides for the creation of federal State, composed of two autonomous regions, Palestine and East Jordan. During the war of October 1973 between the Arab countries and Israel, Jordan sent two armoured brigades into Syria to support the Syrian campaign on the Golan Heights.

The present constitution of the Kingdom came into force in 195z. It provides for a senate of 30 members (all appointed by the King) and an elected House of Representatives of 60 persons. The King himself appoints the members of the Council of Ministers. Following the Arab summit meeting at Rabat in October 1974, and the U.N. General Assembly in November, at which the Palestinian Liberation Organization achieved recognition as the sole legitimate representative of the Palestinian people, King Hussein took measures to amend the 1952 constitution to take account of the resultant change in the status of the West Bank in relation to the administration of Jordan east of the river. Crown Prince Hassan normally
acts as Regent when King Hussein is away from Jordan.

Production and Industry.-West Jordan is fertile, though many areas have suffered from soil erosion. In East Jordan the main agricultural areas are the east part of the Jordan Valley, the hills overlooking the Valley and the flatter country to the south of Amman and around Madaba and Irbid. The rest of the country is desert and semi-desert. The principal crops are wheat, barley, vegetables, olives and fruit (mainly grapes and citrus fruits). Agricultural production in the Jordan Valley has suffered from the continued hostilities in the area, though the East Ghor Canal, vital to the irrigation of the area, has now been restored and is being extended. The only important industrial product is raw phosphates (production 1975: $\mathbf{~}, 35^{2}, 500$ tons), most of which is exported. There are schemes under consideration for the production of copper, potash and phosphate fertilizers. Tourism was a major industry and foreign currency earner before the 1967 war but dwindled considerably as most of the tourist sites are now in Israeli occupled territory. In recent years it has begun to increase once more, with numbers of tourists visiting the archæological sites of East Jordan and the resort of Aqaba. The Trans-Arabian oil pipeline (Tapline) runs through North Jordan on its way from the eastern province of Saudi Arabia to the Lebanese coast of Sidon. A branch pipeline feeds refinery at Zerqa (production 1975: 828,197 tons) which meets most of Jordan's requirements for refined petroleum products.

Communications.-The trunk road system is good. Amman is linked to Damascus, Baghdad and Jedda by tarred roads which are of considerable importance in the overland trade of the Middle East. The former Hejaz Railway enters Jordan east of Ramtha and runs through Zerqa and Amman to Ma'an with I spur to the top of the Raz al-Naqb escarpment. The formerly abandoned section from Ma'an to Medina in Saudi Arabia has been partially reconstructed. A total of 1,064 vessels called at Aqaba in 1976 and $3.503,000$ tons of cargo were handled. Much of Jordan's trade moves overland to and from the ports in Syria and Lebanon. The Royal Jordanian Airline (ALIA) operates from Amman Airport to other cities in the Middle East and Gulf area, to most major European cities, and to Bankok in the Far East. There is $\quad$ service to the newly constructed airport at 'Aqaba.

Representative, J. G. Mills, Box 634 , Jebel Amman, Amman.

## KOREA

Korea is situated between $124^{\circ} 1 x^{\prime \prime}$ and $x 30^{\circ} 57^{\prime}$ E. long., and between $33^{\circ} 7^{\prime}$ and $43^{\circ} 1^{\prime \prime} \mathrm{N}$. lat. It has an area of $85,256 \mathrm{sq}$. miles with an estimated population of about $48,000,000$, of whom about $35,900,000$ (1976) live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart).

History. - The last native dynasty (Yi) ruled from r392 until $\mathbf{1 9 1 0}$, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 3 8th parallel being fixed at the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korcan Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 2947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up 1 Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the $3^{8 \text { th }}$ parallel.

The Korean War.-The country remained effectively divided into two along the line of 38 th parallel until the aggression of June 25,1950 , when the North Korean forces invaded South Korea. An emergency meeting of the U.N. Security Council adopted Resolution calling for $m i m$ imediate cease fire and the withdrawal of North Korean forces. This was ignored and the communist advance continued. In response to Security Council recommendations the United Nations members should furnish assistance to repel the attack, 16 nations including the United States of America and the United Kingdom came to the aid of the Republic of Korea. However the communist advance could not be contained until eventually a front was established around Busan. Later, following a successful U.S. marine landing at Inchon, the communist forces were driven beyond the 38 th parallel. At this point the Chinese "volunteers" joined the campaign and although the U.N. forces were initially driven back beyond Seoul they regrouped and threw the communist forces back to approximately the old dividing line. The fighting was ended by an Armistice Agreement signed by the U.N. Commander-inChief and the Commander of the North Korean

army and the Chinese People's "volunteers" on July 27, 1953. By this Agreement (which was not signed by the Government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the $3^{8 \text { th }}$ parallel. The Geneva Conference discussed Korea in 1954 but failed to agree on 미 ता for re-unifying the country.

## Republic of Korea

President, Park, Chung Hec, assumed office, March 22 1962; re-elected for four years. 1963,1967 and $x 97 x$; and for six years in 1972. Prime Minister, Choi Kyu Hah (1975).

## Korean Embassy <br> 4 Palace Gate, W.8. <br> [01-58r 0247]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Pyo-Wouk Han (x977). Minister, Tae Joon Ha.
Counsellors, In Hwan Chai; Jai Sung Kim; Chang Choon Lee; Nyum Jin.
Defence Attaché, Col. Dong Yull Seo.
The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of $3^{8,452} \mathrm{sq}$. miles and a population of 35,860,000 (2976).

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 3x. The Assembly passed ${ }^{1}$ Constitution July 12 , and um July 20 elected the late Dr. SyngIII: Rhee as the first President of the Republic of Korea, an office which he held until rg60. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to - end.

President Syngman Rhee was overthrown by a widespread popular rising in 1960. After a year of unstable and ineffectual governments a new régime was set up by an army officers' coup on May x6, ig6r led by Major-Gen. Park Chung Hee, On March 22,1962 , he took over as acting President, retaining his post © Chairman of the Supreme Councll.

Elections were originally promised for May and August, $\mathbf{1 9 6 3}$, respectively, but when political activities were allowed to start again at the beginning of that year there was considerable confusion, so that the military government decided to retain power until December, 1963 . Elections were then held in which General Park was elected and the Democratic Republican Party secured a majority. At further elections held in 1967 , Pres. Park was returned by a comfortable majority for a new four-year term. In 1969 a constitutional amendment was passed to enable Pres. Park to stand for I third term and he was re-elected on April $27,197 x$.

In 1972 a new constitution was inaugurated under which there was no limit to the number of terms which the President could serve. President Park was then elected in December 1972 to ${ }^{1}$ six-year term.

Armed Forces.-The Republic of Korea has $\quad$ u army of about 600,000 , a small navy mostly for coastal protection duties, an air force with 215 combat aircraft and a marine corps. Six to seven per cent. of the nation's G.N.P. is currently spent on defence.

Language and Literature.-Desplte the great cultural influence of the Chinese, Koreans have developed and preserved their own cultural heritage. The Korean language is of the UralAltaic Group. Its script, Hangul, was invented in the 15th century; prior to this Chinese characters alone were used. Also invented around this time was the first metal movable printing type. The first works translated into Hangul were Buddhist, Confucian and other classics and it was only in the late xgth century that the European infiuence first began to be felt.

Education and Religion.-Primary education is compulsory for six years from the age of seven. Secondary and Higher education is extensive. In 1976 there were 72 colleges and universities offering four-year courses. The national illiteracy rate is the lowest in Asia. There is freedom of religion. Buddhism has the most followers ( 12 million) followed by Confucianism and Protestantism with $4 \frac{1}{2}$ million each. Catholics are increasing rapidly and totalled over a million in x976. There are also indigenous religions.

Agriculture and Fisheries.-The soil is fertile but the arable land is limited by the mountainous nature of the country. Staple agricultural products are rice, in which self-sufficiency was reached in 2975. barley and other cereals, beans, coffee, tobacco and hemp. Fruit growing and sericulture are also practised. Ginseng, medicinal root much affected by the Chinese, forms a rich source of revenue. The Korean fishing industry is in the process of being modernised. Agriculture and fisheries took nearly 4 per cent. of the Budget in 1976.

Finance.-The unit of Korean currency is the Won. In 1976 the rate of exchange averaged about 854 Won = £r. The budget for 1977 totals 2,870 billion Won of which $3^{2} 24$ per cent. is for defence.

Trade and Industry.-In prewar days the South was mainly agricultural and most of the limited industries were in the North; since 2966 however rapid industrialisation has taken place in the South. Main exports are now textiles, plywood, and wood products, fish and fish preparations, electrical and electronic equipment, chemicals footwear, rubber, petroleum products, cement, ships, toys, sports goods and iron and steel products. Her
main customers are Japan and the U.S.A. but exports to Europe and the Middle East are becoming significant. Korean construction firms are active in Saudi Arabia, Iran and Kuwait. Imports continue to exceed exports but the situation is rapidly improving. In 1976 exports totalled \$U.S. $7,715,500,000$ and imports amounted to \$U.S. 8,773,600,000. Foreign exchange holdings improved from \$U.S. $1,546,300,000$ in 1975 to \$U.S. $2,960,600,000$ at the end of 1976. By the end of May 1977 they had surpassed \$U.S. 3.520,000,000.

Trade with U.K.
$1975{ }^{1976}$
Imports from U.K.... $£ 52,577,000 £ 63, \times 25,000$ Exports to U.K....... 74,543,000 $\times 35.723,000$

Minerals.-The Republic of Korea is deficient in mineral resources, except for deposits of coal on the East Coast. Small deposits of gold, copper, iron, graphite, tungsten and other minerals are distributed throughout the country but are more abundant in the North. Extensive exploration is under way to locate deposits of other minerals.

Communications and iransport.-The opening of several modern highways since 1970 means that the whole country is now within one day's drive of Seoul. In 1976 there were $3,746 \mathrm{Kms}$ of paved road. Seoul has subway system and there are national railway and airline systems. Korean Air Lines operates regular Hights to Europe, United States, the Middle East and South East Asia. There are major ports at Busan and Inchon and vessels registered in 1976 totalled 3, 127,000 gross tons.

CAPTTAL.-Seoul, population (1976), 8,6840,00. Other main centres are $\Psi$ Pusan (pop. 2,54 1,000 ), Taegu (pop. 1,3 $\mathbf{1 1}, 087$ ) and $\Psi$ Inchon (pop. 799,982), Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Scoul, are the main ports but the development of Inchon is hampered by $n$ tide variation of $28-30$ feet.
Flag.-White, with red over blue device in centre, three black parallel bars, some broken, in each quarter.
National. Day.-August 15 (Independence Day). British Embassy

## KUWAIT

(The State of Kuwait)
Amir, H.H. Shaikh Sabah al Salem al-Sabah, born 1915; acceded Nov. 24, 1965.
Crown Prince and Prime Minister (Dec. 1965), H.H. Shaikh Jabir al-Ahmad Al Sabah; appointed Crown Prince, May 31, 1966.

## Kuwatt Embassy in London 46 Queen's Gate, S.W. 7. [01-589 4533]

Ambassador Extraordinary and plenipotentiary, His Excellency Sheikh Saud Nasir Al-Sabah ( 1975 ). Area and Population.-Kuwait extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 7,500 square miles and a population (Census, 1976) of $1,066,400$. It is officially estimated that about 47 per cent. of this total are Kuwaitis, the remainder being large numbers of other Arab peoples, Persians, Indians and Pakistanis. The total European and American population is about 7,000 . Kuwait has a hot, dry climate with - summer season extending from April to September. During the coldest month (January) the temperatures can fall below freezing, but normally range between $50^{\circ}$ to $60^{\circ} \mathrm{F}$. Shade temperatures are about $85^{\circ} \mathrm{F}$; and can reach $130^{\circ} \mathrm{F}$.; $180^{\circ} \mathrm{F}$. has been recorded in the sun. Humidity rarely exceeds 60 per cent. except in July and August.

Government.-Although Kuwait had been independent for some years, the "e exclusive agreement" of 1899 between the Shaikh of Kuwait and the British Government was formally abrogated by an exchange of letters dated June 19, 1961. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait and, in accordance with the terms of the exchange, the Amir requested British military assistance to help him maintain his sovereignty and independence, which was immediately supplied. British troops were withdrawn in October, 1961 , and replaced by the Arab League Security Force composed of contingents from various Arab States. The withdrawal of this Force was completed in January, ro63. On May 7, 1963, Kuwait was admitted to the United Nations and on Oct. 4, r963, Iraq recognized Kuwait's independence. On May 13,1968 , 11 exchange of Notes was signed giving notice that the 196 x defence agreement with the United Kingdom would end on May 13, 1971.

Elections were held in December, 196r, for a Constituent Assembly, which held its first meeting in January, 1962. A council of Ministers including non-members of the ruling family was formed in January, 1962, to replace the former Supreme and Joint Councils. Under the Constitution drafted by the Constituent Assembly, the first $50-m e m b e r$ National Assembly was elected in January, 1963. The Fourth National Assembly which was elected for four years in January 1975 was dissolved by Amiri Decree on August 29, 1976. The Constitution itself remains in force but an ad hoc committee to be set up for the purpose is to submit recommendations for its revision. In the absence of

## National Assembly, all laws are issued by Amiri

 Decree.Education, etc.-As. $\boldsymbol{m}$ result of the very considerable oil revenues, the Kuwait Government embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. Kuwait University was opened in 1966. In 1975, 583 students graduated out of a total 4,445 . In 1976 there were over zor,907 pupils at 326 government schools.

Public Utilities.-Kuwait has a domestic water supply from water distillation plants which operate on waste natural gas from the oil fields. These plants can produce over $60,000,000$ gallons of fresh water daily. For storage there are two $15,000,000$ gallon reservoirs and one of $3,000,000$ gallons. There are also two $7,500,000$ gallon reservoirs at Shuaiba and two of similar capacity at Abraq Kheitan.

In 196I natural source of fresh water was discovered at Raudhatain in the north of the State. This has been developed to produce $5,000,000$ gallons per day for at least 20 years and a pipeline has been built to carry the water to Kuwait town. Kuwait signed an agreement with Iraq on Feb. 1r, I964, allowing her to draw up to r20,000,000 gallons of sweet water a day from the Shatt-al-Arab, but this has yet to be implemented. Electricity is produced by three power stations in Kuwait ( $\mathbf{r} 60 \mathrm{MWh}$ ) and two at Shuaiba ( 400 MWh ). A new power station at Dolia, west of Kuwait City, will be operational in 8978 . The State is served by a network of dual carriageway roads and more are under construction.

Communications.-Ships of British, Dutch, Kuwaiti and other lines make regular calls at Kuwait. British Airways, Kuwait Airways, K.L.M., Lufthansa and several international and Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wireless communications, telephone and postal services are conducted by the Kuwait Government, which has built an earth satellite station.

Finance.-Banking is carried out by the National Bank of Kuwait, the Commercial Bank, the Gulf Bank, the Al Ahli Bank, the Burgan Bank, and by the Bank of Kuwait and the Middle East. There are also a large number of investment banks in some of which the Government holds equity. The banking system is controlled by the Central Bank of Kuwait.
Revenue for the financial year $1976-77$ was budgeted at $K D z, 171,926,800$. Estimated total expenditure for 1976-77 was $K D x, 192,000,000$ including $K D 59,700,000$ on health, $K D 89,700,000$ on defence, $K D 89,700,000$ on education, and $K D$ $263,000,000$ on construction projects. The financial year begins on July I.

Production and Trade.-Until 1974, the Kuwait Oil Company was wholly owned by the British Petroleum Company and the American Gulf Oil Corporation. The Government of Kuwait then began to participate by stages in the ownership of the Company and an agreement was signed in November 1975 which brought 100 per cent. government ownership.

The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait City. Oil is exported through - specially constructed port at Mina al Ahmadi, which is about five miles from the Company's administrative and residential centre at Ahmadi. Production of crude oil in 1976 was approximately 93 million metric tons. The

Company employs about 3,000 people, including Kuwaitis, British, Americans, Indians, Pakistanis and citizens of other Arab Countries.

Oil is also lifted in the Kuwait/Saudi Arabia Partitioned Zone, south of the State. Concessions for this $=$ are held by the American Independent Oil Company (AMINOIL) from Kuwait and the Getty Oil Company from Saudi Arabia. AMINOIL's production in 1976 (i.e. Kuwait's share) approximately 4 million metric tons.

The Arabian Oil Company of Japan, having been awarded in 1958 the oil concession for the Partitoned Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 2960. The first shipment of crude oil was made in March 2g6x; production in 1976 was approximately 7.6 million metric tons. A concession covering the offshore min of Kuwait proper wn awarded to the Shell Company in November $\mathbf{x 9 6 0}$, and the concession agreement in the name of the Kuwait Shell Petroleum Development Company was signed in Kuwait on January 15, 196x. Exploratory drilling began in 1962 but w. suspended in the autumn of 1963. The establishment of the Kuwait National Petroleum Company was authorised by an Amiri Decree on October 5, 1960. This company took over the distribution of petroleum products in Kuwait from the Kuwait Oil Company on June $\mathbf{x}$, 196x, and was, in partnership with the Spanish Company Hispanoil, awarded the concession to exploit an relinquished by the KOC Ltd in 1962.

In addition to petroleum products, wooden prefabricated office accommodation, skins and wool are also exported. Trade in 1975 amounted to: Imports, KD693,000,000; Exports (including reexports), KDz,663,000,000.

## LAOS

(People's Democratic Republic of Laos)
President, Souphanouvong, assumed office, Dec. 2, 1975.

Prime Minister, Kaysone Phomvihane.

> EMBASSY IN LONDON 5 Palace Green, W. 8

Ambassador Extraordinary and Plenipotentiary. His Excellency Platthana Chounlamany ( 5976 ).

Position and Extent.-The People's Democratic Republic of Laos is in the northerly part of IndoChina, lying between China and Viet-nam, on the north and east, and Burma and Thailand on the west. Laos has a common boundary with Cambodia to the south. The area of the country is approximately 90,000 sq. miles, with $I$ population (estimated , 1976) of about $3,000,000$.
History.-The Kingdom of Lane Xang, the Land of $\quad$ Million Elephants, was founded in the 14th century, but broke up at the beginning of the $35^{\text {th }}$ century into the separate kingdoms of Luang Prabang and Vientiane and the Principality of Champassac, which together came under French protection in $\mathbf{1 8 9 3}$. In 1945 the Japanese executed a coup de force and suppressed the French administration. Under a Constitution of 1947 Laos became a constitutional monarchy under King Sisvang Vong of the House of Luang Prabang, and an independent sovereign state in 1949.

The next twenty-five years in Laos were marked by power struggles and civil war. International conferences were held in Geneva in 1954 and $196 x-2$ to produce I settlement based on neutrality and independence. But the resulting Coalition Governments were short-lived. Personalities involved include the present adviser to the Government, Prince Souvanna Phouma, who in 1957 formed a Government of National Union, including Pathet Lao (Communist) ministers, and held office as Prime Minister with intervals from 1962 to 1975 ; Prince Boun Oum of Champassac who formed a rightist Government in December 1960, fled Laos in 1975 and was consequently condemned to death, and Prince Souphanouvang, who took part in a later coalition with Souvanna Phouma and Boun Oum in 1962-63. Attempts to seize power by Capt. Kong Le ( 1960 ), Gen. Phoumi Nosavan ( 1965 ) and Gen. Thoa Ma (1966 and 1973) were unsuccessful.

Recent Events.-After 1967 North Vietnamese forces steadily increased their military activities in Laos. Although there were regular seasonal fluctuations in the fighting, which resulted in many areas of the country changing hands several times, Government forces gradually lost ground. By February 2x, 1973, when a ceasefire agreement was signed in Vientiane between the Pathel Lao and the Government in Vientiane, Communist forces had occupied or dominated most of the strategic areas of Laos, including the Plain of Jars in the north, and the Bolovens Plateau in the south. The 1973 Vientiane Agreement and its Protocol of September 1973, provided for a cease-fire; a timetable for the withdrawal of foreign forces; a halt to U.S. bombing and the "neutralization "of Vientiane and of the Royal capital, Luang Prabang. The agreement also made provisions for Provisional Government of National Union and for a Political Consultative Council (eventually formed on April 5, 1974) with equal representation from the Pathei Lao (now known as the Lao Patriotic forces) and the Vientiane Government, which would hold office until new elections could be held. After the fall of Saigon in April 1975, internal resistance to the Pathet Lao crumbled; Communist troops occupied the whole country and, though still paying lipservice to the 1973 Agreement and maintaining facade of coalition, the Pathet Lao took over the government and began to implement an authoritarian régime with policies of austerity and economic self-sufficiency. On December 2, 2975 following the abdication of the King, Laos was declared a People's Democratic Republic and the pathet Lao assumed full charge of the country.
Finance.-Budget estimates for the fiscal year r977/78 not available. The unit of currency
h the Kip (K). In July 8977 the official exchange rate $\quad 200 \mathrm{Kip}$ to US8.

CAPirai.-Vientiane population (estimated z977) 120,000.

Flag.-Blue background with central white circle, framed by $=$ horizontal red stripes.

NATIONAI DAX.-December ${ }^{2}$.

## LEBANESE EMBASSY IN LONDON ax Kensington Palace Gardens, W. 8 [OI-329 7265]

Ambassador Extraordinary and Plenipotentiary, His Excellency Nadim Dimechkie (xg66). Counsellor, Chawki Nicholas Choueri. ist Secretary, Nizar Farhat. Hal Secretary, Gllbert Aoun. Atsaché (Tourism), Mounir El-Shelkh. Consular Section, I5 Palace Gardens Mews, W. 8 (or-229 8485).
Area and Population.-Lebanon forms a strip about 280 illi in length vill varying in width from 30 to 35 miles, along the Mediterrancan littoral, and extending from the Isracl frontier on the south to the Nahr al Kebir ( 55 miles north of Tripoli) EII the north; its castern boundary runs down the Aati-Lebanon Nill and then down the Great Central depression, the Beqaa, from which fow the rivers Orontes and Litani. It is divided Into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There $\|$ mixed Arabic-speaking population of Christians, Moslems and Druses. The t jtal area of Lebanon is about $4,300 \mathrm{sq}$. miles, population (U.N. estimate, 1969 ), $2,645,000$. (For Map, see p. 882. )

Government - Lebanon became in independent State on Sept. $x, ~ \geq 920$, administered under French Mandate until Nov. 36, r94. Powers were transferred to the Lebanese Government from Jan. I, z944, and French troops were withdrawn in 3946 .

Suleiman Franjieh was elected President in 1970, for a term of six years. In April r975, serious fighting
broke out in Belrut between members of the predominantly Christian Phalangist Party and Palestivian guerrillas based in Lebanon. On May 35 , the Government of M. Rashid Solh resigned, an the President appointed amilitary government led by Brig. Noureddin Rifai on May 23, Which lasted only three days. After a renewed outbreak of violence on June 24 , the country was on the verge of civil War. On June 30 , new cabinet was foxmed with the sole intention of restoring peace. It I. by Rachid Karame, and contained 1 representative of each of the main religious communildes.

However, the government min powerless to stop the fighting, which continued and increased throughout 1975 and 1yyfi In Aprli 1976 constitutional amendment facilitated the resignation of President Frangié. On May 8, the Lebanese Parliament elected Mr. Elias Sarkis President. In the autumn, the Arab Deterrent Forces composed mainly of Syrian troops, imposed III effective ceasefire yo brought nincteen months of civil war to an end throughout Lebanon, except in the South.

Production.-Fruits ern the moni important products and include citrus fruit, apples, grapes, limawa and olives. There is a minal but growing industry, geared mainly to the production of conimin goods. The most important industries we foods and drinks (confectlonery, jams, sugar, wines and beer, etc.), textiles, chemicals, furniture, plastics, leather, clothing and footwear, refrigerators, cast and forged metal products, and building materials. There is little remaining of the famous cedars of Lebanon.

Railways.-A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with branch of the standard-gauge line which II from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Beirut Tripoli.

Archeeology, etc.-Lebanon some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of first to third century Roman temples and Jubail (Biblos), - of the oldest continuously inhabited towns in the world, and ancient Tyre which is in course of excavation.

Language and Literature.-Arabic is the principal language (see Arabia), and French is also an official language and widely used. The use of English is increasing. About 20 daily papers are published, including 2 in French, I in English and $\quad$ in Armenian; and a further 40 periodicals.

Education.-There are five universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University, the Beirut University College (originally for women) and the Arab University which recent foundations in the early stages of development. There are several institutions for vocational training and there good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

Finance.-Revenue and Expenditure, 1974 (Estimated) $\mathcal{C L x} 385,300,000$. The monetary unit the Lebanese $\mathcal{L}(L)$. (See also p. 84.)

Principal Imports-Gold and precious metals, machinery and electrical equipment, textiles and yarns, vegetable products, iron and steel goods, motor vehicles, mineral products, chemicals and chemical products, pharmaceuticals, prepared foods, beverages, tobacco products, live animals m 10 lm I products.

Principal Exports.-Gold and precious metals, frutts and vegetables, textiles, building materials, furniture, plastic goods, foodstuffs, tobacco and wine.

## Libyan Embassy in London 58 Prince's Gate, S.W. 7 [ox-5895235]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mohamed Younis AIMismari.
Counsellors, Abdulhamid A. Shaikhy. Syad M. Gaddafeddam; Saad S. Abdussayed; Ahmed I. Alfakih (Head of Press Office); Khalifa A. Bazelya (Cultural); Aboshnief A. Elkezza (Commercial); Ali Mabruk Jabua (Financial).
Libya, the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three former provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population ( 1973 Census preliminary results) of 2,257,037. The people of Libya are principally Arab with some Berbers in the West and aboriginal tribes in the Fezzan. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers, and, as rainfall is precarious, a good harvest is infrequent. Agri-

culture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Jaghbub, Gadames, Jofra, Sebha, Murzuch, Brach, Gat, Jalo and the Kufra group in the South-East. Exports from Libya are dominated by crude oil, but some wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins are also exported. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. The major producing companies are Esso, Oasis, Mobil, Um Al Jawabi (formerly Amoseas), A.G.I.P., Occidental, Aquitane and Libyan National Oil Co.

September 1973, the Libyan Government announced that it would be taking a 5 I per cent. share in all foreign-owned companies. A few companies have been completely nationalized. In addition to the Esso main pipeline from Zelten to the terminal at Mersa Bregha and the Oasis Company's pipeline from Dahra to Ras-es-Sider, Mobil operates $\quad 576$-mile pipeline from Amal to Ras Lanuf and the Occidental line from Intisar field to Zuetina. A new gas liquefaction plant $\begin{aligned} & \text { non }\end{aligned}$ by Esso was opened at Mersa Bregha in June 1970. Production of crude oil in 1976 was 700 million barrels.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. An Italian expedition has found in the S.W. of the Fezzan $n$ series of rock-paintings more than 5,000 years old. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area where motor road (of international standards) runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, in the Fezzan, was completed in Oct. 196z. A Czech-built road between Nalut and Ghadames was completed in 1972. The 1976-80 Five Year Development Plan provides for the expenditure of LD 520 million on major road projects, and for a further LD 50 million on agricultural roads. In the meantime roads are poor and the transport inland is confined to caravan and occasional motor bus routes. There are airports at Tripoli and Benghazi (Benina), Tobruk, Mersa Bregha, Sebha, Ghadames and Kufra regularly used by commercial airlines and military airfields at Jamal Abdul Nasser (formerly El Adem near Tobruk) Okba ben Nafi' (formerly Wheelus Field near Tripoli) and at Al Watiyah south of Zuara.

Government.-Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province 11 transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as Libia Italiana. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 2x, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations. The monarchy was overthrown by a revolution on Sept. x, 1969, and the country declared I republic. In $\mathbf{x 9 7 x} \square$ Libyan Arab Soci-
alist Union was created - the country's sole political organisation. In January 1976 the General People's Congress was designated the supreme constitutional authority. The Revolutionary Command Council which had governed Libya since 1969 has been seplaced by the General Secretariat of the General People's Congress and the Council of Ministers has been superseded by the General People's Comunittee. Libya's title has also been changed to the Socialist People's Libyan Arab Jamahirrya.

Local Government.-Until the amendment of the Constitution in 1963, Libya was a Federal State, each of the three Provinces, Tripolitania, Cyrenaica and Fezzan, being administered by Governor assisted by Executive and Legislative Councils. In April 1963, however, comprehensive unity was proclaimed and the Federal system (together with the Governors and the Executive and Legislative Councils) abolished. The country was then divided into ten divisions, each administered by an Inspectorate (Muyaaqiba). Local government is now administered by People's committees, who are answerable to Basic People's Congresses.

Currency.-The Libyan pound was abolished in August, 1971, and a new currency the Libyan dinar of 1,000 dirham was introduced. Dinar $=£ 2 \cdot 00$ sterling (see also p. 83).

Technical assistance is being provided by the United Nations to foster Libya's economic and educational development.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953, but terminated at the Libyans' request in January, 1972.

> EMbassy and Consulate 27 Wilton Crescent, S.W.I
> $\left[\begin{array}{ll}\text { [ox-235 } 696 \pi]\end{array}\right.$

Ambassador Extraordinary and Plenipotentiary, His Excellency André Philippe, G.c.v.o. (1972).
A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the soverelgnty of the King of the Netherlands as Grand Duke by the Congress of Vienna in $18 \times 5$, it formed part of the Germanic Confederation, 1815 -66, and was included in the German "Zollverein ". In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918 . By the Treaty of Versailles, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in
$192 x$ an economic union was made with Belgium (B.L.E.U.). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Graud Duchy man modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is mov a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Communities.

Besides B.L.E.U., Luxemburg is also member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux, 1960). The Court of the European Communities has its seat in Luxemburg, as does the Secretariat of the European Parliament, the European Investment Bank and the European Monetary Co-operation fund.

The area is 1,000 square miles; the population (Jan. 1975) 357,300, nearly all Roman Catholics, There is a Chamber of 59 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with $m$ annual productive capacity over $6,000,000$ tons. Government revenue for 1975 was estimated at L.F. $3^{0}, 510,318,000$, expenditure L.F.30,78r,613,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy, Approximate Exchange Rate, 70 Francs $=$ Cx (June $x, 1976$ ). There are 170 miles of railway.

> Trade with U.K.

1972
 Exports to U.K....... $6,363,000 \quad 7,847,000$ The capital, Luxemburg, pop. (1972), 78,300 , is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; all speak German and many English.
FiAg.-Three horizontal bands, red, white and blue. National Day.-June 23 .

Art and Revolutionary Culture, Gaston Lahy.

Madagascar lies 240 miles off the cast coast of Africa and is the fifth largest island in the world. It has $m$ area of $\mathbf{2 2 8 , 0 0 0}$ sq. miles and $=$ population of about $8,000,000$. It became a French protectorate in 1895, and $■$ French colony in 1896 when the former queen was exiled. Republican status was adopted on October 14, 1958. Independence was proclaimed on June 26,1960 , when agreements confirming Madagascar's membership of the French community and co-operation with France on defence, monetary, judicial, educational and other matters were signed.

Following demonstrations in Tananarive on May 13, 1973, the Parti Social Democrate (PSD) Government which had been in power since independence under Monsieur Tsiranana (President 1959-1972) was replaced by military government under General Ramanantsoa who resigned in January r975, His successor, Col. Ratsimandrava, was assassinated on February 13 after only 6 days in office. A mutiny liv a police camp in the capital was put down with about 20 casualties. A Directoire Militaire under General Andriamahazo then took over and martial law was declared. The Directoire was replaced by a Supreme Council of the Revolution of members of the armed forces under Capitaine de Frégate Didier Ratsiraka on June In, $_{5}$ 1975. Twelve civilian ministers whose activities are coordinated and directed by the Supreme Council were also appointed. The first act of the new Government was to nationalise insurance and banking.

Both houses of the Malagasy Parliament, and the activities of political parties were suspended.
In December 1975 a new constitution was approved in a referendum, and Lt. Cdr. Ratsiraka was appointed President.
Revised agreements with France were signed on June 4, 1973, providing for the withdrawal of the French forces stationed in the country since independence. The French naval base at Diégo Suarez has been turned into I civilian ship repair yard and French influence has been greatly reduced. Madagascar has also withdrawn from the Franc Zone and has announced a claim to the Islands of Juan de Nova, Glorieuses, Isle de l'Europe, Bassa da India and Tromelin which had remained integral parts of the French Republic after independence.
The people are of mixed Polynesian, Arab and Negro origin. The languages spoken are Malagasy and French. There are sizeable French, Chinese and Indian communities.
The island's economy is still almost wholly based on agriculture, which accounts for three-quarters of its exports. Development plans have placed emphasis on increasing agricultural and livestock production, the improvement of communications and the creation of small industries.
Total exports in 1973 amounted to FMG $44^{\circ 7}$ million. The principal exports in order of value were coffee ( 25 per cent. of total), cloves (xo per cent.), vanilla, rice, meat and meat products, sugar and butter beans. Minerals exported include chrome ore, graphite and mica.
Total imports in 1973 amounted to FMG $45^{\prime \prime}$ million compared with FMG 51 million in 1972. The main imports are manufactures, petroleum, fertilizers, cement and rice.

## THE MALDIVES

President, His Excellency Amir Ibrahim Nasir. Area, etc.- The Maldives are a chain of coral atolls, some 400 miles to the south-west of Sri Lanka, stretching from just south of the equator for about 600 miles to the north. There are 12 clearly defined atolls, separated from each other by deep channels through which the currents run strongly. No point in the entire chain of islands is more than 8 feet above sea-level. The total number of islands is over 2,000 , some being very small; about 220 of them are inhabited. The population of the islands (estimated, 1975) is 123,000 . The people are Mosiems and the Maldivian language is akin to Elu or old Sinhalese. They are highly civilized and are great navigators and traders.

Government.-The Maldives form I Republic which is elective. There is $\quad$ Parliament (the Citizens' Majlis) with representatives elected from all the atolls. The life of the Majlis is 5 years. The Government consists of a Cabinet, which is responsible to the Majlis. By the agreement signed with the British Government in 1965, the Maldives form a composite sovereign and fully independent state, free to conduct their own external relations with other countries.

On March 6, 1975, the Prime Minister, Ahmed Zaki, was arrested and exiled, and presidential rule was imposed.

Until March 29, 1976 the R.A.F. maintained a staging post on Gan Island, in Addu Atoll, the most southerly atoll, lying just south of the equator.

Production, etc.-The vegetation of the islands is coconut palms with some scrub. Hardly any cultivation of crops is possible and nearly all food to supplement the basic fish diet has to be imported. The principal industry is fishing and considerable quantities of fish are exported to Japan. Dried. fish is exported to Sri Lanka, where it is I delicacy. The tourist industry is expanding very rapidly. The Maldician Fishing Line has -fleet of some 60 merchant ships.

Caprtal.-Malé (population, estimated 1970 , $x_{3}, 6 \mathrm{zo}$ ). There is mimir strip on Hulule Island about $x$ mile from Malé.

Flag.-Green field bearing a white crescent. with wide red border.

## British Representation

Ambassador Extraordinary and Plenipotentiary, His Excellency David Pascoe Aiers, C.M.G. (r976). (concurrently British High Commissioner to Sri Lanka).

## MALI

(Republic of Mali)
Chief of State, Presidemt of the Government, Col. Moussa Traore, born 1937, assumed office Nov. 20, 1968.

The Republic of Mali, an inland state in northwest Africa has an area of 465,000 square miles and a population ( 1976 census) of $6,308,000$.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 23 by the secession of Senegal. The title of the Republic of Mali was adopted on Sept. 22, 5960 . The Republic is no longer $\quad$ member of the French Community. On July 1 , 1962, a Mall franc equal in value to the Franc CFA was introduced and a new State bank set up. The Franc Malien now has $n$ fixed rate of exchange of $2 F M=$ I CFA Franc.
The régime of Modibo Keita was overthrown on Nov. 19. 1968, and the President arrested by group of Army officers, who formed a National Liberation Committee and appointed $\mid$ Prime Minister. Lieut. Traore assumed the functions of Head of State. A new civil constitution to come into being in 1979 was approved in a national referendum on June 2x, 1974.

Mali's principal exports are groundnuts (raw and processed), cotton fibres, meat and dried fish. The principal rivers are the Niger and the Senegal. Goods to the value of $£ \mathrm{x}, 453,000$ were 1 mported from the United Kingdom in 1976 ( 1975 . $\mathcal{L}, 697,000$ ) Exports to U.K. 1976 © $\mathcal{E}, 797,000$ ( $1975 \mathcal{L} 576,000$ ). CAPITAL.-Bamako (404,000). Other towns are Gao, Kayes, Mopti, Sikasso and Segou (all regional capitals), and Timbuktu.
Flag.-Vertical stripes of green (by staff), yellow and red. NATIONAL DAY.-September 22.

British Embassy
Ambassador Extraordinary and Plenipotentiary, His Excellency John Ernest Powell-Jones, C.M.G. (resident at Dakar).

## MAURITANIA

(Islamic Republic of Mauritania)
President and Prime Minister, Moktar Ould Daddah, assumed office Nov. 28, 1958; re-elected for 5 years, 1966, $197^{1}$ and 1976.
Mauritania lies on the north-west coast of Africa immediately to the north of Senegal. It is bounded on the south and on the east by the Republic of Mali. To the north it is bounded by the territory formerly known as Spanish Sahara. (Mauritania and Morocco took possession of that territory in February 1976 when Spain formally relinquished
all right to it and in April 1976 agreed on a new frontier dividing the territory between them). Area 4 r9,000 sq. miles. The population was estimated at $\mathrm{x}, 48 \mathrm{r}, 000$ in 1977. (For MAP, see p. 869). The Republic of Mauritania elected on November 28,1958 , to remain within the French Community as an autonomous republic. It became fully independent on Nov. 28 , 1960. In 1972 Mauritania broke with the franc zone and established its own unit of currency, the Ougiva, equal in value to 5 francs CFA. Mauritania's main source of potential wealth lies in rich deposits of iron ore around Zouérate, in the north of the country. Exports began in 1963, via a railway laid for the purpose from the mine to the port of Nouadhibou. The deposits are being exploited under the aegis of the Société Nationale Industrielle Miniere following the nationalisation on November 28, 1974 of the internationally based company MIFERMA. There are copper deposits at Akjoujt which are being exploited by SOMIMA, a company which had international base but was nationalised on Feb. 25, 1975.

## MEXICO

(Estados Unidos Mexicanos)
President ( $1976-82$ ), Lic. José López Portillo, born 19x6, elected July 4, 1976; to assume office, Dec. $x$, 1976.

## Cabinet

Minister of the Interior, Jesús Reyes Heroles.
Foreign Affairs, Santiago Roel García.
National Defence, Félix Galvan López.
Navy, Ricardo Cházaro Lara (Admiral).
Finance, Julio Rodolfo Moctezuma Cid.
National Property, José Andrés Oteyza.
Industry and Commerce, Fernando Solana.
Agriculture and Livestock, Francisco Merino Rábago.
Communications and Transport, Emilio Mujica Montoya.
Public Works, Pedro Ramírez Vázquez.
Public Education, Porfirio Muñoz Ledo.
Labour and Social Affairs, Pedro Ojeda Paullada.
Secretariat of the Presidency, Carlos Tello Macías.
Agrarian Reform, Jorge Rojo Lugo.
Health and Public Welfare, Emilio Martínez Manautou.
Tourism, Guillermo Rossell de la Lama.
Hydraulic Resources, Jesus Robles Linares.
Attorney General of the Republic, Oscar Flores Sánchez.
Regent of the Federal District, Carlos Hank González. Attorney General of the Federal District, Agustin Alanís Fuentes.
Director of the Federal Electricity Commission, Hugo Cervantes del Río.

## Mexican Embassy in London

8 Halkin St. S.W. 3 [ox-235 6393]
Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Manuel Tello, C.M.G.
Minister-Counsellors, Sr. Héctor Cárdenas; Sr. Mario Tapia Ponce (Consular), Sr. Horacio Flores-Sánchez (Culiural).

Naval Attaché, Rear Adm. Salvador Gómez Bernard.
Counsellors, Sra. Francisca Celis-Campos, M.V.O. (Information); Sr. Lic. Oliver Farés (Commercial); Sr. Walter Astié Burgos; Sr. Lic. José Gurria Trevino (Coffee); Sr. Santiago de León Treviño (Financial) Sr. Manuel de Araoz, C.V.O.
Area and Population.-Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from $14^{\circ} 33^{\prime}$ to $32^{\circ}$ $43^{\prime}$ N. lat. and $86^{\circ} 46^{\prime}$ to $1 y^{\circ} 08^{\prime}$ W. long., and comprising one of the most varied zones in the world. It contains 3 I states and the federal district of Mexico, making in all 32 political divisions, covering an area of 762,604 square miles. At the Mexican General Census taken on Jan. 28, 1970, the total population was $48,3 \times 3,000$, but a present day estimate is $6 x, 000,000$.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the Sierra Madre, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. The lowlying lands of the coasts form the Tierra Caliente, or tropical regions (below 3,000 ft .), the higher levels form the Tierra Templada, or temperate region (from 3,000 to $6,000 \mathrm{ft}$.), and the summit of the plateau with its peaks is known as Tierra Fria, or cold region (above $6,000 \mathrm{ft}$.). The only considerable rivers are the Rio Grande del Norte which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the Rio Grande de Santiago, the Rio Balsas and Rio Papaloapan. The remaining streams He governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas". The largest fresh-water lakes are Chapala ( 70 miles long and 20 miles wide), and Patzcuaro. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

History and Archroology.-The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from A.D. 500 to 1100 and A.D. 1300 to 1500 and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archæological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in Yucatán and Chiapas (Maya); Teotihuacon, renowned for the Pyramid of the Sun ( 256 feet high) in the Valley of Mexico (Teotihuacano); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajin in the State of Veracruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 18ro a revolt began against Spanish rule. This was finally successful in 3821 , when a precarious independence was proclaimed. Friction with the United States in Texas led to the war of 1845-48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 862 Mexican insolvency led to invasion by French forces which installed Archduke Maximilian of Austria as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juarez's death was followed by the dictatorship of Porfirio Diaz, which saw an enormous increase of forelgn, particularly British and United States, investment in the country. In rgio began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.-Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of Senate of 64 members, elected for six years, and of a Chamber of Deputies, at present numbering 213 , elected for three years. Presidents, who wield full executive powers, are elected for six years; they cannot be re-elected.

There are four political parties registered in Mexico, of which by far the largest and most influential is the Parti do Revolucionario Institucional (P.R.I.) which has for many years constituted the governing party.

Communications.-Veracruz, Tampico and Coatzacoalcos are the chief ports on the Atlantic, and Guaymas, Mazatlán, Puerto Lázaro Cárdenas, Acapulco, Salina Cruz and Puerto Madero on the Pacific. The total tonnage of registered merchant marine in May, 1976, was $x, 053,679$ tons. There were 25,864 kilometres of railway track open in Mexico in 1974. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system; help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. The railways were completely nationalised in 1970 .

The total length of road at the end of 1974 was $\mathbf{3 7 5 , 5 4 0}$ kilometres, of which 53,140 were paved,

68,900 dressed and 53,500 gravelled. Mexico City may be reached by at least three excellent highways (with 14 entry points) from the United States, and work is complete on roads southward from Mexico City to Yucatán as well as on two principal highways to the Guatemalan border (with three entry points).

At the end of February 1976, the national telegraph system had a network of 58,215 kilometres. The total length of lines within the network was 220,422 kilometres. International telegraph services to the United States frontier are provided by the government-owned Mexican Telegraph Company and then through the United States to Canada and Europe.

Teléfonos de México, a state-controlled company, controls about 98 per cent. of all telephone services; there were slightly more than 3.5 million telephones in service in mid-r975 and installations are expanding at an annual rate of 15 per cent. In 1976 there were $9,708,000$ kilometres of long distance lines. Satélite Latinoamericano, S.A. (SATELAT) is $\quad$ joint government/private sector venture disseminating television programmes to Latin America through Intelstat IV satellite facilities leased by the Mexican Government.
There is a good national and international network of air services. There are $\mathrm{x}, \mathrm{II} 3$ airports and landing fields in Mexico, of which eighteen are equipped to handle long-distance flights. There are 166 airline companies, including two of the major national airlines-Mexicana de Aviación and Aeroméxico. Passenger traffic is growing by about 18 per cent. yearly, while cargo increases by some 14 per cent. a year.
Production.-The total area of arable land is estimated at $24,000,000$ hectares, of which an estimated $34,000,000$ hectares is under cultivation. The principal agricultural crops are maize, beans, rice, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, chick-peas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus, yields several fermented drinks, mezcal and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

The volume of the fishing industry has grown from 187,922 tons in 1965 to 451,330 tons in 1975 for human consumption and 26,446 tons in 1965 to 157,795 tons in 1975 for industrial use.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries. The mining industry has shown a growth of 20 per cent. in two years. The stecl industry has expanded rapidly and produced $5,077,000$ tons of steel in 1975. The mineral wealth is great, and principal minerals are gold, silver, copper, lead, zinc, quicksilver, iron and sulphur. Substantial reserves of uranium have been found. Production in 1974 amounted to: gold, 4,182 kilograms; silver, 1,200 tons; lead, $2 \pm 8,02 \mathrm{I}$ metric tons. In the non-metals sector, Mexico continues to produce 25 per cent. of the world's supply of fluorspar with a yearly output of $\mathrm{x} \cdot \mathrm{I}$ million metric tons. Sulphur production rose $70 \cdot 3$ per cent. in $x 973$ and jumped ${ }^{-1}$ additional 44.3 per cent. in 1974 to metric tons.
The total proven petroleum reserves were 5,775 million barrels in 1975 . Crude oil production in 1975 was $39,403,000$ cubic metres and current daily production is 895,000 barrels. Daily pro-
duction of natural gas is $\mathbf{2 2 3 . 5 7 7}$ cubic metres. Oil reserves were increased substantially due to very important new discoveries in Tabasco and Chiapas states. A new refinery at Tula, State of Hidalgo, is the nation's largest; and new refineries in Monterrey, State of Nuevo Leon, and Salina Cruz, State of Oaxaca, are under construction.

Paper production is growing about 9 per cent. per year and reached I. 2 million metric tons in $\mathbf{x 9 7 4 ,}$ but imports are still necessary to meet domestic demand.

Textile production is led by the artificial fibres sector, which is growing by about o per cent. each year, and produced 260,000 tons in 1974. The natural fibre textile industry has not registered dynamic growth in the past two years and continues to lose its share of the market to the synthetics, but is being re-structured to make it mmm efficient and competitive.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 3,048 thousand kilowatts in 1960 to 9,629 thousand kilowatts in 1974. It is estimated that electric energy production increases by about in per cent. yearly and generating capacity will be at least $13^{\circ} 3$ million killowatts by the end of 1976 and 15.7 million kilowatts in 1978 .

Defence.-Supreme command is vested in the President, exercised through the Ministries of Defence (for Army and Air Force) and Marine.

Army. - The country is divided into 35 zones in which both the regular army and volunteer corps are trained. The Army, in 1976, had i mechanized I infantry and I parachute brigade, 5 z garrison battalions and 23 cavalry regiments. Peace-time strength is 65,000 . Military education is provided for officers, at the National Military School, the Application Centre for Army Officers and the Staff College, as well as in other specialized schools. To combat illiteracy in the Army, schools have been established in every regular and volunteer group.

Navy.-The Navy consists of - (former U.S.) destroyers, frigates (including 6 former U.S, destroyer escort transports), 19 fleet minesweepers, 17 escort minesweepers, $2 x$ new fishery protection cutters of 130 tons built in Britain in $1974-76$ and ro built in Mexico, so patrol boats, 1 survey ships, I transport, I landing ships ( 2 used for rescue and I repair), oilers and 5 tugs. There are 4 naval districts on the Atlantic and 4 on the Pacific coast. Naval personnel in 1976 totalled 18,000 officers and men including naval air force, coastguard and marines. There were 7 companies of marines active duty, with I regiment (3 companies) in reserve, formed by military service conscripts.

Air Force.-The Air Force has a strength of about 6,000 officers and men, and 200 aircraft. These include 15 T-33A dual purpose jet-trainer/ fighter-bombers, $\mathrm{C}, 118 \mathrm{~A}, \mathrm{C}-54, \mathrm{C}-47$, Israelibuilt Arava and LASA-60 transports, 30 T-28A and 45 T-6 armed piston-engined trainers and 3 Puma, xo Bell 205 Iroquois, 5 Jet-Ranger II and other light helicopters, One HS 135 , a IetStar and 3 Islanders are employed on general and VIP transport duties. Primary trainers comprise 20 Beech Musketeers and 20 Bonanzas.

Language and Literature.-Spanish is the official language of Mexico and is spoken by about 95 per cent. of the population. In addition to Spanish, there are five basic groups of Indian languages spoken in Mexico. The 1970 Census showed that of the $3.1 \times 1,415$ inhabitants speaking an Indian language, $35 \cdot 7$ per cent. spoke Nahuatl; $14 \cdot 6$ per cent. Maya; $9^{\circ}$ I per cent Zapotec; $7^{\prime \prime}$ per cent.

Otomi; $7 \cdot 5$ per cent. Mixtec and 36 per cent. one or other of the 59 dialects derived from these basic languages. The National Library in the capital contained $1,034,000$ volumes in 1976 and has a yearly increment of 30,000 volumes. The Press of Mexico is in a fourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.-Education is divided into primary, secondary, preparatory and university. Primary education free, secular and nominally compulsory. Total school population at all levels rose to $16,000,000$ in $1975-76$, from $11,500,000$ in 1970-7x. There were 53,489 kindergarten and primary schools in $1974-75$ and $x 2,700,000$ pupils at these levels at the end of 1975; 5,900 secondary schools with an estimated 2,024,042 pupils in 1976 . Preparatory, vocational and technical schools in 1974-75 numbered $x, 326$ with 590,089 students, while there were 299 teacher training colleges with 89,865 students and 507 professional schools, including universities, with 452,000 students.

The National Autonomous University of Mexico (1551) had 238,300 students in 1975. In 1975, illiteracy had fallen to 10.5 per cent. of the population above 6 years of age from 21 per cent. in 1965. Between 1971 and 1976, the number of schools increased by 137 per cent.and the number of pupils by $3^{8}$ per cent.

The prevailing religion is Roman Catholic.
Finance. (Pesos).
As from September 1976, the Mexican Peso has been on floating basis and has fluctuated between $33 \cdot 50$ and $25^{\circ} 00$ pesos $=1$ 8U.S. (see also p. 84).
Total Imports. ............ Pesos 82,25x,950,0
Total Exports. .......... Pess 82,251,950,000
Trade with U.K.
$1974 \quad 1975$
 Exports to U.K...... $10,889,000 \quad 33,400,000$

Imports consist largely of machinery and implements for industry, mining and agriculture, and raw materials for industry. Principal exports are cotton, coffee, sisal (henequen), sugar, tomatoes and shrimps, lead, silver, zinc and other metals, tobacco, sulphur and heavy fuel oil.

Capital.-Mexico City, est. pop. 1976-77 8,941,912; metropolitan area $12,57^{8,420}$. Other cities (est. pop. 1976-77) are: Guadalajara ( $\mathbf{x}, 725,107$ ): Monterrey ( $\mathbf{x}, 350,000$ ); Ciudad Juárez ( $570,40 \mathrm{x}$ ); León ( 557.030 ); Puebla ( 526,197 ); Mexicali $(360,556)$; Chihuahua ( 386,645 ); San Luis Potosi ( 303,571 ); and Mérida ( 250,306 ).

Flag.- Three vertical bands in green, white, red, with the Mexican emblem (an eagle on 1 cactus devouring a snake) in the centre.
National Day.- September 16 (Proclamation of Independence).

## British Embassy

(Calle Río Lerma 7x, Colonia Cuauhtémoc, Mexico 5, D.F.)

Mongolian Embassy<br>7 Kensington Court, W. 8 [01-937 0150]

Ambassador Extraordinary and Plenipotentiary, III Excellency Denzengiin Tserendondov (1973). Area Population.-The Mongolian People's Republic (Mongolia) is a large and sparsely populated country to the north of China. Its [ri is over 600,000 square miles. Its population, 1977 about $x, 500,0000$. However, this total constitutes only part of the Mongolians of Asia, number of whom ary to be found in China and in the neighbouring regions of the Soviet Union (especially the Mongolian Buryat Autonomous Reglon). This country, which is almost nowhere below 1,000 metres above level, forms part of the Central Asiatic Plateau and rises towards the west in the high mountains of the Mongolian Altai and Khanggai Ranges. The Khentai Mountain Range, situated to the north-east of the capital Ulan Bator, is less high. The Gobi region covers the southern half of the country. It contains some sand deserts, but between these less hospitable areas there is steppe land which provides pasture for great numbers of cattle, sheep, goats, camels and horses (the latter II still the characteristic means of transport for the population). There are several long rivers and many lakes, but good water is scarce since much of the water is salty. The climate is hard, with a short mild summer giving way to $n$ long winter when tempreatures can drop as low w minus $50^{\circ}$ Centigrade.

History.-Mongolia, under Genghis Khas the conqueror of China and much of Asia, 11 for many years a buffer state between Tsarist Russia and China, although it was under general Chinese suzerainty. The outbreak of the Chinese Revolution in rgis rill the signal for a declaration of independence which was confirmed by the SinoRussian Treaty of Kiakhta (1915), but cancelled by a unilateral Chinese declaration in 1919. Later the country became a battleground of the Russian Civil War, and Soviet and Mongolian troops occupied Ulan Bator wis 1921: this was followed by another declaration of independence. However, in 1924 the Soviet Union in $I$ Treaty with China again recognized the latter's sovereignty over Mongolia; but this was never properly exercised because of China's pre-occupation with internal affairs, and later by the anti-Japanese war. The Mongolian People's Republic was formally established in 1924. Under the Yalta Agreement, Chiang Kai-shek agreed to a plebiscite, held in 1945, in which the Mongolians declared their desire for independence; this was granted. The country entered the United Nations in 1g6r. The heroes of Mongolian history during the earlier part of the century were Sukhebator, who died in 1923, and the Communist Choibalsang (died 1952), who Wlll much to turn the country into the Communist ilate it is today, and
carried out a systematic destruction of the power of the Lamas and the old princely houses which had previously been the dominant force in both the economy and the government.
Production, etc. - The total of Mongolia's livestock was planned to reach 24.6 million in 1977 . Traditionally the Mongolian is = herdsman, tending his flock of sheep, goats and horses, cows and camels and leading $■$ totally nomadic life. With the coming of the Communist régime (under the Mongolian People's Revolutionary Party) and especially since x952, great efforts have been made to settle the population, but a large proportion still live nomadiccally or semi-nomadically in the traditional ger (circular tent). The pastoral population was collectivized at the end of the rgsos into huge negdels (co-operatives) and State farms which have hastened the process of settlement, but within these the herdsmen and their families still move with their gers from pasture to pasture as the seasons change. The country, and two city districts (Ulan Bator and Darkhan), is today divided into 18 aimaks (provinces) and beneath these into 259 somons (countries), and these form the basis of the State organization of the country, parallel with which runs the apparatus of the Revolutionary Party.
Membership of the Communist bloc has brought Mongolia considerable quantities of aid from other Socialist countries, especially the Soviet Union and China, both of which supplied many thousands of workers to help with various construction projects. Mongolia's support of the Soviet Union in the Sino-Soviet dispute resulted in the cessation of Chinese aid and a halt in the supply of Chinese workers. Mongolia is now relying on eastern European, especially Czech, Polish and East German aid to supplement the massive assistance from the Soviet Union. Soviet and Bloc aid is hastening the process of industrialization; for although the economy remains based on the herds of animals, and the principal exports of the country are still animal by-products (especially wool, hides and furs) and cattle, factories serving the needs of the country have been started up and the coal and electricity industries are being developed to provide an industrial base. A joint Mongolian/Soviet enterprise for copper and molybdenum mining has been started in northern Mongolia. A major geological survey is being carried out by the CMEA countries, in order to prepare for the extraction of the considerable mineral deposits known to exist in Mongolia. A copper and molybdenum mining complex is at Erdenet. Coal production is expected to rise to $4 \cdot 5-4 \cdot 9$ million tons by 1980 .
Ulan Bator, which contains - quarter of the country's population, is the main seat of industry. Under the third 5 -year plan, a new industrial centre was founded at Darkhan, north of the capital near the Soviet frontier. It is now Mongolia's second town and is still being developed under the current, sixth, Five Year Plan. Its industries include lime, cement and building materials, a flour mill and a power station. Choibalsan, in the east, is also being developed industrially. Agriculture, formerly little practised, is now being extended. By the end of the sixth 5 -year plan ( $1976-80$ ), total cereal production is expected to be 500,000 to 530,000 tons. Communication is still difficult in the country as there are virtually meroads. The trans-Mongolian railway, following the line of the old north-south trade route, was opened in 1955 and links Mongolia with both China and Russia. Mongolia's fundamental difficulty is its very small population and labour force.

Foreign trade is dominated by the Soviet Union, Firit the eastern European countries taking most of
what is left. Trade with western countries is developing slowly.

Caprtal.-Ulan Bator. (Pop. 400,000.)
Flag.-Vertical tri-colour red, blue, red and in the hoist the traditional Soyombo symbol in gold. National DAY.-July is (Anniversary of the Mongolian People's Republic).

## Royal Moroccan Embassy and Consulate 49 Queen's Gate Gardens, S.W. 7 <br> [ $\mathrm{OI}-58_{4} 8^{827}$ ]

Ambassador Extraordinary and Plenipotentiary, His Excellency M. Badreddine Senoussi.
Military, Naval and Air Attaché, Col. Ahmed Benomar Sbay.
Area and Population.-Morocco is situated in the north-western corner of the African continent

between latitude $27^{\circ} 40^{\prime}-36^{\circ} \mathrm{N}$. and longitude $\mathrm{x}^{\circ}-13^{\circ}$ W. with an area estimated at approximately I80,000 sq. miles, and a population (2975) of $\times 5,379,259$. It is traversed in the north by the Riff Mountains and in general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Tangier which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the Pillars of Hercules, the western gateway of the Mediterranean.

Climate. -The climate of Morocco is generally good and healthy, especially on the Atlantic coast, (where I high degree of humidity is, however, prevalent) the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are $8 \mathrm{I}^{\circ}$ F. and $45^{\circ} \mathrm{F}$.; for Marrakesh roi ${ }^{\circ}$ F. and $40^{\circ} \mathrm{F}$. respectively.

Government.-Morocco became an independent sovereign state in $\mathbf{~ 9 5 6}$, following joint declarations made with France on March 2, 1956, and with Spain on April 7, 1956. The Sultan of Morocco, Sidi Mohammad ben Youssef, adopted the title of King Mobammad V.

A constitution, adopted by referendum on December 7,1962 , was in force from December 34, 1962, until June 7, 1965 .

Following serious disturbances in Casablanca in March, 1965 , attempts were made by King Hassan, in consultation with all political parties, to form government of national union. These efforts were unsuccessful and on June 7, $\mathbf{x} 9$, the King proclaimed "state of exception" and suspended Parliament. Assuming himself the office of Prime Minister, he announced the formation of a new government and indicated that constitutional changes were to follow. A revised Constitution was approved by a national referendum on July 24 , x970 and brought into effect soon after. It was superseded by another constitution, also approved by I national referendum, on March 1, 1972. This provides that not only political parties,
but trade unions, chambers of commerce and professional bodies will participate in the organization of the State and representation of the people; specifies that the King is the supreme representative of the people; makes changes in the composition of the Regency Council and the Sovereign's rights and establishes $\quad$ unicameral legislature. The new Chamber is to have 264 members, 176 elected by direct universal suffrage and 88 members elected by electoral colleges representing local government, industry, agriculture and working class groups. Parliamentary elections took place in June 1977.

Defence. -The Moroccan army, formed in 1956, is about 50,000 strong. A Moroccan air force was formed in 1959 and in navy in 1960. The armed forces possess quantities of French, Soviet and American equipment, including aircraft.

Production and Trade.-Morocco's main sources of wealth are agricultural and mineral. The current Five Year Plan (1973-77) for economic development places particular emphasis on social improvement. Other priority sectors are industrial development, agriculture and tourism.

Agriculture employs more than 70 per cent. of the working population and accounts for about 40 per cent. of Morocco's exports. The main agricultural products are cereals, citrus fruits, olives, grapes, tomatoes and vegetables. Dates and figs are also grown and exported. Cork and wood-pulp are the most important commercial forest products. Esparto grass is also produced. There is a fishing industry and substantial quantities of canned fish, mainly sardines, exported. Livestock in 1972 included about $11,900,000$ sheep, $4,600,000$ goats, $2,785,000$ horned cattle and smalier numbers of donkeys, camels, horses and pigs.

Morocco's mineral exports are phosphates, anthracite, manganese, iron ore, lead and zinc, while the following are also produced: petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates totalled $17,800,000$ tons in $1975^{\circ}$. There are oil refineries at Mohammedia and Sidi Kacem, and oil sold in Morocco in 1975 amounted to $2,270,117 \mathrm{cu}$. metres. Production of crude oil in 1974 amounted to 25,159 tons.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.
The trade of Morocco, which is chiefly with France, the U.S.A., W. Germany, Italy, the United Kingdom and Spain, was valued in 1974 at Imports, DH 4.683,587,000; Exports, DH $3.745 .948,000$ (both involving very small variations on 2973).

Trade with U.K.
$1974 \quad 1975$
Imports from U.K.... $£ 28,127,000 \propto 351500,000$ Exports to U.K....... $52,506,000 \quad 5 \mathrm{x}, 900,000$ There is a British Chamber of Commerce at Casablanca (c/o B.B.M.E., 80 Avenue Lalla Yacout).

Finance and Currency.- The unit of currency is the dirham. Exchange rate (see p. 84).
The 1976 Ordinary Budget amounted to DH 8,233,000,000 (1975: DH 8,849,000,000).

Communications.-The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs castwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due south from Oujda skirts the MoroccoAlgeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger
project. Moroccan railroads cover $\mathbf{x}, 250$ miles and traction is electric or diesel. An extensive network of well-surfaced roads covers all the main towns in the kingdom.

Tangier is distant from London about $x, 200$ miles ㅌ Imatter of hours by air, 4 days by sea. Royal-Air-Maroc and British Caledonian Airways operate services between Casablanca and London. There are air services between Tangier, Agadir, Marrakesh (seasonal) and London, and also between Tangier and Gibraltar connecting with London. Royal Air Inter operates internal services. There are also regular services by many airlines with many parts of the world.

Language.-Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The foreign population is estimated at $\mathbf{x 1 2 , 0 0 0}$ (1971). The national dally press consists of 3 Arabic and 4 French newspapers.

Education.-There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a recular university at Rabat. Schoois for special denominations, Jewish and Catholic, are permitted and may receive government grants.

Capital.- $\Psi$ Rabat (population 565,000 ). The other chief towns are: $\Psi$ Casablanca $(x, 638,000)$; Marrakesh ( 407,000 ); Fez ( 399,000 ); Meknes ( 376,000 ); Oujda ( 323,000 ); Tetuan $(285,000)$. $\Psi$ Tangier ( $\mathbf{I 8 7} 7894$ ), $\Psi$ Kenitra ( 339,105 ). The towns of Fe , Marrakesh and Meknes were capitals at various times in Morocco's history.
FLAG.-Red, with green pentagram (the Seal of Solomon). National Day.-March I (Anniversary of the Throne).

## British Embassy Rabat

Ambassador Extraordinary and Plenipotentiary, His Excellency John Spenser Ritchie Duncan, C.m.G., M.B.E. (1975).
ist Secretary, P. K. Williams (Head of Chancery and Consul).
Defence Attaché, Lt.-Col. J. R. Nias.

## British Consular Offices

There are British Consular Offices at Tangier and Casablanca.

British Council Representative, Dr. R. T. Taylor, P.O. Box 427 , Avenue Moulay Youssef, Rabat.

## MOZAMBIQUE (Moçambique)

President, Samora Moises Machel.
Area and Population.-The People's Republic of Mozambique lies on the east coast of Africa, and is bounded by South Africa in the south and west, Rhodesia in the west, Zambia and Malawi in the north-west and Tanzania in the north. It has an area of 297,657 square miles, with a population approaching 10,000,000 (1976).

Government.-Mozambique, discovered by Vasco da Gama in 1498 , and colonized by Portugal in 1505, achieved complete independence from Portugal on June 25, 1975. The date had been agreed in September 1974 by Portugal and Frelimo. (Frente da Libertacão de Mocambique) the Marxist liberation movement. A transitional government, containing Portuguese and Frelimo elements, had been sworn in on Sept. 20, 1974.

A constitution w published on June 25, 1975, which stated, inter alia, that Wia President of Frelimo
would be President of the People's Republic of Mozambique, and head of state. The legislative body would be the People's Assembly, consisting of $2 x 0$ members.
It was announced that the basis of the economy would be collectivised agriculture. Main exports are sugar, cashew nuts, copra, cotton, tea and sisal.

Capital. $\Psi$ Maputo (pop. 44r,363). Other main ports are Beira and Nacala.

Flag.-Red, green, black and yellow diagonals, divided by white stripes; motif in top left-hand corner of rifle crossed with Inoe, on abook inside $I$ cog-wheel.

ist Secretary, Muhan Bahadur Panday.
Military Attaché, Lt.-Col. Digamber Shamsher Jung Bahadur Rana.
Attaché, Khadga Bahadur Khadka.
Nepal lies between India and Tibet an the slopes of the Himalayas, and includes Mt. Everest ( 29,028 ft .). If has I total area of 54,362 sq. miles and population estimated at about $53,000,000$. Amid the mountains lie many fertile valleys. The lower hills and Terai Plains in covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. (For MAP, see p. 744.) Kathmandu, the capital, is connected with India by road, the mountain section of which was built by India under the Colombo Plan, and to Tibet by road from Kathmandu to Kodari on the border, which was built by the Chinese and opened on May 26 , 1967. The Indian-aided Sunauli Pokhara road (r28 miles) was inaugurated in April, 1972, and a road between Pokhara and Kathmandu, constructed by the Chinese, was opened in 1973 . The EastWest Highway (Mahendra Raj Marg) to run the length of the country, is wol almost finished.

The road is complete from the Eastern border to Butwal except for two major bridges (which will restrict traffic during the monsoon). Work in progress from Butwal westwards. Sections of the highway have been, or are being built, with aid from India, Great Britain, U.S.S.R., America and the Asian Development Bank.
Nepal exports rice and other grains, hides, ollseeds, ghi, cattle, jute, large quantities of timber. etc., and imports cotton goods and yarn, sugar. salt, spices, petrol, metals, etc. Nepalese imports from U.K. were valued at $£ x, 532,000$ in 1976 exports to U.K., €539,000.

Finance.-Revenue for the fiscal year 1977-78, is estimated at N.Rs. 1,724,500,000; Foreign Aid NRs. 1,130,570,000; and Internal Borrowing NRs. 242,250,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. Since the sterling pound was floated, the exchange rate has fuctuated. On July 2, 1977, it was NRs. $21 \cdot 3 x$ Buying Rate and NRs. $21 \cdot 52$ Selling Rate $=6$. There mind three commercial banks with branches throughout Nepal.

The inhabitants $\quad$ of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions aminduism and Buddhism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha, whose ruler founded the present Nepalese dynasty, became predominant in 1768. During the $1914-18$ and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, revolutionary movement in 1950 and 1953 achieved the aim of breaking the hereditary power of the Ranas and of restoring to the monarchy the powers which it had lost 104 years before. After ten years, during which various parties and individuals tried their hand at government, the late King Mahendra resumed direct powers on December $\mathbf{3 6}$, 1960, with the object of leading $\quad$ united country to basic democracy.

The state of emergency ended on April 83, r963, the King appointing a Cabinet consisting of a Prime Minister and seven other ministers, all of whom have seats in the indirectly elected Rastriva Panchayat (Parliament). A State Council (Rai Sabha) of 69 members, to advise the King on state affairs, constitutional matters and on the choice of the heir to the throne was also appointed on April 2, 1963. An Act was passed at the same time maintaining the existing ban on political parties.

CAPITAL.-Kathmandu, population (9977) 399,603. Other towns of importance are Morang $(340,693)$, Lalitpur ( $x 75,086$ ) and Bhaktapur (124,433). These population figures include some adjacent rural areas.

Flag.-Double pennant of crimson with blue border on peaks; white moon with rays in centre of top peak; white quarter sun, recumbent in centre of bottom peak. NATIONAL DAY.-February 18.

## British Embassy

Ambassador Extraordinary and Plenipotentiary, His
Excellency John Denson, C.M.G., O.B.e. (r977). ist Secretaries, R. E. Holloway (Head of Chancery and Consul); D. A. Spain, O.B.E. (Aid). Defence Attaché, Lt.-Col. P. T. Bowring. and Secretary, S. Davey. Vice-Consul, P. Covill.

British Council Representative, N. M. Ross, P.O. Box 640, Kanti Path, Kathmandu.

## NETHERLANDS (or HOLLAND)

(Koninkrijk der Nederlanden)
Queen of the Netherlands, Her Majesty Juliana, K.G., bom April 30, 1909; married January 7, 1937, Prince Bernhard of Lippe-Biesterfeld, G.C.B., G.C.v.O., G.b.e. (The Prince of the Netherlands), borm June 29, 191x; succeeded, September 4, 1948, upon the abdication of her mother Queen Wilhelmina who died Nov. 28, $\mathbf{x 9 6 2}$. Issue:
(x) H.R.H. Princess Beatrix Wilhelmina Armgard, G.C.V.O., borm Jan. 31, 1938; married March 10, 1966, H.R.H. Prince Claus George Willem Otto Frederik Geert of the Netherlands, Jonkheer ni Amsberg; and has isste, Prince Willem Alexander, $b$. April 27, 1967; Prince Johan Friso, b. Sept. 25. 1968; Prince Constantijn Christof, b. Oct. 11, 1969.
(a) H.R.H. Princess Irene Emma Elisabeth, born Aug. 5. 1939; married April 29, 1964, Prince Carlos Hugo of Bourbon-Parma and has issue, Prince Carlos, b. Jan. 27, 1970; Princess Margarita and Prince Jaime, b. Oct. 13, 1972; and Princess Maria Carolina Christina, b. June 23, 1974.
(3) H.R.H. Princess Margriet Francisca, born (at Ottawa, Canada), Jan. 19, 1943; married Jan. 10, 1967, Pieter van Vollenhoven: and has issue, Prince Maurits, b. April 17, 1968; and Prince Bernhard, b. Dec. 25, 1969; and Prince Pieter-Christiaan, b. March 22, 1972; and Prince Floris, $b$. April 10 , 1975.
(4) H.R.H. Princess Maria Christina, born Feb. 18, 1947. married June, 28, 1975, Jorge Guillermo; and has issue, Bernardo, $b$. June $\mathbf{2 7}$, 1977.

## Cabinet

Prime Minister and Minister of General Affalrs, J. M. den Uyl (Labour).
Deputy Prime Minister and Minister of Justice, A. A. M. van Agt (Catholic).

Foreign Affairs, M. van der Stoel (Labout).
Home Affairs, W. F. de Gaay Fortman (AntiRevolutionary).
Education and Sciences, J. A. van Kemenade (Labour).
Finance, W. F. Duisenberg (Labour).
Defence, A. Stemerdink (Labour).
Housing and Planning, J. P. A. Gruijters (Democrats '66).
Transport and Waterways, T. E. Westerterp (Catholic).
Economic Affairs, R. F. M. Lubbers (Catholic).
Agriculture and Fisheries, A. P. J. J. M. van der Stee (Catholic).
Social Affairs, J. Boersma (Anti-Revolutionary).
Culture, Recreation and Social Welfare, H. W. van Doorn (Radical).
Public Heallh and Environment, Mrs I. Vorrink (Labout).
Development Co-operation, J. P. Pronk (Labour).
Without Portfolio in charge of Science Policy, F. H. P. Trip (Radical).

Netherlands Embassy in London $3^{8}$ Hyde Park Gate, S. W. 7
[01-584 5040]
Ambassador Extraordinary and Plenipotentiary, His Excellency Robbert Fack (r976).
Ministers Plenipotentiary, H. T. Schaapveld; C. H. A. Plug.

Counsellors, J. G. Van Der Tas, A. U.W. vanWerven; A. P. vanWalsum; D. J. van Wijnen, C.V.o.
ist Secretaries, R. de Beaufort, c.v.o.; J. Schoen:
J. A. Krijgsman; J. A. van Alphen; J. Huisman. Naval Attaché and Air Attaché, Capt. J. R. Roele. Assistant Naval Attaché and Assistant Air Attaché, Cdr. F. Muijers.
Military Attaché, Col. W. Epke.
Area and Population. -The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. $50^{\circ} 46^{\prime}-$ $53^{\circ} 34^{\prime} \mathrm{N}$. and long. $3^{\circ} 22^{\prime}-7^{\circ} 34^{\prime} \mathrm{E}$., consisting of ix provinces plus Eastern and Southern Flevoland (reclaimed parts of the Ysselmeer) and containing a total area of $\mathbf{x 3}, 500 \mathrm{sq}$. miles ( $34,830 \mathrm{sq} . \mathrm{km}$ ). The population in Jan. 1977 was estimated at $33,8 \times 5,838$. The live birth rate in Jan., 1977 was 1 I. 7 per 1,000 of the population, and the death-rate was 8.3 .

The land is generally flat and low, intersected by numerous canals and connecting rivers-in fact, network of water courses. The principal rivers are the Rhine, Maas, Yssel and Scheldt.

The chief agricultural products are potatoes, wheat, rye, barley, corn, sugar bect, cattle, pigs, milk and milk products, cheese, butter, poultry, eggs, beans, peas, flax seed, vegetables, fruit, flower bulbs, and cut flowers and there is an important fishing industry. Among the principal industries are engineering, both mechanical and electrical, electronics, nuclear energy, petro-chemicals and plastics, shipbuilding, steel, textiles of all types, leather goods, electrical appliances, metal ware, furniture, paper, cigars, sugar, liqueurs, beer, clothing, rubber products, etc.
Production of crude oil ( 1975 ) $14,190,000,000,000$ K.cal and refined oil $439,920,000,000,000 \mathrm{~K} . c a l$; steel $4,823,000,000 \mathrm{Kgs}$. and gas $90,853,000,000$ cubic metres. Diamond cutting, though still an important industry, has declined considerably in importance.

Government.-In 1855 the Netherlands became constitutional Kingdom under King William I, Prince of Orange-Nassau, a descendant of the house which has taken = leading part in the destiny of the gation since the x6th century. The StatesGeneral comprise the Eerste Kamer (First Chamber) of 75 members, elected for 6 years by the Provin-

cial Council; and the Tweede Kamer (Second Chamber) of $\mathbf{x} 50$ members, elected for 4 years by men and women voters of 38 years and upwards. Members of the Tweede Kamer are paid.

General elections were held on May 25, 1977 for the Second Chamber of the States-General. Party Representation is: Labour Party, 53; Christian Democrats, 49; Liberal, 28; Democrats '66, 8; Radicals, 3 ; Political Reformed, 3 ; Communists, 2; Reformed Political Union, x ; Pacifist Socialists, x; Democratic Socialists '70, $x$; Farmers' Party, x.
The First (Upper) Chamber of the States-General was elected by the Provincial Councils in June, 1974 Party Representation is: Labour, 21; Catholic People's Party, 16; Liberal, $\mathbf{1 2}$; Christian Historical Union, 7; Anti-Revolutionary, 6; Radicals, 4; Communists, 4; Democrats '66, 3 ; Political Reformed, x: Farmers' Party, $x$.

Defence. -The armed forces mix almost entirely committed to NATO. As a result of a far-reaching defence review, completed in 1974 and revised in 1976 the three services are expected to be reduced in size but to be re-equipped over the next decade with new ships, aircraft and Army vehicles. Under this plan, the Royal Netherlands Navy is to be modernized to provide three escort groups, each consisting of a guided-missile, Command ship and six frigates, for use in the NATO Eastern Atlantic and Channel areas, with substantial participation by conventional submarines and long range maritime patrol aircraft. The Royal Netherlands Army consists of an Army Corps of two active and one reserve Division each containing three brigades and an independent reserve brigade, and National Forces which are mainly reserve. The Army Corps is fully integrated into the NATO Central Army Command. The Royal Netherlands Air Force comprises nine squadrons of jet aircraft, the principal roles of which are offensive support, air defence. and reconnaissance. All these squadrons are assigned to the NATO Central Region. In addition there are various missile units stationed in Germany, also assigned to NATO.
Language and Literature.-Dutch is a WestGermanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used in the Netherlands Antilles. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eight national papers, four of which morning papers, and there many regional dally papers.
Education.-Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school ive compulsory. Secondary schools are numerous, well equipped and well attended. The principal Universities are at Leiden, Utrecht, Groningen, Amsterdam (2), Nijmegen (R.C.) and Rotterdam, and there are technical Universities at Delft (polytechnic); Eindhoven (polytechnic), Enschede (polytechnic) Wageningen (agriculture).

Communications.-The total extent of navigable rivers including canals, is $4,892 \mathrm{~km}$. and of metalled roads $86,354 \mathrm{~km}$. In 1976 the total length of the railway system amounted to $2,825 \mathrm{~km}$., of which $x, 7 \pm 2 \mathrm{~km}$. were electrified. The mercantile marime in 1976 consisted of $x, 157$ ships of total 3,245,000 gross registered tons. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the course of April, 2975 , to April, 2976, was $321,900 \mathrm{~km}$.

Finance Estimates, 1976<br>Aggregate Budget Revenue.....Fls. $74,100,000,000$ Aggregate Budget Expenditure. 83,200,000,000

## Trade

The Dutch are traditionally $\quad$ trading nation. Entrepôt trade, banking and shipping are of particular importance in their economy. The geographical position of the Netherlands, at the mouths of the Rhine, Meuse and Scheldt, brings a large volume of transit trade to and from the interior of Europe to Dutch ports.

Principal trading partners are the Federal Republic of Germany and Belgium/Luxemburg. Britain supplied 7.1 per cent. of Netherlands imports in 1976 (Fls. $6,473,000,000$ ) and took 9.8 per cent. of Netherlands exports (Fls. 8,800,000,000).

In common with other members of the European Economic Community, the Netherlands on July $x_{\text {, }}$ r968, removed remaining duties on imports from EEC countries and brought down duties en imports from other countries into line with the Common External Tariff of the EEC.

Excluding the building industry, the index of industrial production in the Netherlands ( $1970=$ 100) rose from $x 17$ in 1975 to 125 in 1976 and the index of industrial production per worker ( $1970-$ x00) rose from $13 x$ in 1975 to 145 in 1976 . In 1976 Dutch imports amounted to Fls. 9x,092,000,000 and exports to Fls. $90,221,000,000$ (excluding Belgium and Luxembourg).

## OVERSEAS TERRITORIES

The Netherlands West Indies formerly comprised Surinam in South America and certain islands in the West Indies known as the Netherlands Antilles (Curacao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of the Netherlands Antilles is $394^{-x}$ sq. miles with - population of 234,400 . Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs as parts of the Netherlands Realm under the Crown. The statute was amended in 1975 to provide for the full independence of Surinam on November 25, 2975. Henceforth the Realm comprises the Netherlands and the Netherland Antilles only.

Governor
Netherlands Antilles, Dr. B. M. Leito (x970).

## NICARAGUA

(República de Nicaragua)
President of the National Emergency Committee and Supreme Chief of the Armed Forces, Gen. Anastasio Somoza Debayle, assumed office, Dec. I, 1974. Foreign Affairs, Dr. Alejandre Monticl Arguello.

## Nicaraguan Embassy and Consulate General <br> - Gloucester Road, S.W. 7 <br> [os-584 323I]

Ambassador Extraordinary and Plenipotentiary (vacant). Minister-Counsellor, Dr. José Rizo Castellon.
Area and Population.-Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between $10^{\circ} 45^{\prime}-15^{\circ} \mathrm{N}$. lat. and $83^{\circ} 40^{\prime}-87^{\circ} 3^{8^{\prime} \mathrm{W}}$. long., containing an area of 57,145 English square miles (see MAP, p. 872 ). It has a population of $2,400,000$ of whom about threequarters are of mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent and the remaining so per cent. are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic coast and were formerly under British protection.
Government.- The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 182 x , when its independence was secured. From 1972 the country was headed by I three-man National Governing Council A new Constitution, adopted in April 1974, provided for presidential elections to be held on Sept. r, 1974. General de Division Anastasio Somoza, Debayle was re-elected President (formerly in oftice, 1967-72) of the Republic, and took office on December 1,1974 for a term expiring on April 3x, 198r. Nicaragua is now II democratic representative republic divided into sixteen Departments and the National District, which includes Managua and its surroundings. The Government is divided into four branches: Legislative, Executive, Judicial and Electoral. Legislative power is vested in a Senate of 30 members and the ex-President, and chamber of Deputies with not less than 70 members.
Agriculture and Industry. - The country is mainly agricultural. The major crops are cotton, coffee, sugar, sesame and bananas. Beans, rice, maize and
ipecacuanha are also important. Livestock and timber production, already considerable, une expanding. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.

Communications. - There are 252 miles of railway, all on the Pacific side and approximately 5,500 miles of telegraph. There are 27 radio stations and two television stations in Managua. An automatic telephone system has been installed in the capital and extended to the provincial towns of León, Granada, Matagalpa, Chinandega, Diriamba and Jinotepe. The system in the capital, however, suffered heavy damage as $=$ result of the earthquake in December 1972. A ground station for satellite communication was inaugurated in 2973. Transport except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway runs from the Corinto on the Pacific coast vià Managua to Rama, where there is a natural waterway to Bluefields on the Atlantic. The country's main airport is at Managua. It is used by several airlines, including Panam and Lanica, the Nicaraguan national airline.

Language and Literature. -The official language of the country is Spanish. There are $\square$ daily newspapers published at Managua, apart from the official Gazette (La Gaceta) and 4 in the provinces. About 40 per cent. of the population are illiterate. There are universities at León and Managua.

Trade with U.K.
 Exports to U.K........ $9,980,000 \quad 1,200,000$ Considerable quantities of foodstuffs are imported as well cotton goods, jute, iron and steel, machinery and petroleum products. The chief exports are cotton, coffee, beef, gold, sugar, cottonseed, bananas, copper and soluble coffee.

Capital, Managua, population post-earthquake, 400,000. The centre was almost totally destroyed in the earthquake of December 1972, and reconstruction will take several years. León, 119,347; Granada, 100,334; Masaya, 96,830 ; Chinandega, 95,437; $\Psi$ Bluefields, 17,706 ; Matagalpa, 65,928 ; Jinotepe, 15,957. $\Psi$ Corinto ( 9,650 ), on the Pacific is the chief port, handling about 70 per cent. of the total trade; Bluefields and Puerto Somoza on the E. coast are mainly concerned in the fish, banana and timber trade to the United States.
Flag.-Three horizontal bands, blue, white, blue (the arms of the Republic on the white band, displaying five volcanoes surmounted by a cap of liberty under 1 rainbow).

## NIGER

## (République du Niger)

President, It.-Col. Seyni Kountché, assumed power April 15, 1974.
Minister of Foreign Affairs, Capt. Moumoun! Djermakoye Amadou.
Situated in West Central Africa, between $12^{\circ}$ and $24^{\circ} \mathrm{N}$. and $0^{\circ}$ and $16^{\circ} \mathrm{E}$., Niger has common boundaries with Algeria and Libya in the north, Chad, Nigeria, Benin, Mali and Upper Volta.
It has an area of about 459,000 square miles with a population (U.N. estimate, 1972) at $4,030,000$. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djer-
mas in the south-west and the nomadic Touaregs in the north.
The first French expedition arrived in 1899 and the country was fully occupied by 1914. It decided on December 88 , 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 2960 . Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 3962. These are now being revised.
The constitution of Niger, adopted on November 8, 1960, provided for $\begin{gathered}\text { presidential system of }\end{gathered}$ government, modelled on that of the United States and the French Fifth Republic, and $\quad$ single Chamber National Assembly. In April 2974 Lt.Col. Seyni Kountché seized power, suspended the Constitution, dissolved the National Assembly, and suppressed all political organizations. He then set up a Supreme Military Council with himself President and eleven other officers together with a temporary Government in which all the major portfolios are held by military officers. Niger is a member of the United Nations, the Conseil de l'Entente, O.C.A.M., O.A.U., C.E.D.E.A.O. and C.E.A.O. (see Ivory Coast). The official language is French.
Finance. - The currency of Niger is the franc CFA (Francs CFA 50-I French Franc). In 1976 the total budget amounted to Francs CFA 24,3 11,000,000.
Trade.-The cultivation of ground-nuts and the production of livestock are the main industries and provide the two main exports. A company formed by the Goverument, the French Atomic Energy Authority and private interests is exploiting uranium deposits at Arlit. Total value of trade in 1974 was: Imports, Francs CFA 23,144,000,000; Exports, Francs CFA $\mathbf{1 2 , 6 2 x , 0 0 0 , 0 0 0 \text { . Imports }}$ from U.K. (1976)- £ $1,101,000$; exports to U.K. (1976)-£820,000.

## CAPITAL.-Niamey ( 100,000 ).

Fiag.-Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe. NATIONAL DAY,-December $\mathbf{z 8}$. British Ambassador, His Excellency Joe Booth Wright (resident at Abidjan).

## NORWAY <br> (Norge)

King, Olav V, K.G., K.T., G.C.B., G.C.V.O., b. July 2, 1903: succeeded, Sept. 3x, 1957, on death of his father King Haakon VII; married March 21, 1929, Princess Marthe of Sweden (borm March 29, 1901: died April 5, 1954); having issue, Harald (see below) and two daughters.
Heir-Apparent, H.R.H. Prince Harald, G.c.v.O., b. Feb. 2x, x937; m. Aug. 29, 1968, Sonja Haraldsen, and has issue Princess Märtha Louise, b. Sept. 22, 197r; and Prince Haakon Magnus, b. July $20,2973$.

Cabinet
Prime Minister, Odvar Nordli.
Foreign Affairs, Knut Frydenlund.
Agriculture, Oskar Oksnes.
Justice, Fru Inger Louise Valle.
Education and Ecclesiastical Affairs, Kjolv Egeland.
Defence, Rolf Hansen.
Commerce, Hallvard Bakke.
Industry, Bjartmar Gjerde.
Consumer Affairs and Administration, Fru Annemarie Lorentzen.
Communications, Ragnar Christiansen.
Fisheries, Eivind Bolle.
Labour and Municipal Affairs, Leif J. Aune.
Social Affairs, Ruth Ryste.
Environment, Fru Gro Harlem Brundtland.
Finance and Customs, Per Kleppe.
Without Portfolio, Jens Evensen.

## Royal Norwigian Embassy in London Offices: 25 Belgrave Square, S.W. 1 [or-235 7x5x]

Ambassador Extraordinary and Plenipotentiary, His Excellency Frithjof Halfdan Jacobsen (1975).
Minister-Counsellor, Olav Sole.
Counsellors, Herman Pedersen (Press and Information), Semund Remay (Fisheries): Hans Hoegh Henrichsen (Commercial); Nils Oskar Dietz (Economic).
2st Secretaries, Gunnar Henriksson Lindeman; Sven Smaaland; Oscar Torgersen (Consultant); D. R. Nielsen (Commercial).
Defence Attaché, Com. Bjarne Eia.
Asst. Defence Attaché, Maj. B. Schaathun.
and Secretaries, Ole F. Knudsen (Commercial); Arild Wegner (Political).
Atraches, Sigfred Hungnes (Consular); Bjorg Eimstad (Welfare).
Area and Population.-Norway (" The Northern Way "), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872 . It is $1,75^{2} \mathrm{~km}$. in length, its greatest width about 430 km . The length of the coastline $2,650 \mathrm{~km}$., and the frontier between Norway and the neighbouring countries is $2,53 \mathrm{I} \mathrm{km}$. (Sweden 1.619 km ., Finland 716 km . and U.S.S.R. 196 km .). It divided into 19 counties (fylker) and comprises im area of $3^{86,308} \mathrm{sq}$. km. of which Svalbard is 62,049 and Jan Magen 372 sq . km . with is population (estimated, Dec., 1976) of $4,035,365$. In 1975 there were for every $\pm, 000$ inhabitants: 1073 live births; ro'o deaths; $12 \cdot 0$ deaths during first year of (per x,000 live births) ; $6 \cdot 5$ marriages.
The Norweglan coastline is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface mountainous, consisting of elevated and barren tablelands, separated by deep and v valleys. At the North Cape the nimi does not appear to set from the second week in May to the last week in July, causing the phenomenon
known - the Midinight Sun; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23 . During the long winter nights are seen the multiple coloured Northern Lights or Aurora Borealis, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia.

Production.-The cultivated area is about 10,000 sq. km. ( 3.4 per cent. of total surface area); forests cover nearly 25 per cent.; the rest consists of highland pastures or uninhabitable mountains.

The Gulf Stream pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a min current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are manufactures, agriculture and forestry, fisheries, mining, production of metals and ferro-alloys and shipping. Also in recent years industries providing both manufactured products and services for the development of North Sea oil and gas resources have assumed growing importance. In the fourth quarter of 1976, $1,807,000$ persons were employed in Norwegian industry. Manufactures are aided by great resources of hydro-electric power. Actual production in 2976 amounted to $82 \cdot 2 \mathrm{GW}{ }^{*}$. In normal years the quantity of fish caught by Norweglan fishing vessels is greater than that of any other European country except U.S.S.R. In 1975 the total catch amounted to $2,307,222$ metric tonnes.
Government.-From 1397 to 18 I4 Norway was united with Denmark, and from Nov. 4,1814 , with Sweden, under II personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 8814 , the Storting (Parliament) itself elects one-quarter of its members to constitute the Lagting (Upper Chamber), the other three-quarters forming the Odelsting (Lower Chamber). Legislative questions alone - dealt with by both parts in separate sittings.
On April 8-9, 1940, Germany invaded Norway, and it was not until June 7. 1945, that the late King Haakon was able to return from Great Britain to Oslo.

On January 14, 1976, Mr. Odvar Nordli was appointed Prime Minister - the leader of a new Labour Government.
Defence. -Norway is member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. The period of compulsory national service is 15 months (without refresher training) in the Navy and Air Force, and $x 2$ months (with refresher training) in the Army.
Education from 7 to $x 6$ is free and compulsory in the "basic schools" maintained by the municipalities with State grants-in-aid. From 1976 all schools catering for the $\mathbf{1 6 - 1 9}$ age groups will be organised along comprehensive lines, the aim being to offer facilities for some $85-90$ per cent. of the age groups. In 197147.4 per cent. of all 18 year olds received full time schooling. In addition to the many specialized schools and industrial and technical institutes, there are 29 colleges of education and 7 new regional colleges. There are 4 universities and $\eta$ state colleges of university level, with i total in autumn 1973 of 36,694 students, $32 \cdot 4$ per cent. of

[^33]
them women. Oslo University (founded 18 m ) had 19,367 ; Bergen University (1948) 7.351, and Trondheim University (created in 1968 by merging the State Institute of Technology, the State College for Teachers, and the Royal Norwegian Society of Science Museum) 6,230; the newest, Tromse University, started teaching in 1972 with $8_{7 I}$ students in science, the humanities and medicine.

Language and Literature.-Norwegian is one of the Scandinavian languages and the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludvig Holberg ( $1684^{-1754}$ ) is regarded as the founder of Norwegian literature, although modern Norweglan literature dates from the establishment of national university at Christiania (Oslo) in $x 8$ Ix and with the writings of Henrik A. Wergeland ( $5805-\mathrm{I} 845$ ). Some of the famous names are Henrik Ibsen ( $\mathbf{x} 828$ z906) the dramatist, Björnstjerne Björnson ( $1832-$ x9ro) journalist, dramatist and novelist and Nobel Prizewinner in 1903, Jonas Lie ( $1833-1908$ ) novelist, Knut Hamsun ( $8859-1952$ ) novelist and Nobel Prizewinner in 1920 , and Sigrid Undset ( $\mathrm{x} 882-$ 1949), champion of Norwegian womanhood and herself 10 Nobel Prizewinner in 1928. In 1973 there were 67 daily newspapers in the country with total circulation of $2,555,000$, and 77 newspapers published $x$ to 5 times a week with a total circulation of 331,000.

Communications.-The total length of railways open at the end of 1975 was $4,28 \mathrm{Ikm}$., excluding private lines. The extension of the main line from Fauske to Bodö, 60 miles north of the Arctic Circle, Tw completed in 1962 and opened on June 7 by King Olav. The number of telephones at the end of 1975 was $1,406,995$ which is 35 telephones per 100 inhabitants. There $m 77,300 \mathrm{~km}$. of public roads in Norway (including urban streets). At the end of $x 975,2,511,789$ road motor vehicles were registered.

Civil Aviation.-Scheduled internal airservices are operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Wideróes Flyveselskap A.S.

Mercantile Marine.-The Mercantile Marine, December 3I, I975, consisted of $x, 946$ vessels of $26,154,000$ gross tons (vessels above roo gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

## SVALbARD

(Spitsbergen and Bear Island)
By Treaty (Feb. 9, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain ") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 34, r925, Norway assumed sovereignty. In September, r94I, Allied forces (British, Canadian and Norwegian) landed on the main island. Atter destruction of the accumulated stocks of coal and dismantling of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about $x, 500$ ) to the U.S.S.R. Atter the war the

Norwegian mining plants were rebuilt. 873,406 metric tons of coal were shipped from Norwegian and Russian mines i. Svalbard in 1973 (Norwegian mines, 4 Ix,503 metric tons).

The Svalbard Archipelago lies between $74^{\circ}-8 x^{\prime}$ N . lat. and between $10^{\circ}-35^{\circ} \mathrm{E}$. long., with an estimated area of 24,295 square miles. The archipelago consists of main island, known as Spitsbergen ( 55,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait: the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island ( 68 square miles) 127 miles to the $\mathrm{S}_{\mathrm{i}}$; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 355 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and $\mathrm{I}, 300$ miles from Aberdeen. Transit from Tromsó to Green Harbour a to 3 days; from Aberdeen 5 to 6 days.

Jan MAyEn, an island in the Arctic Ocean ( $70^{\circ} 49^{\prime}-7 \mathrm{I}^{\circ} 9^{\prime} \mathrm{N}$. lat. and $7^{\circ} 53^{\prime}-9^{\circ} 5^{\prime} \mathrm{W}$. long.) was joined to Norway by law of Feb. 27, 1930.

## Norwegian Antarctic

Bouvet ISLAND ( $54^{\circ} 26^{\prime}$ S. lat. and $3^{\circ} 24^{\prime}$ E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

Peter the First Island ( $68^{\circ} 4^{8}$ S. lat. and $90^{\circ} 35^{\prime} \mathrm{W}$. long.), was declared $\quad$ dependency of Norway by resolution of Government, May i, $x 931$.

Princess Ragnhild Land (from $70^{\circ} 30^{\prime}$, to $68^{\circ} 40^{\prime}$ S. lat. and $24^{\circ} 15^{\prime}$ to $33^{\circ} 30^{\prime}$ E. long.' has been claimed as Norwegian since Feb. 17, 1935.

Quern Maud Land.- On Jan. 14, 1939, the Norwegian Government declared the area between $20^{\circ} \mathrm{W}$. and $45^{\circ}$ E., adjacent to Australian Antarctica, to be Norwegian territory.

## OMAN <br> (The Sultanate of Oman) <br> Sultan, Qaboos bin Said, succeeded on deposition of Sultan Said bin Taimur, July 23, 1970.

(The Sultan acts as his own Minister of Foreign Affairs and Defence.)

Oman Embassy in London 64 Ennismore Gardens, S.W. 7. [0x-584 6782 ] Ambassador, His Excellency Nassir Seif El Bualy.

The independent Sultanate of Oman lies at the eastern corner of the Arabian Peninsula. Its seaboard is nearly $x, 000$ miles long and extends from near Tibat on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast which belongs to Sharjah and Fujairah of the United Arab Emirates. Ras Darbat Ail marks the boundary between the Sultanate and the People's Democratic Republic of Yemen. The Sultanate extends inland to the borders of the Rub al Khali, or "Empty Quarter" as the South Eastera Arabian Desert i called.
Physically and historically modern Oman can be split into two main parts, the North and the South, divided by large tract of desert. Northem Oman has three main sections. The Balinah, the coastal plain, varies in width from 30 miles in the neighbourhood of Suwaiq to almost nothing at Muscat where the mountains descend abruptly to the sea. The plain is fertile, with date gardens extending over its full length of 150 miles. The dates, which ripen in early July, well before the Basra product, are famous for their flavour. The Hajar, 1 mountain spine running from North East to South West, reaching nearly zo,000 feet in height on Jabal Akhdar. For the most part the mountains are barren, but numerous valleys penetrate the central massif of Jabal Akhdar and in these there is considerable cultivation irrigated by wells or a system of underground canals called falages which top the water table. The two plateaus leading from the western slopes of the mountains, the Dhahirah or back, in the north and the Sharqia in the south east also have centres of settlements and cultivation. They fall from an average height of x,000 feet into sands of the Empty Quarter. Camels raised in this area are prized throughout Arabia. The Wahiba Sands separate the North from the South with nearly 400 miles of inhospitable country crossed by one motorable track, the only land link. Dhofar, the Southern Province, is the only part of the Arabian Peninsula to be touched by the South West Monsoon. Temperatures are more moderate than in the North and sugar cane and coconuts are grown on the coastal plain, while cattle are bred on the mountains.
Muscat is the original capital of Oman, but Matrah, 3 miles away, where $\mathbb{A}$ new port has been built and where there is more room for expansion, is the commercial centre, and government offices and private houses are moving out to Ruwi and Qurum along the road to Seeb Airpott. The other main towns on the northern coast are Sur, Khaburah and Sohar, all of which are ports but without sheltered anchorage. In the interior Nizwa and Rostaq, both former capitals, are the centres of population. The main town of Dhofar is Salalah, and Raysut and Murbat are the ports.

The area of Oman has been estimated at 120,000 sq. miles and the population at 750,000 (1973). The inhabitants of the North are for the most part Arab but along the coast there is a strong infusion of negro blood, while in the Capital Area which stretches from Muscat to Seeb there are large communities of Hindus, Khojas and Baluch, in addition to Zanzibaris of Omani origin. In Dhofar there is also an infusion of negro blood
around Salalah, but in the mountains the inhabitants are either of pure Arab descent or belong to tribes of pre-Arab origin, the Qarra and Mahra, who speak their own dialects of semitic origin.

Since 1973 ships have been using Port Qaboos at Matrah, where deep water berths have been constructed as part of the new harbour facilities ( $£ 20 \mathrm{~m}$. ). In 2974,365 vessels entered the port. 169 tankers called at the oil company port at Mina al Fahal and carried away over 206 million barrels of crude oil.

The telegraph office, an automatic telephone service in Muscat and Matrah and an international telephone service have been operated since January $x 975$ by OMANTEL. The Sultanate of Oman and Cable \& Wireless share in the company in the ratio of $60 / 40$. There are cleared or graded motorable tracks linking most main population centres of the country with the coast and with the towns of the United Arab Emirates. Over 300 miles of tarmac road are now open linking the capital area with the new international airport at Seeb and the town of Sohar and others are being built, for example to link Muscat and Nizwa.

Finance.-On May 7, 1970, a new currency was brought into circulation. The main unit is the Rial Oman RO $0^{\prime} 770=\mathrm{flx}^{\mathrm{I}}$ (July 1975 ). Each Rial is divided into $x, 000$ new Baiza. There are notes of Rials $10,5, x, \frac{1}{2}, \frac{1}{2}$ and roo Baiza and coins of Baiza roo, 50, 25, 10, 5 and 2. The Indian External Rupee ceased to be legal tender from May 2x, 1970. The metric system was introduced in 3975 but there is also - local system in which one kiyas $=$ the weight of six dollars or 5.9375 oz.; 24 liyas $=$ one Muscat maund; 10 maunds=one Farasala; 200 maunds=1 Bahaf. Rice is sold by the bag, other cereals by the following measurement: 40 Palis=one Farrah; wu Farrahs = one Khandi.

\[

\]

$$
\text { Exports to U.K.. .... } 13,997,000 \quad 73,234,000
$$

Commerce and Trade.-Trade is mainly with the United Kingdom, Japan, the Netherlands, U.S., West Germany and India. Imports for the year 1975 exceeded RO 23 xm . Chief imports were machinery, cars, building materials, refined petroleum and food and telecommunications equipment.

Petroleum Development (Oman) Ltd. (owned 60 per cent. by Oman Government and 34 per cent. by Shell) began exporting oll on Aug. $1,1967$. Exports are currently at a rate of 368,000 barrels a day. Wintershall A.-G., Sun Oil and ELFER AP have off-shore concessions and Eif-Aquitane Sumitomo has $\quad$ new inland oll concession.

Development.-For many years the Sultanate was a poor country with 1 total annual income of less than $£ x, 000,000$. The advent of oil revenues since 1967 and the change of régime in 1970 have improved prospects and have enabled the initiation of a wide-ranging development programme, especially concerned with health, education and communications. New hospitals have been completed in the main provincial centres and there are now 13 hospitals and 150 doctors. 270 schools, with 70,000 pupils, were in operation in 1977. At Salalah, the main coastal town of the southern province of Dhofar, a new civil airport is planned. A metalled road joins Salalah to Taqa and the port of Rayzut and several housing schemes have been completed. A thermal power station and desalination plant is under construction EII Muscat and work has recently begun on a flour mill. There int also plans to build a cement factory near Muscat.

Caprial. $\Psi$ Muscat, population (estimated), 7,000.
Flag.-Red, green and white with crossed daggers in red sector.

Ministers, Bakhtiar All (Head of Chancery); Illahsbukhsh Soomro.
Counsellors, Salahuddin K. Leghari; Khalid Hasan (Press); Zafar Iqbal (Economic); Javaid Qayum Khan; Nazir Ahmad (Education).
ist Secretary, Muhammad Abdul Wasay Farouqi.
Area and Population.- The Islamic Republic of Pakistan consists of country situated to the northwest of the Indian sub-continent, bordered by Iran, Afghanistan, the disputed territory of Kashmir and India. It covers 1 total area of $310,403 \mathrm{sq}$. miles. The Government of Pakistan census in 1972 showed a population figure of $64,892,000$. (A 1977 estimate was $73,400,000$.) Of these, about 1 per cent. are Moslems, about 6 per cent. Scheduled Caste Hindus, 5 per cent. Caste Hindus, under 1 per cent. Christians, and $\frac{1}{2}$ per cent. Buddhists.

Running through Pakistan are five great rivers, the Indus, Jhelum, Chenab, Ravi and Sutlej. The upper reaches of these rivers are in Kashmir, and their sources in the Himalayas.

Government.-Until April 17, 1973, when the Republic of Bangladesh seceded and was formally created to replace East Pakistan, Pakistan consisted of two geographical units, West and East Pakistan, which were separated by about $\mathrm{r}, 100$ miles of Indian territory. Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received Royal Assent on July 18, 1947.
In terms of the Act the Dominion of Pakistan consisted of former territories of British India. The States of Bahawalpur and Khairpur (in Punjab and Sind), with a Muslim population of almost 80 per cent. and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) vim defined by a Boundary Commission presided over by Sir Cyril Radcliffe, K.B.E., Q.C. (now Viscount Radcliffe). The following States also acceded to Pakistan: the Baluchistan States of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. (All these States have since been merged in the relevant Provinces of what is now Pakistan). The

States of Junagadh and Manavadar which had acceded to Pakistan were occupjed by India on November 8, 1947.

Pakistan became in Republic on March 23, 1956, when a Parliamentary Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law. General (later Field Marshal) Mohammed Ayub Khan, Commander-in-Chief of the Pakistan Army, was appointed the Chief Martial Law Administrator. On October 28, 1958, General Ayub Khan also became President of Pakistan. Following a period of unrest in both East and West Pakistan, marked by rioting and massed strikes, President Ayub Khan on March 24, 1969, announced his resignation and handed over control of the country to the armed forces. The Com-mander-in-Chief, General Yahya Khan, proclaimed martial law on March 25 and appointed military governors for East and West Pakistan. The Constitution was abrogated, National and Provincial Assemblies dissolved and Provincial Governors dismissed. Law and order were rapidly restored. On March 3x, 1969, Gen. Yahya Khan assumed the Presidency and formed - Council of Administration.

A Legal Framework Order, published by the President in March, 1970, laid down the principles 11 which new Constitution for Pakistan would be based, including the division of West Pakistan into four provinces-The Punjab, Sind, Baluchistan and the North-West Frontier Province.

The first general elections ever held in Pakistan - a basis of "t one man, one vote ", were held on Dec. 7,1970 , with a postponement until January 17 , 2971, in 9 East Pakistan constituencies which had been severely affected by the cyclone disaster in the Ganges delta. The Awami League in East Pakistan, led by Sheikh Mujibur Rahman, and the Pakistan People's Party in West Pakistan, led by Zulfikar Ali Bhutto, won large majorities, the latter party in Punjab and Sind. Following the elections there was total disagreement between the two main parties : the question of new Constitution for Pakistan, Sheikh Mujlb insisting on complete autonomy for East Pakistan. The proposed opening of the National Assembly at Dacca on March 25, 197x, was postponed by the President. Civil war broke out.

The unofficially styled "Bangladesh" seceded from the Government of Pakistan by unilateral declaration 1 II March 26, 197x, and Sheikh Mujibur Rahman flown to West Pakistan where he was in due course tried for treason. Meanwhile, in East Pakistan, fierce and brutal fighting continued between West Pakistan forces and Bengali guerrillas. Several million Bengali refugees fied to India. Fighting in East Pakistan intensified towards the end of the year and eiI December 3 it spread to West Pakistan where Pakistan and Indian forces were engaged. On December 16 the Pakistan forces on the eastern front surrendered, and the following day Pakistan accepted a cease-ire in the West. Following the resignation of Gen. Yahya Khan - President and the succession of Mr. Bhutto on December $\Omega$ Sheikh Mujibur Rahman we released from detention and flown to London on January 8, 1972. From there he proceeded to Dacca where he reasserted that Bangladesh was an independent country and that all ties with West Pakistan were severed. "The Democratic Government of Bangladesh " was formally proclaimed on April $17,197^{2}$.

The United Kingdom had recognized Bangladesh ${ }^{3 I}$ February 4; but already, on January 30, r97a, President Bhutto announced that Pakistan 10 il left the Commonwealth $\quad$ - protest against the
decision by Britain, Australia and New Zealand to recognize Bangladesh. $\mid .1$ decision, taken with regret, was, he said, minal and irrevocable ${ }^{[1}$ and "essential to Pakistan's self-respect ".

A new Constitution was adopted by the National Assembly on April 10, 1973. It wis enforced on Aug. 14, 1973 and provides for a federal parliamentary system with the President constitutional head and the Prime Minister as chief executive.

Education.-Formal education in Pakistan is organized into five stages. These are five years of primary education ( $5-9$ years), 3 years of middle or lower secondary (general or vocational), z years of upper secondary, 2 years of higher secondary (intermediate) and in to 5 years of higher education in colleges and universities. Education is free to upper secondary level.

Examinations for the first two stages are conducted by the Provincial Education Departments for the award of certificates. Public examinations Er conducted at secondary and higher secondary/ intermediate levels by the concerned Boards of Intermediate and Secondary education. Public examinations are alsu held for scholarships and conducted by the Directorates of Education. Examinations at higher levels of education are conducted by the universities.

Provincial Governments are responsible for the total financial support of the government institutions and for grants to non-government institutions. But policy making is authorized by the national Government, which makes annual grants. The Government of Pakistan announced in March, 1972, the Education Policy, 1972-80, the main objects of which to promote ideological solidarity and eradicate illiteracy. According to the Policy, education in classes I-VIII has been made free since Oct. $x$, r972. It is anticipated that primary education will become universal for boys and girls by 1984.

Education in classes IX and $X$ has been made free in all schools from 1973. The present rate of increase in enrolment at secondary and intermediate levels about ro per cent. per annum. By 1980 , it is estimated that the enrolment will be more than double, rising from 400,000 to 850,000 in classes IX and $X$ and from $\times 60,000$ to 360,000 in classes XI and XI.

The number of existing school teachers is about $\mathbf{2 6 0 , 0 0 0}$. It is estimated that an additional 235,000 elementary and secondary school teachers and additional 300,000 adult and further education teachers, men and women, will be needed by 1980. The number of primary schools in 1970 was 39,000 . There were 3,435 secondary schools and 300 general colleges.

Production.-Pakistan's economy is chiefly based in agriculture. According to the 1972 census classification, the employed labour force engaged in agriculture amounted to 56.6 per cent of the total persons employed. The principal crops are cotton, rice, wheat, sugar cane, maize and tobacco. There are large deposits of rock salt. Pakistan has one of the longest irrigation systems in the world. The total area irrigated is 33 million acres.

Other Products: Pakistan also produces hides and skins, leather, wool, fertilizers, paints and varnishes, soda ash, paper, cement, fish, carpets, sports goods, surgical appliances and engineering goods, including switchgear, transformers, cables and wires.

Trade.-Pakistan imported manufactured goods and raw materials to the value of $\$ 2,530$ million in $1976-77$ and exported mainly agricultural products valued at $\$ \pi, 550$ million. Principal imports
are listed as: machinery, food grains, iron and steel manufactures, transport equipment, electrical goods, mineral oils, chemicals, fertilizers, drugs and medicines, and vegetable oils. Principal exports are cotton yarn and cloth, carpets, sports goods, rice, raw skins and fish.

Finance. -The unit of currency is the Rupee of 100 Paisa ( $x$ crore $=$ so million Rupees). For rate of exchange, see p. 83 .

The State Bank has a capital of about Rs. $30,000,000$ and is wholly owned by the Government. Total bank deposits in Pakistan in Dec. 1975, were Rs.2,793 crores.
The 1976 -77 Budget anticipated Revenue receipts of Rs. 1819.87 crores and expenditure (excluding development expenditure) of Rs. $16 \times 4 \cdot 7$ I crores.

Communications-The main seaport is Karachi (which handled $9,900,000$ tons of cargo in 1974/5). The main airport at Karachi occupies an important position on international trunk routes and is equipped with modern facilities and equipment. Pakistan International Airlines (P.I.A.) operates air services between the principal cities within the country as well as abroad.
Post and telegraph facilities are available to every country in the world.
CAPITAL-Islamabad, pop. 235,000. $\Psi$ Karachi (pop. $3,498,634$ ) is the largest city and seaport; Lahore has population of $2,165,372$.
Flag.-The National Flag of Pakistan is đark green, with white vertical stripes at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star.
National Days.-March 23 (Pakistan Day), August 54 (Independence Day).

## BRITISH EmbASSY <br> Diplomatic Enclave, Ramna 5, P.O. Box 1 122, Islamabad.

Ambassador Extraordinary and Plenipotentiary, His Excellency Roger Decerega (1976).
Minister-Counsellor, Sr. Miguel Chavez-Boyd.
Consulate-Wheatsheaf House, 4 Carmelite Street, E.C. 4 [ox-353 4792/3].
There are also Consular Offices of the Republic at Glasgow and Liverpool.
Panama lies on the isthmus of that name which connects N. and S. America (see MAP, p. 842). After 10 revolt (Nov. 3, 1903) it declared its independence from Colombia and established $\square$ separate Government.
Since 1968 control of Panama has been increasingly taken over by Gen. Omar Torrijos, Commander of the National Guard, following a military coup. On October 15 , 1972 , at an assembly of representatives from the 505 electoral districts, the President and Vice-President were installed for six-year term, and General Torrijos was designated as "Leader of the Revolution" with wide overriding powers. In September, 1977, in Washington, President Carter of the U.S.A. and Gen. Torrijos signed a treaty giving Panama control of the Panama Canal in the year 2,000 .
The area of the Republic is $3 x, 890 \mathrm{sq}$. m ., the population (r975 est.) $x, 678,000$. The soil is moderately fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, sugar, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.
Education is compulsory and free from 7 to 25 years. In 1972 there were $x, 906$ official primary schools and 65 private primary schools; 69 official secondary and 138 private secondary schools. Primary students numbered 273,324 in official and 14,241 in private schools in 297 x ; secondary students, 60,352 official and 26,443 private. The average number of students at Panama University in 1973 was 21,216 and at the Catholic University (Universidad Santa Maria Le Antigua) about 728.
Lansuage and Literature.-The official language is

Spanish. There are 4 Spanish language and English language newspapers published dally in the capital.
Finance.-Budget estimates for 1976 showed revenue and expenditure in balance at $B .463,000,000$.
The monetary unit is the Balboa ( $=\$$ I U.S.) ; no Panamanian paper currency is issued, and U.S. dollar bills of all values are in circulation in the Republic and in the Canal Zone.

Ambassador Extraordinary and Plenipotentiary, His Excellency Numa Alcides Mallorquin (1969).
Minister-Counsellor and Consul General, Bernardo Galeano.
1st Sectelaries, Jorge A. Colmán; Mrs. G. S. de Jauregui.
There is $\pm$ Paraguayan Consulate in Liverpool.

Area and Population.-Paraguay is an inland subtropical State of South America, situated between Argentina, Bolivia and Brazil.

The area is computed at 157,000 square miles, with - population (est. 1975) of $2,500,000$.

Eastern Paraguay consists of a series of plains, intersected by abrupt ranges of hills, none of which exceeds 2,300 feet above sea level. The Paraguay and Alto Paraná rivers are normally navigable for vessels of 6 to 7 feet draught. Some of the tributary streams are also navigable. The Pilcomayo river is navigable for small craft for 180 miles from Asunción. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams fowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confuence are extensive marshes, one of which, known as "Neembucú," or "endless," is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935 . The Chaco is a flat plain, rising uniformly towards its western boundary to a height of $x, 140$ feet; it suffers much from floods and still more from drought, but the building of dams and reservoirs has converted part of it into good pasture for cattle raising.

Government.-In 1535 Paraguay was settled a Spanish possession. In 18 II it declared its independence of Spain.
The 1967 constitution provides for a twochamber parliament consisting of $30-$ member Senate and a 60 -member Chamber of Deputies. Two-thirds of the seats in each chamber are allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18 .

The President is elected for 5 years and may be re-elected for further term. He appoints the Cabinet, which exercises all the functions of government. During parliamentary recess it can govern by decree through the Council of State, the members of which are representative of the Government, the armed forces and various other bodies.
The first elections under the new constitution were held on Feb. xi, 1968.
Production.-About three-quarters of the population are engaged in agriculture and cattle raising. Canned and frozen beef, timber, tobacco, cotton, soya, edible oils and essential oils are the main exports. The forests contain many varieties of timber which find good market abroad. Paraguay's hydroelectric power station at Acaray produces $90,000 \mathrm{~kW}$. of which $\square$ surplus is exported to Argentina and Brazil.

Brazil and Paraguay are carrying out a project to develop the potential of the River Paranà-annual output is planned at 10.7 million kWh . Similarly, Paraguay and Argentina are to develop the hydroelectric complex at the Yacyreta rapids. This has a potential annual output of 3.5 million kWh . Work on the Itaipu hydroelectric scheme began early in 1976 and work on the Jacyretá scheme is scheduled to begin in 1978 .

Communications.-A railway, 985 miles in length, connects Asuncion with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). This service is liable to
cancellation without warning when the river is low or in flood. There are direct shipping services between Hamburg, Antwerp, Amsterdam and Asunción; New York, Philadelphia, Baltimore and Asunción; and Liverpool, London and Asunción. Eight airlines operate services from Asunción.

There are 8 xo km . of asphalted roads in Paraguay, connecting Asunción with São Paulo ( 26 hrs.) via the Bridge of Friendship and Foz de Yguazú and with Buenos Aires ( 24 hrs .) via Puerto Pilcomayo, and about 4,050 miles of earth roads in fairly good condition, but liable to be closed or to become impassable in wet weather. A 1000 km . unpaved road links Asunción with the Bolivian border. There are services to Buenos Aires, São Paulo and Paranagua, y port on the Brazilian coast.

Defence.-There $\quad$ permanent milltary force of about 14,000 all ranks, most of whom are conscripts doing their military service; and about 6,500 armed police (again mostly conscripts). Three gunboats and a number of small armed launches patrol inland waters.

Language and Literature.-Spanish is the official language of the country but outside the larger towns Guarani, the language of the largest single unit of original Indian inhabitants, is widely spoken. Four morning, one afternoon and three weekly newspapers published in Asunción.

Education.-In 3976 there were 2,850 primary schools. They had 35,200 teachers and 458,000 students. The National University in Asunción had in 1976 teaching staff of $x, 125$ and 9,280 students. The Catholic University had $\mathbf{4 , 5 6 0}$ students and about 438 teachers.

## Peruvian Embassy and Consulatr

52, Sloane Street, S. W. I
[or-235 1917]
Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Don Adhemar Montagne ( z 969 ).
Minister, Sr. Dr. Don Alejandro San Martin Caro. Naval Attaché, Rear-Adm. Juan Equsquiza.
Air Attaché, Maj. Gen. José Aste.
Area and Population.-Peru is maritime Republic of South America, situated between $0^{\circ} 00^{\prime} 48^{\prime \prime}$ and

$18^{\circ} 3 x^{\prime} 00^{\circ}$ S. latitude and between $68^{\circ} 39^{\prime} 27^{\prime \prime}$ and $88^{\circ} 20^{\prime} \times 3^{\prime \prime} \mathrm{W}$. longitude. The of the Republic including 4,440 square kilometres of the Peruvian section of Lake Titicaca and $3^{2}$ square kilometres of the coastal islands, is about 531,000 square miles with total population (census, 1972) of $14,12 \pi, 564$ -

Physical Features.-The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being Huascaran ( 22,211 feet), Huandoy ( 20,855 feet), Ausangate ( 20,235 feet), Misti volcano ( 18,364 feet), Hualcan ( 20,000 feet), Chachani ( $\mathbf{x 9 , 0 3 7}$ feet), Antajasha ( $\mathbf{1 8 , 0 2 0}$ feet), Pichupichu ( $\mathbf{x 7 , 7 2 4}$ feet), and Mount Meiggs ( $\mathbf{x}, 55^{8}$ feet).

There are three main regions, the Costa, west of the Andes, the Sierra or mountain ranges of the Andes, which include the Punas or mountainous wastes below the region of perpetual snow and the Montana, or Selva, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population.

In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas mu bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.-Peru was conquered in the early 16th century by Francisco Pizarro (born 8478 , died 1541). He subjugated the Incas (the ruling caste of the Quechua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of $182 \mathrm{x}-1824$ established its independence, declared on July 28, 182x. The constitution rests upon the fundamental law of Oct. 18 , 1856 . (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The Constitution provides for the election for six years of a President by direct vote of the people and of a Congress composed of a Senate and Chamber of Deputies.

Presidential and Congressional elections on $I$ basis of proportional representation were held on June 9 , 3963, and a new President, Sr. Belaúnde Terry, held office from July 28 until deposed by $I$ revolutionary junta on Oct. 3, x968, and sent out of the country. The junta appointed $=$ Cabinet composed of officers from the three armed services and named General Velasco - President. In a bloodless coup on August 29, 1975, Gen. Valasco was replaced by Gen. Francisco Morales Bermudez.

Production.-Agriculture employing 46 per cent. of the labour force accounted for only about 34.5 per cent. of the Gross Domestic Product in 1973. The chief crops are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat, barley, grapes and coffee. Mineral exports in 1974 were valued at U.S. $\$ 562$, ro3,000 and included lead, zinc, copper, iron ore and silver.

Peru is normally the world's largest exporter of fishmeal. The value of fishmeal exports dropped from U.S. \$267,000,000 in $197 x$ to U.S. $\$ 233,254,000$ in 1972 and U.S. $\$ 35,894,000$ in 1973 because of adverse climatic conditions, but is now recovering.

Communications.-In recent years the coastal and sierra moin. have been opened up by means of
roads and air routes and there is air communication, well communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazll, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the Andean Highway from the Pacific port of Callao, via Lima, Oroya, Cerro de Pasco ( $\mathbf{x} 4,700 \mathrm{ft}$.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, forms $\quad$ link between the Pacific, the Amazon and the Atlantic. The trunk road iwn through the Boqueron del Padre Abad, ir pass rediscovered un July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout.

The first rallway w opened in 8850 and the 2,400 miles of track are now administered by the Government. There is also steam navigation on the Ucayali (see Andean Highway above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and number of international services call at Lima.
Defence.-The Army is recruited by voluntary enlistment, supplemented by conscription (z years), and numbers about 45,000 of all ranks. Armoured units are equipped with American, Russian and French vehicles. Engineer units are employed on the construction of roadways in Peru using American equipment. Navy.-The Navy consists of 3 cruisers; 4 destroyers; 2 frigates; $\quad$ corvettes; U.S. submarines and 2 German submarines, the latter added to the fleet in 1974 and 1975; 4 LST's; 5 river gun-boats; 4 fleet oilers; 4 fleet auxiliaries; z river transports; $x 4$ patrol boats; - patrol launches; I floating dock and $\mathbf{z}$ tugs. The main Naval base is in Callao and supports all ships of the Fleet. There are training establishments in Callao and La Punta. The Naval Air Arm consists of U.S. and French helicopters: U.S. anti-submarine aircraft and $\mathrm{DC}_{3}$ 's. Air Force. - The Air Force is equipped with British Hunter and Canberra aircraft; American training, fighter and transport aircraft plus helicopters; French Mirage aircraft and Alouette helicopters. There are military airfields at Talara, Piura, Críclayo, Lima, Pisco, Joya, Iquitos and Arequipa plus $n$ seaplane base at Iquitos. There are also a Civil Guard and a Republican Guard whose members number respectively 30,000 and 5,000 .
Education.- Education is compulsory and free for both sexes between the ages of 6 and 15 . In 1972 a new Law of Education radically changed the structure of the system. There are to be three levels: Initial (up to 6 years), Basic ( $6-15$ years) and Higher (over 15 years). Basic education corresponds approximately to the former Primary and Secondary level pupils. In 1975 there were 3,729,028 pupils attending in the normal basic level of education. State basic education schools numbered 19,167 with x06,496 teachers. Technical education numbered 250,788 pupils, 377 schools and ro,320 teachers. Private basic schools numbered 3,517, teachers $\mathbf{1 x , 5 3 5}$ and pupils 376,169. A new system of Higher Schools of Professional Education is being developed to cater for pupils from 15 years to 18 or 19 years. In 1975 there were 9 such schools, with 234 teachers and 5,523 pupils. These schools will replace the top three classes of the former secondary school ( $\mathbf{x} 6-18$ years) and from them pupils may enter University. In 1975 there were state ( 34,979 students) and II private ( $5 \mathrm{r}, 53^{2}$ students) Universities in Peru: 14 of the universities are located in Lima: the oldest, San Marcos, was founded in 155 r.

Language and Literature. - Spanish, the language of the original Spanish stock from which the
governing and professional classes are mainly recruited, was formerly the only official language of the country. However, in May 1975, the Quechua language was declared by Decree Law as the second official tongue. Quechua and Aymara are widely spoken by more than half the population of the country. Before the arrival of Pizarro, the Incas had attained $=$ high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 182 x was pillaged by Chileans in the Pacific War of 1879 -1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1976 there were 7 main morning papers, including the official gazette El Peruano, one afternoon paper daily and about 50 provincial papers.

Finance. - The unit of currency is the Sol of roo centavos. For rate of exchange, see p. 84.
x973-74 (two years)
Public revenue. Soles $843,219,000,000$
Public expenditure
146,219,000,000
In 1975, Peru's balance of payments deficit was U.S. $\$ 565,077,000$.

Trade.-Import trade of Peru in 1975 totalled U.S. $\$ 2,491,000,000$ and exports U.S. $\$ 1,378,460,000$.
Trade with U.K.
 Exports to U.K....... $28,794,000$

41,900,000
The principal imports are machinery, foodstuffs, metal and manufactured metal goods, chemicals and pharmaceutical products. The chief exports are minerals and metals, fishmeal, sugar, cotton and coffee.

Capital.-Metropolitan Lima (including $\Psi$ Callao), population $3,595,000$. Arequipa ( $561,33^{8)} \quad \Psi$ Iquitos $(540,560), \quad \Psi$ Chiclayo ( 533,266 ).

FLAG.-Three vertical bands, red, white, red; coat of arms on white band. National Day.-July 28 (Anniversary of Independence).

Ambassador Extraordinary and Plenipotentiary, His Excellency José Manuel Stilianopoules y Estela (1977).

Minister-Counsellor, Pablo A. Araque.
Armed Forces Attaché, Capt. Artemio Tadiar.
Area and Population.-The Philippines are situated between $21^{\circ} \quad 20^{\prime}-4^{\circ} \quad 30^{\prime} \mathrm{N}$. lat. and $116^{\circ} 55^{\prime}$ $126^{\circ} 36^{\prime}$ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 1 I4,834 square miles, of which total ro6,914 square miles are contained in the eleven largest islands, the 7,079 other islands having is combined area of 7,929 square miles.
The principal islands are:-

| ame | sq. miles | Name | miles |
| :---: | :---: | :---: | :---: |
| Luzon. | 40,422 | Mindoro | ..3,759 |
| Mindana | -36,538 | Leyte. | 2,786 |
| Samar. | 5,050 | Cebu. | r,703 |
| Negros. | 4,906 | Bohol |  |
| Palawan. | . 4,550 | Masbat | 62 |

Panay............ 4, 4, 450
Masbate. . . . ..... I, 262
Other groups in the Republic are the Sulu islands (Capital, Jolo), Babuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines was estimated at the end of 1975 at $42,759,000$.
The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Moslems, in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000 , and other much smaller forcign communities, notably Spanish, American and Indian.

The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas", after the son of the King of Spain, and in $\mathbf{x 5 7 5}$ the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 2764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the SpanishAmerican War of 1898 rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May x; 1898), Manila was captured by American
troops with the help of Filipinos, on Aug. $\mathbf{2 3}, \mathbf{3 8 9 8}$, and the Islands were ceded to the United States by the Treaty of Paris of Dec. 10, 2898 . However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899 , against the U.S. Government, maintaining a desultory rebellion until it was quelled in 1902 . Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946 with a presidential form of government based on the American system. On January $\mathbf{1 7}, 1973$, a revised constitution, providing for I parliamentary form of government with a unicameral legislative, was proclaimed after its ratification in national referendum. Since September 2x, 1972, however, the country has been under martial law: the President, who has also assumed the position of Prime Minister under the new constitution, has postponed indefinitely elections for the new National Assembly, while he attempts to carry out a programme of social reforms. In the meantime government functions by presidential decrees.

Language and Literature.-The official languages are Pilipino and English. Pilipino, the national language, is based on Tagalog, one of the MalayPolynesian languages which according to the 1960 census is spoken by 44 per cent. of the population. English, which is the language of government and of instruction in secondary and university education, is spoken by at least 40 per cent. of the population. Spanish, which ceased to be an official language in 1973, is now spoken by only 2 per cent. 73 per cent. of the population are literate. There is a National Library in the capital with branches in other urban centres and a flourishing press. Education accounts for about 30 per cent. of local expenditure in the national budget. Secondary and higher education is extensive and there are 37 private universities recognized by the Government, including the Dominican University of Santo Thomas (founded in $\mathbf{x 6 r 1}$ ), the first in the Far East and 25 years older than Harvard; there are also 6 State-supported universities, including the University of the Philippines, founded 1go8. Students at private and state

colleges and universities in $1975-76$ numbered 1,421,530.

Roads and Railways.-Communications suffered serious damage during the War of $194 \mathrm{I}-45$ owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system is undergoing rehabilitation and extension and, including all types of services, covered 74,768 kilometres in 1972. In 1974 there were 792,253 road vehicles registered. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 740 miles are still operated. The Philippine National Railway, on Luzon Island, has been converted to diesel traction.

Shipping.-There are 92 ports of entry in the Philippines and 3,377 vessels of various types, totalling 591,443 tons, are engaged in inter-island traffic. There are $\mathbf{5 4}$ ocean-going vessels regis-, tered in the Philippines, totalling 740,233 gross tons.

Civil Aviation.-Air transport plays a key part in inter-island travel and an important one in communications overseas. The Civil Aeronautics Administration (C.A.A.) operates and maintains 70 national airports. Phillippine Air Lines have regular flights to Hong Kong, Taipei, Sydney, Singapore, and Tokyo and operate four transPacific flights a week to San Francisco, in addition to inter-island services. Air Manilla (Inc.) also operate charter international and local air services.

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber. There is, however, an increasing number of manufacturing industries and it is the policy of the Government to diversify its economy.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, bananas, embroideries and tobacco.

CapITAL.- $\Psi$ Manila, in the island of Luzon: population (x975): City area, $5,438,253$; Manila with suburbs (incl. Quezon City, Pasay City, Caloocan City, Makati, Parañaque, San Juan Mandaluyong and Navota), $3,356,404$. The next largest cities are $\Psi$ Cebu $(418,517)$, $\Psi$ Davao ( 515,520 ), $\psi$ Iloilo ( 247,956 ), , $\psi$ Zamboanga ( 240,066 ), and Bacolod ( 196,492 ).

Area and Population.-In 1939 the area of the Polish Republic was 150,572 square miles with a population of about $35,000,000$, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3 , 1950, the population had fallen to $24,977,000$ in an area of 121,000 square miles. In 1975, it was estimated to be $34,186,000$. Roman Catholicism is the religion of 95 per cent. of the inhabitants.

Government.-The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 19I8, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznania and Polish Pomerania, Austria acquired Galicia and the

small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into treaty with Poland (France had done so in 192x) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17 , 1939, Russian forces invaded eastern Poland and on September 21, 2939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused In the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952, and was modified in February 1976. It changed the title of the country to the Polish People's Republic (Polska Rzeczpospolita Ludowa). It made no provision for a President of the Republic, whose functions were to be jointly exercised by $\quad$ Council of State. Private ownership of land and freedom of religion were recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyniski. Dissatisfaction with the régime and conditions of life led to riots in Poznań in June, 1956, and subsequently M. Wladyslaw Gomulka, who had been expelled from the Party in 1949 , was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszynski was allowed to resume his functions. In Jan., 1957, elections to the Sejm were held and in Feb., 1957, 1 reconstructed Government, still led by M. Cyrankiewicz, took office. Elections to the Sejm have been held in 196x, 1965, 1972 and 1976. The expression of severe popular discontent in December 1970, in the form of rioting in the northern parts of Gdansk, Gdynia and Szczecin led to the ousting of Gomulka, and substantial Government and Party changes followed. Edward Gierek succeeded - First Secretary. In Jume 1976 the government introduced steep price rises for food stuffs but after strikes and riots in number of Polish cities, notably Radom and Ursus, these proposals were dropped.

Education.-Elementary education (ages 7-15) is compulsory and free. Secondary education is optional and free. There are universities at Krakow Warsaw, Poznan, Lódź, Wroclaw, Lublin and Toruí and a considerable number of other towns.

Language and Literature.-Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being used. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543 ). A national school of poetry and drama survived the dismemberment and the former era of romanticism, whose chief Polish exponent was Adam Mickiewicz, was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz ( I 846 -1916), Nobel Prize-winner for Literature in 1905 , Boleslaw

Prus ( 8847 -1912), and Stanislaw Reymont ( 1868 1925), Nobel Prize-winner in 1924. There are now 42 daily papers published in Poland, Ix of them in Warsaw.

Production and Industry.-On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 99 per cent. of Polish industry is stated to be "socialized ", but $74^{\prime}$ x per cent. of agricultural land is privately farmed.

## Embassy in London <br> ix Belgrave Square, S.W.I [0I-235 533I]

Ambassador Extraordiniry and Plenipotentiary, His Excellency Dr. Armando Martins (x977).
Counsellor, Sr. J. D. N. Barata, O.B.E.
and Secretaries, Dr. J. M. G. Salgueiro, Dr. A. Almeida Fernandes.
Area and Population.-Continental Portugal occupies the western part of the Iberian Peninsula, covering an area of 34,000 square miles. It lies between $36^{\circ} 58^{\prime}-42^{\circ} 12^{\prime \prime} \mathrm{N}$. lat. and $6^{\circ} 1 \mathrm{I}^{\prime} 4^{8^{\prime \prime}-9^{\circ}}$ $29^{\prime} 45^{\prime \prime}$ W. long., being 302 miles in length from N. to S ., and averaging about 117 in breadth from E. to W. The population (including the Azores and Madeira) of $8,613,125$ (1970 census) has been swollen by the arrival since 1974 of approximately $600,000-700,000$ refugees from the former colonics.

New statutes granted greater autonomy to the North Atlantic islands of the Azores and Madeira in 1976.

Government.-From the eleventh century until xgio the government of Portugal was monarchy. and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822 . In rgio an armed rising in Lisbon drove King Manoel II and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government.

After the fall of the monarchy in 1910, a period of great political instability ensued until eventually the military stepped in. In 1928 Dr. Salazar was appointed Finance Minister, with very wide powers, and in 1932 he became Prime Minister. The Constitution of 1933 gave formal expression to the corporative "Estado Novo" (New State) which he came to personify. Dr. Caetano succeeded Salazar as Prime Minister in 1968 but his failure to liberalize the régime or to provide any alternative to continuing the wars in the African colonies resulted in his government's overthrow by a military coup on April 25, 1974. The next two years were characterized by great political turmoil. No fewer than 6 provisional governments held office between April 1974 and July 1976. The first post-coup President, General Spinola, resigned in September 1974, and was succeeded by General Costa Gomes, who remained in office until a presidential election was held in 1976.

During 1975 Communist and other extreme left elements, both civilian and military, made determined and repeated attempts to control the Government. The political situation was confused and unstable for most of the year, but with the failure of nit attempted coup by the extreme left in November 1975 the situation began to become more stable. Elections for a Constituent Assembly were held on April 25, 1975, and for the Assembly of the Republic on April 25, 1976. Both showed that the Communists and the extreme left generally lacked wide support among the population. In the April, 1976 Legislative Assembly elections the Socialist Party of Dr. Mário Soares won the largest number of votes ( $34 \cdot 97$ per cent. of the total). In local elections held on Dec. 12, of that year the Socialist Party was again victorious, with $33^{2} 24$ per cent. of the votes. General Ramalho Eanes was elected President on June 27,2976 , with $6 x \cdot 54 \%$ of the vote.

Defence.-All physically fit males are liable for
military service, but conscription is becoming increasingly selective as the armed forces are being greatly reduced following the end of the colonial wars, and reorganized and re-equipped for a conventional national defence rôle. The present strength of the Army is about 33,000 . One brigade is carmarked for N.A.T.O. service. The Navy consists of about 12,000 officers and men, including 2,000 marines, manning about 7o craft of varicus types, many of which are obsolete. The present serving strength of the Air force is about 9,000 , (including paratroops) and about 200-300 aircraft of various types.

Education is free and compulsory for six years from the age of 7 . Secondary education is mainly conducted in State lyceums, commerciai and industrial schools, but there are also private schools. There are also military, naval, technical and other special schools. There are old established Universities at Coimbra (founded in 1290), Oporto and Lisbon. Three new Universities have been established at Lisbon, Braga and Aveiro.

Language and Literature.-Portuguese is ERomance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil, and is the lingua franca of Angola, Mozambique and Guinea-Bissau.

Portuguese language and literature reached the culminating point of their development in the Lusiadas (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camoes), born in 5524 , died in 1580 . Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is flourishing.

Newspapers and Broadcasting.-Many new newspapers have sprung up since 1974 and there are now so main daily newspapers in Lisbon and 3 in Oporto, and 3 main weekly newspapers. Most have been losing money and the Government has announced plans for a radical reorganization of the newspaper industry. There are a TV channels (both black and white) and 5 radio stations ( 3 state controlled) broadcasting nationwide.

Civil aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There are direct flights between London and Faro in the Algarve.

Agriculture. - The chief agricultural products are cork, maize, wheat, rye, rice, oats, barley, potatoes, beans, onions, olives, oranges, lemons, fies, almonds, tomatoes, timber, port wine and table wines. There are extensive forests of pine, cork, eucalyptus and chestnut covering about 20 per cent. of the total area of the country.

Industry.- The country is so far only moderately industrialized, but is fairly rapidly extending its industries. The principal manufactures, some of which are still protected by high tariffs, are textiles, clothing and footwear, machinery (including electric machinery and transport equipment), foodstuffs (tomato concentrates and canned fish), chemicals, fertilizers, wood, cork, furniture, cement, glassware and pottery. There is a modern steelworks, and two modern and very large shipbuilding and repair yards at Lisbon and Setúbal working mainly for foreign ship-owners. There are several hydro-electric power stations and a new thermal power station. Minerals.-The principal mineral products are pyrites, wolfram, tin, iron ores, copper and sodium and calcium minerals.

Finance.-Portugal is member of the European Monetary Agreement, the World Bank, the International Monetary Fund and the International

Finance Corporation. The country has substantial, but declining, gold and foreign exchange reserves. The $197^{6}$ Budget showed a deficit of Escudos 34,778 million. Total revenue, Escudos $\mathbf{x o 5 , 5 2 5}$ million; expenditure Escudos 70,743 million.

Currency.-Escudo (of roo Centavos). Conto consists of $x, 000$ escudos. The rate of exchange (July 1976) Was Escudos $55 \cdot 50=\mathcal{L} I$ (see also D. 83 ).

Trade.-Total trade of Portugal in 1975 amounted to imports valued at Escudos 97,692 million and exports valued at Escudos 49,310 million. The British share of the Portuguese import market amounted to 8.7 per cent. and the United Kingdom imported $21 \cdot 3$ per cent. of all Portuguese exports.

Portugal is a member of EFTA, GATT and OECD. Portugal has signed - Trade Agreement with EEC and the Government has announced its intention of achieving full membership of the E.E.C. The principal imports are cereals, meat, raw and semi-manufactured iron and steel, industrial machinery, chemicals, crude oll, motor vehicles, dried cod fish and raw materials for textiles.

The principal exports for 1975 were textiles, foodstuffs, timber, cork, diamonds, electrical and other machinery, and chemicals.

## BRITISH EMBASSY Lisbon

Ambassador Extraordinary and Plenipotentiary, His Excellency The Lord Moran, C.M.G. (1976). British Council Representative, M. G. Elterton.

## MADEIRA AND THE AZORES

Madeira and The Azores are two administratively autonomous provinces of Portugal, having locally elected Assemblies and Governments.

Madeira is a group of islands in the Atlantic Ocean about 520 miles south-west of Lisbon, and consist of Madeira Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles with a population of 253,220 ( 1970 ). $\Psi$ Funchal in Madeira, the largest island ( 270 square miles), is the capital, with a population of 54,068 ; Machico (10,905). Trade with U.K., 1972: Imports from U.K., $£ 1,745,000$; Exports, $£ 866,000$.

The Azores are a group of 9 islands (Flores, Corvo, Terceira, São Jorge, Pico, Faial, Graciosa, São Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and in population of 291,028 (1970). $\Psi$ Ponta Delgada, the capital of the group, has a population of 21,347 . Other ports are $\psi$ Angra, in Terceira, $(56,476$ ) and 4 Horta ( 2,509 ). Trade with U.K., 1972: Imports from U.K., $£ 609,000 ;$ Exports, $£ 63,000$.

## PORTUGUESE OVERSEAS PROVINCES

The former Portuguese overseas territories of Guinea-Bissau, Mozambique and Angola achieved independence in 1974, 1975 and 1976 respectively.
$\Psi$ MACAU, in China, on an island in the Canton

River, has an area of 5 square miles and $=$ population (1970) of $248,3 \times 6$.

After some months of confused fighting between rival indigenous factions, portuguese Timor (the eastern part of the island) was incorporated into Indonesia in July 1976. Situated in the Malay Archipelago, it has an area of 7,329 square miles, with a population (1970), 6ro,541. Capital, $\%$ Dili, pop. 7,000.

## QATAR

Amir of Qatar, H.H. Sheikh Khalifa Bin Hamad AlThani; assumed power February 22, 1972 (also Prime Minister).

## Council of Ministers

Minister of Defence and Heir Apparent, Sheikh Hamad Bin Khalifa Al Thani.
Minister of Education, (vacant).
Foreign Affairs, Shaikh Suhaim Bin Hamad AlThani.

Ambassador Extraordinary and Plenipotentiary, His Excellency Shaikh Ahmed Bin Saif Al-Thani.
Counsellor, Ahmed Abdullah Al-Khal.
Until r97x, Qatar was one of the nine independent Emirates in the Arabian Gulf in special treaty relations with the Government of the United Kingdom. In that year, with the withdrawal of H.M. Forces from the area, these special treaty relations were terminated. On April z, 1970 Provisional Constitution for Qatar was proclaimed, providing for the establishment of a Council of Ministers and for the formation of a Consultative Council to assist the Council of Ministers in running the affairs of the State. The first Cabinet was formed of ro members on May 29, 1970. Qatar is a member of the Arab league as well as of the United Nations.
The state of Qatar covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about $4,000 \mathrm{sq}$. miles, with I population estimated in 1975 at about 180,000 .
The great majority of the population is concentrated in the urban district of the capital Doha. Only a small minority still pursue the traditional life of the semi-nomadic tribesmen and fisherfolk. There are townships on the coast at Khor, Dukhan, Wakra and Umm-Said. Although Qatar is a desert country, there are many gardens and farms near Doha and to the North and encouragement is being given to the development of agriculture.

Doha is an expanding town with good shopping facilities and services and in airport built to international standards. Regular air services connect Qatar with Bahrain and the United Arab Emirates, Kuwait, Muscat, Iran, Saudi Arabia, Jordan, Syria, Lebanon, Egypt, the Indian sub-continent and Europe.

In April, 1973 , the new Qatar Riyal was introduced. It is tied to the U.S. dollar. During 1977 the exchange rate was approx. $Q R 6^{\prime} 75=£ \mathrm{I}$.

Current industrial development projects include a fertilizer plant, a cement factory, and a natural gas liquids plant. In addition the government is developing an iron and steel and ore reduction plant, and a petrochemical complex. The township of Umm-Said is being developed as an industrial area. Qatar is also rapidly expanding its infrastructure including electrical generation and water distillation, roads, ports, hotels, houses, and Government buildings.

The Qatar Broadcasting Service transmits on medium, shortwave, and V.H.F. Regular television transmissions in colour began in 1974 and a second channel is planned.

The Qatar General Petroleum Corporation is the state-owned company controlling Qatar's interests in oil, gas and petrochemicals. Its wholly-owned subsidiary, the Qatar Petroleum Producing Authority, is responsible for Qatar's oil production of about 450,000 b.p.d. through its two operational divisions; Onshore (formerly the Qatar Petroleum Company, or consortium which first shipped oil in 1949 and was taken over in 1976) and Offshore (formerly Shell Company of Qatar which was taken over in February 1977). Explorations continue for further oil and also in connection with large reserves of natural gas.

Ambassador Extraordinary and Plenipotentiary, His Excellency Pretor Popa (1973).
Counsellors, Ioan Amariei (Political); Adrian Gheorghiu; Nicu Bujor (Political).
Military Attaché, Col. Cornel Popa.
Area and Population.-Rumania is $\quad$ republic of South-Eastern Europe, formerly the classical Dacia and Scythia Pontica, having its origin in the union of the Danubian principalities of Wallachia and Moldavia under the Treaty of Paris (April, 1856). The area of Rumania is $237,500 \mathrm{sq} . \mathrm{km}$. and the population in January, 1977 was $21,559,416$.
Government.-The principalities remained separate entities under Turkish suzerainty until 1859 , when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 3866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the Treaty of Berlin (July 13,5878 ) the Principality was recognized as an independent State, and part of the Dobrudja (which had been occupied by the Rumanians) was incorporated. On March 37, 188x, it was recognized as $\overline{\text { it Kingdom. }}$
The outcome of the War of 1914-18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crisana-Maramures, these additions of territory being confirmed in the Treaty of St. Germain, $19 \mathrm{x9}$, and the Treaty of Petit Trianon, 2920.
On June 27,3940 , in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about $20,000 \mathrm{sq}$. miles, with a population of about $4,000,000$.
In August, 1940 , Rumania ceded to Bulgaria the portion of Southern Dobrudja (about 3,000 sq. miles) taken from Bulgaria in 1913 . Rumania became "The Rumanian People's Republic" in December, 1947, on the abdication of King Michael.

A new Constitution, modelled the Sovict Constitution of 1936 , was adopted unanimousiy nill September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in February, 1957; in March, 196r, and in March, 1965. A new Constizution was approved by the Grand National Assembly in 1965 when the name of the state was changed to The Socialist Republic of Rumania. The Constitution states (Art. 3) that the leading political force of the whole society is the Rumanian Communist Party. The Constitution was modified in March, 1974.
Agriculture.-The soil of Wallachia and Moldavia is among the richest in Europe producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax and hemp. Agriculture and sheep and cattle raising are the principal industries of Rumania, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive, and the timber industry is important.

Socialization of agriculture was completed when plans for collectivization were fulfilled in the spring of $x 962$, some three years ahead of the planned date.

Natural Resources and Industry.-Before the war petroleum and agriculture were the backbone of the Rumanian economy. Though the production of both industries has increased, they no longer hold the same dominant position. Rumania's oil resources enabled her to produce $14,590,000$ tons of crude oil in 1975 and there are plentiful supplies of natural gas, together with various mineral deposits including coal, iron ore, bauxite, lead, zinc, copper and uranium in quantities which allow substantial part of the requirements of industry to be met from local resources. Since 1948 industrialization has proceeded rapidly and the State is well on the way to establishing a mixed industrial economy. Heavy investments have been made in electrical power, the chemical industry, the metallurgical industry and the engineering industry and growing attention is being paid to light industry. The economy is centrally organized on the basis of Five-Year Plans which cover all branches of national activity including investment and production.

1975 production figures were: crude oil, 14,590,000 tons; coal, $29,385,000$ tons; electric power, 53,72 m million kWh ; methane gas, 27,00x million cur. metres; steel, 9,549,000 tons; pig iron, $6,602,000$ tons; wheat, $4,912,200$ tons; maize, 9,240,700 tons; sugar-beet, 4,905,100 tons.

Language and Literature.-Rumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the Council for Socialist Culture and Education, which has the status of a Ministry. In 1976, 59 daily and weekly newspapers were published. The leading religion is that of the Rumanian Orthodox Church; the Roman Catholics and some Protestant denominations are of importance numerically. The Jewish community has declined through emigration.

Education is free and nominally compulsory, with $4,275,497$ in attendance in 1975-76, including 164,567 in higher education. There are Universitles at Bucharest, Iasi, Cluj, Timisoara, Craiova and Brasov. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galati and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

Communications.-In 1975 there were $13,039 \mathrm{~km}$. of railway open for traffic. The mercantile marine had a gross tonnage of $1,250,000$ tons in 1975. The principal ports are Constanta (on the Black Sea), Sulina (on the Danube Estuary), Galati, the most important, Braila, Giurgiu and Turnu Severin. Rumania is a member of the Danube Commission whose seat is at Budapest.

## RWANDA (Republic of Rwanda)

 President, Major General Juvēnal Habyarimana, assumed office, July 5 , 1973 .Rwanda became an independent republic on July 1, 1962. Formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, it has an area of $10,169 \mathrm{sq}$. miles and a population of $4,000,000$, mainly of the Bahutu tribe, with Batutsi and Batwa minorities. Coffee, cotton and tea are grown and there is some mineral production. Hides, extract of quinine and pyrethrum flowers are also exported.

A University was opened at Butare in 1963 .
The currency is the Rwanda franc. In 1975 total imports were valued at $R w . F r .8,3662,00,000$; total exports, Rw.Fr. $5,640,000,000$; imports from U.K. 1974, Rw.Fr. 226,700,000; exports to U.K., Rw.Fr. 9r,100,000. Revenue in 1975 totalled: Rw.Fr. ${ }_{13}, 2 \times 3,000,000$; Expenditure Rw. Fr. 14,447,000,000

At 1 referendum held in September, $196 x$, under supervision of the United Nations, $I$ large majority voted against the retention of the monarchy which was accordingly abolished on Oct. 2, 196x. Elections for a new Legislative Assembly were also held in September, 196x, and the Assembly clected M. Kayibanda as President of the National Council, to hold office as Head of State and Head of the Government. He was deposed in 1973, and replaced by a military government under Maj.-Gen. Juvénal Habyarimana. Admission of Rwanda to membership of the United Nations was approved on July 26, 1962.

## EL SALVADOR

(República de El Salvador)
President, Gen. Carlos Humberto Romero; elected February 1977; assumed office July x, 1977, for a five-year term.
Vice-President, Dr. Julio E. Astacio.
Minister of Foreign Affairs, Mayor y Licenciado Alvaro Ernesto Martinez.

## Salvadorean Embassy and Consulate

16 Edinburgh House, 9B Portland Place, W.x. [0x-636 9563]
Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Manuel Arturo Calderón (r977). Area and Population.-The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with - general breadth of about 50 miles, and contains an area of 7,722 square miles with a population (Dec. 1975) of $4,210,400$. El Salvador is therefore a densely populated country with some 500 persons per square mile. It is divided into 14 Departments. (For Map, see p. 84.)

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano ( $7,700 \mathrm{ft}$.) and the San Vicente volcano ( $\mathbf{7 , 2 0 0} \mathrm{ft}$.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is I wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 3, 1965, when considerable damage was done to San Salvador.
The principal river is the Rio Lempa. There is a large volcanic lake (llopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

Government.-EI Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. Under new Constitution adopted in 1950, the President is elected for six years and the Legislature for two. In the legislative elections under proportional representation held in March, 1976, the result was, 54 deputies of the Official party were elected. The opposition did not participate. In the presidential elections held on February 20, 1977, the candidate of the Official Party, Gen. Carlos Humberto Romero, secured - wide margin over his opponent, Col. Ernasto Claramount Roseville. He took the oath as President on July $x$.
Agriculture.-The principal cash crops are coffee, which is grown under shade-trees principally on the slopes of the volcanoes, cotton, which is cultivated on the coastal plains, and sugarcane Also cultivated are maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and cereal bags. Diversification and modernization of agriculture are in progress, including the exportation of meat, principally to the U.S.A.
Industry.-There is growing industrialization and existing factories make textiles, constructional steel, furniture, cement and household items. El Salvador is a leading exporter to the Central American

Common Market, of which she is a member. The first trade zone was inaugurated in November 1974 and the National Assembly approved ${ }^{\text {and }}$ new port Development Law. The free-trade scheme has already attracted several industries.

Education.-The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature. -The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There - 4 daily newspapers published ${ }^{-1}$ the capital, and 4 in the provinces.

Communications.-The former El Salvador Railways and the Salvadorean Section of International Railways of Central America have been merged under the Executive Autonomous Port Commission (CEPA) which also administrates the previously foreign-owned port of Cutoco, at La Union. The new railroad organization is styled FENADESAL. There is continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The roads are paved and in good condition. There are good motor roads between Acajutla, the principal port, and the capital ( 23 miles), and between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. Pan American Airways, TACA, LANICA, COPA, AVIATECA, SAM, Iberia and LACSA connect El Salvador with the rest of the world. British Airways, SABENA, Iberia and other important airway companies are represented in San Salvador. The llopango international airport can receive jet aircraft. The new Cascatlán Airport is expected to be finished in 1979.

There are post and telegraph offices throughout the country. There are many broadcasting stations and six television stations.

## SAN MARINO (Repubblica di San Marino) Regents, Two "Capitani Reggenti". Consulate General london Saxone House, 74 A Regent St., W. I. Consul General, Sir Charies Forte. Vice-Consul, R. E. Rudge.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by - pious stonecutter of Dalmatia in the 4 th century. The Republic always resisted the Papal claims, and those of neighbouring dukedoms, during the 15th-18th centuries, and its integrity and sovereignty is recognized and respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Heads of State. The Great and General Council, a legislative body of 60 members, is elected by a universal suffrage for a term of 5 years. A Council of Twelve forms in certain cases a Supreme Court of Justice. The area is approximately 23 square miles, the population (June, 1973) is 21,000. The city of San Marino, on the slope of Monte Titano, has three towers, - fine church and Government palace, theatre and museums. The principal products are wine cereals, and cattle, and the main industries are ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Rebublic of San Marino has been in force since 1899 .

Flag.-Two horizontal bands, white, blue (with coat of EIM of the Republic in centre).

Electricily and Industry, Dr, Ghazi Abdul Rahman al-Qusaibi.
Ministers of State, Shalkh Muhammad Ibrahim Mas'oud; Dr. Muhammad al-Amran; Dr. Muhammad Abdul Latif al-Melhem.

## Savdi Arabian Embassy 30 Belgrave Square, S.W.r. [0x-235 083x]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sheikh Faisal Alhegelan ( $\mathbf{x} 976$ ). Counsellor, Salem Azzam, c.v.o.
3st Secretaries, Saleh al-Fouzan; Yasien Khalil Allaf; Farouk M. O. Taurik; Amin Malki; Abdullah O. Barry; Abdullah Naif Mohamed Al-Rajhi. Defence Attaché, Maj.-Gen. Mohammad Sabri.
Cultural Counsellor, Abdul Aziz Mansour Al-Turki. The Kingdom of Saudi Arabla, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd becoming also King of the Hijaz. By the Treaty of Jedda (May 20, 1927) Great Britain recognized Ibn Saud an independent ruler, King of the Hijaz and of Nejd and its Dependencies.
The total area of the Kingdom $W$ about 927,000 sq. miles, with a population (U.N. estimate, 1969 ) of $7,200,000$.
In the r8th century Nejd was in independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In r9zI he added to his dominions the territories of the Rashid family of Jebel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hijaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which Ii now part of the Kingdom.
Nejd ("Plateau") has wim definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at about $3,500,000$, the majority being Muslims of the Wahhabi persuasion. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3.000 acres, at al-Kharj, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oll was found in commercial quantities it Dammam, near Dhahran in the Hasa, in 1938, and in 1973 total production of crude oil for the whole country, including offshore concessions, averaged some 8,000,000 barrels per day. Exports other than oil are negligible, The capital is Riyadh ( 666,840 ), and the principal trading centres Hofuf (the chief town of the Hasa province) ( ( $\mathbf{x}, 27$ ) . $\Psi \mathrm{Al}$ Khobar ( 44,817 ) and $\Psi$ Dammam ( 127,844 ) on the Persian Gulf littoral, Anaiza, Buraida, Hail and Jauf. The old ports (Persian Gulr) were $\Psi$ Qatif, $\psi$ Uqair and $\Psi$ Al Khobar, which were suitable only for saling craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years lease, has bullt a deep-water port for its own purposes if $\Psi$ Ras Tannura, and a civil deep-water port, with a pier seven miles long, $1=$ brought into
 tion from Dammam through Hofuf to Riyadh.

The Hijaz ("The Boundary"-between Nejd 1 IT Tihama) extends from Asir in S. to Jordan in N., and from the Red Sea and the Gulf of 'Aqaba in Ini W. to the ill-defined boundaries of Central Arabla. The envel on the Red Sea labout 800
miles, and the total area is about 382,500 sq. miles, with I population of from $3,000,000$ to $3,500,000$, including many nomad tribes. On the coast inl the small ports of Al-Wajh, Yanba'u, Raabigh and Jizzan. Jedda contains the ruins of the reputed "t tomb of Eve, the mother of mankind": and inland are many settlements through which ane the cim of the disused Saudi-Arabian section of the Hijaz Railway. The Oasis of Khaibar, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kast Yahudi. The importance of the Hijaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (al Madinak al Munawwarah, "The City of Light "), waw the terminus of the Hijaz Rallway, 820 miles from Damascus, has a permanent population of about 137,000 and is celebrated the burial place of Muhammad, who died in the city be June 7.632 ( $x=$ Rabia, A.H. 15). The Mosque of the Prophet ( 500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 45 miles east of the seaport of Jedda, and about miles south of Medina, and has $\begin{aligned} & \text { a population estimated } \\ & \text { wis } \\ & 301,000 \text {. The }\end{aligned}$ city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muslim religion, in which is the black stone "given by Gabriel to Abraham ", placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. $x, 557,867$ Muslim pilgrims visited Mecca during the ten day "Haj" period in 1975. $\Psi$ Jedda $(56 \mathrm{r}, 104)$ is the principal port and commercial centre of Saudi Arabia. A pow deep-water port was completed in 197x.
Asir (" The Inaccessible ") extends, geographically, from a line drawn inland from Birk $i$ the southern limit of Hijaz to the northern boundary of the Yemen, some miles N. of the port of Meidi. Its breadth extends about $x 80$ miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. The territory ificludes the Farsan Islands, where prospectors have searched for oil, but without sufcess. The maritime lowland is interspersed with fertile in near the wadis, which afford pasturage and bear grain. Capital, Abha (30,150).
Finance and Trade.-Oil is the main source of the country's wealth, though customs revenues and other taxes, as well in the foreign exchange accruing from the annual Pilgrimage to Mecca, also bring in a significant income. In the fiscal year 1975-76 Revenue was $S R$ x $01,178,000,000$ and Expenditure $S R 77,489,000,000$. $57 \cdot 4$ per cent. of total Government expenditure was allocated to development projects. The rate of exchange was $S R 6 \cdot 05=6 \mathrm{I}$ (July 1977). (See also p. 84.) The currency is strong, and backed by gold and foreign exchange reserves, second only to West Germany, of $£ 27,000,000,000$. With few exceptions, such as the ban on alcohol, there are no restrictions on trade or payment including foreign exchange transactions. There is no public debt. Imports in 1975 were valued at $S R$ 27,000,000,000, the United States of America being the leading supplier followed by Japan, West Germany and the United Kingdom. Exports in 1975 were valued at $S R$ 100,800,000,000.

Trade with U.K.

1976
Imports from U.K... $£ 199,700,000 £ 400,400,000$ Exports to U.K..... 856,600,000 $978,500,000$

Communications.-The railway from the port of Dammam to the oilfields at Abqaiq and through Hofur to Riyadh wis opened late 1951. Metal-
led roads connect all the main cities in the northern half of the country, and a road linking Abha, in the south, to this network will shortly be opened. The Government-owned Saudi Arabian Airlines, in association with Transworld Airlines operate Lockheed Tristars, Douglas DC3, Convair 340, and Boeing 707,720, 737 and 747 aircraft. Scheduled services are flown to all the main towns of the country. There are first class airports at Dhahran, where new airport was opened in 1962, and at Jedda. A new airport is under construction at Jedda and a new airport is planned for Riyadh; other airports, for internal fights, are also in the planning stage. Saudi Arabian Airlines have an extensive overseas operation including $x_{7}$ flights to London per week. A large nember of international airlines operate into Jedda and Dhahran.
Education.-With four exceptions, all schools Government-run. In 1974 there were (including schools for both boys and girls) a total of 2,675 primary, 589 intermediate, 160 general secondary and xi vocational secondary schools. There are Islamic Universities in Medina and Riyadh and Universities in Jedda (with $I$ branch at Mecca), Riyadh and Dammam. There is a University of Petroleum and Minerals at Dhahran. Education at all levels is free.
CAPITAL-Riyadh, population about 666,840 .
SAudi Arabian Flag.-Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

## SEnegal Embassy in London If Phillimore Gardens, W.8. [01-937 0925]

Ambassador Extraordihary and Plenipotentiary, His Excellency Suliou Diodj-Faye,
Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea in the south. (For MAp, see p. 871.) It has an area of $77,814 \mathrm{sq}$. miles and $\quad$ population (estimated, 1976) of $5,000,000$.

Formerly French colony, Senegal elected on Nov. 25, 2958 , to remain within the French Community as an autonomous republic. Foundation of a Federation of Mali, to consist of the State of Senegal, (French) Soudan, Benin and Upper Volta, was announced in January, 1959, and the Federation came into existence on April 4, consisting of Senegal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20 , 1960. However, these arrangements proved short-lived as on August 22, 1960, the Senegal Legislative Assembly formally approved measures to secede from the Federation and continue as III independent state. In March, 1963 (after an attempted coup d'état by the then Prime Minister in the previous December) a new constitution was approved giving executive powers to the President, on the lines of the present French constitution. Senegal has recently adopted proportional representation, and I three-party system (under which the 'liberal', 'socialist' and 'marxist' positions are authorised to be represented by the P.D.S., P.S. and P.A.I. respectively). Senegal's principal exports meground-nuts (raw and processed) and phosphates.

[^34]of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya ( $z^{\circ}$ South latitude) to Cape Guardafui ( $12^{\circ} \mathrm{N}$.) ; and on the Gulf of Aden to the boundary with Diibouti. Somalia is bounded on the west by Dijbouti, Ethiopia and Kenya and covers an area of approximately $246,000 \mathrm{sq}$. miles. The population, of which a large proportion is nomadic, is estimated (March, 1977) at 3,200,000. Livestock raising is the main occupation in Somalia and there is E modest export trade in livestock on the hoof, skins and hides. Italy imports the bulk of the banana crop, the second biggest export under agreement with the Somali Government. Imports from U.K. in 1976 totalled $£ 5,628,000$.

Government. - The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July $\mathbf{x}$, s960. British rule in Somaliland lasted from 1887 until June 26,1960 , with the exception of a short period in 1940-4I when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 194i until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to an end on July $x$, 1960, when Somalia became independent and united with the former British Somaliland Protectorate under the title of the Somali Republic. Aden Abdulle Osman was returned to office as the first substantive President of the Republic in 196r, after a year $=$ provisional President. Following national elections on June 10, 1967, Dr. Shermarke suceeded to the Presidency and on July 6 appointed Mr. Egal as Prime Minister. On October 15, 1969, the President was assassinated and Army commanders assisted by the police took over the Government without resistance. A Revolutionary Council under Major. Gen. Siad assumed full control of the state. The Somali Revolutionary Socialist Party became the only legal political organization following its inaugural congress in June 1976. The Government thenceforth comprised $■$ Political Bureau, of five members including the President, and a central committee of 74 including zo Departmental Ministers.

Capital.- $\Psi$ Mogadishu (Mogadiscio), population (estimated 1971), 220,000. Other towns are Hargeisa ( 50,000 ), Kisimayu ( $x 8,000$ ), $\Psi$ Berbera ( 19,000 ) and Burao ( 10,000 ).

Flag.-Five-pointed white star on blue ground.
NATIONAL DAY.-July.

rst Secretaries, Miss C. M. C. Nicole; J. N. Fourie; W. Van W. de Vries.
and Secretary, Miss N. D. Theron.
Armed Forces Attaché, Maj.-Gen. H. R. Meintjes.
Naval Attaché, Capt. D. F. Silberbauer.
Air Attaché, Col. A. J. S. Van der Lith.
Area and Population.-The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Molopo and Orange Rivers ( $34^{\circ} 50^{\prime} 22^{\prime \prime}$ South latitude) to the Cape of Good Hope, with the exception of the Transkei, Lesotho, Botswana and Swaziland, and part of Mozambique. It has a total area of $1,880,042$ square kilometres ( 455,626 square miles) and the Transkei has an area of $41,000 \mathrm{sq} . \mathrm{km}$. ( $15,830 \mathrm{sq}$. miles) and a total population (census of May, 1970) of 22,469,000 (White 3,835,000; African, 15,98,000; Coloured, $2,074,000$ and Asian, 642,000 ). Midyear estimates for 1974 show a total population of $24,920,000$ (White, $4,160,000$; African, 37,745,000; Coloured, $2,306,000$ and Asian, 642,000 ). Populations of the Provinces at the $197{ }^{\circ}$ census were: Cape Province ( 278,380 sq. miles), $4,293,000 ;$ Natal ( $33,57^{8}$ sq. miles), $2,264,000$; Transvaal (zo9,62x sq. miles), $6,478,000$; Orange Free State ( 49,866 sq. miles), $x, 682,120$; African Homelands, $7,138,197$.

Zululand, annexed in 1897, comprises about twothirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean: the north by the ex-Portuguese possessions; and on the west by the districts of Babanango, Vryheid and Ngotshe and by Swaziland. In 1953, the appointment was confirmed of Cyprian Bekuzulu, grandson of Dinizulu and greatgrandson of Cetewayo, 居 Paramount Chief of the Zulus in Natal.

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Table Mountain ( 3,582 feet), while the Great Swartberg and Langeberg run in parallel lines from west to east of the Cape Province. Between these two ranges and the Roggeveld and Nieuwveld ranges to the north is the Great Karroo Plateau, which is bounded on the east by the Sneeuberg, containing the highest summit in the province (Kompasberg, 7,800 feet). In the east are ranges which join the Drakensberg ( $x$ x,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at I general elevation of some 3,800 fcet, with occasional hills or kopjes. The Transvaal is also maiuly uII elevated plateau with parallel ridges in the Magaliesberg and Waterberg ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Bankenveld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces. The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between the Territory of South West Africa and the Cape Province. The Limpopo, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Mozambique (Portuguese East Africa.) Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

Government.- The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, xgro, under the South Africa Act, 1909, in a legislative union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as a member of the British Commonwealth until 196 x . A referendum held among white voters on October 5, ro6o, decided by narrow majority in favour of Republican status. $x, 633,77^{2}$ votes were cast-a poll of $90^{\circ} 73$ per cent.-with $52^{\circ} 05$ per cent. in favour. The Union of South Africa became a republic on May 3x, 196x, and withdrew from the Commonwealth. On October 26, 1976, the Transkei became the first of the Bantu homelands to be given independence.
The Senate as reconstituted by the Senate Act, 1960, consists of 54 members, appointed or elected for a term of five years. Eleven are appointed by the Government ( 8 for the Republic, $■$ for South West Africa and a Coloured representative). Forty-three are elected (Transvaal, 34; Cape Province, 11; Natal and Orange Free State, each 8; and South West Africa, 2). The Act of 1960 reintroduced proportional representation at elections to the Senate and excluded Native representation.
The House of Assembly consists of 371 elected members, 55 of whom represent the Cape of Good Hope, 20 Natal, 76 Transvaal, 14 the Orange Free State, and 6 South West Africa. Members of both Houses must be South African citizens of white descent. White female franchise was introduced under the provision of Act No. 18 of 1930 . Cape Bantu voters ceased to be entitled to elect 3 members in Nov. 1959.
In June 1977 the party representation in the House of Assembly was as follows: Nationalist

Party, 122; United Party, 30; Progressive Reform Party, zz; South African Party, 6.

Defence. The South Africa Defence Act, 1957. became law on Nov. x, 1958. This Act, amended in 1963, provides that every citizen between the ages of 27 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of 240 days training with the Citizen Force or Commandos spread over II period of eight years. Thereafter citizens are required to serve with the Reserve for a prescribed period of time.

Education.-The Provinces have been relieved of all vocational education (technical and industrial), and the Departments of Cultural Affairs and Higher Education under the Minister in concerned with universities, technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools. State-aided vocational schools and State and State-aided special schools for the physically handicapped.

Communications.-The total open mileage of Government-owned railway lines at the end of March 1976 was $22,477 \mathrm{~km}$., of which 4.921 km . were electrified. Working expenditure (excluding depreciation) amounted to R.I, $836,05 \mathrm{I}, 548$ (railways, harbours, airways, pipelines and road transport). Internal air services are operated between all the major centres in South and South West Africa.

Production and Trade.-Final figures for the principal crops produced in 1976-77 were: Wheat, 2,015,000 metric tonnes; Maize 7,400,000 mt.; Barley, $63,000 \mathrm{mt}$.; Oats, roz,000 mt.; ground nuts, 106,000 mt.

Mineral production is of the greatest importance in the South African economy. Value of mineral production in 1976: gold, R.2,380, 775,000 ; diamonds, 7,295, 133 metric carats; silver, $R$. 10,617,725. Production in 1976: coal, 77,059,617 metric tonnes; copper, $x, 3$ rx, 894 rat.; tin, concentrates and metallic, $5,625 \mathrm{mt}$. ; asbestos, $369,840 \mathrm{mt}$.

Value of trade in 1976, Imports, R.5,886,350, 710: Exports, R.4,500,715,226.

## Trade with U.K. 1975

 1976 Exports to U.K.... 540,289,000
£645,363,000 Currency.-The South African o12,992,000 with the £ sterling in 1946. A new decimal currency the Rand ( $R$.) was introduced in South Africa on Feb. 14, 1961, with a par value of ros(50p). Sterling. Rate of exchange (July 1977) R.x $49=$ £r.

Finance.-Estimated revenue for the year ended March 3x, 1978, was RM7,404 (1977 RM6,455): total estimated expenditure $R \mathrm{M} 8,992$ ( 2977 RM7,792). The total government debit as at December 31, 1976 was RMiz,ro6.

Capital.-The administrative seat of the Government is Pretoria, Transvaal; population (census 2970), $563.3^{84}$; the seat of the Legislature is $\Psi$ CAPE TOWN, population ( 1970 ), $x, 107,764$. Cape Town is 5,979 miles from Southampton; transit by mail steamship 11 days, and by air mail two days. There is modern and well-equipped aerodrome seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, men in keeping with its status as a world port of commercial and strategic importance. Other large towns are Johannesburg. Transvaal ( $\mathrm{x}, 44 \mathrm{x}, 335$ ); $\Psi$ Durban, Natal, the largest seaport ( 350,935 ): $\Psi$ Port Elizabeth, Cape $(475,869)$; Germiston, Transvaal ( $22 \mathrm{x}, 972$ ); BLOEMFONTEIN, capital of Orange Free State ( 182,329 ); Springs, Transvaal ( $242,8 x 2$ ); Benoni Transvaal ( $25 x, 394$ );
$\psi$ East London, Cape ( 224,763 ); Welkom, O.F.S. (z10,629); and PIETERMARTTZBURG, capital of Natal ( $\mathbf{x} 60,847$ ).
Fiag.-Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full.
National Day.-May 3 3.

There mil British Consular Offices at Cape Town, Johannesburg, Durban, East London and Port Elizabeth.

## South West Africa

Administrator-General, Justice Marthinus Steyn.
South West Africa stretches from the southern border of Angola (lat. $17^{\circ} 23^{\prime}$ S.) to part of the northern (Orange River) and north-western borders of the Cape Province of the Republic of South Africa; and from the Atlantic Ocean in the west to Botswana in the east.

The territory has an area of $318,26 \mathrm{x}$ sq. miles, including the area of Waivis Bay ( 434 sq. miles) which, although part of the Republic of South Africa, is for convenience administered as part of South West Africa. The population 746,328 in 1970 (Census) and the main population groups are: Ovambo ( 342,455 ), Whites $(00,658)$, Damara ( 64,973 ), Kavango (49,577), Herero (49,203), Nama ( 32,853 ), Coloured ( 28,275 ), East Caprivians (25,009), Bushmen (21,909), Rehoboth Baster ( 16,474 ), Kaokovelders $(6,457)$, Tswana ( 3,7 19) and others ( $\mathbf{x} 4,766$ ).

Government.-A German protectorate from $\mathbf{1 8 8 0}$ to 19x5, South West Africa was administered until the end of 1920 by the Union of South Africa. In terms of the Treaty of Versailles the Territory wdeclared " "C" Mandate and entrusted to South Africa with full powers of administration and legislation over the Territory. After the dissolution of the League of Nations and in the absence of a trusteeship agreement, South Africa informed the United Nations that she would continue to administer South West Africa in the spirit of the Mandate. Since the establishment of the United Nations, South West Africa has been the subject ot dispute.

The South African Government announced on Oct. 2, 1968, the formation of a Legislative Council of 42 members for Ovamboland, six members nominated by each of the seven tribal authorities in the territory and a nominated Executive Council of seven members, with - Chief Councillor elected by the Legislative Council. Certain administrative powers ititil in South West Africa in February.

3969, transfered to the South African Government.
On June 3 , 397x, the International Court of Justice at The Hague delivered an advisory opinion inequested by the U.N. Security Council on the legal consequences for States of the continued presence of South Africa in "Namibia" (South West Africa). The Court decided by $x_{3}$ votes to $z$, that (inter alia) "the continued presence of South Africa being illegal, South Africa is under obligation to withdraw its administration from Namibia immediately and thus put an end to its occupation of the Territory". Dissenting opinions were submitted by the British and French judges; several other judges issued separate opinions in respect of parts of the Court's advisory opinion. A member of the South African legal team had contended at the hearings that South Africa had no obligation to submit to general international supervision of its administration of South West Africa, as the Mandate by the League of Nations had come to an end at the dissolution of that organization. The South African Prime Minister rejected the Court's majority opinion in - statement also made on June ar, x971. In September 1975 constitutional talks were begun in Windhoek between delegates from the II ethnic groups of the territory in order to determine the future of South West Africa.

Production and Education.-Mining, agriculture and fisheries are important. Animal husbandry accounts for 99 per cent. of the total gross output of commercial agriculture. The average rainfall over 70 per cent. of the Territory is below 400 mm . per annum. In 1970 there were 480 native schools, with 2,649 teachers and 107,572 Native pupils. For the Whites there were 83 schools with 1,155 teachers and 22,253 pupils.

## Spanish Embassy in London 24 Belgrave Square, S.W.I <br> [01-235 5555]

Ambassador Extraordinary and Plenipotentiary, His Excellency The Marqués de Perinat (1976).
Minister-Counsellor, Sr. D. Pedro Ortiz-Armengol. Area and Population.-A National State in the south-west of Europe, between $36^{\circ}-43^{\circ} 45^{\circ} \mathrm{N}$. lat. and $4^{\circ} 25^{\prime} \mathrm{E} .-9^{\circ} 20^{\prime} \mathrm{W}$. long., bounded on the south and east by the Mediterranean, ou the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrences. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles- $7 \times 2$ formed by the Mediterranean $\quad$ wl 605 by the Atlantic-and it comprises $n$ total mon of 196,700 square miles, with ${ }^{\text {p }}$ population (1975) of $35,47^{2,000}$. Returns for 1970 gave 656,103 births, $28 \mathrm{x}, 777$ deaths and 247,492 marriages.
Physical Features.-The interior of the Iberian Peninsula consists of in elevated tableland surrounded and traversed by mountain rangesthe Pyrenees, the Cantabrias Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, \&c. The principal rivers mi the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro and the Minho.

Government.-In April, 1931, the last monarch of Spain, Alfonso XIII, left the country; a Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, niw formed. The Republican Assembly (Cortes) was a single Chamber Congress of Deputies. On July $\mathbf{1 8}, 1936$, 1 counterrevolution broke out in many military garrisons Spanish Morocco and spread rapidly throughout Spain. The principal leader wal General Francisco Franco Bahamonde, formerly Governor of the Canary Islands. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the MilitaryFascist fusion, or Falange) while those of Communist views supported the Azaña (Popular Front) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 3939, the Civil War was declared to have ended,
the popular Front Governments in Madrid and Barcelona surrendering to the Nationalists (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas, which replaced the former Cortes, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of Caudillo (Leader) of the Empire and Chief of the State. In the Civil War of 1936 -39 over $x, 000,000$ lives were lost.

On July x, 1942, General Franco announced the reinstitution of the Cortes de España. This mir reorganized by an Organic Law of 1966 and is composed of approximately 564 members-ministers, 19; members of the National Council of the Movement, 109; Presidents of various State bodies, 5: representatives of the national syndicates, 150; 100 members elected by heads of families and married women; university rectors, 12; representatives of professional, academic and scientific bodies, 28: representatives of local administration, 186; and 25 members directly appointed by the Head of State.

A referendum held in 2967 approved an Organic Law of the State introducing I number of changes in state institutions. The offices of Head of State and Head of Government were separated, but General Franco continued to hold both offices until June 1973.

On July 22, 1969, General Franco nominated Prince Juan Carlos (Alfonso) of Bourbon (born Jan. 5, 1938; grandson of the late King Alfonso XIII) to succeed him as head of state at his death or retirement. The nomination was approved in the Cortes by a large majority. Following the death of General Franco, on November 20, 1975, Juan Carlos acceded to the throne on Nov. 22, 1975 .

In Spain's first general elections since 1936 the centre-left coalition Union of the Democratic Centre on June $\pm 5$ won $\times 65$ seats in the 350 -member Congress of Deputies and 105 of the 207 elected seats in the Senate. The Spanish Socialist Workers' Party emerged as the main opposition party by winning 118 seats in the Congress, while the Spanish Communist Party won 20 .
Defence.-Army: There are in Spain one armoured, one mechanized, one motorized, and two mountain divisions; one cavalry brigade, two artillary brigades, one air-transportable brigade, I parachute brigade, in infantry brigades, artillery brigades, mountain brigade (Independent) and I battalion surface to air missiles. The Guardia Civil also forms part of the Army though it operates a gendarmerie in the rural $x$ under the control of the Ministry of the Interior.
The active Spanish Navy consists of 1 cruiser, I helicopter carrier, 20 destroyers, 11 frigates and corvettes, 3 anti-submarine launches, 23 minesweepers, 6 submarines, 14 landing craft, 4 squadof helicopters, and II large number of auxiliary and small craft.
The Air Force is divided geographically into 3 Regions covering Spain plus an Air Zone for the Canaries. There are also separate functional Air Defence, Tactical and Transport Commands. The Air Force consists of in fighter-bomber squadrons. one anti-submarine squadron, and one search and rescue squadron. There are also in variety of training and miscellaneous aircraft and some helicopters.
Education.-A new law of education (1970) providing free education for all children aged 6 to 23 is now in the process of implementation. 30 per cent. of primary schools and 80 per cent. of secondary schools are still rim privately, although state spending mil education multiplied fourfold beiwein 1960 and 2970 . There wi eighteen bia
universities, the oldest of which, Salamanca, founded in z230. Other ancient foundations are Valencia ( $\mathbf{2} 245$ ), Oviedo ( $\mathbf{x} 317$ ), Valladolid ( $\mathbf{x} 346$ ), Barcelona (1450), Zaragoza ( $\mathbf{x} 474$ ), Santiago (I501), Seville (I502), Granada (1526), and Madrid (x590). Private universities are Deusto in Bilbao, and Navarra in Pamplona. Student numbers in the universities have risen to over 200,000 .
Language and Literature.-Castilian is the language of more than three-quarters of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provencal Spain, and Galician, spoken in the northwestern provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the Poem of the Cid, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra ( 1547 -36x6), Lope Felix de Vega Carpio ( 1562 1635) and Pedro Calderón de la Barca ( $1600-$ 1681). The Nobel Prize for Literature has three times been awarded to Spanish authors-J. Echegaray ( 1904 ), I. Benavente ( 1922 ) and Juan Ramón Jimenez ( ${ }^{2956)}$.

Public Debt (Dec. 3x, 1964) excluding parastatal organizations and State-guaranteed issues: Pesetas $186,928,600,000$.

The rate of exchange for the peseta in July, 2976 was 221 pesetas $=21$ sterling (see also $\mathrm{p}_{\mathrm{E}} 8_{3}$ ).

Production and Industry.-The country is geaerally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits-olives, oranges, lemons, almonds, pomegranates, bananas, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. The orange crop is exported mainly to Germany, France and the United Kingdom. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced.

Spain's mineral resources of coal, iron, wolfram, copper, zinc, lead and iron ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1970 the coal output amounted to $\times 3,150,000$ metric tons. $4,150,000$ metric tons of iron ore and $7,366,000$ metric tons of steel were produced in 1970. Other production figures included ('ooo metric tons): cement, 16,500 ; sulphuric acid, 2,015; cotton yarn, 117 and wool yarn, 37. Production of electric power was 56,484 million kWh . The fishing industry is important.
The principal goods produced are manufactured goods, textiles, chemical products, footwear and other leather goods, ceramics, sewing machines and bicycles. $24,205,000$ tourists visited Spain in 1970 and spent $£ 700,000,000$. The Gross National Product wis approximately $£ 23,400$ million.

Communications.-In 1970 there were over 13,403 km . of railways in service and $138,670 \mathrm{~km}$. of paved roads. The sea-going mercantile marine in 1970 (excluding fishing boats) registered a total oe $3.338,190$ gross tons. Civil aviation is under the control of the Air Ministry: there are several inland and international services operation.

## Brtish Embassy

(Calle de Fernando el Santo, 16, Madrid 4)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Antony Acland, k.c.v.o., C.M.G. (1977).

Minister, A. B. Urwick.
Counsellor, A. White, о.в.е. (Commercial).
Defence and Military Attaché, Brig. J. I. Dawson. Air Attaché, Wing. Cdr. S. A. Edwards.
Naval Attaché, Cdr. J. M. Lee, O.B.E., R.N. ist Secretary, A. R. Thomas (Head of Chancery). British Council Representative, G. R. Sanderson, Almagro 5, Madrid 4.
The Balearic Isles form an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Ibiza and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is $x, 925$ square miles, with $\mid$ population of 558,287 . The archipelago forms a province of Spain, the capital being $\Psi$ Palma in Majorca, pop. 234,098 ; $\Psi$ Mahon (Minorca), pop. $16,547$.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with population of $\mathbf{x , 1 7 0 , 2 2 4}$. The Canary Islands form two Provinces of Spain.-Las Palmas (Gran Canaria, Lanzarote ( 38,500 ), Fuerteventura ( 19,500 ) and the islets of Alegranza, Roque del Este, Roque del Oests, Graciosa, Montaña Clara and Lobos), with seat of administration at $\psi$ Las Palmas (pop. ${ }^{287}, 03^{8}$ ) in Gran Canaria, where major oil companies have installations for re-fuelling shipping; and Santa Cruz de Tenerife (Tenerife, La Palma ( 76,000 ), Gomera ( $3 \mathrm{r}, 829$ ), and Hierro ( $\mathbf{x} 0,000$ )), with seat of administration at $\Psi$ Santa Cruz in Tenerife, pop. $\times 51,361$.
 Bidassoa in La Higuera bay.
$\Psi$ Cruta is a fortified post on the Moroccan coast, opposite Gibraltar The total area is I square miles, with a population (1970) of 67,187 .
$\Psi$ Melilla is in town on $\quad$ rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492 . Population (1970) 64,942. Ceuta and Melilla are parts of Metropolitan Spain.

Overseas Territories
The former provinces of Spanish Guinea, Fernando Póo and Rio Muni achieved independence on October 12, 1968, under the title of Equatorial Guinea.

Ifni, the former enclave in Morocco, was incorporated in the latter state by treaty, on June 30, r969, and the Spanish Sahara came under joint Moroccan and Mauritanian control in November 1975.

Spanish Morocco.-In addition to Ceuta and Melilla, Spain exercised until 1956 protectorate over - part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:-

Alhucemas, the bay of that name includes six islands: population 366.

Peñon de la Gomera (or Peñon de Velez) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450 .

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier about z miles north of Cape del Agua; population 6 ro.

## SUDAN

(Democratic Republic of the Sudan)
President, Gaafar Mohamed El Nimeri, assumed office May 25, 1969.
Prime Minister, Sayed Al Rashid Tahir.
Defence, General Bashir Mohammed Ali.
Minister of Foreign Affairs, Dr. Mansour Khalid.

## Sudanese Embassy in London <br> 3 Cleveland Row, S.W.r. <br> [ox-839 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Amir El Sawi (r976).
Area and Population.-The Sudan extends from the southern boundary of Egypt, $22^{\circ} \mathrm{N}$. lat., to the northern boundary of Uganda, $3^{\circ} 36^{\prime}$ N. lat., and reaches from the Republic of Chad about $2 x^{\circ}$ $49^{\prime} \mathrm{E}$. (at $12^{\circ} 45^{\prime} \mathrm{N}$.) to the north-west boundary of Ethiopia in $38^{\circ} 35^{\prime} \mathrm{E}$ ( at $18^{\circ} \mathrm{N}$.). The greatest length from north to south is approximately $x, 300$ miles, and east to west 950 miles.

The northern boundary is the zand parallel of North latitude; on the east lie the Red Sea and Ethiopia; on the South lie Kenya, Uganda and Zaire; and on the west the Central African Republic, Chad, and Libya.

The White Nile enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the Bahy el Jebel, and leaves the Sudan at Wadi Halfa. The Blue Nile flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the White Nile at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now

accepted a the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa lie five of the six Cataracts.
The estimated area is about 967,500 sq. miles with a population of $19,500,000$, partly Arabs, partly Negroes, and partly of mixed Arab-Negro blood, with 1 small foreign element, including some 8,000 Europeans. The Arabs are mostly Moslems. The Nilotics of the Bahr el Ghazal and Upper Nile Valleys are generally animists, but some have been converted to Christianity and others are Moslems.

Government.-The Anglo-Egyptian Condominfum over the Sudan which had been established in $\mathbf{x} 899$ ended when the Sudan House of Representatives on Dec. 19, 1955, voted unanimously declaration that the Sudan was a fully independent sovereign state. A Republic was proclaimed on Jan. x, 1956, and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. The Sudan was under military rule from Nov., 1958, until 1964 when new civilian Cabinet me appointed. Following a crisis in the coalition Cabinet of Mr. Mahgoub, the Prime Minister resigned on April 23, 1969, and was unable to form - new coalition. Government of the country was taken over on May 25, $\mathbf{9 6 6}$, by a ten-man revolutionary council headed by Col. Gaafar Mohamed El Nimeri. A coup d'état by a Communist group on July x9, 1971, was short-lived. The leader of the group, Lt.-Col. Babikr al Noor, had been in London for medical treatment when power mir seized by Maj. Hashem Atta. The B.O.A.C. plane in which the former was returning to Khartoum on July $m$ was forced down at Benghazi by Libyan fighter aircraft and Lt.-Col. Noor and an aide were arrested. They were later returned to the Sudan and executed. Maj.-Gen. Nimeri was overwhelmingly elected President in an uncontested election in October 197r. In February 1972 uII agreement was signed at Addis Ababa which brought to an end nearly 17 years of insurrection and civil war in the six southern provinces, and which recognized southern regional autonomy within $\quad$ unified Sudanese State. President Nimeri was re-elected to $\quad$ further five year term in May 1977.

Education.-School education is free for most
children, but not compulsory, beginning with Primary School (of which there are 4,000 ) which continues for 6 years. The final examination at Primary School is highly competitive and selects children for General Secondary Schools (of which there are 700 ) which continues for 3 years. The Higher Secondary Stage comprises 80 academic Higher Secondary schools ( 3 years); 15 vocational schools-Technical (4 years); Agricultural and Commercial ( 3 years) and 15 Primary Teacher Training Colleges ( 4 years). The medium of instruction is Arabic. English is taught as the principal foreign language in all schools.

Teacher Training is carried out in 15 Primary Teacher Training Colleges, 2 General Secondary Teacher Training Institutes and I Higher Teacher Training Institute.

Khartoum University is the largest educational institution and has ro faculties and 7,574 students. There is an Islamic University at Omdurman with x, irio students.

Selection for higher education is normally based on the Sudan School Certificate.

In addition to the three universities there $\quad$ I various technical post-secondary institutes as well - professional and vocational training establishments.

Production.-The principal grain crops are wheat and dura (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (mainly Egyptian type) cotton of which the Sudan is a major producer, but increasing quantities of short and medium staple (American) type cotton $n$ neing grown. Production in 1974-75 totalled $\mathbf{x , 2 0 0 , 0 0 0}$ bales. Much of the high quality, long-staple cotton is provided by the Sudan Geriza Scheme (a Gov-ernment-controlled project irrigated from the Sennar Dam on the Blue Nile) and its extension, the Managil Scheme. The Sudan also produces the bulk of the world's supply of gum arabic. Sugar is an increasingly important crop. The Sudan aims to be self-sufficient in sugar by $297^{8}$ and then to produce an exportable surplus; Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South. A new dam at Khashm el Girba began to store water in May, 1964, and will eventually provide irrigation to about 500,000 acres, most of which is being used to resettle the population of the Wadi Halfa area which has been flooded by the reservoir of the Egyptian High Dam. Another dam $i$ Roseires on the Blue Nile will enable new or increased irrigation emin a further $3,000,000$ acres well as providing hydro-electric power.

Communications.-The rallway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branches out southwards to Wau from the Sennar/Nyala western line. Regular rail and Nile steamer services connect Khartoum with Juba in Equatoria Province which in turn is connected by a bus service with Nimule on the Uganda border. $\psi$ Port Sudan is well-equipped modern seaport. Sudan Airways fly regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, the United Kingdom, the Gulf States, Kenya, Uganda, W. Germany, Iraq and Bahrain and are equipped with Boeing $737^{\prime}$ 's, a Boeing 707's and 4 Fokker Fa7 aircraft.

## SURINAM

$p_{\text {resident, Dr. J. H. E. Ferrier. }}$ Prime Minister, Henck Arron. Surinam is situated on the north coast of South America and is bounded by French Guiana in the east, Brazil in the south and Guyana in the west. It has an area of 63,250 square miles, with a population of 480,000 (December, 1971).

Formerly known as Dutch Guiana, Surinam remained part of the Netherlands West Indies until November 25 , 1975 , when it achieved complete independence. Surinam had received autonomy in domestic affairs under the Realm Statute which took effect December 29, 1954 .
Surinam has large timber resources. Rice and sugar cane un the main crops. Bauxite is mined, and is the principal export.

## SWEDEN <br> (Sverige)

King of Sweden, Carl XVI Gustaf, grandson of the late King Gustaf VI Adolf, born April 30, 3946, succeeded September 15, 1973, married June 19, 1976 Fraulein Silvia Renate Sommerlath and has issue, Princess Victoria Ingrid Alice Désirée, born July $14,1977$.

Prime Minister, Thorbjörn Fälldin.
Deputy Prime Minister and Minister of Labour, Per Ahlmark.
Justice, Sven Romanus.
Foreign Affairs, Karin Söder.
Defence, Erik Kronmark.
Health and Welfare, Rune Gustavsson.
Communications, Bo Turesson.
Economic Affairs, Gösta Bohman.
Budgetary Affairs, Ingemar Mundebo.
Education, Jan-Erik Wikström.
Agriculture, Anders Dahlgren.
Trade, Staftan Burenstam-Linder.
Industry, Nils G. Asling.
Housing, Elvy Olsson.
Local Government, Johannes Antonsson.
Ministers without Portfolio, Ola Ulisten, Ingegerd Troedsson, Britt Mogård, Olof Johansson, Birgit Friggebo.

## SWEDISH Embassy in London

Residence, 27 Portland Place, W. x ; Chancery, 23 North Row, W.I.
[0x-499 9500]
Ambassador Extraordinary and Plenipotentiary, His Excellency Olof Rydbeck ( x 976 ).
Minister Plenipotentiary, L. Bergquist.
Counsellors, Baron C. G. von Platen, c.v.o. (Economic and Financial); D. Winter (Press); G. Westin, M.V.O. (Consular); Miss K. Rosenström (Administration); N. G. Revelius, M.v.o.
xst Secretaries, L. G. Carlsson (Consular); Mrs. W. Tornberg (Consular); T. Westlund (Commodities); H. af Trolle.

Air and Military Attaché, Col. J. Winqvist, M.v.o.
Naval Attaché, Capt. L. Jedeur-Palmgren.
Trade Commissioner. J. H. Dahl (73 Welbeck St., W. . .)

Area and Population.-Sweden occupies the eastern urin of the Scandinavian peninsula in N.W. Europe and comprises 24 local government districts, "Lan", with an area of 173,436 sq. miles, and population Jan. I, 1977 of $8,236,179$. In 1976 there were 98,220 births ( $\mathrm{Ix} \cdot 95$ per 3,000 inhabitants); death rate was $1 \times \cdot 03$ per $x, 000$ inhabitants and infant mortality rate (under mim year of age) 0.8 per cent. of all live births.
Government. Under the Act of Succession of June 6,1809 (with amendments) the throne is hereditary in the House of Bernadotte. JeanBaptiste Jules Bernadotte, Prince of Ponte Corvo, a Marshal of France, was invited to accept the title of Crown Prince, with succession to the throne. He landed at Hälsingborg on Oct. 20, 88 xo , and succeeded Charles XIII in $\mathbf{1 8 5 8}$. There is $\quad$ unicameral Diet (Riksdag) of 349 members, elected for 3 years. The Council of Ministers (Statstdd) is responsible to the Riksdag.
Production and Industry.--Since the end of the First World War Sweden has become one of the leading industrial nations of Europe. Agriculture is still of the main activities, but its relative importance is declining and in 1975 less than 6 per cent. of the working population was engaged in farming and forestry. The country's industrial
prosperity is based on an abundance of natural resources in the form of forests, mineral deposits and water power. The forests are very extensive, covering about half the total land surface, and sustain flourishing timber, pulp and paper milling industries. The mineral resources include iron ore of excellent quality, lead, zinc, sulphur, granite and marble. There are also extensive deposits of low grade uranium ore. Important industries based on mining include fron and steel, aluminium, and copper. The engineering industry has expanded largely on the basis of products invented or developed by Swedish engineers. Sweden has now one of the most important shipbuilding industries in the world. Motor car manufacturing is I major industry. The establishment of in petro-chemicals indusiry has led to a rapid expansion in the output of chemicals and plastics.

Communications.-The total length of Swedish railroads is about 7,500 miles. At the end of 1974 there were 633 telephones for every 1,000 of the population, and in January, 1976, the number of broadcast receiving licences issued had reached $\mathbf{2 , 9 0 9}, 000$. The number of private cars in - on December 3x, 1975 was 2,76I,000.

The Mercantile Marine amounted on December 32, 1975 to $7,731,000$ gross tonnage, of which 3,494,000 comprised the tanker fleet. The Board of Civil Aviation under the control of the Ministry of Communications handles civil aviation matters. Regular domestic air traffic is maintained by the Scandinavian Airlines System and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained by the Scandinavian Airlines System.
Defence.-Based on the policy of non-alignment in peace leading to neutrality in war Sweden maintains a Total Defence intended to make any attack on her costly. Total Defence includes peacetime organizations for civil, economic and psychological defence well compulsory national service for all acceptable males. Some 50,000 National Servicemen are called up for $7 \frac{1}{2}-12$ months training each and all are recalled every fourth year for refresher training. On mobilization the Army strength totals $\quad$ armoured brigades and $z 0$ infantry brigades. The Navy has 6 destroyers, 1 frigates, 17 submarines, 34 torpedo boats, a large number of minor craft and auxiliaries and 65 coast artillery units. The Air Force has modern supersonic aircraft of Swedish manufacture forming $\square$ standing force of 280 air defence, 130 attack and zoo reconnaissance aircraft supported by modern air defence radar system. Facilities exist for rapid dispersal from main bases in war

Religion. -The State religion lill Lutheran Protestant, to which over 95 per cent. of the people officially adhere.
Language and Literature.-Swedish belongs, with Danish and Norwegian, to the North Germanic language group. Swedish literature dates back to King Magnus Eriksson, who codified the old Swedish provincial laws in $\mathbf{3 5 0}$. With his translation of the Bible, Olaus Petri ( $5493^{-1552}$ ) formed the basis for the modern Swedish language. Literature flourished during the reign of Gustavus III, who founded the Swedish Academy in 1786 . Swedish literature is studded with minv such as
 Almquist ( $7795-1866$ ), Rydberg ( $8828-1895$ ), Levertin ( 1862 -1906), Strindberg (1849-1912) and Lagerlöf ( $\mathbf{x 8 5 8 - 1 9 4 0 \text { ), Nobel Prize Winner in } 1 9 0 9 .}$ Contemporary authors include Lagerquist ( 189 x 1973), Nobel Laureate in 1951, Martinson (b 1904) - Johnson ( $\mathbf{x} 900-\mathrm{x976}$ ), Nobel Lareates jointly ias
1974. The Swedish scientist Alfred Nobel ( $\mathrm{I}_{33}{ }^{-}$ 1896) founded the Nobel Prizes for Literature, Science and Peace. In 1975 there were 146 daily newspapers with total circulation of $4,677,800$ copies, 4 major papers being published at Stockholm, at Göteborg and 4 at Malmö.

Education.-Well developed and recently reorganized to provide (i) 9 years' compulsory schooling from the age of 7 to $x 6$ in the Grundskolan; (ii) further education from $x 6$ to $18 / \mathrm{xg}$ in the Gymnasia, which offer number of courses preparing for entry to the universities, other centres of higher education, the professions, etc.; (iii) the universities. There are six universities-Uppsala (founded 1477); Lund (founded 1668); Stockholm (founded 1878); Gothenburg (founded 1887); Umea (founded 1963) and Linköping (founded 1967); three affiliated university branches, empowered to grant first degrees only in the humanities, social sciences and natural sciences, at Örebro, Växjö and Karlstad; and three universities of technology, at Stockholm, Gothenburg and Luled. Another institution of university status is the Karolinska Institute, which specializes in medicine and dentistry. Tuition within the State system, which is maintained by the State and by local taxation, is free.

Ambassador Extraordinary and Plenipotentiary, His Excellency, Dr. Ernesto Thalmann (1976).
Minister Plenipotentiary, Dr. K. Fritschi.
Counsellors, J. P. Zehnder (Economic and Labour); J.-J. Indermuehle (Cultural Affairs); J. Rial.

Defence Attaché, Col. Hans W. Fischer.
yst Secretary, Paul A. Ramseyer.
Counsellor, H. H. Buchmann (Commodities and Agriculture).
Consul and Head of Administration, C. Glauser.
There is Swiss Consulate-General in Manchester.
Area and Population.-The Helvetia of the Romans, $\quad$ Federal Republic of Central Europe, situated between $45^{\circ} 50^{\prime}-47^{\circ} 48^{\prime} \mathrm{N}$. lat. and $5^{\circ} 58^{\prime}-$
$10^{\circ} 3^{\prime}$ E. long. It is composed of 22 Cantons, 3 subdivided, making 25 in all, and comprises $n$ total area of $\times 5,950$ square miles with population (estimated Jan. x, 1973) of $6,385,000$. In 1973 there were 91,342 ( $1973,84,187$ ) live births, 56,489 deaths and $43,08 \mathrm{~m}$ marriages. The infant mortality rate was 13 per 1,000 live births. In 1970, out of a total of $6, \times 69,800,47.8$ per cent. of the population was Protestant, $49^{\circ} 4$ per cent. Roman Catholic and - 3 per cent. Jewish.

Physical Features.--Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to $\mathbf{1 5 , 2 1 7}$ feet in height, occupy its southern and eastern frontiers, and the chief part of its interior;

and the Jura mountains rise in the north-west. The Alps occupy 6r per cent., and the Jura mounains $x z$ per cent., of the country. The Alps are at crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube ( 600 miles). The highest peak, Mont Blanc, Pennine Alps ( $\mathbf{x} 5,732$ feet) is partly in France and Italy; Monte Rosa ( 55,217 feet) and Matterhorn ( 14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Dufourspitze ( $55,203 \mathrm{ft}$.), Finsteraahorn ( $\mathbf{1 4}, \mathbf{0} 56$ ), Aletschhorn ( $\mathbf{x} 3,7 \times 1$ ), Jungfrau ( $\mathbf{1 3}, 675$ ), Mönch ( 13,456 ), Eiger ( 13,040 ), Schreckhorn ( 13,385 ), and Wetterhorn ( $x 2,150$ ) in the Bernese
 Breithorn ( $\mathbf{2}, 685$ ).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zuirich, Lucerne, Neuchâtel, Geneva, Constance, Thun Zug, Lugano, Brienz and the Walensee. There are also many artificial lakes.

Production and Industry.-Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about $3,000,000$ acres being under grass for hay and $2,000,000$ acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

Government.-The legislative power is vested in a Parliament, consisting of two Chambers, in National Council (Nationalrat) of 200 members, and a Councll of States (Ständerat) of 44 members; both Chambers united ar called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (Bundestat) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. Each year the Federal Assembly elects from the Federal Council the President and the Vice-President. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.-All Swiss males must undertake military service in the Army. Elite (ages 20 to 32) initial training, yr8 days. Subsequently 8 training periods of $2 x$ days; then Landwehr ( $33-42$ ) and Landsturm ( 43 to 50). Flying personnel of the Air Force, which is part of the Army (ages 20-36): initial training I year, totalling 200 hours of flying. 6 weeks with squadron each year and completion of to 100 hours of flying. After 36 revert to ground duties with Air Force or Army. Swiss Army equipment includes many Britisk items, notably Centurion tanks, Bloodhound missiles, and Venom, Vampire and Hunter aircraft.

Communications.-By the end of 1974 there were $4,992 \mathrm{~km}$ of railway tracks (Swiss Federal Railways, $2,926 \mathrm{~km}$; Swiss privately owned railways $\mathrm{a}, 066$ $\mathrm{km})$; the whole system is electrified. At the end of 1973, there were $89,940 \mathrm{~km}$ of telegraph and telephones lines. By June 1977 the number of telephone subscribers amounted to $2,56 x, 69 \mathrm{x}$ and the network was fully automatic throughout the country. In April 1977 there were $2,1 \times 7,263$ licensed radio receivers and $x, 827,231$ television receivers.

At the end of $x 976$ the total length of motorways was 975 km . The number of motor vehicles licensed at the end of 1976 was $2,20 x, 221$.

A merchant marine established in 1940, consisted in March 1977 of 26 vessels with 1 total displacement of 250,566 tons (gross). In addition 464 vessels with a total tonnage of 574,986 were engaged in Rhine shipping. In 1975 goods handled at the Basle R hine ports amounted to $7,895,53 x$ tons. 125 lake vessels transported $8,93^{2,950}$ passengers and 45,435 tons of freight in 1976. The national airline, Swissair, has a network covering $248,492 \mathrm{~km}$ and in 2976 carried total of $6,225,83 \mathrm{x}$ passengers. Its fieet of 47 aircraft includes $\square$ Jumbojets. It files to and from the Swiss airports at Zürich, Geneva and Basle.

Education.-Control by cantonal and communal authorities. No central organization. Illiteracy practically unknown. (i) Primary: Free and compulsory. School age varies, generally 7 to 14. (ii) Secondary: Age $12-15$ for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii) Special schools make a feature of commercial and technical instruction. (iv) Universities: Basle (founded 1460), Berne ( 8834 ), Fribourg ( 8889 ), Geneva ( $\mathrm{x}^{873}$ ), Lausanne ( $\mathbf{I 8 9 0}$ ), Zürich ( 8832 ), and Neuchâtel ( 1009 ), and the technical University of Zuirich and commercial University of St. Gall.

Language and Literature.-There me three official languages: French, German and Italian. In addition Romansch is recognized as national, but not an official language. German the dominating language in 89 of the 25 cantons; French If Fri-
bourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons.
Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler ( $\mathbf{x} 845$-1924) and Hermann Hesse ( $\mathrm{x}_{877}-1962$ ) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1946.

Prime Minister, Maj.-Gen. Abdul Rahman Khlefawl.

## Syrian Embassy in London <br> 5 Eaton Terrace, S.W.x. <br> [or-730 0384]

Ambassador Extraordinary and Plenipotentiary, His Excellency Adnan Omran (x974).
Area and Population.-Syria is in the Levant, covering - portion of the former Ottoman Empire, with estimated area of 70,800 sq. miles and a population (Civil Register 1976) of $8,746,224$, Arabic speaking and mainly Moslems. (For Map, see p. 883.) The Orontes fiows northwards from the Lebanon range across the northern boundary to Antakya (Antioch, Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaoology, etc. - The region is rich in historical remains. Damascus (Dimishq ash-Sham) is the oldest continuously inhabited city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the AntiLebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix. xy), while to the North-East is the Roman outpost of Dmeir and further cast is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phoenician town of Marath, where the well has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the 12 th and $33^{\text {th }}$ centuries has been restored - museum.
Hittite cities dating from 2,000 to $\mathrm{x}, 500$ B.C. 3 have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

Government.-Syria, which had been under French mandate since the 19x4-x8 war, became independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, x958, when it became part of the United Arab Republic. It seceded from the United Arab Republic wiII Sept. 28, 1961.
A new Constitution was promulgated in March x973; this declared that Syria is a "democratic, popular. socialist State", and that the Ba'ath Party, which has been the ruling party since ry63, is "the leading party in the State and society ". Elections to the 195 -seat Peoples' Council in May 1973 resulted in a large majority for the Ba'ath Party.
Production and Industry,-Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the
highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebleh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil, glass, soap, sugar, plastics and copper and brass utensils are locally produced. Large new areas are coming under irrigation and cultivation in the north-east of the country as ir result of the Tabqa dam. There are also some light assembly plants. Mineral wealth is modest but oil has been found at Karachuk and other parts in the north-eastern corner of the country and drilling is continuing. A pipeline has been built to the Mediterranean port of Tartous, viâ Homs. An oil refinery is in production at Homs. and revenue is derived from the Kirkuk-Banias oil pipeline and the pipeline from the oilfields of Saudi Arabia to Sidon in Lebanon (Tapline). Oil production in 1975 was estimated at about 8 million tons per annum. Syria also has deposits of phosphate and rock salt.

Language and Literature.-Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 3 daily newspapers and several periodicals in Arabic published in Damascus and one daily newspaper in Aleppo.

Education.-Education in Syria is under State control and, although In few of the schools wit privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts, commerce, agriculture, divinity, fine arts, and Higher Teachers' Training College. The number of students has risen from a few hundred in 1943 to over 40,000 . There are also about 20,000 students at Aleppo University (founded 196I) and over 3,000 at Tishrin University, Lattakia (founded 1975). Approximately $x 0$ per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.
Communications.-A narrow gauge rallway runs from Beirut in the Lebanon to Damascus and on to Der'a near the Jordan border (the Hejaz railway). This line was cut between Damascus and Beirut during the civil war and has not yet been restored. A standard gauge line runs from Beirut through Tripoli (both in Lebanon) to Homs, Hamah, Aleppo and on along the Turkish border through Qamishlige to the Iraq frontier. Branch lines connect the ports of Tartous and Lattakia to the system and another line runs from Aleppo down Euphrates valley to Deir ez Zor and thence North to Qamishliye. The standard and narrow gauge lines connect at Rayak (Lebanon). All the principal towns in the country are connected by roads which vary from modern dual carriageways to narrow country lanes. An internal air service operates between Damascus and Aleppo the former being minternational Airport; from Aleppo there are fights to Turkey and Armenia.

Currency.- The monetary unit is the Syrian paper pound ( $£ S y r$.). Exchange rate, see p. 84 .
Trade.-The principal imports are foodstuffs (fruit, vegetables, cereals, meat and dairy products, tea, coffee and sugar), mineral and petroleum products, yarn and textiles, iron and steel manufactures, machinery, chemicals, pharmaceuticals, fertilizers and timber.

Principal Exports.-Raw cotton, cereals, fruit, livestock and dairy products, other foodstuffs, textiles and raw wool.

Ambassador Extraordinary and Plenipotentiary (vacant).
Area and Population.-The Kingdom of Thailand, formerly known as Siam, has an area of 198,247 sq. miles with $\quad$ population (estimated 1975) of $42,000,000$. For position, see MAP, p. 744. It has a common boundary with Malaysia in the south, is bounded on the west by Burma and on the north-east and east by the People's Democratic Republic of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is separated from the Thai northern border only by $\mathrm{B}^{\text {n narrow stretch of Burmese and Laotian }}$ territory.
The capital, Bangkok, with a population of about $4.500,000$, is situated in the south of the central plain area. To the north-east there is I plateau
area and to the north-west mountains. The south of Thailand consists of a narrow mountainous peninsula. The principal rivers are the Chao Phraya with its tributary the Meping and the Mekong and its tributaries, which water the eastern plateau.

Government. -Thailand is a Constitutional Monarchy. The Constitution promulgated in October x976 provides for an appointed unicameral National Administrative Reform Assembly for four years, to be followed by period of four years in which power is equally divided between elected House of Representatives and an appointed Senate. There will then be $\begin{aligned} & \text { further period of four years during }\end{aligned}$ which the power of the House of Representatives is increased and that of the Senate reduced as much as possible. After that, the Senate may be dissolved, but the House of Representatives will remain.
Following disturbances at Thaimmasart University in Bangkok on Oct. 6, 1976, the elected government of M. R. Seni Pramoi was replaced by a National Administrative Reform Council (N.A.R.C.), composed of senior officers of all three armed forces and the police, headed by Admiral Sa-ngad Chaloryoo. On Oct. 22, 1976 Cabinet was appointed, headed by Tanin Kraivixien, and a new Constitution promulgated under which the N.A.R.C. became the Advisory Council to the Prime Minister, with the duty to determine policies concerning national security jointly with the Cabinet, which is constitutionally bound to carry out the policies thus jointly determined.

Language, Religion and Education. - Thai is basically a monosyllabic, tonal language, $\quad$ branch of the Indo-Chinese linguistic family, but its vocabulary especially has been strongly influenced by Sanskrit and Pali. It is written in an alphabetic script derived from ancient Indian scripts. The principal religion is Buddhism. In 197393.6 per cent. of the population were Buddhists, 3.9 per cent. Moslems, 0.6 per cent. Christians and 1 ' 9 per cent. other religions. Primary education is compulsory and free and secondary education in Government Schools is free. In $x 974$ there were $33,44^{8}$ schools of all kinds with $7,321,797$ pupils and 250,300 teachers. There are 10 Universities attended by $\pm 36,349$ students, 34 training colleges and 196 vocational schools (all types). New universities were opened at Chiengmai and Khon Kaen in 1966 and a further university has subsequently been opened at Songkhla in the south. In 1972 an open university (Ramkhamhaeng) was established in Bangkok with some 45,000 students.

Production and Industry.- The agricultural sector provides just under half the national income and employs about 70 per cent. of the working population. Rice remains the most important crop, accounting for 63 per cent. of the area planted. After rice ( $14,700,000$ tons est. in 1975) the main crops are cassava ( $7,430,000$ tons of roots), maize ( $2,540,000$ tons), and rubber ( 435,000 tons). Other crops of some importance are sugar cane, kenaf, groundnuts, tobacco, and coconuts. There is also - substantial forest extraction industry, the most valuable product of which is teak.

Mineral resources are mainly tin, antimony, tungsten, gypsum and fluorite. The most important of these, tin, is seeing something of a decline, mainly because of the exhaustion of reserves. The importance of lignite as 1 source of energy increased with higher oil prices.

Before the war, industry was mainly confined to the basic processing industries-sawmilling, ricemilling, etc. After the war, the Goverrment set up
a number of factories run by the Civil Service or the Armed Forces. The Government still has a sizeable stake in industry-notably the tobacco monopoly and factories for the manufacture of cement, glass, paper, jute, textiles, sugar and beer and spirits.

The then Government in 1962 instituted $\quad$ policy of encouraging the private sector to invest in industry, by means of tax reliefs and other incentives. The private sector industries are almost entirely of a secondary nature; soap products, gunny bags, textiles, car assembly, pharmaceutical preparations and packaging, dry batteries, etc. Over the last decade the size of the manufacturing sector has grown rapidly and now provides 18 per cent. of national income.

Communications.-Rivers and canals provide the traditional mode of transport for much of the country. Navigable waterways have a length of about $3,100 \mathrm{~km}$. in the dry season and $1,600 \mathrm{~km}$. in the wet season. About $3,830 \mathrm{~km}$. of State-owned railways were open to traffic in 1974. The track is metre gauge. Main lines run from Bangkok to Aranya Prathet, on the Cambodian border ( 160 miles E.); via Korat to Ubol (about 352 miles E.) and to Nongkhai ( 415 miles N.E.) the ferry terminal on the River Mekong opposite Vientiane, capital of Laos; to Chiengmai (4ri miles N.); and to Haad yai ( 600 miles S.), whence lines go down the eastern and western sides of the Malay Peninsula, via Sungei Golok and Penang respectively, to Singapore.

Thailand has some $18,000 \mathrm{~km}$. of highways and provincial roads, of which 63 per cent. are paved.

Bangkok has an international airport of importance, and services connect it direct with cities in Europe, America, and Australia, as well as countries in Asia. Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. Domestic routes are operated by Thai Airways Corporation. There are some $22,000 \mathrm{~km}$. of telegraph lines and improvements are being made to an already extensive micro-wave communications system. The harbour at Bangkok, which can take vessels up to ro,000 tons dead weight is congested, but six new berths are presently being constructed. A new deep-water port has been constructed on the east side of the Gulf of Thailand, but is not yet in full use.

Trade with U.K. 1975

## 1976

Thailand's main exports in 1976 (in millions of Baht) were: rice, 8,910 , sugar 6,842 , maize 5.596 , tapioca products 6,634 , rubber 5,333 and tin 3,057 . Other exports include ready-made garments, textiles, frozen shrimps, timber and articles of wood, mung beans and tobacco leaves. Main imports for the same period were petroleum and petroleum products $\mathbf{1 6 , 7 9 6}$, machinery 8,308 , transport
equipment 7,355 , iron and steel 6,324 , electrical machinery 4,512 , chemicals 2,357 and cotton 2,303 -

Capital, $\Psi$ Bangkok (population $4,300,000$ ); in the delta of Chao Phraya. Other centres are Chiengmai, Nakorn Sawan, Korat and Haadyal, but no other town approaches Bangkok in size or importance.

Flag.-Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others). National Day.-December 5 (King's Birthday).

## British Embassy

(Bangkok)
Ambassador Extraordinary and Plenipotentiary, His Excellency Sir David Lee Cole, K.C.M.G., M.C. (1973).

Counsellors, H. A. J. Staples; J. P. Law, Q.P.M. Defence and Military Attaché, Col. I. T. C. Wilson, M.B.E., M.C.

Naval and Air Attaché, Cdr. G. C. Roberts, O.B.E., R.N.
rst Secretaries, R. Goring-Morris, O.B.E. (Head of Chancery); O. H. Robinson, O.B.E.; Miss. J. M. Murdoch, M.B.E. (Consul); P. B. Cormack; J. L. Brooke; R. J. P. Church; G. D. Quinn; Miss C. Swan.

British Coucil Representative, D. M. Waterhouse.

## TOGO

## (Republic of Togo)

President and Minister of Defence, Gen. Gnassingbé Eyadéma, born 1937, assumed office as Head of State, April I4, 1967.
Minister for Foreign Affairs and Co-operation, Edem Kudjo.
The Republic is situated in West Africa between $0^{\circ}-2^{\circ} \mathrm{W}$. and $6^{\circ}-15^{\circ}$ N., with - coastline only 35 miles long on the Gulf of Guinea, and extends northward inland for 350 miles. It is flanked on the west by Ghana, on the north by Upper Volta and in the east by Benin (see MAp, p. 953). It has an area of $21,000 \mathrm{sq}$, miles and i population (estimate, Dec. 1972) of $2,089,900$, including people of several African races.
The first President of Togo, Sylvanus Olympio, assassinated on January $\mathbf{x 3}$, 1963, was succeeded by Nicolas Grunitzky, who was himself overthrown by an army coup d'état on January 23 . 1967. On April 14, 1967, the Commander-in-Chief of the Togolese army, Lt. Colonel (later promoted General) Eyadéma named himself President. Togo is a member of the Conseil de l'Entente, the Organisation Commune Africaine et Malgache (O.C.A.M.), and the Organization of African Unity (O.A.U.). The official language is French.
Finance.-The currency of Togo is the Franc C.F.A. (Francs C.F.A. $50=9$ French Franc) (Francs C.F.A. $450=$ £ 1 , at June, 1975).

Production and Trade.-Although the economy of Togo remains largely agricultural exports of phosphates have superseded agricultural products phe main source of export earnings, being 75 per cent. of the total in the first 11 months of 1974 compared with ix per cent. for cocoa and 6 per cent. for coffee. Other exports include palm kernels, copra and manioc. The production of phosphates entirely for export was begun by Franco-American consortium in $195^{8}$ but the Togolese Government has increased its participation in recent years and took over completely in February 1974.

Capital.- $\Psi$ Lomé, population (1974), 214,200.
Flag.-Five alternating green and yellow horizontal stripes; quarter in red at top next staff bearing : white star. National Day.-April 27 (Independence Day).

British Embassy
Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency Frank Mills, C.M.G. (resides at Accra).

## TUNISIA

 (Tunisian Republic)President, Habib Bourguiba, elected July 25, 1957 ; re-elected $1959,1964,1969$ and 1974.

CABINET
Prime Minister, Hédi Nouira.
Minister delegué in the Prime Minister's Office, Mohamed Sayah.
Justice, Slaheddine Baly.
Foreign Affairs, Habib Chatti.
Interior, Tahar Belkhodja.
National Defence, Abdallah Farhat.
Finance, Mohamed Fitouri.
National Economy, Abdelaziz Lasram.
Agriculture, Hassan Belkhodja.
National Education, Mohamed M'Zali.
Public Health, Mongi Kooli.
Cultural Affairs, Mahmoud Messadi.
Transport and Communications, Abdelhamid Sassi.
Social Affairs, Mohamed Ennaceur.
Youth and Sport, Fouad M'Bazaa.
Equipment, Lassaad Ben Osman.
Relations with National Assembly, Moncef Belhaj Amor.

In addition there are 5 Secretaries of State.
Tunisian Embassy in London ${ }_{29}$ Princes Gate, S.W. 7 [01-584 8117]
Ambassador, His Excellency Said Ben Ammar (I976). Counsellor, Mohamed Mahrezi.
Assistant Military Attaché, Lt. Habib El Elmi.
Attachés, Azouz Rafrafi; Mahmoud Slim; Belgacem Gabchoug.
Area and Population.-Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with total area of 63,380 sq. miles and the estimated population in 1975 was $5,600,000$.

Government.- A French Protectorate from 188i to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form 1 Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May ro, 1956.

Following first general election held on March 25, 1956, Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republii On lune 1 , 1959, the Constitution was promulgated and on December 7 , 1959, the National Assembly held its first session.
In March 1975 the National Assembly proclaimed M. Bourguiba as President for life.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 13 regions (gouvernorats) each administered by $\quad$ Governor. In $\mathbf{x 9 7 2}$, the number
of regions was increased to 14 by the division of the Tunis region into two regions. By 1974, the number increased to eighteen.

Production, Trade, etc.-The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated.

The chief exports are crude oil, olive oil, phosphates and wine. The chief imports are machinery, food-stuffs, iron and steel, textiles and crude petroleum, etc. Some oil has been discovered in Tunisia and production was $3.709,000$ tons in 1976. In 1976 'Tunisia's total imports were equal in value to Dinars $656,700,000$ and total exports Dinars $338,300,000$. France remains Tunisia's main trading partner, supplying 35 per cent. of the country's imports and purchasing 17 per cent. of Tunisia's exports.

Trade with U.K. 1975

1976
Imports from U.K. . . . $\mathcal{L}_{26,729,000}^{1975} \mathcal{L}_{23,000,000}^{107}$ Exports to U.K. . . . . . $2,968,000 \quad 3,100,000$

Currency.-The Tunisian dinar was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. Although Tunisia remains in the Franc Zone the dinar is not tied to the French franc. The current rate of exchange is dinars $0 \cdot 735=£ \mathrm{II}$ (June, 1977).

So far as trade is concerned Tunisia was effectively part of metropolitan France until September, 1959, when she abrogated the Customs Union with the latter and new trade and payments agreement was negotiated. This reduced or eliminated the tariff advantages enjoyed by certain French goods. Under commercial agreements concluded in November, 1962, and February, 1964, import quotas were established for certain French goods. In June, 1964, however, following Tunisian measures regarding the take-over of foreign-owned lands in Tunisia, France gave notice that she would not renew the 1959 Trade Agreement, due to expire on Sept. 30, 1964. In May 1966, France opened import quotas for range of Tunisian goods (but excluding wine). Within these quota limits these goods can be admitted into France customs-free. In 1966 a policy of severe import restriction was adopted in order to reduce the country's chronic imbalance of trade. An ambitious programme of co-operative schemes for most areas of the economy was reversed in September, x969, and gave way to a more orthodox economic policy. Tunisia became an associate member of EEC early in 1969, and signed - new agreement with the E.E.C. in 1976.

Capiral, $\Psi$ Tunis, connected by canal with La Goulette on the coast, has a population of $x, 127,000$. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are: $\psi$ Sfax ( 482,000 ); $\Psi$ Bizerta ( 336,000 ); $\Psi$ Sousse ( 586,000 ); Kairouan ( 302,000 ).

Flag.-Red crescent and star in white orb, all on a red ground. NATIONAL DAY.-June 1.

## Brtish Embassy

Place de Victoire, Tunis
Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency John Henry Lambert, C.M.G. (r977)
ist Secretary, G. S. Burton (Head of Chancery and Consul).
Commercial Attaché, I. Whitting.
British Council Representative, J. E. Lankester. There is a British Council Library in Tunis.

## TURKEY

President of the Republic, Fahri Korutürk, born 1903; elected President April 6, 1973.

Prime Minister, Suleyman Demirel.
Deputy Prime Ministers, Necmettin Erbakan; Alpasian Turkes.
Ministers of State, Seyfi Ozturk; Suleyman Arif Emre; Sadi Somuncuoglu; Ali Sevki Erek.
Justice, Necmettin Cevheri.
National Defence, Saadettin Bilgic.
Interior, Korkut Ozal.

Culture, Avni Akyol.
Social Security, Turhan Kapanli.
Turkish Embassy in London
Chancery: 43 Belgrave Square, S.W.I [01-235 5252]
Ambassador Extraordinary and Plenipotentiary, His Excellency Turgut Menemencioglu ( 1972 ).
Area and Population.-Turks are to be found scattered throughout a wide belt extending from China through the Soviet Union, Afghanistan and Iran to the present day Turkish State.

Turkey itself extends from Edime (Adrianople) to Transcaucasia and Iran, and from the Black Sea to the Mediterranean, Syria and Iraq. Total population at the Census of October, 1975 was estimated at 40,197,669.

Turkey in Europe consists of Eastern Thrace, including the cities of Istanbul and Edirne, and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles-about 40 miles in length
with a width varying from 1 to 4 miles-the political neighbours being Greece and Bulgaria on the west. Population (Census, 1975), 3,773,705.

Turkey in Asia comprises the whole of Asia Minor m Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Iran, and from the Black Sea to the Mediteran. -II and the northern boundaries of Syria and Iraq. Population (Census, 1975), 36,423,964.

Government.-On October 29, 1923, the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Ataturk) President. Following the introduction of I multi-party régime in 1945, the Democrat Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, body of military officers. The committee ruled from January to November, 196x, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly.

At elections held in October, 1969 , the Justice Party obtained 256 seats, the People's Republican Party 143 and the Reliance Party $\times 5$. Mr. Demirel's Justice Party Government (in office since Oct., 1965) resigned on March 12, 1971, following a memorandum to the President by the Chiefs of Staff of the Armed Forces. Three all-party governments, two under Prof. Erim and the third under Senator Ferit Melen were in office between March 26, 197I and April 1973. After the resignation of the latter Senator Naim Talu formed a further government drawn mostly from the Justice and Republican Reliance Parties. Elections were held in October 1973 and PRP obtained 185 seats, JP I49 seats, DP 45 seats and NSP 48 seats. After several unsuccessful attempts to form a government, coalition under PRP party leader Mr. Bülent Ecevit with NSP as minority partner was formed on January 25, 1974.

However, this coalition collapsed in September, but continued to rule Turkey on a caretaker basis until Inew administration was formed by Senator Prof. Sadi Irmak in November. This largely technocratic government was denied a vote of confidence by Parliament, but continued in office until March 3X, 1975, when a right-wing coalition

of the Justice, National Salvation, Republican Reliance and Nationalist Action Parties was formed, under the Premiership of Süleyman Demirel, Chairman of the Justice Party.
The National Coalition government of Prime Minister Demirel continued in power until June 1977. The official results of the elections of June 5 , 1977 were as follows: Republican People's Party, ${ }_{213}$ (seats); Justice Party, 889 ; National Salvation Party, 24; National Action Party, 16; Republican Reliance Party, 3; Democratic Party, 1; Independents, 4. Mr. Bülent Ecerit formed a caretaker social-democratic Government. However, this Government was subsequently refused vote of confidence by the National Assembly on July 3 and resigned. Mr. Suleyman Demirel was asked to form a new Government, which was announced on July $2 x$.

Turkey is divided for administrative purposes into 67 vilayet with subdivisions into kaza and nahiye. Each vilayet has a governor (vali) and elective council.

Religion and Education.- 98.99 per cent. of the population are Moslems. The main religious minorities, which are concentrated in Istanbul and on the Syrian frontier, are: Orthodox, ro7,000; Armenian Apostolic, 7x,000; Catholic, 25,000; Protestant, 77,000 ; others, $\mathbf{x 0 , 0 0 0}$ (Total Christians, 230,000) J Jewish, 44,000. On April 10, 1928, the Grand National Assembly passed - law in virtue of which Islam ceased to be the State religion of the Republic. Education is free, secular and compulsory at primary level. There are elementary, secondary and vocational schools.
In 1976 there were 42,000 primary schools, with $5,5 \times 2,000$ pupils. There are three universities at Istanbul (Istanbul University, Istanbul Technical University and Bosazici (Bosphorus) University), three in Ankara (Ankara University, Hacettepe University and Orta Doğu (Middle East Technical) University), one each at Izmir, Erzurum and Trabzon. There is also a Faculty of Agriculture at Adana, Faculty of Veterinary Science in Elazig, and Faculties of Economics in Bursa and Eskisehir. The expenditure allocated to education in the 3 rd Five Year Plan (1973-77) is TL14,000,000,000, compared with $T L_{7,002,000,000}$ actually spent from 1968-72, but past experience has shown that targets in this feld are not always met.
Lansuage and Literature.-Until 1926, Turkish was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequeice of this change the number of Turks who can read and write is rising steadily, from about so per cent. in 1927 to nearly 80 per cent. by 1970. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by © popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neoLatin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Istanbul and Ankara, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek, Armenian and English and numerous magazines and weeklies on various subjects, but few trade commercial publications.

Agricultural Production.- 1975 was a year of significant growth in several sectors. Agricultural production rose to 28.8 per cent. of the gross domestic product at constant factor prices, while exports of
agricultural commodities represented 56.6 per cent. of the total exports. About $5^{8}$ per cent. of the working population are in the rural sector, but agriculture is still primitive in many areas and agricultural productivity is low. Estimated production figures for the principal crops in 1975 were ('ooo tons): Wheat, $\mathbf{1 4 , 7 5 0}$ (a record); barley, 4,500 ; rice, 165 ; pulses, $684 \cdot 3$; cotton, 48 o ; tobacco, 200; olives $588 \cdot 2$; sugar beet, 7,000 ; peaches, 170; apples, 800; citrus fruits, 750; sultanas, 1xo; hazelnuts, 350 . With the important exception of wheat, which is mostly grown on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred around Izmir, where substantial quantities of cotton are also grown. The main cetton area is in the Cukurova Plain around Adana. In 1974 it was estimated that there were $76,427,000$ head of livestock, including sheep, 40,539,000; goats, x8,746,000; and cattle, $13,387,000$. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

Industry.-After agriculture, Turkey's second most important industry is based on her considerable mineral wealth which is, however, I yet comparatively unexploited. Coal production in 1975 amounted to 8,361,000 tons, and II,759,000 tons of lignite. The main export mineral is chromite. Production of iron ore in 1975 was $2,238,108$ tons; chrome ore, 933,240 tons; manganese, 35,928 tons; sulphur, 83,832 tons; blister copper, 26,952 tons and boracite, 970,920 tons. The research and exploitation of the principal mineral deposits are mainly in the hands of the Mineral Research and Exploration Institute of Turkey and the Stateowned Etibank respectively. The latter controls directly, on behalf of the Government, all the copper, sulphur and pyrite output of Turkey, well as much of the colemenite and chrome production. Since State-sponsored industrialization began in 1935, industry has played an increasing part in the Turkish economy. Here, also, as in the case of minerals, much of the industry of the country is controlled by the Government.

The progress made in the manufacture of sugar, cotton, woollen and silk textiles, and cement, has been such that the bulk of the country's requirements can now be produced locally, while other industries contributing substantially to local needs include vehicle assembly, paper, glass and glassware, iron and steel, leather and leather goods, sulphur refining, canning and rubber goods, soaps and cosmetics, pharmaceutical products, prepared foodstuffs and a host of minor industries. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to promote the exploitation of Turkey's petroleum resources by foreign countries. Local production of crude petroleum in 1975 totalled $3,095,486$ tons, a decrease of 8.8 per cent. from 1974.

In common with other developing countries, Turkey's economy was adversely affected by the steep rises in oll prices from 1973 onwards. Remittances from workers overseas, which had risen to $\$ 2 \cdot 2$ billion in 1973 , flattened out and declined owing to the recession in Western Europe. Exports at $\$ 1,40 \mathrm{xm}$. fell in 1975 by 8.6 per cent. compared with 1974 . At the same time, industrial growth continued at a high level ( $8 \cdot 6$ per cent.). The unemployment figure for Turkey is $2,500,000$, which is approximately 14 per cent. of the labour force.

Since the Second World War the United States Government has given Turkey financial aid totalling over 5 billion dollars, half of which has been for military and half for economic purposes. The other main official sources of foreign aid have been the O.E.C.D., and more recently the I.B.R.D., while the I.M.F. has made medium term loans for balance of payment support. The United Kingdom has pledged nearly $£ 66,000,000$ of aid to Turkey since 1963.

The third of Turkey's three Five Year Development Plans, for the years 1973-77, began in January 1973. The basic economic objective of the third plan is to achieve an average growth rate of 7.9 per cent. per annum in the gross national product.

## COMMUNICATIONS

Railways.-The complete network became the property of the State Railways Administration in 1948. The total length of lines in operation at the end of 1974 was 8,14x kilometres. In 1974, the railways carried 128,424000 passengers and 83,770,000 metric tons of freight.

Roads.-At the end of 1976 there were $33,762 \mathrm{~km}$. of national roads ( 23,625 of which were macadamized). The total state and provincial road system is some $59,069 \mathrm{~km}$. in length. The estimated number of motor vehicles in use at the end of 1976 was 544,273 of which there were 261,316 motor cars, $3_{2}, 083$ minibuses, 27,083 buses, 145,184 trucks and 78,607 lightweight trucks.

Posts.-In June 1976 the number of telephone subscribers in Turkey was 710,000.

Shipping.-In August 1976 there were 176 merchant ships over 300 gross tons, 14 passenger ships and 57 tankers, giving II total draft weight of x,406,139 tons

Civil Aviation.-The State airlines (T.H.Y.) operate all internal services and have services to London, Paris, Athens, Beirut, Brussels, Amsterdam, Zürich, Frankfurt, Munich, Rome, Milan, Geneva, Copenhagen, Nicosia, Tel Aviv and Vienna. Most of the leading foreign airlines, including British Airways, operate services to Istanbul and some also to Ankara. The T.H.Y. fleet is composed of D.C.ro's, D.C.9's, Fokker Friendships, Fokker Fellowships and Boeing 707's.

## (Financial year, March $\begin{aligned} & \text { Finance } \\ & \text { to February 28) }\end{aligned}$ 1975-76 1976-77 <br> TL' 000,000 <br>  <br> Estimated Revenue. . . . . . .... 99,442 142,264

Currency.-The Turkish Lira (TL) is divided into zoo Kurus. The official rate of exchange is $T L$ $30=$ ExI $^{2}$ (June 1976) and TLx6=U.S.8r. (See also p. 84.)

|  | 1975 | 1976 |
| :---: | :---: | :---: |
| Total imports | \$4,739,000,000 | \$5,128,000,000 |
| Total exports. | 1,401,000,000 | 1,959,000,0 |

The 1975 foreign trade deficit figure was 3.3 billion U.S. Dollars, for $197^{6}$ it was 3.0 billion dollars. The growth in G.N.P. is currently running at an estimated 7.2 per cent.

All imports are subject to licence and the issue of licences is limited to goods considered necessary for the country's economy. Lists of permitted imports are published annually at the beginning of January. The main imports are machinery, crude oil and petroleum products, iron and steel, vehicles, medicines and dyes, fabrics and yarns. The principal exports are cotton, tobacco, fruits, nuts, minerals, livestock and textiles.

Capital of Turkey, Ankara (Angora), an inland town of Asia Minor, about 275 miles E.S.E. of Istanbul, with $\quad$ population (1975) of r,698,542. Ankara (or Ancyra) was the capital of the Roman Province of Galatia Prima, and a marble temple (now in ruins), dedicated to Augustus, contalis the Monumentum (Marmor) Ancyranum, inscribed with $\quad$ record of the reign of Augustus Casar. A new city was laid out on modern lines, with parks, statues and avenues. $\Psi$ ISTANBUL ( $2,534,839$ ), the former capital, was the Roman city of Byzantium. It was selected by Constantine the Great as the capital of the Roman Empire about A.D. $3^{28}$ and renamed Constantinople. Istanbul contains the celebrated church of St. Sophia, which, after becoming a mosque, was made I museum in r934; it also contains Topkapi, former Palace of the Ottoman Sultans, which is also $\mathbb{0}$ museum. Other cities are $\psi$ Izmir $(636,078)$; Adana ( 467,122 ); Bursa ( 346,084 ); Gaziantep ( 300,801 ); and Eskisehir ( 258,266 ).
Flag.-Red, with white crescent and star. NATIONAL DAY.-October 29 (Republic Day).

> Embassy In London 30 Prince's Gate, S.W. 7 $[0 \times-58 \mathrm{r} \times 8 \mathrm{x}]$

Ambassador Extraordinary and Ptenipotentiary, His Excellency Sayed Mohammed Mahdi Al-Tajir.
The United Arab Emirates (formerly the Trucial States) is composed of seven Emirates (Abu Dhabi, Ajman, Dubai, Fujeirah, Ras al Khaimah, Sharjah and Umm al Qaiwain) which came together as an independent state on December 2, 197t, when they ended their individual special treaty relationships with the British Government (Ras al Khaimah joined the other six on February 10,1972 ).

The British Government, by virtue of a treaty made in 8892 , had been responsible for the external affairs of the states through the British Political Resident in the Arabian Gulf and the British Political Agents in each state but on independence the Union Government assumed full responsibility for all internal and external affairs apart from some internal matters that remained the prerogative of the individual Emirates. Six of the Emirates lie on the shore of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West while the seventh, Fujeirah, lies on the Gulf of Oman.

Area and Population
The approximate area of the U.A.E. is 32,000 square miles and the population (according to a census in December 1975) is 655,937 , more than double the 1972 estimate. Security in the area is maintained under one central command by the Union Defence Forces (formerly the Trucial Scouts). Until May 1976 Abu Dhabi, Dubai, Sharjah and Ras al Khaimah had their own separate defence forces, of which the Abu Dhabi Defence Force was the largest, but they were then merged with the Union Defence Forces. Some of the separate police forces have also been merged.

Revenue is chiefly derived from oil and from customs dues on imports. Other formerly important sources of revenue, such as the export of dried fish and pearling, are now almost negligible. A substantial amount is spent on overseas aid, where commitments in 1975 reached a quarter of the gross national product, and on agriculture where more than half of the cultivable area of more than 50,000 acres has already been brought into use.

Trade with U.K.

## 1974

1975
Imports from U.K.... $£ 103,800,000 £ 198,650,000$ Exports to U.K....... 220,300,000 $\mathbf{1 5 9 , 1 6 1 , 0 0 0}$
Abu Dhabi is the largest Emirate of the U.A.E. in area, stretching from Khor al Odaid in the west to the borders with Dubai in the Jebel Ali area. It includes six villages in the Buraimi oasis, the other three being part of the Sultanate of Oman, and number of settlements in the Liwa Oasis system. Following negotiations with Saudi Arabia, some adjustment of the border has now been made in the Khor al Odaid region, but the agreement has not yet been ratified.

The Abu Dhabl Government owns a sixty per cent. interest in oil operations in the Emirate, through the Abu Dhabi National Oil Company. Several companies are operating; the two most important are the Abu Dhabi Petroleum Co. Ltd., on land and Abu Dhabi Marine Areas Ltd. in the offshore concession area. The most important
offshore field is near Das Island where Abu Dhabi Marine Areas has its headquarters and which began production in 1962. Production from the on-shore Murban field began in December 1963 . AbuDhabi's oil revenues for 1975 are estimated at $\mathcal{L}, 650$ million. With its oil wealth the Emirates are expanding rapidly, not only in Abu Dhabi, now a fast growing modern town, but also elsewhere such as at Al Ain in the Buraimi Oasis. There are airfields at Abu Dhabi and Das Island, and an airstrip at Al Ain, and new harbour, Port Zaid, at Abu Dhabi. The population of the Emirates is 235,662 ( $\mathbf{x} 975$ census).

Dubai is the second largest Emirate both in size and in population, which was $206,86 \mathrm{x}$ at the last census. The town of Dubai is the main port for the import of goods into the U.A.E. and the interior of the Sultanate of Oman, and there is also a lively entrepôt trade. Oil was discovered offshore in x966 and production began in September 1973. A second offshore field was discovered in September 1973. The main operator is the Dubai Petroleum Company.

Development is proceeding fast. A new deep water harbour was completed in 1972 and is now being expanded, while a major dry dock has also been built. An international airport opened in May r97r, served on a schedule basis by ten international airlines and by two regular freight services. More than thirty banks are now operating in Dubai and telegraphic and telex communications, managed by Cable and Wireless, are good.

Sharjah, with a present population of 88,188 , has declined from its position 50 years ago as principal town in the area. It became the third oil producing Emirate in the summer of 1974, following the discovery of oil offshore by the Crescent Petroleum Company, a consortium of six companies from the United States headed by Buttes Oil and Gas. The offshore concessions on Sharjah's west coast, in the Arabian Gulf, are held by Shell Hydrocarbons, while Shell Minerals hold both the offshore and on-shore concessions for Sharjah's eastern dependencies on the Gulf of Oman coast. Linked by metalled roads to Dubai and Ras al Khaimah on the Arabian Gulf coast, Sharjah is centrally placed within the U.A.E., and is now experiencing construction and business boom. More than dozen banks are already in operation. Sharjah harbour has been deepened and expanded, while construction of new port at Khor Fakkan, the Gulf of Oman coast, is under way. A small airport is in use while a new one, which will be the biggest in the Middle East, is approaching completion.

Ras al Khaimah has a population of 57,282 of whom more than half live in the town. An ancient sea-port, near which archaeological remains have been found, Ras al Khaimah is the most agricultural of the Emirates, producing vegetables, dates, fruit and tobacco. The offshore oil concession is held by Vitol Exploration and the on-shore concession by Shell Hydrocarbons. Some oil has been found off the coast, but not in commercial quantities.

Fujeirah, with a population of 26,498 , is the poorest and most remote of the seven Emirates lying on the Gulf of Oman coast, and only connected by a metal road to the rest of the country since the end of 2975 . Largely agricultural, its population is spread between the slopes of the inland Hajar mountain range and the town of Fujeirah itself, together with a number of smaller settlements am the comparatively fertile plain on the coast. Shell Minerals hold the on-shore concession and offshore drilling by Reserve Oil and Minerals was due to begin by the end of 1976.

Ajman and Umm al Qaiwain are the smallest

Emirates having populations of $2 x, 566$ and 16,879 respectively. Both lie on the Arabian Gulf coast although Ajman has two inland enclaves at Manama and Masfut. Both are beginning to benefit from the rapid development taking place in their neighbours, Sharjah and Ras al Khaimah. Occidental of Ajman Incorporated hold both the major on-shore and offshore oil concessions, while in Umm al Qaiwain the on-shore concession is held by Shell Hydrocarbons and the offshore by Occidental of Umm al Qaiwain Incorporated and by a consortium headed by Zapata Exploration who made a noncommercial oil find early in 1975 .

BRItish Embassy
(Abu Dhabi)
Ambassador Extraordinary and Plenipotentiary, His Excellency David Arthur Roberts (r977).
British Council Representative, C. W. Long, P.O. Box 6523, Abu Dhabi.

## UPPER VOLTA

(République de Haute Volta)
President, Gen. Sangoulé Lamizana, assumed power in 1966.
Foreign Affairs, Alfred Kabore.
Justice, Francois-Xavier Zongo.
Finance, Capt. Léonard Kalmogo.
Information and Posts and Telecommunications, Capt. Koulidiati.
Interior and Securily, Maj. Gabriel Some Yorgman.

Public Service and Labour, Zoumana Traore.
Planning, Boubac ar Soumana.
Tourism, Emile Bassano.
Upper Volta is an inland savannah state in West Africa, situated between $9^{\circ}$ and $15^{\circ} \mathrm{N}$ and $2^{\circ} \mathrm{E}$ and $5^{\circ} \mathrm{W}$ with an 1 II of about 100,000 square miles and $=$ population estimated in 1972 at $5.514,000$. It has common boundaries with Mali on the west, Niger and Benin on the east and Togo, Ghana and the Ivory Coast on the south. The largest tribe is the Mossi whose king, the Moro Naba, still wields a certain moral influence.
Upper Volta was annexed by France in $x 896$ and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December II, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, etc., were signed in Paris on April 24, 196x. Upper Volta is a member of the Conseil de l'Entente, OCAM, OAU C.E.A.O. and C.E.D.E.A.O. (see Ivory Coast). The official language is French. The 1960 constitution provided for presidential form of government with a single chamber National Assembly, but in January, $\mathbf{x 9 6 6}$, the Army assumed power after popular demonstrations in Ouagadougou against the régime of the former President Yaméogo. A new constitution allowing for
partial return to civilian rule but with the Army still in effective control was adopted by $n$ referendum held on June 14, 1970. Following internal political manoeuvering the President suspended the constitution on Feb. 8, 1974 and dissolved the National Assembly. A Government of National Renewal was formed, with a majority of military members. A Government appointed 32 man committee has drafted new Constitution with a view to a return to Parliamentary democracy at the beginning of $197^{8 .}$ Full legislative and presidential elections are due to take place at the end of 1977.
Finance and Trade.-The currency of the Republic is the Franc CFA (Francs CFA $50=1$ French Franc). The 1976 Budget totalled Francs CFA 25,522,000,000.
The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea-nuts and cotton. Small deposits of gold, manganese, copper, bauxite and graphite have been found. Value of trade in 1974 amounted to: Imports, francs CFA 34,664,000; Exports, francs CFA $8,702,000$. Imports from U.K.£536,000 (1976); Exports to U.K. - £5,855,000 (1976).

CAPITAL-Ouagadougou ( $\mathbf{x 2 5 , 0 0 0 \text { ). Other prin- }}$ cipal town: Bobo-Dioulasso ( 80,000 ).
Flag.-Three horizontal stripes, black over white over red.
National Day.-December $x$.
British Representation
Ambassador Extraordinary and Plenipotentiary, His
Excellency Joe Booth Wright (resident in Abidjan).

## URUGUAY

(República Oriental del Uruguay)
President, Dr. Aparicio Méndez (1976).

## Cabinet

Minister of Interior, General Hugo Linares Brum.
Foreign Affairs, Sr. Alejandro Rovira.
Economy and Finance, Cr. Valentín Arismendi.

Director of Planning and Budget, Sr. Juan José Anichini.
Justice, Dr. Fernando Bayardo Bengoa.
Secretariat of Planning, Coordination and Diffusion, Brig. José D. Cardozo.

## Uruguayan Embassy and Consulate 48 Lennox Gardens, S.W.I [01-589 8835]

Ambassador Extraordinary and Plenipotentiary (vacant). Minister-Counsellor, Sr. Ramiro Píriz Ballón. ist Secretary, Senor Alfredo Cazes.
Area and Population. - The smallest Republic in South America, on the east coast of the Rio de la Plata situated in lat. $30^{\circ}-35^{\circ} \mathrm{S}$. and long. $53^{\circ} 25^{\prime}-$ $57^{\circ} 42^{\prime}$ W., with an area of 72,172 square miles, and population of $2,763,964$, almost entirely white and predominantly of Spanish and Italian descent. Many Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.-The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills $\begin{aligned} \\ \text { the Cuchilla del Haedo, which cross the }\end{aligned}$ Brazilian boundary and extend southwards to the

Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet.

The principal river is the Rio Negro (with its tributary the Yi), flowing from north-east to southwest into the Rio Uruguay. The boundary river Uruguay is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for $\quad$ considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin.
The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.
Government.-Uruguay-or the Banda Oriental, as this territory lying on the eastern bank of the Uruguay River was then called-resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the r7th century, and roo years later the Portuguese settlements were captured by the Spaniards. From 1726 to 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825 , the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in $\mathbf{5 8 2 8}$. In 1830 a Republic was inaugurated.

Elections were held - Nov. 28, 1971, which gave the Colorado Party a narrow majority.
According to the Constitution the President appoints I council of II ministers and the VicePresident presides over Congress. The legislature consists of a Chamber of 99 deputies and I Scnate of 30 members (plus the Vice-President), elected for five years by a system of proportional representation. Voting is obligatory and extends to all citizens of good repute and certain long standing residents who are not citizens, from the age of 18 . However, since February, 1973 the country has been governed by presidential rule with military support.
The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry. - Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1970 livestock census showed figures of 8,563,747 cattle, $19,892,758$ sheep, 420,972 horses, 418,709 hogs. It was estimated that in 1973 the number of cattle rose to $x \mathrm{x}, 000,000$. In addition to the meat packing industry, other foodstuffs, wine, beer and textiles are of importance.

The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leathercuring, beet-sugar, plastics, household consumer goods, edible oils and the refining of petroleum and petroleum products.

Mineral Deposits.-Iron is now being quarried;
estimated yearly production is $2,000,000$ tons of first quality pellets.

Communications.-There about $7,820 \mathrm{~km}$. of national highways, and about $12,083 \mathrm{~km}$. of telegraph, with 48,375 miles of telephones.

There are about $2,398 \mathrm{~km}$. of standard gauge railway in use in Uruguay. A State Autonomous Entity was formed to administer the rail way systems purchased by the Government from four British companies in 1948.

An airline, PLUNA, which is owned by the State, runs $=$ limited daily service to southern Brazil, Paraguay and Argentina. The principal capitals of the interior and limited freight service are connected to Montevideo by IAMO, another State owned airline, using principally military aircraft and personnel. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.-Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, and technical and trade schools and evening courses for adult education are state controlled. There are about 322,053 pupils in the 2,362 state schools. In 1969 there were 140,700 pupils in secondary schools. The University at Montevideo (founded in 1849 ) had, in 1969, 18,000 students enrolled in its ten faculties.

Language and Literature.-Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Five daily newspapers are published in Montevideo with an estimated total circulation of 200,000 . Most of them are distributed throughout the country.

Finance- No recent figures of revenue and expenditure are available. The national debt at Dec. 31, 1972 amounted to \$Ur. 6x,597, 140,427 .

Currency. - The monetary unit is the peso. In May, 5963 , the gold content of the peso was fixed at - osg245 grammes of pure gold. After several devaluations the commercial exchange rate stood at June 21, 1977, at UrN $\$ 4 \cdot 69=\$$ U.S.1. Sterling exchange stood at June 21, 1977, at UrN \$8.04= $\mathcal{E}$. The quotations of the U.S. dollar and pound sterling in the financial fluctuating market as at the same date were 4.70 and 8.08 Uruguayan pesos respectively. Sterling exchange, see p. 84 .

|  | Trade |  |
| :---: | :---: | :---: |
|  | 1975 | 1976 |
| Total exports | \$U.S.38x,197,78x | \$U.S.546,746,000 |
| Total imports | 516,197,876 | 587,177,000 |

The major exports are meat and by-products, wool and by-products, hides and bristle and agricultural products. The principal imports are raw materials, construction materials, oils and lubricants, automotive vehicles, kits and machinery.
The principal export item to the U.K. is wool and the main imports are automotive vehicles, kits, machinery, raw materials and metals.

CapITAL, $\Psi$ Montevideo. Population ( 1975 census $x, 229,748$ ). Other centres (with 1967 estimates) are $\Psi$ Salto $(60,000), \Psi$ Paysandu ( 60,000 ), $\Psi$ Mercedes $(34,000)$, Minas $(34,000)$, Melo ( 30,000 ), and Rivera $(40,000)$.
FLAG.-Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff. National DAY.-August 25 (Declaration of Independence, 1825).

Time of transit from London to Montevideo, by air, 20-22 hours.

## BRITISH EMBASSY

British-Uruguayan Chamber of Commrrce, Avenida Agraciada 164r, Piso $2^{\circ}$, Montevideo.

## U.S.S.R.

Soyuz Sovetskikh Sotsialistiches kh Respublik= Union of Soviet Socialist Republics
THE COMMUNIST PARTY OF THE SOVIET UNION

## (K.P.S.S. $=$ Kommunisticheskaya Partiya Sovetskogo Soyuza)

Constitutionally, the highest executive organ of the C.P.S.U. is its Central Committee, as elected by the Party Congress. The present Central Committee (elected at the XXVth Party Congress in March, 1976) consists of 287 full members; there are also I39 candidate members with a consultative voice and 85 members of the Central Revision Commission. The real power in the Party is vested, however, in the Politbureau, the Secretarial and the permanent Departments of the Central Committec.

Politbureau, Yu. V. Andropov; L. I. Brezhnev: V. V. Grishin; A. A. Gromyko; A. P. Kirilenko; A. N. Kosygin; F. D. Kulakov; D. A. Kunayev; K. T. Mazurov; A. Ya Pel'she; G. V. Romanov; V. V. Shcherbitsky; M. A. Suslov; D. F. Ustinov: (full members); G. A. Aliev; P. N. Demichev; P. M. Masherov; B. N. Ponomarev; Sh. R. Rashidov; M. S. Solomentsev (candidates for Membership).

Secretariat, Leonid Ilyich Brezhnev (General Secretary) (since October 14, 1964); K. U. Chernenko; V. I. Dolgikh; I. V. Kapitonov; A. P. Kirilenko: F. D. Kulakov; B. N. Ponomarev; K. V. Rosakov; Ya. P. Ryabov; M. A. Suslov; M. V. Zimyanin.

Committee of Party Control, A. Ya Pel'she (Chairman).

Komsomol (Young Communist League). B. N. Pastukhov ( $x$ st Secretary).

## GOVERNMENT OF THE U.S.S.R

The Presidium of the Supreme Soviet of the U.S.S.R.

Chairman (=President of the U.S.S.R.), L. I. Brezhnev (since June 16, 1977).
Secretary, M. P. Georgadze.
The Supreme Soviet (=Parliament) consists of two chambers.
Chairman (=Speaker) of the Council of the Union, A. P. Shitikov.

Chairman ( $=$ Speaker) of the Council of Nationalities, V. P. Ruben.

The Council of Ministers of the U.S.S.R.
Chairman ( = Prime Minister), Alexel Nikolayevich Kosygin (since October 14, 1964).
sit Vice-Chairmen, K. T. Mazurov:N. A. Tikhonov.

Vice-Chairmen, I. V. Arkhipov; N. K. Baybakov; V. E. Dymshits; K. F. Katushev; V. A Kirillin; M. A. Lesechko; N. V. Martynov; I. T. Novikov; V. N. Novikov;Z. N. Nuriyev; L, V.Smirnov.

Ministries.-There are three groups of departmental ministries, with - total of 76 ministers- $3 x$ All Union Ministries, i.e. federal ministries, $3^{18}$ Union Republican Ministries (co-ordinating ministries of individual republics) and 14 Chairmen of State committees, etc., ranking as Ministers. The more important posts are occupied by:
Foreign Affairs, A. A. Gromyko.
Defence, D. F. Ustinov.
Foreign Trade, N. S. Patolichev.
Internal Affairs, N. A. Shchelokov.
Planning, N. K. Baybakov.
Science and Technology, V. A. Kirillin.
Buildings, I. T. Novikov.
State Security, Yu V. Andropov.
The Prime Ministers of the 15 constituent republics belong to the Council ex officio.

> Embassy or the U.S.S.R. IN LONDON i3 Kensington Palace Gardens, W. 8. [ox-229 3628$]$

Ambassador Extraordinary and Plenipotentiary, His Excellency Nikolai M. Lunkov (ig73).

## Area and Population

The U.S.S.R is composed of $\times 5$ Union Republics (see below). Before the outbreak of the Second World War ( 1941 r-45 in U.S.S.R.), the U.S.S.R. consisted of II Republics-the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmen, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called Western Ukraine and Western Belorussia, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.
In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviety Socialist Republic to form a Karelo-Finnish S.S.R. which became the rath constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of Bessarabia ceded by Rumania in June was joined to the Moldavian A.S.S.R. to form Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of Bessarabia, including the Danube estuary port of Izmail, and Northern Bukovina, also ceded by Rumania, became part of the Ukraine. The new Soviet-Rumanian frontier was confirmed by the $x 947$ Peace Treaty with Rumania.
In August, 1940, the three independent Baltic States, Estonia, Latvia and Lithuania, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16 th Republics respectively. In June, $\mathbf{x} 945$, Ruthenia was ceded by Czechoslovakia and became part of the Ukranian S.S.R. under the name of Transcarpathia. After the defeat of Germany, $=$ part of East Prussia with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of Memel (Klaipeda) W incorporated into the Lithuanian S.S.S. By the 1947 Peace Treaty with Finland, the district of Petsamo (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of Sakhalin and the whole of the Kurile Islands were incorporated into the lastnamed Republic in $\mathbf{2 9 4 5}$, after the defeat of Japan. In October, 1944, Tannu-Tuva, until the Second World

War 1 nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of Tuva and, in 1961, the Autonomous Republic of Tuva, within the R.S.F.S.R.
In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (Karelian) Republic within the R.S.F.S.R.
Area and population (January $x_{y} 1976$ estimate) of the constituent Republics of the U.S.S.R. with their capitals:-

* (Adjusted to include transfer of 3 border regions -888 sq. miles and 162,000 inhabitants-by Uzbek S.S.R., Kazakh S.S.R. and U.S.S.R. decrees of May-June 197r.)
The total area of the U.S.S.R. is $8,620,822 \mathrm{sq}$. miles; the total population: $255,524,000$.

A striking demographic feature is the rapid urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total, in 1976 it reached $6 x$ per cent., owing to migration to the towns, growth of new towns, incorporation of villages into conurbations and $\quad$ higher birth-rate in urban areas. There are now 40 towns with over 500,000 (II in 1939).
The proportion of women to men is 53.6 to $46 \cdot 4$. (In 1973 the birth-rate was 17.6 ; the mortality rate, 8.6 ; the natural increase, $9 \cdot 0$ per $x, 000$.

More than four-fifths of the people were born after the 3917 Revolution.

## Main Nationalities (1970 Census)

The most numerous national groups of U.S.S.R. are: Russian, 129 m and Ukrainian, 41 m . There are between 5 and million Kazakhs, Tatars, Belorussians, and Uzbeks respectively. Azerbaidjani, Armenians and Georgians number between 3 and 4 million each group. There are some $z$ to 2.5 million Lithuanians, Jews, Moldavians and Tadjiks. In each of the following nationality groups the population numbers between $x \cdot 0$ and x. 8 million: Germans, Chuvashes, Latvians, Poles, Mordovians, Turkmens, Kirghizians, Bashkirs and Estonians.
The 1970 census revealed a remarkable difference between the growth rates of individual nationalities: while the Slav nations showed an annual increase of roughly one per cent., certain Central-Asian and Caucasian (mostly Moslem) nations recorded an annual net growth of three to four per cent.

## The Constitution

On 4 June 1977 the draft of a new Constitution to replace the current 1936 ("Stalin") Constitution, was published in the Soviet press. It should be

adopted in October or November 1977. The new draft includes most of the provisions of its predecessor and a number of new ones; it has 173 Articles against 146.

The draft is divided into preamble and 9 Sections. The preamble describes the Soviet Union as a "developed Socialist society", which is said to be a logical stage on the road to communism. The highest aim of the Soviet state is said to be the building of a classless communist society.
Section I covers the bases of the social-political and economic system. The Soviet state is said to be one of the whole people (Article x) and built on the principle of "democratic centralism", described as the electivity of all organs of state power from bottom to top, their accountability to the people, the mandatory fulfilment of decisions of higher organs by lower organs, the combination of unitary leadership with local initiative and the responsibility of each state organ and official for the work he is doing (Article 3). The Communist Party of the Soviet Union is brought from the obscurity of Article 126 of the 1936 Constitution into the prominence of Article 6 of the new draft, where it is described as "the leading and guiding force of Soviet society, the nucleus of its political system and of all state and public organisations". It is said to "determine the general perspective of the development of society, the line of internal and external policies of the U.S.S.R".

The economic system is based on "socialist ownership of the means of production", which comprises either state ownership or ownership by collective farms and other cooperative organisations or trade unions and other public organisations (Article g). The economy of the U.S.S.R. is said to comprise "a unitary economic complex, embracing all the elements of social production, distribution and exchange on the territory of the U.S.S.R". It is managed on the basis of state plans (Article 15).

This section also contains new chapters on social development and culture, foreign policy, and the defence of the socialist Fatherland. The foreign policy of the U.S.S.R. is said to be "directed to ensuring favourable international conditions for the building of communism in the U.S.S.R" (Article 28).

Section II is devoted to the state and the individual. This includes a long chapter on the basic rights, freedoms and duties of citizens of the U.S.S.R., all of which are subject to the proviso that "exercise by citizens of rights and freedoms must not injure the interests of society and state, and the rights of other citizens" (Article 39). The rights listed include the right to work, leisure, health protection, maintenance in old age, housing, education, access to the achievements of culture, freedom of scientific, technical and artistic creative work "in accordance with the aims of communist construction", the right to take part in the administration of state and public affairs, to submit proposals and complaints to state public organs (Articles 40-49), as well as to freedom of speech, the press and association "in accordance with the interests of the working people and with the aim of strengthening the socialist system" (Article 50).
Freedom to profess or not profess any religion and to conduct atheistic (but not religious) propaganda, and the separation of the Church from the State and the school from the Church are provided for by Article 52. Section II also includes a list of obligations which is more comprehensive than that of the 1936 Constitution and includes the obligation to work conscientiously, to safeguard socialist property, to contribute to the strengthening of the might and prestige of the state, to do military service, to respect the national dignity of other citizens, to contribute to the maintenance of public
order, to prepare their children for "socially useful labour", to protect nature and to further the consolidation of world peace (Articles 59-68).

Section III on the national-state structure of the U.S.S.R. describes it as a "unitary federal multinational state, formed as a result of the free selfdetermination of nations and the voluntary union of equal Soviet Socialist Republics (Article 69). "Each Union Republic shall retain the right freely to secede from the U.S.S.R" (Article 7x).
Section IV on the Soviets of people's deputies and the procedure for electing them provides for the Supreme Soviet of the U.S.S.R. and the Supreme Soviets of Union and Republics to be elected for term of 5 years and for local Soviets to be elected for $2 \frac{1}{2}$ years (Article 89). The minimum voting age and minimum age for deputies in all Soviets has been lowered to 18 (Article 95).
Under Section V, the higher organs of State power and administration of the U.S.S.R., the Supreme Soviet of the U.S.S.R. is the highest organ of State power (Article zo6). It consists of two chambers, I Council of the Union and Council of Nationalities, which are to be equal in rights and consist of the same number of deputies (Articles 107 and 108). Sessions of the Supreme Soviet are convoked twice a year (Article 110 ); between sessions the Supreme Soviet is represented by its Presidium, which consists of $\llbracket$ Chairman (President), a First Deputy Chairman, 15 Deputy Chairmen, one from each Union Republic, a Secretary and 11 Members (Articles $1 \mathrm{I}_{7}$ and 138).

The highest executive organ of the State is the Council of Ministers of the U.S.S.R. (Article 127), consisting of the Chairman, his Deputies, U.S.S.R. Ministers and Chairman of State Committees, Chairmen of the Councils of Ministers of Union Republics ex officio and others (Article 128). The Council of Ministers is accountable to the Supreme Soviet (Article 129). A smaller body, the Presidium of the Council of Ministers, comprising the Chairman and his Deputies, acts as the permanent organ of the Council of Ministers (Article 13x).
Section VI covers the bases of the structure of organs of state power and administration in Union Republics. Section VII deals with justice, arbitration and supervision by the Procuracy. Section VIII deals with the arms, flag, anthem and capital of the U.S.S.R. Section IX is on the procedure for bringing the Constitution into effect and amending it.
Chronological System.-On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June $x 6$, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

## language, Literature and Arts

Language and Literature.-Russian is a branch of the Slavonic family of languages which is divided into the following groups: Eastern, including Russian, Ukrainian and White Russian; Western, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and Southern, including SerboCroat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great ( $1682-1725$ ), Russian literature consisted mainly of folk ballads (byliny), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw - brilliant development
of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (17991837) and Mikhail Lermontov (2814-1841). The aoth century produced great poets like Alexander Blok ( $8880-1921$ ), the Nobel Prize laureate of 1958 Boris Pasternak ( $x 890-1960$ ), Vladimir Mayakovsky (x893-r930) and Anna Akhmatova (1888-1966). Realistic fiction is associated with the of Nikolai Gogol ( $1809-1852$ ), Ivan Turgenev ( $1818-1883$ ), Fedor Dostoyevsky ( $1821-1881$ ) and Leo Tolstoy ( $\mathbf{x 8 2 8 - 1 9 1 0 \text { ), and later with Anton }}$ Tchekhov ( $\mathbf{8} 860-1904$ ), Maxim Gorky ( 1868 -1936), Ivan Bunin ( $\mathbf{x} 80-1953$ ) and Alexander Solzhenitsyn (b. 1918).

Great in music include Glinka ( 1804 1857), Borodin ( $\mathrm{I}_{3} 33^{-8} 7$ ), Mussorgsky ( $1839-$ 188z), Rimsky-Korsakov ( $\mathbf{1 8 4 4 - 1 9 0 8 \text { ), Rubinstein }}$ ( $1820-1894$ ), Tchaikovsky ( $8840-1893$ ), Rakhmaninov ( $\mathbf{x 8} 73$-1943), Skriabin ( $2872-1915$ ), Prokofiev ( $189 \mathrm{x}-1953$ ). Stravinsky ( 1882 -1971) and Shostakovich ( 1906 -1975). Performers include Igor Oistrakh, M. Rostropovich, and S. Richter and the famous conductor Rozhdestvensky.

## FInANCE

A new "heavy" Rouble was introduced on January x, 196r. Prices and wages have been changed accordingly at the rate of no old Roubles $=$ I new Rouble. The official exchange rate is now approx. $£ x=R \cdot x \cdot 28$. It bears little relation to the actual purciasing power of the two currencies. Banknotes in circulation are those valuing R. I, 3 , $5,10,25,50$ and roo. There are also coins valuing Kopecks $1,2,3,5,10,15,20$ and R. . .

## Depence

Defence expenditure in the U.S.S.R. for 1976 is put officially at 17.4 billion roubles (or 7.8 per cent. of total budget). It is believed, however, that this does not represent the total spent on defence in the U.S.S.R. Much of this is concealed in estimates for other ministries. The general trend is I continuing emphasis on nuclear weapons while improving the levels and capabilities of conventional arms.

The basic military service is two years in the Army and Air Force and two to three years in the Navy and Border Guards.

The total size of the Soviet regular forces is now estimated to be about $3,650,000$, excluding some 750,000 uniformed civilians.

Operational ICBMs, i.e. Inter-Continental Ballistic Missiles, now total about 1,530 . SLBMs number 845. The number of MRBMs and IRBMs appears to be fixed at about 600 . The operational personnel of the Strategic Rocket Forces totals about 375,000.

The Air Forces comprise about ix,050 operational aircraft (including about 8,250 combat aircraft). The total strength of the Air Forces, excluding the Naval Air Force ( 50,000 ), is about 450,000 men. The total personnel of the separate Air Defence Command is estimated at 550,000 men.

The total size of the Soviet Army is estimated at . $, 825,000$ men. is thought to be organized in 168 divisions, distributed as follows: 64 divisions in European U.S.S.R., 30 in Central and Southern U.S.S.R., 43 in the Sino-Sovict border area, $3^{\mathrm{I}}$ in Eastern Europe.

The total strength of the Soviet Navy and Naval Air Force is 450,000 Em . In total tonnage, it is the second largest navy in the world, and its main strength lies in the submarine fleet. There are now 84 nuclear-powered and 347 diesel-powered submarines.
The Soviet Navy now has its first aircraft carrier. Two more are in building. The landbased Naval Air Force comprises about 645 combat
aircraft, 430 of which are bombers. The surface ships comprise 38 cruisers and 8 x destroyers.

The para-military forces number some 175,000 security and $\mathbf{~ 7 5 , 0 0 0}$ border troops. There are also about 2 $\frac{1}{2}$ millionDOSAAF members who participate in such activities as athletics, shooting and parachuting.
Minister of Defence, D. F. Ustinov (with rank of Marshal of the Soviet Union).
Chief of General Staff, Marshal N. V. Ogarkov. Chief, Political Administration, Soviet Armed Forces, Army Gen. A. A. Yepishev.
On May 14, 1955: In Treaty of Friendship, Mutual Assistance and Co-operation was signed in Warsaw between the Soviet Union and its European associates (Bulgaria, East Germany, Hungary, Poland, Rumania, and Czechoslovakia) (and Albania which left the Pact in Sept. 1968) to serve as a counterpoise to NATO. A united military command wil set up in Moscow (Secretary-General, N. P. Firyubin; C.-inC., Marshal V. G. Kulikov; Chief of Staff, Army General A. I. Gribkov.

## Industry and Agriculture

One of the most remarkable aspects of the Soviet economy has been the transformation of messentially agricultural country into the second-strongest industrial power in the world. The 1976 output amounted to $105,000,000^{*}$ tons of pig-iron, $145,000,000^{\star}$ thins of steel, $118,000,000^{*}$ tons of rolled metal, 712,000,000* tons of coal, $520,000,000^{*}$ tons of crude oil, 124,000,000* tons of cement, $I, 3 \pm I, 000$ million $\mathrm{k} W / \mathrm{h}$ of electricity and $2,025,000$ motor vehicles.
Agricultural development has been far slower, mainly owing to lack of incentives among peasants organized in kolkhozy (collective farms). Repeated droughts, such - in 1975, were a contributing factor to $\quad$ permanent shortage of grain. Stock breeding has also suffered from the general mismanagement of farming. The livestock at Jan, $\mathbf{1}, 1976$ included 110,000,000 cattle, including 41,900,000 cows, and $146,900,000$ sheep and goats. The level of productivity remains very low. It remains to be seen whether new incentives for peasants introduced in 1966 and 1970 and $\mid$ variety of administrative reforms recently introduced in Moldavia and elsewhere will bring about 1 radical change in the situation. Forests cover nearly 40 per cent. of the whole area of the Union and form $\quad$ considerable source of wealth.

## Communications

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have I good system of north-south and eastwest lines, but the eastern part (the Volga lands), traversed it is by trunk lines between Europe and Asia which enter Siberia via Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (Turksib) which has made possible 1 large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the Trans-Siberian Railway (Magnito-gorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novo-sibirsk-Proyektnaya, etc.), which of great
importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line (the BaikalAmur Railway) is under construction; it will follow a more northerly alignment than the existing TransSiberian and will terminate in the Pacific port of Sovetskaya Gavan.
Sea Ports and Inland Waterways.-The most important ports (Odessa, Nikolayev, Batumi, Taganrog, Rostov, Kerch, Sevastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, icebound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from $2 \frac{1}{2}$ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carried about $475,500,000$ tons of freight in 1975. They are supplemented by system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the White Sea-Baltic Canal, and the Moscow-Volga Canal. The 63 -miles long VolgaDon Canal linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May 1952.

FLAG of the U.S.S.R.-Red, with five-pointed star above hammer and sickle.
National Day of the U.S.S.R.-November 7 (Commemorating the October Bolshevist Revolution of r9x7).

## British Embassy

 (Naberezhnaya Morisa Toreza 14, Moscow)Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Howard Frank Trayton Smith, K.C.M.G. (1975).

Minister, R. L. Wade-Gery.
Counsellors, J. W. Hutson, O.B.E. (Commercial), Dr. J. C. J. Thynne (Scientific); C. L. G. Mallaby (Head of Chancery); B. Spencer (Admin.).
Defence and Air Altaché, Air Cdre. P. D. Thorne, O.B.E., D.F.C.

Military Altaché, Brig. D. H. Bush.
Naval Attaché, Capt. P. H. Coward.
British Council Representative, A. A. Edmondson (Asst. Cultural Altaché).
There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.
1.-R.S.E.S.R.
(The Russian Soviet Federal Socialist Republic) Chairman of the Presidium of the Supreme Soviet, M.A. Yasnov.
Chairman of the Council of Ministers, M. S. Solomentsev.
The R.S.F.S.R. has no Communist Party Central Committee of its own.
The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and
the major northern half of its Aslatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 53 per cent. of the total population. It consists of $x 6$ Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Osetian, Tatar, Tuva, Udmurt and Yakut A.S.S.R.s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Vorenezh and Yaroslav1).
Physical Features.-The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. extends over all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.
The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Obi with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas."
Minerals.-The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus, in the area between the Volga and the Ural (the so-called "Second Baku") and in Western Siberia. The Ural mountains contain a unique assortment of minerals-high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khopper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk-Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry. - The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops
agriculture more complex. An extensive programme of land improvement mainly involving this zone, announced early in 1974, aims to double its total agricultural output by 1990 . In the eastern part of this zone, between the Volga and the Urals, cericulture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown - the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from two areas in the R.S.F.S.R.-the Bashkir and Tatar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Novokuznetsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizh-ny-Tagil, Novosibirsk, Omsk, Volgograd, Gorky, Saratov, Grozny, Rostov and Taganrog.

CapITAL, MosCow. Population 7,734,000 (Jan. I, 1976). Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 5 th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. $\Psi$ Leningrad (before the First World War "St. Petersburg" and from 1914-1924 "Petrograd ") has a population of $4,372,000$ (Jan. I, 2976).

Other towns with populations exceeding 500,000 are:-

About 83 per cent. of the population are Russians. III.-UKRAINE

First Secretary of the Party Central Committee, V. V. Shcherbitsky.

Chairman of the Presidium of the Supreme Soviet, A. F. Vatchenko.

Chairman of the Council of Ministers, A. P. Lyashko. This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces-Cherkassy, Chernigov. Chernovtsy, Crimea, Dnepropetrovsk, Donetsk, Ivano-Frankovsk, Kharkov, Kherson, Khmelnitsky, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Voroshilovgrad, Zaporozhye and Zhitomir.

Physical Features.-The larger part of the Ukraine forms $\quad$ plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the southwest) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.-The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1970, the Ukraine provided 40 per cent of the total Soviet steel, 40 per cent. of metal goods and 33 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in the U.S.S.R. founded in the 9 th century A.D., was the capital of the Russian State from 865 to 1240. Population (Jan. x, 1976), 2,013,000. Other towns with population over 500,000 are:-
Kharkov.................................... $\mathbf{x , 3 8 5 , 0 0 0}$
$\psi$ Odessa . ...................................1,023,000
Dnepropetrovsk (Yekaterinoslav) ......... 976,000
Donetsk (Stalino; Yuzovka, i.e. Hughesovka)
Zaporozhye (Aleksandrovskaya) .......... 760,000
Krivoy-Rog.............................. 634,000
Lvov (Lviv; Lwow; Lemberg) . . . . . . . . . . 629,000

## III.-BELORUSSIA <br> (White Russia)

First Secretary of the Party Central Committee, P. M. Masherov.
Chairman of the Presidium of the Supreme Sovitet, I. E. Polyakov.

Chairman of the Council of Ministers, T. Ya. Kiselev.
The Belorussian S.S.R., lying in the western part of the European area of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dieper, of the Niemen and of the Western Dvina.
CAPITAL, Minsk. Population $\mathrm{x}, \mathrm{x} 89,000$ (Jan. $\mathrm{I}_{\text {, }}$ 1976).

Beiorussians make up four-fifths of the population, with Russians and Poles coming next.

## IV.-UZBEKISTAN

First Secretary of the Party Central Committee, Sh. R. Rashidov.
Chairman of the Presidium of the Supreme Soviet, N. M. Matchanov.

Chaiman of the Council of Ministers, N. D. Khudayberdyev.
The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of $x$ I provinces (Andizhan, Bokhara, Dzhizak, Ferghana, Kashka-Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya, Syr-Darya and Tashikent). It lies between the high Tienshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include gold, natural gas, oil, copper, lead, zinc and coal.

The Uzbeks, a Turkic people, make up $65^{\circ} 5$ per cent. of the population, the Russians ( 12.5 per cent.), Tatars ( 5 per cent.) and Kazakhs ( 4 per cent.) come next.

There are major agricultural and textile machinery plants and several chemical combines. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the contruction of the Great Ferghana Canal ( 230 miles).

Capital, Tashkent. Population $1,643,000$ (Jan. $x_{\text {, }}$ 1976). Samarkand contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulugbek, Tamerlane's astronomer-grandson, and a I5th-century observatory. Heavy damage was done to Tashkent by the series of earthquakes in April and May, 1966.
V.-KAZ.AKHSTAN.

First Secretary of the Party Central Committee, D. A. Kunayev.

Chairman of the Presidium of Supreme Soviet, S. B. Niyazbekov.
Chairman of the Council of Ministers, B. A. Ashimov. The Kazakh S.S.R., the second-largest UnionRepublic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tienshan in the east , and bordering on China, was formed in $19 z 0$ as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted - Union Republic in 1936. It consists of the 29 Provinces: Aktyubinsk, Alma-Ata, Chimkent, Dzhambul, Dzhezkazgan, East-Kazakhstan, Guryev, Karaganda, Kok= chetav, Kustanay, Kzyl-Orda, Mangyshlak, Semipalatinsk, Taldy-Kurgan, Tselinograd, NorthKazakhstan, Pavlodar, Turgay and Uralsk.

Kazakhstan is a country of arid steppes and misedeserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altal and Tienshan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the III. Kazakhstan is very rich in minerals: copper in Kounrad and Dzhezkazgan, lead and zinc in the Altai and Karatau mountains, iron ore in Radryg and Lisakovsk, coal in Ekibastuz and Karaganda and oil and natural gas in the Maangyshlak peninsula. Major centres of metal industry exist now in the Altai Mountains, in

Chimkent, north of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and southwestern parts of the Republic. Grain is grown in the north and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin " lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 33 per cent. of its population, Russian settlers make up 42 per cent. and Ukrainians 7 per cent.

Caprtal, Alma-Ata (formerly Verny). Population, 85 1,000 (Jan. I, 1976). Karaganda, II major mining centre, has a population of 570,000 (Jan. x, 1976).

## VI.-GEORGIA

First Secretary of the Party Central Commiltee, E. A. Shevardnadze.
Chairman of the Presidium of the Supreme Soviet, P. G. Gilashvili.

Chairman of the Council of Ministers, Z. A. Pataridze. The Georgian S.S.R., occupying the northwestern part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921 ; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 3936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjaria) and the South-Osetian Autonomous Province. Georgia is 1 country of mountains, with the Greater Caucasus in the north and the Lesser Caucasus in the south. A relatively lowlying land between these two ridges is divided into two parts by the Surz Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with more continental and dry climate. The Black Sea shore and the Rioni lowlands are subtropical in their climatic character. The most important mineral deposits are manganese (Chiatura), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is a leading producer of manganese in the U.S.S.R. There are also many oil refineries. Viniculture, tea and tobacco-growing are the three main agricultural industries. The Black Sea harbours many famous holiday resorts. Georgians make up 67 per cent. of the population, the remainder largely being composed of Armenfans, Russians, Azerbaidjani and Osetians.

Capital, Tbilisi (Tifis), population $x, 030,000$ (Jan. 1, 1976).

## VII.-AZERBAIDJAN

First Secretary of the Party Central Committee, G. A. Aliyev.
Chairman of the Presidium of the Supreme Soviet, K. A. Khalilov.
Chairman of the Council of Ministers, A. I. Ibragimov.
The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shore of the Caspian Sea, and borders on Iran. It was formed in 1920. Between 1922 and 1936 it formed part of the Transcaucasian Federation. In 1936 it became - Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is depression irrigated by the Kura and by the lower reaches of its tributary Araks. Sheltered by the
mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. Industry is dominated by oil and natural gas extraction and related chemical and engineering industries centred on Baku and Sumgait. A large power station on the Araks was completed in 1969, In conjunction with Iran. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up three-quarters of the population of the Republic, Armemians, about - per cent., and Russians, xo per cent.

Capiral., $\Psi$ Baku. Population $\mathbf{x , 4 0 6 , 0 0 0 ~ ( J a n . ~} 1$, 1976).

## VIII.-LITHUANIA

First Secretary of the Party Central Committee, P. P. Grishkyavichus.
Chairman of the Presidium of the Supreme Soviet, A. S. Barkauskas.

Chairman of the Council of Ministers, I. A. Manyushis. Lithuania, formerly - Province of the Russian Empire, was declared independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 194x, until the autumn of 3944. The Republic forms i plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.
The Lithuanians make up four-fifths of the population, Russians and Poles, 8-9 per cent. each. Capital, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after the collapse and partition of Poland in I939, and recaptured by Soviet forces in 1944). Population 447,000 (Jan. I, 1976).

## IX.-MOLDAVIA

First Secretary of the Party Central Commiltee, I. I. Bodyul.
Chairman of the Presidium of the Supreme Soviet, K. F. Ilyashenko.

Chairman of the Council of Ministers, S. K. Grossu.
Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Rumania with the Pruth forming the frontier. In 1918, Rumania seized the Russian Province of Bessarabia. In 1924 . Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Rumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Rumanians from 194 I to 1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.
The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. Moldavians make up 64 per cent. of the population, with Ukranians, and Russians next.

CAPITAL, Kishinev (Chisinau). Population, 47x,000 (Jan. 1, 1976).
x.-LATVIA

First Secretary of the Party Central Committee, A. E. Voss.
Chairman of the Presidium of the Supreme Soviet, P. Ya. Strautmanis.

Chairman of the Council of Ministers, Yu. Ya. Ruben. The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August r940. Between 194I and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy per cent. of the total territory.

The Latvians make up 57 per cent. of the Republic's population, Russians 30 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940-4x and again after 1944.

CAPITAL, $\Psi$ Riga. Population, 806,000 (Jan. x, 1976).
XI.-KIRGHIZIA

First Secretary of the Party Central Committee, T. U. Usubaliyev.
Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, A. S. Suyumbayev.
The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936 a Union Republic. It contains three provinces, Issyk-Kul, Naryn and Osh. The Kirghiz Republic is I mountainous country, the major part being covered by the ridge of the Central Tienshan, while mountains of the PamirAltai system occupy its southern part. There are number of spacious mountain valleys, the Alai, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains-Chu, Talass, part of the Ferghana Valley where agriculture prospers. Crops include sugar beet and cotton, and sheep are important in the mountains. Industry is being developed and some mining is done. The Kirghiz constitute 44 per cent. of the population, the Russians 29 per cent. The Uzbeks (in Eastern Ferghana) amount to 1 I per cent.

Capital, Frunze (formerly Pishpek). Population, 498,000 (Jan. x. 1976).

> XII.-TADIIKSTAN

First Secretary of the Party Central Committce, D. Rasulov.
Chairman of the Presidium of the Supreme Soviet, M. Kholov.

Chairman of the Council of Ministers, R. N. Nabiev.
The Tadijik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in $\mathbf{2 9 2 9 .}$ It includes the Gorno-

Badakhshan Autonomous Province and the Kulyab and Leninabad Provinces.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., Pik Kommunizma ( 24,500 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the SyrDarya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fiftysix per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), ${ }_{23}$ per cent. Uzbeks, the rest Russians and others.

CAPITAL, Dushanbe (formerly Stalinabad; Dyushambe). Population, 448,000 (Jan. I, 1976).
XIII.-ARMENIA

First Secretary of the Party Central Committee, K. S. Demirchyan.
Chairman of the Presidium of the Supreme Soviet, B. E. Sarkisov.

Chairman of the Council of Ministers, F. T. Sarkisyan.
The Armenian S.S.R. occupies the southwestern part of Transcaucasia: it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is Mount Ararat ( $\mathbf{I 7}, \mathbf{x} 60 \mathrm{ft}$.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. $3^{00}$.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population, 928,000 (Jan. i, 1976).

## XIV.-TURKMENISTAN

First Secretary of the Party Committee, M. Gapurov. Chairman of the Presidium of the Supreme Soviet, A.-M. Klychev.

Chairman of the Council of Ministers, B. Yazkuliev.
Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the AmuDarya and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains five Provinces: Ashkhabad, Chardjou, Knasnovodsk, Mary and Tashauz. The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The cultivation of cotton, stock-raising and mineral extraction are the principal industries. The republic produces 16 per cent. of the Soviet Union's natural gas, as well astrakhan furs and carpets. Most of the land under plough is artificially irrigated. The oil and silk industries are of old standing. There are also some fisheries in the Caspian.

Turkmens, nomadic in the past, make up two-
thirds of the population, Russians 15 per cent., and Uzbeks eight per cent.

CapITAL, Ashkhabad (formerly Askhabad, Poltoratski). Population, 297,000 (Jan. 1, 1976).

> XV.-ESTONIA

First Secretary of the Party Central Commiltee, I. G. Kebin.
Chairman of the Presidium of the Supreme Soviet, A. P. Vader.

Chairman of the Council of Ministers, V. I. Klauson. Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1988. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941 and 1944, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and Ene the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, woodworking, etc.

The population consists of Estonians ( 68 per cent.) and Russians ( 25 per cent.).

Capital, $\Psi$ Tallinn (formerly Reval). Population, 408,000 (Jan. I, 1976).

## THE VATICAN CITY STATE <br> (Stato della Città del Vaticano)

Sovereign Pontiff, His Holiness Pope Paul VI (Giovanni Battista Montini), born at Concesio (Brescia), Sept. 26, 1897 , elected Pope (in succession to John XXIII), June 21, 1963.
Secretary of State, Cardinal Jean Marie Villot, appointed April 30, 1969.
The office of the ecclesiastical head of the Roman Catholic Church (Holy See) is vested in the Pope, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of $3,124,688$. During the reign of Pius IX ( $1846-1878$ ), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of unified Italy in $\mathbf{1 8 7 0}$. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and the Catholic Church in Italy and agreeing to pay $750,000,000$ lire in cash and the income at 5 per cent. on $1,000,000,000$ lire State bonds a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City in 2975 was $\mathrm{I}, 000$.

FlaG.-Square flag; equal vertical bands of yellow (next staff), and white; crossed keys and triple crown device white band.

## British Legation

(9I Via Condotti, Rome)
Envoy Extraordinary and Minister Plenipotentiary to the Holy See, His Excellency Dugald Malcolm, C.M.G., C.V.O., T.D. (1975).
yst Secretary, M. A. Cafferty.

## VENEZUELA

(La Republica de Venezuela)
President, Sr. Carlos Andrés Pérez, elected Dec. 9, 1973, assumed office March 12, 1974.

## Cabinet

Interior, Dr. Octavio Lepage Barreto.
Foreign Affairs, Dr. Simón Alberto Consalvi.
Finance, Sr. Luis José Silva Luongo.
Defence, Gen. Fernandes Paredes Bello.
Development, Dr. Luis Alvarez Dominguez.
Environment and Natural Resources, Sr. Arnaldo José Gabaldón.
Social Development, Sr. Roberto Padilla Fernández. Education, Dr. Carlos Rafael Silva.
Health and Social Security, Dr. Antonio Parra León. Agriculture and Livestock, Sr. Gustavo Pinto Cohen. Labout, Dr. José Monzo González.
Transport and Communications, Sr. Jesús Enrique Vivas Casanova.
Justice, Dr. Juan Martin Echeverria.
Mines and Energy, Sr. Valentín Hernández Acosta.
Information and Tourism, Dr. Diego Arria Salicelli. Youth, Dr. Pedro Paris Montesinos.
Science, Technology and Culure, Dr. José Luis Salcedo Bastardo.
Secretary to the Presidency, Dr. Carnelo Lauria Lesseur.
Minister of State for Planning, Dr. Lorenzo Azpurua Maturet.
Minister of State for International Economic Affairs, Dr. Manuel Pérez Guerrero.
President, Investment Fund, Dr. Héctor Hurtado Navarro.
Governor of Federal District, Dr. Manuel Mantilla.
Venezuelan Embassy in London
3 Hans Crescent, S.W. $x$
[or-584 4206$]$
Ambassador Extraordinary and Plenipotentiary, His Excellency Sr. Juan Manuel Sucre-Trias (1977).
Minister-Counsellor, Lic. José Miguel Quintana.
Minister-Counsellor, Dr. Luis Eloy Añez (Economic). ist Secretary, José Parada.
and Secretaries, Lic. Rafael Hernández-Sanchez; Hedy Hernández Ortega Lic.
Counsellor, Dr. Miriam Blanco-Fombona de Hood (Cultural).
Attaché, O. Senior (Education).
Consulate-General: 7IA Park Mansions, S.W.x. General Consul, Roberto Erwin Lascano.

There is also - Consulate-General at Liverpool.
Area and Population.- A South American Repub-
lic, situated approximately between $0^{\circ} 45^{\prime}$ S. lat. and $12^{\circ} 12^{\prime} \mathrm{N}$. lat. and $59^{\circ} 45^{\prime}-73^{\circ} 09^{\prime} \mathrm{W}$. long. It consists of one Federal District, 20 states and territories. Venezuela has a total area of 353.894 sq. miles and population (estimate, 1975 ) of Ir,992,700 increasing annually at ate of 3.4 per cent.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by Guyana, and south by Brazil. Included in the area of the Republic are 72 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which

is politically associated with Tortuga, Cubagua and Coche to form the State of Nueva Esparta. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of Patos ( 170 acres) about 3 miles from the mainland.

Physical Features.-The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Pico Bolivar ( $x 6,412$ feet) and Picacho de la Sierra ( 15,420 feet), the maritime ranges containing the Silla de Caracas ( 8,53 I feet). Near the Brazillan border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana ( 7,175 feet) and Duida (8,120 feet), and Pacaw raima contains Maraguaca ( 8,228 feet) and Roraima ( 9,000 feet), the latter being on the Venezuela-Guyana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the Orinoco, with innumerable affluents, the main river exceeding 1,600 miles in length from its rise in the southern highlands of the republic to its outfow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Maior Frank Risquez, claimed to have discovered the source of the Orinoco, on Nov. 27, I95I, at $63^{\circ}$ $15^{\prime} \mathrm{W}$. long., $2^{\circ} 18^{\prime}$ N. lat., and about $x, x 00$ metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 40 ft . draft, far as Puerto Ordaz (about 150 miles up-stream), which with the adjacent town of San Felix is now officially known as Ciudad Guayana. Among the many tributaries of the main stream are the Ventuari,

Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by $=$ natural river or canal, known - the Casiquiare. A British scientific expedition travelled in April-May, 1968, by Hovercraft from Manaos in Brazil vià the Rio Negro, Casiquiare canal and Orinoco River to Trinidad. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an area of 8,296 square miles, is the largest lake in South America. Other lakes are Zulia ( 290 square miles), south-west of Maracaibo, and Valencia ( 2 r 6 square miles) about $\mathrm{I}, 400 \mathrm{ft}$. above sea-level in the Maritime Andes. The llanos also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.
The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler season from November to March.
Government.-On January 23, 1958, the military dictatorship of Maj-Gen. Marcos Pérez Jiménez, which had lasted since 1953 and covered ■ period of remarkable economic expansion due to the Venezuelan oil boom, was overthrown by a popular and military uprising. Since 1958 Venezuela has had a freely-elected democratic government. In elections in December, 1958, Accion Democratica (A.D.) gained a clear majority and Sr. Rómulo Betancourt of A.D. was elected President. For most of his five-year term of office Sr. Betancourt governed in coalition with the Christian Socialist Party, Copei. Further national elections were held on December I, 1963, in which A.D. retained $=$ reduced majority. Dr. Raúl Leoni of A.D. was elected President. The inauguration of the new Government took place on March II, 1964. Formation of a broad-based coalition government composed of A.D., U.R.D. (Union Republicana Democratica) and F.N.D. (Frente Nacional Democratico) was announced on Nov. 5, r964. The F.N.D. left the Government in s965 and U.R.D. in April, 1968. A general election held in Dec., 1968, was narrowly won by Copei and Dr. Rafael Caldera assumed the Presidency in March, 1969. Copei, however did not have a majority in Congress, and to some extent governed with the consensus of A.D., who were returned to power with - Congressional majority in the General Election of Dec. 1973. President Carlos Andrés Pérez's term of office lasts until March 1979.
Language and Literature.-Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 44 daily newspapers in Venezuela, of which ten are published in Caracas, and about 60 to 70 weekly news magazines. There are also a large number of fortnightly, monthly and quarterly publications.
Education is free and primary education compulsory from the age of 7 years. There are ten universities in Venezuela, five in Caracas and the others in Maracaibo, Mérida, Valencia, Cumaná and Barquisimeto.
Production and Industry. - The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal and tobacco. There is an extensive beef and dairy
farming industry. The country does not produce all the grain it requires but is practically selfsufficient for its other food requirements.
The principal industry is that of Petroleum, which last year contributed 97 per cent. of Venezuela's foreign exchange income. Daily production of the oilfields was reduced by direct government policy in 1974, and this policy of reduction in offtake is to continue until 1976 as a conservation measure. Before the war of $1939-45$ over 80 per cent. of the crude oil was exported to Netherlands Antilles refineries. In 1942 small refineries were established in Venezuela, capable of handling about zoo,ooo barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Both companies have invested heavily in desulphurization plant to satisfy anti-pollution measures in Eastern U.S.A., whither most of their product goes in the form of fuel oil. Other refineries are being operated at Caripitó, San Lorenzo, Puerto La Cruz, Tucupeido, El Chaure and El Palito. New contracts have been signed for exploitation of petroleum resources in parts of the Maracaibo region. The Venezuelan Government has unified income tax on firms involved in mining and petroleum at 60 per cent., and reformed the basis on which tax is calculated.
Rich iron ore deposits in Eastern Venezuela have been developed and production was $\mathbf{7 7 , 0 0 0 , 0 0 0}$ metric tons in 1972. Secondary processes for pelletizing and briqueting ore for export have been installed. The government-owned steel mill at Matanzas in the Guayana uses local iron ore and obtains its electric power from hydro-electric installations on the Caroni River. It produces seamless steel tubes, billets, wire and profiles. The production of more steel products is planned over the next few years. A new mill at Ciudad Guayana for the production of centrifugally-cast iron pipe came into operation at the end of 1970 , with annual capacity of 30,000 tons. It is planned to increase steel production to $55,000,000$ tons $\begin{gathered}\text { year }\end{gathered}$ by 1985 .

Other industries include petrochemicals, gold, diamonds and asbestos; textiles and clothing; plastics; manufacture of paper, cement, glass and plate glass; beer and other alcoholic beverages; tyres, cigarettes, soap, animal feeding concentrates, nonalcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly; preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing, sanitary ware, electric home appliances, pumps, aluminium and aluminium products, toys, agricultural machinery, bicycles, electronic components, cosmetics and many others.

Communications.-There are about 39.563 km . of all-weather roads. The State has now acquired all but $\quad$ very few of the railway lines, whose total length is only some 372 kilometres. Road and river communications have made rallways of negligible importance in Venezuela except for carrying ironore in the south-east. However, the government now plans a new railway from Guayana to the industrial zones round Valencia for carrying steel. British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them stateowned) which between them have $\square$ comprehensive network of internal lines and also connect Caracas with the United States, Central America, South America, the Caribbean and Europe. In 1972 the Venezuelan state-owned merchaut fleet had 16 ships
with 1 total deadwelght tonnage of $\mathbf{~} \mathbf{2 5 , 9 5 0}$. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled, 96 commercial and one cultural, FM, broadcasting stations. There are three television stations in Venezuela, all in Caracas. One is government controlled.

> Finance

National income per head in Venezuela in 1973 was $\$ \mathrm{U} . S .8260$, the highest in Latin America.

Currency. -The unit of currency is the gold Bolivar of 100 centimos. The selling rate for foreign exchange for all purposes is Bs. $4 \cdot 30=$ U.S. \$I. The rates for other currencies fluctuate according to their quotations against the U.S. dollar. The Government still subsidises the imports of certain basic commodities.

The principal imports are machinery, foodstuffs, durable and non-durable consumer goods, iron, steel and chemicals. The principal exports are petroleum and petroleum products, iron ore, coffee and cocoa, and diamonds.

> Trade with U.K.

Imports from U.K..... $£ 50,3 \times \mathbb{} 1000$

Vietnam, with an area of 129,000 square miles, and an estimated population of $43,700,000$, is bordered on the north by China and the west by Laos and Cambodia.

Government.-Following the end of the war in Vietnam in 1975, and the establishment of a Provisional Revolutionary Government to administer South Vietnam, a National Assembly representing the whole of Vietnam was elected on April 25, 1976. The Assembly met in Hanoi on June 24, and on July $\mathbf{z}$ approved the reunification of North, and South Vietnam under the name of the Socialist Republic of Vietnam. The national flag, anthem and capital of North Vietnam were unanimously adopted for the Socialist Republic, and Saigon was renamed Ho Chi Minh City.

A committee was elected to draft a constitution, pending the introduction of which the 1959 Constitution of North Vietnam applied to the whole country.

The President of North Vietnam since $\mathbf{1 9 6 9}$, Ton Duc Thang, was elected President and Pham Van Dong was elected Prime Minister.

## YEMEN

(Yemen Arab Republic)
Chairman of Command Council, Lieutenant-Colonel Ibrahim Mohammed al Hamdi, assumed office, June 13, 1974.
Prime Minister, Abdul Aziz Abdul Ghani.

> Yemeni Embassy
> 4I South Street, W.I
> [ox-499 5246]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mohammed Abdullah al-Eryani (x974).
Minister-Plenipotentiary, Abdulwahab Mohammed Al-Shami.
Yemen, the Arabia Felix of the ancients, occupies the S. W. corner of Arabia between the kingdom of Saudi Arabia and the People's Democratic Republic of Yemen, with an estimated area of 75,000 square miles and population of abcut $6,500,000$ including about $1,250,000$ emigrant workers in the Arabian peninsula and elsewhere, including the U.K. The highlands and central plateau of Yemen, and the highest portions of the maritime range, form the most fertile part of Arabia, with an abundant but irregular rainfall.

Trade. -The nain exports are cotton, hides and skins, and cotton seeds. Imports from U.K. in 1975 were valued at $\mathcal{\ell} 9,000,000$.

The ruins of Marib, the ancient Sabxan capital and its dam are in the Yemen.

Government.-Following i bloodless military coup in Sana'a on June $\mathbf{2 3}, 1974$, a Military Command Council seized power. The Presidential Council resigned; the Constitution and the Consultative Council were suspended. On Oct. 23 , 1974 the Constitution was revived, but the Con-
suitative Assembly, whilst in theory reconvened, remained in suspense. The Command Council, no longer exclusively formed of military members, replaced the Republican Council as the supreme Constitutional body. In October 1975, by Constitutional Decree, the Chairman of the Command Council became Head of State and Commander in Chief.
CAPITAL, Sana'a (pop. 135,000). Other main cities are Taiz $(80,000)$ and Hodeida $(80,000)$.
Flag.-Horizontal bands of red, white and black, with 5 -point green star in centre of white band. (Adopted Dec., 1962).

## BRITISH EMBASSY

Sana'a
Ambassador Extraordinary and Plenipotentiary, His Excellency Benjamin Leckie Strachan (1976).

British Council Representative, C. K. Smith.

YEMEN
(People's Democratic Republic of Yemen)
presidential Council, Salim Rubi'a Ali (Chairman); Ali Nasser Muhammed; Abdul Fattah Isma'il.

Prime Minister and Minister of Defence and Education, Ali Nasser Muhammed.
Foreign Affairs, Mohammed Saleh Yafai Muti.
There are 13 other departmental Ministers.

## Embassy <br> 57 Cromwell Road, S.W. 7 <br> [OI-584 6607]

Ambassador Extraordinary and Plenipotentiary, His Excellency Muhammed Hadi Awad.
Cotursellor, Hussein Saeed Al-Elfee.
Area and Population.-The Democratic Republic of Yemen lies at the southern end of the Arabian peninsula, having $\quad$ frontier with the Yemen Arab Republic, and a coastline extending 700 miles from the Red Sea eastwards along the Gulf of Aden. The area is largely composed of mountains and desert. Rainfall is generally scarce and unpredictable. The population outside Aden is concentrated in the fertile districts. In the more extensive desert and near-desert areas nomadic communities depend on their livestock for livelihood.

Included in the State are the offshore islands of Perim (in the Bab al-Mandeb Straits) and Socotra, formerly part of the sultanate of Qishn and Socotra, now merged in the People's Republic. Sovereignty over the island of Kamaran (area 70 sq. miles) in the Red Sea is under dispute following its occupation by forces of the Yemen Arab Republic during border conflicts in October, 1972 . The area of the People's Democratic Republic is r80,000 sq. miles, with population of $x, 598,275$ (Census, May 1973). The population of Aden alone ( 75 sq . miles) is about 250,000 . The principal districts of Aden township are: Crater, Khormaksar, Tawahi, and Ma'alla. Neighbouring communities are at Sheikh Othman, Medinat al-Shaab, and Little Aden, which is linked to the main town by sandy strip of coastline, and is the site of British Petroleum oil refinery. The other major coastal town is Mukalla.

Government.-The People's Republic of South Yemen was set up on Nov. 30,1967 when the British government ceded power to the National Liberation front, thus bringing to an end $x 29$ years of British rule in Aden and some years of protectorate status in the hinterland. Its name was
changed to People's Democratic Republic of Yemen on Nov. 30, 3970. Territory of the Republic is that of the former Federation of South Arabia and the Aden Protectorates, consisting of the State of Aden and some 17 sultanates and emirates. It is now divided into six Governorates. Negotiations held between the British Government and representatives of the N.L.F. at Geneva from Nov. 21-29, 1967, ended in agreement on financial aid to South Yemen for civil and military purposes for a period of six months from the date of independence. Evacuation of British military forces which had begun in April, 1967, was completed on Nov. 29.
The Secretary-General of the National Liberation Front, Mr. Qahtan as-Shaabi, who had been appointed President from Nov. 30, 1967, held office until June 22, 1969, when he was deposed in a bloodless coup d'état and replaced by a Presidential Council led by Salim Rubi' a Ali. Under constitution promulgated on Nov. 30, 1970, Supreme People's Council of ioz members was appointed in May, r97r.
The Government receives substantial development and other aid from China, U.S.S.R. and other Socialist Bloc countries. Also Saudi Arabia, Kuwait and Abu Dhabi (Arab Development Funds).

Kuria Muria Islands.-The Kuria Muria Islands, which had been administered by Gt. Britain from Aden although 200 miles distant from Yemen territory, were retroceded to the Sultanate of Oman on Nov. 30, 1967.
Production.-Agriculture is the main occupation of the inhabitants of the 60,000 square miles of the Republic, outside Aden town. This is largely of a subsistence nature, sorghum, sesame and millets being the chief crops, with wheat and barley widely grown at the higher elevations. Of increasing importance, however, are the cash crops which have been developed since the Second World War, by far the most important of which is longstaple cotton, which is now a major export, and revenue from which averages about $£ x, 500,000$ annually.

Under the Five Year Development Plan 1974-79 much importance is attached to the development of agricultural and fisheries projects. It is expected, that together, there will be a production increase of 54 I per cent. by $\times 978-80$ over the base year $1972-73$. Light industries are being established which will replace imports and use locally produced raw materials.

\[

\]

Following the closure of the Suez Canal in 1967 the once prosperous trading economy of Aden fell into $n$ steady decline, which has not been reversed by the re-opening of the Canal. The British Petroleum refinery exports almost $2,500,000$ tons of petroleum products annually. In the main harbour, cargo handling for larger vessels is by lighter, but wharves at Maalla can accommodate alongside vessels up to 300 feet in length and 18 feet in draught.
Finance and Currency.-In the financial year $x 974$ 75 revenue was estimated at about $£ 18,000,000$ and expenditure $£ 38,000,000$. Currency is the South Yemen dinar (SYD), the total circulation of which is about $£ 48,000,000$.

Communications.-There are no railways in the Republic. Aden has 400 miles of good roads and construction of a further 300 miles will proceed under the Five Year Plan. A system of undeveloped but motorable roads links the towns and villages outside Aden. There is international airport at

Aden (Khormaksar) into which a limited number of international airlines operate.

Capital.-Aden (population, 250,000).
FLAG.-A tricolour, red, white and black horizontal bands, with triangle of light blue at the hoist pointing towards the fly and charged with $\begin{aligned} & \text { - }\end{aligned}$ five pointed red star.

National Days.-Independence Day, Nov. 30; . Revolution Day, Oct. 14.

British Embassy
Khormaksar, Aden.
Chargé d'Affaires, John Single Martyn Roberts. 1st Secretary, J. H. Greenfield (Consul). 3rd Secrelary. W. J. Allen(Vice Consul).

## YUGOSLAVIA

(Socijalistička Federativna Republika Jugoslavije)
President of the Republic, President of the Presidency, President of the League of Communists of Yugoslavia, Chairman of the National Defence Council and Supreme Commander of the Armed Forces, Josip Broz Tito, assumed office, Jan. 14, 1953, re-elected for 4 years, 1954, 1958, 1963, 1967 and July 29, 197x ( 5 yrs.). In May, 1974 he was elected President of the Federal Republic for an unlimited term.
Vice President of the Republic, Stevan Doroniski (elected May, 1977 for one year).
President of the SFRJ Assembly, Kiro Gligorov.
President of the Federal Executive Council, Veselin Djuranovic (Feb. 1977).

President of the Socialist Alliance of the Working People of Yugoslavia, Dussan Petrovic.
Vice-Presidents of the SFRJ Assembly, Marijan Cvetkovic; Peko Dapcević; Sinan Hasani; Branko Peśić; Rudi Kolak.
Vice-Presidents of the Federal Executive Council, Anton Vratusa; Dobrosav Culafić; Borislav Šefer; Miloš Minić.
Secretary-General, Ivica Cactic.

Asst. Deferce Attaché, Lt.-Col. Miroslav Ribner.
2nd Secretaries, Radoslav Maksimoviě (Press and Culture): Dragoljub Stevanovic (Consular); Mdme. Ana Marija Besker.
$3^{3+d}$ Secretary, Mlle. Sonja Biserko (Economic).
Consulate, 7 Lexham Gardens, W. 8 .
Area and Population.-Yugoslavia is a Federation comprising the Socialist Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia, Serbia includes the Socialist Autonomous Provinces of the Vojvodina and Kosovo. In Iuly, 1946, Pelagosa and adjacent islands with all territory east of the line known as the French Line in Istria including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 2945. The mer of Ygoslavia
is estimated at 255,804 square kilometres ( 98,725 square miles) and the population in June, 1975 , at $21,352,000$. As a result of the war there was a decrease of nearly $2,000,000$ in the population of Yugoslavia, and this loss has only recently been made up.

Government.-On Nov. 29, 1945, the Constituent Assembly of Yugoslavia at a joint session of the Skupšatina and the House of Nationalities, proclaimed Yugoslavia Republic. In January, 1953 , a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

On April 7, 1963, a new Constitution was proclaimed under which the official name of the country was changed to "The Socialist Federal Republic of Yugoslavia". The existing two Councils of the Federal Assembly were replaced by five Chambers of 120 members each (Federal Chamber, Economic Chamber, Educational-Cultural Chamber, Social Welfare and Health Chamber, and Organizational/ Political Chamber), plus a Chamber of Nationalities of 70 members. A Constitutional Court was created. Elections to the new Federal Assembly were held in 1963 and in April, 1967.

In 1969 the Federal Assembly was reconstructed by the abolition of the Federal and Organizational/ Political Chambers and the addition of one new chamber, the Social/Political. All Chambers continued to have $\mathbf{s} 20$ members each except the Chamber of Nationalities which doubled its size to 140 . Elections to this Assembyy were held in April, 1969. Several amendments to the Constitution were made in 1971. The most important formed a new ruling body called the Presidency. The intention is that its members will take it in turns to become President of the Republic for a period of 12 months each. President Tito will however have the title of Life President. A new Constitution was proclaimed in 1974 followed by the reconstitution of the Federal Assembly, after elections based on the ncw delegatory system, into two chambers consisting of the Federal Chamber ( 220 delegates) and the Republican Provincial Chamber ( 88 delegates). A new Federal Executive Council (i.e. government) was also formed.

Defence.-The Army, Navy and Air Force on peace footing consist of 222,000 officers and men. Religion and Education. -The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. The 1953 Census revealed that $2,127,875$ of the population were without religion, $6,984,686$ were Orthodox, $5,370,760$ Catholic, 157,702 Protestant, 61,274 other Christians, $2,090,380$ Moslem, 2,565 Jews, 495 other nonChristians, $\mathbf{x 0} 0096$ undecided and 130,740 unknown. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952 . Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1969-70 there were 14,043 elementary schools with 156,895 teachers and $2,854,579$ pupils and 2,974 secondary schools (including adult and special schools) with 33,702 teachers and 801,169 pupils. In addition, in the $1970-7 \mathrm{I}$ academic year there were 13 art academies with 483 teachers and 2,225 pupils, so high schools with 557 teachers and 7,456 pupils, and Ix9 higher schools with 3,986 teachers and 79,325 pupils. There are nine universities: Belgrade, Zagreb, Ljubljana, Sarajevo, Skopje, Novi Sad, Nis, Pristina and Titograd.

Language and Literature.-The languages of the country Serbo-Croat, Slovenian and Mace-
donian, all South-Slav tongues. Serbo-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Turkish, Rumanian, Albanian, Italian, Slovak and Ruthenian are also used in certain districts. The desire for the political union of the South Slavs led to cultural unity and I revival of Slav literature. There are

Serbian daily newspapers la Belgrade, - Slovene dailies in Ljubljana (Laibach), 2 Croat dailies in Zagreb, 2 dailies in Novi Sad, one in Hungarian, 3 dailies in Rijeka, one in Italian and daily papers at Skopje, Sarajevo, Pristina, Split, Maribor and Osijek.

Production and Indusiry.-About 47 per cent. of the population is engaged in agriculture, although in recent years industry has expanded rapidly and industrial production has grown sevenfold since 1939 . Recent emphasis has been on the integration of small industrial enterprises into more efficient complexes. In agriculture the main emphasis is on increased investment in mechanization and fertilizers in the large socially-owned agricultural combines but now the private sector is being encouraged to mechanize and become more efficient and small size tractors, farm machinery and implements are being supplied.

The main crops are wheat and maize, of which the yields in 1974 were $6,282,000$ and $7,989,000$ tons respectively. The forest areas produced $57,430.000$ cubic metres of cut timber in 1973. According to Yugoslav official estimates, the livestock population in 1974 was approximately follows: cattle, $5,68 \mathrm{r}, 000$; sheep, $7,852,000$; pigs 7,401,000; poultry, $54,685,000$. Minerals are an important source of wealth particularly in the central and south-eastern regions. Estimated production in 1974 included the following ('ooo tons): coal 33,583; coke 1,315; electrolytic copper $\times 50$; pig iron 2,126 ; steel (total) 2,833; aluminium 147; zinc 56; mercury 546 and crude petroleum 3,458 .

Communications.-In 1973 there were approximately $10,400 \mathrm{kms}$ of standard and narrow gauge railway and approximately $98,400 \mathrm{kms}$ of classified roads. The 476 km . Belgrade-Bar rallway was
opened in June 1976. In 1974 there were $\mathbf{1 , 1 4 3 , 0 0 0}$ telephones in use in the country. The principal $\Psi$ ports on the long Adriatic seaboard of Yugoslavia are Rijeka, Šibenik, Split, Zadar, Ploće, Dubrovnik, Bar, Kotor (Carraro) and Koper. A new port is still under construction at Bakar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

Finance

The rate of exchange is variable and in mid-1976 ww $32 / 33$ dinars= $=1$ (see also p. 84).

## Trade with U.K. 1975

rst Secretaries, A. M. Wood; G. D. G. Murrell (Information); R. J. Ross (Labour) (resident at Athens); D. J. Young (Admin. and Consular). and Secretary, P. L. Thomas.
$3^{\text {rd }}$ Secretaries, A. Marshall; N. A. S. Jones; Miss M. Birch.

Brttish Consular Offices
There are British Consular Offices Belgrade, Zagreb and Split.
British Council Representative, Dr. D. S. Coombs, Generala Ždanova 34, Belgrade. British Council Reading Room Knez Mihajlova 45, Belgrade. There also a centre and library at Zagieb.

## ZAIRE

(The Republic of Zaire)
President of the Republic and Minister of Defence, Gen. Mobutu Sésé Seko, born Oct. 30, 1930; assumed office November 25,1965 ; elected for 7 -year term, Nov. 5, 1970.

## Exbcutive Council

## (As at May 1977)

The President; Vice-President and president of the political, economic and financial Commission, Nguza Karl-I-Bond;
Vice-President and president of the administrative, social and cultural Commission, Engulu Baongampongo Bakokele Lokanga.
Ministers: Foreign Affairs and Intermational Cooperation, Nguza Kar1-I-Bond.
Land Affairs, Duga Kugbetolo.

Political Affairs and Party Coordination, Engulu Baongampongo Bakokele Lukanga.
Agriculture, Senzayi Ryamukuru.
Commerce, Mbala Mbabu.
Culture and Arts, Lobho Lewa Djugundjingu.
National Defence, Mobutu Sese Seko.
National Economy and Industry, Neyembo Shabani.
National Education, Mbulamoko Nzenge Movoambe.
Energy, Kaponda Mueme Ndambu.
Environment, Conservation of Nature and Tourism, Citoyenne Lessedjina Kiaba Lema.
Finance, Bofossa W'Amb'ea Nkoso.
Justice, Mampuya Kanvnk'a-Tshiaba.
Mines, Takizala Luynna Misimbingiri.
National Orientation, Mbunze Nsomi Lebwanabi.
State Porlfolio, Kiakwama Kia Kiziki.
Posts and Telecommunications, Col. Wabali Bakitambisa.
National Plan, Mobutu Sese Seko.
(Director-General), Mulumba Lokoji.
Public Healh, Nsita Makansi.
Sport, Elonga Mali Mazungu.
Transport and Communications, Muleada Shamwange Mutebi.
Labour and Social Security, Yoko Yakambe.
Public Works and Land Management, Mandungu Bula Nyati.

ZAIRE EMBASSY 26. Chesham Place, S.W.I. [0x-235 6r37]

Ambassador Extraordinary and Plenipotentiary, His Excellency Kaninda Mpumbua Tshingomba, G.C.V.O.

The State of the Congo, founded in 1885 , became - Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30,1960 , when it became the Democratic Republic of the Congo. In October r97x the name changed to the Republic of Zaire. Situated between long. $12^{\circ}-3 I^{\circ}$ E. and lat. $5^{\circ} \mathrm{N} .-13^{\circ} \mathrm{S}$., the Zairian Republic comprises an area of 905,582 sq. miles, with a population (Census, 1970) of $21,637,000$, including 932,000 foreigners. The State is divided into 8 provinces (see below).

Government.-On June 30,1960 , the Belgian Congo became independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the Loi Fondamentale, drawn up by the metropolitan Belgian Parliament. On July in, M. Moise Tshombe announced the independence of the State of Katanga although he failed to obtain international recognition. Katanga did not come under the Government at Leopoldville until January 14, 1963 .

The constitutional and political situation remained unsettled, the United Nations having mixed forces in the country until 1964. By the middle of 1965 , the Congolese Government formed by M. Tshombe in July, 1964, had succeeded in gaining control of all the towns from the rebels and depriving them of military aid from outside the Congo. At elections held in the spring of 1965 the Government party won an overall majority of 86 , but the elections in three provinces were annulled on the grounds that they had been irregularly conducted. Following fresh elections held in these provinces in August, rg65. M. Tshombe's Government was dismissed by the President. A new Cabinet was formed by M. Evariste Kimba on October 19 and held office until the deposition on Nov. 25 of the President.

General Joseph-Desiré Mobutu, Commander-inChief of the Congolese National Army, announced on November 25, 9965 , that he had assumed the Presidency. After re-organizations in Dec. r966; and Oct. 5,1967 , new Cabinet, with the President

again as Prime Minister, took office on Mar. 5, 1969.
The office of Prime Minister was later dropped and $\quad$ Presidential régime instituted. The Mouvement Populaire de la Révolution, formed in 1967 , Was made the sole political party. With its deliberative assembly, the Party Congress, it is the supreme political institution of the country. Its executive body, the $15-\mathrm{man}$ Political Bureau, is headed by the President and takes precedence over the single-chamber 420 -person National Assembly as well as over the Government. The President changed his name to Mobutu Sésé Séko Kuku Ngbendu Wa Zabanga in r97a, but is usually known by the first three of these names only.

In March 1977 the so-called "Eighty Day War" occurred in the mineral rich Shaba region, when small forces of allegedly former Katangese gendarmerie crossed the border from Angola. The main incursion reached Kolwezi, an important mining centre, before being repulsed by join ZairianMoroccan force supported by an airlift organised by the French Air Force.

Climate.-Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about $80^{\circ} \mathrm{F}$., but in the South the winter temperature can fall nearly to freezing point. There has been some increase in sleeping-sickness since independence. Malaria, formerly under control in Leopoldville (now Kinshasa) and Matadi, has also begun to increase.

Extensive forest covers the central districts.
Provinces.-On December 24, 1966, the number of provinces was reduced from in to 8 , each under Governor and provincial administration. They have recently been redesignated as "regions" and are now as follows with names of capitals in brackets: Bas-Zaire (Matadi); Bandundu (Bandundu); Equateur (Mbandaka); Haut-Zaire (Kisangani); Kivis (Bukaru); Shaba, formerly Katanga (Lubumbashi); East Kasai (Mbuji-Mayi); West Kasai (Kananga).

Production. - The cultivation of oil palms is wide spread, palm oil being the most important agricultural cash product. Rubber, coffee, cocoa and timber are the next most important agricultural exports. The production of cotton, pyrethrum and copal fell sharply on independence but is now increasing. The country is rich in minerals, particularly Shaba (ex-Katanga) province. Copper is widely exploited and is the country's major source of foreign exchange carnings. Extensive radium
deposits exist near Lubumbashi and reef-gold exists in the north-east of the country.

There is a wide variety of small but flourishing secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint, sugar, furniture, metal goods and tyres, and local assembly of motor vehicles is now beginning. There are very large reserves of hydro-electric power and the huge Inga dam on the river Zaire is now supplying electricity to Matadi and Kinshasa.

The chief exports are copper, palm oil and palmkernels, coffee, diamonds, rubber, cobalt, cassiterite, zinc and other metals.

Currency- - The present unit of currency, the Zaire, was introduced in 1967, replacing 3,000 Old Congolese francs. In March 1976 it was divorced from the U.S. dollar and devalued to $m$ parity of I Zaire =1 S.D.R. Rate against Sterling, $\mathcal{E} I=$ 1.48 Zaire.

Language, Religion and Education. -The people mainly of Bantu-Negro stock, divided into semiautonomous tribes, each speaking a Bantu tongue. Swahili, Eantu dialect with madmixture of Arabic, is the nearest approach to $\quad$ "ाIIT
language in the East and South, while Lingala is the language of Kinshasa, and of large area along the river and in the north. It is estimated there are $5,000,000$ African Christians in the Republic (Roman Catholic 4,200,000, Protestant 800,000). The local Kimbanguist religion has over million adherents. The National University of Zaire has campuses in Kinshasa, Kisangani and Lubumbashi, with approximately 12,000 students.

CAPITAL, Kinshasa (formerly Leopoldville), population (estimated, 1975) $x, 300,000$. Principal towns, Lubumbashi (formerly Elisabethville) ( $\mathbf{I 8 2 , 6 3 8 ) \text { ; }}$ Kisangani (formerly Stanleyville) ( 79,941 ); Likasi ( 74,478 ); Kananga ( 59,935 ); $\psi$ Matadi ( 59,184 ); Kolwezi ( $47,7 \mathrm{zz}$ ) ; Mbandaka ( 37,587 ); and $\Psi$ Boma ( 31,598 ).

FLAG.-Dark brown hand and torch with red flame in yellow roundel on green background. Nattonal Day.-June zo.

## Brtish Embassy

Kinshasa.
Ambassador Extraordinary and Plenipotentiary, His Excellency Richard James Stratton, C.M.G. (x974).
Counsellor, D. G. Reid (Consul General).
Defence, Naval, Military and Air Attaché, Col. D. Kane.
${ }_{\text {rst }}$ Secretaries, J. D. Massingham (Head of Chancery) ; W. B. J. Dobbs (Commercial); A. V. Waters (Vice Consul).

## EUROPEAN FREE TRADE ASSOCIATION (EFTA)

Member States: Austria, Iceland, Norway, Portugal, Sweden, Switzerland. Associate Member: Finland.

Following the unsuccessful attempt to create a European Free Trade Area linking the E.E.C. with other members of the O.E.E.C., seven European States above came together in 1959 to form the European Free Trade Association. The seven were Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom. The EFTA Convention became effective on May 3, 1960, and just over a year later, on June 26, 1961, Finland became an associate member. Iceland applied for full membership in November, 1968, and acceded to the Association and to the FinlandEFTA Agreement on March x, 1970.

In 1973 all the EFTA Member States entered into a new relationship with the EEC. Two-Denmark and the United Kingdom-withdrew from EFTA at the end of December 1972 to become members of the EEC on January I, 1973. Agreements establishing industrial free trade between five of the other EFTA Member States (Austria, Iceland, Portugal, Sweden and Switzerland) and the EEC came into force on that same date. Similar agreements with Norway and Finland came into force on July 1, 1973, and January x, 1974, respectively.

The Convention defines the objects of the Association ( I ) to promote economic expansion in the area of the Association and in each member state; (2) to ensure that trade between miember states takes place in conditions of fair competition; (3) to avoid significant disparity between member states in the condition of supply of nW materials produced within the area; and (4) to contribute to
the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Members agreed to reduce progressively their tariffs on imports of industrial goods originating in the Area with a view to their complete elimination by January x , 1970 . They also undertook to abolish quantitative restrictions imports of goods from the free trade area. Provision m . made for alterations in these timetables and in May, 1963 , when tariffs had been reduced to 50 per cent. of the original rates, members agreed to bring forward the date when tariffs and quotas would be finally eliminated to December 31, 1966. Since that date therefore the member countries of the Association have constituted a virtually complete industrial free trade area. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. The Convention includes rules governing the origin of goods manufactured in the area. It also contains provislons relating to the "rules of competition ${ }^{\text {" }}$-government subsidies, restrictive business practices, etc. There are special provisions relating to trade in agricultural and fish products.
The Council of EFTA consists of one ministerial or official representative from each member country. Each state has a single vote and recommendations must normally be unanimous. Decislons of the Council are binding mimember countries.
Secretary-General, Charles Müller, g-II rue de
Varembé, x21I Geneva 20.

## EUROPEAN COMMUNITY

The nine member states: Belgium, Denmark, France, Germany, Ireland, Italy, Luxemburg, The Netherlands, the United Kingdom.

The beginnings of the European Community date from May 9, s950, when Robert Schuman, France's Foreign Minister, proposed that France and Germany should pool their coal and steel in-
dustries under in independent ("supranational ") High Authority, in a Community open to the membership of any other European country wishing to joln. Not only Germany, but also Italy,

Belgium, the Netherlands, and Luxemburg accepted invitation.

The Coal and Steel Community (ECSC), Commoo Market and Euratom share a single institutional framework: In Commission, Council of Ministers, Parliament and Court of Justice. The core of the Community policymaking process is the "dialogue" between the Commission, which initiates and implements policy, and the Council of Ministers, which takes major policy decisions. The beginnings of democratic control are exercised by the European Parliament, while the Court of Justice ensures the rule of law and is the final arbiter nall matters arising from the Community Treaties.

Since the start of the Common Market and Euratom in 1958, the Parliament and Court of Justice have been common to all three Communities. Up to July, 1967, each Community had its EWI executive body (the EEC and Euratom Commissions, and the ECSC High Authority) and its own Council of Ministers.

In April, 1965, the Six signed a treaty providing for the merger of the three executive bodies in a single Commission and the three Councils in a single Council, with a view to the eventual merger of the three Communities themselves. The merger treaty came into force on July $x, 1967$; the single Commission and single Council then took office. They enjoy the meme powers under the three Community Treaties as did their predecessors.

On December I and 2 , 1969 , the Heads of State or Government of the Six met at the Hague and decided on the completion, strengthening, and, provided that other European countries wished to accept the Treaties of Rome, enlargement of the Community. They instructed the Commission to draw wa plan for economic and monetary union, and the Foreign Ministers to report by the end of July on possible moves towards political unification. They also resolved to intensify the co-ordination of research and development programmes.

II accordance with the Hague decisions the Council of Ministers agreed in April, 1970, that as from 1975 the Community would have its own revenue, independent of national contributions. The Foreign Ministers agreed (May, 1970) to hold formal political consultations twice $\|$ year.

In June, 1970, the Six invited Britain, the Irish Republic, Denmark and Norway to open negotiations on June 30 at Luxemburg on their applications i6 join the Community. Negotiations continued in 1975 and were concluded with the United Kingdom Government for all major questions by the end of June; on July 8, H.M. Government issued = White Paper on the results. On Jan. 22, 1972, the four applicant countries signed the Treaty of Accession in Brussels. Norway conducted a referendum on Common Market entry and as result withdrew its application. The enlarged Community of the Nine came into existence on Jan. I, r973-

With the advent of a Labour Government in the U.K. in 1974, there followed a period of renegotiation of the terms of Britain's entry into the Community, culminating in a referendum co June 5 , r975, as to whether or not the country should remain a member of the E.E.C. The result of the referendum showed two to one in favour of staying in. British Labour Party representatives who had hitherto boycotted the European Parliament now took up their 18 allotted seats.

In January 1976 the European Parliament approved a Report urging direct elections to the Parliament in $197^{8 .}$ On July $12-\mathrm{x} 3,1976$, the Heads of Government or State, meeting in European Council, decided to approve 140 member Parliament with Britain, France, West Germany and Italy allocated

81 seats each; the Netherlands 25, Belgium 24, Denmark 16 , Ireland 15 and Luxemburg 6. Mr. Roy Jenkins was appointed President of the European Commission in 1977.

The "European Council", an addition to the institutionalized meetings provided, under the Treaties, evolved from the "summit" conference of December 1974, when the Heads of Government decided to meet at least three times a year in order to deal with Community problems and with matters requiring political co-operation.

At the end of 1975 Mr. Leo Tindemans, the Belgian Prime Minister, who had been invited to prepare a report on European Union submitted his conclusions. The Report was discussed by the European Council during 1976, but no immediate action was taken on it.

Office of the United Kingdom Permanent
Rrpresentative to the European Communities
Rond-point Robert Schuman 6, 1040 Brussels Ambassador and U.K. Permanent Representative, Sir

Donald Maitland, G.C.M.G., O.B.E. (1975).

## The Commission

On July x, 1970, the Commission was reduced from 14 members to nine, two each from Germany, France, and Italy, and one each from Belgium, the Netherlands and Luxemburg. After the three new countries joined, the number rose to $x_{3}$, with two seats each from Britain, France, Germany, and Italy and one each for the other members.

The members of the Commission are appointed by agreement among the nine member governments for in four-year renewable term; the president and vice-presidents are appointed from among the members for $n$ two-year term, also renewable.

The members of the Commission are pledged to independence of the governments and of national or other particular interests. They accept joint responsibility for their decisions, which are taken by majority vote.

In addition to being the initiator of Community action and having specific powers, the Commission acts as a mediator between the member governments in Community affairs and is the guardian of the Community Treaties.

## Commission of the European Communities Rue de la Loi, Brussels 1049 <br> President, Roy Jenkins (British).

Vice-Presidents, Wilhelm Haferkamp (German); Lorenzo Natali (Italian); François-Xavier Ortoli (French); Finn Olav Gundelach (Danish).
The Commission maintains information offices in London ( 20 Kensington Palace, Gardens, W.8), Washington (Suite 707, 2100 M Street, N.W., Washington, D.C. 20037), New York ( I Dag Hammarskjöld Plaza, 245 East 47th Street, New York, N.Y. 10017) and other cities.

The new r3-member Commission was appointed by the Governments of the Nine and was sworn in on Jan. 6, 1977.

## The Council of Ministers <br> 170 Rue de la Loí, 1040 Brussels

This consists of ministers from each member government, the ministers concerned depending on the subject under discussion. Is is Community's main decision-taking body but its authority is not as great in ECSC matters as in those relating to the European Economic Community and Euratom. The powers of the Commission are proportionately greater under the ECSC Treaty. For coal and steel, decisions are usually by majority vote; on E.E.C. and Euratom matters decisions usually had to be unanimous in the early stages but many decisions can now be taken by a qualified majority vote. For certain important questions,
however, unanimity is still required. (Admission of new members is not decided by the Council, but by unanimous decision of the member governments.) Although the Council is the Community's ultimate decision-taking body, in almost all cases it can act only on the basis of proposals submitted by the Commission. The Council acts by issuing (a) "regulations" which are generally and directly binding throughout the Community; $(b)$ "directives" which set out the aims of policy but leave national governments to implement; (c) "decisions" which bind only those addressed (normally member states); (d) "recommendations" and (e) "opinions", which have no binding force. The meetings of the Council are prepared by $\quad$ Committee of Permanent Representatives of the member states.

The Presidency of the Council is held in rotation for periods of six months.

## European Parliament

Secretariat: Centre Européen, Kirchberg, Luxemburg.
The first direct elections to the European Parliament are due to be held in mid-1978. Of 410 seats, the United Kingdom, France, Germany and Italy will have 81 each, the Netherlands 25 , Belgium 24, Denmark 16 , Ireland 15 and Luxemburg 6. At present the Parliament which meets in Luxemburg and Strasbourg has 198 members nominated by the national parliaments of the nine European Community member countries-the United Kingdom, France, Germany and Italy have 36 each, Belgium and the Netherlands 14 each, Denmark and Ireland ro each and Luxemburg 6 . Set up under the European Coal and Steel Community Treaty of 195z, the Parliament's authority was extended by the r952 Treaty of Rome to cover the European Economic Community and Euratom. It must be consulted on all major issues and has the right to dismiss the Commission by a vote of censure. Apart from general powers of supervision and consultation, it questions the Commission and the Council of Ministers and has measure of control over the Community"s annual budget including its final adoption. It can reject the budget as a whole and can amend items of nonobligatory expenditure (i.e. expenditure not specified in the original treaties-amounting to some 20 per cent. of the total budget). The Members of the Parliament serve on dozen specialised committees and currently sit in six political groupsSocialists, Christian Democrats, Liberals, European Conservatives, European Progressive Democrats and Communists. There are also six independents. President, Emilio Colombo (Christian Democrat, Italy).

## European Court of Justice

Boite postale $\mathbf{1 4 0 6}$, Luxemburg
The European Court superseded the Court of Justice of ECSC and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide a the legality of decislons of the Council of Ministers or the Commission and to determine violations of the Treaties. Cases
may be brought to it by the mest Community int to it by the member States, the Community institutions, firms or individuals. Its
decisions are directly binding in the countries. The nine judges of the court are member ted, for six years by the member Governments in concert and are partially replaced every three years being elegible for re-appointment.
Judges, H. Kutscher (President); G. Bosco; A.
O'Keefe; A. M. Donner; J. Mertens de Wilmars;
P. Pescatore; M. Sørensen; Lord Mackenzie Stuart; A. Touffait. Advocates- General, H. Mayras; M. Capotorti; J.-P. Warner: G. Reischl. Registrar, A. Van Houtte.

## The European Investment Bank <br> 2 Place de Metz, Luxemburg

The European Investment Bank (EIB) was set up in 1958 under the terms of the Treaty of Rome with the essential function that of contributing to the balanced development of the Common Market.

It grants long-term loans to enterprises, public authorities and financial institutions to finance projects which assist the development of less advanced regions and areas where the conversion or modernisation of older, exhausted industries is required. Another important role of the EIB is that of helping to finance projects which serve the interests of the Community as a whole or more than one member country such - intra-Community communications and development and diversification of the EEC's energy sources.

Under the terms of different association or cooperation agreements with the Community involving the provision of development-finance, E.I.B. activities have been gradually extended to more than 60 other countries.

The Bank's total financing operations in 1976 amounted to $1,273^{\prime} 3$ million units of account ${ }^{\star}$, of which $\mathbf{x}, 086$ million were for investments in the E.E.C. and 187.3 million for outside the Community.

The members of the European Investment Bank are the nine member countries of the Community, who have all subscribed to the Bank's capital, which currently stands at $3543^{\prime} 75$ million units of account. The funds required to carry out its tasks are borrowed on the capital markets of the Community and non-member countries, and on the international markets.

As it operates on a non-profit-making basis, the interest rates charged by the E.I.B. are therefore close to the average rates charged on the markets where it obtains its funds.

The Board of Governors of the European Investment Bank consists of Ministers nominated by the member countries, usually the Finance Minister, who lay down general directives on the policy of the Bank and appoint members to the Board of Directors, which takes decisions on the granting and raising of loans and the fixing of interest rates.

A Management Committee, also appointed by the Board of Governors, is responsible for the day-to-day operations of the Bauk.
President, Yves Le Portz.
Vice-Presidents, Maurits Esselens; Horst-Otto Steffe; Sir Raymond Bell; Giorgio Bombassei Fraseani de Vettor.
(The President and Vice-Presidents also sit as Chairman and Vice-Chairmen at meetings of the Board of Directors.)

## Secretary General, Henri Lenaert.

* The financial statements of the European Investment Bank are drawn up in terms of the European Unit of Account which in June 1977 was equivalent to $\mathcal{L}$. 65 .

## EUROPEAN COAL AND STEEL COMMUNTTY

This, the first of the European Communities, was established in 1952. Since then, for coal, iron ore and scrap, it has abolished customs duties, quantitative restrictions, the dual pricing system whereby prices charged on exported coal or steel differed from those charged to home consumers, currency
restrictions and discrimination in transport rates based on the nationality of customers and the special frontier charges which made international transport of these goods within the Community dearer than transport within national frontiers. It has applied rules for fair competition and a harmonized external tariff for the whole Community.

In the period 1952 to 1968 Community steel production rose rapidly from 4 '9 to 99 million tons. The coal industry, however, after expanding initially in conditions of acute energy shortage, found that growing share of the energy market was being won by oil. The task of the ECSC thus came to be to ensure the orderly retreat of coal at a price which would avoid social or economic dislocation. So far, since the start of the crisis, in 1957, the Community's coal industry has lost third of its labour force. The ECSC has been especially active in meeting the social problems raised by such changes.

Between 1954 and 1973 joint expenditure in retraining and resettling or assisting the retirement of workers came to over $£ 228$ millions. ECSC loans in the same period helped to provide over s20,000 new jobs. New priorities, for avoiding further rundown in the coal industry and enhancing its status, have been put forward since 1973. The ECSC also conducts its own housing programme for coal and steel workers.

Decisions of the European Commission in ECSC matters are directly binding on the industries concerned. The Commission now supervises the smooth working of the common market in ECSC products, ensures that the Treaty rules of fair competition are observed, stimulates investment and research, and aids workers threatened with unemployment. The Paris Summit of 1972 recognized the need for the EEC to prepare an energy policy covering all sources. Attempts to formulate such 1 policy have become a dominant issue in EEC affairs since the energy crisis. Of the various forms of energy, coal falls within the competence of the ECSC, nuclear energy within that of Euratom and all others within the EEC.

The United Kingdom, Ireland and Denmark joined the ECSC on Jan. I, I973.

## EUROPEAN ECONOMIC COMMUNITY <br> (THE COMMON MARKET)

Discussions were held at Messina, Sicily, in 1955 between the foreign ministers of the six member states of ECSC (Belgium, France, Germany, Italy, Luxemburg and The Netherlands) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of 1 III enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. The Common Market was established during itransition period of twelve years which ended on Dec. 31, 1969. The Treaty provides for the elimination of customs duties and quotas in trade between member states; the establishment of common customs tariff and a common trade policy towards third countries; the abolition of the obstacles to free movement of persons, services and capital between member states; the inauguration of common policies for agriculture and transport; the establishment of asystem ensuring that competition shall not be distorted in the Common Market; the co-ordination of economic policies; the harmonization of social and economic legislation to the extent necessary in order to enable the Common Market to work; the creation of a

European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living; the establishment of Economic and Social Committee which must be consulted on major proposals, consisting of representatives of employers, workers, consumers and other groups; the establishment of a European Investment Bank intended to aid investment in underdeveloped areas and help to finance modernization; and the association of overseas countries and territories with the Community with a view to increasing trade and to pursuing jointly their effort towards economic and social development.

To date, this programme has been put into effect follows:

Reduction of trade barriers. - A first ro per cent. reduction in customs duties between member countries took place on January $\mathbf{x}$, 1959. Decisions taken by the Council of Ministers in May, 1960, and July, 1963 , resulted in a speeding up of the rate of tariff cutting. On May II, 1966, the Council of Ministers agreed that the abolition of internal duties should be completed on July $x, ~ 1968$, and this advanced target date was met. Quota restrictions on trade within the Common Market were completely removed on January 1 , $196 z$. Customs tariffs between the three new member states and the original Six were phased out by three stages ending on July $x$, 1977. A determined effort is being made to speed up the removal of non-tariff barriers to trade, e.g. different safety regulations and technical specifications.

Common extemal tariff.-The Common Market has a common external tariff (CET) which came into effect in July 1968 along with the abolition of customs duties among the Six, thus forming a customs union. The CET is based on the arithmetical average of those national tariffs it replaced, and after two international tariff-cutting rounds now stands at an average of 6 per cent. The three new members have gradually aligned their industrial tariffs up or down towards the CET and joined in the full customs union on July $1,1977$.

In international tariff and trade negotiations in the GATT framework, the Community is represented by the Commission, which negotiates under a mandate from the Council of Ministers.

Trade between the six member countries of the E.E.C. increased from 6,864 million u.a. equivalent (unit of account $=$ pre-1971 U.S. \&) to 112,251 million u.a. in r97z. Community exports to the rest of the world increased from 55,9 II u.a. equivalent in $195^{8}$ to 56,68 m million $u . a$. in 1972 ; imports rose to 52,526 million u.a. in 1972.

Although the Community was enlarged in 1973 , the oil crisis of that year affected the trading pattern with the onset of economic recession in some of the member States. Levelling off of demand during I975 reduced overall imports by 3 per cent., while exports rose by only $\quad$ per cent. over 1974 to 225 bn. u.a. The Community's trade with the rest of the world, however, was marked by a 6 per cent. decline in imports (mainly oil) to $1 \times 7.8$ bn. u.a., while exports rose by 5 per cent. to $113 \cdot 98 \mathrm{bn}$. u.a.

The deficit in the overall trade balance of the Community contracted to about 2.89 bn . $\mathrm{u} . \mathrm{a}$. in 1975 from 14.5 bn. u.a. in 1974. Excluding internal E.E.C. trade, the Community's 1975 external trade deficit shrank to 3.82 bn . u.a. from 15.8 bn . u.a. in 1974 .

Free movement of labour.-Freedom of movement for workers was achieved within the Common Market in July 1968 , and those who work in member countries other than their own are ensured of rights equal to those of local workers, and of full
transferability of social security benefits. They enjoy equal treatment in applying for jobs and receive priority over workers from non-member countries.

Services. - The right of Community firms to establish business in member countries other than their own is being progressively freed, $\quad$ is the right of Community citizens to engage in professional activities in member countries other than their own. In parallel with this programme, the mutual recognition of professional qualifications is being achieved. Freedom of establishment for $\quad$ number of liberal professions was delayed for years, but with provision by the end of 1976 for dactors to practise throughout the Community, progress elsewhere may improve.

Cayital.-So far unconditional and complete freedom of movement has been achieved for direct investments, transfers of personal funds and emigrants' remittances, short and medium term commercial loans and the buying and selling of stocks and shares. For other transactions, such as capital issues, there is conditional liberalization. Progress is being made towards equalizing access to domestic capital markets within the Nine.

Rules for Fair Competition.- The Common Market Treaty bans agreements which prevent, restrain or distort competition and, in particular, price-fixing, market-sharing, restriction of production or of technical development and discriminatory supply conditions if they are likely to affect trade between member states. The abuse of dominant position in the market by firm or firms is also banned. Implementing regulations adopted by the Council have caused some 36,000 restrictive agreements to be registered with the Commission. Decisions banning or authorizing particular agreements have begun to be taken, and a body of case-law is being established.

Agriculture.-The basic machinery for ${ }^{\text {a }}$ common organization of agricultural markets throughout the Community was established by decision of the Council of Ministers in January 1962 . It involved the setting of target prices, support buying, levies on imports, and export rebates. Community funds riII be allotted for the modernization of farming and the improvement of agricultural productivity in the Community.

Under a decision reached in December, 1964, common price levels throughout the Community came into effect in July, 1967 , for grains, pigmeat, and eggs and poultry. Further decisions taken on July 24, I966, established common marketing regulations and common price levels for fruit and vegetables, sugar, dairy produce and fats and oils; to come into force between July 1,1967 , and July $x$, 1968. On July 24, also, common price levels were fixed for beef and veal, milk and other dairy produce.

On July 1,1967 , grains, pigmeat, eggs and poultry reached the full single-market stage, thus bringing half the Community's farm production under the common agricultural policy's marketing and financial provisions. On May 29, 1968, the Six agreed on the pricing system for dairy produce and beef and veal in the single-market stage from July x , 1968 , having failed to agree by the original planned date of May 1 . The policy has developed and changed along the lines of the 1975 "stocktaking " of the common agricultural policy, which aimed to reduce the cost of the policy and tailor it to changing priorities.

Firm proposals accepted in principle in March, 2971 and formally adopted in March, 1972 provided for Community part-financing of pensions for farmers retiring between the ages of 55 and 65 and
other measures to reduce the number of small scattered farms and to improve agricultural efiiciency by offering modernization aid. The Community has now adopted a hill farming policy which applies to difficult farming areas throughout the Nine.

Economic Policy.-Member States are required by the Treaty to consider their economic policies matter of common concern and to consult their partners and the Commission in the concertation of these policies. From 1959 regular discussions took place in the Monetary Committee (senior officials from the national treasuries and Central Banks), the Central Bank Committee and others devoted to economic policy (later, in 1974 , replaced by a single committee, the Economic Policy Committee). Regular finance ministers' meetings were held.

Following the currency crisis of 1969 and the Hague Summit, ishort-term reserve fund of $\$ 2,000$ millions was set up. Then, in 197 r , the Six embarked on the first steps towards Economic and Monetary Union. The Werner Plan (named after the Luxemburg Prime Minister who chaired the Committee) laid down the path to be followed in the first phase up to 1973 ; establishment of a $\$ 2,000$ million medium-term reserve pool; intensification of short-term monetary policy co-ordination; concertation in international affairs; the progressive harmonisation of taxes and budgetary affairs; and the centrepiece, the narrowing of the permitted margin of fluctuation of members' currencies from the central rate from 4.5 per cent. (world margin) to 2.25 per cent.

The goal of economic and monetary union was affirmed by the 1972 Summit of the Nine, and the target date of $\mathbf{y} 80$ affixed. But by this time (long before the Nine were due to move towards the second phase in December 1973) the international monetary crisis, devaluation of the dollar and floating of the EEC currencies in 197 I had curtailed further progress towards EMU. The floating, first of the Pound Sterling and then of the Lira in 1972, outside the joint float of EEC currencies, left only six countries effectively coordinating their monetary policies. Between January 1974 when France allowed the franc to float separately and July when the franc rejoined the "snake" or fluctuation margin, there were only five.

During 1973 the Nine set up the embryonic Monetary Cooperation Fund but at the end of the year failed to consolidate this action by a significant pooling of reserves. By this time they were faced with the impact of quadrupling oil prices on their economies and prospects of world-wide recession. During 1974 and 1975 inflation, balance of payments deficits and their financing through "recycling ", the coordination of policies internationally and structural economic problems occupied the centre of discussions. On October 21, 2974, the Finance Ministers agreed to launch an initial $\$ 3,000$ million EEC loan to assist member states in balance of payments difficulties and help recycle "petrodollars " accumulating to the oil-exporting countries. The Nine heads of Government reaffirmed the goal of Economic and Monetary Union at the September 1974 Summit, but the weakness of sterling and the Lira and consequent wide fluctuations in the value of Community currencies hindered any practical move in that direction.
Industrial Policy.-The Council of Ministers has adopted a number of directives aimed at removing technical barriers to trade in foodstuffs and industrial products.

The Commission has put forward proposals for
harmonizing company law and taxation and the creation of $=$ European Company Statute, as well - proposals for the improvement, greater independence and cohesion of the Community aircraft, shipbuilding, paper and data-processing industries.

Transport.-The Treaty aims to establish a common policy on transport, with common rules for international transport within the Common Market, covering road, rail and inland water transport. Rates for freight which discriminate $\quad$ to the national origin or destination of goods transported are to be eliminated within the transitional period. In June, 1965 , the Council adopted in Commission proposal setting out the principles of a common policy to be put into force by the end of the transition period. The member governments did not agree on the implementation of these principles, but late in 1967 and early in 1968 a number of steps were agreed, on controlling social and economic conditions in intra-Community transport, especially road-haulage. Other measures covering railways were agreed by the Commission later in 1968 and early in 1969. In December, 1974, the Council agreed to lay down a uniform basis for calculating costs and financing railways. In the middle of 1974 substantial new road haulage quotas were agreed for the three new Member States.

Social Policy.-Under the Treaty, member states agree upon the necessity to promote improvement of the living and working conditions of labour so as to permit the equalization of such conditions in an upward direction. They also cooperate closely on matters relating to employment, labour legislation and working conditions, occupational training, social security, industrial accidents and diseases, industrial hygiene and trade union law. The main instrument for social policy is the Social Fund, established under the Treaty and reformed in 1972. Since then, the Nine's agreement in 1974 on the principles of a social action programme has enlarged the scope for the Fund's operation, which now includes special provisions for migrants, the handicapped, young and redundant workers. In the two years since the Programme was initiated in 1974 the Council adopted - directive, that came into effect in February 1977, seeking to ensure that no firm or public authority can dismiss or make redundant io or more employees without proper consultation with the trade unions; two directives require member States to introduce pay and equaity of treatment for men and women; pilot schemes have been introduced to test and develop new methods of helping the poor; and special help has been allocated from the Social Fund to offset unemployment among young people, as well as extra aid to the handicapped and migrant workers. The total budget for the Social Fund for 1977 is 617 million u.a. (approx. $£ 257 \mathrm{~m}$ ). Under the rules of the Fund the Commission can assist in training and retraining schemes by reimbursing 50 per cent. of the cost financed by a public authority.

In 1975 - European Centre for the Development of Vocational training was established in West Berlin; in May 1976 the new European Foundation for the Improvement of Living and Working Conditions held its first meeting in Dublin, the first Community institution to be set up in Ireland.

Regional development policy.-On December 10, x974, the Summit of the Nine meeting in Paris approved - Regional Development Fund of $\mathrm{x}, 300$ million units of account (£540 million) to be spent over the three years ( $9975-77$ ). The money is used to help to provide or maintain jobs in the
poorer areas of the Community; during the three years the Community has sought to coordinate the regional development policies of the Nine. The Commission is proposing a budgetary allocation to the Fund of $£ 490 \mathrm{~m}$. in 1978.

The Community's external relations.-Under its common external trade policy the EEC has trade agreements of varying kinds with the following countries: Argentine, Brazil, Uruguay, Mexico, India, Pakistan, Bangladesh, Thailand, Sri Lanka, Philippines, Spain, Yugoslavia, Egypt, Lebanon, Israel, Malta, Cyprus, Morocco and Tunisia. Some of these arrangements are being remade and new trade agreements being considered or negotiated with other countries including Syria, Jordan and Algeria in the context of the EEC's Mediterranean policy which will lead to links with 14 countries bordering an the Mediterranean. The first of these was concluded with the Maghreb countries of Algeria, Morocco and Tunisia at the end of April 1976.

In January 1975 the EEC completed negotiations for 1 trade, aid and cooperation agreement (Lomé Convention) with 46 (now increased to 52 ) developing countries of Africa, the Caribbean and the Pacific, among them 22 ex-Commonwealth countries. (Protocol 22 of Britain's accession Treaty had held out the offer of $m$ relationship with the enlarged Community for these countries equivalent to that associating the 18 African Frenchspeaking countries with the EEC under the Yaounde Convention.) The convention came into force on April 1 , 1976. A different kind of associationholding out the possibility of eventual membership -with Greece and Turkey dates back to $\mathbf{2 9 6 I}$ and 1963.

Separate agreements, leading to an industrial free trade area by 1977, were concluded in 1972 with those members of the European Free Trade Association which did not seek candidature for EEC membership when Britain, Denmark and Norway filed their applications: Sweden, Finland, Iceland, Austria, Switzerland, Portugal. These were joined by Norway when the referendum went against entry in the autumn of 1972.

Member states' bilateral agreements with the East European state-trading countries (which was officially due to expire at the end of 1974) are still due to be reshaped into a common commercial policy. The first steps have been made towards this with agreement among the Nine on the draft outlines, or models, for agreements with each of these countries.

Political cooperation.-Cooperation on general foreign policy questions began through the machinery set up in 1970 (Davignon Committec), and takes the form of frequent meetings of the foreign affairs ministers of the Nine. They worked closely together at ministerial level and committee level during the years of preparation and the final summit at Helsinki of the Conference on Security and Cooperation in Europe. Actual military matters are not within the scope of political cooperation: all the members of the EEC except for Ireland ano members of the Atlantic Alliance, although France is no longer a member of NATO's integrated military organization. Consultation uil forelgu affairs is exemplified by the EEC's joint positions m the Middle East, Cyprus and United Nations matters. The Community also participated as an entity in the Conference nil International Economic Co-operation (North-South Dialogue) that began in Paris on December x6-18, 1976.

Scientific and technical collaboration.-In March, 1970, Britain und eight other European countries
accepted invitation by the Six to start discussing concrete projects for Europe-wide scientific and technical collaboration. Seven working parties have so far been set up covering data-processing, telecommunications, new forms of transport, metallurgy, pollution, meteorology and oceanography. The Paris Summit of October $197^{2}$ affirmed the aim of increasing collaboration in the fields of scientfic research and advanced technology. In May 1976 the Commission proposed a fouryear rolling programme of research for the Joint Research Centre (JRC) centring on nuclear safety and the environment.

Enlargement.-The question of possible enlargement of the Community played an important part in its development from the autumn of 196 x when Britain, the Irish Republic, Denmark and Norway first sought membership, and Austria, Sweden, Switzerland, Spain and Cyprus sought association with the Community. The negotiations were vetoed by France in January, 1963. In May, 2967, Britain, the Irish Republic and Denmark formally submitted applications for Community membership. In July Norway followed suit and Sweden announced that it would seek to participate in the enlargement of the Community on terms compatible with its neutrality. These applications made very slow progress and appeared to come to a standstill when in December, 1967, France declared that Britain's economy would have to be strengthened before negotiations could begin. But shortly after taking office as President of France, Georges Pompidou stated in July, 1969, that there was no objection in principle to the admission of Britain to the Community. At the Hague "summit " meeting in December, 1969 (see above) the Six decided that provided that the completion of the Community not prejudiced, and provided that the Community was strengthened to provide for enlargement, then the entry of other European countries would be desirable. After deciding will a common negotiating position, the Six invited Britain and the other applicants to begin negotiations for membership.

The Entry Terms.-A single overall transitional period of five years, during which the Three were to adopt Community rules and regulations, started
on January $x$, 2973 , giving time for the gradual integration of the economies of the Three with the Six. The five-year period covers both agriculture and industry. The industrial tariff reductions take the form of five moves of 20 per cent., the first on April x, x973, $=$ further three on January I of $x 974$, 1975 and x976, and the final reduction m July $x^{\prime}$, 1977.

The first 40 per cent. alignment on the Community's Common External Tariff (CET)-i.e. 40 per cent. of the difference between the new members' tariffs and the CET-was made at the beginning of 1974, and three further alignments of 20 per cent. each will follow the same rhythm as internal tariff-cutting, so that from July $x, 1977$, the Three will apply the same tariffs $\quad$ the Six on goods from non-member states.
Greece, Portugal and Spain have formally applied to join the Community.

## EUROPEAN ATOMIC ENERGY

 COMMUNITY (EURATOM)A second treaty, arising from the Messina discussions between the ECSC powers IIE additional means of co-operation, was signed in Rome on March 25, 1957, setting up the European Atomic Energy Community. The task of Euratom, defined in detail in the Treaty, is to create within $a$ short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on $\begin{aligned} & \text { large scale. Other }\end{aligned}$ sections of the Treaty cover the establishment and growth of nuclear industries, the procurement, ownership and control of nuclear materials, matters affecting health and safety, including training, and external relations, the stimulation of scientific research and the training of specialists, to assure through a Supply Agency adequate supplies of nuclear fuels, the supervision of the nuclear common market, inspection and control of the use of fissile material, and the safeguarding of both workers and the population at large by laying down basic standards for the protection of health. The United Kingdom, Denmark and Ireland joined Euratom on Jan. x, 1973.

## THE COUNCIL OF EUROPE

## Headquarters: 67006 Strasbourg, France.

A European organization founded in 1949 whose aim is to achieve greater unity between its Members to safeguard their European heritage and to facilitate their economic and social progress. The aim of the Council is pursued through discussion and common action in economic, social, cultural, educational, scientific, legal and administrative matters and in the maintenance and furtherance of human rights and fundamental freedoms.

The following is countries belong to the Council: Austria, Belgium, Cyprus, Denmark, France, the Federal Republic of Germany, Greece, Iceland, the Republic of Ireland, Italy, Luxemburg, Malta, Netherlands, Norway, Portugal, Sweden, Switzerland, Turkey and the United Kingdom.

The organs are the Committee of Ministers, consisting of the Foreign Ministers of member countries: and the Parliamentary Assembly of 554 members, elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties. There is also Joint Committee of Ministers and Representatives of the Parliamentary Assembly.

The Committee of Ministers is the executive organ of the Council. Certain of its conclusions take the form of international agreements or recommendations to governments. On certain major matters the Committee votes by unanimity but abstentions are permitted. Decisions of the Ministers may also be embodied in partial agreements to which limited number of member governments are party. The Committee of Ministers meets twice yearly. All Ministers have appointed Deputies to act on their behalf. The Committee of Deputies meets monthly to transact business and to take decisions min behalf of Ministers. Member governments accredit Permanent Representatives to the Council in Strasbourg, who are also the Ministers' Deputies.

The Committee is a forum for discussion between member governments on political and other matters, supervises the work of the technical expert committees and considers recommendations received from the Parliamentary Assembly. The Assembly's conclusions may take the form of recommendations to the Committee of Ministers

Secretary-General, G. Kahn-Ackermann.
III resolutions. Ministers, including Ministers other than those for Foreign Affairs, may address the Assembly and take part in its debates.

The Parliamentary Assembly holds three weeklong sessions a year. It debates reports on, inter alia, political, economic, agricultural, social, educational, legal and regional planning affairs. The Chairman in office of the Committee of Ministers presents a report at each session. The Assembly also debates reports received annually from the O.E.C.D., other European organizations and certain specialized agencies of the United Nations. It holds an annual joint meeting with the members of the European Parliament of the "Nine". Matters of mutual interest to the Committee of Ministers and the Assembly are discussed in the joint Committee. The Council's budget is voted annually in Decernber and is met by agreed contributions of member countries.

One of the principal achievements of the Council of Europe is the European Convention on Human Rights (1950) under which was established the European Commission and the European Court of Human Rights. These organs have built up a valuable system of European jurisprudence in the field of Human Rights. Other major achievements of the Council of Europe are the European Cultural Convention ( $\mathbf{x} 953$ ) and the European Social Charter (r960). Ninety-two conventions and agreements have been concluded by the Council covering matters in all the fields of its competence, such ㅍ social insurance, equivalence of European diplomas for university entrances, equivalence of university degrees, public health patents, extradition, etc.

The Council's cultural and educational programme is administered by the Council for Cultural Co-operation to which in addition to members of the Council of Europe, belong Finland, Spain and the Holy See. A European Committee for Legal Co-operation administers the Council's legal programme. A few non-member states take part - observers in several of the Council's intergovernmental activities.
Permanent U.K. Representative, His Excellency
Peter John Foster, C.M.G. (1974) $£ 6,475$

## RETROSPECT OF SPORT 1976-77

## ATHLETICS

## WORLD RECORDS

(All the world records given below have been accepted by the International Amateur Athletic Federation.)
At the Congress of the International Amateur Athletic Federation held in Montreal in July 1976 it decided that in future (a) with the exception of the one mile both the men and women world records should be accepted only at metric distances (b) up to 400 metres only records timed by fully attomatic timekeeping apparatus should be accepted, (c) records up to 400 metres should be accepted to $\mathrm{x} / \mathrm{ro0} \mathrm{sec}$. and (d) all other records should be accepted to $x / 10$ second.

THE DERBY, $1967-1977$
For particulars of the Derby from $1780-1966$ see $1921-67$ editions.
The Distance of the Derby course at Epsom is $1 \frac{1}{2}$ miles. Lord Egremont won Derby in 1782, 1804, 5, 7 , 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, Oaks); Mr. Bowes, 1835, 43, 52, 3i
 of Westminster, Bend Or ( $\mathbf{x} 880$ ), Shotover ( $\mathbf{x} 882$ ), Ormonde ( 1886 ), and Flying Fox ( $\mathbf{x} 899$ ). Lady James Douglas was the first lady to win the Derby-War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780 . From 1940 to 1945 substitute Derby run at Newmarket. By winning his 5 th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

Yachting.-Royal Yachting Association, Victoria Way, Woking, Surrey. Sec.- Gen., J. Durie.

## DUKE OF EDINBURGH'S AWARD SCHEME

The Duke of Edinburgh's Award Scheme is meant to provide an incentive and a challenge to young people to reach certain standards in leisure-time activities with the voluntary help of adults. Entrants in the United Kingdom and in other Commonwealth countries, must be between their 14th and 23rd birthdays and can enter through their school, the firm where they work, a youth organization, or on their own. Bronze, Silver and Gold Awards can be gained by those who qualify in four of the five sections of the Scheme: Service, Expedition, Interest, Design for Living, and Physical Activity. The qualifying standards are expressed in terms of proficiency, perseverance or sustained effort, participants being assessed on the use they make of their personal abilities and aptitudes and not in competition with others.
In $\mathbf{1 9 7 6}$, there were 76,528 new entrants from the United Kingdom and 23,942 from overseas; $\quad$ total of 32,53I Awards were gained in the U.K. and ro,307 overseas. There have now been more than $\mathbb{0}$ million and a quarter entrants since the Scheme began.
Head Ofice: 5 Prince of Wales Terrace, W.8. Director: A. Blake, c.v.o., M.C.

## THE SILVER JUBILEE

Of Britain's 43 monarchs since 1066 only ${ }_{3} 3$ have kept the crown for 25 years; the first to celebrate his Jubilee ceremonially was said to have been Henry III in the thirteenth century; the penultimate was The Queen's grandfather, King George V, in 1935 . who had endeared himself to his people by declaring after the festivities that till that day he had not realized that he had been so loved. Indubitably, however, 1977's Jubilee was the most comprehensive ever in the numbers it affected; only perhaps equalled in dispaly by the Coronation ceremonies and the Delhi Durbars of the early part of the century.

Moreover, as other monarchies, for example the world's oldest in Ethiopia, and one of the newest, that of Laos established in 1947, were being abolished by revolutionary régimes, Britain's in 2977 proved itself as strong and popular as ever.

The first eight months of Jubilee Year were the busiest The Queen has ever spent. Details of her timetable and itinerary are given elsewhere (see Diary of Events). The festivities involved The Queen going to her people as much as it entailed their coming to greet and see her. However, where the progresses of the first Elizabeti had been largely limited to Southern England, her namesake travelled thousands of miles often to countries that had ceased to be British colonies and become independent members of the Commonwealth during her reign. The Queen did not make comprehensive tour of the Commonwealth, however; it was in fact in Australasia for example that she spent the British winter enjoying the sun of that sub continent, in I two-month tour. While there, she opened the Sports Centre in New Zealand, the venue for the 1982 Commonwealth Games; received a headhunter's skull rack in Papua; was garlanded in flowers by King Taufa'ahau Tupou IV in Tonga; and was greeted in Sydney Harbour by the biggest flotilla of small boats Australia had ever seen. Back from Australasia, The Queen toured Britain-North, South and East London, the West Country, Merseyside, Wales and Scotland as well as Ulster, where, despite "the Troubles" and specific I.R.A. threats, a two-day visit was arranged which passed with only two small bomb explosions. Her Majesty also made a point of appearing in Jubilee Year as the nation's Commander-in-Chief, when she reviewed the army in West Germany, the R.A.F., and the Fleet at Spithead, where 97 British ships and 60 foreign vessels gave the salute. The Queen also at other times reviewed the police and the Royal British Legion.

But as has been said, people also came to share in the Jubilee. Some $£ 1,000,000$ tourists were expected to come to Britain in 1977 to celebrate with us (and to spend $£ x, 170,000,000$ ). Indeed Americans were enticed to make the journey by a large model of Buckingham Palace which was put on display at New York's Kennedy Airport.

The climax to the year's celebrations was Jubilee Week. This was begun by the lighting of a towering bonfire at Windsor by The Queen herself, a spark to $x 02$ others all over the world including one lit by Sir Edmund Hillary (in New Zealand), a man who had as equal reason as Her Majesty for a fond memory of 1953, the year in which he scaled Everest simultaneously with the Coronation. Jubilee Day itself revolved around three eventsFirstly, the thanksgiving service in St. Paul's Cathedral, which was attended in person by 3,000 people, including Commonwealth Heads of States (a service incidentally which was also to be celebrated during the year in the cathedrals of Llandaff
and Glasgow for the benefit of Her Majesty's Welsh and Scottish subjects). Secondly, there was the lunch in Guildhall, after which the Queen addressed the nation and the Commonwealth and movingly reaffirmed the vow of self-dedication to the rôle birth had allotted her, which she had made as I young girl. Thirdly, there came the climacteric, her appearance on the balcony of Buckingham Palace to receive the acclamation of the enormous crowds. Indeed, whilst the events of the day were seen by $22,000,000$ people on British television (and by several million more at peak viewing time in America), others had thronged the streets in their thousands. As Her Majesty walked from St. Paul's to Guildhall she chatted to several of them and received flowers and a little boy's painting of her. As she made her way back to the Palace the people followed her and when she appeared on the balcony in the afternoon beneath aloomy sky there were perhaps three-quarters of a million people filling the whole of The Mall and even spiliing into Trafalgar Square-an incredible assemblage surely unrivalled since V.E. Day; a sight fortunately conveyed to the millions watching on television as part of the biggest outside broadcast ever mounted by the B.B.C. (with atotal of $3^{8}$ cameras employed). The week was concluded by River Pageant on the evening of June 9 , illuminated by a grand fireworks display which rivalled the famous performance organized on the same river for the king by Court musicians headed by Handel.

Jubilee Year inspired a whole gamut of activities, many delightfully informal to accord with Her Majesty's express wish that there should be no lavish expense in this time of economic austerity. In London, for example; 5,000 street parties were planned, roads being temporarily pedestrianized, bunting put up, trestle tables erected and games and food provided for the children; $¥ I$ Jubilee fountain sculpture was unveiled in New Palace Yard; London Transport ran silver-painted Jubilee buses; a new $4 \frac{1}{2}$ acre Jubilee Park was opened on the South Bank on the site of the r95x Festival of Britain; " "Coronarium" of cast iron columns retrieved from blitzed warehouses and arranged in the form of Classical rotunda, was erected in St. Katharine's Docks by the Tower; Leicester Square was cleared of cars and laid out with tables and specially designed Jubilee bollards; the London Jubilee Youth Games were held. The capital also saw national exhibitions inspired by the Jubilee, most particularly the gently jingoistic one "to British Genius" at Battersea, when we were able to boast to the world as the inventors of the television; penicillin, Spitfires, Concorde, the body scanner, cats' eyes and the tandem. There was an equal variety in the acts of celebration outside the Capital as well; Derby was awarded the status of a city; Manchester commissioned a life-size portrait of The Queen and hung it in the Town Hall; and in Norfolk, five rooms at Sandringham, the royal home so beloved of The Queen's father, were opened to the public for the first time.

Sir John Betjeman, the Poet Laureate, composed the Jubilee Hymn, which was put to music by the Australian Master of The Queen's Musick, Malcolm Williamson. Robert Lacey wrote a best-selling biography of Her Majesty, 25,000,000 Jubilee Crowns were minted. 30,000 people, including 9,000 Servicemen, were awarded the Jubilee Medal, which had been designed by David Wynne. The Cabinet presented The Queen with a silver coffee pot. The B.B.C. made a programme on "The Royal Treasures" in which members of the Royal Family spoke about their favourite items. The Prince of Wales launched the Silver Jubilee Appeal in his first live T.V. broadcast; the money raised was
to enable "young people to help others" and the target figure of fxom had already been reached by July (there were similar funds in Commonwealth countries). All over the Commonwealth in total of 72 commemorative stamps was printed.

The tag of "Jubilee" was also applied to $\quad$ bewildering variety-of products, ranging from $=$ phone in Balmoral blue with - royal badge on the dial to a "Jubilee" house presented to the public by a building firm. However almost certainly there were far fewer "Jubilee" Drives, Crescents or Avenues in I977 than there had been in 1935 and there were certainly fewer of the statues which had been erected in 1887 and 1897.

Perhaps the greatest incidental bonus in Jubilee Year was the long-awaited triumph of Virginia Wade at the Wimbledon Tennis Championships in a match actually attended by the Queen.
For many of course Jubilee Year was the occasion for looking back over the preceding twenty-five years and gauging what they have meant for the nation as well as the monarchy. Indeed this was $\quad$ theme frequently alluded to by Her Majesty in her many speeches. The last quarter century has seen change in all spheres of British life as dramatic as any in our past: the average manual workers' basic wage has doubled; there has been a three and a half fold increase in the number of cars per household and to use another gauge of material prosperity, an eightfold increase in the number of television sets. There were 275,000 university students in the midseventies compared with 70,000 in 1952 (and also $9,000,000$ school pupils compared with $6,000,000$ ); there has been a radical upheaval in our conception of morality symbolized by the laws on sexual freedom, divorce, abortion and capital punishment and the rise in violent crime (in 1977 in in people had in criminal record); equality of opportunity between the sexes has been enforced by law and Britain has become the first country outside the Third World to have elected $I$ woman as head of major political party; in the last twenty-five years Britain has also become multi-racial society with a non-white population now of $1,900,000$; our role in the world has changed beyond recognition-having been the only nation in the twentieth century to have shed its Empire largely without bloodshed. In 1973 we entered the European Common Market, which is twenty years old this year; a terrorist war which has claimed nearly 2,000 lives began in 1969 in Ulster and strong but non-violent nationalist movements developed in Wales and Scotland; where there were 442,000 in the Army in 195z there are now 164,600, the total of 166 Royal Navy hulls has declined to ixz and the full complement of the Royal Air Force has been cut by two thirds. Public expenditure on education, health, welfare and housing has risen from $£ 2,130,000,000$ to $£ 21,808,000,000$; however, we have declined as a manufacturing power where we had been the first nation in the world to industrialize; formal religious observances have declined and since 1968650 Anglican churches have been declared redundant.

But as an overarching constant during these years of often confusing change and expansion there has been The Queen, acting as a widely respected focus for national unity. The Royal Family are attuned to the age they live in but not eclipsed by it $=$ so many other institutions have been.

It is a fairly chilling thought that Her Majesty will celebrate her Golden Jubilee in the second year of the twenty-first century, that her reign will extend into the age that Science Fiction has already claimed as its own. If she does retain the throne for fifty years she will be only the fourth monarch to do so in this country, her predecessors in this respect
being Henry III, George III and Victoria. Her people sincerely hope that she will.

THE SCROPE DAVIES PAPERS
The discovery of the Scrope Davies Papers was first announced in The Times on December 20, 1976. If, on reflection, this event was not perhaps "the literary find of the century" as had been suggested, it was nevertheless of great literary and historic importance. The connection with Byron and Shelley distracted attention from the major discovery in the trunk: undoubtedty, the Byron manuscripts and the Shelley poems are of great significance, but the major revelation concerns the owner of the trunk, the character of Scrope Berdmore Davies himself.
This remarkable collection of ephemera, the bills and betting slips, the notebooks and visiting cards, bank statements and summonses, bear mute testament to what must have been a remarkable life by today's standards, let alone those of $\mathbf{x 8 z o}$. One can only speculate at the motives that led men of Scrope Davies's undoubted talent and intelligence to lead the reckless and inevitably ruinous life of the Regency Dandy,-surely, more than addiction to gambling-and one wonders whether Scrope had any regrets as he lived out his thirty-year exile in a Paris attic, his only income that which he received as $\quad$ Fellow of King's College, Cambridge.
The trunk was apparently deposited with Scrope Davies's bankers, Messrs Morland, Ransom and Company, at \& Pall Mall East sometime early in 1820. It seems that Davies hurriedly stuffed his papers and odd belongings, such as a pair of gloves, into the trunk before leaving England to escape his creditors. The bank eventually became part of Barclays Bank at the end of the nineteenth century, and there the trunk remained until, in a reorganization of the premises in $\mathbf{x 9 7 6}$, it was decided to open boxes in a private deposit vault that had been untouched and unclaimed for over one hundred years.

The trunk and its contents have now been placed in the British Library in the British Museum. Although there are descendants of Scrope Davies alive today, he died unmarried and intestate, and it seems unlikely that an authoritative claim could be laid on the hoard. Those of his relatives who have so far examined the contents feel that they should be regarded as national treasures. A selection of the papers and manuscripts was displayed with the trunk in the British Library in 1977.

One of the items of major interest is the "missing", manuscript of Canto III of Byron's Childe Harold's Pilgrimage. During the summer of 1856 Byron stayed on the shores of Lac Leman (Geneva) near Shelley, Mary Godwin whom Shelley was to marry, and her step-sister Claire Claremont who was infatuated with Byron. In August, his old friends John Cam Hobhouse and Scrope Davies arrived on a visit. Shelley returned to England a few days later, entrusted with a manuscript of Canto III, transcribed by Claire, as well as some other poems for delivery to Byron's publisher, John Murray. When Scrope returned to England, Byron gave him his own fair copy of Canto III. Although this predated Shelley's copy, which contained an extra stanza and additional notes, it was nevertheless the more authoritative version. To the other Byron had attached a note which read "This copy is to be printed from-subject to comparison with the original MS. (from which this is $\begin{aligned} & \text { transcription) in such parts as it may chance to be }\end{aligned}$ difficult to decipher in the following."
Scrope's failure to deliver his copy caused Byron much concern. In December he wrote to Murray asking if "Mr Davies, of inaccurate memory, had

## 1978]

or had not delivered the MS. as delivered to him." His motives in failing to do so are matter for speculation. However, he had written on the flyleaf of the notebook "This MS. was given by Lord Byron to Scrope Davies at Geneva, September and 1816 ." Having now come to light some 160 years later this manuscript will be of undoubted value for textual analysis and comparison with the published inferior version.

Of less importance is copy, also by Claire Claremont, of the Prisoner of Chillon. Although it was at first thought that this copy provided at least one significant variant from the accepted text, in its rendering of Stanza $\mathrm{X}, 1$. I8 as "A lonely bird, with azure wings," this has now been challenged if not refuted. It would seem that Byron himself later corrected this to the standard version of " $A$ lovely bird. . ."

Perhaps of greater interest is the assorted correspondence in the trunk, notably the sixteen letters written by Byron to Scrope between 1809 and 1819 , a letter from Byron to their mutual friend Charles Matthews, who had drowned at Cambridge in 18ri, and various other letters from Hobhouse, Thomas Moore, Augusta Leigh (Byron's halfsister), Lady Caroline Lamb, Lady Frances Webster and others.

One of the letters to Scrope is dated June 22, 1809 , and was written from Falmouth while Byron waited for the Lisbon packet to sail on his first tour abroad. It was due to $\quad$ loan from Scrope that he was able to make the trip, and although the letter duplicates several others written at this time, and published in the collected works, particularly in his description of the "'punishment of female peculator who had appropriated her neighbour's assets," his affection for Scrope comes through: "Sincerely, dear Scrope, you are one of the few things in England I leave with regret, and shall return to with pleasure." In another letter dated January 26, 1819 from Venice, Byron rails against his wife. The similarity between her and Donna Inez in Don Iuan having been noted, he wrote, "if the bitch Inez resembles any other bitch that's fair."

Also in the chest was notebook in Shelley's hand, of especial interest to scholars both for the versions of Hymn to Intellectual Beauty and Mont Blanc contained thercin, with significant textual variations from the publislied versions, and also for the two previously unknown poems. Both are complex, typical Shelleian sonnets, one untitled, and the other dedicated "To Laughter," and beginning "Thy friends were never mine thou heartless fiend."

It is perhaps surprising to find material relating to Napoleon in this treasure trove, but Scrope's youngest brother Samuel Decimas Davies was on board H.M.S. Norihumberland when Napoleon was transported to Longwood, St. Helena, in 1815 . His letters and sketches provide - vivid and humorous, if at times pathetic, picture of Naval life in the early nineteenth century.

Although the publicity aroused by the discovery of this remarkable "time-capsule" was provoked mainly through the association with Byron and Shelley, and the mystique of "lost" manuscripts, it would be just if its lasting impact should be as a memorial to the remarkable Scrope Davies. Perhaps the summons dated "gth January in the 58th year of the reign of George III," showing a sum of $£ 7,200$ owed to Edward Howard, was the straw that broke Scrope's back. His intemperate living could have but one result. It is reassuring to note an entry in bank book that Byron repaid on March 26, 1814 the sum of $£ 4,804$ 12S. 4d. which he had borrowed in 1809 , but a notebook kept by Scrope on a journey he made with Hobhouse in Scotland provides a better clue to his
character. It is catalogue of bets: "WWon at throwing stones. ... I8s. od." This perhaps best gives the flavours of the elusive Scrope, scholar, wit, dandy, drunkard, gambler, friend of the famous but eventual failure.

Leslie Marchand, blographer of Byron, quotes John Cam Hobhouse who wrote in his diary, "Of the five that often dined at Byron's table at Diodati near Geneva-Polidori-Shelley-Lord ByronScrope Davies and myself-the first put an end to himself-the second was drowned-the third killed by his physicians-the fourth is in exile-!!!"

That the value of this trunk and its varied contents has been estimated at between $\mathbf{6 2 5 0 , 0 0 0}$ and 6,500,000, should they ever be sold, is an irony that would not have been lost on Scrope Berdmore Davies.

## MENTMORE

In the first half of 1977 the name of a hitherto little known Buckinghamshire country house became adopted, rightly or wrongly, as the byword for lack of governmental resolve in conserving the British architectural heritage. And ㅌ result of that same lack of resolve it also entered the record books as the scene of the country's biggest art sale in this century.

The house is called Mentmore Towers and as that "Gothic" name implies is a pile both gargantuan in size (with 28 bedrooms, for example) and fairytale in its romantic rural setting and in its dramatic many-turreted skyline. It had been designed and built between $185 x$ and 1854 by Paxton with the aid of G. H. Stokes, his son-in-law, in an Elizabethan style derived from that sixteenth century "prodigy house", Wollaton in Nottinghamshire. (Although as befitted the architect of the Crystal Palace, Paxton used steel girders in the toplighting to the Great Hall beneath the period dress and also installed hot water heating and artificial ventilation systems in the house.) Paxton's client was Baron Meyer Amschel de Rothschild, who wanted the house for his fabulous collection of artistic treasures which he had begun to amass $\quad$ few years before and was to continue to do till his death in 1873 . The house, which cost $£ 15,000$, was in fact but one of six Rothschild mansions built at this time in Buckinghamshire.

The mansion's architectural and artistic interest was later compounded by historical interest when it became one of the leading "political houses" in the country at the turn of the century. In 1878 Hannah, Meyer's daughter, had married the Earl of Rosebery and the latter became Liberal Prime Minister between 1893 and 1895 . Both Disraeli and Gladstone seem to have been visitors, and the grand rooms saw some scheming as well as oratory (Matthew Arnold and Thackeray were also to visit the house).

It was however as a private museum cum art gallery that Mentmore became most renowned. Among its treasures till the 1977 auction were desk used by Necker, Louis XVI's gifted Finance Minister, and designed by the great Neo-Classical artist, Leleu; a desk or secretaire of 1755 belonging to Augustus III of Saxony; Gainsborough's only sporting picture; chairs from the Doge's Palace; Reynolds' portrait of Countess della Rena the opera singer; Moroni's portrait of a scholar; an early Erard piano; Gobelin tapestries, Sèvres porcelain: Boucher's painting of "Apollo and Cupid": Drouais' pcrtrait of Madame de Pompadour; Zoffany's "Plundering the King's Cellar"; two very fine Turners; a portrait ascribed to Rembrandt; and a huge chimneypiece by Rubens removed from the house which he built for himself in Antwerp and placed in the Grand Hall. (In the
early stages of The Mentmore Affair the Belglan Government was to try to buy this item in order to return it to its original position.) For a few years in the Second World War the house was even more well endowed when it became a place of safekeeping for national treasures like the royal effigies from Westminster Abbey.

The Mentmore Affair began in $x 974$ when the 6 th Earl of Rosebery died at the age of 92 , leaving an estate of something like $£ 9,500,000$, said to have been the largest fortune since the Duke of Westminster had died in the previous decade. The 7 th Earl found himself with a bill for estate duty of between $£ 4,000,000$ and $£ 5,000,000$ which had to be paid within three years of his father's death (i.e. before May 1977) if he was to avoid paying tax on his treasures' probate (i.e. 1974) value rather than their sale value. In February 1976 he entered negotiations with the Government to see if they would buy Mentmore to release the capital frozen in the house, the better to enable him to meet the tax bill. The price was $£ 2,000,000$, which was extremely reasonable in view of the fact, as it turned out, that the house and contents were worth four times that amount and it seemed for a time that the Government might be able to accept the offer with the substantial help of a private goldmining company. However, after the latter's withdrawal, the Government announced in January 1977, barely four months before the May deadline, that it had to decline the offer. Almost immediately the conservationist group, SAVE, went into action and argued that the Government had turned down the "art bargain of the century"; showed that, if opened to the public, the house, barely ten miles from the new city of Milton Keynes and on the tourist route from London to Stratford, would attract 100,000 visitors annually, thus covering the running costs; that the initial cost of purchase could be recovered by the sale of just a few of the treasures and that because so many of the items fell into the Treasury category of "preeminent" they would be refused export licences, the national museums would be offered first refusal and several would have therefore to be bought anyway by the Government at I cost which would approach that for which the whole house and contents could be acquired (an eventuality which did in fact transpire). Despite some dissentient noises, the Conservation Movement united to fight for the house and received support from M.P.s of all three main parties. When Lord Rosebery renewed his offer (but this time increased to \& $3,000,000$ ) the Government, clearly surprised by the anger at its previous refusal, after several weeks' consideration, announced that it would contribute $£ x, 000,000$ provided the other $£ 2,000,000$ was produced by private sources. Lady Birk, the junior minister responsible, declared that in the environment of recession the full sum "was politically and economically impossible to find". In fact by the time the day of Lord Rosebery's deadline had been reached perhaps $£ x, 250,000$ had been promised from private sources, including the big firm of Trafalgar House. The National Art Collections Fund offered the Government an interest-free loan of $\mathcal{6} 250,000$. Yet despite the relative modesty of
the shortfall the Treasury in particular was obdurate. And this inflexibility was the more regretted because the Victorian Society had bravely declared itself willing to lead a national and public appeal, the National Trust had gone out of its way to declare that it would run the house provided an endowment was raised, the Government itself had upgraded the house from Grade II to Grade I, by which its "outstanding" quality was recognised and Lord Rosebery had submitted a new "package" to the Government, involving among other things the donation of the house and the staggered purchase of the main treasures. Above all, the Government attitude was regretted because of the existence of a sizeable sum of money specifically earmarked by the post war Labour Government to facilitate the purchase of historic houses for the enjoyment of the people. This was the National Land Fund, the brainchild of Dr. Hugh Dalton, the then Chancellor of the Exchequer, which was founded in 1946 with - capital of $£ 50,000,000$ invested in short term government securities. It was funded from the sale of war surplus explicitly as "a thank-offering for victory and as a war memorial" in order to preserve for the nation historic buildings and outstanding landscapes and was meant to be distinct from the general Consolidated Fund and thus largely immune from the pressures arising in times of economic hardship. Unfortunately, although not for lack of need (in 1955 no fewer than 75 historic country houses had been demolished) the Fund was little used and in 1957 the Conservative Minister in charge, Mr. Enoch Powell, bad reduced its capital to $\mathrm{C} 10,000,000$. By 1975 with interest the Fund was worth $£ 16,000,000$ and had been used to buy historic houses like Dyrham in Gloucestershire and Heveningham in Suffolk. The Government however decided to use the Fund to pay all the required price for Mentmore, and argued that the Fund was not independent from the budget of, for example, the Departments of the Environment or Education, but subsumed in them, with the result that any money taken from the Fund would. have to be replaced from the appropriate Department's vote. Thus the heritage was seen as $\quad$ direct competitor with housing and schools for funds.

The climax to the Mentmore Affair was therefore the great auction at the house in late May. Although, as predicted, the Government was obliged to purchase perhaps nine of the main treasures at price approaching that for which it could have bought the whole house and contents at the first offer, the 2,649 lots at the auction still raised the remarkable total of $£ 6,398,933$ (and this also excluded other items which Lord Rosebery kept for his Scottish house at Dalmeny). Even the garden statuary was sold and in the last days quite ordinary items were fetching record prices because of the great interest the case had evoked. In fact as asign of the potential tourist attraction which had now been lost thousands came to the house in the days before and during the sale.

The house is now on the market and could well raise $\mathcal{£} 500,000$ to the further embarrassment of the government who turned down the house and contents in this the conservation cause celdbre of the decade.

## DRAMATIC SUMMARY, 1976-77

Among London productions between October $x, 1976$ and September 3x, 1977, were the following: Albery: St. Martin's Lane, W.C. 2. (x977) Jume 23. Candida by George Bernard Shaw with Deborah Kerr, Denis Quilley. Director, Michael Blakemore.

Aldwych: W.C.2. ( 3976 ) Oct. 12. Old World by Aleksei Arbuzov with Peggy Ashcroft and Anthony Quayle. Dec. 14. Wild Oats by john O'Keeffe with Alan Howard, Lisa Harrow, Joe Melia and Norman Rodway. (1977) Feb. 22. Privates on Parade by Peter Nichols with Denis Quilley, Ian Gelder and Joe Melia. May 6. King Lear (transferred from Stratford) with Donald Sinden, Bob Peck, Robin Ellis and Judi Dench. May x2. Destiny by David Edgar (transferred from the Other Place, Stratford). June 2x. The Comedy of Errors (from Stratford). June 26. A Midsummer Night's Dream (from Stratford). June 30. Much Ado About Nothing (from Stratford). July 6. Romeo and Juliet (from Stratford). Aug. x. Ibsen's Pillars of the Community with Ian McKellen and Judi Dench, directed by John Barton.

Ambassadors: West St., Cambriage Circus, W.C.z. (1976) Oct. zo. Dear Daddy by Denis Cannan, starring Nigel Patrick and Phyllis Calvert. (1977) June 16. Something's Afoot. Directed by Tony Tanner.

Apollo: Shaftesbury Ave., W.x. (x977) Jan. 19. Separate Tables by Terence Rattigan, starring John Mills and Jill Bennett, directed by Michael Blakemore. Aug. 24. After Shave. Sept. 22. Emlyn Williams as Saki.

ARTS:Gt. Newport St., W.C.z. Dirty Linen and New Found Land by Tom Stoppard, directed by Ed Berman.

Cambridge: Earlham St., Cambridge Circus, W.C.2. ( $\mathbf{x 9 7 6 )}$ John Curry's Theatre of Skating. (1977) March 16. Ipi-Tombi (transferred from Her Majesty's) directed by Bertha Egnos.

Comedy: Panton St., S.W.r. (1976) Oct. 4. Otherwise Engaged by Simon Gray, with Michael Gambon, directed by Harold Pinter. (Transferred from Queen's.)

COTTESLOE: South Bank, S.E.z. (x977) March 4. Science Fiction Theatre of Liverpool in Illuminatus! April 5. Strawberry Fields by Stephen Poliakoff with Jane Asher, Kenneth Cranham, Peter Hugo, Maya Kemp, Anne Leon and Stephen Rea, directed by Michael Apted, designed by Di Seymour. April 26. The Passion, directed by Bill Bryden and Sebastian Graham-Jones, designed by William Dudley, Music by the Albion Dance Band. (Mark McManus and Richard Johnson.) May 9. SellOut by Roger Smith and Tom Kempinski, directed by David Scase, designed by David Cockayne, with the Library Theatre Company of Manchester. May 18 . Four to One by Gawn Grainger, directed by Sebastian Graham-Jones, designed by John Halle, with Warren Clarke, Mark McManus, Derek Newark, Trevor Ray and Pitt Wilkinson, June 9. To Those Born Later, poems and songs of Bertolt Brecht, directed by Michael Kustow, designed by Peter Mumford, with Robyn Archer, Jane Asher, Shane Connaughton, Glyn Grain and Gawn Grainger. June 16 . Old Movies by Blll Bryden, directed by Bill Bryden and designed by Geoffrey Scott. July 1. The Camilla Ringbinder Show by Trevor Ray and Richard Mangan, directed by Sebastian Graham-Jones. Iuly 5 . Bow Down by Tony Harrison and Harrison Birtwistle, directed by Walter Donohue. July 1 I. Chris Harris in Kemp's Jig. July 19. London

Theatre Group in East by Steven Berkoff. July 29. London Theatre Group in Metamorphoses by Franz Kafka, adapted by Steven Berkoff. Aug. 1̌. Ben Kingsley in Judgement by Barry Collins, directed by John Russell Brown, designed by John Bury. Aug. 15. The English Stage Company in For the West by Michael Hastings. Aug. 25. Sir Is Winning by Shane Connaughton, directed by Christopher Morahan and designed by Sue Jenkinson.

Criterion: Piccadilly Circus, W.r. (1976) The Thoughts of Chairman Alf by Johnny Speight with Warren Mitchell. Dec. 15. I Gotta Shoe by Caryl Brahms and Ned Sherrin with Linda Lewis and Claire Peters. ( 1977 ) Apr. 13. Leslie Phillips, Julia Lockwood, Peter Blythe, Carol Hawkins, Angela Scoular and Julian Fellows in Sextet by Michael Pertwee, directed by Robin Midgley.

Duke of Yorx's: St. Martin's Lane, W.C.z. (1976) A Bedfull of Foreigners, starring Terry Scott and June Whitfield (transferred from Victoria Palace). (1977) June $\mathbf{x 5}$. Janet Suzman and lan Bannen in Hedda Gabler by Henrik Ibsen, directed by Keith Hack. Sept.6. A Singular Sensation with Anita Harris.

Garrick: Charing Cross Rd., W.C.2. (x977) July 27. Tony Britton, Peter Woodthorpe and Phyllida Law in The Bells of Hell by John Mortimer.

GRERNWICH: Crooms Hill, S.E.xo. (I976) Nov. 4. Diane Cilento in The Ariful Widow. Dec. 9 . Leonard Rossiter in Molière's Tartuffe. (2977) Feb. 3. Siobhan McKenna in The Sons of Oedipus. March 10. Gayle Hunnicut and Max Wall in Twelfith Night. April 14. The Admirable Crichton by J. M. Barrie, with Frank Barrie, Gayle Hunnicut and Trevor Baxter. May 23. The Good Person of Szechwan by Bertolt Brecht. June 23. Singles by John Bowen with Frances de la Tour, Ray Brooks and Gwen Watford. Aug. 16. Shoot Out at Elbow Creek.

Tobias and the Angel by James Bridie, directed by Denise Coffey. June 2. Rosencrantz and Guildenstern are Dead by Tom Stoppard (Paul Kelly, Robert East, David Henry, directed by Jeremy James Taylor.)

This year in the West End, several plays remained unchanged and unthreatened by new material for the entire twelve months. Indeed, No Sex PleaseWe're British by Anthony Marriot and Alistair Foot became the longest running comedy show in British theatre history on July 16 , when it gave its 2,548 th performance. It is now in its seventh year.

That splashy musical, Irene, at the Adelphi, starring Jon Pertwee, played throughout the year. So did Agatha Christie's Murder At The Vicarage, at the Fortune; Donkey's Years by Michael Frayn at the Globe, and $A$ Chorus Line at Drury Lane, a behind the scenes look at the lives of Broadway dancers, itself displaying a magnificent standard of dancing. The rock extravaganza of transvestisism and shock at the King's Road Theatre, The Rocky Horror Show, Jesus Christ Superstar, at the Palace, and The Mousetrap, playing in its 25 th year, all did the same, as did Ned Sherrin's revue of the songs of Stephen Sondheim at Wyndhams called Side by Side by Sondheim.

New musicals included Lionel, which brought together the popular tunes of the composer Lionel Bart, Oh Mr. Porter, a slick American style revue of Cole Porter material, with Una Stubbs, and, at the London Casino, Dean.

Dean, directed by Robert Livingston, starred Gien Conway as James Dean, the popular American youth hero and Rebel Without A Cause. It was set on a Warner Brothers sound-stage and worded by John Howlett. Glen Conway bears in extraordinary resemblance to Dean, but the show was plagued from the start and was forced to close after only five weeks.

On the side of comedy, Tom Stoppard's brilliantly witty Dirty Linen at the Arts Theatre, and the sensational Wild Oats, from ill inspired Royal Shakespeare Company cast, excelled. Other first rate productions included Lindsay Anderson's direction of Celia Johnson and Sir Ralph Richardson e two old lovers reuniting in The Kingfisher by William Douglas-Home; Denis Cannan's prizewinning Dear Daddy; and Just Between Ourselves by Alan Ayckbourn.

Candida, at the Albery, starred Deborah Kerr as the heroine of Shaw's play, with Patrick Ryecart as the frail desperate poet who worships her, with Denis Quilley as her stout Christian husband.

Terence Rattigan's reworking of a radio play of his into Cause Célebre which opened at Her Majesty's
won great approval. Glynis Johns was remarkably good as the middle-aged sensual Bournemouth woman who was accused in 1935, along with her young chauffeur/lover of battering her husband to death. As in The Winslow Boy, Rattigan brings off another courtroom drama success with perfect skill and notable performances from the leading players.

In Hedda Gabler at the Duke of York's, Janet Suzman proved herself one of the most electrifying actresses on the London stage. In a thrilling production directed by Keith Hack, she played Ibsen's heroine trapped by social conventions with great understanding and solid support from a fine cast.

Two studies of poetesses were given this year, the first called Stevie, and about the reclusive Stevie Smith, starred Glenda Jackson, while The Belle of Amherst, was about the equally reclusive nineteenth century New England poetess Emily Dickinson. The sole part was taken by the enchanting Julie Harris.

The most promising playwright whose work and views have come into the limelight this year has been Pam Gems. Two of her plays have now been seen, both very different. Dusa, Fish, Stas and Vi, has a cast of four actresses who play out the interlocking relationships of quartet of flatmates in feminist mould; while her Queen Christina at the Other Place starred Sheila Allen as the scandalous Swedish monarch, brought up as $\quad$ man in order to rule better, but unable to cope with the inherent consequences. Whereas Dusa, Fish, Stas and Vi was played by the small cast of its title, Queen Christina had the trappings of almost the entire R.S.C. to support-in fact $3^{2}$ players. Both plays were directed by women: Nancy Meckler and Penny Cherns.

The season which eventually culminated in the "marriage" of the Prospect Theatre Comapany and the Old Vic Theatre included ax inventive production of Hamlet with excellent performances by Derek Jacobi me the Prince, Timothy West as Claudius and Barbara Jefford as Gertrude. The text was based on the Folio edition and not on the more accepted version, the second quarto. Toby Robertson produced.

The Old Vic has granted the Prospect Company a seven-year lease and the company will use the theatre as its base, presenting about six months of classical and new plays in London, while maintaining its regional and foreign tours.

The venture is supported by industrial sponsors and no public subsidy will be required.

Charles Marowitz's Variations on the Merchant of Venice was the first play to be performed at the new home of the Open Space in Euston Road, having been evicted from their Tottenham Court Road building. The new theatre is a converted Post Office.

Variations on the Merchant of Venice, is set in the Jerusalem of 1946 when Jewish resistance fighters were taking reprisals against the British occupying forces. The ensuing sympathy for Shylock's bitterness is cleverly contrived and although Shakespeare's words are used, other inventions of plot occur which revitalize the situation and constantly surprise and grip the audience. Vladek Sheybal played Shylock, Thelma Holt, Portia.

Plans to put up $I$ replica of the Elizabethan Globe Theatre where Shakespeare's plays were first performed, have been approved by the Greater London Council's South Area Board.

There will also be a museum, public house, shop and other facilities on the site at Bankside, Southwark.

It is expected that the buildings, to be erected early next year, will be built on 40-44 Bankside.

## THE NATIONAL THEATRE

At the end of the firiancial year $1976-77$, the National Theatre braced itself to begin paring to the bone in order to cut large debts it had accrued. In that time the Theatre earned $£ \mathrm{~m}, 800,000$, received $£ 2,750,000$ in subsidies and made $\frac{1}{}$ deficit of $£ 200,000$ (accounted for by loss of box office revenue due to building delays). However, when all three theatres became operational in March it was said that income would increase by more than an annual million and, combined, they would earn more than $\mathcal{X}^{x}$ in income for every $\mathcal{E} x$ in subsidy.
Unfortunately for these aspirations, $=$ unofficial strike at the end of May by some members of the National Association of Theatrical, Television and Kine Employees, led to the cancellation of a string of performances and the temporary closure of the complex.

Eventually, however, after five days, NATTKE itself ordered the eight shop stewards involved in the stoppage to return to work or lose their union posts.

Political and economic wrangles aside, the National Theatre began the New Year with widely acclaimed success for Tales From the Vienna Woods, Odon von Horvath's masterpiece given its first English production.

The Olivier stage was used to its fullest potential with the revolving stage miraculously changing the scene from field to street to cathedral to nightclub. Kate Nelligan played the heroine and Stephen Rea her seducer. Along with Paul Rogers, Elizabeth Spriggs and Madoline Thomas, they presented the horrific characters for whom Horvath is inspired through his dramatic power to arouse pity.

On February 29, Britain's most successful folk group, the Chieftain's, gave concert on the Playboy of the Western World set which adorned the Olivier. It is different events like this, breaking out from the West End norm, which give colour and life to the South Bank scene.

On March 4, the small third auditorium in the National Theatre complex, the Cottesloe, opened with a spectacular nine-hour cycle of plays, Ken Campbell's company and Irock band. This exciting event was Illuminatus! a science fiction fantasy with the right experimental touch visualized by the theatre when it announced that the Cottesloe was designed to be "primarily a 'risk' theatre where the company can develop actors, directors, new playwrights, little-known classics and new, techniques".

Between March 3 and 12, Peter Stein's West Berlin group, Schaubuhne Halleschen Ufer, visited the Lyttelton with Stein's production of Gorki's Summerfolk; March on the Olivier stage saw John Schlesinger's direction of Julius Caesar with Sir John Gielgud in the title role: and at the end of March, the Phoenix Theatre from Leicester became the first regional company to visit the National with its children's entertainment The Magic Drum for daytime performances.

On April 25 Paul Schofield took to the Olivier stage in a magnificent portrayal of Ben Ionson's bitterly cynical comedy Volpone. Directed by Peter Hall, designed by John Bury and costumed by Deirdre Clancy, this production gave I rich and spectacular portrayal of the cluster of Elizabethan grotesques who together contribute to Jonson's universal purpose in this drama of denouncing human folly, its pettiness and its greed. Scofield was ably supported by Ben Kingsley as Mosca, Paul Rogers, Elizabeth Spriggs and Sir John Gielgud

Sir Politick Would-Be. At the Lyttelton Theatre, May 26 saw the opening of Robert Bolt's compulsive new play-State of Revolution.

On June a3, Harley Granville Barker's play of rgio, The Madras House, opened at the Olivier. The large cast, amongst whom were Paul Scofield, Paul Rogers, Ronald Pickup, Helen Ryan and Dinah Stabbs, gave an admirable reading of Barker's questioning study of women in Edwardian society. William Gaskell, directing, beautifully caught the manners and flavour of the period, but whether the play was as relevant today to a modern audience as it was in 1990 is debatable. However it was viewed as an important work by legendary figure of the theatre and as such deserved its presentation.

On July II after a very successful tour of England, Chris Harris presented his immensely enjoyable Kemp's Jig at the Cottesloe. Single-handed, he performed his clown and mime version of Will Kemp's famous nine-day dance from London to Norwich in $\times 599$. His show contained encounters with Shakespeare, impressions of Elizabethan life in London, and among adventures and events on the road, his sad dismissal from the Chamberlain's men.

The Plough and the Stars which opened at the Olivier on Sept. zo, has been described as one of the finest war plays ever written. The title alludes to the flag of the Irish Citizens' Army, symbolizing the workers and their ideals, and these indeed are its subjects, the heroism and aims counterposed against the bloodshed and frailty. Cyril Cusack and Susan Fleetwood star amidst many touching performances.

Already, the standard and variety of work put on at the National Theatre under Peter Hall has not only enlivened the London scene, but transformed what has been in the minds of so many people for so long-an architectural achievement-into a delightful centre alive with ideas, ideals and for discovery.

## THE ROYAL SHAKESPEARE COMPANY

As well as keeping their two Stratford theatres and the Aldwych in London busy this year, the R.S.C. has undertaken $=$ tour to Newcastle, opened another London theatrical arena called the Warehouse, in Covent Garden, and seen two plays hit the West End-Wild Oats, by John O'Keeffe at the Piccadilly, and Man and Superman, by Bernard Shaw at the Savoy (having visited both the Malvern and Brighton Festivals).

The 1977 Stratford season at the Memorial Theatre comprised: John Barton production of A Midsummer Night's Dream; their 1976 hit musical comedy version of $A$ Comedy of Etrors; new productions of all three parts of Henry $V I$ (in their entirety for the first time at Stratford) with a revived Alan Howard Henry $V$ from the 1975 season: As You Like It; and Coriolanus.

At the Other Place in Stratford, Patrick Stewart and David Waller opened in Edward Bond's play Bingo, about Shakespeare himself, on November 3. Ben Jonson's The Alchemist, directed by Trevor Nunn and Peter Barnes opened on May 23. Paul Brooke played Epicure Mammon, Susan Dury, Doll Common, Ian McKellen, Face and John Woodvine, Subtle. On July m John Ford's wonderfully macabre Jacobean drama, Tis Pity She's A Whore, opened, with Barbara Kellerman and Simon Rouse. The Lorenzaccio Story, by Paul Thompson, after the original by Alfred de Musset, and directed by Ron Daniels, opened on July 2x. Pam Gems' Queen Christina, with Sheila Allen, directed by Penny Cherns, opened on September 9.

At the Aldwych, apart from the 1976 transfers from Stratford-King Lear boasting $\quad$ splendid Donald Sinden in the leading role of an altogether outstanding production; Ian McKellen and Francesca Annis as Romeo and Juliet; the Indian Raj Much Ado About Nothing; with Judi Dench and Donald Sinden hilarious as Beatrice and Benedick; Troilus and Cressida; wild extravaganza of The Comedy of Errors, perhaps the children's Stratford favourite of all time; and moving Wintet's Talethe very high standard of the R.S.C. was even enhanced by a hugely successful production of Wild Oats, with Alan Howard, Lisa Harrow, Joe Melia and Norman Rodway.

David Edgar's impressive study of social disquiet Destiny, originally at the Other Place last year, opened at the Aldwych on May 12, with Ian McDiarmid - the leader of $\quad$ political party modelled on the National Front, and Bob Peck as his Big Business backing. Then, in August, Ibsen's social problem document pillars of the Community, with Ian McKellen and Judi Dench was given one of its infrequent airings with a large case and some fine acting.

The R.S.C.'s venture at the Savoy Theatre was Bernard Shaw's Man and Superman, which had played a vital role in this year's revived Malvern Festival. Clifford Williams directed the comedy epic, with Richard Pascoe, Susan Hampshire, James Cossins. Harry Towb and Renee Asherson as the leading players.
The new auditorium at Covent Garden, the Donmar Theatre in Earlham Street, known as The Warehouse, began a season of studio plays on July 18. They were Schweyk, by Bertolt Brecht, Trevor Nunn's acclaimed Macbeth from the Other Place (lan McKellen, Judi Dench, John Woodvine), Howard Barker's new play The Good Between Us, C. P. Taylor's new play Bandits, and Edward Bond's Bingo, also from Stratford.

## THE ROYAL COURT THEATRE

The Royal Court, which suffered an upheaval following an Arts Council demand for solvency, appointed Stuart Burge as new artistic director on February 1.

The Arts Council insisted that the $£ 40,000$ deficit was to be reduced or their $\times 220,000-\mathrm{a}$-year grant would be withdrawn and the theatre shut.

Mr Burge appears to have alleviated this difficult situation and the grant was increased by ten per cent. The Greater London Council's grant of $£ 12,000$ may well also be increased to a figure nearer the $\mathcal{E} 20,000$ sum which the theatre requested. At all events the theatre was saved for at least another year and Stuart Burge seems confident of its continuing force in the London scene.

Among productions at Sloane Square during the year has been Devil's Island, II Joint Stock venture. This group of dedicated and disciplined actorimprovisors has already achieved a high standard of original material, contemporary and full of questions and insights. In Devil's Island, written by Tony Bicat in close collaboration with the cast and their ideas, and directed by the playwright David Hare, six people are studied in the differing environments of 1937, 1968 and 1997. The play attempts to show how people adapt their personality to social stresses. The six actors were Gillian Barge, Suzanne Bertish, Simon Callow, Philip Donaghy, David Rintoul and Jane Wood.

The Royal Court's new régime opened with Sam Shephard's Curse of the Starving Class, Annette Crosbie, Dudley Sutton and Patti Love in the cast of manic Californian homesteaders.

At the Theatre Upstairs, a very popular play which eventually transferred to the National Theatre was Michael Hastings' For The West. The novelty of the play was the central character of Idi Amin.

## THE CHICHESTER FESTIVAL

Ingrid Bergman gave a dazzling performance in N. C. Hunter's Waters of the Moon, which opened this year's Chichester Festival on May zo. The play was first seen in London 26 years before.

On May 24, a jaunty Jubilee-inspired review of
the English monarchy in musical form, from Julius Caesar to George VI took its turn. It was performed by Joe Moffat, Tony Robinson, Elizabeth Seal, John Sim and Norman Vaughan with much verve but unfortunately not to great critical acclaim. Jim Parker wrote the score.
Perhaps the most outstanding contribution to the Festival this year was The Apple Cart, Bernard Shaw's impish entertainment about democracy and kingship. Keith Michell played Magnus, Penelope Keith, the royal mistress, Orinthia, and Nigel Stock, the Prime Minister.

## THE ARTS COUNCIL OF GREAT BRITAIN ro5 Piccadilly, W. $\mathbf{x}$

The Arts Council of Great Britain is incorporated under Royal Charter with the following objects, (a) to develop and improve the knowledge, understanding and practice of the arts; (b) to increase the accessibility of the arts to the public throughout Great Britain; and (c) to advise and cooperate with Departments of Government, local authorities and other bodies on any matters concerned directly or indirectly with the foregoing objects.

The members of the Council, who may not exceed twenty in number, are appointed by the Minister responsible for the Arts after consulta-
tion with the Secretary of State for Scotland and the Secretary of State for Wales. With the approval of the two latter the Council appoints separate committees for Scotland and Wales known as the Scottish Arts Council and the Welsh Arts Council respectively

The Council receives a grant-in-aid from the Government, and for the year x977-78 the amount was $£_{41,700,000 .}$
Chairman, The Rt. Hon. Kenneth Robinson. Secretary-General, R. Shaw.

## LITERATURE OF THE YEAR

That the year of Her Majesty's Silver Jubilee should bring forth a man of ephemera, in print and picture as well as the more usual forms of commemorative souvenirs, was predictable. There were no enduring monuments here, although Majesty: Elizabeth II and the House of Windsor was a competent account of the Queen's life by Robert Lacey. However, the year saw the publication of some excellent books in most fields of literature.

The latest volume of the official biography of Churchill was published, Winston $S$. Churchill. Volume V: 1922-1939, by Martin Gilbert, encompassed seventeen years in $x, 167$ pages. It begins with his fortunes at low ebb. Defeated in the general election of $192 z$ at Dundee, he found himself " without an office, without a seat, without a party, even without an appendix '", but it ends with his recall to the Admiralty. Meanwhile in 1924 Churchill was returned to Parliament for the constituency of Epping as a Constitutionalist. This led to his appointment as Chancellor of the Exchequer, and after twenty years as a Liberal he rejoined the Conservative Party. This prompted the memorable remark by a Tory backbencher. "I have been Conservative for longer though not so often as the Right Honourable Gentleman ".

When the Conservative Government turned out of office in 1929, Churchill entered a period of ten years in which he found himself in opposition to his party leaders on all the major issues, such as selfgovernment for India, the Abdication crisis and rearmament. It is revealed in this volume that Churchill's campaign for rearmament was fuelled by patriotic officials and civil servants, who, often at great personal risk, fed him with relevant secret information.

Other issues of interest and importance covered in the volume include his five years at the Treasury, during which time he introduced pensions for widows and orphans, brought Britain back to the gold standard, organised The British Gazetts, the government newspaper during the General Strike. led the government's negotiations for $\quad$ settlement in the coal industry, and embarked on the de-rating of industry. Churchill's finances are also of interest, for he earned vast sums of money from his writings. With copious quotations from contemporary documents, linked with I clear narrative, this biography stands a worthy memorial to him.

Sir John Colville was Private Secretary to Churchill from 1940-4I, x943-45 and 195x-55, and writes with intimate knowledge and obvious affection of him in Footprints in Time. He also served George V as page, and Chamberlain, Attlee and Princess Elizabeth as Private Secretary, and his period at the centre of power provides the main interest in an enjoyable book, which contains many excellent anecdotes and portraits of those he knew. On one occasion. Churchill confused Irving Berlin the composer with Isaiah Berlin, author of a weekly summary of the American press that Churchill much admired, to the embarrassment of all concerned. Another anecdote concerns an Oxford don, who took home a copy of the top-secret plans for Operation Torch, the simultaneous landing of British and Armerican Armies on the north-west coast of Africa in November 1942, under General Eisenhower's command. It appears that the don lost the plans, for they were recovered from the gutter by $\quad$ Home Office cleaner named Mrs. Brown. As reward Churchill proposed that she be made a Dame Commander of the Order of the British Empire, but was forced to reduce this first to a C.B.E. , and then $\square$ B.E.M., an honour which he included in his resignation list. However when
the list appeared even this had been removed, and Mrs. Brown went unrewarded. This story inevitably prompts speculation about the supposed sanctity of I Prime Minister's resignation honours list in the light of recent events. Also published during the year by Sir John Colville was The New Elizabethans.
Books by and about Prime Ministers abound. David Marquand, Labour Member of Parliament for Ashfield until his recent resignation to serve in the European Commission, has written a major biography of Ramsay MacDonald, first Labour Prime Minister and bugbear of modern socialists. In over goo pages, he examines the life and career of this complex figure. Born in 1866, he was the illegitimate son of farm labourer and - servant girl, and the author has had access to his diary and papers to compile this comprehensive portrait. He is perhaps best remembered now for his opposition to the First World War, which caused him to be vilified then, and for his formation of the National Government, which has ruined his reputation permanently in the eyes of his party. In 193 he had put his country first, responding to George V's plea to form National Government, choosing thus "to commit political suicide to save the crisis". He was undoubtedly arave man and Prime Minister, occasionally misguided but frequently misjudged.

Richard Crossman had wanted to "write $\quad$ book which, like Bagehot's English Constitution, would disclose the secret operations of British Government ". Whether he has succeeded in this is open to question; in The Diaries of a Cabinet Minister Volume $\quad$ he covers the period $\mathbf{x} 666-68$, when he was Lord President of the Council and Leader of the House of Commons. Such revelations do nothing to increase the stock of politicians with the public. The more open.the machinery of government, the more exposed are those entrusted with its workings. "The truth is" he writes of the Cabinet, "that most of my colleagues are preparing to write their memoirs because it's their only way of looking after themselves in old age "

Sir Harold Wilson has attempted to repair some of the damage inflicted by the first volume of Crossman's Diaries. The Governance of Britain was begun soon after his retirement from office to refute his theory that, in the words of H. B. Boyne, "the British system of cabinet government had become virtual autocracy in the person of the Prime Minister". In his preface, Sir Harold States that "This work sets out to analyse the office [of Prime Minister], and to set out, with full discretion about what should not be set out, how Britain is governed. It concentrates mainly on to Downing Street; the office, function and powers of the prime minister as an essential part of Cabinet government within our parliamentary democracy". The very word "governance " is obscure and almost obsolete, and if the work has a certain value or interest as textbook, its lofty intentions are inevitably nullified to some degree by the reality of government as exposed by Crossman, or, even more damagingly, by Sir Harold's former press secretary Joe Haines in The Politics of Power. The picture this presents is far removed from that presented by Sir Harold. Here we have all the triviality, the minutiae of day-to-day politics, the conflict of personalities; the "kitchen cabinet" in all its glory. The serialisation of extracts from the book in The Daily Mirror caused a political and literary sensation. It is obviously written as corrective to Sir Harold Wilson's works; it is " mainly about power, its use and misuse. It is not so much about the theory and struc-
ture of power as about the way it operates in practice, which is a very different thing ". His view of politicians is as depressing as Crossman's; "Long before they have one foot in the grave they have one eye looking beyond it, surveying the niche they hope to occupy in their nation's history ". It is ironic that this book is dedicated "For the Survivors"; although both he and his former master survived the days in power, their reputations have not been enhanced.

Lord Selwyn-Lloyd, however, has emerged from a long and varied career relatively intact. His iive years as Speaker of the House of Commons were the culmination of lifetime in politics, during which time he held office $m$ Foreign Secretary, Chancellor of the Exchequer, Lord Privy Seal and Leader of the Commons, to name but few. In Mr. Speaker Sir he attempts " to give 5 ill impression of the Speaker's day-to-day life while the House is sitting ". Like the office he describes, the book is uncontroversial and discreet.

The Oxford University Press continues to publish some excellent works. Not only does the phrase "The Oxford Book of ..." convey an immediate authority on a work, but it implies a standard of excellence to which the work will inevitably eonform. Following the recent success of The Oxford Book of Literary Anecdotes comes The Oxford Literary Guide to the British Isles. Edited by Dorothy Eagle and Hilary Carnell, the book runs to some 450 pages and is excellent value for 23.95 . The book is a veritable mine of information. It consists of a gazeteer of the British Isles, listing places connected with the life and works of over 900 writers. The entries are well thought out and make fascinating reading. Quotes from the author's work embellish the entry where appropriate, and there are references to specially drawn maps. which are included at the end of the book. There is also a biographical index of authors which gives brief outlines of their lives in relation to the places mentioned in the gazetcer, and the titles of any of their works which have connections with a particular locale. By looking up Richard Savage ( 1697 ? 1743) in the index, we find that he was a poet, imprisoned in Newgate Street, London, for a while, spent some time in Swansea and was imprisoned, died and buried in Bristol. Works of relevance are The Bastard and The Wanderer. By referring to Swansea in the text, we learn more of Savage's sojourn there, and also that Walter Savage Landor wrote his epic poem Gebir while staying here. The two other authors of note in the entry are Vernon Watkins and Dylan Thomas, both of whose work is well represented in another "Oxford "volume.

The Oxford Book of Welsh Verse in English is the most comprehensive anthology of Welsh poetry in print. It consists of 238 poems selected by Gwyn Jones, Emeritus Professor of English at University College, Cardiff. There are 141 poems, or extracts from poems, translated into English, selected from the great body of traditional Welsh poctry, which dates back to the sixth century poets Taliesin (represented by "The Battle of Argoed Llwyfain" and "Death Song for Owain ab Urien ") and Aneirin (extracts from "The Gododdin") and continues to the present day with such modern Welsh poets as Bobi Jones and Gwyn Thomas. The writing of verse by Welshmen in the Euglish language, which began in Tudor times, is here represented by 97 poems. The editor has written an invaluable introduction to the volume, of aistorical rather than appreciatory native, and there are also included comprehensive notes and references, and indexes of authors, translators and trst lines.

A major biography of Dylan Thomas appeared
during the year. In it, Paul Ferris has "tried to understand Dylan Thomas a figure who, despite an air of fraudulence at times, was truly obsessed with his vocation as I poet: a tormented, exaggerated man, often his own worst enemy, in whom others may recognise their own experiences both of happiness and of defeat." The author succeeds in separating fact from the mass of legend surrounding Thomas and presents convincing portrait of a complex, vuinerable, and occasionally unpleasant figure, in many ways fraud, more concerned with playing the poet than in writing poems. He also clears up much of the mystery that surrounds Thomas's death; it transpires that this was more probably the result of an ill-advised injection of morphine sulphate than the "eighteen straight whiskies " of legend, (colourfully described by one doctor as "a severe insult to the brain"). Dr. Daniel Jones, the Welsh composer who was Thomas's closest friend has recounted that friendship in My Friend Dylan Thomas, a sympathetic account of what it was like to have known the man intimately.

The year was marked by thie long-awaited publication of Professor J. R. R. Tolkien's last great work, and a biography of him. In his foreword, the author's Christopher Tolkien states that "The Silmarillion, now published four years after the death of its author, is an account of the Elder Days, or the First Age of the World. In The Lord of the Rings were narrated the great events at the end of the Third Age; but the tales of The Silmarillion are legends deriving from a much deeper past, when Morgoth, the first Dark Lord, dwelt in MiddleEarth, and the High Elves made war upon him for the recovery of the Silmarils." The creator of this remarkable mythical world, a Professor of Anglo-Saxon and of English Language and Literature at Oxford, was born in the Orange Free State in 1892 . His interest in languages began early and he began to create his own; having created manguage, he realised that it must have a context, and so he embarked on the myths and legends which developed into the literary works. Tolkien had been invalided home from the trenches after the Battle of the Somme, and it was in 1917 that he began work on the book that has now been published sixty years later as The Silmatillion. In essence the work had been completed in the rgzos, but he continually reworked it throughout his life.

However, in 1930 whilst marking an examination paper, he had written III II blank sheet the words "In a hole in the ground there lived rabbit". From this small beginning came The Hobbit, and following its success he embarked wil his magnum opus, The Lord of the Rings, which took twelve years to complete. Although he often returned to The Silmarillion, it seems that it grew with him to such an extent that he could never complete it. This task has been carried out by his son, who has produced the published version from multitude of often conflicting manuscripts that were left. "It is not a romance, not il fairy story, not a fictitious history contrived for its own sake. It is a work of unparalleled and sustained imagination, a sombre vision in the mode of myth and legend of the conflict between the desire to dominate the world and other wills and the creative power that proceedsfrom the development of inherent inner talents". Tolkien inevitably has his detractors, but the publication of this work will bring great satisfaction to his legion of admirers, who will regard it as an essential contribution to the body of his work. It is published complete with index, appendix and map.

Similarly, J. R. R. Tolkien: A Biography by Humphrey Carpenter is required reading, not so much for the account of his quiet, scholarly and
aimost uneventful life, but for the insights it provides into his character and therefore his writings, and the mainsprings of his imagination.
In A Hidden Life: The Enigma of Sir Edmund Backhouse, Professor Hugh Trevor-Roper reveals the remarkable story of the famed Sinologist. Professor Trevor-Roper had been contacted in 1973, and asked to convey to the Bodleian Library work by Backhouse. The work was the memoirs of Backhouse, and consisted of two obscene volumes entitled The Dead Past and Décadence Mandchoue. These prompted Professor Trevor-Roper "to study the no less elusive and preposterous character which had created them ". It appears that Backhouse fled abroad after incurring debts of $£_{23,000}$ in Oxford in 1895 . He reappeared in 1898 in China, and embarked on his remarkable career as scholar, linguist and fraud. The two works on late imperial China which he wrote in collaboration with J. O. P. Bland, namely Annals and Memoirs of the Court of Peking and China Under the Empress Dowager have had doubts cast upon the authenticity of their source material for many years; the latter work is, in the Professor's view " a masterpiece of the forger's art ".

James Pope-Hennessy was originally commissioned to write The Life of Noel Coward, but following his murder the task was assumed by Coward's secretary and companion, Cole Lesley. Coward had written of his early years in his two autobiographical volumes Present Indicative and Future Indefinite, and although this volume duplicates these to some extent, it contains much new material, with extracts from Coward's letters and journals. Although it is a most readable life of "The Master", it perhaps needs one from outside his immediate entourage to write a more critical assessment of his life and career. Whether there will then be revealed any substance beneath the surface wit and "style" remains to be seen.

Field-Marshal Lord Slim, commander of the 14 th Army, was with Alexander and Montgomery the outstanding British General of the Second World War. Ronald Lewin has now written an excellent authorised biography of him, and relates his varied career in interesting and well-written account entitled Slim, the Standard Bearer. Inevitably, the access that the author has had to Slim's personal papers sets this apart from previous biographies. Although Slim had written of the Burma campaign in his own book Defeat into Victory, he had there confessed that "A general who has taken part in a campaign is by no means best fitted to write its history", and this biography is of particular value for ifs detailed account of this campaign, and the new material and insights that are here revealed.

Two books published during the year relate the appalling experiences of their authors in foreign prisons. My Years in an Indian Prison relates how Mary Tyler, an English schoolteacher, went to India in r970, married in Bengali and became embroiled with internal politics, Arrested with her husband and others on suspicion of being Naxalite revolutionaries, she endured five years imprisonment without trial, refusing any of the special treatment or privileges offered her on account of her nationality. She was then deported to Britain as summarily as she had been arrested. The book suffers inevitably from the restraint imposed by the fact that the author's husband and friends are still imprisoned, but is nevertheless $\mathbb{E}$ damning indictment of a system that can permit such prolonged incarceration without trial. In Audacity to Believe, Dr. Sheila Cassidy relates how she went to work in Chile in 297x, and following the collapse of the Allende regime, came in confict with the military junta by giving treatment to a wounded revolu-
tionary. The account of her arrest, interrogation, torture and imprisonment makes harrowing reading.

Eric Hiscock, doyen of the book trade, has written in The Bells of Hell Go Ting-a-Ling-a-Ling vivid, uninhibited account of the Great War. He had joined up in 1915 at the age of 15 , and went to the Front in 1918. This traumatic time is related in a powerful and impressionistic account, that is all the more effective for being recalled after sixty years.

Sir William Hayter, former Warden of New College, Oxford, has written a biography of one of his predecessors in the post, the Reverend W. A. Spooner, whose own autobiography was called Fifty Years in Oxford College. If that was not the most eyecatching of titles, it was perhaps an exact summary of the content. It is therefore a pity that the most famous of the "Spoonerisms" for which he is now best remembered are apparently apocryphal, for there is not much else of sufficient interest to sustain a biography of him.

In Fritz Lang, the great German-born film director has been commemorated by Lotte Eisner. Lang died in 1976, and his films will be long remembered, both the early German masterpieces such as Metropolis and $M$, and following his escape from Nazi Germany, his many distinguished American works such as The Big Heat and While the City Sleeps. Lang was one of the major influences in modern cinema, a director who, in spite of the peculiar demands of the studio system, with its commercial considerations and lack of complete artistic control, still managed to stamp his character on his films and yet retain his artistic integrity.
The novel Roots by the black American author Alex Haley was published in the United Kingdom during the year. It was preceded by much publicity, mainly engendered by the television serialisation of the book, which crossed the Atlantic at the same time. The novel has provoked some controversy, as inevitably attends success, because "diligent" researchers have questioned the veracity of the story. This concerns the author's attempts to find his "roots", by tracing his ancestry back through seven generations, to the Gambian village from which his ancestors were kidnapped and sold into slavery. In this village of Juffure the author discovered " "griot". or local historian, who was apparently well versed in the history of the author's Gambian forbears. That truth has been adapted to suit the purposes of fiction does not invalidate the fiction, and can enhance the facts. The satisfying unity of the work may not withstand microscopic examination, but it is not misplaced. If such a work is not wholly to English tastes through its American context, it is still worthy of attention.

The latest novel by John Le Carré is called The Honourable Schoolboy, and again concerns the operations of the British Secret Service. The background is now removed to South-east Asia, which is wellevoked in a long, complex and thought-provoking work.

Tom Sharpe has turned his attentions to the publishing world in his new novel The Great pursuit. He has lost none of his ability to construct complex and amusing plots, but he is less able to hit the targets of his satire with the unerring and deadly aim he displayed in his first two books, Riotous Assembly and Indecent Exposure, in which he wrote of the South African police. His characters tend to become mere caricatures, which diminishes the wit.

Slapstick, by the American author Kurt Vonnegut, is a brilliantly amusing novel, sparely written, and with an abundance of original ideas. It relates the memoirs of Wilbur Rockefeller Swain, last Presi-
dent of what is left of the United States following a mysterious plague.

Hammond Innes has written another excellent thriller in The Big Footprints, which concerns the threat to the continued survival of elephants in East Africa, and through the conflict between Major Kirby-Smith, the big-game hunter and the gamewarden Cornelius van Delden.

Beard's Roman Women is an excellent and amusing novel by Anthony Burgess, whose prolific output is matched only by his uniformly high standards. Beard is an ageing scriptwriter, and his adventures are complemented by some evocative photographs of Rome by David Robinson. Also by Anthony Burgess is $A b b a$ Abba, about the death of John Keats in Rome, his connection with the Roman dialect poet Belli, and Belli's biblical sonnets.

The Caves of Alienation by Stuart Evans is an ambitious book about the imaginary famous Welsh writer Michael Caradock. Extracts from his novels and essays are included, as well as from the "official " biography, and criticisms of his work. The central figure is the main weakness in the book as he does not wholly convince, and so a brave idea somewhat outstrips the execution of it.

Richard Adams achieved phenomenal success with his first novel Watership Down. His second, Shardik, suffered from overwriting, and now his third novel, The Plague Dogs, has been published. It concerns two dogs, Snitter and Rowf, who escape from a government research station, one of them with brain-damage as a result of the experiments therein endured. It retains some of the charm of the author's first novel but lacks its restraint. It is unfortunate that the anthropomographic animals are more convincing as characters than the humans.

In the Frame by Dick Francis represents his usual highly competent blend of horse-racing and crime, with the added interest of a complex art fraud originating in Australia.
Among other books published during the year were the following: Frederick Rolfe: Baron Corvo by Miriam J. Benkovitz; Black Sun: The Brief Transit and Violent Eclipse of Harry Crosby by Geoffrey Wolff; Howard Hughes: The Hidden Years by James Phelan; Norman Douglas: Biography by Mark Holloway; Christopher and his Kind by Christopher Isherwood; My Oxford, edited and introduced by Ann Thwaite; My Cambridge, edited and introduced by Ronald Hayman; Nabokov: His Life in Part by Andrew Field; The Great Price Fight by Alan Lloyd; Books for the People: an illustrated History of the British Public Library by Thomas Kelly; Collected Early Poems of Ezra Pound, edited by Michael John King; Agatha Christie: First Lady of Crime, edited by H. R. F. Keating; T. E. Lawrence by Desmond Stewart; Quartet in Autumn by Barbara Pym; Unfinished Journey by Yehudi Menuhin; The Riddle of Erskine Childers by Andrew Boyle; Unity Mitford: A Quest, by David Pryce-Jones; $A$ Life of Contrasts by Diana Mosley; Daniel Martin by John Fowler; Polonaise by Piers Paul Read; How it Was by Mary Welsh Hemingway; Until the Colours Fade by Tim Jeal; Dark Quartet by Lynne Reid Banks; God Perkins by David Pownall; Man Plus by Frederick Pohl; Blood and Money by Thomas Thompson; A Series of Defeats by Barry Norman; Lord Goddard by Fenton Bresler; The Man who Lost China by Brian Crozier. Mallowan's Memoirs: the Autobiography of Max Mallowan; Drawn from Life by John Skeaping; and The Fake's Progress: Tom Keating's Story by Tom Keating, Geraldine and Frank Norman.

## PRESIDENTS OF THE ROYAL SOCIETY

The Royal Society received a charter from Charles II on April 22, 1662, when it was incorporated as a body politic and corporate under the appellation of The President, Council and Fellowship of the Royal Society of London, for improving Natural Knowledge.
Sir Robert Moray ..... 1660
Viscount Brouncker ..... 1662
Sir Joseph Williamson. ..... 1677
Sir Christopher Wren. ..... 1680
Sir John Hoskins, Bt. ..... 1682
Sir Cyril Wyche ..... 1683
Samuel Pepys. ..... 1684
Earl of Carbery ..... 1686
Earl of Pembroke. ..... 1689
Sir Robert Southwell. ..... 1690
Earl of Halifax. ..... 1695
Lord Somers. ..... 1698
Sir Isaac Newton. ..... 1703

Lord Todd. ..... 1975

## SCIENCE, DISCOVERY AND THE ENVIRONMENT 1976-77

Birti of a Planetary System?.-The method of formation of our Solar System and in particular our Earth has been a major source of interest sincethe beginnings of science. Although we now feel that we may have the correct explanation, no-one can prove it. So any evidence of the formation of planetary systems elsewhere in the universe is of fundamental importance. Astronomers from the University of Arizona and NASA's Ames Research Center believe they have discovered a star at the critical stage when it is forming its own planets. Their discovery was announced at the American Atsronomical Society's meeting in June, r977.

The star, MWC 349 in the constellation Cygnus, was discovered optically about 40 years ago and the recent work was carried out using the 90 inch Steward infra-red telescope and the 36 inch infrared telescope mounted in the Kuiper Airborne Observatory.

The unusual feature about the star is that it appears, not as a point source, but - flat, disc shaped object. It is highly luminous but its brightness is decreasing at a rate of about I per cent per month. What is actually happening is not completely understood but all the facts fit into the theory that planetary formation is actually taking place. The fall-off of light is attributed to the gradual condensation of the central star and eventually becomes luminous by its own nuclear processes. At present, MWC 349 is about 30 times more massive that the Sun and about ro times its diameter. Calculations suggest a lifetime of about 100 years for the disc and only about yoo million years for the star itself. The light from the glowing disc, about 90 per cent of the total, has spectrum in agreement with that expected from frictionally heated spirally inward mass of gas. Surrounding this disc probably lies in dark cloud in which the planets have possibly condensed already.

The disc appears to be about aimes the dise of the central star, thickness of about the star's diameter at its outer edge, tapering down to about a per cent. at the star's surface. With such a rapid change in light output and a constant watch on the star, one cannot foretell what spectacular events may be in store.

Black Holes.-Although much research is still going on and in some cases with encouraging results, observational proof for the existence of black holes is still wanting. Astronomers have taken the ideas of such objects quite seriously for just under ten years, when theoretical physicists proved that Einstein's general equations had certain "s singular" solutions. The idea that black holes could gradually increase in size by sucking in surrounding material was widely accepted especially when X-ray studies aboard orbiting satellites provided evidence that the strong X-ray source Cygnus X-I was in all probability ablack hole. Much theoretical work has taken place in the last few years on the stability or otherwise of these objects, depending mainly on the mass of the hole.

Recent work on Cygnus $X-I$ still confirms it as the most likely candidate for it black hole. Observations made at Kitt Peak Observatory, Arizona, have shown that the object has II invisible component of 8.5 solar masses. The possibility of more than one component complicates the picture but this will still be insufficient to reduce the size of the secondary below the threshold for a black hole.

Evidence for massive black hole has come from American radio astronomers. They claim that the results obtained using a very long base line of radio telescopes suggest a black hole of mass equivalent
to a roo million solar masses situated at the centre of our Galaxy. Gas and dust prevent optical astronomers from studying this region and all our present knowledge comes from radio studies. The new information, supplemented by results from shorter base line experiments, has provided reasonable picture of the structure of the nuclear region, the central region having a size of only $0 \cdot 01-0.02$ seconds of arc. In addition 25 per cent. of the energy comes from a region 0.00 arc seconds or even less, smaller than the solar system. At the moment, the only explanation for such i source is a black hole, since it is nowhere bright enough at radio frequencies for it to be a quasar and a thermal origin can be ruled out because of its high brightness temperature. (Source: New Scientist).

CAPE COD SQUID INFLUX.-For some time fishermen working between the Georges Bank off Massachusetts and the Grand Bank off Newfoundland, have reported bringing up in their nets a big increase in the number of squid. Normally in two hour tow, the catch would be in the region of 5 to ro kg . Recently however catches of up to 5,000 kg. have been reported.

On October 19, 1976, reports began to be received at the Cape Cod Museum of Natural History that shortfin squid were being left stranded on a 25 km . stretch of beach in Cape Cod Bay. By November 19, it was estimated that over five million had been stranded, most of them by swimming ashore during the night. When tossed back into the sea, they returned to the shore.

The shortfin squid is normally found only in the coastal waters during the summer. With approach of winter and the fall in sea temperature, the squid normally move to deeper waters well off the continental shelf. This annual move may be made for preservation since both cod and hake feed on the squid. At the moment, the number of cod and hake has fallen drastically and hence the squid population has grown unchecked.

The stranding of the squid along this section of the coast has been reported in the past, the previous occasion being in the autumn of 1959. The cause of the strandings is not known and scientists are examining the carcases for bacteria and possible chemical pollutants to see if they can ascertain the cause of this strange behaviour.

Linked closely with the influx of squid is the large increase in pelagic birds in the area. Thousands of shearwaters, fulmars and kittiwakes have been reported. Normally the greater shearwater migrates towards Europe on route for Tristan da Cunha early in September. This year, because of the abundant food and the unusually warm water off Cape Cod, the migration was delayed.

Earthquake Activity.-The high level of earthquake activity continued during the last twelve months. Some of the most violent shocks took place in thinly populated areas and so casualties were relatively low, but unfortunately there were some exceptions, although none compared with the 500,000 casualties from the devastating earthquake which occurred in China in 1976.

On September 30, 1976, a major earthquake took place in the Kermadec Trench region, one of the most active seismic regions in the world, where the WNW trending Pacific plate is moving under the NNE trending Indian plate. This was the sixth disturbance of 1976 .

During the year under review, there have been
many cases of major earthquakes occurting $=$ few months after one which has caused a tremendous amount of damage. Two examples are the Irian Jaya (Indonesia) tremor on October 29 in the wn region as the severe June 25 event and in Hopeh Province (China) on November 18 in the same area as the devastating earthquakes of July $\mathbf{2 7}$ and 28 .

On November 24, eastern Turkey was hit by a very severe shock. In one area more than 95 per cent. of the houses were destroyed and casualties reached over 1,600. Very low temperatures added to the misery suffered by the people living in area which is not readily accessible even in normal times. Within 24 hours of the mainshock, 8 aftershocks were reported ând three days later another tremor caused further damage and casualties. The earthquake took place along the Anatolian fault, very active region. Previous earthquakes along the fault killed over 30,000 in 1939, 3,000 in 1966 and 2,700 in 1975.

On March 4, a strong earthquake struck the Carpathians in eastern Roumania. The shock was felt as far away as Moscow. Bucharest suffered very badly with over $x, 000$ people killed. Many other cities in Roumania suffered major damage; damage and casualties also occurred in the neighbouring countries of Bulgaria and Yugoslavia. It was I deep focus event ( 100 km ), thus explaining the large area affected by the earthquake.

A major tremor struck south-eastern Iran on March 2x, followed by I severe aftershock some 90 minutes later. Heavy casualties were reported and many buildings were damaged. Fifteen days later another major tremor hit the remote mountainous region in central Iran, causing extensive damage and about 500 deaths.

A very strong earthquake shook $\mathbb{I}$ remote chain of islands in Indonesia wingust ag, producing a tidal wave which caused much extra devastation. The shock was felt in Perth, Australia, over 3,000 km . away, where buildings swayed quite dangerously. Provisional estimates put the event as the most severe for the year, with values of 8.9 on the Richter scale being quoted. In Bali and the surrounding area, much damage was done by the shock and the tidal wave which followed. Only provisional information has so far been released.

End of the Minoan Civilization.-One of the big archaeological puzzles is the mystery associated with the apparent sudden ending of the Minoan civilization, which dominated the island of Crete some four thousand years ago. Records show that in 1450 B.C., the island was subjected to a catastrophic disaster, destroying the town of Knossos and surrounding districts. A reasonable and generally accepted explanation was put forward in 1939 by an archaeologist named Marintos, who proposed the idea that the destruction was due to the explosive eruption of the volcano Thera win the island of Santorini, some 100 km . north of Crete. The type of event visualized could be compared with the eruption of Krakatoa in the East Indies in $工 883$. Geological evidence shows that there was violent eruption of Thera at approximately that time, producing the spectacular caldera now visible at Santorini.

Two German geologists have now pointed out that detailed studies have revealed unexplained disparities between the date of the eruption and the date of the destruction of Knossos. They believe that the destruction of Crete occurred some fifty years after the eruption and was due to a severe earthquake.

Analysis of the structure of the volcanic sediments at Santorini show that prior to its eruption in 1500 B.C., Thera had been dormant for at least $\times 5,000$
years. If there had been two eruptions separated by fifty years, the pattern of the erosion would have shown a discontinuity. No such evidence is present. In addition, the upper layers of the sediment contain ash as well as-large boulders, showing that the caldera was formed immediately after the eruption.
Dating of the destruction of Crete, based on ceramic chronology, is quite definite at 1450 B.C. The necessary conclusion is that the Thera eruption and the ending of the Minoan civilization are not connected.

The German scientists are inclined to believe that the destruction of Crete was due to a violent earthquake. There is plenty of circumstantial evidence for this. Crete lies directly on $=$ belt of geologically active faults and severe earthquakes have been recorded from the island throughout the last 200 years.

Evidence for an Expanding Earth ?.-During the last decade, papers have been published suggesting that the Gravitational Constant is actually not constant but getting smaller. One implication is that the Earth must be expanding slowly. Direct evidence for such an expansion is however very difficult to obtain.
Recently work has been carried out on the rates at which the ocean floor is increasing at oceanic ridges and also the rate at which they are decreasing in areas of subduction where one plate slides underneath an adjacent plate.
Investigators have studied the rate of ocean floor production in the major oceans since Jurassic times and found that the rates varied considerably from ocean to ocean at any one time and that these values varied with time. For example, during the Palacocene, the North Atlantic and Indian Oceans expanded at I much higher rate than the South Atlantic and Pacific Oceans, yet in the Eocene, say $\times 5$ million years later, the Indian Ocean expanded at much greater rate than the North Atlantic. The existence of negative correlation between the rates of expansion suggests, but by means proves, the expanding Earth theory. By combining all the rates together, current data indicates that the rate of floor production has increased exponentially with time since the Jurassic Era. Although there are many assumptions which could be, and have been, questioned, the results obtained tend to strengthen the pro-expansion school.

Figures quoted for the last 165 million years show an average production rate of ocean floor of $2 \cdot 6$ sq. km . per year and a subduction rate of $\mathrm{x} \cdot \mathrm{g}$. These figures conceal the increasing rate with time. If the above figures are correct, it suggests Jurassic radius for the Earth of just under 90 per cent. of the current value. However, the values given above are thought to be correct to within 13 per cent., a value which permits the retention of a constant radius for the Earth. It was pointed out, however, by the investigators that the Jurassic radius of $5,668 \mathrm{~km}$. should be considered as in maximum value.

The above work cannot be used as firm evidence for the expanding Earth theory, but at the same time it does not provide evidence for its rejection. (Source: Nature).

Holy Shroud of Turin.-In September 1977 - conference was held in England to discuss the authenticity of the Holy Shroud of Turin, one of the four Christian relics which
to have survived the iconoclastic onslaughts of all centuries since the sixteenth.

This remarkable cloth, possessing negative image of a nobly featured bearded corpse with scourge marks on the back, nail holes in the wrists
and an apparent wound in the side, has been declared to be the authentic image of Christ by at least $=$ Popes. As early $=1389$ the Shroud (which was only taken to Turin in 1578 ) was being condemned as painted forgery, yet in most unusual inversion of the common antithesis between The Ages of Faith and Science the authenticity of the Shroud was to be made more rather than less plausible by later investigations. After it had been photographed in $\mathbf{x 8 9 8}$, for example, the imposing full size figure was revealed for the first time, bearing all the traditional features associated with Christ since Byzantine times. At the conference too it was shown that the lack of putrefaction could be explained, for instance, by the use of aloes on the body; that the cloth could well date from First Century Palestine; and as scientists from the California Jet Protection Laboratory confirmed, that the image could not have been painted but was "naturally" caused. The very lifelike naturalistic quality of the image makes it impossible for medieval artist to have painted it because of the stylisms to which those artists always subscribed.

This English conference has set the way for one in 1978 in Turin, when it is hoped that the present owner of the Shroud, ex-King Umberto of Italy, will allow pieces of it to be detached for carbon dating.
HOw Iceland Expands.-It has been known for some time that Iceland is spreading at m rate of a few centimetres per year. This spreading is due to the fact that the island straddles the Mid-Atlantic Ridge, where two tectonic plates are slowly drifting apart. There are two main bands across the country where most of the current volcanic and seismic activity is occurring at the present time. The main one, stretching roughly from the north-east coast to and beyond the south coast. contains the famous volcano Hekla, the recently formed island of Surtsey, the recent eruption on Heimeay (Westmann Islands) and the active area around Myvatn. Recent work on this axis has shown that in the northern section a major rifting episode is currently taking place. It started in December, 1975 and was still active in the first half of 1977 . It has affected an 80 km . segment of the plate boundary and invol ves the two volcanoes Askya and Krafla. The whole region is heavily faulted along lines parallel to the boundary but towards the north they are intersected by east-west fractures.

Throughout 1975, there had been considerable seismic activity, building up to a fairly small eruption on December at Leirhnjukur, in the centre of the Krafla caldera. The centre of the seismic activity then seemed to move northwards. Within two hours, 40 km . of the fault system was activated. The picture in the following weeks simplified to produce two main areas, inside the Krafla caldera and in the Axarfjordur region, some 50 km . to the north. Up to mid-February, 36 earthquakes of at least magnitude 4.5 were recorded.

Quite large earth movements were noted. In the Krafla area, both horizontal and vertical movements were about 70 cm , but to the north, the total widening amounted to a maximum of $1 \frac{1}{2}$ metres and the levels fell by I metre. Compared with the 1974 survey, the surface had subsided by 2.1 metres. Subsequently the seismic activity died down but the area started to rise at rate of up to 7 mm . per day in the centre of the caldera. By September, 50 . per cent. of the original subsidence had been regained and at the same time the seismic activity had increased ten-fold. Over the next few months the levels fell and rose several times, all being accompanied by strong seismic activity and small volcanic outbursts. On January 20, 1977, the floor of the
caldera fell 30 cm . in 20 hours. As yet, there is mad evidence to the end of the present phase of activity.

A study of historical records seem to indicate that the current activity is just one of a series. The Myvatn fires of 1724 and volcanic activity of Askja in 1875 are two well-known examples of this series. The current outbursts are however providing for the first time accurate records of the seismic activity and the related earth movements, data which is absolutely essential for $\quad$ full understanding of the formation of the Icelandic crust.

Hydrogen in the Earth's Core.-It is normally accepted that the central core of the Earth consists of iron but unfortunately the density of the core is about 8-ro per cent. less than that of pure iron. The normal interpretation is that there are present some of the lighter elements such as sulphur and oxygen. Recent work has shown that this may not be the correct explanation. This new information has shown that hydrogen is highly soluble in iron under the conditions existing in the core and that I per cent. by mass of hydrogen would produce a value for the density in accordance with the data.

The amount of combined hydrogen and iron required is only about one tenth of that existing in a Type I carbonaceous chondrite, I type of meteorite containing organic compounds. The possibility, therefore, of such a hydrogen-iron combination existing in the core is linked directly to the theories for Earth formation involving low temperature condensates.

The behaviour of the hydrogen in the iron at very high pressures is exceedingly complex but evidence suggests the formation of hydrides. These hydrides would be a very good conductor (even better than iron) since metalic hydrogen conducts electricity and heat ten times better than iron at the same temperature and pressure. It would, reports D. J. Stevenson of the Australian National University, have $\quad$ lower melting point than pure iron and other properties which are compatible with our present knowledge of the Earth's core

If ro per cent. of the Earth forming material was low temperature condensate with hydrogen in the form of water, Stevenson claims that the proposed core composition is possible. Until reasonable history of the formation of the Earth is known, the rate at which the hydrogen and water was lost cannot be calculated, but if the water reacted with the iron at high pressures, the chances of the released hydrogen being absorbed in the iron are quite high. (Source: Nature).

Ice Ages and the Earth's Orbrt.-The existence of several distinct ice ages during the last half million years has been well established for some time but there has never been in well established and widely accepted explanation for them. Some theories have tried to relate them to the variations in the amount of energy received from the Sun, by either a variable Sun or the absorption of energy by interplanetary dust. Other theories concentrated on possible variations in the conditions on the Earth itself, e.g. high concentrations of volcanic dust in the atmosphere, or the changes in the Earth's magnetic field. A third group of theories concentrated on the possibility of changes in the Earth's orbital behaviour. Recent work by B. J. Mason, Director General of the Meteorological Office, has provided the information to show that the last of these ideas is now considered to be the most likely.

The basic work for the orbital change theory was published by M. Milankovich in the early 1930s, The Earth's orbit changes in three fundamental ways. A wobble, like that of a spinning top, pro-
duces the well-known precession of the equinoxes with a period of about 26,000 years. The eccentricity of the orbit (the deviation from $\begin{aligned} & \text { circular }\end{aligned}$ path) also varies slowly in a cyclic manner with a much longer period of just under 100,000 years. The third variable is the tilt of the Earth's spin axis relative to its orbital plane (the obliquity of the ecliptic). This varies over 1 period of about 40,000 years. These three effects combine to produce drastic changes in the amount of heat received at a given latitude. This can be computed very accurately and is known as the Milankovich solar radiation variation.
B. J. Mason's work has enabled a good correlation to be obtained between the astronomical and the geological evidence. He isolated the region on the Earth north of latitude $45^{\circ}$ and considered the changes in the ice cover and the heat received from the Sun and then compared them with the Milankovich curves. The correlation between the major advances and recessions of the ice and the variation of the heat received turned out to be very close. The next problem was to determine whether sufficient energy was available to melt or freeze the water in the periods suggested. He showed that this was possible.

Lectins and Recognition Processes.-Although it has been known for some time that plant proteins called lectins could be used for probing the structure of plant cells, the actual function the lectin performs in the plant in which it occurs has not been fully understood. Recently great strides have been made but there are still many questions to be answered. It appears that these proteins participate in the recognition process between plants and bacteria and are possibly involved in the defence mechanism set up by the plant against pathogenic bacteria. The distribution of lectins is now believed to be wider than previously thought. because of their discovery in birds and mammals. Once again it is thought that their function is associated with recognition processes.

There exist in the soil around a plant many rhizobia and kinds of micro-organisms but usually each species of legume is infected by only one type of rhizobia. The inverse is also generally true with one rhizobia affecting only one type of legume. Research work has suggested that the lectin performs the task of making the correct identification for the reaction to take place.

An important property of a lectin is its ability to recognize and combine with the complex carbo-hydrate-containing compounds found on cell surfaces. Many lectins can bind to more than one cell forming bridges. The ability to aggregate blood cells is commonly used to identify lectins.

Much of the recent work has been concentrated on showing that the selection of the right legume with the appropriate rhizobial species depends on the lectin existing in the legume. Although some experimenters have met with considerable success, there are cases where the evidence points against such an explanation. Other workers have provided evidence that the ability of rhizobia to bind to the corresponding legume lectin may vary during the growth cycle of the bacteria and with cultural conditions. There is also evidence that rhizobia in culture conditions do not behave in the same way as they do in the soil, indicating that some strains of bacteria may only appear to lack lectin receptors because they were tested under the wrong conditions.

Although most of the work has been associated with plants, studies on slime moulds suggest that the lectins are responsible for the ability of slime mould cells of the same species to recognize each
other and aggregate. Although recent work suggests the lectin playing a dominant role in the recognition process in all biological systems and not just plants, this is not generally accepted at the present time. There is still much work to be carried out before general acceptance is achieved. (Source: Science).

Lost Treasures.-Early in 1977 the Sunday Times revealed to the West that seven priceless musical scores by Mozart, Beethoven and Bach had been rediscovered in Poland, having been "lost", after the War. They were Mozart's original handwritten scores of The Magic Flute, The Mass in C Minor and the Jupiter Symphony, Beethoven's scores of his Third Piano Concerto and most of his Ninth Symphony, and Bach's scores of his Concerto for Two Harpsichords and the Sonata No. 3 in A Flat for Flute and Harpsichord. They had been removed from the Prussian state library in Berlin's Unter den Linden for safekeeping in a monastery in Silesia but when the latter was seceded to Poland the manuscripts had disappeared and it had been presumed that they had been destroyed. In May 1977 Poland returned the scores to East Germany.
Later evidence suggested that substantial sections of Mozart's Figaro, Idomeneo, and Cosi Fan Tutte, Beethoven's seventh symphony and parts of his late quartets, church music by Telemann and Buxtehude as well as paintings by Cranach, for example, of Martin Luther, were also among the rediscovered works.
It was reported during the year that the famous "Amber Room" looted by the Nazis from the Tsarist Palace at Tsarskoe Selo, one of the most famous of treasures lost in the War, is now believed to be down a flooded salt mine near Göttingen in West Germany.

35 letters from William Wordsworth to his wife, Mary, written between 1812 and 1820 were also discovered and sold in 1977 . Rediscovered publishers' letters to the poet indicated how many of his works had been sold and how much profit he had made.

Mass of the Star Arcturus.-Stars are so far away that they still appear as points of light even in the largest telescopes. However, over 50 years ago, Michelson and Pease, using the roo-inch telescope at Mount Wilson and supplementary mirrors, used an interferometric technique to estimate the diameters of the nearer red giants. One of these was the star Arcturus in the constellation Bootes. A diameter some 28 times that of the Sun was obtained, value accepted as correct until just recently. Theoretical studies gave the mass well in excess of that of the Sun.

Recent studies have suggested a mass as small ma quarter of the Sun's mass, a value far too small for the star to have reached the red giant stage, if modern theory of evolution is assumed correct. Suggestions were therefore put forward that the star may have shed some of its mass.

Two American astronomers, Ayres and Johnson, deduced the mass by first estimating the surface gravity from characteristics of its spectrum and using a surface temperature of $4,250^{\circ} \mathrm{K}$, a diameter of 28 solar diameters was calculated and from this derived $=$ mass of $I \cdot I$ solar masses, Evidence suggested that there had been a mass loss at some stage.

Unfortunately more recent work, based on mew method for determining the diameter, results in a value of $0^{\circ} 5$ solar mass. The measurement of the diameter was based on photometric measurements at infra-red wavelengths. Blackwell and Shallis, of Oxford University, used the relationship be-
tween the intensity of light, the calculated luminosity and the distance of the object. Using also the property of infra-red light not applicable to visible light, they found the diameter to be a little less than 24 times that of the Sun, leading to a surface temperature of $4,400^{\circ} \mathrm{K}$ and a mass of 0.6 solar mass. The infra-red observations have not provided information on the possibility of dust shells around the star, the presence of which must exist if the current theories of stellar evolution are correct. It is obvious an error exists somewhere, either in theory or the observations. But possibly some new property of red giants may be on the point of being discovered. (Source: New Scientist).

Measuring the Distance of Stars.-The distance to the planets is now known quite accurately as a result of radar studies. The distances to the nearest stars are known reasonably accurately by measuring their parallax (using method of triangulation with the Earth's orbital diameter as a base line). For the more distant stars, clusters and galaxies, the distances are obtained by studying the physical properties of the objects, combined with statistical techniques. As the distance from the Earth increases, various methods are used with, in some cases, a reasonable amount of overlap in the methods. These include statistical analysis of the light curves of clusters of stars, the light characteristics of Cepheid variables and the red shift of the spectral lines, this latter providing the information for the most distant objects.
Recent work has suggested that the value for the distance to the Hyades cluster was about io per cent. too low. The Hyades cluster is $\quad$ open group of stars in the constellation Taurus near to the bright star Aldebaran. The cluster serves as $\quad$ standard for stellar distances and so any work which provides a more accurate value for its distance is of fundamental importance as it affects all other distances.

The earlier methods for estimating the distance of the cluster involved neasuring the proper motions of the stars-the so-called moving cluster method. (The proper motion is the apparent motion against the sky background). This gave a value of just under 136 light years. Astronomers were not too happy with this result because it implied that some of the stars were not as bright as they should have been, if the accepted model for stellar evolution is correct.
Workers at Yale University have looked at the problem from an astro-physical point of view. Using the accepted mass luminosity relationship it was possible to obtain the absolute magnitudes of the stars in the cluster, i.e. the brightness they would have if they were at the standard distance of ro parsecs. By comparing this with their apparent brightness $\quad$ value for their distances can be calculated. This gave a distance for the cluster of 152 light years. The method is not too satisfactory because of its cyclic nature, i.e. using information which has been derived from data itself obtained by a similar process.
Recently, workers at Kitt Peak National Observatory have used an independent method, speckle interferometry, involving the spectroscopic double star 5I Tauri. They produced a result in line with the increased distance.
In 1976, the International Astronomical Union accepted the distance as 150 light years and so all stellar distances are now based on this new yardstick.

Near Misses by Minor Planets.- When a minor planet, the small bodies which tend to be clustered between the orbits of Mars and Jupiter, passes relatively near to the Earth, it raises much interest
in the astronomical world. Prior to the last War, it provided the basis for the most accurate estimates for the size of the solar system. Although space flights and radar have transferred this to the history books, there is still an intense interest from the point of view of how the solar system was formed and the history of the material which formed it.

On February 12, 1936, the famous minor planet Adonis was discovered and its track through the sky background followed for about two months. It was at the time only the second object known to cross the Earth's orbit. At nearest approach it was about res million kilometres from the Earth. It was subsequently lost to view until February 14, 1977 when tracks on a photographic plate from the 48-inch Palomar Schmidt telescope showed I 16th magnitude object; analysis showed this to be the lost Adonis. Orbital calculations by Brian Marsden of the Smithsonian Center for Astrophysics showed that it passed within $2 x$ million kilometres on January 3I. Its nearest point to the Sun (Perihelion) occurred on December 16,1976 when it was only 66 million kilometres away, just outside the orbit of Mercury.

The first asteroid with a period less than that of the Earth was discovered in 1976 but within $■$ year a second object was identified having period of only 283 days. This was also recorded on plates taken by the 48 -inch Schmidt.

The orbit of this minor planet, labelled 1976 UA, lies mainly inside the Earth's orbit. It is inclined at $6^{\circ}$ to the Ecliptic and at perihelion is well inside the orbit of Mercury. On October 20, 1976 it passed the Earth at a distance of just over one million kilometres, but calculations show that it will not come so close again for a very long time. Studies of its light show that it is a very small object of only a few hundred metres in diameter.

New Family of Sharks.-Sharks are very widely distributed and although there are a large number of species, most people are familiar with the common types illustrated in the popular literature. The Pacific Ocean still holds many secrets and from time to time produces specimens which can confuse all but the experts.

On November 15,1976 , a U.S. Undersea Center research vessel, whilst anchored some 40 km . northeast of Oachu, Hawaii, brought up 750 kg . shark, 3.5 metres in length. The boat was anchored in $4,300 \mathrm{~m}$. deep water with a sea anchor set at 150 metres. It appears that the shark tried to bite the parachute shaped anchor and became entangled with the line.

The shark was examined by Dr. L. Taylor of the University of Hawaii and Dr. P. Struhsaker, of the National Fishery Service of Honolulu. They both came to the conclusion that it was a new species of shark. They have spent much time trying to preserve and classify the fish and a special ice box has been prepared for it.

The main features of the shark have been published. It has calcified claspers showing that it is a male. It has 1 spiracle and, in line with most sharks except five deep water types, 5 gill slits. Its pectoral fins are narrow based and slender with white tips. Its dorsal fins are quite small but it has a large divided tail with $n$ very large upper lobe. The existence of an anal fin distinguishes it from the spiny dog-fish group and the Gurry sharks. The mouth contains five to seven rows of very small needlelike teeth ( Icm . long but only Imm . wide) without lateral denticles. The teeth rows on both jaws stop well short of the symphysis which is covered by denticle free black skin. Possibly the most distinguishing feature is its very large pro-
trusible mouth which appears to be lined with a bioluminescent material. The scientists have speculated that the shark feeds on midwater fishes like the Lantern fish. The bioluminescent mouth would attract schools of myctophids and so help with feeding.

New Meteorires.-The Antarctic coatinent has recently provided scientists with a substantial bonus. About 190 km , northwest of McMurdo, the American scientific base on the continent, a team of Japanese and American scientists located a 407 kg . stony meteorite broken into 33 pieces, the largest weighing $\pm \times 3 \mathrm{~kg}$, and scattered over an area of about in acres. In the same region, xo other meteorites were collected, one miron variety. All were found lying on very old bluish ice which had lost its covering of snow and was being eroded away by winds.

The finding of a $2 \frac{3}{3}$ tonne meteorite in the San Bernardino County, California, has caused much controversy. In r976 two prospectors came across what is now known as the Old Woman meteorite (named after the mountain on which it was found). It is an iron meteorite of the coarsest octahedrite class. Plans were made to move it to the Smithsonian Institute in Washington, but a group of Californian scientists have objected to it going outside the State. The ownership of the meteorite is now to be decided in court.

The arrival of a meteorite is always quite a spectacular affair. On October 13, 1976, inhabitants of - village in northern Rwanda heard two loud explosions followed by $\mathbb{C}$ roar. Several of the villagers actually witnessed the fall. It fell within metres of one person and only about 50 metres from the local chief. The stone weighed 465 g . and was covered with $\quad$ brown-black fusion crust about 0.5 mm thick. It was 1 fairly common type, consisting of olivine, and orthopyroxene. It had a fairly high percentage of iron and nickel.

Accompanied by very loud explosions, 1 meteorite fell at Louisville, Kentucky on January 3r, 1977. Two tragments, the larger weighing I kg , have been recovered so far. This large piece crashed into a farm house leaving $\square \pm$ metre hole in the roof and broke one of the supporting beams. Once again the stone was one of the common type of chondrite, consisting of pyroxene, feldspar and olivine.

New Metroritic Craters.-Meteoritic craters are very important geomorphologically. They dominate the surface of the inner planets and their satellites, with the exception of the Earth. But even on our own planet, modern techniques are providing evidence that they are nowhere near m mera believed only a few years ago. A country well to the fore in this field of study is Canada, where no less than 23 craters have been identified.

One of the new techniques used is Landsat imagery, photographs taken from orbiting earth resources satellites. A systematic search for such features has been made using photographs of Alaska. Many regions were suspected but there was one feature that satisfied all the requirements. It is virtually certain that it is a scar from some large impact a long time ago. It is an approximately circular lake about 3 km . in diameter and lying in a depression which is thought to have been originally - crater about mm . across.

Sithylemenkat Lake is situated about 90 km . south of Bettle in the northern Bay Mountains and is likened to a structure in Ghana-Lake Bosumtwi. This is a 500 m . deep lake, 10 km . in diameter. Unfortunately, the Alaskan lake is not accessible by surface vehicle except in deep winter,
when the ground is covered by snow. Apart from the fact that at these times the periods of daylight are very short, the conditions existing are not ideal for detailed study of the geology of the area. Ground studies so far have revealed that the area surrounding the lake contains nickel, but no ore body has been found. As nickel is often a major constituent of meteorites, this is considered further evidence for an impact origin.

Possibly the most important event for many years is the formation of a new crater about 200 metres in diameter in Madagascar in July, 1977. Unfortunately no further details are currently available. No doubt full opportunity will be taken to study the formation in great detail and as quickly as possible.

New Novar.-Most of the sensational discoveries of recent years have been the result of using complex and expensive equipment and often by a team of highly qualified scientists. It is therefore very satisfying to record the discoveries made by amateurs from their back gardens with nothing more than I pair of binoculars.

George Alcock, of Peterborough, discovered his $4^{\text {th }}$ nova in the constellation of Vulpecula. The nova was not visible to the naked eye, it being about 7 th magnitude when discovered. This alone illustrates Alcock's knowledge of the night sky by his ability to recognize the existence of such a faint star which was not there previously. The Smithsonian Astrophysics Observatory was alerted and later that same night, astronomers at Lick Observatory in the United States obtained $\|$ spectrogram. It showed hydrogen emission lines indicating that the outburst was near to maximum. The nova was subsequently identified with $m$ normally 19 th magnitude star. It was also later found to have been photographed at the Steinberg Institute in Moscow only 26 hours before Alcock discovered it.

Another British amateur also scored a success during the last year. John Hosty, of Huddersfield, using a small monocular, noticed a 7 th magnitude star close to the brighter Alpha Sagittae, itself quite low down in the western sky at dusk on January 7, 1977. This discovery was later confirmed by other members of the Nova Patrol, organized by The Astronomer.

The nova was subsequently photographed by the Royal Greenwich Observatory on January 19 and analysis of its spectrum suggested that it actually brightened to about magnitude 5, possibly in December. A study of the sky atlases also suggests a pre-burst magnitude of about 20 , indicating that the star brightened by - factor of some million times.

It is essential for 1 full understanding of these exploding stars that the professional can use his complex equipment as early $\quad$ possible but he normally has to rely on the amateur for the initial data. This is positive evidence that the amateur can still play I useful role.

New Photographed Meteorite Fall.Although many meteorites have been found lying on the surface of the Earth, it has not been possible to say where they came from. In many cases the fireballs produced as the objects travelled through the atmosphere have been seen and often photographed but it has still not been possible to deduce m accurate track and velocity and from hence obtain an accurate orbit prior to Earth encounter. To overcome this difficulty, camera networks have been set up in Europe and North America but the rate of success is still very low. Many fireballs have been photographed but until recently only 3
meteorite producing events have been successfully recorded. The first, the Pribam, Czechoslovakia meteorite occurred on April 7, 1959, and was recorded by the European Sky Network; the other on January 4, 1970, at Lost City, USA, when the Prairie Network of cameras successfully tracked the path of the bolide.

A third successful event has now occurred. The Canadian network, run by the Canadian National Research Council, recorded the fireball on February 5, 1977. It was of Magnitude - ro and its flight across the sky lasted about 5 seconds. It had a smooth light curve and broke into several pieces just before extinction. Computation of the track showed a low extinction point and a relatively low speed at this point, both facts ideal for producing meteorites. The end point was computed to be at a spot about 150 km . east of Edmonton. The search started on February 17 and after four hours, a $2 \cdot \mathrm{I} \mathrm{kg}$ meteorite was located about 500 metres from the predicted impact point.

The meteorite was of the chondritic stony variety and the specimen was immediately sent for study of short lived radio activity. From this, information can be gained on the intensity of cosmic rays which exist in that part of the solar system in which the original orbit was located. The search for other fragments continued well into the spring and over -area of 500 by 400 metres $\quad$ further 5 meteorites were found. All six pieces fitted together to form the object which was seen to break up just prior to extinction. The total weight was 3.8 kg .

For determining the orbit prior to Earth encounter, photographs from two stations were used. Normally there would have been more than these two cameras seeing the object but they were clouded out. The rotating shutter enabled accurate times to be calculated. The results indicate that it was in a short period orbit, with its perihelion close to the Earth's orbit and aphelion about an astronomical unit beyond that of Mars.

New Technique for Quasar Spectra.-Most astronomers have accepted for some time that the large red shift observed in the spectra of quasars is due to the fact that they are amongst the most distant objects in the universe, but it was only in 1975 that observational proof of their distance was obtained. Since the discovery of the first quasar in 1963, the number of such objects identified has increased rapidly over the years but it is now expected that the numbers will increase dramatically as a result of a new technique for obtaining and measuring the spectra of suspected objects. Quasars are star-like in appearance, being just points of light and they can only be recognized as such when their spectra are examined and their red shifts measured.

The new technique involves placing - prism in front of the telescope thus producing a relatively low resolution spectrum. It has been used for some time for classifying the spectra of faint stars but now it has been used successfully on emission spectra by taking advantage of the newly developed fine grain photographic emulsion. Hypersensitisation has enabled spectra down to magnitude $\mathbf{8 . 5}$ to be recorded.
M. G. Smith, astronomer at the Cerro Tololo observatory in Chile, located nine quasars in x per cent. of the sky. All of these would not have been detected by the usual radio techniques, because all the previously identified quasars have been assoclated with strong radio sources. D. W. Weedman of Kitt Peak observatory, using I grating on the 4 metre telescope identified 2 nhigh red-shift quasars in o. 8 square degrees of sky.

These recent results imply that there would be well over I million observable quasars in the whole
sky, fact which could have important cosmological implications. No doubt it will not be long before the correctness of this implication will be ascertained. Quasars are now known not to be isolated from other galactic objects. For example, the low red-shift quasars are related to the Class I Seyfert galaxies, although the physical processes producing the energy emitted are far from understood. At the present time evidence suggests that quasars are not uniformly distributed throughout the sky, although many think this is due to taking too small $\quad$ sample. The objective prism technique will provide the means of identifying $\quad$ large enough sample to give $\quad$ more accurate picture.

Ozone Layer.-Much has been written in the last few years about the ozone layer and the way it is being modified or destroyed by pollution from exhaust gases emitted by high fiying aircraft and the release of gases from aerosols and refrigerators.

The ozone layer is situated at a height of $25-80 \mathrm{~km}$. in the stratosphere and it absorbs much of the solar radiation which is harmful to man, making it possible for life as we know it to exist on the surface. A destruction of this layer would have a disastrous effect and hence the great concern expressed by many scientists and others.

Recent work has shown that the two alleged sources of polution have entirely different effects. These findings were given at recent meeting of the American Geophysical Union.

The exhausts from supersonic aircraft emit amongst other gases, the very active nitric oxide. This reacts with the hydroperoxyl radical which exists at these levels. This reaction has been known for some time but the new results show that the rate of reaction is some 40 times faster than originally thought. This, say the scientists, uses up the nitric oxide very quickly and reduces the risk of it reacting with and destroying the ozone. Estimates cut in half the amount of ozone destroyed.

On the other hand, chlorine, generated from the freon gases relcased by aerosols etc., enters the stratosphere and eats into the ozone. Estimates given for x975 show that nearly 350 million kilograms of chlorofluoromethane (freon) were released into the atmosphere. This rises to the top of the atmosphere, where sunlight breaks it down and releases the chlorine. Eventually the chlorine will be deactivated by the hydrogen present to form hydrochloric acid but not before it has done immense damage to the ozone. The irony of the situation is that the results of the nitric oxide-hydroperoxyl reaction destroys the hydrochloric acid and frees the chlorine again. Calculations indicate that an extra 35 per cent. ozone is destroyed by chlorine than previously thought.

Some scientists think that the processes do not stop there. They believe it will cause more ozone to be formed than destroyed in the lower stratosphere and this will heat up the region. More water vapour will rise into the upper regions of the stratosphere where it will destroy more ozone.

There is still much to be learned of the chemical reactions involved in these regions of the atmosphere but there is sufficient evidence to show that man must reduce the production of such compounds as freon.

Paris and Wells.-An extraordinary discovery was made in the basement of the French Foreign Trade Bank in Paris in the summer of 1977 . This comprised 21 stone heads and some hundred other assorted fragments. They were part of the statuary from one of Western Europe's most famous displays of Gothic art-The Gallery of The Kings of judah, 28 statues carved in $x 2 z 0$ running across the

West Front of Notre Dame above the magnificent portals. In 1793 the revolutionaries had taken these statues down, thinking they represented not the Jewish monarchs but Kings of France and ordered that they be ceremonially beheaded. This had been done and some of the remains buried at the cathedral. Not surprisingly in the nineteenth century, during the Gothic Revival, the violation of the West Front was considered offensive and Viollet le Duc, in the course of a general restoration of the whole cathedral, designed new statues to replace the damaged and destroyed originals of the West Front. These were carved by Geoffrey Dechaume. The rediscovery of 21 of the 28 heads will now lead to great discussion on whether to keep the nineteenth century replacements or restore the originals.
Similar important discussions were taken in England in 1977 as well in respect of England's greatest assemblage of contemporary Gothic artthe statues on the West Front of Wells Cathedral. Work has now begun on cleaning and repairing these figures and after discussion it has been decided not to restore (e.g. not to replace broken fingers and noses) although it is hoped that the use of lime and silanes will prevent further decay of the stone surfaces.

Planet Jupiter. The planet Jupiter has been the centre of interest for both amateur and professional astronomers on account of it being the largest of the planets and because of its numerous moons forming miniature solar system. But, like all planets, it shines only by reflection and so distinguishing it from the Sun and the stars which shine in their own right by nuclear processes. Jupiter, however, is different from the rest of the planets on account of it being a strong radio source. The recent probes and independent Earthbound observations over the last no to 15 years have also shown that the planet is radiating into space more energy than it is recciving from the Sun. Current ideas suggest a difference of as much as a per cent. Most astronomers have explained this as being due to a slow gravitational collapse, the ball still shrinking from the original gas cloud.
Recently, however, $\quad$ conflicting theory has been proposed by Soviet astronomers. They claim that Jupiter is not a shrinking planet but a star in its very early stages. It is, in fact, they claim, growing in size and will reach the mass and brightness of the Sun in about 3,000 million years' time. That is a little more than half the present age of the Earth. It was reported that at $\boldsymbol{\square}$ conference held in Leningrad last June, Soviet astrophysicists described how the reserves of deuterium are gradually increasing. The temperature in the centre is currently about $300,000^{\circ} \mathrm{K}$. and will continue to increase.

This theory has not been accepted by many western astronomers for a variety of reasons. The mass of Jupiter is one. Very few stars are known with masses less than one sixth of the Sun's mass, yet the planet at the present time is only one thousandth. Other studies have shown that Jupiter would have to increase tenfold before it would shine like a star even if it was virtually all deuterium and if it had composition similar to that of the Sun, a factor of 50 would be required.

Another difficulty is the ability to collect dust and gas at the required rate. Pioneer probes have indicated that dust in the region of Jupiter is about roo times that round the Earth, suggesting that the planet would be able to collect only about one ten millionth of its mass in the time suggested by the Russians.

Prehistoric Animals.-In September The New

Scientist reported the astonishing discovery of a perfect specimen of aby mammoth in eastern Siberia. Estimated to be perhaps as much as $\mathbf{1 5 , 0 0 0}$ years old, the body, although emaciated, was completely intact, even down to the two "fingers" at the end of the trunk. It was six months old, 344 cm tall and had reddish fur.

A Japanese trawler off New Zealand made a similar discovery in July when it fished up the decomposing corpse of what could well have been a plesiosaurus, I creature thought to have been extinct perhaps $65,000,000$ years ago. It was some thirty feet long with a six foot tail and weighed two tons. Unfortunately the skipper of the vessel threw the rotting body back into the sea, so that verification will be very difficult. If the creature does turn out to be a plesiosaurus it will be one of the most important palaeontological discoveries since that of the coelacanth.

Rings of Uranus.-In 1973, Gordon Taylor of the Royal Greenwich Observatery predicted that the star 158687 in the Smithsonian Astrophysical Observatory's catalogue would be occulted by the planet Uranus in March, 1977. Such events are used to study the atmospheric profile and exact size of the outer planets and it was hoped that on this occasion, accurate information could be deduced about the planet as was the case when from data gleaned from an occultation, Neptune was found to be much larger than originally thought.

One of the main difficulties of this kind of work is to predict exactly where on the Earth's surface the occultation will take place. Fortunately on this occasion the planet was due to pass about 0.8 minutes of arc south of the star in late January before reversing its apparent motion and occult the star in March. Photographs of the January event showed that the theoretical positions of both the star and planet were slightly in error. The corrected predicted track of the occultation was found to lie across the Indian Ocean and south of Australia.

On March 10, 1977, group of observers aboard NASA's Kuiper Airborne Observatory (KAO) took off from Perth, Australia, and flew along the predicted track. Another group observed from Perth so that the data could be compared. The results were sensational and completely unexpected.

Because the brightness of the star in yellow light differed by only 4 magnitudes from that of Uranus, the combined light intensity would change by only I per cent. during the occultation. Since the study of the planet's atmosphere would be based on the fall-off of this light, it was felt that much more would be gained by observing in the red and infrared regions where the percentage change would be much greater. Both stations were successful in recording data. Analysis of the light curves showed that Uranus was surrounded by a system of 5 narrow rings, roughly circular in shape and rotating round the primary in the same plane as its satellites. The results from East Africa agreed with these findings. The rings are only about xo km . wide, in contrast with the $20,000 \mathrm{~km}$. Width of Saturn's rings.

Although William Herschel reported in 878 x that Uranus had $=$ ring system, it is fairly certain that he never actually saw them. It is generally agreed that we shall have to wait for further details of the rings until the 2.4 metre Space Telescope is in orbit or the visit of a spacecraft to the vicinity of the planet.

Second Visual Pulsar.-Over 150 pulsars have been identified by radio techniques but astronomers at the new Anglo-Australian telescope at Siding Spring have discovered a second visual counterpart,
which is possibly the faintest object ever seen. It is a fast spinning star about 25 km . in diameter in the constellation Vela. It flashes ix times per second. The first visual pulsar was identified in the Crab Nebula, the star that exploded in 1054 and is recorded in Chinese records.

The Vela pulsar was first detected in 1968 as a radio pulsar and has the third fastest flashing period ever recorded. Studies of pulsars at optical as well as radio frequencies are important for a full understanding of these strange objects which are considered to be only one step away from black holes. Pulsars consist of atomic particles packed so closely that by comparison white dwarfs appear to be virtual vacuum, and these were the densest objects known prior to the discovery of pulsars in 1967. Pulsars are formed when giant stars explode into supernovae.

There has been $\quad$ concerted effort recently to obtain very accurate positions for radio pulsars so as to try and isolate their visual counterparts. Scientists obtained a very accurate position for the Vela pulsar by interferometric techniques and a NASA Deep Space tracking station was used to measure the flashing speed. This information was used at the Siding Spring Observatory where the I50-inch diameter telescope is situated. Using the latest electronic equipment and techniques, the optical counterpart was identified some roo million times fainter than the Sun, flashing at exactly the same period as the radio source. It is only 1,500 light years away and theory suggests that it was formed only a few thousand years ago. A search through ancient Sumerian records has brought to light a report of 1 star flaring up some 6,000 years ago. If it was an event similar to the super nova associated with the Crab Nebula, it must have been exceptionally bright, since the Io54 event was four times farther away.

Stained Glass Museum.-In the summer of 1977 Britain's only museum devoted exclusively to stained glass was opened to its first visitors. It had been established in 1972 in one of the triforia of Ely Cathedral, under the curatorship of Mr. Martin Harrison. The Museum has been able to save some thirty or forty windows from redundant churches, mostly Anglican but also from Methodist church in Wolverhampton and a rich nineteenth century Catholic Welsh church. A particular treasure is the fourteenth century glass from St. John's church at Hadzor, Worcestershire. As Britain possesses perhaps 80,000 examples of stained glass both the legacy and by extension the potential threat is very great (especially as an average of roo Anglican churches are being declared redundant each year). At its best, glass is often exported to Japan or America-much more frequently it is smashed so that the need for the museum is patent. The Museum will open permanently in 1978.

SUPERHEAVY ELEMENTS NOT CONFIRMED.-One of the sensational reports of 1976 was the alleged discovery of naturally occurring elements of atomic number greater than that of uranium. The detection of superheavy nuclei in the mineral monazite from Madagascar was based on the study of giant haloes caused by radioactive decay. The size of such haloes depend on the energies of the emitted particles and R. V. Gentry and co-workers concluded that the extra large radius was due to superheavy elements. Unfortunately it has not been possible to confirm this discovery, although many attempts have been made using a variety of methods.

Scientists at Darmstadt bombarded the mineral with protons of various energies and found that the spectral lines of the emitted gamma rays attributed
to the superheavy elements were in fact due to the element cerium. A group from Oxford bombarded monazite with heavy fons and examined the energies of the recoiling particles. Once again, no superheavy elements could be related to the results obtained. At Harwell, tests were carried out on a giant halo. They focussed $\quad$ microprobe proton beam on to the halo but found no evidence of the new elements.

Most of the attempts to confirm the original findings were made using monazite from the same source but not the haloes used in the original experiments, thus introducing some doubt into any deductions made. The death knoll occurred when the original samples were analysed using inew and far more reliable method. The team of investigators included Gentry. Instead of using 1 proton bombardment method, an intense beam of photons of a single and known energy was fired at the halo. By varying the frequency, a detailed analysis of a particular x-ray transition was made. The results showed no evidence of peaks which would be present if, say, element 126 occurred in the target. It can therefore be concluded fairly confidently that the haloes were not caused by superheavy elements.

SUPER ICEBERGS.-Icebergs originating from the Antarctic have always been a danger to shipping in the southern seas. The importance of their danger has been recognized by the fact that their positions have been tracked by satellite and the information released to shipping in the area. In particular, these reports have been of great help to the supply ships making their way to the scientific bases on the Antarctic continent.

Early maps of the region of Princess Martha coast, to the east of the Weddell Sea showed a tongue of ice jutting out into the ocean. About ten years ago, this tongue broke away from the main ice mass, possibly due to very high winds, mollision with another iceberg, or both. This iceberg, the largest on record and measuring 70 by 40 km ., has kept fairly close to the coast. Two years ago, it rammed the Larsa Ice Shelf on the west of the Weddell Sea and broke off another iceberg about half its size. The two have remained in the Weddell Sea, with the smaller one trailing behind at - distance of about 100 km .

There is i danger that they will not make another circuit of the Weddell Sea but break out into the ocean: Because of their immense size they would be seen easily and hence would not be too big a danger to shipping. But because of the big temperature differences in the water, it is estimated that they would break up within a couple of years and then the situation would become exceedingly dangerous. A serious problem would be the shipping and supertankers passing round Cape Horn at the southern tip of South America.

The average length of icebergs from the Antarctic is about $I \mathrm{~km}$. and they originate from the icesheets as well as glaciers. It is estimated that $10^{15} \mathrm{~kg}$ ice enters the sea each year and that the average lifespan is about 6 years.

The Weddell Sea is part of a large clockwise gyre and hence icebergs formed in that area tend to circulate within the sea, a route taken so far by the two giants mentioned above.

Third Nerve System.-In October, The Times reported from Stockholm, where the subject had been under discussion at a special symposium organised by the Menarini Foundation, the likelihood of a third nervous system in addition to the two classically accepted systems, the cholinergic and the andrenergic. Research papers, shortly to be
published, argued that a network of nerve cells, hitherto unrecognised, controls major arteries, the oesophagus, the stomach and the bladder. If this is so, there could be a new approach to treatment of a number of ailments, including gastro-intestinal complaints, cardio-vascular conditions and glaucoma.

Investigations have been undertaken by British scientists at University Colltege, London, under Professor Geoffrey Burstock in collaboration with other groups in Britain. It is suggested that adenosine triphosphate (ATP) is the essential ingredient of the third type of nerve, which has been termed purinergic. ATP is found in almost any cell of the body, and is the main blochemical for keeping the living cell supplied with nutrients. Because ATP is so widespread, confirmation of the hypothesis is a laborious process, but some clinical specialists are already examining the possible use of a third-nerve system in treating skin disorders and other complaints.

Vikings in Yorr.-The traditional image of the Vikings as freebooting pillagers has been under revision for several years now. As a result of a fascinating excavation now being carried out in York, revision has won the day.

The excavation, begun in 1976 but discovering its great finds in 1977, has uncovered three timber buildings in Coppergate, one of which is the best preserved soth century structure in England (reliably dated by a coin found on the site to about 980). These houses cum workshops had been preserved by the subsoil to the height of 6 feet and even the wooden thongs had been preserved intact. The excavation has proved the Vikings not only to be craftsmen but also great traders, making use of the River Fosse, which runs just behind the houses. They appear; for example, to have shipped amber, furs and pitch from the Baltic and to have reached Ircland, and the R hineland as well. The excavation has also confirmed that York was most definitely the ancient city of Jorvik, as the Vikings called it.

Once the excavation has been completed it is hoped that the houses will be reconstructed in the Yorkshire Museum.

VIKINGS I AND 2.-Some scientists were no doubt disappointed by the fact that both Viking landers did not'send back information which showed that life did exist on the planet Mars. The data was inconclusive in this respect but the information obtained has solved many of the problems which have puzzled astronomers during the last few years.

During the first phase of the programme (up to the time when transmissions had to stop because Mars went behind the Sun) the physical sciences experiments produced three definite pieces of information. The channels which were so evident in the photographs taken by the Mariner probes have now been shown to have been caused by flowing water. The present atmosphere is far too thin to permit liquid water to exist and hence all water present must be in the form of ice or vapour. A detailed study of the structure of the channels has shown teardrop shaped features which are without doubt the remnants of islands in dry river beds. Many other features, such as lines along the shores of the channels, indicate a formation caused by running fluid and the only likely fluid is water. The time of formation of the channels is I matter of conjecture with many conflicting views on the subject. A popular theory is that they were formed at the time of the formation of the volcanoes, with ages ranging from 100 to 1,000 million years. There are over a dozen large volcanoes and one current theory suggests that the channels were
formed during the last major period of volcanic activity. But there is evidence suggesting that the channels were formed over $\quad$ very long period.
Whether water did exist in any quantity has been the leading question for a long time. The Vikings have shown that, without doubt, at the poles and in the mid-latitudes, water was in abundance. The permanent ice cap at the north martian pole is made of water ice. The temperature of the cap ( $205^{\circ} \mathrm{K}$.) rules out carbon dioxide since this would evaporate at this temperature. During the winter months, both poles acquire large caps of carbon dioxide. The ice caps are now known to be several hundred metres thick, sufficient to cover the whole surface of the planet to a depth of 0.5 metres if it were melted all at once.
The atmosphere must have been much denser than at present. Analysis of the currecnt atmosphere suggests that the primitive atmosphere must have been roo millibars or even higher. This is large enough for liquid water to exist. The amount of inert gases is used as measure of the volatile compounds released from the planet during its evolution. At the present time the composition is: carbon dioxide 95 per cent., nitrogen $2-3$ per cent., argon $x-2$ per cent., oxygen $0.1-0.4$ per cent. and water vapour 0 -ox-0.1 per cent.
The three biological experiments provided much interesting information. The first, designed to test for evidence of photosynthesis under simulated martian conditions, gave inconclusive results. The second experiment was designed to ascertain whether or not any component in the martian soil would assimulate a nutrient solution containing organic compounds, labelled with radio active Carbon 14. Large amounts of radio active carbon dioxide were emitted, indicating that something was oxidizing the compounds. The third experiment tested the soil and showed that the soil released oxygen when water vapour was present, in complete contrast with lunar soil, which released hydrogen. The overriding result is that the experimenters are not sure whether the results are due to biological processes or to chemical reactions. A generally accepted explanation is that there is component in the soil which is oxidized beyond its normal state-a super oxide. Water reacts with it to form the normal oxide and oxygen. The component responsible has not yet been identified but there is a suspicion that it could be 1 super oxide of iron.

Meanwhile the probes are still sending back information and it is hoped they will continue to do so for at least two years.

Volcanic Activity, 1976-77.-In common with the previous year, volcanic activity has continued to be quite high. La Soufrière, on Guadeloupe, after dying down and the authorities allowing the local inhabitants to return, burst into activity again in the autumn and on occasions hurled huge boulders many hundreds of metres. Although activity is classed as moderate, scientists still feel that a major eruption and explosion could occur. Still in the central American region, Puracé (in Colombia), one of the most active of all volcanoes, burst into activity in March showering ash on It town 30 km . to the northwest. Costa Rica's Arenal has been more or less active since 1968. The last outburst in October 1976 produced much lava. At one stage avalanches from the flow front near the crater were audible at I rate of one per minute. La Lorenza, which is situated in m marshy region 70 km . north of Monterila, Colombia, erupted on October 20, ejecting a grey mud, which spread over l large area, burying houses and killing many farm animals. After an hour, it suddenly ignited and
burned with $=100$ metre high flame, destroying houses and trees up to $\Pi \mathrm{km}$ from the original vent. The flames, fed by methane gas, burned for several days. Although it is thought that this was the first time that La Lorenza had burst into flames, such fires have been reported in the area in the past.

In Zaire, two of the seven Virunga volcanoes which form a barrier across the western Rift Valley, burst into activity during the year, Nyamuragira on December 23 and Nyiragongo on January 10. The former, the most active of the group, discharged lava from new crater its southwest slope. Tongues of lava reached as much as 3 km . and the ash falls caused serious damage to crops. The second volcano did much more damage. Early reports of 2,000 people being killed have not been confirmed. Lava flowed 19 km . to the south and stopped just x km . short of the town of Goma.

On March 23 , an eruption took place at the southeastern edge of Fernandina caldera in the Galapagos Islands. The Isla Fernandina is the summit of $\begin{aligned} & \text { very } \\ & \text { large shield volcano rising from }\end{aligned}$ the sea floor to 1,495 metres above sea-level, $\square$ total height of about 6,000 metres. The summit consists of $=2 \mathrm{~km}$. diameter lava lake and during
this last eruption, in common with those of $1972-$ 73. the lava has flowed into the lake.

The surrounding regions of the Pacific Ocean have been particularly active, with 3 major eruptions in Alaska, 3 submarine eruptions near Volcano Island and Iwo Jima, the famous Bezymianey volcano in the Soviet Union, the White Island volcano in the Bay of Plenty in New Zealand and in Japan. The Japanese eruption (Mount Usur), in the northernmost island of Hokkaido, caused a mass evacuation of the holiday resort of Toyako Onsen. Within three days of the start of the eruption, two craters over 100 metres had been formed, spewing out lava, sludge and ash, turning large areas of rich agricultural land into a lifeless grey desert. Explosions flung out fist size rocks and ash as far away as 40 km . from the volcano. The last time Mount Usu erupted was in 1943-45.

The East Indies is a consistently active region. Merapi, a strato-volcano on the island of Java, has been active for several centuries with more than 20 periods of activity since 1900. It erupted in November 1976 with lava flowing up to $2 \frac{1}{2} \mathrm{~km}$., but earlier in the year more than 100 nueés ardentes were emitted, some travelling 6 km .

## FUEL AND POWER MEASURES

British Thermal Unit (B.Th.U.) = The amount of heat required to raise I lb of water through $I$ degree Fahrenheit at or near $39^{\prime I}$ degrees $F$. I B.Th.U. $=\mathbf{~} \cdot 05506 \mathrm{~kJ}$.

Unit of electricity (kilowatt-hour) $=$ Output of 1,000 watts for one hour. $=$ k.w.h. $=3,413$ B.Th.U.

Therm $=\mathbf{x 0 0 , 0 0 0}$ B.Th.U. $=29 \cdot 3 \mathrm{k} \cdot \mathrm{w} \cdot \mathrm{h} .=105^{\prime} 506$ MJ.
Atmosphere $=$ pressure of $x 4: 223 \mathrm{lb}$. per sq. in. $=$ I kilogram per sq. cm.

Petroleum
Barrel $=35$ Imperial gallons $=42$ U.S. gallons.
Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi-Arabia, Iraq, etc.) varies from 7 o barrels per metric tonne to 77 barrels, and in the smaller oil producing states (e.g., Albania) is as low $6 \cdot 7$ barrels per tonne. Crude petroleum in the United Kingdom, 7 . 355 barrels per metric tonne ( 2,205 lbs .) ; 7 '472 barrels per long ton ( $2,240 \mathrm{lbs}$.).

## WIND FORCE MEASURES

The Beaufort Scale of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of the numbers $0-17$, each representing a certain strength or velocity of wind at 10 m . ( 33 ft .) above ground in the

|  |  |  | Knots | Scale No. | Wind Force | M.p.h. | Knots |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | m | $\underset{I}{\text { M.p.h. }}$ | Knots | ${ }_{9}$ | Strong gale | 47-54 | 41-47 |
| I | Light air | 1-3 | 1-3 | 10 | Whole gale | 55-63 | 48-55 |
| 3 | Slight breeze | 4-7 | 4-6 | 18 | Storm | 64-72 | 5643 |
| 3 | Gentle breeze | 8-12 | 7-х0 | 12 | Hurricane | $73-82$ | 64-71 |
| 4 | Moderate breeze | 13-18 | 11-16 | 13 | - | $83-93$ | $72-80$ |
| 5 | Fresh breeze | 19-24 | 17-21 | 14 | - | 93-103 | $8 \mathrm{x}-89$ |
| 6 | Strong breeze | 25-31 | 22-27 | 15 |  | 104-114 | 90-99 |
|  | High wind | 32-38 | 28-33 | 16 |  | 115-125 | 100-108 |
| 8 | Gale | 39-46 | 34-40 | ${ }^{1}$ |  | 126-136 | 109-xi8 |

ARCHAEOLOGY IN 1976-77

## Council for British Archaeology

The Council for British Archaeology's 26th Annual Report for the year ended June 30, 1976, was published during the winter of that year, and (despite achievements and progress) in the introductory section is described the effect which the economic crisis of 1975-76 had on archacology; while it was noted and welcomed that the funds for rescue archaeology had kept pace with inflation, there had been " " perceptible decrease " in the amount of excavation carried out during the year, not only because of the increased cost of supporting permanent teams but also because funds were diverted to support post-excavation work. It is appreciated that the provision of more money for rescue excavation is dependent upon an upturn in the economy and consolation is taken from the fact that some of the pressure on archacologists is relieved in that commercial development is also not forging ahead. The C.B.A.'s Report urges that "British archaeology should take advantage of this luli to lay its plans for the future, by using rescue funds for more detailed investigation of sites now available and directing the money more deliberately into research excavation (as at London and York at the present time), by putting considerably more emphasis on survey, so as to improve its data base, and by strengthening its organizational and legislative framework." It is noted that while central Government funds for archaeology are restricted, so too the series of appointments of archaeologists in County Planning Departments has stopped, while spending on museums is also under close scrutiny; the outlook for research is also bleak: "The universities have fallen on hard times and are finding it increasingly difficult to finance archaeological research of any kind. Non-university-based research is even more at risk: the Butser Ancient Farm Project for example, one of the most imaginative and potentially valuable archacological projects anywhere in the world, is in danger of having to close down owing to lack of funds."

## Archaeological Excavations 1976

The Department of the Environment published a summary of pre-historic, Roman and medieval sites excavated in advance of destruction under the title of Archaeological Excavations in 1976. In the introduction it is stated that in the financial year 1976-77 money made available for rescue archaeology in England, Scotland and Wales was increased by $£ 471,000$ to - total of $£ 2,100,000$; in the calendar year 1976 £. $x, 091,918$ was made available towards the costs of surveys and excavations in England, $£_{374,238}$ for post-excavation work, and $£ 50,000$ towards publication costs; for Scotland $\mathcal{L}^{2,2,22}$ was provided in grants and $£ x 66,506$ in Wales; further, fees for supervisors and assistants working on central and sponsored excavations totalled £62,002, $£ 8,030$ going to those engaged in postexcavation work.

Among the more impotrant pre-historic sites noted in the Report was a mesolithic settlement at Monks Moor, Cumbria, indicated by hearths, stakeholes, and $\pm$ large number of microliths. From the neolithic period, at Yard Park, Lower Pitts Farm, Priddy in Somerset was a burnt structure which is thought to have been a burnt turf roof which had collapsed over an area of cobbling within a depression; this is a significant discovery because all too few structures are known from this period. Work continued on an important longer term investigation which has thrown light on the neolithic period and during 1976 the Somerset Levels Project concentrated on field work and post-excavation researches of, in the main, an ecological nature; at Hambledon Hill, Dorset, the examination of this causewayed enclosure concentrated on the investigation of the ditches, the outworks and the surrounding landscape; another small causewayed enclosure was studied at Offham Hill in Sussex where the interior and lengths of the ditches were both examined; also in Sussex at Bullock Down an open settlement indicated by flint scatters began to be investigated. So far as Bronze Age sites are concerned, the excavation of the burial at Astley Hall in Lancashire was finished, and work on the cairnfields in Northumberland was continued; barrows of this
period were excavated at Catholme in Staffordshire and at Cossington in Leicestershire where two mounds produced much pottery. In Oxfordshire five cremation burials were found in two ring ditches at Ashville Trading Estate, while in Oxford itself a late-Beaker infant burial was discovered. At Radiey in Oxfordshire the western part of the linear barrow-cemetery was demonstrated to have been levelled during the medieval period by cultivation; a long barrow at Wooley in Cornwall was examined and round barrows were investigated also at Slindon in Sussex and Stannon Downs in Cornwall. At Thwing in Humberside interior details of a circular Bronze Age hill-fort were brought to light, while at Billingborough in Lincolnshire two four-post houses and evaporation hearths of the same period were revealed; Aldermaston, Berkshire, Runnymede Bridge, Egham, Surrey and Bishops Cannings Down, Wiltshire, all produced Bronze Age settlements which were examined; the Report notes: " Knowledge of settlements of this period is scanty and it is important to have recorded buildings at Aldermaston and a very rare association of a hoard of bronze objects with an enclosure at Egham."

From the later pre-historic period came dated salterns at Helpringham Fen, in Lincolnshire, while another eighteen Iron Age burials were excavated in the large La Tène cemetery at Burton Fleming in Humberside; the excavation of Iron Age settlement at Winterton in Humberside revealed a farmstead of the period, while - extensive late Iron Age farm was examined in part at Whitwell in Leicestershire, where was found a fine enamelled bronze horse trapping. Evidence for Iron Age settlement was found at Ledston in West Yorkshire, while at Beckford in Hereford and Worcester and at Ashville in Oxfordshire Romano-British fields were shown to have been laid out over Iron Age hutcircle villages. Other Iron Age agricultural and domestic sites included those at Elstow in Bedfordshire, North Bersted at Bognor Regis in Sussex, Highstead in Kent and Beeches Nursery Field at Cirencester in Gloucestershire. Especially worthy of note were the excavations of the Iron Age settlements at Old Down Farm at Andover in Hampshire and Winnall Down at Winchester in the same county, where occupational evidence, including huts, was recovered; rural Iron Age settlements without defences were investigated at Somersham and Great Shelford in Cambridgeshire and Woodham Walter, Fingringhoe and Nazeingbury in Essex. "However, the defended northern enclosure at Mucking, Essex was the most important Iron Age excavation in East Anglia, with its coherent sequence and detailed evidence of house construction." Several Iron Age hill-forts were investigated during the year under review including the one at Winklebury in Hampshire where
five acres of the hill-fort interior was excavated and evidence for intensive occupation recorded; at Harting Beacon in Sussex the defences were sectioned and parts of the interior were investigated, while at Wandlebury in Cambridgeshire a possible war-cemetery was found; excavations were undertaken at Danebury in Hampshire, at Uley Bury in Gloucestershire and at Ham Hill in Somerset while, it is noted, " the suggested oppidum at Braintree, Essex, has been confirmed."

Under the heading of Roman military sites the Report notes the work on the Hadrianic barrackblocks at Wallsend on the Tyne and that "the fourth-century plan presents difficulties of interpretation." A pre-Hadrianic fort on a different alignment was discerned at Ravenglass in Cumbria, where the occupation of the Hadrianic fort continues, with breaks in the middle of the second and of the first half of the fourth century A.D., until about A.D. 400 . The construction of a pipe-line trench revealed the extent of the vicus at Ribchester in Lancashire and the opportunity was taken to recover well-preserved organic material. At Chester the investigation of the first and second century alterations in the fortress has claimed most attention and evidence of possible Iron Age cultivation near the north rampart has been noticed. Moving to the eastern side of the country, at York the defences of the legionary fortress were investigated at Parliament Street, the Bedern and Aldwark, while at Bootham Bar it was possible to re-examine the porta principalis dextra; inside the fort, in Blake Street, first century timber buildings were investigated, as they were in the praetentura and at Bedern, while later stone buildings were uncovered at Bedern and Aldwark. At Chesterfield in Derbyshire the internal features of the Neronian fort were disclosed in Station Road, where they underlay a fort and annexe of early second century date, while at Doncaster in South Yorkshire the western defences of the vicus were delineated. At Dover in Kent a number of structures relating to the extramural settlement of the Classis Britannica fort were recorded and the west wall of the Roman "shorefort " was shown to have survived to a height of 3 metres. At Colchester in Essex the western defences were further elucidated, while at Chelmsford in the same county the rampart of the early fort is reported as being found, and at Orsett the complete excavation of an early fort is under way. Among excavations in Roman towns are those within the colonia at Flaxengate in Lincoln where was found a large and ornate fourth century building of Mediterranean style, while in Leicester a series of pottery kilns were discovered beneath a cemetery west of the River Soar; at Hibaldstow in Humberside a large area to the west of Ermine Street lying within the unwalled town was dug to reveal strip buildings and a series of domestic properties around a paved courtyard. Within the City of London work along the river front has led to the discovery of more of the Roman riverside wall which incorporated sculptured stones from an important civil monument; to the front of this wall lay wharves revetted in timber; in Lower Thames Street the bath house examined in 1968 has been incorporated into the basement of modern office block and it has been confirmed that Romanstyle occupation continued on this site until after the mid-fifth century A.D.; first and second century timber buildings were revealed in Newgate Street while salvage work on other sites led to the discovery of a gold and emerald necklace from one of a series of plank-lined drains; on the south side of the Thames in Southwark the study of drainage channels and flood deposits is "beginning to define the limits of the Roman transpontine suburbs." Work has been undertaken on Roman urban sites
at Alcester in Warwickshire, Worcester, Towcester in Northamptonshire, Canterbury,Chichester, Winchester and Neatham in Hampshire, Cirencester, Gloucestershire, as well - in Gloucester and Exeter; of special interest are the excavations at Wanborough in Wiltshire which revealed previously unknown town defences including part of a gateway, while at Ware in Hertfordshire evidence found for the counterfeiting of a range of coins of the late fourth century A.D. Turning now to rural settlements of the Roman period, excavations at Stainmore in Cumbria implied settled agriculture above a height of $x, 600 \mathrm{ft}$. on the limestone, while at Crosshill in Cumbria in the Eden valley there was evidence of industrial as well as agricultural activity; these two sites together with Kennel Hall Knowe in the North Tyne valley are regarded as extending the knowledge of the pattern of civilian life in the military zone. Roman villas and rural settlements were investigated at Dalton Parlours in West Yorkshire, at Winterton in Humberside, and at Welton Wold, in Humberside also, where five enclosures with buildings and grain dryers were examined; at Long Bennington in Lincolnshire and Whitwell in Leicestershire stone built houses and enclosures were delineated; two substantial drying ovens in a timber building were discovered at Keston in the London Borough of Bromley while other rural sites at Barton Court Farm in Oxfordshire, Little Oakley, Essex and Gorhambury in Hertfordshire were examined, the latter site also revealing a probable temple. Roman field systems were examined at Odell in Bedfordshire and Long Wittenham in Oxfordshire; excavations at Ranscombe Hill in Sussex, West Hill, Gloucestershire, and at the cemetery at Poundbury in Dorset all produced important material; evidence of industrial production was found at Chelmsford in Essex where the manufacture of textiles was identified, while a kiln for mortaria and flagons, perhaps made by a potter from Colchester, was recovered in the Waveney valley at Ellingham in Norfolk.
For the post-Roman period the Report notes the excavation of Anglo-Saxon cremation cemeteries at Elsham in Humberside, where the burials were found within a pre-historic ditched enclosure, and at Sancton in Humberside where a larger cemetery than supposed was revealed; work has continued on the pagan Saxon cemetery at Spong Hill in Norfolk, while at Nazeingbury in Essex possibly Christian Saxon cemetery was found; an interesting association is the discovery of ${ }^{-1}$ single Anglo-Saxon inhumation burial in the ruins of the villa at Dalton Parlours in West Yorkshire. The Anglo-Saxon settlement site of Thirlings in Northumberland was excavated and a fourth season was carried out at the village of Catholme in Staffordshire producing twenty-three additional buildings including three grubenhiuser. The Report notes that "Saxon occupation of the villa estate at Barton Court Farm, Oxfordshire, seems to have been confined to narrow strip of land between the home paddocks and wetter soils nearby. There is no evidence of any overlap of occupation, but it would seem that the occupation was carefully controlled. The Saxon occupation of the villa estate at Keston, London Borough of Bromley, seems to have been similarly peripheral to the main enclosure. At Odell, Bedfordshire, traces of Saxon occupation are limited so far to timber-lined wells. In London, where Saxon occupation is notoriously difficult to locate, an eighth to ninth century settlement was found at Althorpe Grove, Battersea, on an island of alluvium beside the Thames." A further fifteen buildings were excavated at Chalton in Hampshire, bringing the total to sixty-two certain or probable buildings. At Flaxengate in Lincoln, urban struc-
tures of the ninth century and earlier were investigated, while at York timber buildings in good condition of the eleventh century were discovered at Coppergate, and industrial buildings, including a foundry, were excavated in Bedern; in the City of London middle-Saxon strata showing at least one timber building have been found at Neweate Street; work continued at Hamwih in Hampshire revealing buildings and industrial débris, while at Bircham in Norfolk a Saxo-Norman kiln was discovered.
Medieval monastic sites described in the Report include that of a bell-pit for casting one of the bells from Norton Priory in Cheshire; the plans of the monastic building have been partially recovered and possible bridge abutment located at Jarrow in Tyne and Wear, this monastic building being outside the guardianship area; successive bakehouses were examined and a late fourteenth century defensive ditch sectioned at Thornholme Priory in Humberside, while at Clementhorpe, York, buildings relating to the small but significant nunnery were investigated. Work is continuing on the claustral buildings of the alien priory of Fontevrault situated at Grove in Bedfordshire, while in the London Borough of Merton the chapter house of the Austin Priory of St. Mary has been found; in north-east London, thirteenth century stone building which stood within the precincts of Stratford Abbey has been discovered in what is now the London Borough of Newham. Turning from monastic sites to churches, the most significant excavation was at St. Mark's Church in Lincoln where a whole series of ecclesiastical buildings dating from the eleventh to the nineteenth century was examined, the earliest church being in an earlier graveyard; in York an carlier church was noted below All Saints, Pavement, while information being recovered about the church and churchyard of St. Nicholas in the Shambles in the City of London is beginning to be useful; this church, which was founded about 1187, was destroyed in 5547-52. At Pagham in Sussex the ground under the nave of the mainly thirteenth century church was investigated revealing the foundations of earlier structures; in addition part of $\begin{aligned} & \text { waglo- }\end{aligned}$ Saxon cross was recovered from an undated grave. Work has continued in medieval towns and at Berwick-upon-Tweed evidence has been produced of seasonal occupation in the eleventh century, while at Hull " extensive excavations in advance of major roadworks revealed the main west gate, tenements along Mytongate, the medieval gaol and guildhall, the garden of the Austin Friary, and substantial traces of the Henrician eastern defences." In Nottingham, "excavations in Goose Gate revealed - fine series of domestic buildings, and double-flued pottery kiln dating to the second quarter of the thirteenth century." A medieval defensive ditch was further investigated at Station Road in Chesterfield, Derbyshire, while in the City of London timber waterfronts of the twelfth, thirteenth and fourteenth centuries at Seal House and Trig Lane have yielded much important information. Excavation has also yielded interesting information concerning the medieval development of Hereford, Warwick, Oxford, Bedford, Canterbury, Chichester, Lewes, Winchester, Poole, Bristol and Exeter; there is new work beginning at Dartford in Kent, Seaford in Sussex, Dorking in Surrey, Christchurch in Dorset, Plymouth and INewton Abbot in Devon; it is clear that 1976 was a significant year for research in the field of medieval studies. As in r975 the only major castle excavation was at Stamford in Lincolnshire where the investigation of the domestic ranges was finished, demonstrating that below the castle was a pre-conquest
pottery kiln which produced red-painted wares as well as the better known Stamford ware; there was also at that level a pair of defensive ditches, from one of which was recovered I coin of King Alfred. Thurleigh Castle in Bedfordshire and the bank of the inner bailey at Northampton were also investigated. At Elland in West Yorkshire a medieval manor house was investigated, as was one at Epworth in Humberside where hall and kitchen ranges have been uncovered and a painted tiled floor found within the kitchen; at Hempstead in Norfolk two rooms on a moated house site were found to be floored with decorated and glazed tiles; the ranges of the medieval manor at Wickham in Hampshire and In fourteenth century house at Winchelsea in Sussex were also examined. So far medieval villages are concerned, work continued at Norton in Cheshire and at West Whelpington in Northumberland, where an Iron Age enclosure was found under part of the site and " none of the material in the medieval village is later than C. A.D. 1300." Stone-footed barns of the twelfth and thirteenth centuries were found by excavation at Barrow-onHumber while the village road plan of Whorlton in North Yorkshire was investigated; substantial parts of the village at Great Linford in Buckinghamshire have now been excavated and it has been shown that "several tofts continued to be occupied until the seventeenth century, when the area was enclosed for pasture." A medieval farm was examined at Meldon Quarry at Okehampton in Devon, while at Caldecote in Hertfordshire "the whole of the southern part of the village and the rectory site was excavated." For the post-medieval period the Report records the excavation of a guncasting pit and an adjacent timber floor at a seventeenth century iron furnace revealed at Scarlets Furnace at Cowden in Kent, while I water-powered blast furnace of the same century was completely excavated at Maynards Gate, Crowborough in Sussex, where a circular gun-casting pit was also found and exposed.

## Ancient Monuments Board

The zard Annual Report of the Ancient Monuments Board for England, covering the year 1976, was ordered to be printed in June, 1977, and includes an account of $i$ tour by the members of the Board based in Lincoln, during which they inspected both archaeological sites and standing buildings. In the section on individual cases, it is reported that three monuments have been removed from the list, namely the site of a deserted village at Thrislington, Cornforth, Sedgefield, in Durham, which had been excavated before development, Whitegrounds Round Barrow at Burythorpe in Yorkshire, which is reported as being fully excavated, and The Garden Wall at Portsmouth Dockyard in Hampshire, which was removed because it was unsafe.

Six cases of the use of compulsory powers by the Secretary of State are recorded; all the sites concerned are of Roman date except for the Butterbump Round Barrow, near Willoughby in Lincolnshire; this latter case is of a cemetery containing at least 16 barrows, some of which still survive. Significant Bronze Age grave goods were found in one of the barrows when excavated with financial support from the Department of the Environment; because of this In Interim Preservation Notice was issued to save the remaining mounds from damage by ploughing. The Roman sites, in connection with which compulsory powers were used, are the Roman settlement meir Bourton Bridge, Lower Slaughter, Gloucestershire, which when excavated in part in x 967 , whound to include the remains of
a Roman posting house, wayside shrine, stable, bakehouse and inn, Brancaster Roman Fort (Branodunum) and surrounding civil settlement in Norfolk, the fort forming part of the line of Saxon shore forts which once ran from Brancaster $[$ the east coast to Portchester on the south coast; the third Roman site which concerned the Board was that of the Roman Road at Blackstone Edge at Littleborough in Lancashire, which is $n$ stretch of road well known for its unusual form of original Roman paving, being constructed of massive stone setts, with a central spine of millstone grit slabs; partly through the effect of weather the road had deteriorated; farther north still, the section of Hadrian's Wall at Grinsdale in Cumbria was threatened by - proposed extension to a sewage treatment works at Carlisle, and the Board urged that no development should be permitted which affected any part of the Wall and therefore recommended the serving of an Interim Preservation Notice. The last cause in this section raised matters of principle beyond the resolution of local problems; outline planning permission was granted by the local authority for deveolpment which affected the Roman town at Alcester, an important urban settlement known to have included many industrial workshops for leather and ironworking; the granting of planning permission for housing was done against the advice of the Ancient Monuments Directorate and the Board, while welcoming the issue by the Department of an Interim Preservation Notice and Preservation Order, "regretted that the monument could be saved only on payment of $=$ large sum in compensation under the Ancient Monuments Acts." The Board hopes that improved consultation between central and local government will prevent the situation recurring.

The Ancient Monuments Board advised on some nine cases during the year, including the threat to Stonehenge, posed by the large number of visitors to this most important monument; the Board is forthright in its analysis of the damage done and the remedies which need to be put into effect: "In particular the trampling of the stones by visitors has led to some erosion of the fallen stones, and the fingering and rubbing of faint carvings on some stones constitutes serious mutilation. We considered that re-siting the car parks and other facilities at $I$ greater distance from the monument would improve its setting and help to reduce the numbers of visitors, provided no transport system from car park to monument be provided. A further essential step to restore the integrity of the monument must be to close this part of the A344 Amesbury-Devizes road. In addition we recommend that the exclusion from the circle itself of visitors, other than those genuinely engaged in study, was now necessary in order to protect the fabric of the circles." Still in the Stonehenge area, the Board was concerned also with the damage being caused by visitors to Silbury Hill, although, in this case, the closure of the monument was not recommended. The Roman sites on which the Board advised, in addition to Alcester mentioned above, included the site of Corstopitum at Corbridge in Northumberland, which lies a few miles south of Hadrian's Wall; from excavations already carried out on that part of the site which is open to the public, it is known that this was the chief supply base for the Wall and the unexcavated area is thought to contain many kilns and tombs, as well as the remains of $\quad$ Roman aqueduct; because part of the unexcavated area was threatened by
proposed housing development, the Board recommended the issue of an Interim Preservation Notice and welcomed the fact that the Department of the Environment is negotiating for the purchase of the land. The Board also considered progress made during the excavations at the Roman fort and civil settlement at Vindolanda at Chesterholm in Northumberland; having heard that the Department of the Environment had agreed with farmers at Colchester in Essex that the depth of ploughing on a Roman site should be limited and that winter wheat without ploughing would be planted over certain areas, the Board " welcomed this step towards preservation through voluntary agreement between agricultural and archacological interests." The site in question, "a large, complex and possibly unique monument of which no part has yet been fully excavated," is at Cheshunt Field, Colchester. " Among other features, it contains $\square$ Roman fort, a Romano-Celtic temple and ambulatory, overlaying what may well have been an earlier sacred site, $I$ Roman theatre, $I$ complex of enclosures and linear ditches thought to be of Iron-age date, and possible kiln-site. A Roman road to Colchester leads north-eastwards from the area. Continued ploughing was cutting into the remains and we recommended that the whole area should be preserved by compulsory powers if necessary." So far as the later periods are concerned, the Board considers that the standard of repairs at Baguley Hall, Greater Manchester, has improved, and that the Department of Trade's proposal to replace $\llbracket$ Coastguard Station standing within the guardianship area of Tynemouth Castie in Northumberland offers the opportunity of better displaying an early zoth century gun battery. Finally, the Board advised on the case of Dunham Toll Bridge at Lindsey in Lincolnshire, which is described as the longest cast iron bridge in the Country, dating from 1832 ; the condition of the bridge has led its owners to propose its demolition and replacement, but the Board is in favour of its preservation " because of the national and even international significance of this example of cast iron technology which is now becoming all too rare."
It is recorded in the Report that ten monuments have been taken into the care of the Department of the Environment during the year under review, and these include Bcwhill House, Exeter, Devon; Battle Abbey at Battle in East Sussex; Hill Hall at Epping and Waltham Abbey Chapter House site, both in Essex; Sutton Valence Castle, Kent; Goodshaw Baptist Chapel, Rawtenstall in Lancashire; an additional area of Wharram Percy deserted medieval Village in North Yorkshire, and Marmion Tower at West Tanfield in the same County; S. Peter's Church, Barton-on-Humber in South Humberside, and finally Halesowen Abbey in Worcestershire. Some 452 monuments were recommended for scheduling by the Ancient Monuments Board during 1976, of which 34 are in Somerset, $3^{2}$ in Cornwall and 30 in Devon. These 452 monuments are divided up into the following categories: caves, 2 ; single, or groups of burial mounds, megalithic monuments and ritual and ceremonial sites, 67 ; camps and settlements, 67 ; Roman remains, 50 ; Saxon remains, 6 ; linear earthworks, 6 : ecclesiastical buildings, 33; crosses, 11; castles and fortifications, 33; deserted villages, settlements and moated sites, 69 ; industrial monuments, 28; other secular sites, $64 ;$ bridges, 14 ; and rounds, 2.

## EDUCATION IN THE UNITED KINGDOM

## ENGLAND AND WALES

## Department of Education and Science

Those responsibilities of the Secretary of State for Education and Science that relate to civil science and the arts and (exercised through the University Grants Committee) the universities cover the whole of Great Britain, but her functions in connection with schools, further education and teachers relate to England and Wales only, except that responsibility for nursery, primary and secondary education in Wales is in the hands of the Secretary of State for Wales. The Department of Education and Science does not run any schools or colleges, or engage any teachers, or prescribe textbooks or curricula, but it does set minimum standards of educational provision; control the rate, distribution, nature and cost of educational building; and control the training, supply and distribution of teachers. The Secretary of State's requirements under the Act are issued, and guidance is given, mainly in the form of regulations, orders and circulars addressed to local education authorities and other bodies, and in booklets. A report and six volumes of statistics are published annually.

A management review of the Department of Education and Science is being undertaken in 1977 78.

## H.M. Inspectorate

Her Majesty's Inspectors inspect schools and other educational establishments apart from universities, report to the Secretary of State for Education and Science on the efficiency of the educational system, and offer independent professional advice based on their observation and judgement to the Secretary of State, the Department of Education and Science, the local education authorities, and teachers. In December 1976 there were 459 H.M.I.s; in that year they visited nearly $30 \%$ of the maintained primary schools, nearly $70 \%$ of the maintained secondary schools, other grant-aided establishments from nursery schools to polytechnics, and independent schools. Much of the work of H.M. Inspectorate relates to national surveys of primary and secondary education.

## Local Education Authorities

The educational service is a national service locally administered. Among its main features are:-
(a) Its administration is decentralized, the responsibility for providing state primary, secondary and further education (but not university education) to meet the needs of their areas being that of the 162 local education authorities (L.E.A.'s).

These elected councils appoint education committees consisting of some of their own members (a majority of the committee) and other people with experience in education and knowledge of the local education situation. The L.E.A.'s maintain schools and colleges and build new ones, employ teachers and provide equipment. Most of the public money spent on education is disbursed by the local authorities. Education is the largest item of their expenditure. L.E.A.'s are financed by rate support grants from the Department of the Environment and from the rates; and employ more than one million people, half of them teachers, whose salaries account for almost half of the national expenditure on education.

## Voluntary Agencies

(b) Voluntary agencies play an important part in educational provision often in co-operation with the State. Some indication of its nature and extent is given below.

## SCHOOLS AND PUPILS

Schooling is compulsory for all children between 5 and 16 years. No fees are charged in any publicly maintained school.
There are four main categories of school: (a) those maintained by local education authorities, the authorities meeting their expenditure partly from local rates and partly from grants made by the Department of the Environment; (b) direct grant grammar schools which have been assisted by grants from the Department of Education and Science (in 1975 the Secretary of State announced the government's intention to withdraw financial support from these schools by stages from 1976 unless, by the end of 1975 they indicated an intention to seek entry to the maintained sector); (c) recognized independent schools, i.e. independent schools which have sought and obtained recognition as efficient after inspection by H.M. Inspectors of Schools; (d) other independent schools.

## County and Voluntary Schools

Maintained schools are of two types: (i) county schools ( $\mathbf{1 9 , 0 0 0 \text { ) which are built, maintained and }}$ staffed by local education authorities. Their managers (primary schools) and governors (secondary schools) are appointed by the L.E.A.'s. (ii) Voluntary schools $(8,500)$ which although built by voluntary bodies (mainly religious denominations) are maintained by an L.E.A. About two-thirds of the voluntary schools are Church of England schools and about 2,600 are Roman Catholic. Voluntary schoois are of three kinds: controlled, aided, and special agreement. In controlled schools $(3,549)$ the L.E.A. nominates two-thirds of the managers or governors (the rest are nominated by the voluntary body), bears all costs and appoints the teachers.
In aided schools (4,89x) the managers or governors (two-thirds appointed by the voluntary interest and one-third by the L.E.A.) are responsible for repairs to the outside of the school building and for improvements and alterations to it though the Department of Education and Science may reimburse up to four-fifths of approved capital expenditure. The L.E.A. meets all running costs. The managers or governors control the appointment of teachers. Special agreement schools (127) are those where the L.E.A. may, by special agreement, pay between one-half and three-quarters of the cost of building anew, or extending an existing, voluntary schools, almost always a secondary school. Two-thirds of the governors are appointed by the voluntary body and the remainder by the L.E.A. Expenditure is normally apportioned between the authority and the voluntary body as for an aided school.

## Direct Grant Schools

Direct grant grammar schools are being phased out starting from 1976 . By the end of $1975,5 x$ of these schools had said they intended to seek entry to the maintained sector as comprehensive schools (and in 1976 four of them did become comprehensive); others announced their intention of becoming independent.

Public Schools
By the term public schools is usually meant the independent schools in the membership of the Headmasters' Conference, the Governing Bodies Association or the Governing Bodies of Girls' Schools Association.

Independent schools charge fees and do not receive grants from the State. Preparatory schools are mainly for boys from about il to 13 years who wish to enter public schools. All independent schools are open to inspection and must register with the Department of Education and Science which lays down certain minimum standards and can make schools remedy any unacceptable features of their building or instruction and exclude any unsuitable teacher or proprietor. To be designated "recognized efficient", an indepenđent school must satisfy the D.E.S. that its standards are broadly comparable with those of grant-aided schools.

## The State System

Nursery Education is for children under 5 years who may attend a nursery school or a nursery class attached to a primary school. In the public sector there are 612 nursery schools accommodating about 48,000 children about two-thirds of whom attend part-time. In addition there are 304,525 boys and girls under compulsory school age who attend maintained primary schools full-time.

Primary Stage. This begins at 5 years and the transfer to secondary school is generally made at Ix years. Over half the primary schools take 5 to $x$ r-year olds; about a quarter are schools for infants (up to 7 years only); and most of the rest take juniors only ( 7 to II year olds). Most primary schools take both boys and girls. More than half have between 100 and 300 children each; most of the rest are smaller.

First Schools.-In some areas, first schools cater for ages from 5 to 8 , 9 or 10 ; they are the first stage of a three-tier system.

Middle Schools.-Middle schools (which take children from first schools) cover the age-ranges to $x 2,9$ to $x 2,9$ to $x_{3}$, 10 to $\pm 3$ or 10 to 54 .

Secondary Stage.-Secondary schools are for children aged in to 16 and over. The largest have over 2,000 pupils but more than half the schools take between 300 and 600 pupils. In January, 1975, when there were $3,619,302$ full-time pupils in maintained secondary schools the main types were: (a) comprehensive schools ( $2,459,648$ pupils), whose admission arrangements are without reference to ability or aptitude; (b) secondary modern schools ( 697,850 pupils) providing mainly a general education with a practical bias; (c) grammar schools ( $343,65^{8}$ pupils) providing an academic course from II to 16-18 years; and (d) technical schools ( 18,049 pupils) providing an integrated academic and technical course.

By 1976, 70\% of the maintained secondary school population were in comprehensive schools. The policy of the Government is to develop a fully comprehensive system of secondary education and to end selection at eleven plus or at any other stage.

The Further Stage is treated separately below.

## Primary and Secondary Schools

The number of full-time pupils in schools of all kinds in 1975 rose by o. $6 \%$ over the previous year but in the maintained sector there was again a slight drop in the number of full-time pupils in primary schools. This reflects the continous decline in the birthrate since 1964.

In January 1975, there were 33,085 schools, of which 30,416 were maintained by local education authorities, 298 were direct grant schools, $1,35^{8}$
were independent schools recognized as efficient, and $x, 005$ were other independent schools. There were at school in $x 975,9,6 x 7,474$ children $(4,934,796$ boys and $4,682,678$ girls) of whom $9,064,858$ were in maintained schools, $x 30,818$ in direct grant schools, $328,52 \mathrm{I}$ in recognized independent schools and 93,137 in other independent schools. Of those in maintained schools, 4,897, I48 were in primary, 407,525 in middle, and $3,619,302$ in secondary schools and the rest in nursery ( 15,365 ) or special ( 123,214 ) schools including hospital, or immigrant centres $(2,304)$. Boys and girls are taught together in most maintained primary schools. Nearly $80 \%$ of secondary school pupils attend mixed schools. At secondary level most recognized independent schools are for boys only or girls only.

Class Sizes.-The average class size in January 1976 was $29 \cdot 2$ for registered classes in primary schools and $22 \cdot 3$ for classes taught as secondary schools. The percentage of maintained primary and secondary school classes with 3 r or more pupils ( 1970 figure in brackets) was in 1976: primary schools $45.2 \%(67 \cdot 5 \%)$, secondary schools $\mathbf{1 5} \cdot 4 \%$ ( $23 \cdot 5 \%$ ).

School Meals.-L.E.A.'s must provide school dinners to all maintained school pupils who require them. In October $1976,5,503,000$ or $14^{\circ} 2$ per cent. of pupils at maintained schools took the school dinner; 14.2 per cent. of the dinners were free of charge. Free school milk is available to pupils in special schools, children in other maintained schools up to the end of the summer term after they become seven, and other junior children for whom it is recommended on health grounds by a school medical officer.

Older Pupils.-Reflecting the raising of the schoolleaving age in 1972-73, there were by January 1975 over $50 \%$ more boys and girls following G.C.E. "O" level or C.S.E. courses in maintained schools than in January 1973 (the 1975 total was 620,302 ). Pupils following G.C.E. "A" level courses, however, increased in number by only $1.4 \%$ in that period to 212,902.

Work Experience.-Many schools provide opportunities for pupils in their later secondary years to see something of the work and other activities of their neighbouring communities, as part of their curriculum. In recent years there has been $\quad$ marked growth in the provision of "work experience "schemes which involve the participation of pupils in the work of industrial, commercial and other firms.

Educational Disadvantage. As part of a policy of special educational help to children suffering from particular social difficulties, including immigrants, the Government in 1974 established an Educational Disadvantage Unit and a related non-government advisory committee. Both work in co-operation with an Assessment of Performance Unit with the wider brief of finding out why some children of all ranges of ability fall below their potential.

Examinations.-Secondary school pupils (and others) can take the General Certificate of Education (G.C.E.) or the Certificate of Secondary Education (C.S.E.). The examinations for the G.C.E., which are conducted by eight examining bodies (most connected with universities) are set at two levels: Ordinary level ("O O ") and Advanced level ("A"). "A" level is usually taken after two years in the sixth form following "O" level, which is normally taken at 16 years (earlier only if the head teacher agrees). The G.C.E. is not a " grouped subject " examination and candidates at either level may take one or more subjects as they wish. At
"A " level passes are awarded in five grades. "A" level candidates may take Special papers which are usually set on the same syllabus as the basic "A" level papers but contain more searching questions.

Under the grading system for "O" level, attainment in an " O " level subject is indicated by a grade $A, B, C, D$ or $E$ of which grade $A$ is the highest and grade $E$ the lowest. Candidates awarded grade A, B or $C$ have reached the standard of the former subject pass at " $O$ " level. Grades D and $E$ indicate lower levels of attainment.

Like the G.C.E. the Certificate of Secondary Education (C.S.E.) can be taken in one or more subjects. It is open to boys and girls in any school completing five years of secondary education, and is meant for pupils of about 16 years who are around the average in terms of ability for their age groups. Five grades are awarded. The C.S.E. can be examined in number of ways, internal and external, and is controlled largely by serving teachers sitting on the 14 regional examining boards.

Co-ordinating the work of the G.C.E. and C.S.E. examining boards, and advising them, is the Schools Council for the Curriculum and Examinations which was established in 1964 by the Secretary of State for Education and Science as independent advisory body financially supported by the D.E.S. and the L.E.A.'s and representing all educational interests with teachers forming majority of its members. The Council is particularly concerned with promoting and encouraging curriculum study and development. It carries out research and development work on curricula, teaching methods and examinations in primary and secondary schools. It is also concerned inter alia with maintaining comparability of standards between boards and also between the two examinations (grade 1 in the C.S.E. is intended to indicate $\boldsymbol{a}$ standard such that a candidate achieving it might reasonably have been expected to obtain a pass at " $O$ " level in the G.C.E. had he followed a course leading to that examination).

School-leavers. Some 707,000 children (provisional figure) left school in 1976, an increase of 16,000 compared with $1975.84 \%$ of leavers attempted C.S.E. or G.C.E. examinations and $82 \%$ of leavers gained some graded examination results, with $16 \%$ ( 122,000 children) gaining one or more " A " levels. Some $34 \mathrm{r}, 000$ leavers (just under half) gained one or more passes (grades A to C) at "O" level or grade $\#$ in the C.S.E.

Since r965 the number of school-leavers obtaining two or more " $A$ " levels has increased by about $25 \%$.

## TEACHERS

Although it is the duty of each Local Education Authority to ensure that there is efficient education to meet the needs of the local population, what is taught in the schools is normally decided on their behalf by the head teachers of schools.

Teachers are appointed by local education authorities, school governing bodies or managers. Those in maintained schools must (except student teachers and instructors) be approved as "qualified " by the Department of Education and Science. Most teachers become qualified by successfully completing a course at a college of education or at university department of education.

In Transition. Colleges of education are in a transitional period. The profession is moving towards an all-graduate entry (with certain exceptions, the last entry to non-graduate certificate of education courses for teacher training will be in 1979-80). Some of the colleges are extending their work beyond teacher training into other forms of
higher education. Some are amalgamating with other institutions and still others will close.

In recent years there has been wharp drop in the number of places for students in teacher training institutions. The number of students on initial training courses which had risen from $65,85 x$ in 1964 to $\times 19,647$ in 1972 fell to 104,326 in 1975 and (provisional figure) 89,840 in 1976. By 1981 the total of teacher training places will have fallen still further to 46,670 . It is because of the expected drop in pupil numbers that, in the next ten years or so, the number of newly trained teachers required to meet the needs of the schools will decline substantially. This expected fall in school population could, in the long term, allow continued improvement in the pupil-teacher ratio (about 20 to one) without further expansion of the teacher force.

There is, however, still some shortage of certain secondary specialist teachers-especially in mathematics, the physical sciences, remedial education, handicrafts and business studies.

Training to be Teachers. In autumn 1976, estimated admissions to full-time courses of initial teacher training ( 1975 figures in brackets) were: non-graduate entrants to colleges and departments of education: $18,666(28,349)$; colleges of education (technical): $1,4 \times 6(1,5 \times 8)$; art teacher training centres: 721 (70x); graduates taking one-year course of professional training in university departments of education: $4,862(4,844)$; graduates taking one-year course of professional training in colleges or departments of education: 5,434 (5,205).
The non-graduate intake in 1977 to initial training is being reduced to 12,000 compared with 20,000 io 1976 .

Training Institutions. Teachers are trained in institutions of various types. In October 1974, there were $\mathbf{y}$ o colleges maintained by local education authorities and 52 by voluntary bodies, and 33 departments of universities. These included 30 university departments of education providing mainly one-year courses for graduates; 150 colleges of education providing mainly three-and four-year courses; 8 departments of education in polytechnics, which also offered mainly three- and four-year courses; 13 art teacher training centres offering one-year specialist courses; and 4 colleges of education (technical) providing one-year and four-term specialist courses and initial training courses for serving teachers.

Serving Teachers. In January 1977, there were 2,138 more maintained nursery, primary and secondary school teachers (including the full-time equivalent part-time teachers) than there were in the previous year; the 1977 total was 462,232 giving 1 pupil-teacher ratio of 20.2 to I which compares with 21.4 to $\sin 1973$.

In March 1974 there were 499,554 full-time teachers in all grant-aided schools and establishments. 60,775 of them were in further education establishments and 11,076 in colleges of education.

Unemployment. The number of teachers registered as unemployed in 1976 was less than $x \frac{1}{2} \%$ of the teacher force.

Salaries. There are national salary scales for teachers in schools and other educational institutions maintained from public funds. There is superannuation scheme administered by the Department of Education and Science.

## HIGHER EDUCATION

"Higher Education" consists of the education provided by universities, polytechnics, colleges of education and in the advanced courses offered by colleges of further education. For details, see under " Universities ", "Teachers " and "Further Education".

## FURTHER EDUCATION

The term "Further Education "usually means all post-school education except that provided by universities.

Local Education Authorities are responsible for providing full-time and part-time courses of postsecondary education (other than university education) in their areas. There are ten Regional Advisory Councils which co-ordinate further education in their regions and nominate a majority of the members of the National Advisory Council on Education for Industry and Commerce which advises the Secretary of State for Education and Science on national educational policy relating to industry and commerce.

The 7,942 further education establishments (November 1975 enrolment $3,940,779$ students ( $58 \%$ of them women) other than the colleges of education, may be grouped in the following main categories of which all, except the last, are grant-aided:-
x. Polytechnics.-Thirty major centres in which a wide range of full-time, sandwich and part-time courses are provided for students at all levels of higher education, and entirely or almost entirely for those of 18 years or more. They have governing bodies with a large measure of autonomy and are mainly teaching institutions though provision is made for certain research where it is essential to the proper fulfilment of teaching functions and the maintenance of close links with industry. They complement the universities and colleges of education. By November 1975 there were 177,8 or students ( $27 \%$ of them women) enrolled in polytechnics, $145,69 \mathrm{x}$ of them taking advanced courses including 2,055 studying for $I$ university first degree and 55,8 II studying for a C.N.A.A. first degree.
2. Other Maintained and Assisted Major Establishments (527).-Including all major establishments, other than polytechnics, maintained or assisted by local education authorities and providing courses in art, agricultural, commercial, technical and other subjects. x,758,4r5 students.
3. Direct-Grant Establishments ( 18 ) which receive financial aid direct from the D.E.S. 6,656 students.
4. Evening Institutes $(7,260)$ offering wide range of courses, many of them recreational, for evening students, and often housed in premises used by day for other educational purposes.- $1,98 \mathrm{x}, 657$ students.
5. Independent Establishments (ro7) recognised as efficient by the Department of Education and Science. 16,250 students.

For Colleges of Education, see under " Teachers " above.

The number of students taking advanced courses in 1975 (full-time, part-time, day, sandwich, or evening only) leading to recognized qualifications at grant-aided establishments was 249,68 of whom $z o$ per cent were women. Of the $249,689,95,802$ were on full-time courses, 37,9 ro were sandwich course students, 85,186 were taking part-time day courses and $37,73 x$ were attending evening only classes. 3,680 of the total were working for a university first degrec, $62,88_{3}$ for a C.N.A.A. first degree (see belowi), 3,327 for a university or a C.N.A.A. higher degree and 55.592 for an H.N.D. or H.N.C. qualification.
In 1973 there was set up a Technician Education Council to develop a unified national system of courses for technicians in England, Wales and Northern Ireland; and in 1974 the Business Education Council which is concerned with the development of policies for a uniform national system of courses, in further and higher education, for people in business and commerce.

An important body with few, if any, parallels in other countries is the Council for National Academic

Awards (C.N.A.A.) which awards degrees to students taking courses approved by it in non-university institutions. Following a recommendation of the Robbins Committee it was established by Royal Charter in 1964 as an autonomous body. More than roo colleges in Britain conduct courses leading to its degrees: B.A., B.Ed., B.Sc., and the higher degrees of M.A. and M.Sc. (for post-graduate course work) and M.Phil. and Ph.D. (for research which may be undertaken jointly in industry and college). In $2976-77,94,523$ students were working for C.N.A.A. qualifications. Of these, 87,587 ( 52,155 full-time, 28,662 sandwich and 6,770 part-time) were studying for first degrees in: science and technology $39.5 \%$; arts and social studies $35 \%$; art and design $13 \cdot 8 \%$; education $9 \cdot 7 \%$; and interdisciplinary courses $I \cdot 7 \%$. Of the 94,523 , 1,553 were working for an M.A. or M.Sc. and $2,48 \mathrm{I}$ for a research degree (M.Phil. or Ph.D.).

The Diploma of Higher Education (Dip.H.E.) is a two-year diploma intended to serve as either a terminal qualification or as a stepping stone to a degree or other further study; it has a normal entry requirement of two " $A$ " levels. The Dip. H.E. is awarded by either the Council for National Academic Awards (see above) or by a university. Courses leading to it are offered by more than 70 polytechnics and colleges. The emphasis in most Dip. H.E. courses is on the humanities and social sciences but many colleges offer scientific options.

Adull Education.--"Adult Education" is generally taken to mean courses of post-school education outside the main areas of higher, professional and technical education. A wide variety of such courses for the education and recreation of adults is provided by local education authorities, the Workers' Educational Association and other voluntary bodies, the extra-mural departments of 'universities and certain residential colleges. About $x, 800,000$ students (provisional figure) were enrolled in November 1976 by local education authorities at adult education centres and evening institutes.

In 1977 - new Advisory Council for Adult and Continuing Education was established by the Secretary of State for Education and Science.

The Youth Service.-Provides for the spare-time activities of young people. The Local Education Authorities co-operate with voluntary bodies in their areas and may maintain their own youth clubs. There are various national voluntary youth organizations which receive grants from the Department of Education and Science. There are over 3,000 full-time youth leaders on the Department's register. In addition there are many thousands of parttime paid and unpaid workers. A basic $z$-year training course, for youth and community workers, at further education colleges leads to a professional qualification.

A Further Education Information Service is provided each summer by the local education authorities in cooperation with the polytechnics and other colleges offering full-time degree and higher national diploma courses, and the Department of Education and Science. Its purpose is to provide up-to-date information and advice about full-time degree, H.N.D. and Dip.H.E. courses in the colleges for those who find themselves, late in the summer, without a place on a course. A list of local advisory officers is available from the D.E.S.

Finance. $£ 5.793 \cdot 6$ million was, in $1975-76$, the total of public expenditure on education in England and Wales (excluding Welsh schools) and on universities in Creat Britain. This compares with $£ 4,566 \cdot 3$ million in 1974-75.
Excluding the universities, the recurrent expenditure in 1975-76 of the education service in

England and Wales was $£ 4,015$ million; $66.9 \%$ of this expenditure was on teachers' salaries and $15 \cdot 3 \%$ on other wages and salaries.

The net average cost in 1975-76 of tuition per pupil was: nursery schools 6608 ; primary schools Cz61; secondary schools-pupils aged 11-16 £ 379, aged $16+£ 694$; and special schools £ 1,240 。

## SCOTLAND

The educational system of Scotland has developed independently of that of England and has $\square$ number of distinctive features. The general supervision of the national system of education, except for the universities, is the responsibility of the Secretary of State for Scotland acting through the Scottish Education Department. The duty of providing education locally rests with the nine regional councils and three island councils. Educational facilities of various kinds are also provided by the governing bodies of grant-aided schools, independent schools, "central institutions", and national voluntary organizations in the field of informal further education.

Schools in Scotland fall into three main categories, viz. education authority schools which are managed by education authorities and financed partly from local rates and partly from rate support grant: grant-aided schools, conducted by voluntary managers who receive grants direct from the department; and independent schools which receive no direct grant, but which are subject to inspection and registration.

In 3974-75 there were 3.574 education authority and grant-aided schools and departments of which 325 were nursery, 2,537 primary, 472 secondary and 176 special, together with 64 occupational centres catering for the most severely mentally handicapped. There were also 103 registered independent schools. The total number of pupils in education authority and grant-aided schools and departments (including special) was $1,075,229$ ( 549,597 boys, 525,632 girls) of which 20,560 ( 10,460 boys, 10,100 girls) received nursery education.

Schooling normally starts at the age of 5 , and the primary school course lasts for 7 years. Primary schools usually take both boys and girls. Pupils transfer from the primary course to secondary courses about the age of 12 .

Over 98 per cent of secondary pupils in education authority schools attend schools with $\quad$ comprehensive intake to the first year. The majority of these schools provide a full range of courses appropriate to all levels of ability from first to sixth year, although $\quad$ decreasing number offer only $z$ - and 4 -year courses, on completion of which children may continue their secondary education at the nearest 6 -year comprehensive. There are also a few schools which are selective in that they admit onfy the less able pupils and which offer only noncertificate courses or courses leading to the Ordinary grade in the Scottish Certificate of Education examinations. Pupils from these schools wishing to continue their education to the Higher grade of the S.C.E. may also transfer to the fifth and sixth year local comprehensive.

The Scottish Certificate of Education examination is conducted by the S.C.E. Examination Board. Pupils may attempt as many of a wide range of subjects as they are capable of, on either the Ordinary grade which corresponds to the Ordinary level of the General Certificate of Education, or on the Higher grade which is normally taken a year earlier than the G.C.E. Advanced level and is therefore not of so high is standard. The Board grants $\begin{aligned} & \text { Certificate of Sixth Year Studies }\end{aligned}$ designed to give direction and purpose to sixth-year work by encouraging pupils who have completed
their main subjects at Higher grade to study a particular subject in depth.

Further Education.-Facilities for further education are provided by 14 Central Institutions (grant-aided colleges administered by independent Boards of Governors) and by 70 further education day centres managed by education authorities. The Central Institutions provide mainly advanced courses in science and technology, commerce, art, music, domestic science, and other subjects, leading to their own diplomas, to professional qualifications or, in certain cases, to C.N.A.A. degrees.

The further education centres normally provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects, but $\quad$ few offer courses of degree level. Courses are offered in $=$ wide variety of subjects but to make the most economic use of resources, provision of certain courses is made on a regional or even a national basis.

Teachers.-All teachers in permanent posts in public or grant-aided schools in Scotland are required to be registered with the General Teaching Council for Scotland (which is independent of the Scottish Education Department) and normally to hold a teaching qualification awarded by a Scottish college of education. There are ten of these colleges, seven of which provide both one- and three-year courses leading to - Teaching Qualification (Primary Education) or 1 Teaching Qualification (Secondary Education). Of the remaining three colleges, one is a residential college of physical education for women and the other two provide only courses leading to Teaching Qualification (Primary Education). Nine of the colleges, in conjunction with local universities or the Council for National Academic Awards, also provide fouryear combined courses leading to the degree of B.Ed.

The basic scales of teachers' salaries are for primary and secondary levels, with additional payments for qualifications and for posts of special responsibility.

## NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly comparable to that in Great Britain. Under the 1947 Act (and later amendments) primary education is provided for children up to about $x \frac{1}{2}$ years of age when they are transferred to secondary school. The main types of secondary school are: secondary grammar and secondary (intermediate). Selection for secondary education is based on verbal reasoning tests at eleven-plus combined with teachers' assessments of performance in school subjects. Fees are charged at grammar schools but qualifed pupils there receive scholarships from their local education authority.
In January 1976 there were 36 nursery schools with $x, 770$ pupils and $6 x$ full-time teachers; $x, x 10$ primary schools with 211,360 pupils and $8,0 x_{3}$ fulltime teachers; 262 secondary schools with 157,507 pupils and 8,999 full-time teachers; 30 special schools with 2,519 pupils and 254 full-time teachers.

In x975-76, $4 \mathrm{r}, \mathrm{I} 82$ students were enrolled in institutions of further education; of these 4.772 were taking advanced courses, and 36,410 nonadvanced, $\mathbf{x 2 , 7 3 6}$ were full-time, 12,930 were on day-release, 802 were on block release, and $\mathbf{1 4 , 7 3 4}$ were other part-time. The training of teachers is carried out in 5 colleges, and in the department of education of the Queen's University of Belfast and the education centre of the New University of Ulster.

Expenditure from public funds on education in NorthernIreland during 1974-75 was $£ 260,990,000$.

## UNIVERSITIES

There are 44 universities in the United Kingdom (see pp. 502-32). Of these, 33 are in England, eight in Scotland, two in Northern Ireland and one (a federal institution) in Wales. In addition, there is the "Open University" which provides courses leading to degrees by a combination of television, radio, correspondence, tutorials, short residential courses and local audio-visual centres. The Open University offers undergraduate (no qualifications needed for entry), post-experience and postgraduate courses. It is grant-aided directly by the Department of Education and Science and does not come within the University Grants Committee system. More than 5,000 students graduate each year from the Open University.

A University College at Buckingham admitted its first students in February 1976; it provides Iwojear course leading to a Licence and its tuition fees were not expected to exceed $£ 2,000$ for 1978 . Its academic year consists of 4 terms of so weeks each.

In December 1974 there were 257,684 full-time students enrolled at universities in the United Kingdom; of these, $33 \%$ were women, nearly $11 \%$ from overseas and nearly $19 \%$ postgraduate students. In addition there were 25,373 parl-time students, nearly $87 \%$ of them at postgraduate level. The number of new undergraduate entrants (fulltime) in 1974-75 was $72,74 \mathrm{I}$; the corresponding figures for $1958-59$ and $1965-66$ were 29,054 and 52,446 . The full-time total of 257,684 in 1974-75 compares with just over 50,000 in 1938 39. In $1974,54,8 \times 3$ first degrees (including $3,6 \times 6$ first class honours degrees) and 13,857 higher degrees were awarded by universities. Women obtained $33 \%$ of the first degrees ( $23 \%$ of the first class honours degrees and $16.5 \%$ of the higher degrees. In 1974-75 there were 37,909 full-time teaching and research staff in U.K. universities; 3,406 of them were professors, 6,351 readers or senior lecturers, 99,677 lecturers or assistant lecturers. Only $2 \%$ of the professors were women and $x 5 \%$ of all teaching and research staff were women.

By 1976-77 (provisional figures) student numbers had risen to 272,500 full-time and sandwich students; $82 \%$ were undergraduates and $18 \%$ postgraduates.

Students applying for admission to a first degree course at sities Central Council on Admissions (U.C.C.A.) which was set up by the universities in 196r on the initiative of the Committee of Vice-Chancellors and Principals. All universities participate fully in the U.C.C.A. Scheme except certain Scottish universities. The U.C.C.A. office is in Cheltenham.

The requirements for entry to first degree courses
may vary somewhat from one university to another but the universities publish co-operatively an annual Compendium which describes these requirements in detail.

Students who are normally resident in Britain, have certain minimum qualifications and have been admitted to a university in the United Kingdom are entitled to an award from public funds; the amount varies according to the financial circumstances of the students and their parents. In $1977-78$ students with mandatory awards will not have to pay tuition fees; the parental contribution scale will apply only to grants for maintenance.

In 1977-78, tuition fees for first degree courses (except at the Open University) were $£ 500$ for home students and $£ 650$ for overseas students. At postgraduate level they were $£ 750$ and $£ 850$.

The recurrent grant paid to the universities in $1975-76$ by the government totalled $£ 515$ million and the grant for 1976 -77, announced as a cash limit, was $£ 58 \mathrm{I}$ million. The grant for furniture and equipment in 1975-76 was $f_{4} 46 \cdot$ I million and in 1976-77 £29.7I million. A building starts programme of 64 million was announced for the year beginning with April 1977.

The University Grants Committee advises the Secretary of State for Education and Science nill university matters. Most of its members are academics or businessmen.

Although the universities have freedom in academic matters, the Government, through the U.G.C., determines the total size of the university student population, strongly influences its distribution between arts, science, medicine, etc., and determines the part which the university sector plays in the whole higher education system.

The Comptroller and Auditor General has access to the books and records of the U.G.C. and of the universities.

## SCHOOLS COUNCIL FOR <br> CURRICULUM AND EXAMINATIONS <br> 160 Great Portland Street, W.x

Established in 1964 , the Schools Council is an independent body representing all sections of the education service in England and Wales-with majority of teacher members on its main committees. It undertakes research and development in the curriculum and keeps under review teaching methods and examinations in schools, including aspects of school organization in so far mey affect the curriculum.

The Schools Councll is jointly financed by the Department of Education and Science and local education authorities.
Chairman, Sir Alex Smith.
Joint Secretaries, Mrs. D. M. White; J. G. Raitt; P. M. Dines.

## NATIONAL INSURANCE AND RELATED CASH BENEFITS

The State insurance and assistance schemes in force from July 5,2948 , comprised schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances: The Ministry of Social Security Act, 1966, introduced $\quad$ scheme of non-contributory benefits, termed supplementary allowances and pensions, in place of national assistaps and non-contributory old age pensions, and provided for the establishment of new Ministry of Social Security (now the Department of Health and Social Security), with overall responsibility for the existing insurance schemes and family allowmine scheme and the new scheme of supplementary benefits, in place of the Ministry of Pensions and National Insurance and the National Assistance Board, which were abolished.

The Conservative Government's Social Security Act, r973, which was intended to be brought into force in April, x975, provided for the replacement of the National Insurance scheme by a basic scheme of social security, offering a range of benefits, including flat-rate basic pensions, similar to those under the existing legislation; a separate reserve pension scheme providing, in addition to the basic pension, earnings-related pensions for those employees not in recognized pensionable employment; and the assimilation of the Industrial Injuries scheme to the basic scheme. It also laid down minimum conditions for recognition of occupational pension schemes so as to exempt the employers and employees concerned from liability to contribute to the reserve pension scheme.

The new Labour Government decided that the basic scheme provisions of the $\mathbf{9 7 3}$ Act should come into force on April 6, 1975, planned, but it decided not to bring into effect the provisions of that Act relating to the reserve pension scheme or the recognition tests for occupational pension schemes seeking exemption from the reserve pension scheme (except the provisions relating to the preservation of benefits under occupational schemes). Effect was given to the Government's decisions by order made in June 1974 under the 1973 Act, and by the Social Security (Amendment) Act, 1974, passed in December, 1974.

Three measures-the Social Security Act, 1975 (now the principal Act) ; the Social Security (Consequential Provisions) Act, 1975; and the Industrial Injuries and Diseases (Old Cases) Act, 1975-were enacted on March 20, 1975, for the purpose of consolidating the law relating to social security in Great Britain, and corresponding measures were passed for Northern Ireland.

The Labour Government published in September, 2974, in a White Paper, "Better Pensions fully protected against inflation ", its proposals for a new pensions scheme. The Social Security Pensions Bill based upon these proposals, after consultation with interested bodies, was introduced, with an explanatory memorandum, in February, r975, and after amendment was passed as the Social Security Pensions Act, 1975, in August, 1975. Preparations are being made for the new scheme to come into force in 1978 (see p. 6I6).

## SOCIAL SECURTTY SCHEME, 1975

From April 6, 1975, the National Insurance scheme 1948-1975 was replaced by a new scheme of social security benefits and contributions, which now operates under the Social Security Acts 1975 to 1977 and regulations made thereunder. Like the former scheme, the new scheme is financed on a pay-as-you-go basis mainly by contributions but in part out of Exchequer funds (rates of benefit and of
contributions being reviewed normally annually in accordance with statutory criteria), but the new scheme contributions, to greater extent than national insurance contributions, are earningsrelated. The graduated pension scheme $196 x-1975$ has been wound up (existing rights being preserved); otherwise the new scheme provides a pattern of pension and other benefits similar to that of the old scheme. The Industrial Injuries scheme continues with only minor changes, but steps have been taken to assimilate the industrial injuries legislation to the general scheme: thus the separate industrial injuries contribution and the Treasury supplement thereto under the Industrial Injuries Acts have been abolished, and the Industrial Injuries Fund has been merged with the National Insurance Fund.

## CONTRIBUTIONS AND <br> CONTRIBUTION CONDITIONS

The funds required for paying benefits payable under the Social Security Acts out of the National Insurance Fund and not out of other public money; for the making of payments towards the cost of the National Health Service and into the Redundancy Fund; and for paying benefit under the Industrial Injuries and Diseases (Old Cases) Act, 1975, are provided by means of contributions payable by earners, employers and others (such nonemployed persons paying voluntary contributions), together with the Treasury supplement.

Contributions are of four classes:
Class I, earnings-related:
(a) primary Class $x$ contributions from employed earners; and
(b) secondary Class I contributions from employers and other persons paying earnings;
Class 2, flat-rate, payable weekly by selfemployed earners;
Class 3 , flat-rate, payable by earners and others voluntarily with view to providing entitlement to benefit, or making up entitlement; and
Class 4, payable by self-employed persons in respect of the profits or gains of trade, profession or vocation, or in respect of equivalent earnings.
Particulars of the contribution rates and earnings limits for contribution liability for the tax year which started on April 6, 1977, are given on p. 1056.

Regulations state the cases in which earners may be excepted from liability to pay contributions, and the conditions upon which contributions are credited to persons who are excepted.

The Secretary of State for Social Services is empowered by the Social Security Acts to alter certain rates of contributions by order approved by both Houses of Parliament, and is required by the same enactments to make annual revicws of the general level of earnings in order to determine whether such an order should be made. The Government Actuary has pointed out that with system of mainly earnings-related contributions the income of the National Insurance Fund will rise automatically with increases in the general level of earnings and will broadly be sufficient to meet the cost of corresponding increases in the level of benefits provided the earnings limits for contribution liability and the flat-rate (Classes and 3) contributions are adjusted regularly. Following the decision in the summer of 1976 to make further increases in benefits in November, 1976 , provision was made by the Social Security (Contributions, Re-rating) Order, 1976, made in January, 1976, for increases in certain rates of contributions and for
changes in the various earnings limits for contribution liability for the $1977-78$ tax year. The new rates and limits and a $a$ per cent surcharge added to secondary Class 1 contributions for taxation purpomapplied from April $6, x 977$ (see p. 2056). It is expected that a further order will be made later in 1977 setting out the rates and limits which are to apply for the tax year $197^{8-1979}$ when the new State pension scheme comes into force.

The yearly Treasury supplement to the National Insurance Fund is equal to 18 per cent. of the contributions of the four classes paid during the year after deducting the National Health Service allocation and the allocation to the Redundancy, etc., Funds (see p. Io56).

## BENEFITS

The benefits payable under the Social Security Acts are as follows:
( I ) Contributory Benefits:
Unemployment benefit.
Sickness benefit.
Invalidity pension and allowance.
Maternity benefit, comprising maternity grant and maternity allowance.
Widow's benefit, comprising widow's allowance, widowed mother's allowance and widow's pension.
Child's special allowance.
Retirement pensions of the following categories:
Category A.
Category B.
Death grant.
(2) Non-contributory Benefits:

Guardian's allowance (see p. 628).
Attendance allowance (see p. 6x7).
Non-contributory invalidity pension (see p. 618 ).

Mobility Allowance (see p. 618).
Invalid care allowance (see p. 6x8).
Retirement pensions of the following categories.
Category C (see p. 617). Category D (see p. 6x7).
(3) Benefits for Industrial Injuries and Diseases.

Cash benefits provided under other enactments (supplementary benefits, child benefit, and family income supplement) are dealt with on pp. 1054-55. Leaflets relating to the various benefits are obtainable from local Social Security offices.

The Social Security Acts empower the Secretary of State to increase certain rates of benefit by order approved by both Houses of Parliament, and require him to increase certain rates by such an order if an annual review shows that they have not retained their value in relation to the general level of earnings and prices obtaining in Great Britain.

An order providing for increases in benefit rates took effect from November 15, 1976. Further increases in benefits were authorised by the Social Security Benefits Up-rating Order, 1977 , made in July, 1977. These new rates are to apply from November 14, 1977.
Entitlement to the contributory benefits provided by the Social Security Acts (except invalidity benefit) depends on contribution conditions being satisfied either by the claimant or by some other person (depending on the kind of benefit). The class or classes of contribution which for this purpose are relevant to each benefit are follows: Short-term benefits

| Unemployment benefit | Class y |
| :--- | :--- |
| Sickness benefit | Class y or 2 |
| Maternity grant | Class x or 3 |
| Maternity allowance | Class y or |
| Widow's allowance | Class $\mathrm{x}, \mathrm{or} 3$ |

Other benefits
Widowed mother's allowance
Widow's pension
Child's special allowance $\}$ Class $x$, $n$ or 3
Category A retirement pension Category B retirement pension Death grant
With the change from a system of flat-rate national insurance and industrial injuries contributions and graduated pension contributions to system of wholly earnings-related contributions for employed earners the contribution conditions for entitlement to benefit could no longer be based on the number of weekly contributions paid in a contribution year or throughout a working life. The Social Security Act, 1975, introduced a new system of contribution conditions related to yearly levels of earnings on which contributions have been paid. The contribution conditions for different benefits are set out in sections 13 to 33 of and Schedule 3 to the Act, and in summary form in leaflets on the benefits available at local Social Security offices. There are two contribution conditions for most of the benefits. The first condition must be satisfied to qualify for benefit at all; the second condition generally determines whether benefit is paid at the standard rate or at reduced rate. Under the arrangements made for the transition from the old scheme to the new one, provision has been made for such matters as treating old-style flat-rate contributions as new-style earnings-related contributions and vice versa, and the use of modified contribution tests for shortterm benefits for an initial period following the start of the new scheme.

There is one system of adjudication on all claims for benefit under the Social Security Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Chief Commissioner and Commissioners.

The rates of benefit stated below are, unless otherwise indicated, the standard rates having effect from dates in the week beginning November 14 , 1977.

## UNEMPLOYMENT BENEFIT

The standard weekly rates of flat-rate benefit payable to primary Class I contributors ave as follows:

Man, single woman or widow.
Married
Increase of benefit for only child or elder or
eldest child (ordinary rate) in addition to child benefit.
3.50

Increase of benefit for each additional child (ordinary rate) in addition to child benefit................................
Increase of benefit for wife or other adult
dependant (ordinary rate) where payable.
3.00
$9 \cdot 10$
Waiting Period.-Flat-rate benefit is not payable for the first three days of a period of interruption of employment.

Duration of Benefit.-Benefit is payable in $\quad$ period of interruption of employment for up to $3 \times 2$ days (a year). Spells of unemployment and sickness not separated by more than $x_{3}$ weeks count as one period of interruption of employment.

Requalification for Benefit.-A person who has exhausted benefit requalifies therefor when he has again worked -1 employed earner for at least $x 6$ hours I week for 13 weeks.

Disqualifications.-There are disqualifications for receiving benefit, e.g. for period not exceeding six weeks if a person has lost his employment
through his misconduct, or has voluntatily left his employment without just cause, or has, without good cause, refused an offer of suitable employment or training.
Earnings-related Supplement.-This supplement is payable to claimants under minimum pension age who are entitled to flat-rate unemployment or sickness benefit or maternity allowance. The amount of the supplement depends upon reckonable earnings in the relevant income tax year. Where based on earnings in the $1975-76$ income tax year, it is one-third of the amount of reckonable weekly earnings lying between £ri and £ $£ 30$ and 15 per cent. of those lying between $£_{30}$ and $£ 69$. Where it is based on earnings in the $197^{6-77}$ income tax year, it is one-third of the amount of reckonable earnings lying between $£^{2} 3$ and $£_{30}$ and 15 per cent. of those lying between $\mathcal{L}_{30}$ and $\mathrm{E}_{95}$. The total benefit, including increases for dependants, is usually subject to a maximum of 85 per cent. of earnings. The supplement starts from the thirteenth day of $I$ period of interruption of employment and lasts for up to maximum of six months. Periods of unemployment or sickness not separated by more than 13 weeks are treated as one period of interruption of employment. Where employment is suspended but not terminated by the employer, e.g. short-time working or lay-off, the supplement is not payable for the first six days (except Sundays and holidays) in any continuous period of suspension.

## SICKNESS BENEFIT

Standard Rates of flat-rate Benefit payable to primary Class I and to Class $\quad$ contributors while incapable of work through illness or disablement.-Same as for unemployment benefit.

Waiting Period.-Same as for unemployment benefit.

Duration of Benefit.-Sickness benefit is payable for 28 weeks of sickness and is then replaced by invalidity benefit (see below).

Disqualifications.-Regulations provide for disqualifying a person for receiving sickness or invalidity benefit for a period not exceeding six weeks If he has become incapable of work through his own misconduct or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or observe prescribed rules of behaviour.

Earnings-related Supplement.-The supplement and the rules as to duration are the same as for the supplement to unemployment benefit.

## INVALIDITY BENEFIT

Normally, after 28 weeks of sickness, sickness benefit is replaced by an invalidity pension of $£ 17.50$ (£xo 50 for a wife or other adult dependant) unless the claimant is over pension age and has retired from regular employment. In addition an invalidity allowance is payable if incapacity for work begins more than five years before pension age. The allowance varies in amount from $£ 1 \cdot 15$ to $£_{3} \cdot 70$ a week, according to the age on falling sick, and if still in payment at pension age will continue as an addition to retirement pension. The increases of benefit for children of an invalidity pensioner are at the higher rate, viz., $£ 7.40$ for the first child and 66.90 for any other child, in addition to child benefit. Earnings-related supplement is not payable with invalidity benefit. The dependent wife of an invalidity pensioner residing with him is subject to the same weekly earnings limit as applies to retirement pensioners which was increased by $\mathcal{C} 5$ to $£ 40$ from the week beginning November 14, 9977 . As to the age addition if the pensioner or dependant is 80 or over, and non-contributory invalidity pensions, see 1054-55).

## MATERNITY BENEFITS

Maternity Grant.-A cash grant of $£ 25$ is payable on the mother's own insurance or on her husband's, or late husband's, whether she is confined at home or in hospital. Extra grants are payable, in certain circumstances, if more than one child is born.
Maternity Allowance.-A woman who has been employed or self-employed and paying contributions at the full rate receives in addition a maternity allowance of $\mathcal{C} 14 \cdot 70$ I week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. Earnings-related supplement is payable with maternity allowance if the claimant's title to the supplement has not been used up in respect of other benefits, see above.

## WIDOW'S BENEFITS

Only the late husband's contributions of any class count for widow's benefit in any of its three forms.

Widow's Allowance.-A woman who at her husband's death is under 60 (or over 60 , if he had not retired), receives (during the first 26 weeks of widowhood) cash allowance usually of $£ 24.50$ a week with increases of $£_{7} \cdot 40$ for the first or only child and $8.6 \cdot 90$ for each other child, in addition to child benefit. She may also be entitled to an earnings-related addition to her widow's allowance based on her late husband's earnings (reckoned in the same way as for earnings-related supplements to unemployment and sickness benefit), see above.

Widowed Mother's Allowance. - When the 26 weeks of widow's allowance have elapsed, a widow Who is left with one or more dependent children receives a cash allowance usually of $£ 24.90$ a week as long as she has a child of qualifying age, and in addition $£ 6 \cdot 90$ for each additional child, as well as child benefit. A widowed mother's personal allowance, usually $£ 1750$ a week, is payable to widows who, when their widow's or widowed mother's allowance ends, have living with them son or daughter under 19, who has left school and is not an apprentice.

Widow's Pension.-A widow receives this pension usually of $£ I 7.50$ a week when widow's allowance ends, if she was over 50 at the time of her husband's death; or (ii) when her widowed mother's allowance or widowed mother's personal allowance ends, if she is then over 50 ( 40 if widowed before February 4, 2957).

Flat-rate widow's pensions on a graduated scale were introduced in April 1971 for women who are widowed between the ages of 40 and 50 , or who cease to be entitled to a widowed mother's allowence between those ages.

Widow's benetit of any form ceases upon remarriage.

## CHILD'S SPECIAL ALLOWANCE

A woman whose marriage has been dissolved or annulled and who has not re-married is paid a special allowance on the ex-husband's death based on his contribution record. The normal condition is that she has If child to whose maintenance he was contributing, or had been liable to contribute, at least 25p a week in cash or its equivalent The allowance is $£_{7} \cdot 40$ a week for the first or only child and $£ 6.90$ for each other child, in addition to child benefit.

## RETIREMENT PENSION <br> (CATEGORIES A AND B)

A Category A pension is payable for life to men or women on their own contributions if (a) they are
over pension age ( 65 for man and 60 for a woman), and (b) they have retired from regular employment. Men aged 70 or over and women aged 65 or over are not required to satisfy condition (b).
The standard flat-rate pension, when the contribution conditions are fully satisfied, is $£ 17.50$, plus £xo-50 for a dependent wife who is not herself qualified for a pension, phes $<740$ for the first or only child and $£ 6.90$ for each other child, in addition to child benefit. An increase for a dependent wife is reduced, under the earnings rule, below, if she earns more than a certain amount. (As to the age addition payable at 80 , see p. 1054.)

Where - person does not retire at 65 ( 60 for a woman) or later cancels retirement, and does not draw - Category A pension, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 ( 65 for a woman), in respect of contributions paid when employed or selfemployed during the five years after reaching minimum pension age. For periods of deferred retirement after Aprii 5, 1975, the rate of pension (without any increases except invalidity allowance), when it is finally awarded, will normally be increased by one-eighth of one per cent. for each week of deferment except those weeks in which other benefits (such as sickness or unemployment benefit) were drawn. A married man can also earn extra pension for his wife.
A Category $B$ pension is normally payable for life to a woman on her husband's contributions when he has retired, or is over 70 , and has qualified for his own Category A pension, and she has reached 60 and retired from regular work or has reached 65 . It is also payable on widowhood after 60 whether or not the late husband had retired and qualified for his own pension. The weekly pension is payable at the lower rate of $£ 10 \cdot 50$ while the husband is alive, and at the higher rate of $£ 17.50$ on widowhood after 60 . Where a woman is widowed before she reaches 60 , a Category $B$ pension is paid to her on reaching 60 at the same weekly rate as her widow's pension if she retires. If a woman qualifies for a pension of each category she receives whichever pension is the larger. For periods of deferred retirement after April 5, 1975, Category B pension will normally be increased by one-sixteenth of one per cent. of the husband's pension rate (apart from any increase other than invalidity allowance) for each week while both husband and wife defer retirement. If the husband dies after April 5, 1975 , the extra pension which he earned for his wife by not drawing his pension after she reached 60 will be doubled. She will also receive half of any extra pension he earned for any period before she reached 6 . (As to the age addition payable at 80 , see p .1054. .)

A man aged 65 to 70 , or a woman aged 60 to 65 . who has qualified for pension will have it reduced If he or she earns more than a certain amount. From the week beginning November 14, 1977, the weekly earnings limit was increased by $£ 5$ to $£ 40$. A man's pension is not affected by his wife's earnings unless he is drawing an increase of his pension for her.

Unemployment, sickness or invalidity benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular work at the same rate as the basic retirement pension they would have received had they retired. A retirement pension will be increased by the amount of any invalidity allowance the pensioner was getting within the period of 13 weeks before reaching minimum pension age. As to attendance allowance and invalid care allowance, see ro54-55 Persons who do not qualify for $\quad$ Category $A$ or 3 pension may qualify for a Category C or D
pension (see p. ro55), or for a supplementary pension (see p. xo54).

## GRADUATED PENSION

The graduated pension scheme under which national insurance contributions and retirement pensions were graduated within specified limits, according to earnings, was discontinued in April, 2975, under the Social Security Act, 1975. Any graduated pension which an employed person over x8 and under 70 ( 65 for a woman) had earned by paying graduated contributions between April 6 , 1961, when the scheme started and April 5, 1975, will be paid when the contributor retires, or at 70 ( 65 for a woman), in addition to any retirement pension for which he or she qualifies.

Graduated pension is at the rate of $2 \frac{1}{2} \mathrm{p}$. week for each "unit" of graduated contributions paid by the employee (half a unit or more counts as whole unit). A unit of contributions is 67.50 for men, and $\mathcal{E} 9 \cdot o$ for women, of graduated contributions paid.

A wife can get 1 graduated pension in return for her own graduated contributions, but not for her husband's. A widow gets graduated addition to her retirement pension equal to half of any graduated additions earned by her late husband, plus any additions earned by her own graduated contributions. If $\|$ person defers retirement beyond 65 ( 60 for woman), half the graduated pension he or she has forgone by deferring retirement (whether before or after April 5, 1975) will be treated as extra graduated contributions paid, and will count towards further graduated pension on retirement or at 70 ( 65 for $I$ woman).

## DEATH GRANT

A death grant is payable on the death of a qualifying contributor or of his wife, child or widow or, if the contributor is a woman, of her husband, child or widower, and also in respect of the deaths of certain handicapped persons on the insurance of close relatives. The normal grant is for an adult $£ 30$, a child aged $6-17 £^{22} \cdot 50$, child aged $3-5 £ \times 5$, a child under 3 £9. For the deaths of people who on July 5,1948 , were between 55 and 65 (men) or between 50 and 60 (women) the grant is $£ \times 5$. No grant is payable for deaths of persons already over pension age on July 5, 1948.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

## INDUSTRIAL INJURIES BENEFITS

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injuries caused and prescribed diseases and injuries developed on or after July 5 , 1948, now operates under the Social Security Acts, 1975 to 1977, and regulations made under the Acts. The Social Security Benefits Uprating Order, 1977, provided for increases in the rates of benefit with effect from dates in the week beginning November 14, 1977. Rates of benefit are now reviewed annually.
Supplementary allowances payable in certain circumstances in cases arising before the Industrial Injuries scheme started are governed by the In-
dustrial Injuries and Diseases (Old Cases) Act, 1975, and regulations made under the Act. Statutory schemes have also been made providing for the payment of allowances supplementing workmen's compensation in certain circumstances, and for the payment of benefits in certain cases where neither workmen's compensation nor Industrial Injuries benefits are payable.

The scope of "employed earners " and their employments to which the industrial injuries scheme applies is defined in the Social Security Act. 1975. and regulations made under the Act.

Separate industrial injuries contributions were discontinued in April, 1975. The Industrial Injuries Fund was at the same time merged in the National Insurance Fund, and the separate Treasury Supplement to the Industrial Injuries Fund came to $m$ end.

## BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity, but not usually for the first three days. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of $\mathcal{E} 17.45$ (days being paid for at one-sixth of the weekly rate): with increases of C $9 \cdot 10$ for a wife or other adult dependant, and normally $£_{3} \cdot 50$ for the first or only child and £ 3.00 for each other child, in addition to child benefit. Other juveniles receive lower rates. Where a claimant who is entitled to sickness benefit draws injury benefit instead, any earnings-related supplement to sickness benefit to which he is entitled will be paid with the injury benefit (see p. 613).

Disablement Benefit is payable if at or after the end of the injury benefit period the employed earner suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without I period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by $\quad$ medical board or medical appeal tribunal. In cases of disablement of less than zo per cent., except in pneumoconiosis or byssinosis cases, benefit normally takes the form of a gratuity paid according to a prescribed scale, but not exceeding $£ 1,900$. Where the degree of disablement is 20 per cent. or more, or if it is due to pneumoconiosis or byssinosis, the benefit is a weekly pension payable either for a limited period or for life, according to the following scale:

| Degree of disablement | Weekly Rate |
| :---: | :---: |
|  | $\underset{28 \cdot 60}{ }$ |
| 90 ", | 25.74 |
| 80 ", | 22.88 |
| 70 | 20.02 17.16 |
| 60 50 | 17.16 $\times 4.30$ |
| 40 ., " | $1 \mathrm{~T} \cdot 44$ |
| ${ }^{30}$ " $"$ | $8 \cdot 58$ |
| 20 " " | $5^{\prime} 72$ |

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive lower rates.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance or if his disablement is exceptionally severe. If the beneficiary is entitled to an unemployability supplement there are increases of $£ 740$ for the first or only child
and $£ 6.90$ for any other child in addition to child benefit, and, subject to the earnings rule, £ $10 \cdot 50$ for an adult dependant. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw sickness or invalidity benefit as appropriate, in addition to disablement pension, during spells of incapacity for work.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives 1 pension of $£ 24 \cdot 50$ a week for the first 26 weeks plus any earnings-related addition she would have received if she had been entitled to national insurance widow's allowance (see p. 1050), and thereatter $\quad$ pension of $£ 18.05$ or less a week according to circumstances, plus $£ 740$ for the first or only child and $\mathcal{L} 6.90$ for each other child, in addition to child benefit.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of claimants for injury or disablement benefit, that of submitting to medical examination and treatment.

Industrial Diseases, etc.-The scheme extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an employed earner's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.-Provision is made for the determination of certain questions by the Secretary of State for Social Services, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the Commissioners, subject to leave. Claims for benefit and certain questions arising in connection with claim for or award of benefit (e.g. whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Secretary of State, or a local appeal tribunal consisting of a chairman appointed by the Secretary of State and equal numbers of members representing employers and employed earners, or, on appeal, by the Commissioners.

## FINANCE

On April r, 1975, the National Insurance (Reserve) Fund and the Industrial Injuries Fund were wound up and their liabilities and assets transferred to the National Insurance Fund. From that date the National Insurance Fund received all social security contributions (less only the National Health Service and Redundancy Fund allocations) together with the Consolidated Fund supplements; and it bore the cost of all contributory benefits provided by the Social Security Acts and the cost of administration.

Approximate receipts and payments of the National Insurance Fund for the year ended March 3I, 1976, were as follows:

| Receipts | C'ooo |
| :---: | :---: |
| , alance, April r, 1975 | x,899,645 |
| Flat-rate contributions (Class I only). | 111,905 |

| Other payments...... |  | $5,728$ |
| Balance, March 31, 1976. |  | 2,218,579 |
|  |  | 9,409,193 |

(a) Mainly Class 1 , but includes Class 2, 3 and 4 contributions paid in the year.
(b) Including estimated amounts of earningsrelated supplement as follows: unemployment benefit $£ 73$ million; sickness benefit $£ 93$ million; maternity allowance $\complement_{7}$ million; widow's benefit $£ 9$ million; graduated retirement benefit $\mathcal{E}_{53}$ million.
Receipts exceeded payments during the year by £. 318.9 million.

## PLANS FOR EARNINGS-RELATED PENSIONS

The Social Security Pensions Act, 1975, embodied proposals for the future coordinated development of State and occupational pensions. When the Act comes into force in April 1978 , the present flat-rate retirement and other State pensions will be replaced for employed earners by earningsrelated pensions, but it will be twenty years after that before any pensions become payable at the full rate.

The aims of the Act will be, by providing better pensions, to reduce reliance upon means-tested supplementary benefit in old age, in widowhood and in chronic ill-health; to ensure that occupational pension schemes which are contracted out of part of the State scheme fulfil the conditions of a good scheme; that pensions are adequately protected against inflation; and that in both the State and occupational schemes men and women are treated equally.

Under the new State scheme retirement, invalidity and widow's pensions for employees will be related to the earnings on which national insurance contributions have been paid. The lower earnings limit for Class i contribution liability will be broadly the current level of the basic component of the personal retirement pension-in April 1977 terms £r 5 week. Employees with earnings at or above this base level in any week will pay contributions on all their earnings up to $\pm$ limit of about seven times the base level-in April 1977 terms about $£ x 05 \Perp$ week. The standard rate of contribution set by the Act is $16 \frac{1}{2}$ per cent. (which includes a per cent. for the National Health Service and $0: 2$ per cent. for the Redundancy Fund), employees
paying $6 \frac{1}{2}$ per cent. and employers so per cent. Provision is made for the rates and earnings limits to be reviewed before the new scheme comes into operation. Employees who are contracted out pay the full rate of contribution on earnings up to the lower limit, but on higher earnings up to the upper limit the rate set by the Act is $9 \frac{1}{\frac{1}{8}}$ per cent. (4 per cent. for employees and $5 \frac{1}{2}$ per cent. for employers), the rate to be reviewed at intervals of not more than five years. The Treasury supplement will be 18 per cent. of all contributions, calculated so as to include those that would have been received if there had been no contracting out. Self-employed persons will pay contributions towards the basic pension. The non-employed and employces with earnings below the lower limit may contribute voluntarily for basic pension. Women who marry for the first time after the new scheme begins will no longer have $\square$ right to elect not to pay the full contribution rate. No primary Class I contributions or Class 2 or Class 4 contributions will be payable by persons who work beyond pension age ( 65 for men, 60 for women), but the employer's liability for secondary Class I contributions will continue if earnings are at or above the lower earnings limit.

The new system of earnings-related pensions for retirement, widowhood and invalidity to replace the present flat-rate pensions will provide for employees of either sex with a complete insurance record a category A pension in two parts, a basic and an additional component. The basic pension will correspond to the present personal flat-rate national insurance pension (before November 14 , 1977 $£_{15} \cdot 30$, and from that date $£_{17} \cdot 50$ ): up to this level the pensioner will receive weekly, from the start of the new scheme, $£$ I for $£$ r of average weekly earnings on which contributions have been paid. The additional component will be ril per cent. of average earnings between the lower earnings limit (£15 from April, 1977) and the upper earnings limit (£ro5 from April, 1977) for each year of such earnings under the scheme, and will thus build up to 25 per cent. in twenty years. When the number of years exceeds twenty, pensions will be based on contributors' twenty best years of earnings between age 16 and pension age, Actual earnings are to be revalued in terms of the earnings level current in the last complete tax year before pension age (or death or incapacity). In April 1977 terms the total personal retirement pension at maturity under the new scheme would vary from $£ 15$ for average earnings of $£ 15$ a week to about $\mathcal{E}_{37} 80$ for average earnings of about fros or over; a married couple's pension (on the husband's contribution record alone) from $£ 24 \cdot 20$ to $\mathcal{2} 47$; and a married couple's pension (where both have contributed) from $£ 30$ to $£ 75.60$. The basic component of pensions in payment will be uprated annually in line with the movement of earnings or prices, whichever is increasing the faster, and the additional component in line with the movement of prices. Graduated retirement pensions in payment and rights to such pensions earned by people who are still working will be brought into the annual review of benefits. Among other steps to be taken to give women equal treatment in benefit provision the State scheme will permit years of home responsibilities to count towards satisfying the contribution conditions for retirement pension, widowed mother's allowance and widow's pension, and from April 1979 the "half-test" by which married woman cannot qualify for a Category A retirement pension unless she has contributed on earnings at the basic level in at least half the years between marriage and pension age is to be abolished. The range of short-term social security benefits and industrial injury benefits
under the Social Security Act, x975, will continue with only minor changes: these will include the repeal of the provision which at present imposes $\quad$ lower rate of sickness and unemployment benefit married women.

Members of occupational pension schemes which meet the standards laid down by the Act can be contracted out of a part of the State retirement and widow's benefits. A contracted-out scheme will be required to provide $■$ minimum level of pension calculated on a basis similar to that for the additional component of retirement pension under the State scheme, with $\quad$ widow's pension at half this rate. The benefits payable from the State scheme will be correspondingly reduced. The State scheme will help in meeting the cost of giving pensions under contracted-out schemes the same protection against inflation as if they had not been contracted out. The Act contains provisions designed to give women the same rights as men to belong to an occupational pension scheme. The Occupational Pensions Board, an independent statutory body established under the Social Security Act, 1973, will be responsible for deciding whether an occupational scheme should be accepted as $\quad$ contracted-out scheme, and for ensuring that a contracted-out scheme has adequate financial resources. The Secretary of State for Social Services is empowered to make regulations for requiring employers to inform employees and their organisations and to have consultations before deciding whether or not to contract out. Leaflets relating to the new pensions and for the guidance of employers with occupational pension schemes are obtainable from local Social Security offices.

## SUPPLEMENTARY BENEFITS

The Ministry of Social Security Act, 1966, as amended by later measures (now consolidated by the Supplementary Benefits Act, 1976, as amended by the Social Security (Miscellaneous Provisions) Act, 1977), enacted a scheme of non-contributory benefits termed supplementary allowances and pensions in place of national assistance and of noncontributory old age pensions, and vested responsibility for these supplementary benefits in \#new Ministry of Soclal Security (now the Department of Health and Social Security). A Supplementary Benefits Commission within the Department is now responsible, subject to Regulations made by the Secretary of State for Social Services, for operating the scheme of supplementary benefits.

The supplementary peasion may be claimed by persons over pension age and the supplementary allowance by persons aged 16 or over but under pension age, who are not in full-time work. The benefit payable is the amount, assessed under the provisions of the Act, by which the claimant's income requirements exceed his resources. The basic weekly rates of supplementary benefit (exclusive of rent) since November 14,2977 , are as follows:

|  | Ordinary | Blind |
| :---: | :---: | :---: |
|  |  | persons |
|  | $\mathcal{L}$ | c |
| Married couple. | 23.55 | $24 \cdot 80$ (a) |
| Single householder. | 14.50 |  |
| Other persons:- |  |  |
| Aged 18 or over. | 11.60 | 15.75 |
| Aged 16-17. | 8.90 | 9.80 |
| Aged 13-15. | $7 \cdot 40$ | 7.40 |
| Aged II-Iz | $6 \cdot 10$ | $6 \cdot 10$ |
| Aged 5-10 | 4.95 | 4.95 |
| Aged under 5 |  | 4.10 |
| (a) $£ 25.60$ | are blind. |  |

The long-term weekly rates, which apply, with
certain exceptions, to supplementary pensioners, and also to those below pension age, other than the unemployed who are required to register for work, after they have been in receipt of an allowance for two years, are as follows:

Where the claimant or $\square$ dependant is aged 80 or over a further 25 p is added to these long-term rates. Any extra allowances on account of exceptional expenses, other than for heating and certain other items, will be set off against part of the longterm rates, viz., 50 p ( 75 p in the case of those over 80). See as to attendance allowances below.

The amount to be added for rent if the claimant (or his wife or her husband) is the householder is normally the net rent and rates in full; and, in the case of the non-householder aged 16 or over, £ 445 - week.
The rules for the computation of resources contain provisions for the treatment of capital and earnings and for certain disregards.
Individual awards of benefit are determined by the Commission; claimant who is dissatisfied with the decision on his claim has $\quad$ right of appeal to an independent Appeal Tribunal.
The Commission may vary nil assessment if there are exceptional circumstances but, in the case of claim to supplementary pension, may not reduce it. The Commission also has powers, similar to those in the national assistance scheme, to award lumpsum payments to meet non-recurring exceptional requirements, and to meet charges for appliances or services supplied under the National Health Service, e.g. for glasses, dentures or dental treatment, and prescriptions.

## OLD PERSONS' PENSIONS

The Social Security Act, 1975, provides, subject to a residence test, a non-contributory retirement pension of $£_{10} \cdot 50$ a week ( $£ 6 \cdot 30$ for a wife or other adult dependant) for persons who were over pensionable age on July $5, ~ 1948$, and for women whose husbands are so entitled if they are over pension age and have retired from regular work, with increases for adult and child dependants (Category C pension); and for others when they reach 80 if they are not already getting retirement pension of any category or if they are getting that pension at less than these rates (Category $D$ pension). An age addition of $25 p$ per week is payable if persons entitled to retirement pension or their dependants are aged 80 or over.

## ATTENDANCE ALLOWANCES

The Act of $x 975$ provides for the payment out of Exchequer funds of a tax-free and non-meanstested attendance allowance to the severely disabled, as determined by the Attendance Allowance Board. The full rate of $\mathrm{E}_{\mathrm{I}} \cdot 00$ a week is paid to those in need of a great deal of attention or supervision both by day and by night. The allowance is paid at the lower rate of $£ 9.30$ a week to those whose need for attention or supervision arises either by day or by night. The allowance is treated as an additional requirement under the supplementary benefits scheme.

## NON-CONTRIBUTORY INVALIDITY PENSION

The Social Security Act, 5975 , provides for a non-contributory invalidity pension for persons of working age, other than married women supported by their husbands, who have been incapable of work for a period of at least 28 weeks but who do not qualify for a contributory invalidity pension. The benefit is payable at the rate of $£$ ro' 50 a week, with additions for dependants. The cost is met from the Consolidated Fund. It is expected that the pension will be extended to disabled wives upon certain conditions in November, 1977.

## INVALID CARE ALLOWANCE

The Social Security Act, 1975, also provides for non-contributory invalid care allowance for persons of working age, other than married women supported by their husbands, who are not gainfully emplosed because they are regularly and substantially engaged in caring for 1 severely disabled relative who is receiving attendance allowance. The benefit is payable at the rate of $£ x 0 \cdot 50$ a week, with additions for dependants. The cost is met from the Consolidated Fund.

## MOBILITY ALLOWANCE

The Social Security Pensions Act, 1975, made provision for new non-contributory cash benefit under the principal Act which, subject to certain conditions, is to be payable to persons over the age of 5 and under pensionable age who are suffering from such physical disablement that they are unable to walk or virtually unable to do so, and their handicap is likely to last for at least $m$ year. The allowance which is taxable is being introduced for different age groups over a period of three years or less starting in January, r976. The weekly rate of the allowance was initially $£ 5^{\circ} \circ$, but provision has been made for the rate to be reviewed in each tax year, and in November, 1977, the rate was raised to £7:00.

## GUARDIAN'S ALLOWANCE

Where the parents of $I$ child are dead, the person who has the child in his family while he or she is of qualifying age receives a guardian's allowance of $\mathcal{L}_{7.40}$ week for the first or only child and $£ 6.90$ for each other child, in addition to child benefit.

The allowance is a non-contributory benefit under the Social Security Act, 1975, and, on certain con ditions, is payable on the death of only one parent.

## CHILD BENEFIT

From April 5, 1977, when the permanent provisions of the Child Benefit Act came into operation, family allowances and child interim benefit were replaced by child benefit payable for all children in a family within the age limits, including the first or only child. The rates at the outset were
 case of certain one-parent families) and $\mathrm{Ex} \cdot 50$ for each child after the first. Consequential adjustments were made in dependency benefit for first or only children under the Social Security Act, 1975. The rates are to be increased from April, 1978, to $£_{3.30}$ for the first child in one-parent families and $£_{2} \cdot 30$ for all other children, with consequential changes in dependency benefit.

## FAMILY INCOME SUPPLEMENT

A benefit met out of Exchequer funds is payable under the Family Income Supplements Act, $\mathbf{1 9 7 0}$, and regulations made thereunder, to families, including - single person, with at least one dependent child under 16 (or over 16 if still at school), whose total family income is below the "prescribed amount" if the head of the family (in the case of a couple, the man) is employed or self-employed, and normally so engaged, in remunerative full-time work (i.e., 30 or more hours work a week). The "prescribed amount" is $£ 43.80$ if there is one child in the family and rises by $£ 4^{\circ}$ oo for each additional child. "Total income" includes gross earnings, child benefit and a wife's earnings. The supplement is one-half of the amount by which the family's total income falls below the "prescribed amount ", subject, since November, 1977, to a maximum payment of $£ 9$ '50 for families with one child, rising by $£ \mathrm{I}$ 'oo for each additional child: odd amounts are rounded up to the next iop above, and the minimum amount payable is zop a week. Usually the supplement is awarded for 52 weeks and is not affected if the claimant's circumstances change during that time. Claim forms can be obtained at a Soclal Security Office or a Post Office. Claims are decided by the Supplementary Benefits Commission but there is an appeal to an independent Appeal Tribunal.

## NATIONAL INSURANCE CONTRIBUTIONS

From April 6, 1975, when the National Insurance and Industrial Injuries schemes were replaced by a new scheme of social security benefits and contributions under the Social Security Act, 1975, combined weekly flat-rate Class I contributions ceased to be payable, and the graduared pension scheme was wound up (existing rights being preserved). Under the new scheme employees and their employers both pay wholly earnings-related contributions, based on ■ percentage of the employee's earnings (Class $x$ ). Self-employed persons continue to pay flat-rate Class a contributions, but may also be liable to pay a contribution (Class 4) based on their profits or gains within certain limits. Class 3 contributions are voluntary, and may be paid to help qualify for certain benefits, including retirement pension. The contribution rates and earnings limits for contribution liability stated below apply for the tax year starting on April 6, 1977.

Class I contributions.- Primary Class n contributions are payable by employed earners and office holders over minimum school-leaving age with gross earnings at or above the lower carnings limit of $\mathcal{L}_{15}$ a week. For those with gross earnings at or above this level, contributions are payable on all earnings up to mpper limit of $£$ Io5 a week. "Gross earnings" include overtime pay, commission, bonus, etc., without deduction of any superannuation contributions. The standard rate of primary contribution is $5 \cdot 75$ per cent. of reckonable earnings (National Insurance Fund 5.35 per cent.; National Health Service $0 \cdot 4$ per cent.). Married women and widows who before May 1r, r977, elected not to pay contributions at the full rate pay - reduced rate of a per cent. over the same earnings range: this covers industrial injuries benefits and a contribution of 0.4 per cent. to the National Health Service. No primary contributions are payable by retirement pensioners when in employment, by persons over pension age with no title to pension, or by men over 70 and women over 65 who continue to work. Secondary Class I contributions are payable by employers of employed earners, and by the appropriate authorities in the case of office-holders, except in the case of persons earning less than the lower earnings limit of £ 15 a week. The rate (excluding the n per cent. surcharge for taxation purposes, below) is 8.75 per cent. (National Insurance Fund 7.90 per cent; National Health Service 0.6 per cent; Redundancy etc. Funds 0.25 per cent.) over the same earnings range -1 primary contributions (regardless of the employed earner's contribution rate). Primary contributions are deducted from earnings by the employer, and are paid, together with the employer's contributions, to the Inland Revenue along with income tax collected under the PAYE system, so dispensing with contribution cards for employed earners.

Class 2 contributions. - These contributions are payable by self-employed earners over school-leaving age at a flat-rate normally of $£_{2} \cdot 66$ a week for men and $£ 2.55$ for women. The women's rate is to be raised to the men's rate by r980. Those with earnings below $\propto_{6} 875$ y year can apply for exception from liability to pay Class \& contributions for the tax year 1977-78. Married women and widows can no longer choose not to pay Class 2 contributions when self-employed if they paid the contribution after May 10, 1977 . No Class I contributions are payable by retirement pensioners when self-employed, by persons over pension age with no title to pension, or by men over 70 and women over 65 who continue to work. There are special rules for those who are concurrently employed and self-employed. Class contributions may be paid by direct debit of a bank or National Giro account or by stamping a contribution card. People who while self-employed are excepted from liability to pay contributions on the grounds of small earnings may pay either Class $\quad$ or Class 3 contributions voluntarily. Self-employed earners (whether or not they pay Class a contributions) may also be liable to pay Class 4 contributions based on profits or gains within certain
limits.

Class 3 contributions. - These are voluntary flat-rate contributions payable by persons over school-leaving age who would otherwise be unable to qualify for retirement pension and certain other benefits because they have an insufficient record of Class \& or Class 2 contributions. The rate is $£ 2.45$ week. Payment may be made by stamping a contribution card or by direct debit through a bank or Giro account. Married women and widows who on or before May 11 , 1977 elected not to pay Class $\mathbf{x}$ (full rate) or Class 2 contributions cannot pay Class 3 contributions.

Class 4 contributions. -These contributions are payable by self-employed earners under 70 ( 65 for women), Whether or not they pay class a contributions, on annual profits or gains from a trade, profession or vocation chargeable to income tax under Schedule D . The rate of contribution is 8 per cent. (including in contribution of 0.6 per cent. to the National Health Service) of such profits or gains falling between $£ \mathrm{I}, 750$ and $£ 5,500$ a year. The maximum Class 4 contribution, payable on profits or gains of $£ 5,500$ or more, is £300. The contribution is based on profits or gains subject to certain allowances and relief, which differ in some respects from those for income tax. Class 4 contributions are generally assessed and collected by the Inland Revenue along with Schedule D income tax. Self-employed persons under 16 , or who are over pension age and have retired from regular work or are treated as having retired, or do not qualify for retirement pension on their own contributions, can apply for exception from liability for Class 4 contributions. There are special rules for people who have more than one job, or who pay Class a contributions on earnings which are chargeable to income tax under Schedule D.
The cuts in public spending announced by the Chancellor of the Exchequer in the House of Commons on July 22, 1976, were accompanied by an increase from April 6, 1977, of a percentage points in employers national insurance (secondary Class I) contributions for taxation purposes, under the National Insurance
Leafiets relating to each class of contribution, and an employer's guide to national insurance contributions,
are obtainable from local Social Security offices.

## BRITISH ARCHITECTURE OF 1976-77

## THE NATIONAL THEATRE

The first formal proposal for a National Theatre was put forward in the middle of the mineteenth century. By the end of the Second World War a committee seeking to establish $₫$ National Theatre as a memorial to William Shakespeare, with Granville Barker and Shaw among its original members, had already spent forty years raising funds, lobbying and acquiring sites first in Gower Street and later in South Kensington.

The possibility of building on the South Bank suggested in 1930 was revived in 1945 when the L.C.C. agreed to provide asite and the National Theatre Act of 1949 empowered the Government to contribute $£ x, 000,000$ towards the cost. A foundation stone was laid in 195I but it was 196x before the matter was reconsidered. In 1962 the National Theatre Company was formed. The architects, Denis Lasdun and Partners, were appointed and began work in 1964 on the task of establishing final brief in consultation with the panel of twelve experts.

The brief evolved in one calling for an amphitheatre which was to be adaptable between openstage and proscenium stage forms. It was soon recognised that a single auditorium designed to be physically adaptable in order to house everything from Greek tragedy to the plays of Coward and Osborne would never in practice be properly suited to anything. It was clear that two auditoria were essential. At least 2,000 seats would be needed and a single auditorium of this size would suffer in visibility and audibility. Two auditoria however could be designed to complement each other.

The estimated cost of the scheme was £ $14,000,000$, providing - National Theatre with two main auditoria, an Opera House with main auditorium and a small studio theatre, and independent restaurant and large underground car park. After ten months it was announced in March 1966, that the Government and the G.L.C. would jointly finance the National Theatre, each contributing C3,750,000, but the rest of the scheme would be deferred.

Work on the design of the two main theatres was resumed in 1966 and both were approved that year. The final scheme was presented in November 1967 and approved in March 1968. Building finally started in November 1969, so that in 1976 England had its tribute to William Shakespeare, a dream which bore fruit over a period of 125 years.

The National Theatre stands a little downstream of Waterloo Bridge on the South Bank of the Thames. Two blank fly towers rise from layers of horizontal terraces, inhabited on many levels. They cascade to the riverside walk and create deep shadows and recesses. The concrete structure is whitish-grey, bare and unadorned. The terraces are clearly a primary feature, supporting the public life of the structure and opening out its contents to the cityscape. The towers are the vertical accompaniments which house fiying equipment, elevators and ventilating equipment. Of various sizes, they also indicate the presence of the theatres within and the position of the main entrance along the 45 degree axis to the open theatre stage. This open stage, the Olivier Theatre, occupies a large area away from the bridge. The proscenium (Lyttelton) theatre is considerably smaller, so that in plan the public areas make an "L"' linked by the receding terraces. To the rear is more neutral brick and concrete box containing paint shops, workrooms and rehearsal spaces. The third small theatre and dressing rooms are tucked in between the two main zones.

The Olivier is an open stage theatre which seats 1,160 people in a bowl-like configuration. In the centre of the stage is a drum revolve. A large fly tower equipped with $\quad$ system of power operated spot lights covers most of the stage. There is no safety curtain. The back of the stage can be opened up or closed off to suit the scale of various productions. The front edge of the stage can be varied in shape and there is the possibility of two entrances for actors beneath the side intermediate tiers. Behind the stage and separated from it by soundproof doors, are scene assembly spaces, from which scenery can be moved on motorised wagons.
The seating in both theatres is similar with carpeted plinth and a radial diffuser which supports a deceptively simple, very comfortable seat. In the Olivier, the lavender haze of the seats is $\quad$ delight with the silvery-grey concrete. The colour in the design comes from the audience themselves.
The Lyttelton theatre is an orthodox proscenium theatre, that seats 895 people in two tiers. The stage can be fully raked and there is the possibility of an orchestra pit. Full sized near and side stages, separated from the main stage by soundproof doors, are equipped with motorised scenery wagons. The carpeting is dark brown and the seats a subtle beaver colour. Dark brown hessian walls flank the stage and the safety curtain is a contrasting dull gold.

The third theatre, the Cottesloe, is a studio theatre for the National Theatre company, which was almost sacrificed at an early stag: to save money. In October 1973 design study was put forward in which it was proposed to turn the space into a multi-tiered room to seat 400 people. In form and scale it is like I Georgian playhouse while having an indoor Elizabethan quality that favours a non-scenic production.

Any examination of the design of the National Theatre has to include the public spaces which must be respected as the architect's imaginative conception of a 'fourth theatre'. They are rich, complex spaces that invite exploration and open vistas. The lighting is dim in places, but this gloom, contrasted with brightness and occasionally even glare, creates the atmosphere.

The success of the typography is the result of close collaboration between the architect and typographer. Legibility was paramount and the choice of final letter form and material came as one, "Serifa" in brightly polished stainless steel. The silvery mirror-like quality is important, the subtle lighting casts a slight shadow on to the concrete and the letters appear to float. The National Theatre symbol is used boldly. The discipline that governs the building has limited the number of elements placed against the concrete to four: lighting bars, lettering, display panels and information racks.

The different levels of the different foyers are not only shot through with connections internally, but link with the city outside. At three separate levels one can walk out of the theatre, not just on to the exterior balconies, but into London or on to the river terraces. The foyers and the bars, restaurants, shows and activities in them, are open to anyone from morning till night.

Denys Lasdun's National Theatre certainly owes much of its architectural allegiance to our present age, but its theatrical roots go back to the Greeks and their theatres. In the same way that the Greeks manipulated their hillsides for theatres, Lasdun has manipulated - piece of cityscape into a building for drama.

SCOTTISH WIDOWS' FUND AND LIFE ASSURANCE SOCIETY HEAD OFFICES, EDINBURGH
In 1969, the possibility was considered of erecting 1 large Head Office to contain all the increased staff of this society. In 1970 the Society purchased a site of six acres lying between Dalkeith Road and Holyrood Park. Adjacent sites are occupied by residential and school buildings, the Royal Commonwealth Pool and the University Halls of Residence. Because of this relationship between the site and the Royal Park, 1 height of fifty feet had to be observed and particular emphasis given to the scale and character of the building and the materials used. Car parking for 300 cars had to be accommodated and a relatively low plot ratio limited the area of the building. The successful solution of the problems won for the architects, Sir Basil Spence, Glover and Ferguson the 1977 R.I.B.A. award for Scotland.

The Society required accommodation to house r,700 staff. The planning solution took the form of a series of interlocking hexagonal figures arranged round two service cores, containing lifts, stairs, toilets, document conveyors and individual offices.

The massing of the building and the selection of the external materials were designed to be in scale and in harmony with the site. Zinc is used to cover the low pitched roofs which are overlooked by the Park. Brown glass was chosen as a cladding to the upper walls and riven York stone to the lower reaches. The structure of the building is in reinforced concrete exposed locally over entrances. Most of the car parking was dug in at the lower end of the site on two levels and is covered by roof garden.

Within the open landscaped office areas staff can be 20 metres from an outside wall, so floor to ceiling windows were adopted to avoid claustrophobic conditions. The window wall was designed to contain outer sheets of brown solar glass, inner sheets of clear, toughened glass and Venetian blinds within the cavity with the blades fixed horizontally so n not to interrupt the superb view.

The floors throughout the main offices are carpeted in yellow/green tiles. Wall panelling round the service cores, office furniture and pass doors are all finished in light oak and chairs are covered in charcoal coloured fabric. The staff restaurant area provides an atmosphere of relaxation. There are changes of level and the restaurant and coffee lounge open to sunlit terraces.

To serve an office of such size and complexity, special mechanical and electrical provisions are many and varied. Included in the design is a computer centre and printing works.

The site has been successfully "saucered" to disguise the bulk and reduce the overall height and achieves good massing and an interesting profile in its setting.

## ROYAL EXCHANGE THEATRE MANCHESTER

Manchester's Royal Exchange ceased to function as the centre of the world's cotton market in 1968 and since then the hall remained unused. During its history it had a chequered career; completed in 1921, bombed in 1941 , repaired and re-opened in 1953, closed again in 1968 and "listed" in 1974.

Once the hall had been listed it was essential to find anew use for it. To the " 69 " Theatre Company, as it was called, the Royal Exchange was ideally situated. By the time the team of consultants had been appointed, Richard Neori and the other artistic directors had developed their earlier work in the Manchester University Theatre, the temporary theatre in the Exchange and elsewhere, into the idea of free-standing concentric audi-
torium under the main dome of the hall. Before beginning the design of the auditorium all the backstage and public facilities of In theatre had to be accommodated without encroaching the hall itself. Whereas the intention throughout has been to give the auditorium a lightness and echaracter precisely opposite to that of the building which houses it, in all the other public areas the intention was to preserve the character of the old building unaltered.
For the restaurant, rehearsal rooms and all the other parts of the theatre to fit into the areas available space was at - premium. It is indicative of the size of the Royal Exchange that the theatre workshop now resides in what were formerly the men's toilets. For the architects the most challenging problem was how to build a large $700-$ seat auditorium in the centre of the hall without destroying its character and the vast sense of space. The domed roof provided a protective umbrella so that in theory a simple structure to support the seating was all that was needed. Because of its size however, the hall has 17.5 second reverberation time and as this has to be reduced for speech, it became clear that the theatre had to be a separate acoustic entity.

Inside the building's central domed hall, the architects have erected a free-standing concentric auditorium with raked seating for 450 around a seven sided open stage and a further 350 in suspended tiered galleries above. Structural stability is achieved by "anchoring" the new theatre to the four massive piers which support the old hall's domed roof.

This is one of the most ingenious schemes ever conceived for the re-use of an old building. Strictly speaking, it is not a conversion. What makes it unique is that a new building has been inserted inside the cavernous half of an old one. This means that theatregoers in Manchester will walk up the stairs of a Victorian building, across the main floor and into a new steel and glass auditorium.

The theatre achieves success on three different counts. Firstly, it provides a stunningly imaginative use for an important but unwanted listed building. Secondly, the close-knit tiered auditorium, entirely surrounding the acting area, ensures that the whole audience is closely involved. Thirdly, the formidable structural problem which necessitated the support of the two upper tiers on existing piers, has been resolved with clarity and elegance which enhances the theatrical form without dominating it.

The architects, Levitt Bernstein Associates, were the award winners for the North-western Area.

## BRUNEL CENTRE, SWINDON

The winner of the South-western area R.I.B.A. award was the work of Douglas Stephen and Partners, the Brunel Centre in Swindon.
Swindon is indelibly linked to the name of Brunel and to the development of the Great Western Railway. Yet it is no longer a 'railway' town; its position on the boundary of the southeasterin region has given it a share in the movement of population to a southern part of the country and this population drift has been matched by a vigorous town policy so that now, light manufacturing plants are taking on the role formerly played by the railway and providing diversified sources of employment.
At the same time, the general growth of population and jobs has brought a prosperity to the town paralleled by striking growth of retail shopping. It was this buoyancy which led the Borough of Swindon to undertake development of large retail shopping centre in the middle of the town.

The architects' brief asked for as much shopping frontage to be provided as possible. Given the location of the building on a main pedestrian crossroad, the problem was to capitalise on the situation and tempt the passer-by into the depths of the site. This was achieved by distributing the larger supermarkets at the rear of the site to draw shoppers past the smaller units. To allow for maximum retail use of the area, vehicle servicing was eliminated at ground level, as service yards would create spaces in the sales frontages. The high water table precluded a basement circulation for service vehicles. This led to roof-servicing with the advantage of freeing the ground and being virtually invisible.

The 5 hectare central area site was included in Swindon Borough Council's development plan approved in 1964 and designated for shopping redevelopment. The site is generally level, the existing buildings being predominantly two-storey terrace housing dating from the turn of the century, as were the surrounding areas where warehousing and commercial buildings bordered the canal.

The question of co-ordinating and creating harmony between the shops and shop fronts led to the decision that individual traders were responsible for their own images. Architectural control was concentrated on the communal spaces, resulting in the building being seen as a large structural carcass of shop bays contained within covered and glazed arcades. Each shop was to follow the same layout:- Ground floor-the principal sales floor of retail units with service corridors to the rear. First floor-upper sales floor or storage. Second floor-vehicle servicing deck with loading bays, refuse chambers and escape corridors. Warehousing and storage areas for larger stores. Third fioor-plant rooms Fourth floor-tank rooms, condensor units.

A basic $6 \mathrm{~m} \times 6 \mathrm{~m}$ grid had been adopted for the building frame, ir construction in in situ reinforced concrete throughout. The canopy material is of bronze-tinted glazing polycarbonate sheet. The greatest gain is the creation of new public spaces. By taking a formal plan and topping the main central space with an elegant, curved, glazed roof, the architects have created - structure which is reminiscent of the Victorian engineer, but is very much of the present day.
Undoubtedly the greatest success is the main plaza. It is strongly evocative of the rallway age in its roof and the "op" black and white floor is dazzling. It is above all a generous space which is freely open day and night. The statue of Isambard Kingdom Brunel himself is happy touch. He adds a whole element of humanity to the square and his elevated position is right for the scale of his surroundings.

The R.I.B.A. jury summed up the success of this design, "The Central Plaza is simply and boldly conceived, a very strong concept handled with great assurance."

## NORTHERN BANK HEAD OFFICE, BELFAST

This new office building and banking hall was designed by the Building Design Partnership. The building occupies a prominent position on the west side of Donegall Square, which surrounds the City Hall in the centre of Belfast. Together with the Scottish Provident building, the bank forms the entire west façade of the square. Planning constraints were placed on the new development to preserve the dominance of the City Hall and the architects have preserved the balance by aligning the facade and roof with the adjoining building.

In this northern city environment and with the ochre rendering of the Scottish Provident building and the Portand stone image of the City Hall the
architects felt that warm light to rich dark tones should be used and that the materials employed should be maintenance free as far as possible. The bank's concrete frame is glazed at street level for the Banking Hall and the upper four storeys are finished in Portland stone and tinted glass, with a strong vertical emphasis.

Internally, the functional requirements of the bank have resulted in deep planning over large areas which provide great scope for open landscaped offices and these are made viable by air-conditioning and high levels of illumination. Air-conditioning, and the opportunity for fixed glass areas, eliminate the greater part of external trattic noise. The open plan concept generally satisfies the working needs of the Bank's Head Office departments and allows for total flexibility for any changes to meet future needs.

The small external window area helps to reduce solar heat gain and glare in the offices with a consequent reduction in the cost of air-conditioning. A further saving on the building's running cost has been achieved through a "heat reclaim" system that converts the extracted heat from office lighting into central heating.

A high standard of finishing and furnishing is used throughout, consistent with the building's importance. In the Banking Hall, the walls are clad in Portland stone similar to the external surfaces of the building. Other wall surfaces are either lined in oak panels or plastered with vinyl paper finish. All working areas are carpeted. Paintings by local artists are hung in many arcas.

The building won the 1977 R.I.B.A. award for Northern Ireland, the judges commenting:"The design adopted by the architects successtully achieves the difticult task of providing a building which, while emphatically stating its importance as housing major financial and commercial headquarters, does not challenge the dominance of the City Hall, nor add another strident note to an already cacophonous chorus from the hotchpotch of styles and periods elsewhere in the square."

## BADGEMORE COUNTY PRIMARY SCHOOL, HENLEY

The school, for 280 pupils between the ages of 5 and Ix , is built on a steeply sloping site that was once int ornamental garden forming part of the old Friar Park Estate.

There were two main problems in designing the building. One was the slope of the land which drops by about 45 feet across the site and the other was the importance of blending the building into its background in an attractive area. The first was overcome by building the school on different levels-a marked change from many primary school desigas which are single storey buildings on one level, and the second by the use of traditional red brick for the building which harmonised with others in the area and by keeping nearly all the mature trees on the site.
Teaching accommodation in the school is planned round class groups of 30 , each having individual quiet areas and general work areas and associated toilet and storage facilities. There are also a genetal purpose hall, music room, kitchen, ofices and staff room. Covered play spaces are glouped round freely shaped playground, which is protected by an extension of the timber beams from the teaching areas. Other features of the building include a bigh level of insulation and careful choice ot materials, so that it will require the minimum of maintenance in future years.
This small and simple building has a very natural feeling and won for the County Architect's Depart-
ment of Oxfordshire County Council, the R.I.B.A. award for the Southern Region.

HEAD OFFICE, IPSWICH, SUFFOLK
Willis, Faber and Dumas the insurance brokers, decided in 1970 to move most of their main office functions from Leadenhall Street, to less cramped situation in the country. Their objectives in moving were expressed in the building brief: to gain room to expand, which demanded using all available space, to allow for future change in the organisation and to increase their office efficiency.

The building had to accommodate 1,350 people. The staff had to be attracted, both from their present offices in London and Southend, and as new recruits from Ipswich. The architects. Foster Associates, had to design a building to provide high standards of working environment and additional facilities which would encourage recruitment. Their success in doing so resulted in their receiving the R.I.B.A. award for the Eastern Region.

The site is on the south-west edge of the old centre of Ipswich in an area between the old town and the railway which had been designated by the local authority for commercial development. It was occupied by a mixture of old properties; terrace houses, small offices, a warehouse and a pub. The planning requirements were primarily concerned with the impact of a new building of large floor area within the old town centre. Buildings were restricted in height to four to six storeys and an additional constraint was imposed on the design by a high water table and poor bearing soils. This ruled out any possibility of a basement other than the swimming pool, which is suspended, and necessitated piled foundations for the columns.

The main office space is accommodated on two levels, mainly on the two middle layers. The ground floor is given over to support systems for the organisations like a swimming pool, gymnasium, loading docks, plant rooms, computers, reception and coffee bars. The roof is a landscaped garden which acts as insulating quilt. The restaurant, also on the roof, opens to the outside. An escalator route runs up through a well at the centre of the building, moving people from the ground right through to the roof level. The fourstorey building is fully glazed, air-conditioned structure which follows and encloses the irregular shape of the site.

The finish of all external walls is of solar tinted toughened glass, the perimeter walk, studded rubber and steelwork painted black matt. Internally, the walls are modular steel partitions in yellow. Office floors are carpeted in green, the service areas, green studded rubber.

Glass as an architectural material has gained great stature from the evolution of the technique of bronzing, for this has converted it from something you look through, a mere facility, to something you look at. It is to the credit of Foster Associates that they have appreciated the "glassiness" of glass and known how to exploit it to the full.

## NEVILLE HOUSE, BIRMINGHAM

The 1977 R.I.B.A. award for the West Midlands went to the firm, John Madin Design Group. The new headquarters of the merchant bankers, G. R. Dawes and Co. Ltd., was built on the garden of their previous premises, a stucco faced Edgbaston house, which had become overcrowded, inflexible and expensive to maintain.

The brief required office space that would accommodate all the firm's existing organisation and provide a 50 per cent surplus for expansion and for sub-letting.

The dark grey glass used throughout the building, not only cuts down solar heat gain, but reflects the trees round the Harborne Road forecourt, so that they can be seen to be both sunlit and in shadow at the same time. The effect is enhanced by the lack of opening lights and almost flush black neoprene glazing beads.

The security of the bank necessitated a vertical division between the lettable offices of G. R. Dawes and Co. Ltd., and the remaining lettable spaces, so the former are served by a lift from the reception/ bank and the latter by lift from the marble lined through hall.
The ceilings throughout are of aluminium slats with equal width light fittings, and finishes are of white plastic laminate, black Andes granite and white veined statuary marble. Door furniture is generally natural satin finished stainless steel on white plastic laminate, set off by black-stained hardwood frames.

The entrance terrace is finished with ochrecoloured polymer, reminiscent of court.

This modern, fully air-conditioned five-storey office building received considerable praise from the R.I.B.A. award jury who commented:-"... it is a delight to experience $\quad$ building where consistently restrained detailing and fine materials have yielded a pleasant environment that both users and visitors clearly recognised."

## RICHMONDSHIRE RECREATION CENTRE

Richmond in the county of North Yorkshire and its most immediate environs form one of the most attractive combinations of town and countryside in England. The historic town is of international repute and is currently the subject of a special conservation study. In all, the new District Council of Richmondshire has the responsibility for managing, solely for recreational purposes, an area of land covering some 200 acres of the Swale Valley.
The architects' brief was to provide a swimming pool and a learners pool with associated changing, catering and administrative accommodation within the wider context of the County Park. The opportunity presented on this particular site, in an outstanding conservation area, was to produce design which was of its own time in terms of structure and materials, yet which would complement the historic setting and in particular the recently restored former railway station immediately next to the pool.
Richmond Station, until the line closed in 1969, was the terminus for the Darlington to Richmond connection. The station is a Grade II listed building of special architectural and historic interest. Built in 1848 to the design of George T. Andrews under the direction of the 'railway king', George Hudson, it is one of the best examples of Gothic Revival architecture in the country. It is a pleasant, slate roofed stone built single-storey structure with an internal platform to one side and end only. By 1972, when the Local Authority was able to acquire the station from British Rail, the condition of the building was rapidly deteriorating. This building has recently been repaired and restored to its former glory and currently houses thriving garden and farm supply centre.
The design of the new swimming pool uses the natural falls on the site to sink the building into the ground, so that the line of the roof would coincide with the eaves and parapets of the existing buildings. The roof itself is split into three bays, each of which echo both in form, scale and finish, the roof of the
engine shed, creating a visual link with the railway architecture of the past. A further link is the stone for the external walls which was taken from a demolished Victorian warehouse on the site, re-cut and re-used to form the plinth upon which the building sits and which contains the changing rooms and service areas of the complex. The most unique feature of the building, is not however an architectural contrivance, but one given freely by time and nature, its setting. To make use of this, the walls of the pool hall are glazed on all sides, giving the swimmers the advantage of a controlled environment without losing the sensation of swimming in the open air. The use of large areas of glazing helps the pool to blend into its setting by reflecting the buildings and landscape which enclose it. This mature landscape has been reinforced in the immediate vicinity of the building by extensive planting of indigenous local species, which will in time obliterate the scars of the former railway line.
The complex is designed on two levels to take advantage of the falls on the site, with the upper level linked by $\equiv$ bridge over the service road to the forecourt of the existing station building. The level includes the entrance foyer, reception and cash desk, staff rooms and a public area which contains a cafeteria and a licensed bar. The cafeteria overlooks the pool hall and as well as serving food it acts as a viewing gallery for the pool. The bar looks across to the station building and has access to a sheltered south-west facing terrace, also licensed, which can be used for sunbathing. From the entrance hall - staircase takes swimmers to the lower level containing the changing rooms, which lead via the pool cleanse areas to the main pool hall.
The hall itself contains two pools, a six lane county standard main pool, designed without diving facilities. A shallow water learner pool is immediately opposite the entrance from the changing rooms and is entered by a series of shallow steps to allow small children to gain their confidence in the water gradually. The two pools have a total capacity of 400 bathers in any one hour and an automatic timing system has been installed to cope with this potential demand at peak periods. To cater for disabled swimmers, two specially equipped changing rooms are situated at the pool side and these have direct access from the service road at the ower level of the building.

The main roofs of the building are clad in slates reclaimed from the demolition of the warehouse on the site and which, because they have already been weathered over a long period of time, blend the building with its neighbours. The external solid walls have an outer skin of re-cut and re-used stone. The glazed walls are clad in double-glazed panels of dark brown anti-sun glass. All floors and walls in the public areas are finished in ceramic tiles, which not only add warmth and colour but are resistant to vandalism.

This design not only won the Yorkshire area R.I.B.A. award, but also the 2976 Steel Design award for its architects, Napper, Errington, Collerton Partnership.

## ARCHITECT'S HOUSE IN HAMPSTEAD

The site for this architect's house is in an attractive, well planted, comparatively low density street of early 19 th century houses, designated by the local authority as a conservation area. The house is a glass and steel two-storey building, almost square in plan, sitting at the bottom of a steep drop from the strect. Access to the house is by means of a footbridge connecting to the house at first floor level. The street and garden elevations are fully glazed from ground level to ronf in two metre wide panels with alternate panes fixed and sliding. Despite the almost invisible glass exterior, calmly reflecting the leafy Hampstead surroundings, the effect is simply stunning.

The building is the result of the architect's experience in the development of steel structures and cladding components for industrial building. This is reflected in the use of an exposed steel structure, profiled metal sheeting and a great deal of glass. Inside and out, the building has been simplified to basic components. Apart from the bathrooms, there are no internal partitions or doors: the divisions are formed by blinds.

The house is designed as a family house and working studio for two architects and three children and can be occupied in a flexible way with the longterm possibility of being separated into parent's and children's flats.
The house, which won the R.I.B.A. award for the London region, was designed, and the building work supervised by Michael Hopkins, for his own use.

## THE QUEEN'S AWARDS FOR EXPORT AND TECHNOLOGY

The Queen's Award for Export Achievement and The Queen's Award for Technological Achievement were instituted by Royal Warrant in 1976, the two separate Awards taking the place of The Queen's Award to Industry which had been instituted in 1965. This was the major change made as $\quad$ result of a number of recommendations by a committee chaired by the Duke of Edinburgh that reviewed all aspects of the Award scheme in 1975 after its second 5 -year period of operation; all the recommendations were accepted by the Government. The reports of the 3 committees that have considered the scheme, in 1965 , 1970, and 1975under the chairmanship of the Duke of Edinburgh, Lord McFadzean and the Duke of Edinburgh res-pectively-are available from Her Majesty's Stationery Office.

The Awards are designed to recognize and encourage outstanding achievements in exporting goods or services from the United Kingdom and in advancing process or product technology. They differ from a personal Royal honour in that they are given to a unit as 1 whole-management and employees working as a ream.

They may be applied for by any organization within the United Kingdom, the Channel Islands or the Isle of Man producing goods or services which meet the criteria for the Awards. Eligibility is not influenced in any way by the particular activities of the unit applying, its location, or size. Units or agencies of central and local government with industrial functions, as well as research associations, educational institutions and bodies of a similar character, are also eligible, provided that they can show they have contributed to industrial efficiency.

The criteria on which recommendations for the Awards are based are:

## I. Export Achievement

A substantial and sustained increase in export earnings to a level which is outstanding for the products or services concerned and for the size of the applicant unit's operations. Account will be taken of any special market factors described in the application. Applicants for the Award will be expected to explain the basis of the achievement (e.g. improved marketing organization or new initiative to cater for export markets) and this will be taken into consideration. Export earnings considered will include receipts by the applicant unit in this country from the export of goods produced in this country, and the provision of services to non-residents. Account will be taken of the overseas expenses incurred other than marketing expenses. Income from profits (after overseas tax) remitted to this country from the applicant unit's direct investments in its overseas branches, subsidiaries or associates in the same general line of business will be taken into account, but not receipts from profits on other overseas investments or by interest on overseas loans or credits.
2. Technological Achievement

A significant advance, leading to increased efficiency, in the application of technology to a production or development process in British industry or the production for sale of goods which incorporate new and advanced technological qualities.
Each award is formally conferred by $\quad$ Grant of Appointment and is symbolized by a representation of its emblem cast in stainless steel and encapsulated in a transparent acrylic block. Presentations are usually made on behalf of The Queen by Her Majesty's Lord Lieutenants at the principal place of business or production of the unit. A reception is
given annually by The Queen at Buckingham Palace for representatives of the winners of the Awards.

Awards are held for five years and holders are entitled to fly the appropriate Award flag and to display the emblem on the packaging of goods produced in this country, on the goods themselves, on the unit's stationery, in advertising and on certain articles used by employees: units may also display the emblem of any previous current Awards during the 5 years.

Awards are announced on April $2 x$ each yearthe actual birthday of Her Majesty the Queenand published formally in a special supplement to the London Gazette.

All enquires about the scheme and requests for application forms should be made to:

The Secretary,
The Queen's Awards Office,
Williams National House,
ri-I3 Holborn Viaduct,
Telephone: ox-222 2277

## Exports Achievement Awards

In 1977, the Queen's Award was conferred on the following concerns for export achievement: Aarc Caravan Co. Ltd., Hull; The Angus Irrigation Unit of the Angus Fire Armour Division of George Angus \& Co. Ltd., Lancaster; The Construction Products Division of Armco Ltd., Newport, Gwent; Laura Ashley Ltd., Carno, Caersws, Powys; Austin \& Pickersgill Ltd., Sunderland; BICC Telecommunication Cables Ltd., Prescot, Merseyside; The Biscuit Division of Baker Perkins Ltd., Peterborough; Banyard Metalheat Ltd., Bournemouth; T.T. Boughton \& Sons Ltd., Amersham, Buckinghamshire; Bowling Reproductions, Cross Hands, Llanelli; C. T. Bowring (Insurance) Holdings Ltd., London, E.C. 3: The Military Aircraft Division of British Aircraft Corporation Ltd., Preston, Lancashire; British Airways Board, London, S.W.I; British Films Ltd., London, S.W.17; British Steel Corporation (Overseas Services) Ltd., London, S. W. 1 ; John Brown Engineering (Clydebank) Ltd., Clydebank, Dunbartonshire; Brush Switchgear Ltd., Loughborough, Leicestershire; C-Power (Marine) Ltd., Gainsborough, Lincolnshire; Carreras Rothmans Ltd., Basildon, Essex; Cohen Bros. (Electrical) Ltd., Manchester; Coles Cranes Ltd., Sunderland; Conder Buildings Overseas Ltd., Winchester; Coronet EM Ltd., Leicester; Crosrol Itd., Halifax; Darlington \& Simpson Rolling Mills Itd., Darlington, Co. Durham; Davy-Loewy Ltd., Sheffield; Thomas De La Rue and Co. Itd., Basingstoke; Derwent Publications Ltd., London, W.C.I; Dimo International Ltd., Pontypool, Gwent; EMI Medical Ltd., Hayes, Middlesex; Escol Products Ltd., London, W.C.2; Ethicon Ltd., Edinburgh; Exploration and Production Services (North Sea) Ltd., London, W. I: The Military Products Division of Fairey Engineering Ltd., Stockport, Greater Manchester; Fletcher and Stewart Ltd., Derby; Foster Whecler Ltd., Reading, Berkshire; GEC Turbine Generators Ltd., Rugby; A. Gallenkamp \& Co. Ltd., London, E.C. 2 ; Goodenough Pumps Ltd., Leigh, Greater Manchester; Graff Diamonds Ltd., London, E.C.r; Sir William Halcrow \& Partners, London, W.xy; John Harvey \& Sons Ltd., Bristol; Hattersley Newman Hender Ltd., Ormskirk, Lancashire; Hawker Siddeley Power Engineering Ltd., Burton on the Wolds, Leicestershire; Hunting Surveys and Consultants Ltd., Boreham Wood, Hertfordshire; IBIS Medical Equipment \& Supplies Ltd., Kendal, Cumbria; Inchcape \& Co. Ltd., London, E.C.3; Inductron Ltd., Basingstoke; The International Marine

Coatings Division of The International Paint Co. Ltd., London, W.I; Dick James Music Ltd., London, W.C.x; Kandya Meredew Ltd., London, W.C.x; Kennedy \& Donkin, Woking, Surrey; Lesney Products \& Co. Ltd., London, E.9; London American Finance Corporation Ltd., London, E.C.4; Kenneth Mackenzie Holdings Ltd., Stornoway, Isle of Lewis; L. H. Mackerness Ltd., Manchester; Marconi Instruments Ltd., St. Albans, Hertfordshire; The Marconi International Marine Co. Ltd., Chelmsford, Essex; Marks and Spencer Ltd., London, W.x; Martin-Black Ltd., Coatbridge, Lanarkshire; Albert Martin Knitwear Ltd., Sutton in Ashfield, Nottinghamshire; May \& Baker Ltd., Dagenham, Essex; Thomas Meadows \& Co. Ltd., London, S. W.x; Michelin Tyre Co. Ltd., Stoke-onTrent; The Semiconductor Products Division of Motorola Ltd., Wembley, Middlesex; Geo. Moulton Successors Ltd., Manchester; North Devon Meat Ltd., Torrington, Devon; Arthur F. Organ (Packaging Machinery) Co. Itd., Redditch, Hereford and Worcester; Pandrol Ltd., London, E.C.I; Josiah Parkes \& Sons Ltd., Willenhall, West Midlands: The Management Consultancy Firm of Peat, Marwick, Mitchell \& Co., London, E.C. 2 ; Petbow Ltd., Sandwich, Kent; Petrocarbon Developments Ltd., Wythenshawe, Manchester; The Phoenix Engineering Co. Ltd., Chard, Somerset; Platt, Saco Lowell Ltd., Rossendale, Lancashire; The Plessey Navaids Division of Plessey Electronic Systems Ltd., Weybridge, Surrey; Polaroid (U.K.) Ltd., St. Albans, Hertfordshire; Portals Holdings Ltd., Whitchurch, Hampshire: Quest Automation Ltd., Wimborne, Dorset; Racal-Tacticom Ltd., Reading, Berkshire; Record Ridgway Ltd., Sheffield; P. A. Richterich \& Co. Ltd., Bradford; John Robson (Shipley) Ltd., Shipley, West Yorkshire; Rohm \& Haas (U.K.) Ltd., Croydon, Surrey; The Royal Mint, Llantrisant, Mid-Glamorgan; Ruston Gas Turbines Ltd., Lincoln; Seltrust Engineering Ltd., London, E.C.I; TI Simplex (Fans and Ballasts) Ltd., Wednesbury, West Midlands; Simplon Interline Trading Co. Ltd., London, S. W. $;$; The Submarine Systems Division of Standard Telephones and Cables Ltd., London, S.E.ro; Stelmo Ltd., Ashford, Kent; Thos. Storey (Engineers) Ltd., Stockport, Greater Manchester; TAC Construction Materials Itd., Manchester: Taylor Woodrow International Ltd., London, W.5; Tecquipment Ltd., Nottingham: Thermal Syndicate Ltd., Wallsend, Tyne and Wear; The British Timken Division of The Timken Company, Northampton; R. Twining \& Co. Ltd., Andover, Hampshire; United Towing Ltd., Huil;

Vosper Thornycroft Ltd., Portsmouth; Enoch Wedgwood (Tunstall) Ltd., Stoke-on-Trent; Westerley Marine Construction Ltd., Waterlooville, Hampshire; Sir Bruce White, Wolfe Barry \& Partners, London, S.W.x; Whitehead Harbormaster Ltd., Harlow, Essex; The Engineering Division of Wilkinson Sword Ltd., London, W.4; George Wimpey \& Co. Ltd., London, W.6.

## Awards for Technical Achievement

In 1977, the following concerns received the Queen's Award for technological achievement: Henry Cooke Ltd., Beetham, Milnthorpe, Cumbria (Base paper for transfer printing of textiles); The Hersham Division of Decca Radar Ltd., Walton-onThames, Surrey (An airfield surface movement indi(ator); EMI-MEC Ltd., East Grinstead, West Sussex ( A fully automatic plug-board controlled turning machine) ; The Agrochemical Division of Fisons Ltd., Hauxton, Cambridgeshire (Selective herbicides for sugar beet and grass crops); The Plant Protection Division of Imperial Chemical Industries Ltd., Haslemere, Surrey (A specific aphicide for control of fruit ant flower crop pests); Johnson Matthey Research Centre, Reading, Berkshire (Catalyst systems for controlling motor vehicle exhaust emissions); Land \& Marine Engineering Ltd., Bromborough, Merseyside (Burial of subsea pipelines); The Electrical Division of Lucas Aerospace Ltd., Hemel Hempstead, Hertfordshire (A toroidal constant speed drive for aircraft generators) ; Malvern Instruments Ltd., Malvern, Hereford and Worcester (The "Malvern Correlato"" for study of laser light signals); Marconi Instruments Ltd., St. Albans, Hertfordshire (A digital storage $V H F$ spectrum analyser); Marconi Space \& Defence Systems Ltd., Stanmore, Middlesex (Radar for missile guidance); Marwin Cutting Tools Ltd., Rothley, Leicestershire (Helical tungsten carbide cutting tips and tools); The Mining Research \& Development Establishment of the National Coal Board, Stanhope Bretby, Burton-on-Trent (The NCB/DOSCO" in-seam miner); The National Vegetable Research Station, Wellesbourne, Warwickshire (Production of bulb onions); Paxman Diesels Ltd., Colchester, Essex (A range of compact diesel engines); Pitcraft Ltd., Hoyland Nether, South Yorkshire ( $A$ chainless haulage system for coal mining) : Railko Ltd., High Wycombe, Buckinghamshire (Reinforced plastics material for ships stern shaft bearings); Ernest Scragg \& Sons Ltd., Macclesfield, Cheshire ( $A$ friction twisting device for textile yarn) : Sorex (London) Ltd., Wembley, Middlesex (Rodenticides).

A TABLE OF THE NUMBER OF DAYS FROM ANY DAY IN ONE MONTH TO THE SAME IN ANY OTHER MONTH IN ORDINARY YEARS

(2976) July.-Monthly rainfall totals were below normal everywhere except in the extreme west of Northern Ireland and in places where above average rainfall was associated with thunderstorms. In England and Wales most districts had less than half the normal amount and it was the driest July since 1955. In much of Scotland and Northern Ireland monthly totals were also below normal. In spite of this thunderstorms occurred in many districts during the first half of the month and in southern, central and eastern England later. Heavy rain caused local flooding on several days and on the rath a man was killed when his lorry was struck by lightning at Clapham, near Bedford. On the same day 64.8 mm ( $2 ; 55$ ins.) was recorded at Sudborough (Northamptonshire). Three whirlwinds were reported in the Southampton area on the afternoon of the $2^{\text {rd }}$. On the 2gth Cairngorm (Highland Region) and Lowther Hill (Strathclyde) recorded gusts of 55 kts ( $63 \mathrm{~m} . \mathrm{p} . \mathrm{h}$.) and 60 kts ( $69 \mathrm{~m} . \mathrm{p} . \mathrm{h}$ ) respectively but gales were very infrequent during the month. Fog was frequently reported around the north coasts of Scotland until mid-month and again during the 4 th week. Fog was reported on the coasts of England and Wales at times. Mean monthly temperatures were above average everywhere and exceeded normal by more than 3 degrees centigrade ( $5.4^{\circ} \mathrm{F}$.) in the London area. They were between and $3^{\circ} \mathrm{C}$. ( $3 \cdot 6-54^{\circ} \mathrm{F}$.) above normal in parts of north, northeast and southern Scotland, in northwest, central and southern England and East Anglia and also in north and south Wales. Temperatures exceeding $30^{\circ} \mathrm{C}$. ( $86.0^{\circ} \mathrm{F}$.) were widely reported in central and southern England and also occurred in Wales, East Anglia, northwest England and parts of Scotland. At Wauchope (Borders Region) the temperature reached $32 \cdot 4^{\circ} \mathrm{C}$. $\left(90 \cdot 32^{\circ} \mathrm{F}\right.$.) on the 2nd, this being the highest temperature recorded in Scotland since $x 908$. On the $3 \mathrm{rd}, 35^{\circ} 9^{\circ} \mathrm{C}$. ( $96.62^{\circ} \mathrm{F}$.) was recorded at Cheltenham (Gloucestershire), the highest there since 1879 . Water shortages became increasingly acute and fires occurred in the countryside in many areas. Monthly sunshine totals were generally well above normal except in western and northern areas of Northern Ireland and the Hebrides. In northeast England and the north Midlands some places had their sunniest July on record. In Cromer (Norfolk) $3^{18 \cdot \text { I hours of sun- }}$ shine was the highest July total since 1902.

August.-Monthly rainfall totals were below average almost everywhere except in a narrow band extending from Norfolk to the Midlands. Less than a quarter of the average amount was recorded in much of Scotland, Northern Ireland, northern England, Wales and sourthern England. Some districts were exceptionally dry and in the Lleyn Peninsula and parts of Dyfed no rain fell. In Scotland it was the driest August since 1869 and in Northern Ireland the driest this century. On the 3rd 17 mm . ( 0.67 ins.) of rain fell at Marham (Norfolk) in one hour and cruiser was struck by lightning on the Norfolk Broads. From mid month until the 26 th it was dry almost everywhere but from the 27th many part of England and Wales had rain or thunderstorms. 69.9 mm . ( 2.75 ins.) fell at Spalding (Lincolnshire) in 9 hours on the 3oth. Monthly mean temperatures were above average in all districts. The month started with an unusually cold night ( $3 \mathrm{rst} / \mathrm{zst}$ ). This was the coldest night of the month in most areas and temperatures fell below freezing at some places. After the first few days it became very warm in most areas and very hot between the 23 rd and 26 th. The temperature reached $3^{2} \cdot 5^{\circ} \mathrm{C}$. $\left(90^{\prime} 5^{\circ} \mathrm{F}\right.$.) at North Heath (West Sussex) on
the 25 th and at Harrow Weald (Greater London) on the 26 th. In Wales $30 \cdot 3^{\circ} \mathrm{C}$. ( $86 \cdot 5^{\circ} \mathrm{F}$.) was recorded at Hawarden Bridge (Clwyd) on the 25th. The highest temperature in Scotland and in Northern Ireland was $29.5^{\circ} \mathrm{C}$. $\left(85 \cdot \mathrm{I}^{\circ} \mathrm{F}\right.$.). The water shortage in much of the country was now extremely acute and supplies were cut off for part of the day in some areas. Fires in heath and moorland caused considerable damage in many areas. Monthly sunshine totals were well above average everywhere, mostly more than 150 per cent. of normal. In parts of Northern Ireland and Western Scotland totals exceeded 180 per cent. of average. It was the sunniest August in Northern Ireland and many places in England this century and the sunniest since 1947 in most of Scotland, parts of northwest England and in Wales. In south and southwest England several places recorded more than 330 hours of sunshine, the previous highest August total being 325 hrs . at Guernsey in 1899. $275 \cdot 8 \mathrm{hrs}$. were recorded at Aldergrove (Co. Antrim) and $250 \cdot 5 \mathrm{hrs}$ recorded at Stornoway (Isle of Lewis) was the highest August total there since 1899 .

September.-Rainfall totals were generally well above average except in Shetland, western Scotland, western areas of Northern Ireland and parts of northwest England and south Wales. In northeast England and from north Wales and Merseyside down to south Devon and Dorset many places had well over twice the normal amount with a few places having three and even four times the average. It was the wettest September in England and Wales since 1918 and the second wettest since 1727. Torrential rain caused flooding in many areas, notably in Stokesley (North Yorkshire) on the rith, Polperro (Cornwall) on the 24 th/25th and in Glasgow on the 28 th when 84 mm . (3'3 $\mathbf{3}^{1}$ ins.) fell in 3 $\frac{1}{2}$ hours. Heavy rain with occasional hail and thunder was frequent between the 8th and iath and there were severe gales. Gusts exceeding 50 knots ( 57 m.p.h.) were widely reported in northern and western districts. Two large water spouts were observed over the sea near Anglesey on the roth and at Great Dun Fell (Cumbria) a gust of 90 knots ( $103 \mathrm{mp} . \mathrm{h}$.) was recorded on the 13 th. Rainfall was unusually heavy and thundery from the arst to the end of the month. Fog was sometimes widespread and persistent mainly in southern and central England and East Anglia on the 18th and rgth and in Northern Ireland on the 22nd. Monthly mean temperatures were little below average almost everywhere, the highest temperature recorded being $25^{\circ} \mathrm{C}$. ( $77 \cdot 0^{\circ} \mathrm{F}$.) at St. Helier (Jersey) on the 7th. Several places in western districts reported air frost from the $x^{5}$ th to 17 th. Monthly sunshine totals were little above average in western coastal districts of Scotland, in Shetland, in a few places on the south coast of England and in Jersey but below average everywhere else. The least sunny areas were in northern England, where some places had less than half the average, and in eastern Scotland where a number of places had the lowest totals for many years. Edinburgh had its dullest September since records began in rgor.

October.-Monthly rainfall totals were above average in all districts except parts of western Scotland and Cumbria. Values exceeded twice the normal amount in much of eastern Scotland, eastern England, the Midlands, southern Wales and eastern parts of Northern Ireland. Three times the average occurred at Exeter (Devon) and at Deers Meadow (Co. Down) where 570 mm . ( $22 \cdot 44 \mathrm{ins}$.) were recorded. Outbreaks of rain, with hail and thunder in places, were frequent and snow fell at
times on the Scottish mountains. It was the wettest October in England, Wales and Scotland since $x 967$ and in Northern Ireland this century. On the 5 th 100.3 mm . ( 3.95 ins.) fell at Avon Dam (Devon) and 113.9 mm . ( 4.48 ins.) fell at Llyn Eigiau (Gwynedd) on the $x 4$ th. There were gales in many places during the first three weeks. These were severe in northern districts on the 6th. Gusts of 80 knots ( 92 m.p.h.) were recorded at Blackford Hill (Edinburgh) and at Lowther Hill (Strathclyde) and at Great Dun Fell (Cumbria). At Snaefell (Isle of Man) gusts of 86 knots ( 99 m.p.h.) and 82 knots ( 94 m.p.h.) were recorded on the 5 th and 6 th respectively. Further gales on the $34^{\text {th }}$ were particularly severe in the English Channel causing a number of deaths at sea. Ferry services to France and the Channel Islands were disrupted, a sloop was torn from her moorings at Weymouth and smashed on the beach and many small boats were swept from their moorings in Christchurch harbour. Overnight fog formed from time to time and was sometimes dense and slow to clear. Many parts of the United Kingdom were affected by fog between the 25 th and 28 th . Monthly mean temperatures were below average in Northern Ireland but near normal everywhere else. At Elmstone (Kent) $20 \cdot 2^{\circ} \mathrm{C}$. $\left(68 \cdot 4^{\circ} \mathrm{F}\right.$.) was recorded on the 9 th and at Morecambe (Lancashire) a similar temperature was recorded on the rith. At Usk (Gwent) the temperature fell to $-6 \cdot 6^{\circ} \mathrm{C}$. ( $20 \cdot \mathrm{x}^{\circ} \mathrm{F}$.) on the night of the 30 th $/ 3$ rst. Monthly sunshine totals were below average except in the Outer Hebrides, much of the west coast of Scotland and in parts of Co. Down. In central London it was the dullest October since 1929 and at Eskdalemuir (Dumfries and Galloway Region), where it was the dullest since records began in x9Io only 40.2 hours of sunshine were recorded and there were 15 days with no sunshine at all.

November.-Monthly rainfall totals were above average in western Scotland, the Isle of Man, the coastal strips of northwest England, southern Wales, parts of southwest England, much of East Anglia and southeast and central southern England. Totals were up to twice the average in Kent and Sussex. Rainfall was below average everywhere else and less than half the normal amount was recorded in parts of northeast Scotland, southeast Scotland to the Humber, the north Midlands and Co. Armagh. Rain caused widespread flooding in southern England at the end of the month and 70.6 mm . ( $2.7^{8}$ ins.) were recorded at Stubbington (Hampshire) on the 2gth. Snowfall was less than normal and at Eskdalemuir (Dumfries and Galloway Region) it was the first November without snow since 1960. A blizzard occurred in Cumbria on the 2gth and Kirkstone Pass was blocked for a short time. Winds were frequently fresh or strong with gales at times. From the 25th gales, severe at times, swept many parts of the United Kingdom affecting northern districts first and southern areas later. These gales caused damage to sea-front properties in southern England and disrupted the ferry service to the Isle of Wight on the zgth. An extreme gust at the Needles blew in the windows of the coastguard look-out. On the 28th gust of 82 knots ( $94 \mathrm{~m} . \mathrm{p} . \mathrm{h}$.) was recorded at Blackford Hill (Edinburgh). Fog occurred widely during the second week and was dense at night with freezing patches. It persisted all day in places, particularly in northern England. Monthly mean temperatures were mostly below average but they were above average in southern Shetland, where Lerwick had its mildest November since 1959, in Orkney, the Outer Hebrides, the northernmost parts of Scotland and a few places on the coasts of
the United Kingdom. At Usk (Gwent) the temperature fell to $-12.4^{\circ} \mathrm{C}$. ( $9^{\circ} 68^{\circ} \mathrm{F}$.) on the night of the 13 th $/ 14$ th. Monthly sunshine totals were below average in western Scotland, northern England, East Anglia, the south Midlands, southern Wales, Ifew places in Northern Ireland and generally in southeast and central southern England. Remaining districts had above average sunshine and Orkney and the northeast coast of Scotland were particularly sunny. At Banff (Grampian Region) it was the sunniest November since records began in 1914.

December.-Monthly rainfall totals varied considerably in different areas of the country from nearly twice the average around Aberdeen and in parts of Bedfordshire to less than half the average in northwest Scotland and some places in northwest England and Wales. In parts of the Scottish Highlands it was the driest December for many years with several places recording less than 35 per cent. of normal. Snow occurred mainly between the ist and rath, during the third week and from the 27th onwards. There were blizzards in Scotland and northern England at the end of the month and snow cover was unusually persistent in these areas. In parts of Scotland the number of days with snow lying was the greatest for December in 60 years. Gales were severe in the English Channel at the beginning of the month and gusts exceeding 70 knots ( 8 x m.p.h.) were recorded in southwest England and the Channel Islands on the rst. Fog affected most areas during the month and formed more frequently than normal in Northern Ireland. The fog, often dense and freezing mostly occurred in the first three weeks and persisted all day in places. A number of road accidents, causing injury and loss of life occurred in thick fog and on the 22nd about 50 vehicles were involved in a multiple pile-up on the Yorkshire/Lancashire border. A whirlwind, which lifted sheds into the air and damaged walls and roofs was reported at Landford (Wiltshire) on the night of the 7 th $/ 8$ th. Mean monthly temperatures were below average everywhere mostly by $z$ or $3^{\circ} \mathrm{C}$. ( 4 or $5^{\circ} \mathrm{F}$.) and it was the coldest December generally since 1950. At both Lagganlia (Highland Region) and Crawfordjohn in the Southern Uplands the temperature fell to $-15 \cdot 8^{\circ} \mathrm{C}$. $\left(3.6^{\circ} \mathrm{F}\right.$.) on the night of the $2 \mathrm{nd} / 3 \mathrm{rd}$. The low temperatures on this night caused two trains to be stranded near Beattock Summit. At Glasgow Airport the daytime temperature did not rise above $-5^{\circ} \mathrm{C}$. $\left(23^{\circ} \mathrm{F}\right.$.) on the 3 rd . In the south the coldest night was the 28 th/2gth when the temperature fell to $-1 x^{\circ} \mathrm{C}$. $\left(12 \cdot 2^{\circ} \mathrm{F}\right.$.) at several places in the south Midlands and central southern England. The temperature rose to $11.5^{\circ} \mathrm{C}$. $\left(52^{2} 7^{\circ} \mathrm{F}\right.$.) at the Lizard (Cornwall) on the aznd. Monthly sunshine totals were mostly near or above average except in Northern Ireland. In the Glasgow area, where almost twice the normal amount was recorded, it was the sunniest December since 1967.
Year (1976).-Annual rainfall totals were slightly above average in parts of Northern Ireland, eastern Scotland and northeastern England. Values were below average almost everywhere else. In Scotland and Northern Ireland January, March and May were wet but February and April were dry. June to August were dry in all areas and this was the driest such period in Northern Ireland since 1900 and in Scotland only 1955 has been drier in 108 years. In England and Wales the exceptionally dry summer was the culmination of 16 months of rainfall deficiency unprecedented in records going back to ${ }^{2727}$. The long drought caused severe water shortages but it was brought to an abrupt end by the heavy rainfall of September and October.

Over England and Wales it was the wettest September since 1918 and the total for the two months together was the highest for this period in 250 years of record. The year opened with one of the most severe gales to affect the United Kingdom this century and on the night of the 2nd at least 23 people lost their lives and damage was considerable. It was very cold with heavy falls of snow in the last week. February was generally mild and fog persisted on southern coasts during the last week. March was mainly cold with snow or sleet showers in the north. On the 12 th gales affected shipping and three were many distress calls and some loss of life. In April northern districts had snow in the first week and rain or showers affected most areas until mid-month. There were widespread frosts towards the end of the month. There were some thunderstorms in May but rainfall amounts were small in the south. June brought heavy rain to southern England on the Igth but otherwise it was a generally dry month in England and Wales. An exceptionally hot spell began the 23rd which continued through the first week of July and temperature records were widely broken. The hot spell was the longest and most extensive for at least 100 years. Heavy thunderstorms occurred in places. August was exceptionally sunny with scattered thunderstorms. September was very wet with prolonged rain often thundery. Gales were severe in the second week and fog occurred in the last two weeks. October was another wet month with high winds, hail and thunder. Gales were severe in northern districts on the 6th and in the English Channel on the 14th when small boats were swept from their moorings and there were anumber of deaths at sea. Fog was widespread during the last week. In November there were severe frosts in Scotland between the xoth and i4th and fog occurred in many areas in the second weck. There were severe gales at the end of the month. December was a cold month with heavy snow at times. Fog was sometimes dense, freezing and persistent. Mean temperatures for the year were a little below average in north Shetland and parts of Cornwall but above average elsewhere. Sunshine totals for the year were above average over England and Wales as a whole and near average over Scotland and Northern Ireland.
(1977) January.-Monthly rainfall totals were above normal almost everywhere in England except the northwest and in eastern areas of Northern Ireland. There was no clear pattern in Wales but rainfall was generally below average in Scotland except for the northwest, the southwest and the east. At Stonethwaite(Cumbria) $73 \cdot 2 \mathrm{~mm}$ ( $2 \cdot 88$ ins.) fell in $3^{\frac{1}{2}}$ hours on the night of the 30 th $/ 3$ rst. Snow and sleet fell in some districts at the beginning and end of the month but the heaviest snowfalls occurred between the roth and roth. Deep drifts made roads impassable in northern areas and in the north Midlands, where several people died of exposure when their cars were stranded. Undrifted snow exceeded 40 cms . ( 15 ins.) in depth in some places and a depth of 30 cms . ( $x 2 \mathrm{ins}$.) was reported near Ashford (Kent) on the i2th. Gales were severe at times particularly in southern England on the 25th when gusts exceeding 70 knots ( 8 Im m.p.h.) were recorded at several places along the south coast. Fallen trees blocked roads in southern counties and a motorist was killed by - falling tree in Surrey. A gust of 88 knots (ror m.p.h.) was recorded on the z6th at High Bradfield (South Yorkshire). Patches of overnight fog formed fairly frequently during the month and affected most districts. The fog was often dense and slow to clear and sometimes freezing. It was particularly persistent in southwest

England and East Anglia on the 30 th and in the Belfast and Glasgow areas on the $3^{\text {rst. }}$. Monthly mean temperatures were below normal in parts of Northern Ireland, southern Scotland and extreme northern England They were a little above normal in parts of southeast England and northernmost Scotland and near normal elsewhere. The temperature rose to $12 \cdot 7^{\circ} \mathrm{C}$. $\left(54 \cdot 9^{\circ} \mathrm{F}\right.$.) at Craigdarroch (Highland Region) on the 4th but fell to $-x 7.8^{\circ} \mathrm{C}$. ( $-0.04^{\circ} \mathrm{F}$.) at Braemar (Grampian Region) on the night of the 17 th $/ 18$ th, the lowest temperature recorded there in January since 1963. At Innsworth (Gloucestershire) the temperature reached $13.6^{\circ} \mathrm{C}$. ( $56.5^{\circ} \mathrm{F}$.) on the $25^{\text {th }}$. Sunshine totals were above average in Devon and Cornwall, along the south coast of England and in most districts north of a line from the Wash to north Wales. Baltasound (Shetland) had its sunniest January since $\mathbf{~} 960$. Wales and the remaining areas of England had less sunshine than normal, the dullest places being in the Salisbury Plain area.

February.-Rainfall totals were well above average everywhere in the United Kingdom except the Highland Region of Scotland and the Northern Isles. Totals exceeded twice the average in many areas with three times the average falling in northern Wales, the Severn and Avon valleys and in parts of the east coast of Scotland. The wettest areas were Nottinghamshire and Derbyshire where rainfall was four times the average. There was severe flooding in many districts and places in eastern Scotland and the Midlands had their wettest February on record. In Nottingham it was the wettest February since 1888 . Snow and sleet fell at times mostly in northern areas and the Welsh mountains but spread into central England in the last week. At Thornton Moor (West Yorkshire) - undrifted depth of 6 x cms . ( 24 ins.) was measured on the 25 th. Winds were frequently strong on western and northern coasts and reached gale force at times. Gusts of 76 and 75 knots ( 87 and $86 \mathrm{~m} . \mathrm{p}$.h.) were measured at Snaefell (Isle of Man) and Lowther Hill (Strathclyde) respectively on the night of the and $/ 3 \mathrm{rd}$. On the $\mathbf{x} 8$ th gales were severe in western and southern coastal districts of England and Wales. During the first two weeks of the month fog was sometimes dense and freezing and persisted in the Central Lowlands of Scotland, in Northern Ireland on the 8th and in parts of southern England and the Midlands on the 15th. Monthly mean temperatures were above average in England, Wales, the Isle of Man, southern Scotland and southern areas of Northern Ireland. Temperatures were below average elsewhere. Northern areas had a cold spell in the second week and the temperature fell to $-15.6^{\circ} \mathrm{C}$. (3.9 ${ }^{\circ} \mathrm{F}$.) at Keith (Grampian Region) on the night of the $x 2$ th $/ x^{3}$ th. On the 20 th temperatures reached or exceeded $13^{\circ} \mathrm{C}$. $\left(55^{\circ} \mathrm{F}\right.$.) at several places in southern England. Monthly sunshine totals were above average along much of the eastern coast of England, in $\quad$ belt from southeast England to the Severn Estuary, the Channel Islands, the north Welsh coast, in a band from the Firth of Clyde to the Firth of Forth, most of the Highland Region, the Outer Hebrides and the Northern Isles. Totals were below average elsewhere and in Northern Ireland it was the dullest February since 1954.

March.-Rainfall totals were below average in parts of northern Scotland, in a few places in eastern Scotland and northern England, the west coast of Wales and in parts of Northern Wales, the north Midlands, Lincolnshire and East Anglia. Rainfall was above average elsewhere and values of up to twice normal were recorded in Wales, the North Yorkshire Moors and parts of southern

England. More than twice the normal amount fell at Cheltenham (Gloucestershire), some places in the Western Isles, in the Grampians and in the Southern Uplands. On the zoth several places in western Scotland had falls exceeding 70 mm . ( $2 \cdot 8$ ins.) ) and 94.0 mm . ( 3.7 ins .) were recorded at Fasnacloich (Strathciy yde). A little snow or steet fell during the first week, mostly in northern areas and also around mid-month in Wales and southwest England. It was occasionally reported in Scotland from the ${ }^{22}$ nd but most areas had showers of snow or sleet from the 27 th onwards and sleet was reported as far south as Guernsey on the 28 th . Gales were severe at times, in the first half of the month, on western and northern coasts and on the $\mathbf{2 5 t h}$ - gust of 97 knots ( I 2/ m.p.h.) was recorded at Snaefell (Isle of Man). From the zoth onwards strong winds reached all districts and gales were severe in exposed places on the 3rst. Widespread fog developed on coasts and hills during the first week and sea and coast fog affected parts of eastern Scotland and northeast England on the roth and zoth. Monthly mean temperatures were above average everywhere the difference from normal ranging from $+0.5^{\circ} \mathrm{C}$. ( $\mathrm{I}^{\circ} \mathrm{F}$.) in western parts to $+2 \cdot 0^{\circ} \mathrm{C}$. ( $3^{\cdot} \cdot 6^{\circ} \mathrm{F}$.) in southeast England and East Anglia. The temperature exceeded $58^{\circ} \mathrm{C}$. $\left(64^{\circ} \mathrm{F}\right.$.) at many places in East Anglia and sourthern England on the 2nd and Exeter Airport with \# temperature of $20^{\prime} 2^{\circ} \mathrm{C}$. ( $68.4^{\circ} \mathrm{F}$.) had its warmest March day since 3944 . Monthly sunshine totals were below average in ail areas except a few places on the coasts of southeast England and East Anglia. At Eskdalemuir (Dumfries and Galoway Region) it was the dullest March since 1936 and at Lety-evan-Hen (Dyfed) it was the dullest March since 1947.
April.-Monthly rainfall totals were above average in northern Wales and from the northwest Midlands along the Pennines to the Border. They were also above average in much of Northern Ireland and Scotland. Amounts exceeded one and a half times normal over the northwest Highlands and the Moray Firth area with some places recording twice the average. Almost all remaining areas had less rainfall than normal and some places on the south coast of England and in southeast Scotland recorded less than half the normal amount. Outbreaks of rain or showers, wintry in many districts, were frequent during the month. At Long Lawford (Warwickshire) hail lay to depth of y cm . ( 0.4 ins) with drifts to ro cms . (3.' ins.) on the rst. Showers of snow or sleet became widespread between the 7 th and 9 th and were reported as far south as the Channel Islands. The number of days with snow or sleet at Kirkwall (Orkney) was the greatest since $x 946$ and at Lerwick (Shetland) it equalled the greatest number for April since records began in 1974. Gales were reported in the west and north in the first half of the month and again after the 22nd. On the rst a gust of s knots ( (0x m.p.h.) was recorded at Snacfell (Isle of Man) and 74 knots 85 m.p.h.) was recorded at Lowther Hill (Strathclyde). Fog was seldom reported in inland areas but it formed extensively along coasts and in southwest England and Wales between the zoth and 26 th often associated with precipitation. Monthly mean temperatures were well below average in all districts. In parts of northern Scotland mean temperatures were lower than for the previous month. At Santon Downham (Norfolk) the temperature fell to $-7.7^{\circ} \mathrm{C}$. ( $8 \cdot \cdot \mathrm{r}^{\circ} \mathrm{F}$.) on the night of the gth/zoth. The highest tenperatures occurred on the eastern side of England and at Hull (Humberside) $x 8 \cdot 6^{\circ} \mathrm{C}$. ( $65 \cdot 5^{\circ} \mathrm{F}$.) was recorded on the 22 nd . On the $25^{\text {th }}$ the temperature rose to $18 \cdot 5^{\circ} \mathrm{C}$. ( $65^{\prime} 3^{\circ} \mathrm{F}$.) in Cambridge and several places recorded
temperatures of at least $8^{\circ} \mathrm{C} .\left(64 \cdot 4^{\circ} \mathrm{F}\right.$ ). Monthly sunshine totals were generally near or a little above average except in southwest England, parts of southeast England and Northern Ireland and over much of northern and western Scotland. Sunny intervals occurred in most districts throughout the month and dull days were infrequent.
May.-Rainfall was above average in much of northern Scotland, parts of northeast England, in scattered places in East Anglia and on the southern coasts of England and in the English Channel. Elsewhere rainfall was below average. In Northern Ireland only 1975 was drier in May this century. Outbreaks of rain occurred in most districts during the first half of the month with thunderstorms and scattered hail showers. On the yxth there were several reports of ball lightning in the area between Rothesey (Isle of Bute) and Glasgow. Some structural damage occurred in the suburbs of Glasgow. Scattered falls of snow were reported in northern districts, over high ground in Waies and on Dartmoor. Gales were reported in Kent on the $3^{\text {rd }}$ and in parts of southern England on the rath. Gales also affected southern areas between the 17 th and the zrst. Night frosts also occurred during the first two weeks. Overnight fog occasionally developed in inland areas. Coastal fog occurred more frequently mainly on the English Channel coasts between the gth and $x$ xth and on the coasts of northern Scotland and northeast England in the last week. The second half of the month was generally sunny and dry, although there were some thunderstorms. Mean temperatures for the month were below normal almost everywhere, the largest differences from average being recorded in parts of East Anglia and the Midlands. They were nearest to average over parts of northern and northeast Scotland and on western and southern coasts of England and Wales. The highest temperatures for the month occurred in the north of Scotland and on the 27 th a maximum of $27 \cdot 0^{\circ} \mathrm{C}$. ( $82 \cdot 2^{\circ} \mathrm{F}$.) was recorded at Craigdarroch (Highland Region) and $27 \cdot 0^{\circ} \mathrm{C}$. ( $80 \cdot 6^{\circ} \mathrm{F}$.) was recorded at Fort Augustus (Highland Region). Monthly sunshine totals were above average everywhere and at Valley (Anglesey) $306 \cdot \mathrm{x}$ hours were recorded making it the sunniest May in that area since records began in $\mathbf{9 9 3}$.
June.-Rainfall was above average in many parts of Great Britain with more than twice the normal amount being recorded in scattered areas between Edinburgh and Exeter (Devon). At Edinburgh it was the wettest June since 1928 and the second wettest since the turn of the century. Northern Ireland, western Scotland, parts of East Anglia and some southeast and southwest coastal areas had less than the average rainfall and at Tiree (Argyll) it was the driest June since x94x. Many central areas had nwet Spring Bank Hoilday on the 6 th. The 7 th and 8 th were generally showery. There were thundery showers on the xth and heavy rain and thunderstorms developed on the x2th and x3th over England and Wales especially in the south and east. On the night of the $x_{3}$ th/ $/ 4$ th widespread severe thunderstorms occurred in southern and eastern England. There was $=$ good deal of flooding and some lightning damage in the south. At Huntingdon (Cambridgeshire) 45 mm . ( $x .8$ ins.) of rain fell in 30 minutes. These thunderstorms reached northern England and northern Wales on the afternoon of the 14th. On the 28 th heavy thunderstorms affected areas from Devon across central England to Lincolnshire with 79 mm . ( $0 \cdot 75$ ins.) being recorded in less than one hour at both Exeter (Devon), where hail shattered glasshouses, and Boston (Lincolnshire). Monthly mean tempera-
tures were below average in all areas．At Abbots－ inch（Glasgow Airport）the maximum temperature on the 6th did not rise above $7^{\circ} \mathrm{C}$ ．（ $45^{\circ} \mathrm{F}$ ．）making it the coldest June day recorded there in 65 years of record．In most places it was the coolest June since 1972 and possibly the second coolest this century in some areas．In spite of this some high temperatures were recorded during the month and on the and
$25^{\circ} \mathrm{C}$ ．$\left(777^{\circ} 0^{\circ} \mathrm{F}\right.$ ．）was recorded at Edinburgh whilst $26^{\circ} \mathrm{C}$ ．（ $78 \cdot 8^{\circ} \mathrm{F}$ ．）was recorded at Leeming（North Yorkshire）on the 3rd．Monthly sunshine totals were generally below average but in Northern Ire－ land，western Scotland and northwest England they were above average．At Southampton it was the second dullest June this century and at Lerwick （Shetland）it was the dullest since 2965 ．

Average and General Values，1975－1977（June）

| Month | Rainfall（mm．） |  |  |  | Temperature（ ${ }^{\circ} \mathrm{C}$ ．） |  |  |  | Bright Sunshine （hrs．per day） |  |  |  |

## TEMPERATURE AND RAINFALL RECORDS

WORLD：The maximum air temperature recorded is $57.8^{\circ} \mathrm{C}$ ．$\left(\mathrm{x}^{6} 6^{\circ} \mathrm{F}\right.$ ．）at San Louis，Mexico on August 13，1933：the minimum air temperature recorded is $-88.3^{\circ} \mathrm{C}$ ．$\left(-127^{\circ} \mathrm{F}\right.$ ．）at Vostok，Antarctica on August 24，1960．The greatest rainfall recorded in one day is 1870 mm ．（ 73.62 ins ．）at Cilaos， Isle de Réunion on March 16，1952；the greatest rainfall in one calendar month is $9,300 \mathrm{~mm}$ ． （ $366 \times x_{4}$ ins．）at Cherrapunji，Assam in July， $186 x_{\text {，}}$ the greatest annual total being $\mathbf{2 2 , 9 9 0} \mathrm{mm}$ ． （ $905 \cdot 12$ ins．）also at Cherrapunji in 1861 ．

United Kingdom：The maximum air temperature recorded is $3^{8 . I^{\circ}} \mathrm{C}$ ．（roo $5^{\circ} \mathrm{F}$ ．）at Tonbridge，Kent on July 22,1868 ；the minimum air temperature recorded is $-27.2^{\circ} \mathrm{C}$ ．（ $-17^{\circ} \mathrm{F}$ ．）at Braemar，Aber－ deen on February 11， 1895 ．The greatest rainfall recorded in one day is 280 mm ．（rrins．）at Martins－ town，near Dorchester on July 18，1955．The greatest annual total is $6,528 \mathrm{~mm}$ ．（ 257 ins．）at Sprinkling Tarn in 1954.

## TEMPERATURE, RAINFALL AND SUNSHINE

IN THE UNITED KINGDOM
The following table gives mean air temperature ( ${ }^{\circ} \mathrm{C}$.) total monthly rainfall ( mm .) and mean daily bright sunshine (hrs.) at $m$ representative selection of climatological reporting stations in the United Kingdom during the year July 1976 to June 1977 and the calendar year ri96. The heights ( m .) of the reporting stations above mean sea level are also given. Fuller details of the weather are given in the Monthly Weather Report published by the Meteorological Office.

## COPYRIGHT

The Government Department dealing with Copyright is the Industrial Property and Copyright Dept., Department of Trade, 25 Southampton Bldgs., W.C.z.

Subject to the provisions of the Copyright Act. 2956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. No registration nor other formalities are required in order to obtain the protection of the Act. Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films and television and sound broadcasts. Libraries
entitled, under a provision still in force of the Copyright Act, r9xr, to receive free copies of books published in the United Kingdom are the British Library, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.-Compulsory registration at Stationers' Hall was terminated by the Copyright Act of 1gri, but in 1924 the Stationers' Company esablished new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being $£_{5}$ for a Book, or a Fine Art; certified copies $\mathscr{C}_{3}$ in either case. The fee for a search is $£_{2} 2^{\prime} 5^{\circ}$

Price $£ 7 \cdot 00$ net.

## THE STOCK EXCHANGE IN THE UNITED KINGDOM AND IRELAND

## THE STOCK EXCHANGE

Broker Members of the Stock Exchange buy and sell shares for members of the public. This is done for individual investors, for their advisers such as bank managers, solicitors and accountants, and for investing institutions like insurance companies, pension funds, unit trusts and merchant banks. For this the stockbroker is paid fixed scale of commission based on the value of the securities. In addition to this service, brokers advise their clients, according to their particular circumstances and needs, on how to invest their money to greatest advantage. In addition, they will undertake to review periodically the portfolios of their clients.

The Stock Exchange provides facilities for raising capital for industry. Any Broker will give advice on how a company can finance its growth by getting a listing. For companies already listed, other methods are possible-such as rights issues and debenture or loan stocks-for obtaining additional funds. Brokers' advice is also available to industrialists on matters such as mergers and acquisitions.

All listed British companies are incorporated under the Companies' Acts, which contain stringent regulations for their management and control. They are limited liability companies, which means that if you are a shareholder in such a company you cannot be called upon to pay any part of its debt or liabilities if it gets into difficulties, unless, in quite exceptional cases, you are a holder of partly-paid shares, in which event your liability is limited to the amount required to make the shares fully paid. The Stock Exchange serves investors, whether inexperienced or expert, big or small, and the authorities of the Stock Exchange insist on compliance with stringent regulations to ensure that the
public are fully informed of the constitution and record of every company whose securities are admitted to the market.

In London the foundation stone of the building was laid in 1801, but the building was almost entirely reconstructed in 1854 from the designs of Thomas Allason. The Stock Exchange has now been rebuilt as a large tower block, 33 feet high with a new Trading Floor to the west of the block.
There are other Trading Floors in Liverpool, Manchester, Birmingham, Glasgow, Belfast and Dublin.

The Stock Exchange provides a market for the purchase and sale of about 8,500 securities valued at over $£ 290,000,000,000$, and also securities listed on overseas Exchanges. At present, the Members of the Stock Exchange, consisting of Brokers (agents for clients) and jobbers (dealers as principals in specific securities), number about 40,00 . Visitor's Gallery in London is open between xo a.m. and 3.15 p.m. from Monday to Friday. Admission free and without ticket. Film show.

## THE CIVIC TRUST

${ }_{7} 7$ Carlton House Terrace, S.W. [01-930 0914]

Founded in 1957 with the object of improving the appearance of town and country, the Trust is recognized charity, supported by voluntary contributions. Four Associate Trusts are linked with it in Scotland, Wales, the North West and the North East.

The Trust gives support and advice to over x,250 local civic and amenity societies throughout Britain. It has initiated hundreds of schemes to brighten and tidy up drab streets. It has promoted new techniques for moving semi-mature trees as part of a wider campaign to plant more trees. It stimulates voluntary action to remove eyesores
which mar town and countryside and makes awards annually for good development of all kinds. Its proposals led to the creation of the Lee Valley Regional Park Authority. It was closely associated with the drafting of the Civic Amenities Act 1967, which created the concept of conservation areas and of the Town and Country Amenities Act 1974, which gave further protection to such areas. It makes available on hire films, photographs, slides and exhibitions. By conferences, projects and reports, it focuses attention on major issues in town planning and architecture.

## LOCAL ARCHAEOLOGICAL SOCIETIES

Price $£ 7.00$ net.

TRADES UNION CONGRESS (T.U.C.)
Congress House, 23-28 Great Russell Street, W.C.x.
[ $0 x-636-4030$ ]

The Trades Union Congress, founded in 1868 , is a voluntary association of Trade Unions, the representatives of which meet annually to consider matters of common concern to their members. The Congress has met annually since ${ }^{3} 871$ (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliated fees are paid. Affiliated unions (in $1976 / 7$ ) totalled 115 with an aggregate membership of $11,515,920$.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with motions from affiliated societies on questions of policy and organization. Some of these unions are themselves federal bodies.

One of the important responsibilities of the annual Congress is to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the trade union movement, with authority to promote common action on general questions, and to assist trade unions in the work of organization. The General Council is elected by Congress and is composed of $4 x$ members ( 39 representing 88 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group and with the number of representatives each group is entitled to have on the General Council. Women Members.-In 1977, over $3,000,000$ women were members of unions in the T.U.C. The largest groups were members of the National Union of General and Municipal Workers ( $3 \times 4,272$ ), National Union of Public Employees ( 433,650 ), Transport and General Workers' Union ( 305,037 ), National Union of Teachers (214, 101), National and Local Government Officers' Association (297,973), and Union of Shop, Distributive and Allied Workers (3 4,272 ).
Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjusting disputes and differences between affiliated organizations; such cases being dealt with by Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the trade union movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council, the trade union movement maintains systematic relations with the Government and Government Departments, with the Confederation of British Industry and with a
large number of other bodics. The General Council is represented on the National Economic Development Council, established to examine problems associated with faster economic growth. The Council includes Ministers dealing with economic and industrial affairs, representatives of public and private industry and independent members. The General Council nominates members to serve on numerous other bodies, e.g., Manpower Services Commission, Health and Safety Commission and the Council of the Advisory, Conciliation and Arbitration Service.
Chairman ( $\mathbf{9 7 7}$-78), D. Basnett.
General Secretary, Rt. Hon. L. Murray, O.B.e.

## SCOTTISH TRADES UNION CONGRESS

16 Woodlands Terrace, Glasgow
The Congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. In 1977 it consisted of 78 unions with a membership of $x$,oro, 200 and 43 directly affiliated Trades Councils. The majority of the unions organize throughout Britain and affiliate on their membership in Scotland.
The Annual Congress in April elects a $2 x-$ member General Council on the basis of 1 II industrial sections. Congress has been prominent in pressing for economic expansion and full employment in Scotland and the development of the social services, most of which are separately organized in Scotland.
Chairman (1977-78), A. Bell.
General Secretary, J. Milne.

Textile Craftsmen, Yorkshire Society of (977). -Sec., F. Towers, Textile Hall, Westgate, Bradford $x$.

## INDUSTRAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1917. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any firm in the particular industry, subject to the approval of the Councils of the Research Associations. The Department of Industry's Research and Development Requirement Boards, now offer work to the Research Associations in = contractual capacity, this system having replaced general purpose grants.

## Bricks.

Brick Development Association, ig Grafton Street, W.x.-Dir.-Gen., J. S. McBride.

## Brushes.

British Brush Manufacturers' Research Association, c/o Dept. of Textile Industries, The University, Leeds.-Dir., D. I. Fothergill.

## Building Services.

Bullding Services Research and Information Association, Old Bracknell Lane, Bracknel1, Berks.

Cast Iron.
British Cast iron Research Association, Bordesley Hail, Alvechurch, Birmingham.Dir,, H. Morrogh, C.b.E., F.R.S.

## Ceramics.

British Ceramic Research Association, Queen's Road, Penkhull, Stoke-on-Trent.-Dir., A. Dinsdale, O.B.E.

## Civil Engineering.

CONSTRUCTION INDUSTRY RESEARCH AND INFORMAtion Association, Old Queen Street House, 6 Storey's Gate, S.W.r.-Dir., L. S. Blake., Ph.D.

Coke and Tar.
British Carbonization Research Association, Research Centre, Wingerworth, Chesterfield, Derbyshire.-Dir., J. P. Graham.

Construction.
Construction industry Research and Information Association, 6 Storey's Gate, S.W.r.Dir., L.S. Blake, Ph.D.

> Cotton, Silk, etc.

Cotton, Sile and Man-Made Fibres Research Association, Shirley Institute, Didsbury, Manchester, 20.-Dir., L. A. Wiseman, O.B.E.

## Cutlery.

Cutlery and Allied Trades Research Assoclation, Henry Strcet, Sheffield, 3.-Diro, E. A. Oldfield.

## Drop Forsing.

Drop Forging Research Association, Shepherd Street, Sheffield, 3.-Director, S. E. Rogers, Ph.D.

## Fabric Care.

Fabric Care Research Association, Forest House Laboratories, Knaresborough Road, Harrogate.Dir., E. J. Davies.

Furniture.
Furniture Industry Research Association, Maxwell Road, Stevenage, Herts.-Dir., D. M. Heughan.

Glass.
Brtish Glass industry Research Association, Northumberland Road, Sheffield ro.-Diro, C. Thorpe.

Heating and Ventilating.
Building Services Research \& Information Association, Old Bracknell Lane, Bracknell. Dir., P. A. Coles.

Hosiery.
Hosiery and Allied Trades Research AssociaTION (Hatra), Thorneywood, 7 Gregory Boulevard, Nottingham.-Dir., W. A Dutton, O.B.E.

Hydromechanics.
Brtish Hydromechanics Research Assoclation, Cranfield, Bedford.-Dir., G. F. W. Adler.

Instrumentation.
Sira Institute LTD., South Hill, Chislehurst, Kent.-Man. Dir., S. S. Carlisle.

## Internal Combustion Engines.

British Internal Combustion Engine Research INSTTTUTE, IIx-12 Buckingham Avenue, Slough, Bucks.-Dir., J. G. Jaquiss.

Linen.
Lambeg Industrial Research Association, Research Institute, Lambeg, Lisburn, Co. Antrim, N. Ireland.-Dir., H. A. C. Todd, O.B.E.

## Machine Tools.

Machine Tool industry Research Association, Hulley Road, Hurdsfield, Macclesfield, Cheshire. -Dir., A. E. De Barr, O.b.E.

Paint.
Paint Research Association, Paint Research Station, Waldegrave Road, Teddington, Middle-sex.-Dir., G. de W. Anderson, Ph.D.

Paper, Board, Printing and Packing.
Research Ássociation for til Paper and Board, Printing and Packaging industries (Pira), Randalls Road, Leatherhead, Surrey.-Dir., N. K. Bridge, Ph.D.

## Rubber and Plastics.

Rubber and Plastics Research Association of Great Britain, Shawbury, Shrewsbury, Shrop-shire.-Dir., Dr. J. P. Berry.

Ships.
British Ship Research Association, Research Station, Wallsend, Northumberland.-Dir., B. R. Snaith.

Shoes.
Shoe and Allird Trades Research Assoclation, Satra. House, Rockinghamt Road, Kettering, Northants.-Dir., J. G. Butlin.

Springs.
Spring Reskarch and MANUfacturers' Associa-
Ton, Henry Street, Sheffield 3.-Dir., J. A. Bennett.

Steel Castings.<br>Steel Castings Research and Trade assoclaTION, 5 East Bank Road, Sheffield 2.-Director Dr. J. A. Reynolds.<br>Timber.<br>Timber Research and Development Association, Hughenden Valley, High Wycombe, Bucks.Dir., J. G. Sunley.

Water.
Water Research Centre, Ferry Lane, Medmenham, Marlow, Bucks.-Dir., R. G. Allen, O.B.E., Ph.D.

> Welding.

Welding Instrivte, Abington Hall, ur. Cam-bridge.-Dir.-Gen., Prof. A. A. Wells, F.R.S.

## Wool.

Wool industries Research Association (Wira), Headingley Lane, Leeds 6.-Dir., B. E. King, ph.D.

## AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 372):
Unit Of Animal Genetics, Institute of Animal Genetics, West Mains Road, Edinburgh 9.Director, Prof. D. S. Falconer, Sc.D., F.R.S.
Unit of Invertebrate Chemistry and Physiology, University of Sussex, Falmer, Brighton.-Hon. Director, Prof. A. W. Johnson, Sc.D, F.R.S.
Unit of Invertebrate Chemistry and Physiology (Subgroup), University of Cambridge, Zoology Dept., Downing Street, Cambridge.-Associate Director, J. E. Treherne, Ph.D., Sc.D.
Unit of Muscle Mechanism and Insect Physiology, Dept. of Zoology, University of Oxford, South Parks Road, Oxford.-Hon. Dir., Prof. J. W. S. Pringle, M.B.E., SC.D., F.R.S.
Unit of Nitrogen Fixation, University of Sussex, Brighton.-Director, Prof. J. Chatt, Ph.D., Sc.D., F.R.S.

Unit of Soil Physics, 219c Huntingdon Road, Cambridge-Dir., E. G. Youngs, ph.D. (acting).
Unit of Statistics, University of Edinburgh, 21 Buccleuch Place, Edinburgh 8.-Hon. Director, Prof. D. J. Finney, Sc.D., F.R.S., F.R.S.E.
Statistics Group, Dept. of Applied Biology, Pembroke Street, Cambridge.-Officer in Charge, J. G. Rowell.

Systemic Fungicides Unit, Wye College, Ashford, Kent.-Hon. Director, Prof. R. L. Wain, C.B.e., D.SC., Ph.D., F.R.S.

Institute for Research on Animal Diseases, Compton, Newbury, Berks.-Director, J. M. Payne, Ph.D.
Institute of Animal Physiology, Babraham, Cambs.-Director, B. A. Cross, ph.D., sc.D., F.R.S.

Animal Breeding Research Organisation, West Mains Road, Edinburgh 9.-Director, J. W. B. King, Ph.D., F.R.S.
Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.-Director, T. C. Carter, O.B.E., Ph.D., D.SC., F.R.S.E.

Letcombe Laboratory, Letcombe Regis, Wantage, Oxon.-Director, R. Scott Russell, C.b.E., D.sc., Ph.D.
Weed Research Organisation, Begbroke Hill, Sandy Lane, Yarnton, Oxford.-Director, J. D. Fryer.
Food Research Institute, Colney Lane, Norwich.Director, Prof. S. R. Elsden, Ph.D.
Meat Research Institute, Langford, rr. Bristol.Director, J. R. Norris, Ph.D. (also Weston Laboratory, Bridge Road, Weston-super-Mare).

## GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture and Fisheries for Scotland.
Long Ashton Research Station, Bristol.-Director, Prof. J. M. Hirst, D.sc., Ph.D., F.R.S.
Animal Diseases Research Association (Scotland), Moredun Institute, 408 Gilmerton Road, Edin-burgh.-Dir., J. T. Stamp, D.Sc., F.R.S.E.
Animal Virus Research Institute, Pirbright, Surrey. -Director, J. B. Brooksby, C.B.E., D.Sc., F.R.S.E.
East Malling Research Station, Maidstone, Kent. Director, A. F. Posnette, C.B.E., Ph.D., SC.D. F.R.S

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.Director, D. Rudd-Jones, Ph.D.
Grassland Research Institute, Ifurley, nr. Maidenhead, Berks.-Director, A. Lazenby, Ph.D.
Hannah Research Institute, Ayr.-Director, Prof. J. A. F. Rook, Ph.D., D.SC.

Hill Farming Research Organisation, Bush Estate, Penicuik, Midlothian.-Director, J. M. M. Cunningham, Ph.D.
Hop Research Centre, Wye College, Ashford, Kent. Head of Dept., R. A. Neve, Ph.D.
Houghton Poultry Research Station,* Houghton, Huntingdon.-Director, P. M. Biggs, Ph.D., F.R.S.
John Innes Institute, Colney Lane, Norwich.Director, Prof. R. Markham, Ph.D., F.R.S.
Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.-Director, R. L. Mitchell, Ph.D., F.R.S.E.
National Institute of Agricultural Engineering, Wrest Park, Silsoc, Bedford.-Director, C. J. Moss, C.B.E.

Scottish Institute of Agricultural Engineering, Scottish Station, Bush Estate, Penicuik, Mid-lothian.-Director, W. J. West, F.R.S.E.
National Institute for Research in Dairying, Shinfield, nr. Reading.-Director, Prof. B. G. F. Weitz, O.B.E., D.SC.
National Vegetable Research Stn. Wellesbourne, Warwick.-Director, Prof. J. K. A. Bleasdale, ph.D.
Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.-Director, Prof. R. Riley, D.Sc., F.R.S.

Welsh Plant Breeding Station, Plas Gogerddan, nr. Aberystwyth.-Director, Prof. J. P. Cooper, Ph.D., D.sc.

Scottish Plant Breeding Station, Pentlandfield, Roslin, Midlothian.-Director, J. H. W. Holden, ph.D. (acting).
Rowett Research Institute, Bucksburn, Aberdeen. -Director, K. L. Blaxter, D.SC., F.R.S.
Rothamsted Experimental Station, Harpenden, Herts.-Director, L. Fowden, Ph.D., F.R.S.
Scottish Horticultural Research Institute, Invergowrie, Dundee.-Director, C. E. Taylor, Ph.D.

[^37]PROGRESS OF THE NEW TOWNS (To Dec. 3, 1976)

## PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The following alphabetical list comprising $\mathbf{3 I}^{1}$ women and 22 men shows the principal charitable bequests since our last issue. Legacies and other charges have to be deducted from gross estates before the amount to charities can be arrived at.

The National Trust received large bequests under three Wills-the roth Earl of Stamford, a bachelor, left his home, Dunham Massey Hall, with an endowment, and Elsie Bambridge, the last surviving child of Rudyard Kipling, left the Trust her Wimpole Estate and an endowment provided it was accepted within six months of her death. She also left the manuscript of the "Just So" stories to the British Museum. Edward S. Duncan left the Trust all of his $£ 166,892$ estate, with the wish that $\begin{aligned} & \text { piece of }\end{aligned}$ land be purchased or leased on the bank near the meeting of the rivers Hodder and Ribble at Mitton, near Whalley, Lancs.

Edward C. Ive left the bulk of his £45,6 ro estate to Winchester Cathedral, "towards the maintenance of the fabric and worship of the cathedral ", and Harold H. Barrett, Ida Brodbeck and Elsic Taylor, all left their respective estates entirely to churches.

Nina R. Benson-Cooke left the residue of her £66,074 estate equally between Berkhamsted School and Ardingly College for scholarships, former schoolmaster Norman F. Parbury, of Coventry, left the residue of his estate to St. John Baptist College, Oxford, "for the purpose of learning and knowledge", and Philip L. Teed, a barrister, left the residue of his $£ 39 \mathrm{I}, 853$ estate to Churchill College, Cambridge.

Alice L. Heap, of Southport, left the residue of her estate to the Church Army Housing, to provide and equip flatlets for elderly persons in Southport, and a Worthing antique dealer, Leslie Godden, left \& 30,000 to Worthing and District Council of Social Service, and the residue of his property on the death of his wife to charities to be selected by his trustees whose principal objects are the provision of homes or accommodation for elderly persons residing within the Borough of Worthing.

Edith A. Bestwick, George A. A. Horner, George E. Robinson and Winifred R. Sudborough, all left large amounts to charities to be selected by their trustees. Helen M. E. Y. Hill, of Folkestone, left all her £, $27,25^{8}$ estate to the Royal College of Surgeons of England, to be known as " The Osman Hill Research Fund "in memory of her husband, to establish and maintain grants and scholarships to university graduates in the UK, to enable them to engage in medical research, and Dame Edith Evans, the actress, left the residue of her $£ 130,545$ estate to the Actors' Charitable Trust, requesting it be used primarily in connection with Denville Hall, the home for retired actors and actresses.

The principal figure in the list below is that of the gross estate.
Mrs. Elsie Bambridge, of Arrington, Royston, Herts................................ $£ 1,600,896$ (The Wimpole Estate, certain securities and the residue of her property to the National Trust)
Mr. Harold Halsall Barrett, of Prenton, Wirral.......................................11,368 (All property to St. Stephens Church, Birkenhead)
Miss Edith Alice Bestwick, of Stretford, Manchester................................ $2 \times 68,380$ ( $£ 5,000$ each to six named charities and the residue to such charities as her trustees think fit)

Mrs. Gladys May Wishart, of Bournemouth
(Residue to USPG)
$£_{153.555}$

## BRITISH INSURANCE COMPANIES IN 1976

In 1976, the worldwide general business premium income of the insurance companies increased by $£ 1,384$ million to $£ 6,025$ million, an increase of $29.8 \%$ over 1975.

The companies sustained an underwriting loss on general worldwide business of $£^{3} 46 \cdot 3$ million ( $2 \cdot 7 \%$ of premiums) compared with a loss of $\mathcal{E} 175^{\circ} \circ$ million ( $4: 2 \%$ of premiums) in 1975 . Taking into account investment income of $£_{63 x}$ million, the net result was million in 1975), the bulk of which went into general reserves to finance the increase in premiums.

The total of general insurance funds, shareholders' capital and free reserves increased from $£ 6,507$ million to $£ 8,295$ million and represented $138 \%$ of premium income ( $140 \%$ in 1975).

## RESULTS IN MAJOR TERRITORIES

 United KingdomThere was a small motor underwriting profit of $\mathcal{L}_{\mathrm{L}} \cdot 7$ million ( $0 \cdot \mathbf{2} \%$ of premiums). Increases in the cost of spare parts ( $x 7 \%$ ), garage charge-out rates ( $x 2 \%$ ) and car prices (over $20 \%$ ) all affected claims costs.

Fire and accident (non-motor) business made loss of £ $£ 39^{\circ} \mathrm{x}$ million ( $3.3 \%$ of premiums) contributed to by claims under household policies for storm damage at the beginning of the year and for subsidence damage.
United States
There was a smaller loss on underwriting in the U.S.A., at $£ 7 \times 9$ million compared with $£^{2} 17.5$ million in 1975. Selective underwriting policies combined with rating increases resulted in reduced losses in motor business, where there was $=$ loss of £ 27.6 million against $£ 74^{\circ} 7$ million in 1975 .
Fire and accident (non-motor) underwriting losses showed little change from the previous year at £ $44 \cdot 3$ million compared with $£ 42 \cdot 8$ million in ${ }^{1975 .}$

## Rest of the World

The improvement in the motor account was more marked in other overseas territories, where the underwriting loss in this class of business was £ 8.0 million ( $2.2 \%$ of premiums) compared with $£ 70.5$ million ( $\mathbf{x} 2.0 \%$ of premiums) in 1975.
Experience in the fire and accident classes did not sustain the breakeven situation achieved in 1975 . In 2976 there was a loss of $£ 19$ o million ( $\mathbf{~} 4 \%$ of premiums) compared with emarginal loss in 1975 of only $£ .2 .7$ million.

In Canada and Australia the recovery begun in 1975 continued. This was particularly evident in Australia.

In Europe, however, experience was less favourable and in Belgium and Holland, in particular, conditions were difficult.

## MARINE, AVIATION AND TRANSPORT

Worldwide premium income for marine and aviation rose by $26.7 \%$ to $£ 517$ million and there was $\quad$ marginal transfer from profit and loss account of $£ 160,000$.

Marine tonnage lost during the year exceeded that of previous years. Following the 1976 tanker losses of the Berge Istra and Olympic Bravery there was a further serious tanker loss in May of the Urquiola, valued at about £xo,500,000. Among offshore losses. physical damage to Deep Sea Driller was estimated at almost $£ 9$ million and there were heavy warehouses losses at Hamburg and at Julfa in Iran.

Regarding aviation, the number of jet airliner total losses was similar to previous years, although passenger fatalities were double those of $\mathbf{9 9 7 5}$. The mid-air collision over Zagreb indicated insurers' exposure to losses of catastrophe proportions. This has since been clearly demonstrated in 1977 by the tragedy at Tenerife, where nearly 600 lives were lost.

## OVERSEAS EARNINGS

Over $60 \%$ of general premium income of the companies relates to overseas operations, enabling a major contribution to be made to foreign currency earnings. The latest figures (for 1975) show that all insurance activities (comprising companies, Lloyd's and brokers) produced annual invisible earnings of £45z million, which includes investment income earned on insurance funds.

## INVESTMENTS

Invested funds of the companies arising from long-term insurance totalled $£ 25,236$ million at book-values at 31st December 1976. Income from these funds was $£ 2,137$ million.

As already stated, invested funds arising from general business totalled $£ 8,295$ million at boakvalues at 3rst December 1976. Income from these funds was $£ 63$ x million.

NOTE: Insurance company figures refer to British Insurance Association members who transact some $95 \%$ of the world-wide business of the British insurance company market.

## LLOYD'S OF LONDON

Lloyd's of London is an international market for almost any type of insurance. Ships, aircraft, oil rigs, cargo of all descriptions, motor cars, civil engineering projects, fire, personal accident and third party liability are a few random examples of the everyday risks placed at Lloyd's which bring some £750 million of premiums to underwriters each year. Two thirds of this business comes from outside Great Britain and makes a valuable contribution to the country's balance of payments.

Today, it was three centuries ago, a policy is subscribed at Lloyd's by private individuals with unlimited liability. Now that Lloyd's members are numbered in their thousands, however, the method of underwriting is the same only in principle. The merchant of the past, signing policies in a coffee house as a sideline to his main business, has long since given way to the specialist underwriter who accepts risks at Lloyd's on behalf of members grouped in a syndicate. There are currently about 270 syndicates of varying sizes, some with up to several hundred inwer and each managed by a fulltime underwriting agent.

Lloyd's membership today is drawn from many sources. Industry, commerce and the professions
are strongly represented while many members are, of course, actively engaged at Lloyd's either on the broking or the underwriting side.

Underwriting membership of Lloyd's is open to men and women of any nationality provided that they meet the stringent financial requirements of the Committee of Lloyd's. Assets of at least £75,000 have to be shown and minimum deposit of $\{10,000$ must be lodged with the Corporation of Lloyd's as security for underwriting liabilities.

Lloyd's also provides the most comprehensive shipping intelligence service available in the world. The enormous volume of shipping information received from Lloyd's agents, radio stations, shipowners and other sources is collated and distributed to newspapers, radio and television services, and throughout the marine and commercial communities in general.

This information is edited, printed and publishec at Lloyd's and sent all over the world. "Lloyd's List " is London's oldest daily newspaper and contains news of general commercial interest as well as shipping information. "Lloyd's Shipping Index " also published daily, lists some 18,000 ocean-going vessels in alphabetical order and gives the latest known report of each.

SUMMARY OF LLOYD'S ACCOUNTS AS AT 3 I DECEMBER, 1975

SUMMARY OF LLOYD'S RESULTS $1969-1973$

## LIFE ASSURANCE IN 1976

New yearly premiums for life assurances and annuities increased in 1976 from $£^{8} 8_{3} 8$ million to C 987 million. This increase of $18 \%$ compares with the inflation rate of $15 \%$ for 1976 . Single premiums rose by $83 \%$ from £2I9 million to £40r million reflecting a revival of interest in the linked bond market. New sums assured rose by $17 \%$ from $£ 28,800$ million to $£ 33,600$ million and new annuities increased by $22 \%$ to $£ x, z 00$ per annum.

The following figures include all forms of life assurances and annuities, at home and overseas, including linked life assurances and occupational pension and life assurance schemes.

## HOME SERVICE INSURANCE IN 1976

The following figures are based on returns from 18 "home service" insurance offices, which together transact over $99 \%$ of all industrial assurance business. While they, unlike all other insurers, transact industrial life assurance, they also carry on very considerable volume of ordinary life and general insurance business, much of it in policyholders' homes.

## THE LIFE ASSURANCE COMPANIES

The list on the following pages contains the names of all the more important British life offices, and of Commonwealth offices (marked C) which transact life business in this country.

Class of business. The second column shows whether the company is conducted on the mutual system whereby the whole of the divisible profit is allotted to participating policyholders (M) or whether the company has proprietors by whom part (usually $\quad$ very small proportion) of such profits received ( P ). Life offices transacting other business are marked $(\mathrm{O})$ in this column. In such cases the life funds are kept separately, and are not líable for the claims of other departments. The share capital is usually liable for the claims of all branches. Those having an industrial branch are indicated by letter (I).

Figures. These are taken from the latest annual accounts available at date of going to press and in the majority of cases refer to annual reports for the tinancial year ended December 3x, 1976.

Life funds. The amounts of these funds, though of interest, are not in themselves $\mathbb{1}$ sufficient indication of the financial stability of I company, which cannot be judged unless liabilities are actually compared with assets.
Premium income. The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risk.

Consideration for annuities.-These are the amounts received to provide various types of annuities.

Interest. - The rate of interest earned is important for comparison with the rate assumed in valuing
liabilities, since the greater the margin between these rates the greater is the surplus available from this source bonus declaration. The rate of interest given is before deduction of Income Tax except where marked ( N )-net.

Valuation.-The valuation returns which are required to be made by the companies to the Department of Trade and Industry indicate liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used) and that interest will be carned at I certain rate. If a company assumes that it will earn - high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appcars greater by some tables than by others. The position of an office is most satisfactory when stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

Types of policy.-Although there are scores of life offices in Britain each offering their own particular products under a wide variety of labels, there are really only four basic types of contract. These are: x. "Term" assurance (sometimes called "temporary " assurance). With this type of policy the assurer, in return for a regular premium agrees to pay the sum assured if the person assured should die within the term of years stated by the policy.

Such policies take care of the temporary need for protection of the family while the children are growing up, and the family is therefore most vulnerable. The commonest and most popular forms are to cover the mortgage on the family home or to assume a regular tax-free income for the family over so many years should the breadwinner die. This is much the cheapest form of life assurance because the majority of policies invariably do not result in claims.
2. "Whole-life" assurance is one under which the assurer undertakes to keep the assurance in force provided the premiums are paid for the whole life of the assured. They will then pay the agreed sum whenever death takes place.

This costs a good deal more than term, naturally. All policies end in claims.
3. "Endowment" assurance. This contract really is one which uses $\quad$ fund for saving to $\quad$ par-
ticular target sum by a particular future date and at the same time secures payment of the sum assured should the saver die before that date arrives. In return for the continued payment of a regular premium over $=$ fixed number of years, the assurer agrees to pay the sum assured at the end of that time, or earlier if the assured person should die. The bulk of endowment assurance premium is savings; consequently the premium of such a contract is a lot higher than that for a whole life assurance.
4. "Annuities". Life assurance can be divided broadly speaking into death or survival benefits. Death benefits are paid to 1 policyholder's dependants if and when he dies. Survival benefits are paid to the policyholder himself either in the form of a cash sum when he reaches a certain age or in the form of a guaranteed annual income for life, which is known - an annuity. Pensions are annuities of $\square$ kind and - very large proportion of the pension due to people are being and will be paid by funds run by life offices.

INDUSTRIAL COMPANIES

## $\dagger 1975$ figures

## POLICYHOLDERS PROTECTION BOARD

Aldermary House, Queen Street, London E.C. 4
The Policyholders Protection Act 1975 put into effect the scheme whereby private policyhoiders of companies in liquidation will normally be granted 90 per cent. ( 100 per cent. in the case of compulsory insurance) of the benefits promised under their policies. The scheme will be financed mainly by a compulsory levy on insurance companies limited to maximum of a per cent. of their annual net premium income. The Board consists of five members, of whom three are drawn from the management of insurance companies and at least one must be qualified to represent the interests of policyholders.

## Directory of Insurance Companies

## DIRECTORY OF INSURANCE COMPANIES

The class of Insurance undertaken is shown in the second column as follows: A-Accident (which includes Motor, Employers' Liability, etc.); F-Fire (including Burglary); L-Life; and M-Marine. A number of offices are now included in Group-the initials of which appear after the name. The main Groups are as follows-E.S.-Eagle Star; C.U.-Commercial Union; G.R.E.-Guardian Royal Exchange; G.A.-General Accident; N.U.-Norwich Union; R-Royal; S.A.-Sun Alliance \& London.

Gold Coin.-Gold ceased to circulate during the First World War. An Order of April 27, 1966, made it illegal for U.K. residents to continue holding more than 4 gold coins minted after 1837 , or to acquire such coins unless they had been licensed as genuine collectors by the Bank of England. This Order was revoked on April x, x97x, by the Exchange Control (Gold Coins Exemption) Order; 197x, whereby residents of the United Kingdom, Channel Islands and the Isle of Man may freely buy and sell and hold gold coins.

The 1971 order was revoked on April 15, 1975, by the Exchange Control (Gold Coin Exemption) Order, 1975. Under this Order Section I of the Exchange Control Act 1947 (which prohibits dealings in gold or foreign currency except with Treasury permission) is exempted for gold coins minted in or before 8837 . But in relation to gold coins minted after 1837, the Order exempts from Section I the following transactions only:
(a) Buying and selling such coins if held in the U.K. and if the seller is resident in the U.K. and is not selling on behalf of a non-resident.
(b) Borrowing and lending such coins if held in the U.K. and if the borrower and lender are resident in the U.K.
Accordingly any other transactions in gold coins minted after 1837 (if prohibited by Section I) now require Treasury permission.

The English sovereign, however, is still used currency in certain Middle East countries and to meet foreign demand during the years $1958-1968$ the Royal Mint struck some $44 \cdot 5$ million sovereigns.

Silver.-Prior to $19 z 0$ our silver coins were struck from standard silver-an alloy of which 925 parts in I,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. From January x, 1947 all 'silver' coins, except Maundy money, have been struck from cupro-nickel-an alloy of copper 75 parts and nickel 25 parts. Maundy coins since 1947 have been struck from standard silver.

Bronze, introduced in 8860 to replace copper, is an alloy of copper 97 parts, zinc $2 \frac{1}{2}$ parts and tin $\frac{1}{2}$ part. These proportions are subject to slight variation.

The "Remedy" is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Mint.

Legal tender of coin.-Gold, dated 1838 onwards, if not below least current weight, is legal tender to any amount. Since Decimal Day (Feb, 15, 197x) cupro-nickel (silver) coins with values up to and including the rop have been legal tender ${ }^{-1}$ to $£$.

The sop coin has been legal tender up to $£$ ro from the date of its introduction. Bronze coins are legal tender for amounts up to zop. Farthings ceased to be legal tender on December 3x, 1960, the hal fpenny on August 1, 1969, the halfcrown on January $x$, 1970, and the threepence and penny on August $3^{3}$, 1978.

## THE WORK OF THE ROYAL MINT DURING 1976

The Royal Mint produced over $x, 567$ million coins during 2976. Production is now entirely carried out at the Royal Mint's factory in Llantrisant, Wales.

Details of the coinage produced in 1976 are:

| Sovereigns. UK 50p. . | $\begin{array}{r} \text { I, 150,000 } \\ 28,050,000 \end{array}$ |
| :---: | :---: |
| ıор. | 197,391,000 |
| 5 P | 3,300,000 |
| 29 | 179,532,000 |
| 1 p | 245,696,000 |
| $\frac{1}{2} \mathrm{p}$ | 221,048,000 |
| UK Decimal Proof Coin | i,660,636 |
| Maundy Money. | 4,632 |
| Overseas Coin. | 689,020,955 |
| Overseas Proof Coin | 927,739 |

Of the total coinage produced, nearly $44 \%$ of the year's production was for overseas governments. In addition to their own production the Royal Mint arranged for some 414 million coins to be struck by sub-contractors working under Royal Mint supervision.

Countries and territories to which coins were supplied include:

Bahamas, Bahrain, Bermuda, Botswana, Brunei, Cayman Islands, Cyprus, Dominican Republic, Gambia, Ghana, Gibraltar, Guernsey, Guyana, Hong Kong, Iceland, Iraq, Irish Republic, Jamaica, Kenya, Kuwait, Malta, Malawi, Mauritius, Morocco, New Zealand, Oman, Papua New Guinea, People's Democratic Republic of Yemen, Philippines, Qatar, Saudi Arabia, Sierra Leone, Sri Lanka, Tanzania, Tunisia,
Trinidad and Tobago, Tuvalu, United Arab
Emirate, Yemen Arab Republic, and Zambia.
The output of medals for the year was 48,025 . Three new designs we.: produced, the Bermuda Badge of Honour, and medals for the International Nickel Company and the Cement and Concrete Association. Among the seals manufactured were a number for various British Embassy posts and for Government Departments in this country. The public seal for Trinidad and Tobago was also produced.

## BANK NOTES

Bank of England notes are currently issued in denominations of $\mathcal{L}, \mathcal{L}_{5}, \mathcal{L} 10$ and $\mathcal{L} 20$ for the amount of the Fiduciary Note Issue, and are legal tender in England and Wales. Only £x notes are legal tender in Scotland and Northern Ireland.

The last of the old white $£ 5$ notes dated up to September 20, 1956, and the $£ 5$ notes issued between 1957 and 1963, bearing a portrait of Britannia, ceased to be legal tender on March 14, 1961, and June 27,1967 , respectively. The next series of $\mathcal{L}$ notes-the first to bear a portrait of the Queen-were first issued in 1963 and ceased to be legal tender on September $x$, 1973. The old series of $f x$ notes issued during the years $x 928$ to $x 960$ and the ros. notes of the same type issued from 1928 to 196x-those without the royal portraitceased to be legal tender May $\quad$ and October 30,

2962, respectively. The ros, note was replaced by the 50 p coin in October 1969, and ceased to be legal tender on November 2x, 1970. Bank notes which are no longer legal tender are payable when presented at the Head Office of the Bank of England in London.

The old white notes for $£ \mathrm{£O}, £ 20, £ 50, £ x \mathrm{oo}$, $\mathcal{L} 500$ and $£ x, 000$, which were issued until April 22, 1943, ceased to be legal tender in May 1945. However, on February 28, 1977 the value of these notes still outstanding amounted to some $\mathcal{£ 6 5 7 , 2 0 0 \text { . }}$

The fio note-after an interval of $2 x$ years was restored on February 21, 2964. This completed the original series bearing portraits of the Queen, plans for which were announced in November 1959.

In 1968 the Bank announced that a new series of Bank notes generally smaller in size than the notes they replace, would be issued in the 1970's. First of the series was a $£ 20$ note, which the Bank of England introduced on July 9, 1970. This was followed by the new $£_{5}$ note introduced on November 1x, 1971, and the new £xo note introduced on February 20, 1975 . A new $£ 1$ note will be introduced in due course to complete the series.

Note circulation is highest at the two peak spending periods of the year-around Christmas and the summer holiday period. On December 22, 1976 it reached a peak of $£ 7,340$ million which was K 592 million more than the previous peak of $\mathcal{L} 6,748$ million reached on August 4, 1976.
£ 5 notes continue to enjoy popularity and represent over $50 \%$ of the total value of notes in circulation as against $\mathbf{x 4} \%$ in 1956. On the other hand, the proportion of £x notes has dropped from $76 \%$ to $12 \%$. The percentage of £xo notes in circulation has increased steadily since 1965 and now represents over $23 \%$ of the total. The proportion of $£ 20$ notes in circulation now amounts to over $9 \%$ of the total compared with just over $2 \%$ 197r. On February 28, 1977 the values of notes in circulation were: $£ 20: £_{551,630,000 ;} £_{10}: £_{21,596,316,000 ;}$ С5: £3,430,620,000; £1: £805,245,000; 105: Ł12,883,000.
Partly because of the rapidly growing preference by the public for new notes rather than used ones, the demand for new bank notes has increased greatly in recent years. Between 1957 and 1976 the
average life of a $£ x$ note fell from $x 9$ months to 9 . and consequently it has been necessary for the Bank of England to print more notes per head of the population than in comparable countries abroad. To alleviate the high cost of the note replacement, the 5op coin was introduced in October, 1969, in place of the ros. note. The Bank of England has been conducting a campaign, in conjunction with the commercial banks, to encourage the public to accept more used but clean notes and this has been successful in reducing the public's requirements of new notes.

Other Bank Notes.-Bank Notes are issued by three Scottish banks -Bank of Scotland, Clydesdale Bank Ltd., Royal Bank of Scotland Ltd. Notes of the latter's constituent banks-Royal Bank of Scotland and National Commercial Bank of Scotland Ltd.-are being withdrawn from circulation, as are those of the former British Linen Bank. These banks issue notes for $£ \mathrm{r}, £ 5, £$ ro, $£ 20$ and $£$ roo. Scottish notes are not legal tender, but in Scotland they enjoy a status equal to that of the Bank of England note.

Channel Isles and the Isle of Man.-The States of Jersey and Guernsey issue notes for $£ x 0, £ 5$ and £r. The Government of the Isle of Man issues notes for $\mathcal{L x O} \mathscr{L}^{5}, \mathfrak{£} 1$ and 50 new pence. These are legal tender only in their respective islands.

Although none of the series of notes specified above is legal tender in the United Kingdom they are generally accepted by the banks irrespective of their place of issue. At one time English banks made a small commission charge for handling Scottish and Irish notes but this was abolished some years ago.

Currency Notes.-Under the provision of the Currency and Bank Notes Act 1928, Currency Notes (popularly known as Treasury Notes) of the value of 105 and for were replaced by the issue of Bank of England Notes of the same denominations = from November 22, 1928. Although no longer legal tender, Currency Notes are payable on presentation at the Head Office of the Bank of England.

## Denomination

## Iriendlu Societies-(Breat Britain <br> Act 1974

Friendly societies are mutual insurance societies in which the members subscribe for provident benefits, in particular sickness, death, endowment and old age benefits. Those friendly societies that are known as "collecting societies" because they collect members' premiums for life assurance by house-to-house visits of collectors or agents are subject to the provisions of the Industrial Assurance Acts as well a the Friendly Societies Act. The totals in ordinary type in the table below relate to registered friendly societies proper (including both centralized societies and the Orders with their branches); those in italics relate to collecting societies.

| End of Year | No. of Societies on Register |  | $\begin{aligned} & \text { Member- } \\ & \text { ship } \end{aligned}$ | Assurances or Policies | Total Funds |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Thousands |  | £000 |  |
|  |  | 64 | 4,277 | 23,898 | 425.962 |  |
| 1938 | 19,600 | 149 | 8,491 6,783 | 25,738 7,481 | $\begin{aligned} & 15 x, 6 \times 3 \\ & 57480 \end{aligned}$ | $\begin{aligned} & 84,837 \\ & 11,165 \end{aligned}$ |
| 1913. | 25,475 | 71 | $6,7^{83}$ | 7,481 |  |  |

The first column headed "No. of Societies on Register" in the above table includes (for 1975) 542 societies without branches and 28 societies with branches ("Orders"), the remainder being the separately registered branches of the Orders.

Although recent years have seen the growth of societies registered for such specific purposes as the provision of Institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1975 Friendly Societies without branches paid out $£^{6} \cdot 3$ millions in sickness benefit and $£ 2.4$ millions in death benefit.

As compared with the previous year the number of societies without branches decreased in 1975 by 17 and the number of branches by 233. Total membership fell to under 4.3 millions.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by $\quad$ contribution increasing with each year of attained age after the member reaches age 30 up to age 65 .
The latest available figures of membership and funds set out below indicate the relative strength of several leading old established societies, including the two largest Orders which operate through registered districts and branches subject to central body:-

| FRIENDLY Socs.-Name with (in brackets) Year Established | Membership | Total Funds |
| :--- | :--- | :--- | :--- |

Long before the term "Friendly Society " came into use, the seeds of voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution to insure relief when sick or in old age and I payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the oldest, operating in Scotland, being the "Incorporation of Carters in Leith ${ }^{\text {P established as long ago }} 111555$.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 5793 , but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including Royal Commission in 187r). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration or sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians.

Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The Friendly Societies Act 1974 , which came into force in April, 1975, consolidated the nine Acts which comprised the Friendly Societies Acts 1896 to r97r and $=$ few other minor enactments relating
to societies to which those Acts applied. The Act allows various specific classes other than "Friendly Societies" to be registered thereunder, but tax exemption (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

## Industrial and forovident Societies-(Great Britain

Acts 1965-1975

The familiar "Co-op" societies are amongst the wide variety which are registered under the Industrial and Provident Societies Act 1965. This consolidating Act, which like the Friendly and the Building Societies Act is administered by the Chief Registrar of Friendly Societies, provides for the registration of societies and lays down the broad framework within which they must operate. Internal relations of societies are governed by their registered rules.
Registration under the Act confers upon society corporate status by its registered name with perpetual succession and a common seal, and limited liability. A society qualifies for registration if it is carrying on an industry, business or trade, and it satisfies the Registrar that either (a) it is a bona fide
co-nperative society or (b) in view of the fact that its business is being, or is intended to be, conducted for the benefit of the community there are special reasons why it should be registered under the Act rather than as a company under the Companies Act.

During 1976 the number of registered societies decreased by $\times 38$ to 9,445 . The largest single group was the 3,949 housing societies which accounted for most of the new registrations and most of the removals in 1976. The largest group in terms of turnover was that consisting of the retail, wholesale and productive societies which includes the "coops " with sales in 1976 of $£ 2,282$ million and the Co-operative Wholesale Society Limited with 1976 sales of $£ 1,23 \mathrm{x}$ million. The principal statistics at the end of 1976 are given in the table below.

|  | Retail | $\left\lvert\, \begin{gathered} \text { Wholesale } \\ \text { and } \\ \text { Pro- } \\ \text { ductive } \end{gathered}\right.$ | Social and Recrea- tional Clubs | General Service | Housing | Agricultural | Fishing | Total |

## Building Societies-(Breat Britain

## Act 1962

Bullding Societies are associations incorporated with limited liability under the Building Societies Act. All Building Societies are required to register their rules and file their accounts with Registry of Friendly Societies. The following particulars showwing the growth of Building Societies (as also that of Friendly and Industrial and Provident Societies) are based on the Chief Registrar's Annual Reports.

The year 1976 was one of marked fluctuations in the conditions affecting the operation of building societies. The general level of interest rates fluctuated widely, as did the societies' competitive position relative to other investment media. Nevertheless, with the aid of an accumulation of surplus funds ("stabilisation funds"), societies discharged with e considerable degree of success the task of reconciling the opposing interests of their investors and borrowers while at the same time maintaining madequate supply of mortgage funds. The net intake of shares and deposits of $£ 2,540$ million was 22 per cent. lower than the record $£_{\text {§3,234 }}$ million in 1975 ; receipts ( $£$ ro,554 million) were up by 15 per cent. but withdrawals ( $£ 8,0 \times 5$
million) were up by 35 per cent. Total assets increased by 56.5 per cent. to $\mathcal{L}_{28,202}$ million.

Despite the substantial decline in the inflow of investment monies mortgage lending was maintained at record level. 913,000 advances were made in the year totalling $\{6,883$ million. (For 1975 the corresponding figures were 798,000 advances totalling $£ 4,908$ million.) Societies achieved this by permitting the proportion of their assets represented by cash and investments to fall from $2 x \cdot 3$ per cent in April to 18.6 per cent. at the close of the year.

During 1976 societies generally were operating on wider basic interest margins than for some years and they also received 1 higher return on their cash and investment holdings. As a result societies added G187 million to reserves (compared with $£ 100$ million in 1975 and $£ 73$ million in 1974) and the overall average ratio of reserves to assets rose from 3.26 per cent. to 3.46 per cent., the first rise since 197x when the ratio was 3.70 per cent.

At the end of 1976 there was 3,696 building society branch offices, in increase of $3^{21}$ over the $x 975$ figure. Building society staff numbered
over 37,$000 ; 65$ per cent. of them worked in branch offices.

During 1976 I3 societies merged with other societies; 5 other societies were removed from the register-one at its own request and four after service of Notices by the Registrar under the Building Societies Act 1962 . Of the latter societies; 3 had previously been prohibited from accepting investments. At the end of the year there were 364 societies on the register, compared with 382 at the end of 1975 . By the middle of 977 this number of further decreased to 354.

Under sections 48 and 51 of the Building Societies Act 1962 the Chief Registrar, with Treasury consent, exercises power of control over the activities of building societies. Under section 55 there is further power to control in relation to small societies. His report for 1976 discloses that orders prohibiting or restricting investment were in force against to socicties at the end of 1976 , whilst directions controlling advertising were in force in respect of four societies.

A society meeting certain basic requirements as
to assets and liabilities, liquid funds, reserves and other matters may be designated by the Chief Registrar under section I of the House Purchase and Housing Act 1959 for the purposes of trustee status. The requirements are set out in The Building Societies (Designation for Trustee Investment) Regulations 1972. The shares and deposits of a society so designated become authorised investments for trustee subject to the provisions of the Trustee Investments Act 1971. Designated societies are identified in the list below by a letter "D" in the first column.

Nearly 70 per cent. of all building societies have an accounting year which ends on 3rst December, the remainder at various dates. Statistics in the tables below are taken from accounts made up to dates between ist February and the following 3rst January. References in the tables below to years or to the financial year should be understood accordingly. In a very few cases the latest information available at the time of compilation has been included in the list of societies.

## IMPORTANT

The Purpose of these notes is to outline some of the more common parts of the law as they may affect the average person, and they are, of course, believed to be correct at the time of going to press. The law is constantly developing and changing, however, and it is dangerous for the layman to seek to be his own lawyerhe may not have access to completely up to date books and his case may, because of its special facts, come within an exception to the general rules set out herein.

It is always best to take expert advice, and if you have a Solicitor who has acted for you in the past you should take any legal problems you have to him. If you do not have a Solicitor a friend may be able to recommend one. Failing this your local Citizens' Advice Bureau (whose address can be obtained from the Telephone Directory or from any Post Office or Town Hall) has a list of Solicitors in your area who deal with that particular type of problem which you have. If you are not able to find a Solicitor in any of these ways you should ask for help in doing so from The Law Society, 113 Chancery Lane, London, W.C. 2 or 27 Drumsheugh Gardens, Edinburgh.

The Legal Aid and Legal Advice and Assistance schemes exist to make the help of the trained lawyer available to everyone whatever their means as of right. The best policy is if in doubt go to a Solicitor without delay-timely advice will set your mind at rest but sitting on your rights can mean that you lose them.

Remember also that it is not necessary for a disbute to have arisen before you go to a Solicitor-the Legal Advice and Assistance Scheme enables him to advise you on your rights say under a tenancy agyeement, the estate of a deceased person or in connection with matrimonial and consumer matters, and to write letters or take other steps on your behalf. He can also act for you where there is no question of a dispute at all, e.g. in the making of a will.

Your entitlement to take advantage of the Scheme depends on your means (see below) but I Solicitor will be able to tell you whether you are covered by it.

## BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.-The law as to British Nationality is now to be found mainly in the British Nationality Act 1948, which came into force on Jan. 1, 1949.

The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Southern Rhodesia, Sri Lanka, Ghania, Malaysia, Cyprus, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho, Singapore, Barbados, Mauritius, Swaziland, Tonga, Fiij, The Bahamas, Bangladesh, Grenada and Seychelles (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject and may be known either as a British subject or as Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act 1950, potential citizens of Newfoundland under the British Nationality Act 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. x, 1949, was determined mainly by the British Nationality and Status of Aliens Acts $1914-$ I943, though these Acts did not affect the status of any person born before Jan. I, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act 1949, styled the Republic of Ireland).
By the Ireland Act 1949, a person who was born before Dec. 6,1922 , in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. x, 1949 , is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. I, 1949, permanently resident there, or (iii) had before Jan. I, 1949, been registered as a citizen of Eire under the laws of that country.

In addition, by the British Nationality Act 1948, any citizen of Eire who immediately before Jan. x, 1949, was also $=$ British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

## Citizenship of the United Kingdom and Colonies

In the majority of cases, a person who is British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the r948 Act. In the latter case, citizenship is acquired by:-
I. Birth on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except
(a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;
(b) children born to fathers who are enemy aliens in enemy occupied territory.
2. Descent, if the father was citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:-
(a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or
(b) the birth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or
(c) the father is at the time of birth in the service of the Crown under Her Majesty's United Kingdom government; or
(d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.
3. Registration by the Home Secretary upon application by:-
(a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period so ending as the Home Secretary may in the special circumstances of any particular case accept; or, in certain circumstances, if he is
serving under an international organization of which the United Kingdom government is a member, or is in the employment of $\quad$ body established in the United Kingdom;
By the provisions of the Immigration Act 1971, registration as of right in these circumstances is restricted to Commonwealth citizens who are "patrial", i.e. born to or legally adopted by a parent who at the time of the birth or adoption had citizenship of the United Kingdom and Colonies by his birth in the United Kingdom. In the case of non-patrials, there are additional conditions and the Home Secretary has a discretion whether or not to register.
(b) a woman married to $\quad$ United Kingdom, etc. citizen. (A woman who marries on or after Jan. I, 1949, does not by virtue of that marriage acquire citizenship.)
A minor child of $\begin{gathered}\text { citizen can be registered upon }\end{gathered}$ application being made by his parent or guardian.

A person in respect of whom $\quad$ recommendation for deportation or deportation order is in force is not entitled to be registered, although the Home Secretary may register such a person.
4. Naturalization.-In order to be eligible for a certificate of naturalization an alien must:-
(a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and
(b) be of good character and have $=$ sufficient knowledge of the English language; and
(c) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.
A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period as the Home Secretary may in any particular case accept.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.
5. Incorporation of Territory when citizenship is granted to such persons as are specified by Order in Council.
6. Transitional provisions, which confer citizenship on a person who was a British subject immediately before Jan. I, 1949, if either:-
(i) (a) he would, if born after that date, have qualified for citizenship by birth; or
(b) he is a person naturalized in the United Kingdom and Colonies; or
(c) he became 1 British subject by reason of annexation of territory which on Jan. x, 1949, was included in the United Kingdom and Colonies; or
(ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or
(iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
(iv) he was not on that date $\|$ citizen or potential citizen of one of the "Dominions"; or
(v) being $m$ woman, had before Jan. i, 1949 , been married to a man who becomes, or would but for his death have become, citizen.
A British subject who is merely a potential citizen of one of the "Dominions" continues as British subject without citizenship until he becomes citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially $\quad$ citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1 , 1949.

By the Adoption Act 1958 an adopted child becomes $=$ citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost-
(i) by declaration in the prescribed manner "by a person, who is also a citizen of "Dominion" or of the Republic of Ireland or national of a foreign country. The Home Secretary can withhold registration of the deciaration in time of war. Under the British Nationality Act 1964 a person who has ceased to be a citizen of the United Kingdom and Colonies as result of a declaration of renunciation is entitled to registration as a citizen of the United Kingdom and Colonies if he can satisfy the Home Secretary on number of matters;
(ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;
(iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:-
(a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
(b) in time of war, traded with the enemy; or
(c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months' imprisonment; or
(d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;
and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;
(iv) where $E$ naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary also deprive him of citizenship of the United Kingdom and Colonies.
(v) Under $\quad$ series of Acts, 2958-19730 which contain special provisions relating to Ghana, Cyprus, Nigeria, Sierra Leone, Tanzania, Jamaica, Trinidad and Tobago, Uganda, Malaysia, Kenya, Malawi, Zambia, Malta, Gambia, Guyana, Botswana, Lesotho, Barbados, Aden, Perim and Kuria Muria Islands, Mauritius, Swaziland, Fiji, The Bahamas and Bangladesh.
Status of Aliens.-Property may be held by an alien in the same manner as by natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act 1949 declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference to - Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

## CONSUMER LAW

1. The Supply of Goods
(a) The Sale of Goods Act 1893 as amended by the Supply of Goods (Implied Terms) Act 1973 provides protection to the purchaser of goods, by implying certain terms into every contract for the Sale of Goods. These implied terms are:-
(i) A condition that the seller will pass good title to the buyer (unless the seller agrees to transfer only such title as he or his principal has) and warranties that the goods will be free from undisclosed encumbrances, and that the buyer will enjoy quiet possession of the goods.
(ii) Where there is sale of goods by description, a condition that the goods will correspond with that description, and where the sale is by sample and description, a condition that the bulk of the goods shall correspond with both sample and description.
(iii) Where the seller sells goods in the course of a business, a condition that the goods will be of merchantable quality, unless before the contract is made, the buyer has examined the goods and ought to have noticed the defect, or the seller has specifically drawn the attention of the buyer to the defect. Merchantable quality means fit for the purpose for which goods of the kind are commonly bought, taking into account any description applied to them, the price and other relevant circumstances.
(iv) A condition that where the seller sells goods in the course of a business, the goods are reasonably fit for any purpose made known to the seller by the buyer, unless the buyer does not rely the sellers skill and judgment, or it would be unreasonable for him to do so.
(v) Where there is sale of goods by sample. conditions that the bulk of the goods shall correspond with the sample in quality, that the buyer will have a reasonable opportunity of comparing the bulk with the sample, and that the goods are free from any defect rendering them unmerchantable, which would not be apparent from the sample.
For these purposes, the broad difference between condition and a warranty is that the remedy for a breach of an implied condition may enable the buyer to reject the goods and recover damages if he has suffered loss whereas the remedy for 1 breach of war-
ranty will only enable the buyer to recover damages.
It is possible for $\|$ seller to exclude some of the above terms from a contract, subject to restrictions imposed by the 1973 Act given below. These restrictions give more protection to a consumer sale than $\begin{aligned} & \text { n non-con- }\end{aligned}$ sumer sale. A consumer sale is $\begin{gathered}\text { n sale } \\ \text { sy a }\end{gathered}$ seller in the course of a business where the goods are of a type ordinarily bought for private use or consumption, and are sold to a person who does not buy or hold himself out as buying them in the course of $\square$ business. A sale by auction or competitive tender is never - consumer sale.

The 1973 Act prohibits the exclusion of the implied terms given in (ii) to (v) above, in consumer sales. In non-consumer sales, terms purporting to exclude these implied terms, may be relied upon only to the extent that it would be reasonable to allow reliance. The Act provides guidelines for determining whether it would be reasonable to allow reliance. The implicd terms in (i) above cannot be excluded in consumer or nonconsumer sales.
(b) Trading Stamps.-The 1973 Act provides protection for a person taking goods in exchange for trading stamps, and implies warranties - to title, freedom from encumbrances, quiet possession and merchantable quality, similar to those implied by the Sale of Goods Act.
(c) The Trade Descriptions Act 1968 provides that it is criminal offence for a trader or businessman to apply a false trade description to any goods, or to supply or offer to supply any goods to which $\quad$ false trade description has been applied. A trade description includes a description ${ }^{-1}$ to quantity, size, method, place and date of manufacture, other history, composition, other physical characteristics, fitness for purpose, behaviour or accuracy, testing or approval. Prosecutions are brought by Inspectors of Weights and Measures.
(d) The Fair Trading Act 1973 is also designed to protect the consumer. It provides for the appointment of Director General of Fair Trading, whose duties include keeping under review commercial activities in the U.K. relating to the supply of goods or services to consumers, and to collect information to discover practices that may adversely affect the economic interests of the consumer. He may refer certain consumer trade practices to the Consumer Protection Advisory Committee, or, of his own initiative take proceedings against firms that are trading unfairly. He may also publish information and advice to consumers. Examples of practices with which he may be concerned include the use of void exclusion clauses, double pricing, false bottoms in bottles, and the size or complexity of print and wording.

## Scotland

The Sale of Goods Act, 1893, as amended by the Supply of Goods (Implied Terms) Act 1973, the Trading Stamp Act, 1964, the Trade Description Act, 1968, and the Fair Trading Act, 1973, all apply with some modification to Scotland. For example, it is not necessary in Scotland to distinguish between the words condition and warranty. The remedies of the buyer in both cases are the same, that is, he can either within $\|$ reasonable time reject the goods and treat the contract as repudiated, or retain the goods and treat the failure to perform such material
part as breach which may give rise to claim for compensation or damages.

## 2. Hire Purchase

## England and Wales

At present, protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act, 1965, which applies to hire-purchase agreements under which the hire-purchase price, i.e., the total sum payable by the hirer to complete the purchase of the goods, does not exceed $£ 2,000$. The Act also provides that where the hirer is I body corporate, the Act is not to apply at all.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and the agreement must be in writing signed by the hirer himself and by or on behalf of the owner and any guarantor. The agreement must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) notice informing the hirer of his rights to terminate the agreement (below), and of the restrictions on the owner's right to recover the goods (below). If the agreement is complete as soon as the hirer signs it he must be given $\quad$ copy there and then; in all other cases he must be given one copy when he signs and another within seven days of the completion of the agreement. There are also Department of Trade and Industry regulations dealing with such matters as the size of the print. In breach of any of these conditions the owner can neither recover the goods from the hirer nor enforce the agreement or any security given, although the Court can dispense with any of the conditions save that as to the signed agreement. The same results ensures (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of $22 \frac{1}{2} p$ for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writting determine the agreement, and, although he remains liable for any instalments already due, he will be under no further obligation under the agreement. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due he must pay the difference to the owner unless the court considers that a lesser sum is sufficient to compensate the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

An important new provision in the Act gives the hirer the right to cancel the agreement and recover all sums paid if he signed it at I place other than trade premises. This right (which was designed to cover the activities of door-step salesmen) must be exercised within 4 days of receiving the second copy.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but recover all sums paid under the agreement.

The Trade Descriptions Act, 1968, further protects the consumer by making it a criminal offence for traders falsely to describe or advertise the quantity or price of goods or services; prosecutions are brought by Inspectors of Weights and Measures. The Act provides no civil remedies.
An important new provision is the Supply of Goods (Implied Terms) Act 1973 which applies to agreements made on or after 18th May 1973. Sections 8-12 which apply to all hire-purchase agreements whether governed by the 1965 Act or not provide that clauses purporting to exclude the owner from liability for defects in the goods shall be void in the case of consumer agreements, and in non-consumer agreements are valid only if they are fair and reasonable in the circumstances.

Consumer Credit Act 1974. This Act has received the Royal Assent, but most of its provisions are not yet in force. It provides in new system for the protection of the consumer, of licensing and control of all matters relating to the provision of credit, or the supply of goods on hire or hire-purchase, administered by the Director-General of Fair Trading. The Act takes the place of previous Acts of Parliament relating to moneylenders, pawnbrokers and hire-purchase traders, and the protection provided by the Trade Description Act 1968 and Supply of Goods (Implied Terms) Act 1973 will be retained. The Act extends to the United Kingdom. Certain provisions of the Act have been brought into force. A licence is required to carry on a consumer credit or consumer hire business, or to deal in credit brokerage, debt adjusting, counselling or collecting, for which group licences are available. Any " fit person " may apply to the Director of Fair Trading for a licence which is normally renewable after 3 years, but if the maximum credit given is less than £300 application is not necessary.
For the Act's provisions to apply the agreement must be "regulated", i.e. be to individuals or partnerships only, must not be exempt, e.g. loans by local authorities or building societies, and the total credit must not exceed $£ 50 \%$. The terms of a regulated agreement can be varied by the creditor, but only if the agreement gives him the right to do so, and the debtor receives notice in the prescribed form.

To be enforceable the agreement must be properly executed, and the specified information must be given during the antecedent negotiations for the contract. These are conducted by the creditor, credit broker or supplier (these being the creditor's agents) and begin when the parties first begin discussions.

Where the agreement requires the debtor to make grossly exorbitant payments or is contrary to the ordinary principles of fair dealing the Court can reopen it either at the debtor's request or during enforcement proceedings and (inter alia) alter the terms of the contract or set aside any obligations it imposes so as to do justice between the parties. Whether an agreement is such an extortionate credit bargain is decided by reference (inter alia) to prevailing interest rates, the pressure for finance the debtor was under, etc.

If $\square$ credit reference agency was used to check the debtor's financial standing the creditor must give the agency's name to the debtor who is entitled to see the agency's file on him on payment of a fee of 25 pence.

Scotland
The Hire Purchase (Scotland) Act 1965 provides a Scots code corresponding to, but not identical with English law. The Supply of Goods (Implied Terms) Act 1973 also applies to Scotland.

The Sale of Goods Act, 1893 , as amended by the Supply of Goods (Implied Terms) Act, 1973, the Trading Stamp Act, 1964, the Trade Description Act, 1968, and the Fair Trading Act, 1973, all apply with little modification to Scotland. The Consumer Credit Act (see above) also extends to Scotland, and goes far in assimilating the Scots law on this topic with English law.

## 3. RECEIPTS

The law on receipts in Scotland is governed by the Prescription and Limitation (Scotland) Act 1973, which for this purpose came into force on July 25 1976. Now, receipts need only be kept for a period of five years and if $I$ creditor does not make a relevant claim within that period no action can be raised.

## CROWN-PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now however, by the Crown Proceedings Act 1947 , which came into operation on Jan. 1,1948 , the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Exceptions to the Act include the immunity of the Crown and any member of the armed forces from liability in tort in respect of death of, or personal injury to, another member of the armed forces on duty, provided that the death or injury is certified as attributable to service for purposes of pension.

Scotland. - The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of National Savings Bank deposits. Section 2 ( I ) of the Law Reform (Miscellaneous Provisions) (Scotland) Act 1966 removes the privilege whereby the wages of Crown servants, other than serving members of the armed forces, are exempt from arrestment in execution.

## DEATHS

## REGISTRATION, BURIAL AND CREMATION

## Registration

(For Certificates, see under Family Law-CertifiCATES)
In England and Wales.-When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons: ( I A relative of the deceased present at the death, or in attendance during the last illmess. If they fail ( 2 ) some other relative of the deceased. In default of any relatives (3) a person present at the death; or, the occupier of the
house in which the death happened. If all the above-named fail (4) inmate of the house. A person (other than I relative) registering the death must be causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the Registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the Registrar. It is essential that a certificate for disposal should be obtained from the Registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of ten pounds. The registration of a death is free of charge. After twelve months no death can be registered without the Registrar General's consent.
A body must not be disposed of until ( $x$ ) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or ( 2 ) until the Coroner has made $=$ disposal order (Births and Deaths Registration Act 1926, S. x).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification = to the date, place, and means of the disposal of the body (ib., S. 3).
"Still-born" child (see under Births (Registration), p. 1x69).

Death at Sea.-The master of $\square$ British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.- Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act 1957.

Deaths (Registration) in Scotland.-New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act 1965 which amends and re-enacts provisions in former Acts.

Personal notification within 8 days must be given to the registrar of (a) the registration district in which the death took place or (b) any registration district in which the deceased was ordinarily resident immediately befor his death, and (c) when a body is found and the place of death is not known, either the registration district in which the body was found or any other registration district appropriate by virtue of the preceding paragraph. When a person dies (in or out of Scotland). $n$ in ship, aircraft or land vehicle during a journey and the body is conveyed therein to any place in Scotland the death shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by one of the following: (a) any relative of the deceased; (b) any person present at the death; (c) the deccased's executor or other legal representative; $(d)$ the occupier, at the time of the death, of the premises where the death took place; (e) if these fail, any other person having knowledge of
the particulars to be registered. Failure to comply involves I penalty not exceeding £zo.

The medical practitioner who attended the deceased during the last illness must sign I certificate of the cause of death. If there is no such medical practitioner, any medical practitioner who is able to do so, may sign the certificate. At the time of registering the death the registrar shall, without charge, give the informant $\|$ certificate of registration, and the person to whom the certificate is given must hand it to the undertaker previous to cremation. A body may, however, be interred before the death is registered, in which case the undertaker must deliver I certificate of burial to the Registrar within three days.

## Burial

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial-unless closed by Order in Council-the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, see above.

## Cremation

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of body, disposal of ashes, etc., and containing numerous essential safeguards,
If Cremation is desired it is advisable for instructions to be left in writing to that effect.
To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. I0x6), amended by the Cremation Regulations 1965 (No. 1146 ).

## INTESTACY England and Wales

As regards deaths on or after March 15, 1977, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates ${ }^{9}$ Estates Act, 1952, the Family Provision Act, 1966 and Orders made thereunder. The I95z and 1966 Acts and S.I. $1977 / 415$ increased the benefits of 1 surviving spouse of an intestate. These notes deal with the present position, so that if the death occurred before March $\times 5,1977$ reference must be made elsewhere. If the intestate leaves In spouse and issue, the
spouse takes (i) the "personal chattels"; (ii) $£ 25,000$ with interest at 4 per cent. from death until payment; and (iii) life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves $\square$ parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels "; (ii) $\mathcal{L} 55,000$ with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of $£ 25,000$ or $£ 55,000$, as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):-(I) children (z) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.
In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain eighteen or marry under that age, their shares going to the persons (if any) within the same group who do attain eighteen or marry. Moreover, in the same cases, succession is not per capita, but per stirpes, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate, who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.
Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.
By the Family Law Reform Act, 1969, the position of an illegitimate child is equated with that of I legitimate child in respect of all deaths occurring on or after January $\mathbf{x}, 1970$. In respect of deaths after March 1976 the provisions of the Inheritance (Provision for Family and Dependents) Act 1975 may allow other persons to claim provision out of the estate. See post under "Wills".
For personal application for Letters of Adminis-tration-see p. 1 I68.

## Scotland

The Succession (Scotland) Act, 1964, provides that the whole estate of any person dying intestate shall devolve without distinction between heritable and moveable property. By that Act the surviving spouse of an intestate may, as a prior right (in addition to legal rights, see below), claim the matrimonial home to a maximum of $£_{30}, 000$, or a choice of one matrimonial home if more than one (or in certain circumstances the value thereof), with its furniture and plenishings not exceeding $£ 8,000$ in value, plus the sum of $£ 4,000$ if the deceased left issue or, if no issue, the sum of $£ 8,000$. These figures may be increased from time to time by order of the Secretary of State.

The Act has been modified by the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1968, which provided that an illegitimate child had exactly the same rights of succession in the estate of his parents as a legitimate child. However, the position still remains that an illegitimate child has no succession rights in the estate of a grandparent even though such would have fallen to his predeceasing parent.

Legal rights, referred to above, are:-
Jus relicti ( $a$ ): the right of a surviving spouse to one half of the deceased's net moveable estate after satisfaction of prior rights if there are no surviving children, or to one third if there are any surviving children.

Legitim: right of surviving children to one-half or one-third of the net moveable estate of deceased parents after satisfaction of prior rights. There are no legal rights in heritage.

In general, the lines of succession are: ( $x$ descendants; ( 2 ) collaterals; ( 3 ) ascendants and their collaterals, and so on in the ascending scale. The Crown is ultimus haeres. The right of representation, $i . e .$, the right of the issue of a person, who would have succeeded if he had survived the intestate, is open to any line of succession where previously it was limited to apply only when there were next of kin or the issue of predeceasing next of kin. The surviving mother of an intestate now has equal rights of succession with the surviving father, where formerly these were restricted. The intestate's maternal relations, who prior to the Act had no rights of succession, are now on an equal footing with his paternal relations. Where the intestate is survived only by parents, and by brothers and sisters (collaterals) half of the estate is taken by the parents and the other half by the brothers and sisters, those of the whole blood being preferred to those of the half blood; where, however, succession opens to collaterals-(which expression can include the brothers and sisters of an ancestor of the intestate)-of the half blood, they shall rank equally amongst themselves, whether related to the intestate (or his ancestor) through their father or their mother.

## WILLS

IMPORTANT NOTE.-The following notes and those on Intestacy must be read subject to the provisions of the Inheritance (Provision for Family and Dependents) Act 1975 which can affect the estate of anyone dying domiciled in England and Wales after March 1976. Very broadly a spouse, former spouse who has not remarried, a child of the deceased himself or one treated by him as a child of his family, or any person maintained by him at his death may apply to the Court under the Act. If the Court thinks that the will or the law of intestacy or both do not make reasonable provision for the applicant it may order payment out of the net estate of maintenance or a lump sum. It may also order the transfer of property, vary certain trusts and the powers can affect property disposed of by the
deceased in his lifetime intending to defeat the Act. It is up to the applicant to take the initiative, and the application must generally be made withinsix months of the grant of Probate or Letters of Administration.

In respect of earlier deaths, earlier Acts apply with narrower class of applicants and less ample powers for the Court.

Reasons for Making A Will.-Every person over the age of 18 should make $I$ will. However small the estate the rules of Intestacy (see above) may not reflect - person's wishes as to his property; in any case a will can do more than just deal with property-it can in particular appoint executors, give directions as to the disposal of the body and appoint guardians to take care of children in the event of the parents' death. For the wealthier person an appropriately drawn will can operate to reduce the burden of Capital Transfer Tax.

It is considered desirable for a will to be properly drawn up by a Solicitor, and the making of a will is one of the services which he can provide under the Legal Advice and Assistance Scheme (see above).

In no circumstances should one person prepare - Will for another person where the former is to take any benefit under it-this can easily lead to suggestion of undue influence which may cause the will to be held bad.

Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after - person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before $=$ will is executed (see below) alteration may be made by striking through the words with $=$ pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with $\begin{aligned} & \text { knife or other instrument, }\end{aligned}$ and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make new will, revoking the old one. The use of codicils should be left to the lawyer. A will should be written in ink and very legibly, on single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms ahould be studied in conjunction with the notes following.
This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street. Reading, Berks] which I make this [thirteenth] day of [February, 1973] and whereby I revoke all previous wills and testamentary dispositions.
x. I hereby appoint [John Green of -- and Richard Brown of -_] to be the executor(s) of this my will.
2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our

[^38] names as witnesses.

William Jones (signed) of Green Gables, South Street, Reading, tailor.
Henry Morgan (signed) of 16 , North Street, Reading, butcher.
Should it be desired to give legacies and/or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:-
2. I give to - of the sum of $\mathcal{L}$ - and to - of my books (or as the case may require).
3. All the residue of my property real and personal I give to - of -

TERMS.-Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words " my money," apart from the context, will normally only include actual real money. The expression "goods and chattels" should not be used. In giving particular property, ordinary language is sufficient, e.g., " my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

Residuary Legatees.-It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. It should be remembered that $a$ will operates on property acquired after it has been made.

Execution of a Will, and Witnesses.-The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such egift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that $\quad$ person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is legatee. If 1 solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

Where there is any suspicion that the Testator is not, by reason of age or infirmity, fully in command of his faculties it is desirable to ask his Doctor to act as a witness (see Testamentary capacity below).

A blind person may make will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness $\quad$ will.

If by inadvertence the testator should have signed his will without the witnesses being present,
then the attestation should be:- "The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. The stringency of the law as to signature and witnessing of 1 will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

EXRCUTORS. - It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatec. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one or two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

Lapsed Legacies.-If - legatee dies in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee predeceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

Testamentary Capacity.-A person under the age of 18 cannot make a will (except for soldiers, sailors and airmen and then only in exceptional circumstances).

So far as mental capacity is concerned the Testator must be able to understand and appreciate the nature and effect of making a will, the property of which he can dispose and the claims to which he ought to give effect. If a person is not mentally able to make a will provision exists (under the Mental Health Act, 1959 as amended) for the Court to do this for him.
Revocation.-A will is revoked by a subsequent will (but if it does not expressly revoke former wills, only so far such subsequent will operates as implied revocation as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise destroying the will with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of will, unless, in the case of a will made on or after Jan. 1 , 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, x925, s. 177); so that after maringe - new will should be made, except in this last case.

## PERSONAL APPLICATION FOR PROBATE

OR LETTERS OF ADMINISTRATION
Application for probate or for letters of administration may be made in person at the Personal Application Dept. of the Principal Registry of the Family Division, a district probate registry or subregistry, or $\quad$ probate office by the executors or persons entitled to a grant of administration. Applications should bring ( $x$ ) the will, if any; ( 2 ) a certificate of death; (3) particulars of all property and assets left by the deceased; and (4) list of debts and funeral expenses.

Intending applicants, before attending at registry or probate office, should write or telephone to the nearest probate registry or sub-registry for the necessary forms. Postal or telephone applications cannot be dealt with at the local probate offices. which are part-time only.

Certain property can be disposed of on death without a grant of probate or administration, or in pursuance of a nomination made by the deceased, provided the amount involved does not exceed $£ x, 500$. See the Administration of Estates (Small Payments) Act, 1965.

WHERE TO FIND A PROVED WILL
A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill 1 room of considerable size at Somerset House, where the indices may be examined and a copy of any will read. In the latter case, the original will proved in the District Registry, is kept there, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or $\quad$ District Registry. This index is usually ready by about October of the following year.

Recent Deaths.- A newly introduced system enables a person to discover when a grant of Probate or Letters of Administration is made which may be invaluable to a creditor of the deceased or applicant under the Inheritance (Provision for Family and De-pendents) Act r975-see above. A "standing search" may be made by sending a request in the form set out below to the Record Keeper at the Principal Registry of the Family Division with £x fee. The searcher will receive particulars of any grant made in the previous 12 months or the following 6 months, including names and addresses of the executors of administrators and the Registry in which the grant was made.

FORM OF SEARCH
In the High Court of Justice
Family Division
The Principal Registry (Probate)
I/We apply for the entry of $n$ standing search so that there shall be sent to me/us an office copy of every grant of representation in England \& Wales in the estate of:-
Full name of deceased:
Alternative or alias name
Full address
Exact date of death
Which either has issued not more than 12 months before the entry of this application or issues within 6 months hereafter
Sgd.-(full address).

## SCOTS LAW OF WILLS

A domiciled Scotsman, unlike domiciled Englishman, cannot in certain circumstances dispose effectively of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her jus relictae), and the children are entitled to another one-third share equally between them (their legitim). If he leave widow but no children -or children but no widow-the jus relictae or legitim is increased to a one-half share of the estate. The remaining portion is known as the dead's part. A surviving husband and children have comparable rights (jus reliciti and legitim) in the wife's estate. It should be noted that the amount of any claim of jus relecti, jus relictae or legitim out of an estate on intestacy, shall be calculated by reference to so much
of the net moveable estate as remains after the satisfaction of any prior claims under the Succession (Scotland) Act, 1964-see Illegitimacy, Scotland and Intestacy, Scotland, supra. The dead's part is the only portion of which the testator can freely dispose. All debts are payable out of the whole estate before any division. Burdens in the nature of legacies are payable out of the dead's part. Pupils cannot make wills. Formerly $\quad$ minor could dispose only of movables but since the passing of the Succession (Scotland) Act, 1964 he has a like capacity to test on heritable property. A will must be in writing and may be typewritten or even in pencil. A will may be either ( I ) holograph, i.e. written and subscribed by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily holograph but may be made effectual when it has clearly been adopted as holograph. Words written on crasure or marginal additions or interlineations in holograph writings, if proved to be in the handwriting of the maker of the deed, are valid; (z) tested, i.c. signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. The Conveyancing and Feudal Reform (Scotland) Act, 1970 whilst altering generally the rules for the description of deeds, specifically (s. 44 (2)) makes no change in the rules applying to wills which must still be signed by the testator on every page. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as m notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the Sheriffdom in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of $\square$ child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will may be revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect. If subsequent will is revoked, the earlier will is revived.
"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of the Region in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will or, where such person has predeceased the testator, by the residuary beneficiary. An Executor dative is one appointed by the Court ( $x$ ) in the case of intestacy or ( $z$ ) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under $£ x, 000$ nett and under f 3,000 gross confirmation is obtained under a simplified procedure at reduced fees.
Presumption of Survivorship.-The Succession (Scotland) Act, 9964 , referred to above provides that where two persons die in circumstances indicating that they died simultaneously or if it is uncertain which was the survivor, the younger will be deemed to have survived the elder unless the elder
person left testamentary provision in favour of the younger, whom failing in favour of a third person, the younger person having died intestate (partially or wholly); butif the persons so dying were husband and wife, neither shall be presumed to have survived the other.

## EMPLOYMENT

WAGES AND HOLIDAYS
Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to manual workers, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, e.g., by cheque, money order, postal order or into a banking account.
The Equal Pay Act 1970, which extends to Scotland, and which came into force on December 29, 1975, prevents discrimination, as regards terms and conditions of employment between men and women.

## PARTICULARS OF TERMS OF EMPLOYMENT

Under the Contracts of Employment Act 1972, an employer must give each employee within $I_{3}$ weeks of the beginning of the employment a written statement containing the following particulars of the contract between them:
(x) the date when the employment began with an indication whether previous work counts as continuous with this job;
(2) The rate of remuneration (or how it is calculated);
(3) the intervals at which wages are paid;
(4) the hours of work;
(5) the employee's entitlement to holidays (including public holidays) and holiday pay;
(6) the title of the employee's job;
(7) terms relating to sickness, injury and sick pay;
(8) the length of notice which the employee should give and receive in order to terminate the contract.
In addition, the written particulars must identify the person to whom the employee can apply to seek redress of any grievance and what further steps may ensue.

## TERMINATION OF EMPLOYMENT

An employee may be dismissed without notice if he is guilty of gross breach of contract, such as disobedience to a lawful order or dishonesty. He is then only entitled to wages accrued due at the date of dismissal.

In other cases, the employee is entitled to reasonable notice which, under the contracts of Employment Act 1972, as amended by the Employment Protection Act 1975, must not be less than one week when he has been continuously employed for up to 2 years; then it is one week for each full year worked with a maximum of $\mathbf{x z}$.

An employer who wrongfully dismisses an employee (i.e. with less than the length of notice to which he is entitled) is generally liable to pay wages for the period of proper notice.

An employee who has a fixed term contract has
no claim against his employer for wrongful dismissal if his contract is not renewed when it expires. He may, however, have a claim for a redundancy payment or compensation for unfair dismissal. If he is wrongfully dismissed before his contract expires, he is generally entitled to remuneration payable over the full period of the contract.

Unless the employee has been guilty of misconduct, he may be entitled to a redundancy payment or to compensation for unfair dismissal if he has been continuously employed for at least certain periods and the employment has been terminated by the employer (with or without proper notice) or he has ifixed term contract which expires without being renewed.

Under the Redundancy Payments Act 1965, employee who satisfies the foregoing conditions and is dismissed by reason of redundancy may be entitled to a redundancy payment calculated by reference to his age, pay and length of service.
The Trade Union and Labour Relations Act 1974 enables an employee who is unfairly dismissed to complain to an Industrial Tribunal (generally within 3 months of dismissal). The onus will then be on the employer to prove that the dismissal was due to capability, conduct, redundancy, illegality or some other substantial reason justifying dismissal, and that he acted reasonably in dismissing the employee. If the tribunal finds that the employer did not act reasonably the dismissal will be unfair, in which case the tribunal can
(a) recommend re-engagement or
(b) award compensation consisting of a basic or compensatory award.
For an employee to bring himself within the unfair dismissal provisions, he must have been continuously employed for a period not less than 26 weeks.
All complaints of unfair dismissal are referred to a conciliation officer or the Department of Employment and a very high proportion of complaints are disposed of in this way.

## OFFICES, SHOPS AND RAILWAY PREMISES

The Offices, Shops and Railway Premises Act, 1963, which extends to Scotland with minor modifications, applies to office premises, shop premises and railway premises being, in each case, premises where persons are employed to work. Shop premises include a building which is not a shop but of which the main use is the carrying on there of aretail trade or business; a building occupied by a wholesaler where goods are kept for sale wholesale (except a warchouse belonging to the owner of a dock, wharf or quay); and a building to which the public can resort for the purpose of having goods repaired. However, the Act does not apply to premises if the only employees are the spouse, parent, grandparent, child, grandchild or brother or sister of the employer, and it does not apply to premises if the period of time worked there during each week does not normally exceed 2 I hours.

The following is $\quad$ very brief summary of the main provisions affecting premises to which the Act applies-
x. The premises and all furniture etc., must be kept clean, and no dirt or refuse must be allowed to accumulate.
2. No overcrowding so as to cause risk of injury to health is permitted.
3. Provisions must be made for maintaining a reasonable temperature in rooms, and a thermometer must be provided on each floor of a building. 4. Provision must be made for securing adequate
ventilation.
5. Provision must be made for securing sufficient and suitable lighting.
6. Suitable and sufficient sanitary conveniences and washing facilities (including a supply of clean, running hot and cold or warm water and, in addition, soap and clean towels or other suitable means of cleaning or drying) must be provided at accessible places; and also an adequate supply of wholesome drinking water.
7. Accommodation must be provided for clothing which is not in use.
8. For each sedentary worker there must be provided a seat of a design, construction and dimensions suitable for that worker.
9. Where persons employed to work in shop premises eat meals there, suitable and sufficient facilities for eating them must be provided.
ro. All floors, stairs and passages must be of sound construction and properly maintained.
in. Every dangerous part of any machinery must be securely fenced, unless it is in such $■$ position or of such construction as to be as safe as if it were fenced. No person under 18 can clean machinery if he is thereby exposed to risk of injury from a moving part.
12. No person can be required to lift or carry $■$ load so heavy as to be likely to injure him.
13. A first-aid box or cupboard must be provided. r4. Means of escape in case of fire must be provided, as must appropriate fire-fighting equipment. 15. Where an accident occurs which causes death to an employee or disables him from working for more than 3 days, the occupier of the premises must at once send notice of the accident to the appropriate authority.

## FAMILY LAW <br> ADOPTION OF CHILDREN

In England and Wales this is now mainly governed by the Adoption Act 1976 though this is not yet fully in force. A court order is necessary to legalise the adoption, which, when completed, has the effect of making the adopted child the child of the adopter as if he or she had been born to the adopter in lawful wedlock, and the original rights and duties of the natural parents are thereby cut. The adopter has full rights as to custody, education etc. and the child is treated as his for the purpose of any devolution of property on an intestacy occurring or under any disposition made after the adoption order. The application may be made to the High Court (Family Division) or to a County Court or Magistrates' Court.

Orders may be made in favour of married couples, single, widowed or divorced persons, but not of one party to a marriage alone unless the other spouse cannot be found, is physically or mentally incapable of making an application, or they are separated in circumstances likely to be permanent. A person aged under 2 cannot adopt.

The child's parents or guardians must consent unconditionally to the making of the order unless the court dispenses with the consent, which it may do if the parent cannot be found or is incapable of giving his consent, is withholding his consent unreasonably, or has neglected or ill-treated the child.

Restrictions are placed on societies which may arrange adoptions.

An adopted person aged over 18 may apply to the Registrar General for information to enable him to obtain $\begin{aligned} & \text { full certificate of his birth, but before being }\end{aligned}$ supplied with the information he will be informed that counselling services are available to him.

An adopter and the adopted child are within the prohibited degrees for the purposes of marriage to one another.

Scotland.-The Adoption Act $195^{8}$ which is a consolidating Act is the main statute governing adoption in Scotland. Under the Adoption Act x968 applications for adoption can be made by persons who are either habitually resident in Great Britain or who possess British Nationality. Applications are made either to the Court of Session or the Sheriff Court within whose jurisdiction the child resides at the date of application. The applicant must be either:-
(a) Twenty-five years of age; or
(b) Twenty-one years of age and a relative (as defined in the 1958 Act) of the infant; or
(c) the mother or father of the infant.

It is possible for a man and wife to adoptan infant jointly. Normally the consent of the child's parents or guardian is required before an adoption order will be made but this may be dispensed with in certain cases.

Reference is made to the Adoption of Children (Scotland) Acts 8930 to 1949 which still apply in part and to the Adoption Act 1960 relating to the revocation of adoption orders. Minor parts of the Adoption Act 1976 apply to Scotland as does the Children Act 1975.

The Succession (Scotland) Act 1964, gives the adopted child the same rights of succession as a child born to the adopter in wedlock but deprives him of any such rights in the estates of his natural parents.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers including shoft certificates which contain min reference to adoptions, can be obtained on conditions similar to those relating to birth certificates, (See below.)

## BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:-

1. The father or mother of the child. If they fail; 2. the occupier of the house in which the birth happened; 3. a person present at the birth; or, 4 . the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of twenty pounds. The registration of birth is free. In England or Wales, the informant, instead of attending before the registrar of the subdistrict where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. Under the Public Health Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. This is in addition to the registration already mentioned.

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy. A stillbirth may only be registered within 3 months of the birth.

The re-registration of the birth of person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths

Registration Act, 1953. When the Children Act 3975 takes effect special provisions will apply to the registration and re-registration of births of abandoned children, and the re-registration of births of illegitimate children showing the father's name; the mother must be party to the latter application and if the child is under 16 must show the father's formal admission or a court's finding of paternity.

Birth at Sea: The master of British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's Office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act, 1957, applicable also to Scotland.

## SCOTLAND

New provisions are included in the Registration of Births, Deaths and Marriages (Scotland) Act, x965, which amends and re-enacts provisions in former Acts. Personal notification within 21 days of any birth, must be given to the registrar of (a) the registration district in which the birth took place, or (b) any registration district in which the mother of the child was ordinarily resiuent at the time of the birth and (c) in the case of foundling child, dead or alive, when the place of birth is not known, the registration district in which the child, or the body was found. When a child is born (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the child is conveyed therein to any place in Scotland, the birth shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by the father or mother of the child, and if they fail, by one of the following: (a) any relative of either parent who has knowledge of the birth; (b) the occupier of the premises in which the child was, to the knowledge of that occupier, born; (c) any person present at the birth; (d) any person having charge of the child. Failure without reasonable cause involves 1 penalty not excceding £zo.

The name of the father of an illegitimate child may be entered in the register of births at the time of registration if jointly requested by the mother and father, and the latter's name may also be recorded at a later date on declaration by both parents. A free abbreviated certificate of birth will be issued to the informant at the time of registration. Provision is made for the re-registration of the birth of $u$ person made legitimate by the subsequent marriage of the parents or whose birth entry is affected by any matter respecting status or paternity, or has been so made as to imply that he is a foundling.

A still-birth must be registered and a certificate, signed by the doctor or certified midwife present at the birth or who has examined the body of the child, must be produced.

## CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS
England and Wales.-Certificates of Births, Deaths, or Marriages can be obtained at the Office of Population Censuses and Surveys, St. Catherine's House, 1o, Kingsway, W.C. 2 or from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriage can
also be obtained from the incumbent of the church in which the marriage took place; or from the Nonconformist minister (or other "authorized person") where the marriage takes place in registered building (see, post, under Marriage).

Where the certificate is issued by the Local Register Office the fee payable for standard Death and Birth certificates is $£ 1.25$ at the time of registration, or until the completed register is handed over to the Superintendent Registrar. Thereafter the fee is $£ 2.50$. Where the certificate is issued by the General Register Office the fee is also $£ 2.50$, if applied for in person or $£ 4.50$ if applied for by post. Certificates at lower rates may be issued under certain statutes, and in particular (under the Births and Deaths Registration Act 1953) a short form of birth certificate showing name, sex and date of birth, but not parentage, may be obtained on payment of a fee of $£ \mathrm{I} .25$ from the Registrar General (when $£ 2.75$ handling charge is also payable) or from the Superintendent Registrar or Registrar.
It is considered desirable when certificate is required to consult the nearest Register Office who, if told the exact or approximate date and place of registration, will be able to advise on the best way of obtaining it.
English Registers.- Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the Office of Population Censuses and Surveys, St. Catherine's House, xo, Kingsway, W.C.2. The Society of Genealogists 37 Harrington Gardens, S.W.7, possess many records of Baptisms, Marriages and Deaths prior to 1837 , including copies, in whole or in part of about 4,000 Parish Registers.
Scottish Registers of Births, Deaths and Marriages. Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained personally at the General Register Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of $£_{2} \cdot 50$ for a full extract entry of birth, death, or marriage, and $\mathcal{£} \cdot 25$ for a short certificate of birth. When the period searched is over 20 years additional fees are payable. A short certificate of registration of deaths is issued free of charge for National Insurance purposes in certain cases.
There are also available at the General Register Office old parish registers of the date prior to 1855 which were formally kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of $\mathcal{£} 2 \cdot 50$. A fee of $£ 3$ per day is payable for - general search of all the Scottish registers.

## DIVORCE, SEPARATION AND ANCILLARY MATTERS

Preliminary.-Matrimonial Suits may be conveniently divided into two classes, viz. ( I ) those in which it is sought to annul the marriage because of some defect; and (z) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it. By virtue of the Matrimonial Causes Act, 1967 , all matrimonial causes are now commenced in one of the divorce county courts designated by the Lord Chancellor or in the Divorce Registry in London. If the suit becomes defended, it must be transferred to the High Court.
(x) Nullity of Marriage. -This is now mainly governed to England and Wales by the Matrimonial Causes Act 1973. A marriage is void ab initio if the parties were within the prohibited degrees of affinity, or were not male and female, or if it was bigamous or if one of the parties was under the age of consent, i.e. 16 , or in the case of a polyga-
mous marriage entered into outside England and Wales, that either party was at the time of the marriage domiciled in England and Wales. Where the formalities of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage.

A marriage is voidable (i.e. a decree of nullity may be obtained but until such time the marriage remains valid) on the following grounds-(a) incapacity of either party to consummate; (b) respondent's wilful refusal to consummate; (c) that either party did not validly consent to the marriage, whether in consequence of duress, mistake, unsoundness of mind or otherwise, (d) that either party at the time of marriage was mentally disordered person; (e) that at the time of marriage the respondent 'was suffering from communicable venereal disease: $(f)$ that at the time of the marriage the respondent was pregnant by another man. In cases ( $e$ ) and ( $f$ ) the petitioner must have been ignorant of the grounds at the date of the marriage and in (c), (d), (e) and ( $f$ ) proceedings must be instituted within 3 years of the marriage. In all cases the court shall not grant I decree where the petitioner has led the respondent to believe that he would not seek a decree and it would be unjust for it to be granted.
The 2973 Act provides that II decree of nullity in - voidable marriage only annuls the marriage from the date of the decree. The marriage remains valid until the decree, and any children of the marriage are legitimate. Children of a void marriage are illegitimate unless the father was domiciled in England and Wales at the child's birth (or father's death, if earlier) and at the time of conception (or marriage if later) both or either of the parents reasonably believed the marriage was valid.
A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (b) above, even though there has been no normal intercourse, but it may in certain circumstances constitute unreasonable behaviour for the purpose of divorce (as to which see below). Further it has been allowed as a defence to a charge of desertion against the aggrieved party.
(2) Judicial Separation and Divorce. - The second class of suit includes \# suit for judicial separation (which does not dissolve a marriage) and $n$ suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation. It is not necessary to prove that the marriage has broken down irretrievably and the five facts listed (a) to (e) under divorce (below) are grounds for judicial separation.

Divorce.- The sole ground on which divorce is obtainable by either husband or wife is the irretrievable breakdown of the marriage. However, the court is precluded from holding that a marriage has irretrievably broken down unless it is satisfied of one or more of the following facts: (a) that the respondent has committed adultery since the marriage and the petitioner finds it intolerable to live with the respondent; (b) such behaviour by the respondent that the petitioner cannot reasonably be expected to continue co-habitation; (c) desertion by the respondent for $z$ years immediately before the petition; (d) 5 years separation immediately before the petition (but only $z$ years where the respondent consents to the decree). Matrimonial Causes Act 1973.

The foregoing is subject to $\quad$ clause prohibiting
any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Desertion may be defined a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of I serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

Provisions designed to encourage reconciliation.-The 1973 Act requires the solicitor for the petitioner to certify whether he has or has not discussed the possibility of a reconciliation and whether or not he has given the petitioner the names and addresses of persons qualified to help effect $\equiv$ reconciliation.

A total period of less than six months during which the parties have resumed living together is to be disregarded in determining whether the prescribed period of desertion or separation has been continuous. Similar provision for effecting a reconciliation exists in relation to the other proofs of break-down, but a petitioner cannot claim that it is intolerable to live with the other party if they have lived together for more than six months after discovery of the respondent's adultery.

Obtaining the Decree Nisi. Where the suit is defended, i.e. the respondent opposes the dissolution or the fact/ground on which the petitioner seeks it-the petition will be heard by a Judge in open court, the parties giving oral evidence. Where the suit is undefended, the evidence will normally take the form of a sworn written statement made by the petitioner which will be sent to the Court and read over by the Registrar. If he is satisfied that he or she has proved the contents of the petition, he will simply fix a date for $\quad$ Judge to pronounce the decree nisi, it being unnecessary for either party to attend. Only if the Registrar is not satisfied as above will he order that the petition be heard formally by the Judge.

Children.-Subject to exceptions, the decree nisi cannot be made absolute unless a Judge by order declares that he is satisfied with the proposed arrangements for the welfare of any child of the family who is under 16 or under 18 and receiving education or vocational training. If the petition is heard in open court the Judge will normally do so at that time. Otherwise if there is no dispute as to the children between the parties and the proposed arrangements for residence, education etc. are specific, an appointment will be made for the Judge to interview one or both parents informally and if satisfied he will make an order to that effect. If not the Registrar may inform the parties that it is up to them to seek hearing before the Judge to resolve the matters in dispute.

Decree Absolute.-Every decree of divorce or nullity is in the first instance a decree nisi, and the marriage subsists until the decree is made absolute, usually six weeks after decree nisi on the petitioner's application. After the decree absolute either party is free to remarry.

Maintenance, etc.-The court has wide powers to order either party to the marriage to make financial provision (e.g. periodical payments, a lump sum, the transfer of property) for the other party or any child of the family, having regard to the party's means, the recipient's needs and all the important aspects of the case. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or̀ defence. A guilty co-respondent may be ordered to pay costs.

The court may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, even though no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the court may also deal with custody of and access to the children.

## CUSTODY OF CHILDREN ETC.

The Court may make orders in respect of access to and the custody, maintenance and education of children in connection with a suit for divorce, nullity or judicial separation (above) or with an application to the Magistrates (below) whether the suit succeeds or not. In addition, if there is no other matrimonial suit involved parent may apply for custody under the Guardianship of Minors Acts 1975 and 1973, and any person may apply to the High Court for the child to be made a ward of court.

In all cases the welfare of the child is the first and paramount consideration. The categories of child who may be covered by any particular type of proceedings differ according to the nature of those proceedings and to the nature of the particular relief sought, but it should be borne in mind that in connection with divorce, nullity and judicial separation - child which has been treated by the spouses as $\quad$ child of the family may be included as well as the children of the spouses themselves. In the case of a Magistrates' order the child must be that of at least one of the spouses which has been accepted by the other as $\begin{gathered}\text { child of the family. }\end{gathered}$

When the Children Act 1975 comes into effect a new procedure called "Custodianship" will be introduced, basically allowing long term foster parents to apply for custody of the foster child.

Any dispute relating to the above matters should be placed in the hands of $\square$ Solicitor without delay (see Legal Aid, etc. below) and in particular it should be borne in mind that where there is financial need (because of, e.g. continuing education or disability) maintenance may be ordered for children even beyond the age of majority.

SEPARATION BY AGREEMENT
Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult $\boldsymbol{I}$ solicitor in every such case.

## MAGISTRATES' SEPARATION AND MAINTENANCE ORDERS

When " husband has been guilty of adultery or has been convicted of certain assaults or has deserted his wife, or has been guilty of persistent cruelty to her or to an infant child of the family, or of wilful neglect to maintain her or such a child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magistrates' court. A husband may apply on similar grounds, so far as they are applicable to him. In particular a wife can sometimes be guilty of the offence of wilful neglect to provide reasonable maintenance for her husband or children and an order can be made against her. The court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum in its descretion to the wife and may order her to make I similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or
both of the spouses of $a$ weekly sum to the person entrusted with legal custody in respect of each child of the family up to the age of $x 6$. If the court thinks the child would still be a dependent although over that age, similar payments may be ordered for support of the child up to the age of 23 . The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct conduced to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wifful neglect or misconduct conduced to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, I952, separates the hearing of matrimonial disputes from ordinary court business; specifies the persons allowed to be present; limits newspaper reports, etc., etc.

## SCOTLAND <br> Divorce

Actions of divorce can only be raised in the Court of Session which has jurisdiction to entertain such actions only if either of the parties to the marriage in question (a) is domiciled in Scotland on the date when the action is begun; or (b) was habitually resident in Scotland throughout the period of one year ending with that date.

The Scots Law of Divorce is now governed by the Divorce (Scotland) Act 1976, which for the purposes of divorce came into force on January $x$, 1977. The sole ground of divorce is now irretrievable breakdown of the marriage. This can only be established in one of the following ways:
(a) The defending spouse has committed adultery since the date of the marriage. Here it is not necessary for the pursuing spouse to prove that the fact of adultery made it intolerable to live with the defending spouse.
(b) The defending spouse has behaved in such way that the pursuing spouse cannot reasonably be expected to cohabit with him or her. It is immaterial whether or not the conduct founded upon is active or passive.
(c) The defending spouse has deserted the pursuing spouse for a continuous period of two years. There must be no question of the pursuing spouse having refused $=$ genuine and reasonable offer to adhere. Nor is irretrievable breakdown established if cohabitation is resumed for a period of more than three months, after the two year period has expired.
(d) There has been no cohabitation at any time during ${ }^{-}$continuous period of two years immediately preceding the action between the parties to the action, and the defending spouse consents to the divorce being granted.
(e) There has been no cohabitation at any time during a continuous period of five years, as in (d) supra, except that on the expiry of the five year period, the consent of the defending spouse is not required.

The facts of desertion and separation are not interrupted by the parties cohabiting for a period or periods not exceeding six months. However such
a period or periods of cohabitation would not be included in the calculation of the two-year or fiveyear periods.
Encouragement of Reconciliation: The burden of promoting a reconciliation between spouses in a divorce action in Scotland falls upon the Court by virtue of the 1976 Act. Where an action of divorce has been raised, it may be postponed by the Court to enable the parties to seek to effect a reconciliation, if the Court feels that there may be a reasonable prospect of such reconciliation. If the parties do cohabit during such postponement, no account shall be taken of such cohabitation if the action later proceeds.

Maintenance, efc.: The 1976 Act also provides that either party to a marriage can apply to the Court at any time prior to decree being granted for (a) an order for $\quad$ periodical allowance (b) an order for a capital sum or (c) a variation of marriage settlement. The Court in granting or refusing such an order takes into account the respective means of the parties, and also all the circumstances of the case.

Nullity of Marriage.-A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of - previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

## SEPARATION

Under the Divorce (Scotland) Act 1976 supra, I decree of Judicial Separation can be obtained by proof of the same facts necessary to obtain decree of divorce-except that for the principle of irretrievable breakdown there is substituted that of grounds justifying separation.

## Custody of Children

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody. The Children Act 1975 (supra) also applies to Scotland.

## ILLEGTTIMACY AND LEGTTIMATION <br> England and Wales

A man may be summoned to petty sessions on the application of the mother of an illegitimate child, or by the Supplementary Benefits Commission where benefit has been paid for the requirements of the child, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum in their discretion. The woman is not bound to give evidence in every case but if she does so it must be corroborated in some material particular. The mother has the custody of her illegitimate children. Prima facie every child born of married woman during a marriage is legitimate; and this presumption can only be rebutted by strong evidence.' However, under the Family Reform Act, 1969, any presumption of law as to the legitimacy (or illegitimacy) of any person may in civil proceedings be rebutted by evidence showing that it is more probable than not that the person is illegitimate (or legitimate) and in any proceedings where paternity is in question, blood tests may be ordered. If however the husband and wife are separated under an Order of the Court, a child conceived by the wife during such separation is presumed not to be the husband's child.

Legitimation.-The Legitimacy Act 1976 con-
solidates earlier legislation dating back to January I, 1927. Where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. $\mathbf{x}$, 1927, or from the date of the marriage, whichever last happens. Marriage legitimates a person even though the father or mother was married to $I$ third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar-General information for re-registration of the birth of $\quad$ legitimate child.

Declarations of Legitimacy.-A person claiming that he, his parents, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.-A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., I will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

Property Rights of Illegitimate Children.-By the Family Law Reform Act, 1969, the rights of an illegitimate child on an intestacy are now broadly equated with those of a legitimate child. Also, in any deposition made after January I, 1970, any reference to children and other relatives shall, unless the contrary intension appears, be construed as including references to, and to persons related through, illegitimate children.

## SCOTLAND

Illegitimate Children (Scotland) Act, 1930.-The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or ailment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen.
By Scots Law illegitimate child is legitimated by and on the date of the subsequent marriage of its parents and there is no objection to there having been an impediment to the marriage of the parents at the time of the child's conception-see the Legitimation (Scotland) Act, 1968, which came into operation on June 8, 1968, on which date thousands of existing illegitimate children were regarded as legitimated. By the Registration of Births, Deaths and Marriages (Scotland) Act, 1965 , a child so legitimated, who has already been registered as illegitimate, may be re-registered as legiti-
mate. The consent of the father of an illegitimate child to its adoption is not required.

The Law Reform (Miscellaneous Provisions) (Scotland) Act, r968, gives an illegitimate child full rights of succession (including legitim) in the estate of both parents, while the father and mother share equally in the estate of their illegitimate child, Unless expressly excluded, a reference in a deed executed on or after 25 th November, 1968, to a relationship, e.g., "issue" or "children" is presumed to include illegitimate children.

## MARRIAGE

A.-MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND
I. Marriage by Banns.-The Marriage Act, r949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain $I$ licence (see below), or submit to the republication of banns.
2. Marriage by Licence.-Marriage licences are of two kinds:-
(i) A Common Licence, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (x The Sanctuary, Westminster, S.W.I) and (for marriages in London) at the Bishop of London's Diocesan Registry ( I The Sanctuary, S.W.I), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writies, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to six pounds. No previous notice is required and the licence is available as soon as it is issued. Before licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of
the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.
(ii) A Special Licence granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., $£ 25$.
3. Marrlage under Superintendent RegisTRAR'S CERTIFICATE.-A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

Marriage Fees.-The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although it stranger-clergyman may be invited to perform the service.

## B.- MARRIAGE UNDER SUPER- <br> INTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):-
(a) A marriage in a registered building (e.g., a nonconformist church registered for the solemnization of marriages therein).
(b) A marriage in a register office.
(c) A marriage according to the usages of the Society of Friends (commonly called
(d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
(e) A marriage according to the rites of the Church of England (see above-in this case the marriage can only be without licence).
Notice.- Notice of the intended marriage must be given as follows:-
(i) Marriage by certificate (without licence)-if both parties reside in the same regisration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
(ii) Marriage by certificate (with licence)-one notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has
resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.
The notice (in cither case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (see below) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.
issue of Certificate:
(i) Without licence.-The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Supcrintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage which can then take place at any time within three months from the date of the entry of the notice.
(ii) With licence. The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.
Solemizization of the Marriage:
(i) In a Registered Building.-The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in mappropriate registered building in the nearest district.
The presence of Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an " authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.
The marriage must be solemnized between the hours of $8 \mathrm{a} . \mathrm{m}$. and $6 \mathrm{p} . \mathrm{m}$. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration-"I do solemnly declare that I know not of any lawful impediment why I. A. B., may not be joined in matrimony to C. D." Also each of the parties must
say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of $=$ Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."
(ii) In a Register Office.-The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of a.m. and $6 \mathrm{p} . \mathrm{m}$. , with open doors in the presence of the Superintendent Registrar or a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other:" "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Register Office, though the parties may, on production of their marriage certificate, go through subsequent religious ceremony in any church or persuasion of which they are members.
(iii) Other Cases.-If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.
If both parties are Jews they may marry according to their usages in a synagogue, which has certificate marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of $\llbracket$ Registrar of Marriages is not necessary.
fees of Superintending Registrars
For entering notice of a marriage by certi-
ficate (with or without licence) in the
marriage notice book. ..................... For a licence for marriage....................
For marriage by certificate (with or
without licence) in the presence of a
Registrar (including cost of certificate)....

\[

## C.-MARRIAGE UNDER REGISTRAR GENERAL'S LICENCE

The main purpose of the Marriage (Registrar General's Licence) Act, 1970, which came into force on January x , x97x, is to enable non-Anglicans to be married in unregistered premises where one of the persons to be married is seriously ill, is not expected to recover and cannot be moved to registered premises. A fee of $£ x 5$ is payable to the Registrar General for the licence, though he has power to remit this in whole or in part to avoid hardship.

MISCELLANEOUS NOTES
Consanguinity and Affinity.-A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the rst Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract $\quad$ marriage with:-

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

Minors.-Persons under 18 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and and Schedule as amended by the Family Law Reform Act, 1969). Where both parents are living, both must consent, where one is dead, the survivor, or, if there is I guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of 1 parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act prohibits any marriage where either party is under 16 years of age.
D.-MARRIAGE IN ENGLAND OR WALES WHIEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND
Notice for a marriage by $\quad$ Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.
Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

## MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is contract which is completed by the mutual consent of parties. The Marriage (Scotland) Act 1977, which comes into force on January $x, 197^{8,}$, states or restates the law in convenient form. References in this section are to that Act.
Impediments to Marriage: These are (a) Nonage, i.e., where either party is under the age of 16 . (b) Forbidden degrees of relationship (Section 2). (c) Subsisting previous marriage. (d) Incapacity to understand the nature of the contract. (e) Both parties of the same sex. (f) Non-residence, i.e., if the requirements of prior residence of one or other of the parties in Scotland have not been complied with. The Act also states the grounds on which certain marriages may be declared void.
Marriages may be regular or irregular, thus:-
Regular Marriages
A regular marriage is one which is celebrated by a Minister of Religion or authorised Registrar or ther celebrant specified in the Act. The parties
must submit to the District Registrar a statutory notice of intention to marry. The Registrar will then enter the parties' names and particulars in the Marriage Notice Book which must also show the intended date of the marriage. He must then display the notice of intention to marry in a prominent public place until the intended date, and any person claiming an interest may lodge written objections thereto with the Registrar (Section 5). The Registrar, on being satisfied that there are no legal impediments to the marriage, may then issue to either or both parties a Marriage Schedule, which must be produced to the celebrant of the marriage; failure so to do before the ceremony renders the marriage void. After the ceremony the marriage must be registered with the Registrar General for inclusion in the Register of Births, Deaths and Marriages, within the prescribed time.

## Irregular Marriages

Since the Marriage (Scotland) Act 1939 the only form of irregular marriage to be recognised by law-viz., marriage by habit and repute, remains competent under the 1977 Act. If the parties live together constantly as husband and wife and are held to be such by the general repute of the neighbourhood, then there may arise presumption from which marriage can be inferred. Before such - marriage can be registered, however, a decree of declarator of marriage must be obtained from the Deputy Principal Clerk of the Court of Session. It is the duty of the Deputy Principal Clerk to register the decree as soon as it is granted.

## JURY SERVICE

Every local or parliamentary elector between the ages of eighteen and sixty-five who has resided in the United Kingdom, Channel Islands or Isle of Man for at least five years since he attained the age of thirteen will be qualified to serve on a jury unless he is "ineligible " or "disqualified ".
Ineligible persons include those who have at any time been judges, magistrates and certain senior court officials, those who within the previous ten years have been concerned with the law (such as barristers and solicitors and their clerks, court officers, coroners, police, prison and probation officers); priests of any religion and vowed members of religious communities; and certain sufferers from mental illness.
Disqualified persons are those who have at any time been sentenced by Court in the United Kingdom, Channel Islands or Isle of Man, to a term of imprisonment exceeding five years, or who have in the previous ten years served any part of sentence exceeding three months or been sentenced to Borstal.

Some others are excusable as of right. These include members and officers of the Houses of Parliament, full-time serving members of the forces (including Women's forces) and registered and practising members of the medical, dental, nursing, veterinary and pharmaceutical professions and any person who has served on a jury in the two years before he is summoned. In other cases the court may excuse a juror at its discretion (e.g., where the service would be a hardship to the juror).
If a person serves on a jury knowing himself to be disqualified or inelegible he is liable to be fined up to $£ 400$ or $£ 100$ respectively.
A juror is entitled to subsistence and travelling expenses, compensation for other expenses incurred in consequence of attendance for jury service, loss of earnings and loss of national insurance bencfits but certain maximum figures (which are revised from time to time) are laid down.

A verdict of a jury must normally be unanimous but after two hours consideration (or such longer period = the Court thinks reasonable), a majority verdict is acceptable if ten jurors agree to it (or nine if the size of the jury has been reduced to ten, e.g., by illness during the trial).

Jury trial is now very unusual in civil cases but a person charged with any but the least serious crimes is entitled to be tried by a jury. The defendant may object to any juror if he can show that that juror ought not be on the jury (e.g., because he is incligible or is biased against him) and may object to seven jurors without giving any reason.

## JURY SERVICE IN SCOTLAND

It is the duty of the sheriff principal of each sheriffdom, in respect of each sheriff court district in his sheriffdom, to maintain a book, known as the "general jury book", containing the names and designations of persons within the district who are qualified and liable to serve as jurors. The book, which is compiled from information which every householder is required to provide, is kept open for the inspection by any person, upon payment of a nominal fee, at the sheriff clerk's office for the district. Part II of the Juries Act 1949 (amended by the Juries Act 1954 with regulations following thereon) applies only to Scotland and provides, inter alia, for the payment of travelling expenses and subsistence allowances to jurors and for loss of earnings.

The number of a jury in a civil cause in the Court of Session is twelve and in the Sheriff Court seven. In a criminal trial the number is fifteen, and in inquiries by Sheriff and jury under the Fatal Accidents Inquiry (Scotland) Act 1895 or the Fatal Accidents and Sudden Deaths Inquiry (Scotland) Act 1906 the number is seven. In Scotland there is no Coroner's Inquest.

## Qualifications

Every man or woman between the ages of $2 x$ and 60 who is possessed of heritable property of the yearly value of at least $£ 5$, or of moveable property of the value of at least $£ 200$ Sterling, is qualified to serve on a jury.
Exemptions.-The following persons are exempt from serving on juries: peers, judges of the supreme courts, sheriffs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and other officers of any court of justice, prison offices, university professors, practising physicians, surgeons, registered veterinary surgeons or midwives, registered dentists (if they wish to be exempt), officers in the Army, Navy or Air Force on full pay, officers of the Customs and Excise, messengers at arms, police and other officers of law, commissioners and other officers and employees of the Inland Revenue, lighthouse keepers and their assistants, soldiers of the regular Army or Air Force, officers and men of the Territorial Army and Royal Auxiliary Air Force, factory inspectors and airport police. Officers of the Post Office will not be compelled to serve.

Jurors failing to attend without good cause are liable to $=$ penalty.

## LANDLORD AND TENANT ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the
position is position is complicated by numerous statutory provisions. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important provisions include:-
(x) As to agricuitural holdings-the Agricultural

Holdings Act, 1948. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

The Agriculture (Miscellaneous Provisions) Act 1976, contains provision for succession on the death of a tenant of an agricultural holding. Subject to certain conditions and qualifications, a member of a deceased tenant's family (as defined in the Act) can within three months of the death apply to the Agricultural Land Tribunal for a direction entitling him to a tenancy of the holding.
(2) As to business premises-the Landlord and Tenant Acts, 1927 and 1954, and the Law of Property Act 1969, Pt. I. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.
(3) As to dwelling houses. The complicated mass of legislation is now mainly embodied in the Rent Acts 1968 and 2974 , which does not extend to Scotland or Northern Ireland. If the house is within the Act, tenant has a personal right to reside there, and he may only be ousted on certain grounds.

Such tenancies may be either controlled or regulated. A controlled tenancy is one which has been in existence since July 6, 1957; had at that time the protection of the Rent Acts and is of a house or part of a house the rateable value of which did not exceed $£ 40$ in London or $£_{30}$ elsewhere on Novermber 7, 1956. A regulated tenancy is one which is not controlled, and which falls within the following limits:-
(a) Rateable value on March 23, 1965 (or when first rated, if later)-not in excess of $£_{400}$ in Greater London or $£ 200$ elsewhere OR
(b) Rateable value on March 22, 1973 (or when first rated, if later)-not in excess of $£ 600$ in Greater London or $£ 300$ elsewhere OR
(c) Rateable value on Aprili 1,1973 (or when first rated, if later)-not in excess of $£ 5500$ in Greater London or $£ 750$ elsewhere.
The essential difference between controlled tenancies and regulated tenancies is in the maximum rent recoverable. Under controlled tenancies, the maximum rent is ascertained by taking an appropriate multiple of the gross value for rating purposes of the property on November 7, 1956, whereas the maximum rent under aregulated tenancy is the rent agreed between the landlord and tenant, unless a fair rent has been registered, in which case that is the maximum rent recoverable. Application for the registration of a fair rent may be made by either the landlord or tenant, to the Local Rent Officer, and appeal against his decision lies to the Rent Assessment Committee.
$\mathrm{S}_{27}$ of the Housing Finance Act 1972 provides for the conversion of = controlled tenancy into a regulated tenancy on the issue of a certificate by the Local Authority that the house is provided with all standard amenities. The Housing Rents and Subsidies Act 1975 has repealed the former provision for conversion by reference to rateable value on specific date. This Act also provides for the phasing of rent increases in the private sector.
(4) As to dwelling houses with resident landlords. The Rent Act 1974 gives tenants of furnished dwellings the same security of tenure as those of unfurnished dwellings unless the landlord lives in part
of the house. In the latter case, and in the case of a tenancy of an unfurnished dwelling granted by a resident landlord after 13th August 1974, the tenancy may fall within Part VI of the Rent Act 1968, and the tenant may be granted relief from eviction by application to the Rent Tribunal after a notice to quit has been served, but before it has expired. The Rent Tribunal is empowered to delay the operation of the notice to quit by 6 months, and by the end of that period, the tenant may apply for further delay of 6 months. The landlord or the tenant may also apply to the Rent Tribunal for a reasonable rent to be registered, and once registered, this is the maximum rent recoverable.
(5) The Protection from Eviction Act 1977 provides that if any person with intent to cause the residential occupier of any premises to give up the occupation thereof does any act calculated to interfere with the peace or comfort of the residential occupier or members of his household. he shall be guilty of an offence. A further provision prevents a landlord enforcing a right to possession against: tenant (who is not protected by any security of tenure legislation) without a court order, and there are special rules in such cases relating to agricultural employees.
(6) A notice to quit any dwellinghouse must be given at least four weeks before it is to take effect, and must be in writing and in the prescribed statutory form.
(7) Part I of the Landlord and Tenant Act, 1954, applies to most tenancies of houses for over twentyone years at a ground rent. Where it applies, the contractual tenancy is continued until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on limited grounds.

Further, under the Leasehold Reform Act, 1967, tenants of houses under leases for over twenty-one years at rent less than two-thirds of the rateable value of the house are in most cases given a right to purchase the freehold or to take an extended lease for a term of fifty years, provided the tenant at the time when he seeks to exercise the right has been occupying the house as his residence for the last five years or for periods amounting to five years in the last ten years.
(8) Full Rent Act protection is available only if a house is let on $=$ tenancy, so that if the occupier of house has a mere licence to occupy, he does not have Rent Act protection. Further, even if he has - tenancy, he will not be Rent Act protected if the rent payable was less than two-thirds of the rateable value of the house. For other reasons, many occupants of houses owned by farmers and occupied by farm workers did not enjoy full security of tenure. The Rent (Agriculture) Act 1976 contains detailed provisions conferring security of tenure on certain agricultural workers housed by their employers and on their successors on death.
(9) Under the Housing Act, 196I (which does not extend to Scotland), in a lease of a dwellinghouse granted after October 24, 196x, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

## SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played in important part
in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 C. 17 , $\quad$ contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (I) the lease, if for more than one year, must be in writing, (z) there must be a rent, (3) there must be Eterm of expiry, and (4) the tenant must have entered into possession.
It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting $\quad$ few important Statutes is followed here.
The Agricultural Holdings (Scotland) Act, 1949 (amended by the Agriculture Act, 1958), which is a consolidating Act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.
It is of interest to note that the Small Landholders Act, 1915 , provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.
In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Acts, 1949 and 1964 give $\begin{aligned} & \text { measure of security to tenants of shops. }\end{aligned}$ These Acts enable the tenant of shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for renewal of the tenancy may be dismissed. Reference should be made to Section $x(3)$ of the 1949 Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Acts apply to premises held by the Crown or Government Departments, either as landlord or tenant.
The Housing (Scotland) Act 1969 and the Rent (Scotland) Act 197x, as amended by the Rent Act 1974, define controlled tenancies and regulated tenancies, both furnished and unfurnished, and lay down the system by which a landlord or tenant may obtain from the Rent Officer registration of a fair rent. The Acts also give to the tenants either of furnished or unfurnished lets a substantial degree of security of tenure. There are, however, certain exceptions; thus, they do not apply to tenancies where the interest belongs to the Crown, or to a local authority, a development corporation the Housing Corporation of new towns. There must be a true tenancy for the Acts to apply. They do not apply to licensees such as lodgers or persons allowed to occupy houses on a grace and favour basis or to service occupiers. The Acts define the circumstances under which a landlord may apply for increased rent as a consequence of having carried out improvements to his property and also lay down the system of phasing of such rent increases. On the death of statutory successor to $\|$ tenancy the tenancy may pass for a second time to a member of the family or a relative who has been in residence in the house for period of at least six months The Acts also lay down the duties and functions of Rent Officers and Rent Assessment Committees with regard to unfurnished accommodation and of Rent Tribunals for furnished accommodation.

## LEGAL AID

## LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid Act 1974 , is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the service is contained in the Act itself
and the Regulations made thereunder, administered by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, Lands Tribunal, Restrictive Practices Court, before the Commons Commissioners, and civil proceedings in Magistrates' Courts. In any event, Ir application for legal aid will not be approved if it appears that the applicant would gain only 1 trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation are excepted from the scheme, as are also relator actions and election petitions. It is generally not available for obtaining the decree in undefended divorce and judicial separation, although the Legal Advice and Assistance Scheme (post) will be, and Legal Aid is still, available to deal with property, custody disputes etc., arising in the suit.

Where I person is concerned in proceedings only in a representative, fiduciary or official capacity, his personal resources are not to be taken into account in considering eligibility for legal aid. Apart from this, eligibility in civil proceedings depends upon applicant's "" disposable income" and "disposable capital ". The figures change frequently; particulars can be obtained from a Solicitor, the Law Society or a Citizens' Advice Bureau. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital part of the value of the house in which the applicant resides, of furniture and household possessions; allowances are made in respect of dependants. Except in cases where the spouses are living apart, or have a contrary interest, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the Department of Health and Social Security, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of certificate lies to $m$ Area Committee. A person resident in England or Wales desiring legal aid may apply for certificate to any Local Committee; if resident elsewhere application should be made to Local Committee for London. However, if the application is made in respect of proceedings in an appellate court and the applicant is resident in England or Wales, application should generally be made to any Area Committee-if resident elsewhere, to Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel from 1 panel. The costs of the assisted person's solicitor and counsel will be paid out of the legal aid fund. The court may order that the costs of a successful unassisted party shall be paid out of the legal aid fund.

## LEGAL ADVICE AND ASSISTANCE

The Scheme is governed by the Legal Aid Act 1974.

Under this legal advice and assistance scheme client may obtain such advice or assistance as is normally provided by a solicitor and if necessary the advice of a barrister may be obtained, but the scheme does not extend to taking any step in any proceedings before any court or tribunal. Where legal aid is available for civil proceedings (see above) or in criminal cases (see below) the scheme
covers work done in making application for such legal aid.

A person is eligible for advice or assistance under the scheme provided his disposable capital and his disposable income do not exceed limits in force from time to time or if he receives Supplementary Benefit or Family Income Supplement. For married man or person with children or other dependants deductions will be made from gross income and capital and allowances made in respect of income tax, National Insurance contributions, etc. It is intended that the financial limits shall approximate to those applying for legal aid in civil proceedings (see above). Except when they are separated or have confling interests the means of husband and wife will be aggregated for the purpose of determining financial eligibility. As in the case of Legal Aid, depending his means, a person may be called upon to pay a contribution towards the costs of work done for him. Particulars may again be obtained from a Solicitor, the Law Society or a Citizens' Advice Bureatr.

Solicitor's costs and expenses, which should not together exceed £25 (V.A.T. exclusive), or $£ 45$ in the case of divorce etc. (not applicable to Scotland, where the $£ 25$ limit still applies) without leave of the Area Legal Aid Committee, will be paid out of the client's contribution and any monies recovered in respect of costs or damages from another party and the balance will be paid by the Legal Aid Fund.

The Act also extends the scheme to cover the costs of solicitor who is present within the precincts of magistrates' court or county court and is requested by the court to advise or represent person who is in need of help.

## LEGAL AID IN CRIMINAL CASES

The Legal Aid Act 1974 Part II provides for legal aid in criminal proceedings. A criminal court (e.g., magistrates' court, Crown Court) has power to order legal aid to be granted where it appears desirable to do so in the interests of justice. The court shall make order in certain cases, e.g., where a person is committed for trial on a charge of murder. However, the court may not make an order unless it appears to the court that the person's means are such that he requires assistance in meeting the costs of the particular proceedings in question. Application should be made to the appropriate court where proceedings are to take place.

An applicant may be required to make $\boldsymbol{I}$ contribution towards the costs of the action. In order to ascertain the amount of this contribution he will have to produce written evidence of his means. Any assessment of means will be carried out by the Supplementary Benefits Commission, which will report to the court. No contribution will be required from a person who has insufficient means.

Any practising barrister or solicitor may act for legally aided person in criminal proceedings unless excluded by reason of misconduct. In general where legal aid is given it will normally include representation by both counsel and solicitor. However, in connection with magistrates' courts, representation will be by solicitor alone unless it is $\pm$ serious offence.

Where any doubt arises about the grant of a legal aid order that doubt is to be resolved in favour of the applicant. The court also has power to amend or revoke a legal aid order. Legal aid may also be granted in connection with appellate proceedings, e.g., on appeal to the Criminal Division of the Court of Appeal under the Criminal Appeal Act, 1968.

SCOTLAND
Civil Proceedings
The Legal Aid (Scotland) Act, 1967 and the Legal Advice and Assistance Act, 1972 form the basis of scheme to provide legal advice in most civil actions in the House of Lords on appeals from the Court of Session, in the Court of Session, the Lands Valuation Appeal Court, the Scottish Land Court, the Sheriff Court, the Restrictive Practices Court and Lands Tribunals for Scotland.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. In lase where litigation is not immediately necessary, the client can seek advice under the Legal Advice and Assistance Act 1972 which is similar to the legal advice and assistance provisions of the Legal Aid Act 1974 (see above). In instance where litigation is expected, application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the Supplementary Benefits Commission after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action. The Legal Aid (Scotland) Act, 5967 provides for the payment (to a limited extent) out of the legal aid funds of expenses incurred by successful opponents of legally aided litigants.

## Legal Advice

Legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England-the Scottish scheme being administered under the Legal Advice and Assistance Act 1972.

## Criminal Proceedings

Legal Aid in criminal cases is administered under the Legal Aid (Scotland) (Criminal Proceedings) Scheme and Regulations, 1975.

Subject to the financial eligibility of the applicant and the merits of his case, Legal Aid is available for proceedings in the High Court of Justiciary, the Sheriff Court and the District Court, as well as for appeals from those courts. Separate lists of practitioners prepared to act on behalf of assisted persons are kept, as regards counsel, by the Faculty of Advocates, and, as regards solicitors, by the Supreme Court and Local Legal Aid Committees of the Law Society of Scotland. Generally, an applicant may nominate to act on his behalf any solicitor whose name appears on the lists. The Scheme also provides for a rota of Duty Solicitors to act for persons taken into custody on homicide charges and persons who are in custody awaiting the first hearing of their case before the Sheriff or District Court.

Applications for Legal Aid must normally be made on the prescribed form to the clerk of the court in question and an applicant is required to provide therein particulars of the merits of his case and his financial circumstances. Where less than 7 days before his trial an accused lodges $\operatorname{li}$ application it shall be refused unless, ou special cause shown, the court decides the application to be timeously made. In certain cases, i.e. where -
person is in custody on = charge of serious crime, an oral application to the clerk of court will be sufficient. Applications are dealt with by the courts themselves and the results communicated to the relevant Committee of the Law Society. An award may be made subject to a contribution to the Legal Aid Fund. Where an applicant has a right to legal representation at the expense of I third partye.g. a Trade Union-he will be refused Legal Aid, although person with a high income may be awarded Legal Aid if the Court is satisfied that he would be unable without grave financial hardship to meet the costs of his defence.

A solicitor acting for an assisted person in a murder trial or appeal may instruct without the prior sanction of the Law Society both senior and junior counsel. In all other cases before the High Court only junior counsel may be instructed without prior sanction.

TOWN AND COUNTRY PLANNING
The Town and Country Planning Act 197x (consolidating earlier Acts) contains very farreaching provisions affecting the liberty of owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Under the Development Land Tax Act 1966 charge to development land tax may arise where a person realises development value by a disposal of an interest in land in the U.K. on or after August $I$, 1976.

What is Development:-
(a) Carrying out of building, engineering, mining or other operations.
(b) Making $\quad$ material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.
Examples of what is not deemed Development:-
(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior, with the exception that since January $x$, rg69, any expansion of building below ground level constitutes development.
(b) Change of use of property within the curtilage of inwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.-Application for such permission is not always necessary, as the Secretary of State may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1973 specifies a number of types of development for which no permission is required, e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 50 cubic metres or one-tenth, whichever is greater, subject to maximum of in5 cubic metres.

Appeal against refusal of permission lies to the Secretary of State and from his decision, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

## VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the most important of which are the Act of 1949 (as amended) and the Act of 8969.

Those entitled to vote as electors' at a parliamentary election in any constituency are all persons resident there on the qualifying date who, at that date are British subjects or citizens of the Republic of Ireland of at least 18 years of age and not subject to any legal incapacity to vote. In addition, a person who is of voting age on the date of the poll at parliamentary or local government election is entitled to vote, whether or not he is of voting age on the qualifying date. Accordingly, a qualified person will be entitled to be registered in a register of parliamentary electors or a register of local government electors if he will attain voting age within twelve months from the date which the register is required to be published.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' m the registration officer determines the claims and objections which must generally be lodged by December 16 in each year. The procedure is slightly different for Northern Ireland.

## INCOME TAX 1977-78

Income Tax is chargeable on the income of all individuals and persons other than bodies corporate.

Income Tax is a tax on annual income, represented by money or money's worth. In general, the charge to tax is on the full amount of income arising for the year of assessment, the fiscal year which runs from April 6 in one year to Aprill 5 in the next, subject to the deductions authorized in the Income Tax Acts. Under Schedule D, however, the assessment is made on the profits or gains of continuing trade or profession for the year preceding the year of assessment, which is called the "basis year". The profits are arrived at on ordinary accountancy principles and then adjusted for tax purposes. The profits for the accounting year of the trade or profession which ends in the fiscal year preceding the year of assessment are the profits of the "basis year".

Broadly, the charge to tax is on income arising in the United Kingdom, or on income derived from home or abroad by residents in the United Kingdom. An individual is resident and ordinarily resident in the United Kingdom if he is living here in the ordinary course of his life or for an extended period; also, though normally he lives here, if he is abroad for occasional residence only; or if he visits the United Kingdom year by year and, over a period of four years he spends average of three months or more in this country, even though his main home is abroad.

The United Kingdom has concluded Double Taxation Agreements with many overseas countries. Persons who are residents of those countries may be exempt from United Kingdom income tax, or chargeable to tax at reduced rates, on income arising in the United Kingdom.

Subject to some important exceptions which are considered below (see "Husband and Wife") the income of a married woman living with her husband is aggregated with his income.

Income Tax is imposed at the rates specified by the annual Finance Acts. From April 1973 single graduated tax replaced the separate income tax and surtax which operated in earlier years. After deducting personal allowances and reliefs the balance of income is now taxed at a basic rate of 34 per cent. Where the balance of income exceeds E6,000 the excess is charged at the following higher rates-

the next $£ 2,000, \ldots \ldots . .65$ per cent.
the next $£ 2,000 . . . . . . .70$ per cent.
the next $£_{5}, 000 \ldots \ldots . . .75$ per cent.
the remainder. . . . . . . . . . 83 per cent.

Where investment income exceeds $£ x, 500$ an investment income surcharge at so per cent. is payable on the first $\mathcal{L} 500$ of the excess and at 15 per cent. on the balance of the excess. But if the taxpayer or his wife living with him has attained the age of 65 years, the surcharge is payable on the excess of the investment income over $£, 2,000$-at ro per cent. on the first $\mathcal{K} 500$ of the excess and 15 per cent. on the balance. Therefore where income is sufficiently large to attract the maximum rate of $8_{3}$ per cent. the top slice of investment income will be charged at 98 per cent.
The enactments relating to Income Tax were consolidated in the Income and Corporation Tax Act 1970 as amended by subsequent Finance Acts.
The tables which follow show the tax payable for $1977 / 8$ by an individual on the amount of income specified, after deduction of the personal allowance and children's allowance (where appropriate). The taxpayer may, however, be entitled to further reliefs which would reduce the tax payable below the amounts shown in the tables.
The income and profits of bodies corporate are subject to Corporation Tax which is outside the scope of this article. Some important changes in the system of Corporation Tax which came into effect in 1973/74 are, however, dealt with in a special article (see Index).

Assessment.-The Income Tax Acts provide for tax to be assessed and collected under number of Schedules which deal with separate sources of income:

Schedule A.-Tax under this Schedule is charged on annual profits from the ownership or occupation of land in the United Kingdom, viz.: ground rents, certain other receipts from land (other than mineral rents and royalties), rents (less expenditure on maintenance, insurance and repairs) and premiums leases for less than fifty years. Such premiums are assessed me the amount received less a per cent. for every year after the first year. "Lease" includes any tenancy. Furnished letting income is normally assessed under Case VI, Schedule D without distinguishing the receipts as between the space let and the furniture hire, but rent for the space en be distinguished and assessed under Schedule A, the profit on the hire of furniture being assessed under Case VI, Schedule D.
(x) Single Persons (under 65 years of age)

Under Schedule B.-Assessment under this Schedule is now restricted to woodlands in the United Kingdom managed on a commercial basis with a view to the realization of profits. The assessment of woodlands will be based on one third of the annual value of the land arrived at on the normal rating basis on the assumption that the lands were let and occupied in their natural and unimproved state. The taxpayer has the option to be assessed under Case I, Schedule D on the results shown by the accounts instead.

Under Schedule C.-Assessed on the paying agent. Not of concern to the individual taxpayer.

Under Schedule D.-This schedule is divided into six cases as follows: Cases I and II-Profits of trades, business, commercial activities on land including farming, professions or vocations.

Case III.-Interest on Government Stocks not taxed at source (e.g., War Loan, British Savings Bonds), bank deposit interest, discounts, etc. Interest on ordinary National Savings Bank and Trustee Savings Bank up to £ 70 is exempt from Income Tax. This exemption applies to both husband and wife separately. Interest on National Savings Bank and Trustee Savings Bank Special Investment Accounts is not exempt.

Cases IV and V.-Interest from foreign or Commonwealth securities, rents, dividends and all other unearned income; assessed on full amount arising, whether remitted or not, where person domiciled and ordinarily resident in the U.K. but on amount remitted only where person not domiciled in the
U.K. or a British subject not ordinarily resident. Prior to April 1974 overseas pensions and profits from trades, business and professions exercised abroad were subject to tax if remitted to the U.K. by a person resident in the U.K. From April 6, x974, individuals who are resident and domiciled in the U.K. will be subject to U.K. tax on overseas pensions whether remitted to the U.K, or not, subject to a deduction of one tenth. Individuals who are domiciled and ordinarily resident in the U.K. will be subject to U.K. tax assessment profits from trades, businesses or professions exercised abroad whether remitted or not, subject to a deduction of one quarter.

Case VI.-Sundry profits and annual receipts not assessed under any other case, e.g., insurance commission, post cessation receipts, certain premiums paid to persons other than landlords and numerous other receipts treated as income and specifically charged hereunder. As to furnished lettings, see under Schedule A.

Losses.-Under Cases I, II, V and VI losses min in general be carried forward against corresponding income or profits of subsequent fiscal years without time limits. Losses under Cases I and II (and from overseas activities to the extent that a profit would be assessable under Case V) may alternatively be set off against other income of the same year or the year next following.

Capital Gains.-A separate long-term gains tax was introduced in the Finance Act 1965 and this applies to gains realized on chargeable assets dis-
(z) Married Couple (under 65 years) Without Children

posed of after April 6, 1965. Details of this tax are given elsewhere in this volume.

To the extent that capital gains from disposals after December 1973 of interests in land in the United Kingdom were development gains, computed under complicated provisions found in the 1974 Finance Act, they were chargeable to income tax under Case VI of Schedule D, only the balance of the gain being charged to capital gains tax. Development gains accruing from disposals on or after August rst 1976 are not subject to income tax but may be chargeable to development land tax under the Development Land Tax Act 1976.

Under Schedule E.-Income from all offices, employments and pensions, including salaries, wages, emoluments, director's fees, etc. Assessed on the actual earnings for the year of assessment. Foreign earnings of this type which prior to April 1974 would have been subject to the "remittance" basis of assessment are now assessable on the amount arising but subject to a deduction of 25 or 100 per cent., depending on the circumstances, viz: where the taxpayer is resident, ordinarily resident and domiciled in the U.K. and the employment is carried on wholly or partly outside the U.K. for 365 days or more continuously the deduction will be yoo per cent. If, in performing the duties of such an employment, the taxpayer is absent from the U.K. for less than 365 days but for not less than 30 qualifying days in the year of assessment, he is entitled to a deduction of 25 per cent. of the emoluments. Further, a deduction of 25 per cent. will be granted from emoluments of an employment with i foreign employer where the duties of the employment are performed wholly outside the U.K.

There are special more complex rules to cover the emoluments received by persons resident but not domiciled in the U.K. from foreign employers. In general, where the duties are performed in the U.K. such earnings will be assessable subject to a deduction of 50 per cent. for and from 1974/75
but from 1976/77 the deduction will be reduced to 25 per cent. where the taxpayer has been resident in the U.K. for at least nine out of the last ten preceding tax years.
In arriving at the amount to be assessed under Schedule E all expenses incurred wholly, exclusively and necessarily in the performance of the duties of the office or employment may be deducted, including fees and subscriptions to certain professional bodies and learned societies and, within strict limits, depreciation allowances.
Expenses allowances and payments in kind (less expenses incurred in performance of duties) to directors and employees enjoying emoluments of $\AA 5,000$ ( $£ 2,000$ before $1975 / 76$ ) or more are assessable. From 1965/6 onwards expenses incurred in providing business entertainment (including hospitality of any kind and gifts) are not allowable except when provided for an overseas customer. Where any person has premises available for his use by reason of his employment and either pays no rent or pays less than the annual value he will be charged to tax on the annual value less any rent paid. Provision is also made for charging directors and employees to tax on the value of benefits obtained from the issue or transfer of shares on advantageous terms and from subsidized medical insurance schemes. Certain payments made on retirement or removal from a person's office or employment (in excess of $£ 5,000$ ) are assessable to tax on him.
Exemptions.-Unemployment, sickness and maternity bencfit and grant, and death grant payable under the National Insurance Acts and (with effect from 1977/78) Child Benefit payable under the Child Benefit Act 1975, are not assessable to income tax, but (retirement, widows, etc.) pensions are included in the charge under this schedule. Under Finance Act 1966 statutory redundancy payments are exempt from tax.

Where the emoluments are paid by an employer

in the U.K., deduction of income tax is made by the employer by reference to the employee's code number. As to P.A.Y.E. (pay as you earn) see further below.

Under Schedule F.-From April 1973 U.K. resident company paying a dividend must account to the Revenue for advance corporation tax on the amount of the dividend paid. A shareholder who is resident in the U.K. and who receives such a dividend is taxable under Schedule F on the amount of the dividend plus the advance corporation tax appropriate to it, but is entitled to a credit against tax liability equal to the amount of the advanced corporation tax.

Chargeable Income-Income tax is charged on the net total income, that is to say, on the aggregate of the income computed under the Schedules and Cases referred to above, after deducting from that aggregate such deductions and allowances as are authorised by the Taxes Act. Interest paid wholly and exclusively for the purposes of atrade, profession or vocation is deductible as an expense in computing the income chargeable under Case I or Case II of Schedule D. Interest which cannot be so dealt with may, subject to certain restrictions, be deducted from the total income. To rank for this relief the interest must be annual interest or interest paid to bank, stockbroker or discount house. Relief will not be given to the extent that the interest is paid at a rate exceeding a reasonable commercial rate and no deduction is available for-
(a) interest on moverdraft;
(b) interest payable after April 5, 1980 on $\Perp$ loan incurred before March 27, 1974 unless it is eligible for relief under paragraphs (i) to (vi) below.
Interest paid at reasonable commercial rates on a loan within any of the following is eligible for relief-
(i) A loan to purchase or improve an interest in land owned by the taxpayer and used as his
only or main residence or used as the sole or main residence of a dependent relative or of former or separated spouse. If the loan exceeds $£ 25,000$, relief is restricted to interest on that amount.
(ii) A loan to purchase or improve an interest in land which is let, or is available to be let at a commercial rent. In this case, however, the interest is deductible only from the rent income.
(iii) A loan to acquire an interest in a close company or an interest in In partnership.
(iv) A loan to member of a partnership to acquire machinery or plant for use in the partnership business.
(v) A loan to an employed person to acquire machinery or plant for the purposes of his employment.
(vi) A loan to a personal representative to enable him to pay capital transfer tax.
Subject to (ii) above, if the taxpayer has both earned income and investment income, the interest eligible for relief will be taken, as far as possible, as reducing the investment income.

Allowances.-The following allowances are deductible in arriving at the net total income and are taken, as far as possible, as reducing earned income in priority to investment income. The Finance Act $x 977$ includes provisions requiring the personal and "wife's earned income" allowances to be varied annually by reference to the retail price index.
Personal Allowances.-

> To a single person........... $£ 845$
> To a married man whose wife
> is living with or maintained
> by him........................ $£ x, 295$

In the year of marriage the allowance to a married person is reduced by $\mathrm{x} / 12$ of $£ 450$ for each fiscal month (i.e. ending May 5, June 5 etc.) which ended before the date of marriage.
(4) Married Couples (under 65 years) with Two Children

| Income(ExcludingChildBenefit) | All Earned Income |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 10,000 | 3,059'50 | $30 \cdot 6$ | 3,024.50 | 30.2 | 2,994.50 | 29.9 |
| 12,000 | 4,143'40 | 34.5 | 4,101 ${ }^{40}$ | 34.2 30.8 | 4,065.40 | 33.9 |
| 15,000 | 6,010.35 | $40 \cdot$ | 5,964.85 | 39.8 | 5,925.85 | 39.5 |
| 20,000 25,000 | $9.594 \cdot 25$ $\times 3.53 \times 37$ | $4^{48 \cdot}$ | $9,541.75$ $\times 3,473.27$ | $47 \cdot 7$ 53 | $9,496 \cdot 75$ $\times 3,423.47$ | 47.5 53 |
| 25,000 | 34,281-37 | 68.6 | 34,223.27 | 68.4 | 34,173.47 | 68.3 |
| 100,000 | 75,78x-37 | 75.8 | 75,723.27 | $75^{\prime} 7$ | 75,673*47 | 75'7 |

If an unmarried person who has attained the age of 65 years has a total income of not more than 63.500 , the personal allowance is increased to EI, rio. Where a married man, or his wife living with him is aged 65 years or over, the personal allowance is increased to $£ x, 765$. If the income exceeds $£ 3,500$, the allowance is reduced by twothirds of the amount of the excess, but cannot be reduced below the level of the normal personal allowance (above). The benefit of this increased allowance ceases if the income of the single person exceeds $£ 3,912$ or that of the married couple exceeds $£ 4,205$.

Wife's Earned Income.-An allowance equal to the wife's earned income but not exceeding $£ 845$. This allowance is not granted in the year of marriage. (See "Husband and Wife", below.)

Children.-With effect from the year 1977/78 child allowances for income tax purposes are geared to Child Benefits payable under the Child Benefit Act 1975 and it is intended that the income tax allowances shall eventually be withdrawn. The current payments of Child Benefit are £I per week for the first or only child and $\mathcal{E}$ r. 50 for each other child. These sums are not chargeable to income tax and the child allowances for income tax, granted in respect of each child of the taxpayer living at any time in the year of assessment are (except as indicated below) increased by $£ 26$ where the child for whom the claim is made is a " first or only "child. The allowances for $1977 / 78$ are-

|  | First or only | Any other |
| :--- | :---: | :---: |
| child | child |  |

In each case the age is taken as at the beginning of the fiscal year. A parent living abroad who cannot claim the child benefit may claim the higher child allowances at the rates applicable to the year 1976/77. A similar claim is available where the child is undergoing full-time higher education and
the claimant cannot benefit from the reductions in parental contributions to the student grant. The 1976/77 allowances were-

$$
\begin{aligned}
& \text { Not over Ix years. . . . . . . . . . £ } 300 \\
& \text { Over is not over } 56 . . . . . . . . \text {. } £ 335 \\
& \text { Over } 16 \text { years................... } \AA_{365}
\end{aligned}
$$

The child allowance in respect of a child over the age of 16 years is available only where the child is receiving full-time instruction at university, college, school or other educational establishment or is undergoing full-time training for a trade, profession or vocation.
If $=$ child who is under the age of eighteen years and is unmarried at the end of the year of assessment has earned income not exceeding $£_{235}$, the full allowance will only be given if his investment income does not exceed £rrs. Scholarship or bursary does not count as income for this purpose. Marginal relief is given where a child's income exceeds $£_{350}$ or, when appropriate, the investment income exceeds £irs. The child relief will then be reduced by $\mathcal{E}_{\mathrm{I}}$ for each $\mathcal{L} \mathrm{I}$ by which the child's income exceeds the relevant limit. "Child" includes step-child and adopted child. Child allowance is due to the person who has the custody of and maintains the child. If more than one person could claim the allowance, e.g., if husband and wife are divorced or separated, the allowance, will be apportioned between them as necessary.
Life Insurance Premiums.-Relief is granted for premiums paid on policies of life assurance on the life of the taxpayer or that of his wife. In respect of policies taken out after June 22, 1956 relief is given equal to half the amount of the premium but if the total amount of the premiums paid in any year does not exceed $£ 20$, the relief is on £xo or the amount of the premiums, whichever is lower.
The premium on which relief is given may not exceed 7 per cent. of the sum assured and the total of the premiums on which relief is given may not exceed one-sixth of the total net income.

Dependent Relatives.-The maximum deduction for each dependent relative is normally $£ 100$ but an increased allowance of £I45 may be claimed where the claimant is a woman (other than married woman living with her husband). These allowances are reduced by £x for every £x by which the relative's own income (excluding voluntary allowances) exceeds the basic National Insurance Retirement Pension. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband or whose marriage has been dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided pro rata.

Daughter.-A person who by reason of his or his wife's old age or infirmity has to retain the services of a daughter resident with him or her is entitled to an allowance of $£ 55$.

Housekeeper or Person looking after children.An allowance to:
(a) Widows and Widowers: Housekeeper allowance of $£ 100$ in respect of housekeeper employed as such or female relative of his or hers or of the deceased spouse acting as housekeeper. These females must be resident.
(b) Unmarried man: Housekeeper allowance of £roo in respect of a female relative living with and maintained by him to look after brothers or sisters for whom he is entitled to. child allowance.
(c) If widow or widower entitled to the child aliowance, is also entitled to an allowance of £450. The relief is also available to a married man whose wife is totally incapacitated by physical or mental infirmity throughout the year. This relief cannot be claimed in addition to the housekeeper allowance of $£$ roo.

Blind Persons.-An allowance of £x8o less the amount of any tax-free disability payment recciv-
able may be claimed by a registered blind person provided that the Daughter's Allowance of $£ 55$ is not also claimed. Where both spouses are blind the maximum allowance is $\mathcal{C} 360$ less any tax-free disability receipts. The reliefs quoted are for a full year and must be scaled down where - person is registered as blind for only part of the year.

Husband and Wife.-The general rule is that the income of a married woman living with her husband is aggregated with his income for the purpose of charging it to tax. This does not, however, apply for the year of assessment in which the parties are married. For that year the husband will receive the personal allowance appropriate to a married man but the allowance will be reduced (for 1977/78) by $£ 37.50$ for each fiscal month which ended before the date of the marriage. The wife will be taxed for that year as if she were single and no "wife's earned income" relief will be granted. For subsequent years the income of husband and wife will be aggregated and if the husband does not satisfy the tax liability, the Revenue may require the wife to pay the tax appropriate to her income. For I year in which the incomes are aggregated, husband and wife may claim that they shall be assessed separately and the election will then have effect for all years until it is revoked. This election does not alter the total liability of the parties. But - joint election may also be made that the wife shall be assessed as a single person in respect of her earnings. Where such election is made, the husband will be assessed on his income and on his wife's investment income and will receive the personal allowance appropriate to single man. This latter election may be of advantage where the saving in higher rate tax on the wife's income is greater than the increased tax resulting from loss of the married allowance.

If in any year of assessment one of the parties to marriage is and the other is not resident in the U.K., they may be assessed as if they were not married. But this may not operate to increase the aggregate liability above what it would have been if they had been taxed $\quad$ married persons.

## CAPITAL GAINS TAX

Introduction.-Capital gains tax was introduced by the Finance Act, 1965, and has effect in respect of disposals of assets from April 6, 1965. A person is chargeable to capital gains tax in respect of chargeable gains which accrue to him in ■ year of assessment during any part of which he is resident in the United Kingdom, or during which he is ordinarily resident in the United Kingdom. A non-resident person is chargeable to capital gains tax in respect of chargeable gains which accrue to him in I year of assessment in which he is carrying on trade in the United Kingdom through a branch or agency.

Rate of Tax.-The tax is charged at the rate of 30 per cent. of the chargeable gains. If, however, the chargeable gains accruing to an individual in any one year do not exceed $\mathcal{L} 5,000$ his liability to capital gains tax on those gains may not exceed the additional income tax that would be payable if one half of the sums were added to his income with marginal relief if the sums do not greatly exceed $£ 5,000$. A company is charged to corporation tax on chargeable gains effectively at 30 per cent., but this is achieved by reducing the amount of chargeable gains to be included in a company's total profits for any accounting period by such fraction as Parliament may from time to time determine. Special rules apply to the calculation of the liability
to capital gains tax of investment trusts and unit trusts.

Amount chargeable.- Capital gains tax is chargeable on the total amount of chargeable gains which accrue to person in each year of assessment after deducting any allowable losses accruing to him in that year, and any unused losses from previous years. Capital gains tax chargeable in respect of the chargeable gains of married woman in a year of assessment or any part of year of assessment during which she is a married woman living with her husband, will be assessed and charged on the husband unless an election for separate assessment is made.

Disposal of Assets.-A disposal of assets occurs not only where assets are sold or exchanged but where there is a gift of assets and in the latter case, or in the case of any other disposal which is not at arm's length, the donor or other person making the disposal is deemed to do so for a consideration equal the market value of the asset at the time of the disposal and the person acquiring it is treated as doing so for the like consideration. There is also a disposal of assets where any capital sum is derived from assets as, for example, where compensation is received for loss or damage to an asset. A part disposal of an asset may also give rise to liability.

A disposal of assets in accordance with an unconditional contract is treated as occurring when
the contract is entered into and not when the asset is conveyed or transferred. The disposal arising from a receipt of compensation for loss or damage to an asset occurs when the compensation is received.

Valuation of Assets.-In general the actual amount received as consideration for the disposal of an asset will be the sum from which very limited expenses may be deducted for the purpose of computing the gain which will be the basis on which the liability to tax is calculated. In some cases, however, it is necessary to determine market value which is defined as the price which the asset might reasonably be expected to fetch on a sale in the open market. In the case of unquoted shares or securities, it is to be assumed that in the open market there is available to any prospective purchaser all the information which a prudent prospective purchaser of the shares or securities might reasonably require, if he were proposing to purchase them from willing vendor, by private treaty and at arm's length. This will usually be established by negotiation with the Shares Valuation Division of the Inland Revenue.

In the case of shares or securities where the market value is quoted in the Stock Exchange daily official list, will be:
(a) the lower of the two prices shown in the quotations for the shares or securities in the list on the relevant date plus one-quarter of the difference between those two figures; or
(b) half way between the highest and lowest prices at which bargains other than bargains done at special prices were recorded in the shares or securities for the relevant date.
The amount to be taken as the market value will be the lower of ( $a$ ) or (b) unless there are no bargains falling under (b), when the value ascertained under (a) will represent market value.

Partnerships.-Where two or more persons carrying on a trade or business in partnership dispose of an asset to an outside person, each of the partners will be treated as disposing of his fractional share of the asset. In practice there are special rules for dealing with the position where there is change in partnership profit-sharing ratios, or where assets of the partnership are revalued.

Assessments.-Assessments are made by the Inland Revenue in respect of chargeable gains accruing in - year of assessment and in general, an assessment must be made within six years after the end of the year of assessment in which the chargeable gain arises. Some extension of this time limit is available to the Revenue where fraud, wilful default or neglect has been committed by the taxpayer. Capital gains tax is due for payment on or before July 6 following the year of assessment or on the expiration of thirty days after the date of the issue of the notice of assessment whichever is the later. In very limited circumstances, the payment of capital gains tax may be postponed and where the proceeds of the disposal are payable by instalments, it may be possible to defer the payment of the tax if it can be shown that there is hardship to the taxpayer.
If capital gains tax is not paid by the due date, interest may be charged on the outstanding tax, the current rate being 9 per cent. per annum.
Appeals.-Where a taxpayer objects to an assessment to capital gains tax, he may give notice of appeal to the General or Special Commissioners. In most cases, however, the matter will be determined by agreement between the taxpayer and H.M. Inspector of Taxes.

Returns.-Every person is required by notice from H.M. Inspector of Taxes to deliver within a specified time $\quad$ return of his chargeable gains and must carry out this request, the chargeable gains being computed in accordance with the provisions of the Act. A married woman living with her husband can be required to make a return of her own chargeable gains, even if a claim for separate assessment is not made. It is usual for the return issued for income tax purposes to include an appropriate space so that the taxpayer can insert the amount of his chargeable gains for the year of assessment on that return.

General Exemptions.-There is a general exemption from liability to capital gains tax-
(a) where the consideration arising from all disposals made by an individual in any year of assessment does not exceed $\mathcal{£ x , 0 0 0}$, and
(b) where the value of gifts made by an individual does not exceed £100.
There are, however, number of other types of asset, the disposal of which will not give rise to chargeable gains or allowable losses and these include:
(a) private motor-cars;
(b) certain Government securities;
(c) National Savings Certificates, Premium Bonds, Defence Bonds and National Development Bonds;
(d) currency of any description acquired for personal expenditure outside the United Kingdom;
(e) Decorations awarded for valour;
(f) betting wins and pool, lottery or games prizes;
(g) compensation or damages for any wrong or injury suffered by an individual in his person or in his profession or vocation;
(h) life assurance and deferred annuity contract where the person making the disposal is the original beneficial owner;
(i) dwelling-houses and land enjoyed with the residence as its garden or grounds which is the owner's only or main residence;
(j) tangible movable property, the consideration for the disposal of which does not exceed £1,000;
(k) certain tangible movable property which is a wasting asset having a life not exceeding fifty years;
(l) assets transferred to charities and certain other bodies and works of art, historic buildings and other assets;
$(m)$ assets used to provide maintenance funds for historic buildings;
$(n)$ assets transferred to trustees for the benefit of employees.
Charities and superannuation funds are not charged to capital gains tax on disposals made by them.

Dwelling-houses.-Exemption will generally be available in the case of a gain which accrues to an individual and which is attributable to the disposal of or of an interest in a dwelling-house or part of dwelling-house which is or has at any time been his only or main residence in his period of ownership, or land which he has for his own occupation and enjoyment with that residence as its garden or grounds up to an area inclusive of the site of the dwelling-house of one acre, or such larger area as
the Commissioners concerned may decide on being satisfied that, regard being had to the size and character of the dwelling-house, the larger area is required for the reasonable enjoyment of it as a residence. The gain will not be I chargeable gain if the dwelling-house or part of a dwelling-house has been the individual's only or main residence throughout the period of ownership, or throughout the period of ownership except for all or any part of the last twelve months of that period. A proportionate part of the gain will be exempt if the dwelling-house has been the taxpayer's only or main residence for ownership. Certain periods of temporary absence may still count as periods during which the dwell-ing-house was the individual's only or main residence eligible for relief, but only if both before and after the period of absence there was a time when the dwelling-house was the individual's only or main residence. Relief will not be available if the acquisition of the dwelling-house or part of a dwelling-house was made wholly or partly for the purpose of realising a gain from the disposal of it.

Replacement of Business Assets.-A measure of deferment of the payment of capital gains tax may be obtained if the consideration which a person carrying on a trade obtains for the disposal of specified categories of assets used and used only for the purposes of the trade throughout the period of ownership, is applied by him in acquiring new assets which, on the acquisition, are taken into use and used only for the purposes of the trade. Relief will be available only if the acquisition of the new asset takes place within a period commencing twelve months before and ending three years after the disposal of the old assets, although the Board of Inland Revenue may exercise discretion to extend this period where the circumstances were such that it was impossible for the trader to acquire the new asset before the expiration of the time limit.

Disposals on death.-In the case of a death occurring after April 5 , 1969, no capital gains tax is chargeable on death. However, the legal personal representatives will be deemed to acquire assets from the deceased at the date of death by reference to the market value of them at that time. Where - person acquires an asset under a will or intestacy, no chargeable gain will accrue to the personal representative and the person taking the asset will be treated as having acquired it on the death of the deceased at its then market value.

Retirement Relief.-Where a person who has attained the age of 60 years disposes by way of sale or gift of the whole or part of $\quad$ business which he has owned throughout the period of ten years ending with the disposal, or disposes by way of sale or gift of shares or securities of $a$ company which has been a trading company and his family company during the ten-year period and of which he has been a fulltime working director throughout that period, he may claim to have deducted from the chargeable gains arising on the disposal, relief at the rate of $£ 4,000$ per annum up to a maximum of $£ 20,000$ if he has attained the age of 65 years at the time of disposal.
Computation of chargeable gains.-In arriving at the chargeable gain or allowable loss all the proceeds from the disposal must be taken into account except any that have been charged to income tax mincome or taken into account in computing income of the person making the disposal. The sums allowable as a deduction from the consideration for the disposal in computing the gain accruing to any person will be restricted to:
(a) the cost of the asset with incidental costs wholly and exclusively incurred in connection with the acquisition of the asset;
(b) expenditure wholly and exclusively incurred on the asset in enhancing its value, being expenditure reflected in the state or nature of the asset at the time of the disposal, and any expenditure wholly and exclusively incurred by him in establishing, preserving or defending his title to or a right over the asset, and
(c) the incidental costs of making the disposal.

Where there is a part disposal, the cost to be attributed to that part will be determined, having regard to the consideration for the part disposal and the market value of the property which remains undisposed of at that time.
Capital distributions hy Companies.-Where $\begin{aligned} & \text { - person }\end{aligned}$ receives or becomes entitled to receive in respect of shares in a company, any capital distribution from the company, he will be treated as if he had in consideration of that capital distribution disposed of an interest in the shares. A capital distribution is any distribution from - company, including a distribution in the course of dissolving or winding up the company, in money or money's worth, except a distribution which in the hands of the recipient constitutes income for the purposes of income tax. If, therefore, a company goes into liquidation and a shareholder receives from the liquidator - distribution of its assets, he will be regarded $\quad$ having disposed of an interest in his shares and, therefore, a potential liability to capital gains tax arises.

Reorganisation of Share Capital.-Where as a result of a reorganisation of the share capital of a company iperson receives shares or securities in exchange for his original holding, this will not be treated for capital gains tax purposes as involving a disposal which would give rise to a charge to tax. If, however, he receives cash for his original holding, he will be treated as if he had disposed of that holding or a part thereof, as the case may be, and therefore liability to tax will arise.
Assets held on April 6, 1965.-Capital gains tax is chargeable in respect of gains which accrue from April 6, 1965 , and, therefore, any gain which is attributable to an earlier period is to be excluded from the charge to tax. In general this is achieved by computing the overall gain from the time of acquisition to the time of disposal and then apportioning the gain on a time basis so that only that part which is attributable to the period subsequent to April 5, 1965, is liable to tax. There are some circumstances in which it is necessary to value the asset at April 6, 1965, instead of using the time apportionment method and where time apportionment can be used, the taxpayer has the option to elect to adopt market value at April 6, 1965 , instead of using time apportionment for the purpose of computing the chargeable gain. If he makes the election, he cannot subsequently revoke it. If he makes the election in respect of $\square$ part disposal, the election will hold good when there are subsequent part disposals of the asset.

Companies.-Although companies are charged to corporation tax on their chargeable gains, those gains are computed in the same manner as for individuals. The rate of corporation tax is, however, higher than that which is applicable to capital gains tax so that only a proportion of the chargeable gains of companies will be liable to corporation tax, which will in general result in the tax chargeable being the same as it would be in the case of an individual.

## CAPITAL TRANSFER TAX

Introduction.-Capital transfer tax is charged lifetime gifts and on assets which pass or are deemed to pass on death. The tax was introduced by the Finance Act, 1975, and was the subject of amending legislation in the Finance Act, 1976. In the case of lifetime gifts, the tax is chargeable where they are made after March 26, 1974, and in the case of deaths, the tax replaces estate duty where the death occurs on or after March 13, 1975 . Certain transfers are exempt from liability to capital transfer tax and certain property, notably that which is located outside the United Kingdom where the person beneficially entitled to it is domiciled abroad, is excluded from liability. Special rules apply to the determination of a person's domicile for capital transfer tax purposes.

Lifetime gifts, which attract liability to capital transfer tax may also give rise to liability to capital gains tax. The rates of capital transfer tax apply on graduated basis computed on the aggregate of the gifts and transfers both during lifetime and on death. The rates of tax which apply to transfers on death are higher than those which apply to lifetime gifts.
Lifetime Dispositions.-There will be liability to capital transfer tax on a chargeable transfer, being lifetime disposition after March 26, 1974, as a result of which the value of the estate of the individual making the transfer after the disposition is less than it would be if the disposition had not been made. The amount by which the value has fallen is the value transferred by the transfer and which will normally attract liability to tax. However, a disposition is not a transfer of value if it is shown that it was not intended to confer gratuitous benefit on any person and either that it was made in a transaction at arm's length between persons not connected with each other, or that it was such as might be expected to be made in a transaction at arm's length between unconnected persons.

Transfer on Death.-The tax is charged as if immediately before the death of an individual he had made itransfer of value and the value transferred by it had been equal to the value of his estate immediately before his death. For this purpose a person's estate is the aggregate of all the property to which he is beneficially entitled other than excluded property which, in general, is property situated outside the United Kingdom where the person beneficially entitled to it is an individual domiciled outside the United Kingdom.
Liability for Tax.-In the case of a lifetime disposition, the persons liable are:
(a) the transferor and the transferee;
(b) so far as the tax is attributable to the value of any property, any person in whom the property is vested, whether beneficially or otherwise at any time after the transfer, or who at any time is beneficially entitled to an interest in possession in the property;
(c) where the chargeable transfer results in any property becoming comprised in a settlement, any person for whose benefit any of the property or income from it is applied.
Where the chargeable transfer takes the form of settlement, the persons liable are:
(a) the trustees of the settlement;
(b) any person entitled, whether beneficially or not, to an interest in possession in the settled property;
(c) any person for whose benefit any of the settled property or income from it is applied at or after the time of the transfer;
(d) where the chargeable transfer is made during
the life of the settlor and the trustees are not for the time being resident in the United Kingdom, the person liable will be the settlor.
Where the chargeable transfer is deemed to have been made on the death of any person, those liable are usually the personal representatives of the deceased. In some circumstances, there can be a limitation on the liability of those from whom the tax can be demanded. Some lifetime gifts are not liable to tax because they are exempt transfers. In order to overcome administrative difficulties involved in identifying small gifts and charging tax thereon, it is provided that transfers of value by a transferor in any one year by outright gifts to any one person are exempt to the extent that the values transferred to that person do not exceed £yoo. Transfers of value by 1 transferor in any one year are exempt to the extent that the aggregate of the values transferred in that year do not exceed $£ 2,000$. A year for this purpose ends on April 5 . Where a person does not make gifts to the full extent of this latter exemption, any shortfall may be carried forward one year. A transfer of value is exempt where the following three conditions are satisfied:
(a) It was made as part of the normal expenditure of 1 transferor and
(b) taking one year with another, it was made out of his income, and
(c) after allowing for all transfers of value forming part of his normal expenditure, the transferor was left with sufficient income to maintain his usual standard of living.
Gifts in consideration of marriage are exempt if they comply with certain conditions. In the case of a gift by a parent of E party to the marriage, an exemption of $£ 5,000$ is available to that parent where the gift is an outright gift to a child of the transferor, or the transferor is the parent of either party to the marriage and either the gift is an outright gift to the other party to the marriage, or the property comprised in the gift is settled by the gift. In the case of gifts made in consideration of marriage by a grandparent or remoter ancestor, there will be exemption where the gifts do not exceed $£ 2,500$, and where it is shown that it is an outright gift to a descendant of the transferor or the transferor is an ancestor of either party to the marriage and either the gift is an outright gift to the other party to the marriage, or the property comprised in the gift is settled by the gift.

A gift by one party to the marriage to the other party is exempt to a maximum level of $£ 2,500$ if it is shown that the gift is an outright gift or the property comprised in the gift is settled by the gift. Gifts in consideration of marriage made by other persons are exempt to the extent that the gifts do not exceed £x,000.
Husband and Wife.-For capital transfer tax purposes, husband and wife are regarded as separate individuals and, therefore, lifetime gifts must be recorded separately for each spouse and the estate passing on death of each spouse will attract capital transfer tax. However, if husband and wife are both domiciled in the U.K. I lifetime gift from one spouse to the other will not attract liability to capital transfer tax nor will there be liability to the extent to which the estate of one spouse passes to the other on death. If, however, one is domiciled in the United Kingdom and the other is not, transfers between them will be exempt transfers only to the extent that the total does not exceed £ 55,000 .

Chavities.-Transfers of value are exempt to the extent that the values transferred are attributable
to property which is given to charity. Such gifts made within twelve months preceding the date of death or at the time of death are exempt up to a maximum of $£ x 00,000$ but otherwise, there is no limit on the amount of the exemption in the case of gifts to charities. A charity for this purpose is ? body of persons or trust established for charitable purposes only.

Political Parties.-Transfers of value to political parties are exempt subject to the limitations imposed in the case of charities.

National Interest.-A transfer of value is an exempt transfer to the extent that the value transferred is attributable to property which becomes the property of certain qualifying bodies, there being no limit on the value that can be transferred to them, either during lifetime or on death. These bodies include:
(a) The National Gallery;
(b) The British Museum;
(c) The Royal Scottish Museum;
(d) The National Museum of Wales;
(e) The Ulster Museum;
(f) Any university or university college in the United Kingdom.

Public Benefit.-Exemption for gifts applied for the "public benefit" is available subject to the satisfaction of certain conditions. It is necessary that the property shall become the property of a body not established or conducted for profit and is the subject of a direction issued by the Treasury.

Woodlands.-Where woodlands pass on death, they will normally attract liability to capital transfer tax. However, an election may be made in respect of land in the United Kingdom on which trees or underwood are growing and if certain conditions are satisfied, the value of the trees or underwood will be left out of account in determining the value transferred on death. The claim is, however, confined to the value of the trees or underwood and does not extend to the land on which they are growing. Liability to tax will, however, arise if and when the trees or underwood are sold.

Agricultural and Business Property.-In some circumstances the value of agricultural property can be discounted when computing liability to capital transfer tax thereon. Agricultural property for this purpose means agricultural land or pasture, including woodland if occupied with agricultural land or pasture, and where the occupation is ancillary to that of the agricultural land or pasture. There may also be included cottages, farm buildings and farmhouses, together with land occupied with them, which are of a character appropriate to the property. If the relief is given in respect of woodland under this provision, it will not be available separately for growing timber. Certain conditions must be satisfied if relief is to be available and there are limitations on the amount available for relief.

Business Property.-Where the whole or part of the value transferred by transfer of value is attributable to the value of relevant business property, the value transferred may be reduced by 30 per cent. This relief is available both in respect of lifetime gifts and in relation to transfers of value death. The reduction of 30 per cent. in the value of relevant business property is confined to:
(a) property consisting of a business or ma interest in a business;
(b) shares in or securities of a company which either by themselves or together with other such shares or securities owned by the transferor, gave the transferor control of the company immediately before the transfer;
(c) any land, building, machinery or plant which immediately before the transfer was used wholly or mainly for the purposes of I business carried on by company of which the transferor then had control, and
(d) any land, building, machinery or plant which immediately before the transfer was used wholly or mainly for the purposes of the business carried on by $I$ partnership of which the transferor was then a partner.

Valuations.-The general rule is that the value of property at any time will represent the price which the property might reasonably be expected to fetch if sold in the open market at that time, and the price cannot be reduced on the ground that the whole property is to be placed on the market at one and the same time. In some circumstances it is necessary to take into account related property. Property will be regarded as being related to the property comprised in a person's estate, for example, if it is comprised in the estate of his spouse. If the value of any property comprised in a person's estate would be less than the appropriate portion of the value of the aggregate of that and any related property, the value will represent the appropriate portion of the aggregate value. This can be of particular importance where it is necessary to value unquoted shares of company and where the holdings of the spouses taken together give control. Quoted shares and securities will normally be valued at the lower of the two prices shown in the quotations for the shares or securities in the Stock Exchange daily official list plus one-quarter of the difference between those two figures, or half-way between the highest and lowest prices at which bargains, other than bargains done at special prices, were recorded in the shares or securities for the relevant dates.

Rates of Capital Transfer Tax for transfers on death or within three years preceding death.-

| Portion of value |  | Rate of tax |
| :---: | :---: | :---: |
| Lower limit £ | Upper limit દ | Per cent. |
| - | 15,000 | Nil |
| 15,000 20,000 | 20,000 25,000 | 10 $\times 5$ |
| 25,000 | 30,000 | 20 |
| 30,000 | 40,000 | 25 |
| 40,000 | 50,000 60,000 | 30 35 |
| 50,000 60,000 | 60,000 80,000 | 35 40 |
| 80,000 | 100,000 | 45 |
| 100,000 | 120,000 | 50 |
| 120,000 150,000 | $\begin{aligned} & 150,000 \\ & 1000 \end{aligned}$ | 55 60 |
| 500,000 | 1,000,000 | 65 |
| x,000,000 | 2,000,000 | 70 |
| 2,000,000 | - | 75 |

For othey lifetime dispositions.-

| Portion of value |  | Rate of tax |
| :---: | :---: | :---: |
| Lower limit C | Upper limit $<$ | Per cent. |
| $\bigcirc$ | 15,000 | Nil |
| 15,000 | 20,000 | 5 |
| 20,000 | 25,000 | $7 \frac{1}{8}$ |
| 25,000 | 30,000 | 10 |

| 250,000 | 300,000 | 55 |
| 300,000 | 500,000 | 60 |
| 500,000 | 1,000,000 | 65 |
| 1,000,000 | 2,000,000 | 70 |
| 2,000,000 | - | 75 |

Setted Property. - There are special and complicated provisions which apply in relation to trust property.
Where - person is beneficially entitled to an interest in possession in settled property, he will be treated as beneficially entitled to the property in which the interest subsists, but where the interest comes to an end in whole or in part, possibly because of the death of the beneficiary, liability to capital transfer tax will usually arise.
In the case of a settlement where there is no interest in possession, liability to tax can arise if the trustees make a payment which is not income of any person for income tax purposes. In such a case periodic charge to capital transfer tax can also be made as if the trustees had made $I$ transfer of value equal to the value of the property comprised in the settlement. The charge will be made at 30 per cent. of the rate at which the tax would otherwise be chargeable on $I$ capital distribution. The periodic charge can be made at $x$-year intervals from the date of the transfer of value which established the settlement but no periodic charge may be made before April x, 1980 .
Administration.-Capital transfer tax is administered by the Board of Inland Revenue. In order that the Board may have appropriate information regarding transfers of value, the following persons
are required to deliver an account to the Revenue:
(a) The personal representatives of $\quad$ deceased person.
(b) Every person who is liable as transferor for tax on the value transferred by a chargeable transfer or would be so liable if tax were chargeable that transfer, and
(c) Every person who is liable as trustee of a settlement for tax on the value transferred by a transfer of value made after March 26, 1974, or would be so liable if tax were chargeable that value and
(d) Every person who is liable trustee of the settlement for tax on II capital distribution or would be so liable if tax were chargeable it.
The account to be delivered to the Board must specify details of the relevant property. Where the account is delivered by a personal representative, the relevant property comprises all property which forms part of the deceased's estate immediately before his death. Other persons must provide details of any property to the value of which capital transfer tax is or could be attributable.

The Board may require the following further information from any person who appears to the Board to be a transferor or to be liable for any of the tax chargeable on a transfer:
(a) the date of the transfer;
(b) the value transferred and the value of any property to which the value transferred is wholly or partly attributable;
(c) the transferor;
(d) the tax chargeable, if any, and the persons who are liable for the whole or part of it;
(e) the amount of any payment made in excess of the tax for which person is liable and the date from which and the rate at which tax on any repayment of tax overpaid carries interest;
(f) any other matters that appear to the Board to be relevant for the purposes of capital transfer tax.

Payment of Tax.-The general rule is that capital transfer tax on the value transferred by margeable transfer is due six months after the end of the month in which the chargeable transfer is made. If, however, the transfer is made after April 5 and before the following October I otherwise than on death, tax falls due on the following April 30 although there are certain exceptions to this general rule. In some circumstances, the tax may be paid by instalments.

## OTHER TAXES AND STAMP DUTIES

The Commissioners as a general rule allow deeds, etc., to be stamped after execution:-
Without Penalty, on Payment or Duty only.
Deeds and instruments not otherwise excepted, within 30 days of first execution.
Note.-Where wholly executed abroad, the period begins to run from the date of arrival here.
Penalties Enforceable on Stamping, тo DUTY:-
Instruments presented after the proper time (subject to special provisions in some cases and subject to the commissioner's power to mitigate) a penalty equal to the duty.

Agreemrnt for Lease, see Leases.
Agreement for Sale of Property-charged with ad val. duty as if an actual conveyance on sale with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (sees. 59 ( x ), Stamp Act $\mathbf{1 8 9 1}$ ). If ad val. duty is paid an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any ad val. duty and the Commissioners will upon application either place $\quad$ denoting stamp on such conveyance or transfer or will transfer the ad val. duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the ad val. duty paid.
Agreement under seal subject to exemptions Appointment of a new trustee or in exercise of ${ }^{[ }$power over property, not being by will; also on retirement of trustee, although no new trustee be appointed.
Assignment:
By way of sale-see Conveyance.
By way of gift-see Voluntary Disposition. Assurance-see Insurance Policies.
Bearer Instrument:
Inland bearer instrument, i.e. share warrant, stock certificate to bearer or any other instrument to bearer by which stock be transferred, issued by a company or body formed or established in U.K. Duty of an amount equal to three times the transfer duty (usually $£ 6 \%$ of the market value).
Overseas bearer instrument, i.e., such an instrument issued in G.B. by in company formed out of the U.K. Duty equal to twice the transfer duty (usually $£ .4 \%$ of the market value). Even if issued out of G.B. the instrument must be stamped before transfer in G.B. The issue or transfer of in bearer instrument relating to stock expressed in the currency of territory outside the Scheduled territories is exempt from duty.
Brll of sale, Absolute, see Conveyance on Sale.
Capital Duty.-Where $=$ chargeable transaction of a capital company takes place after July 3x, x973, duty of £ I is payable on every $£ 100$ or fraction of $£ 100$ of the actual value of the assets contributed by the members (as opposed to the previous duty of 50 p per Eroo of the nominal capital), provided the place of effective management of the company is in G.B. or its registered office is in G.B. but the place
of its effective management is outside the E.E.C. (Finance Act 1973).

A statement containing prescribed particulars must be delivered to the Commissioners within one month of the transaction unless there is an obligation under the Companies Act 1948 (e.g., on the formation of a limited liability company) or the Limited Partnerships Act xgo7 (e.8., on the registration of a limited partnership) to send a statement to the registrar of companies as $=$ result of the transaction.
Capital company includes a company incorporated with limited liability under U.K. law, limited partnership under the Limited Partnerships Act 1907, $\quad$ company incorporated according to the law of any other member of the E.E.C. and any other corporation or body of persons whose members have the right freely to dispose of their shares and whose liability for debts is limited.
Chargeable transaction includes the formation of ecapital company, an increase in its capital by the contribution of assets of any kind, the transfer to G.B. of its place of effective management from a country outside the E.E.C. if its registered office is in such a country, and the transfer to G.B. of its registered office from a country outside the E.E.C. if its place of effective management is in such a country.
Capital Transfer Tax
A new tax on the transmission of wealth, made by way of gift during a person's lifetime and on death, was introduced by the Finance Act 1975. It applies retrospectively to March 27, 1974, unless the donor died before March 13, 1975 (when Estate Duty or modified Estate Duty will apply).

Tax is charged at progressive rates on the cumulative totals of chargeable gifts made during a person's lifetime, with a final cumulation of the value of person's estate on his death. The rates of tax for lifetime transfers are those shown in Table I. For transfers on death, or within 3 years of death, the rates applicable are those in Table 2.

In calculating the value transferred on lifetime
Table:

| Value transferred |  | Rate of tax |
| :---: | :---: | :---: |
| Lower limit | Upper limit | Per cent. |
| - | 15,000 | Nil |
| 15,000 20,000 | 20,000 25,000 | 5 |
| 20,000 25,000 | 25,000 30,000 | - ${ }^{7 \frac{1}{2}}$ |
| 30,000 | 40,000 | z2e |
| 40,000 | 50,000 60,000 | 15 |
| 50,000 | 60,000 80,000 | ${ }^{17} 8$ |
| 80,000 | 100,000 | $22 \frac{1}{2}$ |
| 100,000 | 120,000 | $27 \frac{1}{2}$ |
| 120,000 | 150,000 | 35 |
| 150,000 200,000 | 200,000 250,000 | 422 |
| 250,000 | 300,000 | 55 |
| 300,000 | 500,000 | 60 |
| 500,000 | 1,000,000 | 65 |
| 1,000,000 2,000,000 | 2,000,000 | 70 75 |
|  |  |  |

Table -

| Value transferred |  | Rate of tax |
| :---: | :---: | :---: |
| Lower limit $\mathcal{L}$ | Upper limit £ | Per cent. |
| - | 15,000 | Nil |
| 15,000 | 20,000 | 10 |
| 20,000 | 25,000 | 15 |
| 25,000 | 30,000 | 20 |
| 30,000 | 40,000 | 25 |
| 40,000 50,000 | 50,000 60,000 | 30 35 |
| 60,000 | 80,000 | 40 |
| 80,000 | 100,000 | 45 |
| 100,000 | 120,000 | 50 |
| 120,000 | 150,000 | 55 |
| 150,000 | 500,000 |  |
| 500,000 $\times, 000,000$ | $1,000,000$ 2,000,000 | 65 70 |
| 8,000,000 2,000,000 | 2,000,000 | 70 75 |

gifts, the amount of tax paid by the donor on the gift must be taken into account. The value transferred on death is the value of the person's estate at his death.

Certain exemptions and reliefs are given, including:
(a) For lifecime transfers only:
(i) The first $£_{2,000}$ of gifts made in each tax year (April 6 to the following April 5) are exempt. Only the balance over $£ 2,000$ is taxable. There is provision for the carry forward of this relief for one year only, in so far as it has not been used in the previous year.
(ii) Gifts not exceeding £xoo to any one donee in the tax year are exempt. The excess only is taxable. This relief is in addition to the $£ z, 000$ relief.
(iii) Gifts which are normal expenditure out of income are exempt, provided the donor is left with sufficient income to maintain his standard of living.
(iv) Gifts in consideration of marriage are exempt up to $\mathcal{E}_{5}, 000$ if made by a parent; $f z, 500$ if made by a grandparent or some other lineal ancestor, or by one party to another; and $£ x, 000$ in any other case.
(v) Gifts of certain types of property, including works of art, are exempt if made to $\quad$ body not established or conducted for profit.
(b) For lifetime transfers and on death:
(i) Transfers between spouses are exempt to the extent that the gift increases the value of the donee spouse's estate.
(ii) Lifetime gifts to Charities and certain Political Parties are exempt without limit. If made on death or within one year of death, gifts are exempt up to £.100,000 only.
(iii) Gifts to listed heritage bodies, including National Gallery, British Mușeum, and Government Departments, are exempt.
(iv) Agricultural relief:

Provided certain conditions are satisfied, on a transfer of Agricultural land, the agricultural value is reduced to half. To satisfy the conditions, inter alia, the transferor must be a working farmer (as defined) and must have occupied the land for the purposes of Agriculture for two years up to the time of the transfer.
(v) There is also relief for business property in certain circumstances.
(c) For transfers on death only:

Conditional exemptions exist for works of art, timber and for death on active service.
Tax must be paid within months of the end of the month in which the chargeable event occurs unless the event is a lifetime transfer, made between April 5 and October $\quad$ in any year, when tax is due at the end of the next following April. In certain circumstances, tax may be payable by instalments.

Interest on unpaid tax runs from the date the tax is due, at $6 \%$ p.a. on death and $9 \%$ p.a. otherwise.
The transition from Estate Duty
The normal rules for Estate Duty apply for deaths up to November 12, 1974 (see post, p. $1 \times 89$ ). For deaths after that date and before March 13 , 1975, Estate Duty is levied, but at the rates given in Table = above, and, inter alia, transfers between spouses are totally exempt (and not limited to $\mathcal{F} 5,000$ ). No Capital Transfer Tax is payable on lifetime gifts where death occurs before March x $_{3}$, 1975.

For deaths after March 12, 1975, Capital Transfer Tax only, applies.
Contract, see Agreement.
CONTRACT NOTE for the sale or purchase of any stock or marketable security; where the value of the stock or marketable securityExceeds $£$ roo and does not exceed $£ 500 .$. " £500 " " " " £1,500.. 300

(Special adhesive stamps)
Option Contract Notes are chargeable with half the above rates only, unless the option is a double one.
Contract Note following a duly stamped option contract note chargeable with half the above rates only.
CONTRACT OR GRANT FOR PAyment Of a SUPERANNUATION ANNUITY: for every £io or fractional part of £.o.
Conveyance or Transfer on sale in the case of a Voluntary Disposition, see below, p. $1 \times 89$ ) of any property (except stock or marketable securitics for which, see above), where the Conveyance or Transfer contains a certificate of value certifying that the transaction does not form part of larger transaction or $\begin{gathered}\text { e series of transactions in }\end{gathered}$ respect of which the aggregate amount or value of the consideration exceeds $£ 55,000$.
 tion of $£ 50$ ) .............................. Exceeds $\mathfrak{£ 2 0 , 0 0 0}$ (for every $£ 50$ or fraction of $£ 50$ ).............................. Exceeds $£ 25,000$ (for every $£ 50$ or fraction of $£ 50$ ) . . ............................. Exceeds $\mathcal{L} 30,000$ (for every $\mathcal{£} 50$ or fraction of $£ 50$ )............................ If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of $£ \mathrm{x}$ for every $£_{50}$ or fraction of $£ 50$ will be payable whatever the amount of the consideration.
However, if the consideration does not exceed $£ 300$, and the instrument does not contain a certificate of value, then:
Where the consideration:
Does not exceed $£ 5 . \ldots \ldots . .$.
Exceeds $£ 5$ but does not exceed £roo, 20p per $f$ ro or part.
Exceeds $£ x 00$ but does not exceed $£ 300$, 40 p per $£ 20$ or part.

If in such a case the instrument is certified at $£ 20,000$ it is stamped at $25 \%$ of the above rates with a minimum of 50 ; if certified at $£ 25,000$ it is stamped at $50 \%$ of the above rates; if certified at $£ 30,000$ it is stamped at $75 \%$ of the above rates with a minimum of rop.
Conveyance or Transfer of any other kind .fixed duty
Included under this head are Transfers for nominal consideration within any of the following categories:
(a) Transfers vesting the property in trustees on the appointment of new trustee of $\equiv$ pre-existing trust, or on the retirement of a trustee.
(b) Transfers, where no beneficial interest in the property passes, (i) to mere nominee of the transferor; (ii) from ${ }^{\text {E }}$ mere nominee of the transferee; (iii) from one nominee to another nominee of the same beneficial owner.
(c) Transfer to residuary legatee of stock, etc., forming part of the residue divisible under a will.
(d) Transfers to a beneficiary under will of a specific legacy of stock, etc. (Note.-Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with ad valorem duty on the amount of the legacy so discharged.)
(e) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.
(f) Transfers to beneficiary under settlement on In distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.
(g) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.
(h) Transfers by the liquidator of company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on $\quad$ wind-ing-up.
The evidence necessary to establish that $\square$ transfer is liable to the fixed duty of 50 p should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) such a certificate should be signed by ( I ) both transferor and transferee or ( $z$ ) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of $\quad$ bank; in the last case when the bank or its official nominee is - party to the transfer, the certificate, instead of setting out the facts, may be to the effect that " the transfer is excepted from Section 74 of the Finance ( $1909-10$ ) Act igro." A certificate in other cases should be signed by a solicitor or other person (e.g., a bank acting as trustee or executor) having $\quad$ full knowledge of the facts.

Registering Officers will in any case in which a Marketing Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 50 p fixed duty is duly stamped.

COVENANT-For original creation and sale of any annuity, see Conveyance.
Separate Deed of, made on occasion of sale, but not being an instrument chargeable with ad valorem duty as a Conveyance: same duty as a Conveyance on sale, but not to exceed.

50p
Declaration of Trust, not being - Will or Settlement.

50p
Deed of any kind not charged under some
special head.................................... 50 p
Demise, see Lease.
DUPLICATE OR COUNTERPART
Same duty as original, but not to exceed. .

*If the term is indefinite the same duty is payable if the term did not exceed 7 years.

#### Abstract

Agreement for lease not exceeding 35 years, same at actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed $£ 30,000$ as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed Exp a year. $^{2}$

## Mortgages are exempt.

Power of ATrorney, etc., for receiving certain prize-money or wages
For the receipt of any money, or bili, or note, not exceeding $£$ oo, or of any periodical payments not exceeding £.ro annually$25 p$

For the receipt of dividends or interest of
any stock, if for one payment only..... ..... 5 p

Ditto in any other case ....................
Power of attorney of any other kind ..... 50p
Procuration, Deed, etc., of. ..... sop
Receipts for Salaries, Wages and Superannuation, and other like allowances are exempt.
Revocation of any Trust of Property not being a Will

Transfer of Stock and Shares by way of gift or sale-for each $\mathcal{L} 50$ or part of $£ 50$

Unit Trust Instrument-Any trust instrument of a unit trust scheme-For every

## $£$ roo, and also for any fractional part of £roo, of the amount or value of the property subject to the trusts created or recorded by the instrument. <br> 25p

Voluntary Disposition inter vivos:-
On any instrument being a voluntary disposition (inter vivos) of any property (except stock or marketable securitics, see ante, under Conveyance or Transfer) where the value of the property conveyed or transferred does not exceed $£ 15,000$.
nil
Exceeds $£ 15,000$ but does not exceed $\mathcal{£} 20,000$ for every $\mathcal{L} 50$ and fraction of $£ 50$

25p
Exceeds £zo,000 but does not exceed $£ 25,000$, for every $£ 50$ and fraction of 650

50p
Exceeds $\mathcal{C} 25,000$ but does not exceed $£_{30,000}$
for every $£ 50$ and fraction of $£ 50 \cdots \cdots$ 75p

The instrument must contain similar certificates of value as a Conveyance or Transfer on Sale (see p. 1187 ), with the substitution of the words "property conveyed or transferred" for the word "consideration."

If the value of the property does not exceed $£ 300$ the same graduated rates apply as under Conveyance or Transfer on Sale (except Stock or marketable securities).

## CONFEDERATION OF BRITISH INDUSTRY

2 I Tothill Street, London, S.W.I.

The Confederation of British Industry was founded in August 1965 to promote the prosperity of British industry and those elements of British business closely associated with it. It combines in a single, democratic and voluntary association the rôles previously played by the British Employers' Confederation, the Federation of British Industries and the National Association of British Manufacturers.
The C.B.I. is recognized nationally and internationally as the representative organization of the management side of industry for the United Kingdiom. It acts as national point of reference for all those who seek the views of industry and management and it advises the Government on all aspects of Government policy which affect the interests of industry and business, both at home and abroad.

Membership of the C.B.I. consists of more than ro,000 companies and over 200 trade associations and employers' organizations. In addition to these most of the nationalized industries are in membership as public sector members and thereby able to
work with the C.B.I. on problems that are the concern of all management.

The governing body of the C.B.I. is the Council, which meets monthly in London. It is assisted by some 30 expert standing committees which advise on the main aspects of policy. There is a C.B.I. Regional Council and seven C.B.I. offices in the administrative regions of England and offices and Councils covering Scotland, Wales and Northern Ireland. These Regional Councils send their representatives to the governing body. The C.B.I. is represented in more than roo centres overseas.

The C.B.I. provides its members with $\quad$ wide range of services and practical advice on economic, industrial relations, commercial, technical, social and export questions. The organization is financed by the subscriptions of its members. President, The Lord Watkinson, P.C., С..
Deputy President, H. B. Greenborough; C.B.E.
Vice-Presidents, Sir Michael Clapham, K.B.E., Sir
Ralph Bateman, K.B.E.
Director-General, J. Methven.
Secretary, E. M. Felgate.

On April 1,1976 , the total mileage of public roads in Great Britain, excluding green lanes, was 207,177 of which 157,809 were in England, 30,233 in Scotland and 19, 334 in Wales. Highway Authorities.-The powers and responsibilities of highway authorities in England and Wales are set out in the Highways Acts 1959-1971. They are concerned mainly with the construction, improvement and maintenance of highways. The Secretaries of State for Transport and for Wales are the highway authorities for the trunk roads in England and in Wales respectively. (Trunk roads constitute the national system of routes for through traffic and include most motorways.) Under the Local Government Act 1972, from April x, 1974, the new county councils are the highway authorities for all highways in England (outside Greater London) and Wales, other than trunk roads. However, the new district councils have a right to maintain unclassified urban roads, footpaths and bridleways and may under agency arrangements carry out other highway functions on behalf of the county councils. In Greater London the most important non-trunk roads are metropolitan roads, for which the Greater London Council is highway authority. The Common Council of the City of London and the London borough councils are highway authorities for all other non-trunk roads in their areas.
For Scotland there is separate legislation under which the Secretary of State for Scotland is the highway authority for trunk roads. The highway authorities for non-trunk public roads are the town councils of large burghs for all such roads and the town councils of small burghs for unclassified roads in their respective areas (under the Roads and Bridges (Scotland) Act 5878 ), and county councils for all other non-trunk public roads (under the Local Government (Scotland) Act 1889). Under the Local Government (Scotland) Bill the highway authorities for all non-trunk public roads would, after May 15,1975 , be the councils of the proposed new regions and island areas who will have general powers of delegation which will enable them, if they wish, to delegate road functions to district councils.

The system of grant-aiding local authority expenditure on highways has recently been revised. From April x, 1975, the GLC and all county councils in England and Wales became eligible for an annual grant towards their total transport expenditure. The grant, known as the transport supplementary grant, represents about one-third of Central Government's aid towards all local transport services; the remaining two-thirds is assisted through the rate support grant along with other rate-borne expenditure. For the financial year beginning April x, I977, local authorities in England and Wales received a total of $£ 255,000,000$ in transport supplementary grants.

## Motorways

The network in England and Wales is based on six main routes-London-Yorkshire (MI), LondonSouth Wales (M4). Birmingham-Bristol-Exeter (M5), Birmingham-Carlisle (M6), LondonFolkestone (Mzo) and Lancashire-Yorkshire (M62). Other motorways in use or under construction
include Mz Medway Towns, M3 LondonBasingstoke, Mi8 Rotherham-Goole, M40 Lon-don-Oxford, M53 Mid-Wirral, M56 North Cheshire, M73 Maryville, (M74)-Mollisburn (A80), $\mathrm{M}_{74}$ Draffen-Stonehouse (A74)-Glasgow, M9 Edinburgh-Stirling and Mgo Inverkeithing-Perth.

At the end of March 1976, r301. 8 miles of motorway were open to traffic in England and Wales and $124^{\circ} 9$ miles were under construction, with a further 270.0 miles in the firm programme.

Motor Vehicles.-The number of vehicles in Great Britain with current licences in 1976 totalled 17,815,000; cars 14,029,000; motor cycles, scooters and mopeds $x, 2 x 9,000$; public transport vehicles 113,000; goods vehicles 1,755,000; agricultural tractors 402,000 . There were 173,000 vehicles exempt from licensing.
Driving Tests.-The number of driving tests conducted in Great Britain in the year 1976 was x,882,725, of which 54.9 per cent. resulted in failure.
Expenditure on roads in Great Britain rose from £ $x, 042,500,000$ in $1973-74$ to about $£ \mathrm{I}, \mathrm{I} 49,500,000$ in 1974-75. The expenditure during 1974-75 may be broken down as follows: New Construction and Improvement, $\quad$ £687,000,000 (Trunk roads, $£_{336,000,000 ; ~ P r i n c i p a l ~ r o a d s, ~}^{£ 270,000,000 ;}$ Other roads, $£ 8 \mathrm{r}, 000,000$ ); Maintenance £292,000,000 (Trunk roads, £44,000,000; Principal roads, $£ 66,000,000 ;$ Other roads, $\mathcal{E}_{182,000,000 \text { ); }}$ Cleansing, Gritting and Snow-Clearing, $£_{52,000,000}$ Other roads, $£ 43,000,000$ ); Administration £xr8,000,000 (Non-trunk roads) £xio,000,000. In addition to the 1974-75 total of expenditure on roads, the cost of road lighting was $\mathcal{£} 60,000,000$, and of vehicle parks $\mathcal{E}_{5 \times, 000,000}$ (gross).

Expenditure on new construction and improvement of trunk roads in England during 1974-75 was $\mathcal{£} 285,000,000$. In Scotland and Wales, the figures were $£ 31,000,000$ and $£ 20,000,000$ respectively. Grants made to local highway authorities for the improvement of principal roads in the same financial year were: England, £101,000,000; Scotland, £24,000,000; Wales $£ 9,000,000$.

## Road Casualties

In 1976 there were 86 vehicles for every mile of road or one vehicle for every 20 yards. Eighteen road users were killed and 910 injured on an average day.

The British Rallways Board was set up, along with our other separate nationalized transport undertakings, by the terms of the Transport Act, 1962. This Act dissolved the British Transport Commission and shared its assets between the new bodies which assumed their responsibilities on January x, 1963. Under the Act the finances of the railways were reconstructed and previous restrictions were modified to give them greater commercial freedom than they had enjoyed in the past.
The Transport Act of 1968 reduced the railways' commencing debt from § $£, 562,000,000$ to $\mathcal{L}_{300,000,000 \text {. The Act also enabled the Secretary }}$ of State for the Environment to make grants for the maintenance of unremunerative passenger services.
The Railways Act of 1974 introduced a new system of financial support in accordance with EEC regulations and from January 1975 the Board's capital debt was reduced to $£ 250,000,000$ and their borrowing limit, including commencing debt, was increased to $\mathcal{K} 600,000,000$ extendible to $\mathrm{E} 900,000,000$.
The power to make grants for unremunerative passenger services is withdrawn. The Secretary of State is authorised to impose general obligations on the Board in respect of passenger services and is empowered to compensate the Board for providing adequate transport services. Aggregate compensation is limited to $£ 900,000,000$ extendable to £1,500,000,000, subject to Parliamentary approval.

For the purposes of management and operation the railways are divided into Regions. They cover the following areas:
x. London Midland Region-bounded by a line joining Carlisle, Oldham, Nottingham, Bedford; London, Banbury, Kidderminster, Aberystwyth.
2. Western Region-west of a line joining Yeovil, Westbury, Reading, London and the southern border of the L.M. Region.
3. Southern Region-south of a line joining Dorchester, Salisbury, London and the Thames.
4. Eastern Region-cast of a line joining London, Peterborough, Sheffield, Bradford and Carlisle.
5. Scottish Region-north of a line joining Carlisle and Berwick.
Staff:-On Dec. 31, 1976, British Rail employed a total staff of 182,695 , compared with 289,93 x on Dec. 31, 1975.

Financial Results, 1976. -The balance sheet for 1976 showed a deficit of $£ 29,900,000$, compared with I deficit of $£ 60,800,000$ for 1975 while the railway working profit (before taking interest charges or revenue from other activities into account) was $£ 100,000$, compared with - E $^{22,339,000}$ loss for the previous year.

| RATING |  |

At the end of 1976 , British Rail had' 28,700 miles of standard gauge lines and sidings in use, representing $1 x, x 89$ miles of route of which $2,32 x$ miles were electrified. Standard rail on main line has a weight of iro lbs. per yard. British Rail had 3,689 locomotives (diesel and diesel electric, 3,338 and electric, $32 x$ ); 3,367 diesel multiple-unit vehicles, 7,228 electric multiple-unit vehicles and 3,665 locomotive-hauled passenger carriages with a capacity of $1,082,2 \times 6$ seats or berths in 1976 . Loaded train miles run in passenger service totalled 202,372,000. 708,474,000 passenger journeys were made during the year, including 304,581,000 made by holders of season tickets. The average distance of each passenger journey on ordinary fare was 29.1 miles; and on season ticket, $x 7 \cdot x$ miles. Passenger stations in use in 1976 numbered 2,36 r and freight stations $5 \times 5$.
Freight.-There were 187,000 freight-vehicles and 5,262 other vehicles in the non-passengercarrying stock. 97,001,000 tonnes of coal and coke were carried in $9976,29,455,000$ tonnes of iron and steel and $42,580,000$ tonnes of other traffic. Loaded train miles run in freight service totalled 43,334,000.

Casualties in Train Accidents (includes British Railways, London Transport and other railways).

## ELECTRICITY SUPPLY

England and Wales
In the year ended March 31, 1977, the electricity industry sold 191,960 million units to all consumers, an increase of $\mathrm{I} \cdot 3$ per cent. over 1975-76. Average price per unit to consumers was 2.018 p compared with x.758p in 1975-76. At the end of the year there were $19,767,869$ consumers, $x \cdot 2$ per cent. more than at March 3x, 1976.
78,360 million units were supplied to industry (an increase of 6.8 per cent.), $7 \mathrm{x}, 766$ million to domestic users ( 4.4 per cent. less) and 32,246 million to commercial users ( $3^{\circ}$ I per cent. more), ${ }^{17,655}$ million units were sold on off-peak tariffs, a decrease of 9.4 per cent. over 1975-76.

On March 3x, 1977, the Central Electricity Generating Board had 137 power stations ( 1976,161 ) with a maximum output capacity of $56,365 \mathrm{MW}$, a decrease in capacity of 3.9 per cent. over 1976. In 1976/77 x, 1x8 MW of new plant was commissioned. C.E.G.B. power stations supplied 208,566 million kWh in $\mathbf{~ 9 9 7 6 - 7 7 , ~ I ' 9 ~ p e r ~ c e n t . ~ m o r e ~}$ than in 1975-76. Maximum simultaneous demand met during the year was $42,110 \mathrm{MW}$ (1975-76, 41,353).

Transmission lines in service at the end of the year totalled $54,59 \mathrm{r}$ circuit km . and distribution lines 585,216 circuit km .

The industry employed 160,873 persons at March 3x, 1977, 5,953 less than in 1975-76.

The following results are those of the Electricity Council and Boards in England and Wales, the tigures being rounded off.

## $\dagger$ April to March. <br> GAS SUPPLY

Town gas
Natural gas for direct supply
Total gas available

1975-76 1976-77 (Million Therms) $478 \cdot 3 \quad 129 \cdot 2$ $13,867 \cdot 3 \quad 14,6 \pm \times 6$
$14,345.6 \times 4,740 \cdot 8$
Consumption of coal for gas making fell from 16,004,000 tons in 1966-67 to 8,000 tons in 1976-77 and of oil from 3,725,000 tons to 92,000 tons.

In 1976-77, natural gas from fields in the North Sea accounted for 97 per cent. of gas supplied. Conversion of all gas consumers in Great Britain to natural gas was completed in the autumn of 1977.

## THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December ro, 1896, leaving a fortune of $\mathcal{£}, 750,000$. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology or Medicine; (d) Literature; (e) Peace. The first awards were made in 19or on the fifth anniversary of Nobel's death. The awarding authorities are the Royal Swedish Academy of Sciences: (a) Physics- (b) Chemistry; the Royal Caroline Institute, Stockholm- (c) Physiology or Medicine; the Swedish Academy-(d) Literature; a committee of five persons elected by the Norwegian Storting- (e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of five members and three deputy members. The Swedish Government appoints a chairman and - deputy chairman, the remaining members being appointed by the awarding authorities.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentina; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Jreland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia; (ff) Yugoslavia; (gg) Greece; (hh) Israel; (ii) Guatemala. The distribution by nationalities is shown at foot of table.

For prize winners for the years $1901-1965$, see earlier editions of Whitarer's Almanack.

Reduced rate: 40 p per kg .
Max. rate (bags up to 30 kg max).
Min. rate (bags up to 23 kg )
Exceptionally, newspapers, periodicals, books, pamphlets, maps and musical scores which comply with the conditions shown in the Post Office Guide under Printed Papers at Reduced Rates may be sent abroad by surface mail only at the postage rate of:

## Single packets

Not over 100 g , $\mathbf{2 3}$; not over 250 g , 24p; not over $500 \mathrm{~g}, 43 \mathrm{P}$; not over $1000 \mathrm{~g}, 72 \mathrm{p}$.
Posted in bulk - Direct Agents Bags.

## NEWSPAPERS

Inland (Newspapers " Registered at P.O."):-
Not over: $60 \mathrm{~g}, 7 \mathrm{p}$; $100 \mathrm{~g}, 9 \frac{1}{2} \mathrm{p} ; 150 \mathrm{~g}, \mathrm{x} 2 \mathrm{p} ; 200 \mathrm{~g}$, ${ }^{15 p} ; 250 \mathrm{~g}, 18 \frac{1}{2} \mathrm{p} ; 300 \mathrm{~g}, 22 \mathrm{p} ; 350 \mathrm{~g}, 25 \frac{1}{2} \mathrm{p} ; 400 \mathrm{~g}$, 29p; $450 \mathrm{~g}, 3 \mathbf{3 2}_{\frac{1}{2} \mathrm{p}}$; $500 \mathrm{~g}, 36 \mathrm{p} ; 750 \mathrm{~g}, 54 \mathrm{p}$.

Publications registered at the P.O. as newspapers will be given First Class service at the newspapers postage rate, but only if posted by publishers or their agents, and prominently marked Newspaper Post. All other newspapers are transmitted as first or second class letters. Limit of weight for second class items 750 g . Limit of size Letters.
Overseas: See printed papers.

## SMALL PACKETS (See also p. 2zor).

## Overseas:

Not exceeding 100 g, 15p; 250 g, 28p; 500 g, 50p; ₹ kg, 84p.
Limits: Maximum size, as for letters A and B ii. Minimum limits of size as for letters; Weight 1 kg in general but some countries only accept Small Packets weighing up to 500 g 。

## PARCELS

Should be marked "Parcel Post," and must be handed over the counter; postage must be prepaid by stamps, affixed by the sender.

Posters of over 2,500 parcels per annum may sign contracts to which special conditions apply.

The name and address of sender should be inside and (not too prominent) on the outside of every parcel and preferably be to the left of and at right angles to the name and address of the addressee.
A rural postman will accept any packets he can conveniently carry, except overseas letters intended for insurance or any parcels for abroad; but if on foot or cycle not more, without notice, than 10 kg from one person. Maildrivers need not accept between regular stopping points.
Parcels to or from Irish Republic, Channel Is. or L. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay a clearance fee if any duty be payable. Senders can undertake to pay customs charges of Irish Republic, Channel Islands and mim overseas countries (a deposit is required).

Inland:-(Limit of size: length, x•070 m.; length and girth combined, $\quad$ m.):-

| U.K. and Irish Republic:- |  |  |
| :---: | :---: | :---: |
| Not | National | Area |
| over |  |  |
| 1 kg | 66 p | 56 p |
| 2 kg | 86 p | 76 p |
| 3 kg | 106 p | 96 p |
| 4 kg | $116 g$ | $105 p$ |
| 5 kg | 126 p | 115 p |
| 6 kg | 136 p | 125 p |
| 7 kg | 146 p | 135 p |
| 8 kg | 151 p | 140 p |
| 9 kg | 156 p | 145 p |
| 10 kg | 161 p | 150 p |

## Air Mail Services

## For mode of packing, prohibitions, limits of size, \&c., see Post Office Guide

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe, for which no special air mail marking is required. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet $\mathrm{PL}(\mathrm{B})_{3216}$ )

AIR LETTER FORMS, postage $10 \frac{1}{2} p$ and 1 ip, may be sent to all countries. Enclosures are not permitted. You may get the special forms at post offices or use privately-manufactured forms which bear a statement that they have been approved by the Post Office, with the approval number. Unapproved forms will be treated - ordinary air mail letters.
Printed Papers. Small Packets and Newspapers may be sent by air to countries outside Europe at the rates shown in col. 3 below. Newspapers: Publications registered at the P.O. as newspapers may be sent at the reduced rates indicated in col. 4
below. There is no air mail service to Europe for these items. If the quickest transmission is desired the letter post rate should be paid.

## European Countries (and The Azores)

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offer; earlier delivery. The rates are:-

Letters-Not over 20 g . $10 \frac{1}{2} \mathrm{p} ; 50 \mathrm{~g} . \mathrm{x9p} ; 100 \mathrm{~g}$. 25p; 250 g. $50 \mathrm{p} ; 500$ g. 97 p ; 1000 g. 168 p ; 2000 g. 273p.
Postcards, 8p.
Air mail labels are not necessary.
Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1206-9.

## Countries Outside Europe

Rates for letters, postcards and printed papers etc. appear below; for air parcel rates see pp. 1206-9.

COUNTRIES OUTSIDE EUROPE
For air mail services to Europe, see above; Air Parcel Rates, pp. 1206-9.

POST OFFICE FINANCIAL RESULTS

[^40]
## GENERAL REGULATIONS

Export Restrictions.-Under Department of Trade and Industry regulations the exportation of some goods by post is prohibited except under Department of Trade licence. Enquiries in the matter should be addressed to the Export Data Branch, Export Services and Promotions Division, Department of Trade and Industry, Export House, 50 Ludgate Hill, London, $\mathrm{EC}_{4} \mathrm{M}_{7} \mathrm{HU}$.

Prohibited Articles.-Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement.

Certipicate of Posting.-For non C.F. parcels the fee is xp each (maximum rop). May also be obtained for unregistered letters and unregistered postal packets (fee ip).

Recorded Delivery (inland, not to Irish Republic). Charge: 9 p .-This service provides for record of posting and delivery. Advice of delivery, - further $12 \frac{1}{2} \mathrm{p}$ at time of posting, 25 p after time of posting. Money and jeweilery are not allowed, The service does not apply to parcels, railex or railway letters. Ask at the post office for full details.

UNPaID Packets, are charged double postage on delivery; Underpaid Packets, double the deficiency.

Undelivered Postal Packets.-Undelivered postal packets are returned to the sender without charge provided the return address is indicated either on the outside of the envelope or inside. If the sender's address is not available, items not containing property are destroyed; however, if the packet contains something of intrinsic value, it is retained for up to three months pending reclaim before being disposed of. Perishable items within this category are dealt with as requisite. Exceptionally, items in the minimum weight step on which a rebate of postage has been allowed are destroyed unopened unless there is $\begin{aligned} & \text { return address }\end{aligned}$ shown on the outside of the cover. In addition, undeliverable second class mail in the minimum weight step, which, upon opening, is found to consist only of newspapers, magazines or commercial advertising material is also destroyed. (These rules are currently under revision: for the up-to-date position, consult the nearest post office.) British packets undelivered abroad; instructions for disposal are required if parcel is undeliverable and must be given at the time of posting.

Reply Coupons, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum surface mail letter rate from the country concerned to the U.K. International Reply Coupons (valid in most countries) 25p. Sold at chief offices.
poste Restante (solely for the convenience of travellers, and for three months only in any one town).-A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante " or " to be called for " in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper person. Redirection from a Poste Restante is not undertaken for more than x month unless longer (up to 3 months) is applied for. Letters at seaport for $\quad$ expected ship are kept 2 months; otherwise letters are kept for 2 weeks-or for $x$ month if originating from abroad-at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

Redirection.-( x ) By agent of addressec: Packets other than parcels, business reply and Freepost items may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. Parcels may be redirected free of charge within the same time limits, only if the original and the substituted address are both within the same local parcel delivery area (or within the London Postal Area). Registered packets, which must be taken to $\quad$ Post Office, are re-registered free only up to day after delivery. (z) By the Post Office: Requests for redirection of letters, etc., should be on printed forms, obtainable from any post office, and must be signed by the person to whom the letters are to be addressed. The fees for redirection are as follows:redirection for period not exceeding a month, commencing before the first anniversary of redirection $£ \mathrm{Ex} \cdot 25$; redirection for a period not exceeding 3 months, commencing before the first anniversary of redirection $£ .3 .00$; redirection for a period not exceeding I year, commencing before the first anniversary of redirection $£ 7 \cdot 50$; redirection for I period not exceeding I year, commencing on or after the first anniversary of redirection $£^{2} 5^{\circ} 0$. A fee is payable for each different surname on the application form. Additional postage is generally due on redirected parcels (see above). Separate forms must be filled in for the forwarding of telegrams.

Registration, Inland (First Class letters only). All packets intended for registration should be marked "Registered " in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. The packets must be made up in reasonably strong cover appropriate to their contents. Packets and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, etc. Minimum fee: 60 p , exclusive of postage. Advice of delivery, a further $12 \frac{1}{2} p$ at time of posting, 25 p after time of posting. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any letter packet apparently meant for registration and wrongly posted (minimum fee less any prepaid excess postage); (b) letter packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, etc., in each case $£ 2$ or more in value. Ask at the post office for full details.

COMPEnsation, Ins.and.-Subject to certain prescribed regulations which are set out in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters, (ii) though not as $\|$ legal right, for loss of or damage to recorded delivery packets, parcels on which a compensation fee has been paid and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. Registered letters (including items sent to the Irish Republic and the Channel Islands): The fees for registration are: 60 p covering compensation up to $£ 200 ; 65 \mathrm{P}, £ 400 ; 70 \mathrm{p}, £ 600$ (maximum). (No legal right to compensation exists in respect of
registered letters sent to and from Irish Republic or the Channel Islands.) Compensation Fee (C.F.) parcels, fees: 12 p for compensation up to $\mathcal{£ I O}$; 5 P up to $£ 50 ; 25$; up to $£ \mathbf{x 0 0} ; 40 \mathrm{p}$ up to $£ 200$. Recorded delivery packets: maximum compensation $£_{2}$ provided no contents inadmissible. Fee 9p. Unregistered packets conveyed by Express Messenger all the way: Maximum compensation $£ 5$.
Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by registered letter post in one of the special envelopes sold officially and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, will not exceed $£ 5$ except in $\quad$ case where the value of each coin exceeds its face value, i.e. numismatic coins. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care". No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic, whether registered or not.
Registration, Overseas (except for parcels and printed paper items posted in bulk), is in force to all countries with the exception of Chagos Islands, British Indian Ocean Territory, Republic of Maldives or North Vietnam. No compensation is payable for the loss of or damage to valuable articles or other items sent in an unregistered letter. Fee 6op. If claimed within $\quad$ year compensation is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions. Compensation is also payable for the partial or complete loss of or damage to the contents of registered items in the service with certain countries (see Post Office Guide for list).
Insurance, OVERSEAS, may be effected on packets to many countries at the following rates:7op for up to £ xoo cover; rop for each additional $\mathcal{L} 50$ up to $\mathcal{E} \mathrm{I} \cdot 70$ for $\mathcal{L} 600$. For H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses (e.g., British Forces Post Office followed by a number) only parcels are insurable, up to £1oo. Fee 7op. Packets containing valuable papers, (banknotes, etc.), documents (press, etc.) and, in some cases, valuable articles such as jewellery, can be insured as letters, or as parcels if the country of origin does not accept durable goods in the letter post.
The Post Office Guide should be consulted for details of the conditions of Insurance.

COMPENSATION up to maximum of $£ 8.20$ may be given for loss or damage in the U.K. to uninsured parcels to or from most overseas countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

Cash on Delivery Service, Inland (not to or from Irish Republic, nor to H.M. Ships).-A sum (Trade Charge) up to £xoo can, under certain conditions, be collected from addresses and remitted to sender of a parcel or registered letter packet posted at a Money Order Office. Fee (extra to normal postage and registration charges): 50p.

Cash on Delivery, overseas.-Applicable to parcels only, but not all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. A fee of £r 20 per parcel must be prepaid in addition to the postage. The Trade Charge
(amount to be collected) may not exceed £50, but to some countries the limit is lower. Addressee has also to pay on delivery, besides Customs, if any further fee (25p in U.K.) not prepayable. If Trade Charge cannot be collected, special rules for undeliverable C.O.D. parcels apply.
Express and Special Services (Inland).In general the express service are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. (I) All the way, by P.O. messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 50 p per mile, or part of a mile, with 4 p on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. (z) After transmission by post, on addressee's application ( 50 p per mile, or part of a mile, and $2 \frac{1}{2} p$ for every ten or less additional packets). (3) After transmission by post, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available ( $60 \mathrm{p} .+$ postage). This service is restricted to First Class letters and to parcels. Packets must be marked "Special Delivery," and letters bear a broad blue or black vertical line back and front. A similar line must be drawn completely round a packet or parcel. (4) Special delivery on Sunday of postal packets (except parcels) handed in on Saturdays. Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available only: ( x ) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (z) Good Friday: to London only from towns in ( I ). Delivery is made from offices only during periods when they are open for telegraphic business. The handing-in offices in London are:-The London Chief Office, King Edward St., London ECIA IAA, W. and S.W. District Offices, and Camberwell Green, Clapham Common, Hammersmith, Holloway, Trafalgar Sq., Stratford, and Swiss Cottage (Branch Offices). Packets marked "Express: Sunday Delivery," must be handed in in time to catch Saturday mails (in London $11.45 \mathrm{a} . \mathrm{m}$.-r p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office for posting. Fee is $£_{\mathrm{I}} \cdot 50$ in addition to postage. Not available for parcels. (5) (Railex.) Postal packets which cannot be registered are despatched by rail, met, and specially delivered in Great Britain, Northern Ireland (Belfast, Larne and Londonderry only). Inclusive charges irrespective of weight but not exceeding 450 g . £4, but packets handed in in Northern Ireland for destinations in Great Britain or Northern Ireland may not exceed 60 g . (6) A Railway Parcel is similarly accelerated at the cost of a telegram, of railway charges, and of Service ( $x$ ) at both ends of its journey. It should be marked "Railway Parcel, to be handed to Post Office messenger at. .Station."
Railway Letters, \&C.-A First Class letter, not liable to registration, may be handed in at the parcel or passenger booking office of a railway station of British Rail and certain other minor railway companies, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at I station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage) are charged by British Rail or the minor railway companies on which railway letters travel.

Enquiries about these fees should be made at the station at which railway letters are handed in. For other combinations of rail and express, see preceding paragraph, Services (5) and (6).

AIRWAY Letters.-On certain internal air routes operated by the British Airways (European Division), First Class letters may be handed in at certain Airport offices for conveyance by the next available direct air service to be transferred to the post at the distant airport or town terminal or to be called for at the airport or town terminal. Fee besides postage) fi plus VAT, maximum weight $45^{\circ}$ g. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. This service is not available to the Irish Republic, Isle of Man or to any country overseas. Full information can be obtained from any office of British Airways (European Division).

International Express Service.-From the office of delivery by special messenger is available to or from certain countries. In some countries the service is restricted to certain towns. 6op is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P.O. Guide.)

Datapost.-This service offers door-to-door overnight service to most parts of the country on a contract basis. Charges are negotiated with individual customers and reffect the services performed. Head Postmasters will provide full information on request.
This service is also available to the U.S.A., Brazil, Belgium, France, Japan, the Netherlands and Hong Kong, Australia, Argentina and Kuwait.

Business Reply and Freepost (Inland, excluding Irish Republic).-These services enable a person or firm to receive replies to advertisements, letters from clients, etc. without prepayment of postage, the addressee paying the postage together with I handling charge of $\frac{1}{2} p$ per item delivered. A licence costing £ 15 p.a. must be obtained to use either service and these are available from Head Postmasters who will also provide any further information required.

Postage Forward Parcel Service.-This service enables a person or firm to receive parcels from clients without prepayment of postage, the addressee pays a fee of 6 p on each parcel in addition to postage. A special label is used for this service. A licence costing $£ 15$ p.a., to use the service must first be obtained from the local Head Postmaster.

Articles for the Blind (Inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Postage free.

Blind Literature, Overseas (in other respects treated as Printed Papers):-Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind (Cécogrammes) ", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

Small Packets Post (Overseas). -For the transmission of goods (including trade samples) in the same mails as Printed Papers up to 1 kg . Registration is allowed; not insurance. Available to all countries, but to some countries there is limit of 500 g . A customs declaration is required.

NEWSPAPER POST (INLAND).-For newspapers "registered at the P.O." (p. I995).
Copies of registered newspapers may be posted by the publishers or their agents in wrappers open at both ends, in unsealed envelopes approved by the Post Office for the purpose or without covers and tied with string which can be removed without cutting. Wrappers and envelopes must be prominently marked Newsfaper Post in the top left-hand corner and be easily removable for the purpose of examination. No writing or additional printting is permitted, other than the words "with compliments", name and address of sender, request for return if undeliverable and a reference to a page.
Newspapers posted by the public or supplements to registered newspapers despatched apart from their ordinary publications are transmitted under the conditions governing the First or Second Class Letter Services.

STAMPS, ENVELOPES, POSTCARDS, \&C.
£sd stamps are no longer valid for postage.
PoSTAGE STAMPS (used also for receipts, telegrams and certain Inland Revenue duties) are sold for the respective values of $\frac{1}{2} p, 1 p, 2 \mathrm{p}, 3 \mathrm{p}, 5 \mathrm{p}, 6 \frac{1}{2} \mathrm{p}$, $7 \mathrm{p}, 7 \frac{1}{2} \mathrm{p}, 8 \mathrm{p}, 8 \frac{1}{2} \mathrm{p}, 9 \mathrm{p} .9 \frac{1}{2} \mathrm{p}, 10 \mathrm{p}, 10 \frac{1}{2} \mathrm{p}, 11 \mathrm{p}, 20 \mathrm{p}, 50 \mathrm{p}$, $\mathcal{L}$ I, $£ z$ and $£ 5$. Books containing 2 at $\frac{1}{2} p, 3$ at Ip, r at 6 p, rop; also 2 at $\mathrm{mp}, 3$ at $\eta \mathrm{p}, 3$ at $9 \mathrm{p}, 50 \mathrm{p}$; rolls of 7 p and 9 p stamps are sold. There are also mixed value rolls made up of strips of to at $7 \mathrm{p}, 7 \mathrm{op}$; 10 at $9 \mathrm{p}, 9 \mathrm{p} .6 \mathrm{p}, 2 \mathrm{p}, 1 \mathrm{p}, \frac{1}{2} \mathrm{p}, \frac{1}{2} \mathrm{p}$ ( Iop ).

Registered Letter Envelopes printed with 69 p stamp ( 6 op for registration and $9 p$ for postage) are of three sizes: G, $156 \mathrm{~mm} \times 95 \mathrm{~mm}, 73 \mathrm{p} \mathrm{each}$; $\mathrm{H}, 203 \mathrm{~mm} \times 120 \mathrm{~mm}, 74 \mathrm{P}$ each; K, $292 \mathrm{~mm} \times 152$ $\mathrm{mm}, 78 \mathrm{p}$ each.

Forces Air Letter Forms issued against purchase of 7 p stamp.

Letter Cards printed with 7p stamp, op each; 9p stamp, $1 \mathrm{I}_{2}^{\frac{1}{2} \mathrm{p}}$ each.
POSTCARDS printed with $9 p$ stamp, Io $\frac{1}{\mathrm{p} p}$ each.
ENVELOPES printed with 7 p stamp: Size is ( 146 $\mathrm{mm} \times 95 \mathrm{~mm}) 9 \frac{1}{2} \mathrm{p}$ each; Size $2(235 \mathrm{~mm} \times 120 \mathrm{~mm})$ nop each. With $9 p$ stamp; Size I ( $146 \mathrm{~mm} \times 95$ mm ) $1 \frac{1}{2} \mathrm{p}$ each; Size $2(235 \mathrm{~mm} \times 120 \mathrm{~mm}$ ) 12 p each.

Air Letter Forms printed with $10 \frac{1}{2} p$ or 1 xp stamp, $10 \frac{1}{2} p$ and IIp each.

Printed postage stamps cut out of envelopes, postcards, lettercards, air letter forms or newspaperwrappers may be use. as adhesive stamps in payment of postage or ielegrams provided they are not imperfect, mutilated or defaced in any way.

## MONEY ORDERS

There is no Inland Ordinary Money Order Service. Overseas Service. Advice of Payment: $7 \frac{1}{2} \mathrm{p}$ (to certain countries). Payment may be stopped (fee $7 \frac{1}{2} \mathrm{p}$ ).
Inland Telegraph Money Orders (and to Irish Republic, Channel Islands and Isle of Man).

Money may be transmitted by this means from most offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day, Boxing Day and Good Friday special arrangements apply (see Post Office Guide).

The fee is $£ 3$ per order (maximum value $£$ roo) plus cost of official Tclegram of Advice, $£ x \cdot 40$ minimum for Inland Orders (including orders to Channel Islands and Isle of Man) and £ $\times 50$ minimum for Irish Republic Orders and where applicable the charge for any private message sent with the order, 7 p per word. (All charges for telegrams are subject to Value Added Tax in addition to the charges shown above).
Ordinary Money Orders for Abroad
The fee is $£ 3$ per order. Limits of amount of
each order vary according to destination but in any case may not exceed $£ 50$; validity varies between one and twelve months (see Post Office Guide). Telegraph Money Orders for Abroad
The fee is $£ 3$ per order, plus cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries).

Application to remit money orders to countries outside the Scheduled Territories (formerly known the Sterling Area) must be made on a special declaration form upon which the purpose of the remittance must be stated. This form is obtainable at any money order office, where it may be ascertained whether any particular country with which a money order service is in operation is outside the Scheduled Territories.

## POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and/or paid in many countries within the Commonwealth and in a few other countries. Transmission of postal orders to overseas countries is restricted under Exchange Control Regulations and is prohibited to any country outside the British Postal Order Area, except to members of H.M. Forces under special arrangements (particulars of Exchange Control restrictions may be obtained at any post office transacting Postal Order business). British postal orders are paid and issued in the Channel Islands and the Isle of Man, and paid in the Irish Republic. They are printed with $\quad$ counterfoil, for rop and every multiple of $2 \frac{1}{2} p$ up to 25 p, then $30 p$ and every multiple of $5 p$ up to $£ x$, then in $£$ steps to $£$ ro. Adhesive unmarked current British Postage Stamps not exceeding two in number, if affixed in the space provided, may increase the value of the order by not more than $4 \frac{1}{2} \mathrm{p}$. Fees rop up to $£ \mathrm{x}, 8 \mathrm{p} ; £_{2}, £ 3$, $£_{4}, £_{5}, \mathcal{L}, £ 7, £ 8, £^{\circ}$, or $£_{10}$, rop. The name of the payee must be inserted. If not presented within six months of the last day of the month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster to ascertain whether the order may still be paid.

## INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone or telex at all times. All charges for telegrams are subject to Value Added Tax in addition to the charges shown below. Rate, 7op per telegram, plus 7p for each word. (To Irish Republic 8op per telegram plus 7 p for each word.) Greetings telegrams on appropriately designed forms in special envelopes cost the rate of an ordinary telegram plus a surcharge of 4op. Greetings telegrams may be tendered by telephone or handed in in advance for delivery on a specified day. On Mondays to Fridays, if the Greetings telegram is handed in at any time before noon of the day before delivery is required, the surcharge is reduced to 2op. (Greetings service not available to and from Irish Republic.)

> Overnight Telegram

An Overnight telegram may be tendered between a.m. and $\mathbf{z 0 . 3 0} \mathrm{p} . \mathrm{m}$. for delivery, normally by first post, the following morning. On days when there is no postal delivery, Overnight telegrams are held until the next postal delivery. The charge is 50 p per telegram plus 4 p for each word. The Overnight service is not available to the Irish Republic. A redirection charge of £r:40
per telegram is made if the original and new addresses are in the same delivery area or London Postal District. Overnight telegrams are normally redirected by post free of charge. In all other cases the redirection charge is at the ordinary inland rate. In England, Wales and Northern Ireland a telegram tendered on Sundays, Good Friday and Christmas Day is charged 45p extra; in Scotland this surcharge applies to a telegram tendered on Sundays and on New Year's Day. Replies may be prepaid within the limits of $70 p$ (minimum) and $\mathrm{E}_{3} \mathrm{SO}^{\circ}$ (maximum), Irish Republic 70p (minimum) and $£ 3.60$ (maximum); the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph, telex or telephone account rendered by the Post Office, or its value refunded to sender, the addressee or person applying on behalf of the sender of the original telegram, on completion of the declaration on the back of the voucher. Receipt for charges on telegrams accepted at post office counters free on request. Certified copy 45 p ; application to the local Head Postmaster must be within 3 months of the date of sending. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within $\quad$ mile of the delivery office; beyond that any necessary charge will be collected on delivery.
Telegraph office always open in London: Trafalgar Sq., 24-28 William IV Street, WC2N 4DL.

## INTERNATIONAL TELEGRAMS

The per word charges for ordinary or Full Rate telegrams from the United Kingdom to places abroad are shown on pp. 1205-8. Urgent Telegrams may be sent to many countries at double the ordinary per word rates.

For telegrams of = social character the GLT (Commonwealth Social Telegram) service at half the ordinary per word rates is available to most Commonwealth countries. The service indicator GLT will be counted as chargeable word.

Letter telegrams to certain countries are admitted at half the ordinary per word rates for messages in plain language of lengthy though less urgent character for which the minimum charge is as for 22 words including the indicator LT. Full particulars as to which countries this facility is available can be obtained from any Post Office or International Telegraph Office.

In addition to these per word charges, the following fixed charges per telegram apply, irrespective of destination.
LT............op

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in facsimile to many places in the world. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Post Office or International Telegraph Office.

## RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any Postal Telegraph Office or dictated over the telephone. The charge for radiotelegrams is $15 p$ per word (standard rate). Radiotelegrams at the standard rate should be addressed Portishead Radio unless the sender nominates another coast station. The address should contain ( $x$ ) the name or rank of the addressee, ( 2 ) the name of the ship and (3) the name of the coast station in the British Isles if the

$$
\begin{aligned}
& \text { Ordinary. . . . . 7op } \\
& \text { Urgent. ... £ \& } 140 \\
& \text { GLT...........70p }
\end{aligned}
$$

sender knows that the ship is within range of that station.

The charge for messages to H.M. Ships is rop word. The address should contain ( 1 ) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine "), (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio".

In addition to the per word charges quoted fixed charge of $70 p$ per radiotelegram applies. There is a surcharge of 45 p for radiotelegrams tendered on Sundays, Good Friday and Christmas Day. In Scotland, this surcharge is applied to radiotelegrams tendered on Sundays and New Year's Day.

Radiotelegrams may also be sent to R.A.F. vessels. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words "R.A.F. Vessel" before the name of the ship.

## RADIOTELEPHONE SERVICE

Radiotelephone services are available between telephone subscribers (but not from coin-box telephones or call offices unless the caller is holder of a telephone credit card) in Great Britain, Northern Ireland, the Channel Islands and the Isle of Man and suitably equipped ships. The service is generally available at all hours of the day and night, but the periods of communication with $\quad$ particular ship vary with the ship's position and are dependent on radio conditions.

Calls are normally made through the coast stations, listed below, and callers should ask the local exchange telephone operator for SHIPS' TELEPHONE SERVICE adding, if known, the telephone number and name of the coast station through which the call should be made. If the name of the coast station is not known, the caller will be connected to Portishead Radio. When connected to the coast station operator, the caller should ask for SHIPS' RADIO TELEPHONE CALL giving the name of the ship and the name (or designation) of the person required.

Charges vary according to the position of the ship. The rates are (for minimum of 3 minutes) Short range (within 50 miles of VHF station) 8 Ip for 3 minutes. $27 p$ for each additional minute.

Medium range (within 250 miles of U.K.). £I' 35 for 3 minutes. $45 p$ for each additional minute.

Long range (dependent on position of ship). £3.15 for 3 minutes £I.05 respectively for each additional minute.

The service is available, for calls to and from H.M. Ships, subject to the approval of the Duty Commander M.O.D. Navy, through whom all calls to H.M. Ships should be booked. The charges are the same as those for merchant ships but as H.M. Ships do not normally keep watch for private radiotelephone calls from the shore, no attempt should be made to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on the ship. The caller must be able to give the name of the coast station through which the call is to be made, or the approximate position of the ship at the time the call is required.

The holder of a telephone credit card issued in Great Britain, Northern Ireland, the Channel Islands or the Isle of Man may use it to make radiotelephone calls to ships at sea from any telephone in this country (including coin-box telephones and call offices) and have the charges debited to his own account.

## INLAND TELEPHONES

The quarterly rental for an exclusive business exchange line is $£ 9.75$ and $£ 8 \cdot 25$ for any other exclusive exchange line. For shared service, in which two subscribers share one line but have practically the same facilities as those provided by individual lines, each customer pays £ 4 per annum less than for exclusive line service. A condition of telephone service is that all new and removing residential customers since January, 1948, are liable to share their lines if called upon to do so. Subscriber trunk dialling (STD) facilities are provided to most destinations at virtually all exchanges. Local and dialled trunk calls from these exchanges are charged in 3p units, $2 p$ units from pay on answer coin-box lines. Charges from coin-box lines are Value Added Tax included whereas from ordinary lines Value Added Tax is not included on individual call charges but per cent. charge is made on customer's total bill to cover Value Added Tax. The length of time per unit depends on the distance of the call, from two minutes for a local call to ten seconds for distances over 56 kilometres. Additional time is allowed during the cheaper rates period.

Operator connected trunk calls from ordinary lines have - three minute minimum charge (and thereafter by the minute) which varies with distance, but those from coinbox lines are charged in 3 minute periods at the coinbox tariff. For calls that have to be passed through the operator because the caller cannot dial or because a dialled call had failed, the charge is equivalent to the dialled rate, subject normally to the three minute minimum. Generally higher charges apply to other operator connected calls including special services calls and those to the Irish Republic and the Channel Isles. All trunk calls are cheaper if made after $6 \mathrm{p} . \mathrm{m}$. or at weekends. Personal calls (to specified person) 24 p extra, if the person cannot be found nothing further is charged. For fuller information see Preface to Telephone Directory, Dialling Instruction Booklet (where appropriate) and Post Office Guide.

TELEX SERVICE
Annual rental of teleprinter, associated equipment
and line to Telex exchange is from $\propto_{3} 80$ per IIIIIII (depending upon the equipment required). The minimum call charge for International calls via the operator is three minutes. For subscriberdialled calls to some Inter-Continental countries, the minimum call charge is one minute, and sub-scriber-dialled calls to the Continent are charged in $2 \frac{1}{2} \mathrm{p}$ units (see Post Office Guide for rates). Automatic equipment allowing messages to be sent at the maximum speed of 400 characters ( $60-70$ words) per minute can be rented in addition. Descriptive leaflet available from all Telephone Area Offices; for local address see Telephone Directory.

## DATA COMMUNICATIONS SERVICES

Data communications services provide for data transmission at speeds ranging from $50-50,000$ bits per second (bit/s) over telegraph, speech and wideband circuits. They accommodate \#number of additional facilities such wir automatic calling and answering, Dataplex and midnight line service. The services mul be described briefly as follows: Data over telegraph equipment. Data transmission over telegraph type circuits cither on the public switched telex network or privately rented circuits at speeds up to $x$ ro $\mathrm{bit} / \mathrm{s}$. PO terminals at $50 \mathrm{bit} / \mathrm{s}$ are provided on telex. On telegraph circuits either PO or privately supplied terminals which have been granted permission for connection may be used.
Datel 200 provides for duplex data transmission over speech type circuits either privately rented or on the public switched telephone network (PSTN) at up to $300 \mathrm{bit} / \mathrm{s}$ using PO modems and privately supplied terminal equipment which has been permitted for connection to the network.
Datel 600 provides for duplex data transmission over speech type circuits either privately rented or on the PSTN at up to $1200 \mathrm{bit} / \mathrm{s}$ using PO modems or privately supplied terminal equipment which has been permitted for connection to private circuits. Datel 2400 provides for synchronous duplex data transmission over speech type private circuits at up to 2400 bit/s using PO modems or privately supplied terminal equipment which has been permitted for connection to private circuits.
Datel 2400 Dial-Up provides for synchronous duplex data transmission over the PSTN at up to $2400 \mathrm{bit} / \mathrm{s}$ using PO modems.
Datel 2412 effectively combines the facilities of Datel 2400 Dial-up services, and offers $\#$ single package which fully conforms with the latest CCITT recommendations.
Datel 48 K provides for data transmission at 40.8 K , 48 K or 50 K bit/s over specially engineered wideband circuits using PO modems or privately supplied terminal equipment which has been permitted for connection to the network.
Data Control Equipment enables terminal to automatically originate and answer calls over the switched network.
Dataplex allows the data from a number of low speed terminals to be sent over a single high speed link, resulting in reduced user costs.
Midnight Line Service provides for unlimited subscriber dialled inland calls between midnight and $6 \mathrm{a} . \mathrm{m}$. for $=$ fixed annual rental.

## INTERNATIONAL DATA TRANSMISSION SERVICES

## (i) Datel Services

In the International context the term Datel has been adopted to refer to data transmission over the public switched telephone network.

## Datel

This service provides full duplex (simultaneous both way) serial transmission of data at speeds up to 200 bits per second using the public telephone network. Service is available to most of Europe, Bahrain, Dubai, the U.S.A., Singapore and South Africa. Note: Non European traffic (except South Africa) is connected on $\quad$ manual or semi-automatic basis via the international exchange.

## Datel 600

This service provides half duplex (bothway, but not simultaneous) serial transmission of data within the speed range of 600 to 1200 bits per second. Telephone networks, although designed for speech transmission are usually capable of carrying data transmissions at 600 bits per second and on some connections, 1200 bits per second should be obtainable. Service is available to most European countries and Australia, Bahrain and Dubai, Canada, Hong Kong, New Zealand, Singapore, South Africa and the U.S.A. (Note: Non-European traffic (except South Africa) is connected on a manual basis via the interantional exchange.)
Datel 2400
Datel 2400 service was introduced on I August 1977 to Belgium, Denmark, Finland, W. Germany, Netherlands, Sweden, Norway and S. Africa using a new Post Office modem. Service to other countries will be provided as agreement is reached with the foreign administration (or RPOA) concerned.

The use of permitted non-Post Office modems over the international public telephone network over certain routes will cease from 31 August 1978. Any such modems which have already been permitted by that date will subject to the terms and conditions prevailing, be allowed to remain in operation for the serviceable life of the modem. The use of = Post Office modem for $2400 \mathrm{bit} / \mathrm{s}$ operation will be mandatory for all new public switched network installations provided on and from I September 1978."
(ii) Private Circuits

International private circuits are available for data transmission and are provided in accordance with the Recommendations of the International Telephone \& Telegraph Consultative Committee (CCITT). Depending on the modulation method used, higher transmission rates than those offered by the Datel services are usually obtainable over voice bandwidth circuits.

In addition, high speed data transmission, e.g. $4^{8 \mathrm{~K}}$ bits per second, may be achieved over wideband leases (telephone circuits grouped together to give 48 KHz bandwidth) or by using special facilities provided via the INTELSAT satellite.

## INTERNATIONAL TELEPHONES

The same charges apply for calls originating in any part of Great Britain, Northern Ireland and the Isle of Man. Callers with STD in many parts of this country can dial direct to numbers on many exchanges on the continent and in some other countries. Access to this facility (International Direct Dialling-IDD) is progressively being made available to more places in this country, and the number of places abroad to which calls may be dialled is also increasing, callers should consult their dialling codes booklet for information on how to make calls.

Directly dialled calls are charged in units of time costing 3p. Cheap rates apply from 8 p.m. to $6 \mathrm{a} . \mathrm{m}$. nightly, and at any time on Saturdays and Sundays. Where access to IDD is not yet available, callers should ask the local operator for the International.Exchange, specifying the country required.

On order: Concorde, 5 ; Tristar, $6 ;$ Boeing 747, 6 .

## THE PRESS COUNCIL <br> - Salisbury Square, E.C.4. <br> [ox-353 2248 ]

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 2949, recommended inter alia that ${ }^{\text {- voluntary Press Council be }}$ formed.

A constitution ultimately set up provided for the establishment of such a council on July 1 , I953. This constitution was materially amended in 1963 by the introduction of an independent chairman and up to zo per cent. lay membership. In x973, the Council was increased to 30 (excluding the Chairman) of whom one-third are lay members. The objects of the Council are (r) to preserve the established freedom of the British press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to consider complaints about the conduct of the Press or the conduct of persons and organizations towards the Press; to deal with these complaints in whatever manner might seem practical and appropriate and record resultant action; (4) to keep under review developments likely to restrict the supply of information of public interest and
importance; (5) to report publicly on developments that may tend towards greater concentration or monopoly in the Press (including changes in ownership, control and growth of Press undertakings) and to publish statistical information relating thereto; (6) to make representations on appropriate occasions to the Government, organs of the United Nations and Press organizations abroad; and (7) to publish periodical reports recording the Council's work and to review, from time to time, developments in the Press and the factors affecting them.

The membership of the Council consists of editorial and managerial nominees of The Newspaper Publishers Association Ltd. (5), The Newspaper Society (3), The Periodical Publishers Association Itd. (z), The Scottish Daily Newspaper Society ( I ), Scottish Newspaper Proprietors' Association (x), The Guild of British Newspaper Editors (z), The National Union of Journalists (4), The Institute of Journalists (2) plus (xo) lay members appointed by the Press Council Appointments Commission. In addition each constituent body nominates one official as non-voting member. Chairman, The Lord Shawcross, P.C., G.B.E., Q.C. Secretary, N. S. Paul.

## BRITISH PASSPORT REGULATIONS

Applications for United Kingdom passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Main Post Office.
London.-Clive House, 70-7 Petty France, S.W.I. Liverpool.-India Buildings, Water Street, Liverpool, 2.
Newport, Gwent.-Olympia House, Upper Dock Street.
Peterborough.-Passport Office, 55 Westfield Road, Peterborough.
Glasgow.- ist Floor, Empire House, $x_{3}$ 2 West Nile Street, Glasgow, C. . .
Hours. The above offices are open Mon.-Fri. 1 a.m. to $4.3^{\circ}$ p.m. The Passport Offices are also open for cases of special emergency (e.g. death or serious illness) arising outside normal office hours between 4.30 p.m. and 5.30 p.m. ( 6.00 p.m. in London); and in London on Saturdays between zo a.m. and noon.

Completed forms of application should be sent to one of the five Passport Offices, with photographs, supporting documents and the fee of £工o, in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office.

Persons resident in Northern Ireland may apply in person to the Foreign and Commonwealth Office Passport Agency, ist Flr., Marlborough House, $3 \circ$ Victoria Street, Belfast, or by post to the Passport Office, Glasgow.

A Passport cannot be issued or renewed by the Foreign and Commonwealth Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N . Ireland, to the nearest British Passport issuing authority.

United Kingdom Passports are granted:-
(i) To citizens of the United Kingdom and Colonies.
(ii) To British subjects without citizenship.
(iii) To British Protected Persons.

A passport granted to 1 child under 16 will normally be valid for an initial period of five years, after which it may be extended for a further five years with no extra charge. A passport granted to a person over 16 will normally be valid for 10 years and will not be renewable. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the holder's spouse is not available for his/her use when he/she is travelling alone. A spouse's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. Their applications must be signed by one of their parents.

Passport applications must be countersigned by a Member of Parliament, Justice of the Peace, Minister of Religion, Doctor, Lawyer, Bank Officer, Police Officer or any person of similar standing who has been personally acquainted with the applicant for at least two years. The applicant's birth certificate and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring I separate passport, an application should be made by one of the parents on form (B).

If the applicant for $\begin{gathered}\text { Passport be } \quad \text { citizen of the }\end{gathered}$ United Kingdom and Colonies by naturalization or registration, the Certificate of Naturalization or
registration must be produced with the application.
British Passports are generally available for travel to all countries. The possession of $\square$ Passport does not, however, exempt the holder from compliance with any Immigration Regulations in force in British or foreign countries, or from the necessity of obtaining $\mathbb{N}$ visa where required.

## PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and wife/husband, if to be included in the Passport) must be sent. These photographs should be printed on thin paper and must not be glazed on the reverse side. A coloured photograph should not be submitted unless the supplier advises that the type is "passport approved". They should measure not more than $2 \frac{1}{2}$ in. by 2 in. ( 63 mm . by 50 mm. ), or less than 2 in . by $\mathrm{x} \frac{1}{2} \mathrm{in}$. ( 50 mm . by 38 mm .), and should be taken full face without a hat.

## RENEwAL of Passports

Applications for the renewal of United Kingdom passports must be made on Form D.

## 94-Page Passports

On May I, 1973, a new type of passport became available. Intended to meet the needs of frequent travellers who fill standard passports well before the ten-year validity has expired, it contains 94 pages, is valid for ten years and costs. £zo.

British Visitors' Passports
A simplified form of travel document is available for British subjects (Citizens of the United Kingdom and Colonies) wishing to pay short visits (not exceeding three months) to certain foreign countries, viz.

Andora; Austria; Belgium; Bermuda; CANADA: Denmark; Finland; France (incl. Corsica) ; Greece ( \& the Greek Islands); W. Germany (incl. West Berlin by air only); Gibraltar; Iceland; Italy; Liechtenstein; Luxemburg; Malta; Monaco; Netherlands; Noriway; Portugal (incl. Madeira \& Azores); San Marino; Spain (incl. Balearic \& Canary islands); Sweden; Switzerland; Turkey.

A fee of $£ 5^{\circ} \circ 0$ is charged for the issue of $\boxminus$ British Visitors' Passport, which is valid for 12 months, cannot be amended and is not renewable; on expiry application should be made for new passport if required. Particulars of in applicant's spouse and/or children under 26 years can be included at the time of issue only at no extra cost. A child of years of age and over is eligible to hold a British Visitors' Passport. Applications for, or including, person under 18 years of age (unless married or serving in H.M. Forces) must be countersigned by the legal guardian.
British Visitors' Passports are obtainable by application on Form VP (from any Main Post Office). Applicants in England, Scotland and Wales should take the completed form in person to any Main Post Office which will normally issue the passport without further delay; applicants in Northern Ireland to Foreign and Commonwealth Passport Agency, Belfast. British Visitors' Passports are not oblainable from the Passport Offices. Two recent passport photographs will be required of the applicant and of his/her spouse, if to be included; photographs of children are not required. Size of photographs must be 2 in . $\times$ 溇 in . ( 50 mm . by $3^{8}$ mm .) (see also Photographs above). No visas are required on British Visitors' Passports.
Applicants must also produce for the purpose of identification $=$ N.H.S. Medical Card, birth certificate or retirement pension book.

## HALL-MARKS ON GOLD AND SILVER WARES

London (Goldsmiths' Hall) Date Marks
From 1498 to 1976.

Hall-marks me the symbols stamped on gold or silver articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold or silver articles are required by law to be hall-marked before they are offered for sale. Hallmarking was instituted in 1300 under a statute of Edward I.

Normally | complete modern hall-mark consists of four symbols-the maker's mark, assay office mark, standard mark and date letter. Additional marks have been authorized from time to time.

Maker's Mark.-Instituted in $\mathbf{x 3 6 3}$, the maker's mark was originally a device such II a bird or fleur-de-lys and now consists invariably of the initials of the Christian and momamm of the maker or of the firm.

Assay Office Mark.-The existing assay offices and their distinguishing marks are:-

LONDON (Goldsmiths' Hall).
A leopard's head (uncrowned from 5300 to 3478-9, when it became crowned until 8825 , since when it has been uncrowned). From

1697-1720 this mark $\quad$ used in London for gold only and not for silver.
BIRMINGHAM. . . . . . . . . . . . . . . . . . . . . An anchor SHEFFIELD. . . . . . . . . . . . A York rose for gold and silver
EDINBURGH. . . . . . . . . . . . . . . . . . . . . . . . . A castle
Offices formerly existed in other towns, e.g. Chester, Glasgow, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

Standard Mark,-Instituted in 1544 . The current legal standards and their marks are as follows:-

SLIVER.-Sterling silver ( 92.5 per cent. silver) is marked by English assay offices with lion passant and by the Edinburgh Assay Office with a lion rampant. A full-length figure of Britannia was impressed

on silver of a higher standard ( $95 \cdot 84$ per cent. silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

GOLD.- 22 carat articles ( 91.6 per cent. gold) are marked by English offices and the Edinburgh office with a crown followed by the figure $9 x 6$.

18 carat articles ( 75 per cent. gold) are marked by English assay offices with a crown followed by the figure $75^{\circ}$.

All Britisn assay offices mark 14 carat gold ( 58.5 per cent. gold) with the figure 585 and 9 carat gold ( 37.5 per cent. gold) with the figure 375.

Date Letter.-Instituted in 55 th Century. The date letter denotes the year in which nil article was assayed or hall-marked. Each alphabetical cycle
has a distinctive style of lettering or shape of shield. The date letters are different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. The date letter $\bar{l}$ changed at the London Office in May each year and at Birmingham and Sheffield in July. Specimen shields and letters used by the London Office in each period from 1438 to date are shown on p. 1212.

## OTHER MARKS

Duty Mark.-In 1784 an additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty 1890.

Commemorative Marks.-There are three other marks to commemorate special events, the Silver Jubilee of King George V and Queen Mary in 1935, the Coronation of Queen Elizabeth II in r953 and her Silver Jubilee in 1977.

Foreign Wares.-Since $\quad$ z84a foreign virw imported into Great Britain have been required to be hall-marked before sale. The marks consist of the importer's mark, a special assay office mark (see below), the decimal figures denoting fineness (together with the carat figure in the case of gold) and the annual date letter. The current assay office marks for foreign wares are - follows:-

LONDON. - The sign of the Constellation Leo. BIRMINGHAM.-Equilateral triangle.
sheffield. - The sign of the Constellation Libra. fidinburgh.-St. Andrew's Cross.

## CLOSE TIMES

Wild Birds.-The Protection of Wild Birds Act, 1954, lays down a close season for wild birds (other than Game Birds) from February $I$ to August 38 inclusive, each year. Exceptions to these dates are made for-

Capercaillie and (except Scotland) Woodcock. Feb. 8 -Sept. 30.

Snipe, Feb. 1-Aug. 1 I.
Wild Duck and Wild Goose (in or over water areas), Feb. 2x-Aug. 3 .

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, wigeon) and certain wild geese (bean, Canada, pink-footed and whiteironted).

Certain wild birds may be killed or taken at any time by authorized persons-cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, starling, stockdove and wood pigeon; and, in Scotland only, goosander, red-breasted merganser and rock-dove. The sale of Wild Birds' Eggs is prohibited, except that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. I-

April 34 inclusive.
Game Birds-in each case the dates are inclu-sive:-
Black Game-Dec. 15 to Aug. 19 (Aug. $3^{2}$ in Somerset, Devon, and New Forest).
*Grouse-Dec. Ix to Aug. 22.

* Partridge-Feb. $\quad$ to Aug. 3 3.
* Pheasant-Feb. - to Sept. 30.
* Ptarmigan-(Scotland only) Dec. 18 to Aug. ir.

It is also unlawful (in Ensland and Wales) to MII the game marked * on a Sunday or Christmas Day.

Hunting and Ground Game.-There is no statutory close-time for fox-hunting or rabbit-shooting, nor for hares: but by an Act passed in $\mathbf{x} 92$ the sale of hares or levercts in Great Britain is prohibited from March $I$ to July $3^{x}$ inclusive under I penalty of a pound. The First of November is the recognized date for the opening of the fox-hunting season, which continues till the following April. Otterhunting lasts from mid-April to mid-September.
Deer.-The Deer Act, x963, effective from Nov. I, 1963 , imposed the following close times. Red Deer and Sika Deer: Stags, May x-July 3z; Hinds, March 1-Oct. 3 ${ }^{\text {r. }}$ Fallow Deer and Roe Deer: Buck, May x-July 3x; Doe, March x-Oct. 3x. Under the Act it is an offence to take or wilfully kill deer of any species from one hour after sunset to one hour before sunrise.

## WEIGHTS AND MEASURES

The Weights and Measures Act of 1963 enacts the legal measures for Great Britain, basing them upon "United Kingdom primary standards " in the custody of the Standards Department of the Dept. of Trade. The primary standards are the yard, pound, metre and kilogramme. The Gallon, the capacity standard, wet or dry, is based upon the Pound. The Act of 1963 defines the Gallon as the space occupied by 10 pounds weight of distilled water of density 0.998859 gramme per millilitre weighed in air of density o.0ox 217 gramme per millilitre against weights of density $8 \cdot 136$ grammes per millilitre. The METRE and the LITRE have the meanings assigned by order of the Dept. of Trade to reproduce in English the international definition of these measures in force at the time of making of the orders.

New definitions for an international yard and pound were adopted on Jan. x, 1959, by the standards laboratories of the United Kingdom, Canada, AustraHia, New Zealand, South Africa and the United States:
international yard $=0.9544$ metre. $\quad$ international pound $=0.45359237$ kilogramme.
The following list shows the definitions of measures set out in the Weights and Measures Act, 1963 and some useful conversions. See also Conversion Tables, p. 1218.

Measurement of Length

| Imperial Units ${ }^{\text {a mil }=1 / \mathrm{s} 000 \text { inch. }}$ |  |
| :---: | :---: |
| Mile $=x, 760$ yards | $\Sigma 2$ inches (in.) $=1$ foot (ft.). |
| Furlong $=220$ yards. | 3 feet $=x \operatorname{yard}(y d$.$) .$ |
| Chain $=22$ yards. | 6 feet $=x$ fathom. |
| YARD $=0.9844$ metre. | 22 yards $=x$ chain $=100$ links. |
| Foot $=\frac{1}{3}$ yard. Inch $=x / 36$ yard. | so chains $= \pm$ furlong. |
| Inch" $=1 / 36$ yard. | 1 furlongs $=\mathrm{x}$ mile $=1.760$ yards. |

## Metric Units

Kilometre $=x, 000$ metres.
$\operatorname{METRE}$ (see above) $=\mathrm{x} \cdot 094$ yards.
Decimetre $=1 / x 0$ metre.
Centimetre $=x / 000$ metre.
Millimetre $=x / x 000$ metre.
so millimetres (mm.) $=\mathrm{x}$ centimetre $(\mathrm{cm})=.0.39370 \mathrm{inch}$.
xo centimetres $=1$ decimetre $(d m)=$.3.937 oxs inches.
xo decimetres $=\mathrm{I}$ METRE $(m)=.1.0936 \times 4$ yards.
мо metres $=x$ dekametre $($ dam. $)=10.936 \quad 143$ yards.
ro dekametres $=x$ hectometre $(\mathrm{hm}$. $)=\mathrm{x09} \cdot \mathrm{a}^{6 \mathrm{I}} 43$ yards.
so hectometres $=x$ kilometre $\left(k m_{\text {. }}\right)=0.62137 x$ mile.

A kilometre is approximately five-eighths of a mile, so that $\square$ kilometres_may be regarded as 5 miles.
Measurement of Area

## Imperial Units

Square mile $=640$ acres.
Acre $=4,840$ square yards.
Rood $=x, 2 \times 0$ square yards.
SQUARE YARD= a superficial area equal to that of a square each side of which measures one yard.
Square foot $=x / 9$ square yard.
Square inch $=\mathrm{I} / \mathrm{x} 44$ square foot.

## Metric Units

## Hectare $=\mathbf{1 0 0}$ ares.

Dekare $=$ ro ares.
Are $=100$ square metres.
SQUARE METRE=a superficial area equal to that of a square each side of which measures one metre.
Square decimetre $=x /$ roo square metre.
Square centimetre $=x / 100$ square decimetre.
Square millimetre $=1 / 100$ square centimetre.

I sq. centimetre $=0.155$ sq. inch.
I sq. METRE $=10.7639$ sq. feet $=\Sigma 19599$ sq. yds.
I are $(a)=$.0.0988 rood.
I hectare ( $x 0,000$ sq. metres) $(h a)=.2.47 \mathrm{I} 05$ acres.

- sq. kilometre $=0.386102$ sq. mile.

## Imperial Units

Cubic Yard = a volume equal to that of $\equiv$ cube each edge of which mar me one yard.
Cubic foot $=1 / 27$ cubic yard.
Cubic inch $=1 / \mathbf{x 7}^{28}$ cubic foot.

## Metric Units

CUbic Metre $=$ a volume equal to that of $\quad$ cube each edge of which measures one metre.
Cubic decimetre $=3 / 5000$ cubic metre.
Cubic centimetre $=\Sigma / 5000$ cubic decimetre.
$x, 728$ cubic inches $=1$ cubic foot. 27 cubic feet $=x$ cubic yard.

## Measurement of Volume

## Measurement of Capacity-continued

| Fluid drachm $=\frac{1}{8}$ fluid ounce. | See Apothecaries' Weight (below). |
| :--- | :--- |
| Minim $=x / 60$ fluid drachm. |  | Minim $=x / 60$ fluid drachm.

I centilitre $(\mathrm{cl})=.0.0704 \mathrm{gill}$.
$I_{\text {LITRE }}(x / x, 000$ cubic metre) (lit. $)=x^{\prime} 7598$ pints $=0.88$ Imp. quart $=0.22$ Imp. gallon $=61.0255$ cu . inch $=0.0353157 \mathrm{cu} . \mathrm{ft}$.

- hectolitre (hl. $)=21.9975 \mathrm{Imp}$. gallons $=26.417 \mathrm{I}$ U.S. gallons $=2 \wedge 749 \mathrm{Imp}$. bushels $=2 \cdot 8377$ U.S. bushels.
Metric Units

Hectolitre $=$ roo hitres.
LITRE $=$ The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under pressure of one standard atmosphere ( $\mathbf{4} \cdot 696 \mathrm{lb}$. per sq, inch).
Decilitre $=x /$ ro litre.
Centilitre $=s /$ roo litre.
Millilitre $=\Sigma / 5000$ litre.

## Measurement of Mass or Weight

Imperial Units
Ton $=2,240$ pounds.
Hundredweight $=112$ pounds.
Cental = yoo pounds.
Quarter $=28$ pounds.
Stone $=14$ pounds.
POUND $=0.45359237$ kilogram.
Ounce $=1 / 16$ pound.
Dram $=1 / 16$ ounce.
Grain $=1 / 7,000$ pound.

7,000 grains ( $g 7_{0}$ ) $=x$ pound ( $l b_{0}$ ).
I6 drams ( $d r_{0}$ ) = I ounce ( $\left(0 z_{\text {. }}\right.$ ).
s6 ounces $=\Sigma$ POUND (lb.).
14 pounds $=x$ stone.
28 pounds $=1$ quarter (of a $c w t_{\text {. }}$ ).
4 quarters (inz lb.) $=x$ hundredweight ( $c w t$.).
. hundredweight $(2,240 \mathrm{lb})=$.I ton.

Ounce Troy $=480$ grains
Pennyweight $=24$ grains

20 pennyweights $\left(d w t_{0}\right)=1$ Troy ounce.
For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce $=480$ Avoirdupois grains ( $3 \mathrm{I} \cdot 1035$ Grammes) in weight. A Troy PoUND ( $=5,760$ grains) is legalized in the United States.
Ounce apothecaries' $=480$ grains.
See Apothecaries' Weight (below)
Drachm $=\frac{2}{8}$ ounce apothecaries.
Scruple $=\frac{1}{3}$ drachm.

## Metric Units

Metric ton $=1,000$ kilograms.
Quintal = 100 kilograms.

I centigram (cg.) $=0.1543^{2}$ grains.

- decigram (dg. $)=x \cdot 543$ grains.
- gramme $(\mathrm{grm})=$.15.4324 grains.

1 dekagram (dag.) $=5.6438$ drams.
I hectogram (hg.) $=3.52740 \mathrm{Oz}$.
I KILOGRAM (kgo) $=32^{\circ} \cdot 1507 \mathrm{oz}$. Troy $=35^{\circ} 2734 \mathrm{oz}$. Avoirdupois $=2 \cdot 20462 \mathrm{lb}$. Avoirdupois.
I myriagram $=22.0462 \mathrm{lb}$. Avoirdupois.
1 quintal $\left(q_{0}\right)=100 \mathrm{~kg}=220 \cdot 5 \mathrm{lb}$. Avoirdupois $=1 \cdot 9684 \mathrm{cWt}$.
tonne $(t)=$.0.984207 U.K. or long ton=x'I02 $3 x$ U.S. or short ton

## Measurement of Electricity

Units of measurement of electricity, the AMPERE (unit of electrical current), the OHM (unit of electrical resistance), the VOLT (unit of difference of electrical potential) and the WATT (unit of electrical power) have the meanings assigned to them respectively by order of the Dept. of Trade, to reproduce in English the international definitions in force at the date of the making of the order.

Kilowatt $=1,000$ watts.
Apothecaries' Weight
Measures of Weight.
20 grains $=\mathrm{x}$ scruple ( $\mathrm{\theta}_{\mathrm{x}}$ ).
3 scruples $=1$ drachm (3x).
drachms $=\Sigma$ ounce.
Measures of Capacity.
60 minims ( $\min$. ) $=$ fluid drachm.
fluid drachms $=$ Ifluid ounce.
5 fluid ounces
4 gills
$=x$ gill.
$=I$ pint. 4 pints $=$ GAILON.
The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelled differently. A fluid ounce of distilled water at a temperature of $62^{\circ}$ Fahrenheit is equal in weight to the Avoirdupois ounce ( 437.5 grains). A fluid drachm ( 54.6875 grains) is equal in weight to Two Avoirdupois drams.

## Angular or Circular Measure

60 seconds (") = $x$ minute ( ${ }^{\prime}$ ).
60 minutes $=x$ degree $\left(^{\circ}\right.$ ).

Megawatt $=x, 000,000$ watts.
90 degrees $=x$ right angle or quadrant.
Diameter of circle $\times 3.1456=$ circumference
Diameter squared $\times \cdot 7854=$ area of circle.
Diameter squared $\times 3 \cdot 14 \mathrm{II} 6=$ surface of sphere.
Diameter cubed $\times 523=$ solidity of sphere.
One degree of circumference $\times 57^{\circ} 3=$ radius.*
Diameter of cylinder $\times 3^{\prime} 14 \mathrm{x} 6$; product by length or height, gives the surface.

Diameter squared $\times \cdot 7854$; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) $=57.3$ degrees, nearly.
Note.-A circle of 7 yards diameter has, in practice, a circumference of 22 yards $=1$ chain.

## Water Measures

Cubic inch................. $=252 \cdot 458$ grains.
Gallon ( 277.274 cu . in.) $\ldots . .=$ 10 1 b . (distilled).
Cubic foot. $\ldots \ldots \ldots \ldots . .$.
$35^{\circ} 943$ cubic ft . ( 224 gals.). $=\mathrm{x}$ ton.
Water for Ships: Tun, zzo gals., Butt ryo, Puncheon 72, Barrel 36 , Kilderkin $\mathbf{2 8}$ gals.

## Sizes of Bound Books

Note.-Folio means a sheet folded in half, quarto folded into four, and so on; thus, a crown 8 vo page is one-cighth the size of a crown sheet. Books are usually bound up in sheets of 16 or $3^{2}$ pages. Octavo books are generally printed 64 pages at a time ( $3^{2}$ pages on each side of a sheet of quad): crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or xo reams per $x, 000$ copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

## INTERNATIONAL PAPER SIZES

Simplification of the large number of stock paper sizes in use in the United Kingdom has been proceeding since publication of British Standard 730 in 1937. Recommendations made by the International Organization for Standardization were accepted by the United Kingdom in 1959 and it is considered that general adoption of the international or A size will bring great economies to users of paper.

The basis of the international series of paper sizes is a rectangle having an area of one square metre, the sides of which are in the proportion of $1: \sqrt{ }$. In other words, taking one side as X and the other $=\mathbf{Y}$, the basic size provides the equation- $\mathrm{X}: \mathrm{Y}$ $=\mathrm{r}: \vee \mathrm{V}$; and $\mathrm{X} \times \mathrm{Y}=\mathrm{r}$. It may be noted that the proportions $\mathrm{I}: \sqrt{ } 2$ have a geometrical relationship, the side and diagonal of any square being in this proportion. As the basic size is one square metre in area, this means that $\mathrm{X}=84 \mathrm{x}$ millimetres and $\mathrm{Y}=\mathbf{x , 1 8 9}$ millimetres. The effect of this arrangement is that if the short side is doubled or the longer side is halved, i.e., if the area of the sheet is doubled or halved, the shorter side and the longer side of the new sheet are still in the same proportion $\mathrm{x}: \sqrt{ }$. This feature is particularly useful where photographic enlargement or reduction is used, as the proportions remain the same.

Description of the A series is by capital A followed by a figure. The basic size has the description Ao and the higher the figure following the letter, the greater is the number of sub-divisions and therefore the smaller the shect. Half Ao is Ax and half $A_{x}$ is $A_{2}$. Where larger dimensions are required the A is preceded by $\|$ figure. Thus 2 A means twice the size Ao; 4A is four times the size of Ao.

It is essential feature of these series that the dimensions are of the trimmed or finished size.

- A ' SERIES OF TRIMMED SIZES

| Designation | SIZE |  |
| :---: | :---: | :---: |
|  | mm | inches |
| A | $84 \mathrm{x} \times 1189$ | $33^{121} \times 46.8 \mathrm{x}$ |
| A 1 | $594 \times 84 \mathrm{x}$ | $23.39 \times 33.15$ |
| A 2 | $420 \times 594$ | 16.54×23.39 |
| A 3 | $297 \times 420$ | $11.69 \times 16.54$ |
| A 4 | $210 \times 297$ | $8.27 \times 11^{6} 69$ |
| A 5 | +188920 | $5.83 \times 8.27$ |
| A 6 | $105 \times 148$ | $4.13 \times 5.83$ |
| ${ }^{\text {A }} 7$ | $74 \times 105$ | $2.98 \times 4.13$ |
| A 8 | $52 \times 74$ | $2.05 \times 2.91$ |
| A ${ }_{\text {A }} 9$ | $37 \times 52$ $26 \times 37$ | $1.46 \times 2.05$ $1.02 \times 1.46$ |

Subsidiary Series.-A series of B sizes has been devised for use in exceptional circumstances when sizes intermediate between any two adjacent sizes of the A series are needed.

- B' SERIES OF TRIMMED SIZES

| Designation | SIZE |  |
| :---: | :---: | :---: |
|  | mm | inches |
| B o | $1000 \times 1414$ | $39.37 \times 55.67$ |
| B 1 | $700 \times 11000$ $707 \times 107$ | $27.83 \times 39.37$ |
| $\mathrm{B}_{2}$ | $500 \times 707$ $353 \times 500$ | $\begin{aligned} & 10.68 \times 27.83 \\ & 13.90 \times 19.68 \end{aligned}$ |
| B 3 | $353 \times 500$ $250 \times 353$ | $13.90 \times 19.68$ $9.84 \times 13.90$ |
| B4 | 176× | $6.93 \times 9.84$ |
| B 6 | ${ }_{125 \times 176}$ | $4.92 \times 6.93$ |
| B 7 | $88 \times 125$ | $3.46 \times 4.92$ |
| B 8 | $62 \times 88$ | $2.44 \times 3.46$ |
| B 9 | $44 \times 62$ | $\pm .73 \times 2.44$ |
| B 10 | $3 \mathrm{x} \times 44$ | 1. $22 \times 1.73$ |

In addition there is a series of C sizes which is used much less. A is for magazines and books, B for posters, wall charts and other large items, C for envelopes particularly where it is necessary for an envelope (in C series) to fit into another envelope. The size recommended for business correspondence is A4.

Long Sizes.-Long sizes are obtainable by dividing any appropriate sizes from the two series above into three, four or cight equal parts parallel with the shorter side in such a manner that the proportions mentioned in paragraph $=$ (above) are not maintained, the ratio between the longer and the shorter sides being greater than $\checkmark 2: I_{\text {. In }}$ In practice long sizes should be produced from the A series only.

## THE COST OF LIVING

The first cost-of-living index to be calculated in Great Britain was the one which took July, 1914, as 100 and was based on the pattern of expenditure of working class families in 1904. Since 1947 the Index of Retail Prices has superseded the cost-ofliving index, although the older term is still often popularly applied to it. This index is designed to reflect the month-by-month changes in the average level of retail prices of goods and services purchased by the " majority" of households in the United Kingdom, including practically all wage-earners and most small and medium salary-earners. For spending coming within the scope of the index, a representative list of items is selected and the prices actually charged for these items are collected at regular intervals. In working out the index figure, the price changes are "weighted "-that is, given different degrees of importance-in accordance with the pattern of consumption of the average family.

A more widely used guide when considering changes in the average level of prices of all consumer goods and services, particularly over number of years, is the consumer price index, now renamed the consumers' expenditure deflator. This index, which has been calculated back to $193^{8,}$ covers the expenditure of all consumers $=$ defined for national income purposes, and compares the price of goods and services actually purchased in : given year with the prices of the same goods and services in a base year.

During 1973 the Central Statistical Office constructed an annual index of prices of consumer goods and services over the period 1914 to 1972. This index has been constructed by linking together the pre-war cost of living index for the period $1984-1938$, the consumers' expenditure deflator for the period $193^{8}$ and $1946-62^{*}$ and the General Index of Retail Prices for the period 1962-1972.

In 1974 the index was rebased taking January 1974 $=$ roo. Using this index the following table has been constructed:

|  | Price Index | Comparable |
| :---: | :---: | :---: |
|  | Jan $1974=100$ | Purchasing power of Cx in 1976 |
| 1914. | 11.1 | 14.15 |
| 1915. | 13.7 | 1x.46 |
| 1920. | 27.7 | $5 \cdot 67$ |
| 1930. | 17.6 | $8 \cdot 93$ |
| 1938. | 17.4 | 9.03 |
| 1946. | 29.4 | $5 \cdot 34$ |
| 1950. | $35 \cdot 6$ | 441 |
| 1955. | $44^{1}$ I | 3.56 |
| 1960. | $49^{\cdot 6}$ | $3 \cdot 17$ |
| 1961. | 51.0 | 3.08 |
| 1962. | $53^{\circ}$ | $2 \cdot 96$ |
| 1963. | $54^{\circ}$ | $2 \cdot 91$ |
| 1964. | $55 \cdot 8$ | $2 \cdot 8 \mathrm{I}$ |
| 1965. | $58 \cdot 4$ | $2 \cdot 69$ |
| 1966. | $60 \cdot 7$ | $2 \cdot 59$ |
| 1967. | $62 \cdot 3$ | $2 \cdot 52$ |
| 1968. | $65^{2}$ | 2.41 |
| 1969. | $68 \cdot 7$ | $2 \cdot 29$ |
| 1970. | $73 \cdot 1$ | $2 \cdot 15$ |
| 1971. | $80 \cdot 0$ | 1.96 |
| 1972. | 85.7 | - 83 |
| 1973. | 93.5 | x. 68 |
| 1974. | 108.5 | $\pm .45$ |
| 1975. | 134.8 | I.16 |
| 1976. | 157. 1 | 100 |

By employing this table an annual purchasing power of the pound index may be derived by taking the inverse of the price index. So, for example, if the purchasing power of the pound is taken to be roop in 1971, then its comparable purchasing power in 1976 would be:

$$
100 \times \frac{80 \cdot 0}{157 \cdot x}=51 p
$$

It should be noted that these figures can only be approximate.

* There are no official figures for $1939-45$.

PERIODS OF GESTATION AND INCUBATION
The table shows approximate periods of gestation or incubation for some common animals and birds. In some cases the periods may vary and where doubt arises professional advice should be sought.

| Species | Shortest <br> Period. Days | Usual Period. Days | Longest Period. Days | Species | Shortest Period. Days | Usual Period. Days | Longest Period. Days |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Human | 240 | 273 | 313 | Turkey. | 25 | 28 | 28 |
| Mare. | 305 | 336 | 340 | Duck. | 28 | 28 | 32 |
| Ass. | 365 |  | 374 | Goose. | 28 | 30 | 32 |
| Cow. | 273 | 280 | 294 | Pigcon. | 17 | 18 | 19 |
| Ewe | 140 | 147-50 | 160 | Canary. | 12 | 14 | 14 |
| Goat. | 147 | 151 | 155 | Guinea Pig. | 63 | - | 70 |
|  | $\underline{09}$ | 112 | 125 | Mouse. | 18 | - | 19 |
| Bitch | 55 | 63 | 70 | Rat.... | 21 |  | 24 |
| Cat. | 53 | 56 | 63 | Elephant |  | 2 years |  |
| Rabbit | 30 | 32 | 35 |  |  | 45 weeks |  |
| Hen. | 20 | 21 | 22 | Zebra |  | 56 weeks |  |

## WATER AUTHORITIES

The Water Act 1973, which provided for the reorganisation of the water services in England and Wales, resulted in the disappearance of 29 river authorities, 157 water undertakings and x,393 sewerage and sewage disposal authorities and the creation of ten autonomous multi-purpose water authorities (nine regional authorities in England and the Welsh National Water Development Authority). The Aut also created the National Water Council and the Water Space Amenity Commission.

The water authorities are responsible for water supply, water conservation, sewerage and sewage disposal, prevention of river pollution, fisheries, land drainage and the recreational use of their waters. Between them the new authorities employ about 65,000 people, have an annual revenue of some $£ 650$ million and an investment budget of about $£ 450$ million a year.

The National Water Council is the national
consultative and advisory body for the water services and consists of a chairman appointed by the Secretary of State for the Environment, the chairmen of the regional water authorities and ten other members appointed by the Secretary of State and the Minister of Agriculture, Fisheries and Food.
The Council advises water authorities and the Government on national water policy and promotes and assists the efficient performance by water authorities of their functions in research and planning.

To undertake this work the Council has manpower and training divisions, and sections dealing with technical services, testing of appliances, public relations, information, legal and financial matters and a secretariat.
The National Water Council, I Queen Anne's Gate, London, S.W.x.-Dir.-Gen., P. F. Stott.

## Regional Water Authorities

Thames Water Authority, New River Head, Rosebery Avenue, London, E.C.I.-Chief Executive, A. Morrison.

Southern Water Authority, Guildborne House, Worthing, Sussex.-Chief Executive, B. R. Thorpe.
Severn Trent Water Authority, Abelson House, 2297 Coventry Road, Sheldon, Birmingham.Chief Executive, D. A. D. Reeve.

Wessex Water Authority, Techno House, Redcliffe Way, Bristol.-Chief Executive, K. F. Roberts.
Anglian Water Authority, Diploma House, Grammar School Walk, Huntingdon.-Chief Executive, P. H. Bray.

SOUTh West Water Authority, P.O. Box 22, 3-5 Barnfield Road, Exeter. -Managing Director, H. R. Slocombe.

Northumbrian Water Authority, Northumbria House, Regent Centre, Gosforth, Newcastle-upon-Tyne.-Chief Executive, A. S. Robertson.
North West Water Authority, Dawson House, Great Sankey, Warrington.-Chief Executive, J. G. Lloyd.
Yorkshire Water Authority, West Riding House, 67 Albion Street, Leeds.-Chief Executive, J. Brooksbank.

Welsh National Water Development AuthorITY, Cambrian Way, Brecon, Powys.-Chief Executive, Dr. H. H. Crann.
