## H.M. COASTGUARD

Her Majesty's Coastguard, which is administered by the Department of Trade, is responsible for co-ordinating all civil marine search and rescue operations around the 2,500 mile coastline of Great Britain and Northern Ireland, and 1,200 miles into the Atlantic, as well as co-operating with search and rescue organizations of neighbouring countries both in Western Europe and around the Atlantic seaboard. In addition the Service maintains a 24-hour watch on the Dover Strait, providing a Channel Navigation Information Service for all shipping in one of the busiest sea lanes in the world.

Since 1978 H.M. Coastguard has been organized into six major Regions, each with a Regional Controller operating from a Maritime Rescue Co-ordination Centre. Each Region is subdivided into Districts under District Controllers, operating from Maritime Rescue Sub-Centres. In all there are 26 of these major centres. They are on 24-hour watch and are fitted with a comprehensive range of communications and rescue equipment. They are supported by some 400 smaller stations manned by Auxiliary Coastguards under the direction of the Regulars, each of which keeps its parent centre fully informed of day to day casualty risk, particularly on the more remote danger spots around the coast.

Between January 1 and December 31, 1981, the 560 Regular and 9,000 Auxiliary Coastguards co-ordi-

nated 3,942 incidents requiring search and rescue facilities, resulting in assistance being given to 7,753 persons. All distress telephone and radio calls are centralized on the 26 centres, which are particularly on the alert for people or vessels in distress, shipping hazards and oil slicks. Using their modern telecommunications equipment and the extensive facilities provided by British Telecom's Coast Radio Stations, they can alert the most appropriate rescue facilities: RNLi lifeboats, ships in the vicinity, Royal Navy or RAF helicopters, fixed-wing aircraft, Naval vessels, and Coastguard shore and cliff rescue teams.

For those who regularly sail in local waters, or make longer passages, the Coastguard Yacht and Boat Safety Scheme provides an invaluable free service. Its aim is to give the Coastguard a record of the details of craft, their normal operating areas and their passage plans. Yacht and Boat Safety Scheme Cards are available from all Coastguard stations, harbourmasters' offices and most yacht clubs and marinas.

Founded in 1822 to guard our coasts against smuggling, the Coastguard's role today is a very different one—that of complete dedication to the guarding and saving of all life at sea. Members of the public who see an accident or a potentially dangerous incident on or around the coast should without hesitation dial '999' and ask for the Coastguard.

## THE ZODIAC

The Zodiac is an imaginary belt in the heavens within which lie the apparent paths of the Sun, Moon and major planets. It is bounded by two parallels generally taken as lying 8° on either side of the ecliptic or path of the Sun in its annual course. The Zodiac is divided into twelve equal parts of 30° called Signs, which are not used by astronomers, but have some import in astrology, for which the division of the Zodiac was probably made originally. The Signs of the Zodiac take their names from certain of the constellations with which they once coincided. They are assumed to begin at the vernal equinox or intersection of the plane of the ecliptic with that of the equator. This point is still called the First Point of Aries, although the Sign of Aries now lies in the constellation of Pisces, some 30° to the west. This

retrograding of the equinox by about 50° a year is due to precession; the signs no longer coincide with the constellation whose names they bear.

A catalogue has been made (Grimaldi, 1905) of all, so far as is known, sculptured or incised representations on ancient monuments or tablets of the traditional constellation figures, either Zodiacal or otherwise, together with many modern pictures of the Zodiac. The first in the list is a roughly shaped upright, black stone about 2½ feet high and 1½ feet broad in the Babylonian room of the British Museum on the front of which are lightly incised ten out of the twelve Signs and other constellation figures. This was found near Baghdad and its date is estimated to be about 1187–1175 B.C.

## FOREIGN COUNTRIES

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Capitals and by the Foreign and Commonwealth Office in London, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies and Consulates-General in London for various corrections and additions.

AFGHAN EMBASSY IN LONDON  
 31 Princes Gate, S.W.7.  
 [01-589 8891/2]

*Chargé d'Affaires*, Mohammad Azam Shahim.

Afghanistan lies to the N. and W. of Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population (Government estimate, 1979) 15,500,000, although it is estimated that two to three million have become refugees in Pakistan and Iran since the Soviet invasion. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durranis, from whom the Royal Family came, and the Ghilzais. Then come the Tadjiks, an Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashs, who belong to the Shia sect.

Afghanistan is bounded on the W. by Iran (boundary fixed 1857 and 1904), on the S. by Baluchistan (now Pakistan) (boundary fixed 1896-7), on the N. by the U.S.S.R. (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (now Pakistan) (boundary fixed 1895) and China. The northern boundary runs from Zulfikar on the Iran frontier to Kushk, the Russian railway terminus, and thence N.E. to the Oxus (or Amu Darya, "Mother

of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. An Afghan-Chinese border treaty was signed in 1963 and the border demarcation in 1964. The Pakistan-Afghan frontier was settled by the Durand agreement of 1893.

By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into 29 provinces each under a Governor.

*Government*.—The Constitutional Monarchy, introduced by the 1964 Constitution, was overthrown by a *coup d'état* on July 17, 1973. The country was ruled by Presidential decree until February 1977 when a constitution was approved by a Loya Jirgah (Grand Assembly). Mohammad Daoud was elected President of the Republic for a term of six years.

On April 27, 1978, President Daoud was overthrown by the Armed Forces and power handed to the People's Democratic Party of Afghanistan (PDPA). Noor Mohammad Taraki was appointed Secretary-General of the PDPA, President of the Revolutionary Council and Prime Minister. He was ousted and succeeded by Hafizullah Amin in September 1979. In December 1979 Soviet troops invaded Afghanistan and Babrak Karmal was installed in place of Amin, becoming Secretary-General of the PDPA, President of the Revolutionary Council and Head of State.

*Judiciary*.—Hitherto Afghanistan has been ruled on the basis of Shariat or Islamic law. However, the Constitution introduced in 1965 provided for the creation of a legal code, and for a new structure of courts, consisting of a lower court in each *wulusual* (sub province), and a court of appeal in each province, with a Supreme Court in Kabul. The complete separation of executive and judiciary in this constitution was abolished by Presidential Decree in July, 1973. In late 1976 and early 1977 new Penal and Civil Codes were published.

*Defence*.—The Army has been reorganized and is recruited by yearly calls. Service is for one year for officers and 2 years for other ranks. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern.

*Production*.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woolen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (a) Internal: Kabul-Kandahar (310 miles); Kandahar-Herat (350 miles); Herat-Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif-Kabul

(380 miles). Also Kabul-Khanabad-Faizabad (450 miles); Kabul-Gardez (80 miles); Kabul-Bamian (140 miles). The road from Kabul to the North was shortened by the completion in 1964 of the Salang pass. (b) Roads to the frontiers: Kabul-Khyber (175 miles); Kandahar-Chaman (70 miles) and roads from Herat to the Russian and Iranian borders. Five of the major roads in Afghanistan were surfaced by U.S. and Soviet Aid. The Kabul-Khyber, Kandahar-Spin Baldak and Kabul-Kunduz-Qizil Qala roads are also surfaced. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Motor transport has taken the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles). In 1982 the Afghan and Soviet shores of the River Oxus were linked by a road and rail bridge which joins the Afghan port of Hairatan and the Soviet port of Termez. A network of internal air services operates between the main towns.

*Language and Literature.*—The principal languages of the country are Dari (a form of Persian) and Pushtu, although a number of minority languages are also spoken in various provinces. All schoolchildren learn both Persian and Pushtu. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and two universities, one in Kabul (established 1932) and one in Jalalabad (established early 1970's).

The annual revenue consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have become eligible for income-tax.

#### Trade with U.K.

	1980
Imports from U.K. ....	£6,800,000
Exports to U.K. ....	20,200,000

Exports are mainly Persian lambskins (Karakul), dried fruits, nuts, cotton, raw wool, carpets, spice and natural gas, while the imports are chiefly oil, cotton yarn and piece goods, tea, sugar, machinery and transport equipment.

**CAPITAL**, Kabul (about 970,000). The chief commercial centres are Kabul and Kandahar (185,000). Other provincial capitals are Herat (145,000), Mazar-i-Sharif (105,000), Jalalabad (55,000).

**FLAG.**—Black, red and green horizontal stripes with a device in top left-hand corner.

#### BRITISH EMBASSY (Kabul)

*Chargé d'Affaires*, J. D. Garner, M.V.O.

Kabul is distant 5,000 miles from London.

### ALBANIA

*Head of State*, Haxhi Lleshi, *assumed office*, July 24, 1953.

*Chairman, Council of Ministers*, Adil Çarçani.

#### Labour (= Communist) Party

*Politbureau of the Central Committee*, R. Alia; M. Asllani; A. Carcani; H. Celiku; K. Haziu; Enver Hoxha; H. Isai; R. Marko; P. Miska; M. Myftiu; L. Cuko; S. Stefani (*full members*); L. Gegprifti; Q. Mihali; P. Peristeri; B. Bektashi; F. Çami; P. Murro (*candidate members*).

*Secretariat of the Central Committee*, Enver Hoxha (*First Secretary*); R. Alia; H. Isai; P. Murra; S. Stefani.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1980) of 2,670,600.

In 1946 Albania was declared an independent Republic. United Kingdom diplomatic relations with Albania ceased in 1939 and have so far not been restored.

Although Albania was almost entirely an agricultural country (staple crops are wheat and maize), industrial expansion of her natural resources is now in process.

**CAPITAL**, Tirana (pop. 200,000).

**FLAG.**—Black two-headed eagle surmounted by yellow outline star, all on a red field.

### ALGERIA

*President of State, Secretary-General of the Party*, Bendjedid Chadli, *elected*, February, 1979.

#### CABINET

*Secretary-General of the Presidency*, Abdelmalek Benhabyles.

*Secretary-General of the Government*, Mohamed Tayebi.

#### Ministers:

*Prime Minister*, Mohamed Benahmed Abdelghani.

*Foreign Affairs*, Ahmed Taleb Ibrahim.

*Interior*, Mohamed Yala.

*Finance*, Boualem Benhamouda.

*Trade*, Abdelaziz Khellef.

*Heavy Industry*, Kasdi Merbah.

*Light Industry*, Said Ait-Messaoudène.

*Energy and Petrochemicals*, Belkacem Nabi.

*Information*, Boualem Bessaïeh.

*Education*, Mohamed Kharroubi.

*Higher Education and Scientific Research*, Abdelhak Brerhi.

*Transport*, Salah Goudjil.

*Labour*, Mouloud Oumeziane.

*Agriculture and Agrarian Revolution*, Salim Saâdi.

*Justice*, Boualem Bakì.

*Tourism*, Abdelmadjid Allahoum.

*Youth and Sports*, Adenour Bekka.

*Planning and Organization of National Territory*, Abdelhamid Brahimi.

*Health*, Abderrazak Bouhara.

*Posts and Telecommunications*, Bachir Rouis.

*Public Works*, Mohamed Kortebi.

*Housing and Construction*, Ahmed Ali Ghazali.

*Religious Affairs*, Abderrahman Chibane.

*Secretary of State for Fisheries*, Ahmed Benfreha.

*Secretary of State for Forests and Afforestation*, Mohamed Rouighi.

#### ALGERIAN EMBASSY IN LONDON 54 Holland Park, W.11 [01-221 7800]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Redha Malek (1982).

*Minister Counsellor*, Mouloud Ali-Khodja.

*Ministers Plenipotentiary*, Mohamed Azzeddine Azouz; Abdelhalim Hammat.

*Counsellors*, Hadj Osman Bencherif; Mohammed Larabi Si-Ahmed; Tabey Saadi.

Algeria lies between 8° 45' W. to 12° E. longitude 27° 6' N. to a southern limit about 19° N. Area, 855,200 sq. miles (estimated). The population is estimated at about 18,250,000.

*Government.*—Algiers surrendered to a French

force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. Between 1955 and 1960 these were reorganized to form 13 departments. The Southern Territories of the Sahara, formerly a separate colony, became an integral part of Algeria on the attainment of independence. In June 1974 there was a further administrative reorganisation resulting in 31 departments. An armed rebellion led by the Moslem *Front de Liberation Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. French control of Algeria came to an end when President de Gaulle declared Algeria independent on July 3, 1962; by October, 1963, all agricultural land held by foreigners had been expropriated and by 1965 more than 80 per cent. of the French population had left Algeria. More have left since.

Ben Bella was elected President of the Republic in Sept., 1963, but was deposed and a Council of the Revolution presided over by Col. Boumediène assumed power on June 19, 1965.

A new constitution was established by referendum on Nov. 19, 1976, and on Dec. 10, 1976 President Boumediène was elected for a six-year term of office. Elections for a national popular assembly were held in Feb. 1977. Following President Boumediène's death in December 1978, M. Bendjedid Chadli was elected President in February 1979.

Development in Algeria is regulated by a series of national development plans. The 1970-73 Plan placed particular emphasis on industrial development. The 1974-77 Plan provided for expenditure of the order of £13,000 million on infrastructure development and social services. The 1980-84 Plan concentrates on housing, water supply and agriculture.

#### Trade with U.K.

	1980
Imports from U.K. ....	£142,500,000
Exports to U.K. ....	114,000,000

Algeria's main exports are crude oil and liquefied natural gas. Principal imports from the United Kingdom are capital plant and equipment for industrial use.

Algeria's main industry is the hydrocarbons industry. Oil and natural gas are pumped from the Sahara to terminals on the coast before being exported; the gas is first liquefied at liquefaction plants at Skikda and Arzew.

Other major industries being developed include a steel industry, motor vehicles, building materials, paper making, chemical products and metal manufactures. All major industrial enterprises are now under State control.

Algeria has a rapidly expanding network of roads and railways. Considerable sums are also being spent on the development of the State airline, the national shipping company and telecommunications.

CAPITAL.—Algiers, population 3,250,000 (approx). It is one of the principal ports of the Mediterranean as well as an important industrial center. Other towns include Oran; Constantine; Annaba; Blida; Setif; Sidi-Bel-Abbes; Tlemcen; Mostaganem; Skikda; Bejaia and Tizi Ouzou.

FLAG.—Red crescent and star on vertically divided green and white background.

NATIONAL DAY.—November 1.

#### BRITISH EMBASSY

Résidence Cassiopee, 7 Chemin de Glycines, Algiers.

*Ambassador Extraordinary and Plenipotentiary, His Excellency Benjamin Leckie Strachan, C.M.G. (1978).*

*Cultural Attaché, British Council Representative, J. M. S. Whittell, 6 Avenue Souidani Boudjemaa, Algiers. There is a British Council library in Algiers.*

## ANDORRA

A small, neutral principality (formed by a treaty in 1278), situated on the southern slopes of the Pyrenees between Spain and France, with an approximate area of 190 square miles and population of about 31,000, one quarter of whom are native Andorrans. It is surrounded by mountains of 6,500 to 10,000 feet. Andorra is divided into seven Parishes, each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-eight. Constitutionally, the sovereignty of Andorra is vested in two "Co-Princes", the President of the French Republic and the Spanish Bishop of Urgel. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. They are represented by Permanent Delegates of whom one is the French Prefect of the Pyrenees Orientales Department at Perpignan and the other is the Spanish Vicar-General of the Diocese of Urgel. They are in turn represented in Andorra la Vella by two resident "Viguiers" known as the Viguier Français and the Viguier Episcopal, who have a joint responsibility for law and order and overall administration policy, together with judicial powers as members of the Supreme Court.

The language of the country is Catalan, but French and Spanish (Castilian) are also spoken. Spanish *pesetas* and French *francs* are the accepted currency and the Budget is expressed in *pesetas*. A good road crossing the Valleys from Spain to France is open all year. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes have been developed for skiing, and it is estimated that 8,000,000 tourists visit the Valleys during the year.

There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

## 790 Foreign Countries—Andorra, Angola, Arabia, Argentina [1983

**CAPITAL:** Andorra la Vella (population 11,750).  
**FLAG.**—Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.  
*H.M. Consul-General, E. V. Vines, O.B.E. (Resident at Barcelona).*

### ANGOLA

*President, Jose Eduardo Dos Santos.*

Angola, which has an area of 488,000 square miles lies on the western coast of Africa; its population in 1972 was estimated at 5,798,000 although in the wake of fighting between the rival liberation movements the white population formerly of several hundred thousand has been greatly reduced, by a mass exodus.

After a Portuguese presence of at least four centuries, and an anti-colonial war since 1961, Angola became independent on Nov. 11, 1975 in the midst of civil war. Soviet-Cuban military assistance to the Popular Movement for the Liberation of Angola (M.P.L.A.) enabled it to defeat its South African-assisted rivals early in 1976. Cuban troops remain in Angola.

Angola exports diamonds and oil, which make up 75-80 per cent of foreign exchange earnings. Otherwise, economic activity has fallen since independence although marked progress has been made in the provision of electricity supplies, health services and primary education.

**CAPITAL.**—Luanda (Est. 480,613 in 1972).

**FLAG.**—Red and black with a yellow star, machete and cog-wheel.

#### Trade with U.K.

	1980
Imports from U.K. ....	£27,811,000
Exports to U.K. ....	83,125,000

*Ambassador Extraordinary and Plenipotentiary, His Excellency Francis Kennedy, C.B.E. (1981).*

### ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E, long, and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from 'Aqaba at the head of the Gulf of 'Aqaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

**Language and Literature.**—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt

and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand and One Nights"), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic-speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

*See also*—BAHRAIN; KUWAIT; OMAN; QATAR; SAUDI ARABIA; THE YEMEN REPUBLICS; UNITED ARAB EMIRATES.

### ARGENTINE REPUBLIC (República Argentina)

*Public Health and the Environment, Dr. Horacio Rodriguez Castells.*

#### EMBASSY IN LONDON

The Embassy closed after the Argentine invasion of the Falkland Islands. Argentine interests in Great Britain are currently handled by the Brazilian Embassy.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from Cordoba in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentine thus contains a succession of level plains, broken only in Córdoba by the San Luis and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra De La Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south Colorado and Rio Negro rise in the extreme

west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 22 provinces, one territory (Tierra del Fuego) and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with a population (Census of 1980) of 27,862,771, an increase of 19.3 per cent. since 1970.

**Government.**—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán.

The first decades after independence were dominated by the dictatorship of Juan Manuel de Rosas. Following his overthrow in 1852, constitutional rule was restored and Buenos Aires was finally established as the seat of the federal government. Compulsory male suffrage was introduced in 1912, but in 1930 the government of Hipólito Irigoyen was overthrown in a military *coup*. In 1945 Juan Domingo Perón became President and supported by his popular wife Evita, established a strong populist regime. Following Evita's death in 1952, Perón's administration became increasingly repressive and he was overthrown in 1955. There followed eighteen years of political and economic instability during which both civilian and military governments failed to match the popularity of Perón's first administration, and eventually in 1973, he was recalled from exile. Elected President he died within a year and was succeeded by his widow, Vice President María Estela Perón, but control of the government passed into the hands of warring factions of the Perónist movement. Increasing terrorist activity eventually led to a bloodless *coup* by the armed forces on March 24, 1976; President

Perón and many of her senior advisers and officials of her Government were arrested. A Junta, consisting of the three commanders of the Armed Forces, was established and one of their number, Lt.-General Videla, was also sworn in as President on March 29, 1976 and was later nominated to serve until March 1981. His successor, former Army Chief of Staff, Lt.-Gen. Viola, was ousted in December 1981 and replaced by Gen. Galtieri. Following the Falkland Islands defeat Gen. Galtieri resigned and the Army appointed Gen. Bignone as President. The Navy and Air Force withdrew from the Junta.

**Agriculture.**—Of a total land area of approximately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar, fruit and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic food-stuffs and conducting a large export trade in many others. Pastoral and agricultural products provide about 85 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the provinces of Buenos Aires, Santa Fé, Entre Ríos, Córdoba and La Pampa.

The following table shows the yield of some of the more important crops:

	1980-81 metric tons
Maize .....	11,000,000
Wheat .....	7,830,000
Linseed .....	510,000
Oats .....	501,000
Barley .....	239,000
Rye .....	178,000
Rice .....	240,000
Sunflower seed .....	200,000
Cotton .....	573,000
Sugar cane .....	16,575,000
Millet .....	200,000
Tobacco .....	78,000
Soya .....	3,700,000

**Livestock.**—Livestock population in 1980 was: cattle, 60,000,000; sheep, 35,000,000; and pigs, 4,000,000. Meat exports to UK were 33,096 tons in 1980.

**Mineral Production.**—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquen), Tartagal (Salta) and in other districts. There are a natural gas pipeline between Comodoro Rivadavia and Buenos Aires, an oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé), a natural gas pipeline from the same source to the outskirts of Buenos Aires and a natural gas pipeline between Neuquen and Bahía Blanca. The production of oil is of first importance to Argentina's industries and, to some extent, to her economic and financial development. Total petroleum output for 1980 was 28,400,000 cubic metres compared with 27,467,000 cubic metres in 1979.

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold, silver and tin. Coal production in 1980 was 4,156,000 tons, compared with 7,270,000 tons in 1979; this is produced at the Rio Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural

resources, especially copper for which the Government and private companies are carrying out exploration.

**Industries.**—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile, plastic and machine tool industries and engineering, especially in the production of motor vehicles and steel manufactures.

**Communications.**—There are 25,386 miles of railways of which 14,000 miles are broad gauge (5' 6"), 2,000 miles standard (4' 8½"), 8,720 miles of narrow 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. Plans are in hand for complete re-organization of the railways in order to improve their operating efficiency and reduce a very large financial deficit. The combined national and provincial road network totals approximately 137,000 miles of which 23,180 miles are surfaced. There are air services between Argentina and all the neighbouring republics, Europe, Asia, Canada, the U.S.A. and South Africa. Total tonnage entering Argentine ports in 1979 was 13,879,391.

There are 16 short-wave broadcasting stations, 150 medium wave (of which 65 are official). In addition there are 65 television stations, of which 4 are in Buenos Aires. About 3.8 million television receivers are in use.

**Defence.**—The Army consists of four corps organized into 12 brigades, including mountain, jungle, airborne and armoured troops. It numbers about 5,000 officers, 15,000 N.C.O.s and 65–70,000 conscripts who serve 1 year.

The Navy consists of 1 aircraft carrier, 9 destroyers, 4 frigates/corvettes, 3 submarines, 4 minesweepers, 1 minehunter and ancillary craft. Strength is about 3,000 officers and 30,000 ratings, including 11,000 conscripts.

The Air Force consists of 9 brigades and a training force, with a strength of 1,600 officers, 15,000 other ranks and 20,000 civilians.

**Education—Primary and Secondary.** The government is formulating a new education policy. At the moment, education is compulsory for the 7 grades of primary school (6 to 13). Secondary schools (14 to 17+) are available in and around Buenos Aires and in most of the important towns in the interior of the country. Most secondary schools are administered by the Central Ministry of Education in Buenos Aires, while primary schools are administered by the Central Ministry or by Provincial Ministries of Education. Private schools, of which there are many, are also loosely controlled by the Central Ministry. **Teacher-Training** now takes place at post school level, courses lasting from 2 to 5 years. **Universities**—Many new universities have been created over the last two years. The total is now over 50 with 24 national (including the Federal Technological University), 25 private and a small number of provincial universities.

**Language and Literature.**—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century. About 450 daily newspapers are published in Argentina, including 7 major ones in the city of Buenos Aires. The English language newspaper is the *Buenos Aires Herald* (daily). There are several other foreign language newspapers.

AUSTRIAN EMBASSY IN LONDON  
18 Belgrave Mews West, S.W. 1  
[01-235 3731]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Reginald Thomas (1982).

*Defence Attaché*, Col. G. S. M. Trofaier.

*Counsellor*, Dr. B. Stillfried (*Cultural*).

*Attachés*, Dr. F. S. Hennerbichler (*Press*).

*Consul-General*, Frau M. Ballod.

*Attachés*, J. Kellner (*Administration*); Frau T. Stockert (*Social Welfare*).

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population (1981), 7,553,380.

**Government.**—The Austrian Federal Republic comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. In March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German Reich under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and a freely-elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the

U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938.

There is a National Assembly of 183 Deputies. In the elections of October 1975, the Socialists won an overall majority of the votes.

The state of the parties in May 1979, was:

Socialist Party .....	95
People's Party .....	77
Freedom Party (right wing) .....	11

**Religion and Education.**—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 15 and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz, Innsbruck, Salzburg, Linz and Klagenfurt.

**Language and Literature.**—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are 6 daily papers in Vienna and 23 in the provinces, as well as numerous weeklies and monthlies.

**Communications.**—Internal communications in Austria are partly restricted because of the mountainous nature of the country, and road and rail routes must, of necessity, follow the river valleys. The railways in Austria are state-owned and have 5,901 km. of track of which 2,949 km. had been electrified by June, 1979. While road surfaces in many cases are not up to British standards, the main roads linking the major towns are generally good and relatively fast. The *Westautobahn*, completed in 1967, links Munich, Salzburg, Linz and Vienna. A second major autobahn (*Inntal Autobahn*) is now complete between Kufstein, Innsbruck and the Brenner pass, thus linking the West German and

Italian autobahn networks through Austria. A third major autobahn (*Südautobahn*) linking Vienna with Graz, Klagenfurt and Villach is under construction and about half of it is already open for use.

**Tourism.**—14,241,392 tourists visited Austria in 1981. Net receipts from tourism were 44,211 million Schillings—a major contribution to the balance of payments.

**Production and industry.**—Agriculture and forestry accounted for 4.65 per cent of the Domestic Product in 1981. The arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth, about 44.2 per cent. of the total land area consisting of forest areas. Coniferous species predominate.

Austria has important heavy industries. Production figures for 1980 include (in thousands of metric tons): pig iron 3,485, steel 4,629, rolled products 3,827.9. Raw magnesite, nitrogenous fertilizers, paper, chemical pulp and synthetic fibres are produced in quantity. In addition, motor cycles, scooters, buses, tractors and motor lorries are produced. Mining and manufactures provided 30.25 per cent and construction 7.3 per cent of the total G.D.P. in 1981.

**Energy.**—Of Austria's energy requirement in 1981, 32 per cent. was supplied from internal sources. Production of crude oil was 1.34 million metric tons in 1981, 12 per cent of annual consumption. Imports of crude oil were 7.5 million tonnes, of which 1.7 million from the U.S.S.R., and 3.1 million from Saudi Arabia. Austria produced 1,436 million cubic metres of natural gas in 1981 and imported 3,990 million cubic metres, of which 3,961 million cubic metres came from the U.S.S.R. In 1981 production of electricity reached 42,894 million kwht, and exports of electric power totalled 7,445 million kwht. A 700 mw nuclear power station had already been constructed when in November 1978 the Austrian people

decided by a very small margin in a national referendum not to allow the introduction of nuclear power stations in Austria.

**Minerals.**—Production of iron and magnesite ore in 1980 was 3.2 million tonnes; of lead and zinc ore 694,545 tonnes; crude magnesite 1.3 million tonnes; gypsum 698,652 tonnes and brown coal 2.9 million tonnes. In addition there are useful deposits of salt and limited deposits of copper, antimony and tungsten.

BAHRAIN EMBASSY IN LONDON  
98 Gloucester Road, S.W.7  
[01-370 5132]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sheik Abdul-Rahman Faris Al-Khalifa.

**Area and population.**—Bahrain consists of a group of low-lying islands situated about half-way down the Gulf, some 20 miles off the east coast of Arabia. The largest of these, Bahrain island itself, is about 30 miles long and 10 miles wide at its broadest. The capital, Manama, is situated on the north shore of this island. The next largest, Muharraq, with the town and Bahrain International Airport, is connected to Manama by a causeway 1½ miles long.

The population (1981) is 358,857, of whom 142,779 are foreign. The Bahrainis are about equally divided between Sunnis and Shias; the ruling family and many of the most prominent merchants are Sunnis.

**Climate.**—The climate is humid all the year round, with rainfall of about 3 in., concentrated in the mild winter months, December to March; in summer, May to October, temperatures can exceed 110° F.

**Government.**—Bahrain has been a fully independent state since 1971. Government takes the form of a constitutional monarchy, in which traditional consultative procedures continue to play an important role.

**Economy.**—The largest source of revenue is oil. The Bahrain field, discovered in 1932, is now wholly owned by the Bahrain National Oil Co. Production in 1981 was 16.86 million barrels. The Sitra refinery derives about 70 per cent. of its crude oil by submarine pipeline from Saudi Arabia. Bahrain also has a half share with Saudi Arabia in the profits of the offshore Abu Sa'afa field. A reservoir of unassociated gas has recently been developed on Bahrain island.

Heavy industry is currently limited to the Aluminium Bahrain smelter, with an annual capacity of 181,000 tonnes of ingots, billets and slabs; it used alumina from Australia and the local natural gas. The Bahrain Government owns 77.9 per cent. of the shares. A dry dock built for a consortium of the OPEC countries and capable of taking tankers of up to 500,000 dwt was opened in 1977. A large petrochemical plant to produce ammonia and methanol is part of Bahrain's industrial development.

The pearling industry, once the basis of the economy, has virtually ceased to exist. There is however a variety of light industries.

The state is being developed as a financial centre. Apart from commercial banks, led by the National Bank of Bahrain, the Chartered Bank, the British Bank of the Middle East and the Bank of Bahrain and Kuwait, many international banks are being licensed as "offshore banking units"; there are also money brokers and merchant banks.

The currency is the Bahraini Dinar (BD) divided into 1,000 fils. In May 1981 it was worth approximately US \$2.65.

## Trade with U.K.

	1980
	million
Imports from U.K. ....	BD115.6
Exports to U.K. ....	25.1

**Communications.**—The port of Mina Sulman has sixteen alongside berths for ships up to 36' draft.

Bahrain International airport is the main air traffic centre of the Gulf; it is the headquarters of Gulf Air, and a stopping point on routes between

Europe and Australia and the Far East, including British Airways.

A world-wide telephone and telex service, by satellite, is operated by Bahrain Telecommunications Company.

FLAG.—Red, with vertical serrated white bar next to staff.

CAPITAL.—Manama; population (1979) 120,000.

#### BELGIAN EMBASSY IN LONDON

103 Eaton Square, S.W.1.

[01-235 5422]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency M. Robert Vaes, k.c.m.g.

*Minister Plenipotentiary*, M. N. Cockx.

*Minister Counsellor*, M. B. Lauwaert (Economic).

*Military, Naval and Air Attaché*, Col. D. X. Gysemans.

A Kingdom of Western Europe, with a total area of 11,781 square miles and a population, (1981) of 9,848,647. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S.

by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 898 miles, and a seaboard of 41 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Signal de Botranges, rises to a height of 2,276 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is divided linguistically between those who speak Dutch (the Flemings, in the North) and those who speak French (the Walloons, in the South) with a small German-speaking region east of Liège. Nearly all Belgians are Roman Catholics.

*Government*.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 4, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September 1944.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The parliamentary term is four years.

The last general election was held on November 8, 1981. The results were as follows (seats):

*Chamber of Deputies*: CVP, 43; PVV, 28; BSP, 26; VU (Flemish Nationalists), 20; Ecology, 4; PSC, 18; PRL (Liberal), 24; PSB, 35; RW (Walloon Regional

ist)/FDF, 18; UDRT (anti-tax), 3; Communists, 2.

*Senate:* Christian Socialists, 60; Socialists, 55; Liberals, 47; Flemish Nationalists, 14; Ecologists, 5; Walloon Regionalists, 2; Communist, 1; Brussels Francophone, 1; UDRT (anti-tax), 1. Besides these directly elected representatives the Senate also includes a number of members who are elected by the Provincial Councils and 25 who are co-opted in the proportions of the directly elected seats. H.R.H. Prince Albert is a "sénateur de droit".

*Production.*—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly averaged some 30,000,000 tons but which dropped to 6,590,000 metric tons in 1978 following the closing of uneconomic pits. Industry is based largely on the processing for re-export of imported raw materials. In 1978 3.1 per cent. of the active population was engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainaut, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Crude steel output in 1978 was 12,600,000 metric tons.

*Education.*—In 1980, the budget for education (200,000,000,000 Belgian francs) represents 17.3 per cent of the national budget and does not include the amount spent by the Communes, provinces and the church in subsidized schools. The nursery schools provide free education for the 2½ to 6 age group. There are over 8,000 primary schools (6 to 12 years) of which approximately 5,000 are administered by the State, province or commune and the remainder are free institutions (predominantly Roman Catholic). There are more than 1,100 secondary schools offering a general academic education slightly over half of which are free institutions (predominantly Roman Catholic but subsidized by the State) and the remainder official institutions. The official school leaving age is 14.

*Language and Literature.*—Dutch is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainaut, Namur, Luxembourg, Liège and the southern half of Brabant. Dutch is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. Brussels is officially bilingual. There is a small German-speaking group along the German border, east of Liège.

In July, 1971, the Belgian Parliament passed three Bills together implementing the constitutional amendments introduced in December 1970, to ease friction between the French-speaking and Dutch-speaking communities. The first Bill established a cultural council for each linguistic group, in operation from Dec. 1, 1971, all members of the Chamber of Representatives and the Senate being members of one council or the other. A Cultural Council for the German-speaking community also has since been established. The second Bill defined the powers of the cultural councils, providing that the councils would be responsible for certain aspects of cultural life; commission for co-operation with the other council would be set up, with a statutory obligation to hold at least two meetings with the other council in each Parliamentary session. The third Bill provided for the establishment of five "agglomerations" of municipalities centred on Antwerp, Brussels, Charleroi, Ghent and Liège and the federation of small municipalities, with special provision in respect of the border boroughs of Brussels (which have a predominantly Flemish population) designed gradually to reduce the influence of the French

speakers in that area. Regional councils for Flanders, Wallonia and Brussels were established in 1974.

The literature of France and the Netherlands is supplemented by an indigenous Belgian literary activity, in both French and Dutch. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Emile Verhaeren (1855-1916) was a poet of international standing. Of contemporary Belgian writers, perhaps the most celebrated is Georges Simenon (born at Liège in 1903). There are 44 daily newspapers (French, Dutch and some German) in Belgium.

## FINANCE

Budget	1981 B. Fr. (millions)
Revenue .....	1,158,800
Expenditure .....	1,609,000

The unit of currency is the Belgian *franc*. (See also p. 83.) External trade figures relate to Luxembourg as well as Belgium since the two countries formed an Economic Union in 1921.

## TRADE

	1981 B. Fr. (millions)
Total Imports .....	2,296,600
Total Exports .....	2,059,900

*Communications.*—On Dec. 31, 1979, there were 4,050 kilometres of normal gauge railways operated by the Belgian National Railways, of which 1,301 kilometres were electrified; the length of regional railways operated in 1979 was 200 kilometres. The Belgian National Light Railways (SNCV) also operated 25,124 kilometres of regular bus routes. On Dec. 31, 1978, there were 2,159,000 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands) which permits the passage to Ghent of ships up to 60,000 tons; the Canal of Willebroek Rupel-Brussels (20 miles, by which ships drawing 18 ft reach Brussels from the sea; opened in 1922); and *Bruges* (from Zebrugge on the North Sea to Bruges, 6½ miles). The *Albert Canal* (79 miles), links Liège with Antwerp; it was completed in 1939 and accommodates barges up to 1,350 tons. The modernization of the port of Antwerp is well advanced. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp-Ghent and the Brussels-Charleroi Canal are being widened or deepened to take barges up to 1,350 tons.

In 1977 there were 11,277 km. of trunk roads of which about 1,082 km. are motorways. Most of the maritime trade of Belgium is carried in foreign shipping, the mercantile marine consisting (in 1977) of 90 vessels (2,530,812 metric tons), in addition to which there were 216 fishing boats.

The Belgian National Airline *Sabena* operates regular services between Brussels and London, and many continental centres, as well as overseas services to the United States, Zaire, Canada, Mexico, Guatemala, Middle East, Far East, India, etc. Many foreign airlines call at Brussels.

*Cities and Towns.*—The Capital, BRUSSELS, has a population (1981) of 997,293 (with suburbs). Other towns are Antwerp, the chief port (918,144); Ghent (485,565), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp; Liège (605,123), the centre of the iron

industry, and Charleroi (450,110), an important coal-mining and metallurgical centre; ΨBruges (252,430); ΨOstend (270,888); Malines (291,459). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, 50 mins.

**NATIONAL FLAG.**—Three vertical bands, black, yellow, red.

**NATIONAL DAY.**—July 21 (Accession of King Leopold I, 1831).

**BRITISH CHAMBER OF COMMERCE FOR BELGIUM AND LUXEMBURG (INC.)**, 30 Rue Joseph II, 1040 Brussels.

## BENIN

(People's Republic of Benin)

*President of the Military Revolutionary Government and Head of State*, Lt.-Col. Mathieu Kerekou; *assumed office*, October 26, 1972.

A republic situated in West Africa, between 2° and 3° W. and 6° and 12° N., Benin (formerly known as Dahomey) has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by Upper Volta and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population (estimate, 1976) of 3,200,000. Although poor in resources, Benin is one of the most thickly populated areas in West Africa, with a high level of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of inter-communicating lagoons, a clay belt and a sandy plateau in the north.

The first treaty with France was signed by one of the kings of Abomey in 1851 but the country was not placed under French administration until 1892. Benin became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. In October, 1963, a popular revolution led to the fall of the government of the first President of Benin, Hubert Maga. The Army held power until Sourou-Migan Apithy was elected President and Justin Ahomadegbé Chief of Government in January, 1964, after a new constitution had been agreed. This government was overthrown in November, 1965, following a long-standing disagreement between Maga and Apithy. It was replaced by President Tahirou Congacou, who was in turn dismissed in December of the same year by the Army. Christophe Soglo then assumed control and dismissed the Assembly. Soglo was in his turn overthrown by an Army *coup d'état* on December 17, 1967. Seven months later Dr. Zinsou was installed, with the

support of the Army, as President, an appointment which was confirmed by a national referendum on July 28, 1968.

Dr. Zinsou was overthrown by a military coup on December 10, 1969 and for five months the country was ruled by a military "Directoire". Following abortive elections in March, 1970, a Presidential Council was set up in May, 1970 consisting of MM. Maga, Ahomadegbé and Apithy, with M. Maga as President of the Council and Head of State. He was succeeded in May, 1972 by M. Ahomadegbé, who in turn would have been succeeded in May 1974 by M. Apithy, but for the *coup d'état* of October 26, 1972 which brought the Military Revolutionary Government, headed by Lt.-Col. Kerekou, to power. General elections were held in Nov. 1979, and a new Constitution and National Assembly were established.

Benin is a member of the *Conseil de l'Entente*, the *Organisation Commune Africaine et Malgache* (OCAM), the Organization of African Unity (O.A.U.) and the Economic Community of West African States (ECOWAS). The official language is French.

**Finance.**—The currency of Benin is the *Franc CFA* (*Francs CFA* 50=1 French *Franc*).

**Trade.**—The principal exports are palm products (80 per cent.) followed by ground nuts, shea-nuts, cotton and coffee. Small deposits of gold, iron and chrome have been found; oil production is scheduled to begin in 1983.

#### Trade with U.K.

	1980
Imports from U.K. . . . . .	£13,120,000
Exports to U.K. . . . . .	2,860,000

**CAPITAL.**—Porto Novo (104,000). Political capital and principal commercial town and port, ΨCotonou (178,000).

**FLAG.**—Green, with five pointed red star in the top left corner.

**NATIONAL DAY.**—November 30.  
*British Embassy* (see Lagos, Nigeria).

## BHUTAN

*King of Bhutan*, H.M. Jigme Singye Wangchuck, born 1955; *succeeded his father*, July, 1972; *crowned*, June 2, 1974.

#### COUNCIL OF MINISTERS

*H.M. Representative in the Ministry of Finance*, H.R.H. Ashi S. C. Wangchuk.

*H.M. Representative in the Ministry of Development*, H.R.H. Ashi D. W. Wangchuk.

*Trade, Industry and Forests*, H.R.H. Namgyel Wangchuk.

*Home Affairs and Speaker of the National Assembly*, Lyonpo Tamji Jagar.

*Foreign Affairs*, Lyonpo Dawa Tshering.

*Communications and Tourism*, Lyonpo Sangye Penjor.

*Deputy Minister of Defence*, Col. Lam Dorji.

Bhutan, with an area of about 18,000 sq. miles and an estimated population (1978) of 1,247,000, mainly Buddhists, is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a State of the Indian Union. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains independence, issues its own passports and has diplomatic representatives at the United Nations, India and in Bangladesh.

It also receives from the Government of India an annual payment of Rs.500,000 as compensation for portions of its territory annexed by the British Government in India in 1864. India provides 75% of the budget for Bhutan's 6-year plan (1981-7).

Bhutan has a National Assembly which meets twice a year. The Royal Advisory Council, nominated by the King and the National Assembly, acts as a consultative body when the National Assembly is not in session. The King is also assisted by a Council of Ministers.

The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. Tourism and postage stamps are increasingly important sources of foreign exchange. A motor road runs 107 miles from Paro, the winter capital, to Phuntsholing. Three other roads linking Bhutan with India are under construction or projected. The Government of India has a diplomatic representative in Bhutan.

The State Religion is Mahayana Buddhism. There are a number of Hindus living in the south of the country. The official language is Dzongkha, a dialect of Tibetan; there are many local variations.

CURRENCY.—Ngultrum (parity with Indian rupee).

CAPITAL.—Thimphu.

FLAG.—Orange and crimson divided diagonally, with dragon device in centre.

## BOLIVIA (República de Bolivia)

*President of the Republic, General Guido Vildoso, took office, July 22, 1982.*

BOLIVIAN EMBASSY IN LONDON  
106 Eaton Square, S.W.1  
[01-235 4248]

*Minister Counsellor, Sr. Humberto Zannier.*

*1st Secretary, Srta. Marta Bosacomá Bonel.*

*Civil Attaché, Sr. Fernando Gaya.*

*Attaché, Sra. Maria Elena Diaz.*

There are Bolivian Consular Offices in *Liverpool, Birmingham and Hull.*

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W. It has an area estimated at 415,000 square miles with a population (1976) of 4,700,000. (*For MAP, see Index.*) The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenez, Beni, Mamore and Madre de Dios.

Mining, natural gas, petroleum and agriculture are the principal industries. The ancient silver mines of Potosí are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaysia, the largest in the world. Copper, antimony, lead, zinc, asbestos, wolfram, bismuth salt and sulphur are found. 30,000 tons of tin are produced, and together with other minerals provide over half of Bolivia's exports.

In 1980 Bolivia produced about 22,000 barrels of oil a day, sufficient for internal consumption. Production should increase to about 28,000 barrels a day by late 1981. Gas (currently providing about a quarter of Bolivia's export income) is piped to Argentina and there are plans to build a pipeline to Sao Paulo, Brazil, by 1985. Bolivia's agricultural produce consists chiefly of rice, barley, oats, wheat, sugar-cane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts etc. Total exports (F.O.B.) in 1980 were U.S. \$1,033 million.

*Transport and Communications.*—There are 2,200 miles of railways in operation including the lines from Corumbá to Santa Cruz (312 miles). There are about 10,950 miles of telegraphs, and microwave telephone communications between La Paz, Santa Cruz, Cochabamba, Oruro and Sucre; there are plans to include other cities in the network soon. Most other towns of any size have radio/telephone communication with the main cities. There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (34 days); branch lines run from Oruro to Cochabamba, and from Río Mulato to Potosí, and from Potosí to Sucre, the legal capital. The Antofagasta (Chile) and Bolivia Railroad was formerly an all-British concern, but the Bolivian sector has now been nationalized. Communication with Peru is effected by rail to Guaquí and thence by steamer across lake Titicaca to the railhead at Puno.

Commercial aviation in Bolivia is conducted by Braniff International Airways (American), Lufthansa, Avianca, Aerolíneas Argentinas, Cruzeiro do Sul (Brazil), and Lloyd Aéreo Boliviano (Bolivian), providing international connections with U.S.A., West coast South American countries, Canal Zone, Europe, Brazil and Argentina; local flights provided by Lloyd Aéreo Boliviano and Transporte Aéreo Militar link La Paz, Oruro, Cochabamba, Santa Cruz, Tarija, Sucre, Trinidad and other towns.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones and Antofagasta by the "Pacific War" of 1879-1884.

*Language and Literature.*—The official language of the country is Spanish, but many of the Indian inhabitants (about two-thirds of the population) speak Quechua or Aymará, the two linguistic groups being more or less equal in numbers.

The Roman Catholic religion was disestablished in 1961 but relations between it and the State are good. Elementary education is compulsory and free and there are secondary schools in urban centres. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are six other universities, the largest being the University of San Andrés at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are four principal daily newspapers in Bolivia.

### FINANCE

The economy has deteriorated since 1977, with disappointing petroleum reserves and a large external debt. The position worsened in 1981 when world tin prices remained low. The peso was devalued to 25 to 1 U.S. dollar in November 1979. The inflation rate in 1980 was just below 60 per cent.

### Trade with U.K.

	1980
Imports from U.K. ....	£8,684,000
Exports to U.K. ....	33,179,000

Mineral exports represent about 83 per cent of

these totals. A large part of Bolivia's minerals were shipped to U.K. for smelting and re-export, but Bolivia is now developing her own smelters and will in future be exporting metals. The chief imports are wheat and flour, iron and steel products, machinery, vehicles and textiles.

*Seat of Government.*—La Paz. Population (census 1976) 654,700. Other large centres are Cochabamba (194,000), Oruro (124,000), Santa Cruz (237,000), Potosí (77,000), Sucre, the legal capital and seat of the judiciary (63,000) and Tarija (38,500).

FLAG.—Three horizontal bands; red, yellow, green.

NATIONAL DAY.—August 6 (Independence Day).

BRITISH EMBASSY  
Casilla 694, La Paz.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Stanley Frederick St. Clare Duncan (1981).

*1st Secretary*, T. H. Steggle (*Commercial and Head of Chancery*).

There are British Consular Offices at *La Paz* and *Cochabamba*.

BRAZIL  
(The Federative Republic of Brazil)

*President*, General João Baptista de Figueiredo; *elected*, October 15, 1978; *inaugurated*, March 15, 1979.

*Vice-President*, Aureliano Chaves.

BRAZILIAN EMBASSY IN LONDON  
32 Green Street, W.1.  
(01-499 0877)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Roberto de Oliveira Campos (1975).

*Minister-Counsellor*, José Olympio Rache de Almeida.

*Minister*, S. de C. Weguelin Vieira (*Consular*).

*Air Attaché*, Col. U. S. N. Batista.

*Naval and Military Attaché*, Capt. P. C. de A. Adriaio.  
*Consular Section*, 6 Deanery Street, W.1 (01-499 7441).

*Commercial Section*, 15 Berkeley Street, W.1 (01-499 0877).

There are also a Brazilian Consulate-General at *Liverpool* and honorary consular offices at *Cardiff* and *Glasgow*.

POSITION AND EXTENT

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,685 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles, with a population (1980 census) of 119,098,922.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central states of Mato Grosso are principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are

*Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra da Mantiqueira* (Itatiaia, 9,163 feet) and the *Serra do Espinhaço* (Itacolomi, 5,748 feet), in the south-east of Minas Gerais; the *Serra do Paraná*, between Goiás and Minas Gerais, the *Serra dos Aimorés*; which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia*, *Branca* and *Arapize*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingú* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from the Plateau of Mato Grosso and the mountains of Goiás to the Gulf of Pará. The *Parnaíba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguai*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Iguaçu* or *Iguassú*, which unites with the Upper Paraná at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Iguaçu* (200 ft.), and on the *São Francisco* are the no less famous falls of *Paulo Afonso* (260 ft.).

*Government.*—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King Joao VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed.

The Federative Republic of Brazil is made up of the Federal District, 23 States and 3 Territories (the most under-developed frontier regions). The constitution of January 1967 draws on the same conceptual basis as that of the United States, and envisages an equal distribution of power between the Executive, the Legislature and the Judiciary. The President, who heads the Executive of the Federal Government, will in future be elected for a 6-year term by an electoral college consisting of the Congress and representatives of the State Legislative Assemblies. The next Presidential elections will be in January 1985.

The Congress consists of a Senate (3 Senators per State elected for an 8-year term) and a Chamber of Deputies which is re-elected every 4 years. (The number of Deputies per State depends upon the State's population). Each State has a Governor, and a Legislative Assembly with a 4-year term.

*Production.*—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is being exploited to an increasing extent. The iron ore deposits of Minas Gerais and the untapped ones of the Amazon region are particularly rich and plans for mining them are advanced. Production is increasing all the time.

Electric power production in 1981 was 143,580 Gwh. In the same year, the total output of pig-iron was 10,791,200 tonnes and oil output was 12,384,000 cubic metres.

Agriculture production in 1981 was:

Black Beans .....	2,345,000 tonnes
Casava .....	25,638,000 "
Castor Beans .....	303,900 "

Cocoa .....	304,000	tonnes
Coffee .....	3,775,000	"
Cotton .....	1,758,000	"
Maize .....	21,141,000	"
Oranges .....	57,339,000	"
Peanuts .....	324,000	"
Potatoes .....	1,891,000	"
Rice .....	8,495,000	"
Sisal .....	203,000	"
Soya .....	15,290,000	"
Sugar .....	154,660,000	"
Tobacco .....	354,000	"
Jute .....	98,000	"
Wheat .....	2,029,000	"

*Defence.*—The peace-time strength of the Army is 182,750 of which 15,280 are officers and warrant officers and 35,500 are N.C.O.s and 132,000 conscripts. The Navy consists of 1 aircraft carrier, 8 submarines, 10 destroyers, 6 frigates, 10 patrol vessels, 5 river patrol ships, 1 river monitor, 1 river transport, 6 coastal mine sweepers, 7 survey ships, and 29 other vessels. The strength of the Navy is 49,000. The Air Force, with a strength of 43,000, has 696 aircraft, of which 192 are fast-jet.

*Education.*—Primary education is compulsory and is the responsibility of State governments and

municipalities. At this level approximately 10 per cent. attend private schools. Secondary education is largely the responsibility of the State and Municipal Governments, although a small number of very old foundations (the Pedro II Schools) remain under direct federal control. Over 50 per cent. of all pupils at this level attend Private Schools. Higher education is available in Federal State, Municipal and private universities and faculties.

*Language and Literature.*—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers.

*Communications.*—In 1976 there were 1,489,065 km. of highways. The route-length of railways in 1977 was 28,763 km. Seventy-eight aviation com-

panies (25 foreign) provide air-mail and passenger services. There are 21,944 miles of navigable inland waterways. During 1975, 6,919 vessels entered Rio de Janeiro and Santos, the two leading ports.

FINANCE

	1981 <i>Cruzeiros</i>
Revenue .....	2,261,969 million
Expenditure .....	1,899,323 million

In 1981 Brazil's foreign debt stood at U.S.\$61,410.8 million. Reserves in 1981 were \$7,506.8 million.

TRADE (1981)

Total imports .....	U.S.\$22,080 million
Total exports .....	U.S.\$23,293 million

Trade with U.K. (1981)

Imports from U.K. ....	U.S.\$329,600,000
Exports to U.K. ....	U.S.\$734,900,000

Principal imports are fuel and lubricants, machinery, chemicals, wheat, metals and metal manufactures. Principal exports are coffee, iron ore, cotton, sugar and pinewood. In 1981 the Brazilian automobile industry produced 1,062,197 vehicles. Of these, 779,836 vehicles (worth U.S. \$2,200,000,000) were exported.

**CAPITAL.**—Brasilia (inaugurated on April 21, 1960). Population (Census 1980), 1,176,748. Other important centres are São Paulo (8,490,763); the former capital  $\Psi$ Rio de Janeiro (5,094,396);  $\Psi$ Belo Horizonte (1,774,712);  $\Psi$ Recife (1,204,794);  $\Psi$ Salvador (1,017,591);  $\Psi$ Porto Alegre (1,125,091);  $\Psi$ Fortaleza (1,308,859); and Belem (934,330).

**FLAG.**—Green, with yellow lozenge in centre; blue sphere with white band and stars in centre of lozenge.

**NATIONAL DAY.**—September 7 (Independence Day).

*The Politbureau of the Central Committee, A. Lilov; G. Filipov; P. Kubadinski; S. Todorov; T. Zhivkov; T. Dragoicheva; D. Dzhurov; O. Doinov; P. Mladenov; T. Bozhinov; M. Balev (full members); A. Lukanov; G. Yordanov; P. Dyulgerov (candidate members).*

*The Secretariat of the Central Committee, Todor Zhivkov (Secretary-General); A. Lilov; O. Doinov; G. Atanasov; D. Stanishev; S. Michailov; M. Balev; M. Mishev; C. Alexandrov; V. Tsanov; X. Zarev.*

BULGARIAN EMBASSY AND CONSULATE IN LONDON  
186-188 Queen's Gate Gardens, S.W.7.  
[01-584 9400]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Kiril Shterev* (1980).

The Republic of Bulgaria is bounded on the north by Rumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population in December, 1975 of 8,730,000. The largest religion of the Bulgarians is the Bulgarian Orthodox Church. The Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 101 seats out of 465.

On May 16, 1971 a referendum was held, at which a new Constitution was adopted. According to the Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage for a maximum term of 5 years and consisting of 400 deputies representing constituencies of equal size. The 1971 Constitution also established the Council of State, being the supreme permanent body of the National Assembly with both legislative and executive functions. The opposition Agrarian Party was suppressed in 1947, but its remnant was later revived as the Agrarian Union which now constitutionally shares power with the Communist Party.

*Production*.—Until 1939 Bulgaria was a predominantly agricultural country, but has since pursued

an elaborate programme of industrialization. About 90 per cent of the country's agriculture has been turned over to co-operatives, and a smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The livestock includes cattle, sheep, goats, pigs, horses, asses, mules and water buffaloes.

There is now a substantial engineering industry producing *inter alia* machine tools, electric trucks of all kinds, agricultural machinery, cranes, electric motors and electronic components, which accounts for about two-thirds of Bulgaria's exports; and considerable production of ferrous and non-ferrous metals. In 1975 production of electricity was 25,232 million kilowatt-hours, of steel 2,265,000 tons and of coal 28,920,000 tons (of which about one-quarter was soft coal).

There are mineral deposits of varying importance. Bulgaria's heavy industry includes the Kremilkovski Steel Plant near Sofia and the Lenin steel mill at Pernik, the chemical complex at Devnia, the petro-chemical plant at Bourgas with an annual capacity of 6 million tons of processed oil and various other chemical and metallurgical works situated around the country. The Soviet-designed nuclear power station at Kozlodui will have four reactors, each with a capability of producing 800 million kilowatt/hours; in 1976 two were in operation.

*Defence*.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 152,000 strong.

*Education*.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1975 there were 7,553 kindergartens, and a total of 4,485 educational establishments for primary and secondary education including vocational, technical and other specialized schools for secondary age pupils. The total number of pupils attending these establishments was 1,529,857. There are three Universities (at Sofia, Plovdiv and Veliko Turnovo) and 21 higher educational establishments whose pupils total 106,055.

*Language and Literature*.—Bulgarian is a Southern Slavonic tongue, closely allied to Serbo-Croat and Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature chiefly educational and popular. The alphabet is Cyrillic. In 1967 there were 8 daily newspapers in Sofia.

*Finance*.—Estimated budget revenue for 1980 was 13,187,000,000 *levs*, expenditure 13,167,000,000 *levs*. Currency in Bulgaria is the *lev*.

#### TRADE

The principal imports are industrial and agricultural machinery, industrial raw materials, machine tools, chemicals, dyestuffs, pharmaceuticals, rubber, paper. The principal exports are non-ferrous metals, electric trucks and motors, pumps, ships, accumulators and machine tools, cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals and oils including attar of roses. In 1978, 80 per cent of Bulgaria's foreign trade was with the Soviet bloc, including 57 per cent with the Soviet Union.

#### Trade with U.K.

	1979
Imports from U.K. ....	£27,324,000
Exports to U.K. ....	12,082,000

*CAPITAL*.—Sofia, Pop. (1980), 1,056,945, at the foot of the Vitosha Range, the capital and commercial centre is on the main railway line to Istanbul, 338

miles from the Black Sea port of ΨVarna (291,224) and 125 miles from Lom (28,500), on the Danube; Ψ Bourgas (168,412) is also a Black Sea Port, those on the Danube being ΨRousse (172,782), ΨVidin (59,434). Other important trading and industrial centres are Plodiv (350,438), Plevn (127,716), Stara Zagora (136,177), Pernik (92,653), Sliven (97,714), Yambol (82,523), Haskovo (84,117) and Tolbukhin (95,672).

FLAG.—3 horizontal bands, white, green, red; national emblem on white stripe near hoist.

NATIONAL DAY.—Sept. 9 (Day of Freedom).

#### BRITISH EMBASSY

*Residence*, 65 Boulevard Tolbukhin, Sofia.

*Health*, U Tun Way.

*Mines*, Brigadier-General Than Tin.

#### BURMESE EMBASSY AND CONSULATE

19A Charles St., Berkeley Square, W.1.

[01-499 8841]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency U Myo Aung (1981).

*Area and Population*.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 9' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west and a frontier with Bangladesh along the Naaf River, defined in 1964 by a Memorandum of Agreements, and India to the north-west defined in 1967. In the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and has since been demarcated; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. (*For MAP, see Index*). The total area of

the Union is about 262,000 square miles, with an officially estimated population of 33,310,000 in 1979—about 127 persons to the square mile.

*Political Divisions*.—The Socialist Republic of the Union of Burma is comprised of fourteen States and Divisions. Amongst the former are the Kachin State (34,000 sq. miles), Kayah State (4,500 sq. miles); Karen (formerly Kawthoolei) State (12,000 sq. miles), Chin State (14,000 sq. miles), Mon State, Arakan State and the Shan State (60,000 sq. miles).

*Physical Features*.—Burma falls into four natural divisions. Arakan (with the Chin Hills region) the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan State. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

*Races, Language and Religions*.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Thai groups. The three important non-indigenous elements are Indians, Chinese and those from the former East Pakistan. Numbers of resident foreigners have shown a sharp decline in recent years. Burmese is the official language, but minority languages include Shan, Karen, Chin, Kayah and the various Kachin dialects. English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent of the people, with 5 per cent Animists, 4 per cent Moslems, 4 per cent Hindus and rather less than 3 per cent Christians.

*Government*.—Burma became an independent republic outside the British Commonwealth on January 4, 1948, and remained a parliamentary democracy for 14 years.

On March 2, 1962 the army took power, and suspended the parliamentary Constitution. A Revolutionary Council of senior officers under General Ne Win took measures to create a Socialist State.

In January 1974 a new Constitution was adopted after a national referendum. On March 2 the Revolutionary Council transferred power to the bodies elected under the new Constitution. The highest authority is the People's Assembly (450 representatives) which meets twice a year. When the Assembly is not in session the Council of State (29 members) is vested with wide powers. The senior executive body is the Council of Ministers. The Chairman of the Council of State (U Ne Win) is also President of the Socialist Republic of the Union of Burma.

*Education*.—The literacy rate is high compared with other Asian countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade.

Most Burmese children attend primary school, and about 3½ million are said to be currently enrolled; in Middle and High schools, perhaps 900,000. The drop-out rate is high.

There are two Arts and Science Universities, at Rangoon and Mandalay, and in 1978/79 the numbers graduating were 6,200. A number of autonomous institutes of university standard award their own degrees: three Institutes of Medicine (two at Rangoon, one Mandalay), and one each of Animal Husbandry & Veterinary Science, Economics, Technology, Agriculture, Education and Dental Medi-

cine. Under the two Universities are affiliated colleges at Bassein, Moulmein and Magwe, and the Workers' College, Rangoon. Since 1976, an increasing number of Regional Colleges (now 21) throughout the country have provided two-year pre-University and vocational courses. Attendance at these is compulsory for all students entering higher education.

Teachers' colleges at Rangoon, Moulmein and Mandalay train teachers for Middle and Primary schools, and 13 teacher training Institutes (not to be confused with the professional Institutes, above) for Primary only. There are 9 Vocational schools for weaving, handicrafts and so on, 21 technical institutions of different standards, and 11 Agricultural high schools. Britain grants aid to Burma under the Colombo Plan.

**Finance.**—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1980-81 were: Revenue, K25,068,700,000; Expenditure, K26,610,700,000. The monetary unit is the *Kyat* of 100 *Pyas*. (For rate of exchange, see p. 83.)

**Production, Industry and Commerce.**—Three-quarters of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat, grain, tea, sugarcane, Virginia and Burmese tobacco, jute and rubber. Rice has traditionally been the mainstay of Burma's economy and the quantity of rice and by-products available for export was 671,700 tons in 1980.

The net area sown to all crops in 1978-79 was 24,409,000 acres and reserved forests covered 38,315 square miles. The principal export after rice is teak, of which some 200,000 tons were exported annually before the war. The 1980 figure was 123,100 cubic tons.

Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum products are the most important. Oil is now being produced from oilfields in Myanaung, Prome and Shwepyitha and at Chauk, Yenangaung, Mann, and Letpando. Production of crude oil in 1980 totalled 10,410,645 U.S. barrels. There is a refinery at the main oilfield, Chauk, another at Syriam near Rangoon and a third is being built at Mann. Present output of petroleum products is sufficient for most of Burma's needs and some heavy petroleum oil is exported. Oil extraction and the production and distribution of petroleum are monopolies of the Myanma Oil Corporation and the Petroleum & Chemical Industries Corporation respectively. Offshore oil exploration, begun in 1974, was suspended in 1977.

All industrial activity of any size is in the public sector. Under development plans, projects completed or under construction with overseas financial and technical assistance include the production of cement, bricks and tiles, sheet glass, steel sections, jute bags and twine, cotton yarns, cotton and cotton mixture cloth, pharmaceuticals, sugar, paper, plywood, urea fertilizers, soda ash, tractors and tyres; also a hydro-electric scheme and various irrigation works. Japan continues to be the major individual donor of soft loans and grant aid in the industrial and agricultural sectors. West Germany has also been an important contributor of soft loans. In 1980 the British Government made a £3.6 million grant to assist in the fishery development schemes on the Arakanese coast at Sandoway.

Loans amounting to US \$125 million have been extended by the World Bank. As a member of the Colombo Plan since 1952 Burma continues to receive

technical assistance from a number of countries and international agencies.

#### Trade with U.K.

	1980
Imports from U.K. ....	£20,494,000
Exports to U.K. ....	5,379,000

**Communications.**—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein. Transit from London to Rangoon: by sea, 35 days; by air (via Bangkok), 16 hours.

The Burma Railways network covers 2,780 route miles, extending to Myitkyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and there are now 193 diesel locomotives in service, as well as 193 steam. There were 2,452 miles of Union highways and 11,530 miles of other main roads in 1979-80. The airport at Mingaladon, about 13 miles north of Rangoon, only handles limited international air traffic.

**CAPITAL.**—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1973), 3,186,886.

Mandalay, the chief city of Upper Burma, had a population of 781,819 in 1973, Moulmein of 679,484 and Bassein of 335,588. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

**FLAG.**—The Union flag is red, with a canton of dark blue, inside which are a cogwheel and two rice ears surrounded by 14 white stars.

**NATIONAL DAY.**—January 4.

#### BRITISH EMBASSY (80 Strand Road, Rangoon)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Charles Leonard Booth, C.M.G., M.V.O. (1978).

*1st Secretaries*, J. R. Leeland (*Head of Chancery and Consul*); G. G. Collins (*Commercial*).

*2nd Secretary*, R. Milburn.  
*Cultural Attaché*, (vacant).

#### BURUNDI (Republic of Burundi)

*President*, Col. Jean-Baptiste Bagaza, *assumed office* Nov. 1, 1976.

Formerly a Belgian trusteeship under the United Nations, Burundi was proclaimed an independent State on July 1, 1962. Situated on the east side of Lake Tanganyika, the State has an area of 10,747 sq. miles and a population (estimated, 1977) of 3,900,000. The majority of the population are of the Bahutu ethnic group, but power rests in the hands of the minority Batutsi ethnic group.

Burundi became independent as a Constitutional monarchy but this was overthrown on November 28, 1966. Since Nov. 1, 1976, when the government of President Micombero was overthrown, the country has been ruled by a Supreme Revolutionary Council led by Col. Jean-Baptiste Bagaza.

The chief crop is coffee, representing about 80 per cent of Burundi's export earnings, some 73 per cent of which is exported to the United States. Cotton is the second most important crop. Minerals, tea, hides and skins exports are also important. Joint economic arrangements of Burundi with Rwanda ended in

1964 and each country now has its own national bank, coffee organization, etc.

#### Trade with U.K.

	1980
Imports from U.K. ....	£1,881,000
Exports to U.K. ....	583,000

The currency is the Burundi Franc. Government expenditure for 1972 was *Bu. Fr.* 2,400,000,000 and revenue the same.

**CAPITAL.**—Bujumbura (formerly Usumbura), with about 150,000 inhabitants. Kitega (18,000 inhabitants) is the only other sizeable town. Official languages are Kirundi, a Bantu language, and French. Kiswahili is also used.

**FLAG.**—White diagonal cross on green and red quarters, with a circular white panel in the centre.

**NATIONAL DAY.**—July 1.

*British Ambassador, His Excellency John Michael Owen Snodgrass (resident at Kinshasa, Zaire).*

## CAMBODIA

(Democratic Kampuchea)

*President, Prince Norodom Sihanouk.*

*Vice-President responsible for Foreign Affairs, Khieu Samphan.*

*Prime Minister, Son Sann.*

**Area and Population.**—Situated between Thailand and the south of Vietnam and extending from the border with Laos on the north to the Gulf of Thailand, Cambodia covers an area of some 70,000 square miles. It has a population (1981) of approximately 6 million. (For MAP, see Index.)

**History.**—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Full independence was proclaimed on November 9, 1953. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Vietminh forces from the country, and the process was completed when, in January, 1955, the Kingdom of Cambodia became financially and economically independent not only of France but also of Laos and Vietnam. For the next fifteen years the political life of the country was dominated by Prince Norodom Sihanouk, first as King, then as Head of Government after he had abdicated in favour of his father and finally (following his father's death in 1960) as Head of State.

On March 18, 1970, during his absence from the country, Prince Sihanouk was deposed as Head of State by a vote of the National Assembly. A Republic was declared on October 9, 1970, and the name of the country changed to the Khmer Republic. A constitution was adopted by referendum on April 30, 1972 and Marshal Lon Nol elected President. A bicameral parliament was elected in September 1972.

In April 1970 widespread fighting developed between communist Vietnamese and Khmer forces which gradually developed into a general civil war with republican forces controlling the major centres of population and large areas of the country falling under the control of the Khmer Rouge supported by North Vietnamese. With large-scale assistance from the United States the armed forces of the Republic were increased from 35,000 in 1970 to 250,000 in 1973.

In March 1973 a State of National Emergency was declared, various clauses of the constitution were suspended and a coalition "government of exception" was formed under the premiership of In Tam.

Following In Tam's resignation in December 1973, Long Boret, formerly Foreign Minister, was appointed Prime Minister.

In April 1975 Phnom-Penh fell to the Khmer Rouge. Khieu Samphan ran the government and Prince Sihanouk returned to Cambodia on September 9, to resume his role as Head of State. However, a new Constitution was promulgated in Jan. 1976 and elections to a People's Representative Assembly were held in March. Prince Sihanouk resigned as Head of State in April, and when the Assembly met on April 11 Khieu Samphan was elected President of the State Presidium. A Government led by Pol Pot was appointed.

On Dec. 25, 1978 Vietnamese troops invaded Cambodia in support of an uprising by the "Cambodian National United Front". The Cambodian capital, Phnom-Penh, fell on Jan. 7, 1979. The following day the "Cambodian National United Front" established a "People's Revolutionary Council", recognised only by Vietnam, U.S.S.R. and Soviet Union-aligned countries. The Khmer Rouge forces and non-communist nationalist groups, however, maintain a guerrilla resistance against the regime, which remains almost totally dependent on the Vietnamese.

**Geography, Economy and Communications.**—Cambodia has an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber used to be the main exports though rubber production was brought to a standstill by the hostilities, and rice exports ceased in 1972, although it was announced that the 1975 rice crop amounted to 2,200,000 tons, which was twice the amount needed to feed the population for a year. Following the Khmer Rouge victory, the populations of Phnom-Penh and other towns were forcibly evacuated to the country to work on the land, and re-establish the plantations producing such crops as cotton, rubber and bananas. Factories, in particular textile mills, iron smelting works and cement works were put back in production. Following the Vietnamese invasion of 1978 the towns were repopulated and commerce revived; currency was reintroduced.

Fifty per cent. of the total land area is forest or jungle, abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country had over 5,000 kilometres of roads, of which nearly half are hard-surfaced and passable in the rainy season. There are two railways. One runs from Phnom-Penh to the Thai border; the other from Phnom-Penh to Kampot and on to Kompong Som. Operations and repairs are hindered by the continuing fighting. Phnom-Penh is on a river capable of receiving ships of up to 2,500 tons all the year round. The deep water port at Kompong Som on the Gulf of Thailand can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway.

**Religion and Education.**—The state religion was Buddhism of the "Little Vehicle". The new constitution guaranteed religious freedom, but in practice Buddhism was suppressed by the Khmer Rouge. There has been some revival recently. There were also small Muslim and Christian communities, but many members of them died or fled the country during Khmer Rouge rule. The national language is Khmer. In the years preceding the civil war considerable efforts were devoted to the development of education and new schools, colleges and technical institutes had been established. Until April 1975 there was a Buddhist University in Phnom-Penh,

and several residential teachers' training colleges were in operation. However, most of the country's educated elite died under the Khmer Rouge regime, which closed all institutions of higher education.

**CAPITAL.**—Phnom-Penh.

**FLAG.**—Red, with a yellow three-towered temple in the middle.

**NATIONAL DAY.**—April 17.

**CAMEROON REPUBLIC**  
(United Republic of Cameroon)

*President, Ahmadou Ahidjo, elected for 5 years, May 5, 1960; re-elected for 5 years, May 7, 1965; Mar. 20, 1970, April 5, 1975 and April 7, 1980.*

**MINISTRY**

- Prime Minister, P. Biya.*
- Defence, A. Maikano.*

- Urbanisation and Habitat, M. Hamadou.*

**CAMEROON EMBASSY**  
84 Holland Park, W.11.  
[01-727 0771]

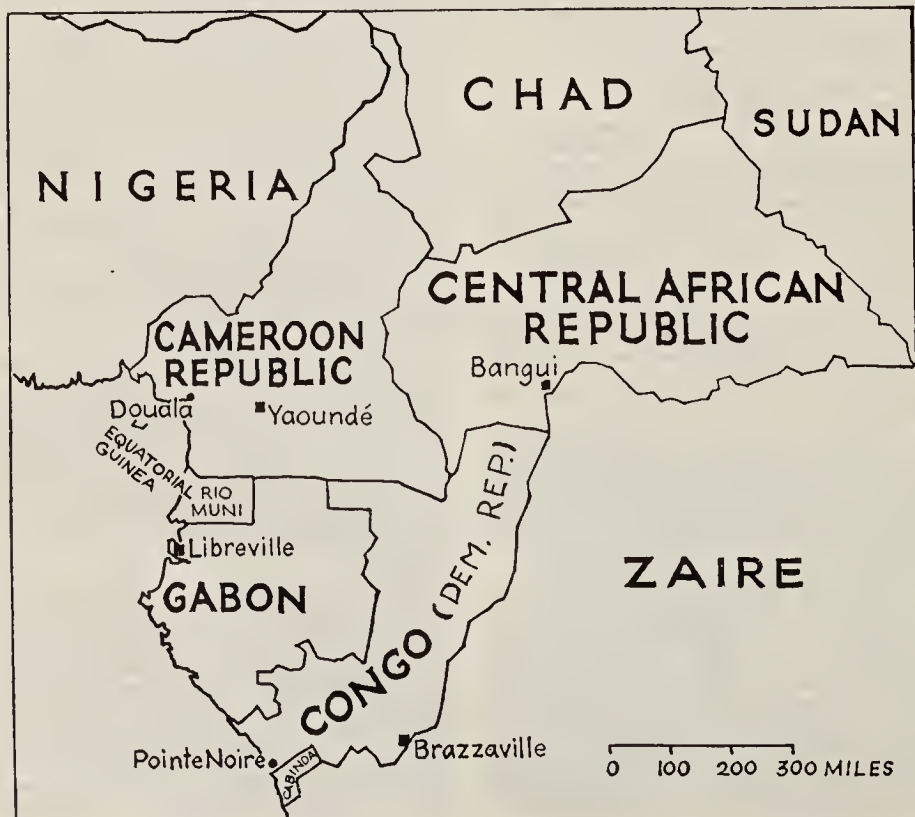

*Ambassador Extraordinary and Plenipotentiary, His Excellency Benoit Bindzi (1981).*

The United Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west, Chad and the Central African Republic to the east and Congo and Gabon and Equatorial Guinea to the south. It has an area of 475,400 sq. km. and a population of 8,320,000 (1980 estimate). Principal products are cocoa, coffee, bananas, cotton, timber, ground-nuts, aluminium, rubber and palm products. There is an aluminium smelting plant at Edéa with an annual capacity of 50,000 tons. Annual trade of the United Republic is approximately, (1978) Exports, *FCFA* 191 billion; Imports, *FCFA* 216 billion.

**Trade with U.K.**

	1979
Imports from U.K. ....	£18,811,000
Exports to U.K. ....	16,278,000

The whole territory was administered by Germany from 1884 to 1916. From 1916 to 1959, the former East Cameroon was administered by France as a League of Nations (later U.N.) trusteeship. On Jan. 1, 1960 it became independent as the Republic of Cameroon. The Republic was joined on October 1, 1961, by the former British administered trust territory of the Southern Cameroons, after a plebiscite held under United Nations auspices. Cameroon became a Fed-

eral Republic governed by a President, Vice-President and 19 Federal Ministers, with separate East and West Cameroon state governments. Subsequently in a plebiscite held in May, 1972, there was an overwhelming vote in favour of the proposal that Cameroon should become a United Republic and on July 3, 1972, the President appointed the first government of the United Republic.

Cameroon is the only country in Africa where French and English are both official languages enjoying equal status, and the government's declared long-term objective is to achieve complete "bilingualism" and "biculturalism".

The main economic emphasis is on agricultural development, both through encouraging small-scale peasant agriculture, and through the development of large-scale agro-industrial complexes, with the aim of making the country agriculturally self-sufficient and a major food exporter.

**CAPITAL.**—Yaoundé (337,000).  $\Psi$  Douala (458,000) is the commercial centre.

**FLAG.**—Vertical stripes of green, red and yellow with single five-pointed yellow star in centre of red stripe.

#### BRITISH EMBASSY Yaoundé

*Ambassador Extraordinary and Plenipotentiary, His Excellency Bryan Sparrow* (1981).

*1st Secretary, J. W. Guy* (*Head of Chancery and Consul*).

*2nd Secretary, J. C. Northover.*

*British Council Representative, C. H. Mogford.*

## CAPE VERDE ISLANDS (Republic of Cape Verde)

*President, Aristides Pereira born 1924, assumed office, July 5, 1975.*

*Prime Minister, Gen. Pedro Pirió.*

The Cape Verde Islands, off the west coast of Africa, consist of two groups of islands, *Windward* (Santo Antão, São Vicente, Santa Luzia, São Nicolau Boa Vista and Sal) and *Leeward* (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 sq. miles and an estimated population (1978) of 306,046.

**CAPITAL,**  $\Psi$  Praia (1970, 6,000).

The Islands, colonized in c. 1460, achieved independence from Portugal on July 5, 1975, under the nationalist party of Guinea Bissau and Cape Verde. A federation of the islands with Guinea Bissau was planned (till 1879 Guinea-Bissau and the Islands were a single administrative unit) but this was dropped following the 1980 coup in Guinea Bissau.

The Republic is a one-party state with a President elected by the National Assembly. He has a mandate of 5 years, as do Assembly deputies, who are elected by universal adult suffrage.

The main exports are meat, fish and salt.

#### Trade with U.K.

	1980
Imports from U.K. ....	£1,047,000
Exports to U.K. ....	207,000

*British Ambassador, His Excellency Clifford William Squire, C.M.G., M.V.O.* (1979) (*resident at Dakar*).

## CENTRAL AFRICAN REPUBLIC

*Head of State, Gen. Andre Kolingba, assumed power Sept. 1, 1981.*

Formerly the French colony of Ubanghi Shari, the Republic lies just north of the Equator between the

Cameroon Republic, the Republic of Chad, the southern part of Sudan and Zaïre. The Republic has an area of about 234,000 sq. miles and a population of 3,200,000 (est. 1975). On December 1, 1958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960. The first President of the Central African Republic, M. David Dacko, held office from 1960 until Jan. 1, 1966, when he was replaced by the then Col. Bokassa after a *coup d'état*. On Dec. 4, 1976, President Bokassa proclaimed himself Emperor and a new constitution (Parliamentary Monarchy) was introduced, the country being known as the Central African Empire. On Sept. 20, 1979, Emperor Bokassa was deposed by M. David Dacko in a bloodless *coup* and the country reverted to a Republic. President Dacko surrendered power on 1st September 1981 to army commander Gen. Andre Kolingba in a bloodless *coup*.

**Economy.**—A programme of economic reconstruction is under way, concentrating on agricultural production and private investment. Cotton, diamonds, coffee and timber are the major exports. Imports from U.K. 1980 £738,000; Exports to U.K., £1,466,000.

**CAPITAL.**—Bangui, near the border with Zaïre (350,000).

**FLAG.**—Four horizontal stripes, blue, white, green, yellow, crossed by central vertical red stripe with a yellow five-pointed star in top left-hand corner.

## CHAD REPUBLIC

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by Libya in the north, by the Sudan on the east and by the Central African Republic on the south. (*For MAP, see Index*.) It has an area of 488,000 sq. miles and a population now estimated at 4,000,000. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960. On April 14, 1962, a new Constitution was adopted involving a presidential-type regime. This was suspended on April 13, 1975 when President Tombalbaye was killed in a military coup. The country was run by a Supreme Military Council, under General Felix Malloum until his overthrow in February 1979. Chad is currently governed by a Transitional Government of National Unity, headed by Goukouni Oueddei.

#### Trade with U.K.

Cotton is the main product of the country.

	1980
Imports from U.K. ....	£361,000
Exports to U.K. ....	279,000

**CAPITAL.**—Njaména (formerly known as Fort Lamy) south of Lake Chad (150,000).

**FLAG.**—Vertical stripes, blue, yellow and red.

## CHILE

(República de Chile)

*Head of State, General Augusto Pinochet* (Ugarte), born, November 25, 1915, Army Commander-in-Chief and President of the Republic.

*Junta Members, Admiral José Toribio Merino* (Castro), C.-in-C. Navy; General Fernando Matthei (Aubel), C.-in-C. Air Force; General César Mendoza (Durán), Director-General of Carabineros; General César Raul Benavides Escobar (Army).

## CABINET

*Secretary General of the Government*, Hernan Felipe Errazuriz.

CHILEAN EMBASSY AND CONSULATE IN LONDON  
 12 Devonshire Street, W.1  
 [01-580 6392]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Miguel Schweitzer.  
*Air Attaché*, Col. Ramón I. Vega.  
*Naval Attaché*, Capt. Sergio Cabezas.  
*Minister Counsellor*, Sra. Lucia Suárez de Ernst (*Consular Affairs*); Sr. Jorge Errazuriz (*Commercial*); Sr. Carlos Ducci (*Chargé d'Affaires*).  
*Counsellors*, Sr. Guillermo Santa Cruz; Srta. Cecilia Gallardo; Sr. Patricio Despouy.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 59' S. and long. 66° 30' and 75° 48' W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid. (For MAP, see p. 791.)

Among the island possessions of Chile are the *Juan Fernandez group* (3 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (Robinson Crusoe) shipwreck. *Easter Island* (27° 8' S. and 109° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 12 regions and the Metropolitan Area and the total area of the Republic is estimated at 290,000 square miles, with a population (estimated, 1979) of 11,000,000. Two of these regions, Arica and Antofagasta, were annexed from Peru and Bolivia respectively after the War of the Pacific (1879-84). The province of Tacna was also annexed but under a treaty signed in 1929 was returned to Peru which at the same time received payment of £1,200,000 for Arica. The Chilean population has four main sources: (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians,

and Changos; (c) mixed Spanish Indians; and (d) European immigrants. Only the few remaining indigenous Indians and some originally Bolivian Indians in the north are racially separate. Following extensive intermarriage there is no effective distinction among the remainder.

*Government*.—Chile was discovered by Spanish adventurers in the 16th century and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipo* (April 5, 1818), achieved the independence of the nation.

At a general election held on Sept. 4, 1970, the Marxist candidate Dr. Allende was elected President by a narrow margin. A new Cabinet took office on Oct. 30, 1970.

After severe industrial unrest and widespread violent incidents, the Government of Dr. Salvador Allende was overthrown on September 11, 1973, by a coup planned, and carried out within a few hours, by leaders of the Armed Forces and National Police. President Allende was said to have committed suicide.

After a national plebiscite, the Constitution of 1925 was replaced early in 1981 and Gen. Pinochet was sworn in as President, to serve until 1989. Economically, the regime is pursuing a free-market economy and the level of inflation has already been reduced, from 1,000 per cent in 1973 to about 9.5 per cent in 1981.

*Production*.—Wheat, maize, barley, oats, beans, peas, rice, lentils, wines, tobacco, hemp, chilipepper, potatoes, sugar beet, onions, grapes, peaches and melons are grown extensively and livestock accounts for nearly 40 per cent of agricultural production. The vine and all European fruit trees flourish in the central zone and fruit is an important export item. Good wines are produced and exported and are becoming more widely known in world markets. Sheep farming predominates in the extreme south (Province of Magallanes). There are large timber tracts in the central and southern zones of Chile, some types of which are exported, along with wood derivatives such as cellulose, to Europe and the Argentine and other markets. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. Copper production in 1981 totalled 1,080,000 metric tons. Copper provides 43 per cent of Chile's exports earnings, the remainder of which are derived mainly from other minerals, wool, fruit, fish and forestry derivatives. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural resources in the world. Production in 1981 of both potassium and sodium nitrate was 624,400 metric tons. Chile also produces iodine, manganese ore, coal, mercury, molybdenum, zinc, lead and a small quantity of gold. 995,561 metric tons of coal were produced in 1981. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945. Production in 1981 was 2,520,000 cu. metres of crude oil and 5,100,000 cu. metres of natural gas—all in the Magallanes area from on- and off-shore wells. This total production, which covers approximately 50 per cent of total oil requirement, plus imported crude oil is refined at Concon and San Vicente in the central part of the country. There is a steel plant at Huachipato, near Concepción. Current production capacity is about 625,500 metric tons of steel ingots per year, to be increased to one million metric tons per year.

Some consumer goods are manufactured locally—copper, steel and oil derivatives, pulp and paper, cement and other building materials, tobacco, cut-

lery, food products and beverages, sugar refining, textiles, clothing and footwear, plastic products, household equipment, motor-vehicles, tyres and other rubber products, chemicals, pharmaceutical products, soaps, detergents and cosmetics.

**Communications.**—Chilean ships have a virtual monopoly in the coastwise trade, though, with the improvement of the roads, an increasing share of internal transportation is moving by road and rail. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or via the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine numbers about 63 vessels (of over 100 tons gross) with a total deadweight tonnage of 754,494 (1979). Recently introduced changes to navigation laws now facilitate the operation of regular shipping services on a flag-of-convenience basis. A cargo reserve of 50 per cent to Chilean vessels is only applicable when there are flag protection policies in other countries at whose ports such vessels call.

There are 6,575 miles of railway track. A metre-gauge line (the *Longitudinal*) runs from La Calera, just north of Santiago, to Iquique. The wide gauge railway (1-676 metres) runs from Valparaíso through La Calera, 60 miles inland, and after passing through Santiago ends at Puerto Montt.

With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso to the Pacific with Buenos Aires, crossing the Andes at 11,500 ft. However services have now been suspended due to financial difficulties.

Chile is served by about 20 international airlines. The domestic traffic is carried by the State-owned Linea Aerea Nacional and the privately-owned LADECO, which also operate internationally, and smaller regional carriers. Chile has an extensive system of airports.

Chile's road system is about 65,000 kilometres in length, but only an estimated 7,000 kilometres are first-class paved highways. At the end of 1981 there were some 730,000 cars, 18,600 buses and taxis, 175,000 goods vehicles and 17,000 tractors in circulation.

**Defence.**—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. The Army's total strength is 50,000, which includes 3,000 officers and 25,000 conscripts (2 years). In addition there is a police force of "Carabineros" of 30,000 officers and men. The Air Force has 800 officers and 8,700 other ranks, with a strength of 200 aircraft. The Navy consists of 3 cruisers, 12 destroyers, frigates and escorts, some patrol vessels and FPBs and 3 submarines. There is a support force of transports, tankers, 1 submarine depot ship and ancillary small craft. The strength of the Navy is 1,000 officers and 14,000 men, plus a Marine Force of 60 officers and 2,000 men.

**Education.**—Elementary education is free, and has been compulsory since 1920. There are 8 Universities (3 in Santiago, 2 in Valparaíso, 1 in Antofagasta, 1 in Concepción and 1 in Valdivia). The religion is Roman Catholic.

**Language and Literature.**—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and

prose, and in 1971 to the poet Pablo Neruda. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

**Finance.**—Total revenue for 1980 is estimated at U.S. \$3,448,200,000, expenditure U.S. \$3,371,790,000. That is a 2.2 per cent surplus. Foreign debt at December 31, 1981 was provisionally quoted at U.S. \$14,500 million.

EXTERNAL TRADE  
(Final figures)  
(\$U.S. ,000)

	1980	1981
Total imports .	\$U.S.5,820,000,000	\$U.S.6,378,500,000
Total exports .	4,818,000,000	3,951,500,000

Trade with U.K.

	1980	1981
Imports from U.K. . .	£55,740,000	£62,000,000 (provisional)
Exports to U.K. . . . .	126,273,000	78,800,000

The principal exports are metallic and non-metallic minerals (refined copper, ingots and bars, iron ore, etc.), wood derivatives, some metal products, fish products, vegetables, fruit and wool. The principal imports are wheat, sugar and other food products, industrial raw materials, machinery, equipment and spares, oil fuels, lubricants and transportation equipment.

**CAPITAL,** Santiago, 4,000,000 (Greater Santiago), Other large towns are:—ψValparaíso (500,000), Concepción (170,000), Temuco (110,000), ψAntofagasta (110,000), Chillán (79,461), ψTalcahuano (75,643), Talca (75,354), ψValdivia (70,000), ψIquique (50,000), ψPunta Arenas (50,000). Punta Arenas on the Straits of Magellan, is the southernmost city in the world.

**FLAG.**—2 horizontal bands, white, red; in top sixth a white star on blue square, next staff.

**NATIONAL DAY.**—September 18 (National Anniversary).

BRITISH EMBASSY

 [01-636 5726]

*Ambassador Extraordinary and Plenipotentiary*, Ke Hua.

**AREA AND POPULATION.**—The area of China is about 3,700,000 square miles. Estimates of the present population vary considerably. The Chinese put the figure for the end of 1980 at 982,550,000, excluding Taiwan. This figure is considered low by most Western demographers. The 1979 birth rate is given as 17.9 per thousand and the natural growth rate at 11.7 per thousand. China is now anxious to curb population growth and has set a target rate of 5 per thousand or less by 1985. A nationwide census was held in July 1982 (results not yet released). About 6 per cent of the population belong to around 60 ethnic minorities. Among the largest are the Zhuang of Guangxi, the Uygurs of Xinjiang, the Tibetans and the Mongols.

## THE PROVINCES OF CHINA

Population figures made public in 1980 were as follows:

Anhui	48,030,000
Fujian	24,800,000
Gansu	18,940,000
Guangdong	56,810,000
Guangxi Zhuang	
Autonomous Region	34,700,000
Guizhou	27,310,000
Hebei	51,046,400
Heilongjiang	31,690,000
Henan	71,890,000
Hubei	46,326,000
Hunan	51,000,000
Jiangsu	58,930,000
Jiangxi	32,290,000
Jilin	21,846,000
Liaoning	34,426,000
Nei Monggol	18,510,000
Autonomous Region	
Ningxia Hui	
Autonomous Region	3,640,000
Qinghai	3,720,000
Shaanxi	28,070,000
Shandong	72,310,000
Shanxi	24,472,000
Sichuan	97,740,000
(Taiwan)	17,600,000
Xinjiang Uygur	
Autonomous Region	12,560,000
Tibet	
Autonomous Region	1,830,000
Yunnan	31,350,000
Zhejiang	37,920,000

Xinjiang is the largest region or province in area (about 1/6th of the whole area of the country) and Sichuan the most populous.

**Government.**—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

On September 30, 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C) met in Peking and appointed the National People's Government Council under the Chairmanship of Mao Tse-tung. On October 1, Mao proclaimed the inauguration of the Chinese People's Republic. The Soviet Union broke off relations with the Nationalists and established relations with the new régime on October 2. The régime was recognized by all the Communist bloc countries in quick succession, and soon after by the Asian countries of the Commonwealth, the

United Kingdom and by a number of other countries. Others, led by the United States, continued to recognize the Chiang Kai-shek *régime* on Taiwan as the rightful Government of China. China's ideological quarrel with the Soviet Union flared up into open conflict across the Ussuri River in 1969. In early 1979 China made an incursion into Vietnam. China has concentrated instead on wooing developing countries, the West and Japan. In 1971 the People's Republic won acceptance into the United Nations on the expulsion of Taiwan. Since then many more countries have accorded recognition, including, among the most recent, the United States and Japan. To date, 124 countries have established diplomatic relations with China.

The C.P.P.C.C. continued to be the supreme legislative body of the new state until September 20, 1954, when a new constitution was adopted. It was then replaced as the highest organ of state power by the National People's Congress which exercised legislative power.

With the adoption of the 1954 Constitution, the National People's Government Council was replaced by the State Council, composed of the Premier, 16 Vice-Premiers and the heads of ministries and commissions. This body was the supreme administrative body, responsible for the day-to-day running of the country.

A new Constitution was adopted by the Fifth National People's Congress in February 1978, revising the Constitution adopted by the Fourth National People's Congress in January 1975. The Constitution establishes the leading role of the Communist Party in all spheres of national life. The National People's Congress is the highest organ of state power. It is supposed to hold one session a year. It is empowered to amend the Constitution, make laws, decide on the choice of Premier and other members of the State Council (upon the recommendation of the Party's Central Committee and the Premier respectively), elect the heads of the judicial system, approve the national economic plan, the state budget and the final state accounts, confirm the administrative divisions of the country, and decide on questions of war and peace. There is no post of State Chairman, but the Chairman of the Standing Committee of the National People's Congress is empowered to carry out protocol functions normally associated with a Head of State such as receiving foreign diplomatic envoys. The State Council is the Central People's Government; it is composed of the Premier, currently fifteen Vice-Premiers and the heads of the Ministries and Commissions. Command over the armed forces is vested in the Chairman of the Chinese Communist Party.

The system of elections to local People's Congresses and to the National People's Congress is maintained. Deputies to congresses at the primary level are "directly elected" by the voters "through a secret ballot after democratic consultation". This is now being extended to county level. These Congresses elect the Deputies to the Congress at the next higher level. Deputies to the National People's Congress are elected by the People's Congresses of the provinces, autonomous regions and municipalities directly under the Central Government, and by the armed forces.

Local government is conducted through People's Governments at provincial, municipal and county levels. Autonomous regions, prefectures and counties exist for national minorities and are described as self-governing. The system prevailing is that found elsewhere, i.e. People's Congresses and People's Governments. Peking, Shanghai and Tientsin continue to come directly under the central government.

The draft of a new constitution was approved by the National People's Congress Standing Committee

on 22 April 1982, to be submitted to the next full session of the National People's Congress. The draft stipulates that China will pursue "socialist modernisation" under the leadership of the Communist Party. It also restores the post of Chairman of the People's Republic (Head of State), provides for a Central Military Commission within the state structure, and enlarges the powers of the Standing Committee.

In 1966 Mao Tse-tung launched the Cultural Revolution to ward off what he saw as revisionism within the Communist Party. The Party apparatus was virtually swept away, and with it many of China's top leaders, including the senior Party Vice-Chairman and Chairman of the People's Republic Liu Shao-Chi. Mao's second prospective heir Lin Biao was disgraced in 1971, and at the 10th Congress in 1973 Premier Chou En-lai was placed second to Mao at the head of the newly-reconstructed Communist Party. Both men died in 1976 to be succeeded as Party Chairman and Premier by Hua Guofeng. The so-called "Gang of Four", headed by Mao's widow, Chiang Ching, were promptly arrested for allegedly attempting to seize power. This led to pressure for the recall of Vice-Premier Deng Xiaoping, dismissed shortly after Chou's death for betraying Maoist orthodoxy. At the 11th Congress in 1977 Deng was elected Vice-Chairman under Chairman Hua. He has since become the dominant force within the Party by eliminating leftist influence, rehabilitating fallen leaders and adjusting Maoist policies to meet the needs of a developing economy. Hua was replaced as Premier by Zhao Ziyang in 1980, and resigned from the Party Chairmanship in 1981, being replaced by Hu Yaobang, and himself becoming a Vice-Chairman.

**Armed Forces.**—All three military arms in China are parts of the People's Liberation Army (P.L.A.) The size of this body has not been formally given, but it is estimated that China has between 2½ and 3 million men under arms, with a further 12 million (or perhaps many more) reserves who take part in militia activities. Until 1955 the P.L.A. did not have a rank structure, but one was introduced in that year similar to that of the Russian Army. In the same year compulsory military service was introduced for all men between the ages of 18 and 40. This service was on a selective basis. The present length of service for those conscripted is three years in the Army, four years in the Air Force and five years in the Navy. With effect from June 1, 1965, the rank structure was abolished, together with all marks of distinction of branch of service. Both are expected to be reinstated in the near future.

China exploded her first experimental nuclear device on October 16, 1964 and made further tests in 1965 and in May, October and December, 1966. Her first hydrogen bomb was tested in June, 1967. Further tests of nuclear devices and hydrogen bombs have since been announced, the latest being in November 1976. China embarked on a programme of earth-satellite launchings in April 1970, the latest being made in January 1978. A long-range I.C.B.M. was tested in May 1980.

**Religion.**—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. There are also Chinese Moslems and Christians. Religious freedoms, severely curtailed during the Cultural Revolution, are reviving slightly under more liberal policies.

**Education.**—Although primary education was compulsory under the Nationalists, mass education did not become a fact until after the Communists had taken over. All major educational establishments closed down at the start of the Great Proletarian

Cultural Revolution in 1966. Primary and middle schools began to re-open in 1968 and universities in 1970. The Cultural Revolution caused considerable disruption to the educational system and since 1976 attempts have been made to raise academic standards. Primary education now lasts five years, and is now almost universal with a claimed enrolment of 143,330,000 pupils. Secondary education lasts five years (three years in Junior Middle School and two years in Senior Middle School). There were 48,596,000 Middle School pupils in 1981. Efforts are being made to expand secondary education, particularly in the rural areas. Particular attention is being paid to higher education where there are over 600 universities, colleges and institutes with an enrolment of 1,230,000 students. 1,762 students went to study abroad during 1979.

*Language and Literature.*—The Chinese language has many dialects, notably Cantonese, Hakka, Amoy, Foochow, Changsha, Nanchang, Wu (Shanghai) and the northern dialect. The Common Speech or *Putonghua* (often referred to as "Mandarin") which is being taught throughout the country is based on the northern dialect. The Communists, when they came into power, continued the Kuomintang policy of promoting it as the national language and made much more intensive efforts to propagate it throughout the country. Since the most important aspect of this policy is the use of the spoken language in writing, the old literary style of writing has fallen into disuse.

Chinese writing is ideographic and not phonetic. While the number of sounds in *Putonghua* is limited,

the use of four tones expands the variety of meanings that a sound may have. These meanings are distinguished visually by different characters. Whereas originally the language was monosyllabic and confusion was avoided by the use of different characters, thus producing texts which were visually clear but ambiguous to the ear, with the increasing use of the spoken language for writing people are increasingly making use of polysyllabic compounds both in speech and writing in order to avoid confusion. In 1956, after some 4 years of study, the Government decided to introduce 230 simplified characters with a view to making reading and writing easier. The list was enlarged; there are now over 2,000 simplified characters in use. In January, 1956, all Chinese newspapers and most books began to appear with the characters printed horizontally from left to right, instead of vertically reading from right to left, as previously.

In February 1958 The National People's Congress adopted a system of Romanization, known as pinyin, using 25 of the letters of the Latin alphabet (not v). This has been used within the country largely for assisting school children and others to learn the pronunciation of characters in *Putonghua*, and is now used for Chinese names in foreign-language publications.

Chinese literature is one of the richest in the world. Paper has been employed for writing and printing for nearly 2,000 years. The Confucian classics which formed the basis of the traditional Chinese culture date from the Warring States period (4th–3rd centuries B.C.) as do the earliest texts of the

rival tradition, Taoism. Histories, philosophical and scientific works, poetry, literary and art criticism, novels and romances survive from most periods. Many have been translated into English. In the past all this considerable literature was available only to a very small class of *literati*, but with the spread of literacy in the 20th century, a process which has received enormous impetus since the Communists took over in 1950, the old traditional literature has been largely superseded by modern works of a popular kind and by the classics of Marxism and modern developments from them.

The most important among the newspapers and magazines are the *People's Daily* and the twice-monthly *Red Flag*, the communist party organs. Total circulation of newspapers in 1980 was 14,040,000,000.

**Currency.**—The  *yuan*  was revalued with effect from March 1, 1955, on the basis 10,000 old  *yuan*  for one new  *yuan* . (See also p. 83.)

**Production and Industry.**—China is essentially an agricultural and pastoral country: peasants constitute about 80 per cent of the population. After the establishment of the Chinese People's Government at which time land for the most part was privately owned, there occurred several stages of land reform culminating in the formation of the people's communes in 1958. With the exception of the State farms, the communes embrace the whole rural population. In all there are 50,000 communes and each is sub-divided into production brigades and teams. Work is assigned on a collective basis. The production team (of about 45 families) is the normal unit of accounting and labour, with some work being assigned to smaller groups on a contract basis. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

Livestock is raised in large numbers. Silk worm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities. The mineral wealth of the country is very great. Coal of excellent quality is produced. Iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundant. Oil is produced in several northern provinces, particularly in Heilongjiang and Shandong, and off-shore deposits are to be tapped in co-operation with Western and Japanese companies.

The Chinese State Statistical Bureau issues production figures annually. The following are of note for 1981:

Steel 37,600,000 tons; pig iron 34,170,000 tons; electric power 309,300,000,000 kWh; crude oil 101,220,000 tons; timber 49,420,000 cubic metres; chemical fertilizers 12,390,000 tons; motor vehicles 176,000; cotton cloth 14,270,000 square metres; machine tools 103,000; grain, 325,020,000 tons; cotton 2,968,000 tons; tea, 343,000 tons; pork, beef and mutton 12,609,000 tons.

Following the Great Leap Forward in 1958 and during three subsequent years of difficult conditions for agriculture, there was a cut back in both agricultural and industrial production which then recovered to its pre-1958 level. The unsettled years from the start of the Cultural Revolution in 1966 to the purge of the "Gang of Four" in 1976 brought renewed economic dislocation. The State Statistical Bureau valued the national income for 1981 at Yuan 388,000 million, an increase of 3 per cent over 1980. The total value of industrial and agricultural output was Yuan 749,000 million, of which industrial output counted for Yuan 517,800 million. Per capita income in 1980 has been estimated at U.S. \$270.

All Chinese policies are now directed to realising the "Four Modernisations"—agriculture, industry, national defence and science and technology. Specific targets were announced in 1978 for such items as grain, steel, coal and capital construction by 1985, but these are now judged to be too high and to have caused imbalances in development. China is at present engaged in a reordering of economic priorities in favour of agriculture, light industry, textiles, fuel and power, and transport and communications. This involves severe cuts in capital investment, closure of uneconomic plants, cancellation of large foreign trade contracts and careful control of imports of foreign technology. A new 10-year plan is being formulated.

The principal articles of export are animals and animal products; oil; textiles; ores, metals and tea. The principal imports are raw cotton, cotton yarn and thread; motor vehicles; machinery; chemical fertilizer plants; wheat; aircraft; books, paper and paper-making materials; chemicals; metals and ores; and dyes.

#### Trade with U.K.

	1980
Imports from U.K. ....	£169,500,000
Exports to U.K. ....	153,400,000

**Communications.**—Of the total area of China over half consists of tableland and mountainous areas where communications and travel are generally difficult. By 1949, the communications system, as a result of years of neglect and civil war, was more or less completely paralysed. In any case such roads and railways as did exist were largely confined to the eastern plains. After the Communists achieved complete control they devoted much attention to restoring and improving the communication system. The country now has more than 50,000 kilometres of railway trunk and branch lines (as compared to 21,000 kilometres in 1949) and some 890,000 kilometres of highway (as compared with 70,000 kilometres in 1949). In addition, internal civil aviation has been developed, with routes now totalling more than 340,000 kilometres. As a result the communications network now covers most of the country. In the past where roads did not exist the principal means of communications east to west was provided by the rivers, the most important of which are the Yangtze (Changjiang) (3,400 miles long), the Yellow River (Huanghe) (2,600 miles long) and the West River (Xihe) (1,650 miles). These, together with the network of canals connecting them are still much used, but their overall importance is less than it was. Coastal port facilities are being improved and the merchant fleet expanded. In the past 10 years great progress has been made in developing postal services and telecommunications. It is now claimed that 95 p.c. of all rural communes are on the telephone and that postal routes reach practically every production brigade headquarters.

**CAPITAL.**—Peking, population (Chinese official figure, 1980), 8,706,000. The population of  $\Psi$  Shanghai (Chinese official figure, 1980) is given as 11,320,000; Nanking (estimate, 1974) 2,400,000; Tianjin (Chinese official figure, 1980) 7,390,000; Shenyang (Chinese official figure 1975) 4,400,000; Wuhan (Chinese official figure, 1976) 3,500,000; Chongqing (Chinese official figure, 1979) 6,200,000;  $\Psi$  Guangzhou (Canton) (estimate, 1973) 5,000,000; Harbin (estimate, 1974) 2,100,000; Luda (Lushun and Dalien) (estimate, 1973) 4,200,000.

**FLAG.**—Red, with large gold five-point star and four small gold stars in crescent, all in upper quarter next staff.

**NATIONAL DAY.**—October 1 (Founding of People's Republic).

## BRITISH EMBASSY

11 Guang Hua Lu,

Jian Guo Men Wai, Peking.

*Counsellors*, M. W. Atkinson, M.B.E. (*Head of Chancery*); G. E. Clerk, O.B.E. (*Commercial*).

*Defence Attaché*, Col. G. A. Gilhead.

*1st Secretaries*, A. C. Galsworthy; O. M. O'Brien; K. R. Hunter, O.B.E.; (*Cultural*); J. Owen, M.B.E. (*Administration*); J. P. Watson.

*2nd Secretaries*, G. Voysey (*Commercial*); P. S. Johnson; Miss V. P. Hart (*Cultural*); R. Peirce; A. E. C. Cowan; Miss R. C. Manning; J. Ashton; G. Andrews, M.B.E.; J. V. Everard.

## SPECIAL TERRITORY

*Tibet*, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population of 1,700,000.

From 1911 to 1950, Tibet was virtually an independent country but its status was never officially so defined. In October 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yadong, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby the Chinese army was allowed entry into Tibet. A Communist military and administrative headquarters was set up. In 1954 the Government of India recognized that Tibet was an integral part of China, in return for the right to maintain trade and consular representation there.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On March 28, 1959, the Chinese Premier issued an order dissolving the Tibetan Government. In its place the 16-member Preparatory Committee for the Tibetan Autonomous Region, originally set up in 1955 with the Dalai Lama as Chairman, was to administer Tibet under the State Council. The Preparatory Committee was to have the Panchen Lama as Acting Chairman and also to include 4 Chinese Officials. Elections were held to choose local People's Congresses in Tibet, thus indicating that the government organization there no longer differed significantly from that of any ordinary province in China.

In December, 1964, the Dalai Lama was declared to be a traitor, and both he and the Panchen Lama were dismissed. The position of Acting Chairman of the Preparatory Committee was assumed by Ngapoi Ngawang Jigmi, who had long been the most prominent secular figure in Tibet. This move marked the end of the period of co-operation by the Chinese Government with the traditional religious authorities, and the eclipse of the latter. The Preparatory Committee completed its work with the setting up of Tibet as an Autonomous Region of China on Sept. 9, 1965. The Panchen Lama is now rehabilitated as an official of the C.P.P.C.C., and the Chinese have invited the Dalai Lama to return from exile.

TAIWAN  
(Formosa)

*President*, Chiang Ching-kuo, *sworn in*, May 20, 1978.  
*Premier*, Y. S. Sun (Sun Yun-suan) (May 26, 1978).

An island of some 13,800 sq. miles in the China Sea, Taiwan lies 90 miles east of the Chinese mainland in latitude 21° 45'N.—25° 38'N. The population (18,203,000 in March, 1982), is almost entirely Chinese in origin and includes about 2,000,000 mainlanders who came to the island with Chiang Kai-shek in 1947-49. The territories administered by the Chinese Nationalists include the Pescadores Islands (50 sq. miles), some 35 miles west of Taiwan, as well as Quemoy (68 sq. miles) and Matsu (11 sq. miles) which are only a few miles from the mainland. Settled for centuries by the Chinese, the island was administered by Japan as a province from 1895 to 1945. General Chiang Kai-shek withdrew to Taiwan in 1949, towards the end of the war against the Communist régime, accompanied by 500,000 Nationalist troops, after which the territory continued under his presidency. Gen. Chiang Kai-shek died on April 5, 1975 and was succeeded by the Vice-President, Dr. C. K. Yen. Gen. Chiang Kai-shek's elder son, Chiang Ching-kuo, who had been Premier since 1972, was elected President for a six year term in March 1978. A mutual defence treaty between the United States and Taiwan Governments was signed in 1954 but this has been terminated as the United States recognized the People's Republic of China on January 1, 1979.

The eastern part of the main island is mountainous and forest covered. Mt. Morrison (Yu Shan) (13,035 ft.) and Mt. Sylvia (Tz'ukaoshan) (12,972 ft.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, sweet potatoes, tea, bananas, pineapples and tobacco. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports are Keelung and Kaohsiung are situated in the northern and southern sections of the island.

## Trade with U.K.

	1980
Imports from U.K. ....	£92,300,000
Exports to U.K. ....	233,500,000

**CAPITAL**—Taipei (population 1979, 2,196,237). Other towns are Kaohsiung (1,172,777); Tainan (572,590); Taichung (585,205); and Keelung (345,392).

**FLAG**—Red, with blue quarter at top next staff, bearing a twelve-point white sun.

## BRITISH CONSULATE

The British consulate was withdrawn from Taiwan on March 31, 1972.

COLOMBIA  
(República de Colombia)

*President*, Belisario Betanear, *assumed office*, August 7, 1982.

COLOMBIAN EMBASSY IN LONDON  
3 Hans Crescent, S.W.1  
(01-589 9177)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Andres Restrepo-Londoño (1981).

*Minister Plenipotentiary*, Miss N. Millán.

*Minister Counsellor*, Dr. J. Gaviria.

*Naval Attaché*, Lt. Com. A. Vasquez.

*Counsellors*, Dr. J. M. Santos (*Coffee Affairs*); Dr. G. Ramirez (*Commercial*).

*1st Secretaries*, Dr. R. Ortega; Dr. R. Correa-Lara.

There are *Consulates-General* in London and Liverpool.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 4° 13' S. to 12° 30' N. lat. and 68° to 79° W. long., with an approximate area of 440,000 square miles, and a population (estimated 1980) of 27,729,847.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811–1824. In 1819 Simón Bolívar (born 1783, died 1831) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1866 the present title was adopted. In 1903 Panama seceded from Colombia, and became a separate Republic.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the most important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic. The highest mountain in Colombia is Cristóbal Colón (18,946 feet) in the Sierra Nevada de Santa Marta on the Caribbean coast.

The principal rivers are the Magdalena, Guaviare, Cauca, Atrato, Caquetá, Putumayo and Patía. The Patía flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guaitara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Rio Bogotá is the great *Fall of Tequendama*, 482 ft. in height.

**Government.**—During the early nineteen-fifties Colombia suffered a period of virtual civil war between the supporters of the traditional political parties, the Conservatives and the Liberals. The dictatorship of Gen. Rojas Pinilla (1953–57) put an end to the worst of the violence and on May 10, 1957, following Pinilla's summary dismissal, a military junta took over, preparing the way for a return to democratic government. Congressional elections were held on March 16, 1958, which yielded a Liberal majority. This led, the same year, to the institution of the National Front system, to run for a period of 16 years. The Presidency alternated every four years between the Liberals and Conservatives while parity of appointment was maintained between the two parties in Congress, the Government and all Government Departments.

During the presidency of Dr. Carlos Lleras (May, 1966 to April, 1970) the country made considerable economic advances, but the National Front system was nearly overthrown at the 1970 presidential election, when Gen. Rojas, with his political movement, the National Popular Alliance, almost defeated the Government candidate, Dr. Misael Pastrana.

In 1974 the first election not subject to the National Front system for the Presidency and Congress was won by the Liberal candidate, Alfonso López Michelsen; parity in administrative appointments between the traditional parties continued, however, until 1978. Thereafter, the constitution lays down that Government portfolios and Administrative appointments shall be divided among the two majority parties in Congress in an "adequate and equitable" manner.

**Production.**—The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and

other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead and coal. In 1977 the country was producing 146,000 barrels of oil per day after a peak production figure of 218,000 in 1970. Measures have recently been taken to encourage exploration for new reserves, but since early 1975 Colombia has exchanged its rôle of net-exporter for that of net-importer of crude oil. The principal agricultural products are coffee (which accounts for over 60 per cent. of total exports by value) cotton, bananas, rice, cocoa, sugar, tobacco, maize, cut flowers, wheat and other cereals. Manufactures (mainly for home consumption, but with an increasing export trade) consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and steel. Stimulus to the economy has been provided by large loans from the World Bank and IADB for project development, particularly in the power sector (in which hydroelectric projects have predominated) and for telecommunications. Technical aid in the form of loans has tended to diminish in recent years, but technical assistance programmes in many fields continue. The importation of many consumer goods is restricted although there has recently been a slight relaxation of controls.

**Defence.**—The Army peace effective strength is 42,000; war effective 300,000. The Navy consists of 4 destroyers, 3 frigates, 2 submarines, 4 miniature submarines, some gunboats and other small craft, with personnel about 5,200 including units of marines; a battalion of the Colombian army and elements of the Navy served with the United Nations forces in Korea. The Air Force, with 6,600 personnel, has jet trainers and 2 front-line squadrons equipped with Mirage fighters.

**Communications.**—The first railway was opened in 1855, about 1,914 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Marta, was opened in July, 1961. There are about 2,200 miles of rail in use at present. The total road network (1978) consists of 53,200 km. of roads of all types, of which 21,800 km. are classified as main trunk and transversal roads. A programme of road improvement and construction is under way, financed by a tax on petrol. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, and services to London via Miami, Panama, and other European capitals and once weekly by British Caledonian and Avianca direct to London. Air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to most parts of the country.

**Language and Literature.**—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 70 per cent. of those over 10 years of age can read and write. In addition to the National University with headquarters at Bogotá there are 26 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

Roman Catholicism is the established religion.

*Finance*.—For rate of exchange, see p. 83.

#### BRITISH EMBASSY

Calle 38, No. 13-35, Bogotá

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John A. Robson (1982).

There are British Consular Offices at *Bogotá*, *Barranquilla* and *Cali*.

*British Council Representative*, J. Lawrence O.B.E., CRA 9, No. 86-54, Bogotá.

## THE COMOROS

*President*, Ahmed Abdallah.

*Prime Minister*, Ali Mroudjae.

The Comoro archipelago includes the islands of Great Comoro, Anjouan, Mayotte and Moheli and certain islets in the Indian Ocean with an area of 800 sq. miles and a population (estimated 1979) of 385,000. The islanders voted for independence from France in December 1974 and the islands became independent on July 6, 1975. The island of Mayotte was against independence and has remained under French administration. On October 1, 1978 the other three islands voted in a referendum to adopt a new Constitution and the title of The Federal and Islamic Republic of the Comoros.

Principal exports are copra, vanilla, cloves and essential oils.

**CAPITAL**.—Moroni.

## CONGO

(People's Republic of the Congo)

*President and Prime Minister*, Col. Denis Sassou-Nguesso.

*Vice-President*, Maj. Louis Sylvain Goma.

The Republic lies on the Equator between Gabon on the west and Zaire on the east, the River Congo and its tributary the Ubanghi forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. Area of the Republic of Congo is 129,960 sq. miles, with a population of approximately 2,100,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

In 1968, conduct of affairs was assumed by a National Council of Army officers. Commandant

Marien Nguabi became President of the Republic on December 31, 1968. The Parti Congolais du Travail (PCT) was created by the Congress of December 29-31, 1969. The People's Republic of the Congo was established, and a new Constitution was promulgated. Following the Second Extraordinary Congress of the Party in December 1972, a new Constitution and a reorganization of the structures of the Party and the State were submitted to a people's referendum, in July 1973. President Nguabi was assassinated on March 18, 1977. Col. Joachim Yhombi-Opango took over as President of the Party Military Committee, President of the Republic, Chief of State and President of the Council of Ministers. He was subsequently promoted to brigadier-general. On Feb. 5, 1979 President Yhombi-Opango and the Military Committee resigned. Col. Denis Sassou-Nguesso was appointed as President ad interim. On March 27, he was confirmed as President and subsequently further elected to be Prime Minister. His government was later recognised by referendum and elections held for the National Assembly in July.

#### COSTA RICAN EMBASSY

Cromwell Mansions, 225 Cromwell Road, S.W.5.  
 [01-373 0197]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Jorge Borbon Zeller (1982).

The Republic of Costa Rica in Central America extends across the isthmus between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of 19,653 English sq. miles, and a population (mid-1979) of 2,183,625. The population is basically of European stock, in which Costa Rica differs from

most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country obtained its independence, although from 1824 to 1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific by rail.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Meat is now Costa Rica's fourth largest export.

The chief ports are  $\Psi$  Limón, on the Atlantic coast, through which passes most of the coffee exported, and  $\Psi$  Puntarenas on the Pacific coast. A new Pacific port, Caldera, currently under construction with Japanese aid, is likely to divert traffic from Puntarenas within a few years.

Bananas are exported from Golfito, on the Pacific Coast, by the United Fruit Co., and from Limón by the Standard Fruit Co. In 1981, 1,013 ships entered Costa Rican ports handling imports and exports of approximately 2,393,374 tons of goods. About 500 miles of railroad are open. LACSA is the national airline, operating flights throughout Central and South America, the Caribbean and U.S.A., besides internal flights to local airports by SANSa.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

#### FINANCE

CUBAN EMBASSY IN LONDON  
167 High Holborn, W.C.1  
[01-240 2488]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Hermes Herrera (1981).

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles. The country has now been divided into 14 provinces. The estimated total population in 1978 was 9,700,000.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, where in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish

forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years. In 1961 Dr. Castro proclaimed the revolution to be Socialist and himself to be a Marxist-Leninist.

In October, 1965, the Communist Party of Cuba was formed to succeed the United Party of the Socialist Revolution. It is the only authorized political party. Elections are no longer to be held. The First Congress of the Communist Party of Cuba was held in December 1975. The new Socialist Constitution came into force on February 24, 1976 and elections to the National Assembly of People's Power were subsequently held.

The Revolutionary Government has carried out programmes of land and urban reform and of nationalization of the means of production and distribution. By June, 1963, 90 per cent of industrial production, all foreign trade and about 50 per cent of small commercial companies were in state hands. In March, 1968, virtually all remaining private commercial enterprises were nationalised. About 80 per cent of the cultivated land is in state farms or co-operatives. Private smallholders, who own the remainder, also come under a measure of Government control.

Although efforts are being made to diversify the economy, sugar is still its mainstay and Cuba's principal source of foreign exchange. It still accounts for some 80 per cent in value of total Cuban exports. The largest sugar harvest ever was produced in 1969/70, when total production reached about 8,500,000 tons. This was achieved at considerable expense to the rest of the economy, however, and the declared target of 10 million tons, which was to have been reached in 1970, has been delayed. Cuba's other main exports are nickel, seafood, citrus fruits, tobacco and rum.

Despite increased trade with Western Europe and Japan, the Communist countries, particularly the Soviet Union, form Cuba's main trading partners, covering about 70 per cent of imports and exports. In addition, the U.S.S.R. offers substantial aid from an imbalance in the annual trade profits in Cuba's favour which has recently been in the region of 250 to 350 million roubles.

There are 14,000 kms. of railway track, of which 5,000 kms. are in public service. In 1980 there were 10,000 kms. of road, 4,700 of which were unpaved. At present scheduled international air services run to Mexico City, Moscow, Prague, Madrid, Rabat, Algiers, Georgetown, Kingston, Montreal, Toronto, Panama, Lima and East Berlin.

*Language and Literature.*—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728, but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. There are universities at Santiago de Cuba and Santa Clara. Public libraries have been established. The daily press and broadcasting and television are under the control of the Government.

#### CZECHOSLOVAK EMBASSY

25 Kensington Palace Gardens, W.8.  
[01-229 1255]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Zdeněk Černík (1977).

*Commercial Counsellor*, Václav Jarolím.

*Military and Air Attaché*, Col. Miroslav Merhaut.

*Commercial Attaché*, Jan Bittner.

*Assistant Military and Air Attachés*, Maj. Josef Črkal; Maj. Miroslav Seberka.

*3rd Secretaries*, Dr. Rostislav Pilc (*Consular Affairs*); Josef Valíček; Pavel Laseček; Petr Broskevic; Libor Tělečky; Jiri Kupsa; Petr Souček (*Press*).

**Area and Population.**—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory affected having an area of 53,700 square miles, reduced, by the cession of Ruthenia to U.S.S.R. in 1945, to 49,400 square miles. The population of Czechoslovakia was 15,237,788 in 1979.

**Government.**—The Communist Party, with the aid of Action Committees, seized power in Czechoslovakia in February, 1948, and Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

In January, 1968, pressures for reform of the system were realized with the removal of the First Secretary of the Communist Party, Novotný, and his replacement by Alexander Dubček. They were translated into a Party Action Programme adopted in April. Shortly afterwards the country's supreme legislative body, the National Assembly, began work on new legislation, which envisaged the democratization of the country's political life, greater guarantees of fundamental liberties and the establishment of a federal system.

The speed of events and their implications for the internal development of the other communist regimes in Eastern Europe and the Soviet Union, as well as for the system of alliances among these countries, alarmed the Soviet Union. On the night of August 20, Czechoslovakia was invaded by Soviet, Polish,

East German, Hungarian and Bulgarian troops, the capital and all major towns being occupied.

The Russians were unable to depose the Czechoslovak leadership, but forced them to sign on August 26 an Agreement modifying their policies and, on October 18, a treaty legalising the presence of Soviet troops on Czechoslovak territory.

On April 17, 1969, Gustáv Husák took over the leadership of the Communist Party, and the reforms of 1968 were abandoned with exception of the Federal system of government, which had been set up in October 1968. Czechoslovakia now consists of the Czech Socialist Republic and the Slovak Socialist Republic, each of which has its own government responsible to its legislative body—the National Council. Areas such as the Constitution, Defence, Foreign Affairs, State Material Reserves and Currency are the responsibility of the Federal Administration. The Federal Government is responsible to the Federal Assembly, which is composed of two Chambers, the Chamber of the People, whose deputies are elected throughout the Federation, and the Chamber of the Nations, consisting of an equal number of Czech and Slovak Deputies. The federal system was not extended to the organization of the Communist Party.

*The Economic System.*—Czechoslovakia has long been one of the most highly-industrialised countries of Central Europe. Under the present political system industry is state-owned, while nearly all agricultural land is cultivated by state or co-operative farms. Economic planning is centralised, and state economic plans have the force of law. Reforms of the system implemented from 1965 collapsed in the wake of the events of 1968, after which there was a sharp swing back to centralized planning. But in 1978 a small scale experimental economic reform was introduced into some 150 enterprises, under which there was limited devolution of responsibility. Early in 1980 this experiment, having been considered reasonably successful, was expanded into a "Set of Measures for the Reform of Planned Management" which affects most of the economy. Its main purpose is to introduce some devolution of production and profits control in order to encourage higher productivity and a better quality output.

*Language and Literature.*—Czech and Slovak are the official languages, each having its own literature. The Reformation gave a wide-spread impulse to Czech literature, the writings of Jan Hus (who

was martyred in 1415 as a religious and social reformer) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the 17th century when Jan Amos Komensky or Comenius (1592–1670) was expelled from the country. He is still recognized as an outstanding educationist and a thinker of first magnitude. Under Austrian repression and with the persistent pursuit of Germanization, there was a period of stagnation until the national revival in the first half of the 19th century. Modern prose, drama and fiction, penned between the Wars, are represented by several authors, of international reputation, notably K. M. Capek-Chod (1860–1927), Viktor Dyk (1877–1931), Jaroslav Hašek (1883–1923), Karel Capek (1890–1938), Vladimír Vančura (1891–1942), and Ivan Olbracht (1882–1952). Liberty of the press ceased with the loss of independence and the Nazi occupation in 1939. It was temporarily restored on the liberation of the country. After the Communist take-over of February, 1948, however, freedom of the press was curtailed. All papers and periodicals were forced to follow the Party line and a number of publications were banned. Following the thaw of 1956 and after the relapse into dogmatism after the Hungarian revolution, the new wave of freedom started in 1962–1963 and led to increased recognition of Czech and Slovak literature in the world. Greater international recognition is hampered by translation difficulties. In 1966 nearly 250 Czech and Slovak books were published abroad, including roughly one-third in non-Socialist countries. The prominent writers include František Hrubín (b. 1910), Bohumil Hrabal (b. 1914), Václav Havel (b. 1936), Ladislav Mňačko (b. 1919), Ladislav Novomeský (b. 1904), Arnošt Lustig (b. 1926), Jiří Mucha (b. 1915), and others. Poetic writing ranges from traditional lyric (Jaroslav Seifert) to "concrete" and typographic modernism (Jiří Kolář, Josef Híršal). In the present political conditions few of these writers are published in Czechoslovakia.

*Education.*—Education is compulsory and free for all children from the ages of 6 to 15. The number of pupils in basic nine-year schools is 1,875,479 (1979–80). There are 142,725 students in the secondary grammar schools and the number given for technical schools of all kinds is 331,840. There are five universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno,

Olomouc and Košice. In addition there are a considerable number of other institutions of university standing, technical colleges, agricultural colleges, etc. In 1979-80, there were 183,632 students in centres of higher education of which 44,963 were part-time.

**Finance.**—The Czechoslovak currency is the Czechoslovak Koruna (Kčs = Czechoslovak crown) of 100 heller.

**Trade with U.K.**

	1980
Imports from U.K. ....	£81,000,000
Exports to U.K. ....	87,800,000

**CAPITAL.**—Prague (Praha), on the Vltava (Moldau), the former capital of Bohemia with a population (1979) of 1,191,125. Other towns are Brno (Brünn), capital of Moravia (372,793), Bratislava (Pressburg), capital of Slovakia (374,860), Ostrava (325,473), Košice (200,943) and Plzen (Pilsen) (169,466).

**FLAG.**—Two equal horizontal stripes, white (above) and red; a blue triangle next to staff.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Tyge Dahlgard (1981).

*Minister Plenipotentiary*, K. A. Eliassen.

*Minister Counsellors*, I. J. Kelland (*Economic and Consular*); B. Skou (*Press and Culture*); H. J. Rossen (*Commercial*); M. Hermansen (*Agricultural Affairs*).

*Counsellor*, H. H. Bruun.

*Defence Attaché*, Col. B. P. Faaberg.

**Area and Population.**—A Kingdom of Northern Europe, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic, the Faroes and Greenland. Denmark is situated between 54° 34'–57° 45' N. lat., 8° 5'–15° E. 12' long., with an area of 17,000 square miles, and a population estimated (1981) of 5,119,155. In 1981 there were 53,410 live births, and 56,411 deaths.

**Government.**—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Faroes and 2 for Greenland. The voting age is 20.

The Social Democrat Government of Mr. Jørgensen, formed in January 1982, resigned from office in early September 1982 after failing to obtain approval of Budget proposals.

In 1973 Denmark joined the European Economic Community. Denmark is also a member of NATO, and the Nordic Council.

**Education** is free and compulsory, the schools being maintained by taxation. Special schools are numerous, commercial, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478), Aarhus (1933), Odense (1966), Roskilde (1972) and Aalborg (1974). A further University at Esbjerg is planned.

**Language and Literature.**—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1857–1875), Sören Kierkegaard (1813–1855) and

Georg Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1944. Among recent authors of note are Klaus Rifbjerg (b. 1931) and Lief Panduro (b. 1923). Some 48 newspapers are published in Denmark. 10 daily papers are published in Copenhagen.

**Production and Industry.**—8.1 per cent. of the labour force is engaged in agriculture, fishing, forestry, etc.; 26.7 per cent. in manufacturing, building and construction; 11.7 per cent. in commerce and 53.5 per cent. in administration, the liberal professions, etc. The chief agricultural products are pigs, cattle, dairy products, poultry and eggs, seeds, cereals and sugar beet; manufactures are mostly based on imported raw material but there are also considerable imports of finished goods.

**COMMUNICATIONS.**—Mercantile marine (ships above 100 gross tonnage) at end of 1981, totalled 854 ships, with a gross tonnage of 4,748,000. In 1981 there was 2,461 km. of railway. In 1980 the capacity of the telecommunications network in circuit km. was 27,437,000.

## FINANCE

	1982
Revenue ( <i>Budget estimate</i> ) . . . . .	Kr. 119,400 million
Expenditure ( <i>Budget estimate</i> ) . . . . .	167,100 million

Denmark's balance of payments on current account showed a deficit for 1981 of Kr. 12,435,000,000 (1980, Kr. 12,545,000,000).

## TRADE

	1980	1981
	Kr. million	
Total Imports . . . . .	109,388	124,676
Total Exports . . . . .	95,671	113,802

## Trade with U.K.

	1979	1980

*3rd Secretary*, R. C. Bronson.

*Attaché*, S. L. O'Meara, M.B.E. (Vice Consul).

*Chaplain*, Rev. K. Povey.

There are Consulates at Aabenraa, Aalborg, Aarhus, Esbjerg, Fredericia, Odense and at Tórshavn.

*British Council Representative and Cultural Attaché*, Dr. W. N. Brown, Montergade 1, Copenhagen.

## Outlying Parts of the Kingdom

THE FARØES, or Sheep Islands (540 sq. m.; pop. (1976) 41,211), capital, Tórshavn, are governed by a *Lagting* of 26 members, a *Landsstyre* of 4 members which deals with special Farøes affairs, and send 2 representatives to the *Folketing* at Copenhagen. On Sept. 14, 1946, the *Lagting*, with the consent of the Danish Government, for its own guidance held a plebiscite on the Farøes. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At subsequent general election for the *Lagting* a great majority voted in favour of remaining part of the Kingdom of Denmark with a certain measure of home rule and in 1948 the Farøes received this. The Farøes are not part of the E.E.C.

GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population (1976) 49,666) is divided into 3 provinces (West, North and East). Greenland (capital, Nuuk (Godthåb)) has a *Landsraad* of 17 members and sends 2 representatives to the *Folketing* at Copenhagen. Greenland attained a status of internal autonomy on May 1, 1979. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department. Following a plebiscite Greenland is negotiating its withdrawal from the E.E.C., but without discontinuing relations with Denmark. Mineral and oil prospecting revealed deposits of lead, zinc, iron ore, oil, gas and uranium. Commercial exploitation of these resources has already begun. The United States of America has acquired certain rights to maintain air bases in Greenland.

## DJIBOUTI

(Republic of Djibouti)

*President*, Hassan Gouled Aptidon.

Formerly known as French Somaliland and then the French Territory of the Afars and the Issas, the country became independent at midnight on June 26, 1977. It is situated on the north-east coast of Africa and has an estimated population of over 300,000. The climate is harsh and much of the country is semi-arid desert. The French continue to maintain army, navy and air force bases. Djibouti has an excellent port, international airport and a railway line runs to Addis Ababa. *Capital*,  $\Psi$ Djibouti (est. pop. 150,000).

## DOMINICAN REPUBLIC

(República Dominicana)

*President*, Salvador Jorge Blanco, took office, 16 Aug. 1982.

## EMBASSY

4 Braemar Mansions, Cornwall Gardens, S.W.7  
[01-937 1921]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Alfredo A. Ricart (1975).

*Minister-Counsellor*, Lic. F. M. Guerrero Prats-Ramirez.

*Attachés*, Dr. Rosa America Paredes; Dr. Jose Arturo Silie.

*Air Attaché*, Col. Diogenes Lora.

*Cultural Attaché*, Mrs. N. Barletta de Cates.

*2nd Secretary*, Sr. Lic. Rafael Q. Montilla.

The Consulate is at Flat 2, 108 Lexham Gardens, W.8. There are also Consular Offices at *Liverpool, Birmingham, Manchester, Grimsby, Southampton, Cardiff, Glasgow, Westminster and Plymouth.*

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America. The western part of the island forms the Republic of Haiti. (*For Map, see p. 844.*)

The island lies between Cuba on the west and Puerto Rico on the east and the Republic covers an area of about 19,322 square miles, with a population (1981 Census) of 5,647,977. The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes.

*Government.*—Santo Domingo was discovered by Christopher Columbus in December, 1492, and remained a Spanish Colony until 1821. In 1822 it was subjugated by the neighbouring Haitians who remained in control until 1844 when the Dominican Republic was proclaimed. The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. From 1930 until May 30, 1961 (when he was assassinated) Generalissimo Rafael Trujillo ruled the country.

Professor Juan Bosch, elected President in December 1962, held office until September, 1963, when he was deposed by a military junta. A revolt in favour of ex-President Bosch in April, 1965, developed into civil war lasting until September the same year when a provisional President was elected. On June 1, 1966, Dr. Joaquin Balaguer was elected President and the following November a new Constitution was introduced.

On May 16, 1982 Dr. Salvador Jorge Blanco was elected President and in separate, but concurrent, voting his P.R.D. party won an overall majority in both the Senate and the Chamber of Deputies.

*Constitution.*—The constitution now in force was introduced in Nov. 1966. Executive power is vested in the President, who is elected by direct vote and serves for four years. The President forms his cabinet without reference to the Congress.

Legislative power is exercised by the Congress, which has a term of four years concurrent with the Presidency. The Upper Chamber is the Senate of 27 senators, one for each province and one for Santo Domingo. The lower is the Chamber of Deputies which has 120 members, one for each 50,000 inhabitants in each province, with the provision that no province has less than two members. Judicial power is exercised by the Supreme Court of Justice.

*Communications.*—According to local classification there are 2,932 miles of first class and 1,392 miles of second class and inter-communal roads in the Republic. There is a direct road from Santo Domingo to Port-au-Prince, the capital of Haiti, but that part of it in the border area has fallen into disuse. The frontier has been closed since Sept., 1967, except for that section crossed by the main road linking the two capitals. A telephone system connects practically all the principal towns of the republic and there is a telegraph service with all parts of the world. There are more than 90 commercial broadcasting stations and six television stations.

Spanish is the language of the Republic.

The Republic is served by two national and six foreign airlines, and an international airport 18 miles to the east of the capital is in operation. Another has been built near Puerto Plata on the north coast.

*Economy.*—Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, ferro-nickel, bauxite, gold, silver, cattle, sisal products, honey and chocolate. There is a growing number of light industries producing beer, tinned foodstuffs, glass products, textiles, soap, cigarettes, construction materials, plastic articles, shoes, papers, paint, rum, matches, peanut oil and other products.

FINANCE

Budget	1981	1982 (est.)
Revenue . . . .	RD\$1,088,000,000	RD\$1,052,000,000

TRADE

	1980	1981
Imports . . . .	RD\$1,425,000,000	RD\$1,445,000,000
Exports . . . .	961,000,000	1,188,000,000

Trade with U.K.

	1980
Imports from U.K. . . . .	£11,514,000
Exports to U.K. . . . .	4,788,000

The chief imports are machinery, food stuffs, iron and steel, cotton textiles and yarns, mineral oils (including petrol), cars and other motor vehicles, chemical and pharmaceutical products, electrical equipment and accessories, construction material, paper and paper products, and rubber and rubber products; the chief exports are sugar, coffee, cocoa, tobacco, chocolate, molasses, bauxite, ferro-nickel and gold.

Ferro-nickel is the principal export to U.K.; ferro-nickel and bauxite are also exported in considerable quantities to the U.S.A. and Europe.

*CAPITAL.*— $\Psi$  Santo Domingo, population of the Capital District (1981 census), 1,550,739. Other centres, with populations (1981 census); Santiago de los Caballeros (550,372); La Vega (385,043); San Francisco De Macoris (235,544); San Juan (239,957); San Cristóbal (446,132).

*FLAG.*—Red and blue, with white cross bearing an emblem at centre.

*NATIONAL DAY.*—February 27 (Independence Day, 1844).

EMBASSY AND CONSULATE

Flat 3B, 3 Hans Crescent, S.W.1  
 [01-584 1367]  
*Ambassador Extraordinary and Plenipotentiary*, His Excellency Orlando Gabela.

Minister, Byron Morejón-Almeida.

Minister-Counsellor (Commercial), Dr. G. Espinosa.

Military, Naval and Air Attaché, Col. E. Jaramillo.

**Area and Population.**—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 20' and 81° W. long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles. (For MAP, see Index.)

The Republic of Ecuador is divided into 20 provinces. It has a population (census, 1981) of approximately 8 million, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,408 ft.), Ilinza (17,405 ft.), Carihuairazo (16,515 ft.), Cotacachi (16,301 ft.) and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,612 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Giant Tortoise) *Islands* forming the province of the Archipelago de Colón, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1981) of 5,000. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The province consists for the most part of National Park Territory, where unique marine birds, iguanas, and the giant tortoises are conserved. There is some local subsistence farming; the main industry, apart from tourism, is tuna and lobster fishing.

**Government.**—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

After seven years of military rule, Ecuador returned to democracy in 1979. The present constitution, introduced in 1978, provides for an elected President and Vice-President who serve for a five year term. (Neither may stand for re-election.) There is a Chamber of Representatives with 69 members elected every five years, 12 of whom are elected on a national basis and the rest by the provinces. The Chamber meets for two months every year (Aug.–Oct.) but can be convoked at any time for extraordinary sessions. Four Legislative Commissions meet through the year. Voting is compulsory for all literate and (since 1980) voluntary for all illiterate citizens over the age of 18. Thirteen political groupings are recognized.

**Agriculture and Industry.**—Agriculture is the most important sector of the economy, supporting nearly 50 per cent of the population (particularly the poorest) and contributing 13 per cent of the Gross Domestic Product and 26 per cent of exports. The main products for export are fish (mainly shrimps, tuna and sardines), which had become the largest export by early 1982; bananas, which provide a third of agricultural exports; cocoa and coffee. Other important crops are sugar, corn, soya, rice, cotton,

African palm (for oil), vegetables, fruit and timber, the temperate crops being produced mostly in the highlands.

The economy was transformed by the discovery in 1972 of major oil fields in the Oriente area, and oil accounted for two thirds of 1981 export earnings. The economy grew rapidly in the 1970s but is now faced with reduced growth, due mainly to the fall in the price of oil. The oil deposits in the Oriente are estimated at between 10–15,000 million barrels, and further exploration and development is taking place. The oil is evacuated by a trans-Andean pipeline to the port of Balao (near Esmeraldas).

**Communications.**—There are 23,256 km. of permanent roads and 5,044 km. of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. Nine commercial airlines operate international flights, linking Ecuador with major foreign cities and there are internal services between all important towns.

**Defence.**—The standing Army has a strength of about 38,000. There is an Air Force of some 120 aircraft of various kinds and 4,800 personnel. The small Navy is 4,500 strong.

**Language and Literature.**—Spanish is the principal language of the country but Quechua is also a recognized language and is spoken by the majority of the Indian population. As a result of an intensive national education programme more than 75 per cent of the population are now literate. 3 daily newspapers are published at Quito and 4 at Guayaquil. Elementary education is free and compulsory. There are 9 Universities, at Quito (2), Guayaquil (3), Cuenca, Machala, Loja and Portoviejo, Polytechnic Schools at Quito and Guayaquil and 8 technical colleges in other provincial capitals.

**Finance.**—The estimated government budget at Jan. 1982 was 64,770 million sucres (53,600 million sucres in 1981). The balance of payments deficit stands at U.S.\$1.4 billion, and foreign exchange reserves at U.S.\$500 million.

#### TRADE

Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

	1980
	U.S.\$ millions
Imports .....	2,257.1
Exports .....	2,422.7

#### Trade with U.K.

	1980
Imports from U.K. ....	£30,930,000
Exports to U.K. ....	8,844,000

Manufactured goods and machinery are the main imports.

**CAPITAL.**—Quito. Population (1981 estimate), 800,000; Ψ Guayaquil (1,000,000) is the chief port; Cuenca (110,000).

**FLAG.**—Three horizontal bands, yellow, blue and red (the yellow band twice the width of the others); emblem in centre.

**NATIONAL DAY.**—August 10 (*Día de la Independencia*).

## EGYPT

(Arab Republic of Egypt)

President, Muhammad Husni Mubarak, elected, Oct. 14, 1981.

CABINET  
(May, 1982)

Prime Minister, Dr. Ahmed Fuad Muhieddin.

Deputy Prime Minister and Minister of Foreign Affairs, Gen. Kamal Hassan Ali.

Deputy Prime Minister for People's Assembly Affairs, Fikri Makram Ebeid.

Deputy Prime Minister for Services and Minister of Local Government, Gen. Muhammad Nabawi Ismail.

Deputy Prime Minister for Production and Minister for Petroleum and Mineral Wealth, Ahmad Ezz Eddin Hilal.

Deputy Prime Minister for Economic Affairs and Minister of Investment, Dr. Wagih Shindy.

Deputy Prime Minister and Defence and Military Production, F. M. Mohammed Abdul Helim Abu Ghezala.

Deputy Prime Minister and Education and Scientific Research, Dr. Mustafa Kamal Helmi.

Social Affairs and Insurance, Dr. Amal Abdul Rahim Osman.

Development, Housing and Land Reclamation, Has-saballah el Kafrawi.

Minister of State for Foreign Affairs, Dr. Butros Butros Ghali.

Agriculture and Food Security, Dr. Yusef Wali.

Agriculture, Dr. Mahmoud Muhammad Dawud.

Transport, Communications and Maritime Transport, Soliman Metwali Soliman.

Irrigation and Sudan Affairs, Muhammad Abdul Hadi Samaha.

Minister of State for People's Assembly Affairs, Muhammad Rashwan Mahmud.

Tourism and Civil Aviation, Teweik Abdu.

Health, Dr. Muhammad Sabri Zaki.

Justice, Mamduh Atteya.

Industry and Mineral Resources, Fuad Ibrahim Abu Zaghla.

Electricity and Energy, Maher Muhammad Osman Abaza.

Supply and Internal Commerce, Dr. Ahmed Noh.

Finance, Dr. Muhammad Salah Al Din Hamid.

Economy and Foreign Trade, Dr. Mustapha Kamel el Sa'eed.

Minister of State for Military Production, Dr. Eng. Gamal Al Said Ibrahim.

Interior, Hassan Soliman Abu Basha.

EMBASSY IN LONDON  
26 South Street, W.1  
[01-499 2401]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hassan Abu Seeda (1980).

Minister Plenipotentiary, Ahmed Adel (Political Affairs); Hassan Abdel-Aal (Consular).

**AREA AND POPULATION.**—The total area of Egypt is estimated at 1,000,253 square kilometres (385,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population (estimated December, 1981) of 44,000,000.

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahin* (*fellāh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder

semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayūm. The third element is the *Nubian* of the Nile Valley between Aswān and Wadi-Halfa of mixed Arab and Negro blood. The Bedouin and Nubians are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollūm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweināt Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of 'Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of 'Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddāns* (12,431 square miles) and the area of lakes at 641,000 *feddāns* (1,039 square miles), a total of 8,308,000 *feddāns* (13,470 square miles).

**Physical Features.**—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the seven provinces of Lower Egypt, with the richest soil in the country.

The *Nile* has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river formerly had a regular yearly rise and fall of about 13 feet at Cairo, but since the commencement of storage in the

reservoir of the Aswan High Dam in 1965, there has been no flood downstream of the dam and the water level remains almost constant throughout the year. Westward from the Nile Valley into Tripolitania stretches the *Libyan desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia and Siwa. A new valley of an area of some 16,000 *feddâns* in the western desert has been created north of these *oases*, irrigated by subsoil water reserves.

On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Gizeh, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

**Religions.**—The predominant religion is Islam but there are over 3,000,000 Christians (mainly Copts). By 1968 nearly all the Jews had left the country. The chief Moslem religious authorities in Egypt are the *Sheikh el Gami el Azhar* and the *Mufti Gumhuriya Misr el Arabiya*.

**Government.**—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire under which it remained until early in the 19th century.

A British Protectorate over Egypt declared on Dec. 18, 1914, lasted until Feb. 28, 1922, when Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936) and the military occupation by British troops was terminated.

In July, 1952, following a military *coup d'état*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

A union with Syria was affected in 1958 and lasted until September, 1961, when Syria seceded after a *coup d'état*. The title and flag of the United Arab Republic were, however, retained for Egypt until Sept. 2, 1971.

President Nasser died suddenly on Sept. 28, 1970, and the duties of Head of State were assumed by Mr. Anwar Sadat who was elected President in a referendum on Oct. 15. President Sadat was assassinated on Oct. 6, 1981 and succeeded by the Vice-President, Hosni Mubarak, who was elected President in a referendum on Oct. 14, 1981.

**Agriculture.**—Despite increased industrialization and the discovery of new oil fields, agriculture continues to provide the most substantial contribution to the national economy. Cotton (10 million *kanbars* in 1974) is the most important export, but sugar cane, onions, potatoes and citrus fruits are also

sold extensively to overseas markets. Nearly all cultivation is carried out by peasant farmers whose operations are funded and generally controlled by co-operative organizations. Productivity is usually good. Irrigation and land reclamation schemes have contributed to a small increase in the cultivable area, and a \$147 million drainage project, financed partly by the International Bank for Reconstruction and Development, is intended ultimately to irrigate nearly one million acres.

**Railways.**—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to a new port being constructed upstream of the High Dam. At this point a steamer connection runs to Wadi Halfa, connecting Egypt with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Solûm, thus joining Libya to Egypt. The gauge is standard (4 ft. 8½ in.).

**Roads and Caravan Routes.**—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollûm and thence to connect with the coast road in Libya. A bitumen road leads to Kharga and Dakhla, from the former of which there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir, a metalled road, being probably the most frequently used.

**Shipping.**—Apart from the three great seaports of Alexandria, Port Said and Suez, the last two of which are now undergoing reconstruction following several years of disuse after the 1967 war, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

**Currency.**—The monetary unit of Egypt is the Egyptian *pound* of 100 *piastres*.

#### Trade with U.K.

	1980
Imports from U.K. ....	£346,700,000
Exports to U.K. ....	336,600,000

The principal imports are metals, and manufactures thereof, chemicals and pharmaceuticals, machinery and transport equipment, foodstuffs, beverages and textile fibres. The exports are principally raw cotton, textile yarns, rice, fruit and vegetables, petroleum products and a growing list of secondary exports, many of them manufactured goods.

**CAPITAL.**—Cairo (population, estimated in 1981 at 11,000,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century and containing in its walls the Mosque of Mohamed Ali built in the 19th century.

ψALEXANDRIA (estimated population in 1980 of 2,521,000), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World". Other towns are: Ismailia (400,000); ψPort Said (285,000); Mansura (120,000); Asyût (300,000); Faiyûm (180,000); Tanta

(150,000); Mahalla el Kubra (130,000);  $\Psi$ Suez;  $\Psi$ Damietta (100,000).

Cairo is 2,520 miles from London: transit *via* Ancona or Venice, 5 days; *via* Marseilles, 6 days.

FLAG.—Horizontal bands of red, white and black, with a hawk in the centre of the white band.

NATIONAL DAY.—July 23 (Anniversary of Revolution in 1952).

#### BRITISH EMBASSY

Ahmed Ragheb Street, Garden City, Cairo

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir Michael Weir, K.C.M.G.

*British Council Representative*, M. Dalziel, 192 Sharia el Nil, Agouza, Cairo.

## EQUATORIAL GUINEA

*Leader of the Revolutionary Council*, Col. Teodora Nguema.

Formerly the territory of "Spanish Guinea", Equatorial Guinea consists of the Island of Bioco (formerly known as Macias Nguema), an island in the Bight of Biafra about 20 miles from the west coast of Africa, Pagalu Island (formerly Annobon) in the Gulf of Guinea, the Corisco Islands (Corisco, Elobey Grande and Elobey Chico) and Rio Muni, a mainland area between Cameroon and Gabon. It has a total area of about 28,000 sq. km. and a population (1980 estimate) of 150,000.

*Bioco* is a mountainous island with forests of oil palm, ebony, mahogany and oak, and sugar-cane, cotton and indigo. Cocoa, coffee, sugar, tobacco, vanilla nut and kola nut are cultivated and cocoa and other products are exported.

*Government*.—Former colonies of Spain, the territories now forming the Republic of Equatorial Guinea were from April 1, 1960, constituted as two provinces of Metropolitan Spain, the inhabitants having the same rights as Spanish citizens. As a result of a plebiscite held on Dec. 15, 1963, an autonomous régime was instituted on June 2, 1964, with the approval of the Spanish Government. Equatorial Guinea became fully independent on October 12, 1968, after a referendum on the new constitution held in August, 1968, and presidential elections on Sept. 22, 1968. The first President, Señor Francisco Macias, assumed office on Independence Day.

Severe disorders occurred during February and March, 1969, following incidents at the town of Bata (in Rio Muni). Spanish residents left Equatorial Guinea in large numbers, having had to seek the protection of residual Spanish forces while awaiting evacuation to Spain. Some 600 Spanish civilians elected to remain in Bioco and about 80 in Rio Muni, but most of these have subsequently left. Following Nigerian allegations of continuing mistreatment, most of the Nigerian labour force, on whom cocoa production largely depended, were repatriated in late 1975 and early 1976. The economy is now mainly dependent on outside aid, principally from Spain.

On Aug. 4/5, 1979, President Macias was deposed by his Defence Minister, and nephew, Col. Teodoro Nguema.

CAPITAL.— $\Psi$ Malabo (formerly known as Santa Isabel) on the island of Bioco (population 25,000).  $\Psi$ Bata is the principal town and port of Rio Muni.

FLAG.—Three horizontal bands, green over white over red; blue triangle next staff; coat of arms in centre of white band.

*British Ambassador*, His Excellency Bryan Sparrow (1981) (*resides at* Yaoundé).

## ETHIOPIA

*Chairman*, Lt.-Col. Mengistu Haile Mariam.  
*Minister of Foreign Affairs*, Col. Feleke Gedle-Ghiorgis.

EMBASSY IN LONDON  
17 Prince's Gate, S.W.7  
[01-589 7212]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Ayalew Wolde Giorgis.

*Position and Extent*.—Ethiopia, with which Eritrea was federated from 1952 to 1962 when it was incorporated as a province, is in North-Eastern Africa, bounded on the north-west by the Sudan; on the south by Kenya; on the east by Djibouti and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles, with a population of 29,416,000 (1977) of whom about one-third are of the ruling race of Semitic origin (Amharas and Tigreans) and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simien range in the north; many other mountains exceed 10,000 ft. Eritrea consists of a mountainous hogs-back range up to 10,000 ft., interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges are very hot; the higher plateaux are well watered, with a genial climate. On the high plateaux there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

Those of Semitic origin (Amharas and Tigreans), who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christians of the Ethiopian Orthodox Church, which was formerly led by the head of the Coptic Church, the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous and the new Patriarch, Abuna Tekle Haimanot, was enthroned in

1976. Moslems inhabit lowland Eritrea, Wollo, Harargne and Bale provinces. Harar is a centre of Islam. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

Following considerable military and civil unrest in early 1974 the Emperor Haile Selassie I announced on March 5 the convening of a commission to revise the Constitution, and the setting up within six months of a conference to consider the commission's proposals. Internal unrest continued through the summer, however, and at the end of June, the armed forces assumed effective control of the country by establishing an "Armed Forces Committee" now entitled the Provisional Military Administrative Council (*The Derg*). Their demands for far-reaching reforms were acceded to by the Government, with the agreement of the Emperor, who was finally deposed on Sept. 12, 1974.

The Provisional Military Administrative Council was reorganized in Dec. 1976 into three tiers—general assembly, central committee and standing committee. At the same time the powers of Mengistu Haile Mariam, the First Vice-Chairman, were curtailed. As a result there was an internal coup and Brig.-Gen. Teferi Bante, the head of state, was killed, Mengistu becoming the new Chairman. Mengistu's position was established by a proclamation of Feb. 11, 1977. As a result of an internal dispute Atnafu Abate, the Vice Chairman, was executed in Nov. 1977, leaving Mengistu in sole control. In December 1979, C.O.P.W.E. (Commission to Organise the Party of the Working People of Ethiopia) was formed.

In July 1977, Somalia, claiming the Ogaden region of Ethiopia in support of Western Somalia Liberation Front guerrillas, invaded the region. Ethiopia, with massive arms shipments from the U.S.S.R., and with the aid of several thousand Cuban troops, was able to defeat the Somalis. The Somali regular army withdrew in March 1978, but guerilla activity continued.

*Eritrea*.—Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown, becoming a province of Ethiopia in 1962. An armed campaign for independence started in 1962 and has intensified since the early 1970's.

*Production and Industry*.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 70 per cent. of the country's total exports by value in 1979. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, tyres, beer and cement. Hydro-electric power production and telecommunications are expanding rapidly, however, mainly with loans from the World bank, which in 1971 had approved a number of loans for agricultural development.

*Communications*.—A railway links Addis Ababa, the capital, via Dire Dawa, with Djibouti, 486 miles away, although it is vulnerable to guerilla attack. In Eritrea a narrow gauge line runs from Massawa to Asmara and on to Agordat, but it is out of action because of the conflict there. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with a branch from Dessie to Assab on the Red Sea Coast. Addis Ababa and

Asmara are linked by a road running through Gondar and along Lake Tana. Others run from Addis Ababa west to Lekempti, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the east to Dire Dawa, Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to many provincial towns. External services are operated to Athens, Frankfurt, Moscow, Rome, Paris, Aden, Djibouti, Sana'a, Taiz, Jeddah, Cairo, Khartoum, Nairobi, Dar-es-Salaam, Entebbe, Lagos, Accra, Douala, Kigali, Kinshasa, Bombay, New Delhi, Peking and London.

*Defence*.—Under the Ministry of Defence the armed forces comprise the Army, the Air Force and the Navy. The Army consists of four infantry divisions, including one mechanized brigade with armour, with normal artillery, engineer units and supporting arms including a parachute battalion. There are also approximately 75,000 militia which are in the process of being integrated into the regular army as separate divisions.

The Air Force comprises a transport squadron, a bomber squadron, three fighter squadrons, a training squadron, a jet conversion squadron, and an elementary training unit. The Air Force Headquarters is situated at Debre Zeit. Most of the aircraft are of Russian manufacture.

The Navy has a headquarters in Addis Ababa with a main base at Massawa and a smaller one at Assab.

*Education*.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools, and cadet-schools for the Army, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. In 1961 the Haile Selassie I University was founded to co-ordinate the existing institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.) and to provide a framework for future development. There is also a Catholic-run university in Asmara. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

*Finance*.—The total revenue for 1980-81 was £333,070m, while expenditure was expected to reach £343,483m. The Ethiopian unit of currency is the *birr*. At December 31, 1979 the combined note and coin issue amounted to £200m. Foreign exchange and gold reserves of the National Bank amounted to £87,747,000 at the same date.

*Trade*.—The chief imports by value are machinery and transport equipment, manufactured goods and chemicals (from U.K.); the principal exports by value being coffee, oilseeds, hides and skins, and pulses.

## TRADE

	1979
Total Imports .....	£247,277,680
Total Exports .....	181,812,210

## Trade with U.K.

	1980
Imports from U.K. ....	£20,962,000
Exports to U.K. ....	16,046,000

CAPITAL.—Addis Ababa (population, estimated

912,000), also capital of the province of Shoa; Asmara (population 250,000) is the capital of the Province of Eritrea. Dire Dawa is the most important commercial centre after Addis Ababa and Asmara,  $\Psi$ Massawa and  $\Psi$ Assab (recently enlarged) are the two main ports. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

38 Chesham Place, S.W.1  
[01-235 9531]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Richard Björnson Tötterman, G.C.V.O., O.B.E. (1975).*

*Minister Counsellor, Veijo Sampovaara.*

*1st Secretaries, Kirsti Lintonen; Lief Fagernäs.*

*Press Counsellor, Tom Christian Söderman.*

*Defence Attaché, Lt.-Col. Ilkka Ranta.*

**Area and Population.**—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,165 square miles, of which 70 per cent. is forest, 10 per cent. cultivated, 9 per cent. lakes and 11 per cent. waste and other land; population (December, 1981), 4,811,391. In 1981 the birth rate was 13.2, death rate 9.3 per 1,000. The infant mortality rate was 7.6 per 1,000 live births (1980). 90.3 per cent. of the people are Lutheran, 1.1 per cent. Greek Orthodox and 8.4 per cent. others.

The Aland Archipelago (Ahvenanmaa), a group of

small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (December, 1980) of 21,682 (95.2 per cent. Swedish-speaking). The islands have a semi-autonomous status.

**Government.**—Under the Constitution there is a single Chamber (*Eduskunta*) composed of 200 members, elected by universal suffrage. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

The present government came into office on Feb. 19, 1982. The four parties in the coalition are the Social Democratic Party, the Centre Party, the Finnish People's Democratic League and the Swedish People's Party of Finland.

**Defence.**—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the Army is limited to a force not exceeding 34,400. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8-11 months. Total strength of trained and equipped reserves is about 700,000, 16,500 of which have served in the U.N. peacekeeping force.

**Education.**—Primary education (co-educational comprehensive school) is compulsory for children from 7 to 16 years, and free of charge. In the autumn of 1981, there were 551,906 in comprehensive schools (332,887 at basic stage and 219,019 at upper stage), 103,369 in senior secondary schools and 135,000 in vocational institutions of senior level. There are 22 universities or other schools of academic level, University of Helsinki (1981), 23,900 students. Combined enrolment at universities and other schools of academic level was (1981) 84,716.

**Language and Literature.**—There are two official languages in Finland. 93.5 per cent of the population speak Finnish as their first language, 6.3 Swedish (1979). The remaining 0.2 per cent. speak other

languages (mainly Lapps who number about 2,500 and live in the Far North). Both Finnish and Swedish are used for administration and education; newspapers, books, plays and films appear in both languages. There is a vigorous modern literature. F. E. Sillanpää, who died in 1964, was awarded the Nobel prize for Literature. Best known among the living authors are Väinö Linna, Veijo Meri and Paavo Haavikko. There are 62 daily newspapers in Finland which appear on 4 or more days per week (55 Finnish language, and 7 Swedish).

**Production and Industry.**—Finland is a highly industrialised country producing a wide range of capital and consumer goods. Timber and the products of the forest-based industries remain the backbone of the economy, accounting for 40 per cent. of her export earnings, but the importance of the metal-working, shipbuilding and engineering industries has been growing. This sector in 1981 accounted for 31 per cent. of Finland's exports. The textile industry is well developed and Finland's glass, ceramics and furniture industries enjoy international reputations. Other important industries are rubber, plastics, chemicals and pharmaceuticals, footwear, food-stuffs and electronic equipment.

**Communications.**—There are 6,976 kilometres of railroad, a fully automatic telephone system and a well-developed telegraph system. There is a railway connection with Sweden and U.S.S.R., passenger boat connection with Britain, Sweden, Denmark, West Germany, Poland and U.S.S.R. Vessels on the London to Leningrad route call at Helsinki. There are also passenger/cargo services between Britain and Helsinki, Kotka and other Finnish ports. External civil air services are maintained by most European airlines. The merchant fleet at the end of March 1982 totalled 486 vessels (2,441,784 tons gross); 150 passenger vessels (257,677 tons gross), 46 tankers (1,283,583), 192 dry cargo vessels (915,299) and 98 other vessels (15,225).

## FINANCE

	1981	1982
	<i>Finnmarks</i>	<i>Finnmarks</i>
Revenue ( <i>Budget</i> ) . . .	56,077,381,600	64,916,000,000
Expenditure ( <i>Budget</i> )	56,072,225,600	64,916,000,000

## TRADE

	1980	1981
	<i>Finnmarks</i>	<i>Finnmarks</i>
Total Imports . . .	58,250,000,000	61,263,000,000
Total Exports . . .	52,795,000,000	60,314,000,000

## Trade with U.K.

	1980	1981
Imports from U.K. . .	£5,005,000,000	£4,935,000,000
Exports to U.K. . . . .	5,940,000,000	6,422,000,000

The principal imports are raw materials, machinery and manufactured goods. The exports are principally the output of the paper and other forest industries, engineering, metal industry (e.g. paper-working machinery and ships) and chemicals.

**CAPITAL.**— $\Psi$ Helsinki (Helsingfors). Population (Jan. 1981), 482,800; other towns are Tampere (Tammerfors), 166,300;  $\Psi$ Turku (Åbo), 163,700; Espoo, 137,500; Vantaa, 132,100; Lahti, 94,700;  $\Psi$ Oulu (Uleåborg), 93,800;  $\Psi$ Pori (Björneborg), 79,400; Kuopio, 74,600; Jyväskylä, 64,200.

**NATIONAL DAY.**—December 6 (Day of Independence).

**FLAG.**—White with blue cross.

BRITISH EMBASSY  
Helsinki

*British Ambassador's Residence*, It. Puistotie 15.  
*Chancery Offices*, Uudenmaankatu 16–20.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Andrew Christopher Stuart, C.M.G. (1979).

*Counsellor (Commercial)*, B. Holmes.

*1st Secretaries*, R. S. Gorham; Miss M. Ramsay; T. I. Priest; J. R. Jamieson (*Consul*); A. Ward (*Commercial*).

*Defence, Military and Air Attaché*, Lt.-Col. R. K. Sampson.

*2nd Secretaries*, M. Mochan (*Commercial*); V. C. Wallis.

*3rd Secretary*, R. Avery (*Vice-Consul*).

There are British Consular offices at *Helsinki, Tampere, Turku, Pori, Kotka, Oulu and Vaasa*.

*British Council Representative*, A. R. Payne, Eteläspanadi 22A, Helsinki 13.

## FRANCE

(La République Française)

*President of the French Republic*, Francois Mitterrand, elected May 10, 1981.

*Prime Minister*, M. Pierre Mauroy.

*Foreign Affairs*, M. Claude Cheysson.

*Interior*, M. Gaston Defferre.

*Justice*, M. Robert Badinter.

*Economy*, M. Jacques Delors.

*Budget*, M. Laurent Fabius.

*Environment*, M. Michel Crepeau.

*Defence*, M. Charles Hernu.

*Education*, M. Alain Savary.

*Co-operation*, M. Pierre-Bérgovoy.

*Agriculture*, Mme. Edith Cresson.

*Industry*, M. Jean-Pierre Chevènement.

*Transport*, M. Charles Fiterman.

*External Trade*, M. Michel Jobert.

*Labour*, M. Jean Auroux.

*Health*, M. Jack Lalitte.

*Culture*, M. Jack Lang.

*Communication*, M. Georges Fillioud.

*Youth, Sports and Leisure*, M. Edwige Avice.

*Women*, Mme. Yvette Roudy.

*Posts and Telecommunications*, M. Louis Mexandeau.

## FRENCH EMBASSY IN LONDON

Residence: 11 Kensington Palace Gardens, W.8

[01-229 9411]

Chancery: 58 Knightsbridge, S.W.1. [01-235 8080].

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Monsieur Emmanuel de Margerie (1981).

**Area and Population.**—The largest state in Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 85' E. to 4° 45' W. long., bounded on the north by the English Channel and the Straits of Dover (*Pas de Calais*), which separate it from England. Its circumference is estimated at about 3,000 miles and its area at 213,000 sq. miles divided into 95 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The population of France in 1981 was 53,962,000.

## GOVERNMENT

*Parliament* consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The *Prime Minister* is appointed by the President, as is the Cabinet on the Prime Minister's recommendation. They are responsible to Parliament. But the executive is constitutionally separate from the legislature and Ministers may not sit in Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session.

A *Constitutional Council* is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the

*Economic and Social Council* gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

*Production*.—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1980 was 71,545,600 hectolitres. Cider-making is also an important industry. The mineral resources include coal, natural gas, pig iron, bauxite, lead, silver, antimony and salt. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

*Language and Literature*.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Tunisia, Algeria, Mauritius, Haiti and the Province of Quebec, Canada, to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 11 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1927), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952), Albert Camus (1957), St. John Perse (Alexis Léger) (1960) and Jean Paul Sartre (1964).

*Defence*.—the personnel of the Defence Forces in September 1975 totalled 331,500; AIR FORCE 102,000; NAVY 69,000; GENDARMERIE 70,000. National nuclear forces include medium-range ballistic missiles, submarine-launched ballistic missiles and *Mirage IV* medium bombers. The Army has a variety of new French-made equipment in service, including medium tanks, field and anti-aircraft SP guns, trucks and radio equipment. Defence Budget for 1981 111,482.5 million francs.

*Education*.—The educational system is highly developed and centralized. It is administered by the Ministry of National Education, comprising (a) the *Direction des Enseignements Supérieurs*; *Direction de la Pédagogie, des Enseignements Scholaires et de l'Orientation*; *Direction des Personnels d'Enseignement Général Technique et Professionnel*; *Direction des Services Administratifs et Sociaux*; *Direction de l'Équipement Scolaire, Universitaire et Sportif*; *Direction des Bibliothèques et de la Lecture Publique*; *Direction de la Coopération*; (b) the Superior Council of National Education (consultative); and (c) the Inspectorate. *Local Administration* comprises 25 Territorial Academies, with inspecting staff for all grades, and Departmental Councils presided over by the *Préfet*, and charged especially with *primary* education.

Primary and secondary education are compulsory, free and secular, the school age being from 6 to 16. Schools are for boys, for girls, or mixed. (i) *Primary* education is given in *écoles maternelles* (nursery schools), *écoles primaires élémentaires* (primary schools), and *collèges d'enseignement général* (4-year secondary modern course); (ii) *Secondary* education in *collèges d'enseignement technique*, *collèges d'enseignement secondaire* and *lycées* (7-year course

leading to one of the five *baccalauréats*). *Baccalauréat A* consists largely of philosophy and languages with a little mathematics, and provides entry into the faculties of Letters and Law. *Baccalauréat B* groups languages, mathematics and economics with philosophy classes oriented towards psychology and sociology. It provides entry to the faculties of Letters for the social sciences and to the faculty of Law for economics. *Baccalauréat C*, consisting of mathematics and physics with some languages, provides entry to the faculty of Sciences for those studying for a degree in mathematics and physics. *Baccalauréat D* has the same language component as *Baccalauréat C*, but its main feature is the natural sciences. It provides entry to the faculty of Sciences for natural science degrees, and also to the Medicine and Pharmacy Faculties. *Baccalauréat E* is largely scientific and technical with a language element, and provides entry to engineering schools and the Faculty of Science. (iii) *Special schools* are numerous. (iv) There are numerous *Grandes Ecoles* in France which award diplomas in many subjects not taught at university, especially applied science and engineering. Most of them are State institutions but have a competitive system of entry, unlike the universities. (v) The reform of the French university structure continues, and there are now universities in twenty-four towns in France. In the major provincial towns the existing university has been reorganized to form two, or three universities, and in Paris and the immediate surrounding district there are, since autumn 1970, thirteen universities.

In 1980–81, 7,123,445 pupils were attending primary schools and 5,107,711 secondary schools; university students numbered 869,788.

*Archaeology, etc.*—There are dolmens and cave drawings in Brittany, prehistoric remains and cave drawings in Dordogne and Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Cæsar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgæ from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and the XVIIth and XVIIIth century châteaux survived the French Revolution.

*Roads.*—The length of the *Routes Nationales* at the end of 1980 was 28,355 km. and of motorways 4,514 km. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use in 1975 were 8,623 km.

*Railways.*—The system of railroads in France is very extensive. The length of lines of general

interest, exclusive of local lines, open for traffic at the end of 1979 was 34,444 km., of which 9,863 km. were electrified.

**Shipping.**—The French mercantile marine consisted in Oct. 1981, of 399 ships of 10,584,000 tons gross, of which 30 were passenger vessels (182,000 tons gross), 103 tankers (7,361,000 tons gross) and 266 cargo vessels (3,041,000 tons gross).

**CAPITAL OF FRANCE.** Paris, on the Seine.

Population (estimated, 1980), 2,050,500 (town); 10,033,700 (incl. suburbs).

The following towns have a population of over 150,000 inhabitants:—Paris (2,050,500);  $\Psi$ Marseilles (914,356); Lyons (462,841); Toulouse (383,176);  $\Psi$ Nice (346,620);  $\Psi$ Nantes (263,689); Strasbourg (257,303);  $\Psi$ Bordeaux (226,281); Saint-Etienne (221,775);  $\Psi$ Le Havre (219,583); Rennes (205,733); Montpellier (195,603);  $\Psi$ Toulon (185,050); Reims (183,610); Lille (177,218);  $\Psi$ Brest (172,176); Grenoble (169,740); Clermont-Ferrand (161,203); Dijon (156,787); Le Mans (155,245).

The chief towns of Corsica are  $\Psi$ Ajaccio (51,770) and  $\Psi$ Bastia (52,000).

Paris is distant from London 267 miles; transit by air, 1 hr.

**FLAG.**—The "tricolour", three vertical bands, blue, white, red (blue next to flagstaff).

**NATIONAL DAY.**—July 14.

#### BRITISH EMBASSY

(35 rue du Faubourg St. Honoré, Paris)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir John Fretwell (1982).

*Minister*, P. C. Petrie, C.M.G.

*Defence Attaché*, Air Cdre. J. M. A. Parker, A.F.C., R.A.F..

*Counsellor and Consul-General*, T. W. Sharp.

#### BRITISH CONSULAR OFFICES

There are British Consulates-General in Metropolitan France at *Paris, Bordeaux, Lille, Lyons, Marseilles*.

#### BRITISH CHAMBER OF COMMERCE

6 rue Halévy, Paris 9e

*President*, J. Wicker.

*Vice-Presidents*, D. Goodchild, C.B.E.; J. Tuby.

#### BRITISH COUNCIL

*Representative in Paris*, B. E. Swingler, C.B.E., 9 rue de Constantine, 75007 Paris.

There are British Council libraries at *Paris, Bordeaux, Lille, Lyons, Marseilles and Toulouse*.

#### FINANCE

Whereas the country's gross domestic product (GDP) fell by 3 per cent in real terms in 1975 an overall growth rate of 5 per cent was achieved in 1976, which decelerated to 1.3 per cent in 1980 and 0.3 per cent in 1981. At April 1982, French gold and currency reserves stood at £282,343 million francs.

**Currency.**—The unit of currency is the *franc* of 100 centimes.

#### COMMERCE

The principal imports are machinery, mineral fuels, chemical products, automobiles, iron, electrical equipment, minerals and non-ferrous metals, textile and leather goods, meat, fish, poultry and other agricultural products and precision instruments. The principal exports are automobiles, chemical products, iron and steel, textile and leather goods, machinery, electrical equipment, cereals and flour, wine and other agricultural products.

#### FRENCH FOREIGN TRADE

	1980	1981

#### Trade with U.K.

	1980	1981
	Francs	Francs
Imports from U.K.	30,774,757,000	35,915,847,000
Exports to U.K. ...	32,700,000,000	39,055,177,000

#### OVERSEAS DEPARTMENTS

With effect from Jan. 1, 1947, the colonies of Guyane (French Guiana), Martinique, Guadeloupe and La Réunion with its dependencies have been theoretically administered in exactly the same way as the Metropolitan Departments, but in practice somewhat greater discretion is allowed to the Prefects and the locally elected bodies.

**La Réunion.**—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (1974), 476,675. Capital, St. Denis (104,603). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations (1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land in the Antarctic Continent are also dependencies of Réunion.

**Martinique.**—An island situated in the Windward Islands group of the West Indies, between Dominica in the north and St. Lucia in the south. Population 324,832. Capital  $\Psi$ Fort de France (100,576). Other towns are  $\Psi$ Trinité (11,214) and  $\Psi$ Marin (6,104).

**Guadeloupe.**—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Population 324,530. Capital  $\Psi$ Pointe à Pitre (23,889). Other towns are  $\Psi$ Basse Terre (15,778) in Guadeloupe and  $\Psi$ Grand Bourg (6,611) in Marie Galante.

**French Guiana.**—Area, 35,000 sq. miles. Population (U.N. estimate, 1969), 48,000. Capital,  $\Psi$ Cayenne (20,000). Situated on the north-eastern coast of South America, French Guiana is flanked by Surinam on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royal and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894 to 1899.

#### THE FRENCH COMMUNITY

The Constitution of the fifth French Republic promulgated on Oct. 6, 1958, envisaged the establishment of a French Community of States closely linked with common institutions. A number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally members of the French Community. The Community Institutions in fact never operated as envisaged. Nevertheless, with the exception of Guinea, which opted out of the Community in the 1958 referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements.

#### FRANCOPHONE COUNTRIES

In the following countries French is either the official or national language or the language of

instruction; where there is another national language the name of it is shown after the name of the country:—Algeria (*Arabic*); Belgium (*Flemish*); Benin; Burundi (*Kirundi*); Cambodia (*Khmer*); Cameroon (*English*); parts of Canada (in Quebec, parts of Ontario and New Brunswick) (*English*); Central African Republic (*Sangho*); Chad; Congo (P.D.R.); France; Gabon; Guinea; Haiti (*Creole*); Ivory Coast; Laos (*Laotian*); Lebanon (*Arabic*); Luxembourg (*German and Letzeburgesch*); Madagascar (*Malagasy*); Mali; Morocco (*Arabic*); Mauritania (*Arabic*); Niger; Rwanda (*Kinyarwanda*); Senegal; Switzerland (1,000,000 French speaking); Togo; Tunisia (*Arabic*); Upper Volta; Vietnam (*Vietnamese*); Zaire. French is also spoken in the Overseas Departments (see above).

#### OTHER TERRITORIES

**New Caledonia.**—Area, 7,200 sq. miles. Population (estimate, 1971), 100,600. Capital  $\Psi$ Noumea (12,000). A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc., the Huon islands and Alofis). New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement. It is the world's third largest producer of nickel, after Canada and U.S.S.R.

**Wallis and Futuna Islands.**—Following a request from local kings and chiefs, it was decided by referendum (Dec. 27, 1959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 8,550, mostly Polynesians.

**French Polynesia.**—Area, 2,500 sq. miles. Population (estimate, 1971), 119,200. Capital,  $\Psi$ Papeete (15,220), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukuhiva, Hiva-oo, etc., 500 sq. miles, population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raivavae, Rimatarara and Rapa Island; Maiao Island; the Tuamotu Islands).

**St. Pierre and Miquelon.**—Area, 93 sq. miles. Population (1968), 5,200. Two small groups of Islands off the coast of Newfoundland.

## GABON

(Gabonese Republic)

(For MAP, see Index).

President, El Hadj Omar Bongo, assumed office, December, 1967.

EMBASSY IN LONDON  
48 Kensington Court, W.8  
[01-937 5285/9]

Ambassador Extraordinary and Plenipotentiary, His Excellency Monsieur Léon N'Dong.

Gabon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by Equatorial Guinea and Cameroon and on the east and south by the People's Republic of Congo. It has an area of 101,400 sq. miles and a population (estimated 1972) of 750,000. Gabon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

Over the past decade Gabon has known one of the fastest economic growth rates in Africa, based almost entirely on oil, production of which attained 10.6 million tonnes in 1978, making Gabon the fourth largest oil producer in Africa. Other wealth includes

timber (especially okoumé wood), manganese, uranium and iron.

The GDP increased by 2,276 per cent. between 1970 and 1976. The 1980 budget was for £660,500,000. Gabon became an associate member of OPEC in 1973 and a full member in 1975.

#### Trade with U.K.

	1979
Imports from U.K. ....	£8,507,000
Exports to U.K. ....	12,893,000

CAPITAL.— $\Psi$ Libreville (150,000).

FLAG.—Horizontal bands, green, yellow and blue.

NATIONAL DAY.—August 17.

BRITISH EMBASSY  
B.P. 476, Libreville

Ambassador Extraordinary and Plenipotentiary, His Excellency Alan H. Grey (1982).  
2nd Secretary, J. T. Vass.

## GERMANY

\* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863–1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the duchies of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North German Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North German Confederation and three South German States became the Germanic Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914–1918, Germany was a Confederate League bearing the name German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

THE WAR OF 1939–1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, which had (March 31) given a pledge to support Poland against aggression.

On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm

\* Nazi historians referred to the National Socialist régime as *Drittes Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy, and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in March, 1948.

## FEDERAL REPUBLIC OF GERMANY

*President*, Prof. Karl Carstens, *elected* May 23, 1979, for five years.

### CABINET

*Federal Chancellor*, Helmut Schmidt (SPD).

*Foreign Minister and Vice-Chancellor*, Hans Dietrich Genscher (FDP).

*Interior*, Gerhart Baum (FDP).

*Justice*, Dr. Jürgen Schmüde (SPD).

*Finance*, Manfred Lahnstein (SPD).

*Economics*, Dr. Otto Graf Lambsdorff (FDP).

*Food, Agriculture and Forestry*, Josef Ertl (FDP).

*Labour and Social Affairs*, Heinz Westphal.

*Defence*, Dr. Hans Apel (SPD).

*Posts and Telecommunications*, Hans Matthöfer (SPD).

*Regional Planning, Building and Urban Development*, Dr. Dieter Haack (SPD).

*Intra-German Relations*, Egon Franke (SPD).

*Health, Family and Youth Questions*, Anke Fuchs (SPD).

*Education and Science*, Björn Engholm (SPD).

*Research and Technology*, Dr. Andreas von Bülow (FDP).

*Economic Co-operation*, Rainer Offergeld (SPD).

*Transport*, Dr. Volker Hauff (SPD).

FDP = Free Democrats; SPD = Social Democrats.

### EMBASSY IN LONDON

23 Belgrave Square, S.W.1

[01-235 5033]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Jürgen Rühfus (1980).

*Minister Plenipotentiary*, Jürgen von Alten.

*Minister-Counsellor*, Dr. E. Bracklo.

*1st Counsellors*, Dr. Christian Kudlich (*Head of Economic Dept.*); Dr. Reinhard Holubek (*Cultural*); Dr. Ulrich Däunert (*Scientific Affairs*); Dr. Alois Baier (*Agriculture*); Herr Diethelm Stephan (*Defence Research*).

*Counsellors*, Herr Franz Josef Goldschmitt; Herr Frank Elbe; Herr Ernst Roth; Herr Heinrich Rosenlehner; Herr Peter Kiewitt (*Press*); Herr Bruno Güntner (*Commodities*); Herr Hans-Alard von Rohr (*Legal and Consular*); Dr. Detlof von Berg; Dr. Hans-Joachim Voss (*Labour*); Herr Oskar F. Weber.

*1st Secretaries*, Herr Hans-Günter Gnodtke; Frau Christiane Gnodtke; Herr Jürgen Gockel; Dr. Michael Bley (*Maritime*).

NOTE.—Except where otherwise indicated statistical data on the Federal Republic of Germany include Berlin (West).

*Area and Population*.—The area of the Federal Republic is approximately 96,015 sq. miles. Total population of the Federal Republic on December 31, 1980, was 61,657,900. Distribution of the population among the *Länder* in 1979 was:

Schleswig-Holstein .....	2,611,300
Hamburg .....	1,653,100
Lower Saxony .....	7,256,400
Bremen .....	721,000
North Rhine Westphalia .....	17,058,200
Hessen .....	5,601,000
Rhineland Palatinate .....	3,642,500
Baden-Württemberg .....	9,258,900
Bavaria .....	10,928,200
Saarland .....	1,066,300
Berlin (West) .....	1,876,200

The population of the principal cities and towns in the Federal Republic on Dec. 31, 1980, was:

Berlin (West) 1,896,200	Mülheim/
ΨHamburg .. 1,645,100	Ruhr .....
Munich .....	181,300
Cologne .....	175,100

	Ulm .....
	100,700

*Vital Statistics.*—There were 10.1 live births per 1,000 inhabitants in the Federal Republic in 1981, compared with 19.5 per 1,000 for the same area in 1938.

*Government.*—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948–49 Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 23, 1949. It provides for a President, elected for a five-year term, a Lower House, with a four-year term of office, elected by direct universal suffrage, and an Upper House composed of delegates of the *Länder*, without a fixed term of office.

The results of the elections held for the lower House (*Bundestag*) on October 5, 1980, were as follows:

Party	Numbers
Social Democrats .....	218
Christian Democratic Union .....	174
Christian-Social Union .....	52
Free Democrats .....	53
Total .....	497

with an additional 22 representatives of Berlin elected by the Berlin Chamber of Deputies (Social Democrats, 10; Christian Democrats, 11; Free Democrats, 1). The Social Democrats form a coalition with the Free Democrats. The Christian Democratic and the Christian Social Unions are the Parliamentary Opposition.

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the *Länder* governments in June, 1982, were:

#### Ministers-President

*Baden-Württemberg.*—Lothar Späth.  
*Bavaria.*—Franz Josef Strauss.  
*Berlin.*—Dr. Richard von Weizsäcker (*Governing Mayor*).  
*Bremen.*—Hans Koschnick (*Mayor*).  
*Hamburg.*—Dr. Klaus von Dohnanyi (*Mayor*).  
*Hessen.*—Holger Börner.  
*Lower Saxony.*—Dr. Ernst Albrecht.  
*North Rhine-Westphalia.*—Johannes Rau.  
*Rhineland-Palatinate.*—Dr. Bernhard Vogel.  
*Saarland.*—Werner Zeyer.  
*Schleswig-Holstein.*—Dr. Gerhard Stoltenberg.

*Economic position.*—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1981

was estimated at DM.1,551.9 billion, an increase of 4 per cent over 1980.

*Agriculture.*—In 1981 total area of farmland was 12,196,500 hectares, of which 7,262,700 hectares were arable land. Forest areas cover 7,317,500 hectares. The 1981 harvest yielded 10,106,800 metric tons of bread grains, 7,585,400 metric tons of potatoes. The livestock population at the end of 1981 included 14,992,100 cattle, 363,600 horses, 1,108,000 sheep, 22,310,300 pigs and 80,509,300 fowl.

*Industrial Production.*—The index of industrial net production adjusted for irregularities of the calendar (1976 = 100) has developed in the Federal Republic, including Berlin, as follows:

	1980	1981
Mining .....	98.2	98.9
Manufacturing industry .....	109.9	108.2
(i) Basic materials .....	108.5	104.5
(ii) Capital goods .....	112.9	112.9
(iii) Consumer goods .....	106.0	101.2
(iv) Foodstuffs .....	107.4	109.8
Power (electricity and gas) .....	113.3	114.4
Construction .....	114.2	105.3
Total industry .....	110.2	108.1

Productivity of labour in industry (excluding electricity, gas and construction) per man-hour: 1976, 100; 1977, 104.3; 1978, 108.1; 1979, 113.7; 1980, 115.0; 1981, 118.1 per cent.

Some production figures are shown below (monthly averages):

	1980	1981
	<i>Number</i>	
Passenger cars .....	270,813	274,627
Commercial vehicles .....	26,083	26,600
	<i>Tons</i>	
Sulphuric acid .....	324,000	328,000
Chlorine .....	249,997	251,130
Hard Coal .....	7,262,000	7,372,000
Brown Coal .....	10,819,000	10,885,000
Aluminium .....	60,889	84,210
	<i>DM</i>	
Computers (ADP) .....	546,000	600,000

365,491 new dwellings were completed in 1981 in the Federal Republic (1980, 388,904).

*Labour.*—Of 25,680,000 employed in 1981 (annual average), 15,961,000 were men. The average number of unemployed was 1,271,574 of whom 652,205 were men (1980 = 888,900 and 426,417). On September 30, 1981, 1,917,000 foreign workers were employed in the Federal Republic.

	1979	1980
Coal mining .....	205,060	207,147
Iron and steel production .....	288,312	284,057
Mechanical engineering .....	1,799,367	1,825,711
Chemicals .....	559,729	567,668
Textiles and clothing .....	567,305	552,655

*Finance.*—As from January 1, 1979, the distribution of taxes in the Fed. Rep. of Germany between Federation, *Länder*, communities and local authorities has been regulated by the Basic Law (Constitution) as follows:—

- (1) Of the yields of wage tax and assessed income tax, Federation and *Länder* receive 42.5 per cent each, and the communities 15 per cent. The yields of capital yield tax and corporation tax are distributed to Federation and *Länder* with 50 per cent each.
- (2) The turnover taxes were made joint taxes in 1976 of which the Federation obtains 67.5 per cent and the *Länder* 32.5 per cent, before deduction of the E.C. share.
- (3) Of the trade tax which had been fully allocated to the communities, the Federation and the *Länder*

receive equal shares (about 15 per cent of the trade tax receipts).

(4) The yields of capital transactions taxes, insurance and bill taxes accrue to the Federation.

Excise duties, other than the beer tax, accrue to the Federal Government, all other taxes (with the exception of local taxes, *i.e.* particularly taxes on land and buildings) to the *Länder*.

Preliminary figures of budgetary expenditure in 1982 are: total expenditure *DM* 245,737.5 billion (1981, 231,533,000,000); Defence *DM* 44,261.3 billion (1981, 44,260,000,000); Social expenditure, *D.M.* 77,708.7 billion (1981, 83,302,000,000); Agriculture and food, *DM* 6,097.7 billion (1981, 1,982,000,000); Transport, *DM* 24,775 billion (1981, 13,775,000,000).

**Currency.**—The currency of the Federal Republic is the *Deutsche Mark* of 100 *Pfennig*. The rate of exchange of the pound sterling has been floating since June 23, 1972. (See also p. 83.)

**Foreign Trade.**—In 1981, imports were valued at *DM* 369,178,790,000 (1980, 341,380,308,000); and exports at *DM* 396,898,348,000; 12.9 per cent of imports consisted of foodstuffs and 17.3 per cent of industrial raw materials; 47.3 per cent came from the Common Market countries; 11.2 per cent from the E.F.T.A. and 8.6 per cent from the United States and Canada. The Common Market countries took 46.9 per cent of

all exports, the E.F.T.A. 15.8 per cent and the United States and Canada 7.2 per cent.

#### Trade with U.K.

	1981
Imports from U.K.	£6,036,471,400
Exports to U.K. ....	5,742,516,900

U.K. is the second largest supplier of oil (1981; worth £2,214,419,000).

**Communications.**—In December, 1980 the state-owned railways of the Federal Republic measured 17,699 miles of which 6,930 miles were electrified, and the privately owned railways 1,944 miles, a total of 19,643 miles. In 1980 the railways handled 364,299,758 tons of goods and the inland waterways 240,985,445 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1980, 2,715 electric locomotives, 3,106 diesel locomotives, 14,484 passenger coaches, 379 rail buses and 284,175 goods waggons. Classified roads measure 106,583 miles. On Jan. 1, 1982 there were registered 23,680,900 cars, 1,358,600 commercial vehicles (incl. buses) and 1,650,260 tractors. Ocean-going shipping under the German flag in Dec., 1980, amounted to 7,618,839 tons gross (1,679 ships). Civil aircraft in service at the same date totalled 217 aircraft.

**Social Welfare.**—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of the second and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a decent standard of living.

**Law and Justice.**—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

**Language and Literature.**—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1797–1856). German authors have received the Nobel Prize for Literature on seven occasions—Theodor Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), Thomas Mann (1929), N. Sachs (1966) and Heinrich Böll (1972). In 1978 there were 371 daily papers.

**Education.**—School attendance is compulsory for all children and juveniles between the ages of 6 and 18. Compulsory education comprises 9 years of schooling at primary and main schools (*Grund und Hauptschulen*)—full-time compulsory education—and 3 years of compulsory vocational education on a part-time basis. In autumn, 1979, there were in the Federal Republic 17,701 primary and main schools (*Grund- und Hauptschulen*) with 5,353,992 pupils. Secondary modern schools (*Realschulen*) numbered 2,492 with 1,365,204 pupils. There were 2,706 other general secondary schools (*Gymnasien* including *Gesamtschulen*) with 2,303,202 pupils.

There were also 2,785 special schools (*Sonderschulen*) for retarded, physically and mentally handicapped and socially maladjusted children in the Federal Republic with 370,739 pupils.

The secondary school leaving examination (*Abitur*) entitles the holder to a place of study at a university or another institution of higher education. The number of examinations passed in 1979 was 123,170.

Juveniles below the age of 18 who are not attending a general secondary or a full-time vocational school are obliged to take a three-year course (part-time) at a vocational school. In November, 1979, there were 2,824 full and part-time vocational schools (*Berufsschulen*) and 381 vocational extension schools (*Berufsaufbauschulen*) with 1,928,485 pupils, 2,824 full-time vocational schools with 339,196 pupils, 1,194 advanced vocational schools (*Fachschulen*) with 88,000 pupils; 977 schools for secondary technical studies (*Fachoberschulen/Fachgymnasien*) with 121,714 students and 1,718 Health Schools with 93,694 pupils.

Public expenditure by *Types of Schools* was in 1978 as follows:

	DM.mn
Elementary and primary schools .....	14,585.9
Special schools .....	2,550.5
Secondary modern schools .....	3,316.5
Grammar schools .....	7,570.8
Comprehensive schools .....	4,252.8
Part-time vocational schools .....	} 4,729.1
Full-time vocational schools .....	
Advanced full-time vocational schools ..	

According to preliminary results, in the winter term 1979/80 there were 64 universities—including a college for physical education (*Sporthochschule*)—(717,428 students), 10 colleges of theological philosophy (*Theologische Hochschulen*) (2,049 students), 17 teachers' training colleges (*Pädagogische Hochschulen*) (54,099 students), 26 colleges of arts (*Kunsthochschulen*) (16,780 students) and 111 vocational colleges (*Fachhochschulen*) 179,928 students); a total of 228 institutions of higher education with 970,284 students. The largest universities were in Munich, Berlin, Münster (Westf.), Hamburg, Bonn, Cologne, Bochum and Aachen.

**Religion.**—In 1970 there were 29,696,571 Protestants in the Republic, 27,060,826 Roman Catholics, 31,684 Jews and 3,861,518 others.

**CAPITAL**, Bonn, in North Rhine Westphalia, 15 miles distant from Cologne. Population 288,100 (Dec. 31, 1980).

**FLAG.**—Horizontal bars of black, red and gold.

#### BRITISH EMBASSY

Friedrich-Ebert Allee 77, 5300 Bonn

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir John Lang Taylor, K.C.M.G. (1981).

*Ministers*, P. W. Unwin, C.M.G.; C. L. G. Mallaby, C.M.G.

*Counsellors*, A. J. Hunter (*Head of Chancery*); B. Smith, O.B.E. (*Commercial*); A. F. Hatfull (*Labour*); W. A. Perry (*Defence Supply*); T. Garrett, C.B.E. (*Scientific*); A. J. Beamish (*Economic*); J. D. Perris (*Administration*); D. Stuart; P. J. Fowler.

*1st Secretaries*, R. E. Escritt; T. Macan; Miss A. Bailes; Dr. W. D. Evans; P. J. Torry; W. D. Townend; I. C. Sloane; M. G. Thickett; B. S. T. Eastwood; F. Cameron; A. J. Alderson; M. C. Wood; A. R. Purton; J. C. Sluich; D. B. Merry.

*2nd Secretaries*, T. G. Longdon-Griffiths; R. C. Cutler; N. A. S. Jones; Mrs. A. M. Leslie; R. Tasker; L. R. Etheridge; J. Harrison.

*3rd Secretaries*, J. F. Dimmock; N. P. Dickerson; K. H. Rowe.

*Defence and Military Attaché*, Brig. C. W. Woodburn.

*Asst. Military Attaché*, Lt.-Col W. G. C. Kenney.

*Naval Attaché*, Captain R. M. Venables, R.N.

*Asst. Naval Attaché*, Lt.-Cdr. W. T. Wiseman, R.N.

*Air Attaché*, Air Cdre. M. J. Rayson, M.V.O.

*Head of Visa Section* (*Düsseldorf*), R. Capie, M.B.E.

*Chaplain*, Rev. A. M. Cole.

There are British Consulates-General at *Berlin*, *Hamburg*, *Düsseldorf*, *Frankfurt*, *Munich* and *Stuttgart* and British Consulates at *Bremerhaven* and *Hanover*.

#### BRITISH COUNCIL

*Representative*, R. Arbuthnott, Hahnenstrasse 6, Cologne. Offices at *Berlin*, *Hamburg* and *Munich* and British Council libraries at *Berlin*, *Cologne* and *Munich*.

#### BERLIN

*G.O.C. British Sector*, Maj.-General J. D. F. Mostyn, C.B.E.

*Minister and Deputy Commandant*, F. R. MacGinnis, C.M.G.

*Counsellor*, T. C. Wood (*Political Adviser and Head of Chancery*).

## GERMAN DEMOCRATIC REPUBLIC

**Area and Population.**—The German Democratic Republic comprises the five former German *Länder* of Brandenburg, Mecklenburg, Saxony, Saxony-Anhalt and Thuringia (an area of 41,768 sq. miles).

The seat of Government is East Berlin (156 sq. miles). The population of the Republic, including East Berlin (end of 1980) is 16,740,000. In 1952 the former *Länder* were replaced by fourteen *Bezirke* (regions): Potsdam, Cottbus and Frankfurt (*formerly* Brandenburg); Rostock, Schwerin and Neubrandenburg (*formerly* Mecklenburg); Karl-Marx-Stadt, Dresden and Leipzig (*formerly* Saxony); Halle and Magdeburg (*formerly* Saxony-Anhalt); Erfurt, Gera and Suhl (*formerly* Thuringia.)

The present Constitution, which defines the GDR as a Socialist state, came into force on April 9, 1968 after endorsement by a referendum. It replaced the first Constitution of October 7, 1949. Among items of the 1949 Constitution omitted from that of 1968 were the rights of trade unions to strike, of citizens to emigrate and of newspapers to publish without censorship. Further amendments came into force on October 7, 1974 after adoption by the *Volkskammer* on September 27, 1974. They mainly involved (a) the deletion of all references to the German nation and to the possibility of reunification, and (b) the recording of the transfer of certain governmental functions from the Council of State to the Council of Ministers which had their origin in the Law on the Council of Ministers of October 16, 1972. The supreme organ of State power is the *Volkskammer*, which has power to elect and dismiss the Council of State, the Council of Ministers, the Chairman of the National Defence Council, the Supreme Court and the Procurator-General. The Council of State retains the presidential powers which it has exercised since the abolition of the office of President on September 12, 1960, together with responsibility for the organization of defence with the help of the National Defence Council. The Council of Ministers is responsible to the *Volkskammer* for the conduct of State policy. The present *Volkskammer* is that elected in June 1981.

As with other communist countries, effective power lies with the ruling Marxist-Leninist Party, in this case the Socialist Unity Party of Germany (SED). The other parties and mass organizations are members of the SED-controlled National Front.

#### COUNCIL OF STATE

*Chairman*, Herr Erich Honecker.  
*Deputy Chairmen*, Dr. Manfred Gerlach; Herr Ernst Goldenbaum; Herr Gerald Götting; Prof. Heinrich Homann; Herr Horst Sindermann; Herr Willi Stoph; Herr P. Verner.  
*Members*, Herr K. Anclam; Herr W. Feife; Prof. K. Hager; Frau B. Hanke; Herr F. Kind; Herr E. Krenz; Dr. G. Mittag; Frau M. Müller; Herr A. Pisknik; Herr B. Quandt; Herr W. Seifert; Dr. K. Sorgenicht; Herr P. Strauss; Frau I. Thiele; Herr H. Tisch; Prof. J. Töpfer; Frau R. Walther.

#### COUNCIL OF MINISTERS

*Chairman*, Herr Willi Stoph.  
*1st Deputy Chairmen*, Herr Werner Krolkowski; Herr Alfred Neumann.

Total membership of the Council is 45, including 9 other Deputy Chairmen, 8 holding principal portfolios and 15 holding portfolios of a mainly technical nature.

#### SOCIALIST UNITY PARTY OF GERMANY

*Politbureau of the Central Committee*, H. Axen; H. Dohlus; W. Felfe; K. Hager; J. Herrmann; Gen. H. Hoffman; E. Honecker; W. Krolkowski; E. Mielke; G. Mittag; E. Mückenberger; K. Naumann; A. Neumann; H. Sindermann; W. Stoph; H. Tisch; P. Verner (*full members*); W. Jarowsinsky; G. Kleiber; E. Krenz; Frau I. Lange; Frau M. Müller; G.

Schabowski; G. Schürer; W. Walde (*candidate members*).

*Secretariat of the Central Committee*, E. Honecker (*General Secretary*); H. Axen; H. Dohlus; W. Felfe; K. Hager; J. Herrmann; W. Jarowsinsky; I. Lange; G. Mittag; P. Verner (*secretaries*).

#### EMBASSY IN LONDON

Brent Cross House, 124 The Broadway, N.W.9  
 [01-202 3847/9]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Martin Bierbach.

*Minister Plenipotentiary*, H. Knobbe.

*Counsellors*, M. Käbel; A. Schönherr (*Commercial*).

*1st Secretaries*, H. J. Brückner; Dr. W. Lange; L. P. Escher; H. Zabel.

*Economic Position.*—Before the 1939-45 war, the economy of the area at present occupied by the GDR was largely devoted to agriculture and light industry, most heavy industry being concentrated in other parts of the Reich. In spite of this imbalance, compounded by severe war damage, a declining population, a shortage of labour and a lack of basic raw materials, G.D.R. has made considerable economic progress and now claims to be in the world's top ten industrial nations in terms of G.N.P., and is second to the U.S.S.R. in Eastern Europe as a major producer of industrial goods. G.D.R. has a number of highly developed industries including basic chemicals and petro-chemicals, machine tools and industrial plant, ship-building and transport equipment, electronic and engineering equipment, precision tools and optical instruments.

The G.D.R. economy, including the control of industry and foreign trade, is centrally planned and administered. The State Planning Commission, which is subordinate to the Council of Ministers, is responsible for drawing up the 5- and 1-Year Plans. The 5-Year Plans determine the future development and structure of the economy; the 1-Year Plans have to achieve these aims. The implementation of these plans is the responsibility of the State Production Enterprises under the supervision of the economic and industrial Ministries.

The economy is very closely integrated with those of other member countries of C.M.E.A. and particularly with the U.S.S.R.

#### Trade with U.K.

	1979	1980
Imports from U.K. . . . .	£58,162,000	£94,100,000
Exports to U.K. . . . .	111,705,000	88,100,000

Principal cities and towns (population, 1980): East Berlin (1,152,529); Leipzig (1,412,037); Dresden (1,806,401); Karl-Marx-Stadt (Chemnitz) (1,930,087); Magdeburg (1,268,360); Halle/Saale (1,833,135); Rostock (887,820); Erfurt (1,238,576); Zwickau (88,436); Potsdam (1,117,523).

FLAG.—Horizontal bands of black, red, gold; hammer, compasses and corn device at centre.

#### BRITISH EMBASSY

(108 Berlin, Unter den Linden 32/34)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Peter Malcolm Maxey, C.M.G. (1981).

*Counsellor*, D. F. Ballentyne.

*1st Secretaries*, Miss A. Lewis (*Head of Chancery*); R. J. P. Church; E. W. Callway (*Commercial*).

*2nd Secretaries*, F. W. Mayland (*Administration and Consul*); C. D. Smith.

*3rd Secretary*, C. P. Burrows.

*Cultural Attaché*, G. E. B. Coe (*British Cultural Representative*).

## GREECE (Hellas)

*President of the Hellenic Republic, Konstantinos Karamanlis, born 1907 (assumed office May 15, 1980).*

GREEK EMBASSY IN LONDON  
1a Holland Park, W.11  
[01-727 8040]

*Ambassador Extraordinary and Plenipotentiary, His Excellency E. Lagacos (1979).*

*Armed Forces Attaché, (vacant).*

*Counsellors, Chr. Tsalikis; A. Anninos (Consular Affairs); G. Protonotarios (Commercial); C. Kondoyiannis (Agricultural); V. S. Zafropoulos (Political).*

*Tourist Adviser, C. Analytis.*

There are Honorary Consulates at *Birmingham, Bradford, Bristol, Falmouth, Hull, Inmingham, Leeds, Manchester, Newcastle, Portsmouth, Southampton, Cardiff, Edinburgh and Glasgow, and at Belfast.*

A maritime State in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian and Mediterranean seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. A census held throughout the country on March 14, 1971, recorded a population of 8,768,641.

The area of the mainland is 41,328 sq. miles, and the islands 9,854 sq. miles. The main divisions are: *Macedonia* (which includes Mt. Athos and the island of *Thasos*), *Thrace* (including the island of *Samothrace*), *Epirus, Thessaly, Continental Greece* (which includes the island of *Euboea* and the *Sporades* or "scattered islands" of which the largest is *Skyros*), the *Peloponnese* (or *Morea*), the *Dodecanese* or *Southern Sporades* (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, *Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the Cyclades* (a circular group numbering about 200, with a total area of 923 sq. miles); the chief islands are *Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos*), the *Ionian Islands* (*Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo*), the *Aegean Islands* (*Chios, Lesbos, Limnos and Samos*). In *Crete* there was for over 1,500 years (3000 to 1400

b.c.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Knossos afford evidence of astonishing comfort and luxury. Greek civilization emerged about 1300 b.c. and the poems of Homer, the blind poet of Chios, which were probably current about 800 b.c., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 b.c.).

*Government.*—A military coup on April 21, 1967, suspended parliamentary government and, following an unsuccessful royal counter coup on December 13, 1967, King Constantine went into voluntary exile in Rome. A new constitution was approved in 1968 in a national referendum. On June 1, 1973, following allegations of a plot within the Navy to overthrow the government, the monarchy was abolished and a republic established under the Presidency of Mr. George Papadopoulos.

The overthrow of Archbishop Makarios, President of Cyprus, on July 15, 1974, by a military coup led by Greek Officers of the Cypriot National Guard caused an international crisis, in the wake of which the heads of the Greek armed forces decided, on July 23, to relinquish power. Mr. Konstantinos Karamanlis, Prime Minister between 1955 and 1963, returned from his self-imposed exile in Paris to form a provisional Government. On August 1, Mr. Karamanlis announced that the Constitution of 1952 would be reintroduced, pending a new Constitution.

The first elections for ten years were held on November 17, 1974. Mr. Karamanlis' New Democracy Party polled 54.3 per cent of the vote and gained 220 out of the 300 seats in Parliament (this was later reduced in by-elections to 215 seats). Mr. Karamanlis formed a new Government on November 21.

The constitutional position of the King, who had gone into exile in December 1967, remained unsettled until December 8, when by a referendum, the Greek people rejected "crowned democracy" by 69.2 per cent to 30.8 per cent and Greece became a republic. A new constitution came into force on June 11, 1975.

In Parliament Elections held on November 20, 1977, the New Democracy Party gained a reduced majority with 172 seats (later increased to 177 by the addition of members of smaller parties) and Mr. Karamanlis formed a new Government. Mr. Andreas Papandreou's Pan Hellenic Socialist Movement became the official opposition with 93 seats.

Mr. Karamanlis was elected President of the Republic by Parliament on May 15, 1980. A new government was formed on May 10 by Mr. George Rallis after his election as leader of the New Democracy party in succession to Mr. Karamanlis. The Socialist Movement under Andreas Papandreu came into office following the General Election of Oct. 1981.

**Defence.**—The Services are organised on the Chiefs of Staff system, the Chief of the Armed Forces Staff being a rotational appointment between the three services. The strength of the Army is 130,000 backed up by some 50,000 in the National Guard. The Navy consists of 17,500 men and is equipped with a balanced fleet of destroyers, submarines, fast patrol boats and amphibious warfare vessels, mostly of U.S., French and German origin. The Air Force consists of 21,000 men and is equipped with a modern inventory of aircraft disposed in 12 combat squadrons supported by the necessary transport, training, helicopter and reconnaissance squadrons. National service is 2 years.

**Communications.**—The 2,650 kilometres of Greek railways are State-owned with the exception of the Athens—Piræus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Greek roads total somewhat over 35,500 kilometres, of which about 25 per cent are classified as national highways and just under 30,000 km. are classified as provincial roads.

On Dec. 31, 1979, the Greek Mercantile fleet numbered 3,902 ships with a total tonnage of 38,570,128 tons gross. On the same day Greek-owned ships registered under foreign flags numbered 910 with a total tonnage of 14,379,967 tons gross. (N.B. These figures exclude Greek-owned vessels under 100 tons gross). Athens has direct airline links with Australasia, North America, most countries in Europe, Africa and the Middle East.

**Religion.**—Over 97 per cent of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Œcumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Œcumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Œcumenical Patriarch.

**Education** is free and compulsory from the age of 6 to 15 and is maintained by State grants. There are six Universities, Athens, Salonika, Patras, Thrace, Joannina and Crete. There are several other institutes of higher learning, mostly in Athens.

**Language and Literature.**—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. *Katharevousa*, a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748–1833) and used for official and technical matters, is to be phased out over the next few years. Novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854–1929). The poets Solomos, Palamas, Cavafis, Sikelianos, Seferis and Elytis have won a European reputation.

**Production.**—Though there has in recent years been a substantial measure of industrialization, agriculture still employs about a quarter of the working population, the most important product and

export being tobacco, which accounts for about one-tenth of the value of total visible exports from Greece. The production of wheat, cotton, sugar and rice has been greatly increased, however, in order to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, peach, vine, orange, lemon, fig, almond and currant-vine, and now exports of Greek fresh fruit and vegetables have established themselves as an important contributor to the economy and have considerable growth potential. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are nickel, bauxite, iron ore, iron pyrites, manganese magnesite, chrome, lead, zinc and emery, and prospecting for petroleum is being carried on. Oil refineries are in operation near Athens and at Salonika, where there is also a petro-chemical plant. The chief industries are textiles (cotton, woollen and synthetics), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. In recent years new factories have been opened for the production of aluminium, nickel, iron and steel products, tyres, chemicals fertilizers and sugar (from locally-grown beet). Food processing and ancillary industries have also grown up throughout the country. The development of the country's electric power resources, irrigation and land reclamation schemes and the exploitation of Greece's lignite resources for fuel and industrial purposes are also being carried out. Tourism has developed rapidly, but is now slowing down. Greece signed the Accession Treaty with the E.E.C. on May 28, 1979 and became a full member on January 1, 1981.

**Currency.**—The Greek *drachma* has a floating exchange rate.

## TRADE

	1979
Total imports .....	\$10,110,000,000
Total exports .....	3,932,000,000

## Trade with U.K.

**CAPITAL.**—Athens. Population (including ΨPiræus and suburbs), 2,540,241 (1971 Census). Other large towns are ΨSalonika (557,360); ΨPatras (111,607); ΨVolos (71,245); Larissa (72,336); and ΨKavalla (46,234); in Crete—ΨHeraklion or Candia (77,506); ΨCanea (40,564); and ΨRethymnon (14,969); in the Ionian Islands—ΨCorfu (28,630); in the Dodecanese—ΨRhodes (32,092); in the Cyclades—ΨSyros Hermoupolis (13,502); in Lesbos—ΨMytilene (23,426); in Chios—ΨChios (24,084).

**FLAG.**—Blue and white stripes with a white cross on a blue field in the canton.

**NATIONAL DAY.**—March 25 (Independence Day).

## BRITISH EMBASSY

(Ploutarchou 1, Athens)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Peregrine A. Rhodes, C.M.G. (1982).

*Counsellors*, M. J. Llewellyn Smith (*Political and Consul-General*); P. S. Fairweather (*Economic and Commercial*).

*Defence and Military Attaché*, Brigadier A. M. Cranstoun.

*Naval and Air Attaché*, Capt. D. S. Dobson, R.N.

*Embassy Chaplain*, Rev. S. J. B. Peake.

*Hon. Attaché*, H. W. Catling, O.B.E., D.Phil. (*Director, British School of Archaeology*).

## BRITISH CONSULAR OFFICES

There are British Consular Offices at *Athens, Corfu, Samos, Rhodes, Salonika, Heraklion, Kavalla and Patras.*

## BRITISH COUNCIL

17 Philikis Etairias Street, Kolonaki Square,  
Athens 138

*Representative, J. M. E. Took, M.B.E.*

There is also an office at *Salonica* and British Council libraries at both centres.

## GUATEMALA

(República de Guatemala)

*President, Brig. Gen. Efrain Rios Montt, assumed Presidency, June 1982.*

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long. from 88° 12' 49' to 92° 13' 43', and has an area of 42,042 square miles, and a population of 6,835,900 (*for MAP, see p. 846*).

The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec. 1917. An earthquake in Feb. 1976 killed about 25,000 people, and caused considerable damage to property and the infrastructure. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief seaports are San José de Guatemala and Champerico on the Pacific and Santo Tomás de Castilla and Puerto Barrios on the Atlantic side.

The constitutionally elected president, Gen. Miguel Ydigoras Fuentes, was overthrown on March 31, 1963, by the Army, which handed executive and legislative powers to the Minister of Defence, Col. Enrique Peralta Azurdia. Important changes were included in a new constitution promulgated on Sept. 15, 1965, and elections for a new Congress and for President and Vice-President took place on March 6, 1966. The constitution was suspended "for as long as the situation demands" following a military coup in March 1982. An amnesty for guerrillas was unsuccessful and the Army is now fully occupied dealing with the proliferating subversive groups throughout the country.

*Language and Literature.*—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

*Finance.*—Actual revenue and expenditure in 1978 were *Quetzales* 665,000,000 and *Quetzales* 665,300,000 respectively, compared with *Quetzales* 593,000,000 and *Quetzales* 522,600,000 in 1977.

## TRADE

	1978	1979
	<i>Quetzales</i>	<i>Quetzales</i>
Imports (c.i.f.) . . . . .	1,285,640,600	£1,503,937,000
Exports (f.o.b.) . . . . .	1,089,457,200	1,241,448,000

## Trade with U.K.

	1979	1980
Imports from U.K. . . . .	£13,371,000	£13,835,000
Exports to U.K. . . . .	7,596,000	23,657,000

The principal export is coffee, other articles being manufactured goods, sugar, bananas, cotton, beef

and essential oils. The chief imports are petroleum, vehicles, machinery and foodstuffs.

*CAPITAL.*—Guatemala. Population: 1,500,000. Quezaltenango (second city of the Republic), has a pop. of 65,733. Other towns are  $\Psi$ Puerto Barrios (38,956), Mazatenango (38,319), and Antigua (26,631).

*FLAG.*—Three vertical bands, blue, white, blue; coat of arms on white stripe.

(Guatemala and the U.K. have no formal diplomatic relations.)

## GUINEA

(Republic of Guinea)

*President, Ahmed Sékou Touré, elected for seven year terms, Jan. 1961, 1968, 1974 and May 1982.*

*President of National Assembly, Léon Maka.*

## MINISTERS

*Prime Minister, Dr. Lansana Béavogui.*

*Interior, Sékou Chérif.*

*Scientific Research and Education, Mamady Keita.*

*Social Affairs, Mme. Jeanne-Martine Cissé.*

*Foreign Affairs and Co-operation, Dr. Abdoulaye Touré.*

*Finance, Fodé Mamoudou Touré.*

*Environment and Urban Development, El Hadj Moussa Diakité.*

*Energy, N'Pamara Keita.*

*Public Health, Dr. Mamadou Bah Kaba.*

*Transport, Commandant Siaka Toure.*

*Agriculture, Toumany Sangaré.*

*Industry, Mamady Kaba.*

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Guinea-Bissau and Sierra Leone and in the interior is adjacent to Senegal, Mali, Ivory Coast, Liberia and Sierra Leone (*see above*). Area, 96,865 sq. miles. The population (1978 estimate) is 5,133,000, mostly the Fullah, Malinké and Soussou tribes.

*Government.*—Guinea was separated from Senegal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. M. Sékou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for reelection, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, 1961. General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the *Guinea franc* (now the *Syli*). This led to the rupture of commercial relations with France, hitherto her most important supplier and purchaser. Guinea is in receipt of economic aid and technical assistance from a number of countries, including the United States, Federal Republic of Germany, Yugoslavia, the Soviet

Union and China. The Government's foreign policy is one of "positive neutralism" and non-alignment. In January 1977 Guinea signed an agreement with France settling the outstanding claims between the two countries. Diplomatic relations with U.K., suspended in December, 1965, were resumed on Feb. 20, 1968.

*Production, etc.*—The principal products of Guinea are bauxite, alumina, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, bauxite, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. At Kambart in the mountains in the hinterland of Guinea (Fouta Djallon, 4,970 feet), where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) are mined. Deposits of iron ore, gold, diamonds and uranium have also been discovered. Guinea imported goods to the value of £26,000,000 from U.K. and exported to U.K. goods to the value of £10,000,000 in 1980.

*CAPITAL.*—ΨConakry (120,000). Other towns are Kankan (29,000), which is connected with Conakry by a railway, Kindia (25,000), N'Zérékoré, Mamou, Siguiri and Labé.

*FLAG.*—Three vertical stripes of red, yellow and green.

*NATIONAL DAY.*—October 2 (Anniversary of Proclamation of Independence).

#### BRITISH EMBASSY

*Ambassador Extraordinary and Plenipotentiary, His Excellency Clifford William Squire, C.M.G., M.V.O. (1979) (resident at Dakar).*

### GUINEA-BISSAU

*President, and Minister of the Armed Forces and the Interior, Gen. João Bernardo Vieira.*  
*Prime Minister, Victor Saude Maria.*

Guinea-Bissau, formerly Portuguese Guinea, lies in Western Africa, between Senegal and Guinea; it has an area of 14,000 sq. miles and had a population in 1978 of 800,000.

Guinea-Bissau achieved independence on Sept. 10, 1974. Sr. Luis Cabral was ousted in a *coup* led by Gen. Vieira in November, 1980.

*Currency.*—The *escudo* was replaced by the *peso* in March 1976.

*Economy.*—The country produces rice, coconuts, ground-nuts and oil palm products. Cattle are raised, and there are bauxite deposits in the south. Imports from U.K. in 1980 were £483,000; exports to U.K. were £1,000.

The Capital and Chief Port is ΨBissau.

## EMBASSY AND CONSULATE

33 Abbot's House,  
St. Mary Abbot's Terrace, W.14.

*Ambassador Extraordinary and Plenipotentiary* (vacant).

*Chargé d'Affaires*, Theo Duval.

The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic, including off-shore islands, is about 10,700 sq. miles with a population of 6,000,000. The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood. About 90 British subjects, many of West Indian origin, reside in Haiti.

A French colony under the name of Saint-Domingue from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former negro slave, who, on January 1, 1804, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

Dr. Duvalier was installed as President in 1957 and was re-elected as President for life on June 15, 1964. He died on April 21, 1971. He was succeeded as President for life on the same day by his son, Jean Claude Duvalier, whom he had nominated as his successor under Article 102 of the Constitution of 1964 as amended on January 14, 1971.

*Production, Industry, etc.*—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the

gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of productivity. The main project is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley. In May 1977 it was recorded that the country was undergoing an unprecedented famine, which had been caused by protracted drought and which had resulted in the deaths of hundreds of people. Since then, heavy rain in 1978 and 1979 has improved matters but it is estimated that eighty per cent of the people do not get enough to eat and the situation remains acute.

The principal products are coffee, sugar, essential oils, sisal, cocoa and cotton. Coffee accounts for about one third of total exports and is still a mainstay of the country's economy though exports now rarely exceed 300,000 bags (of 60 kg.). Exports of bauxite began in 1957, but known reserves are now almost exhausted. Industry is still on a small scale but the last few years have seen a steady and considerable expansion of light industry (the so-called transformation industries) taking advantage of cheap local labour (minimum wage, Oct. 1982, \$U.S. 2.64 per day) to assemble or manufacture labour-intensive goods for the U.S. market (baseballs, brassieres, electronic equipment, etc.). Exports of manufactures now rank second after coffee at about 40 per cent of total exports. The tourist industry is again expanding and many French Canadians are now attracted to Haiti for winter holidays. The country is one of the most beautiful in the Caribbean.

*Communications.*—The main roads are asphalted but secondary roads are bad. Air services are maintained between the capital and the principal provincial towns. The principal towns and villages are connected by telephone and/or telegraph. The telephone company is now state owned (51 per cent.) and the service both in Port-au-Prince and Interurban has been greatly improved. External telegraph, telephone and postal services are normal. There are several commercial radio stations and a television station at Port-au-Prince.

Haiti is very well served by air from New York and Miami to the North and from Martinique, Puerto Rico and other points to the South, with daily services by one line or another in both directions. There are also services to Kingston, Curaçao and Santo Domingo. The airlines touching Port-au-Prince International Airport include Dominicana, Air France, American Air Lines, Eastern Airlines, Air Jamaica and A.L.M. Regular passenger liner services to New York have ceased, but cruise ships

call regularly, one Norwegian line operating a weekly cruise service to Miami. Freight sailings are frequent for the U.S.A., Canada, Europe, Latin America (except Cuba) and the main Caribbean ports. (Air-mail: U.K./Port-au-Prince, 4-14 days—extremely variable.)

**Climate.**—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

**Language and Literature.**—French is the language of the government and the press, but it is only spoken by the educated minority. The usual language of the people is Creole. Education is free but estimates of illiteracy are as high as 75 per cent. There are four French daily newspapers. The total circulation is very small.

**Finance.**—New arrangements are being negotiated with the International Monetary Fund following missions to Haiti in Sept. 1981 and April 1982.

	1979
	\$U.S.
Revenue .....	94,709,000
Expenditure .....	94,709,000

**Trade.**—Value of imports 1979 \$U.S. 224,800,000; exports 1979 \$U.S. 128,000,000.

#### Trade with U.K.

	1980
Imports from U.K. ....	£2,818,000
Exports to U.K. ....	915,000

The principal exports are listed above; the principal imports are foodstuffs, machinery, vehicles, chemicals and miscellaneous manufactured goods.

**CAPITAL.**— $\Psi$ Port-au-Prince. Population (census, 1971), 506,525. Other centres are:  $\Psi$ Cap Haitien (54,691);  $\Psi$ Gonaives (36,736);  $\Psi$ Les Cayes (27,222); Jérémie (25,117);  $\Psi$ St. Marc (20,504);  $\Psi$ Jacmel (16,449);  $\Psi$ Port de Paix (21,733).

**FLAG.**—Two vertical bands, black (next staff) and red; arms in centre on a white background.

**NATIONAL DAY.**—January 1.

*British Ambassador*, His Excellency Barry G. Smallman, C.M.G., C.V.O. (1982) (*resident at Kingston, Jamaica*).

#### HONDURAS EMBASSY IN LONDON

52 Manchester Street, W.1

[01-486 3380]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sr. Edgardo Dumas-Rodriguez (1982).

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' W. with a seaboard of about 375 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 63 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains a total area of approximately 43,278 sq. miles (112,088 km.) and a population (1979 estimate) of 3,500,000, of mixed Spanish and Indian blood. There is a foreign negro (West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras, with peaks rising to 1500 and 2400 metres above sea level. Most of the soil is poor and acid, except for a few acres along the North coast and in the interior. Rainfall is seasonal, May to October being wet and November to April dry. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands. Threequarters of the territory is covered by pine forests which contribute to much of the country's wealth in natural resources.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under military government from 1972–81, the present Liberal government was elected in Nov. 1981 and took office in Jan. 1982.

The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief exports are coffee, bananas and timber, the most important woods being pine, mahogany and cedar. Cattle raising and the exporting of frozen meat is becoming an increasingly important industry. Other products are tobacco, beans, maize, rice, cotton, sugar cane, cement and tropical fruits. There are large tracts of uncultivated land.

Agriculture is mainly confined to the large and fertile valleys on the wide Caribbean plain, and the extensive valleys found in the Comayagua and Olancho regions of the interior. Reaching inland from the Caribbean towards the eastern border with Nicaragua a vast tropical forest area called the Mosquitia constitutes an untapped reserve of precious timber.

Lead, zinc and silver are mined.

There are about 730 miles of railway in operation, chiefly to serve the banana plantations and the Caribbean ports. There are 13,448 km. of roads, of which 1,724 are paved, excluding some 250 kms of new major highways recently inaugurated. Improvements are being made and new roads built. There are 33 unpretentious airports and three international airports Tegucigalpa, San Pedro Sula and La Ceiba. There are international air services by the Honduran airlines TAN and SAHSA and by the U.S. company Air Florida, and, to San Pedro Sula, by AVIATECA. Domestic services are operated by ANHSA and LANSA.

The language of the country is Spanish. Primary and secondary education is free, primary education being compulsory, and the Government have launched a campaign to eradicate illiteracy.

$\Psi$ The chief ports are Puerto Cortes, Tela and La

Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side. A new deep-water port, Henecan, has been opened at San Lorenzo, on the mainland, in the Gulf of Fonseca.

The unit of currency is the *Lempira* (named after a native chief).

*3rd Secretaries*, Dr. György Bánlaki (*Press*); Dr. István Mohácsi; Gábor Hegedűs.

*Area and Population*.—The area of Hungary may be stated as approximately 36,000 sq. miles with a population (1980) of 10,710,000.

*Government*.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939-45 War on the side of Germany in 1941. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

After the liberation, a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties carried out major land reform and mines, heavy industry, banks and schools were nationalized. By 1949 the Communists had succeeded in gaining a monopoly of power. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been "socialized". The Party formulates policy and the function of the Government is mainly executive.

In mid-1953 Mr. Imre Nagy became Prime Minister, replacing Mr. Rákosi, who remained as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry. However, in April 1955 he was removed from his position as Prime Minister and subsequently expelled from the Party. But opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as First Secretary and succeeded by Mr. Gerő, who had been one of his closest associates.

The period from July 1956 to the outbreak of the national revolution on Oct. 23 was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian

Revolutionary Worker Peasant Government under the leadership of Mr. Kádár was announced.

*Economy*.—Industrialization has made considerable progress in the last decade and now produces 68 per cent of national income. Industry is mainly based on imported raw materials but Hungary has her own coal (mostly brown), bauxite, considerable deposits of natural gas (some not yet under full exploitation), some iron ore and oil. Output figures in 1980 (1,000 tons), coal, 25,700; bauxite, 2,950; steel 3,763; crude oil, 2,031; cement, 4,660. Natural gas production totalled 6,127 million cubic metres.

Agriculture still occupies an important place in the Hungarian economy. 10.6 per cent of the entire land area is owned by State farms and a further 63.8 per cent is within co-operative farms. Production of the most important crops in 1980 was up on previous years; figures (1,000 tons); wheat, 6,048; rye 138; barley 926; maize 6,575; rice 25; oats 104; sugar beet 3,873; green maize and silage maize 6,253; lucerne 2,222.

In 1980, national income grew by 1 to 1.5 per cent, while agricultural production remained at 1978 levels. The retail price index rose by just over 9 per cent.

Since 1968 the Hungarian economy has been run according to a system which allows more decentralized decision-making than in some other Eastern European countries. More difficult economic circumstances have led to some slight moves to more central control in vital areas such as the allocation of fuels and raw materials.

*Religion and Education*.—About two-thirds of the population are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—kindergartens 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18). In the academic year 1978-79 there were 106,000 students at higher education institutions, 198,000 at secondary schools, and 1,107,000 at general schools.

*Language and Literature*.—Magyar, or Hungarian, is one of the Finno-Ugric languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800-1855), Sándor Petöfi (1823-1849), János Arany (1817-1882), Imre Madach (1823-1864), Kálmán Mikszáth (1847-1910), Endre Ady (1877-1918), Attila József (1905-1937), Mihály Babits (1883-1941) and Dezső Kosztolányi (1885-1936).

*Finance*.—The budget estimates for the year 1978

were: Revenue, *Forints* 382,922,000,000; Expenditure, *Forints* 386,402,000,000.

## EMBASSY IN LONDON

1 Eaton Terrace, S.W.1.

[01-730 5131]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Einar Benediktsson (1982).

*Counsellor*, Mrs. H. Bergs.

*Cultural Minister*, M. Eiríkur Benedikz.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,500 square miles, or about one-sixth greater than that of Ireland. The population was 231,608 on Dec. 1, 1980.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The parliamentary (*Althing*) elections in December 1979 gave the Independence Party 21 seats (plus one running against the official candidate), Progressives 17, People's Alliance 11 and Social Democrats 10. In February 1980, Dr. Gunnar Thoroddsen, Vice-Chairman of the Independence Party, formed an administration with the Progressives and the People's Alliance, leaving the Social Democrats and the main body of the Independents in opposition.

Iceland has considerable resources of hydroelectric and geothermal energy. It is estimated that exploited water power (3,320 Gigawatt hours/a) represents only about 12 per cent of that economically exploitable, whereas only 5 per cent of the estimated 80,000 Gigawatt hours/a of available geothermal power has so far been harnessed. Energy-intensive heavy industry includes an aluminium smelter, a nitrogen fertilizer factory, a diatomite plant and a recently-commissioned ferro-silicone plant.

The principal exports are frozen fish fillets, salt fish, stock fish, fresh fish on ice, frozen scampi, fishmeal and oil, skins and aluminium; the imports consist of almost all the necessities of life, the chief items being petroleum products, transport equipment, textiles, foodstuffs animal feeds, timber, and alumina.

At January 1, 1982, the mercantile marine consisted of 561 vessels of under 100 gross tons and 389 ships of 100 gross tons and over; a total of 950 vessels (194,482 gross tons). There is a regular shipping service between Reykjavík and Felixstowe and between Reykjavík and Weston Point on the Mersey, and the Continent.

In the period since Iceland attained independence in 1944, relations between Britain and that country

have come under strain on several occasions as a result of unilateral action by Iceland to extend the area of her exclusive fishery jurisdiction. The last such confrontation ended with an agreement signed in Oslo in June 1976. Since December 1976 no British vessels have fished the waters within Iceland's 200-mile extended fishing zone, and no agreement for the resumption of fishing by British vessels has been reached.

A regular air service is maintained between Glasgow and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A., Germany, France and Luxemburg.

Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres and a few key highways are metalled the rest being of gravel, sand and lava dust. The climate and terrain make first-class surfaces for highways out of the question. Total number of vehicles licensed is about 90,000 (private cars, 81,000).

*Language and Literature.*—The ancient *Norraena* (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

## FINANCE

*President*, Mar. 28, 1968, re-elected for a term of 5 years, March, 1973 and March 1978.

## INDONESIAN EMBASSY AND CONSULATE

38 Grosvenor Square, W.1.

[01-499 7661]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sjahabuddin Arifin (1981).

*Minister*, Agus Tarmidzi (*Deputy Chief of Mission*).

*Minister-Counsellor*, C. Taihitu (*Economic*).

*Counsellor*, I. Abidin (*Information*).

*First Secretary*, Den Zachrie (*Economic*).

*Attaché*, A. Susanto; M. I. Dwijaatmaja (*Administration*); Mrs. N. S. Rochadiat (*Political*).

*Defence Attaché*, Lt. Col. P. Damanik.

*Communications Attaché*, R. Robbani.

*Commercial Attaché*, S. L. Tobing.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of *Java* and *Madura*, the island of *Sumatra*, the *Riouw-Lingga Archipelago* (which with *Karimon*, *Anambas*, *Natuna Islands*, *Tambelan*, and part of *Sumatra*, forms the province of *Riau*), the islands of *Bangka* and *Billiton*, part of the island of *Borneo* (*Kalimantan*), *Sulawesi* (formerly *Celebes Island*, the *Molucca Islands* (*Ternate*, *Halmahera*, *Buru*, *Seram*, *Banda*, *Timor-Laut*, *Larat*, *Bachiam*, *Obi*, *Kei*, *Aru*, *Babar*, *Leti* and *Wetar*), the island of *Bali* and the islands of *Lombok*, *Sumbawa*, *Sumba*, *Flores*, *Timor* and others comprising the provinces of *East* and *West Nusa Tenggara* and the western half of the island of *New Guinea* (*Irian Jaya*), with a total area of 735,000 sq. miles, and a population of about 147,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War 1939–45, during which the Archipelago was occupied by the Japanese, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands of all the former Dutch East Indies except *W. New Guinea* took place on December 27, 1949.

*Dr. Sukarno* was elected *President* of Indonesia and held office until his deposition in 1967. He died on June 21, 1970.

Following the establishment of *Malaysia* (including *Sabah* and *Sarawak*) in 1963, *President Sukarno* pursued a policy of "confrontation" against it, involving border incursions in both *West* and *East Malaysia*. *Commonwealth* forces assisted *Malaysian* resistance. *Western New Guinea* became part of *Indonesia* in 1963 under the name *West Irian* (now *Irian Jaya*), this interpretation being confirmed in an "Act of Free Choice" in July, 1969, of which the *United Nations* took note in *November 1969*. Following a unilateral declaration of independence by the *Fretilin*, *Indonesia* took over the former *Portuguese* colony of *East Timor*, which in July 1976 was declared the 27th province of *Indonesia*.

On *Sept. 30, 1965*, an attempted *coup d'état* assisted by the *Palace Guard* resulted in the murder of six generals. The *Indonesian Communist Party* was charged with plotting to destroy the power of the *Army* and to set up a *Peking-oriented régime*, nominally under *President Sukarno*. The *coup* was swiftly crushed and a widespread massacre of *Communists* and their supporters followed. *Sukarno* remained in office but his *Foreign Minister*, *Dr. Subandrio*, among others, was arrested and later sentenced to death. The sentence has not been carried out.

Following a three-week period of unrest and violent student demonstrations the *Minister of the Army*, *General Soeharto*, took over effective political power in *March, 1966*, and announced the banning in

Indonesia of the Communist Party. The new régime concluded an agreement ending the "confrontation" with Malaysia on Aug. 11, 1966, and Indonesia resumed membership of the United Nations Organization which it had left in 1965. General Soeharto was made Acting President with full powers, on March 11, 1967.

Using his powers as Acting President, General Soeharto revised the membership of the two Houses of Parliament, and on March 28, 1968, the MPRS (Provisional People's Consultative Congress), the highest constitutional body, appointed him full President for a period of five years. The 1971 elections resulted in the Government faction Golkar (functional groups) achieving a large majority.

In accordance with another instruction General Soeharto on June 6 replaced the Ampera Cabinet with the Development Cabinet, i.e. one which was intended to reflect the emphasis to be placed henceforward on the development of the country, economic affairs, efficiency and expertise in general, and to reduce the direct influence of the military in the Government.

From March 12-24, 1973, the M.P.R. (Peoples' Consultative Assembly) met at Jakarta, the first time that it had assembled in its proper form during Indonesian independence. The primary outcome was the re-election of President Soeharto for a further term of 5 years, the election of Hamengku Buwono IX, Sultan of Yogyakarta, as Vice-President, and the determination of the broad lines of State policy. In March a new Cabinet, called the Second Development Cabinet, was sworn in. Elections were held again in May 1977 and produced for the Government faction (Golkar) the same large majority as in 1971. The M.P.R. duly met again in March 1978 to elect the President and lay down the broad outlines of State Policy for the next five years. President Soeharto was re-elected for a further five-year term and appointed his new Government, to be known as the Third Development Cabinet. Adam Malik was elected Vice-President, the Sultan having declined to stand again. In the general election of May 1982, Golkar obtained 246 seats, the Moslem Party 94, and the Democratic Party of Indonesia 24.

**Finance.**—Following new measures introduced by the Government in October, 1966, inflation declined

from the rate of 600 per cent. in 1966 to about 2 per cent. in 1971. At the end of 1972, a rice shortage, followed by a rise in other prices, increased inflationary pressure on the economy and inflation rose to 27 per cent. in 1973 and 40 per cent. in early 1974 but special measures reduced this to about 2 per cent. for the year. Following the agreement on the re-scheduling of Indonesia's debts in 1966, Western creditor nations agreed to make available aid amounting to \$200,000,000 as balance of payments support. Commitments undertaken by these countries in May 1974 amounted to over \$900,000,000.

The new measures adopted by the Government in October, 1966, included the abolition of State controls, and the introduction of a free market policy with more realistic exchange rates geared to a floating rate for the purchase of foreign exchange in the form of bonus export certificates for essential imports. The rate had risen to a peak of *Rps.*480 = \$1 by mid-1968, but fell to *Rps.*378 = \$1 by mid-1969. On April 17, 1970, the Government abolished the bonus exports certificate system and introduced a free market for foreign exchange. *Rps.*415 = U.S. \$1 (July 1974). This remained stable until the Government's decision on Nov. 15, 1978 to break the *Rupiah's* link with the U.S. dollar in favour of a system whereby Bank Indonesia fixes the exchange rate daily against a "weighted basket" of major currencies. Initially, the new rate was *Rps.*625 = U.S. \$1. There have since been only minor variations.

**Production.**—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg, pepper and cloves are produced, mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estates. Rubber, tea, coffee and tobacco are also produced by both in large quantities. Timber is now the second largest foreign exchange earner after oil. Rice is a traditional staple food for the people of Indonesia and the islands of Java, Sulawesi and Sumatra are important producers. Production has risen rapidly in recent years to over 22 million tons and the country is now nearly self sufficient.

Oil and LNG are the most important assets, the export of which in 1981 earned about U.S. \$18,686,892,000 (over 70 per cent of Indonesia's exports).

Indonesia is rich in minerals; petroleum, tin, coal, nickel and bauxite are the principal products; gold, silver, manganese phosphates and sulphur were produced in quantity before the Second World War and there are considerable deposits. Aid to Indonesia is channelled through the Inter-Governmental Group on Indonesia (IGGI), which pledged U.S. \$1,925,900,000 in 1982-3.

Indonesia has ended its second five-year development programme. The Third Development Programme started in 1979 and its main objectives are the elimination of poverty, agriculture and urban problems.

#### Trade with U.K.

There was a progressive decline in British exports to Indonesia after 1960. This became more marked during Indonesia's policy of "confrontation" against Malaysia which resulted in a disruption of normal commercial relations and stringent import controls due to lack of foreign currency, but exports have improved markedly since the restoration of normal commercial relations in 1967.

	1980
Direct Imports from U.K. ....	£112,170,000
Exports to U.K. ....	56,970,000

Principal exports to the United Kingdom are rubber, timber, tea, coffee and spices. Imports from the United Kingdom are mainly of machinery, transport equipment and electrical equipment.

*Transport.*—In Java a main line connects Jakarta with Surabaya in the East of Java and there are several branches. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago are maintained by the State-run shipping companies Djakarta-Lloyd (ocean-going) and Pelni (coastal and inter-island) and other small concerns. Transport by small craft on the rivers of the larger islands plays an important part in trade. Air services in Indonesia are operated by Garuda Indonesian Airway and other local airlines, and Jakarta is served by various international services. There are approximately 50,000 miles of roads.

*CAPITAL.*—ΨJakarta, formerly Batavia (population 6,503,449). Other important centres are: (Java) ΨSurabaya (7,027,913), ΨSemarang (1,026,671), Bandung (1,462,637), ΨCirebon (223,776), ΨSurakarta (469,888), Jogjakarta city (398,727); (Sumatra) Palembang (787,187), ΨPadang (480,922), Medan (1,378,955), Jambi (230,373), Pekanbaru (186,262); (Sulawesi) Manado (217,159), ΨUjung Pandang (*formerly Makassar*) (709,038); (Kalimantan) Banjarmasin (381,286), ΨPontianak (304,778), Samarinda (264,718), ΨBalikpapan (280,675); (Moluccas) Ambon (208,898); (Bali) Denpasar, Singaraja (for whole island 2,174,105); (Nusa Tenggara) Kupang (329,371); (Irian Jaya) Jayapura (107,164).

*NATIONAL DAY.*—August 17 (Anniversary of Proclamation of Independence).

*FLAG.*—Equal bands of red over white.

#### IRANIAN EMBASSY IN LONDON 27 Princes Gate, S.W.7

*Area and Population.*—Iran has an area of 628,000 sq. miles, with a population of 39,190,000 (1982 estimate). It is mostly an arid table-land, encircled, except in the east, by mountains, the highest in the north rising to 18,934 ft. The central and eastern portion is a vast salt desert.

The Iranians are mostly Shi'ah Moslems but among them are a few hundred thousand Zoroastrians, Bahais, several million Sunni Moslems and Armenian and Assyrian Christians. There is also a substantial Jewish community.

*Government.*—Iran was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Iranian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah, who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi. On September 16, 1941, Reza Shah abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammed Reza Shah Pahlavi.

Following widespread and persistent opposition to his regime, the Shah departed from Iran in January, 1979. Ayatollah Khomeini, the main spiritual leader of the Shi'ah Moslems, returned to Iran from exile on February 1. Following a national referendum, Iran was declared an Islamic Republic by Ayatollah Khomeini on April 1, 1979. A new constitution, providing for a President, Prime Minister and Consultative Assembly, and also for overall leadership by Khomeini, was approved by referendum in December 1979. In January 1980 Dr. Bani-Sadr was elected President; elections to the Consultative Assembly were held in March and April. After disagreement between Dr. Bani-Sadr and the fundamentalist clergy, he was forced to resign in June 1981. From exile in Paris he became the leader of the discontent of the moderates with the fundamentalist policies of the government and religious leaders. Opposition to these policies led to assassination and bombings, including in August 1981 the deaths of the President and Prime Minister in an explosion.

Iran has been at war with Iraq since the Iraqi invasion of Iran in Sept. 1980. Following their defeat

at Khorramshahr Iraqi forces withdrew from Iranian territory in June 1982.

**Defence.**—The Army has a strength of about 150,000 men, in 4 armoured divisions, 4 infantry divisions and one airborne division. The Air Force had a strength of about 35,000, with some 100 combat aircraft. The Navy had a strength of about 10,000 and consisted of 3 destroyers, 4 frigates, 4 corvettes, 5 minesweepers, and patrol boats, support ships, landing craft and hovercraft. The Islamic Revolutionary Guards Corps numbers about 15,000 men, of whom approximately half are at the front. Both the regular armed forces and the police forces are in a phase of reconstruction, although the army has been expanded since the outbreak of fighting with Iraq.

**Education.**—Since 1943 primary education has been compulsory and free, but there is large scale absenteeism, particularly outside the towns. The establishment in 1963 of the Literacy Corps (a body of National Servicemen seconded to the Ministry of Education to work as Primary School teachers in rural districts) brought schooling to hitherto deprived villages. There are in Iran 22 universities (8 in Tehran, 14 in the provinces) though they have been closed since July 1981 pending "Islamisation". The educational system has not yet been fully reformed following the revolution.

**Language and Literature.**—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, of Firdausi (A.D. 939–1020), Omar Khayyám, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa'di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389).

**Finance.**—The budget for the Iranian year beginning March 22, 1982, was revenue *Rials*, 2,519 billion; expenditure *Rials*, 3,085 billion. The unit of currency is the *Rial* of 100 *Dinars* (for rate of exchange, see p. 84).

**Production and Industry.**—While petroleum is the principal product and by far the greatest export, Iran is otherwise largely an agricultural and pastoral country. After the 1979 revolution the Provisional Government announced its intention of giving greater emphasis to the development of agriculture with a view to reducing Iran's dependence on food

imports. Although half of Iran's area of 165 million hectares is either mountain or desert, more than half the country's population of 34 million people live in rural areas, depending on the 10 million hectares under crop, 55 million sheep, 27 million goats and 9 million cattle for their livelihood. Wheat is the principal crop, using about 6 million hectares. Other important crops are barley, rice, cotton, sugar beet, fruit, nuts and vegetables. Wool is also a major product. There are extensive forests in the north and west, the conservation of which is an urgent problem. Under the Shah, great emphasis was given to the development of industry. Apart from oil, the principal industrial products are carpets, textiles, sugar, cement and other construction materials, ginned cotton, vegetable oil and other food products, leather and shoes, metal manufactures, pharmaceuticals, automobiles, fertilizers and plastics. Industrial output was severely curtailed by the 1979 revolution, as a result of which many industrialists left the country. In July 1979 the Provisional Government nationalized a wide range of major industrial concerns, having nationalized the banks and the insurance companies the previous month.

The oilfields, which lie in South Western Iran, were worked under a concession by the Anglo-Iranian Oil Company until nationalization in 1951. In 1957 the former functions of A.I.O.C. were taken over by a consortium of eight oil companies (one British, one French, one Dutch, and five U.S.), which until the 1979 revolution remained responsible for the production, refining and sale of oil through two operating companies, while "non-basic" operations were undertaken by the National Iranian Oil Company. In July 1979 N.I.O.C. assumed full control of the oil industry. In addition to that extracted from the wells in the former consortium area, oil is also produced from a number of off-shore oilfields which were developed by several oil companies formed jointly by N.I.O.C. with western oil companies, notably S.I.R.P., I.P.A.C., L.A.P.C.O. and I.M.I.N.C.O. Average oil production was 5.6 million barrels per day (b.p.d.) in 1977, and 5.9 million b.p.d. for the first ten months of 1978. Production was almost totally halted by striking oil workers in December 1978, but by June 1979 had reached an average of 3.5 million b.p.d., all but 700,000 b.p.d. for export. Present production is approximately 2 million b.p.d., of which some 1.5 million b.p.d. is exported. Iran is a member of the Organization of Petroleum Exporting Countries (O.P.E.C.).

**Communications.**—The principal roads are from Tehran via Tabriz to the Turkish border at Bazargan, with a branch road to the Soviet frontier at Julfa; from Tehran via Qom, Isfahan, and Shiraz to Bushire; from Tehran to Mashad; three roads through the Alborz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan via Yazd and Kerman to Zahedan. Mashad is connected by road with Herat (Afghanistan), and Zahedan with Quetta (Pakistan). The Trans-Iranian Railway from Bandar Turcoman (formerly Bandar Shah), on the Caspian Sea, via Tehran to Bandar Khomeini (formerly Bandar Shahpur), on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles and took eleven years to build. Other lines link Tehran with Tabriz and with Mashad. There are also railways from Tabriz to Julfa and from Zahedan to Quetta, and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma (Iraq). An extension from Qom to Yazd via Kashan is now in operation, as is one from Bandar Turcoman to Gorgan. An extension from Yazd to Kerman is partially complete. The Iranian rail system is linked to the Turkish system via Van. There is an international airport at Tehran (Mehrabad), and airports at all the major provincial

centres. The national airline, Iranair, is government-owned and operates international and domestic routes.

## TRADE

	1981
	U.S.\$
Imports .....	10,330,000,000
Exports .....	262,000,000

These figures are calculated at the commercial rate of exchange and exclude oil exports.

## Trade with U.K.

	1980	1981*
Imports from U.K. . .	£393,335,000	£369,200,000
Exports to U.K. . . .	107,176,000	47,800,000

\*estimate

Imports to Iran declined dramatically at the beginning of 1979 as a result of the economic disruption caused by the revolution. For example British exports to Iran during the three months to 30 April, 1979 were about 10 per cent. of the figures for the same period of 1978.

Imports into Iran consist mainly of industrial and agricultural machinery, motor vehicles and motor vehicle components for assembly, iron and steel (including manufactures), electrical machinery and goods, meat, various other foods, and certain textile fabrics and yarns. The principal exports, apart from oil, are cotton, carpets, dried fruit, nuts, hides and skins, mineral ores, wool, gums, caviare, cummin seed and spices. West Germany, Japan and the U.S.A. have been Iran's three leading suppliers. West Germany, the U.S.S.R., the U.S.A. and Italy have been the main customers for Iran's non-oil exports.

CAPITAL: Tehran, population 6,200,000. Other large towns are Tabriz (600,000), Isfahan (560,000), Meshed (350,000), Shiraz (250,000), Resht (150,000), Kerman (100,000), Hamadan (130,000), Yazd (70,000), Kermanshah (152,000), ΨAbadan (300,000), Ahwaz (175,000).

FLAG.—Equal horizontal bands of green, white and red; with an emblem of the Islamic Republic.

BRITISH EMBASSY  
Tehran

Counsellor, N. J. Barrington, C.M.G., C.V.O.

First Secretary, C. J. S. Rundle.

(The Embassy was closed on September 9, 1980, and representatives are based temporarily at the Swedish Embassy.)

## IRAQ

## REVOLUTIONARY COMMAND COUNCIL

Chairman, President of the Republic, and Supreme Commander of the Armed Forces, Saddam Hussain, assumed office July 16, 1979.

Members, Izzat Ibrahim (RCC Vice-Chairman); Taha Muhiiddin Ma'aruf (Vice-President of the Republic); Taha Yasin Ramadhan (First Deputy Prime Minister); Na'im Haddad (Chairman of the National Assembly); Tariq 'Aziz (Deputy Prime Minister); General Adnan Khairallah (Deputy Prime Minister and Minister of Defence); Sa'doun Shakir (Interior); Hassan Ali (Trade); Khalid Abdul Mun'im Rasheed (acting Secretary-General); Muhammad Hamza; Abdul Ghani Ghafur; Samir Muhammad Abdul Wahhab; Abdul Hassan Rahi Far'aon; S'adi Mehdi Saleh; Mezban Khidr Hadi (Advisers to the President).

In addition to those members of the R.C.C. holding departmental portfolios listed above, there are 19 other Ministers and 4 Ministers of State.

## EMBASSY OF THE REPUBLIC OF IRAQ

21 Queen's Gate, S.W.7

[01-584 7141]

Ambassador Extraordinary and Plenipotentiary,  
H. E. Hisham Ibrahim Al-Shawi.

Area, etc.—Traversed by the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Gulf on the S. and S.E. and from Iran on E. to Syria and Arabian Desert on W., the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. (see MAP, p. 877). The area of Iraq is officially estimated at 172,000 sq. miles of which 37 per cent. is desert land. About 35 to 40 per cent. of the remainder is potentially cultivable either by rainfall or by irrigation.

Population.—At the Census of October 1977 Iraq had a total population of 12,171,480.

The Euphrates (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzurum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzurum in the Dumlu Dagh. The Tigris has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Antiquities.—In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C. Excavations in 1948 at Tel Abu Shahrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world. Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel). Mosul Liwa covers a great part of the ancient kingdom of Assyria, the ruins of Ninevah, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the Garden of Eden.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal was elected King of Iraq. The country was a monarchy until July, 1958, when King Faisal II was assassinated. From 1958 Iraq has been under Presidential rule.

The ruling Party is the Arab Ba'ath Socialist Party, which came to power on July 17, 1968.

Diplomatic relations with the United Kingdom were broken in June 1967 and resumed in May 1968. They were again broken in Dec. 1971 and resumed once more in April 1974.

Iraq has been engaged in hostilities with Iran since September 1980, originally over control of the Shatt-al-Arab waterway. In July 1982 Iranian forces moved across the border into Iraq.

Language.—The language is mainly Arabic (see Arabia) and English is widely used in commerce, science and the arts.

Communications and Trade.—New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. Facilities at the port of Basrah have been improved but the port has not been used since the outbreak of hostilities with Iran in Sept. 1980. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun),

but dredging operations have also been suspended by hostilities and the channel has probably seriously silted. The port of Um Qasr near the Kuwaiti border has been developed for freight and sulphur handling and a container terminal is now in operation. Road routes from Turkey and the Mediterranean are well used, and carry through traffic to Kuwait and the south. The border between Syria and Iraq was closed in late 1977, reopened in November, 1978 and closed again in April 1982.

There is an international airport at Baghdad. Iraqi Airways and British Airways provide flights between Baghdad and London in each direction almost daily, and other international airlines operate to Europe. There are Iraqi services to Mosul and Basrah. Iraqi Republican Railways provide regular passenger and goods services on a standard gauge line between Basra, Baghdad and Mosul, which links up through Syria and Turkey with the Mediterranean and the Bosphorus. There is also a metre gauge line connecting Baghdad with Khanaqin, Kirkuk and Arbil.

**Agriculture and Industry.**—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. The Government's concern with agricultural development is shown in the large financial allocations made to the sector. Apart from the valuable revenues to be derived from oil, agricultural development makes a valuable contribution to the wealth of the country and two harvests can usually be gathered in the year. Production fluctuates from year to year according to rainfall. Salinity and soil erosion, caused by a high water table, inadequate irrigation and drainage and traditional farming methods, are the major problems now being tackled by development plans.

Increasing industrialization is taking place, mainly in the public sector. Priority is being given to petro-chemicals, food industries, construction industries and engineering. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel fabrications, furniture, tanning, textiles, footwear and vegetable oils. In 1975 there were 1,349 industrial establishments employing 134,594 persons. Iraq's major industry is oil production. It was nationalized on June 1, 1972 and accounts for approximately 98 per cent. of the country's foreign exchange receipts, 90 per cent. of the total government revenue and 45 per cent. of the Gross National Product. Production was some 3.5 million barrels per day in 1979 but in 1982 the effects of war damage on the Basra terminals and the closure of the trans-Syria pipeline have reduced production to an estimated 600,000 barrels per day. Total revenues of crude oil have not been published since 1972, but they are believed to have been worth some \$20,000,000,000 in 1979.

## FINANCE

	1980*	1981*
Total revenue ..	ID14,412,503,000	ID19,434,856,809
Total expenditure	14,103,423,000	19,250,261,450

\* Budget estimates.

## TRADE

(Excluding oil)

	1978
Total Imports .....	ID1,244,051,000
Total Exports .....	ID62,914,000

## Trade with U.K.

	1980	1981 (est.)
Imports from U.K. ....	£321,000,000	£650,000,000
Exports to U.K. ....	445,000,000	89,000,000

In 1979, petroleum accounted for some £387,360,000 of exports to the U.K. The U.K. imports 8 per cent of its total oil requirements from Iraq, but reduced production in 1982 will lower this figure.

The principal imports are iron and steel, mechanical and electrical machinery, motor vehicles, cotton and rayon piecegoods and grains. The chief exports are crude petroleum, dates, cement, raw wool, raw hides and skins and raw cotton.

**CAPITAL.**—Baghdad. Population of the governorate (Census 1977) 3,205,645. Other towns of importance are Ψ Basrah and Mosul.

**FLAG.**—Horizontal stripes of red, white and black, with three green stars on the white stripe.

## BRITISH EMBASSY

Sharia Salah Ud-Din,  
Karkh, Baghdad

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Stephen Loftus Egerton, C.M.G. (1980).  
*Counsellor*, A. J. Ramsey.

*1st Secretaries*, A. Ferguson (Consul); L. E. Walker, M.V.O., M.B.E. (Commercial).

*Defence Attaché*, Col. D. G. Turner.

There are no British Consular Offices outside Baghdad.

*British Council Representative*, G. Ness, 7/2/9 Waziriya, Baghdad.

## IRELAND

**Position and Extent.**—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between 51° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. Coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Isles, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain; the Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower*

*Erne*, and *Erne*; *Melvin*, *Gill*, *Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of Maggillicuddy's Reeks, are the famous *lakes of Killarney*.

*Primitive Man*.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appears to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

*History*.—According to Irish legends, the island of *Jerne* was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Cool (Fingal) to connect Antrim with Scotland (Staffa).

*Hibernia* was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Finggaill* (White Strangers) and the Danes as *Dubgaill* (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaid's-tír, Laiginstír, Mumans-tír and Kunnak-tír). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under the king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmid MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruidhri O'Connor (the high king of Ireland), and invited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though, under Henry VII, Sir Edward Poynings, as

Lord Deputy, had passed at the *Parliament of Drogheda* (1494) the act later known as *Poynings' Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

*Christianity*.—Christianity did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later escaping to Gaul at the age of 22. In 432 he was consecrated Bishop of Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

## REPUBLIC OF IRELAND

*Uachtarán-na-hÉireann* (President), Patrick J. Hillery, born 1923, assumed office, Dec. 3, 1976.

The present Government was formed by the Fianna Fáil party following a general election on 18 Feb. 1982.

### MEMBERS OF THE GOVERNMENT

*Taoiseach*, Charles Haughey.  
*Tánaiste and Minister for Finance*, Ray MacSharry.  
*Minister for Foreign Affairs*, Gerard Collins.  
*Defence*, Patrick Power.  
*Trade, Commerce and Tourism*, Desmond O'Malley.  
*Justice*, Sean Doherty.  
*Industry and Energy*, Albert Reynolds.  
*Environment*, Raphael Burke.  
*Labour and the Public Service*, Gene Fitzgerald.  
*Education*, Martin O'Donoghue.  
*Agriculture*, Brian Lenihan.  
*Gaeltacht*, Patrick Flynn.  
*Health and Social Welfare*, Michael Woods.  
*Fisheries and Forestry*, Brendan Daly.  
*Posts and Telegraphs and Transport*, John Wilson.

### EMBASSY IN LONDON [01-235 2171]

17 Grosvenor Place, S.W.1

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Eamon Kennedy.

*Area and Population*.—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Laoighis, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population (provisional) of the Republic at the Census held on April 1, 1981, was 3,440,427 (males 1,728,204; females 1,712,223), a density of 129 persons per sq. mile (Census, 1979, 3,368,217). Provisional figures showed 74,388 births, 21,723 marriages and 32,980 deaths in the year 1980.

### GOVERNMENT

*The Constitution*.—The constitution approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic

and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the reintegration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

*The President.*—The President—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

*The Legislature.*—The National Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

Dáil Éireann is composed of 166 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the *Taoiseach* and 49 are elected; six by institutions of higher education, and 43 from panels of candidates, established on a vocational basis.

Members of Dáil Éireann are paid an allowance of £13,802 per annum (and members of Seanad Éireann £7,619), are allowed free travelling facilities between Dublin and their constituencies and are, subject to certain restrictions, granted free telephone and postal facilities from Leinster House and allowances for overnight stays in Dublin.

*The Executive.*—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The *Taoiseach* is appointed by the President on the nomination of Dáil Éireann. The other members of the government are appointed by the President on the nomination of the *Taoiseach* with the previous approval of Dáil Éireann. The *Taoiseach* appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the *Taoiseach* in the event of the death, permanent incapacitation, or temporary absence of the *Taoiseach*. The *Taoiseach*, the *Tánaiste* and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

#### THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann has 166 Members, elected on the system of

Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 18 years and are not disqualified by law have the right to vote. Each Dáil may continue for a period not exceeding five years from the date of election.

The result of the general election on 18 Feb. 1982 was as follows: *Fianna Fáil*, 81; *Fine Gael*, 63; *Labour*, 15; *Independent*, 4; *Workers' Party*, 3. Total membership including the *Ceann Comhairle* (Chairman), 166.

#### JUDICIAL SYSTEM

The Judicial system comprises Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include a High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, with such exceptions and subject to such regulations as may be prescribed by law. No law may, however, be enacted excepting from the appellate jurisdiction of the Supreme Court the question of the validity of any law, having regard to the provisions of the Constitution.

*Chief Justice*, Hon. Thomas F. O'Higgins .. £37,297  
*President of the High Court*, Hon. Thomas A.

Finlay ..... £32,351

*Judges, Supreme Court*, Hon. Brian Walsh;  
Hon. Seamus Henchy; Hon. Francis Griffin;  
Hon. Anthony Hederman ..... £32,351

*Judges, High Court*, Hon. Donal Barrington;  
Hon. William R. Ellis; Hon. John M. Gannon; Hon. Liam Hamilton; Hon. Thomas A. Doyle; Hon. James McMahon;  
Hon. Herbert R. McWilliam; Hon. Rory O'Hanlon; Hon. Declan Costello; Hon. James A. D'Arcy; Hon. Ronan Keane;  
Hon. Edward Walsh; Hon. Mrs. Mella Carroll; Hon. Henry D. Barron; Hon. Francis D. Murphy; Hon. Thomas J. Nealon  
(*ex officio*) ..... £27,405

*Attorney-General*, John Murray.

#### DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. To aid and counsel the Minister for Defence on all matters in relation to the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Minister of State at the Department of Defence, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 18,000 all ranks, including the Air Corps and the Naval Service. Recruitment is on a voluntary basis. Minimum term of enlistment is three years in the Permanent Defence Force followed by six years in the Reserve Defence Force. The Defence Vote for the year ending Dec. 31, 1982, provides for approximately 22,200 all ranks of the Reserve Defence Force. Recruitment is also on a voluntary basis; minimum term of enlistment is five years. The Defence Estimate for the year ending

Dec. 31, 1982 provides for an expenditure of IR£204,113,000.

## FINANCE

	1981 (Actual)	1982 (Estimated)
Revenue .....	£3,972,706 m.	£5,270,000 m.
Expenditure ...	4,775,000 m.	5,949,000 m.

The estimated *Revenue* for 1982 includes Customs Duties, £68,000,000; Excise Duties, £1,221,800,000; Estate etc. Duties, £1,000,000; Income Tax, £1,589,800,000; Corporation Tax, £188,000,000; Motor Vehicle Duties, £70,500,000; Stamp Duties, £97,200,000; Post Office Services, £393,000,000; Value-added Tax, £1,084,500,000; Capital Taxes, £18,500,000; Agricultural levies (E.E.C.), £8,000,000; Youth Employment Levy, £40,000,000. Total (including other items), £5,269,900,000.

The principal items of estimated current *Expenditure* for 1982 are Debt Service, £1,424,000,000; Agriculture, £263,000,000; Defence, Gardai (Police) and Justice, £451,000,000; Education, £716,000,000; Social Welfare, £880,000,000; Health, £856,000,000; Tourism and Transport, £145,000,000; Post Office, £242,000,000; Superannuation, £154,000,000; Industry and Energy, £130,000,000. Total (including other items) £5,949,000,000.

The Gross Debt on December 31, 1981 was £10,195,000,000 and capital assets were £2,396,000.

RELIGION  
(Census of 1971)

Catholic .....	2,795,666
Church of Ireland .....	97,739
Presbyterians .....	16,052
Methodists .....	5,646
Others .....	63,145
Total .....	2,978,248

## EDUCATION

Primary education is directed by the State, with the exception of approximately 91 private primary schools with an enrolment of about 17,000 in 1980-81.

There were 3,405 State-aided primary schools with an enrolment of 551,319 in 1980-81.

In 1980-81 there were 524 recognized secondary schools with 200,872 pupils under private management (mainly religious orders). Also, 68,811 at permanent vocational schools. All these schools and colleges are controlled by 38 statutory local Vocational Education Committees. There were 15 State comprehensive schools in 1980-81 with a total enrolment of 8,451 students, and 34 community schools with an enrolment of 18,355 students. There were also other miscellaneous second-level schools and the total full-time enrolment at second-level for 1980-81 was 300,601.

Third-level education is catered for by five University Colleges, a National Institute for Higher Education, and also by third-level courses offered by the Technical Colleges and Regional Technical Colleges and other miscellaneous third-level institutions. There were 41,928 full-time third-level students in 1980-81, of whom 23,205 were attending university courses.

The estimated State expenditure on education in the period Jan. 1, 1982 to Dec. 31, 1982, excluding administration and inspection, is Primary £285,528,000; Secondary £334,618,000. The vote for Universities and third-level Colleges amounted to £90,338,000, while, in addition, grants of £7,403,000 were provided in respect of the Faculties of General Agriculture, Veterinary Medicine and Dairy Science.

## MINERALS AND FISHERIES

*Minerals*.—300 persons were employed in the coal mines in 1981 and 70,000 tons of coal won.

*Sea Fisheries*.—8,740 persons were employed in the fisheries in 1981. Total value of all fish landed in 1981 was £35,444,000.

## COMMUNICATIONS

*Railways*.—In the year ended Dec. 31, 1980, there were 1,236 miles of railway all of standard (5 ft. 3 in.) gauge; 16,654,000 passengers and 3,571,000 tons of merchandise were conveyed; the receipts were £40,748,000 and expenditure £85,938,000. These figures are in respect of railway working by *Coras Iompair Eireann*, the national transport undertaking which is now the only concern operating a rail service in the State.

*Road Motor Services*.—In 1980 road motor vehicles carried 248,114,064 passengers, the gross receipts being £64,845,988.

*Shipping*.—In 1980 the number of ships with cargo and in ballast in the foreign trade which arrived at Irish ports was 12,468 (18,389,710 net registered tons); of these 2,617 (4,436,859 net registered tons) were of Irish nationality.

## CIVIL AVIATION

*Shannon Airport*, 15 miles W. of Limerick, is on the main transatlantic air route. In 1981 the airport handled 943,228 passengers.

*Dublin Airport*, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline *Aer Lingus* and other airlines. In 1981 the airport handled 2,732,928 passengers.

*Cork Airport*, 5 miles S. of Cork serves the cross Channel and European services operated by *Aer Lingus* and other airlines. In 1981 the airport handled 319,465 passengers.

## Trade with U.K.

	1980	1981
Imports from U.K. ..	£2,754,729,838	£3,267,394,497
Exports to U.K. ...	1,763,782,179	1,919,450,856

## OVERSEAS TRADE

Year	Imports	Exports	Trade Balance
	£	£	£
1979 ..	4,827,922,798	3,496,089,139	1,331,833,659
1980 ..	5,420,704,523	4,131,821,312	1,288,883,211
1981 ..	6,575,484,061	4,845,876,833	1,729,607,228

## PRINCIPAL ARTICLES

*Imports (1981)*

The principal groups were: live animals, £106,419,831; food, drink and tobacco, £722,138,064; petroleum and petroleum products, £852,449,405; chemicals, £691,184,268; machinery, £1,361,833,542; transport equipment, £438,405,545; metal and manufactures, £461,108,028; textiles and clothing, £565,619,170; paper, paperboard and manufactures, £183,216,091; professional, scientific, etc. goods, £113,477,356.

*Exports (1981)*

Principally live animals, £238,159,250; meat and meat preparations, £489,020,751; other food, drink, and tobacco, £877,731,448; machinery and transport equipment, £1,049,300,690; clothing, headgear and footwear, £131,059,499; textiles, £310,785,483; metal ores and scrap, £51,733,875; metals and manufactures,

£141,675,286; non-metallic mineral manufactures, £78,853,035; chemicals, £642,555,102; professional, scientific, etc. goods, £177,303,526.

**CAPITAL.**—Dublin (*Baile Atha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1981, its population (provisional) was 525,360.

Other cities and towns, with their populations (provisional) at the Census of 1981 are  $\Psi$ Cork (136,269);  $\Psi$ Limerick (60,721);  $\Psi$ Dun Laoghaire (54,405);  $\Psi$ Waterford (38,457);  $\Psi$ Galway (37,714);  $\Psi$ Dundalk (25,610).

**FLAG.**—Equal vertical stripes of green, white and orange.

**NATIONAL DAY.**—March 17 (St. Patrick's Day).

**BRITISH EMBASSY**  
33 Merrion Road, Dublin 4

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir Leonard Figg, K.C.M.G. (1980).  
*Counsellor*, D. E. Tatham.

*First Secretaries*, I. Orr (*Head of Chancery*); J. J. Beale (*Agriculture*); R. Buist (*Commercial*); V. J. W. Auster (*Economic*); B. W. Money (*Administration*), P. Johnstone (*Chancery*).

**ISRAEL**  
(Yisrael)

*President of Israel*, Itzhak Navon, born 1921, elected April 19, 1978.

**CABINET**

*Prime Minister*, Menachem Begin.

*Deputy Prime Minister and Minister for Agriculture*, Simha Erlich.

*Deputy Prime Minister and Minister for Housing*, David Levy.

*Defence*, Ariel Sharon.

*Foreign Affairs*, Yitzhak Shamir.

*Interior and Religious Affairs*, Dr. Yosef Burg.

*Finance*, Yoram Aridor.

*Economic Coordination*, Ya'acov Meridor.

*Energy*, Yizhak Berman.

*Health*, Eliezer Shostak.

*Education and Culture*, Zevulun Hammer.

*Justice*, Moshe Nissim.

*Labour and Social Affairs*, Aharon Uzan.

*Transport*, Haim Corfu.

*Trade and Industry*, Gideon Patt.

*Tourism*, Avraham Sharir.

*Communications*, Mordehai Zipori.

*Without Portfolio*, Yizak Moda'i.

**EMBASSY IN LONDON**  
2 Palace Green, Kensington, W.8  
[01-937 8050]

*Ambassador Extraordinary and Plenipotentiary*, (vacant).

**Area and Population.**—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30'–33° 15' N. and longitude 34° 15'–35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South-West.

The area is estimated at 7,992 square miles out of the 10,429 square miles which comprised the pre-1948 mandated territory of Palestine (the remainder being occupied by Israel since the Six Day War in June, 1967, and the Golan Heights). The population was estimated in 1980 at 3,921,700. Jewish immigration has made rapid progress since the establishment of the State in 1948. In 1912 there were only 83,790

Jews in Palestine out of a total population of 752,048. During the upheavals of 1948–49 a large number of Arabs left the country as refugees and settled in neighbouring countries. Since 1948 the population of Israel has more than quadrupled.

Hebrew and Arabic are the official languages of Israel. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

**Physical Features.**—Israel comprises four main regions: (a) the hill country of Galilee and Judea and Samaria, rising in places to heights of nearly 4,000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Kishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51.5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 feet above sea-level, near Safad, Upper Galilee.

**Climate.**—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

**Antiquities.**—The following are among the principal historic sites in Israel: Jerusalem: the Church of the Holy Sepulchre; the Al Aqsa Mosque and Dome of the Rock, standing on the remains of the Temple Mount of Herod the Great, of which the Western (wailing) Wall is a fragment; the Church of the Dormition and the Cœnaculum on Mount Zion; Ein Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Atlit, Massada, Megiddo and Hazor. Other antiquities in the West Bank of Jordan and the Golan Heights at present occupied by Israel can now be visited from Israel. In accordance with the terms of the peace treaty signed between Egypt and Israel on March 26, 1979, Israel withdrew in April 1982 to the pre-1967 boundary, returning the Sinai area to Egyptian sovereignty.

**Government.**—There are a Cabinet and a single-chamber Parliament (*Knesset*) of 120 members. A general election is held at least once every four years.

**Immigration.**—The Declaration of Independence of May 14, 1948, laid down that "the State of Israel will be open to the immigration of Jews from all

countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. From the establishment of the State until April 1978, about 1.7 million immigrants had entered Israel from over 100 different countries.

**Education.**—Elementary education for all children from 5 to 15 years is free, though secondary education is not compulsory. The law also provides for working youth, age 15–18 who for some reason have not completed their primary education, to be exempted from work in order to do so.

In 1980–81 enrolment in all educational establishments was 1,235,527: kindergartens 252,000; elementary education, 436,387; teacher's training colleges, 11,955; secondary education, 149,112; universities, 58,970.

**Finance.**—Government expenditure in 1980 was IS2,913 million (at 1975 prices). GNP was IS5,551 million.

The unit of currency, is the Shekel (of 100 agorot). Exchange rate, see p. 84.

#### COMMUNICATIONS

**Railways and Roads.**—Israel State Railways started operating in August 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lod, Nahariya, Beersheba, Dimona, Ashdod and intermediate stations. In 1980 the total railway network amounted

to 830 km. There were 12,160 km. of paved road in 1979 and 532,000 licensed vehicles in 1980.

**Shipping.**—Israel's merchant marine had reached a total of 4,346,000 tons deadweight by December, 1980.

The chief ports are Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; the harbour on the Red Sea at Eilat, inaugurated in September 1965, has a capacity of 10,000 tons a day; Acre has an anchorage for small vessels; the deep-water port at Ashdod, 20 miles south of Tel Aviv, which started operations at the end of 1965, handled 5,327,000 tons of cargo in 1980. In 1980 Israel's three main ports handled 11,753,000 tons of cargo (excluding petroleum).

**Civil Aviation.**—In 1980, 2,849,000 passengers passed through Ben Gurion airport, of which 585,051 arrived by charter flight.

#### PRODUCTION AND INDUSTRY

**Agriculture.**—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to subtropical crops such as sorghum, millet and mangoes. The famous "Jaffa" orange is produced in large quantities mostly in the coastal plain for export; high-profit export crops such as strawberries and cut flowers are increasingly important. The citrus yield during the 1979–80 season was 1,527,480 tons. Of this total

854,700 tons were exported, earning IS890,800,000. Specialized glasshouse crops for export, such as flowers, tomatoes and strawberries, are becoming increasingly popular and exports of flowers in 1980 earned IS323,500,000. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 24,200 tons in 1980. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production. The area under cultivation is 4,270,000 dunams, of which 2,030,000 is under irrigation. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

**Industry.**—In value polished diamonds account for about one quarter of Israel's total exports. Amongst the most important of her exporting industries are textiles, foodstuffs, chemicals (mainly fertilisers and pharmaceuticals). Her metal-working and science-based industries are highly sophisticated and technologically advanced. These include the aircraft and military industries. Other important manufacturing industries include plastics, rubber, cement, glass, paper and oil refining.

	TRADE	
	1979	1980
Imports ...	U.S.\$7,683,000,000	U.S.\$8,250,900,000
Exports ...	5,043,700,000	6,111,600,000

#### Trade with U.K.

	1980
Imports from U.K. ....	U.S.\$672,900,000
Exports to U.K. ....	465,800,000

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

**CAPITAL.**—Most of the Government departments are in Jerusalem (population, 1980, 448,200). A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950. It is not, however, recognized as the capital by the United Nations. Other principal towns are Tel Aviv and district (1,005,000); Haifa and district (566,400) and Beersheba and district (275,800).

**FLAG.**—White, with two horizontal blue stripes. The Shield of David in the centre.

**NATIONAL DAY (1982)**—April 28.

#### JERUSALEM

Until 1967 Jerusalem was divided between Israel and Jordan, two of the 36 recognized Christian Holy Places (in the New City) being under Jewish administration, the remainder under Arab administration in the Old City. At the conclusion of hostilities between Israel and the surrounding Arab countries in 1967 the entire city was under Israeli control.

#### BRITISH EMBASSY

192 Hayarkon Street, Tel Aviv.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Patrick Hamilton Moberley, C.M.G. (1981).

*Counsellor*, W. K. Prendergast (*Head of Chancery, Consul-General and Counsellor, Commercial*).  
*Defence and Military Attaché*, Col. W. S. H. Boucher.

*British Council Representative*, C. N. Horton, 140 Hayarkon Street, Tel Aviv. There is an office and library in Tel Aviv and a library in Jerusalem.

#### ITALY

(Repubblica Italiana)

*President of the Italian Republic*, Alessandro Pertini, born 1896. Elected July 8, 1978.

#### COUNCIL OF MINISTERS

(Aug. 1982)

*Prime Minister*, Giovanni Spadolini.

*Interior*, Virginio Rognoni.

*Foreign Affairs*, Emilio Colombo.

*Regional Affairs*, Aldo Aniasi.

*Justice*, Clelio Darida.

*Budget*, Giorgio La Malfa.

*Finance*, Rino Formica.

*European Affairs*, Gustavo Abis.

*Southern Affairs*, Claudio Signorile.

*Treasury*, Beniamino Andreatta.

*Defence*, Lelio Lagorio.

*Public Administration*, Dante Schietroma.

*Education*, Guido Bodrato.

*Scientific Research*, Giancarlo Tesini.

*Public Works*, Franco Nicolazzi.

*Industry*, Giovanni Marcora.

*Labour*, Michele Di Giesi.

*Foreign Trade*, Nicola Capria.

*Agriculture*, Giuseppe Bartolomei.

*Transport*, Vincenzo Balzamo.

*Posts and Telecommunications*, Remo Gaspari.

*Merchant Navy*, Calogero Mannino.

*State Participation*, Gianni De Michelis.

*Health*, Renato Altissimo.

*Tourism*, Nicola Signorello.

*Culture*, Vincenzo Scotti.

*Relations with Parliament*, Luciano Radi.

*Commissioner for Civil Protection*, Giuseppe Zamberletti.

#### ITALIAN EMBASSY IN LONDON

14 Three Kings Yard, Davies Street, W.1

(01-629 8200)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Signor Andrea Cagiani, G.C.V.O. (1980).

*Minister-Counsellor*, Sig. Luigi M. Fontana Giusti.

*First Counsellors*, Sig. Mario Quagliotti; Sig. Ferdinando Zezza.

*Counsellors*, Sig. Umberto Pestalozza; Sig. Leonardo Sampoli; Sig. Adolfo Treggiari.

*First Secretaries*, Sig. Giorgio Mariotti, M.B.E.; Sig. Anacleto Felicani; Sig. Walter La Tella; Sig. Mario Polverini.

*Air and Defence Attaché*, Brig. Gen. Roberto Boemio.

*Naval Attaché*, Capt. Alfredo Civetta.

*Military Attaché*, Lt.-Col. Rolando Mosca Moschini.

*Cultural Attaché*, Prof. Alessandro Vaciago.

*Commodities Attaché*, Dr. Igino Baccarini.

*Financial Attaché*, Sig. Corradino de Novellis.

*Italian Consulate General*, c/o 20 Saville Row, W.1.

(01-439 0271).

*Consul General*, Sig. T. Fuxa.

Italy is a Republic in the South of Europe, consisting of a peninsula, the large island of Sicily

and Sardinia, the island of Elba and about 70 islands. Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area is about 324,000 sq. kilometres (131,000 sq. miles).

The peninsula is for the most part mountains, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are *Monte Rosa* (15,217 feet), *Matterhorn* (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (405 miles), which flows through Piedmont, Lombardy and the Veneto, and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Cæsar did in 49 B.C., thus "invading" Italy in arms) is used to indicate definite committal to some course of action.

**Population.**—In Oct. 1981, Italy's population was 56,500,000. The annual rate of population increase

was 3.8 per 1,000 people in 1981, compared to 6.7 in the 1960s.

**Government.**—Italian unity was accomplished under the House of Savoy, after a heroic struggle from 1848 to 1870, in which the great patriots Mazzini (1805-72), Garibaldi (1807-82) and Cavour (1810-61) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader) was born July 29, 1883, and was continuously in office as Prime Minister from Oct. 30, 1922, until July 25, 1943, when the Fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in

12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

**Constitution.**—The constitution of the Republic of Italy, approved by the Constituent Assembly on December 22, 1947, provides for the election of the President by an electoral college which consists of the two Houses of Parliament (the Chamber of Deputies and the Senate) sitting in joint session together with three delegates from each region (one in the case of the Valle d'Aosta). The President, who must be over 50 years of age, holds office for 7 years. He has numerous carefully defined powers, the main one of which is the right to dissolve one or both Houses of Parliament, after consultation with the Speakers.

**Defence.**—The period of conscription is 12 months for the Army and Air Force and 18 months for the Navy. The Army consists of 255,000 men with 550,000 reservists. It has three corps, each of one armed and three mechanical divisions, two independent mechanized brigades, four independent motorized brigades, five alpine brigades, one airborne brigade, two amphibious battalions and one missile brigade. There is also a para-military force, the *Carabinieri*, about 84,500 strong. The Navy consists of 1 helicopter carrier, 2 cruisers, 25 escorts including four G.W. destroyers, 9 submarines, 32 minesweepers and also coastal craft and fleet auxiliaries. Approximate strength: 42,000 men, with 160,000 reservists. The Air Force consists of 69,000 men, with 28,000 reservists and some 310 combat aircraft.

#### REGIONS OF ITALY

**Rome and Central Italy.**—Rome was founded, according to legend, by Romulus in the year now known as 753 B.C. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the Kingdom was established in 1871. The capital is concerned mainly with tourism and government, but owing partly to the fact that the power of the Central Government is increasingly felt by industry, and that the headquarters of the giant State and parastatal companies are located there, Rome's importance as a business centre, although far from rivalling that of Milan, is steadily increasing.

**Lombardy and Milan.**—In the small area around Milan are to be found some 22 per cent of Italy's commercial and banking services and some 30 per cent of her industry. Here too, a market for consumer goods greatly exceeds that of any other comparable area in Italy. Lombardy's population of some 8.6 million is growing fast, both naturally and by immigration, and enjoys a *per capita* income some 40 per cent above the national average. The whole range of Italian industry is there. Most important are the steel, machine tool and motor car factories.

**Turin and Piedmont.**—Turin between 1861 and 1865 was Italy's first capital as the home of the Piedmontese Royal Family. Now with a population of over 1,000,000 it is famous as the headquarters of Europe's largest manufacturer of motor cars, produces 75 per cent. of Italy's motor vehicles and over 80 per cent. of its roller bearings. Turin is also Italy's second largest steel producing city. Piedmont is the centre of the Italian textile industry based mainly on Biella.

**Genoa and the Ligurian Riviera.**—Genoa is Europe's fourth largest port and handles one-third of Italy's foreign trade. About 80 per cent. of the goods handled are imports. Anglo-Genoese trade goes back to the 13th century and 20 per cent. of Genoa's imports still come from Britain. Genoa is Italy's third most important industrial city.

**Venice and the North-East.**—Venice is primarily a tourist attraction of unique beauty. It was founded in the middle of the 5th century by refugees from the mainland fleeing from Barbarian attacks. At the beginning of the 16th century it was one of the strongest and richest states of Europe, dominating Eastern Mediterranean trade. It lost its independence in 1797 when Napoleon handed it over to Austria. Industry is now developing in the Venice area, particularly on the autostrada linking Venice with her historical and now developing rivals, Verona, Vicenza, Padua and in the areas around Pordenone. Padua is known for mechanical equipment, Verona for paper and stationery, Treviso for consumer goods, and Valdagno for its woollen industry. An important electrical appliance industry is based near Treviso and at Pordenone. Near Trieste, which has a population of 277,135, is the modern Monfalcone shipyard. A Free Territory of Trieste was established in the Italian Peace Treaty of 1947 and was composed of Zone A, which included the city of Trieste and was administered by the Allied Military Government, and Zone B which was administered by Yugoslavia. In 1954 Zone A was handed over to the Italian authorities and Zone B to Yugoslavia. A treaty was signed in 1975 between Italy and Yugoslavia under which each country abandoned its residual claims to the other's zone. The Treaty was ratified in April 1977.

**Tuscany, Emilia and Romagna.**—Before the last war this area was the agricultural centre of Italy and there was little industry. Now there are large industrial centres at Bologna, Florence, Modena, Pistoia and Ravenna. Most of the new firms are small or medium-sized. In Prato there are about 1,000 textile firms. The footwear industry is based on Florence, reproduction furniture at Cascina and Poggibonsi, ceramics at Sassuolo, and glass and pottery at Empoli and Montelupo. Bologna is an important centre for the food industry. Florence, the capital of Tuscany was one of the greatest and most creative cities in Europe from the 11th to the 16th centuries. Under the Medici family in the 15th century flourished many of the greatest names in Italian art, including Filippo Lippi, Botticelli, Donatello and Brunelleschi. In the 16th century the tide turned to Rome where great Florentine artists like Michelangelo and Leonardo da Vinci flourished.

**Naples and the Toe of Italy.**—Naples, formerly the capital and administrative centre of the Kingdom of Naples and Sicily, remains the dominant city in the area, but it is beset with great problems of unemployment and the need for modernization. Around it, however, helped by Government incentives, industry is slowly developing, northwards to Caserta, southwards to Salerno and eastwards to Benevento.

**Puglia.**—Bari has always been a commercial centre. Fairly rapid industrial development is now taking place in the areas of Taranto, Bari, Brindisi and Foggia. At Taranto there are a highly-mechanized steel-works and a modern oil refinery. The Bari industrial zone has factories producing electronic and pneumatic valves, specialized vehicle bodies and tyres, etc. The main industry of Brindisi is a petro-chemical plant. At Foggia there is a textile factory.

**Sicily.**—The main source of income is agriculture, particularly citrus fruits, almonds and tomatoes, but this faces severe competition. Oil and oil products have recently supplanted citrus fruits as Sicily's main exports. The island is the scene of intense activity in the fields of oil, natural gas and petrochemicals. Small and medium sized industries, benefiting from the Government's incentives, are developing. Of the island's 279 factories, some 90 are in the Catania area and 60 around Palermo, the capital

of the island. Tourism is bringing an increasing amount of revenue to Sicily.

**Sardinia.**—Sardinia is another autonomous region, with its capital at Cagliari. Six main industrial development areas have been officially designated; they are at Cagliari, Porto Vesme, Oristano, Sassari, Olbia and Arbatax. Lead and zinc mining are important. At Porto Vesme, a large smelting plant has been constructed. In the same area, a company is investing some £60 million in an aluminium plant. There is a flourishing tourist industry.

#### THE ECONOMY

Italian gross domestic product in 1981 was 3345.1 bn. The economy developed fast in the fifties and early sixties with an average real annual increase in the gross national output of about 7 per cent. But its recovery after a setback caused by labour unrest in the last quarter of 1969, was slower than was expected. After a partial recovery came the energy crisis of 1973/74. In 1975 the balance of payments deficit was reversed and inflation halved but this was accompanied by stagnation and increasing unemployment. In May 1982 the annual rate of inflation stood at 15.5 per cent.

**Currency.**—The unit of currency is the *lira*. (see also p. 83).

**Industry.**—The general index of industrial production (1975=100) stood at 127.8 in 1981. The State-owned sector of Italian industry is important, dominated by the holding companies IRI (mechanical, steel, airlines), ENI (petro-chemicals) and ENEL (electricity).

**Mineral Production.**—Italy is generally poor in mineral resources but since the war deposits of natural methane gas and small deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Other minerals produced in significant quantities include iron ores and pyrites, mercury (over one-quarter of the world production), lead, zinc and aluminium. Marble is a traditional product of the Massa Carrara district. Tobacco is still a Government monopoly.

**Agriculture.**—Agriculture accounted for 6.8 per cent. of gross domestic product in 1978. The agricultural labour force in 1981 was 2,780,000 (13 per cent of total employment), of which 1,753,000 are self-employed.

**Tourist Traffic.**—In 1980 an estimated 20 million foreign tourists visited Italy, and in 1979 foreigners spent an estimated L7,000 bn (\$8.28 m). The net balance on tourism was about L5,500 bn.

**Communications.**—The main railway system is State-run by the *Ferrovie dello Stato*. A network of motorways (*autostrade*) covers the country, built and operated mainly by the IRI State-holding company and ANAS the State highway authority. The *autostrada* network covered 5,176 kms. in 1974. *Alitalia*, the principal international and domestic airline, is also State-controlled by the IRI group. Other smaller companies, including ATI (an *Alitalia* subsidiary) and *Itavia* operate on domestic routes. The Italian mercantile marine total of 8,378,000 tons in December, 1972, compared with 3,500,000 tons before the War.

#### FOREIGN TRADE

The balance of payments current account on a cash basis in Dec. 1981 showed a deficit of L488 bn (£212.2 m) and a cumulative deficit over the whole year of L7,675.3 bn (£3.3 bn).

The main markets for Italian exports in 1980 were West Germany (18.3 per cent), France (15.1 per cent), U.K. (6.1 per cent) and U.S.A. (5.3 per cent). The E.E.C. accounted for 47.5 per cent of exports. Imports came principally from West Germany (16.6 per cent), France (13.9 per cent), U.S.A. (7 per cent) and the

U.K. (4.4 per cent). The E.E.C. provided 43.8 per cent of imports.

#### Trade with U.K.

	1979	1980
Imports from U.K. . . . .	£1,491,266,000	£1,899,000,000
Exports to U.K. . . . .	2,234,692,000	2,311,000,000

**Language and Literature.**—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265–1321; Petrarch, 1304–1374; and Boccaccio, 1313–1375) and in the renaissance during the fifteenth and sixteenth centuries (Ariosto, 1474–1533; Machiavelli, 1469–1527; Tasso, 1544–1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785–1873), Carducci (1835–1907) and Gabriele d'Annunzio (1864–1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1971, there were 85 daily newspapers published in Italy, of which 22 were published in Rome and 10 in Milan.

**Education.**—Education is free and compulsory between the ages of 6 and 14; this comprises five years at primary school and three in the "middle school", of which there are about 8,000. Pupils who obtain the middle school certificate may seek admission to any "senior secondary school", which is roughly equivalent to a U.K. grammar school but may be a lyceum with a classical or scientific or artistic bias, or may be an institute or school for teacher training, or may be an institute directed at technology (of which there are eight different types) or trade or industry (including vocational schools). Courses at the lyceums and technical institutes usually last for five years and success in the final examination qualifies for admission to university. There are 35 State and 14 private universities, some of ancient foundation; those at Bologna, Modena, Parma and Padua were started in the 12th century. University education is not free, but entrants with higher qualifications are charged reduced fees according to a sliding scale. In general, schools, lyceums and universities are financed by local taxation and central government grants.

**CAPITAL.**—Rome. Population of the commune (1981) 2,830,569.

1981 estimates of the population of the communes of the principal cities and towns are Milan, 1,634,638; ♀Naples, 1,210,503; Turin, 1,103,520; ♀Genoa, 760,300; Bologna, 455,853; Florence, 453,293; ♀Palermo, 699,691; ♀Bari, 370,781; ♀Catania, 378,521. 1976 estimates of other towns: ♀Venice, 362,494; ♀Trieste, 267,857; Verona, 271,381; Padua, 242,186; ♀Taranto, 243,750; Brescia, 215,156; Modena, 178,530; ♀Parma, 177,894; ♀Reggio Calahria, 177,883; Leghorn, 177,687; ♀Salerno, 161,645; Ferrara, 155,172; Pisto, 154,362; Foggia, 153,334. Sicily, ♀Messina, 265,318; in Sardinia, ♀Cagliari, 225,812.

**ISLANDS.**—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 9,601. The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,811. The Tuscan Archipelago (including Elba), area 293 sq. km., pop. 31,861; Pontine

Archipelago (including Ponza, area 10 sq. km., pop. 2,515); Flegrean Islands (including Ischia, area 60 sq. km., pop. 51,883); Capri; Eolian Islands (including Lipari, area 116 sq. km., pop. 18,636); Tremiti Islands (area 3 sq. km., pop. 426).

FLAG.—Vertical stripes of green, white and red.

NATIONAL DAY.—June 2.

#### BRITISH EMBASSY

Via XX Settembre 80a, Rome

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir Ronald Arculus, K.C.M.G., K.C.V.O. (1979).

*Minister*, M. K. O. Simpson-Orlebar, C.M.G.

*Minister*, P. S. McLean, O.B.E. (FAO).

*Defence and Military Attaché*, Col. A. A. Julius.

*Naval Attaché*, Capt. E. H. M. Orme.

*Air Attaché*, Group-Capt. K. G. Baynes.

*Counsellors*, T. L. Richardson (*Head of Chancery*); L. C. R. Seeley.

*1st Secretaries*, P. J. Sullivan (*Labour*); J. R. H. Evans (*Administration*); M. J. Richardson; Miss Y. Veale (*Consul*); P. J. Morrice (*Commercial*); M. Ibbotson (*Agriculture*); R. N. Culshaw, M.V.O.; P. R. Nelson (*Information*).

*2nd Secretary*, P. Faulkner.

*3rd Secretaries*, Miss C. M. Redman; P. J. Hughes (*Vice-Consul*); E. B. Ellam; C. Cottam.

*Chaplain*, Rev. Canon D. Palmer.

#### BRITISH CONSULAR OFFICES

There are British Consular Offices at *Milan, Rome, Naples, Genoa, Florence, Venice, Trieste and Cagliari* and a trade representative at *Turin*.

*British Council Representative*, D. J. Sharp, Palazzo del Drago, Via delle Quattro Fontane 20, 00184, Rome.

There are *British Council Offices* at *Milan and Naples*, each with a library.

## IVORY COAST

(République de Côte d'Ivoire)

*President*, Félix Houphouët-Boigny, *elected* for five years in 1960; *re-elected* 1965, 1970, 1975 and 1980.

#### IVORY COAST EMBASSY IN LONDON

2 Upper Belgrave Street, S.W.1  
[01-235 6991]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dieudonné Essienne (1978).

*1st Counsellor*, N' Goran Kouame.

The Ivory Coast is situated on the Gulf of Guinea between 5° and 10° N. and 3° and 8° W. and is flanked on the West by Guinea and Liberia, on the North by Mali and Upper Volta and on the East by Ghana. It has an area of about 127,000 square miles—tropical rain forest in the southern half and savannah in the northern—and a population of 7,000,000 (1979 estimate) divided into a large number of ethnic and tribal groups.

Although official French contact was made in the first half of the 19th century, the Ivory Coast became a Colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The Ivory Coast was a founder member of the *Conseil de l'Entente*, established on May 29, 1959, as a loose union embracing also, without abrogation of sovereignty, Dahomey,

Niger and Upper Volta. Togo also adhered in June, 1966. The official language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 147 members was elected in 1980. The defence of the Constitution which was promulgated on Nov. 3, 1960, is vested in a Supreme Court.

*Finance*.—The unit of currency of the Ivory Coast is the *Franc CFA*. In 1982, the Ivory Coast Budget allocated £800 m. for current expenditure and £550 m. for investment and equipment.

*Trade*.—The principal exports are coffee, cocoa, timber, palm oil, pineapples, bananas, and cotton all of which are exported to the U.K. Diamonds are exported. There are a few deposits of minerals including manganese and iron. Trade in 1981 was valued at: Imports, *Francs CFA* 650.1 bn; Exports, *Francs CFA* 628 bn.

CAPITAL,  $\Psi$ Abidjan (population, 1,700,000) which is also the main port.

FLAG.—3 vertical stripes, orange, white and green.

NATIONAL DAY.—December 7.

#### BRITISH EMBASSY

Immeuble Les Harmonies, B.P. 2581, Abidjan 01.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency M. F. Daly (1978).

## JAPAN

(Nihon Koku—Land of the Rising Sun)

*Emperor of Japan*, His Majesty Hirohito, *born* April 29, 1901; *succeeded* Dec. 25, 1926; *married* (1924) Princess Nagako (*born* March 6, 1903), daughter of the late Prince Kuniyoshi Kuni, and has issue two sons and four daughters.

*Heir-Apparent*, His Imperial Highness Prince Akihito, *Crown Prince*, *born* Dec. 23, 1933; *married* April 10, 1959, Miss Michiko Shoda and has issue Prince Naruhito Hironomiya, *born* Feb. 23, 1960, Prince Fumihito, *born* Nov. 30, 1965 and Princess Sayako, *born* April 18, 1969.

*Prime Minister*, Zenko Suzuki.

*Justice*, Michita Sakata.

*Foreign Affairs*, Yoshio Sakurachi.

*Finance*, Michio Watanabe.

*Education*, Heiji Ogawa.

*Health and Welfare*, Motoharu Morishita.

*Agriculture, Forestry and Fisheries*, Kichiro Tazawa.

*International Trade and Industry*, Shintaro Abe.

*Transport*, Tokusaburo Kosako.

*Posts and Telecommunications*, Noboru Minowa.

*Labour*, Taikihiro Hatsumura.

*Construction*, Ihei Shiseki.

*Home Affairs*, Masataka Seko.

#### JAPANESE EMBASSY AND CONSULATE

43-46 Grosvenor Street, W.1

*Information Centre*: 9 Grosvenor Square, W.1  
[01-493 6030]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Tsuyoshi Hirahara (1982).

*Ministers*, Koji Yamazaki (*Finance*); Susumu Honobe (*Commercial*); Koichi Tsutsumi.

*Counsellors*, Yukio Satoh; Tadashi Masui; Kiyohiko Arafune; Akira Sugino; Naoki Hirano.

*Defence Attaché*, Capt. Mitsunori Kiryu.

*Area and Population*.—Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 128° 6' East and 145° 49' East and between latitude 26° 59' and 45° 31' N., with

a total area of 142,812 square miles and a population (1982) of 118,390,000.

*Japan Proper* consists of *Honshū* (or Mainland), 230,448 sq. km. (88,839 sq. m.), *Shikoku*, 18,757 sq. km. (7,231 sq. m.), *Kyūshū*, 42,079 sq. km. (16,170 sq. m.), *Hokkaido*, 78,508 sq. km. (30,265 sq. m.). Formosa and the Kwangtung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1939-45.

After the unconditional surrender to the Allied Nations (Aug. 14, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

*Vital Statistics.*—The birth rate in 1980 was 13.6 per 1,000 (1947, 34 per 1,000; 1967, 19.7 per 1,000). It has been stated that a considerable part in reducing the birth rate to its present level was played by drastic methods, induced abortion and sterilization, the legal grounds for which had been extended by the Eugenic Law, 1948, to include economic and social hardships. The improving standard of living has also played an important part in keeping the birthrate down.

The death rate in 1980 was 6.2 per 1,000, compared with 17 per 1,000 in pre-war years.

*Physiography.*—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical in the south to cool temperate in the north. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful

rainfall and the rivers are short and swift-flowing offering abundant opportunities for the supply of hydro-electric power.

*Government.*—According to Japanese tradition, Jimmu, the First Emperor of Japan, ascended the throne on Feb. 11, 660 B.C. Under the constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "*Meiji Constitution*" of 1889, and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The Conservatives have governed Japan almost without interruption since World War II. Since 1955, when it was formed, the Liberal Democratic Party has maintained an absolute majority in the House of Representatives, though it had been gradually declining, until it regained its clear superiority in the election on June 22, 1980. The present strength of the parties in the House of Representatives is: Liberal Democratic Party, 287; Japan Socialist Party, 105; Komeito, 34; Democratic Socialist Party, 33; Japan Communist Party, 29; New Liberal Club, 11; Minor Parties and Independents, 12.

The House of Councillors whose powers are subordinate to the House of Representatives, re-elects half of its members every three years. In January, 1981, the strength of the Parties was: Liberal Democratic Party, 134; Japan Socialist Party, 47; Komeito, 27; Japan Communist Party, 12; Democratic Socialist Party, 11; Minor Parties and Independents, 17, vacant, 4.

*Agriculture and Livestock.*—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. The forest land includes *Cryptomeria japonica*, *Pinus massoniana*, *Zeikowaskeaki*, and *Paulownia imperialis*, in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. The tobacco plant, tea shrub, potato, rice, wheat and other cereals are all cultivated: rice is the staple food of the people, about 10,259,000 metric tons being produced in 1981. The floral kingdom is rich, beautiful and varied. Fruit is abundant, including the mandarin, persimmon, loquat and peach; European fruits such as apples, strawberries, pears, grapes and figs are also produced.

*Minerals.*—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

*Industry.*—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including automobiles, electronics, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1981 (average) was 57,070,000, of which 1,260,000 were unemployed. Of the total labour force, some 50,710,000 were engaged in non-agricultural industries, 5,100,000 in agriculture, forestry and fisheries.

*Communications.*—There were 26,866 kilometres of Government and private railroad (steam and electric) in March, 1981. The merchant fleet (ocean-

going ships over 3,000 tons gross) consisted of 1,079 vessels totalling 34,149,000 tons gross in March, 1981.

**Armed Forces.**—After the unconditional surrender of August, 1945, the Imperial Army and Navy were disbanded and disbanded.

Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being in August, 1950, and a Maritime Safety Force was established in April, 1952. In August, 1952, these Forces were renamed the National Safety Force and the Coastal Safety Force and were placed under a National Safety Agency. In July, 1954, the Agency was renamed the Defence Agency, the Forces under it the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force was created. At the same time the mission of the forces was extended to include the defence of Japan against direct and indirect aggression.

A Treaty of Mutual Co-operation and Security between Japan and the U.S.A. was signed in January, 1960, replacing an earlier Security Treaty signed in 1951 at the same time as the Peace Treaty. By this Treaty each country recognized that an armed attack against either in the territories under the administration of Japan would be dangerous to its own safety and declared that it would act to counter the danger.

The defence budget allocated for the fiscal year 1982–83 amounted to Yen 2,600 billion, equivalent to 0.93 per cent of Japan's Gross National Product, or 5.2 per cent of the total budget. The authorized uniformed strength was: Ground Self-Defence Force (GSDF) 180,000 (Reserve 41,600); Maritime Self-Defence Force (MSDF) 45,200 (Reserve 600); Air Self-Defence Force (ASDF) 46,200. Actual strength of the GSDF is slightly below their authorised figure.

In 1981 the GSDF was organized into five regional Armies, totalling thirteen Divisions, one of which had recently been reorganized as an Armoured Division. Of the Infantry Divisions, seven have an authorized strength of 9,000 (four combat groups) and five 7,000 (three combat groups). Major equipment includes 850 tanks, 540 APC's, 890 towed and SP guns, 8 groups of Hawk AA missiles, and 350 aircraft. Equipment is now largely manufactured in Japan.

The MSDF has 162 warships and auxiliaries including four DDH, three TARTAR-equipped GMDs, 42 destroyers, 14 submarines and 99 others, 205 fixed-wing aircraft and 97 helicopters.

The ASDF has 800 aircraft (160 F104-J, 110 F4E-J, 59 x F.1, 14 RF4E, 380 trainers T-34, Fuji T-1, T-33; 41 transports and 56 support aircraft including helicopters). There are 6 groups of Nike SAM missiles.

All three SDF are carrying out major re-equipment programmes. The ASDF has already taken delivery of the domestically produced F-15J and is due to receive U.S. built E2C AEW aircraft. The MSDF is to have P3C's which will also be built under licence. In addition, it is to have new classes of DD and DE equipped with Rolls-Royce gas turbine engines.

**Religion.**—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 2 archbishops and 16 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 11 Japanese bishops (1978) and is an autonomous branch of the Anglican communion. There is also a United Protestant Church. About 1 per cent of Japanese are Christians.

**Education.**—Under the Education Law of 1948 education at elementary (6 year course) and lower secondary (3 year course) schools is free, compulsory and co-educational. The (3 year) upper secondary schools are attended by 93 per cent of the age group. They have courses in general, agricultural, commercial, technical, mercantile marine, radio-communi-

cation and home-economics education, etc. 37.4 per cent of upper secondary school leavers went on to higher education in 1981. There are 2 or 3 year junior colleges and 4 year universities. Some of the 4 year universities have graduate schools. In May 1981 there were 974 universities and junior colleges, 128 state maintained, 86 local authority maintained and 760 privately maintained. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaido (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

**Language and Literature.**—Japanese is said to be one of the Uro-Altai group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when Chinese characters came into use. Japanese who have received school education (99.8 per cent of the population) can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is taught in all middle and high schools and universities. By 1981, the number of public libraries was 1,399 with 69,102,557 volumes. In addition there are 920 university libraries with 113,171,629 volumes. There are 125 daily newspapers in Japan. Japan's total newspaper circulation was estimated at 47,256,150 copies and 1.30 per household at the end of 1981.

#### FINANCE

The Budget for the financial year 1982–83, ending on March 31, was initially estimated at Yen 49,680,800,000 for revenue and expenditure on the general account, an increase of 6.2 per cent over the preceding financial year.

For rate of exchange see also p. 83.

#### PRODUCTION AND TRADE

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports in 1981 consisted of mineral oils (50.6 per cent), raw materials (14.0 per cent) e.g. metal ores and scrap, 5.1 per cent, timber, 3.1 per cent; raw cotton, 1.0 per cent; and soya beans (1.0 per cent), foodstuffs (11.1 per cent) (e.g. wheat and sugar), machinery (7.1 per cent), chemicals (4.5 per cent) and textiles (2.4 per cent). Principal exports consist of steel (11.0 per cent), ships (4.8 per cent), automobiles (17.4 per cent), electric machinery and appliances (14.8 per cent), non-electric machinery (14.9 per cent), chemicals (4.5 per cent) and textile goods (4.7 per cent).

#### FOREIGN TRADE

	1980 (\$1,000)	1981 (\$1,000)
Total imports .....	140,527,652	143,289,675
Total exports .....	129,807,025	152,030,247

#### Trade with U.K.

	1980 (\$1,000)	1981 (\$1,000)
Imports from U.K. ....	£1,954,385	£2,694,452
Exports to U.K. ....	3,781,876	4,789,225

**CAPITAL.**—**TOKYO.** Population, 11,648,378. The other chief cities had the following populations:  $\Psi$ Osaka (2,629,395);  $\Psi$ Nagoya (2,081,465);  $\Psi$ Yokohama (2,817,479); Kyoto, the ancient capital (1,469,891);  $\Psi$ Kobe (1,376,759); Kita-Kyushu (1,065,512);  $\Psi$ Sapporo (1,439,554);  $\Psi$ Kawasaki (1,047,284);  $\Psi$ Fukuoka (1,109,344).

**FLAG.**—White, charged with sun (red).  
Yokohama, by sea via Suez Canal, 11,072 miles (30 days); via Panama, 12,544 miles (27 days); Tokyo, by air (British Airways polar route), 8,382 miles distant

from London: transit, 17 hrs.; British Airways trans-Siberia route (13 hrs.).

## BRITISH EMBASSY

(No. 1 Ichiban-cho, Chiyoda-ku, Tokyo)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir Hugh Cortazzi, K.C.M.G. (1980).

*Minister*, J. S. Whitehead, C.M.G., C.V.O.

*Counsellors*, D. J. Wright (*Economic*); J. W. Hodge (*Commercial*); C. R. D. Elston (*Financial*); R. P. Martin, M.B.E. (*Cultural*); A. P. F. Bache (*Head of Chancery*); E. Williamson, O.B.E. (*Atomic Energy*).

*1st Secretaries*, P. W. Denison-Edson; D. E. Love (*Economic*); K. C. James; W. J. A. Buckley (*Administration*); G. J. B. Williams; P. S. Dimond (*Commercial*); M. P. Barrett (*Cultural*); R. P. Hamilton; Dr. M. D. Rogers (*Scientific*); D. W. F. Warren-Knott (*Consul*); A. F. Pinnell (*Information*).

*2nd Secretaries*, S. J. Plater; N. K. Darroch; A. T. MacDermott; B. R. Jones; S. N. Crow (*Commercial*); W. R. Charlesworth; R. C. B. Jones; Miss P. L. D. Byrde (*Vice-Consul*); G. Thom; O. J. Traylor (*Economic*).

*3rd Secretaries*, B. G. Farnham; P. MacDonald. *Attaché*, R. W. Barnett (*Information*); Miss P. A. Seaward; C. P. Winnington-Ingram.

*Defence and Military Attaché*, Col. M. R. Grove.

*Naval Attaché*, Capt. M. Forrest, R.N.

*Air Attaché*, Gp. Capt. J. M. Curry, R.A.F.

There is a British Consulate-General at *Osaka* and an Honorary Consulate at *Kita Kyushu*.

## JORDAN

(The Hashemite Kingdom of The Jordan)

*King of the Jordan*, Hussein, G.C.V.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age.

*Crown Prince*, Prince Hassan, third son of King Talal of Jordan, born 1948, appointed *Crown Prince*, April 1, 1965.

## CABINET

*Prime Minister and Minister for Defence*, Mudar Badran.

*Labour*, Dr. Jawad Anani.

*Information*, Adnan Abu Odeh.

*Education*, Dr. Sa'id Tell.

*Finance*, Salem Masa'deh.

*Public Works*, Awni Masri.

*Agriculture*, Marwan Dudin.

*Minister of Awqaf*, Kamel Sharif.

*Transport (and Minister of State for Prime Ministry Affairs)*, Ali Suheimat.

*Interior*, Ahmed Obeidat.

*Justice*, Ahmad Abdul Karim Tarawneh.

*Health*, Dr. Zuhair Malhas.

*Communications*, Dr. Mohammad Adoub Ziben.

*Culture and Youth, and Tourism and Antiquities*, Maan abu Nuwar.

*Industry and Trade*, Walid Asfour.

*Supply*, Ibrahim Ayyoub.

*Municipal, Rural and Environmental Affairs*, Hasan Momani.

*Social Development*, Mrs. In'am Mufti.

*Minister of State*, Hikmat Saket (*Prime Ministry Affairs*).

*Foreign Affairs*, Marwan Qasem.

*Affairs of the Occupied Land*, Hassan Ibrahim.

## JORDANIAN EMBASSY

6 Upper Phillimore Gardens, W.8.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency, Ibrahim Izziddin.

*Minister Plenipotentiary*, Mazin Nashashibi.

*Defence Attaché*, Brig. Mahmoud Hammad Salem.

*Service Office*: 16 Upper Phillimore Gardens, W.8. (01-937-9611).

*Area and Population*.—The Kingdom, which covers 37,700 sq. miles, is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. Since the hostilities of June, 1967, that part of the country lying to the west of the Jordan River has been under Israeli occupation. The majority of the population are Sunni Moslems and Islam is the religion of the State. Total population is 2,150,000 (Jordanian census, Nov. 1979). (*For MAP*, see p. 859).

*History and Government*.—After the defeat of Turkey in the First World War the Amirate of Transjordan was established in the area east of the River Jordan as a state under British mandate. The mandate was terminated after the Second World War and the Amirate, still ruled by its founder, the Amir Abdullah, became the Hashemite Kingdom of Jordan. Following the 1948 war between Israel and the Arab States, that part of Palestine remaining in Arab hands (but excluding Gaza) was incorporated into the Hashemite Kingdom. King Abdullah was assassinated in 1951; his son Talal ruled briefly but abdicated in favour of the present King, Hussein, in 1952. All of Jordan west of the River has been under Israeli occupation since 1967. As a result of the wars of 1948 and 1967 there are about 750,000 refugees and displaced persons living in East Jordan, about 200,000 of whom live in refugee and displaced persons camps established by the U.N. Relief and Works Agency (UNRWA). In addition there are some 300,000 entirely self-supporting Palestinian members of the East Jordanian community. It was largely among the refugee population that the Palestinian *fedayeen* (commando) movement which had come into existence some years earlier grew considerably in strength during 1969 and 1970. The *fedayeen* organizations conducted a number of operations against Israel but during 1970 came more and more into conflict with the Jordanian Government. After the civil war between the Jordan Army and the *fedayeen* the Jordan Government re-established its authority. The *fedayeen* were finally expelled from Jordan in the summer of 1971.

The present constitution of the Kingdom came into force in 1952. It provides for a senate of 30 members (all appointed by the King) and an elected House of Representatives of 60 persons. Half of the constituencies of the latter are on the West Bank and since the Israeli occupation of this area in 1967 it has not been possible to hold elections. For a time membership of the House continued on the basis of pre-1967 membership but was eventually suspended in 1976. In May 1978 a National Consultative Council was set up, composed of 60 members appointed by the King, and in May 1982 the membership was increased to 75. A new N.C.C. was appointed in May 1980. The King himself appoints the members of the Council of Ministers. Crown Prince Hassan normally acts as Regent when King Hussein is away from Jordan. Following the Arab summit meeting at Rabat in October 1974, and the U.N. General Assembly in November, at which the Palestinian Liberation Organization achieved recognition as the sole legitimate representative of the Palestinian people, King Hussein took measures to amend the 1952 constitution to take account of the resultant change in the status of the West Bank in relation to the administration of Jordan east of the river.

**Production and Industry.**—West Jordan is fertile, though many areas have suffered from soil erosion. In East Jordan the main agricultural areas are the east part of the Jordan Valley, the hills overlooking the Valley and the flatter country to the south of Amman and around Madaba and Irbid. The rest of the country is desert and semi-desert. The principal crops are wheat, barley, vegetables, olives and fruit (mainly grapes and citrus fruits). Agricultural production in the Jordan Valley has increased considerably in recent years due to the extension of the East Ghor Canal and the King Talal Dam. The only important industrial product is raw phosphates (production 1981: 4,200,000 tons), most of which is exported. There are schemes under construction for the production of potash and phosphate fertilizers. Tourism has recovered fast since the Israeli occupation of the West Bank in 1967. International-class hotels have been built to cater for the tourists visiting the archaeological sites of East Jordan and the resort of Aqaba, and for businessmen visiting Jordan or stopping en route to Baghdad. The Trans-Arabian oil pipeline (Tapline) runs through North Jordan on its way from the eastern province of Saudi Arabia to the Lebanese coast of Sidon. A branch pipeline feeds a refinery at Zerqa (production 1981: 2,125,873 tons) which meets most of Jordan's requirements for refined petroleum products.

**Communications.**—The trunk road system is good. Amman is linked to Damascus, Baghdad and Jeddah by tarred roads which are of considerable importance in the overland trade of the Middle East. The former Hejaz Railway enters Jordan east of Ramtha and runs through Zerqa and Amman to Ma'an with a spur to the top of the Raz al-Naqb escarpment. The formerly abandoned section from Ma'an to Medina in Saudi Arabia is being studied and redesigned by consultants. A total of 1,744 vessels called at Aqaba in 1981 and 9,334,748 tons of cargo were handled. Much of Jordan's trade moves overland to and from the ports in Syria and Lebanon. The Royal Jordanian Airline (ALIA) operates from Amman Airport to other cities in the Middle East and Gulf area, to most major European cities, to New York, and to Bangkok in the Far East. There is also a service to the airport at Aqaba.

## KOREA

Korea is situated between 124° 11' and 130° 57' E. long., and between 33° 7' and 43° 1' N. lat. It has an area of 85,256 sq. miles with an estimated population of about 54,000,000, of whom about 37,600,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Cheju.

**History.**—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R., the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea, an office which he held until 1960. On August 15, 1948, the Republic was formerly inaugurated and American Military Government came to an end.

Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang; a Supreme People's Soviet was elected in September 1948, and a Soviet-style Constitution adopted.

*The Korean War.*—The country remained effectively divided into two along the line of 38th parallel until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. An emergency meeting of the U.N. Security Council adopted a Resolution calling for an immediate cease fire and the withdrawal of North Korean forces. This was ignored and the communist advance continued. In response to Security Council recommendations that United Nations members should furnish assistance to repel the attack, 16 nations including the U.S.A. and the U.K. came to the aid of the Republic of Korea. However the communist advance could not be contained until eventually a front was established around Pusan. Later, following a successful U.S. marine landing at Inchon, the communist forces were driven beyond the 38th parallel. At this point the Chinese "volunteers" joined the campaign and although the U.N. forces were initially driven back beyond Seoul they regrouped and threw the communist forces back to approximately the old dividing line. The fighting was ended by an Armistice Agreement signed by the U.N. Commander-in-Chief and the Commander of the North Korean army and the Chinese People's "volunteers" on July 27, 1953. By this Agreement (which was not signed by the Government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea in 1954, but failed to agree on measures for re-unifying the country.

## Republic of Korea

*President*, Chun Doo Hwan (August, 1980).

*Prime Minister*, Yoo Chang-soon (1982).

KOREAN EMBASSY  
4 Palace Gate, W.8  
[01-581 0247]

*Ambassador Extraordinary and Plenipotentiary*, His

Excellency Dr. Young Hoon Kang (1981).

*Minister*, Chong-Ha Yoo.

*Counsellors*, Hak-Sung Lee; Nake Chun Choi; Sung-Wuk Huh.

*Defence Attaché*, Col. Song Kyu Kim.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites.

President Syngman Rhee was overthrown by a popular rising in 1960. After a year of unstable government a new regime was set up on May 16, 1961 by an army officers' *coup* led by Major General Park Chung Hee. On March 22, 1962 he took over as acting President. He was elected President in December 1963 and again in 1967, 1971, 1972 and 1978.

President Park was assassinated by the head of the Korean Central Intelligence Agency, Kim Jae Kyu, on October 26, 1979. The country was placed under partial martial law. The then Prime Minister Choi

Kyu Hah was elected President that December but resigned in August 1980 to be succeeded by Gen. Chun Doo Hwan. The constitution was revised and new elections held. President Chun was re-elected and his Democratic Justice Party gained majority in the National Assembly after elections in March 1981.

*Constitution.*—The Constitution was revised in 1980. The President, who is Head of State, Chief of the Executive and Commander-in-Chief of the Armed Forces, is indirectly elected for a single term of seven years by an electoral college of over 5,000 members, who are directly elected. He appoints the Prime Minister with the consent of the National Assembly, and members of the State Council on the recommendation of the Prime Minister. The President is also empowered to take wide-ranging measures in an emergency, including the declaration of martial law, but must obtain the agreement of the National Assembly.

The National Assembly is directly elected for a four year term, one third by proportional representation, two thirds from constituencies. The Assembly's powers include legislation, decision on the Budget, and approval of the Prime Minister and members of the State Council.

*Armed Forces.*—The Republic of Korea has an army of about 520,000, a small navy mostly for coastal patrol and protection duties, an air force with 362 combat aircraft and a marine corps which is incorporated in the navy. About six per cent of the nation's G.N.P. is currently spent on defence.

*Language and Literature.*—Despite the great cultural influence of the Chinese, Koreans have developed and preserved their own cultural heritage. The Korean language is of the Ural-Altaic Group. Its script, Hangul, was invented in the 15th century; prior to this Chinese characters alone were used. Also invented around this time was the first metal movable printing type. The first works translated into Hangul were Buddhist, Confucian and other classics and it was only in the late 19th century that the European influence first began to be felt.

*Education and Religion.*—Primary education is compulsory for six years from the age of seven. Secondary and Higher education is extensive. The national illiteracy rate is the lowest in Asia. There is freedom of religion. Buddhism has the most followers (13 million) followed by Protestantism (5 million) and Confucianism (4½ million). Catholics numbered just over one million in 1977.

*Agriculture and Fisheries.*—The soil is fertile but the arable land is limited by the mountainous nature of the country. Staple agricultural products are rice, barley and other cereals, beans, tobacco and hemp. Fruit growing and sericulture are also practised. Ginseng, a medicinal root much used by both the Chinese and Koreans, forms a useful source of revenue. In recent years tobacco has become an important crop. The Korean fishing industry is a major contributor to both food supply and exports.

*Finance.*—The unit of Korean currency is the Won. The budget for 1981 totals U.S.\$11.6 billion of which U.S.\$4 billion is for defence and U.S.\$2.8 billion is for social development.

*Trade and Industry.*—Since the beginning of 1962 a series of successful five-year plans has resulted in real economic growth averaging 10 per cent a year until 1979. In 1980 the annual per capita G.N.P. was U.S.\$1,522. Total imports in 1980 were U.S.\$22,160 million and exports U.S.\$17,505 million.

Until the 1960's the Republic of Korea's economy was mainly agricultural. But in 1980, 28.6 per cent of exports were textile goods, 13 per cent electrical goods and 11 per cent iron and steel. Important exports include cars, electrical and electronic equipment, footwear, ships, railway rolling stock and iron and steel products.

## TRADE

	1979
Imports .....	\$22,160,000,000
Exports .....	17,505,000,000

Foreign exchange holdings in 1980 were U.S.\$6,563 million.

## Trade with U.K.

	1980
Imports from U.K. ....	£101,103,000
Exports to U.K. ....	244,583,000

**Minerals.**—The Republic of Korea is deficient in mineral resources, except for deposits of coal on the East Coast and tungsten. There are some prospects of discovering oil in the sea between Korea and Japan.

**Communications and Transport.**—Modern highways mean that the whole country is now within one day's drive of Seoul. In 1980 there were 15,599 km. of paved road. Seoul has a subway system and there are national railway and airline systems. Korean Air Lines operates regular flights to Europe, the United States, the Middle East and South East Asia. Pusan and Incheon are the major ports with Pusan serving the industrial areas of the southeast. Incheon, 28 miles from Seoul, serves the capital, but development and operation at Incheon are hampered by a tidal variation of 9–10 metres.

**CAPITAL.**—Seoul, population (1980), 8,367,000. Other main centres are ΨPusan (pop. 3,160,000), Taegu (pop. 1,607,000) and ΨInchon (pop. 1,084,000).

**FLAG.**—White, with red over blue device in centre, three black parallel bars, some broken, in each quarter.

**NATIONAL DAY.**—August 15 (Independence Day).

BRITISH EMBASSY  
Seoul

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John Albert Leigh Morgan.

*Counsellor*, E. J. Field (*Commercial*).

*Defence and Military Attaché*, Brig. B. S. Burditt.

*1st Secretaries*, Dr. J. E. Hoare (*Head of Chancery and Consul*); D. V. Thornley (*Commercial Information*).

*Cultural Attaché*, Dr. W. A. Barr (British Council Representative). There is an Honorary British Consul at Pusan.

## North Korea

*Political Committee of the Central Committee*, Kim Il-sung; Kim Il; O Chin-u; Kim Chong-il; Yi Chong-ok (*full members and members of the presidium*); Pak Song-chol; Yim Chun-chu; So Chol; O Paek-yong; Kim Chung-nin; Kim Yong-nam; Chon Mun-sop; Kim Hwan; Yun Hyong-muk; O Kuk-yol; Kang Song-san; Paek Hak-nim (*full members*). Ho Tam; Yun Ki-pok; Choe Kwang; Cho Seung; Choe Chae-u; Kong Chin-tae; Chong Chun-ki; Chong Kyong-hui; Choe Yong-nim; So Yun-sok; Yi Kun-mo; Hyon Mu-kwang; Kim Kang-hwan; Yi Son-il; Kye Ung-tae; Kang Hui-wou; Hong Song-nam (*alternate members*).

*Secretariat of the Central Committee*, Kim Il-sung (*General Secretary*); Kim Chong-il; Kim Chung-nin; Kim Yong-nam; Kim Hwan; Yon Hyong-muk; Yun Ki-pok; Hwang Chang-yop; Hyon Mu-kwang; Ho Chong-suk; So Kwan-hui.

The population (1982) of North Korea is around 18,000,000. The capital is Pyongyang with approximately 1,500,000 inhabitants. North Korea is rich in minerals and a 7-year plan for 1978–84 gives priority

to the fuel and mining industries. In 1981 the army was believed to number about 650,000 men.

**FLAG.**—Broad red horizontal band bordered by white lines bearing a five-point red star on a white disc in centre; blue horizontal bands at top and bottom.

KUWAIT EMBASSY IN LONDON  
45–46 Queen's Gate, S.W.7.  
[01–589 4533]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Ghazi M. A. Al-Rayes (1980).

**Area and Population.**—Kuwait extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 7,500 square miles and a population (1982) of 1,562,000. It is officially estimated that about 38.9 per cent of this total are Kuwaitis, the remainder being large numbers of other Arab peoples, Persians, Indians and Pakistanis. The total European and American population is about 12,500. Kuwait has a hot, dry climate with a summer season extending from April to September. During the coldest month (January) the temperatures can fall below freezing, but normally range between 50° to 60° F. Shade temperatures are about 85° F.; and can reach 130° F.; 180° F. has been recorded in the sun. Humidity rarely exceeds 60 per cent except in July and August.

**Government.**—Although Kuwait had been independent for some years, the "exclusive agreement" of 1899 between the Shaikh of Kuwait and the British Government was formally abrogated by an exchange of letters dated June 19, 1961. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait and, in accordance with the terms of the exchange, the Amir requested British military assistance to help him maintain his sovereignty and independence, which was immediately supplied. British troops were withdrawn in October, 1961, and replaced by the Arab League Security Force composed of contingents from various Arab States. The withdrawal of this Force was completed in January, 1963. On May 7, 1963, Kuwait was admitted to the United Nations and on Oct. 4, 1963, Iraq recognized Kuwait's independence although the Kuwait-Iraqi border has not yet been determined formally. The 1961 defence agreement with the United Kingdom ended on May 13, 1971.

Elections were held in December, 1961, for a Constituent Assembly, which first met in January, 1962 and a council of Ministers including non-members of the ruling family was also formed. Under the Constitution drafted by the Constituent Assembly, the first 50-member National Assembly was elected in January, 1963. The fifth National Assembly was elected for a four year term in February, 1981 after a four year period of rule by Amiri decree following the suspension of the constitution in 1976.

**Education, etc.**—As a result of the very considerable oil revenues, the Kuwait Government embarked

on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. Kuwait University was opened in 1966. In 1979 there were over 286,561 pupils at 457 government schools.

**Public Utilities.**—Kuwait has a domestic water supply from water distillation plants which operate on natural gas from the oil fields. These plants can produce over 100,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. There are also two 7,500,000 gallon reservoirs at Shuaiba and two of similar capacity at Abraq Kheitan, with 20,000,000 gallon storage capacity in water towers. Total water storage amounts to over 193 million gallons.

In 1961 a natural source of fresh water was discovered at Raudhatain in the north of the State. This has been developed to produce up to 3,000,000 gallons per day for at least 20 years and a pipeline has been built to carry the water to Kuwait town. Kuwait signed an agreement with Iraq on Feb. 11, 1964, allowing her to draw up to 120,000,000 gallons of sweet water a day from the Shatt-al-Arab, but this has yet to be implemented. Electricity is produced by four power stations in Kuwait (Shuwaikh, 324 MW; Shuaiba North, 400 MW; Shuaiba South, 800 MW; Doha East, 1,050 MW; Doha West, 2,400 MW). The State is served by a network of dual carriageway roads and more are under construction.

**Communications.**—Ships of British, Dutch, Kuwaiti and other lines make regular calls at Kuwait. Several international and Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Telecommunications, and postal services are conducted by the Kuwait Government, which has built an earth satellite station.

**Finance.**—Banking is carried out by the National Bank of Kuwait, the Commercial Bank, the Gulf Bank, the Al Ahli Bank, the Burgan Bank, the Bank of Bahrain and Kuwait, and by the Bank of Kuwait and the Middle East. There are also a large number of investment banks in some of which the Government holds equity. The banking system is controlled by the Central Bank of Kuwait.

Revenue for the financial year 1982-83 was budgeted at KD3,206 million. Estimated total expenditure for the same year was KD3,518 million. The financial year begins on July 1.

**Production and Trade.**—Until 1974, the Kuwait Oil Company was wholly owned by the British Petroleum Company and the American Gulf Oil Corporation. The Government of Kuwait then began to participate by stages in the ownership of the Company and an agreement was signed in November 1975 which brought 100 per cent government ownership. The Kuwait National Petroleum Company was established by Amiri Decree in October 1960 and in June 1961 took over the distribution of petroleum products in Kuwait from the K.O.C. A reorganisation of the national oil industry in 1980 caused all the business of the K.O.C and the K.N.P.C. to be taken over by the Kuwait Petroleum Corporation, the national co-ordinating body for the whole industry of which the Minister of Oil is the Chairman. The Corporation is broken down into various companies responsible for crude oil products, refinery and gas plants, exploration and production, tanker operations, etc. The capital of K.P.C. was increased in 1982 to KD2,500 million to finance refinery modernisation and further overseas acquisitions.

The centre of Kuwait oil production is at Burgan, south of Kuwait City. Oil is exported through a specially constructed port at Mina al Ahmadi. Production of crude oil in 1981 was approximately

418 million barrels, current daily production being 1-14 million barrels. About 3,000 people are employed, including Kuwaitis, British, Americans, Indians, Pakistanis and citizens of other Arab Countries.

Oil is also lifted in the Kuwait/Saudi Arabia Partitioned Zone (Wafra) south of the State. Wafra's production in 1979 (i.e. Kuwait's share) was approximately 30 million barrels.

Oil was found in Kuwait/Saudi Arabia Partitioned Zone offshore sea-bed in 1960 and shipment of crude oil began in March 1961; production in 1980 was 100 million barrels. A concession covering the offshore area of Kuwait proper was awarded in November 1960. Exploratory drilling began in 1962 but was suspended in the autumn of 1963.

In addition to petroleum products, wooden prefabricated office accommodation, skins and wool are also exported. Trade in 1980 amounted to: Imports, KD1,764,900,000; Exports (including re-exports), KD5,519,600,000. The U.K. is Kuwait's third largest supplier of imports.

## LAOS

### (People's Democratic Republic of Laos)

*President*, Souphanouvong, *assumed office*, Dec. 2, 1975.

*Prime Minister*, Kaysone Phomvihane.

#### EMBASSY IN LONDON

5 Palace Green, W.8

*Ambassador Extraordinary and Plenipotentiary* (vacant).

*Chargé d' Affaires*, Thongkhoun Sengphachanh.

**Position and Extent.**—The People's Democratic Republic of Laos is in the northerly part of Indo-China, lying between China and Vietnam, on the north and east, and Burma and Thailand on the west. Laos has a common boundary with Cambodia to the south. The area of the country is approximately 90,000 sq. miles, with a population (estimated, 1976) of about 3,000,000.

**History.**—The Kingdom of Lane Xang, the Land of a Million Elephants, was founded in the 14th century, but broke up at the beginning of the 15th century

into the separate kingdoms of Luang Prabang and Vientiane and the Principality of Champassac, which together came under French protection in 1893. In 1945 the Japanese executed a *coup de force* and suppressed the French administration. Under a Constitution of 1947 Laos became a constitutional monarchy under King Sisvang Vong of the House of Luang Prabang, and an independent sovereign state in 1949.

The next twenty-five years in Laos were marked by power struggles and civil war. International conferences were held in Geneva in 1954 and 1961–2 to produce a settlement based on neutrality and independence. But the resulting Coalition Governments were short-lived. Personalities involved include the present adviser to the Government, Prince Souvanna Phouma, who in 1957 formed a Government of National Union, including *Pathet Lao* (Communist) ministers, and held office as Prime Minister with intervals from 1962 to 1975; Prince Boun Oum of Champassac who formed a rightist Government in December 1960, fled Laos in 1975 and was consequently condemned to death, and Prince Souphanouvong (now President of the Republic), who took part in a later coalition with Souvanna Phouma and Boun Oum in 1962–63.

*Recent Events.*—After 1967 North Vietnamese forces steadily increased their military activities in Laos. Although there were regular seasonal fluctuations in the fighting, which resulted in many areas of the country changing hands several times, Government forces gradually lost ground. By February 21, 1973, when a ceasefire agreement was signed in Vientiane between the *Pathet Lao* and the Government in Vientiane, Communist forces had occupied or dominated most of the strategic areas of Laos, including the Plain of Jars in the north, and the Bolovens Plateau in the south.

After the fall of Saigon in April 1975, internal resistance to the *Pathet Lao* crumbled; Communist troops occupied the whole country and, though still paying lip-service to the 1973 Agreement and maintaining a façade of coalition, the *Pathet Lao* took over the government and began to implement an authoritarian régime with policies of austerity and economic self-sufficiency. On December 2, 1975, following the abdication of the King, Laos was declared a People's Democratic Republic and the *Pathet Lao* assumed full charge of the country.

*Economy.*—There is no significant industrial base in Laos, an estimated 85% of the work force being engaged in agriculture, largely concerned with rice cultivation. Rice production in 1981 amounted to over 1 million tonnes, thus rendering the country theoretically self-sufficient in this staple food.

The main exports are electricity, timber and coffee, the total value in 1980 being \$30.5 m. Imports during 1980 amounted to \$109.3 m., the items of greatest value being petroleum products, machinery and raw materials. Export figures for 1981 are estimated to total \$45 m., of which electricity accounted for some \$30 m. Clearing agreements have been signed with certain socialist countries and the trade gap is largely financed by foreign aid, of which some 60% is provided by socialist countries.

Laos' economic performance so far has been poor and shows no signs of early recovery, the free market rate for the dollar is currently more than double the official rate and prices of consumer items continue to increase.

*Finance.*—In January 1980 a "new" *Kip* replaced the former currency.

*CAPITAL.*—Vientiane, population (estimated 1978) 90,000.

*FLAG.*—Blue background with a central white circle, framed by 2 horizontal red stripes.

*NATIONAL DAY.*—December 2.

*Ambassador Extraordinary and Plenipotentiary, and Consul-General.* His Excellency William B. J. Dobbs.

*3rd Secretary,* R. A. Coleman.

## LEBANON

*President of the Republic of Lebanon,* Amin Gemayel, elected, Sept. 21, 1982.

LEBANESE EMBASSY IN LONDON  
21 Kensington Palace Gardens, W.8  
(01-229 7265)

*Ambassador Extraordinary and Plenipotentiary,* His Excellency Dr. Khalil Makkawi (1978).  
*1st Secretary,* Marwan Tarsissi.  
*Attaché (Tourism),* Mounir El-Sheikh.  
*Consular Section,* 15 Palace Gardens Mews, W.8 (01-727 6696)

*Area and Population.*—Lebanon forms a strip about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Israel frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, from which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses. The total area of Lebanon is about 4,300 sq. miles, population (1974), 2,780,000. (*For MAP, See p. 859.*)

*Government.*—Lebanon became an independent State on Sept. 1, 1920, administered under French Mandate until Nov. 26, 1941. Powers were transferred to the Lebanese Government from Jan. 1, 1944, and French troops were withdrawn in 1946.

In April 1975, serious fighting broke out in Beirut between members of the predominantly Christian Phalangist Party and Palestinian guerrillas based in Lebanon. After a renewed outbreak of violence on June 24, the country was on the verge of civil war. On June 30, a new multi-denominational cabinet was formed with the sole intention of restoring peace.

However, the government was powerless to stop the fighting which continued and increased throughout 1975 and 1976. In the autumn of 1976 the Arab Deterrent Forces composed mainly of Syrian troops, imposed an effective ceasefire and brought nineteen months of civil war to an end throughout Lebanon. In the south a United Nations force acts as a buffer between the Lebanon and Israel, and between Palestinians and a pro-Israeli Lebanese militia. Major bouts of fighting took place in October 1978 and April/May 1981, interspersed with regular clashes on a smaller scale. There was renewed fighting in the summer of 1982 when Israeli forces invaded the country, penetrating as far as Beirut. Following negotiations, Palestine Liberation Organisation guerrillas left Lebanon for various Arab countries.

*Production.*—Fruits are the most important products and include citrus fruit, apples, grapes, bananas

and olives. There is a considerable amount of light industry, mostly for the production of consumer goods, but most factories have been operating below capacity since 1975. The most important industries are foods and drinks, textiles, chemicals, furniture, plastics, leather, clothing and footwear, refrigerators, cast and forged metal products, and building materials. Much of this is exported to neighbouring Arab countries. There is little remaining of the famous cedars of Lebanon.

**Railways.**—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with a branch of the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotcheh. A standard gauge railway also runs up the coast from Nakowia to Tripoli. The railways are not functioning as a result of the 1975-6 civil war.

**Archæology, etc.**—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of first to third century Roman temples and Jubail (Biblos), one of the oldest continuously inhabited towns in the world, and ancient Tyre.

**Language and Literature.**—Arabic is the principal language (see Arabia), and French is also an official language and widely used. The use of English is also wide-spread.

**Education.**—There are five universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University, the Beirut University College and the Arab University which are recent foundations in the early stages of development. There are several institutions for vocational training, some of which have been rendered inoperative by the civil war, and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

**Finance.**—Revenue and Expenditure, 1980 (Estimated) £L5,211,200,000, including a deficit of £L1,500m. The monetary unit is the Lebanese £(L). (See also p. 84.)

**Principal Imports.**—Gold and precious metals, machinery and electrical equipment, textiles and yarns, vegetable products, iron and steel goods, motor vehicles, mineral products, chemicals and chemical products, pharmaceuticals, prepared foods, beverages, tobacco products, live animals and animal products.

**Principal Exports.**—Gold and precious metals, fruits and vegetables, textiles, building materials, furniture, plastic goods, foodstuffs, tobacco and wine.

#### Trade with U.K.

	1980
Imports from U.K. ....	£70,692,000
Exports to U.K. ....	9,000,000

There is also a considerable and very important transit trade through Beirut, including gold, crude oil and a wide range of machinery and consumer goods. Lebanon is the terminal for two oil pipe lines, one formerly belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans Arabian Pipeline Company, at Sidon. The latter supplies most of Lebanon's requirements as the former has not functioned for some years.

**CAPITAL.**—Ψ Beirut (population, 702,000). Other towns are Ψ Tripoli (175,000), Zahlé (46,800), Ψ Sidon (24,740), Ψ Tyre (14,000).

**FLAG.**—Horizontal bands of red, white and red with a green cedar of Lebanon in the centre of the white band.

**NATIONAL DAY.**—November 22.

#### LIBERIAN EMBASSY IN LONDON

21 Prince's Gate, S.W.7

[01-589 9405]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Harry F. Moniba (1981).

An independent republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. The population at the Census of 1974 was 1,481,524.

William V. S. Tubman, President of Liberia since 1944, died on July 23, 1971, and was succeeded by Dr. Tolbert. The Constitution was suspended following a military *coup* on April 12, 1980 led by M/Sgt. Samuel K. Doe, who then became Head of State. Executive power is now vested in the Head of State assisted by an appointed Cabinet of 18 which is supervised by the People's Redemption Council. The Army of Liberia consists of one division of 2 brigades of militia, three regular infantry battalions, one engineer battalion and a small coastguard. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports. International and African airlines call at Robertsfield, 35 miles from Monrovia. Spriggs Payne airfield, on the outskirts of Monrovia, is used by Air Liberia for internal flights.

Liberia is receiving assistance from a number of countries, including the United Kingdom, and from the E.E.C. and various international agencies. This aid is mainly directed towards the implementation of Liberia's National Socio-Economic Development Plan.

LIBYAN DIPLOMATIC MISSION IN LONDON  
5 St. James's Square, S.W.1  
[01-930 6041]

*Sec. Gen of Mission, Adam Kuwiri.*

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three former provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population (1977 estimate) of 2,900,000. The people of Libya are principally Arab with some Berbers in the West and aboriginal tribes in the Fezzan. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers, and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Jaghub, Gadames, Jofra, Sebha, Murzuch, Brach, Gat, Jalo and the Kufra group in the South-East. Exports from Libya are dominated by crude oil, but some wool, cattle, sheep and horses,

esparto grass, olive oil, sponges and hides and skins are also exported. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. In September 1973, the Libyan Government announced that it would be taking a 51 per cent share in all foreign-owned companies. A few companies have been completely nationalized. In addition to the main pipeline from Zelten to the terminal at Mersa Bregha and the pipeline from Dahra to Ras-es-Sider, there is a 176-mile pipeline from Amal to Ras Lanuf and a line from Intisar field to Zuetina. A new gas liquefaction plant was opened at Mersa Bregha in June 1970. A major petrochemical complex is to be built at Ras Lanuf and an iron and steel plant at Misurata. Production of crude oil in 1980 averaged 1,750,000 barrels per day.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. An Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 5,000 years old. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area where a motor road (of international standards) runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. In 1979 there were over 10,000 km. of paved road. There is a good road from Tripoli to Ghadames and a passable road from the coast to Sebha. There are airports at Tripoli and Benghazi (Benina), Tobruk, Mersa Bregha, Sebha, Ghadames and Kufra regularly used by commercial airlines and military airfields at Jamal Abdul Nasser near Tobruk, Mi'Atiga (formerly Okba bin Nagi-Renamei) near Tripoli and at Al Watiyah south of Zuara.

*Government.*—Libya was occupied by Italy in 1911-12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After

the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations. The monarchy was overthrown by a revolution on Sept. 1, 1969, and the country was declared a republic. It was ruled by the Revolutionary Command Council (RCC) under the leadership of Colonel Muammar Qadhafi.

In March 1977 a new form of direct democracy, the "Jamahiriyah" (state of the masses) was promulgated and the official name of the country was changed to Socialist People's Libyan Arab Jamahiriyah. At local level authority is now vested in 186 Basic and 46 Municipal People's Congresses which appoint Popular Committees to execute policy. Officials of these Congresses and Committees form at national level the General People's Congress, a body of some 1,000 delegates which normally meets for about a week twice a year. This is the highest policy-making body in the country. The General People's Congress appoints its own General Secretariat and the General People's Committee, whose members head the 20 government departments which execute policy at national level. The Secretary of the General People's Committee has functions similar to those of a Prime Minister.

Following the latest reorganization of March 1979 Colonel Qadhafi retains his position as leader of the Revolution. But neither he nor his former RCC colleagues any longer have any formal posts in the new administration.

*Currency*.—The Libyan *pound* was abolished in August, 1971, and a new currency the Libyan *dinar* of 1,000 *dirham* was introduced. (See also p. 83.)

Technical assistance is being provided by the United Nations to foster Libya's economic and educational development.

#### Trade with U.K.

*Labour and Social Security and Finance*, M. Jacques Santer.

*Education and Tourism*, M. Fernand Boden.

*Secretary of State for Labour and Finance*, M. Ernest Muhlen.

Democrats:

*Vice-President of the Government, Foreign Affairs, Foreign Trade, Economic Affairs, Middle Classes and Justice*, Mme. Colette Flesch.

*Transport, Post and Telecommunications, Energy and the Environment*, M. Josy Barthel.

*Civil Service and Public Works*, M. René Konen.

*Armed Forces, Public Health and Sport*, M. Emile Krieps.

*Secretary of State for Foreign Affairs, Foreign Trade, Economic Affairs, Middle Classes and Justice*, M. Paul Helmingier.

#### EMBASSY AND CONSULATE

27 Wilton Crescent, S.W.1

[01-235 6961]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Roger Hastert, C.M.G. (1978).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein". In 1867 the Treaty of London declared it a neutral territory. On the death of the

King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the *Treaty of Versailles*, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (B.L.E.U.). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Communities.

Besides B.L.E.U., Luxemburg is also a member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux, 1960). The Court of the European Communities has its seat in Luxemburg, as does the Secretariat of the European Parliament, the European Investment Bank, the European Audit Court and the European Monetary Co-operation fund.

The area is 999 square miles; the population (Jan. 1980) 365,100, nearly all Roman Catholics. There is a Chamber of 59 Deputies, elected by universal suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy was rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity over 4,000,000 tons. Government revenue for 1981 was estimated at L.F. 50,800,000, expenditure L.F. 52,200,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy. There are 170 miles of railway.

#### Trade with U.K.

	1979	1980
Imports from U.K. . . .	£21,431,000	£21,115,000
Exports to U.K. . . . .	39,472,000	39,449,000

The capital, Luxemburg, pop. (1979), 79,600, is a dismantled fortress. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; most speak German and many English.

FLAG.—Three horizontal bands, red, white and blue. NATIONAL DAY.—June 23.

#### BRITISH EMBASSY

28 Boulevard Royal, Luxemburg

*Ambassador Extraordinary and Plenipotentiary*, His Excellency The Hon. Humphrey Maud (1982).

## MADAGASCAR

(The Democratic Republic of Madagascar)

*President*, Capt. de Frégate Didier Ratsiraka.

(A Presidential election was due to take place on Nov. 7, 1982.)

Madagascar lies 240 miles off the east coast of Africa and is the fifth largest island in the world. It has an area of 228,000 sq. miles and a population of about 8,000,000. It became a French protectorate in 1895, and a French colony in 1896 when the former queen was exiled. Republican status was adopted on October 14, 1958. Independence was proclaimed on June 26, 1960, when agreements confirming Madagascar's membership of the French community and co-operation with France on defence, monetary, judicial, educational and other matters were signed.

Following demonstrations in Antananarivo on May 13, 1972, the Parti Social Démocrate (PSD) Government which had been in power since independence under Monsieur Tsiranana (*President* 1959-1972) was replaced by a military government

under General Ramanantsoa who resigned in January 1975. His successor, Col. Ratsimandrava, was assassinated on February 11 after only 6 days in office. A *Directoire Militaire* under General Andriamahazo then took over and martial law was declared. The *Directoire* was replaced by a Supreme Council of the Revolution of 18 members under Capitaine de Frégate Didier Ratsiraka on June 15, 1975. Civilian ministers whose activities are co-ordinated and directed by the Supreme Council have also been appointed. The first act of the new Government was to nationalize insurance and banking.

Both houses of the Malagasy Parliament, and the activities of political parties were suspended, but are now active again under the 1975 constitution.

In December 1975 a new constitution was approved in a referendum, and Lt. Cdr. Ratsiraka was appointed President.

Revised agreements with France, signed on June 4, 1973, provided for the withdrawal of the French forces stationed in the country after independence. The French naval base at Diégo Suarez was turned into a civilian ship repair yard. Madagascar also withdrew from the Franc Zone and announced a claim to the Islands of Juan de Nova, Glorieuses, Isle de l'Europe, Bassa da India and Tromelin which had remained integral parts of the French Republic after independence.

The people are of mixed Polynesian, Arab and Negro origin. The languages spoken are Malagasy and French. There are sizeable French, Chinese and Indian communities.

The island's economy is still largely based on agriculture, which accounts for three-quarters of its exports. Development plans have placed emphasis on increasing agricultural and livestock production, the improvement of communications, the exploitation of mineral deposits and the creation of small industries.

#### TRADE

	1977 ('000 FMG)
Imports . . . . .	85,274,000
Exports . . . . .	82,634,000

#### Trade with U.K.

	1978
Imports from U.K. . . . .	£3,592,000
Exports to U.K. . . . .	4,162,000

CAPITAL.—Antananarivo (population about 400,000). Other main towns are the chief port Toamasina (55,000); Mahajanga (50,000); Fianarantsoa (47,000); Antsiranana (41,000).

FLAG.—Equal horizontal bands of red (above) and green, with vertical white band by staff.

NATIONAL DAY.—June 26 (Independence Day).

#### BRITISH EMBASSY

(BP 167, Antananarivo)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Richard James Langridge.

*2nd Secretary*, Miss S. White.

*Vice-Consul (Commercial)*, J. A. Marcelin.

## THE MALDIVES

*President*, His Excellency Maumoon Abdul Gayoom.

#### CABINET

*Justice*, Ibrahim Fareed Didi

*Home Affairs*, Umar Zahir.

*Provincial Affairs*, Hon. Abdulla Homeed.

*Education*, Hon. Mohamed Zahir Hussain.

*Health*, Hon. Mohamed Mustapha Hussain.

*Fisheries*, Hon. Abdul Sattar Moosa Didi.

*Agriculture*, Hon. Ahamed Hilmy Didi.

*Transport*, Ahamed Shareef.

*External Affairs*, Hon. Fathulla Jameel.

*Area, etc.*—The Maldives are a chain of coral atolls, some 400 miles to the south-west of Sri Lanka, stretching from just south of the equator for about 600 miles to the north. There are 12 clearly defined atolls, separated from each other by deep channels through which the currents run strongly. No point in the entire chain of islands is more than 8 feet above sea-level. The total number of islands is over 2,000, some being very small; about 220 of them are inhabited. The population of the islands (1978) is 143,469. The people are Moslems and the Maldivian language is akin to Elu or old Sinhalese. They are highly civilized and are great navigators and traders.

*Government.*—The Maldives form a Republic which is elective. There is a Parliament (the *Citizens' Majlis*) with representatives elected from all the atolls. The life of the Majlis is 5 years. The Government consists of a Cabinet, which is responsible to the Majlis. By the agreement signed with the British Government in 1965, the Maldives form a composite sovereign and fully independent state, free to conduct their own external relations with other countries.

Until March 29, 1976 the R.A.F. maintained a staging post on Gan Island, in Addu Atoll, the most southerly atoll, lying just south of the equator.

*Production, etc.*—The vegetation of the islands is coconut palms with some scrub. Hardly any cultivation of crops is possible and nearly all food to supplement the basic fish diet has to be imported. The principal industry is fishing and considerable quantities of fish are exported to Japan. Dried fish is exported to Sri Lanka, where it is a delicacy. The tourist industry is expanding very rapidly. Maldives Shipping Ltd. has a fleet of some 60 merchant ships.

*CAPITAL.*—Malé (population, 1978, 29,555). There is an air strip on Hulule island about 1 mile from Malé.

*FLAG.*—Green field bearing a white crescent, with wide red border.

#### BRITISH REPRESENTATION

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John William Nicholas, C.M.G. (1979). (concurrently *British High Commissioner to Sri Lanka and resident at Colombo*).

### MALI (Republic of Mali)

*Chief of State, President of the Government*, Gen. Moussa Traore, born 1937, assumed office Nov. 20, 1968.

The Republic of Mali, an inland state in north-west Africa has an area of 465,000 square miles and a population (1978) of 6,297,000.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Senegal. The title of the Republic of Mali was adopted on Sept. 22, 1960. The Republic is no longer a member of the French Community. On July 1, 1962, a Mali franc equal in value to the Franc CFA was introduced and a new State bank set up. The *Franc Malien* now has a fixed rate of exchange of 2FM=1 CFA Franc.

The régime of Modibo Keita was overthrown on Nov. 19, 1968, and the President arrested by a group of Army officers, who formed a National Liberation Committee and appointed a Prime Minister. Lieut. Traore assumed the functions of Head of State. A new civil constitution to come into being in 1979 was approved in a national referendum on June 21, 1974. The new government formed on May 4, 1978 contained a majority of civilians. On June 19, 1979, elections were held for an 82-member National Assembly. Presidential elections held on the same day confirmed Col. Traore as President.

Mali's principal exports are groundnuts (raw and processed), cotton fibres, meat and dried fish. The principal rivers are the Niger and the Senegal. Goods to the value of £6,120,000 were imported from the United Kingdom in 1979. Exports to U.K. in 1979 were £13,861,000.

*CAPITAL.*—Bamako (404,000). Other towns are Gao, Kayes, Mopti, Sikasso, Segou and Timbuktu (all regional capitals).

*FLAG.*—Vertical stripes of green (by staff), yellow and red. *NATIONAL DAY.*—September 22.

#### BRITISH EMBASSY

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Clifford William Squire, C.M.G., M.V.O., (1979) (resident at Dakar).

### MAURITANIA (Islamic Republic of Mauritania)

*President*, Lt. Col. Mohamed Khouna Ould Haidalla.

Mauritania lies on the north-west coast of Africa immediately to the north of Senegal. It is bounded on the south and on the east by the Republic of Mali. To the north it is bounded by the territory formerly known as Spanish Sahara. Mauritania and Morocco took possession of that territory in February 1976 when Spain formally relinquished all right to it and in April 1976 agreed on a new frontier dividing the territory between them. In August 1979, Mauritania signed a peace treaty with the Polisario and relinquished all claim to the southern sector of the Western Sahara (former Spanish Sahara). Area 419,000 sq. miles. The population was estimated at 1,545,000 in 1978. (For MAP, see above.) The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic. It became fully independent on Nov.

28, 1960. In 1972 Mauritania broke with the franc zone and established its own unit of currency, the *Ouguiya*, equal in value to 5 francs CFA. Mauritania's main source of potential wealth lies in rich deposits of iron ore around Zouérate, in the north of the country. Exports began in 1963, via a railway laid for the purpose from the mine to the port of Nouadhibou. The deposits are being exploited under the aegis of the *Société Nationale Industrielle Minière* following the nationalization on November 28, 1974 of the internationally based company MIFERMA. There are copper deposits at Akjoujt which are being exploited by SOMIMA, a company which had an international base but was nationalized on Feb. 25, 1975; the mine was closed in 1978, but re-opened in 1981.

	1979
Imports from U.K. ....	£2,845,000
Exports to U.K. ....	7,420,000

FLAG.—Yellow star and crescent on green ground.

NATIONAL DAY.—November 28.

CAPITAL.—Nouakchott (135,000).

*British Ambassador*, His Excellency Clifford William Squire, C.M.G., M.V.O. (Resident at Dakar).

## MEXICO

(Estados Unidos Mexicanos)

*President* (1982–88), Lic. Miguel de la Madrid Hurtado, *elected*, 4 July 1982, *took office*, 1 Dec. 1982.

*Secretary of the Interior*, Dr. Enrique Olivares Santana.

*Foreign Affairs*, Jorge Castañeda.

*Defence*, General Felix Galvan Lopez.

### MEXICAN EMBASSY IN LONDON

8 Halkin St., S.W.1

[01-235 6393]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. José Juan de Olloqui.

*Minister-Counsellor*, Dr. Carlos T. Peñaloza-Webb.

*Counsellors*, Sra. Francisca Celis-Campus, M.V.O. (*Information*); Sr. Carlos Casas (*Commercial*); Sr. Jorge Ortega (*Coffee*); Sr. Jorge Pinto (*Financial*); Sr. Crisoforo Peralta (*Petroleum*); Sr. Moises Torres Serrano.

*Area and Population*.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific

Oceans, extending from 14° 33' to 32° 43' N. lat. and 86° 46' to 117° 08' W. long., and comprising one of the most varied zones in the world. It contains 31 states and the federal district of Mexico, making in all 32 political divisions, covering an area of 761,604 square miles. At the Mexican General Census taken on Jan. 28, 1970, the total population was 48,313,000, but a present day estimate is 62,500,000.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 ft.), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 ft.), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 ft.). The only considerable rivers are the *Rio Grande del Norte* which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, the *Rio Balsas* and *Rio Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas". The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

*History and Archaeology*.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from A.D. 500 to 1100 and A.D. 1300 to 1500 and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archaeological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in Yucatán and Chiapas (Maya); Teotihuacan, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacán); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Veracruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to the war of 1845–48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency led to invasion by French forces which installed Archduke Maximilian of Austria as Em-

peror. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Díaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

**Government.**—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of a Senate of 64 members, elected for six years, and of a Chamber of Deputies, at present numbering 213, elected for three years. Presidents, who wield full executive powers, are elected for six years; they cannot be re-elected.

There are four political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the governing party. The Mexican Communists allied with several like-minded smaller parties to form the Mexican United Socialist Party (P.S.U.M.) in 1982.

**Communications.**—Veracruz, Tampico and Coatzacoalcos are the chief ports of the Atlantic, and Guaymas, Mazatlán, Puerto Lázaro Cárdenas, Acapulco, Salina Cruz and Puerto Madero on the Pacific. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system; help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. The railways were completely nationalized in 1970.

Mexico City may be reached by at least three excellent highways (with 14 entry points) from the United States, and work is complete on roads southward from Mexico City to Yucatán as well as on two principal highways to the Guatemalan border (with three entry points).

International telegraph services to the United States frontier are provided by the government-owned Mexican Telegraph Company and then through the United States to Canada and Europe.

**Teléfonos de México**, a state-controlled company, controls about 98 per cent of all telephone services. In 1976 there were 9,708,000 kilometres of long distance lines. *Satélite Latinoamericano, S.A.* (SATELATA) is a joint government/private sector venture disseminating television programmes to Latin America through Intelstat IV satellite facilities leased by the Mexican Government.

There is a good national and international network of air services. There are 1,113 airports and landing fields in Mexico, of which eighteen are equipped to handle long-distance flights. There are 166 airline companies, including two of the major national airlines—*Mexicana de Aviación* and *Aeroméxico*. Passenger traffic is growing by about 18 per cent yearly, while cargo increases by some 14 per cent a year.

**Production.**—The principal agricultural crops are maize, beans, rice, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, chick-peas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus, yields several fermented drinks, mezcál and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries. The mining industry has shown a growth of 20 per cent in two years. The steel industry has expanded steadily and produced

5,500,000 tons of steel in 1977. The mineral wealth is great, and principal minerals are gold, silver, copper, lead, zinc, quicksilver, iron and sulphur. Substantial reserves of uranium have been found. In the non-metals sector, Mexico continues to produce 25 per cent of the world's supply of fluor spar with a yearly output of 1.1 million metric tons.

The total proven petroleum reserves were 60 billion barrels in 1980. Crude oil production in 1976 was 303,300,000 barrels and current daily production is about 1,050,000 barrels. Daily production of natural gas is 2,183,000 cubic feet. Oil reserves have increased substantially due to very important new discoveries in Tabasco and Chiapas states. A new refinery at Tula, State of Hidalgo is the nation's largest; and new refineries in Monterrey, State of Nuevo Leon, and Salina Cruz, State of Oaxaca, are under construction.

Textile production is led by the artificial fibres sector, which is growing by about 9 per cent each year. The natural fibre textile industry has not registered dynamic growth in the past two years and continues to lose its share of the market to the synthetics, but is being re-structured to make it more efficient and competitive.

**Defence.**—Supreme command is vested in the President, exercised through the Ministries of Defence (for Army and Air Force) and Marine.

**Army.**—The country is divided into 35 zones in which both the regular army and volunteer corps are trained. The Army, in 1976, had 1 mechanized, 1 infantry and 1 parachute brigade, 52 garrison battalions and 23 cavalry regiments. Peace-time strength is 65,000. Military education is provided for officers, at the National Military School, the Application Centre for Army Officers and the Staff College, as well as in other specialized schools. To combat illiteracy in the Army, schools have been established in every regular and volunteer group.

**Navy.**—The Navy consists of 2 (former U.S.) destroyers, 10 frigates (including 6 former U.S. destroyer escort transports), 19 fleet minesweepers, 17 escort minesweepers, 21 new fishery protection cutters of 130 tons built in Britain in 1974–76 and 10 built in Mexico, 10 patrol boats, 2 survey ships, 1 transport, 3 landing ships (2 used for rescue and 1 repair), 2 oilers and 5 tugs. There are 4 naval districts on the Atlantic and 4 on the Pacific coast.

**Air Force.**—The Air Force has a strength of about 6,000 officers and men, and 200 aircraft. These include 15 T-33A dual purpose jet-trainer/fighter-bombers, C-118A, C-54, C-47, Israeli-built Arava and LASA-60 transports, 30 T-28A and 45 T-6 armed piston-engined trainers and 3 Puma, 10 Bell 205 Iroquois, 5 Jet-Ranger II and other light helicopters. One HS 125, a JetStar and 3 Islanders are employed on general and VIP transport duties. Primary trainers comprise 20 Beech Musketeers and 20 Bonanzas.

**Language and Literature.**—Spanish is the official language of Mexico and is spoken by about 95 per cent of the population. In addition to Spanish, there are five basic groups of Indian languages spoken in Mexico. The 1970 Census showed that of the 3,111,415 inhabitants speaking an Indian language, 25.7 per cent spoke Náhuatl; 14.6 per cent Maya; 9.1 per cent Zapotec; 7.1 per cent Otomí; 7.5 per cent Mixtec and 36 per cent one or other of the 59 dialects derived from these basic languages. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

**Education.**—Education is divided into primary, secondary, preparatory and university. Primary education is free, secular and nominally compulsory.

## Trade with U.K.

1980

Imports from U.K. ....	£188,100,000
Exports to U.K. ....	111,600,000

Imports consist largely of machinery and implements for industry, mining and agriculture, and raw materials for industry. Principal exports are cotton, coffee, sisal (henequen), sugar, tomatoes and shrimps, lead, silver, zinc and other metals, tobacco, sulphur and heavy fuel oil.

**CAPITAL.**—Mexico City, est. pop. 1976-77 8,941,912; metropolitan area 12,578,420. Other cities (est. pop. 1976-77) are: Guadalajara (1,725,107); Monterrey (1,350,000); Ciudad Juárez (570,401); León (557,030); Puebla (516,197); Mexicali (360,556); Chihuahua (386,645); San Luis Potosí (303,571); and Mérida (250,206).

**FLAG.**—Three vertical bands in green, white, red, with the Mexican emblem (an eagle on a cactus devouring a snake) in the centre.

**NATIONAL DAY.**—September 16 (Proclamation of Independence).

## BRITISH EMBASSY

(Calle Río Lerma 71, Colonia Cuauhtémoc, Mexico City 5, D.F.)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Crispin Charles Cervantes Tickell, M.V.O. (1981).

There are British Consular Offices at Mexico City, Acapulco, Guadalajara, Mérida, Monterrey, Tampico and Veracruz.

*British Council Representative.*—Dr. J. B. C. Brown, O.B.E., Maestro Antonio Caso 127, Col. San Rafael, Mexico 4, D.F.

**BRITISH CHAMBER OF COMMERCE**, Calle Tiber 103, 6th Floor, Mexico 5, D.F.—*Manager*, T. King.

Transit from London to Mexico City:—By air, 13 hours; By sea, U.K.—New York, 5 to 10 days; New York—Mexico City, by rail, 3 days; by air, 4 hours. There is a direct freight service from Liverpool to ports on both the Mexican Gulf and the Pacific Coast.

## MONACO

(Principauté de Monaco)

*Sovereign Prince*, H.S.H. Rainier III-Louis-Henri-Maxence Bertrand, born May 31, 1923, succeeded his grandfather (H.S.H. Prince Louis II), May 9, 1949; married April 19, 1956, Miss Grace Patricia Kelly (died Sept. 14, 1982) and has issue Prince Albert Alexandre Louis Pierre, born March 14, 1958, Princess Caroline Louise Marguerite, born January 23, 1957; and Princess Stephanie Marie Elisabeth, born Feb. 1, 1965.

*President of the Crown Council*, M. Pierre Blanchy. *President of the National Council*, Me. Jean-Charles Rey.

*Minister of State*, André Saint-Mleux, appointed 1972.

## CONSULATE-GENERAL IN LONDON

4 Audley Square, W.1

[01-629 0734]

*Consul-General*, I. S. Ivanovic.

*Consul*, A. J. Hucker, 5-6 Raymond Buildings, Gray's Inn, W.C.1 [01-242 8404].

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long (area approx. 467 acres), with 25,029 inhabitants (1975) and a yearly average of over

1,000,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are some notable public and private gardens. Monaco has a small harbour (30 ft. alongside quay) and the import duties are the same as in France. The National Council consists of 18 members and the Council of Government of the Minister of State, as President, and three Government Counsellors. There is a local police force of 160 men.

A new constitution was promulgated by Prince Rainer on Dec. 17, 1962, which is subject to modification only with the approval of the elected National Council. It maintains the traditional hereditary monarchy and gives guarantees for the right of association, trade union freedom and the right to strike.

**CAPITAL.**—Monaco-ville (1,443).

**FLAG.**—Two equal horizontal stripes, red over white.

*H.M. Consul-General*, E. A. W. Bullock (*Resident at Marseilles*).

## MONGOLIA

(Mongolian People's Republic—  
Bugd Nairamdakh Mongol Ard Uls)

*President*: Yu Tsedenbal.

*Prime Minister*: J. Batmounkh.

**Mongolian People's Revolutionary**  
(= Communist) Party

*Politbureau of the Central Committee*, Yu Tsedenbal; J. Batmounkh; D. Molomjants; N. Jagvaral; D. Maidar; N. Luvsanravdan; S. Jalan-Aajav; T. Ragchaa (*full members*); B. Altangerel; D. Gombojav (*deputy members*).

*Secretariat of the Central Committee*, Yu Tsedenbal (1st); D. Molomjants; N. Jagvaral; S. Jalan-Aajav; D. Gombojav; P. Damin; G. Adya.

## MONGOLIAN EMBASSY

7 Kensington Court, W.8

[01-937 0150]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Oyuny Hosbayar (1978).

**Area and Population.**—The Mongolian People's Republic (Mongolia) is a large and sparsely populated country to the north of China. Its area is over 600,000 square miles. Its population (Jan. 1981) is about 1,641,000. However, this total constitutes only part of the Mongolians of Asia, a number of whom are to be found in China and in the neighbouring regions of the Soviet Union (especially the Mongolian Buryat Autonomous Region). This country, which is almost nowhere below 1,000 metres above sea level, forms part of the Central Asiatic Plateau and rises towards the west in the high mountains of the Mongolian Altai and Khangai Ranges. The Khentai Mountain Range, situated to the north-east of the capital Ulan Bator, is less high. The Gobi region covers the southern half of the country. It contains some sand deserts, but between these less hospitable areas there is steppe land which provides pasture for great numbers of cattle, sheep, goats, camels and horses (the latter is still the characteristic means of transport for the rural population). There are several long rivers and many lakes, but good water is scarce since much of the lake water is salty. The climate is hard, with a short mild summer giving way to a long winter when temperatures can drop as low as minus 50° Centigrade.

**History.**—Mongolia, under Genghis Khan the conqueror of China and much of Asia, was for many years a buffer state between Tsarist Russia and China, although it was under general Chinese

suzerainty. The outbreak of the Chinese Revolution in 1911 led to a declaration of autonomy under Chinese suzerainty which was confirmed by the Sino-Russian Treaty of Kiakhta (1915), but cancelled by a unilateral Chinese declaration in 1919. Later the country became a battleground of the Russian Civil War, and Soviet and Mongolian troops occupied Ulan Bator in 1921: this was followed by another declaration of independence. However, in 1924 the Soviet Union in a Treaty with China again recognized the latter's sovereignty over Mongolia; but this was never properly exercised because of China's preoccupation with internal affairs, and later by the anti-Japanese war. The Mongolian People's Republic was formally established in 1924. Under the Yalta Agreement, Chiang Kai-shek agreed to a plebiscite, held in 1945, in which the Mongolians declared their desire for independence; this was granted. The country entered the United Nations in 1961. The heroes of Mongolian history during the earlier part of the century were Sukhebaator, who died in 1923, and the Communist Choibalsan (died 1952), who did much to turn the country into the Communist state it is today, and carried out a systematic destruction of the power of the Lamas and the old princely houses which had previously been the dominant force in both the economy and the government.

*Production, etc.*—The total of Mongolia's livestock was 24 million in 1980. Traditionally the Mongolian is a herdsman, tending his flock of sheep, goats and horses, cows and camels and leading a totally nomadic life. With the coming of the Communist régime (under the Mongolian People's Revolutionary Party) and especially since 1952, great efforts have been made to settle the population, but a large proportion still live nomadically or semi-nomadically in the traditional *ger* (circular tent). The pastoral population was collectivized at the end of the 1950s into huge *negdels* (co-operatives) and State farms which have hastened the process of settlement, but within these the herdsmen and their families still move with their *gers* from pasture to pasture as the seasons change. The country, and three city districts (Ulan Bator, Darkhan and Erdenet), is today divided into 18 *aimaks* (provinces) and beneath these into 258 *somons* (districts), and these form the basis of the State organization of the country, parallel with which runs the apparatus of the Revolutionary Party.

Membership of the Communist bloc has brought Mongolia considerable quantities of aid from other Socialist countries, especially the Soviet Union and China, both of which supplied many thousands of workers to help with various construction projects. Mongolia's support of the Soviet Union in the Sino-Soviet dispute resulted in the cessation of Chinese aid and a halt in the supply of Chinese workers. Mongolia is now relying on eastern European, especially Czech, Polish and East German aid to supplement the massive assistance from the Soviet Union. Soviet and Bloc aid is hastening the process of industrialization; for although the economy remains based on the herds of animals, and the principal exports of the country are still animal by-products (especially wool, hides and furs) and cattle, factories serving the needs of the country have been started up and the coal and electricity industries are being developed to provide an industrial base. A joint Mongolian/Soviet enterprise for copper and molybdenum mining was opened in 1978, in northern Mongolia. By late 1981 it will process about 16 million tons of ore annually. A major geological survey is being carried out by the CMEA countries, in order to prepare for the extraction of the considerable mineral deposit known to exist in Mongolia. A copper and molybdenum mining complex was officially opened at Erdenet in December

1978 and is expected to be in full planned production by late 1981. Coal production in 1980 was 4.5 million tons and is expected to rise to 6.8 million tons by 1985.

Ulan Bator, which contains a quarter of the country's population, is the main seat of industry. The second largest industrial centre is at Darkhan, north of the capital, near the Soviet frontier. Its industries include lime, cement and building materials, a flour mill and a power station. Choibalsan, in the east, is also being developed industrially. Agriculture, formerly little practised, is now being extended. Average cereal production for 1976-80 was 347,000 tons. By the end of the seventh 5-year plan (1981-85), total cereal production is expected to be 580,000 to 640,000 tons. Communication is still difficult in the country as there are virtually no roads. The trans-Mongolian railway, following the line of the old north-south trade route, was opened in 1955 and links Mongolia with both China and Russia. Mongolia's fundamental difficulty is its very small population and labour force.

Foreign trade is dominated by the Soviet Union, with the eastern European countries taking most of what is left. Trade with western countries and Japan is developing slowly.

CAPITAL.—Ulan Bator. (Pop. 420,000.)

FLAG.—Vertical tri-colour red, blue, red and in the hoist the traditional Soyombo symbol in gold.

NATIONAL DAY.—July 11 (Anniversary of the Mongolian People's Republic).

#### BRITISH EMBASSY

Ulan Bator

*Ambassador Extraordinary and Plenipotentiary*, His Excellency James R. Paterson (1982).

*2nd Secretary*, M. A. Hilton.

*Attachés*, J. S. Watt; E. Deane.

## MOROCCO

(Kingdom of Morocco)

*King*, H. M. King Hassan II, born July 9, 1929; *acceded* February 26, 1961, on the death of his father, King Mohammad V. *Heir*, Crown Prince Sidi Mohamed, b. August 21, 1963.

#### CABINET

*Prime Minister and Minister of Justice*, Me Maâti Bouabid.

*Foreign Affairs and Co-operation*, Me M'Hamed Boucetta.

*Posts and Telecommunications*, Mahjoubi Aherdane. *Cultural Affairs*, Hadj M'Hamed Bahni.

*Equipment and National Development*, M'Hamed Douiri.

ROYAL MOROCCAN EMBASSY AND CONSULATE  
49 Queen's Gate Gardens, S.W.7  
[01-581 5001]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Mehdi Benabdeljalil (1982).  
*Military, Naval and Air Attaché*, Col. Mustapha Jabrane.

*Area and Population*.—Morocco is situated in the north-western corner of the African continent between latitude 27° 40'–36° N. and longitude 1°–13° W. with an area estimated at approximately 180,000 sq. miles, and a population (1979) of 19,470,000. It is traversed in the north by the Rif Mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Tangier which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the *Pillars of Hercules*, the western gateway of the Mediterranean.

*Climate*.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast, (where a high degree of humidity is, however, prevalent) the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

*Government*.—Morocco became an independent sovereign state in 1956, following joint declarations made with France on March 2, 1956, and with Spain

on April 7, 1956. The Sultan of Morocco, Sidi Mohammad ben Youssef, adopted the title of King Mohammad V.

Following serious disturbances in Casablanca in March, 1965, attempts were made by King Hassan, in consultation with all political parties, to form a government of national union. These efforts were unsuccessful and on June 7, 1965, the King proclaimed a "state of exception" and suspended Parliament. Assuming himself the office of Prime Minister, he announced the formation of a new government and indicated that constitutional changes were to follow. A revised Constitution was approved by a national referendum on July 24, 1970 and brought into effect soon after. It was superseded by another constitution, also approved by a national referendum, on March 1, 1972. This provides that not only political parties, but trade unions, chambers of commerce and professional bodies will participate in the organization of the State and representation of the people; specifies that the King is the supreme representative of the people; makes changes in the composition of the Regency Council and the Sovereign's rights and establishes a unicameral legislature. The Chamber has 264 members, 176 elected by direct universal suffrage and 88 members elected by electoral colleges representing local government, industry, agriculture and working class groups. In October 1977 a government was formed under Ahmed Osman comprising of "Independents" and Istiqlal and Mouvement Populaires Parties. In 1979 a new government was formed under Me Maâti Bouabid, with a similar political make-up.

*Defence*.—The Moroccan army, formed in 1956, is about 120,000 strong. A Moroccan air force was formed in 1959 and a navy in 1960. The armed forces possess quantities of French, Soviet and American equipment, including aircraft.

*Production and Trade*.—Morocco's main sources of wealth are agricultural and mineral. The last Five Year Plan (1973–77) for economic development placed particular emphasis on social improvement. Other priority sectors are industrial development, agriculture and tourism. The world recession and high energy prices, coupled with a fall in the price of phosphates, posed problems for the economy and in June 1978 a new Three Year Austerity Plan was announced.

Agriculture employs more than 70 per cent. of the working population and accounts for about 40 per cent. of Morocco's exports. The main agricultural products are cereals, citrus fruits, olives, grapes, tomatoes and vegetables. Dates and figs are also grown and exported. Cork and wood-pulp are the most important commercial forest products. Esparto grass is also produced. There is a fishing industry and substantial quantities of canned fish, mainly sardines, are exported. Livestock in 1976 included about 12,300,000 sheep 5,100,000 goats, 2,900,000 horned cattle and smaller numbers of horses, camels, donkeys and pigs.

Morocco's mineral exports are phosphates, anthracite, manganese, iron ore, lead and zinc, while the following are also produced: petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates totalled 20,000,361 tonnes in 1979, of which 17,867,540 tonnes were exported. There are oil refineries at Mohammedia and Sidi Kacem. Production of crude oil in 1979 amounted to 3,412,299 tonnes.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France, the U.S.A., W. Germany, Italy, the United King-

dom and Spain, was valued in 1980 at Imports, DH 16,792,600,000; Exports, DH 9,645,000,000.

#### Trade with U.K.

	1980
Imports from U.K. ....	£69,223,000
Exports to U.K. ....	62,582,000

There is a British Chamber of Commerce at Casablanca (c/o B.B.M.E., 80 Avenue Lalla Yacout).

**Finance and Currency.**—The unit of currency is the *dirham*. Exchange rate (see p. 84).

The 1980 Ordinary Budget amounted to DH 15,300,000,000 (1976: DH 8,213,000,000).

**Communications.**—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due south from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,250 miles and traction is electric or diesel. An extensive network of well-surfaced roads covers all the main towns in the kingdom.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea. Royal-Air-Maroc and British Caledonian Airways operate services between Casablanca and London. There are air services between Tangier, Agadir, Marrakesh (seasonal) and London, and also between Tangier and Gibraltar connecting with London. Royal Air Inter operates internal services. There are also regular services by many airlines with many parts of the world.

**Language.**—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken mainly in the towns. The foreign population is estimated at 112,000 (1971). The national daily press consists of 4 Arabic and 4 French newspapers.

**Education.**—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a secular university at Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

**CAPITAL.**—ΨRabat (population 865,100). The other chief towns are: ΨCasablanca (2,357,200); Marrakesh (1,224,100); Fez (744,900); Meknes (774,100); Oujda (769,100); Tetouan (682,100). ΨTangier (377,600), ΨKenitra (1,192,200). The towns of Fez, Marrakesh and Meknes were capitals at various times in Morocco's history.

**FLAG.**—Red, with green pentagram (the Seal of Solomon).

**NATIONAL DAY.**—March 3 (Anniversary of the Throne).

#### BRITISH EMBASSY Rabat

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John Cambridge (1982).

*1st Secretary*, D. Broad (*Head of Chancery and Consul*).

*Defence Attaché*, Lt.-Col. C. M. G. de Planta de Wildenberg, M.V.O.

#### BRITISH CONSULAR COMMERCIAL OFFICE

There is a British Consular/Commercial Office at Casablanca.

*British Council Representative*, A. J.-J. Dunn, M.B.E., P.O. Box 427, 22 Avenue Moulay Youssef, Rabat.

## MOZAMBIQUE

(Moçambique)

*President*, Samora Moisés Machel.

**Area and Population.**—The People's Republic of Mozambique lies on the east coast of Africa, and is bounded by Swaziland in the south, South Africa in the south and west, Zimbabwe in the west, Zambia and Malawi in the north-west and Tanzania in the north. It has an area of 297,657 square miles, with a population estimated at 850,000 (1982).

**Government.**—Mozambique, discovered by Vasco de Gama in 1498, and colonized by Portugal, achieved complete independence from Portugal on June 25, 1975. The date had been agreed in September 1974 by Portugal and *Frelimo* (*Frente de Libertação de Moçambique*), the Marxist liberation movement.

**Constitution.**—The country is governed by a Council of Ministers and by the Permanent Political Committee of the *Frelimo* Party; membership of these two bodies virtually overlaps. No other political parties are permitted. The principal legislative body, the People's Assembly, consists of 216 members nominated by *Frelimo*.

The basis of the economy is subsistence agriculture, but there is an industrial sector based mainly in Beira and Maputo, and the government is giving priority to the development of collective farms and state enterprises in all sectors. Main exports are sugar, cashew nuts, copra, cotton, tea and sisal. Mozambique has a range of aid and cooperation agreements with a number of countries in Eastern Europe and in the West.

**CAPITAL.**—Ψ Maputo (pop. 600,000). Other main ports are Beira and Nacala.

**FLAG.**—Red, green, black and yellow diagonals, divided by white stripes; motif in top left-hand corner of a rifle crossed with a hoe, on a book inside a cog-wheel.

#### BRITISH EMBASSY Av. V. I. Lenine, 310, Maputo.

*Ambassador Extraordinary and Plenipotentiary*, J. A. B. Stewart, C.M.G., O.B.E.

*1st Secretary*, Ann Grant (*Head of Chancery and Consul*).

*2nd Secretaries*, I. Duncan; R. H. House.

## NEPAL

*Sovereign*, King Birendra Bir Bikram Shah Deva, born 1945; succeeded January 31, 1972; crowned Feb. 24, 1975.

#### COUNCIL OF MINISTERS

*Prime Minister and Minister for Palace Affairs and Foreign Affairs*, Surya Bahadur Thapa.

*Home Affairs*, Nayan Bahadur Swarn.

*Panchayat, Local Development and Health*, Nava Raj Subedi.

*Water Resources*, Lal Bahadur Khadayat.

*Defence and Industry*, Balaram Gharti Magar.

*Agriculture*, Hem Bahadur Malla.

*Forest and Soil Conservation*, Rama Nanda Prasad Yadav.

*Works and Transport*, Kasi Nath Gautam.

*Education and Culture*, Narayan Dutta Bhatta.

*Finance, Commerce and Supplies*, Yadav Prasad Pant.

*Ministers of State.*—Hari Bahadur Thapa (*Land Reform*); Bhim Prasad Gauchan (*General Administration*); Drona Shumsher J. B. Rana (*Tourism*); Miss Bhadra Kumari Ghale (*Labour and Social Welfare*); Fatte Singh Tharu (*Communications*); Bishnu Maden (*Law and Justice*).

There are also eleven Assistant Ministers.

ROYAL NEPALESE EMBASSY IN LONDON  
12A, Kensington Palace Gardens, W.8  
(01-229 6231)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir Jharendra Narayan Singha, G.C.V.O. (1977).

*1st Secretary*, Mohan Bahadur Panday, C.V.O.

*Military Attaché*, Lt.-Col. Shankar Bikram Shah, C.V.O.

*Attaché*, Ghanashyam Singh Tuladhar, M.V.O.

**Area and Population.**—Nepal lies between India and the Tibet Autonomous Region of China on the slopes of the Himalayas, and includes Mount Everest (29,028 feet). It has a total area of 54,362 square miles and a population estimated at about 15 million. The country comprises three distinct horizontal formations. In the south, joining the Indian plains, is the Terai, a fair proportion of which is covered with jungle in which wild animals abound. The region represents 10% of the total land area and nearly 40% of the population live there. The central belt of the country is hilly, but with many fertile valleys, leading up to the snowline at about 14,000 feet. The hills account for 60% of the area of the country and about 50% of the population. The remainder of the country consists of high mountains which are sparsely inhabited. The country is drained by three great river systems rising within and beyond the Himalayan mountain ranges and eventually flowing into the Ganges in India.

The inhabitants are of mixed stock, with Mongolian characteristics prevailing in the North and Indian in the south. The official religion is Hinduism but there is also a strong Buddhist adherence. Gautama Buddha was born in Nepal.

**History and Government.**—The country was originally divided into numerous hill clans and petty principalities, but Nepal emerged as a nation in the middle of the 18th Century when its component parts were unified by the warrior Raja of Gorkha, Prithvi Narayan Shah, who founded the present Nepalese dynasty. In 1846 power was seized by Jung Bahadur Rana after a massacre of nobles, and he was the first of a line of hereditary Rana Prime Ministers who ruled Nepal for 104 years. During this time the role of the Monarchs was mainly ceremonial.

During the 1914-18 and 1939-45 World Wars the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

In 1950/51 a revolutionary movement achieved its aim of breaking the hereditary power of the Ranas and restoring the Monarchy to its former position. After 10 years, during which various parties and individuals tried their hand at government, the late King Mahendra proscribed all political parties and assumed direct powers on December 16, 1960, with the object of leading a united country to democracy. In 1962 he introduced a new Constitution embodying a tiered, partyless system of panchayat (council) democracy, under which there were elected councils at village level which in turn elect members to district council and thence to zonal councils; a referendum in May 1980 decided in favour of retaining the panchayat system, with some reforms; namely, election to the Rastriya Panchayat (National Parliament) by universal adult franchise (over 21 years old); selection of the Prime Minister by the Rastriya Panchayat and responsibility of his government to that body. The King retains certain reserve powers. In a general election in May 1981, 112 members were elected from the 75 districts of Nepal. The King appoints 28 other members, making a total of 140.

**Economy.**—Nepal exports jute, rice and other grains, hides, oil seeds, ghi, cattle, timber, etc., and imports cotton goods and yarns, sugar, salt, spices,

petrol, metals, etc. Foreign aid supports 60 per cent of the development budget of the Kingdom and tourism is the single largest commercial earner of foreign exchange (U.S.\$64 m in 1980-81).

Revenue for the fiscal year 1981/82 is estimated at *N Rps.* 3,100m; foreign aid *N Rps.* 3,188m; and internal borrowing *N Rps.* 500m. Nepalese imports from U.K. in 1980-81 were valued at £2.5 million and exports to U.K. at just under £2 million. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. Since the £ Sterling was floated, the exchange rate has fluctuated. There are three commercial banks with branches throughout Nepal.

**Communications.**—Kathmandu is connected with India by a road, the mountain section of which was built by India under the Colombo Plan, and to Tibet by a road to Kodari on the border which was built by the Chinese and opened on May 26, 1967. The Indian-aided Sunauli-Pokhara road (128 miles) was inaugurated in April 1972, and a road between Pokhara and Kathmandu, constructed by the Chinese, was opened in 1973. A link road between Mugling and Naryanghat, completed by the Chinese in 1981, has further improved communications between Kathmandu and the Terai. The East-West Highway (Mahendra Raj Marg) to run the length of the country, is complete from the Eastern border to Butwal except for two major bridges (which restricts traffic during the monsoon). Work is in progress from Butwal westwards. Sections of the highway have been, or are being built, with aid from India, Great Britain, U.S.S.R., America and the Asian Development Bank. Britain is also building a road from Dharan to Dhankuta.

There are daily flights from Kathmandu to New Delhi, some direct and some via Banares, and frequent flights to Calcutta and Patna. There are also daily flights to Bangkok, a twice weekly direct flight to Dacca, flights from Kathmandu to Rangoon via Calcutta twice a week and twice a week to Colombo.

**CAPITAL.**—Kathmandu, population (1981) 235,000. Other towns of importance are Biratnagar (94,000), Lalitpur (81,000) and Bhaktapur (50,500) and Pokhara (48,500).

**FLAG.**—Double pennant of crimson with blue border on peaks; white moon with rays in centre of top peak; white quarter sun, recumbent in centre of bottom peak.

**NATIONAL DAY.**—February 18.

#### BRITISH EMBASSY

(Lainchaur Kathmandu, P.O. Box 106)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John Denson, C.M.G., O.B.E. (1977).

#### ROYAL NETHERLANDS EMBASSY IN LONDON 38 Hyde Park Gate, S.W.7 [01-584 5040]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Jonkheer J. L. R. Huydecoper de Nigtevecht (1982).  
*Minister Plenipotentiary*, A. F. Tieleman.  
*Minister (Economic)*, J. W. van Doesburgh.  
*Counsellors*, A. J. van der Stadt; C. F. Stork; E. Röell; D. Vries; A. D. H. Simonsz.  
*1st Secretaries*, F. R. de Bruin; A. P. T. Bijlsma; W. H. Ronke.  
*Defence Attaché*, Capt. G. van Beusekom.  
*Assistant Naval Attaché and Assistant Air Attaché*, Cdr. H. J. Grefe.  
*Military Attaché*, Col. M. F. E. Heestermans.

*Area and Population*.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces plus Eastern and Southern Flevoland (reclaimed parts of the Ysselmeer) and containing a total area of 13,500 sq. miles (34,830 sq. km). The population in Jan. 1981 was estimated at 14,208,586. The live birth rate in Jan., 1980 was 12.8 per 1,000 of the population, and the death-rate was 8.1.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, Yssel and Scheldt.

The chief agricultural products are potatoes, wheat, rye, barley, corn, sugar beet, cattle, pigs, milk and milk products, cheese, butter, poultry, eggs, beans, peas, flax seed, vegetables, fruit, flower bulbs, and cut flowers and there is an important fishing industry. Among the principal industries are engineering, both mechanical and electrical, electronics, nuclear energy, petro-chemicals and plastics, ship-building, steel, textiles of all types, leather goods, electrical appliances, metal ware, furniture, paper, cigars, sugar, liqueurs, beer, clothing, rubber products, etc.

In 1980 the production of crude oil was 1,280,000,000 Kgs and refined oil products 49,338,000,000 Kgs; steel 5,271,800,000 Kgs, and gas 91,153,000,000 cubic metres. Diamond cutting,

though still an important industry, has declined considerably in importance.

*Government*.—In 1815 the Netherlands became a constitutional Kingdom under King William I, a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Council; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 18 years and upwards. Members of the *Tweede Kamer* are paid.

*Defence*.—The armed forces are almost entirely committed to NATO. As a result of a far-reaching defence review, completed in 1974 and revised in 1976 and 1978, the three services have been reduced in size but are being re-equipped with new ships, aircraft and Army vehicles. All units are assigned to the NATO Central Region. Total armed forces number 102,800, which includes 49,300 conscripts and 1,316 women. In addition there are 145,000 reservists. There is compulsory military service of 14–17 months.

*Language and Literature*.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used in the Netherlands Antilles. Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are eight national papers, four of which are morning papers, and there are many regional daily papers.

*Education*.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools are numerous, well equipped and well attended. The principal Universities are at Leiden, Utrecht, Groningen, Amsterdam (2), Nijmegen (R.C.) and Rotterdam, and there are technical Universities at Delft

(polytechnic); Eindhoven (polytechnic), Enschede (polytechnic) Wageningen (agriculture).

**Communications.**—The total extent of navigable rivers including canals, is 4,343 km. and of metalled roads 86,354 km. In 1980 the total length of the railway system amounted to 2,880 km., of which 1,760 km. were electrified. The mercantile marine in January 1979 consisted of 541 ships of total 2,927,000 gross registered tons. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in 1978 was 362,547 km.

**FINANCE**

*Estimates, 1981*

Aggregate Budget Revenue . . . . *Fls.* 129,925 million  
 Aggregate Budget Expenditure . . . . 146,642 million

**TRADE**

The Dutch are traditionally a trading nation. *Entrepôt* trade, banking and shipping are of particular importance in their economy. The geographical position of the Netherlands, at the mouths of the Rhine, Meuse and Scheldt, brings a large volume of transit trade to and from the interior of Europe to Dutch ports.

Principal trading partners are the Federal Republic of Germany and Belgium/Luxemburg. Britain supplied 8.2 per cent of Netherlands imports in 1980 (*Fls.* 12,480,788,000) and took 7.8 per cent of Netherlands exports (*Fls.* 11,583,871,000).

In common with other members of the European Economic Community, the Netherlands on July 1, 1968 removed remaining duties on imports from EEC countries and brought down duties on imports from other countries into line with the Common External Tariff of the EEC.

Excluding the building industry, the index of industrial production in the Netherlands (1975 = 100) rose from 114 in 1979 to 115 in 1980 and the index of industrial production per worker (1975 = 100) rose from 128 in 1979 to 131 in 1980. In 1980 Dutch imports amounted to *Fls.* 152,832,342,000 and exports to *Fls.* 146,772,924,000 (including Belgium and Luxemburg).

**Trade with U.K.**

	1980
Imports from U.K. . . . .	£3,842,647,000
Exports to U.K. . . . .	3,406,745,000

**SEAT OF GOVERNMENT.** The Hague (Den Haag or, in full, 's-Gravenhage). Pop. (1978) 673,391.

**PRINCIPAL TOWNS.**— $\Psi$  Amsterdam, 965,246;  $\Psi$  Rotterdam, 1,017,136; Utrecht, 471,897; Eindhoven, 362,982; Haarlem, 228,536; Groningen, 199,827; Tilburg, 213,502; Nijmegen, 216,088; Enschede, 241,184; Arnhem, 284,244; Leiden, 170,804; Breda, 151,102; Maastricht, 145,209; Dordrecht, 191,251; Apeldoorn, 135,829; Hilversum, 111,645.

**FLAG.**—Three horizontal bands of red, white and blue.

**BRITISH EMBASSY**

(Lange Voorhout, 10, The Hague)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Philip Robert Aked Mansfield (1981).

*British Council Representative*, W. E. Moss, O.B.E., Keizersgracht 343, Amsterdam (Library).

**OVERSEAS TERRITORIES**

*The Netherlands West Indies* formerly comprised Surinam in South America and certain islands in the West Indies known as the *Netherlands Antilles* (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of the Netherlands Antilles is 394.1 sq. miles with a population of

250,000. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs as parts of the Netherlands Realm under the Crown. The statute was amended in 1975 to provide for the full independence of Surinam on November 25, 1975. Henceforth the Realm comprises the Netherlands and the Netherland Antilles only.

**Governor**

*Netherlands Antilles*, Dr. B. M. Leito (1970).

**Trade with U.K.**

<i>Netherlands Antilles</i>	1979	1980
Imports from U.K. . . . .	£59,070,000	£33,375,000
Exports to U.K. . . . .	44,841,000	36,243,000

The capital of Curaçao is  $\Psi$  Willemstad (pop. 154,928), of Aruba,  $\Psi$  Oranjestad; of Bonaire,  $\Psi$  Kralendijk; of St. Martin, Philipsburg; of St. Eustatius, Eustatius; Oranjestad; and of Saba, Bottom.

**NICARAGUA**

Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between 10° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 57,145 English square miles (see MAP, p. 846). It has a population of 2,700,000 (1980), of whom about three-quarters are of mixed blood. Another 15 per cent are white, mostly of pure Spanish descent and the remaining 10 per cent are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic coast and were formerly under British protection.

**NICARAGUAN EMBASSY IN LONDON**

8 Gloucester Road, S.W.7.

[01-584 3231]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Señor Francisco José d'Escoto (1981).

**Government.**—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. In 1936 the Presidency was assumed by Anastasio Somoza, Director of the National Guard. He was succeeded in power by his sons Luis and Anastasio Somoza, until 1979 when the family and the National Guard were overthrown by left-wing guerrillas of the Sandinista National Liberation Front. The capital of Managua fell to the Sandinistas on July 19. A Junta of National Reconstruction subsequently took power.

It was announced in March, 1981, that the ruling Junta had been reduced in membership from five to three—Sr. Rafael Cordova Rivas, Sr. Sergio Ramirez Mercado and Sr. Daniel Ortega Saavedra.

**Agriculture and Industry.**—The country is mainly agricultural. The major crops are cotton, coffee, sugar cane, tobacco, sesame and bananas. Beans, rice, maize and ipecacuanha are also important. Livestock and timber production, already considerable, are expanding. Nicaragua possesses deposits of gold and silver.

**Communications.**—There are 252 miles of railway, all on the Pacific side and approximately 5,500 miles of telegraph. There are 51 radio stations and two television stations in Managua. An automatic telephone system has been installed in the capital and extended to all major cities. A ground station for satellite communication was inaugurated in 1973. Transport except on the Pacific slope, is still attended with difficulty but many new roads have either been

opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway runs from the Corinto on the Pacific coast via Managua to Rama, where there is a natural waterway to Bluefields on the Atlantic. The country's main airport is at Managua. The chief port is Corinto on the Pacific.

*Language and Literature.*—The official language of the country is Spanish and the majority profess Catholicism, although the English language and the Moravian Church are widespread on the Atlantic coast. There are 3 daily newspapers published at Managua, apart from the official Gazette (*La Gaceta*). A national literacy campaign in 1980 has reduced illiteracy to less than 20 per cent. There are universities at León and Managua.

#### Trade with U.K.

	1980
Imports from U.K. ....	£2,478,000
Exports to U.K. ....	1,510,000

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. The chief exports are cotton, coffee, beef, gold, sugar, cottonseed, bananas, copper and soluble coffee.

**CAPITAL.**—Managua, population 615,000. The centre was almost totally destroyed in the earthquake of December 1972. León, 158,577; Granada, 72,640; Masaya, 78,308; Chinandega, 144,291.

## NIGER

### (République du Niger)

*President*, Col. Seyni Kountché, *assumed power*, April 15, 1974.

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad, Nigeria, Benin, Mali and Upper Volta.

It has an area of about 459,000 square miles with a population (U.N. estimate, 1972) at 4,030,000. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djermas in the south-west and the nomadic Touaregs in the north.

The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. These are now being revised.

The constitution of Niger, adopted on November 8, 1960, provided for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly. In April 1974 Lt.-Col. Seyni Kountché seized power, suspended the Constitution, dissolved the National Assembly, and suppressed all political organizations. He then set up a Supreme Military Council with himself as President. The official language is French.

*Finance.*—The currency of Niger is the *Franc CFA*. In 1979 the total budget amounted to *Francs CFA* 59,000,000,000.

*Trade.*—The cultivation of ground-nuts and the production of livestock are the main industries and provide the two main exports. Exports in 1978 were

Livestock, *Francs CFA* 11,600,000,000; Ground-nuts, *Francs CFA* 300,000,000. A company formed by the Government, the French Atomic Energy Authority and private interests is exploiting uranium deposits at Arlit. Exports of uranium in 1978 were worth *Francs CFA* 47,000,000,000. Imports from U.K. (1978)—£11,930,000; exports to U.K. (1978)—£235,000.

**CAPITAL.**—Niamey (100,000).

**FLAG.**—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe.

**NATIONAL DAY.**—December 18.

*British Ambassador*, His Excellency M. F. Daly (*resident at Abidjan*).

## NORWAY

### (Norge)

*King*, Olav V, K.G., K.T., G.C.B., G.C.V.O., *b.* July 2, 1903; *succeeded*, Sept. 21, 1957, on death of his father King Haakon VII; *married* March 21, 1929, Princess Märtha of Sweden (*born* March 29, 1901; *died* April 5, 1954); *having issue*, Harald (*see below*) and two daughters.

*Heir-Apparent*, H.R.H. Prince Harald, G.C.V.O., *b.* Feb. 21, 1937; *m.* Aug. 29, 1968, Sonja Haraldsen, and has issue Princess Märthe Louise, *b.* Sept. 22, 1971; and Prince Haakon Magnus, *b.* July 20, 1973.

#### CABINET

*Prime Minister*, Kåre Willoch.

*Asst. Defence Attaché, Lt.-Col. T. Medhus.*

*Attaché, Terje Rasmussen (Consular).*

**Area and Population.**—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and the neighbouring countries is 2,531 km. (Sweden 1,619 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 19 counties (*fylker*) and comprises an area of 386,308 sq. km. of which Svalbard is 62,049 and Jan Mayen 372 sq. km. with a population (estimated, Dec. 1981) of 4,107,063. In 1979 there were for every 1,000 inhabitants: 12·7 live births; 10·2 deaths; 8·7 deaths during first year of age (per 1,000 live births); 5·7 marriages.

The Norwegian coastline is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity

in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia.

**Production.**—The cultivated area is about 8,170 sq. km. (2·2 per cent of total surface area); forests cover nearly 25 per cent; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are manufactures, agriculture and forestry, fisheries, mining, production of metals and ferro-alloys and shipping. Also in recent years industries providing both manufactured products and services for the development of North Sea oil and gas resources have assumed growing importance. In 1981, the total workforce was 1,932,000 of which 390,000 persons were employed in Norwegian industry. Manufactures are aided by great resources of hydro-electric power. Actual production in 1981 amounted to 92,770 million kilowatts. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1981 the total catch amounted to 2,590,440 metric tonnes.

**Government.**—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden, under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

The Labour Party was defeated in the General Election of Sept. 14, 1981. When the three non-socialist parties proved unable to form a coalition the Conservative Party formed a minority government with Kåre Willoch as Prime Minister.

**Defence.**—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. The period of compulsory national service is 15 months (without refresher training) in the Navy and Air Force, and 12 months (with refresher training) in the Army. In March 1978 Norway committed an infantry battalion with additional support to the U.N. Interim Force in the Lebanon.

**Education** from 7 to 16 is free and compulsory in the "basic schools" maintained by the municipalities with State grants-in-aid. The majority of the pupils receive post-compulsory schooling at "upper secondary" schools, colleges of education (19) regional colleges akin to polytechnics (12), universities (4) and other university-level specialist institutions.

**Language and Literature.**—Old Norse literature is among the most ancient and richest in Europe. Norwegian in both its present forms is closely related to other Scandinavian languages. Independence from Denmark (1814) and resurgent nationalism led to the development of "new Norwegian" based on dialects, which now has equal official standing with "bokmål", in which Danish influence is more obvious. This was formed in the time of the Reformation, and Ludvig Holberg (1684-1754) is regarded as the father of Norwegian literature, though the

modern period begins with the patriotic and romantic writings of Henrik Wergeland (1808–1845). Some of the famous names are Henrik Ibsen (1828–1906), the dramatist, Bjørnstjerne Bjørnson (1832–1910), dramatist, novelist and Nobel Prizewinner in 1903, and the novelists Jonas Lie (1833–1908), Alexander Kielland (1849–1906), Knut Hamsun (1859–1952) and Sigrid Undset (1882–1949), the latter two both Nobel Prizewinners, and the latter a champion of Norwegian womanhood. In 1978 there were 72 newspapers appearing six times weekly, eighty-five 2–5 times weekly and 2 once a week. Total circulation was in the region of 1,683,000. There are no Sunday newspapers.

**Communications.**—The total length of railways open at the end of 1980 was 4,242 km., excluding private lines. The extension of the main line from Fauske to Bodø, 60 miles north of the Arctic Circle, was completed in 1962. The number of telephones at the end of 1981 was 1,992,000. There are 82,482 km. of public roads in Norway (including urban streets). At the end of 1981, 2,123,622 road motor vehicles were registered.

**Civil Aviation.**—Scheduled internal air services are operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartsselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerøes Flyveselskap A.S.

**Mercantile Marine.**—The Mercantile Marine, December 1980, consisted of 1,682 vessels of 21,706,985 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks seventh among the merchant navies of the world.

## FINANCE

	1980	1981
	million <i>Kroner</i>	
Revenue .....	83,582	101,400
Expenditure .....	95,767	107,600

## TRADE

	1980	1981
	million <i>Kroner</i>	
Total imports .....	118,363	130,500
Total exports .....	135,003	156,700

The chief imports are raw materials, motor vehicles, chemicals, motor spirit, fuel and other oils; coal, ships and machinery; together with manufactures of silk, cotton and wool. The exports consist chiefly of crude oil and gas, manufactured goods, fish and products of fish (as canned fish, whale oils), pulp, paper, iron ore and pyrites, nitrate of lime, stone, calcium carbide, aluminium, ferro-alloys, zinc, nickel, cyanamide, etc.

**CAPITAL.**— $\Psi$ Oslo (incl. Aker). Pop. (Dec. 31, 1981), 450,386. Other towns are  $\Psi$ Trondheim, 134,690;  $\Psi$ Bergen, 207,419;  $\Psi$ Stavanger, 91,021;  $\Psi$ Kristiansand, 61,476;  $\Psi$ Dramman, 50,098;  $\Psi$ Tromsø, 47,148;  $\Psi$ Aalesund, 34,743;  $\Psi$ Haugesund, 26,982; Moss, 25,088.

## BRITISH COUNCIL

*Representative*, Miss M. Wane, O.B.E., Fridtjof Nansens Plass 5, Oslo 1.

## SVALBARD

(Spitsbergen and Bear Island)

By Treaty (Feb. 9, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, Norway assumed sovereignty. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantling of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. 288,000 metric tons of coal were extracted from Norwegian mines in Svalbard in 1980.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 355 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour 2 to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'–71° 9' N. lat. and 7° 53'–9° 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

## Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 48' S. lat. and 90° 35' W. long.) was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNILD LAND (from 70° 30' to 68° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

## OMAN

(The Sultanate of Oman)

*Sultan*, Qaboos Bin-Said, succeeded on deposition of Sultan Said bin Taimur, July 23, 1970.

(The Sultan acts as his own Prime Minister, Minister of Foreign Affairs, Defence and Finance.)

*Deputy Prime Minister for Security and Defence*, Fahar Bin-Taimour al-Said.

*Deputy Prime Minister for Legal Affairs*, Fahad Bin Mahmud al-Said.

*Deputy Prime Minister for Finance and Economy*, Qais Abdel-Moneim al-Said.

*Special Adviser to the Sultan, governor of Muscat*, Thuwaini Bin Shihab al-Said.

*Minister of State for Foreign Affairs*, Yousef al-Alawi Abdullah.

*Special adviser to the Sultan on religious and historical affairs*, Mohammad Bin-Ahmad.

*Interior*, Badr Bin-Saud Bin-Hareb.

*Justice*, Hilal Bin-Hamad al-Sammar al-Said.

*Post, Telegraphs and Telephones*, Hamdud Abdullah al-Harhi.

*Civil Aviation, Roads and Ports*, Salem Nasser al-Bousaidi.

*Commerce and Industry*, Mohammad Zubair.

*Petroleum and Mineral Resources*, Said Ahmad al-Shanfari.

*Agriculture and Fisheries*, Abdel-Hafaz Salem Rajab.

*Health*, Mubarak al-Khadouri.

*Education*, Yahya Mahfouz al-Munziri.

*Social Affairs and Labour*, (vacant).

*Land Affairs and Municipalities*, Ahmad Abdullah al-Ghazali.

*Information and Youth Affairs*, Abdel-Aziz Rowass.

*Public Works*, Assem al-Jamali.

*National Heritage*, Faisal Bin-Ali al-Said.

*Diwan Affairs*, Hamad Bin-Hamoud al-Said.

*Governor of Dhofar and Minister of State*, Sayyid Halil bin Saud bin Harub.

*Minister of State and Special Envoy for the Sultan*, Shahib bin-Taimour al Said.

*Secretary to the Council of Ministers*, Salem al-Ghazali.

*President of the State Consultative Council*, Khalfan Nasir al-Wahaibi.

OMAN EMBASSY IN LONDON  
44a/b Montpellier Square, S.W.7  
[01-584 6782]

*Ambassador*, (vacant)

The independent Sultanate of Oman lies at the eastern corner of the Arabian Peninsula. Its seaboard is nearly 1,000 miles long and extends from near Tibet on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast which belongs to Sharjah and Fujairah of the United Arab Emirates. Ras Darbat Ali marks the boundary between the Sultanate and the People's Democratic Republic of Yemen. The Sultanate extends inland to the borders of the Rub al Khali, or "Empty Quarter" as the South Eastern Arabian Desert is called.

Physically and historically modern Oman can be split into two main parts, the North and the South, divided by a large tract of desert. *Northern Oman* has three main sections. The *Batinah*, the coastal plain, varies in width from 30 miles in the neighbourhood of Suwaiq to almost nothing at Muscat where the mountains descend abruptly to the sea. The plain is fertile, with date gardens extending over its full length of 150 miles. The dates, which ripen in early July, well before the Basra product, are famous for their flavour. The *Hajar*, a mountain spine running from North East to South West, reaching nearly 10,000 feet in height on Jabal Akhdar. For the most part the mountains are barren, but numerous valleys penetrate the central massif of Jabal Akhdar and in these there is considerable cultivation irrigated by wells or a system of underground canals called *falajs* which tap the water table. The two plateaus leading from the western slopes of the mountains, the *Dhahirah* or back, in the north and the *Sharqia* in the south east also have centres of

settlements and cultivation. They fall from an average height of 1,000 feet into the sands of the Empty Quarter. Camels raised in this area are prized throughout Arabia. The North is separated from the South by nearly 400 miles of inhospitable country crossed by one motorable track, the only land link. *Dhofar*, the Southern Province, is the only part of the Arabian Peninsula to be touched by the South West Monsoon. Temperatures are more moderate than in the North and sugar cane and coconuts are grown on the coastal plain, while cattle are bred on the mountains.

*Government*.—A Consultative Council for the State was established by Sultanic decree on October 18, 1981. The Council is a nominated body consisting of 45 members (28 representing the public and 17 representing the government). The Council's jurisdiction is confined to economic affairs and social development.

Muscat is the original capital of Oman, but Matrah, 3 miles away, where a new port has been built and where there is more room for expansion, is the commercial centre, and government offices and private houses are moving out to Ruwi and Qurum along the road to Seeb Airport. The other main towns on the northern coast are Sur, Khaburah and Sohar, all of which are ports but without sheltered anchorage. In the interior Nizwa and Rostaq, both former capitals, are the centres of population. The main town of Dhofar is Salalah, and Raysut and Murbat are the ports.

The area of Oman has been estimated at 120,000 sq. miles and the population at 850,000 (1982). The inhabitants of the North are for the most part Arab but along the coast there is a strong infusion of negro blood, while in the Capital Area which stretches from Muscat to Seeb there are large communities of Hindus, Khojas and Baluch, in addition to Zanzibaris of Omani origin. In Dhofar there is also an infusion of negro blood around Salalah, but in the mountains the inhabitants are either of pure Arab descent or belong to tribes of pre-Arab origin, the Qarra and Mahra, who speak their own dialects of semitic origin.

Since 1972 ships have been using Port Qaboos at Matrah, where eight deep water berths have been constructed as part of the new harbour facilities (£20m.).

The telegraph office, an automatic telephone service in Muscat and Matrah and an international telephone service have been operated since January 1975 by OMANTEL. The Sultanate of Oman and Cable & Wireless share in the company in the ratio of 60/40. There are cleared or graded motorable tracks linking most main population centres of the country with the coast and with the towns of the United Arab Emirates. In 1977, 1,447 km. of tarmac road linked the capital area with the new international airport at Seeb and the town of Sohar and others are being built.

*Finance*.—On May 7, 1970, a new currency was brought into circulation. The main unit is the *Rial Oman*.

#### Trade with U.K.

	1980	1981 (est.)
Imports from U.K. . . .	£131,094,000	£200,000,000
Exports to U.K. . . . .	28,728,000	40,000,000

*Commerce and Trade*.—Trade is mainly with the United Kingdom, Japan, the Netherlands, U.S., West Germany and India. Total imports for the year 1981 were RO790,346,000. Chief imports were machinery, cars, building materials, refined petroleum and food and telecommunications equipment.

Petroleum Development (Oman) Ltd. (owned 60 per cent by Oman Government and 34 per cent by

Shell) began exporting oil on Aug. 1, 1967. Winter-shall A.-G., Sun Oil and ELF-ERAP have off-shore concessions and Eif Aquitaine Sumitomo has a new inland oil concession. The current level of oil production is about 300,000 barrels per day.

*Development.*—For many years the Sultanate was a poor country with a total annual income of less than £1,000,000. The advent of oil revenues since 1967 and the change of régime in 1970 have improved prospects and have enabled the initiation of a wide-ranging development programme, especially concerned with health, education and communications. New hospitals have been completed in the main provincial centres and there are now 13 hospitals and 150 doctors. 310 schools, with 75,000 pupils, were in operation in 1977. At Salalah, the main coastal town of the southern province of Dhofar, a new civil airport is planned. A metalled road joins Salalah to Taqa and the port of Rayzut and several housing schemes have been completed. A thermal power station and desalination plant is under construction near Muscat and work has recently begun on a flour mill. There are also plans to build a cement factory near Muscat.

*CAPITAL.*— $\Psi$  Muscat, population (estimated), 7,000.

*FLAG.*—Red, green and white with crossed daggers in red sector.

#### BRITISH EMBASSY Muscat

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Duncan Slater, C.M.G. (1982).

PAKISTAN EMBASSY  
35 Lowndes Square, S.W.1  
[01-235 2044]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Ali Arshad (1981).

*Ministers*, Amir Usman; Qutubuddin Aziz (*Information*).

*Counsellors*, Muhammad Quarban (*Head of Chancery*); Ahmad Javed Shah; Wajahat Latif; Hafeezullah (*Commercial*); Dr. Zia Mohyuddin.

*1st Secretaries*, Mohammad Imtiaz-ul-Hassan; Dr. Farouk A. Rana.

*Area and Population.*—The Islamic Republic of Pakistan consists of country situated to the north-west of the Indian sub-continent, bordered by Iran, Afghanistan, the disputed territory of Kashmir and India. It covers a total area of 310,403 sq. miles. The Government of Pakistan census in 1981 showed a population figure of 83,780,000. Of these, about 97 per cent are Moslems, about 1 per cent Hindus, 1.5 per cent Christians, and 4 per cent Buddhists.

Running through Pakistan are five great rivers, the Indus, Jhelum, Chenab, Ravi and Sutlej. The upper reaches of these rivers are in Kashmir, and their sources in the Himalayas.

*Government.*—Until April 17, 1972, when the Republic of Bangladesh seceded and was formally created to replace East Pakistan, Pakistan consisted of two geographical units, West and East Pakistan, which were separated by about 1,100 miles of Indian territory. Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received Royal Assent on July 18, 1947.

In terms of the Act the Dominion of Pakistan consisted of former territories of British India. The States of Bahawalpur and Khairpur (in Punjab and Sind), with a Muslim population of almost 80 per cent and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) were defined by a Boundary Commission. The following States also acceded to Pakistan: the Baluchistan States of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. (All these States have since merged in the relevant Provinces of what is now Pakistan). The States of Junagadh and Manavadar which had acceded to Pakistan were occupied by India on November 8, 1947.

Pakistan became a Republic on March 23, 1956, when a Parliamentary Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law.

The first general elections ever held in Pakistan on a basis of "one man, one vote", were held in Dec. 1970 and Jan. 1971. The Awami League in East Pakistan, led by Shiekh Mujibur Rahman, and the Pakistan People's Party in West Pakistan, led by Zulfikar Ali Bhutto, won large majorities. Following the elections there was total disagreement between the two main parties on the question of a new Constitution for Pakistan, Sheikh Mujib insisting on complete autonomy for East Pakistan. The proposed opening of the National Assembly at Dacca on March 25, 1971, was postponed and civil war broke out.

The unofficially styled "Bangladesh" seceded from the Government of Pakistan by unilateral declaration on March 26, 1971. Fighting in East Pakistan intensified towards the end of the year and on December 3 it spread to West Pakistan and Indian forces were engaged. On December 16 the Pakistan forces on the eastern front surrendered, and the

following day Pakistan accepted a cease-fire in the West. "The Democratic Government of Bangladesh" was formally proclaimed on April 17, 1972.

The United Kingdom had recognized Bangladesh on February 4; but already, on January 30, 1972, President Bhutto announced that Pakistan had left the Commonwealth as a protest against the decision by Britain, Australia and New Zealand to recognize Bangladesh.

The general elections called in March 1977 resulted in a sweeping victory for Mr Bhutto's Pakistan People's Party but the Opposition Pakistan National Alliance alleged that the elections had been rigged. Following weeks of negotiation between the representatives of the Government and the PNA, the Armed Forces assumed power on July 5, 1977 and imposed martial law throughout the country. The military government scheduled new general elections for October 1977, but these were postponed.

From January 1978, Gen Zia-ul-Haq was assisted by a 19-member Advisory Council, which was replaced in July 1978 by a 22 member Cabinet including members of the political parties. Gen. Zia declared himself President on Sept. 16, 1978, and a federal cabinet was formed in March, 1981. In January 1982 a Federal Council (Majlis-i-Shoora) was inaugurated; a nominated advisory body, it is intended to reflect popular views until there is a return to democracy.

**Education.**—Formal education in Pakistan is organized into five stages. These are five years of primary education (5-9 years), three years of middle or lower secondary (general or vocational), two years of upper secondary, two years of higher secondary (intermediate) and two to five years of higher education in colleges and universities. Education is free to upper secondary level.

Examinations for the first two stages are conducted by the Provincial Education Departments for the award of certificates. Public examinations are conducted at secondary and higher secondary/intermediate levels by the concerned Boards of Intermediate and Secondary education. Public examinations are also held for scholarships and conducted by the Directorates of Education. Examinations at higher levels of education are conducted by the universities.

Provincial Governments are responsible for the total financial support of the government institutions and for grants to non-government institutions. But policy making is authorized by the national Government, which makes annual grants. The Government of Pakistan announced in March, 1972, the Education Policy, 1972-80, the main objects of which were to promote ideological solidarity and eradicate illiteracy. According to the Policy, education in classes I-VII has been made free since Oct. 1, 1972. It is anticipated that primary education will become universal for boys and girls by 1984.

Education in classes IX and X has been made free in all schools from 1973. The present rate of increase in enrolment at secondary and intermediate levels is about 10 per cent per annum. By 1980, it was estimated that the enrolment was more than double, rising from 400,000 to 850,000 in classes IX and X and from 160,000 to 360,000 in classes XI and XII.

There are at present some 139,000 primary school teachers, 115,000 in secondary schools and nearly 20,000 teachers at university level.

**Production.**—Pakistan's economy is chiefly based on agriculture. The principal crops are cotton, rice, wheat, sugar cane, maize and tobacco. There are large deposits of rock salt. Pakistan has one of the longest irrigation systems in the world. The total area irrigated is 33 million acres. There are substantial natural gas mains near the Baluchistan-Sind border. Distribution now extends to most urban areas.

**Other products:** Pakistan also produces hides and skins, leather, wool, fertilizers, paints and varnishes, soda ash, paper, cement, fish, carpets, sports goods, surgical appliances and engineering goods, including switchgear, transformers, cables and wires.

**Trade.**—Pakistan imported manufactured goods and raw materials to the value of \$5,350 million in 1980-81 and exported mainly agricultural products valued at \$2,588 million. Principal imports are listed as: petroleum products, machinery, fertilizers, transport equipment, edible oils, chemicals, and ferrous metals. Principal exports are raw cotton, cotton yarn and cloth, carpets, rice, petroleum products, synthetic textiles, leather, and fish.

#### Trade with U.K.

	1980
Imports from U.K. ....	£139,600,000
Exports to U.K. ....	57,400,000

**Finance.**—The unit of currency is the Rupee of 100 Paisa (1 crore = 10 million Rupees). For rate of exchange, see p. 83.

The 1982-83 Budget anticipated Revenue receipts of Rs.57,180 million and expenditure (excluding development expenditure) of some Rs.78,000 million.

**Communications.**—The main seaport is Karachi. The main airport at Karachi occupies an important position on international trunk routes and is equipped with modern facilities and equipment. Pakistan International Airlines (P.I.A.) operates air services between the principal cities within the country as well as abroad.

Post and telegraph facilities are available to every country in the world.

**CAPITAL.**—Islamabad, pop. 201,000. ΨKarachi (pop. 5,103,000) is the largest city and seaport; Lahore has a population of 2,920,000.

**FLAG.**—The National Flag of Pakistan is dark green, with white vertical stripes at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star.

**NATIONAL DAYS.**—March 23 (Pakistan Day), August 14 (Independence Day).

#### BRITISH EMBASSY

Diplomatic Enclave, Ramna 5,  
P.O. Box 1122, Islamabad.

*Ambassador Extraordinary and Plenipotentiary, His Excellency Oliver Grantham Forster, C.M.G., M.V.O. (1979).*

There is a British Consulate-General at Karachi.

*British Council Representative, M. G. Eltenton, O.B.E., P.O. Box 1135, Islamabad. There are regional offices at Karachi and Lahore.*

#### PROVINCES OF THE ISLAMIC REPUBLIC OF PAKISTAN

The Establishment of West Pakistan Act, 1955, came into force on October 3, 1955, and incorporated: (1) the former Governors' Provinces of the Punjab, North-West Frontier and Sind; (2) the former Chief Commissioners' Provinces of Baluchistan and Karachi; (3) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (4) the Tribal Areas of Baluchistan, the Punjab and the North-West Frontier and the States of Amb, Chitral, Dir and Swat, into the Province of *West Pakistan* with effect from October 14, 1955. The Province was reorganized with effect from July 1, 1970, into the four separate Provinces of Punjab (including Bahawalpur), Sind (including Karachi), North West Frontier Province and Baluchistan together with Islamabad Capital Territory and the Tribal Areas.

**PANAMA**  
(República de Panama)

*President of the Republic*, Lic. Ricardo de la Espriella, took office, July 30, 1982 following resignation of Pres. Royo.

MINISTERS OF STATE

*Government and Justice*, Sr. Jorge Ritter.  
*Foreign Affairs*, Sr. Jorge Illueca.  
*Finance*, Dr. Orville Goodin.  
*Commerce and Industry*, Raúl Brostella.  
*Public Works*, Sr. Tomas Duque.  
*Agriculture*, Sr. René González.  
*Health*, Dr. Edith Jimenez.  
*Education*, Sra. Susana Richa de Torrijos.  
*Labour and Social Welfare*, Dr. José G. Montenegro.  
*Planning and Economic Policy*, Dr. Luis Alberto Arias.  
*Housing*, Sr. Abel Rodriguez.  
*Minister to the President*, Sr. Ricardo Rodriguez.

PANAMANIAN EMBASSY IN LONDON  
Eagle House, 109-110 Jermyn Street, S.W.1  
[01-930 1591]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dr. Santiago Harris.  
*Minister-Counsellor*, Sr. Mario Velasquez.

CONSULATE  
24 Tudor Street, E.C.4  
[01-353 4792/3].

There are also Consular Offices of the Republic at *Glasgow* and *Liverpool*.

Panama lies on the isthmus of that name which connects N. and S. America (see MAP, p. 817). After a revolt (Nov. 3, 1903) it declared its independence from Colombia and established a separate Government.

After 1968 control of Panama was increasingly taken over by Gen. Omar Torrijos, Commander of the National Guard, following a military coup. On October 11, 1972, at an assembly of representatives from the 505 electoral districts, the President and Vice-President were installed for a six-year term, and General Torrijos was designated as "Leader of the Revolution" with wide overriding powers. In October 1978 he withdrew from government, and Dr. Aristides Royo was elected President by the Assembly of Representatives. In September, 1977, in Washington, President Carter of the U.S.A. and Gen. Torrijos signed a treaty giving Panama control of the Panama Canal in the year 2,000.

The area of the Republic is 31,890 sq. m., the population (1976 est.) 1,718,000. The soil is moderately fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, sugar, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

Education is compulsory and free from 7 to 15 years.

*Language and Literature*.—The official language is Spanish. There are five Spanish language and one English language newspaper published daily in the capital.

*Finance*.—The monetary unit is the *Balboa* (= \$1 U.S.); no Panamanian paper currency is issued, and U.S. dollar bills of all values are in circulation in the Republic and in the Canal Zone.

TRADE

1980 (provisional)

Imports ..... U.S.\$1,396 million  
Exports ..... 406 million

Trade with U.K.†

1980 (provisional)

Imports from U.K. .... £34,900,000  
Exports to U.K. .... 4,100,000  
† Including Colon Free Zone.

The imports are mostly manufactured goods, machinery, lubricants, chemicals and foodstuffs; exports are bananas, petroleum products, shrimps, sugar, meat and fishmeal.

CAPITAL, Panama City. Population (1970 Census), 418,000.

FLAG.—Four quarters; white with red star (top, next staff), red (in fly), blue (below, next staff) and white with red star.

NATIONAL DAY.—November 3.

*Dependencies of Panama*.—Taboga Island (area 4 sq. miles) is a popular tourist resort of some 12 miles from the Pacific entrance to the Panama Canal. Tourist facilities are also being developed in the Las Perlas Archipelago in the Gulf of Panama. There is a penal settlement at Guardia on the island of Coiba (area 19 sq. miles) in the Gulf of Chiriqui.

PARAGUAYAN EMBASSY IN LONDON  
Braemer Lodge, Cornwall Gardens, S.W.7  
[01-937 1253]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Antonio Zuccolillo.  
*Counsellor and Consul General*, Rubén Alvarenga-Cabañas.  
*1st Secretaries*, Mrs. G. S. de Jáuregui; J. C. Frutos.

There is a Paraguayan Consulate in *Liverpool*.

*Area and Population*.—Paraguay is an inland subtropical State of South America, situated between Argentina, Bolivia and Brazil.

The area is computed at 157,000 square miles, with a population (est. 1980) of 3,167,900.

Eastern Paraguay consists of a series of plains, intersected by abrupt ranges of hills, none of which exceeds 2,300 feet above sea level. The Paraguay and Alto Paraná rivers are normally navigable for vessels of 6 to 7 feet draught. Some of the tributary streams are also navigable. The Pilcomayo river is navigable for small craft for 180 miles from Asunción. Paraguay

is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucú," or "endless," is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is a flat plain, rising uniformly towards its western boundary to a height of 1,140 feet; it suffers much from floods and still more from drought, but the building of dams and reservoirs has converted part of it into good pasture for cattle raising.

**Government.**—In 1535 Paraguay was settled as a Spanish possession. In 1811 it declared its independence of Spain.

The 1967 constitution provides for a two-chamber parliament consisting of a 30-member Senate and a 60-member Chamber of Deputies. Two-thirds of the seats in each chamber are allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18.

The President is elected for 5 years and may be re-elected for a further term. He appoints the Cabinet, which exercises all the functions of government. During parliamentary recess it can govern by decree through the Council of State, the members of which are representative of the Government, the armed forces and various other bodies.

**Production.**—About three-quarters of the population are engaged in agriculture and cattle raising. Cotton, soya beans, tobacco, edible and essential oils and timber are the main exports. The forests contain many varieties of timber which find a good market abroad. Paraguay's hydroelectric power station at Acaray produces 180,000 kW. of which a surplus is exported to Argentina and Brazil.

Brazil and Paraguay are carrying out a project to develop the potential of the River Paraná—annual output is planned at 10.7 million kWh. Similarly, Paraguay and Argentina are to develop the hydroelectric complex at the Yacireta rapids. This has a potential annual output of 3.5 million kWh. Work on the Itaipú hydroelectric scheme began early in 1976 (production is planned to start in late 1983) and work on the Jaciretá scheme began in 1978.

**Communications.**—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). This service is liable to cancellation without warning when the river is low or in flood. There are direct shipping services between Hamburg, Antwerp, Amsterdam and Asunción; New York, Philadelphia, Baltimore and Asunción; and Liverpool, London and Asunción. Eight airlines operate services from Asunción.

There are 1,176 km. of asphalted roads in Paraguay, connecting Asunción with São Paulo (26 hrs.) via the Bridge of Friendship and Foz de Yguazú and with Buenos Aires (24 hrs.) via Puerto Pilcomayo, and about 4,050 miles of earth roads in fairly good condition, but liable to be closed or to become impassable in wet weather. A 1000 km. road, of which 300 km. are paved, links Asunción with the Bolivian border. There are services to Buenos Aires, São Paulo and Paranaíba, a port on the Brazilian coast.

**Defence.**—There is a permanent military force of about 25,000 all ranks, most of whom are conscripts

doing their military service; and about 6,500 armed police (again mostly conscripts). Three gunboats and a number of small armed launches patrol inland waters.

**Language and Literature.**—Spanish is the official language of the country but outside the larger towns *Guarani*, the language of the largest single unit of original Indian inhabitants, is widely spoken. Three morning, one afternoon and three bi-weekly newspapers are published in Asunción. There are 48 AM, 15 FM and three TV stations in the country.

**Education.**—In 1980 there were 3,050 primary schools. They had 15,800 teachers and 503,000 students. The National University in Asunción had in 1980 a teaching staff of 1,184 and 12,000 students. The Catholic University had 7,000 students and about 620 teachers.

#### FINANCE 1982 (in million guaraníes)

Central Government	Decentralized Bodies	
Revenue . . . . .	94-237	197-661
Expenditure . . . . .	94-237	190-665

**Currency.**—A free exchange system was introduced in August, 1957. (See also p. 84.)

**Trade.**—The imports are chiefly articles of food and drink, consumer goods, textiles, vehicles and machinery. Main exports: Soja, cotton, tobacco, meat, timber, seeds, maize, fruit and vegetable oils.

#### Trade with U.K.

	1980	1981
Imports from U.K. . . . .	£14,736,842	£18,980,000
Exports to U.K. . . . .	3,420,000	2,720,000

**CAPITAL,** ΨAsunción, about 1,000 miles up the River Paraguay from Buenos Aires. Pop. (census, 1970), 437,000; other centres being ΨEncarnación, 47,333; Concepción, 52,826; and Villarica 38,052.

**FLAG.**—Three horizontal bands, red, white, blue with the National seal on the obverse white band and the Treasury seal on the reverse white band.

**NATIONAL DAY.**—May 14.

(PO Box 404)

**Ambassador Extraordinary and Plenipotentiary and Consul-General,** His Excellency Derrick Mellor (1979).

**2nd Secretary,** P. T. Rouse, M.B.E.

Asunción is approximately 4,000 miles distant from London by air. Transit by sea 25 days. By air approximately 21 hours flying time via Rio de Janeiro.

## PERU

(República del Perú)

**President,** Fernando Belaunde, *assumed office*, May 5, 1980.

PERUVIAN EMBASSY AND CONSULATE  
52 Sloane Street, S.W.1  
[01-235 1917]

**Ambassador Extraordinary and Plenipotentiary** (vacant).

**Minister and Chargé d'Affaires a.i.,** Armando Lecaros de Cossio.

**Naval and Military Attaché,** Vice-Adm. Julio Zapata.  
**Air Attaché,** Maj. Gen. Jaime R. Arrospide.

**Area and Population.**—Peru is a maritime Republic of South America, situated between 0° 00' 48" and 18° 21' 00" S. latitude and between 68° 39' 27" and 81° 20' 13" W. longitude. The area of the Republic including

4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles with a total population (census, 1972) of 14,121,564.

**Physical Features.**—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being *Huascarán* (22,211 feet), *Huandoy* (20,855 feet), *Ausangate* (20,235 feet), *Misti* volcano (18,364 feet), *Hualcan* (20,000 feet), *Chachani* (19,037 feet), *Antajasha* (18,020 feet), *Pichupichu* (17,724 feet), and *Mount Meiggs* (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area, lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population.

In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco, leche caspi and petroleum.

**Government.**—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quechua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic.

**Production.**—The chief crops are cotton, potatoes, and other vegetables, sugar, fruit, maize, rice, wheat, barley, grapes and coffee. Mineral exports include lead, zinc, copper, iron ore and silver. Peru is

normally the world's largest exporter of fishmeal. The value of fishmeal exports dropped for some years but is now recovering.

**Communications.**—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, *via* Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a pass rediscovered in 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout.

The first railway was opened in 1850 and the 2,400 miles of track are now administered by the Government. There is also steam navigation on the Ucayali (*see* Andean Highway above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and many international services call at Lima.

**Defence.**—The Army is recruited by voluntary enlistment, supplemented by conscription (2 years), and numbers about 45,000 of all ranks. Armoured units are equipped with American, Russian and French vehicles. Engineer units are employed on the construction of roadways in Peru using American equipment. **Navy.**—The Navy consists of 3 cruisers; 4 destroyers; 2 frigates; 2 corvettes; 6 U.S. submarines and 2 German submarines; 4 LST's; 5 river gun-boats; 4 fleet oilers; 4 fleet auxiliaries; 2 river transports; 14 patrol boats; 2 patrol launches; 1 floating dock and 2 tugs. The main Naval base is in Callao and supports all ships of the Fleet. There are training establishments in Callao and La Punta. The Naval Air Arm consists of U.S. and French helicopters; U.S. anti-submarine aircraft and DC3's. **Air Force.**—The Air Force is equipped with British Hunter and Canberra aircraft; American training, fighter and transport aircraft plus helicopters; French Mirage aircraft and Alouette helicopters. There are military airfields at Talara, Piura, Chiclayo, Lima, Pisco, Joya, Iquitos and Arequipa plus a seaplane base at Iquitos. There are also a Civil Guard and a Republican Guard whose members number respectively 30,000 and 5,000.

**Education.**—Education is compulsory and free for both sexes between the ages of 6 and 15. In 1972 a new Law of Education radically changed the structure of the system.

**Language and Literature.**—Spanish, the language of the original Spanish stock from which the governing and professional classes are mainly recruited, was formerly the only official language of the country. However, in May 1975, the Quechua language was declared by Decree Law as the second official tongue. Quechua and Aymara are widely spoken by more than half the population of the country. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879–1882, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943.

**Finance.**—The unit of currency is the *Sol* of 100 *centavos*. For rate of exchange, *see* p. 84.

*Trade.*—Import trade of Peru in 1980 totalled U.S.\$3,134 million and exports U.S.\$3,904 million. In 1980, Peru had an overall balance of payments surplus of about U.S.\$800 million.

**Trade with U.K.**

	1980
Imports from U.K. ....	£46,500,000
Exports to U.K. ....	77,400,000

The principal imports are machinery, foodstuffs, metal and manufactured metal goods, chemicals and pharmaceutical products. The chief exports are minerals and metals, fishmeal, sugar, cotton and coffee.

**CAPITAL.**—Metropolitan Lima (including  $\Psi$ Callao), population 3,595,000. Arequipa (561,338)  $\Psi$ Liquitos (540,560),  $\Psi$ Chiclayo (533,266).

**FLAG.**—Three vertical bands, red, white, red; coat of arms on white band. **NATIONAL DAY.**—July 28 (Anniversary of Independence).

**PHILIPPINE EMBASSY**  
9a Palace Green, W.8  
[01-937 1609]

*Ambassador Extraordinary and Plenipotentiary*, (vacant).

*Minister-Counsellor and Consul General*, Dr. Jaime S. Bautista.

*Armed Forces Attaché*, Capt. Artemio Tadiar.

*Commercial Attaché*, Miss E. M. Yulo.

**Area and Population.**—The Philippines are situated between 21° 20'–4° 30' N. Lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,929 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon	40,422	Mindoro	3,759
Mindanao	36,538	Leyte	2,786
Samar	5,050	Cebu	1,703
Negros	4,906	Bohol	1,492
Palawan	4,550	Masbate	1,262
Panay	4,446		

Other groups in the Republic are the Sulu islands (Capital, Jolo), Babuyanans and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines was estimated at the end of 1975 at 42,759,000.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent of them are Christians, predominantly Roman Catholics. Most of the remainder are Moslems, in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 500,000, and other much smaller foreign communities, notably Spanish, American and Indian.

**History.**—The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas", after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the Spanish-American War of

1898, Manila was captured by American troops with the help of Filipinos and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898. However, the Filipinos rose up in arms on Feb. 4, 1899, against the U.S. Government, maintaining a desultory rebellion until 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted in 1916 and in 1934 the Philippines were granted a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946 with a presidential form of government based on the American system. Martial law was imposed on September 21, 1972. This was lifted, except in two southern provinces, on January 17, 1981. On January 17, 1973, a revised constitution, providing for a parliamentary form of government with a unicameral legislative, was proclaimed after its ratification in a national referendum. Elections were held on April 7, 1978 for 165 seats in the new Interim National Assembly, which is intended to prepare the way for a permanent body. This met for the first time on June 12, 1978 when the President was sworn in as Prime Minister. Constitutional amendments were approved in April 1981 providing for a French-style system of parliamentary government with a strong executive Presidency. President Marcos subsequently fought and won a Presidential election.

*Language and Literature.*—The official languages are Pilipino and English. Pilipino, the national language, is based on Tagalog, one of the Malay-Polynesian languages which according to the 1970 census is spoken by 55.2 per cent of the population. English, which is the language of government and of instruction in secondary and university education, is spoken by at least 44 per cent of the population. Spanish, which ceased to be an official language in 1973, is now spoken by only 3.6 per cent. 73 per cent of the population are literate. Secondary and higher education is extensive and there are 37 private universities recognized by the Government, including the Dominican University of Santo Thomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there are also 213 State-supported colleges and universities, including the University of the Philippines, founded 1908. Students at private and state colleges and universities in 1978-79 numbered 1,129,056.

*Roads and Railways.*—Communications suffered serious damage during the War of 1941-45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system covered 63,542 kilometres in 1978 and in 1977 there was a total of 986,466 registered road vehicles. The railways operate approximately 740 miles of track. The Philippine National Railway, on Luzon Island, has been converted to diesel traction.

*Shipping.*—There are 93 ports of entry in the Philippines and 12,049 vessels of various types (including 172 ocean-going vehicles), totalling 2,319,500 tons, are engaged in inter-island traffic.

*Civil Aviation.*—The Civil Aeronautics Administration (C.A.A.) operates and maintains 82 national airports. Philippine Air Lines have regular flights throughout the Far East and operate trans-Pacific flights to San Francisco, in addition to inter-island services. Air Manilla (Inc.) also operate charter international and local air services.

## TRADE

	1980
Total imports .....	\$7,726,912,426
Total exports .....	5,787,787,554

## Trade with U.K.

	1980
Imports from U.K. ....	£88,998,000
Exports to U.K. ....	99,018,000

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), fruits, tobacco and lumber. There is, however, an increasing number of manufacturing industries and it is the policy of the Government to diversify its economy.

Principal exports are sugar, coconut oil, copper concentrate, logs and lumber and copra.

*CAPITAL.*— $\Psi$ Manila, in the island of Luzon: population (1975): City area, 1,438,253; Manila with suburbs (incl. Quezon City, Pasay City, Caloocan City, Makati, Parañaque, San Juan Mandaluyong and Navota), 3,356,404. The next largest cities are  $\Psi$ Cebu (418,517),  $\Psi$ Davao (515,520),  $\Psi$ Iloilo (247,956),  $\Psi$ Zamboanga (240,066), and Bacolod (196,492).

*FLAG.*—Equal horizontal bands of blue (above) and red; gold sun with three stars on a white triangle next staff.

*NATIONAL DAY.*—June 12 (Independence Day).

POLISH EMBASSY IN LONDON

47 Portland Place, W.1

[01-580 4324]

Ambassador Extraordinary and Plenipotentiary, His Excellency Stefan Staniszewski.

**Area and Population.**—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tehran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles. In the 1978 Census it was 35,032,000. Roman Catholicism is the religion of 95 per cent. of the inhabitants.

**Government.**—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share, the Tsar assuming the title of King of Poland, and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrians absorbed the Cracow Republic. Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17, 1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952, and was modified in February 1976. It changed the title of the country to the Polish

People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion were recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, and dissatisfaction with the régime and conditions of life led to riots in Poznań in June, 1956. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government took office. Elections to the *Sejm* have been held in 1961, 1965, 1972, 1976 and 1980. The expression of severe popular discontent in December 1970 led to the ousting of Gomulka, and substantial Government and Party changes followed. In June 1976 the government introduced steep price rises for food stuffs but after strikes and riots in a number of Polish cities these proposals were dropped. In July 1980 steep rises in food prices but static wages led to widespread strikes. The strikes continued throughout August, causing a major government reshuffle and obliging the government to agree to allow independent trade unions, the right to strike, the easing of censorship and other political and economic demands. The independent trade union movement, Solidarity, led by Lech Walesa, became a powerful force but many of its leaders, including Walesa, were detained and union activity suspended when martial law was declared on Dec. 12, 1981. Initially there was widespread passive resistance to martial law, which flared up in August 1982 into public demonstrations when the Government attempted to prevent celebrations of the Solidarity's second anniversary.

**Education.**—Elementary education (ages 7-15) is compulsory and free. Secondary education is optional and free. There are universities at Kraków, Warsaw, Poznań, Łódź, Wrocław, Lublin and Toruń and a considerable number of other towns.

**Language and Literature.**—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being used. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism, whose chief Polish exponent was Adam Mickiewicz, was followed by

realistic and historical fiction, including the works of Henryk Sienkiewicz (1846–1916), Nobel Prize-winner for Literature in 1905, Boleslaw Prus (1847–1912), and Stanislaw Reymont (1868–1925), Nobel Prize-winner in 1924.

*Production and Industry.*—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 99 per cent of Polish industry is stated to be “socialized”, but 68 per cent of agricultural land is privately farmed.

#### EMBASSY IN LONDON

11 Belgrave Square, S.W.1

[01–235 5331]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency João de Freitas-Cruz (1980).  
*Minister-Counsellor*, Sr. José Maria de A. S. de Lemos Macedo.

*1st Secretary*, Sr. Paulo G. Castilho.

*Area and Population.*—Continental Portugal occupies the western part of the Iberian Peninsula, covering an area of 34,000 square miles. It lies

between 36° 58'–42° 12' N. lat. and 6° 11' 48'–9° 29' 45' W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The population (including the Azores and Madeira) was estimated at 9,862,700 in 1979.

New statutes granting greater autonomy to the Atlantic islands of the Azores were promulgated in 1980. Provisional statutes for Madeira were published in 1976. The territory of Macao remains under Portuguese administration.

*Government.*—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manuel II and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government.

After the fall of the monarchy in 1910, a period of great political instability ensued until eventually the military stepped in. The Constitution of 1933 gave formal expression to the corporative “Estado Novo” (New State) which was personified by Dr. Salazar, Prime Minister from 1932–68. Dr. Caetano succeeded Salazar as Prime Minister in 1968 but his failure to liberalize the régime or to provide any alternative to continuing the wars in the African colonies resulted in his government’s overthrow by a military coup on April 25, 1974. The next two years were characterized by great political turmoil with no fewer than 6 provisional governments between April 1974 and July 1976 but with the failure of an attempted coup by the extreme left in November 1975 the situation began to become more stable. Elections for a Constituent Assembly were held on April 25, 1975, and for the Assembly of the Republic on April 25, 1976. Both showed that the Communists and the extreme left generally lacked wide support among the population. In the April 1976 Legislative Assembly elections and in the December local elections, the Socialist Party of Dr. Mário Soares won the largest number of votes (37.8 per cent of the total), but since the Dec. 1979 elections a centre-right coalition of the Social Democratic, Centre Democratic and Popular Monarchist parties, known as the Democratic Alliance, has held office. Constitutional reforms introduced in Aug. 1982 abolished the Council of the Revolution, ending the military’s capacity to intervene in government.

*Defence.*—All physically fit males are liable for military service, but conscription is becoming increasingly selective as the armed forces are being greatly reduced following the end of the colonial wars, and reorganized and re-equipped for a conventional national defence role. The present strength of the Army is about 36,000. One brigade is earmarked for N.A.T.O. service. The Navy consists of about 12,000 officers and men, including 2,000 marines, manning about 60 craft of various types, many of which are obsolete. The present serving strength of the Air Force is about 9,000, (including paratroops) and about 80 aircraft of various types.

*Education* is free and compulsory for six years from the age of 7. Secondary education is mainly conducted in State lycéums, commercial and industrial schools, but there are also private schools. There are also military, naval, technical and other special schools. There are old established Universities at Coimbra (founded in 1290), Oporto and Lisbon. Three new Universities have been established at Lisbon, Braga and Aveiro.

*Language and Literature.*—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil, and is the *lingua franca* of Angola, Mozambique and Guinea-Bissau.

Portuguese language and literature reached the

culminating point of their development in the *Lusíadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camoës), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is flourishing.

**Newspapers and Broadcasting.**—There are now 9 main daily newspapers in Lisbon and 4 in Oporto, and 3 main weekly newspapers. Most have been losing money and the Government has announced plans for a radical reorganization of the newspaper industry. There are 2 TV channels (broadcasting in colour) and 5 radio stations (4 state controlled) broadcasting nationwide.

**Civil aviation** is controlled by the Administração Nacional Aeronáutica. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There are direct flights between London and Faro in the Algarve.

**Agriculture.**—The chief agricultural products are cork, maize, wheat, rye, rice, oats, barley, potatoes, beans, onions, olives, oranges, lemons, figs, almonds, tomatoes, timber, port wine and table wines. There are extensive forests of pine, cork, eucalyptus and chestnut covering about 20 per cent of the total area of the country.

**Industry.**—The country is so far only moderately industrialized, but is fairly rapidly extending its industries. The principal manufactures, some of which are still protected by high tariffs, are textiles, clothing and footwear, machinery (including electric machinery and transport equipment), foodstuffs (tomato concentrates and canned fish), chemicals, fertilizers, wood, cork, furniture, cement, glassware and pottery. There is a modern steelworks, and two modern and very large shipbuilding and repair yards at Lisbon and Setúbal working mainly for foreign ship-owners. There are several hydro-electric power stations and a new thermal power station. **Minerals.**—The principal mineral products are pyrites, wolfram, tin, iron ores, copper and sodium and calcium minerals.

**Finance.**—Portugal is a member of the European Monetary Agreement, the World Bank, the International Monetary Fund and the International Finance Corporation. The country has substantial, but declining, gold and foreign exchange reserves.

**Currency.**—*Escudos* (of 100 *Centavos*). *Conto* consists of 1,000 *Escudos*.

**Trade.**—Total trade of Portugal in 1979 amounted to imports valued at \$US545.2 million and exports valued at \$US290.4 million. The British share of the Portuguese import market amounted to 9.1 per cent and the United Kingdom imported 18.1 per cent of all Portuguese exports.

Portugal is a member of EFTA, GATT and OECD. Portugal has signed a Trade Agreement with EEC and the Government has announced its intention of achieving full membership of the EEC; negotiations begun in October 1978. The principal imports are cereals, meat, raw and semi-manufactured iron and steel, industrial machinery, chemicals, crude oil, motor vehicles and raw materials for textiles.

The principal exports are textiles, foodstuffs, timber, cork, electrical and other machinery, and chemicals.

#### MADEIRA AND THE AZORES

Madeira and The Azores are two administratively autonomous regions of Portugal, having locally elected Assemblies and Governments.

**Madeira** is a group of islands in the Atlantic Ocean about 520 miles south-west of Lisbon, and consist of Madeira Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles with a population of 265,600 (1978). ΨFunchal in Madeira, the largest island (270 square miles), is the capital, with a population of 54,068; Machico (10,905).

**The Azores** are a group of 9 islands (Flores, Corvo, Terceira, São Jorge, Pico, Faial, Graciosa, São Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 292,200 (1978). ΨPonta Delgada, the capital of the group has a population of 21,347. Other ports are ΨAngra, in Terceira. (16,476) and ΨHorta (2,509).

#### PORTUGUESE OVERSEAS PROVINCES

The former Portuguese overseas territories of Guinea-Bissau, Mozambique and Angola achieved independence in 1974, 1975 and 1976 respectively.

ΨMACAU, in China, on an island in the Canton River, has an area of 5 square miles and a population (1970) of 248,316.

After some months of confused fighting between rival indigenous factions, PORTUGUESE TIMOR (the eastern part of the island), situated in the Malay Archipelago, was incorporated into Indonesia in July 1976.

#### QATAR

Amir of Qatar, H.H. Sheikh Khalifa Bin Hamad Al-Thani, C.C.M.G.; assumed power February 22, 1972 (also *Prime Minister*).

EMBASSY IN LONDON  
27 Chesham Place, S.W.1  
[01-235 0851]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sherida Sa'ad Jubran Al-Ka'abi.  
*Counsellor*, Abdulrahman A. Al-Wohaibi.

Until 1971, Qatar was one of the nine independent Emirates in the Arabian Gulf in special treaty relations with the Government of the United Kingdom. In that year, with the withdrawal of H.M. Forces from the area, these special treaty relations were terminated. On April 2, 1970 a Provisional Constitution for Qatar was proclaimed, providing for the establishment of a Council of Ministers and for the formation of a Consultative Council to assist the Council of Ministers in running the affairs of the State. The first Cabinet was formed of 10 members on May 29, 1970. Qatar is a member of the Arab league as well as of the United Nations.

The state of Qatar covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 4,000 sq. miles, with a population estimated in 1982 at about 250,000.

The great majority of the population is concentrated in the urban district of the capital Doha. Only a small minority still pursue the traditional life of the semi-nomadic tribesmen and fisherfolk. There are townships on the coast at Khor, Dukhan, Wakra and Umm-Said. Although Qatar is a desert country, there are many gardens and farms near Doha and to the North and encouragement is being given to the development of agriculture.

Doha is an expanding town with good shopping facilities and services and an airport built to international standards. Regular air services connect Qatar with Bahrain and the United Arab Emirates, Kuwait, Muscat, Iran, Saudi Arabia, Jordan, Syria, Lebanon, Egypt, the Indian sub-continent and Europe.

In April, 1973, the new Qatar *Riyal* was introduced. It is tied to the U.S. dollar at QR1 = \$3.6502.

Current industrial development projects include a steel mill, a fertiliser plant, a cement factory, a petrochemical complex and two natural gas liquids plants. A new 50,000 b.p.d. oil refinery is being built to supplement the existing 10,000 b.p.d. domestic refinery. With the exception of the cement works, which is at Umm Bab, all these industries are at Umm Said which is being developed as an industrial area. An offshore gas field (North Field), containing one of the largest known gas fields in the world, has yet to be tapped. Qatar is also rapidly expanding its infrastructure including electrical generation and water distillation, roads, ports, hotels, houses, and Government buildings.

The Qatar Broadcasting Service transmits on medium, shortwave, and V.H.F. Regular television transmissions in colour began in 1974 and a second channel opened in 1982.

The Qatar General Petroleum Corporation is the state-owned company controlling Qatar's interests in oil, gas and petrochemicals. Since its merger in 1980 with the Qatar Petroleum Producing Authority, the corporation is responsible for Qatar's oil production of about 300,000 b.p.d. through its two operational divisions; Onshore (formerly the Qatar Petroleum Company, or consortium which first shipped oil in 1949 and was taken over in 1976) and Offshore (formerly Shell Company of Qatar which was taken

over in February 1977). Explorations continue for further oil and also in connection with the large reserves of natural gas in the North Field.

#### ROMANIAN EMBASSY IN LONDON

4 Palace Green, W.8

[01-937 9666]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Vasile Gliga (1980).

*Area and Population*.—Romania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* under the *Treaty of Paris* (April, 1856). The area of Romania is 237,500 sq. km. and the population in July, 1979 was 22,048,305.

*Government*.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality was recognized as an independent State, and part of the *Dobrudja* (which had been occupied by the Romanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914–18 added Bessarabia, the Bukovina, Transylvania, The Banat and Crisana-Maramures, these additions of territory being confirmed in the *Treaty of St. Germain*, 1919, and the *Treaty of Petit Trianon*, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Romania ceded to Bulgaria the portion of Southern Dobrudja (about 3,000 sq miles) taken from Bulgaria in 1913. Romania became "The Romanian People's Republic" in December, 1947, on the abdication of King Michael.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in February, 1957, in March, 1961, and in March, 1965. A new Constitution

was approved by the Grand National Assembly in 1965 when the name of the state was changed to The Socialist Republic of Romania. The Constitution states (Art. 3) that the leading political force of the whole society is the Romanian Communist Party. The Constitution was modified in March, 1974.

*Agriculture*.—The soil of Wallachia and Moldavia is among the richest in Europe, producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax and hemp. Agriculture and sheep and cattle raising are the principal industries of Romania, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive, and the timber industry is important.

Socialization of agriculture was completed when plans for collectivization were fulfilled in the spring of 1962, some three years ahead of the planned date.

*Natural Resources and Industry*.—Before the war petroleum and agriculture were the backbone of the Romanian economy. Though the production of both industries has increased, they no longer hold the same dominant position. There are plentiful supplies of natural gas, together with various mineral deposits including coal, iron ore, bauxite, lead, zinc, copper and uranium in quantities which allow a substantial part of the requirements of industry to be met from local resources. Since 1948 industrialization has proceeded rapidly and heavy investments have been made in electrical power, the chemical, metallurgical and engineering industries and growing attention is being paid to light industry. The economy is centrally organized on the basis of Five-Year Plans which cover all branches of national activity including investment and production.

1979 production figures were: crude oil, 12,323,000 tons; coal 32,764,000 tons; electric power, 64,933,000 kwh; methane gas, 27,189,000 cu. metres; steel, 12,909,000 tons; wheat and rye, 4,716,300 tons; maize, 12,424,500 tons; sugar-beet, 6,109,100 tons.

*Language and Literature*.—Romanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled

and authorized by the Council for Socialist Culture and Education, which has the status of a Ministry. The leading religion is that of the Romanian Orthodox Church; the Roman Catholics and some Protestant denominations are of importance numerically. The Jewish community has declined through emigration.

*Education* is free and nominally compulsory, with 4,680,917 in attendance in 1979-80, including 192,546 in higher education. There are Universities at Bucharest, Iasi, Cluj, Timisoara, Craiova and Brasov. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galati and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

*Communications*.—In 1979 there were 11,113 km. of railway open for traffic. The mercantile marine had a gross tonnage of 13,220,000 tons in 1979. The principal ports are Constanta (on the Black Sea), Sulina (on the Danube Estuary), Galati, the most important, Braila, Giurgiu and Turnu Severin. Romania is a member of the Danube Commission whose seat is at Budapest.

FINANCE

	1979
	<i>Lei</i>
Revenue .....	339,309.3m
Expenditure .....	337,626.8m

The Romanian *Lei* (of 100 *Bani*) had been revalued three times since the war. With a 141.45 per cent. premium on all "capitalist" currencies for non-commercial transactions, the effective exchange rate in July, 1981 was *Lei* 20.96 = £1. (See also p. 84.)

TRADE

	1979
	<i>Lei</i>
Imports .....	48,792m
Exports .....	43,467m

No detailed statistics for foreign trade have been published since 1974. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; export consists principally of maize, wheat, barley, oats, petroleum, timber, cattle, machines and industrial equipment. Trade with U.K., although relatively small, has been growing steadily over the past few years. External trade with Communist countries dropped from 80 per cent. in 1960 to 45 per cent. in 1978.

Trade with U.K.

	1980
Imports from U.K. ....	£98,914,000
Exports to U.K. ....	64,795,000

*CAPITAL*, Bucharest, on the Dimbovitza, population 1,960,097. Other large towns are: Constanța (279,308); Iasi (262,493); Timișoara (281,320); Cluj-Napoca (274,095); Brașov (299,172); Ploiești (207,009); Craiova (220,893); ΨGalati (252,884); ΨBrăila (208,983); Arad (172,669); Oradea (178,407); Sibiu (156,854); Pitești (133,179); Tîrgu Mures (129,284).

*FLAG*.—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band.

*NATIONAL DAY*.—August 23 (Liberation Day, 1944).

BRITISH EMBASSY

24 Strada Jules Michelet, Bucharest

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Paul Cecil Henry Holmer, C.M.G. (1979).  
*Counsellor*, J. M. Willson (*Commercial*).

*Defence, Naval and Military Attaché*, Lt.-Col. J. P. MacDonald.

*Cultural Attaché*, J. Harniman.

RWANDA  
(Republic of Rwanda)

*President*, Major General Juvénal Habyarimana, assumed office, July 5, 1973.

Rwanda became an independent republic on July 1, 1962. Formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, it has an area of 10,169 sq. miles and a population of 4,500,000, mainly of the Bahutu tribe, with Batutsi and Batwa minorities. Coffee, cotton and tea are grown and there is some mineral production. Hides, bark of quinine and extract of pyrethrum flowers are also exported.

A University was opened at Butare in 1963.

The currency is the *Rwanda franc*. In 1979 total imports were valued at *Rw.Fr.* 10,594,100,000; total exports, *Rw.Fr.* 15,750,000,000; imports from U.K. (1980) £4,666,000; exports to U.K. £1,245,000.

At a referendum held in September, 1961, under supervision of the United Nations, a large majority voted against the retention of the monarchy which was accordingly abolished on Oct. 2, 1961. Elections for a new Legislative Assembly were also held in September, 1961, and the Assembly elected M. Kayibanda as President of the National Council, to hold office as Head of State and Head of the Government. He was deposed in 1973, and replaced by a military government under Maj.-Gen. Juvénal Habyarimana. On Dec. 24, 1978, Gen. Habyarimana was elected President for a further period of five years.

*CAPITAL*.—Kigali (7,000).

*FLAG*.—Three vertical bands, red, yellow and green with letter R on yellow band.

*NATIONAL DAY*. July 1.

*British Ambassador*, His Excellency John Michael Owen Snodgrass (resident at *Kinshasa*).

EL SALVADOR  
(República de El Salvador)

*President*, Dr. Alvaro Magaña, elected, April 29, 1982.

*SALVADOREAN EMBASSY AND CONSULATE*  
9 Welbeck House, Welbeck Street, W.1  
[01-636 9563]

*Ambassador Extraordinary and Plenipotentiary*, (vacant).

*Area and Population*.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an area of 8,200 square miles with a population of 4,539,000 (Dec. 1977). El Salvador is therefore a densely populated country with some 530 persons per square mile. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 3, 1965, when considerable damage was done to San Salvador.

The principle river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

**Government.**—El Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. Under a new Constitution adopted in 1950, the President is elected for five years and the Legislature for two.

After two years of government by a Junta headed by José Napoleon Duarte, elections for a Constituent Assembly were held in March 1982. Six political parties participated and about 70 per cent of the electorate voted. A coalition government was formed of the leading parties and a political independent, Dr. Mangaña, appointed President. The three Vice-Presidents represent the three largest political parties; Christian Democrat Party, ARENA and National Conciliation Party.

**Agriculture.**—The principal cash crops are coffee, which is grown under shade-trees principally on the slopes of the volcanoes, cotton, which is cultivated on the coastal plains, and sugarcane. Also cultivated are maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and cereal bags. Land reforms, announced in March 1980, are being undertaken. The Salvadorean Coffee Company and the banking system are nationalised.

**Industry.**—Existing factories make textiles, constructional steel, furniture, cement and household items. El Salvador is a member of the Central American Common Market. The first trade zone was inaugurated in November 1974 and the National Assembly approved a new Export Development Law.

**Education.**—The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

**Language and Literature.**—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

**Communications.**—The former El Salvador Railways and the Salvadorean Section of International Railways of Central America have been merged under the Executive Autonomous Port Commission (CEPA) which also administers the previously foreign-owned port of Cutuco, at La Union and the principal port of Acajutla. The new railroad organization is styled FENADESAL. There is continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The roads are paved and in good condition. There are good motor roads between Port Acajutla and the capital (60 miles), and between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. TACA, LANICA, COPA, TAN-SAHSA, SAM, Iberia and LACSA connect El Salvador with the rest of the world. British Airways, British Caledonian, SABENA, Iberia and other important airway companies are represented in San Salvador. The El Salvador international airport can receive jet aircraft.

There are post and telegraph offices throughout the country. There are many broadcasting stations and six television stations.

## FINANCE

	1980
	Colones

HONORARY BRITISH CONSULATE  
Gibson y Cia (Suc.), P.O. Box 242,  
San Salvador

*Honorary Consul*, W. H. J. Chippendale, O.B.E.  
San Salvador is 5,700 miles from London.

**SAN MARINO**  
(Repubblica di San Marino)

*Regents*, Two "Capitani Reggenti".

CONSULATE GENERAL IN LONDON  
7 Hanover Square, W.1.  
*Consul-General*, The Lord Forte.

A small Republic in the hills near Rimini on the Adriatic, founded, it is stated, by a pious stonemutter of Dalmatia in the 4th century. The Republic always resisted the Papal claims, and those of neighbouring dukedoms, during the 15th–18th centuries, and its integrity and sovereignty is recognized and respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Heads of State. The Great and General Council, a legislative body of 60 members, is elected by a universal suffrage for a term of 5 years. A Council of Twelve forms in certain cases a Supreme Court of Justice. The area is approximately 23 square miles, the population (March 31, 1980) is 21,359. The city of San Marino, on the slope of Monte Titano, has three towers, a fine church and Government palace, a theatre and museums. The principal products are wine, cereals, and cattle, and the main industries are tourism, ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

**FLAG.**—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

BRITISH CONSULATE-GENERAL  
*Consul-General*, R. A. Eilbeck (resides at Florence).

## SÃO TOMÉ AND PRÍNCIPE

*President*, Dr. Manuel Pinto da Costa.

The islands of São Tomé and Príncipe are situated in the gulf of Guinea, off the west coast of Africa. They have an area of 372 square miles, and a population (1977 est.) of 82,000.

Following Portugal's decision to grant independence, a transitional government was installed on Dec. 21, 1974, and the islands became an independent democratic republic on July 12, 1975.

Cacao is the main product.

## Trade with U.K.

	1980
Imports from U.K. ....	£2,103,000
Exports to U.K. ....	99,000

## ROYAL SAUDI ARABIAN EMBASSY

30 Belgrave Square, S. W. 1

[01-235 0831]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sheikh Nasser Almanqour (1980).  
*Minister Plenipotentiary*, Naji S. Mufti.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd becoming also King of the Hijaz.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Abdulaziz Ibn Saud as an independent ruler, King of the Hijaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with a population (1976 est.) of 9,160,000. Islam is the established and only permitted religion.

In the 18th century Nejd was an independent state governed from Diriya (now in ruins, 25 km. from Riyadh) and the stronghold of the Wahhabis, a puritanical Islamic sect. It subsequently fell under the Turkish yoke, but in 1913 Abdulaziz Ibn Saud threw off Turkish rule and captured the Turkish province of al Hasa. In 1920 he captured the Asir, and in 1921, by force of arms, he added to his dominions the Jebel Shammar territory of the Rashid family. In 1925 he completed the conquest of the Hejaz. The discovery of oil in 1938, the exploitation of this resource after World War II, and the increases in oil prices, and consequently in state revenues, since 1973 have enabled the Kingdom to make rapid strides towards Western standards of development. In the interim the nomadic lifestyle of the Bedouin has disappeared: in 1979 only about 5 per cent of the population was still truly nomadic.

Nejd ("Plateau"), now the Central Province, has no definite frontiers, but extends over Central Arabia including the Nafud and Dahna deserts. The population is estimated at about 2 million (1976) concentrated on the national capital Riyadh (approx. 1 million) and the main provincial towns of al Kharij, Unaiza, Buraidah and Hail. Apart from a concentration of light industry in Riyadh the area is agricultural: about 110,000 hectares are farmed as dry lands, with some irrigation.

Al Hasa is now incorporated into the Eastern Province, which extends from the Iraq/Kuwait borders in N. to Rub al Khali desert in S. and from the Gulf to Dahna desert in west. The population is about 1 million, concentrated on the seaboard towns of Dammam, Al Khobar and Qatif, and in Hofuf. Oil was found in commercial quantities in Dhahran, near Dammam, in 1938. Total production of crude oil

in 1978 averaged 8.3 million barrels/day: in early 1980 the average was reported to be 9.5 m.b.d. About 97 per cent of the total is extracted by the Arabian-American Oil Company. Aramco's 66-year lease will terminate in 1999 but the company was nationalized in 1980. Aramco operates a deep-water oil terminal at Ras Tanura. The modern commercial port at Dammam has 37 piers with an annual capacity of 9.1 million tons: it is linked by a railway line via Hofuf to Riyadh, where a dry port opened in 1981. There is a concentration of manufacturing industries around Dammam. Al Hasa is traditionally a dry farming area, and at Haradh a major irrigation scheme will cover 16,000 hectares. Jubail, one of the industrial poles is approx. 75 km. north of Dammam.

The Hijaz ("the Boundary"—between Nejd and Tihama), known as the Western Province, extends from Asir in S. to Northern Province and from the Red Sea to the boundaries of the Central Province (300–350 km. inland). The population estimated at 2.3 million is concentrated in Jeddah (1 million) and the holy towns of Mecca and Medina. The former, about 60 km. east of Jeddah, is the birthplace of the Prophet Muhammad, and contains the Great Mosque, within which is the Kaaba or sacred shrine of the Muslim religion. This is the focus of the annual Hajj ("Pilgrimage") performed by almost 2 million in 1980. The latter, Medina al Munawwarah ("The City of Light") some 300 km. north of Mecca, is celebrated as the first city to embrace Islam and as the Prophet Muhammad's burial place (he died there on Rabia 12, 11 AH, corresponding to June 7, 632 AD). Medina was the terminus of the now abandoned Hejaz railway from Damascus. The traditional wealth of the Hejaz was founded on the pilgrimage traffic to Mecca and Medina, and on the role of Jeddah as an entrepôt for commercial traffic on the Red Sea. The modern commercial port at Jeddah had 43 piers with an annual capacity of 17 million tons in 1981. The city is a centre of light industry. Dryland farming is practised in the region. Yanbu, the second industrial pole (see below) is on the coast some 350 km. north of Jeddah.

Northern Province incorporates the areas north and west of the Nafud desert, from the Red Sea eastward along the borders of Jordan and Iraq. The population of a little over half a million is centred on the provincial capitals of Tabuk and al Jouf. There is little industrial development in the region: dryland and irrigated farming covers some 3,000 hectares.

Asir ("Inaccessible") named for its mountainous terrain, and the coastal plain of the Tihama constitute the Southern Province, which extends from the border with Yemen north for some 500 km. to the port of al Lith, and inland approx. 200 km. to include Bishah and Najran. The population of about 1.85 million is engaged largely in agriculture, this being the only region to enjoy substantial rainfall. Water supplies are, however, being supplemented by dams and irrigation. The region is served by the ports of Qufudah and Jizan, and is the home of the first National Park.

**Finance and Trade.**—Oil has replaced customs duties and foreign exchange accruing from the pilgrimage traffic as the main source of receipts in the balance of payments. In the fiscal year 1981–82 (ended April, 1982) the Government revenue was SR340,000 million, of which 25 per cent accrued from oil royalties, and 73 per cent from income tax on companies and individuals. The 1982–83 budget provided for revenue and expenditure of SR313,500 million, of which 52 per cent was allocated to development projects. There is no public debt. There are no restrictions on foreign exchange transactions. The currency is strong and backed by gold and foreign exchange reserves.

With the exceptions of alcohol, pork meat and

firearms there are no restrictions on imports. Imports in 1981 were valued at SR119,298 million (up 8 per cent on 1980), the leading suppliers being the U.S.A. 21 per cent, Japan 18 per cent, West Germany 9 per cent, Italy 6.7 per cent, the U.K. 6.2 per cent and France 5 per cent. Exports in the same year were SR405,481 million (up 12 per cent on 1980), the chief customers being Japan 17 per cent, U.S.A. 13 per cent, France 9 per cent, Italy 7 per cent, Netherlands 5.6 per cent and Singapore 4.8 per cent.

#### Trade with U.K.

	1980
Imports from U.K. ....	£946,000,000
Exports to U.K. ....	1,927,583,000

**Industry.**—The Government actively encourages the establishment of manufacturing industries in the country. The policy includes the provision of industrial estates and loans covering 50 per cent of capital investment. By December 1980, 2,208 licences had been granted for industrial plants. Of these 35.8 per cent were related to the construction industry (577 for articles of clay, cement, marble, stone and gypsum, and 213 for structural metal products), 16.7 per cent to food and drink processing, and 17.8 per cent to light engineering (7.6 per cent) chemical-based (5.7 per cent) and furniture (4.5 per cent) industries. The Government has also established two industrial poles at Jubail and Yanbu, to be the focus of heavy industrial development. Linked by gas and oil pipelines, both are to have petrochemical complexes producing, initially, ethylene and methanol, for which agreements have been signed with American companies. In addition an integrated steel complex and a urea fertilizer factory are under construction in Jubail with West German and Taiwanese partners. Complete new cities are being built at each pole: Jubail will eventually house 300,000 and Yanbu 150,000.

**Communications.**—The railway from the port of Dammam to the oilfields at Alqaiq and through Hofuf to Riyadh was opened in 1951. An extension to Jeddah via Medina and the reopening of the Hejaz railway are planned. A direct line Dammam-Riyadh is under construction. Metalled roads connect all the cities and main towns: the network consisted of 22,501 km. in 1981. The Government-owned Saudi Arabian Airlines (Saudia) operate Lockheed Tri-Star, Douglas DC8, Fokker Friendship and Fellowship F-28, and Boeing 707, 737, 747, 747SP, and Airbus aircraft. Scheduled services are flown to 19 domestic airports. There are international class airports at Dhahran, Jeddah and Riyadh: a new international airport is under construction at the latter. Saudia have an extensive overseas operation including 15 flights to London per week. A large number of international airlines operate into the country. Telecommunications are being rapidly expanded. By mid-1981 433,000 telephone lines were installed: another three-quarters of a million are to be in operation in 1985. International direct dialling is available. By 1979 there were 11 ground satellite stations for inter-city communications and two for international lines. There were also 6,350 telex lines in 19 cities and towns.

**Education.**—With the exception of a few schools for expatriate children, all schools are Government supervised. In 1981 there were (including schools for both boys and girls) a total of 5,744 elementary, 2,181 intermediate and secondary schools. There are Universities in Jeddah, Mecca, Riyadh (branches in Abha, to become independent, and Qassim) and Dammam (branch at Hofuf). There is a University of Petroleum and Minerals at Dhahran, and there are Islamic Universities in Medina and Riyadh. In addition the Ministry of Labour runs vocational

training centres providing combined literacy and artisan skill training (there were 18 centres in 1981) and more advanced technical training schools and institutes (9 in 1981). Education in government-owned institutes is free at all levels.

**CAPITAL.**—Riyadh, population about 1 million.

**FLAG.**—Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

**SENEGAL**  
(République du Sénégal)

*President and Head of Government*, Abdou Diouf, installed, Jan. 1, 1981.

*Prime Minister*, Habib Thiam.

**SENEGAL EMBASSY IN LONDON**  
11 Phillimore Gardens, W.8  
[01-937 0925]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Ousmane Camara.

Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea-Bissau in the south. (For MAP, see p. 843.) It has an area of 77,814 sq. miles and a population (1978) of 5,377,000.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. In March, 1963 (after an attempted *coup d'état* by the then Prime Minister in the previous December) a new constitution was approved giving executive powers to the President, on the lines of the present French constitution. The first Presidential and legislative elections under a new, multi-party system took place on Feb. 26, 1978. President Senghor was returned with 82 per cent of the vote, the remainder going to the leader of the P.D.S. In the legislative elections the P.D.S. took 18 of the 100 seats in the National Assembly, the P.A.I. nil, and the P.S. 82. President Senghor resigned from office on December 31, 1980. Under the new President, opposition parties continue to exist.

In Feb. 1982, after an attempted coup in The Gambia in July 1981, a federation of Senegal and The Gambia was set up. This will be known as Senegambia and will be concerned at first with defence and internal security. The sovereignty of each country will be maintained, as will their separate names.

The next elections will take place in 1983. Senegal's principal exports are groundnuts (raw and processed) and phosphates.

**SOMALI EMBASSY**  
60 Portland Place, W.1  
[01-580 7148]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Mohamed Jama Elmi (1980).

The Somali Democratic Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Cape Guardafui (12° N.); and on the Gulf of Aden to the boundary with Djibouti. Somalia is bounded on the west by Djibouti, Ethiopia and Kenya and covers an area of approximately 246,000 sq. miles. The population, of which a large proportion is nomadic, is estimated (June, 1981) at 4,000,000.

Livestock raising is the main occupation in Somalia and there is a modest export trade in livestock on the hoof, skins and hides. Italy imports the bulk of the banana crop, the second biggest export. Imports from U.K. in 1980 totalled £14,000,000.

**Government.**—The Somali Democratic Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was established on July 1, 1960. British rule in Somaliland lasted from 1887 until 1960 except for a short period in 1940/41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by British forces in 1941. In 1950 it was placed under Italian administration by a resolution of the U.N.; this trusteeship lasted until independence. Following the assassination of President Shermake on October 15, 1969, the armed forces, assisted by the police, took over the

Government without resistance and a Revolutionary Council under Siad Barre assumed control of the country. A new constitution was introduced following a referendum in 1979. This provides for an elected People's Assembly of 171 seats. The Assembly met for the first time in January 1980. A state of emergency was declared in October, 1980 but lifted in March 1982. There is an outstanding territorial dispute with Ethiopia and incursions by Ethiopian-backed Somali rebels occurred in disputed areas in July 1982.

**CAPITAL.**—ΨMogadishu (Mogadiscio), population (estimated 1981), 450,000. Other towns are Hargeisa (100,000), Kisimayu (18,000), ΨBerbera (19,000) and Burao (10,000).

**FLAG.**—Five-pointed white star on blue ground.

**Area and Population.**—The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Molopo and Orange Rivers (34° 50' 22" South latitude) to the Cape of Good Hope, with the exception of Transkei and Bophuthatswana,

Venda, Lesotho, Botswana and Swaziland, and part of Mozambique. It has a total area of 1,130,422 square kilometres (455,616 square miles) and a total population (est. mid-1978) of 23,894,000 (White, 4,408,000; African, 16,214,000; Coloured, 2,494,000 and Asian, 778,000). The Transkei has an area of 36,900 sq. km. and a total population of 1,727,000. Bophuthatswana has an area of 37,994 sq. km. and a total population of 988,300 and Venda has an area of 6,500 sq. km. and a total population of 357,600. Populations of the Provinces at the 1970 census were: Cape Province (278,380 sq. miles), 4,293,000; Natal (33,578 sq. miles), 2,164,000; Transvaal (109,621 sq. miles), 6,478,000; Orange Free State (49,866 sq. miles), 1,682,120; African Homelands, 2,138,197.

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Swartberg* and *Langeberg* run in parallel lines from west to east of the Cape Province. Between these two ranges and the *Roggeveld* and *Nuweveld* ranges to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Kompasberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains, with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Bushveld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agriculture land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces. The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensberg* and flowing into the Atlantic between the Territory of South West Africa and the Cape Province. The *Limpopo*, or *Crocodile River*, in the north, rises in the Transvaal and flows into the Indian Ocean through Mozambique. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

**Government.**—The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, under the South Africa Act, 1909, in a legislative

union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as a member of the British Commonwealth until 1961. A referendum held among white voters on October 5, 1960, decided by a narrow majority in favour of Republican status. 1,633,772 votes were cast—a poll of 90.73 per cent—with 52.05 per cent in favour. The Union of South Africa became a republic on May 31, 1961, and withdrew from the Commonwealth. On October 26, 1976, the Transkei became the first of the Black homelands to be given independence. It was followed in December 1977 by Bophuthatswana, in September 1979 by Venda and the Ciskei tribal homeland in December 1981. The other Black homelands have their own governments with limited powers.

The *House of Assembly* consists of 165 elected members, 55 of whom represent the Cape Province, 20 Natal, 76 Transvaal, and 14 the Orange Free State. Members of both Houses must be South African citizens of white descent. Cape Black voters ceased to be entitled to elect 3 members in Nov. 1959 and Cape coloured voters ceased to be entitled to elect 4 members in 1964.

*Education*.—The Provinces have been relieved of all vocational education (technical and industrial), and the Department of National Education under the Minister is concerned with universities, technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools, State-aided vocational schools and State and State-aided special schools for the physically handicapped.

*Communications*.—The total open mileage of Government-owned railway lines at the end of March 1979 was 23,327 km., of which 6,779 km. were electrified. Working expenditure (excluding depreciation) amounted to R.2,924,935,217 (railways, harbours, airways, pipelines and road transport). Internal air services are operated between all the major centres in South and South West Africa/Namibia.

*Production and Trade*.—Final figures for the principal crops produced in 1979–80 were: Wheat, 2,215,000 metric tonnes; Maize 10,554,000 mt.; Barley, 141,000 mt.; Oats, 87,000 mt.; ground-nuts, 191,000 mt.; sunflower, 333,000 mt.

Mineral production is of the greatest importance in the South African economy. Value of mineral production in 1979: gold R.5,842,002,000; diamonds, 547,372,000 metric carats; silver, R.29,872,000. Production in 1979: coal, 103,767,866 metric tonnes; copper (metal and concentrates), 190,591 mt.; tin (cassiterite), 2,697 mt.; asbestos, 249,187 mt.

Value of trade in 1979, Imports, R.7,033,771,000; Exports, R.9,458,856,000.

#### Trade with U.K.

	1979
Imports from U.K. ....	£713,466,000
Exports to U.K. ....	533,659,000

*Currency*.—The South African £ reached parity with the £sterling in 1946. A new decimal currency the *Rand (R)* was introduced in South Africa on Feb. 14, 1961, with a par value of 50p sterling.

*Finance*.—Estimated revenue for the year ended March 31, 1981, was RM11,334 (1980 RM9,256); total estimated expenditure RM12,823 (1980 RM12,823). The total government debt as at December 31, 1979 was RM18,185.

*CAPITAL*.—The administrative seat of the Government is PRETORIA, Transvaal; population (census 1970), 563,384; the seat of the Legislature is ψCAPE TOWN, population (1970) 1,107,764. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port

of commercial and strategic importance. Other large towns are Johannesburg, Transvaal (1,441,335); ψDurban, Natal, the largest seaport (350,935); ψPort Elizabeth, Cape (475,869); Germiston, Transvaal (221,972); BLOEMFONTEIN, capital of Orange Free State (182,329); Springs, Transvaal (142,812); Benoni Transvaal (151,294); ψEast London, Cape (124,763); Welkom, O.F.S. (210,629); and PIETERMARITZBURG, capital of Natal (160,847).

*FLAG*.—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full.

*NATIONAL DAY*.—May 31.

#### BRITISH EMBASSY 6 Hill Street, Pretoria

91 Parliament Street, Cape Town (Jan.–June)

There are British Consular Offices at *Cape Town*, *Johannesburg* and *Durban*; and Honorary Consuls at *Port Elizabeth* and *East London*.

#### NAMIBIA

Namibia (South West Africa) stretches from the southern border of Angola (lat. 17° 23' S.) to part of the northern (Orange River) and north-western borders of the Cape Province of the Republic of South Africa; and from the Atlantic Ocean in the west to Botswana in the east.

The territory has an area of 318,261 sq. miles, including the area of Walvis Bay (434 sq. miles) which is claimed by South Africa. The population was estimated at 1,039,400 in 1982 and the main population groups are: Ovambo (516,600), Whites (75,000), Damara (76,800), Kavango (98,000), Herero (77,600), Nama (49,700), Coloured (43,500), Caprivians (39,500), Bushmen (29,500), Rehoboth Baster (25,800), Tswana (6,800).

*Government*.—A German protectorate from 1880 to 1915, South West Africa was administered until the end of 1920 by the Union of South Africa. In terms of the Treaty of Versailles the Territory was declared a "C" Mandate and entrusted to South Africa with full powers of administration and legislation over the Territory. After the dissolution of the League of Nations and in the absence of a trusteeship agreement, South Africa informed the United Nations that she would continue to administer South West Africa in the spirit of the Mandate. Since the establishment of the United Nations, South West Africa has been the subject of dispute.

Certain administrative powers held in South West Africa were in February, 1969, transferred to the South African Government, and from 1968 onwards tribal authorities were set up for the different groups.

On June 21, 1971, the International Court of Justice at The Hague delivered an advisory opinion as requested by the U.N. Security Council on the legal consequences for States of the continued presence of South Africa in "Namibia" (South West Africa). The Court decided by 13 votes to 2, that (*inter alia*) "the continued presence of South Africa being illegal, South Africa is under obligation to

withdraw its administration from Namibia immediately and thus put an end to its occupation of the Territory". The South African Government rejected this opinion, but accepted the principle that the territory should attain independence. In September 1975 constitutional talks (known as the Turnhalle Conference) were begun in Windhoek between delegates from the 11 ethnic groups of the territory in order to determine the future of South West Africa. But their representative nature was contested by, *inter alia*, SWAPO, a liberation movement with substantial international support and when, in April 1977, it became clear that independence based on the Turnhalle would not solve the problem, the Five Western members of the U.N. Security Council sought a way out of the impasse whereby the territory would become independent peacefully. This process is still under way. Meanwhile, the South African Government appointed an Administrator-General in 1977 in order to bring the territory to independence and establish a central administration there for those functions previously administered from Pretoria. In December 1978, the South Africans organized an election for a constituent assembly which SWAPO and some internal political parties boycotted. The resultant assembly was transformed into a National Assembly with legislative powers in May 1979. In June 1980, a Council of Ministers drawn from the National Assembly was established, vested with certain powers previously exercised by the Administrator-General.

**Production.**—Mining, agriculture and fisheries are important. Animal husbandry accounts for 99 per cent of the total gross output of commercial agriculture. The average rainfall over 70 per cent of the Territory is below 400 mm. per annum.

#### Trade with U.K.

	1979
Imports from U.K. ....	£1,593,000
Exports to U.K. ....	20,446,000

**CAPITAL.**—Windhoek (population, 1970 census, 61,260). The only port of any size is  $\Psi$  Walvis Bay.

## SPAIN (España)

**Head of the Spanish State,** King Juan Carlos I de Borbón y Borbón, born Jan. 5, 1938, acceded to the throne, Nov. 22, 1975, married May 14, 1962, Princess Sophie of Greece and has issue, Infante Felipe Juan Pablo Alfonso Todos Los Santos (Prince of the Asturias) born Jan. 30, 1968; Infanta Elena Maria Isabel Dominica, born Dec. 20, 1963; and Infanta Christina Frederica Victoria, born June 13, 1965.

**Prime Minister (President of the Government),** Sr. Leopoldo Calvo Sotelo, appointed Feb. 10, 1981.

#### CABINET

**1st Deputy P.M., responsible for Political Affairs,** Sr. Rodolfo Martin Villa.  
**2nd Deputy P.M. and Minister of Economy and Commerce,** Sr. Juan Antonio Garcia Diez.  
**Assistant Minister to the P.M. and Government Chief Whip,** Sr. Jaime Lamo de Espinosa.  
**Minister in Prime Minister's Office,** Sr. Matias Rodriguez Inciarte.  
**Defence,** Sr. Alberto Oliart Saussol.  
**Foreign Affairs,** Sr. José Pedro Perez-Llorca.  
**Finance,** Sr. Jaime Garcia Anoveros.  
**Justice,** Sr. Pio Cabanillas.  
**Interior,** Sr. Juan José Roson.  
**Public Works,** Sr. Luis Ortiz Gonzalez.  
**Education,** Sr. Federico Mayor Zaragoza.

**Labour,** Sr. Santiago Rodriguez Miranda.

**Industry,** Sr. Ignacio Bayon Marine.

**Agriculture,** Sr. José Luis Alvarez.

**Transport,** Sr. Luis Gamit Casares.

**Culture,** Sr. Soledad Becerril Bustamante.

**Health,** Sr. Manuel Nunez Perez.

**Territorial Administration,** Sr. Rafael Arias Salgado.

A General Election was to take place on Oct. 28, 1982.

#### SPANISH EMBASSY IN LONDON

24 Belgrave Square, S.W.1

[01-235 5555]

**Ambassador Extraordinary and Plenipotentiary,** His Excellency Fernando Arias-Salgado (1981).  
**Minister-Counsellor,** Sr. D. Luis de la Torre.

**Area and Population.**—A National State in the south-west of Europe, between 36°–43° 45' N. lat. and 4° 25' E.–9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenths of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 square miles, with a population (1981) of 37,682,355.

**Physical Features.**—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro and the Minho.

**Government.**—In April, 1931, the King of Spain, Alfonso XIII, left the country; a Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands. The struggle, in its later phases, threatened to embroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*)

while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo (Leader) of the Empire and Chief of the State*. In the Civil War of 1936–39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstatement of the *Cortes de España*. This was reorganized by an Organic Law of 1966 and was composed of approximately 564 members—ministers, 19; members of the National Council of the Movement, 109; Presidents of various State bodies, 5; representatives of the national syndicates, 150; 100 members elected by heads of families and married women; university rectors, 12; representatives of professional, academic and scientific bodies, 28; representatives of local administration, 116; and 25 members directly appointed by the Head of State.

A referendum held in 1967 approved an Organic Law of the State introducing a number of changes in state institutions. The offices of Head of State and Head of Government were separated, but General Franco continued to hold both offices until June 1973.

On July 22, 1969, General Franco nominated Prince Juan Carlos (Alfonso) of Bourbon (grandson of the late King Alfonso XIII) to succeed him as head of state at his death or retirement. The nomination was approved in the *Cortes* by a large majority. Following the death of General Franco, on November 20, 1975, Juan Carlos acceded to the throne on Nov. 22, 1975.

Following general elections in June 1977, in which the centrist Union of Centre Democrats headed by Sr. Suárez gained the largest number of seats, a new Constitution was drawn up. This was approved by referendum in December 1978 and new legislative elections were held on March 1, 1979. The U.C.D. won 167 out of 350 seats in the Congress of Deputies, slightly improving its position; the socialist P.S.O.E. gained 121 and the communist P.C.E. 23. The municipal elections held on April 3, 1979 resulted in the socialists and communists together controlling most of Spain's major cities.

In an attempted *coup* in Feb. 1981 the *Cortes* (including the whole Cabinet) were held overnight. The *coup* collapsed the following day.

**Regions.**—Since the promulgation of the 1978 Constitution, four autonomous regions have been established, with their own parliaments and governments. These are in the Basque country, Catalonia, Galicia and Andalusia.

**Defence.**—**Army.** There are in Spain 1 armoured, 1 mechanized, 1 motorized, and 2 mountain divisions; 1 armoured cavalry brigade, 2 artillery brigades, 1 air-transportable brigade, 1 parachute brigade, 10 infantry brigades, 1 mountain brigade and 1 battalion surface to air missiles. The *Guardia Civil* also forms part of the Army though it operates as a gendarmerie in the rural areas under the control of the Ministry of the Interior.

The active Spanish *Navy* consists of 1 helicopter carrier, 13 destroyers, 14 frigates and corvettes, 3 motor torpedo boats, 22 minesweepers, 10 submarines, 16 landing craft, 5 squadrons of helicopters, and a large number of auxiliary and small craft.

The *Air Force* is divided geographically into 3

Regions covering Spain plus an Air Zone for the Canaries. There are also separate functional Air Defence, Tactical and Transport Commands. The Air Force consists of 7 fighter-bomber squadrons, one counter-insurgency squadron, one maritime reconnaissance squadron, 3 search and rescue squadrons, 8 transport and 7 training squadrons. There are also a variety of miscellaneous aircraft and some helicopters.

**Education.**—A new law of education (1970) providing free education for all children aged 6 to 13 is now in the process of implementation. 30 per cent of primary schools and 80 per cent of secondary schools are still run privately, although state spending on education multiplied fourfold between 1960 and 1970. There are eighteen state universities, the oldest of which, Salamanca, was founded in 1230. Other ancient foundations are Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Zaragoza (1474), Santiago (1501), Seville (1502), Granada (1526), and Madrid (1590). Private universities are Deusto in Bilbao, and Navarra in Pamplona. Student numbers in the universities have risen to over 200,000.

**Language and Literature.**—Castilian is the language of more than three-quarters of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provençal Spain, and Galician, spoken in the northwestern provinces, is akin to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547–1616), Lope Felix de Vega Carpio (1562–1635) and Pedro Calderón de la Barca (1600–1681). The Nobel Prize for Literature has four times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922), Juan Ramón Jiménez (1956) and Vicente Aleixandre (1977).

**Currency.**—The *peseta* = 100 *céntimos*. (See also p. 83).

**Production and Industry.**—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—olives, oranges, lemons, almonds, pomegranates, bananas, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. The orange crop is exported mainly to Germany, France and the United Kingdom. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced.

Spain's mineral resources of coal, iron, wolfram, copper, zinc, lead and iron ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1970 the coal output amounted to 13,150,000 metric tons. 4,150,000 metric tons of iron ore and 7,366,000 metric tons of steel were produced in 1970. Other production figures included ('000 metric tons): cement, 16,500; sulphuric acid, 2,015; cotton yarn, 117 and wool yarn, 37. Production of electric power was 56,484 million kWh. The fishing industry is important.

The principal goods produced are manufactured goods, textiles, chemical products, footwear and other leather goods, ceramics, sewing machines and bicycles. In 1977 tourism contributed (net) an estimated U.S.\$3,500 million to the balance of payments. The Gross Domestic Product for 1977 was 8,782,900 million pesetas.

## TRADE

	1980
	\$ million
Imports .....	34,078
Exports .....	20,720

The balance of payments on current account showed an estimated surplus of \$1,509 million in 1978 and reserves stood at \$10,774 m. at the end of the year.

**Trade with U.K.**  
(inc. Canary Islands)

	1980
Imports from U.K. ....	£755,106
Exports to U.K. ....	865,797

The principal imports are cotton, tobacco, cellulose, timber, coffee and cocoa, fertilizers, dyes, machinery, motor vehicles and agricultural tractors, wool and petroleum products. The principal exports include iron ore, cork, salt, vegetables, citrus fruits, wines, olive oil, potash, mercury, pyrites, tinned fruit and fish, bananas and tomatoes.

**CAPITAL, Madrid.** Population (1970) 3,146,071. Other large cities are  $\Psi$ Barcelona (1,750,000), Valencia (648,000),  $\Psi$ Seville (546,000), Zaragoza (470,000),  $\Psi$ Málaga (361,000), Bilbao (410,000); Murcia (244,000).

**FLAG.**—Three horizontal bands, red, yellow and red, with coat of arms on yellow band. **NATIONAL DAY.**—July 18 (*Fiesta Nacional Española*).

**AIR TRANSIT FROM U.K.**—London—Barcelona (713 miles), 2 hrs. 25 mins.; Madrid (775 miles), 2 hrs. 5 mins.; Valencia, 2 hrs. 10 mins.

## BRITISH EMBASSY

(Calle de Fernando el Santo, 16, Madrid 4)

*Ambassador Extraordinary and Plenipotentiary, His*

*Excellency Sir Richard Parsons, K.C.M.G. (1981).*

*Minister, The Hon. H. J. H. Maud.*

*Counsellor, A. St. J. H. Figgis (Commercial).*

*Air Attaché, Wing. Cdr. S. A. Edwards.*

*Naval Attaché, Cdr. J. M. Lee, O.B.E., R.N.*

*Head of Chancery, L. G. Faulkner.*

*1st Secretary, D. N. Reddaway.*

*British Council Representative, S. R. Smith, Almagro 5, Madrid 4.*

The **BALEARIC ISLES** form an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Ibiza and Formentera), and seven smaller (Aire, Aucanada, Botafoch, Cabrera, Dragoneira, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 558,287. The archipelago forms a province of Spain, the capital being  $\Psi$ Palma in Majorca, pop. 234,098;  $\Psi$ Mahon (Minorca), pop. 16,547.

The **CANARY ISLANDS** are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 1,170,224. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote (38,500), Fuerteventura (19,500) and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of administration at  $\Psi$ Las Palmas (pop. 287,038) in Gran Canaria, where major oil companies have installations for re-fueling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma (76,000), Gomera (31,829), and Hierro (10,000)), with seat of administration at  $\Psi$ Santa Cruz in Tenerife, pop. 151,361.

**ISLA DE FAISANES** is an uninhabited Franco-Spanish condominium, at the mouth of the Bidassoa in La Higuera bay.

$\Psi$ CEUTA is a fortified post on the Moroccan coast,

opposite Gibraltar. The total area is 5 square miles, with a population (1970) of 67,187.

$\Psi$ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. Population (1970) 64,942. Ceuta and Melilla are parts of Metropolitan Spain.

## OVERSEAS TERRITORIES

The former provinces of Spanish Guinea, Fernando Póo and Rio Muni achieved independence on October 12, 1968, under the title of Equatorial Guinea.

Ifni, the former enclave in Morocco, was incorporated in the latter state by treaty, on June 30, 1969, and the Spanish Sahara came under joint Moroccan and Mauritanian control in November 1975.

**SPANISH MOROCCO.**—In addition to Ceuta and Melilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

*Peñon de Alhucemas*, the bay of that name includes six islands: population 366.

*Peñon de la Gomera* (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

*The Chaffarinas* (or *Zaffarinas*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

## SUDAN

(Democratic Republic of the Sudan)

*President and Prime Minister, Gaafar Mohamed El Nimeri, assumed office May 25, 1969 elected President, Oct. 1971, re-elected, May 1977.*

*First Vice-President and Head, State Security, Maj.-Gen. Omer Mohammed El Tayyeb.*

*Vice-President, Joseph Lagu.*

## SUDANESE EMBASSY IN LONDON

3 Cleveland Row, S.W. 1  
[01-839 8080]

*Ambassador Extraordinary and Plenipotentiary, His Excellency Nastr el Din Mustafa Ahmed (1982).*

**Area and Population.**—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from the Republic of Chad about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Ethiopia in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea and Ethiopia; on the South lie Kenya, Uganda and Zaire; and on the west the Central African Republic, Chad, and Libya.

The *White Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the White Nile at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa lie five of the six *Cataracts*.

The estimated area is about 967,500 sq. miles with a population of 19,500,000, partly Arabs, partly

Negros, and partly of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs are mostly Moslems. The Nilotics of the Bahr el Ghazal and Upper Nile Valleys are generally animists, but some have been converted to Christianity and others are Moslems.

**Government.**—The Anglo-Egyptian Condominium over the Sudan which had been established in 1899 ended when the Sudan House of Representatives, on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state. A Republic was proclaimed on Jan. 1, 1956, and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. The Sudan was under military rule from Nov., 1958, until 1964 when a new civilian Cabinet was appointed. Government of the country was taken over on May 25, 1969, by a ten-man revolutionary council headed by Col. Gaafar Mohamed El Nimeri. Maj.-Gen. Nimeri became President in an uncontested election in October 1971. In February 1972 an agreement was signed at Addis Ababa which brought to an end nearly 17 years of insurrection and civil war in the six southern provinces, and which recognized southern regional autonomy within a unified Sudanese State.

**Education.**—School education is free for most children, but not compulsory, beginning with Primary School (of which there are 4,000) which continues for 6 years. The final examination at Primary School is highly competitive and selects children for General Secondary Schools (of which there are 700) which continues for 3 years. The Higher Secondary Stage comprises 80 academic Higher Secondary schools (3 years); 15 vocational schools—Technical (4 years); Agricultural and Commercial (3 years) and 15 Primary Teacher Training Colleges (4 years). The medium of instruction is Arabic. English is taught as the principal foreign language in all schools.

Teacher Training is carried out in 15 Primary Teacher Training Colleges, two General Secondary Teacher training Institutes and one Higher Teacher Training Institute.

Khartoum University is the largest educational institution and has 10 faculties. There is an Islamic University at Omdurman and a University at Juba. Selection for higher education is normally based on the Sudan School Certificate.

In addition to the three universities there are

various technical post-secondary institutes as well as professional and vocational training establishments.

**Production.**—The principal grain crops are wheat and *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (mainly Egyptian type) cotton of which the Sudan is a major producer, but increasing quantities of short and medium staple (American) type cotton are being grown. Production in 1979-80 totalled 450,000 bales. Much of the high quality, long-staple cotton is provided by the Sudan Geriza Scheme (a Government-controlled project irrigated from the Sennar Dam on the Blue Nile) and its extension, the Managil Scheme. The Sudan also produces the bulk of the world's supply of gum arabic. Sugar is an increasingly important crop. The Sudan has almost become self-sufficient in sugar and aims to produce an exportable surplus. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South. A new dam at Khashm el Girba began to store water in May, 1964, and will eventually provide irrigation to about 500,000 acres, most of which are being used to resettle the population of the Wadi Halfa area which has been flooded by the reservoir of the Egyptian High Dam. Another dam at Roseires on the Blue Nile provides increased irrigation on a further 3,000,000 acres as well as providing hydro-electric power.

**Communications.**—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Karima, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A line branches out southwards to Wau from the Sennar/Nyala western line. Regular rail and Nile steamer services connect Khartoum with Juba in Equatoria Province which in turn is connected by a bus service with Nimule on the Uganda border. Port Sudan is a well-equipped modern seaport. Sudan Airways fly regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, the United Kingdom, the Gulf States, Kenya, Uganda, W. Germany, Iraq and Bahrain and are equipped with 2 Boeing 737's, 2 Boeing 707's and 4 Fokker F27 aircraft.

#### FINANCE

## SURINAM

*Prime Minister and Minister of Finance, Henri Neyhorst.*

Surinam is situated on the north coast of South America and is bounded by French Guiana in the east, Brazil in the south and Guyana in the west. It has an area of 63,250 square miles, with a population of 375,000.

Formerly known as Dutch Guiana, Surinam remained part of the Netherlands West Indies until November 25, 1975, when it achieved complete independence. Surinam had received autonomy in domestic affairs under the Realm Statute which took effect on December 29, 1954. The civilian government was ousted by the military in Feb. 1982, and replaced by a predominately civilian Cabinet in March.

Surinam has large timber resources. Rice and sugar cane are the main crops. Bauxite is mined, and is the principal export.

### SWEDISH EMBASSY IN LONDON

*Residence, 27 Portland Place, W.1; Chancery, 23*

*North Row, W.1*

*[01-499 9500]*

*Ambassador Extraordinary and Plenipotentiary, His Excellency Leif Leifland (1982).*

*Minister Plenipotentiary, F. K. C. Belfrage.*

*Counsellors, A. A. E. Alsterdal (Press); P. G. Larsson*

*(Consular); H. R. Andersson.*

*Defence and Naval Attaché, Rear-Adm. R. Rheberg.*

*Air and Military Attaché, Group Capt. J. Westberg.*

*Trade Commissioner, S. Widenfelt (73 Welbeck Street, W.1).*

*Area and Population.*—Sweden occupies the eastern area of the Scandinavian peninsula in N.W. Europe and comprises 24 local government districts, "Län", with an area of 173,436 sq. miles, and population Dec. 31, 1980 of 8,318,000. In 1980 there were 97,064 births (11.6 per 1,000 inhabitants); 91,800 deaths (11.05 per 1,000 inhabitants) and infant mortality rate was 4.47 per 1,000 births.

*Government.*—Under the Act of Succession of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte. Jean-Baptiste Jules Bernadotte, Prince of Ponte Corvo, a Marshal of France, was invited to accept the title of Crown Prince, with succession to the throne. He landed at Hälsingborg on Oct. 20, 1810, and succeeded Charles XIII in 1818. There is a unicameral Diet (*Riksdag*) of 349 members elected for 3 years. The Council of Ministers (*Statsråd*) is responsible to the *Riksdag*.

*Production and Industry.*—Since the end of the First World War Sweden has become one of the leading industrial nations of Europe. Agriculture is still one of the main activities, but its relative importance is declining and in 1979 only 5.7 per cent. of the working population was engaged in farming and fishing. The country's industrial prosperity is based on an abundance of natural resources in the form of forests, mineral deposits and water power. The forests are extensive, covering about half the total land surface, and sustain flourishing timber, pulp and paper milling industries. The mineral resources include iron ore, lead, zinc, sulphur, granite, marble and extensive deposits of low grade uranium ore. Sweden has long had important industries based on mining, principally iron and steel, aluminium and copper but today it is the general engineering industry that provides the basis of Sweden's exports. Motor car manufacturing and shipbuilding remain important sectors but growth areas are largely in the specialised machinery and systems and chemical industries. Apart from water power Sweden has no significant indigenous resources of conventional hydrocarbon fuels and relies to a high degree upon imported oil. Much of Sweden's electricity is generated by nuclear power but as a result of a referendum in 1980, the nuclear programme is to be discontinued by 2010. Small supplies

of natural gas will be imported from Denmark into southern Sweden from 1985.

**Communications.**—The total length of Swedish railroads is about 7,500 miles. In 1979 there were 744 telephones and 370 television sets for every 1,000 of the population. The number of passenger cars in use on December 31, 1979 was 2,868,302.

The Mercantile Marine amounted on December 31, 1980 to 3,979,163 gross tonnage. The Board of Civil Aviation under the control of the Ministry of Communications handles civil aviation matters. Regular domestic air traffic is maintained by the Scandinavian Airlines System and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained by the Scandinavian Airlines System.

**Defence.**—Based on the policy of non-alignment in peace leading to neutrality in war Sweden maintains a Total Defence intended to make any attack on her costly. Total Defence includes peacetime organizations for civil, economic and psychological defence as well as compulsory national service for all acceptable males. Some 50,000 National Servicemen are called up for 7–15 months training each and all are recalled every fourth year for refresher training. On mobilization the Army strength totals 5 armoured brigades and 24 infantry and winter warfare brigades. The Navy has 6 destroyers, 13 submarines, 11 torpedo boats, a large number of minor craft and auxiliaries and 5 coast artillery units. The Air Force has modern supersonic aircraft of Swedish manufacture forming a standing force of 250 air defence, 140 attack and 92 reconnaissance aircraft supported by a modern air defence radar system. Facilities exist for rapid dispersal from main bases in war.

**Religion.**—The State religion is Lutheran Protestant, to which over 95 per cent of the people officially adhere.

**Language and Literature.**—Swedish belongs, with Danish and Norwegian, to the North Germanic language group. Swedish literature dates back to King Magnus Eriksson, who codified the old Swedish

provincial laws in 1350. With his translation of the Bible, Olaus Petri (1493–1552) formed the basis for the modern Swedish language. Literature flourished during the reign of Gustavus III, who founded the Swedish Academy in 1786. Swedish literature is studied with names such as Almqvist (1795–1866), Strindberg (1849–1912) and Lagerlöf (1858–1940), Nobel Prize Winner in 1909. Contemporary authors include Lagerquist (1891–1974), Nobel Laureate in 1951, Martinson (b 1904) and Johnson (1900–1976), Nobel Laureates jointly in 1974. The Swedish scientist Alfred Nobel (1833–1896) founded the Nobel Prizes for Literature, Science and Peace.

**Education.**—Well developed and recently reorganized to provide (i) 9 years' compulsory schooling from the age of 7 to 16 in the comprehensive elementary schools; (ii) further education of 2, 3 or 4 years in the upper secondary schools, which offer a number of courses preparing for entry to the universities, other centres of higher education, the professions, etc.; (iii) the universities. There are six universities—Uppsala (founded 1477); Lund (founded 1668); Stockholm (founded 1878); Gothenburg (founded 1887); Umeå (founded 1963) and Linköping (founded 1967); three affiliated university branches, empowered to grant first degrees only in the humanities, social sciences and natural sciences, at Örebro, Växjö and Karlstad; and three universities of technology, at Stockholm, Gothenburg and Luleå. Another institution of university status is the Karolinska Institute, which specializes in medicine and dentistry. Tuition within the State system, which is maintained by the State and by local taxation, is free.

	FINANCE

#### Trade with U.K.

	1980
Imports from U.K. ....	£1,623,511,000
Exports to U.K. ....	£1,475,506,000

Sweden's main imports from Britain are machinery and parts, road vehicles and components, crude oil and petroleum products, clothing and textiles and steel. Britain's main imports from Sweden are paper and board, road vehicles, machinery, wood, steel and pulp. There is also a substantial exchange of direct investment between the two countries.

**CAPITAL.**—Stockholm. Population (1980): City 647,214; Greater Stockholm, 1,386,980; Gothenburg (Göteborg) (431,273); Malmö (233,803); Västerås (117,487); Uppsala (146,192); Norrköping (119,238); Örebro (116,969); Jönköping (107,561); Linköping (112,600); Borås (102,129).

**FLAG.**—Yellow cross on a blue ground.

**NATIONAL DAY.**—June 6 (Day of the Swedish Flag).

**BRITISH EMBASSY**

*Transport, Energy and Communications*, M. Leon Schlumpf.

## SWISS EMBASSY IN LONDON

16-18 Montagu Place, W.1  
[01-723 0701]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Claude Caillaat (1980).

*Counsellor*, H. Buchmann (*Commodities and Agriculture*).

*First Secretaries*, Dr. J. Kellenberger (*Economic and Labour*); B. Junod (*Cultural*); J. Doswald (*Press*); B. Marfurt (*Finance*).

*Defence Attaché*, Brig. Gen. H. Mäudli.

*Consul and Head of Administration*, C. Duboulet.

There is a Swiss Consulate-General in *Manchester*.

*Area and Population*.—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of 23 Cantons, 3 subdivided, making 26 in all, and comprises a total area of 15,950 square miles with a population (estimated December, 1979) of 6,365,900. In 1980 there were 73,661 live births, 59,097 deaths and 35,721 marriages. Of the total population 47.8 per cent of the population was Protestant, 49.4 per cent Roman Catholic and 0.3 per cent Jewish.

*Physical Features*.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent, and the Jura mountains 12 per cent, of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,782 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Dufourspitze (15,203 ft.), Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Brienz and the Walensee. There are also many artificial lakes.

*Production and Industry*.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize,

barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

*Government*.—The legislative power is vested in a Parliament, consisting of two Chambers, a National Council (*Nationalrat*) of 200 members, and a Council of States (*Ständerat*) of 46 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. Each year the Federal Assembly elects from the Federal Council the President and the Vice-President. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

*Defence*.—All Swiss males must undertake military service in the Army. *Elite* (ages 20 to 32) initial training, 118 days. Subsequently 8 training periods of 21 days; then *Landwehr* (33–42) and *Landsturm* (43 to 50). Flying personnel of the Air Force, which is part of the Army (ages 20–36): initial training 1 year, totalling 200 hours of flying. 6 weeks with squadron each year and completion of about 80 hours of flying. After 36 revert to ground duties with Air Force. Swiss Army equipment includes some British items, such as Centurion tanks, Bloodhound missiles, and Venom, Vampire and Hunter aircraft.

*Communications*.—There are 4,993 km of railway tracks (Swiss Federal Railways, 2,923 km; Swiss privately owned railways 2,070 km). At the end of 1980 the number of telephone subscribers amounted to 2,839,461 and the network was fully automatic throughout the country. At the same time there were 2,252,915 licensed radio receivers and 1,979,518 television receivers.

At the end of 1980 the total length of motorways was 1,170.6 km. The number of motor vehicles licensed was 2,702,266.

A merchant marine, established in 1940, consisted at the end of 1980 of 30 vessels with a total displacement of 474,525 DWT. In addition 451 vessels with a total tonnage of 599,629 were engaged in Rhine shipping. In 1980, goods handled at Basle Rhine ports amounted to 11,743,534 tonnes. In 1978 151 lake vessels transported 9,033,000 passengers and 3,577 tonnes of freight. Swiss airlines have a network covering 273,544 km and in 1980 carried 6,941,367 passengers. Swissair, the State airline, which owned 49 aircraft in 1979, flies to and from the Swiss airports at Zürich, Geneva and Basle.

**Education.**—Control by cantonal and communal authorities. No central organization. Illiteracy practically unknown. (i) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii) *Secondary*: Age 12–15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii) *Special schools* make a feature of commercial and technical instruction. (iv) *Universities*: Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and commercial University of St. Gall.

**Language and Literature.**—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 26 cantons; French in Fribourg, Jura, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons.

Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845–1924) and Hermann Hesse (1877–1962) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1946.

## FINANCE

	Budget 1980
	<i>Swiss Francs</i>
Revenue .....	16,000,000,000
Expenditure .....	17,300,000,000

## TRADE

## BRITISH CONSULAR OFFICES

There is a Consular Section at H.M. Embassy, Berne; *Consulates-General* at Zürich and Geneva and Consular offices at Lugano and Montreux. The Directorate of British Export Promotion in Switzerland is in the Consulate-General Office in Zürich.

BRITISH-SWISS CHAMBER OF COMMERCE FOR SWITZERLAND, Dufourstrasse 51, 8008 Zürich.

SWISS-BRITISH SOCIETY, Berne.—*President*, Dr. Th. von Mandach.

SWISS-BRITISH SOCIETY, Zürich.—*President*, Dr. B. Lüthi.

SWISS-BRITISH SOCIETY, Basle.—*President*, G. Simons.

## SYRIA

(Syrian Arab Republic)

*President*, Lt.-Gen. Hafez el Assad, b. 1930, assumed office March 14, 1971, for a term of 7 years, and re-elected for a further 7 years, Feb. 1978.

*Prime Minister*, Abdul-Raouf Al-Kasam.

*Deputy Prime Minister and Minister for Foreign Affairs*, Abdul Halim Khaddam.

*Deputy Prime Minister for Services Affairs*, Brig. Walid Hamdoun.

*Deputy Prime Minister for Economic Affairs*, Abdul Qadir Qaddoura.

## SYRIAN EMBASSY IN LONDON

8 Belgrave Square, S.W.1  
[01-245 9012]

*Ambassador Extraordinary and Plenipotentiary*, (Vacant).

*Chargé d'Affaires a.i.*, Zouheir Namani.

**Area and Population.**—Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,800 sq. miles and a population (1979) of 9,622,632, Arabic speaking and mainly Moslems. (*For Map, see p. 861.*) The Orontes flows northwards from the Lebanon range across the northern boundary to Antakya (Antioch, Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

**Archæology, etc.**—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is said to be the oldest continuously inhabited city in the world (although Aleppo disputes this claim), having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayed Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix. 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins of the Phœnician town of Marath, where the *well* has been found and is being excavated and also ruins of

Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the 12th and 13th centuries has been restored as a museum. One of the oldest alphabets in the world has been discovered at Ugarit (Ras Shamra), a Phoenician village near the port of Latakia.

Hittite cities dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

**Government.**—Syria, which had been under French mandate since the 1914–18 war, became an independent Republic during the 1939–45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic. It seceded from the United Arab Republic on Sept. 28, 1961.

A new Constitution was promulgated in March 1973; this declared that Syria is a "democratic, popular socialist State", and that the Ba'ath Party, which has been the ruling party since 1963, is "the leading party in the State and society". Elections to the 195-seat Peoples' Council in August 1977 resulted in a large majority for the Ba'ath Party.

**Production and Industry.**—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebleh district of Latakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil, glass, soap, sugar, plastics and copper and brass utensils are locally produced. Large new areas are coming under irrigation and cultivation in the north-east of the country as a result of the Thawra dam. There are an increasing number of light assembly plants as Syria's industrialisation programme develops. Mineral wealth is modest but oil has been found at Karachuk and other parts in the north-eastern corner of the country and exploitation and further excavations are continuing. Syria produces about 9 million tons of oil per year. A pipeline has been built to the Mediterranean port of Banias, *via* Homs. Two oil refineries are in production at Homs and Banias. Revenue is derived from the pipeline from the oilfields of Saudi Arabia to Sidon in Lebanon (Tapline). Another pipeline from the Iraq oilfields was closed in April 1982. Syria also has deposits of phosphate and rock salt, and produces asphalt.

**Language and Literature.**—Arabic is the principal language, but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 3 daily newspapers and several periodicals in Arabic published in Damascus, and also a daily newspaper in English. English has taken over from French as the main foreign language, especially among the young.

**Education.**—Education in Syria is under State control and, although a few of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts, commerce, agriculture, divinity, fine arts, and a Higher Teachers' Training College. The number of students has risen from a few hundred in 1943 to over 60,000. There are also about 20,000 students at Aleppo University (founded 1961), over 3,000 at Tishrin University, Latakia (founded 1975) and 2,000 at Ba'ath University, Homs. Approximately 10 per cent

of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

**Communications.**—A narrow gauge railway runs from Beirut in the Lebanon to Damascus and on to Der'a near the Jordan border (the Hejaz railway). This line was cut between Damascus and Beirut during the civil war, but there is a regular freight and passenger service between Damascus and Amman. A standard gauge track links Homs, Hamah, Aleppo and on along the Turkish border through Qamishliyye to the Iraq frontier. Branch lines connect the ports of Tartous and Latakia to the system and another line runs from Aleppo down Euphrates valley to Deir ez Zor and thence North to Qamishliyye, with a branch going to the Euphrates Dam. All the principal towns in the country are connected by roads which vary from modern dual carriageways to narrow country lanes. An internal air service operates between all major towns. The main International Airport is at Damascus and there are also flights to Eastern Europe, Turkey and Armenia from Aleppo.

**Currency.**—The monetary unit is the Syrian paper pound (£Syr.). Exchange rate, *see* p. 84.

**Trade.**—The principal imports are foodstuffs (fruit, vegetables, cereals, meat and dairy products, tea, coffee and sugar), mineral and petroleum products, yarn and textiles, iron and steel manufactures, machinery, chemicals, pharmaceuticals, fertilizers and timber.

**Principal Exports.**—Raw cotton, oil, cereals, fruit, phosphates, livestock and dairy products, other foodstuffs, textiles and raw wool.

#### Trade with U.K.

	1980
Imports from U.K. ....	£81,600,000
Exports to U.K. ....	12,200,000

**CHIEF TOWNS.**—Damascus (population (estimated) 2,250,000) is the capital of Syria. Other important towns are Aleppo (population 1,862,713), Homs (821,703) and Hama (747,578), and the principal port is Latakia (563,173).

**FLAG.**—Red over white over black horizontal bands, with two green stars on central white band.

**NATIONAL DAY.**—April 17.

ROYAL THAI EMBASSY IN LONDON  
30 Queen's Gate, S.W.7  
[01-589 0173]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Phan Wannamethee.

*Area and Population*.—The Kingdom of Thailand, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1980) of 47,600,000. For position, see MAP, p. 955. It has a common boundary with Malaysia in the south, is bounded on the west by Burma and on the north-east and east by Laos and Cambodia, which were formerly part of the French colony of Indo-China. Although there is no common boundary between Thailand and China, the Chinese province of Yunnan is separated from the Thai northern border only by a narrow stretch of Burmese and Laotian territory.

The capital, Bangkok, is situated in the south of the central plain area. To the north-east there is a plateau area and to the north-west mountains. The south of Thailand consists of a narrow mountainous peninsula. The principal rivers are the Chao Phraya with its tributary the Meping and the Mekong and its tributaries, which water the eastern plateau.

*Government*.—Thailand became a Constitutional Monarchy in 1932. The Constitution promulgated in December 1978 provides for a National Assembly consisting of a Senate appointed by the King and a House of Representatives elected by universal adult suffrage.

In April 1981 a *coup* attempt by a group of young Army officers was put down successfully.

*Language, Religion and Education*.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family, but its vocabulary especially has been strongly influenced by Sanskrit and Pali. It is written in an alphabetic script derived from ancient Indian scripts. The principal religion is Buddhism. In 1973 93.6 per cent of the population were Buddhists, 3.9 per cent Moslems, 0.6 per cent Christians and 1.9 per cent other religions. Primary education is compulsory and free and secondary education in Government Schools is free. In 1979 there were 35,000 schools and training colleges, with a total of 9,558,910 pupils and 49,005 teachers. There are 14 state universities and institutes of technology attended by a total of 396,058 students. In 1972 an open university (Ramkhamhaeng) was established in Bangkok with some 45,000 students.

*Production and Industry*.—The agricultural sector provides just under half the national income and employs about 70 per cent of the working population. Rice remains the most important crop, accounting for 63 per cent of the area planted. After rice the main crops are cassava, maize, and rubber. Other crops of some importance are sugar cane, kenaf, groundnuts, tobacco, and coconuts. There is also a

substantial forest extraction industry, the most valuable product of which is teak.

Mineral resources are mainly tin, antimony, tungsten, gypsum and fluorite. The most important of these, tin, is seeing something of a decline, mainly because of the exhaustion of reserves. The importance of lignite as a source of energy increased with higher oil prices. Natural gas, piped from the Gulf of Thailand, is expected to supply much of the country's energy requirements by the late 1980's.

Before the war, industry was mainly confined to the basic processing industries—sawmilling, rice-milling, etc. After the war, the Government set up a number of factories run by the Civil Service or the Armed Forces. The Government still has a sizeable stake in industry—notably the tobacco monopoly and factories for the manufacture of cement, glass, paper, jute, textiles, sugar and beer and spirits.

The then Government in 1962 instituted a policy of encouraging the private sector to invest in industry, by means of tax reliefs and other incentives. The private sector industries are almost entirely of a secondary nature; soap products, gunny bags, textiles, car assembly, pharmaceutical preparations and packaging, dry batteries, etc. Over the last decade the size of the manufacturing sector has grown rapidly and now provides 18 per cent of national income.

*Communications*.—Rivers and canals provide the traditional mode of transport for much of the country. Navigable waterways have a length of about 1,100 km. in the dry season and 1,600 km. in the wet season. About 3,765 km. of State-owned railways were open to traffic in 1980. The track is metre gauge. Main lines run from Bangkok to Aranya Prathet, on the Cambodian border (160 miles E.); *via* Korat to Ubon (about 352 miles E.) and to Nongkhai (415 miles N.E.) the ferry terminal on the River Mekong opposite Vientiane, capital of Laos; to Chiangmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malay Peninsula, *via* Sungai Golok and Penang respectively, to Singapore.

Thailand has some 25,000 km. of highways and provincial roads.

Bangkok has an international airport of importance, and services connect it direct with cities in Europe, America, and Australia, as well as countries in Asia. Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. Domestic routes are operated by Thai Airways Corporation. There are some 22,000 km. of telegraph lines and improvements are being made to an already extensive micro-wave communications system. The harbour at Bangkok can take vessels up to 27' draught and is sometimes congested. New deep-water facilities are being provided at Sattahip on the east side of the Gulf of Thailand, where the existing naval port is to be converted for commercial use.

	TRADE	1981
		millions of Baht
Total imports .....		218,060
Total exports .....		149,042

	Trade with U.K.	1981
		millions of Baht
Imports from U.K. ....		£5,729
Exports to U.K. ....		2,445

The exchange rate for the *Baht* was officially fixed at *Baht* 23.0 = \$1 U.S. (See also p. 84.)

Thailand's main exports are rice, sugar, maize,

tapioca products, rubber and tin. Other exports include ready-made garments, textiles, frozen shrimps, timber and articles of wood, mung beans and tobacco leaves. Main imports are petroleum and petroleum products, machinery, transport equipment, iron and steel, electrical machinery, chemicals and cotton.

**CAPITAL.**—ΨBangkok (population 5,153,902 (1980)); in the delta of Chao Phraya. Other centres are Chiangmai, Nakorn Sawan, Korat and Haadyai, but no other town approaches Bangkok in size or importance.

**FLAG.**—Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others).

**NATIONAL DAY.**—December 5 (King's Birthday).

**BRITISH EMBASSY**  
(Bangkok)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Hubert Anthony Justin Staples, C.M.G. (1981).

*British Council Representative*, Miss A. Lambert, O.B.E.

**TOGO**  
(Republic of Togo)

*President and Minister of Defence*, Gen. Gnassingbé Eyadéma, born 1937, assumed office as *Head of State*, April 14, 1967; re-elected for seven-year term on Dec. 30, 1979.

*Minister for Foreign Affairs and Co-operation*, Dr. Anani Kuma Akakpo-Ahianyo.

**EMBASSY IN LONDON**  
20 Wellington Court,  
116 Knightsbridge, S.W.1  
[01-584 7377]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Monsieur Ayivi Mawuko Ajavon.

The Republic is situated in West Africa between 0°–2° W. and 6°–11° N., with a coastline only 35 miles long on the Gulf of Guinea, and extends northward inland for 350 miles. It is flanked on the west by Ghana, on the north by Upper Volta and in the east by Benin (see MAP, p. 941). It has an area of 21,000 sq. miles and a population (estimate, Dec. 1977) of 2,348,000, including people of several African races.

The first President of Togo, Sylvanus Olympio, assassinated on January 13, 1963, was succeeded by Nicolas Grunitzky, who was himself overthrown by an army *coup d'état* on January 13, 1967. On April 14, 1967, the Commander-in-Chief of the Togolese army, Lt. Colonel (later promoted General) Eyadéma named himself President. The official language is French.

**Finance.**—The currency of Togo is the *Franc C.F.A.*

**Production and Trade.**—Although the economy of Togo remains largely agricultural, exports of phosphates have superseded agricultural products as the main source of export earnings. Other exports include palm kernels, copra and manioc. The production of phosphates entirely for export was begun by a Franco-American consortium in 1958 but the Togolese Government has increased its participation in recent years and took over completely in February 1974.

**TUNISIAN EMBASSY IN LONDON**  
29 Princes Gate, S.W.7  
[01-584 8117]

*Ambassador*, His Excellency Sadek Bouzayen.

**Area and Population.**—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 63,380 sq. miles and an estimated population in 1981 of 6,520,000.

**Government.**—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army.

Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. On June 1, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

In March 1975 the National Assembly proclaimed M. Bourguiba as President for life.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 13 regions (*gouvernorats*) each administered by a Governor. In 1972, the number of regions was increased to 14 by the division of the Tunis region into two regions. By 1974, the number increased to eighteen.

**Production, Trade, etc.**—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated.

The chief exports are crude oil, phosphates, olive oil, finished textiles, and wine. The chief imports are machinery and equipment, foodstuffs, petroleum products, and textiles. Some oil has been discovered and production reached an annual rate of 5.4 million tons in 1981. Gas has also been discovered in commercial quantities off the east coast. Tourists numbered over 2 million in 1981, generating earnings of 285 million *dinars*. In 1981, Tunisia's total imports were equal in value to *dinars* 1,970,300,000 and total exports *dinars* 1,204,100,000. France remains the main trading partner, supplying 23 per cent of the

country's imports and purchasing 18 per cent of Tunisia's exports.

#### Trade with U.K.

1981

Imports from U.K. . . . . Dinars 34,755,000  
Exports to U.K. . . . . 6,053,000

*Currency.*—The Tunisian *dinar* was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. Although Tunisia remains in the Franc Zone the *dinar* is not tied to the French *franc*.

So far as trade is concerned Tunisia was effectively part of metropolitan France until September, 1959, when she abrogated the Customs Union with the latter. In May 1966, France opened import quotas for a wide range of Tunisian goods (but excluding wine). Within these quota limits these goods can be admitted into France customs-free. In 1966 a policy of severe import restriction was adopted in order to reduce the country's chronic imbalance of trade. Tunisia became an associate member of E.E.C. early in 1969, and signed a new agreement with the E.E.C. in 1976. In 1977 the introduction of import quota measures by the E.E.C. on some textile goods resulted in a reduction of growth in this important sector of the Tunisian market. An increase in these quotas for 1979 and 1980 was negotiated in March 1979.

*CAPITAL.*—Ψ Tunis, connected by canal with La Goulette on the coast, has a population (1981) of 1,133,000. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are: Ψ Sfax (554,000); Ψ Sousse (255,000); Ψ Bizerta (376,000); Kairouan; Gabes; Menzel Bourguiba.

*FLAG.*—Red crescent and star in a white orb, all on a red ground.

*NATIONAL DAY.*—June 1.

#### TURKISH EMBASSY IN LONDON

*Chancery*: 43 Belgrave Square, S.W.1  
[01-235 5252]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Rahmi Gümrükçüoğlu (1981).

*Area and Population.*—Turks are to be found scattered throughout a wide belt extending from China through the Soviet Union, Afghanistan and Iran to the present day Turkish State.

Turkey itself extends from Edirne (Adrianople) to Transcaucasia and Iran, and from the Black Sea to the Mediterranean, Syria and Iraq. Total population at the Census of October, 1980 was 45,217,556.

*Turkey in Europe* consists of Eastern Thrace, including the cities of Istanbul and Edirne, and is separated from Asia by the Bosphorus at Istanbul and by the *Dardanelles*—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west. Population (est. 1980), 4,500,000.

*Turkey in Asia* comprises the whole of Asia Minor or *Anatolia* ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Iran, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. Population (est. 1980), 40,500,000.

*Government.*—On October 29, 1923, the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Ataturk) President. Following the introduction of a multi-party régime in 1945, the Democrat Party was returned to power in 1950 and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, a body of military officers. The committee ruled from January to November, 1961, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly.

In March 1975 a right-wing coalition of the Justice, National Salvation, Republican Reliance and Nationalist Action Parties was formed, under the Premiership of Süleyman Demirel, Chairman of the Justice Party.

The second Nationalist Front Government of Mr. Demirel fell in December 1977 and Mr Ecevit formed a government. The Ecevit government fell in October 1979, returning Mr. Demirel to office. However the mounting problems with the economy and terrorism led the military to assume legislative powers in Sept. 1980, a civilian technocratic government being appointed later that month.

Turkey is divided for administrative purposes into 67 *il* with subdivisions into *kaza* and *nahiye*. Each *il* has a governor (*vali*) and elective council.

*Religion and Education.*—98.99 per cent of the population are Moslems. The main religious minorities, which are concentrated in Istanbul and on the Syrian frontier, are: Greek Orthodox, 10,000; Armenians, 42,000; Syrians, 42,000; Others, 6,000. (Total Christians, 100,000); Jewish, 44,000. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is free, secular and compulsory at primary level. There are elementary, secondary and vocational schools.

There are three universities at Istanbul (Istanbul University, Istanbul Technical University and Boğaziçi (Bosphorus) University), three in Ankara (Ankara University, Hacettepe University and Orta Doğu (Middle East Technical) University), one each

at Izmir, Erzurum and Trabzon. There are 18 universities in all, 6 of which were recently created. There is also a Faculty of Agriculture at Adana, a Faculty of Veterinary Science in Elazig, and Faculties of Economics in Bursa and Eskisehir. The expenditure allocated to education in the 4th Five Year Plan (1979-83) was TL76,000,000,000, compared with TL14,000,000,000 in the 3rd Five Year Plan (1973-77), but past experience has shown that targets in this field are not always met.

*Language and Literature.*—Until 1926, Turkish was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the number of Turks who can read and write has risen steadily, from about 10 per cent in 1927 to nearly 80 per cent by 1970. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Istanbul and Ankara, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek, Armenian and English and numerous magazines and weeklies on various subjects, but few trade commercial publications.

*Agricultural Production.*—In 1981 agricultural production accounted for some 21 per cent of the gross domestic product at constant factor prices, while exports of agricultural commodities represented some 47 per cent of the total exports. About 60 per cent of the working population are in the rural sector, but agriculture is still primitive in many areas and agricultural productivity is low. Estimated production figures for the principal crops in 1981 were ('000 tons):

Wheat	17,000	Tobacco	200
Barley	5,900	Sugar Beet	11,000
Maize	1,100	Potatoes	3,000
Rye	500	Grapes	3,600
Oilseeds	1,507	Citrus Fruits	1,200
Pulses	825	Figs	200
Cotton	500	Hazelnuts	350

With the important exception of wheat, which is mostly grown on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred around Izmir, where substantial quantities of cotton are also grown. The main cotton area is in the Kukurova Plain around Adana. 1980 livestock figures are as follows ('000): horses, 794; mules, 305; donkeys, 1,345; camels, 12; cattle (including buffalo), 16,925; sheep and goats, 64,015; angora goats, 3,658; hogs, 13; poultry, 61,449. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threaten to destroy the existing forests within the next 25 years.

*Industry.*—After agriculture, Turkey's second most important industry is based on her considerable mineral wealth which is, however, as yet comparatively unexploited. Coal production in 1981 amounted to 7,223,000 tons, and 17,400,000 tons of lignite. The main export minerals are chromite and boron. Production of iron ore in 1981 was 2,856,000

tons; chrome ore, 507,000 tons; copper, 45,000 tons and boron minerals, 1,333,000 tons. The research and exploitation of the principal mineral deposits are mainly in the hands of the Mineral Research and Exploration Institute of Turkey and the State-owned Etibank respectively. The latter controls directly, on behalf of the Government, all the copper, sulphur and pyrite output of Turkey, as well as much of the colemanite and chrome production. The government has plans to return some of the mines to the private sector and to open the mining field to foreign investment. Since state-sponsored industrialization began in 1935, industry has played an increasing part in the Turkish economy. Here, also, as in the case of minerals, much of the industry of the country is controlled by the Government.

Industrial production figures for 1981 ('000 tons): cement, 15,008; sugar, 1,270; pig iron, 1,830; steel ingots, 1,830; paper, 368; petroleum products, 12,606; crude oil, 2,100; artificial fertilizer, 6,609; electric energy (billion of kilowatt hours), 25; cotton fabrics (thousand metres), 228.

The progress made in the manufacture of sugar, cotton, woollen and silk textiles, and cement, has been such that the bulk of the country's requirements can now be produced locally, while other industries contributing substantially to local needs include vehicle assembly, paper, glass and glassware, iron and steel, leather and leather goods, sulphur refining, canning and rubber goods, soaps and cosmetics, pharmaceutical products, prepared foodstuffs and a host of minor industries. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to promote the exploitation of Turkey's petroleum resources by foreign countries.

In common with other developing countries, Turkey's economy was adversely affected by the steep rises in oil prices from 1973 onwards. This led to a succession of economic crises and high inflation culminating in Jan. 1980 in the introduction of an economic stability programme. Exports have since risen dramatically, inflation has largely been brought under control, and modest growth has resumed although the internal economy is still depressed with high unemployment.

Since the Second World War the United States Government has given Turkey financial aid totalling over 5 billion dollars, half of which has been for military and half for economic purposes. The other main official sources of foreign aid have been the O.E.C.D. (who have pledged over \$3 billion since 1979); the I.B.R.D., and the I.M.F. which has made medium term loans for balance of payment support (\$1.6 billion over three years in 1980). The United Kingdom has pledged over £100,000,000 of aid to Turkey since 1963.

The fourth of Turkey's Five Year Development Plans, for the years 1979-83, began in January 1979. The basic economic objective of the fourth plan was to achieve an average growth rate of 8.0 per cent in the gross national product. This had not been achieved and the plan has been dropped. Preliminary work has been started on the Fifth Plan.

#### COMMUNICATIONS

*Railways.*—The complete network became the property of the State Railways Administration in 1948. The total length of lines in operation is 8,193 kilometres.

*Roads.*—At the end of 1980 there were 31,976 km. of national roads (24,972 of which were macadamized). The total state and provincial road system is some 60,761 km. in length. The estimated number of vehicles in 1980 was 1,135,000, of which there were 711,000 motor cars, 66,000 minibuses, 170,000 lorries and 157,000 light-weight trucks.

**Posts.**—In June 1979 the number of telephone subscribers in Turkey was approximately 1,800,000.

**Shipping.**—In August 1980 there were 343 merchant ships over 300 gross tons, 79 passenger ships and 73 tankers, giving a total draft weight of 1,545,062 tons.

**Civil Aviation.**—The State airlines (T.H.Y.) operate all internal services and have services to London, Paris, Athens, Beirut, Brussels, Amsterdam, Zürich, Frankfurt, Munich, Rome, Milan, Geneva, Copenhagen, Nicosia, Tel Aviv and Vienna. Most of the leading foreign airlines, including British Airways, operate services to Istanbul and some also to Ankara. The T.H.Y. fleet is composed of D.C.10's, D.C.9's, Fokker Friendships, Fokker Fellowships and Boeing 707's.

#### FINANCE

(In 1982 the financial year is being aligned with the calendar year: these figures are for Mar. 1–Dec. 31)

	1982
	TL'000,000
Estimated Expenditure .....	1,755,200
Estimated Revenue .....	1,680,000

**Currency.**—The Turkish *Lira* (TL) is divided into 100 *Kurus*. For rate of exchange see also p. 84.

#### TRADE

	1980	1981
Total imports ....	\$7,909,000,000	\$8,911,000,000
Total exports ....	2,910,000,000	4,703,000,000

The 1981 foreign trade deficit figure was U.S., \$4,208,000,000; for 1980 it was U.S.\$4,999,000,000.

All imports are subject to licence and the issue of licences is limited to goods considered necessary for the country's economy. Lists of permitted imports are published annually at the beginning of January. The main imports are machinery, crude oil and petroleum products, iron and steel, vehicles, medicines and dyes, chemicals, fertilizers and electrical appliances. The principal exports are cotton, tobacco, fruits, nuts, minerals, livestock, textiles, glass and cement.

#### Trade with U.K.

	1980
Imports from U.K. ....	£147,118,000
Exports to U.K. ....	49,243,000

**CAPITAL.** Ankara (Angora), an inland town of Asia Minor, about 275 miles E.S.E. of Istanbul, with a population (1980) of 3,196,460. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Cæsar. A new city was laid out on modern lines, with parks, statues and avenues. ΨIstanbul (4,870,747), the former capital, was the Roman city of Byzantium. It was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328 and renamed Constantinople. Istanbul contains the celebrated church of St. Sophia, which, after becoming a mosque, was made a museum in 1934; it also contains Topkapi, former Palace of the Ottoman Sultans, which is also a museum. Other cities are ΨIzmir (1,968,614); Adana (1,467,346); Bursa (1,161,553); Gaziantep (387,093); and Eskişehir (543,733).

**FLAG.**—Red, with white crescent and star.  
**NATIONAL DAY.**—October 29 (Republic Day).

EMBASSY IN LONDON  
30 Prince's Gate, S.W.7  
[01-581 1281]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sayed Mohammed Mahdi Al-Tajir.

The United Arab Emirates (formerly the Trucial States) is composed of seven Emirates (Abu Dhabi, Ajman, Dubai, Fujeirah, Ras al Khaimah, Sharjah and Umm al Qaiwain) which came together as an independent state on December 2, 1971, when they ended their individual special treaty relationships with the British Government (Ras al Khaimah joined the other six on February 10, 1972).

The British Government, by virtue of a treaty made in 1892, had been responsible for the external affairs of the states through the British Political Resident in the Arabian Gulf and the British Political Agents in each state, but on independence the Union Government assumed full responsibility for all internal and external affairs apart from some internal matters that remained the prerogative of the individual Emirates. Six of the Emirates lie on the shore of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West while the seventh, Fujeirah, lies on the gulf of Oman.

*Area and Population*.—The approximate area of the U.A.E. is 33,000 square miles and the population in 1980 was estimated at one million. Security in the area is maintained by the U.A.E. Armed Forces. The Ministry of Defence is located in Dubai with a General Headquarters in Abu Dhabi. Most of the separate police forces have also been merged.

Revenue is chiefly derived from oil, re-exports and customs dues on imports. A substantial amount is spent on overseas aid, where commitments in 1980 totalled £154.8 million, doubling those of 1979.

## Trade with U.K.

	1980
Imports from U.K. ....	£537,255,000
Exports to U.K. ....	485,900,000

## Abu Dhabi

Abu Dhabi is the largest Emirate of the U.A.E. in area, stretching from Khor al Odaid in the west to the borders with Dubai in the Jebel Ali area. It includes six villages in the Buraimi oasis, the other three being part of the Sultanate of Oman, and a number of settlements in the Liwa Oasis system. Following negotiations with Saudi Arabia, some adjustment of the border has now been made in the Khor al Odaid region, but the agreement has not yet been ratified.

The Abu Dhabi Government controls oil, gas and petrochemical operations in the Emirate through the Abu Dhabi National Oil Company (ADNOC) which has majority shareholdings in the several oil operating and gas treatment companies. ADNOC also has majority shareholdings in oil industry related companies covering drilling, refining, distribution, chemical manufacture and investment. Offshore production began in 1962, the most important fields being Umm Shaif and Lower Zakum, near Das Island, site of a large associated gas liquefaction plant. The Upper Zakum field is due to start production in late 1982, and four other offshore fields are being developed, one near Abu Dhabi city and 3 near Delma. Production of oil onshore began in 1963 from the Murban field. A large onshore associated gas liquefaction project based at Ruwais started production in 1981. Other large natural gas finds in recent years will consolidate Abu Dhabi's position as a holder of some of the largest reserves of natural gas in the world. Abu Dhabi's crude oil production in 1981 was 545 million barrels.

With its oil wealth the Emirate has seen a decade of growth (which is currently slowing down), not only at Abu Dhabi, now a modern city of about 350,000 people, but also at Al Ain in the Buraimi Oasis and at the new petro-chemical city at Ruwais. A new international airport opened in 1982 at Abu Dhabi and another is planned for Al Ain. There are airfields at Das Island and Jebel Dhanna. The port and harbour on Abu Dhabi island are now almost completed and a port will be built at Ruwais. The population of the Emirate is now about 450,000.

## Dubai

Dubai is the second largest Emirate both in size and in population, which is now about 350,000. The town of Dubai is the main port for the import of goods into the U.A.E. and has a wide re-export trade to the other Gulf States. Dubai's prosperity was established by this trade long before the discovery of oil. Oil was discovered in 1966 and production began in September 1969. The main operator of Dubai's offshore oilfields is Dubai Petroleum Company, a subsidiary of CONOCO.

Oil income has been used to finance a number of major construction projects including an international airport and a large deep-water port. The increase in oil prices in the mid-1970's led to a major construction boom in Dubai and several large projects were completed including a dry dock complex and an international trade and exhibition centre. At the Emirate's industrial area of Jebel Ali a port development is nearing completion and work on an aluminium smelter has been completed. The introduction of other industries to the area is under consideration, and there are improved prospects for those with the recent discovery of gas and condensate onshore in Dubai.

## Sharjah

Sharjah, with a present population of approx. 120,000, has declined from its position 50 years ago as

principal town in the area. It became the third oil producing Emirate in the summer of 1974, following the discovery of oil offshore by the Crescent Petroleum Company, a consortium of six companies from the United States headed by Buttes Oil and Gas. Although this field is under the control of Sharjah, a boundary settlement left it with only 35 per cent of the revenues and production is now less than 10,000 barrels per day. New oil and gas discoveries were made in 1980 and exports from this source were due to begin in mid-1982. Sharjah is well connected by metalled roads to all the other Northern Emirates. It experienced a construction boom in the mid-1970's including an ambitious layout of roads and flyovers within the town. A new container port has been constructed on the Gulf of Oman at Khor Fakkan. The new international airport was officially opened in 1979.

#### Ras al Khaimah

Ras al Khaimah has a population of 80,000 of whom more than half live in the town. An ancient sea-port, near which archaeological remains have been found, Ras al Khaimah is developing as the most agricultural of the Emirates, producing vegetables, dates, fruit and tobacco. Oil exploration work is currently going on both off- and onshore. Some oil was previously found offshore, but not in commercial quantities. An industrial area has been developed to the north of the Emirate, which includes 2 cement works. Ras al Khaimah has an international airport and has also expanded its port.

#### Fujeirah

Fujeirah, with a population of 40,000, is the poorest and most remote of the seven Emirates lying on the

Gulf of Oman coast, and only connected by a metal road to the rest of the country since the end of 1975. Largely agricultural, its population is spread between the slopes of the inland Hajar mountain range and the town of Fujeirah itself, together with a number of smaller settlements on the comparatively fertile plain on the coast. Although exploration work continues, there have been no hydrocarbon discoveries in the Emirate. However, there are some chrome and other mineral deposits.

#### Ajman and Umm al Qaiwain

Ajman and Umm al Qaiwain are the smallest Emirates, having populations of approx. 36,000 and 25,000 respectively. Both lie on the Arabian Gulf coast although Ajman has two inland enclaves at Manama and Masfut. Exploration work continues in both Emirates for oil and gas but so far only Umm Al Qaiwain has experienced any success, with the offshore discovery of natural gas, but the field has yet to be commercially developed. The discovery of onshore gas in nearby Sharjah has increased hopes of similar discoveries in both Ajman and Umm Al Qaiwain.

#### BRITISH EMBASSY (Abu Dhabi)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Harold Berners Walker, C.M.G. (1981).  
*British Council Representative*, W. H. Jefferson, P.O. Box 248, Abu Dhabi.

(Dubai)  
*Counsellor and Consul General*, P. R. M. Hinchcliffe, C.V.O.  
*British Council Representative*, J. E. Dawson, P.O. Box 65, Dubai.

## UNITED STATES OF AMERICA

### AREA AND POPULATION

*Population.*—The total resident population of the United States on April 1, 1977 was estimated at 215,892,000 excluding Armed Forces stationed abroad. Civilian resident population at the same date was estimated at 214,244,000. Including Armed Forces stationed abroad (April 1, 1977), 216,376,000.

\* Provisional.

IMMIGRATION AND NATURALIZATION

From 1820 to 1978, 48,664,965 immigrants were admitted to the United States. The 601,442 admitted during fiscal year 1978, were born in the following countries: Mexico (92,367), the Philippines (37,216), Greece (7,035), Cuba (29,754), Jamaica (19,265), the

United Kingdom (14,245), China and Taiwan (21,315), Canada (16,863), Portugal (10,445), the Dominican Republic (19,458), India (20,753), Korea (29,288), Germany (6,739), Colombia (11,032) and Trinidad and Tobago (5,973).

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolution.

## PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25° 07'–49° 23' North and longitude 66° 57'–124° 44' West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of 71° 23' N., at Point Barrow (2,502 miles from the U.S. geographic centre).

The general coastline of the 50 States has a length of about 2,069 miles on the Atlantic, 7,623 miles on the Pacific, 1,060 miles on the Arctic, and 1,631 miles on the Gulf of Mexico.

The principal river is the mighty Mississippi-Missouri-Red, traversing the whole country from north to south, and having a course of 3,710 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, and Ohio, Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, Roanoke and Savannah; of the latter, the Columbia-Snake, Sacramento, and Colorado. The Nueces, Brazos, Trinity, Pearl, Mobile-Tombigbee-Alabama, Apalachicola-Chattahoochee, Suwannee and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 647,300 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,234,600 are drained by the Mississippi-Missouri-Red. The chain of the Rocky Mountains separates the western portion of the country from the remainder, communications being carried on over certain elevated passes, several of which are now traversed by railroads and major highways; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. In the Eastern States (which form the more settled and most

THE UNITED STATES

thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, pine, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The mineral kingdom produces ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include large quantities of coal, petroleum, stone, phosphate rock, and salt. The highest point is Mount McKinley (Alaska), 20,320 ft. above sea level and the lowest point of dry land is in Death Valley (Inyo, California), 282 ft. below sea-level.

THE PRESIDENTS OF THE UNITED STATES OF AMERICA

Name (with Native State)	Party	Born	Inaug.	Died	Age
1. GEORGE WASHINGTON, <i>Va</i> .....	Fed.	1732, Feb. 22	1789	1799, Dec. 14	67

† Died in office. § Assassinated. (a) Elected as Vice-President.

† Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of organized Territories. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternatively. July 4 (Independence Day) is observed as the National Day.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791 and eleventh to twenty-sixth, Jan. 8, 1798, Sept. 25, 1804, Feb. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951, March 29, 1961, Jan. 23, 1964, Feb. 10, 1967 and June 30, 1971), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election for one additional term. The mode of electing the President is as follows:—Each state appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the

Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the *first Monday after the second Wednesday in December* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *sixth day of January* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not exceeding three) the House of Representatives elects a President the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice-President end at noon on the 20th day of January of the years in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice-President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of \$200,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance not exceeding \$100,000. Under the XXIInd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein. (2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials. (3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any state which the authorities thereof are unable to suppress, the aid of the President is invoked. (4) He conducts the Foreign policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the senators present concur." The Declaration of War rests with Congress. (5) He makes recommendation of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by two-thirds majority in each House, it becomes law, notwithstanding the objection of the President.

*President of the United States*, RONALD WILSON REAGAN, born Feb. 6, 1911, sworn in January 20, 1981. Republican.

*Vice-President*, George Herbert Walker Bush, born June 12, 1924, sworn in Jan. 20, 1981.

#### THE CABINET

*Secretary of State*, George Schultz.

*Secretary of the Treasury*, Donald T. Regan.

*Secretary of Defence*, Caspar W. Weinberger.

*Attorney-General*, William F. Smith.

*Secretary of the Interior*, James G. Watt.

*Secretary of Agriculture*, John R. Block.

*Secretary of Commerce*, Malcolm Baldrige.

*Secretary of Labour*, Raymond J. Donovan.

*Secretary of Health and Human Services*, Richard S. Schweiker.

*Secretary of Housing and Urban Development*, Samuel R. Pierce, Jr.

*Secretary of Transportation*, Andrew L. Lewis, Jr.

*Secretary of Energy*, James B. Edwards.

*Secretary of Education*, Terrel H. Bell.

#### UNITED STATES EMBASSY

Rosenvorn Square W.1

[01-499 9000]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency the Hon. John Jeffrey Louis, Jr. (1981).

*Minister*, Hon. Edward J. Streator.

*Minister for Economic and Commercial Affairs*, Robert J. Morris.

*Counsellors*, Robert W. Maule (*Consular Affairs*); David C. Fields (*Administrative Affairs*); Calvin C. Berlin (*Commercial Affairs*); Justin L. Bloom (*Scientific Affairs*); Philip Arnold (*Public Affairs*); Turner L. Oyloe (*Agricultural Affairs*); Timothy E. Deal (*Economic Affairs*); Roger C. Schrader; Richard L. McCormack (*Political Affairs*).

*Defence Attaché*, *Naval Attaché* and *Naval Attaché for Air*, Capt. Duane L. Heisinger, U.S.N.

*Army Attaché*, Col. Edward K. Johnson, U.S.A.

*Air Attaché*, Col. Ervin J. Rokke, U.S.A.F.

*1st Secretaries*, Millard L. Johnson (*Public Affairs*);

Miss Kathryn J. Groot (*Personnel*); Coleman Parrott; Ralph Hartwell (*Administrative*); Christopher Snow; Sigmund Cohen (*Cultural Affairs*); Stephen Conn; Gibson Lanpher; Roger Harrison; Richard Cornish; Paul Schlamm; James Hooper (*Political*); Malachy T. Minnies; Edward O'Connor; Harvey Clew; Edward Williams; An-

drew Grossman (*Economic*); Diane Dillard; Robert Emmons; Richard Schenk (*Consular*); Theodore Horoschak (*Agriculture*); George Kachmar (*Commercial*).

#### CAPITAL OF THE UNITED STATES

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of Government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 61 square miles, with a population at the Census of 1980 of 637,651.

The District of Columbia was formerly governed by a Commissioner and assistant and a 9-member City Council, all appointed by the President. From Nov. 5, 1974, this body has been replaced by an elected mayor and City Council.

The *City of Washington* is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia.

## THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The average number of persons represented by each Congressman is 1 for 500,000. The *Senate* consists of 100 members. The salary of a Senator is \$60,662-50 per annum, with mileage at 20 cents per mile each session. The *House of Representatives* consists of 435 Representatives, a resident commissioner from Puerto Rico and a delegate from American Samoa, the District of Columbia, Guam and the Virgin Islands. The salary of a Representative is \$60,662-50 per annum, with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On Nov. 1, 1980, there were 160,491,000 persons of voting age, excluding members of the armed forces overseas.

## THE NINETY-SEVENTH CONGRESS

*President of the Senate*, George Bush (*Vice President of the United States*).

*Speaker of the House of Representatives*, Thomas P. O'Neill, Jr., *Massachusetts*.

*Secretary of the Senate*, William F. Hildenbrand, *Pennsylvania*.

*Clerk of the House of Representatives*, Edmund L. Henshaw, Jr., *Virginia*.

Members of the 97th Congress were elected on Nov. 4, 1980.

The 97th Congress is constituted as follows: *Senate*.—Democrats 47; Republicans, 53; Total, 100. *House of Representatives*.—Democrats, 242; Republicans, 190, and 3 vacancies. Total, 435.

## THE JUDICATURE

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, etc., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the judgments of the highest Courts of the States. (2) The *United States Courts of Appeals*, dealing with appeals from District Courts and from certain federal administrative agencies, and consisting of all the Circuit Judges within the circuit. (3) The 95 *District Courts* served by 516 District Court Judges.

## THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.)

*Chief Justice*, Warren E. Burger *Va.*, born Sept. 17, 1907, appointed June 23, 1969.

## DEFENCE

## Department of Defence

*Secretary of Defence (in the Cabinet)*, Caspar W. Weinberger.

*Secretary of the Army*, John O. Marsh.

*Secretary of the Navy*, John Lehman.

*Secretary of the Air Force*, Verne Orr.

*Chairman, Joint Chief of Staff*, Gen. John W. Vessey, Jr.

The Department of Defence includes the Secretary of Defence as its head, the Deputy Secretary of Defence, the Defence staff offices, the Joint Chiefs of Staff and the Joint Staff, the three military departments and the military services within those departments, the unified and specified commands, and other Department of Defence agencies as the Secretary of Defence establishes to meet specific requirements. The Defence staff offices and the joint Chiefs of Staff, although separately organized, function in full coordination and cooperation. They include the offices of the Director of Defence Research and Engineering, the Assistant Secretaries of Defence, the General Counsel of the Department of Defence and such other staff offices as the Secretary of Defence may establish. The Joint Chiefs of Staff, as a group, are directly responsible to the Secretary of Defence for the functions assigned to them. Each member of the Joint Chiefs of Staff, other than the Chairman, is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary and functions under the direction, authority and control of the Secretary of Defence.

The Department of Defence maintains and employs armed forces: (1) to support and defend the Constitution of the United States against all enemies, foreign and domestic; (2) to insure, by timely and effective military action, the security of the United States, its possessions, and areas vital to its interests; (3) to uphold and advance the national policies and interest of the United States; and (4) to safeguard the internal security of the United States. All functions in the Department of Defence and its component agencies are performed under the direction, authority and control of the Secretary of Defence.

Commanders of unified and specified commands are responsible to the President and the Secretary of Defence for the accomplishment of military missions assigned to them.

## Unified Defence Commands

## COMMANDERS-IN-CHIEF

*U.S. European Command, Brussels*.—Gen. Bernard W. Rogers (*U.S. Army*) (concurrently *N.A.T.O. Supreme Allied Commander*).

*U.S. Southern Command, Quarry Heights, Panama Canal Zone*.—Lt.-Gen. Wallace H. Nutting (*U.S. Army*).

*Atlantic, Norfolk, Virginia.*—Adm. Wesley L. McDonald (*U.S. Navy*) (concurrently *N.A.T.O. Supreme Allied Commander, Atlantic*).

*Pacific, Hawaii.*—Adm. Robert W. Long (*U.S. Navy*).  
*H.Q., Aerospace Defence Command, Lt.-Gen. James V. Hartinger (U.S.A.F.).*

\**Strategic Air Command, Omaha.*—Gen. Bennie L. Davis (*U.S.A.F.*).

\**Military Air Lift Command, Gen. James R. Allen (U.S.A.F.).*

*U.S. Readiness Command, Gen. Donn A. Starry (U.S. Army).*

\* A Specified Command.

*Army.*—The Army of U.S. had a strength of 8,293,766 (including 2,310,436 Air Force) on V.E. Day, reduced by June 30, 1959, to 861,964 (excluding Air Force). The strength on March 31, 1981, was 774,394. Stationed in Germany were four divisions.

*Chief of the Staff of the Army, Gen. Edward C. Meyer.*

*Navy.*—The peak strength of the Navy (including Marine Corps in 1945, was 3,855,497. The strength on March 31, 1981 was 535,406. Strength of the Marine Corps, 186,858.

*Commandant, Marine Corps, Gen. Robert H. Barrow.*

The U.S. Navy had in service in 1979, 458 active fleet ships, including 13 attack carriers, 28 cruisers, 73 destroyers, 65 frigates, 123 submarines (80 nuclear, 41 SSBN and 2 diesel), 65 amphibious, 3 mine warfare, 65 auxiliaries and 3 patrol craft.

*Chief of Naval Operations, Adm. Thomas B. Hayward.*

*Air.*—The United States Air Force was established as a separate organization on September 18, 1947. On

May 31, 1981, there were 570,000 officers and airmen on active duty, with 40,000 civilian employees. Air Force Reserve and Air National Guard numbered 246,000 on May 31, 1981.

To deter aggression the Air Force has up to 30 per cent of the strategic bomber fleet maintaining constant alert as well as 1,052 inter-continental ballistic missiles in hardened silos. In addition, the Air Force maintains the capability to carry out limited war and special warfare operations. In March, 1961, the Air Force was assigned primary responsibility for the Department of Defence space development programmes and projects. On June 13, 1981, the United States had a total of 2,779 spacecraft in earth orbit or deep space. These included Air Force, Army and N.A.S.A. shots.

*Chief of Staff of the U.S. Air Force, Gen. Charles A. Gabriel.*

#### NATIONAL ORIGINS OF THE POPULATION

About 61,155,000 of the approximately 214 million persons in the United States reported on a sample survey conducted in March, 1978, that they were of one of eight specific origin categories. Approximately 15.2 million persons reported German origin; 10.9 million, English, Scottish or Welsh; 8.4 million, Irish; 12 million, Spanish; 6.8 million, Italian; 3.5 million, Polish; and 1.5 million, Russian. About 10 million persons living in the United States at the time of the 1970 Census were foreign born, Germany, Italy, Mexico and the United Kingdom were the major

contributing countries. About 18 per cent of them reported English as the language usually spoken in their homes. They were 25 years older on the average than the native population.

Countries of birth for about 400,000 foreign-born persons (1970 census) were: Canada (812,000), Cuba (439,000), Germany (833,000), Italy (1,009,000), Mexico (760,000), Poland (548,000) and the United Kingdom (686,000).

### SOCIAL WELFARE EXPENDITURE

The total value of government expenditure on social welfare (federal, state and local government) in 1979 was \$428,400,800,000. In 1979 expenditure per person (of the total population of U.S.A.) was \$1,912—social insurance, \$863; education, \$484; public aid, \$289; health and medical services, \$110; veterans' welfare, \$91; other services, \$48 per person. Total expenditure by programme was:

	\$ million		
	1977	1978	1979
Social insurance .....	160,867	175,101	193,588
Education .....	94,421	101,188	108,279

Housing .....	4,358	5,225	6,226
<b>TOTAL .....</b>	<b>361,553</b>	<b>394,462</b>	<b>428,401</b>

### PUBLIC DEBT

On Sept. 30, 1980, the total gross *Federal Debt* of the United States stood at \$914,317,000,000; the equivalent debt for 1979 was \$833,751,000,000.

### COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical workers—single persons and families—in 50 cities representative of all cities in the United States) showed a monthly average during the calendar year 1980 of 247.0 (the basic figure of 100 being the 1967 average), a rise of 13.5 per cent over the 1979 figure of 217.4.

### PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose to \$1,708.0 billion in 1978, 11.9 per cent. above the level of the previous year. Business proprietors, professional and farm income totalled \$123.7 billion in the first quarter of 1979 (17.8 per cent. increase on previous year) and dividends, interest, and rent totalled \$250.5 billion (up to 12.4 per cent.). Transfer payments were \$238.1 billion and personal contributions to social insurance, which are offsets to income, were \$78.8 billion.

*Disposition of personal incomes.*—Personal taxes were \$270.6 billion in the first quarter of 1979, leaving households with \$1,563.5 billion of disposable income. Consumption expenditures were \$1,444.7 billion; \$213.4 billion for durable goods, \$569.7 billion for non-durable goods and \$661.6 billion for services. Personal saving was \$80.9 billion.

*Private domestic investment.*—The total gross private domestic investment rose from \$345.6 billion in 1978 to \$371.6 billion in the first quarter of 1979. Fixed investment in residential construction increased to \$107.0 billion in 1978 (1977 \$91.9 billion) and other construction rose to \$222.6 billion (1977 \$190.4 billion). Investment in producers' durable equipment rose from \$126.5 billion in 1977 to \$144.8 billion in 1978.

\* Includes geothermal power and electricity produced from wood and waste.

During 1981 oil and gas drilling rigs in operation averaged 3,970 and the number of well completions totalled 78,538. Seismic exploration work in progress involved a total of 681 crews, 44 in offshore areas and 637 on shore. Domestic crude oil production in 1981 averaged 8.6 million barrels per day and imports of petroleum totalled 6.8 million barrels per day, of which about two-thirds came from members of O.P.E.C. Production of dry natural gas in 1981 was 19,424 billion cubic feet (Bcf) and imports were 877 Bcf, supplying 19,261 Bcf required for domestic consumption. Stocks of gas available for withdrawal were estimated at 2,813 Bcf. Production of coal in 1981 was 820,139,000 short tons and imports were 1,042,000 short tons. Domestic consumption required 729,021,000 short tons, and 112,541,000 short tons were exported. In 1981 U.S. nuclear power generators produced 272,674 million net kilowatt-hours of electricity, accounting for 12 per cent of domestic electricity generation. Reactors licenced for commercial operation by end Dec. 1981 totalled 74, with a maximum dependable capacity of 55,524 million net kilowatts.

## LABOUR

*Organized Labour.*—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formally established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership in 1980 was 16,773,000. There are also 7,113,000 members of labour organizations not affiliated to the AFL-CIO. Of the 23,885,000 members of national and international unions with headquarters in U.S.A., 1,534,000 were employed in Canada.

Approximately 23 per cent. of the employed wage and salary workers in the United States are members of labour organizations.

*Work Stoppages.*—There were 3,885 stoppages recorded in 1980. There were 33,289,000 man-days of idleness, representing 0.14 per cent. of estimated working time of all non-agricultural workers.

*Employment and Unemployment.*—The civilian labour force (working population) was 107,406,000 in May 1981. This includes self-employed wage and

salary-earners, and unpaid family workers, employed and unemployed. Unemployment was estimated at 8,171,000 in May 1981 (7.6 per cent.) (it was 7.6 per cent. in May 1980).

Wages (Preliminary Figures) April 1982	Average Weekly Earnings \$	Hours per Week	Average Hourly Earnings \$
Manufacturing .....	325.47	38.7	8.41
Durable .....	350.06	39.2	8.93
Non-durable .....	290.70	38.0	7.65
Coal Mining .....	494.36	39.9	12.39

Gen. Bldg. Contractors	368.10	35.6	10.34
Gas, Electricity and Sanitary Services ...	438.66	41.5	10.57
Wholesale trade .....	304.07	38.2	7.96
Retail trade (incl. eating and drinking places)	161.02	29.6	5.44
Laundries, Cleaners ..	167.82	33.1	5.07

*Wages.*—In March 1982, gross average weekly earnings in industry ranged from \$563.71 per week in petroleum refining (42.9 hours and \$13.14 average hourly earnings) to \$103.42 in eating and drinking places (25.6 hours and \$4.04 average hourly earnings). The average for all manufacturing was \$327.27 compared with \$311.62 in March 1981.

On Jan. 1, 1978, the minimum wage set by federal law became \$2.65 an hour for most non-agricultural employees subject to the Fair Labour Standards Act. The rate rose to \$2.90 an hour on Jan. 1, 1979, \$3.10 on Jan. 1, 1980 and \$3.35 on Jan. 1, 1981. The law requires at least time and a half of an employee's regular rate of pay for all hours over 40 a week for most covered workers.

The Fair Labour Standards Act covers all employees of certain enterprises having workers engaged in interstate commerce, producing goods for interstate commerce, or handling, selling, or otherwise working on goods or materials that have been moved in or produced for such commerce by any person.

There are certain exemptions from these requirements in specific occupations and industries.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of retirement plans, insurance and health benefits financed by the employer or by employer and employees jointly.

## ROADS

In 1980 there were 3,955,387 miles of roads and streets in the United States, of which 3,331,334 miles were in rural areas and 624,053 miles were in urban areas. Surfaced roads and streets account for 3,197,447 miles of the total; 757,940 miles were unimproved or graded and drained. State primary roads, including extensions in municipal areas, total 476,557 miles (475,494 surfaced). Other roads and streets under State control total 304,648 miles (287,474 surfaced), 2,911,419 miles are under local control (2,341,930 surfaced); and 262,763 miles (90,962 surfaced) are under Federal control (in national forests and parks).

An estimated total of \$39,195,000,000 was spent in 1980 for roads and streets in the United States. Of this total \$24,914,000,000 was spent for State highways, \$5,690,000,000 was spent for county and local rural roads, \$7,640,000,000 was spent for city streets and \$951,000,000 was spent on roads in Federal areas. Capital outlay accounts for 50.9 per cent of the total expenditure; 27.9 per cent was spent for maintenance, and 7.7 per cent for administration; 9.7 per cent for highway police and safety; and 3.8 per cent for interest on highway bonds.

**Motor Vehicles and Taxation.**—The number of motor vehicles registered in 1980 in the United States was 155,796,219, an increase of 2.6 per cent over the 1979 total of 151,869,299. The State governments received \$17,177,713,000 in 1980 from motor fuel, motor vehicle and motor-carrier taxes. In 1980 the Federal Government received \$6,415,021,000 from excise taxes on motor vehicles and parts, tyres and tubes, petrol, diesel and special fuels and lubricating oils.

**Accidents.**—In 1980 there were 51,089 deaths caused by motor vehicle accidents. The death rate per 100,000,000 vehicle-miles of travel was 3.34 in 1980 compared with 3.35 in 1979.

## SHIPPING

The ocean-going Merchant Marine of the U.S. on May 1, 1981, consisted of 862 vessels of 1,000 gross tons and over, of which 579 were privately owned and 283 were government-owned ships. Of the 579 privately owned vessels, 533 were active including 5 combination passenger and cargo ships, 102 freighters, 13 bulk carriers, 255 tankers, 10 tug-barge units, 8 liquefied natural gas carriers and 140 intermodal ships. There were 262 ships in the National Defense Reserve Fleet of inactive government-owned vessels, of which 21 were to be sold for scrap.

## AIR TRANSPORT

United States domestic and international scheduled airlines in 1981 carried 285,720,000 passengers over 248,756,780,000 revenue passenger miles. The freight flown by the scheduled airlines during 1981 totalled 5,616,750,000 ton miles and express 67,974,000 ton miles. In addition, the airlines flew 1,383,340,000

ton miles of mail, an increase of 3.5 per cent. over 1980.

Total operating revenues of all U.S. scheduled airlines reached the record figure of \$36,502,217,000 in 1981, an increase of 9.7 per cent. over 1980. Similarly, total operating expenses rose to a record high total of \$36,922,235,000 last year, or a 10.3 per cent. increase over 1980. Scheduled operations showed a net operating loss of \$420,020,000 in 1981, compared to a net operating loss of \$221,615,000 and a net profit of \$17,212,000 in 1980.

Nine principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (11); (b) Local Service Carriers, operating routes of lesser traffic density between the smaller traffic centres and between small and large centres (8); (c) The International and Territorial Carriers, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, other than Canada, and over international waters; also between foreign countries and into Mexico, the Caribbean (10); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Intra-Alaskan Carriers, providing service within Alaska (5); (f) All Cargo Carriers (3).

EDUCATION  
State School Systems

All the 50 States and the District of Columbia have compulsory school attendance laws. In general, children are obliged to attend school from 7 to 16 years of age. Officers of local administrative units, usually known as truant or attendance officers, are charged with enforcing the compulsory attendance laws.

In the autumn of 1981, 45,190,000 children were enrolled in regular elementary and secondary day schools in the United States, of whom 5,070,000 or 11.1 per cent attended private schools.

The following percentages of the school-age population were estimated to be enrolled in school in the autumn of 1981; of 5- and 6-year-olds, 96 per cent; of 7- to 13-year-olds, 99 per cent; of 14- to 17-year-olds, 93 per cent; and of 18- to 24-year-olds, 29 per cent.

Preliminary data for the 1980-81 school year for public elementary and secondary regular day schools were as follows: enrolment of 40,984,093; 2,183,538 classroom teachers with an average salary of \$17,360; \$89,926,078,000 for estimated current expenditures; \$6,720,681,000 for sites, buildings, furniture and equipment expenditures; and \$1,851,832,000 expended for interest on school debt.

Revenue for public elementary and secondary school purposes comes from the Federal, State, and local governments, sales of bonds, real property and equipment, loans and proceeds from insurance adjustments. Estimated revenue receipts from Government sources during 1980-81 amounted to \$99,840,529,000; 8.4 per cent from the Federal Government, 46.8 per cent from State governments, and 44.7 per cent from local governments.

During the 1980-81 school year, the average daily attendance in regular public elementary and secondary day schools was 37,697,000. In the 1979-80 academic year 2,756,623 students graduated from regular public high schools, 299,433 graduated from private high school, and an additional 25,549 were graduated from evening schools and adult education programmes, and 487,893 received high school equivalent certificates.

#### Institutions of Higher Education

In the autumn of 1981, total enrolment in universities, colleges, professional schools, and two-year schools numbered 12,371,672.

During the school year 1979-80, 929,417 bachelor's degrees were conferred, 473,611 to men and 455,806 to women; 70,131 first-professional degrees, 52,716 to men and 17,415 to women; 298,081 master's degrees, 150,749 to men and 147,332 to women; and 32,615 doctorates, 22,943 to men and 9,672 to women. The major fields for bachelor's degrees were Education, 118,102; Business and Management, 186,683; and Social Sciences, 103,870. First-professional degrees in Law, 35,647 and Medicine, 14,903 were predominant. Master's degrees were heavily concentrated in Education, 103,453, and Business and Management, 55,148. The most popular fields of study for the Doctorate were Education, 7,940, and Social Sciences, 3,225.

During the 1981-82 academic year, the 3,253 colleges and universities employed about 860,000 instructional faculty. Current fund expenditures for colleges and universities during the 1979-80 academic year were \$56,913,588,000.

Particulars of some of the Universities (with opening autumn enrolment figures, 1981) are: *Harvard* (21,252 students, including 8,274 women), founded at Cambridge, Mass. on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; *Yale* (10,280 students, including 4,283 women), founded at New Haven, Connecticut, in 1701; *Bowdoin*, Brunswick, Me. (founded 1794; 1,373); *Brown*, Providence, R.I. (founded 1764; 6,914 students, including 3,241 women); *Columbia*, New York, N.Y. (founded 1754; 23,883 students, including 11,868 women); *Cornell* (founded at Ithaca, N.Y., 1865; 19,313 students, including 8,230 women); *Dartmouth*, Hanover, N.H. (founded 1769, 4,377 students, including 1,521 women); *Georgetown*, Washington, D.C. (founded 1789; 12,229 students, including 5,359 women); *North Carolina*, Chapel Hill, N.C. (founded in 1789; 21,612 students, including 11,756 women); *Pennsylvania*, Philadelphia, Pa. (founded 1740; 22,246 students, including 9,653 women); *Pittsburgh*, Pa. (founded 1787; 28,781 students, incl. 13,753 women); *Princeton*, N.J. (founded 1746; 6,088 students and 2,185 women); *Tennessee*, Knoxville, Tenn. (founded 1794; 30,391 students, including 13,765 women); *William and Mary*, Williamsburg, Va. (founded 1693; 6,520 students, including 3,345 women); *New York University*, founded in 1831 at New York, 32,537 students, including 17,241 women.

#### WEIGHTS AND MEASURES

The weights and measures in common use in the United States are of British origin. They date back

to the American Revolution when practically all the standards were intended to be equivalent to those used in England at that period. The principal units were the yard, the avoirdupois pound, the gallon, and the bushel. More or less authentic copies of the English standards of the denominations mentioned had been brought over and adopted by the different colonies. Divergencies in these weights and measures were, however, quite common, due no doubt to the fact that the system of weights and measures in England was not itself well established, and hence the copies brought to the United States were often adjusted to different standards.

Because of these discrepancies, the system of weights and measures in the United States (U.S. Customary System) is not identical with the British system. The U.S. bushel and the U.S. gallon, and their subdivisions differ from the corresponding British units. Also the British ton is 2,240 pounds, whereas the ton generally used in the United States is the short ton of 2,000 pounds. The American colonists adopted the English wine gallon of 231 cubic inches. The English of that period used this wine gallon and they also had another gallon, the ale gallon of 282 cubic inches. In 1824 these two gallons were abandoned by the British when they adopted the British Imperial gallon, equivalent to 277.42 cubic inches. At the same time, the bushel was redefined as 8 gallons. In the British system the units of dry measure are the same as those of liquid measure. In the United States these two are not the same, the gallon and its subdivisions being used in the measurement of liquids, while the bushel, with its subdivisions, is used in the measurement of certain dry commodities. The U.S. gallon is divided into 4 liquid quarts and the U.S. bushel into 32 dry quarts. All the units of capacity mentioned thus far are larger in the British system than in the U.S. system. But the British fluid ounce is smaller than the U.S. fluid ounce, because the British quart is divided into 40 fluid ounces, whereas the U.S. quart is divided into 32 fluid ounces.

The rapidly diminishing world-wide use of the U.S. Customary and British Systems of measurement and the corresponding rise in metric usage, promoted the passage of Public Law 90-472. Pursuant to this law, the National Bureau of Standards conducted a programme of investigation, research and survey to determine the impact on U.S.A. of such increasing world-wide and domestic use of the metric system (SI), reporting back to Congress in July, 1971. The study recommended a concerted, co-ordinated, but voluntary national effort to make the SI the predominant form of measurement in the United States. Legislation to effect this recommendation was introduced in Congress. In December 1975, Public Law 94-168, the Metric Conversion Act 1975, was passed. It declared "that the policy of the United States shall be to coordinate and plan the increasing use of the metric system in the United States, and to establish a United States Metric Board to coordinate the voluntary conversion to the metric system."

The International System of Units—officially abbreviated SI—is a modernized version of the metric system. It was established by international agreement to provide a logical and interconnected framework for all measurements in science, industry and commerce.

#### TERRITORIES, ETC. OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnson (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and

Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam, Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other islands of

the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

As a result of the Panama Canal Treaty of 1977 the Canal Zone was placed under Panamanian jurisdiction. The Panama Canal Commission, an arm of the U.S. Government, will continue to operate the canal until the year 2000.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 116,662 in Sept. 1980. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of the Assistant Secretary, Territorial and International Affairs, Dept. of the Interior, Washington, D.C.

#### CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1938, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Great Britain and U.S.A. for aviation and communication. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

The status of Canton and Enderbury was the subject of negotiation in 1979 between the United States, the United Kingdom and the Government of the Republic of Kiribati. These negotiations resulted in the signing, on September 20, 1979, of a Treaty of Friendship between the United States and the Republic of Kiribati. The Treaty, if it is ratified by the U.S. Senate, would renounce the United States claim to Canton and Enderbury. The Republic of Kiribati declared its independence on July 12, 1979.

Canton Island was successively used for aviation support activities and as a missile tracking station by the U.S. National Aeronautics and Space Administration, and until recently by the U.S. Air Force Space and Missile Test Centre in San Francisco. Enderbury has been uninhabited since World War II.

#### GUAM

*Guam*, the largest of the Ladrone or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 209 square miles, with a population (1980) of 105,816.

The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec. 1941 but was recaptured and occupied throughout by U.S.

forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has statutory powers of self-government, and Guamanians are United States citizens. The Governor is popularly elected. A non-voting delegate is elected to serve in the U.S. House of Representatives. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

*Governor*, Paul M. Calvo, *elected* Nov. 1978.

*Lt. Governor*, Joseph F. Ada, *elected* Nov. 1978.

*CAPITAL*, Agaña. Port of entry,  $\Psi$ Apra.

#### WAKE AND MIDWAY ISLANDS

*Wake Island*, annexed in 1897, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. Wake Island was occupied by Japanese, Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945. Population (1979), 300.

*Midway Islands*, with a total area of 28 sq. miles and a population (1970) of 2,220, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population.

#### PUERTO RICO

*Puerto Rico* (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'-18° 30' N. lat. and 65° 30'-67° 15' W. long., with a total area of 3,421 square miles and a population (1980) of 3,187,570. The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 111 miles from west to east, and 36 miles from north to south. The capital is 1,600 miles distant from New York, and 1,000 miles from Miami. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes and yams are also grown. The trade is principally with the U.S. In 1976 there were 4,191 miles of highway under maintenance. There are good harbours at San Juan, Mayagüez and Ponce.

The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 7 members is appointed by the Governor, with the advice and consent of the Senate. The Governor appoints all Judges. There are 13 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. Puerto Rico is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote, although he has a right to vote on those committees of which he is a member. Great improvement has been made

in the progress, industrialization and welfare of the island during the last two decades. A programme of tax exemption has raised income from industry to a level higher than that from agriculture. Public and private schools are established throughout—enrolment in 1977 was 831,071. Enrolment in the public and private universities for 1977 was 119,083.

**CAPITAL.**— $\Psi$ San Juan, population of the municipality, 518,700; Other major towns are:  $\Psi$ Ponce (188,500); Bayamón (205,800);  $\Psi$ Mayagüez (99,800); and  $\Psi$ Arecibo (83,300).

*Governor*, Carlos Romero Barceló.

*Secretary of State*, Carlos S. Quirós.

*Resident Commissioner*, Baltasar Corrada del Rio.

*Chief Justice*, José Trias Monge.

#### TRADE

	1977

Total Exports .....	4,480,000,000

#### Trade with U.K.

	1978
Imports from U.K. ....	£23,291,000
Exports to U.K. ....	29,266,000

### AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 32,295 in 1980.

*Tutuila*, the largest of the group, has an area of 52 square miles and contains a magnificent harbour at  $\Psi$ Pago Pago. The constitution of American Samoa designates the village of Fagatogo as the seat of government. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. In September 1977, the Secretary of the Interior issued an Order providing for an election for Governor every four years. The first election was held in November 1977. In January 1978 the first popularly elected Samoan Governor was inaugurated in Pago Pago. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces or other naturalization procedure. A non-voting delegate is elected to serve in the U.S. House of Representatives.

*Governor*, Peter Tali Coleman.

*Lt.-Governor*, Tufele Li'e.

### TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1980 was 116,662. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary considerably among island groups and even more among islands and atolls in the same geographic area. Nine different languages are spoken in the territory.

$\Psi$ Seaport.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947, administration being under the general jurisdiction of the Secretary of the Interior.

For administrative purposes, the Territory is divided into seven jurisdictions: Palau, Yap, Truk, Ponape, Kosrae, the Marshalls and the Northern Mariana Islands. The Northern Marianas separated administratively in April 1976 from the Trust Territory Government and upon termination of the trusteeship the Northern Marianas will become a Commonwealth in political union with the U.S.A. In May 1979, duly constituted governments were inaugurated in the Marshall Islands and the Federated States of Micronesia, which is comprised of Yap, Truk, Ponape and Kosrae. In January 1981 a constitutional government was established in Palau.

*High Commissioner*, Janet J. McCoy.

*Deputy High Commissioner*, Daniel J. High.

**CAPITAL (Provisional).**—Saipan, Mariana Islands.

### VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population (1980) of 95,591. *St. Thomas* (28 sq. miles) has a population of 43,828; *St. Croix* (84 sq. miles) has a population of 48,916; *St. John* (20 sq. miles) has a population of 2,470.

**CAPITAL.**  $\Psi$ Charlotte Amalie contains one of the finest harbours in the West Indies. The government of the Virgin Islands is organized under the provisions of the Revised Organic Act of the Virgin Islands, enacted by the Congress of the United States on July 22, 1954. Legislative power is vested in the Legislature of the Virgin Islands, a unicameral body composed of 15 senators popularly elected for two-year terms. Virgin Islanders are citizens of the United States. From the elections of November, 1970, the Governor has been popularly elected. A non-voting delegate is elected to serve in the U.S. House of Representatives. The Virgin Islands are now a favourite tourist area in the Caribbean. The climate of the islands is delightful at all times, and particularly so during the winter months.

*Governor*, Juan F. Luis.

*Lieut.-Governor*, Henry A. Millin.

### THE PANAMA CANAL

The Canal Zone has an area of 647 sq. miles (about 1 per cent. of the total area of Panama) (land area, 372 sq. miles) and a population in 1970 of 51,000.

*Chief Towns.*—Balboa Heights, Balboa, Ancon, Gamboa and Margarita.

#### OCEAN GOING COMMERCIAL TRAFFIC

Fiscal Year	No. of Transits	Canal, Net Tons	Cargo Tons
1977	11,896	133,353,132	122,928,985
1978	12,677	156,907,260	142,518,288
1979	12,935	167,470,601	154,110,866
1980	13,507	182,063,175	167,214,955
1981	13,884	188,656,491	171,221,762

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 500 to 1,000 feet wide at the bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea takes on average 8 to 10

hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging.

#### BRITISH EMBASSY

3100 Massachusetts Avenue, N.W.  
Washington, D.C. 20008

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir (John) Oliver Wright, G.C.M.G., G.C.V.O., D.S.C. (1982).

### UPPER VOLTA

(République de Haute Volta)

*Head of State, President of the Military Committee, and the Council of Ministers, Minister of Defence*, Col. Saye Zerbo, took power, Nov. 1980.

*Interior and Security*, Police Lt.-Col. B. Nezien.

*Justice*, B. Ouattara.

*Foreign Affairs*, Lt.-Col. F. Tiemtarboun.

*Finance*, E. Ki.

Upper Volta is an inland savannah state in West Africa, situated between 9° and 15°N. and 2°E. and 5°W. with an area of about 100,000 square miles and a population estimated in 1979 at 6,600,000. It has common boundaries with Mali on the west, Niger and Benin on the east and Togo, Ghana and the Ivory Coast on the south. The largest tribe is the Mossi whose king, the Moro Naba, still wields a certain moral influence.

Upper Volta was annexed by France in 1896 and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic

within the French Community; full independence outside the Community was proclaimed on August 5, 1960. The official language is French. The 1960 constitution provided for a presidential form of government with a single chamber National Assembly, but in January, 1966, the Army assumed power after popular demonstrations in Ouagadougou against the régime of the former President Yaméogo. A new constitution allowing for a partial return to civilian rule but with the Army still in effective control was adopted by a referendum held on June 14, 1970. Following internal political manoeuvring the President suspended the constitution on Feb. 8, 1974 and dissolved the National Assembly. A Government of National Renewal was formed, with a majority of military members. Full legislative and presidential elections were held on April 30, and May 28, 1978 respectively when President Sangoulé Lamizana was re-elected. In a military coup in Nov. 1980, the President was deposed, the National Assembly was dissolved and the constitution suspended.

*Finance and Trade*.—The currency of the Republic is the *Franc CFA (Francs CFA 50=1 French Franc)*. The 1979 Budget totalled *Francs CFA 35,700,000,000*.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea-nuts and cotton. Small deposits of gold, manganese, copper, bauxite and graphite have been found. Imports from U.K.—£1,039 million (1980); Exports to U.K.—£2,819,000 (1980).

*CAPITAL*.—Ouagadougou (200,000). Other principal towns; Bobo-Dioulasso (90,000) and Kouddougou (35,000).

*FLAG*.—Three horizontal stripes, black over white over red.

*NATIONAL DAY*.—December 11.

#### BRITISH REPRESENTATION

*Ambassador Extraordinary and Plenipotentiary*, His Excellency M. F. Daly (*resident in Abidjan*).

### URUGUAY

(República Oriental del Uruguay)

*President*, General Gregorio Alvarez (1981).

#### CABINET

*Minister of Interior*, General Yomandu Trinidad.

*Foreign Affairs*, Dr. Estanislao Valdés Otero.

*Economy and Finance*, Cr. Valentín Arismendi.

*Transport and Public Works*, Ing. Francisco Tourreilles.

*Public Health*, Cr. Luis A. Givogre.

*Labour and Social Security*, Dr. Carlos Alberto Maeso.

*Agriculture and Fisheries*, Sr. Carlos Mattos Moglia.

*Education and Culture*, Dra. Raquel Lombardo de Betolaza.

*National Defence*, Dr. Justo M. Alonso.

*Industry and Energy*, Cr. Walter Luzziardo Aznarez.

*Justice*, Dr. Julio César Espinola.

*Secretariat of Planning, Co-ordination and Information*, Gen. Pedro Aranco.

#### URUGUAYAN EMBASSY AND CONSULATE

48 Lennox Gardens, S.W.1

[01-589 8835]

*Ambassador Extraordinary and Plenipotentiary*, His

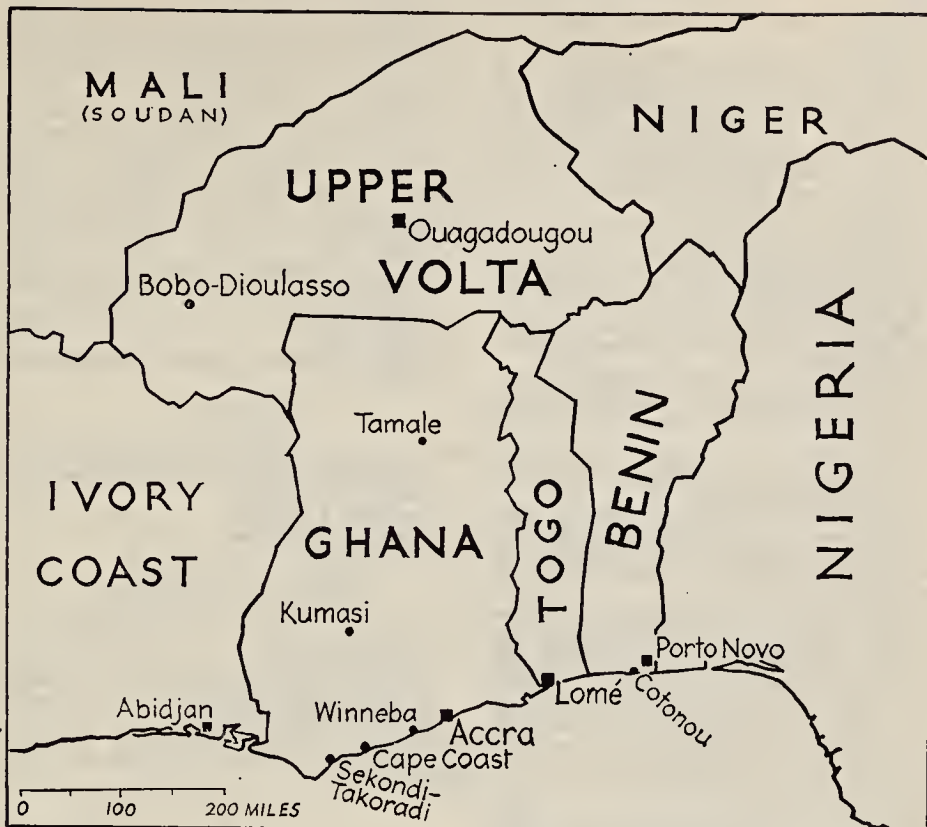

Excellency Dr. Osualdo R. Soriano Mesia.

*Minister-Counsellor*, Sr. Ramiro Piriz Ballón.

*2nd Secretary*, Dra. Marta Pizzanelli (*Consul*).

*Financial Attaché*, Sr. Miguel Pereira.

*Area and Population*.—The smallest Republic in South America, on the east coast of the Rio de la

Plata situated in lat.  $30^{\circ}$ – $35^{\circ}$  S. and long.  $53^{\circ}$   $15'$ – $57^{\circ}$   $42'$  W., with an area of 72,172 square miles, and an estimated population of 2,886,187, almost entirely white and predominantly of Spanish and Italian descent. Many Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

**Physical Features.**—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet.

The principal river is the *Rio Negro* (with its tributary the *Yi*), flowing from north-east to south-west into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin.

The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts. Floods also occur.

**Government.**—Uruguay—or the *Banda Oriental*,

as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726 to 1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

According to the Constitution the President appoints a council of 11 ministers and the Vice-President presides over Congress. The legislature consists of a Chamber of 99 deputies and a Senate of 30 members (plus the Vice-President), elected for five years by a system of proportional representation. Voting is obligatory and extends to all citizens of good repute and certain long standing residents who are not citizens, from the age of 18. However, since February, 1973 the country has been governed by presidential rule with military support.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River

Uruguay, which forms the main line of division from Argentina.

**Production and Industry.**—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. There are just under 11 million cattle and just under 2½ million sheep. In addition to meat packing, other foodstuffs, citrus wine, beer and textile industries are of importance.

The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, plastics, household consumer goods, edible oils and the refining of petroleum and petroleum products.

**Mineral Deposits.**—There are some ferrous minerals, not extracted at present. Non-ferrous exploited minerals include clinker, dolomite, marble and granite.

**Communications.**—There are about 9,899 km. of national highways, and about 12,083 km. of telegraph, with 48,375 miles of telephones.

There are about 2,987 km. of standard gauge railway in use in Uruguay. A State Autonomous Entity was formed to administer the railway systems purchased by the Government from four British companies in 1948.

An airline, PLUNA, which is owned by the State, runs daily services to southern Brazil, Paraguay and Argentina, and one flight a week to Madrid. The principal capitals of the interior and a limited freight service are connected to Montevideo by TAMU, another State owned airline, using principally military aircraft and personnel. International passenger and freight services are maintained by American, South American and European airlines. The international airport of Carrasco lies 12 miles outside Montevideo.

**Education and Social Services.**—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, and technical and trade schools and evening courses for adult education are state controlled. There are about 322,053 pupils in the 2,362 state schools. The University at Montevideo (founded in 1849) has about 18,000 students enrolled in its ten faculties.

**Language and Literature.**—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. Five daily newspapers are published in Montevideo with an estimated total circulation of 150,000. Most of them are distributed throughout the country.

**Finance.**—Government income at Dec. 1981 amounted to US\$19,330 million. Government expenditure (1981) amounted to US\$19,422 million. The external debt at Dec. 1981 was U.S.\$3,129,300,000. Central Bank reserves (18 June, 1982) were US\$478,600 million.

**Currency.**—The monetary unit is the peso. In May, 1963, the gold content of the peso was fixed at 0.059245 grammes of pure gold. The Central Bank unified *de facto* the exchange rate in October 1978 by programmed daily minidevaluations. Rate of exchange at May 30, 1981, U.S. \$1 = N\$12.44. For sterling exchange see p. 84.

The major exports are meat and by-products, wool and by-products, hides and bristle and agricultural products. The principal imports are raw materials, construction materials, oils and lubricants, automotive vehicles, kits and machinery.

The principal export item to the U.K. is wool and the main imports are automotive vehicles, kits, machinery, raw materials and metals.

**CAPITAL.**— $\Psi$ Montevideo. Population (1979) 1,298,546. Other centres (with 1967 estimates) are  $\Psi$ Salto (60,000),  $\Psi$ Paysandu (60,000),  $\Psi$ Mercedes (34,000), Minas (34,000), Melo (30,000), and Rivera (40,000).

**FLAG.**—Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff.

**NATIONAL DAY.**—August 25 (Declaration of Independence, 1825).

Time of transit from London to Montevideo, by air, 20–22 hours.

#### BRITISH EMBASSY Montevideo

*Ambassador Extraordinary and Plenipotentiary*, Her Excellency Miss Patricia M. Hutchinson, C.M.G. (1980).

*1st Secretary*, K. W. Kelley.

*2nd Secretary*, J. McGhee.

*Defence Attaché*, Lt.-Col. R. T. Smith.

#### BRITISH CONSULAR OFFICES

There is a British Consular Office at Montevideo.

ANGLÓ-URUGUAYAN CULTURAL INSTITUTE, San José 1426, Montevideo.

There are branch Institutes at Salto, Paysandu, Fray Bentos, Rivera, Las Piedras, Melo, Mercedes, Trinidad, and Treinta y Tres.

BRITISH-URUGUAYAN CHAMBER OF COMMERCE, Avda Libertador Brig. Gen. Lavalleja 1641, of 201, Montevideo.

#### U.S.S.R.

Soyuz Sovetskikh Sotsialisticheskikh Respublik = Union of Soviet Socialist Republics

#### THE COMMUNIST PARTY OF THE SOVIET UNION

(K.P.S.S. = Kommunisticheskaya Partiya Sovetskogo Soyuza)

Constitutionally, the highest executive organ of the C.P.S.U. is its *Central Committee*, as elected by the *Party Congress*. The Central Committee elected at the XXVth Party Congress in March, 1981 consists of 319 full members; there are also 151 candidate members with a consultative voice and 75 members of the *Central Revision Commission*. The real power in the Party is vested, however, in the *Politbureau*, the *Secretariat* and the permanent Departments of the Central Committee.

*Politbureau*, Yu. V. Andropov; L. I. Brezhnev; K. U. Chernenko; M. S. Gorbachev; V. V. Grishin; A. A. Gromyko; A. P. Kirilenko; D. A. Kunayev; A. Ya. Pel'she; G. V. Romanov; V. V. Shcherbitsky; N. A. Tikhonov; D. F. Ustinov (*full members*); G. A. Aliev; P. N. Demichev; V. I. Dolgikh; T. Ya. Kiselev; V. V. Kuznetsov; B. N. Pomomarev; Sh. R. Rashidov; E. A. Shevardnadze; M. S. Solomentsev (*candidate members*).

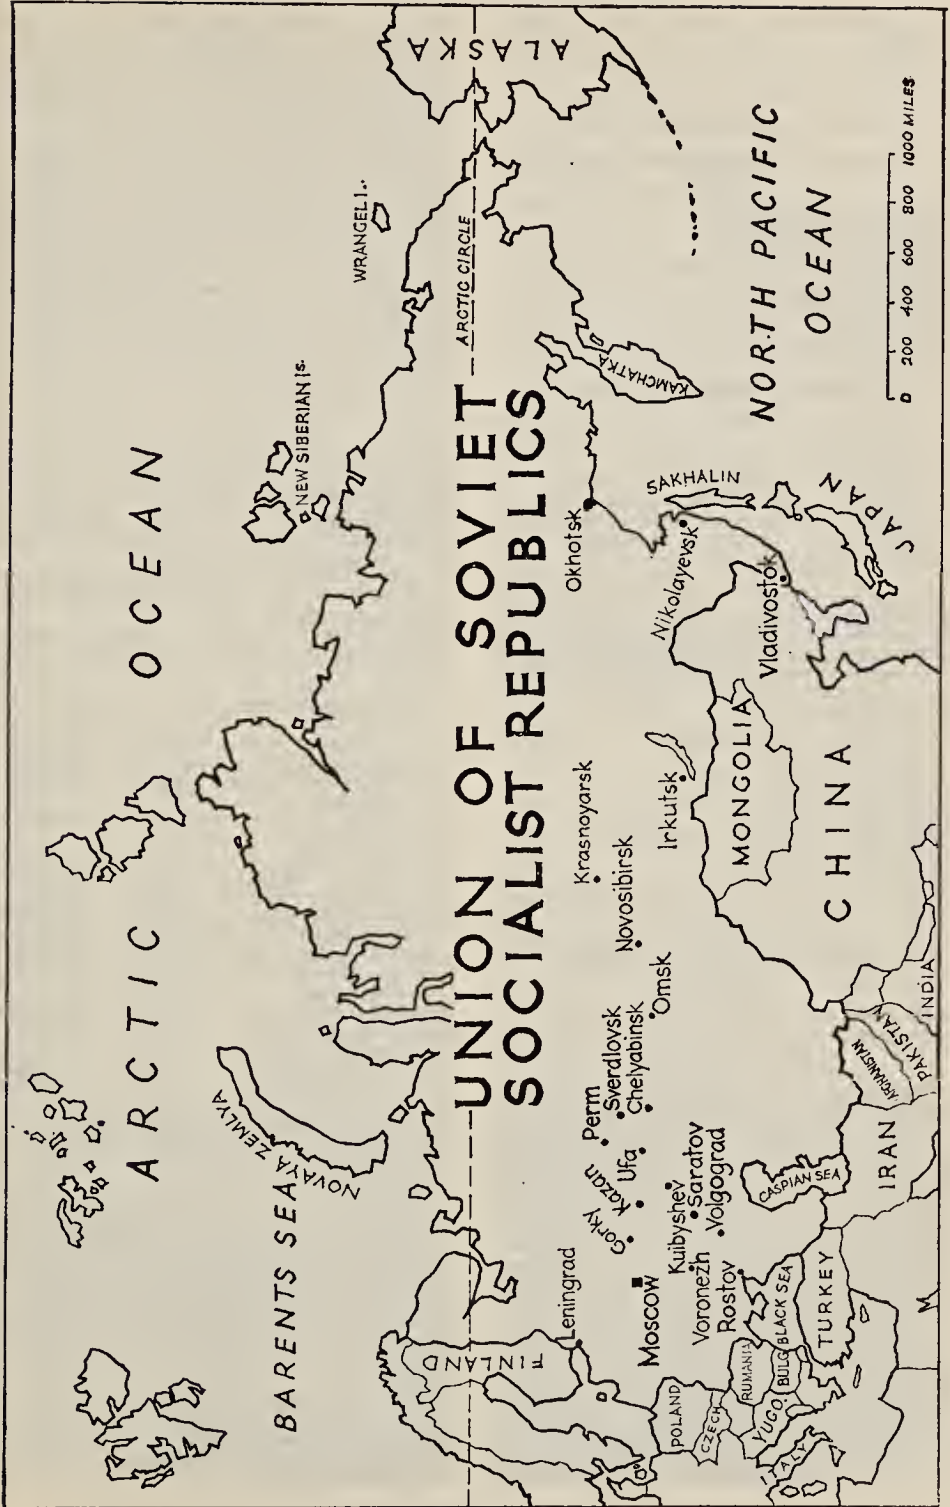

*Secretariat*, Leonid Ilyich Brezhnev (*General Secretary*) (since October 14, 1964); Yu. V. Andropov; K. U. Chernenko; V. I. Dolgikh; M. S. Gorbachev; I. V. Kapitonov; A. P. Kirilenko; B. N. Pomomarev; K. V. Rusakov; M. V. Zimyanin.

#### TRADE

1980 1981

Total exports U.S.\$1,058,500,000 U.S.\$1,215,400,000

Total imports 1,680,300,000 1,598,000,000

Committee of Party Control, A. Ya Pel'she (Chairman).

*Komsomol* (Young Communist League). B. N. Pastukhov (1st Secretary).

#### GOVERNMENT OF THE U.S.S.R.

The Presidium of the Supreme Soviet of the U.S.S.R.

Chairman (= President of the U.S.S.R.), L. I. Brezhnev (since June 16, 1977).

Secretary, M. P. Georgadze.

The Supreme Soviet (= Parliament) consists of two chambers.

Chairman (= Speaker) of the Council of the Union, A. P. Shitikov.

Chairman (= Speaker) of the Council of Nationalities, V. P. Ruben.

#### The Council of Ministers of the U.S.S.R.

Chairman (= Prime Minister), Nikolai Tikhonov (since Oct. 1980).

1st Vice-Chairman, I. V. Arkhipov.

Vice-Chairmen, A. K. Antonov; N. K. Baybakov; I. I. Bodyul; V. E. Dymshits; K. F. Katushev; L. A. Kostandov; V. N. Makeev; G. I. Marchuk; N. V. Martynov; I. T. Novikov; Z. N. Nuriyev; L. V. Smirnov; N. V. Talyzin.

Ministries.—There are three groups of departmental ministries, with a total of 84 ministers—33 All Union Ministries, i.e. federal ministries, 31 Union Republican Ministries (co-ordinating ministries of individual republics) and 20 State Committees whose Chairmen rank as Ministers. The more important posts are occupied by:

*Foreign Affairs*, A. A. Gromyko.

*Defence*, D. F. Ustinov.

*Foreign Trade*, N. S. Patolichev.

*Internal Affairs*, N. A. Shchelokov.

*Planning*, N. K. Baybakov.

*Science and Technology*, G. I. Marchuk.

*Building*, I. T. Novikov.

*State Security*, V. V. Fedorchuk.

The Prime Ministers of the 15 constituent republics belong to the Council *ex officio*.

#### EMBASSY OF THE U.S.S.R. IN LONDON

13 Kensington Palace Gardens, W.8.

[01-229 3628]

Ambassador Extraordinary and Plenipotentiary, His Excellency Victor I. Popov (1980).

#### AREA AND POPULATION

The U.S.S.R. is composed of 15 Union Republics (see below). Before the outbreak of the Second World War (1941-45 in U.S.S.R.), the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmen, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Rumania

in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of Bessarabia, including the Danube estuary port of Izmail, and *Northern Bukovina*, also ceded by Rumania, became part of the Ukraine. The new Soviet-Rumanian frontier was confirmed by the 1947 Peace Treaty with Rumania.

In August, 1940, the three independent Baltic States, *Estonia*, *Latvia* and *Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the Second World War a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* and, in 1961, the Autonomous Republic of Tuva, within the R.S.F.S.R.

In July, 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (*Karelian*) Republic within the R.S.F.S.R.

Area and population (January, 1981) of the constituent Republics of the U.S.S.R. with their capitals:—

Republic (Capital)	Sq. miles	Population
I. R.S.F.S.R. (Moscow) . . . . .	6,593,391	139,165,000
II. Ukraine (Kiev) . . . . .	252,046	50,135,000
III. Belorussia (Minsk) . . . . .	80,300	9,675,000
IV. Uzbekistan (Tashkent) . . . . .	157,181*	16,158,000*
V. Kazakhstan (Alma-Ata) . . . . .	1,064,980*	15,053,000*
VI. Georgia (Tbilisi) . . . . .	26,911	5,071,000
VII. Azerbaidjan (Baku) . . . . .	33,436	6,202,000
VIII. Lithuania (Vilnius) . . . . .	26,173	3,445,000
IX. Moldavia (Kishinev) . . . . .	13,912	3,995,000
X. Latvia (Riga) . . . . .	24,695	2,539,000
XI. Kirghizia (Frunze) . . . . .	76,642	3,653,000
XII. Tadjikistan (Dushanbe) . . . . .	54,019	4,007,000
XIII. Armenia (Erevan) . . . . .	11,306	3,119,000
XIV. Turkmenistan (Ashkhabad) . . . . .	188,417	2,897,000
XV. Estonia (Tallinn) . . . . .	17,413	1,485,000

\* (Adjusted to include transfer of 3 border regions—888 sq. miles and 162,000 inhabitants—by Uzbek S.S.R., Kazakh S.S.R. and U.S.S.R. decrees of May-June 1971.)

The total area of the U.S.S.R. is 8,620,822 sq. miles; the total population: (1 Jan. 1982) 268,800,000.

A striking demographic feature is the rapid urbanization. While in 1939 the proportion of urban population was 32 per cent of the total, in 1981 it reached 63 per cent, owing to migration to the towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 48 towns with over 500,000 (11 in 1939).

The proportion of women to men is 53.3 to 46.7. In 1980 the birth-rate was 18.3; the mortality rate, 10.3; the natural increase, 8 per 1,000.

More than four-fifths of the people were born after the 1917 Revolution.

*Main Nationalities*  
(1979 Census)

The most numerous national groups of U.S.S.R. are: Russian, 137 m. and Ukrainian, 42 m. There are between 6 and 12 million Kazakhs, Tatars, Belorussians, and Uzbeks respectively. Azerbaidjani, Armenians and Georgians number between 3.5 and 5.5 million each group. There are some 1.9 to 2.9 million Lithuanians, Kirghizians, Turkmens, Germans, Moldavians and Tadjiks. In each of the following nationality groups the population numbers between 1.02 and 1.8 millions: Chevashes, Latvians, Poles, Mordovians, Bashkirs, Estonians, Dagestanis and Jews.

The 1979 census revealed a marked difference between the growth rates of individual nationalities: while the Slav nations showed an annual increase of under one per cent, certain Central-Asian and Caucasian (mostly Moslem) nations recorded an annual net growth of 2.5 to 3.5 per cent.

THE CONSTITUTION

On October 7, 1977 a new Constitution was adopted to replace the 1936 ("Stalin") Constitution.

The new Constitution is divided into a preamble and 9 Sections. The preamble describes the Soviet Union as a "developed Socialist society", which is said to be a logical stage on the road to communism. The highest aim of the Soviet state is said to be the building of a classless communist society.

Section I covers the *bases of the social-political and economic system*. The Soviet state is said to be one of the whole people (Article 1) and built on the principle of "democratic centralism", described as the electivity of all organs of state power from bottom to top, their accountability to the people, the mandatory fulfilment of decisions of higher organs by lower organs, the combination of unitary leadership with local initiative and the responsibility of each state organ and official for the work he is doing (Article 3). The Communist Party of the Soviet Union is brought from the obscurity of Article 126 of the 1936 Constitution into the prominence of Article 6 of the new draft, where it is described as "the leading and guiding force of Soviet society, the nucleus of its political system and of all state and public organisations". It is said to "determine the general perspective of the development of society, the line of internal and external policies of the U.S.S.R."

The *economic system* is based on "socialist ownership of the means of production", which comprises either state ownership or ownership by collective farms and other cooperative organizations or trade unions and other public organizations (Article 9). The economy of the U.S.S.R. is said to comprise "a unitary economic complex, embracing all the elements of social production, distribution and exchange on the territory of the U.S.S.R." It is managed on the basis of state plans (Article 15).

This section also contains new chapters on *social development and culture, foreign policy, and the defence of the socialist Fatherland*. The foreign policy of the U.S.S.R. is said to be "directed to ensuring favourable international conditions for the building of communism in the U.S.S.R." (Article 28).

Section II is devoted to the *state and the individual*. This includes a long chapter on the *basic rights, freedoms and duties of citizens of the U.S.S.R.*, all of which are subject to the proviso that "exercise by citizens of rights and freedoms must not injure the interests of society and state, and the rights of other citizens" (Article 39). The rights listed include the right to work, leisure, health protection, maintenance in old age, housing, education, access to the achievements of culture, freedom of scientific, tech-

nical and artistic creative work "in accordance with the aims of communist construction", the right to take part in the administration of state and public affairs, to submit proposals and complaints to state public organs (Articles 40-49), as well as to freedom of speech, the press and association "in accordance with the interests of the working people and with the aim of strengthening the socialist system" (Article 50).

Freedom to profess or not profess any religion and to conduct atheistic (but not religious) propaganda, and the separation of the Church from the State and the school from the Church are provided for by Article 52. Section II also includes a list of obligations which is more comprehensive than that of the 1936 Constitution and includes the obligation to work conscientiously, to safeguard socialist property, to contribute to the strengthening of the might and prestige of the state, to do military service, to respect the national dignity of other citizens, to contribute to the maintenance of public order, to prepare their children for "socially useful labour", to protect nature and to further the consolidation of world peace (Articles 59-68).

Section III on the *national-state structure of the U.S.S.R.* describes it as a "unitary federal multinational state, formed as a result of the free self-determination of nations and the voluntary union of equal Soviet Socialist Republics (Article 69). "Each Union Republic shall retain the right freely to secede from the U.S.S.R." (Article 71).

Section IV on the *Soviets of people's deputies and the procedure for electing them* provides for the Supreme Soviet of the U.S.S.R. and the Supreme Soviets of Union and Republics to be elected for a term of 5 years and for local Soviets to be elected for 2½ years (Article 89). The minimum voting age and minimum age for deputies in all Soviets had been lowered to 18 (Article 95).

Under Section V, the *higher organs of State power and administration of the U.S.S.R.*, the *Supreme Soviet of the U.S.S.R.* is the highest organ of State power (Article 106). It consists of two chambers, a Council of the Union and Council of Nationalities, which are to be equal in rights and consist of the same number of deputies (Articles 107 and 108). Sessions of the Supreme Soviet are convoked twice a year (Article 110); between sessions the Supreme Soviet is represented by its Presidium, which consists of a Chairman (President), a First Deputy Chairman, 15 Deputy Chairmen, one from each Union Republic, a Secretary and 21 Members (Articles 117 and 118).

The highest executive organ of the State is the Council of Ministers of the U.S.S.R. (Article 127), consisting of the Chairman, his Deputies, U.S.S.R. Ministers and Chairmen of State Committees, Chairmen of the Councils of Ministers of Union Republics *ex officio* and others (Article 128). The Council of Ministers is accountable to the Supreme Soviet (Article 129). A smaller body, the Presidium of the Council of Ministers, comprising the Chairman and his Deputies, acts as the permanent organ of the Council of Ministers (Article 131).

Section VI covers the *bases of the structure of organs of state power and administration in Union Republics*. Section VII deals with *justice, arbitration and supervision by the Procuracy*. Section VIII deals with the *arms, flag, anthem and capital of the U.S.S.R.* Section IX is on the *procedure for bringing the Constitution into effect and amending it*.

*Chronological System*.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

## LANGUAGE, LITERATURE AND ARTS

*Language and Literature.*—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682–1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799–1837) and Mikhail Lermontov (1814–1841). The 20th century produced great poets like Alexander Blok (1880–1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890–1960), Vladimir Mayakovsky (1893–1930) and Anna Akhmatova (1888–1966). Realistic fiction is associated with the names of Nikolai Gogol (1809–1852), Ivan Turgenev (1818–1883), Fedor Dostoyevsky (1821–1881) and Leo Tolstoy (1828–1910), and later with Anton Chekhov (1860–1904), Maxim Gorky (1868–1936), Ivan Bunin (1870–1953) and Alexander Solzhenitsyn (b. 1918).

Great names in music include Glinka (1804–1857), Borodin (1833–87), Mussorgsky (1839–1881), Rimsky-Korsakov (1844–1908), Rubinstein (1829–1894), Tchaikovsky (1840–1893), Rakhmaninov (1873–1943), Scriabin (1872–1915), Prokofiev (1891–1953), Stravinsky (1882–1971) and Shostakovich (1906–1975). Performers include Igor Oistrakh, M. Rostropovich, and S. Richter and the famous conductor Rozhdestvensky.

## FINANCE

A new "heavy" Rouble was introduced on January 1, 1961. Prices and wages were changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The official exchange rate bears little relation to the actual purchasing power of the currency. Banknotes in circulation are those valuing R. 1, 3, 5, 10, 25, 50 and 100. There are also coins valuing Kopecks 1, 2, 3, 5, 10, 15, 20 and R. 1.

## DEFENCE

Defence expenditure in the U.S.S.R. for 1982 is put officially at 17.05 billion roubles (or 5.3 per cent of total budget). It is believed, however, that this does not represent the total spent on defence in the U.S.S.R. Much of this is concealed in estimates for other ministries. The general trend is a continuing emphasis on nuclear weapons while improving the levels and capabilities of conventional arms.

The basic military service is two years in the Army and Air Force and two to three years in the Navy and Border Guards.

The total size of the Soviet regular forces is now estimated to be about 3,673,000, excluding some 560,000 Border Guard, internal security, railway and construction troops (mainly uniformed civilians).

Operational ICBMs, i.e. Inter-Continental Ballistic Missiles, now total about 1,400. SLBMs number 1,015. The number of MRBMs and IRBMs is some 690. The operational personnel of the Strategic Rocket Forces totals about 375,000.

The Air Forces comprise about 11,600 operational aircraft (including about 8,600 combat aircraft). The

total strength of the Air Forces, excluding the Naval Air Force (59,000), is about 475,000 men. The total personnel of the separate Air Defence Command is estimated at 550,000 men.

The total size of the Soviet Army is estimated at 1,825,000 men. It is thought to be organized in 175 divisions, distributed as follows: 67 divisions in European U.S.S.R., 30 in Central and Southern U.S.S.R., 48 in the Sino-Soviet border area, 30 in Eastern Europe.

The total strength of the Soviet Navy and Naval Air Force is 443,000 men. In total tonnage, it is the second largest navy in the world, and its main strength lies in the submarine fleet. There are now 99 nuclear-powered and 160 diesel-powered submarines.

The Soviet Navy now has three aircraft carriers. The surface ships comprise 37 cruisers and 73 destroyers and more than 180 frigates. The land-based Naval Air Force comprises about 770 combat aircraft, 380 of which are bombers.

The para-military forces number some 560,000, including 300,000 border troops and 260,000 internal security troops. There are also DOSAAF members (claimed active membership, 80 million) who participate in such activities as athletics, shooting and parachuting.

*Minister of Defence*, D. F. Ustinov (with rank of Marshal of the Soviet Union).  
*Chief of General Staff*, Marshal N. V. Ogarkov.  
*Chief, Political Administration, Soviet Army and Navy*, Army Gen. A. A. Yepishev.

On May 14, 1955, a Treaty of Friendship, Mutual Assistance and Co-operation was signed in Warsaw between the Soviet Union and its European associates (Bulgaria, East Germany, Hungary, Poland, Rumania, and Czechoslovakia) (and Albania which left the Pact in Sept. 1968) to serve as a counterpoise in NATO. A united military command was set up in Moscow. *C-in-C*, Marshal V. G. Kulikov; *Chief of Staff*, Army General A. I. Gribkov.

## INDUSTRY AND AGRICULTURE

One of the most remarkable aspects of the Soviet economy has been the transformation of an essentially agricultural country into the second-strongest industrial power in the world. The 1981 output amounted to 149,000,000\* tons of steel, 103,000,000\* tons of rolled metal, 704,000,000\* tons of coal, 609,000,000\* tons of crude oil, 127,000,000\* tons of cement, 1,325,000 million kW/h of electricity and 2,197,000 motor vehicles.

Agricultural development has been slower, mainly owing to lack of incentives among peasants organized in *kolkhozy* (collective farms). Repeated droughts, such as in 1980–81, were a contributing factor to a permanent shortage of grain; the 1978 record harvest of 237 million tons of grain was followed by one of only 179 million tons in 1979 and 189 million tonnes in 1980. Stock breeding has also suffered from the general mismanagement of farming, and from shortages of fodder in recent years. The livestock at Jan. 1, 1982 included 115,700,000 cattle, including 43,600,000 cows, 73,200,000 pigs and 148,000,000 sheep and goats. Besides *kolkhozy* (collective farms) and *soukhhozy* (state farms) a significant contribution to agricultural production is made by the private plots cultivated by individual peasants. The cultivation of these plots is encouraged by the Soviet authorities. The level of productivity remains very low. *Forests* cover nearly 40 per cent of the whole area of the Union and form a considerable source of wealth.

	1980
Imports from U.K. ....	£455,300,000
Exports to U.K. ....	786,200,000

## COMMUNICATIONS

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands), traversed as it is by trunk lines between Europe and Asia which enter Siberia via Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektynaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line (the Baikal-Amur Railway) is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

*Sea Ports and Inland Waterways.*—The most important ports (Odessa, Nikolayev, Batumi, Taganrog, Rostov, Kerch, Sevastopol and Novorossiisk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, icebound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carried about 475,500,000 tons of freight in 1975. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don Canal* linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May 1952.

FLAG OF THE U.S.S.R.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY OF THE U.S.S.R.—November 7 (Commemorating the October Bolshevik Revolution of 1917).

## BRITISH EMBASSY

(Naberezhnaya Morisa Toreza 14, Moscow)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir Iain Sutherland, K.C.M.G. (1982).

*Minister*, A. Brooke Turner.

*Counsellors*, D. Beattie (*Commercial*); C. J. R. Meyer (*Head of Chancery*); M. J. F. Duncan.

*Defence and Air Attaché*, Air Cdre. A. William, R.A.F.

*Military Attaché*, Brig. J. H. Pegg, C.B.E.

*Naval Attaché*, Capt. A. B. Richardson, R.N.

There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.

## I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

*Chairman of the Presidium of the Supreme Soviet*, M. A. Yasnov.

*Chairman of the Council of Ministers*, M. S. Solomentsev.

The R.S.F.S.R. has no central Communist Party organization of its own.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern portion of its Asiatic part and makes up 77 per cent of the total territory of the U.S.S.R. with 53 per cent of the total population. It consists of 16 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Dagestan, Kabardin-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North-Osetian, Tatar, Tuva, Udmurt and Yakut, A.S.S.R.s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Vorenezh and Yaroslavl).

*Physical Features.*—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. extends over all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Obi with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Kolyma and Anadyr. Lakes are abundant, particularly in the north-west. The huge Baikal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Greater Volga canal system, the Moscow and Rybinsk "Seas".

*Minerals.*—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus, in the area between the Volga and the Ural (the so-called "Second Baku") and in Western Siberia. Western Siberia also has large deposits of natural gas. Coal and gas deposits in Siberia and the Far East (especially Yakutia) are currently being developed, now that some deposits in the western parts of the

U.S.S.R. are approaching exhaustion. The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khopper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk-Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

*Production and Industry.*—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North reindeer breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. An extensive programme of land improvement mainly involving this zone, announced early in 1974, aims to double its total agricultural output by 1990. In the eastern part of this zone, between the Volga and the Urals, cericulture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with new industrial areas being developed in the Urals, the Kuznetsk basin, and more recently in Siberia and the Far East. However, Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the U.S.S.R. now comes from the R.S.F.S.R., half annual output comes from Tyumen Oblast in Western Siberia. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Novokuznetsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Ormsk, Volgograd, Gorky, Saratov, Grozny, Rostov and Taganrog.

*CAPITAL.*—Moscow. Population 8,203,000 (Jan. 1, 1981). Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital.  $\Psi$ Leningrad (before the First World War "St. Petersburg" and from 1914–1924 "Petrograd") has a population of 4,676,000 (Jan. 1, 1981).

Other towns with populations exceeding 500,000 are:—

Gorky (Nizhny-Novogorod) .....	1,367,000
Novosibirsk (Novonikolayevsk) .....	1,343,000
Sverdlovsk (Yekaterinburg) .....	1,239,000
Kuibyshev (Samara) .....	1,238,000
Chelyabinsk .....	1,055,000
Omsk .....	1,044,000
Perm (Molotov) .....	1,018,000

Kazan .....	1,011,000
Ufa .....	1,009,000
$\Psi$ Rostov-on-Don .....	957,000
Volgograd (Stalingrad; Tsaritsyn) .....	948,000
Saratov .....	873,000
Krasnoyarsk .....	820,000
Voronezh .....	809,000
Yaroslavl .....	608,000
Krasnodar .....	581,000
Izhevsk .....	574,000
Irkutsk .....	568,000
$\Psi$ Vladivostok .....	565,000
Novokuznetsk .....	551,000
Barnaul .....	549,000
Khabarovsk .....	545,000
Togliatti .....	533,000
Tula .....	521,000

$\Psi$  Seaport.

About 83 per cent of the population are Russians.

## II.—UKRAINE

*First Secretary of the Party Central Committee, V. V. Shcherbitsky.*

*Chairman of the Presidium of the Supreme Soviet, A. F. Vatchenko.*

*Chairman of the Council of Ministers, A. P. Lyashko.*

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkassy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Donetsk, Ivano-Frankovsk, Kharkov, Kherson, Khmelnytsky, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Voroshilovgrad, Zaporozhye and Zhitomir.

*Physical Features.*—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

*Production and Industry.*—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1970, the Ukraine provided 40 per cent of the total Soviet steel, 40 per cent of metal goods and 33 per cent of coal. The central forest-steppe region (mainly on the right bank of the Dnieper) is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

*CAPITAL* (since 1934), Kiev, one of the oldest cities in the U.S.S.R., founded in the 6th–7th century A.D., was the capital of the Russian State from 865 to 1240.

Population (Jan. 1, 1979), 2,144,000. Other towns with population over 500,000 are:—

Kharkov .....	1,444,000
$\Psi$ Odessa .....	1,046,000
Dnepropetrovsk (Yekaterinoslav) .....	1,066,000
Donetsk (Stalino; Yuzovka, i.e. Hughesovka) .....	1,021,000
Zaporozhye (Aleksandrovskaya) .....	781,000
Lvov (Lviv; Lwow; Lemberg) .....	667,000
Krivoy Rog .....	650,000
Zhdanov .....	503,000

### III.—BELORUSSIA (White Russia)

*First Secretary of the Party Central Committee*, T. Ya. Kiselev.  
*Chairman of the Presidium of the Supreme Soviet*, I. E. Polyakov.  
*Chairman of the Council of Ministers*, A. N. Aksenov.

The Belorussian S.S.R., lying in the western part of the European area of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, of the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population 1,276,000 (Jan. 17, 1979).

Belorussians make up four-fifths of the population, with Russians and Poles coming next.

### IV.—UZBEKISTAN

*First Secretary of the Party Central Committee*, Sh. R. Rashidov.  
*Chairman of the Presidium of the Supreme Soviet*, I. B. Usmankhodzaev.  
*Chairman of the Council of Ministers*, N. D. Khudayberdiyev.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 12 provinces (Andizhan, Bokhara, Dzhezak, Ferghana, Kashkadarya, Khorezm, Namangan, Navoi, Samarkand, Surkhan-darya, Syr-darya and Tashkent). It lies between the high Tianshan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include gold, natural gas, oil, copper, lead, zinc and coal.

The Uzbeks, a Turkic people, make up 68·7 per cent of the population, the Russians (10·8 per cent), Tatars (4·2 per cent) and Kazakhs (4 per cent) come next.

There are major agricultural and textile machinery plants and several chemical combines. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population 1,780,000 (Jan. 17, 1979). Samarkand contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulugbek, Tamerlane's astronomer-grandson, and a 15th-century observatory. Heavy damage was done to Tashkent by the series of earthquakes in April and May, 1966.

### V.—KAZAKHSTAN

*First Secretary of the Party Central Committee*, D. A. Kunayev.  
*Chairman of the Presidium of Supreme Soviet*, S. N. Imashev.  
*Chairman of the Council of Ministers*, B. A. Ashimov.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tianshan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of the 19 Provinces: Aktyubinsk, Alma-Ata, Chimkent, Dzhambul, Dzhezkazgan, East-Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanay, Kzyl-Orda, Mangyshlak, North-Kazakhstan, Pavlodar, Semipalatinsk, Taldy-Kurgan, Tselinograd, Turgay and Uralsk.

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tianshan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan is very rich in minerals: copper in Kounrad and Dzhezkazgan, lead and zinc in the Altai and Karatau mountains, iron ore in Radryg and Lisakovsk, coal in Ekibastuz and Karaganda and oil and natural gas in the Mangyshlak peninsula. Major centres of metal industry exist now in the Altai Mountains, in Chimkent, north of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the north and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are in a minority in the Republic named after them; they constitute only 36 per cent of its population, Russian settlers make up 41 per cent and Ukrainians 6 per cent.

CAPITAL, Alma-Ata (formerly Verna). Population 910,000 (Jan. 17, 1979). Karaganda, a major mining centre, has a population of 572,000 (Jan. 17, 1979).

### VI.—GEORGIA

*First Secretary of the Party Central Committee*, E. A. Shevardnadze.  
*Chairman of the Presidium of the Supreme Soviet*, P. G. Gilashvili.  
*Chairman of the Council of Ministers* (vacant).

The Georgian, S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and Adjara) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Lesser Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Surz Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rioni lowland are subtropical in their climatic character. The most important mineral deposits are manganese (Chiatura), coal (Tkibuli and Tkvarcheli) and oil (Kakhetia). Georgia is a leading producer of manganese in the U.S.S.R. There are also many oil refineries. Viticulture, tea and tobacco-growing are the three main agricultural industries. The Black Sea harbours many famous holiday resorts. Georgians make up 68·8 per cent of the population, the remainder being largely composed of Armenians, Russians, Azerbaidjani and Osetians.

CAPITAL, Tbilisi (Tiflis), population 1,066,000 (Jan. 17, 1979).

#### VII.—AZERBAIDJAN

*First Secretary of the Party Central Committee*, G. A. Aliyev.

*Chairman of the Presidium of the Supreme Soviet*, K. A. Khalilov.

*Chairman of the Council of Ministers*, G. N. Seidov.

The Azerbaijan S.S.R. occupies the eastern part of Transcaucasia, on the shore of the Caspian Sea, and borders on Iran. It was formed in 1920. Between 1922 and 1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the lower reaches of its tributary Araks. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaijan has a continental climate. The land requires artificial irrigation. Industry is dominated by oil and natural gas extraction and related chemical and engineering industries centred on Baku and Sumgait. A large power station on the Araks was completed in 1969, in conjunction with Iran. Azerbaijan is also important as a cotton growing area. The Azerbaijani (Turks) make up more than three-quarters of the population of the Republic, Armenians, about 8 per cent, and Russians, 8 per cent.

CAPITAL,  $\Psi$  Baku. Population 1,550,000 (Jan. 17, 1979).

#### VIII.—LITHUANIA

*First Secretary of the Party Central Committee*, P. P. Grishkyavichus.

*Chairman of the Presidium of the Supreme Soviet*, A. S. Barkauskas.

*Chairman of the Council of Ministers*, R.-B. I. Songaila.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its incorporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 7-9 per cent each.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after the collapse and partition of Poland in 1939, and recaptured by Soviet forces in 1944). Population 481,000 (Jan. 17, 1979).

#### IX.—MOLDAVIA

*First Secretary of the Party Central Committee*, S. K. Grossu.

*Chairman of the Presidium of the Supreme Soviet*, I. P. Kalin.

*Chairman of the Council of Ministers*, I. G. Ustian.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Rumania with

the Pruth forming the frontier. In 1918, Rumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Rumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Rumanians from 1941 to 1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. Moldavians make up 64 per cent of the population, with Ukrainians, and Russians next.

CAPITAL, Kishinev (Chisinau). Population, 503,000 (Jan. 17, 1979).

#### X.—LATVIA

*First Secretary of the Party Central Committee*, A. E. Voss.

*Chairman of the Presidium of the Supreme Soviet*, P. Ya. Strautmanis.

*Chairman of the Council of Ministers*, Yu. Ya. Ruben.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent of the total territory.

The Latvians make up 53.7 per cent of the Republic's population, Russians 32.8 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Libau) are important sea-ports.

CAPITAL,  $\Psi$  Riga. Population, 835,000 (Jan. 17, 1979).

#### XI.—KIRGHIZIA

*First Secretary of the Party Central Committee*, T. U. Usubaliyev.

*Chairman of the Presidium of the Supreme Soviet*, T. Kh. Koshoev.

*Chairman of the Council of Ministers*, A. D. Duisheev.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936 a Union Republic. It contains three provinces, Issyk-Kul, Naryn and Osh. The Kirghiz Republic is a mountainous country, the major part being covered by the ridge of the Central Tianshan, while mountains of the Pamir-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alai, Susamyr, the Issyk-Kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agricul-

ture prospers. Crops include sugar beet and cotton, and sheep are important in the mountains. Industry is being developed and some mining is done. The Kirghiz constitute 47.9 per cent of the population, the Russians 25.9 per cent. The Uzbeks (in Eastern Ferghana) amount to 12.1 per cent.

CAPITAL, Frunze (formerly Pishpek). Population, 533,000 (Jan. 17, 1979).

## XII.—TADJIKISTAN

*First Secretary of the Party Central Committee*, R. N. Nabiev.

*Chairman of the Presidium of the Supreme Soviet*, M. Kh. Kholov.

*Chairman of the Council of Ministers*, K. M. Makhkamov.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Kulyab and Leninabad Provinces.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., Pík Kommunizma (24,500 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syr-Darya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. 58.8 per cent of the population are Tadjiks (linguistically and culturally akin to the Persians), 23 per cent Uzbeks, the rest Russians and others.

CAPITAL, Dushanbe (formerly Stalinabad; Dyu-shambe). Population, 494,000 (Jan. 17, 1979).

## XIII.—ARMENIA

*First Secretary of the Party Central Committee*, K. S. Demirchyan.

*Chairman of the Presidium of the Supreme Soviet*, B. E. Sarkisov.

*Chairman of the Council of Ministers*, F. T. Sarkisyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia: it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges. The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Araks valley has a long, hot and dry summer. Irrigation is essential for agriculture. In Turkey, at the junction of the former Turkish, Persian and Russian boundaries, is *Mount Ararat* (17,160 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A. D. 300.

Nearly 90 per cent of the population is Armenian.

CAPITAL, Erevan. Population, 1,019,000 (Jan. 17, 1979).

## XIV.—TURKMENISTAN

*First Secretary of the Party Committee*, M. N. Gapurov.  
*Chairman of the Presidium of the Supreme Soviet*, B. Yazkuliev.

*Chairman of the Council of Ministers*, Ch. S. Karryev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya, and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains five Provinces: Ashkhabad, Chardjou, Krasnovodsk, Mary and Tashauz. The country is a low-lying plain, fringed by hills in the south. Ninety per cent of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The cultivation of cotton, stock-raising and mineral extraction are the principal industries. The republic produces 16 per cent of the Soviet Union's natural gas, as well as astrakhan furs and carpets. Most of the land under plough is artificially irrigated. The oil and silk industries are of old standing. There are also some fisheries in the Caspian.

Turkmen, nomadic in the past, make up 68.4 per cent of the population, Russians 12.6 per cent, and Uzbeks 8.5 per cent.

CAPITAL, Ashkhabad (formerly Askhabad, Polto-ratsk). Population, 312,000 (Jan. 17, 1979).

## XV.—ESTONIA

*First Secretary of the Party Central Committee*, K. G. Vaino.

*Chairman of the Presidium of the Supreme Soviet*, I. G. Kebin.

*Chairman of the Council of Ministers*, V. I. Klauson.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Osel, form part of Estonian territory. Between 1941 and 1944, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, woodworking, etc.

The population consists of Estonians (64.7 per cent) and Russians (27.9 per cent).

CAPITAL, Ψ Tallinn (formerly Reval). Population, 430,000 (Jan. 17, 1979).

## THE VATICAN CITY STATE

(Stato della Città del Vaticano)

*Sovereign Pontiff*,

His Holiness Pope John Paul II (Karol Wojtyła), born at Wadowice (Krakow, Poland), May 18, 1920, elected Pope (in succession to Pope John Paul I), Oct. 16, 1978.

*Secretary of State*, Cardinal Agostino Casaroli, appointed April, 1979.

APOSTOLIC NUNCIATURE IN LONDON

*Apostolic Pro Nuncio*, His Excellency Archbishop Bruno Heim (1982).

*Counsellor*, Mario Oliveri.

The office of the ecclesiastical head of the Roman Catholic Church (Holy See) is vested in the Pope, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX (1846-1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel Gandolfo and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and the Catholic Church in Italy and agreeing to pay 750,000,000 *lire* in cash and the income at 5 per cent on 1,000,000,000 *lire* State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City in 1978 was 731.

FLAG.—Square flag; equal vertical bands of yellow (next staff), and white; crossed keys and triple crown device on white band.

(01-584 4206)

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Vice-Admiral Félix Mendoza Acosta.  
*Minister Counsellor*, Dr. Rafael Monsalve.  
*Consul General*, Sr. Ambrosio Ponsala.

There is also a Consulate-General at *Liverpool*.

*Area and Population*.—A South American Republic, situated approximately between 0° 45' S. lat. and 12° 12' N. lat. and 59° 45'–73° 09' W. long. It consists of one Federal District, 20 states and 2 territories. Venezuela has a total area of 353,894 sq. miles and a population (1981 estimate) of 16 million.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by Guyana, and south by Brazil. Included in the area of the Republic are 72 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nueva Esparta*. *Margarita* has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of *Patos* (170 acres) about 3 miles from the mainland.

*Physical Features*.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Pico Bolívar (16,411 feet) and Picacho de la Sierra (15,420 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Pacaraima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guyana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,600 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations have opened the Orinoco to ocean-going ships, of up to 40 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream), which with the adjacent town of San Félix is now officially known as Ciudad Guayana. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area of 8,296 square miles, is the

largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles) about 1,400 ft. above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October, the dry, cooler season from November to March.

**Language and Literature.**—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 44 daily newspapers in Venezuela, of which ten are published in Caracas, and about 60 to 70 weekly news magazines. There are also a large number of fortnightly, monthly and quarterly publications.

**Education** is free and primary education compulsory from the age of 7 years. There are ten universities in Venezuela, five in Caracas and the others in Maracaibo, Mérida, Valencia, Cumaná and Barquisimeto.

**Production and Industry.**—The produce of Venezuelan forest and fields includes the following: (a) tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal and tobacco. There is an extensive beef and dairy farming industry. Despite substantial improvements in agriculture, Venezuela is heavily reliant upon food imports, which constitute about 60 per cent of total consumption.

The principal industry is that of *petroleum*, which in 1979 contributed 96 per cent of Venezuela's foreign exchange income. Daily production in the oilfields (which were nationalized on January 1, 1976) has steadily declined since 1973 in line with Venezuela's conservation policies, reaching 2.16 million barrels a day (average) in 1980 (1973—3.366 mbd). Preliminary indications are that production in 1981 will be a little less. Before the war of 1939–45 over 80 per cent of the crude oil was exported to Netherlands Antilles refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell (now Maravén) plant at Punta Cardon went into production in 1949, and

the Creole refinery at Amuay a year later. Other refineries are being operated at Caripitó, San Lorenzo, Puerto La Cruz, Tucupeído, El Chaure and El Palito. Development of the Orinoco heavy oil belt is now moving ahead with the inauguration of the Lagoven continuous steam injection pilot plant at El Jobo in southern Monagas. It has been estimated conservatively that there might exist recoverable resources of 70,000 million barrels in the Orinoco region, but the initial aim of the Lagoven project is the production of 125,000 and 500,000 bpd of upgraded crude by 1988 and 2000 respectively. A high proportion of the production is exported to the U.S.A. in the form of fuel oil. The Venezuelan Government has unified income tax on firms involved in mining and petroleum at 60 per cent, and reformed the basis on which tax is calculated.

Aluminium is now the second highest source of foreign exchange after petroleum. The Venezuelan state now holds the majority stake in both the principal producing companies, Venalum and Alcasa, and is moving towards a consolidation of the aluminium industry, with both companies sharing their resources and adopting general policies of marketing and procurement of supplies. Output in 1980 was 222,100 tons, with 151,250 tons exported.

Rich iron ore deposits in Eastern Venezuela have been developed. Secondary processes for pelletizing and briquetting ore for export have been installed. The government-owned steel mill at Matanzas in the Guayana uses local iron ore and obtains its electric power from hydro-electric installations on the Caroni River. It produces seamless steel tubes, billets, wire and profiles. The production of more steel products is planned over the next few years. A new mill at Ciudad Guayana for the production of centrifugally-cast iron pipe came into operation at the end of 1970, with an annual capacity of 30,000 tons. It is planned to increase steel production to 15,000,000 tons a year by 1985.

Other industries include petrochemicals, gold, diamonds and asbestos; textiles and clothing; plastics; manufacture of paper, cement, glass and plate glass; beer and other alcoholic beverages; tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly; preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing, sanitary ware, electric home appliances, pumps, aluminium and aluminium products, toys, agricultural machinery, bicycles, electronic components, cosmetics and many others.

**Communications.**—There are about 36,563 km. of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 372 kilometres. Road and river communications have made railways of negligible importance in Venezuela except for carrying iron ore in the south-east. However, the government is restoring the Puerto Cabello-Barquisimeto line and expanding it to Turén in the agricultural heartland of Venezuela. A new line connecting Caracas with La Guaira and the Litoral is planned, and in 1983 the Caracas Metro comes into operation. British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with the United States, Central America, South America, the Caribbean and Europe. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled, 150 commercial and one cultural, FM, broadcasting stations. There are

four television stations in Venezuela, all in Caracas. Two are government controlled.

*Defence Attaché*, Capt. M. Southgate, R.N.

*British Council Representative*, J. Mallon, O.B.E.

#### BRITISH CONSULAR OFFICES

There are British Consular Offices at *Caracas*, *Maracaibo*, *Puerto La Cruz* and *Valencia*.

### VIETNAM

(Socialist Republic of Vietnam)

*President*, Truong Chinh.

*Prime Minister*, Pham Van Dong.

*Deputy Premiers*, Pham Hung; Vo Nguyen Giap; Do Muoi, To Huu, Vu Dinh Lieu, Tran Phuong, Dong Si Nguyen, Tran Quynh, Vo Van Kiet (*Chairman of State Planning Commission*).

#### EMBASSY IN LONDON

12-14 Victoria Road, W.8

[01-937 1912]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dang Nghiem Bai.

*Attaches*, Phan Trong Thuyet (*Commercial*); Pham Quang Nhue; Nguyen The Dang.

Vietnam, with an area of 129,000 square miles, and an estimated population of 55,000,000, is bordered on the north by China and the west by Laos and Cambodia (*see map, p 955*).

**Government.**—Following the end of the war in Vietnam in 1975, and the establishment of a Provisional Revolutionary Government to administer South Vietnam, a National Assembly representing the whole of Vietnam was elected on April 25, 1976. The Assembly met in Hanoi on June 24, and on July 2 approved the reunification of North and South Vietnam under the name of the Socialist Republic of Vietnam. The national flag, anthem and capital of North Vietnam were unanimously adopted for the Socialist Republic, and Saigon was renamed Ho Chi Minh City.

A new constitution was adopted in December 1980. The elected National Assembly will, in due course, elect a new Council of Ministers, and a Council of State which will combine the functions of President and Standing Committee of the National Assembly.

**Economy.**—During the last five years, Vietnam's economy has faced considerable problems. These include harvest failures as a result of climatic disasters, reductions in foreign aid, border hostilities and the continued allocation of resources to military

expenditure. Efforts to integrate the economies of the North and South have not been all that successful. Real GDP grew on average by only 2% per annum during the period of the second Five-Year Plan 1976-80, even declining in both 1979 and 1980.

A modest recovery was noted in 1981. Food production reached 15 m tons. Production of light industrial goods rose by 7% over 1980 but other sectors stagnated. Nonetheless, real GDP rose by 3% in 1981. Exports were estimated at U.S.\$369 m and imports at U.S.\$1,080 m, leaving a substantial trade gap. The 1981-85 Five Year Plan is expected to be finalised by the end of 1982 and provides for more modest targets.

**CAPITAL.**—Hanoi (2,543,800).

**FLAG.**—Red, with yellow five-point star in centre.

**NATIONAL DAY.**—September 2.

#### YEMEN EMBASSY

41 South Street, W.1

[01-629 9905]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Ahmed Daifellah Alazeib (1981).

Yemen, the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between the kingdom of Saudi Arabia and the People's Democratic Republic of Yemen, with an estimated area of 75,000 square miles and a population of about 8,556,974 including about 1,396,123 emigrant workers in the Arabian peninsula and elsewhere, including the U.K. The highlands and central plateau of Yemen, and the highest portions of the maritime range, form the most fertile part of Arabia, with an abundant but irregular rainfall.

**Trade.**—The main exports are cotton, coffee, hides and skins. Imports from U.K. in 1981 were estimated at £32 million.

The ruins of Marib, the ancient Sabæan capital, and its dam are in the Yemen.

**Government.**—A People's Constituent Assembly, the legislative body, replaced the Command Council in 1978. The Cabinet is the executive body and on May 9, 1979, an Advisory Board of senior Government officials was formed to advise the President.

President Lt.-Col. Ahmad Hussein al Ghashmi was assassinated on June 24, 1978, Lt.-Col. Ali Abdullah Saleh was elected as his successor on July 17 and promoted to Colonel in 1979.

**CAPITAL.**—Sana'a (pop. 277,817). Other main cities are Taiz (119,572) and Hodeida (126,386).

**FLAG.**—Horizontal bands of red, white and black, with 5-point green star in centre of white band.

## YEMEN

(People's Democratic Republic of Yemen)

President, Ali Nasser Mohammed, *assumed power*  
April 1980.

### EMBASSY

57 Cromwell Road, S.W.7  
[01-584 6607]

Chargé d'Affaires, Saeed Hadi Awad.

*Area and Population.*—The Democratic Republic of Yemen lies at the southern end of the Arabian peninsula, having a frontier with the Yemen Arab Republic, Saudi Arabia and the Sultanate of Oman, and a coastline extending 700 miles from the Red Sea eastwards along the Gulf of Aden. The area is largely composed of mountains and desert. Rainfall is generally scarce and unpredictable. The population outside Aden is concentrated in the fertile districts. In the more extensive desert and near-desert areas nomadic communities depend on their livestock for a livelihood.

Included in the State are the offshore islands of Perim (in the Bab al-Mandeb Straits) and Socotra, formerly part of the sultanate of Qishn and Socotra, now merged in the People's Republic. Sovereignty

over the island of Kamaran (area 70 sq. miles) in the Red Sea is under dispute following its occupation by forces of the Yemen Arab Republic during border conflicts in October, 1972. The area of the People's Democratic Republic is 112,000 sq. miles, with a population of 1,800,000 (Est. 1977). The population of Aden alone (75 sq. miles) is about 270,000. The principal districts of Aden township are: Crater, Khormaksar, Tawahi, and Ma'alla. Neighbouring communities are Sheikh Othman, Medinat al-Shaab, and Little Aden, which is the site of the Aden Refinery Company refinery. The other major coastal town is Mukalla.

**Government.**—The People's Republic of South Yemen was set up on Nov. 30, 1967 when the British government ceded power to the National Liberation front, thus bringing to an end 129 years of British rule in Aden and some years of protectorate status in the hinterland. Its name was changed to People's Democratic Republic of Yemen on Nov. 30, 1970. Territory of the Republic is that of the former Federation of South Arabia and the Aden Protectorates, consisting of the State of Aden and some 17 sultanates and emirates. It is now divided into six Governorates. Under a constitution promulgated on Nov. 30, 1970, a Supreme People's Council of 101 members was appointed in May, 1971. Elections to a new council (112 strong) took place from 16–18 December 1978. At its first plenary session, on Dec. 27, the SPC appointed an 11-member Presidium to replace the five-man Presidential Council. Abdel Fattah Ismail was appointed Chairman of the Presidium, and thus head of state. Ismail resigned in April 1980 and was succeeded both as Chairman of the Presidium and as Secretary-General of the ruling Yemeni Socialist Party by the Prime Minister Ali Nasser Mohammed.

The Government receives substantial development from Kuwait and Abu Dhabi (Arab Development Funds). Other aid is provided by China, U.S.S.R. (including military aid) and other Socialist Bloc countries.

**Kuria Muria Islands.**—The Kuria Muria Islands, which had been administered by Great Britain from Aden although 200 miles distant from Yemen territory, were retroceded to the Sultanate of Oman on Nov. 30, 1967.

**Production.**—Agriculture is the main occupation of the inhabitants of the 112,000 square miles of the Republic, outside Aden town. This is largely of a subsistence nature, sorghum, sesame and millets being the chief crops, with wheat and barley widely grown at the higher elevations.

Under the Five Year Development Plan 1974–79 much importance was attached to the development of agricultural and fisheries projects. Under the second Five Year Plan (1981–85) emphasis has shifted to industrial development, which has been allocated 29 per cent of the total investment budget (YD508m); agricultural development has been allocated 12 per cent. Light industries are being established which will replace imports and use locally produced raw materials.

#### Trade with U.K.

	1980
Imports from U.K. ....	£25.4m
Exports to U.K. ....	5.68m

Following the closure of the Suez Canal in 1967 the once prosperous trading economy of Aden fell into a steady decline, which has not been reversed by the re-opening of the Canal. In the main harbour, cargo handling for larger vessels is by lighter, but wharves at Maalla can accommodate alongside vessels up to 300 feet in length and 18 feet in draught. The Aden Refinery Company has a refining capacity of 8 m tons

per annum but for a number of years throughout has not exceeded a rate equivalent to 5 m tons annually. Yemen is not an oil producing country but significant traces of hydrocarbons were found during exploration activities offshore in 1982.

**Finance and Currency.**—During 1977 revenue was estimated at about £51,000,000 and expenditure £68,000,000. Currency is the South Yemen *dinar* (YD).

**Communications.**—There are no railways in the Republic. Yemen has 760 miles of good roads and construction of a further 300 miles is in hand. A system of undeveloped but motorable roads links the towns and villages outside Aden. There is an international airport at Aden (Khormaksar) into which a limited number of international airlines operate.

**CAPITAL.**—Aden (population, 270,000).

**FLAG.**—A tricolour, red, white and black horizontal bands, with a triangle of light blue at the hoist pointing towards the fly and charged with a five pointed red star.

**NATIONAL DAYS.**—Independence Day, Nov. 30; Revolution Day, Oct. 14.

BRITISH EMBASSY  
Khormaksar, Aden.

Chargé d'Affaires, Malcolm Towers McKernan.

## YUGOSLAVIA (Socijalistička Federativna Republika Jugoslavije)

*President of the Presidency, Peter Stambolic (elected May 1982 for one year).*

*Vice-President of the Presidency, Dr. Vladimir Bakarić (elected May 1982 for one year).*

*President of the SFRJ Assembly, Raif Dizdarević.  
President of the Federal Executive Council, Milka Planinc.*

*President of the Socialist Alliance of the Working People, Bogoljub Nedeljković.*

*Vice-President of the SFRJ Assembly, Mito Hilajkov.  
Vice-Presidents of the Federal Executive Council, Zvone Dragan; Borislav Srebrić; Dr. Mujat Najović.*

*Secretary General, Petar Najović.*

*Federal Secretaries:—*

*Foreign Affairs, Lazar Mojsov.*

*National Defence, Branko Mamula.*

*Internal Affairs, Stane Dolanc.*

*Finance, Jože Florijančić*

*Foreign Trade, Dr. Milenko Bojanić.*

*Trade and General Economic Affairs, Luka Reljić.*

*Justice and Organization of Federal Administration, Borislav Krajina.*

*Information, Mitko Čalovski.*

*Federal Committee Presidents:—*

*Energy and Industry, Rade Pavlović.*

*Agriculture, Milorad Stanojević.*

*Transport and Communications, Mustafa Nazmi.*

*Labour, Health and Social Security, Djordje Jakovlević.*

*Questions concerning War Veterans and Disabled Veterans, Dragomir Nikolić.*

*Legislature, Janko Česnik.*

## LEAGUE OF YUGOSLAV COMMUNISTS

*Presidency of the Central Committee.*

*President of the Presidency, Mitja Ribičič (elected for one year in June 1982).*

*Secretary, Nikola Stojanović (elected for two years in June 1982).*

*Members, V. Bakarić; D. Belovski; J. Bilić; D. Čkrebić; D. Čuić; D. Culafić; D. Dragosavać; M.*

Djuričin; K. Hadzivasilević; S. Hasani; F. Herljević; M. Kučan; A. Marinc; D. Marković; K. Markovski; P. Matic; V. Milatović; H. Pozderac; M. Radović; A. Šukrija; D. Vidić.

YUGOSLAV EMBASSY IN LONDON  
5-7 Lexham Gardens W.8  
[01-370 6105]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Dragi Stamenković (1981).

*Minister Counsellors*, Lazar Zaković; Ilija Acimovic (Economic).

*Counsellors*, Dr. Stojan Gligoric (Press and Culture); Mate Rako (Consular).

*Armed Forces Attaché*, Capt. Uros Trbojevic.

*Air Attaché*, Capt. Milan Damjanović.

*1st Secretary*, Neven Madey.

*2nd Secretary*, Milorad Ivanovic.

*Consulate*, 7 Lexham Gardens, W.8.

**Area and Population.**—Yugoslavia is a Federation comprising the Socialist Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the Socialist Autonomous Provinces of the Vojvodina and Kosovo. The area of Yugoslavia is estimated at 255,804 square kilometres (98,725 square miles). The population in April 1981 was 22,420,000, including 8,140,000 Serbs, 4,430,000 Croats, 1,750,000 Slovenes, 1,730,000 Albanians, 1,341,000 Macedonians and 1,220,000 "Yugoslavs", as well as a variety of other minorities.

In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Under an agreement signed at Osimo on November 10, 1975 the Italian and Yugoslav Governments reached final accord on the future status of Trieste.

**Government.**—On Nov. 29, 1945, the Constituent Assembly of Yugoslavia at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic.

On April 7, 1963, a new Constitution was proclaimed under which the official name of the country was changed to "The Socialist Federal Republic of Yugoslavia".

Several amendments to the Constitution were made in 1971. The most important formed a new ruling body called the Presidency, which has 8 members, one from each Republic and Autonomous Province. Since the death of President Tito in May 1980, its members take it in turns according to a fixed order of succession to become President of the Presidency of the Republic for a period of 12 months each. A new Constitution was proclaimed in 1974 followed by the reconstitution of the Federal Assembly, after elections based on the new delegate system, into two chambers consisting of the Federal Chamber (220 delegates) and the Republican/Provincial Chamber (88 delegates). A new Federal Executive Council (i.e. government) was also formed. The current Council was elected in May 1982 with a 4 year mandate.

**Defence.**—The Army, Navy and Air Force on a peace footing consist of 250,000 officers and men.

**Religion and Education.**—The three main faiths are the Orthodox, Catholic and Islamic, and freedom for all faiths is constitutionally guaranteed. Religion is separated from the State and no religious instruction is allowed in state schools, although it is permitted in churches.

**Education.**—Eight years' elementary education is

compulsory and all education is free. There are 18 universities.

**Language and Literature.**—The language mainly used throughout Yugoslavia and in the Federal Government is Serbo-Croat but Slovenian and Macedonian (also South-Slav tongues) and Albanian, Bulgarian, Rumanian, Italian, Slovak, Ruthenian, Hungarian and Turkish are also spoken in certain areas. There is, however, no official language since all are constitutionally equal, except in the Armed Forces where Serbo-Croat is obligatory. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin. There are 4 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana, 2 Croat dailies in Zagreb, and many other dailies published in other towns. There are also many local newspapers and radio programmes in the different "minority" languages.

**Production and Industry.**—The share of industry in Gross Domestic Product (average annual rate in real terms of 6 per cent in 1979) has increased to about 49 per cent, while agriculture has declined to about 14 per cent. In industry the high level of investment of recent years is being cut back and present efforts are directed towards development of high priority areas such as mining, energy resources and transport and communications. Agricultural policy is directed towards substantially increased production, to make the country self-sufficient and to provide significant exports of foodstuffs. Some 85 per cent of land is still privately owned.

The main crops are wheat, maize, sugar beet, sunflower and soya. Yields in 1981 were (tons): wheat, 4.5 m; maize, 9.8 m; sugar beet, 7.8 m. According to Yugoslav official estimates, the livestock population in 1981 was approximately as follows: cattle, 5,149,000; sheep, 7,339,000; pigs, 7,300,000; poultry, 63,055,000. Minerals are an important source of wealth particularly in the central and south eastern regions. Production in 1981 included the following ('000 tons): coal 51,400; coke 2,620; iron ore 4,450; pig iron 4,450; steel 3,612 (1980); crude oil 4,230 and smaller quantities of copper, zinc and mercury.

**Communications.**—In 1982 there were 10,000 kms of standard and narrow gauge railway and approximately 105,000 kms of classified roads. In 1979 there were 1,913,000 telephones in use in the country. The principal ports on the long Adriatic seaboard of Yugoslavia are Rijeka, Bakar, Šibenik, Split, Zadar,

Kardeljeva (formerly Ploče), Dubrovnik, Bar, Kotor (Cattaro) and Koper. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

## FINANCE

	1979	1980 (Jan.–Nov.)
	million <i>Dinars</i>	million <i>Dinars</i>
Revenue .....	499.2	563.2
Expenditure .....	499.3	563.2

The rate of exchange is variable. On June 6, 1980 the *dinar* was devalued against all convertible currencies by about 30 per cent and has since been regularly adjusted downwards. (See also p. 84).

## Trade with U.K.

	1979	1980
Imports from U.K. . . .	£174,000,000	£190,000,000
Exports to U.K. . . . .	51,000,000	56,000,000

**CAPITAL.**—Belgrade, population (1981) 1,455,000. Other towns are Zagreb (763,000); Skopje (503,000); Ljubljana (253,000); Sarajevo (447,000); Novi Sad (169,000); Priština (1971) (153,000); Ψ Split (152,000); Ψ Rijeka (133,000); Titograd (95,000).

**FLAG.**—Five-point red star outlined by narrow yellow stripe, on a ground of three horizontal bars, blue, white and red.

**NATIONAL DAY.**—November 29.

## BRITISH EMBASSY

General Ždanova 46, Belgrade.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Kenneth B. A. Scott, C.M.G. (1982).  
*Counsellors*, A. St. J. H. Figgis.

*Defence Attaché*, Col. C. F. Eaton, O.B.E.  
*Naval and Air Attaché*, Wing-Cdr. M. R. Killick.  
*1st Secretaries*, G. W. Hewitt; M. J. S. Allen (*Commercial*); N. D. Rampton (*Admin. and Consular*).  
*2nd Secretaries*, G. Kirby (*Commercial*); C. G. Crawford (*Information*).  
*Attachés*, P. L. Strange; P. G. Hewitt.  
*3rd Secretaries*, T. C. Moore; A. Stead (*Admin. and Consular*).

## BRITISH CONSULAR OFFICES

There are British Consular Offices at *Belgrade*, *Zagreb* and *Split*.

*British Council Representative*, O. D. Elliott, Generala Ždanova 34, Belgrade. British Council Reading Room, Knez Mihajlova 45, Belgrade. There are also a centre and library at *Zagreb*.

## ZAIRE

(The Republic of Zaire)

*President of the Republic and National Security*, Gen. Mobutu Sésé Sékou, born Oct. 30, 1930; assumed office November 25, 1965; elected for 7-year term, Nov. 5, 1970; re-elected for 7-year term, Dec. 5, 1977.

*Premier*, N'Singu Udjuu.  
*Vice-Premier and Administration*, Vundwawe Te Pemako.

*Foreign Affairs*, Yoka Mangono.  
*Justice*, Mananga Dintoka Pholo.  
*Finance*, Namwisi ma Nkoy.  
*Economy, Industry and Trade*, Pay-Pay wa Syakasige.  
*Agriculture and Environment*, Kamitatu Massamba.  
*Mines and Energy*, Umba Kyamitala.

## ZAIRE EMBASSY

26 Chesham Place, S.W.1  
[01-235 6137]

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Matungulu N'Kuman Tavun.

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960, when it became the Democratic Republic of the Congo. In October 1971 the name changed to the Republic of Zaire. Situated between long. 12°–31° E. and lat. 5° N.–13° S., the Zairian Republic comprises an area of 905,582 sq. miles, with a population (Census, 1970) of 21,637,000, including 932,000 foreigners. The State is divided into 8 provinces (see below).

**Government.**—On June 30, 1960, the Belgian Congo became an independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the *Loi Fondamentale*, drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the independence of the State of Katanga although he failed to obtain international recognition. Katanga did not come under the Government at Leopoldville until January 14, 1963.

The constitutional and political situation remained unsettled, the United Nations having mixed forces in the country until 1964. By the middle of 1965, the Congolese Government formed by M. Tshombe in July, 1964, had succeeded in gaining control of all the towns from the rebels and depriving them of military aid from outside the Congo.

General Joseph-Désiré Mobutu, Commander-in-Chief of the Congolese National Army, announced on November 25, 1965, that he had assumed the Presidency. After re-organizations in Dec. 1966, and Oct. 5, 1967, a new Cabinet, with the President again as Prime Minister, took office on Mar. 5, 1969.

A Presidential régime was instituted by the 1967 Constitution, subsequently amended in 1974 and totally revised in Feb. 1978. The Mouvement Populaire de la Révolution is the sole political party. The President changed his name to Mobutu Sésé Sékou Kuku Ngbendu Wa Zabanga in 1972, but is usually known by the first three of these names only.

**Climate.**—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. There has been some increase in sleeping-sickness since independence. Malaria, formerly under control in Leopoldville (now Kinshasa) and Matadi, has also begun to increase.

Extensive forest covers the central districts.

*Provinces.*—On December 24, 1966, the number of provinces was reduced from 21 to 8, each under a Governor and provincial administration. They have recently been redesignated as "regions" and are now as follows with names of capitals in brackets: Bas-Zaire (*Matadi*); Bandundu (*Bandundu*); Equateur (*Mbandaka*); Haut-Zaire (*Kisangani*); Kivu (*Bukavu*); Shaba, formerly Katanga (*Lubumbashi*); East Kasai (*Mbuji-Mayi*); West Kasai (*Kananga*).

*Production.*—The cultivation of oil palms is widespread, palm oil being the most important agricultural cash product. Coffee, rubber, cocoa and timber are the next most important agricultural exports. The production of cotton, pyrethrum and copal fell sharply on independence but is now increasing. The country is rich in minerals, particularly Shaba (ex-Katanga) province. Copper, widely exploited, is the country's major source of foreign exchange earnings; industrial diamonds and cobalt are also produced. Extensive radium deposits exist near Lubumbashi and reef-gold exists in the north-east of the country.

There is a wide variety of small secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint, sugar, furniture, metal goods and tyres, and local assembly of motor vehicles. There are very large reserves of hydro-electric power and the huge Inga dam on the river Zaire is now supplying electricity to Matadi and Kinshasa.

The chief exports are copper, palm oil and palm-kernels, coffee, diamonds, rubber, cobalt, cassiterite, zinc and other metals.

*Currency.*—The present unit of currency, the Zaire, was introduced in 1967, replacing 1,000 Old Congolese francs.

#### Trade with U.K.

	1979	1980
Imports from U.K. . . . .	£22,246,000	£52,585,000
Exports to U.K. . . . .	67,006,000	27,629,000

*Language, Religion and Education.*—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, while Lingala is the language of Kinshasa, and of a large area along the river and in the north. It is estimated there are 5,000,000 African Christians in the Republic (Roman Catholic 4,200,000, Protestant 800,000). The local Kimbanguist religion has over a million adherents. The National University of Zaire has campuses in Kinshasa, Kisangani and Lubumbashi, with approximately 28,000 students (1978-79).

*CAPITAL.*—Kinshasa (formerly Leopoldville), population (estimated, 1980) 2,500,000. Principal towns, Lubumbashi (formerly Elisabethville) (403,623); Kisangani (formerly Stanleyville) (310,705); Likasi (146,394); Kananga (601,239);  $\Psi$  Matadi (143,598); and Mbandaka (134,495).

*FLAG.*—Dark brown band and torch with red flame in yellow roundel on green background.

*NATIONAL DAY.*—June 30.

#### BRITISH EMBASSY Kinshasa.

*Ambassador Extraordinary and Plenipotentiary*, His Excellency John Michael Owen Snodgrass, C.M.G.  
*1st Secretary*, Mrs. M. Bryan.  
*2nd Secretaries*, D. R. Tilling (*Commercial and Vice-Consul*); I. A. Crees.

## THE ARCTIC OCEAN

The Arctic Ocean consists of a deep sea over 2,000 fathoms, on the southern margin of which there is a broad continental shelf with numerous islands. Into this deeper sea there is only one broad channel, about 700 miles, between Greenland and Scandinavia. Behring Strait is only 49 miles wide and 27 fathoms deep. The southern boundary of the Arctic Ocean is the Wyville-Thomson and Faeroe-Icelandic submarine ridge, which separates the North Atlantic from the Norwegian and Greenland Seas. The Norwegian Deep lies between Norway and Jan Mayen and Iceland; it exceeds 1,500 fathoms. The Greenland Deep, of similar depth, lies between Spitsbergen and Greenland. These two depressions are separated by a somewhat deeply submerged ridge from the east of Jan Mayen to Bear Island, south of Spitsbergen. A shallow ridge from the north-west of Spitsbergen to Greenland separates the Greenland Sea from the deep North Polar Basin. This extends from the north of Spitsbergen and Franz Josef Land to the north of the New Siberia Islands and of the North American Arctic Archipelago. Another more shallow depression is Baffin Bay, less than 1,000 fathoms. This is separated from the North Atlantic by a submarine ridge. Barent's Sea, between Spitsbergen, Norway and Novaya Zemlya, and the Kara Sea, between Novaya Zemlya and the Siberian coast, are respectively below 200 and 100 fathoms. The total area of the Arctic Sea is about 5.5 million square miles, of which 2.3 million square miles are probably covered with floating ice.

## THE ANTARCTIC

THE ANTARCTIC is generally defined as the area lying within the Antarctic Convergence—the zone where cold northward-flowing Antarctic sea water sinks below warmer southward-flowing water. This zone is at about lat. 50° S. in the Atlantic Ocean and lat. 55°–62° S. in the Pacific Ocean. The continent itself lies almost entirely within the Antarctic Circle, an area of about 5.5 million square miles, 98 per cent of which is permanently ice-covered. The average thickness of the ice is 6,500 ft. but in places exceeds 14,500 ft., submerging entire mountain ranges; some mountains protrude—the highest being Vinson Massif, 16,863 ft. The ice amounts to some 7.08 million cubic miles and represents 99 per cent of the world's fresh water.

Along one-third of the Antarctic coastline, land-ice flowing outwards forms extensive ice shelves, fragments of which break off to form tabular icebergs, leaving ice cliffs up to 150 ft. high. Much of the sea freezes in winter, forming fast ice which breaks up in summer and drifts north as pack ice. The presence of ice and continuous darkness in winter restrict access to the coastline by sea to the summer months.

The most conspicuous physical features of the continent are its high inland plateau (much of it over 10,000 ft.), the Transantarctic Mountains (which together with the large embayments of the Weddell Sea and Ross Sea mark the approximate boundary between Greater and Lesser Antarctica), and the mountainous Antarctic Peninsula and off-lying islands (which extend northwards towards South America). The continental shelf averages about 20 miles in width (half the global mean, and in places it is non-existent) and reaches exceptional depths (1,300–2,600 ft., which is 3–6 times the global mean).

*Climate.*—On land, summer temperatures range from just below freezing around the coast to –30° F. (about –34° C.) on the plateau, and in winter –5° F. (–20° C.) on the coast to –85° F. (–65° C.) inland. Over a large area the maxima do not exceed +5° F. (–15° C.).

Precipitation is scanty over the plateau but amounts to 10–30 in. (water equivalent) along the coast and some scientific stations are permanently buried by snow. Some rain falls over the more northerly areas in summer. Gravity winds on the plateau slopes and cyclonic storms further north can both exceed 100 m.p.h. and gusts have been known to reach 150 m.p.h. Visibility can be reduced to zero in blizzards.

*Flora and Fauna.*—Although a small number of flowering plants, ferns and clubmosses occur on the sub-Antarctic islands, only two (a grass and a pearlwort) extend south of 60° S. Antarctic vegetation is dominated by lichens and mosses, with a few liverworts, algae, and fungi. Most of these occur around the coast or on islands, but lichens and some mosses also occur inland.

The only land animals are tiny insects and mites with nematodes, rotifers, and tardigrades in the mosses, but large numbers of seals, penguins, and other sea-birds go ashore to breed in the summer. The emperor penguin is the only species which breeds ashore throughout the winter. In contrast, the Antarctic seas abound with life—a wide variety of invertebrates (including krill) and fish providing

food for the seals, penguins, and other birds and a residual population of whales.

*Exploration and Antarctic Treaty.*—In the 180 years from Captain James Cook's circumnavigation of the Antarctic in 1772–75 to the mid-1950's, about half of all expeditions to the Antarctic were British and a number of these made major contributions to geographical and scientific knowledge of the area. Notable were the expeditions of Sir James Clark Ross, Captain Robert Scott, and Sir Ernest Shackleton.

Apart from four years during World War II, British Antarctic research has been continuous since 1925, and most of it is now organized and carried out by the British Antarctic Survey (a component of the Natural Environment Research Council).

The world-wide International Geophysical Year, 1957–58, gave great impetus to Antarctic research. Prior to the mid-1950's, only 17 stations were operated in the Antarctic by four nations and vast areas of the continent were still unknown. By 1957, 44 stations had been established by 12 nations. The co-operative scientific effort proved so fruitful that the 12 nations involved pledged themselves to continue to promote scientific and technical co-operation unhampered by politics (territorial claims being left in abeyance) and agreed that the continent should be used for peaceful purposes only. These aims were embodied in the Antarctic Treaty (covering the area south of lat. 60° S., excluding the high seas but including the ice shelves), which came into force in 1961. It has since been signed by a further 12 acceding nations, two of which are active in the Antarctic and have therefore been accorded consultative status.

*Potential resources.*—Increasing pressure on the world's food and mineral supplies has stimulated the search for new sources even in the extremely hostile polar environment. Minerals have been found in great variety but not in commercially exploitable concentrations in accessible localities. (For example, coal seams occur in the Theron Mountains and Horlick Mountains.)

There are indications that off-shore hydrocarbons could be present but mostly below great depths of stormy, ice-infested seas. However, the Antarctic Treaty nations and their scientific advisors are already considering the environmental implications of possible mineral exploration and exploitation.

Currently, the chief interest is in marine protein, particularly the shrimp-like krill, already fished commercially by Japan and U.S.S.R. Basic research to ensure rational management of stocks of this key organism is continuing, but it is estimated that they could sustain a yield equal to the present total annual world fish catch.

*Scientific research.*—At present, six British stations are maintained in the Falkland Islands Dependencies and the British Antarctic Territory. Two are biological stations, two geophysical observatories, one is the centre for airborne earth sciences, and one is a general scientific station.

There are a further 31 stations operated by 11 other nations including a station maintained at the South Pole by the U.S.A.

The staff of these stations and summer field-workers are the only people present on the continent and off-lying islands. There are no indigenous inhabitants.

(British Antarctic Survey, see entry on p. 426).

# THE UNITED NATIONS

## CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York. October 24 has been designated "United Nations Day".

The following 157 states are members of the United Nations:—

Afghanistan, Albania, Algeria, Angola, Antigua and Barbuda, Argentina,\* Australia,\* Austria, Bahamas, Bahrain, Bangladesh, Barbados, Belgium, Belize,\* Benin, Bhutan, Bolivia,\* Botswana, Brazil,\* Bulgaria, Burma, Burundi, Byelorussian Soviet Socialist Republic,\* Cambodia, Cameroon, Canada,\* Cape Verde, Central African Empire, Chad, Chile,\* China,\* Colombia,\* Comoros, Congo (Pop. Repub.), Costa Rica,\* Cuba,\* Cyprus, Czechoslovakia,\* Denmark,\* Djibouti, Dominica, Dominican Republic,\* Ecuador,\* Egypt,\* El Salvador,\* Equatorial Guinea, Ethiopia,\* Fiji, Finland, France,\* Gabon, Gambia, Germany (East), Germany (West), Ghana, Greece,\* Grenada, Guatemala,\* Guinea, Guinea-Bissau, Guyana, Haiti,\* Honduras,\* Hungary, Iceland, India,\* Indonesia, Iran,\* Iraq,\* Republic of Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Kenya, Kuwait, Laos, Lebanon,\* Lesotho, Liberia,\* Libya, Luxembourg,\* Madagascar, Malawi, Malaysia, Maldives Islands, Mali, Malta, Mauritania, Mauritius, Mexico,\* Mongolia, Morocco, Mozambique, Nepal, Netherlands,\* New Zealand,\* Nicaragua,\* Niger, Nigeria, Norway,\* Oman, Pakistan, Panama,\* Papua New Guinea, Paraguay,\* Peru,\* Philippines,\* Poland,\* Portugal, Qatar, Rumania, Rwanda, St. Lucia, St. Vincent and the Grenadines, Sao Tome and Principe, Saudi Arabia,\* Senegal, Seychelles, Sierra Leone, Singapore, Solomon Islands, Somalia, South Africa,\* Spain, Sri Lanka, Sudan, Surinam, Swaziland, Sweden, Syria,\* Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey,\* Uganda, Ukrainian Soviet Socialist Republics,\* Union of Soviet Socialist Republics,\* United Arab Emirates, United Kingdom,\* United States of America,\* Upper Volta, Uruguay, Vanuatu,\* Venezuela,\* Viet Nam, Yemen (Arab Repub.), Yemen (P.D.R.), Yugoslavia,\* Zaire, Zambia, Zimbabwe.

\*Original member (*i.e.* from 1945). (From October 25, 1971, "China" was taken to mean the People's Republic of China.)

The principal organs of the United Nations are:— (1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

### 1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. A new President is elected by the General Assembly at the start of every annual session. Special Sessions may also be held.

The work of the General Assembly is divided among seven Main Committees, on each of which every Member has the right to be represented:—(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social,

Humanitarian and Cultural; (4) Decolonization (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such *ad hoc* committees as may be required from time to time for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission. In 1964 the General Assembly set up the United Nations Conference on Trade and Development (UNCTAD) as a permanent body.

The United Nations Industrial Development Organization (UNIDO) was set up on Jan. 1, 1967, to promote industrialization and co-ordinate United Nations activities in this field.

*President of the United Nations General Assembly,*  
Ismat T. Kittani (Iraq) (1981).

### 2. The Security Council

The Security Council consists of fifteen Members, each of which has one representative and one vote. There are five *permanent Members* (China, France, U.K., U.S.A., U.S.S.R) and ten non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of nine Members. On all other matters the affirmative vote of nine Members must include the concurring votes of the *permanent Members*, and it is this clause which makes the *Veto* possible. The only exception to this rule is that with regard to measures for peaceful settlement a party to a dispute may refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A *Committee on the Admission of New Members* was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

### 3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United

Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, (Social) Development, Status of Women, Narcotic Drugs, Population, Regional Economic Commissions for Europe, Asia and the Pacific, Western Asia, Latin America and Africa. The Council also supervises and co-ordinates the work of 17 specialized agencies.

*United Nations Children's Fund (UNICEF).*—UNICEF embraces all aspects of child welfare and assists the governments of the developing countries in developing maternal and child health services, the prevention and treatment of disease, nutrition and the preparation of children for adult life. It is financed by voluntary contributions from Governments and from the public and its work is carried out in co-operation with the relevant technical members of the United Nations.

#### 4. Trusteeship Council

The Trusteeship Council now consists of five members: the U.S.A. (administering authority of Micronesia, the only remaining trust Territory of the original 11), and the other four permanent members of the Security Council, China, France, U.K. and U.S.S.R.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

#### 5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

*President, Taslim Olawale Elias (Nigeria).*

#### THE SECRETARIAT

*Secretary-General, Javier Perez de Cuellar (Peru).*  
*Director-General, Development and International Economic Co-operation, Jean Ripert (France).*

*U.N. Information Centre, 14–15, Stratford Place, W.1.*

#### BUDGET OF THE UNITED NATIONS

The budget is now approved for periods of two years, and the appropriation for the biennium 1982–83 is U.S.\$1,506,241,800 (gross). The scale of assessments for 1982–83 includes: Australia, 1.83 per cent.; Canada, 3.28 per cent.; India, 0.60 per cent.; New Zealand, 0.27 per cent.; United Kingdom, 4.46 per cent.; The United States contribution is 25.00 per cent.; U.S.S.R. is 11.10 per cent.; France is 6.26 per cent.; China is 1.62 per cent and Japan is 9.58 per cent.

#### UNITED KINGDOM REPRESENTATIVES

845 Third Avenue, New York

*Permanent Representative to the United Nations and Representative on the Security Council, Sir John Thomson, K.C.M.G. (1982).*

*Minister and Deputy Permanent Representative, W. E. H. Whyte, C.M.G.*

*Counsellors, M. I. Goulding (Head of Chancery); D. H. Anderson (Legal Adviser); A. S. Donkin (Administration); J. D. I. Boyd (Economic and Social Affairs); T. H. Preston.*  
*1st Secretaries, R. G. Fursland; W. G. Ehrman; I. A. G. Mathewson; R. M. J. Lyne; C. T. W. Humphrey; N. A. Thorne; J. M. Brand.*

#### INTERNATIONAL ATOMIC ENERGY AGENCY

Vienna International Centre,  
P.O. Box 100, A-1400, Vienna

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it or under its supervision is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and some of the specialized agencies. In June, 1982, 110 states were members.

A General Conference of all members meets in regular annual session and in such special sessions as may be necessary. A Board of Governors (34 members) carries out the functions of the Agency and meets usually four times a year. The Regular Budget for 1982 amounted to \$86,369,000.

*Director-General, Hans Blix (Sweden).*

#### INTERNATIONAL AGENCIES

Seventeen other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

**International Labour Organization (ILO)**  
Geneva (London Branch Office, 96–98 Marsham Street, S.W.1.). Established with the League of Nations in 1919 under the Treaty of Versailles, the ILO became in 1946 the first specialized agency associated with the United Nations. In Feb., 1982 the Organization had 147 member States. The aim of the ILO is to promote lasting peace through social justice, and to this end it works for better economic and social conditions everywhere. It was awarded the Nobel Peace Prize in 1969.

The ILO establishes international labour standards, which set guidelines for improving working conditions and protecting basic human rights; runs a world-wide programme of technical assistance to developing countries (with funds from all sources amounting in 1980 to about \$99 million); conducts research and disseminates information on the human aspects of economic activity, with a view to improving social and economic well-being. Through its World Employment Programme, the ILO is attacking unemployment and its associated ills by aiding national and international efforts to provide productive work for the world's fast-growing population. It is also developing an international programme for the improvement of working conditions and the working environment.

The International Labour Conference, composed of national delegations of two government delegates, one worker delegate and one employer delegate, meets at least once a year. It formulates international labour standards and broad policies of the Organization, provides a forum for discussion of world labour and social problems, and approves the ILO's work programme and budget, which is financed by member States.

A 56-member Governing Body, composed of 28 government members, 14 worker members and 14

employer members, acts as the Organization's executive council. Ten governments hold seats on the Governing Body because of their industrial importance.

The International Labour Office, the secretariat of the Organization, collects and distributes information, assists governments on request in drafting legislation on the basis of international labour standards, directs technical co-operation activities, and issues publications.

*Director-General, Francis Blanchard (France).*

**Food and Agriculture Organization of the United Nations (FAO)**, Via delle Terme di Caracalla, Rome.—Established on October 16, 1945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy and ensuring man's freedom from hunger. Among its many activities the Organization promotes the global exchange of information in the fields of agriculture, forestry and fisheries, facilitates international agreement in these fields and provides technical assistance in such subjects as nutrition and food management, soil erosion control, re-afforestation, the establishment of paper industries, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. Jointly with the United Nations it administers the World Food Programme. The 1981 session of the governing Conference approved a budget of \$366,600,000 for the two years 1982–83. In addition FAO is carrying out field programmes involving annual expenditure of about \$320,000,000 under the U.N. Development Programme and other aid programmes. Through its co-operative programme with the World Bank it is helping to increase international investment in agriculture and allied fields.

The policy of the Organization is directed by a two-yearly Conference of the 152 member countries. A council (49 members) acts for the Conference between its sessions.

*Director-General, Edouard Saouma (Lebanon).*

**United Nations Educational, Scientific and Cultural Organization (UNESCO)**, 7 Place de Fontenoy, Paris 75700.—Under its constitution, the Organization makes its contribution to peace and security by promoting collaboration among its Member States in the fields of education, science, culture and communications. It aims at furthering a universal respect for justice, for the rule of law and for human rights, without distinction of race, sex, language or religion, in accordance with the Charter of the United Nations.

The Organization is composed of three organs: (i) the *General Conference*, consisting of representatives of Member States, which meets biennially to decide the programme and budget; (ii) the *Executive Board*, composed of 45 members elected by the General Conference to supervise the execution of the approved programme and (iii) the *Secretariat*, which is responsible for Unesco's day-to-day functioning and the execution of the programme. In most Member States National Commissions serve as a link with Unesco and help to carry out the programme. Member States in June 1982, 157 and one Associate Member (the British Eastern Caribbean group).

*Director-General, Amadou Mahtar M'Bow (Senegal).*

U.K. National Commission for UNESCO, Ministry of Overseas Development, Stag Place, S.W.1.

**World Health Organization (WHO)**, 1211 Geneva 27. Established on April 7, 1948, the aim of the World Health Organization is the attainment by all peoples of the highest possible level of health. It co-operates with its member governments in their efforts to develop health manpower, streamline health services, control communicable diseases, promote family health—including mother and child care, family planning, nutrition and health education—and strengthen environmental health. It promotes biomedical and health services research through some 500 collaborating research centres in different parts of the world. Its other services include the International Pharmacopoeia, drug evaluation and monitoring, biological standardization, epidemiological surveillance and scientific publications. Approved budget for 1982 and 1983, \$484,300,000. Membership (May 1982), 158.

Organs are a *World Health Assembly* meeting annually to frame policy, an *Executive Board* (30 members), meeting at least twice a year, and a *Secretariat*.

*Director-General, H. T. Mahler (Denmark).*

**International Bank for Reconstruction and Development (The World Bank)**, 1818 H Street, Washington, D.C.; European office, 66 Ave. d'Iéna, 75116, Paris, France.—Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of member countries by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources. The loans made by the Bank since its inception to June 30, 1981, totalled \$68,200,000,000. Subscribed capital, \$36,600,000,000.

The *Board of Governors* consists of one Governor and one alternate appointed by each of the 139 member countries.

Twenty *Executive Directors* exercise all powers of the Bank except those reserved to the Board of Governors. The *President*, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff.

*President, A. W. Clausen (U.S.A.).*

**International Development Association (IDA)**, 1818 H Street, Washington, D.C.; European office, 66 Ave. d'Iéna, 75116 Paris, France.—An affiliate of the World Bank established in September 1960. Its purposes are to promote economic development, increase productivity and thus raise standards of living in the less developed areas of the world included within the Association's membership, in particular by providing finance to meet their important developmental requirements on terms which are more flexible and bear less heavily on the balance of payments than those of conventional loans, thereby furthering the objectives of the World Bank and supplementing its activities. IDA's Board of Governors and Executive Directors are the same as those holding equivalent position in the World Bank, serving *ex officio* in IDA. By June 30, 1981, IDA had extended development credits totalling \$20,500,000,000 in 73 countries for improved transportation, agriculture, electric power facilities, industry, education and municipal water supplies. The credits were for terms of 50 years, free of interest.

**International Finance Corporation (IFC)**, 1818 H Street, Washington, D.C.; European representative, New Zealand House, Haymarket, S.W.1.—The IFC was established in 1956 as an affiliate of the World Bank to assist less developed member countries

by promoting the growth of the private sector of their economies. IFC's share capital of \$497,273,000 at June 30, 1982, had been subscribed by 122 countries. In addition, IFC is empowered to borrow up to approximately \$3,390,702,425 from the World Bank for use in its lending programme. At the end of June 1982, IFC had made approvals totalling more than \$4,674,800,000 in 76 countries.

*President, A. W. Clausen (U.S.A.).*

**International Monetary Fund**, 700 19th Street, N.W. Washington, D.C.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. 146 countries were in membership of the Fund in May, 1982.

The Fund's financial assistance takes the form of a foreign exchange transaction. The member pays to the Fund an amount of its own money equivalent to the amount of foreign currency it wishes to purchase. The member is expected to "repurchase" its own currency from the Fund, usually within three to five years, with a payment of S.D.R. or dollars or convertible currency acceptable to the Fund. These arrangements are subject to certain charges which rise in proportion to the amount of foreign exchange involved, and in some cases the length of time it is held.

Currencies drawn from the Fund may be used in a flexible way to relieve the member's payments difficulty.

Each member of the Fund is assigned a quota which determines its voting power and the amount of resources that it may draw from the Fund. The subscription of each member is equal to its quota, and is payable in the member's own currency and S.D.R.s. *Managing Director, Jacques de Larosière (France).*

**International Civil Aviation Organization (ICAO)**, International Aviation Square, 1,000 Sherbrooke Street, W., Montreal, Quebec, Canada.—In existence since April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations or operation, and simpler procedures at international airports. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 150 states are now members of ICAO.

An *Assembly* of delegates from member states meets at least once every three years. A *Council* of 33 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees.

*President of Council, Dr. Assad Kotaite (Lebanon). Secretary-General, Yves Lambert (France).*

**Universal Postal Union (UPU)**, Weltpoststrasse 4, 3000 Berne 15.—Established on October 9, 1874, by the postal Convention of Berne and in operation

from July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union includes almost all the countries of the world. Budget, 1982, \$U.S.11,233,670. A *Universal Postal Congress* meets at five-yearly intervals. The last was held in Rio de Janeiro in Sept-Oct. 1979, and the next is scheduled to take place in Hamburg in June-July 1984.

*Director-General, Mohamed I. Sobhi (Egypt).*

**International Telecommunication Union (ITU)**, Place des Nations, Geneva.—Founded at Paris in 1865 as the International Telegraph Union. ITU became a U.N. Specialised Agency in 1947 and as from Jan. 1, 1975, is governed by the Convention adopted by the Torremolinos Conference held in 1973, amended at Nairobi in 1982. ITU exists to set up international regulations for telegraph, telephone and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, collects and publishes information on telecommunication matters, including space radio communications. The Budget for 1982 is 78,045,000 *Swiss francs*.

*Secretary-General, M. Mili (Tunisia).*

**World Meteorological Organization (WMO)**, Geneva.—Came into existence in 1951. The present membership is 149 States and 5 Territories. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology and hydrology, and to promote the establishment and maintenance of centres providing meteorological and related services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, water problems, agriculture, and other human activities; to promote activities in operational hydrology and to further close co-operation between meteorological and hydrological services; to encourage research and training in meteorology and to coordinate their international aspects. Budget (1980-83), \$U.S.74,400,000. A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (29 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), eight technical commissions and a Secretariat.

*Secretary-General, A. C. Wiin-Nielsen (Denmark).*

**International Maritime Organization (IMO)**, Albert Embankment, S.E.1. A United Nations Specialized Agency established on March 17, 1958, to provide means for co-operation and exchange of information among governments on technical matters related to international shipping, especially with regard to safety at sea and preventing marine pollution caused by ships. IMO is responsible for

calling maritime conferences and drafting maritime agreements. It has produced numerous technical codes relating to the carriage of various types of cargo such as chemicals, ores, and dangerous goods and to the construction and equipment of ships, e.g., gas and chemical carriers. In June, 1982, 122 nations were in membership. Budget, 1982-83, \$25,700,600. (The Organization changed its name from the Inter-Governmental Maritime Consultative Organisation (IMCO) on May 22, 1982.)  
*Secretary-General, C. P. Srivastava (India).*

**International Trade.** *General Agreement on Tariffs and Trade* (GATT), Centre William Rappard, Rue de Lausanne 154, CH-1211, Geneva 21. A multilateral treaty, in operation since 1948, to which 87 countries are parties; a further 31 countries apply GATT *de facto*. Its rules thus govern over four-fifths of world trade. Objectives of GATT are to expand international trade and promote economic development. GATT provides a permanent forum for discussion and solution of particular international trade problems, and for multilateral negotiations to reduce tariffs and other obstacles to the expansion of international trade. Special attention is given to trade problems of developing countries. In November 1979, participating countries concluded the Tokyo Round of multilateral trade negotiations (launched in Tokyo in September 1973) with agreements covering tariff reductions, non-tariff measures, an improved framework for the conduct of international trade, bovine meat, dairy products, tropical products, civil aircraft, and a revised GATT anti-dumping code. An International Trade Centre, set up by GATT in 1964 to aid developing countries in export

promotion, is now operated jointly by GATT and UNCTAD.  
*Director-General, A. Dunkel (Switzerland).*

**United Nations University, Toho Seimei Building, 15-1 Shibuya 2-Chome, Shibuya-ku, Tokyo 150, Japan; European Office, 14/15 Stratford Place, W.1.** The United Nations University is an autonomous U.N. organization chartered by the General Assembly in 1973 to help solve "pressing global problems of human survival, development and welfare" through internationally coordinated research, advanced training and the dissemination of knowledge. It is funded by income from an Endowment Fund designed to ensure the objectivity of its research and made up primarily of contributions from member states. Its headquarters are in Tokyo. The UNU's academic work covers five main areas; Peace, security, conflict resolution and global transformation; The global economy; Hunger, poverty, resources and the environment; Human and social development and the coexistence of peoples, cultures and social systems; Science and technology and their social implications. Research is conducted through 19 world-wide networks of institutions and scholars; advanced training is provided to UNU Fellows at the University's 27 associated institutions; knowledge generated by research is disseminated through workshops, seminars, publications and other means. The UNU's principles and policies are set by an international Council whose 24 members are appointed jointly by the Secretary General of the United Nations and the Director General of UNESCO, and serve as individuals and not as government representatives.  
*Rector, Soedjatmoko.*

## EUROPEAN COMMUNITY

The ten member states: Belgium, Denmark, France, Federal Republic of Germany, Greece, Ireland, Italy, Luxemburg, The Netherlands, the United Kingdom.

The beginnings of the European Community date from May 9, 1950, when Robert Schuman, France's Foreign Minister, proposed that France and Germany should pool their coal and steel industries under an independent ("supranational") High Authority, in a Community open to the membership of any other European country wishing to join. Not only West Germany, but also Italy, Belgium, the Netherlands, and Luxemburg accepted this invitation.

The Coal and Steel Community (E.C.S.C.), European Economic Community and Euratom share a single institutional framework: a Commission, Council of Ministers, Parliament and Court of Justice. The core of the Community policymaking process is the "dialogue" between the Commission, which initiates and implements policy, and the Council of Ministers, which takes major policy decisions. The beginnings of democratic control are exercised by the European Parliament, while the Court of Justice ensures the rule of law and is the final arbiter in all matters arising from the Community Treaties.

Since the start of the European Economic Community and Euratom in 1958, the Parliament and Court of Justice have been common to all three Communities. Up to July, 1967, each Community had its own executive body (the E.E.C. and Euratom Commissions, and the E.C.S.C. High Authority) and its own Council of Ministers.

In April, 1965, the Six signed a treaty providing for the merger of the three executive bodies in a single Commission and the three Councils in a single Council, with a view to the eventual merger of the three Communities themselves. The merger treaty came into force on July 1, 1967; the single Commission and single Council then took office. They enjoy the same powers under the three Community Treaties as did their predecessors.

On December 1 and 2, 1969, the Heads of State or Government of the Six met at the Hague and decided on the completion, strengthening, and, provided that other European countries wished to accept the Treaties of Rome, enlargement of the Community. They instructed the Commission to draw up a plan for economic and monetary union, and the Foreign Ministers to report by the end of July on possible moves towards political unification. They also resolved to intensify the co-ordination of research and development programmes.

In accordance with the Hague decisions the Council of Ministers agreed in April, 1970, that as from 1975 the Community would have its own revenue, independent of national contributions. The Foreign Ministers agreed (May, 1970) to hold formal political consultations twice a year.

In June, 1970, the Six invited Britain, the Irish Republic, Denmark and Norway to open negotiations on June 30 at Luxemburg on their applications to join the Community. Negotiations continued in 1971 and were concluded with the United Kingdom

Government for all major questions by the end of June; on July 8, H.M. Government issued a White Paper on the results. On Jan. 22, 1972, the four applicant countries signed the Treaty of Accession in Brussels. Norway conducted a referendum on its Common Market entry and as a result withdrew its application. The enlarged Community of the Nine came into existence on Jan. 1, 1973.

With the advent of a Labour Government in the U.K. in 1974, there followed a period of renegotiation of the terms of Britain's entry into the Community, culminating in a referendum on June 5, 1975, as to whether or not the country should remain a member of the E.E.C. The result of the referendum showed two to one in favour of staying in. British Labour Party representatives who had hitherto boycotted the European Parliament then took up their 18 allotted seats.

In January 1976 the European Parliament approved a Report urging direct elections to the Parliament in 1978. On July 12-13, 1976, the Heads of Government or State, meeting in European Council, decided to approve a 410 member Parliament with Britain, France, West Germany and Italy allocated 81 seats each; the Netherlands 25, Belgium 24, Denmark 16, Ireland 15 and Luxemburg 6. Because some countries (including Britain) had not passed the relevant legislation in time, the date of European Elections was postponed until June 1979. When Greece joined the E.E.C. in January 1981, she was allocated 24 seats in the Parliament, bringing the total number to 434.

The "European Council", an addition to the institutionalized meetings provided under the Treaties, evolved from the "summit" conference of December 1974, when the Heads of Government decided to meet at least three times a year in order to discuss Community problems and matters requiring political co-operation.

OFFICE OF THE UNITED KINGDOM PERMANENT REPRESENTATIVE TO THE EUROPEAN COMMUNITIES  
Rond-point Robert Schuman 6, 1040 Brussels  
*Ambassador and U.K. Permanent Representative, Sir Michael Butler, K.C.M.G.*

## The Commission

On July 1, 1970, the Commission was reduced from 14 members to nine, two each from Germany, France and Italy, and one each from Belgium, the Netherlands and Luxemburg. Following the 1973 enlargement, the number rose to 13, with two seats each from Britain, France, Germany, and Italy and one each for the other members. The admission of Greece in 1981, with 1 seat, brought the total to 14 Commissioners.

The members of the Commission are appointed by agreement among the ten member governments for a four-year renewable term; the president and vice-

presidents are appointed from among the members for a two-year term, also renewable.

The members of the Commission are pledged to independence of the governments and of national or other particular interests. They accept joint responsibility for their decisions, which are taken by majority vote.

In addition to being the initiator of Community action and having specific powers, the Commission acts as a mediator between the member governments in Community affairs and is the guardian of the Community Treaties.

#### Commission of the European Communities

200 Rue de la Loi, 1049 Brussels

*President*, Gaston Thorn (Luxemburg).

*Vice-Presidents*, François-Xavier Ortoli (French), Christopher Tugendhat (British), Wilhelm Haferkamp (German); Etienne Davignon (Belgian), Lorenzo Natali (Italian). *Members*, Poul Dalsager (Danish), Edgard Pisani (French), Frans Andriessen (Dutch), Antonio Giolitti (Italian), Karl-Heinz Narjes (German), Giorgos Contogeorgis (Greek), Ivor Richard (British), Richard Burke (Irish).

The Commission maintains information offices in London (20 Kensington Palace, Gardens, W.8), Edinburgh (7 Alva Street), Cardiff (4 Cathedral Road), Belfast (Windsor House, 9/15 Bedford Street), Dublin (39 Molesworth Street), Washington (2100 M. Street, N.W. (Suite 707), Washington, D.C. 20037, New York (1 Dag Hammarskjöld Plaza, 245 East 47th Street, New York, N.Y. 10017), Ottawa (Inn of the Provinces, Office Tower (Suite 1110), 350 Sparks Street, Ontario, K1R 7S8), and other cities.

The new 14-member Commission was appointed by the Governments of the Ten and was sworn in on Jan. 12, 1981.

#### The Council of Ministers

170 Rue de la Loi, 1048 Brussels

This consists of ministers from the governments of each of the ten member states, the ministers concerned depending on the subject under discussion. A single Council exists for the three European Communities. It is the main decision-taking body within the Community legislative process. The Council acts, in almost all cases, on the basis of proposals submitted by the Commission, which is present at Council sessions to participate in the shaping of the measures taken. Before examining Commission proposals the Council normally obtains the opinions of the European Parliament and the Economic and Social Committee on them.

As prescribed by the E.E.C. treaty, under which the great majority of the Council's business falls, decisions are taken by majority vote, qualified majority vote (a system in which the members' votes are weighted) or by unanimity. The Council acts under the E.E.C. treaty by issuing (a) "regulations" which are binding in their entirety and directly applicable in all member states; (b) "directives" which are binding as to the result to be achieved but leave open to national governments the method of

attaining this result; (c) "decisions" which bind those addressed; (d) "recommendations" and (e) "opinions", which have no binding force. The Euratom treaty has the same system of voting and taking action; the E.C.S.C. system differs in certain respects.

The Presidency of the Council is held in rotation for periods of six months. The sessions of the Council are prepared by a Committee of Permanent Representatives of the member states. The Council and its committees are serviced by a general secretariat.

#### European Parliament

*Secretariat*: Centre Européen, Kirchberg, Luxembourg.

The first direct elections to the European Parliament were held in mid-1979. Of 434 seats, the United Kingdom, France, Germany and Italy have 81 each, the Netherlands 25, Belgium 24, Greece 24, Denmark 16, Ireland 15 and Luxemburg 6. The Parliament meets in Strasbourg and its Committees in Brussels. The former Parliament consisted of 198 members nominated by their national Parliaments—the United Kingdom, France, Germany and Italy had 36 seats each, Belgium and the Netherlands 14 each, Denmark and Ireland 10 each and Luxemburg 6. Set up in 1952 under the European Coal and Steel Community Treaty of 1951, the Parliament's authority was extended by the 1957 Convention on Common Institutions to cover the European Economic Community and Euratom. It must be consulted on all major issues and has the right to dismiss the Commission by a vote of censure. Apart from general powers of supervision and consultation, it questions the Commission and the Council of Ministers and has a measure of control over the Community's annual budget including its final adoption. It can reject the budget as a whole and can amend items of non-obligatory expenditure (i.e. expenditure not specified in the original treaties or derived legislation—amounting to some 27 per cent. of the total budget). The Members of the Parliament serve on specialized committees and sit in political groups—Socialists, Christian Democrats, Liberals and Democrats, European Democrats, European Progressive Democrats and Communists. There are also a number of Independents in the Parliament.

*President*, Piet Dankert.

#### European Court of Justice

Boite postale 1406, 1014 Luxembourg

The European Court superseded the Court of Justice of E.C.S.C. and is common to the three European Communities. It exists to safeguard the law in the interpretation and application of the Community treaties, to decide on the legality of decisions of the Council of Ministers or the Commission and to determine violations of the Treaties. Cases may be brought to it by the member States, the Community institutions, firms or individuals. Its decisions are directly binding in the member countries. The eleven judges and five advocates-general of the Court are appointed for renewable six-year terms by the member Governments in concert.

During 1981 the court gave 128 judgements. Since 1973 the Court has given judgement in 19 direct actions and 25 preliminary rulings concerning U.K. and its citizens.

*Judges, J. Mertens de Wilmars (President); G. Bosco (President of 1st Chamber); O. Due (President of 2nd Chamber); A. Touffait (President of 3rd Chamber); T. Koopmans; P. Pescatore; Lord Mackenzie Stuart; A. O'Keefe; U. Everling; A. Chloros; F. Grevisse.*

*Advocates-General, F. Caportorti (1st Advocate-General); G. Reischl; Sir Gordon Slynn; Mme. S. Rozes; P. VerLoren van Themaat. Registrar, P. E. Heim.*

### The European Investment Bank 100 Boulevard Konrad Adenauer, 2950 Luxembourg

The European Investment Bank (E.I.B.) was set up in 1958 under the terms of the Treaty of Rome with the essential function of contributing to the balanced development of the Common Market.

It grants long-term loans to enterprises, public authorities and financial institutions, to finance projects which assist the development of less advanced regions and the conversion or modernisation of older, exhausted industries. Another important role of the E.I.B. is that of helping to finance projects which serve the interests of the Community as a whole or more than one member country such as intra-Community communications and development and diversifications of the E.E.C.'s energy sources.

E.I.B. activities have also been extended outside member countries under the terms of different association or cooperation agreements which more than 70 countries have signed with the Community.

The Bank's total financing operations in 1981 amounted to 3,848.1 million e.c.u.,\* of which 3,361.3 million (including 539.8 million from the resources of the New Community Instrument for Borrowing and Lending—'Ortoli Facility') were for investments in the E.E.C. and 486.8 million for outside the Community. Between 1973 and 1981 the E.I.B. had made available a total of 3,674.0 million e.c.u. for investment in the U.K., close to a quarter of its total operations in the Community during this period (15,788.2 million e.c.u.).

The members of the European Investment Bank are the ten member countries of the Community, who have all subscribed to the Bank's capital, which the Bank's Board of Governors doubled to 14,400 million e.c.u., with effect from December 31, 1981. The funds required by the Bank to carry out its tasks are borrowed on the capital markets of the Community and non-member countries, and on the international markets.

As it operates on a non-profit-making basis, the interest rates charged by the E.I.B. are therefore

close to the average rates charged on the markets where it obtains its funds.

The Board of Governors of the European Investment Bank consists of Ministers nominated by the member countries, usually the Finance Minister, who lay down general directives on the policy of the Bank and appoint members to the Board of Directors (18 nominated by the member States, 1 by the Commission of the European Communities), which takes decisions on the granting and raising of loans and the fixing of interest rates. A Management Committee, also appointed by the Board of Governors, is responsible for the day-to-day operations of the Bank.

*President, Yves Le Portz.*

*Vice-Presidents, Horst-Otto Steffe; C. Richard Ross; Arie Pais; Lucio Izzo; Noel Whelan.*

*(The President and Vice-Presidents also preside as Chairman and Vice-Chairmen at meetings of the Board of Directors.)*

*General Administration Directorate, Hans Hitzlberger (acting manager).*

*U.K. Office: 23 Queen Anne's Gate, S.W.1.*

### EUROPEAN COAL AND STEEL COMMUNITY

This, the first of the European Communities, was established in 1952. Since then, for coal, iron ore and scrap, it has abolished customs duties, quantitative restrictions, the dual pricing system whereby prices charged on exported coal or steel differed from those charged to home consumers, currency restrictions and discrimination in transport rates based on the nationality of customers and the special frontier charges which made international transport of these goods within the Community dearer than transport within national frontiers. It has applied rules for fair competition and a harmonized external tariff for the whole Community.

### THE TREATY OF ROME

Discussions were held at Messina, Sicily, in 1955 between the foreign ministers of the six member states of E.C.S.C. (Belgium, France, Germany, Italy, Luxembourg and The Netherlands) on proposals for further advances towards economic integration in Europe, and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. The Treaty provides for the elimination of customs duties and quotas in trade between member states; the establishment of a common customs tariff and a common trade policy towards third countries; the abolition of the obstacles to free movement of persons, services and capital between member states; the inauguration of common policies for agriculture and transport; the establishment of a system ensuring that competition shall not be distorted in the Common Market; the co-ordination of economic policies; the harmonization of social

\* The financial statements of the European Investment Bank are drawn up in e.c.u. which at June 1, 1982 equalled +£0.57, U.S.\$1.01.

and economic legislation to the extent necessary in order to enable the Common Market to work; the creation of a European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living; the establishment of an Economic and Social Committee which must be consulted on major proposals, consisting of representatives of employers, workers, consumers and other groups; the establishment of a European Investment Bank intended to aid investment in underdeveloped areas and help to finance modernization; and the association of overseas countries and territories with the Community with a view to increasing trade and to pursuing jointly their effort towards economic and social development.

## EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM)

A second treaty, arising from the Messina discussions between the E.C.S.C. powers on additional means of co-operation, was signed in Rome on March 25, 1957, setting up the European Atomic Energy Community. The task of *Euratom*, defined in detail in the Treaty, is to create within a short period the technical and industrial conditions necessary to utilize nuclear discoveries and especially to produce nuclear energy on a large scale. The United Kingdom, Denmark and Ireland joined *Euratom* on Jan. 1, 1973, and Greece on Jan. 1, 1981.

## EUROPEAN PARLIAMENT SUMMARY 1981-82

### ENLARGEMENT OF THE COMMUNITY

The question of possible enlargement of the Community played an important part in its development from the autumn of 1961 when Britain, the Irish Republic, Denmark and Norway first sought membership, and Austria, Sweden, Switzerland, Spain and Cyprus sought association with the Community. The negotiations were vetoed by France in January, 1963. In May, 1967, Britain, the Irish Republic and Denmark formally submitted applications for Community membership. In July Norway followed suit and Sweden announced that it would seek to participate in the enlargement of the Community on terms compatible with its neutrality. These applications made very slow progress and appeared to come to a standstill when in December, 1967, France declared that Britain's economy would have to be strengthened before negotiations could begin. But shortly after taking office as President of France, Georges Pompidou stated in July, 1969, that there was no objection in principle to the admission of Britain to the Community. At the Hague "summit" meeting in December, 1969, the Six decided that provided that the completion of the Community was not prejudiced, and provided that the Community was strengthened to provide for enlargement, then the entry of other European countries would be desirable. After deciding on a common negotiating position, the Six invited Britain and the other applicants to begin negotiations for membership.

A single overall transitional period of five years, during which the Three were to adopt Community rules and regulations, started on January 1, 1973, giving time for the gradual integration of the economies of the Three with the Six by the end of 1977.

The first 40 per cent alignment on the Community's Common External Tariff (C.E.T.)—i.e. 40 per cent of the difference between the new members' tariffs and the C.E.T.—was made at the beginning of 1974, and three further alignments of 20 per cent each followed.

Negotiations with Greece were concluded and the Treaty of Accession signed on May 28, 1979. Greece became the tenth member of the Community on January 1, 1981. Portugal and Spain have formally applied to join the Community.

### Foreign Visits

No sooner had 17 Euro-M.P.s begun a 10-day visit to China than Mr. Karel van Miert, a Belgian Socialist, tabled a motion on Sept. 3, 1981, calling for cuts in the Parliament's £2 million annual budget for foreign visits, and imploring his fellow Members "to set an example" of restraint at a period of economic recession. The motion appeared as the Euro-M.P.s, 10 of whom were accompanied by their wives, landed in Peking with a 42-strong Parliamentary delegation including 12 officials and three journalists. Simultaneously 22 members of the Assembly's European Progressive Democrat group were attending their annual conference at a hotel in the French Caribbean island of Guadeloupe. In both cases it was stated by Parliamentary source that most of the cost would be met from E.E.C. funds. Mr. van Miert's motion called for wholesale reductions in spending on foreign trips and a review of the existing system of paying members' personal expenses which automatically gives them first-class travel costs and a daily £34 allowance when travelling outside the E.E.C.

### Tax and Expenses

The European Court of Justice in a test case in Luxembourg ruled that the Inland Revenue's attempt to tax the expense allowances paid to U.K. members of the Assembly was illegal under community law and declared that lump-sum payments from the Parliament reimbursing travel and subsistence expenses could not be taxed unless shown to be part of remuneration. The case involved Lord Bruce of Donington, a Labour peer, who was a member of the European Parliament from 1975 to 1979 before Euro-M.P.s were directly elected. He contested moves by the Inland Revenue to tax him on what he had been able to save from the lump sum expense allowance paid for carrying out his duties. The special commissioners of income tax asked the court to decide if community law should be interpreted as precluding a member state from taxing any part of an expenses allowance paid from community funds to members of the European Parliament. The Inland Revenue claimed the allowances were emoluments from an office and liable to tax subject to any deductions for actual expenses incurred. The court stated that it was the Parliament's view that national tax provi-

sions did not apply to community payments which were necessary for the functioning of community institutions. The court did not take the view that any payments made by the Parliament to its members from community funds was necessarily exempt from national taxes, but it was for the Parliament to decide what activities and travel were necessary for Members to perform their duties and how the refund of travel and subsistence expenses should be paid. National tax authorities were bound to respect the decision of the Parliament to refund expenses on a lump sum basis and the review carried out by the Inland Revenue amounted to an interference with the internal functioning of the Parliament and was incompatible with its autonomy.

#### Excess Expenses Payments

Mr. Piet Dankert, the Assembly's President, revealed on June 22 that some Euro-M.P.s would be asked to refund excess expenses payments which had been disclosed by a report from the Parliament's court of auditors after an investigation into its finances. Mr. Dankert said part of the cash would be claimed from Irish members who received some expense payments in sterling instead of Irish pounds "because of an administrative error". Another member, he added, was being asked to refund expenses advanced for overseas trips but not subsequently justified to the Assembly's accounts department. The President, who refused to name the Members or disclose the sums involved, said a preliminary investigation had shown no reason to suspect fraud. The system of unlimited cash advances to Members undertaking overseas visits had now been ended, he stated. Mr. Dankert later told a Press conference in Luxembourg that the payments to Irish members in sterling instead of the less valuable Irish pound occurred during 1980 and 1981 when the Parliament had no bank account in Ireland, but there was no suggestion that Irish Members had played a hand in this "administrative error" although none had pointed out the mistake.

On July 7, President Dankert told Parliament that legal action might be taken against some officials of the Assembly following the investigation into its financial transactions and in a letter to all Euro-M.P.s said that a firm of accountants had been asked to scrutinise "the regularity and sound accounting practices of a number of financial transactions". The letter followed a report by the court of auditors which disclosed a number of "serious shortcomings" in the operation of the Members' Cash Office. Mr. Dankert stressed that nothing in the information available to him pointed to any irregularities having been committed by Members. On July 8, the President stated that all but about £50,000 of the £20 million paid as expenses to Euro-M.P.s in the past three years had been accounted for and that the Irish Members had all paid back the over-payments credited to them.

#### Unemployment

On Sept. 17, 1981, Mr. Norman Tebbit, the new U.K. Employment Secretary, speaking in his capacity

as president of the Council of E.E.C. Social Affairs Ministers, told the Assembly that the U.K. Government in its remaining three months in the E.E.C. presidency would work closely with the Parliament and the Commission to tackle the twin evils of unemployment and inflation. He described nine million jobless in the E.E.C. as an appalling figure and a tragic waste of human and economic potential. The Government would push forward attempts to reform the E.E.C. social fund which assisted job creation and retraining schemes in the Community. The fund, worth £400 million this year, should, he said, be adapted to tackle the growing unemployment among young people and in less-favoured regions of the Community.

#### The British Rebate

On Oct. 20, 1981, a 16 to 14 vote by the Assembly's budget committee temporarily blocked the payment to Britain of a £430 million rebate, half of the repayment of £860 million from the E.E.C. won last year. The vote meant the transfer of part of the refund from one part of the Budget to another in order to increase parliamentary control over the money. The move was engineered by Mr. Richard Balfe, Labour Euro-M.P. for London, South Inner, who forced the vote and cast his own against the refund because, he said, money already refunded was going back to the British Treasury to offset the public sector borrowing requirement instead of going straight to depressed areas of Britain. Conservative Euro-M.P.s accused him of hypocrisy. Later, Mr. Balfe explained that he forced the vote against repayment because the money due to the British Government was intended to be spent on additional regional policies approved by the E.E.C. Commission. As the ultimate word on the E.E.C. Budget rests with the European Parliament the decision effectively froze £430 million. But in plenary session on Nov. 5, the Assembly overturned the vote of the budget committee which recommended the payment be halted until the U.K. Government proved the money was being used for extra spending on social and regional projects and not merely being taken off the public debt. The rejection of the committee's recommendation meant there were no legal obstacles to prevent the rebate being paid to Britain.

#### The General Budget

On the issue of the general budget, Parliament voted big increases in the sums to be spent by the Common Market on regional and social development with a severe reduction in the proposed budget for agriculture. Members voted to add £105 million to the regional fund to help depressed areas and £143 million to the social fund for aiding the unemployed. They also supported extra money for energy and research and introduced new programmes for protection of the environment and the extension of "clean" technologies. The Parliament increased the proposed E.E.C. budget of some £12,500 million by about £400 million above the amount authorised by ministers earlier in the year although ministers were to have another opportunity to examine the propos-

als. On Nov. 24, E.E.C. budget ministers were moving towards a compromise with the Parliament on the 1982 budget which would enable limited increases in regional and social spending to be made. Mr. Ridley, U.K. Financial Secretary to the Treasury, chaired the meeting and advanced the compromise proposals, the total spending on which would rise by some £216 million with £85 million more for regional development and £88 million for social programmes. There was to be only £7 million however for Northern Ireland housing schemes, less than half the amount proposed by the Parliament. Then on Dec. 6, E.E.C. Foreign Ministers agreed to make a final effort to agree on new budget policies, but on Dec. 21, Mme Simone Veil, President of the Parliament, ignored an appeal from member Governments and exercised her E.E.C. Treaty rights to declare the budget adopted. After an emergency meeting, finance ministers refused to accept the additions voted by Euro-M.P.s but promised Mme Veil negotiations early in the New Year if she left the Parliament's final budget draft unsigned, but the President was defiant. The amount of cash in dispute was about £54 million, or less than one-half per cent of total E.E.C. spending.

#### New President

Mme Veil's term as President expired at the year-end and Mr. Piet Dankert, a Dutch Socialist, was elected in Strasbourg on Jan. 19, 1982, for the next two years to succeed her. On Jan. 20, Mr. Dankert's first presidential speech blamed the E.E.C. Council of Ministers for losing sight of the overall interest all had in the success of European policies; no member state alone could resolve them.

Conservative Euro-M.P.s on Feb. 11 elected Sir Henry Plumb as their leader in place of Sir James Scott-Hopkins, who had held the post since 1979.

On Feb. 16, M. Gaston Thorn, Commission President, presented the Commission's 1982 work programme to the Parliament and in a forceful delivery declared that the Community was in danger and that within its frontiers cohesion was compromised by the economic crisis which was rousing the old demons of protectionism, the illusion that salvation lay in going it alone.

Sir Henry Plumb told Members in Strasbourg on Feb. 17 that the blame for the present disarray and gloom in the Common Market was laid at the door of the Brussels Commission. He sharply criticised the E.E.C.'s record in persuading national governments to put into effect E.E.C. policies and declared that the Commission was failing to justify faith in Community solutions. Mr. Robert Jackson, Con. Euro-M.P. for Upper Thames, criticised the manner in which the Commission had cut out the European Parliament in its informal effort to solve Britain's E.E.C. budget problems and contended that a crisis of confidence between Parliament and the Commission was brewing. The Commission, he urged, had to show real progress in overcoming the deep structural crisis which now stared the Community in the face.

It was disclosed in the Parliament the same day that moves by the French Government to protect a number of domestic industries damaged by imports were likely to be challenged by the E.E.C. Commis-

sion. Members were told that while the Commission was still considering its official view, it did seem that some of these measures were a complete violation of the principles of free trade within the Community.

#### The System of Voting

Nearly all British Euro-M.P.s strongly opposed the move in Strasbourg on Mar. 10, but the Parliament voted to introduce a uniform system of voting based on proportional representation for the next Euro-elections in two years' time. However, the vote of 138 to 77 supporting a regional list system and favouring proportional representation was not mandatory and ministers from the E.E.C. Governments would decide on the form of balloting in 1984. U.K. Tories pressed for a compromise Additional Member System under which individual member countries could allocate up to 75 per cent of the vote to "list" or to "first-past-the-post" candidates, but the Parliament rejected the system. Sir Henry Plumb said the motion adopted had nothing to commend it; the Tory group had accepted the principle of uniform voting and the need to introduce proportionality but the system chosen was not uniform, not balanced, and not fair.

The Parliament voted overwhelmingly on Mar. 11 for a Common Market ban on imports of seal pelts and products although the vote was not binding on the Member Governments. The resolution was passed by 160 votes to 10 and was sponsored by Mr. Stanley Johnson, a Con. Euro-M.P.

#### Vote for Record Price Increase for Farmers

Members of the Parliament meeting in Strasbourg on Mar. 26 voted by a 28 majority in favour of giving the eight million Common Market farmers a record 14 per cent price increase, as recommended on Mar. 17 by the Agriculture Committee and instead of the nine per cent proposed by the E.E.C. Commission. But there was considerable opposition by Conservative and Labour Euro-M.P.s and the Brussels Executive Commission, who argued it would result in excessive price increases for consumers and add an extra £750 million to the Community budget in a full year. Sir Henry Plumb was the only British Euro-M.P. to vote in favour of the increase although he joined his Tory group colleagues in voting against the overall report of the Agriculture Committee. In the voting, Parliament also rejected moves to curb surplus farm output which the Assembly itself had initiated when it supported a special report by Sir Henry Plumb in June, 1981. Mr. David Curry, Con. Euro-M.P. for North East Sussex, said the voting was a total catastrophe and an awful day for Europe, but Mr. Poul Dalsager, Commissioner for Agriculture, said subsequently he would not be tabling any new compromise farm price package as a result of the decision which he termed disappointing. On the previous day, Mar. 25, Mr. Brian Ford, Con. Euro-M.P. for London West, said the recommendation of the Agriculture Committee for the 14 per cent increase was unrealistic, irresponsible, inflationary, and one-sided. Mrs. Barbara Castle, Labour Euro-M.P. for Greater Manchester North, condemned the recommendation as a monstrosity.

### The Falklands Conflict

Euro-M.P.s voted massively in Strasbourg on April 22 for the withdrawal of Argentine troops from the Falklands and for continued economic sanctions by the Common Market against Argentina, the vote being 202 in favour with 28 against and 10 abstentions. An alternative resolution proposed by the Socialist group under the acting leadership of Mrs. Barbara Castle was defeated by 144 to 81; this stated a peaceful solution would be reached through "the withdrawal of all its forces by the Argentine Government and the halting of British naval operations". In the debate, Mr. Adam Fergusson, Con. Euro-M.P., Strathclyde West, described Mrs. Castle's stand as "a sad and petty exercise in how to undermine the Community solidarity she resents, how to denigrate and dishearten your own forces and how to give comfort to the enemies of peace and human rights". Mrs. Castle denied that her Socialist group put Argentina and Britain parallel and in stressing the need for a peaceful solution said a war over this issue would not be just a tragedy but an absurdity. Mr. Otto Habsburg, a German Christian Democrat, said that what had happened to Britain could detrimentally afflict any one of them tomorrow; they should not put the aggressor and the victim on an equal footing. Mr. Poul Moller, a Danish Conservative, said no country had done as much for human rights as Britain.

On May 12, M. Gaston Thorn, the Commission President, told the Parliament that the Commission would call on the E.E.C. Council of Ministers to extend the economic sanctions against Argentina after their expiry on May 17 for a further month unless Security Council Resolution 502 had been implemented. Soon after the Assembly voted convincingly for a resolution proposed by the Liberals inviting the Foreign Ministers to renew the embargoes if no solution was reached by May 16. The resolution also deplored the loss of life in the South Atlantic and recognised that this was because of the failure of Argentina to comply with Resolution 502. Only four of the 17 British Socialists voted for the resolution; most of the other U.K. Socialists, including Mrs. Castle, voted against, but it was carried by 131 votes to 79.

The Parliament on May 13 recorded majority votes in favour of four resolutions to ban the use of plastic bullets throughout the E.E.C. but the motions were not binding on any of the member Governments.

### The "Luxembourg Compromise"

Dissension among the Conservative group in the Assembly emerged on May 13 when a vote by the

Parliament called for an end to the right of a single Common Market country to veto decisions taken by the majority. This result had a direct relation to the ongoing dispute over the U.K.'s demands for reductions in its E.E.C. contributions, which the British Government stressed were linked to the question of E.E.C. farm prices in 1982 in regard to which the U.K. was threatening to use its right of veto to block them until the budget issue was settled. The present vote meant the abandonment of the so-called "Luxembourg compromise" under which a member country could block any decision it felt was against its national interests. The vital amendment was proposed by Mr. William Newton Dunn, Con. Euro-M.P. for Lincolnshire, whose move to end the power of veto was approved by 98 to 31 with Conservative members evenly split. The resolution passed also called on the E.E.C. Commission to take all E.E.C. Governments to court for their failure to agree increased farm prices by the April 1 legal deadline, but the votes were only recommendatory without any effective power. Sir Henry Plumb demanded that farm price decisions be taken by a majority vote but said that while his Tory group did not agree with the dropping of the right of veto, it favoured a majority decision to increase farm prices.

On July 6, the Parliament decided that Euro-M.P.s would lose more than £400 a month in future if they failed to attend at least half the sittings of the Assembly. To receive their full monthly allowance of £570 for office equipment and stationery and £252 for travel within their constituencies, Euro-M.P.s would have to attend on at least 32 of the 63 days that Parliament meets each year, otherwise the payments were to be halved. The only two reasons to be accepted for absence would be illness or duties carried out elsewhere on behalf of the Assembly.

By 81 votes to 51 the Parliament approved a resolution moved by Mr. Alan Tyrrell, Con. Euro-M.P., London East, calling for the establishment of "common principles for extradition between member states."

A vote on July 29 by E.E.C. Finance Ministers against a proposal by Euro-M.P.s to increase the E.E.C. Social Fund by some £200 million provoked sharp reaction from members of the Parliament. Mr. Robert Jackson, Con. Euro-M.P., Upper Thames, described the decision as "meanness and hypocrisy" and Mr. Piet Dankert, President of the Parliament, said it was short-sighted.

## EUROPEAN FREE TRADE ASSOCIATION (E.F.T.A.)

Member States: Austria, Iceland, Norway, Portugal, Sweden, Switzerland. Associate Member: Finland.

Following the unsuccessful attempt to create a European Free Trade Area linking the E.E.C. with other members of the O.E.E.C., seven European States came together in 1959 to form the European Free Trade Association. The seven were Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom. The E.F.T.A. Convention became effective on May 3, 1960, and just over a year later, on June 26, 1961, Finland became an associate member. Iceland applied for full membership in November, 1968, and acceded to the Association and to the Finland-E.F.T.A. Agreement on March 1, 1970.

In 1973 all the E.F.T.A. Member States entered into a new relationship with the E.E.C. Two—Denmark and the United Kingdom—withdraw from E.F.T.A. at the end of December 1972 to become members of the E.E.C. on January 1, 1973. Agreements establishing industrial free trade between five of the other E.F.T.A. Member States (Austria, Iceland, Portugal, Sweden and Switzerland) and the E.E.C. came into force on that same date. Similar agreements with Norway and Finland came into force on July 1, 1973, and January 1, 1974, respectively.

The Convention defines the objects of the Association as (1) to promote economic expansion in the area of the Association and in each member state; (2) to ensure that trade between member states takes place in conditions of fair competition; (3) to avoid significant disparity between member states in the condition of supply of raw materials produced within the area; and (4) to contribute to the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Since December 31, 1966 the member countries of the Association have constituted a virtually complete

industrial free trade area. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. The Convention includes rules governing the origin of goods manufactured in the area. It also contains provisions relating to the "rules of competition"—government subsidies, restrictive business practices, etc. There are special provisions relating to trade in agricultural and fish products.

The free trade agreements between the E.F.T.A. countries and the E.E.C. provided for the complete removal by July 1, 1977 of the tariffs on almost all industrial products traded between them. This deadline was observed, and free trade was thereby established over almost all of Western Europe. A multilateral free trade agreement between the seven E.F.T.A. countries and Spain came into force on May 1, 1980.

Particularly during the 1970s E.F.T.A. has done much work on the removal of non-tariff barriers to trade, especially technical barriers to trade. Seven international schemes and two international conventions to overcome obstacles to trade in specific categories of products were devised in E.F.T.A. but are independent of the Association, and now involve the participation of other countries alongside E.F.T.A. countries.

The Council of E.F.T.A. meets every two weeks at the level of officials—the heads of the permanent national delegations to E.F.T.A.—and usually twice a year at the level of ministers. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries. *Secretary-General*, Per Kleppe (Norway) 9-11 Rue de Varembe, 1211 Geneva 20.

## ORGANIZATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

*Headquarters*: Paris, France. *Secretary-General*, E. van Lennep.

Formed on September 30, 1961, the O.E.C.D. replaced the Organization for European Economic Co-operation (O.E.E.C.). The O.E.C.D. is the instrument for international co-operation among industrialized member countries on economic and social policies. Its objectives are to assist its member governments in the formulation and co-ordination of policies designed to achieve high, sustained economic growth while maintaining financial stability, to contribute to world trade on a multilateral basis and to stimulate members' aid to developing countries.

The following countries belong to the O.E.C.D.: Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Greece, Iceland, Irish Republic, Italy, Japan, Luxemburg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, U.K. and U.S.A. (Yugoslavia participates with a special status).

The Council is the supreme body of the Organization. Composed of one representative for each

member country, it meets at Permanent Representative level under the Chairmanship of the Secretary General, or at Ministerial level (usually once a year) under the Chairmanship of a Minister elected annually. Decisions and Recommendations are adopted by mutual agreement of all members of the Council. Fourteen members of the Council are chosen annually to form an Executive Committee to assist the Council. However, most of the O.E.C.D.'s work is undertaken in over 200 specialized committees and working parties. Four autonomous or semi-autonomous bodies also belong to the Organization: the Nuclear Energy Agency, the International Energy Agency, the Development Centre, and the Centre for Educational Research and Innovation. These bodies, the committees and the Council are serviced by an international Secretariat headed by the Secretary-General of the Organization. *U.K. Permanent Representative*, K. J. Uffen, C.M.G., 19 rue de Franqueville, Paris 16.

## THE COUNCIL OF EUROPE

Headquarters: 67006 Strasbourg, France. Secretary-General, F. Karasek.

A European organization founded in 1949 whose aim is to achieve greater unity between its Members to safeguard their European heritage and to facilitate their economic and social progress. The aim of the Council is pursued through discussion and common action in economic, social, cultural, educational, scientific, legal and administrative matters and in the maintenance and furtherance of human rights and fundamental freedoms.

The following 21 countries belong to the Council: Austria, Belgium, Cyprus, Denmark, France, the Federal Republic of Germany, Greece, Iceland, the Republic of Ireland, Italy, Liechtenstein, Luxemburg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey and the U.K.

The organs are the Committee of Ministers, consisting of the Foreign Ministers of member countries; and the Parliamentary Assembly of 170 members, elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties. There is also a Joint Committee of Ministers and Representatives of the Parliamentary Assembly.

The Committee of Ministers is the executive organ of the Council. Certain of its conclusions take the form of international agreements or recommendations to governments. On certain major matters the Committee votes by unanimity but abstentions are permitted. Decisions of the Ministers may also be embodied in partial agreements to which a limited number of member governments are party. The Committee of Ministers meets twice yearly. All Ministers have appointed Deputies to act on their behalf. The Committee of Deputies meets twice a month to transact business and to take decisions on behalf of Ministers. Member governments accredit Permanent Representatives to the Council in Strasbourg, who are also the Ministers' Deputies.

The Committee is a forum for discussion between member governments on political and other matters, supervises the work of the technical expert committees and considers recommendations received from the Parliamentary Assembly. The Assembly's con-

clusions may take the form of recommendations to the Committee of Ministers or resolutions. Ministers, including Ministers other than those for Foreign Affairs, may address the Assembly and take part in its debates.

The Parliamentary Assembly holds three week-long sessions a year. It debates reports on, *inter alia*, political, economic, agricultural, social, educational, legal and regional planning affairs. The Chairman in office of the Committee of Ministers presents a report at each session. The Assembly also debates reports received annually from the O.E.C.D., other European organizations and certain specialized agencies of the United Nations. Matters of mutual interest to the Committee of Ministers and the Assembly are discussed in the joint Committee. The Council's budget is voted annually in December and is met by agreed contributions of member countries.

One of the principal achievements of the Council of Europe is the European Convention on Human Rights (1950) under which was established the European Commission and the European Court of Human Rights. These organs have built up a valuable system of European jurisprudence in the field of Human Rights. Other major achievements of the Council of Europe are the European Cultural Convention (1953), the European Social Charter (1960) and the European Convention on the Suppression of Terrorism. Over one hundred conventions and agreements have been concluded by the Council covering matters in all the fields of its competence, such as social insurance, equivalence of European diplomas for university entrances, equivalence of university degrees, public health, patents, extradition, migrant workers, data protection, etc.

The Council's cultural and educational programme is administered by the Council for Cultural Co-operation to which in addition to members of the Council of Europe, belong Finland and the Holy See. A European Committee for Legal Cooperation administers the Council's legal programme.

Permanent U.K. Representative, His Excellency Christopher Duncan Lush.

## RETROSPECT OF SPORT 1981-82

## ATHLETICS

## WORLD RECORDS

(All the world records given below have been accepted by the International Amateur Athletic Federation except those marked with an asterisk\* which are awaiting homologation.)

Fully automatic timing to 1/100th second is mandatory up to and including 400 metres. For distances up to and including 10,000 metres records will be accepted to 1/100th second if timed automatically, and to 1/10th if hand timing is used.

<i>Shot</i> —S. Rodhouse (U.K.) .....		18-02

U.K. beat Belgium by 83½ points to 46½.

**Women's National Cross-Country Championships**

Held at Carlisle, February 20, 1982

Senior (5,932 metres)	min.	sec.
1. P. Fudge (Hounslow) .....	20	20
2. A. Ford (Hounslow) .....	20	22
3. J. Furniss (Sheffield) .....	20	24
<b>Team result</b>		
1. Sale (4, 8, 23, 25) .....		60 pts.
Intermediate (4,000 metres)	min.	sec.
1. A. Hollington (Bournemouth) ..	13	02
<b>Team result</b>		
1. Darlington (7, 19, 20, 24) .....		70 pts.
Junior (3,500 metres)	min.	sec.
1. J. Beasley (Berry Hill) .....	10	18
<b>Team result</b>		
1. Andover (18, 43, 45, 55) .....		161 pts.
Girls (3,000 metres)	min.	sec.
1. R. Hughes (Fleet & Crookham)	10	14
<b>Team result</b>		
1. Victoria Park AAC (3, 6, 17, 21)		47 pts.

**United Kingdom v. Federal Republic of Germany**

Held at Cosford, February 20, 1982

**Men's Events**

Metres	min.	sec.
60—H. King (U.K.) .....		6-7
200—E. Skamrah (F.R.G.) .....		21-48
400—M. Henrich (F.R.G.) .....		47-7
800—K-P. Nabein (F.R.G.) .....	1	49-40
1,500—P. Ilg (F.R.G.) .....	3	45-03
3,000—K. Newton (U.K.) .....	7	55-68
60 <i>Hurdles</i> —A. Schaumann (F.R.G.) ..		7-9
		metres
<i>High Jump</i> —C. Thranhardt (F.R.G.) ..		2-24
<i>Pole Vault</i> —P. Volmer (F.R.G.) .....		5-30
<i>Long Jump</i> —J. Wornier (F.R.G.) .....		7-46
<i>Triple Jump</i> —A. Huber (F.R.G.) .....		15-99
<i>Shot</i> —U. Gelhausen (F.R.G.) .....		18-55

F.R.G. beat U.K. by 73 pts. to 58.

**Women's Events**

Metres	min.	sec.
60—W. Hoyte (U.K.) .....		7-32
200—R. Patten (U.K.) .....		24-23
400—V. Elder (U.K.) .....		53-32
800—E. Pecker (F.R.G.) .....	2	06-94
1,500—R. Gerdes (F.R.G.) .....	4	17-32
60 <i>Hurdles</i> —J. Livermore (U.K.) .....		8-28
		metres

<i>High Jump</i> —A.M. Cording (U.K.) and D. Elliott (U.K.) .....		1-89
<i>Long Jump</i> —M. Hirsch (F.R.G.) .....		6-18
<i>Shot</i> —J. Oakes (U.K.) .....		17-20

U.K. beat F.R.G. by 53 pts. to 46.

## United Kingdom v. G.D.R.

Held at Senftenberg, G.D.R., February 28, 1982

## Men's Events

Metres	min.	sec.
60—H. King (U.K.)		6-71
400—J. Bremer (G.D.R.)		47-83
800—H.J. Mogalle (G.D.R.)	1	48-3
1,500—L. Zauber (G.D.R.)	3	45-0
3,000—H. Kunze (G.D.R.)	8	02-7
60 Hurdles—H. Pohland (G.D.R.)		7-78
		metres
High Jump—R. Beilschmidt (G.D.R.)		2-16
Pole Vault—A. Weber (G.D.R.)		5-35
Long Jump—H. Lauterbach (G.D.R.)		7-88
Triple Jump—A. Moore (U.K.)		16-00
Shot—M. Schmidt (G.D.R.)		19-82

G.D.R. beat U.K. by 70 pts. to 51.

## Women's Events

Metres	min.	sec.
60—M. Gohr (G.D.R.)		7-21
400—D. Rubsam (G.D.R.)		51-76
800—M. Steuk (G.D.R.)	2	01-4
1,500—B. Liebich (G.D.R.)	4	13-2
3,000—A. Ford (U.K.)	9	22-1
60 Hurdles—B. Gartz (G.D.R.)		8-08
		metres
High Jump—K. Dedner (G.D.R.)		1-94
Long Jump—A. Voigt (G.D.R.)		6-54
Shot—L. Schmuhl (G.D.R.)		20-70

G.D.R. beat U.K. by 67 pts. to 32.

## National Cross-Country Championships

Held at Leeds, March 6, 1982

Senior (9 miles)	min.	sec.
1. D. Clarke (Hercules-Wimbledon)	42	19
2. H. Jones (Ranelagh)	42	33
3. M. McLeod (Elswick)	42	41
Team result		
1. Tipton (24, 26, 44, 48, 60, 61)		263 pts.
2. Coventry Godiva (4, 36, 49, 57, 67, 91)		304 pts.
3. Aldershop F & D (5, 41, 46, 56, 77, 83)		308 pts.
Junior (6 miles)	min.	sec.
1. S. Harris (Shaftesbury)	29	42
Team result		
1. Birchfield (4, 5, 43, 81)		133 pts.
Youth (4 miles)	min.	sec.
1. M. Vile (Westbury)	21	00
Team result		
1. T.V.H. (10, 21, 23, 99)		153 pts.

## European Indoor Championships

Held at Milan, Italy, March 6-7, 1982.

## Men's Events

Metres	min.	sec.
60—M. Woronin (Poland)		6-61
200—B. Skamrah (F.R.G.)		21-20
400—P. Konovalov (U.S.S.R.)		47-04
800—A. Paez (Spain)	1	48-02
1,500—J. Gonzales (Spain)	3	38-70
3,000—P. Ilg (F.R.G.)	7	53-50
60 Hurdles—A. Puchkov (U.S.S.R.)		7-73
		metres
High Jump—D. Mogenburg (F.R.G.)		2-34
Pole Vault—V. Spusov (U.S.S.R.)		5-70
Long Jump—H. Lauterbach (G.D.R.)		7-86
Triple Jump—B. Bakosi (Hungary)		17-13
Shot—V. Milic (Yugoslavia)		20-45

## Women's Events

Metres	min.	sec.
60—M. Gohr (G.D.R.)		7-11
200—G. Walter (G.D.R.)		22-80
400—J. Kratochvilova (Czechoslovakia)		49-59
800—D. Melinte (Romania)	2	00-39
1,500—G. Dorio (Italy)	4	04-01
3,000—A. Possamai (Italy)	8	53-77
60 Hurdles—K. Knabe (G.D.R.)		7-98
		metres
High Jump—U. Meyfarth (F.R.G.)		1-99
Long Jump—S. Everts (F.R.G.)		6-70
Shot—L. Vesselinova (Bulgaria)		20-19

## International Cross-Country Championships

Held in Rome, Italy, March 21, 1982

Senior (11,900 metres)	min.	sec.
1. M. Kadir (Ethiopia)	33	40-5
2. A. Salazar (U.S.A.)	33	44-0
3. R. Dixon (N.Z.)	34	01-8
Team result		
1. Ethiopia (1, 6, 12, 16, 28, 35)		98 pts.
2. England (5, 9, 11, 18, 22, 49)		114 pts.
3. U.S.S.R. (19, 24, 45, 46, 52, 71)		257 pts.
Junior (7,400 metres)	min.	sec.
1. Z. Gelaw (Ethiopia)	22	45-3
2. A. Lem (Ethiopia)	22	46-6
3. S. Mei (Italy)	22	48-7
Team result		
1. Ethiopia (1, 2, 4, 5)		12 pts.
2. Italy (3, 6, 7, 21)		37 pts.
3. U.S.A. (11, 14, 22, 23)		70 pts.
Women (4,663 metres)	min.	sec.
1. M. Puica (Romania)	14	38-9
2. F. Lovin (Romania)	14	40-5
3. G. Waitz (Norway)	14	43-9
Team result		
1. U.S.S.R. (7, 8, 11, 18)		44 pts.
2. Italy (4, 9, 19, 25)		57 pts.
3. England (13, 14, 16, 24)		67 pts.

## A.A.A. Marathon

Held at Gateshead, June 13, 1982

	hr.	min.	sec.
1. S. Kenyon (Salford)	2	11	40
2. D. Cannon (Gateshead)	2	12	49
3. I. Ray (Salisbury)	2	14	08

## W.A.A.A. Marathon

Held at Windsor, June 12, 1982

	hr.	min.	sec.
1. K. Binns (Sale)	2	36	12
2. C. Gould (Barnet)	2	37	53
3. J. Barleycorn (Crawley)	2	43	28

## London Marathon

Held on May 9, 1982

Men			
	hr.	min.	sec.
1. H. Jones (Ranelagh)	2	09	24
2. O. Dahl (Norway)	2	12	21
3. M. Gratten (Invicta)	2	12	30
Women			
1. J. Smith (Barnet)	2	29	43
2. L. Moller (N.Z.)	2	36	15
3. J. Hines (N.Z.)	2	41	49

## United Kingdom National Championships

Held at Cumberan, May 30/31, 1982

## THE DERBY, 1972-1982

For particulars of the Derby from 1780-1971 see 1921-72 editions.

The *Distance* of the Derby course at Epsom is 1½ miles. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

Year	Owner and Name of Winner	Betting	Jockey	Trainer	No. of Run's
1972	Mr. J. Galbreath's Roberto (Ir.)	3-1 F.	L. Piggott	M. V. O'Brien	21
1973	Mr. A. M. Budgett's Morston	25-1	E. Hide	A. M. Budgett	22
1974	Mrs. N. Phillips' Snow Knight	50-1	B. Taylor	P. M. Nelson	25
1975	Dr. C. Vittadini's Grundy	5-1	P. Eddery	P. Walwyn	18
1976	Mr. N. B. Hunt's Empery (Fr.)	10-1	L. Piggott	M. Zilber	23
1977	Mr. R. Sangster's The Minstrel (Ir.)	5-1	L. Piggott	M. V. O'Brien	22
1978	Lord Halifax's Shirley Heights	8-1	G. Starkey	J. Dunlop	25
1979	Sir Michael Sobell's Troy	6-1	W. Carson	W. R. Hern	23
1980	Mrs. A. Plesch's Henbit	7-1	W. Carson	W. R. Hern	24
1981	H. H. Aga Khan's Shergar	10-11 F.	W. R. Swinburn	M. R. Stoute	18
1982	Mr. R. Sangster's Golden Fleece (Ir.)	3-1 F.	P. Eddery	M. V. O'Brien	18

Marked\* also won the Two Thousand Guineas; ° the St. Leger.

Record times, 2 min. 34 secs. by Hyperion in 1933; Windsor Lad in 1934; 2 min. 33.8 sec. Mahmoud in 1936.

*British Open Down-the-Line Championship*.—J. I. Stafford (Scotland), 300/300.

*Down-the-Line High Gun Trophy*.—J. I. Stafford (Scotland), 600/600 (new record).

*Mackintosh Trophy*.—New Zealand, 7,366/7,500.

*British Open Skeet Championship*.—B. J. Simpson (Cams.), 99/100.

*British Open Sporting Championship*.—R. Calton (Norfolk), 83/100.

*Coronation Cup*.—G. Digweed (E. Sussex), 360/400.

*Grand Prix of Great Britain (Olympic Trap)*.—G. Leary (Canada), 192/200.

*European Sporting Championship (Switzerland)*.—D. Lawton (Staffs.), 172/200. *Team Match*: France, 651/800.

*Game Fair Championship*.—J. Little (Lancs.), 25/25.

*Grand Mondial (Universal Trench)*.—P. Croft (W. Midlands), 196/200.

## BOXING, 1982

## A.B.A. CHAMPIONSHIPS (Winners)

*Light-Flyweight*.—J. Lyon; *Flyweight*.—J. Kelly; *Bantam*.—R. Gilbody; *Feather*.—H. Henry; *Light*.—J. McDonnell; *Light-Welter*.—A. Adams; *Welter*.—C. Pyatt; *Light-Middle*.—D. Milligan; *Middle*.—J. Price; *Light-Heavy*.—G. Crawford; *Heavy*.—H. Hilton; *Super-Heavy*.—A. Elliott.

## PROFESSIONAL BOXING

## WORLD (W.B.C.) CHAMPIONS

*Heavy*.—L. Holmes (U.S.A.); *Cruiser*.—S. T. Gordon (U.S.A.); *Light-Heavy*.—D. Braxton (U.S.A.); *Middle*.—M. Hagler (U.S.A.); *Light-Middle*.—W. Benitez (Puerto Rico); *Welter*.—Sugar Ray Leonard (U.S.A.); *Light-Welter*.—L. Haley (U.S.A.); *Light*.—A. Arguello (Nicaragua); *Super-Feather*.—R. Limon (Mexico); *Feather*.—S. Sanchez (Mexico); *Super-Bantam*.—W. Gomez (Puerto Rico); *Bantam*.—L. Pintor (Mexico); *Super-Fly*.—Chulho Kim (Korea); *Fly*.—P. Cardona (Colombia); *Light-Fly*.—H. Zapata (Panama).

## WORLD (W.B.A.) CHAMPIONS

*Heavy*.—M. Weaver (U.S.A.); *Cruiser*.—O. Ocasio (Puerto Rico); *Light-Heavy*.—M. Spinks (U.S.A.); *Middle*.—M. Hagler (U.S.A.); *Light-Middle*.—D. Moore (U.S.A.); *Welter*.—Sugar Ray Leonard (U.S.A.); *Light-Welter*.—A. Pryor (U.S.A.); *Light*.—R. Mancini (U.S.A.); *Super-Feather*.—S. Serrano (Puerto Rico); *Feather*.—E. Pedroza (Panama); *Super-Bantam*.—S. Palma (Argentina); *Bantam*.—J. Chandler (U.S.A.); *Super-Fly*.—J. Watanabe (Japan); *Fly*.—S. Laciari (Argentina); *Light-Fly*.—K. Takashika (Japan).

## BRITISH CHAMPIONS

*Heavy*.—N. Meade; *Light-Heavy*.—T. Collins; *Middle*.—R. Gumbs; *Light-Middle*.—H. Graham; *Welter*.—C. Jones; *Light-Welter*.—C. McKenzie; *Light*.—R. Cattouse; *Feather*.—P. Cowdell; *Bantam*.—J. Feeney; *Fly*.—(vacant).

## COMMONWEALTH CHAMPIONS

*Heavy*.—T. Berbeck (Canada); *Light-Heavy*.—L. Mwale (Zambia); *Middle*.—(vacant); *Light-Middle*.—H. Graham (G.B.); *Welter*.—C. Jones (G.B.); *Light-Welter*.—O. Nwankpa (Nigeria); *Light*.—C. Noel (Trinidad and Tobago); *Super-Feather*.—J. Aba (Papua); *Feather*.—A. Nelson (Ghana); *Bantam*.—P. Ferrarri (Australia); *Fly*.—S. Muchoki (Kenya).

## EUROPEAN CHAMPIONS

*Heavy*.—L. Rodriguez (France); *Light-Heavy*.—R. Koopmans (Holland); *Middle*.—T. Sibson (G.B.); *Light-Middle*.—L. Minchillo (Italy); *Welter*.—H. H. Palm (Denmark); *Light-Welter*.—C. McKenzie (G.B.); *Light*.—J. Gibilisco (Italy); *Super-Feather*.—C. Boza Edwards (G.B.); *Feather*.—P. Cowdell (G.B.); *Bantam*.—G. Fossati (Italy); *Fly*.—C. Magri (G.B.).

## BILLIARDS AND SNOOKER

*World Professional Snooker Championship*.—A. Higgins beat R. Reardon by 18–15 frames.  
*World Amateur Snooker Championship*.—T. Parsons (Wales) beat J. Bear (Canada) by 11–8.  
*Benson and Hedges Masters Snooker Tournament*.—S. Davis beat T. Griffiths by 9–5.  
*U.K. Professional Snooker Championship*.—S. Davis beat T. Griffiths by 16–3.  
*World Amateur Billiards Championship*.—M. Ferreira (India) beat N. Dagley (England) by 2,725 to 2,631.

- The Rugby Football League. *Sec.-Gen.*, D. S. Oxley, 180 Chapelton Road, Leeds.
- SKATING.—National Skating Association of Great Britain. *Gen. Administrator*, E. Waughray, 117 Charterhouse Street, E.C.1.
- SKI-ING.—British Ski Federation. *Sec.*, P. A. Allan, 118 Eaton Square, S.W.1.
- SQUASH RACKETS.—Squash Rackets Association. *Chief Executive*, R. I. Morris, Francis House, Francis Street, S.W.1.
- Women's Squash Rackets Association. *Sec.*, Miss C. Myers, 345 Upper Richmond Road West, S.W.14.
- SWIMMING.—Amateur Swimming Association, Harold Fern House, Derby Square, Loughborough, Leics.
- TABLE TENNIS.—English Table Tennis Association. *Gen. Sec.*, A. W. Shipley, 21 Claremont, Hastings.
- TOBOGGANING.—British Racing Tobogganing Association.—*Pres.*, Dr. R. Liversedge, Oak Cottage, Flaunden, Herts.
- UNDERWATER SWIMMING.—British Sub-Aqua Club, *General Manager*, D. D. Robertson, 16 Upper Woburn Place, W.C.1.
- VOLLEYBALL.—English Volleyball Association, 128 Melton Road, West Bridgford, Nottingham. *Gen. Administrator*, E. Pratt.
- WALKING.—Race Walking Association. *Hon. Sec.*, P. Marlow, 65 Lordship Lane, S.E.22.
- WATER SKI-ING.—British Water Ski Federation, 16 Upper Woburn Place, W.C.1. *Sec.*, G. Hill.
- WEIGHT-LIFTING.—British Amateur Weight Lifters Association. *Hon. Sec.*, W. W. R. Holland, 3 Iffley Turn, Iffley, Oxford.
- WRESTLING.—English Olympic Wrestling Association. *Sec.*, H. Jacob, O.B.E., 2 Huxley Drive, Bramhall, Stockport, Cheshire.
- YACHTING.—Royal Yachting Association, Victoria Way, Woking, Surrey. *Sec.-Gen.*, J. Durie.
- SPORTS COUNCIL.—16 Upper Woburn Place, W.C.1. *Dir.-Gen.*, E. Jones, M.B.E.

## OPERA AND DANCE, 1981-82

## Dame Janet Baker

To widespread expressions of regret, Dame Janet Baker retired from the operatic stage during the 1981-82 season with farewell performances with the Royal Opera, English National Opera and Glyndbourne Festival Opera. *Alceste* (Gluck) at Covent Garden and *Orfeo ed Eurydice* (Gluck) at Glyndbourne were new productions, while the *Mary Stuart* (Donizetti) at the London Coliseum was a revival of E.N.O.'s 1973 production. The choice of two Gluck operas to be amongst Dame Janet's final three roles was not surprising in view of the mezzo-soprano's extensive recital repertoire of the composer and her previously acclaimed portrayals of *Orfeo*. The role of *Alceste* was a new one for her but, as with *Mary Stuart*, required the portrayal of what one critic termed "majesty ... transfigured by grief and ill-use", a requirement accomplished with great artistry in moving performances at all three houses to the accolades of audiences and critics alike.

Response to aspects of the productions themselves was not so complimentary. The revival of *Mary Stuart* fared best with the critics, perhaps benefiting by not suffering the teething troubles of a new production. The six performances given in April, 1982 were widely admired, Dame Janet's finely judged portrayal being matched by a strong performance from Rosalind Plowright as *Elizabeth* which made the Act 2 confrontation of the Queens the dramatic climax of the opera. Some aspects of the scenery and stage business in *Alceste* and *Orfeo ed Eurydice* were found less felicitous, including much of the choreography in both; that in *Alceste* even provoked sections of one audience to laughter. However, fine vocal support was in evidence in all productions, with John Shirley-Quirk deserting the concert platform for a regrettably rare opera appearance in *Alceste*.

This production of *Mary Stuart* was recorded for issue on record and video, and also a television broadcast on July 14, while a concert performance of the Glyndbourne *Orfeo ed Eurydice* was given at the Royal Albert Hall on August 11 as part of the Promenade season. Despite her farewell to the stage Dame Janet still plans a busy concert schedule.

Dame Janet's final performance at Covent Garden on December 15, 1981 was the occasion of a presentation to mark her farewell to opera. Sir John Tooley, general manager of the Royal Opera House, presented her with four vellum-bound engravings from an eighteenth century book of French theatre costume. These, aptly, are illustrations of Gluck performances.

For details of the productions of *Alceste* and *Orfeo ed Eurydice*, see below.

**Mary Stuart.** *Conductor*, Sir Charles Mackerras; *producer*, John Copley; *designer*, Desmond Heeley.

*Mary Stuart*, Janet Baker; *Queen Elizabeth*, Rosalind Plowright; *Leicester*, David Rendell; *Talbot*, John Tomlinson; *Cecil*, Alan Opie; *Hannah*, Angela Bostock.

## Obituaries

*Dame Marie Rambert, D.B.E.*, who died on June 12, 1982 at the age of 94, was the founder of Ballet Rambert, and its guiding spirit until more recent years, when advancing years led to some diminishing of her energy. Although born in Warsaw, on February 20, 1888, Dame Marie was sent to Paris by her family in 1905 to avoid the possibility of trouble with the political authorities in Poland. There, her interest in dance was first aroused by the "art-dancing" of Isadora Duncan and the eurhythmic theories of Dalcroze. Her introduction to classical dance came in 1913 when she joined Diaghilev's Russian Ballet to help Nijinsky to disentangle the then avant-garde rhythms of *The Rite of Spring*, also dancing in the corps-de-ballet. Although subsequently she danced only in the earliest days of her own company, Dame Marie had a great love of the classics and from the start Fokine and Pepita works were performed.

However, Dame Marie's great gift was her ability to recognise the potential of dancers and choreographers, and with her own energy and enthusiasm to draw from everyone around her the utmost they had to give—an important gift with dancers but a vitally stimulating one with choreographers. This encouragement began even before the company itself. The pupils of the dance studio she opened in London in 1920 formed the nucleus of the company ten years later and among them was Frederick Ashton whose choreographic career was launched and developed there. His first piece *Scarlet Scissors* or *A Tragedy of Fashion* in 1926 provided the school with its first publicly performed work and he created another 19 works for the Rambert dancers in the nine years to 1935 when he moved to the Vic-Wells Ballet. Other members of the company who went on to make notable reputations as choreographers included Antony Tudor (*Jardin aux Lilas*, *Dark Elegies*, etc.), Andrée Howard (*Death and the Maiden*, *Lady into Fox*, etc.), Walter Gore (*Confessional*, *Winter Night*, *Sweet Dancer*, etc.) and Frank Staff (*The Tartans*, *Czernyana*, etc.)

The post-war enlargement of the Ballet Rambert and revivals of classical ballets reduced the company's commitment to the creation of new works. However, reorgani-

sation in 1966 due to a financial crisis reduced the company to a small group primarily concerned with mounting new works, including many using modern dance techniques. This development received Dame Marie's active support until well-established, after which she left the running of the company to others although maintaining a strong interest and involvement. Through her company, and as a catalyst to the talents she nurtured there, Dame Marie Rambert made a major contribution to the development of British choreography and dancing, and helped to lay the foundations of the strong tradition of dance, classical and modern, in Britain today.

*Lotte Lenya* died in New York on November 27, 1981 at the age of 83. She was born in Vienna and studied as a dancer in Zurich before moving in 1920 to Berlin, where six years later she married Kurt Weill. In 1928, Lenya created the role of Jenny in *The Threepenny Opera* and subsequently created roles in other Weill/Brecht collaborations including, in 1933, that of Anna in *The Seven Deadly Sins*. The Weills fled Germany, emigrating to the U.S.A. two years later, where Lenya worked in films as well as on stage. After Weill's death in 1950, she helped with the restaging of her husband's work, also singing in revivals and on recordings of them.

### Anniversaries

The Royal Ballet celebrated the centenary of the birth on June 17 of Igor Stravinsky with six performances of a programme of three ballets choreographed to his scores. *The Firebird* was written in 1910 when the composer was still unknown; *Les Noces* was started in 1914 but completed after, and influenced by, the Russian Revolution; and *Orpheus*, commissioned in 1947 by Balanchine but presented here in a new version choreographed by MacMillan (see below).

"Ninety Years On", a musical tribute to Dame Eva Turner on the eve of her 90th birthday, took place at the Coliseum on March 9. The celebrations continued with a birthday lunch at Covent Garden the following day and at the Royal Opera House on March 14 with an evening of extracts from the soprano's best-known roles, at which Dame Eva was presented with a Covent Garden Silver Medal.

A surprise party was held at the Royal Opera House on February 16 to celebrate the 60th birthday of Sir Geraint Evans, who announced his intention of retiring from the operatic stage in the 1983-84 season. On March 11, Sir Geraint was presented with an original *Meistersinger* score at this season's final performance of *Die Meistersinger von Nürnberg*, the opera in which he made his Covent Garden debut in 1948 as *The Night-watchman* and in which he has latterly sung *Beckmesser*.

The 1981-82 season saw the 25th anniversary of the debut at the Royal Opera House of the tenor Jon Vickers, who celebrated by singing *Samson* in autumn 1981, *Canio* (Pagliacci) in April and *Tristan* in May, three of the intense, passionate roles for which he is known.

### European Premiere

December 16, 1981, saw the European premiere of *A Christmas Carol*, Thea Musgrave's fifth opera based on the Charles Dickens' story. The work was performed at Sadler's Wells Theatre by the Royal Opera for a short season aimed primarily at young audiences. The composer, also her own librettist, managed to include many of the book's characters by having some singers take several parts. The opera was double cast for its six performances, with the first-night cast being led by the American baritone, Frederick Burchinal, in the role of Scrooge which he created.

*Producer*, David Farrar; *designers*, Miguel Romero and Alex Reid; *conductors*, Peter Mark/David Cyrus.

*Scrooge*, Frederick Burchinal/Jonathan Summers; *Bob Cratchit*, Robin Leggate/Terry Jenkins; *Young Scrooge*, Philip Gelling/William Shimell; *Mrs. Cratchit*, Mrs. Fezzywig, etc., Elizabeth Bainbridge/Phyllis Cannan; *Fezzywig*, etc., Forbes Robinson/Eric Garrett; *Belle*, etc., Eiddwen Harry/Vivian Townley; *Fanny*, etc., Sandra Dugdale/Mary Hall; *Marley's Ghost*, (spoken part) Philip Locke; *Spirits of Christmas*, (dance and mime part), Murray Melvin.

### The Nureyev Festival

The seventh Festival was held at the London Coliseum from June 1 to July 3, featuring three companies in support of Nureyev. The first two weeks saw the performance of *Romeo and Juliet* by the London Festival Ballet, in the award-winning version choreographed for the company by Nureyev himself. The role of Juliet was shared by Patricia Ruanne and Evelyne Desutter.

The third week saw the return to the Festival of the Zurich Ballet with the first performance in Britain of *Manfred*, a ballet based on the Byronic legend set to music by Tchaikovsky. The ballet, which interweaves incidents in Byron's life with that of the hero of his poem, was conceived and created by Nureyev as a role for himself. The other piece given by the company was *Western Symphony*, a Balanchine piece set to well-known country and western songs such as "Golden Slippers" and "Red River Valley".

The final fortnight brought the Ballet Théâtre Français on their first visit to this country, with four ballets, three by Diaghilev. *Spectre de la Rose* and *L'après-midi d'un Faune* were making a return to the

programme but Nureyev danced *Petrouchka* at the Festival for the first time. The fourth piece was *La Boutique Fantastique* (Massine).

### New Company

During the 1981-82 season there were short seasons of opera at Sadler's Wells Theatre performed by artists attached to other companies, e.g. The Royal Opera and English National Opera. In August 1981 there were performances of *The Gypsy Princess* (Kalman) and *Hansel and Gretel* (Humperdinck), and in April and May 1982 *The Gypsy Princess* was presented in conjunction with *The Grand Duchess of Gerstein* (Offenbach). The success of these occasional productions has led to the forming of The New Sadler's Wells Opera, with the aid of a four-year sponsorship worth £400,000 by the National Westminster Bank. The company, launched on June 29, 1982, plans to give its first performances in January 1983, and hopes to concentrate on the presentation of light opera, so complementing rather than competing with the major London opera companies.

### OPERA PRODUCTIONS

In the summaries of company activities shown below the dates in brackets indicate the year in which the current production of the work entered the repertoire of that company.

#### THE ROYAL OPERA (1946)

Royal Opera House, Covent Garden, W.C.2.

Productions from the repertoire were *Arabella* (1965), *Simon Boccanegra* (1980), *Tosca* (1964), *Il trovatore* (1964), *Don Giovanni* (1981), *Les Contes d'Hoffmann* (1980), *La Bohème* (1974), *Billy Budd* (1951), *Salome* (1970), *Cavalleria rusticana* (1959) and *Pagliacci* (1959), *Eugene Onegin* (1971), *Tristan und Isolde* (1971), *Pelléas et Mélisande* (1969), *La clemenza di Tito* (1974) and *Der Freischütz* (1977).

Revised productions were:

Nov. 2, 1981. *La Sonnambula* (Bellini). *Conductor*, Manfred Ramin, making his debut with the Royal Opera; *producers* were Filippo Sanjust and Richard Gregson; *designer*, Filippo Sanjust.

*Amina*, Ileana Cotrubas; *Teresa*, Phyllis Cannan; *Elvino*, Dennis O'Neill; *Count Rodolfo*, Robert Lloyd; *Lisa*, Elizabeth Gale; *Alessio*, Roderick Earle.

Feb. 22, 1982. *Die Meistersinger von Nürnberg* (Wagner). *Conductor*, Colin Davis; *producer*, Hans Hartleb; *designer*, Barry Kay.

*Eva*, Lucia Popp; *Walther*, Reiner Goldberg; *Sachs*, Hans Sotin; *Pogner*, Gwynne Howell; *Beckmesser*, Geraint Evans; *Kothner*, Barry Motha; *Magdalene*, Phyllis Cannan; *David*, Robert Tear; *Nightwatchman*, John Tomlinson.

There were three new productions:

Sept. 28, 1981. *Samson et Dalila* (Saint-

Saëns). *Conductor*, Colin Davis; *producer*, Elijah Moshinsky; *designer*, Sidney Nolan.

*Samson*, Jon Vickers; *Dalila*, Shirley Verrett; *Abimelech*, John Tomlinson; *High Priest*, Jonathan Summers.

Nov. 26, 1981. *Alceste* (Gluck). *Conductor*, Charles Mackerras; *producer*, John Copley; *designers*, Roger Butlin and Michael Stennett; *choreography*, Ronald Hynd.

*Alceste*, Janet Baker; *Admète*, Robert Tear; *Hercule*, Jonathan Summers; *Grand-Prêtre/Dieu Infernal*, John Shirley-Quirk; *Le Hérault/Apollo*, Philip Gelling; *Évangre*, Maldwyn Davies; *L'Oracle*, Matthew Best.

June 30, 1982. *Falstaff* (Verdi). *Conductor*, Carlo Maria Giulini; *producer*, Ronald Eyre; *designer*, Hayden Griffen.

*Falstaff*, Renato Bruson; *Pistol*, William Wildermann; *Bardolph*, Francis Egerton; *Dr. Caius*, John Dobson; *Mistress Page*, Brenda Boozer; *Mistress Ford*, Katia Ricciarelli; *Nannetta*, Barbara Hendricks; *Mistress Quickly*, Lucia Valentini-Terrani; *Ford*, Leo Nucci; *Fenton*, Dalmacio Gonzalez.

#### ENGLISH NATIONAL OPERA (1931)

London Coliseum, St. Martin's Lane, W.C.2.

*Clori*, Della Jones; *Climone*, Delia Wallis; *Egisto*, Neil Rosenheim; *Lidio*, Andrew Dalton; *Ipparco*, Donald Maxwell; *Dema*, Francis Egerton; *Amor (Cupid)*, Patricia O'Neill.

The company toured to London (Dominion), Edinburgh, Newcastle, Aberdeen, Liverpool, Dunfermline, Dundee, Belfast, Ayr, Oxford. The production of *L'Égisto* was also taken on tour for two weeks to Schwetzingen, Frankfurt and Venice in May 1982.

The company's "Opera Go Round" group toured a new production of *The Marriage of Figaro*; *producer*, Rebecca Meitlis; *designers*, Sue Wilmington and Emma Purdy; *music director and accompanist*, Lesley-Anne Sammons; *company* included Suzan Bingham, Rosanne Brackenridge, Faith Elliot, Stewart Buchanan, Keith Brookes, Jim Broom and Halcro Johnson. The group visited venues throughout Scotland from September to December 1981, and the Farøe Islands for two weeks in September 1981.

#### OPERA NORTH (1978)

Grand Theatre, 46 New Briggate, Leeds.

Productions from the repertoire were *Car-men* (1979), *Hansel and Gretel* (1978), *Orpheus in the Underworld* (1978), *Rigoletto* (1979), *Nabucco* (1980) and *The Flying Dutchman* (1979).

Six new productions were presented:

Sept. 17, 1981. *Macbeth* (Verdi), a co-production with Welsh National Opera. *Conductor*, David Lloyd-Jones; *producer*, Michael Geliot; *designer*, John Gunter.

*Macbeth*, John Rawnsley; *Lady Macbeth*, Elizabeth Vaughan; *Banquo*, John Tranter.

Dec. 1, 1981. *The Bartered Bride* (Smetana), premiered at the Palace Theatre, Manchester. *Conductor*, David Lloyd-Jones; *producer*, Steven Pimlott; *designer*, Stefan Lazaridis.

*Mařenka*, Marie Slorach; *Jenik*, Arthur Davies; *Kecal*, Eric Garrett; *Vašek*, Justin Lavender; *Esmeralda*, Elizabeth Collier.

March 9, 1982. *A Midsummer Night's Dream* (Britten). *Guest conductor*, Elgar

Howarth; *producer*, Ian Watt-Smith; *designer*, Alexander McPherson.

*Oberon*, Kevin Smith; *Titania*, Nan Christie; *Puck*, Andrew Secombe; *Lysander*, Ian Caley; *Demetrius*, Christopher Booth-Jones; *Hermia*, Fiona Kimm; *Helena*, Barbara Walker; *Bottom*, Stephen Rhys-Williams.

March 11, 1982. *Manon Lescaut* (Puccini), sung in Italian. *Conductor*, David Lloyd-Jones; *producer*, Christopher Renshaw; *designer*, Bruno Santini.

*Manon*, Arlene Saunders; *Des Grieux*, Benito Maresca; *Lescaut*, Christian du Plessis; *Géronte*, Thomas Lawlor.

May 21, 1982. *Così fan tutte* (Mozart). *Conductor*, David Lloyd-Jones; *producer*, Graham Vick; *designer*, Russell Craig.

*Fiordiligi*, Eiddwen Harry; *Dorabella*, Patricia Parker; *Ferrando*, Robin Leggate; *Guglielmo*, Gordon Sandison; *Don Alfonso*, Rodney Macann; *Despina*, Kate Flowers.

May 26, 1982. *Werther* (Massenet). *Conductor*, Clive Timms; *producer*, Steven Pimlott; *designer*, Maria Björnson.

*Werther*, John Brecknock; *Charlotte*, Carol Wyatt; *Albert*, Stuart Harling; *Sophie*, Leslie Garrett; *The Magistrate*, Thomas Lawlor.

Nine productions were performed at the Palace Theatre, Manchester during the year, and other cities visited were Southampton, Coventry, Nottingham, Norwich and York.

#### KENT OPERA (1969)

Pembles Cross, Egerton, Ashford, Kent.

Productions from repertoire were *Eugene Onegin* (1977) and *Così Fan Tutte* (1974).

New productions were:

Sept. 29, 1981. *The Marriage of Figaro* (Mozart). *Conductor*, Roger Norrington; *producer*, Nicholas Hytner; *designer*, David Fielding.

*Figaro*, Alan Watt; *Susanna*, Meryl Drower; *Count Almaviva*, Gordon Sandison; *Countess Almaviva*, Jennifer Smith; *Cherubino*, Eiran James; *Dr. Bartolo*, Harry Coghill; *Marcellina*, Margaret Cable; *Don Basilio*, Graeme Matheson-Bruce.

March 11, 1982. *Agrippina* (Handel). *Conductor*, Ivan Fischer; *producers*, Christopher Bruce and Norman Platt; *designer*, Roger Butlin.

*Agrippina*, Felicity Palmer; *Nero*, Cynthia Buchan; *Pallas*, Glyn Davenport; *Narcissus*, Christopher Robson; *Lesbo*, Andrew Shore; *Otho*, Paul Esswood; *Poppea*, Meryl Drower.

Kent Opera has no home theatre and all productions were performed on tour in Brighton, Cambridge, Canterbury, Eastbourne, Leicester, London (Sadlers Wells Theatre), Norwich, Poole, Portsmouth, Southend and Tunbridge Wells.

The company gave two performances of a new production of *The Beggar's Opera* (Britten) at the Aldeburgh Festival in June

1982. *Conductor*, Peter Robinson; *producer*, Nicholas Hytner; *designers*, Nick Chelton and Di Seymour.

*Macheath*, Gordon Sandison; *Polly Peachum*, Eirian James; *Peachum*, Alan Watt; *Mrs. Peachum*, Mary King; *Lockit*, Thomas Helmsley; *Lucy Lockit*, Anne Pashley; *The Beggar*, Andrew Shore; *Filch*, Alasdair Elliott.

During May 1982 the company also gave five performances at the Teatro La Fenice in Venice of a baroque quadruple bill; three works by Monteverdi, *Il Ballo delle Ingrate*, *Lettera Amorosa* and *Il Combattimento de Tancredi e Clorinda* (all sung in Italian) and *Venus and Adonis* by John Blow (sung in English).

#### GLYNDBOURNE FESTIVAL OPERA (1934)

Glyndbourne, Lewes, E. Sussex.

The 1982 Festival ran from May 24 to August 12 and the resident orchestra was the London Philharmonic. Of the five operas presented, three were revivals; *Il barbiere di Siviglia* (1981 production by John Cox), *Der Rosenkavalier* (1980 production by John Cox) and *Don Giovanni* (1977 production by Peter Hall).

The new productions were:

May 25, 1982. *L'Amour des Trois Oranges* (Prokofiev). *Conductor*, Bernard Haitink; *producer*, Frank Corsaro; *designer*, Maurice Sendak.

*Le Roi*, Willard White; *Le Prince*, Ryland Davies; *Fata Morgana*, Nelly Morpurgo; *Princesse Clarice*, Nucci Condò; *Farfarello*, Derek Hammond-Stroud; *Pantolon*, Peter-Christoph Runge; *Trouffaldino*, Ugo Benelli; *Léandre*, John Pringle; *Tchélio*, Richard Van Allen; *Linette*, Yvonne Lea; *Nicolette*, Susan Moore; *Ninette*, Colette Alliot-Lugaz; *Sméraldine*, Fiona Kimm; *Le Maître de Cérémonies*, Hugh Hetherington.

June 27, 1982. *Orfeo ed Eurydice* (Gluck). *Conductor*, Raymond Leppard; *producer*, Peter Hall; *designer*, John Bury; *movement*, Stuart Hopps.

*Orfeo*, Janet Baker; *Eurydice*, Elisabeth Speiser; *Amore*, Elizabeth Gale.

The touring company presented *Don Giovanni*, *Il barbiere di Siviglia* and *Orfeo ed Eurydice* at Manchester, Plymouth, Southampton, Oxford and Norwich during the autumn of 1982.

## DANCE PRODUCTIONS

### THE ROYAL BALLET (1931)

Royal Opera House, Covent Garden, W.C.2.

Productions of full length ballets from the repertoire were *Swan Lake* (Pepita and Ivanov; 1979), *The Sleeping Beauty* (Sergeyev after Pepita, with additional choreography by Ashton; 1977), *Manon* (MacMillan; 1974), *Giselle* (Coralli/Perrot; 1951),

*Romeo and Juliet* (MacMillan; 1975) and *Isadora* (MacMillan; 1981).

Programmes also included combinations of shorter pieces, including the following from the repertoire; *La Bayadère* (Nureyev after Pepita), *The Two Pigeons* (Ashton), *Enigma Variations* (Ashton), *Rhapsody* (Ashton), *The Dream* (Ashton), *Scènes de Ballet* (Ashton), *Concerto* (MacMillan), *Gloria* (MacMillan), *Les Biches* (Nijinska), *Shadowplay* (Tudor), *The Rite of Spring* (MacMillan), *Afternoon of a Faun* (Robbins), *Flower Festival at Genzano* (Bournonville), *The Firebird* (Fokine), *Les Noces* (Nijinska), *The Concert* (Robbins), *Elite Syncopations* (MacMillan), *The Walk to the Paradise Garden* (Ashton), *Illuminations* (Ashton).

New productions were:

Dec. 3, 1981. *Napoli divertissement* (Bournonville). Revival staged by Kirsten Ralov; *designer*, Richard Beer.

March 16, 1982. *L'Invitation au Voyage*, a one-act ballet choreographed by Michael Corder, set to five songs by Henri Duparc; *designer*, Yolanda Sonnabend. The cast of 11 dancers was led by Antoinette Sibley and Stephen Jefferies; the songs were sung by Diana Montague (*mezzo-soprano*); *conductor*, Adam Gatehouse.

May 28, 1982. *Villa d'Este* pas-de-deux. *Choreography*, Derek Deane; *music*, Liszt; *designs*, Anthony Dowell. The dancers at the premiere (at the Palace Theatre, Manchester) were Merle Park and David Wall.

June 11, 1982. *Orpheus*, a one-act ballet. *Choreographer*, Kenneth MacMillan; *music*, Stravinsky; *designer*, Nicholas Georgiadis. The cast for the premiere included Jennifer Penney (*Euridice*), Wayne Eagling (*The Dark Angel*), Ashley Page (*The Angel of Light*), and Peter Schaufuss making his debut with the company in the title role.

In May—June 1982 the company presented a one-week season at the Theatre Royal in Plymouth, a two-week season at the Palace Theatre, Manchester, and a three-week summer season in the "Big Top", Battersea Park, London.

### SADLER'S WELLS ROYAL BALLET (1931)

Sadler's Wells Theatre, Rosebery Avenue, E.C.1.

Full length ballets from the repertoire were *La Fille mal gardée* (Ashton; 1960), *The Taming of the Shrew* (Cranko; 1980), *Papillon* (Hynd; 1980), *Coppélia* (after Pepita and Cecchitti; 1979), *Giselle* (Pepita after Coralli and Perrot; 1968).

Programmes included combinations of the following shorter ballets *Night Moves* (Bintley), *Le Corsaire* pas de deux (Klavin), *Sinfonietta* (Ashton), *Les Rendezvous* (Ashton), *Checkmate* (de Valois), *Spring Waters* pas de deux (Messerer), *Façade* (Ashton), *Les Sylphides* (Fokine), *The Two Pigeons* (Ashton),

*Three Pictures* (Corder), *Pineapple Poll* (Cranko), *Elite Syncopations* (MacMillan), *Solitaire* (MacMillan), *Card Game* (Cranko), *Prodigal Son* (Balanchine), *Paquita* (Pepita), *Concerto* (MacMillan), *The Invitation* (MacMillan), *Twilight* (van Manen), *Meadow of Proverbs* (Bintley), *Danses Concertantes* (MacMillan), *The Dream* (Ashton).

New productions included:

Nov. 27, 1981. *Swan Lake*. *Choreography*, Pepita and Ivanov with additional choreography by Peter Wright; *producers*, Peter Wright and Galina Samsova; *designer*, Peter Prowse. On the opening night at the Palace Theatre, Manchester, *Odette/Odile* was danced by Galina Samsova and *Prince Siegfried* by David Ashmole.

March 2, 1982. *Quartet*, the second movement of a full-length MacMillan ballet premiered in April (see below); *music*, Verdi; *designer*, Deborah Williams. *Dancers*, Kelly, Myers, Samsova and Tait.

*Pas de Six* from *La Vivandière* by Saint-Léon, revived by Ann Hutchinson; *music*, Pugnî. The leading roles on the opening night were danced by Margaret Barbieri and Roland Price.

*Confessional*, based on the Browning poem. *Choreography*, Gore, revived by Sally Gilmour; *music*, Sibelius; *designer*, Andrée Howard. The dancers on the opening night were Marion Tait and Carl Myers and the poem was read by Mary Miller.

In addition to performing at their home theatre in London, the company also toured to Plymouth for three weeks, to Oxford, Newcastle-upon-Tyne, Manchester, Birmingham, Glasgow, Leeds, Stratford-on-Avon, Liverpool, Norwich, Eastbourne, Bristol, Bournemouth and Milton Keynes. At the 1982 Aldeburgh Festival the company performed *Quartet*, *Danses concertantes*, *La Vivandière* pas de six and *Night Moves*. Overseas tours were to Yugoslavia in October on a ten-day British Council tour, which included two performances at the Bemus Festival, and to Monte Carlo in December where nine performances were given at the Opera House.

The company also gave two Royal Gala performances during the season, both attended by H.R.H. Princess Margaret. The first was given at Bristol on April 7 in aid of Wells Cathedral and the second at Sadler's Wells Theatre on May 20 in aid of the Sadler's Wells Theatre Appeal Fund. The Royal Gala in Bristol saw the first performance of MacMillan's *Quartet* in full. The ballet is set to Verdi's String Quartet in E minor, the first movement being choreographed as a pas de deux for Elisabetta Terabust and Peter Schaufuss, premiered in Italy in February. The second movement, for four dancers, was choreographed to fill a gap in the Sadler's Wells' spring programme when MacMillan's

new project, *Noctuary*, was postponed, and dances were set to the remaining two movements for the Gala premiere of the complete ballet. The third movement provided another pas de deux and the fourth, a finale for all eight dancers. The Gala on May 20 included the first stage presentations of Ashton's ballet *Pas de legumes* from the 1979 film "Stories from a Flying Trunk", and MacMillan's pas de deux to the first movement of Chopin's Sonata No. 3 choreographed for a television programme, "A Lot of Happiness". There were also British premieres of three works; van Manen's pas de deux *Sarcasm* performed by artists of the Dutch National Ballet, Stevenson's pas de deux *Vivaldi* (to the Winter movement of *The Four Seasons*) performed by dancers from the Houston Ballet, and Deane's pas de deux *Impromptu* danced by Sibley and Wall.

#### LONDON FESTIVAL BALLETS (1950)

Festival Ballet House, 39 Jay Mews, S.W.7.

Productions of full-length ballets from the repertoire were *La Sylphide* (Schaufuss after Bournonville; 1979), *Rosalinda* (Hynd; 1979), *Coppélia* (Carter after Pepita/Saint Léon; 1969), *The Sleeping Beauty* (Nureyev after Pepita; 1975), *Giselle* (Skeaping after Perrot, Coralli, Pepita; 1971), and *Romeo and Juliet* (Nureyev; 1977).

Programmes also included combinations of one-act ballets, including the following from the repertoire; *The Sanguine Fan* (Hynd), *Les Sylphides* (Markova after Fokine) and *Etudes* (Lander).

A new production of *Swan Lake* was introduced into the repertoire on May 25, 1982. *Choreography*, Field after Pepita and Ivanov; *music*, Tchaikovsky; *designer*, Carl Toms. On the opening night *Odette/Odile* was danced by Evelyne Desutter and *Prince Siegfried* by Jay Jolley.

One-act ballets performed for the first time were:

Oct. 15, 1981. *Verdi Variations*. *Choreography*, André Prokovsky; *music*, Verdi; *designer*, Peter Farmer.

Dec. 30, 1981. *Switch Bitch*. *Choreography*, Trevor Wood (a Soloist with the company); *music*, Shostakovitch. The piece, based on a Roald Dahl story, was designed by Michael Annals.

*Henri Biotte*, Kevin Richmond; *Sir Oswald Cornelius*, Matz Skoog; *Dictator*, Dominic Hickie; *Mrs. Elvira Ponsonby*, Christopher Mercer; *Simone Gautier*, Mary McKendry.

May 3, 1982. London premiere of *The Storm*, premiered in the provinces in May 1981. Based on an Ostrovsky play the ballet was choreographed by André Prokovsky; *music*, Shostakovitch, arranged and orchestrated by John Riley; *designer*, Peter Farmer.

*Katya*, Patricia Ruanne; *Tikhon*, Terry

Hayworth; *Mme. Kabanova*, Kathleen Munson; *Boris*, Frederic Jahn-Werner; *Varya*, Andria Hall; *Varya's Young Man*, Ben van Cauwenbergh; *Beggar Woman*, Jane Scott.

London Festival Ballet has no home theatre and all productions were performed at the London Coliseum, the London Festival Hall or on tour in Hull, Stafford, Treorchy, Aldeburgh (Snape Maltings), Norwich, Nottingham, Leeds, Manchester, Blackpool, Bristol, Eastbourne, Southampton, Cardiff and Oxford.

The company also gave its traditional Christmas season of performances of *The Nutcracker* (Hynd; 1976) at the London Festival Hall, and gave *Romeo and Juliet*, with Nureyev in the lead role, at the London Coliseum as part of the Nureyev Season in June 1982 (see above).

#### BALLET RAMBERT (1926)

Mercury Theatre, Ladbroke Road, W.11.

Performances from the repertoire were *Dancing Day* (Bruce), *The Rite of Spring* (Alston), *Nuthouse Stomp* (Warren), *Ghost Dances* (Bruce), *Rainbow Ripples* (Alston) and *Unsuitable Case* (Owen).

New works were:

Oct. 9, 1981. *Night Music*. *Choreographer*, Richard Alston; *music*, Mozart; *designer*, Howard Hodgkin.

Oct. 16, 1981. *Lonely Town, Lonely Street*. *Choreographer*, Robert North; *music*, popular song music by Bill Withers; *designer*, Andrew Storer.

Jan. 30, 1982. *Rumba*. *Choreographer*, Robert North; *music*, de Lucia. Created for and danced by students of the Rambert Academy.

March 11, 1982. *Requiem*. *Choreographer*, Christopher Bruce; *music*, Weill and Brecht's "Mahagonny Songspiel" and "Das Berliner Requiem"; *designer*, Pamela Marre.

March 18, 1982. *Airs*. *Choreography*, Paul Taylor, mounted on this company by Eileen Cropley; *music*, Handel; *designer*, Gene Moore.

May 3, 1982. *Pribaoutki*. *Choreographer*, Robert North; *music*, Stravinsky; *designer*, Andrew Storer.

July 27, 1982. *Apollo Distraught*. *Choreographer*, Richard Alston; *music*, Nigel Osborne flute concerto; *designer*, Peter Mumford.

*Fantasia*. *Choreographer*, Richard Alston; *music*, Mozart; *designer*, Anne Guyon.

The company toured to Newcastle, Leeds, Oxford, Edinburgh, Glasgow, Liverpool, Cardiff, Brighton, Southampton, Coventry, Bristol, Mold and Nottingham. Performances were also given as part of the "Big Top" season in London in July 1982, and a choreographic workshop at the Riverside Theatre, London in April 1982.

#### LONDON CONTEMPORARY DANCE THEATRE (1967)

The Place, 17 Dukes Road, W.C.1.

The company's 1981/82 season opened on August 31, 1981 with its debut at the 1981 Edinburgh Festival, premiering *Dances of Love and Death*, a full-length work by Robert Cohan specially commissioned by the Festival with the aid of the Tennant Caledonian Award. The specially commissioned score was by Carl Davis with additional music by Conlon Nancarrow and *designs* by Norberto Chiesa. The work was subsequently performed in Bristol during the autumn tour, given its London premiere at the first night of the Sadler's Wells season, and from April to June 1982 was toured to Liverpool, Leeds, Newcastle, Glasgow, Oxford and Leicester.

The Autumn 1981 tour visited Warwick, York, Manchester, and Bristol and the Spring 1982 tour Exeter, Mold, Blackpool, Ashton-under-Lyne and Stirling. Repertoire works performed on tour and during the four-week season at Sadler's Wells Theatre, London were *Death and the Maiden* (North), *Troy Games* (North), *Eos* (Cohan), *Masque of Separation* (Cohan), *Cell* (Cohan), *Khamsin* (Cohan), *Class* (Cohan), *Beyond The Law* (Bhuller), *The Homerun* (Taylor), *Recall* (Lee), *Aspects* (Harding-Irmer), and the central duet from *Changing Your Mind* (Wagoner).

New works were:

Oct. 12, 1981, world premiere in Warwick *Free Setting* by Siobhan Davies; *specially commissioned score for piano*, Michael Finnis; *designer*, David Buckland. The work received its London premiere on December 1 and was also performed on the Spring tour.

Nov. 24, 1981. London premiere of *Songs and Dances* by Robert North; *music*, Schubert; *designer*, Andrew Storer.

Feb. 4, 1982, English premiere in Exeter of *The Brood* by Dick Kuch, inspired by Brecht's "Mother Courage and Her Children"; *music*, Pierre Henry; *designer*, François Barbeau.

The company's activities also included a one-week tour in Poland in September 1981 and a week's teaching residency in Hampshire in January 1982.

#### THE SCOTTISH BALLET (1969)

261 West Princes Street, Glasgow 4.

Performances from the repertoire were *Ursprung* (Maldoom), *Jeux* (Darrell), *Othello* (Darrell), *Five Ruckert Songs* (Darrell), *The Water's Edge* (North), *Belong* (Vesak), *Three Dances to Japanese Music* (Carter), *Napoli* (Bournonville), *Comme La Princesse Salome Est Belle Ce Soir* (Bejart), *Adagietto* (Arai), *Vespri* (Prokovsky) and the full-length ballets *La Sylphide* (Bournonville; 1973), *Cinderella*

(Darrell; 1979), *The Nutcracker* (Ivanov, Darrell; 1973), *Tales of Hoffman* (Darrell; 1972).

New productions were:

Aug. 4, 1981. British premiere of *Symphony in D*. *Choreography*, Jiri Kylian; *music* by Haydn; *designer*, Tom Schenk. Also premiere of *The Kp Index*, a pas de deux by Jack Carter performed by McDonald and Bart.

Aug. 7, 1981. *All The Sun Long*. *Choreography*, Garry Trinder; *music* by Bartok (Piano Concerto No. 3); *designer*, Kim Baker; performed by Bart, Hantam, Moore, Ohara, and Tyers. Also premiere of *Steps To*. *Choreography*, Peter Royston; *music*, Pachelbel; performed by Dear, Packer, Stewart and Tyers.

March 31, 1982. *Romeo and Juliet*. *Choreographer*, John Cranko; *music*, Prokofiev; *designer*, Jürgen Rose.

*Juliet*, Elaine Macdonald; *Romeo*, Davide Bombana; *Nurse*, Ann Baird; *Tybalt*, Jonathan Kelly; *Mercutio*, Vincent Hantam; *Benvolio*, Christopher Gillard; *Paris*, Christopher

Long; *Lord Capulet*, Gordon Aitken; *Lady Capulet*, Sally Collard-Gentle; *Lord Montague*, Garry Trinder; *Lady Montague*, Judy Mohkey.

The productions were performed at the King's Theatre, Edinburgh and the Theatre Royal, Glasgow, and on tour in Venice, Spain (Santander, San Sebastian, St. Jean de Luz, Barcelona), Stirling, Inverness, Bristol, Belfast, Perth and Dumfries.

The company also undertook a "Ballet for Scotland" tour on behalf of the Scottish Tourist Board's "Showcase" season, performing in smaller towns and communities around the country. The programme was *Pas de Quatre* (Dolin), *Pie Jesu* (Trinder), *Othello* (Darrell) and *Chopin Dances* (Trinder). A specially designed programme of ballet was taken simultaneously to schools by a section of the company.

The "Ballet in Glasgow" season in February 1982 introduced *Variations on a Rococco Theme for Cello and Orchestra* by Peter Darrell, to music by Tchaikovsky.

## BRASS BAND CHAMPIONS

### The British Open Brass Band Championships 1982

Test Piece—*Three Figures*.

1. Besses o' th' Barn (R. Newsome)—191 pts.
2. Fairey Engineering Works (G. Brand)—189 pts.
3. G.U.S. (K. Wilkinson)—186 pts.
4. Desford Colliery Doughty (H. Snell)—184 pts.
5. Ever Ready (E. Cunningham)—182 pts.
6. Leyland Vehicles (R. Evans)—181 pts.

### The National Brass Band Championship of Great Britain 1981

- Championship*.—Black Dyke Mills (P. Parkes)  
*Second Section*.—Stalybridge (Tetley-Walker) (E. Woodhouse)  
*Third Section*.—Yorkshire Bus Co. (E. Griffiths)  
*Fourth Section*.—Rhodian Brass (D. Windle)  
*European Championships*.—Brighouse & Rastrick (J. Scott)  
*Bullin's Youth Band*.—Kilmarnock Area Schools Band (A. Keachie)

## DRAMATIC SUMMARY, 1981-82

One of the major events in the theatrical world was the long-awaited opening of the Royal Shakespeare Company's new home at the Barbican in June. The new theatres have attracted adverse comment from actors and audience alike, with the studio theatre, the Barbican Pit, the particular target for criticism. However, it would be rash to attempt to pass a definitive judgment until the company have had time to adapt to their new surroundings. The main theatre, seating 1,160 people, with separate entry points to each row of seats, is an impressive auditorium, and it is to be hoped that the Royal Shakespeare Company find adequate outlet for their talents in the midst of the Barbican complex. The opening production was *Henry IV, Parts I and II*, directed by Trevor Nunn, with Peter Flannery's *Our Friends in the North* inaugurating the Pit.

With the theatre in London still suffering from the recession, and the continuing burden of Value Added Tax still bitterly resented and blamed for much of the trouble, the Royal Shakespeare Company will have to attract near-capacity audiences to avoid financial difficulties in the years ahead. Several London theatres have remained closed during the past years, with many others in financial difficulty, the Royal Court, the Round House, and the recently rebuilt Mermaid all being affected. The National Theatre continued to justify its existence with such productions as Aeschylus's *The Oresteia* and its first musical, *Guys and Dolls*, which few commercial managements could have risked, the former for the length of gestation and rehearsal behind what was an esoteric but brave venture, and the latter with the lavishness of its sets.

Several curiosities appeared on the London stage, notably the London debut of Elizabeth Taylor, the film actress, in Lillian Hellman's *The Little Foxes*. Miss Taylor, as Regina Giddins, dominated the proceedings, attracting much publicity, and an apparently indiscriminating audience, in spite, or because of seats priced at £12.50. However, the play was undistinguished and the acting little better, the dramatic impact towards the end of the run being severely reduced by an injury to Miss Taylor which necessitated her being propelled around the stage in a wheelchair by a stagehand, which made a nonsense of the play's climax.

A little-known play by a Polish "playwright", Karol Wojtyła, also surfaced in London, some three days before the visit to Britain of Pope John Paul II. *The Jeweller's Shop* was a simple, sentimental tale, the only reason for its production being the fact that its author was the Pope himself. Also sentimental, but not cloyingly so, was Helene Hanff's *Eighty-Four Charing Cross Road*, the deceptively slight account of the correspond-

ence between an American author and the manager of a London bookshop, which made for a captivating evening's entertainment. Less enthralling was *Her Royal Highness . . . ?* by Royce Ryton and Ray Cooney, which dramatised events before the wedding of the Prince of Wales to Lady Diana Spencer, who was imagined as having doubts about her betrothal, causing the substitution of an Australian barmaid as her stand-in. In dubious taste, it was an abuse of dramatic licence to use the Royal family in such a manner. Curiously, life imitated art as far as drama was concerned, for the Queen attended a performance of Shaw's *The Dark Lady of the Sonnets* at the Open Air Theatre, Regent's Park, shortly after an intruder had entered her bedroom at Buckingham Palace: Shaw's play concerned a similar problem that beset Elizabeth I, although her intruder had some merit, in being Shakespeare.

## Farce

Michael Frayn's *Noises Off* was a witty and cleverly plotted tale about the tribulations of a provincial theatre company, with Paul Eddington prominent amongst a distinguished cast. The author's quest for perfection led him to rewrite the ending several times, before the play's West End transfer from Hammersmith. Alan Ayckbourn's latest play, *Way Upstream*, sprang a leak, however, and its opening at the National Theatre was postponed. Set on a boat, which was supposed to move on a complex series of rails, in a water tank, the play has suffered from technical problems.

The talents of Judy Geeson and Martin Jarvis were wasted in a farce about sex shops at the Garrick, called *Caught in the Act*, but *Private Dick* at the Whitehall featured Robert Powell in a clever and affectionate pastiche of Raymond Chandler, in which the author was imagined as engaging his creation Philip Marlowe to track down his missing manuscript. J. P. Donleavy's *The Beastly Beauties of Balthazar B* at the Duke of York's was an inconsistent stage version of the novel, somewhat redeemed by Simon Callow's performance. At the Globe, Eric Idle's *Pass the Butler* was weakly structured, although suffused with jokes.

## DRAMA

The Mermaid Theatre, after a misguided production of extracts of *Julius Caesar* and *Anthony and Cleopatra* called *Shakespeare's Rome*, redeemed its reputation with a remarkably provocative and intelligent dramatisation by Christopher Hampton of George Steiner's novel, *The Portage to San Cristobal of A.H.* The A. H. of the title is

Adolf Hitler, and the play imagines that he is still alive in South America, where he is captured and tried by four Israelis. Alec McCowen excelled in the main role.

At the Half Moon, Andrew Carr's *Instant Enlightenment Including V.A.T.* exposed in powerfully dramatic form the current, somewhat subversive, fad for self-improvement seminars which revolve around brain-washing techniques of mind-control. Julian Mitchell's *Another Country*, which opened in Greenwich before deservedly transferring to the West End, was set in an English public school in 1932. The play endeavoured to establish that the formative years of the Cambridge spies and traitors of the post-war era were their schooldays, and was well-written and acted, with Rupert Everett particularly noticeable in an excellent young cast.

### ROUND AND ROUND

Arthur Schnitzler's *La Ronde*, which came out of copyright at the beginning of 1982, has acquired a degree of notoriety out of all proportion to its content. First performed in its entirety in Germany in 1920, this cyclical account of ten sexual encounters caused such uproar that the playwright banned further productions. Now it serves as a historical curiosity, an account of Viennese morals and customs at the turn of the century, the point of which was lost by the first production, that at Manchester's Royal Exchange, where, renamed *The Round Dance*, the play was performed out of context. The Royal Shakespeare Company's Aldwych performance was an improvement, but the flurry of productions only served to emphasise the play's limitations.

### REVIVALS

Arthur Miller's second play, *All My Sons*, was deservedly revived at Wyndham's Theatre, its first London production since 1948. At the Lyric, Shaftesbury Avenue, Shaw's *Arms and the Man* was distinguished by fine performances from Richard Briers and Peter Egan, whilst Robert Hardy impersonated the dramatist in Jerome Kilty's *Dear Liar* at the Mermaid, accompanied by Siân Phillips. Angela Huth's *The Understanding* had its opening at the Strand delayed by the untimely death of Celia Johnson, whose part was taken by Joan Greenwood, but the play was disappointing. More impressive was Catherine Hayes' powerful drama at Hampstead, *Skirmishes*, about a dying woman and her two daughters, with a fine performance from Frances de la Tour.

Other productions included Andrew Lloyd Webber's *Song and Dance*, featuring Marti Webb and Wayne Sleep, and *Windy City*, a

musical version of Ben Hecht's *The Front Page*, with Dennis Waterman. *The Mitford Girls* and *Underneath the Arches* found homes in the West End after their Chichester performances.

### NATIONAL THEATRE

Tom Stoppard's *On the Razzle* at the Lyttelton, produced by Peter Wood, was based on Johann Nestacy's 1842 Viennese farce, *Einen Jux Will Er Sich Machen*, which itself drew on Oxenford's *A Day Well Spent*. The piece has also been resurrected in Thornton Wilder's *The Matchmaker*, which itself inspired *Hello Dolly!* With lavish sets and costumes, the tale of two apprentices' night on the town displays all Stoppard's linguistic virtuosity, with Felicity Kendal and Dinsdale Landen giving fine performances, but it was felt that some of the subtler nuances of Nestroy's plot had been sacrificed for comic effect.

The main Olivier production was Peter Hall's ambitious version of Aeschylus's trilogy, *The Oresteia*, consisting of *Agamemnon*, *Choephoroi* and *Eumenides*. Tony Harrison's imaginative translation and Harrison Birtwistle's music combined effectively in this ritualistic drama. The all-male company of sixteen actors wore full masks, with varying degrees of success, but the production was a bold and worthwhile venture, well-suited to the Olivier stage, which had been modelled on the amphitheatre at Epidauros.

The National Theatre's first musical production, *Guys and Dolls*, was lavishly staged, and a resounding success. Based on the story and characters of Damon Runyon, with music and lyrics by Frank Loesser, Bob Hoskins gave a fine performance as Nathan Detroit, well-supported by Julia McKenzie as Miss Adelaide. However, the appearance of Paul Scofield in Keith Dewhurst's version of *Don Quixote* raised expectations it did not fulfil. Arnold Wesker's *Caritas*, based on an anchoress's experiences, walled up at the time of the Peasants' Revolt, was too polemical and not well enough written to make significant drama from the bizarre situation. Michael Bogdanov's production of Molière's *Le Malade Imaginaire (The Hypochondriac)* by concentrating on the comedy, lost sight of the play's underlying serious intent.

Other productions included Chekhov's *Uncle Vanya*, directed by Michael Bogdanov, with Michael Bryant as Vanya, Peter Gill's production of Büchner's *Danton's Death*, *True West* by Sam Shephard, directed by John Schlesinger, *The Second Mrs Tanqueray* by Pimero, with Felicity Kendal, directed by Michael Rudman, Edward Bond's *Summer*, and Heinrich von Kleist's *The Prince of Homburg*, directed by John Burgess.

## ROYAL SHAKESPEARE COMPANY

At the Aldwych, Alexander Solzhenitsyn's *The Love-Girl and the Innocent* proved a dramatic, compelling work. Set in a corrective labour camp, with a fine set designed by Ralph Koltai, the play was occasionally slow-moving, with echoes of *One Day in the Life of Ivan Denisovich*, but deserved its showing on the London stage. Also impressive was C. P. Taylor's *Good*. An R.S.C. production which was first shown at the Warehouse, it transferred to the Aldwych after the main company's move to the Barbican. Alan Howard was excellent as Halder, a young German professor who becomes a member of the S.S. before taking up a post at Auschwitz. Joe Melia gave good support as a Jewish analyst in Howard Davies's production of a clever and thought provoking play. Transfers from Stratford included *Richard II* and *Richard III*, with Alan Howard taking the title roles in Terry Hands' productions, and Michael Pennington as Hamlet in John Barton's production, and at the Warehouse, Ron Daniels's much acclaimed production of the seldom performed *Timon of Athens*, with Richard Pasco, continued its successful run after moving from Stratford's Other Place.

At the Barbican, after Trevor Nunn's productions of *Henry IV, Parts I and II*, *All's Well That Ends Well*, *The Winter's Tale* and *A Midsummer Night's Dream* were transferred from Stratford, with *A Doll's House*, *The Twin Rivals* and *Money* arriving from the Other Place to be shown at the Pit.

At Stratford, *Titus Andronicus* and *Two Gentlemen of Verona* were presented in a double bill. John Barton's production employed the device of having a group of strolling players performing in a barn, but substantial cuts had to be made from both plays, which were competently performed, without providing any new insights. Trevor Nunn's production of *All's Well That Ends Well*, set in the early 20th century, was a magnificent achievement, with Harriet Walter excellent, and Peggy Ashcroft making a memorable return to the stage. Other Stratford productions were *Much Ado About Nothing*, directed by Terry Hands, with Sinead Cusack as *Beatrice*, *Macbeth* with Bob Peck and Sara Kestelman, directed by Howard Davies, *King Lear* with Michael Gambon, Antony Sher and Jenny Agutter, directed by Adrian Noble, and *The Tempest* with Derek Jacobi, Bob Peck and Alice Krige, directed by Ron Daniels.

Productions at the Other Place included *The Witch of Edmonton* by Dekker, Ford and Rowley, directed by Barry Kyle, Edward Bulwer-Lytton's *Money*, Ibsen's *Peer Gynt* and Edward Bond's *Lear*.

## PRODUCTIONS

Among London productions between Septem-

ber 1, 1981 and August 31, 1982 were the following:

ALBURY: St. Martin's Lane, W.C.2. (1981) Oct. 6. *Children of a Lesser God* by Mark Medoff (transferred from Mermaid).

ADELPHI: (1981) Nov. 18. Gilbert and Sullivan season, with D'Oyly Carte.

ALDWYCH: W.C.2. (1981). Sept. 8. *The Love-Girl and the Innocent* by Alexander Solzhenitsyn, translated by Jeremy Brooks and Kitty Hunter Blair, with Dearbhla Molloy and James Hazeldine. Sept. Shakespeare's *Hamlet*, with Michael Pennington and Carol Royle. Oct. 9. Shakespeare's *Romeo and Juliet*, with Anton Lesser, Judy Buxton, Brenda Bruce and Jonathan Hyde. Nov. 10. Shakespeare's *Richard II*, with Alan Howard, David Suchet and Raymond Westwell. Nov. 24. Shakespeare's *Richard III*, with Alan Howard, Richard Pasco, Barbara Leigh-Hunt and Sinead Cusack. (1982) Jan. 11. *La Ronde*, by Arthur Schnitzler, with Susan Fleetwood, Richard Pasco and Barbara Leigh-Hunt. Feb. *The Forest* by Alexander Ostrovsky, with Alan Howard. Apr. *Good* by C. P. Taylor, with Alan Howard and Joe Melia.

AMBASSADORS: West St., Cambridge Circus, W.C.2. (1981) Oct. 14. *Harvest* by Ellen Dryden, with Lynn Farleigh, Gwen Taylor, Sylvestra Le Touzel, David Horovitch and Donald Gee. Nov. 26. *84 Charing Cross Road* by Helene Hanff, with Rosemary Leach and David Swift.

APOLLO: Victoria, S.W.1. (1982) Feb. 23. *The Housekeeper* by Frank D. Gilroy, with Leo McKern, Clive Merrison and Connie Booth. March 29. *Season's Greetings* by Alan Ayckbourn, with Bernard Hepton, Barbara Ferris and Peter Vaughan.

ARTS: Gt. Newport St., W.C.2. (1981) Sept. *Macready!* with Frank Barrie. (1982) Feb. *Playing the Game* by Jeffrey Thomas, with Christopher Barr.

ASTORIA: Charing Cross Rd., W.C.2. (1982) June 15. *Wild Wild Women* by Michael Richmond and Nola York, with Susannah Fellows and Lesley Joseph.

BARBICAN: E.C.2. (1982) June 9. Shakespeare's *Henry IV, Parts I and II*, with Patrick Stewart, Gerard Murphy, Joss Ackland and Miles Anderson. June 17. Shakespeare's *A Midsummer Night's Dream*, with Harriet Walter, Jane Carr, Mike Gwilym, Joseph Marcell and Juliet Stevenson. July 7. Shakespeare's *All's Well that Ends Well*, with Harriet Walter, Philip Franks, Stephen Moore, Peggy Ashcroft, and Cheryl Campbell. July 21. Shakespeare's *The Winter's*

*Tale*, with Patrick Stewart, Gemma Jones and Sheila Hancock.

**BARBICAN PIT:** *June 10. Our Friends in the North* by Peter Flannery, with David Whitaker, Jim Broadbent and Peter Chelsom. *June. A Doll's House* by Henrik Ibsen, translated by Michael Meyer, with Cheryl Campbell and Stephen Moore. *June. Money* by Edward Bulwer-Lytton, with George Rainstrick, Juliet Stevenson and Miriam Karlin. *July. The Twin Rivals* by George Farquhar, with Miriam Karlin, Mike Gwilym, Simon Templeman and Roger Allam.

**CAMBRIDGE:** Earham St., Cambridge Circus, W.C.2. (1982) *May 20. Hedda Gabler* by Henrik Ibsen, translated by Una Ellis-Fermor, with Susannah York, Tom Bell, Tom Baker, Ralph Bates, Paula Wilcox and Irene Handl.

**DUCHESS:** Catherine St., W.C.2. (1982) *May 12. Funny Turns* with Victoria Wood and the Great Soppingo.

**DUKE OF YORK'S:** St. Martin's Lane, W.C.2. (1981) *Sept. 30. The Beastly Beatitudes of Balthazar B* by J. P. Donleavy, with Simon Callow and Patrick Rycroft.

**FORTUNE:** Russell St., W.C.2. (1981) *Nov. 9. The Brothers Karamozov* by Dostoyevsky, adapted by Richard Crane, with Bruce Alexander, Stephen Boxer, Peter Kelly and Will Knightley. (1982) *Here's a Funny Thing* by R. W. Shakespeare, with John Bardon. *May 11. Fear and Loathing in Las Vegas* by Hunter S. Thompson, with Jeffrey Chiswick, Stuart Fox and Peter Marinker.

**GARRICK:** Charing Cross Rd., W.C.2. (1981) *Sept. Caught in the Act* by Trevor Cooper, with Judy Geeson and Martin Jarvis. (1982) *Jan. 18. No Sex Please, We're British* (transferred from Strand).

**GLOBE:** Shaftesbury Ave., W.1. (1981) *Oct. 8. The Mitford Girls* (Chichester Festival production). (1982) *Jan. 26. Pass the Butler* by Eric Idle, with Madge Ryan, Peter Jones, John Fortune and William Rushton. *June 8. A Personal Affair* by Ian Curteis, with Gerald Harper and Virginia McKenna. *Aug. 4. Design for Living* (transferred from Greenwich).

**GREENWICH:** Croom's Hill, S.E.10. (1981) *Sept. 29. The Deep Blue Sea* by Terence Rattigan, with Dorothy Tutin and Clive Francis. *Nov. 4. Another Country* by Julian Mitchell, with Rupert Everett, Joshua Le Touzel, David William and Michael Parkhouse. *Dec. The School for Scandal* by R. B. Sheridan, with Nina Thomas, Paul Brooke, Louise Breslin, Kenneth Farrington, Jennie Stoller and James Coyle. (1982) *March 15. The Assassin* by Jean-Paul Sartre, with

James Simmons and Edward Woodward. *June 22. Design for Living* by Noel Coward, with Maria Aitken, Gary Bond and Ian Ogilvy. *Aug. 7. Mindkill* by Don Webb, with Derek Foulds and Diana Quick.

**HALF MOON:** Mile End Rd., E.1. (1981) *Sept. 24. Instant Enlightenment Including V.A.T.* by Andrew Carr, with Robin Nedwell, Robin Halstead, Joanna Monro and Ralph Bates. (1982) *April 29. W.C.P.C.* by Nigel Williams, with Robert Stephens, Phil Smeeton and Bill Stewart.

**HAMPSTEAD:** Swiss Cottage, N.W.3. (1981) *Oct. In the Mood* by Michael Abbensetts, with Norman Beaton and Allister Bain. *Dec. 9. Incident at Tulse Hill* by Robert East, with Michael J. Jackson, Lindsay Ducan and Alison Fiske. (1982) *Feb. 1. Skirmishes* by Catherine Hayes, with Frances de la Tour, Gwen Taylor and Anna Wing. *April. Meetings* by Mustapha Matura with Rudolph Walker. *June. Dreyfus...* by Jean Claude Grumberg, translated by Tom Kempinski, with Alfred Molina and Gary Waldhorn. *Aug. 16. Rocket to the Moon* by Clifford Odets, with Mary Maddox, John Woodvine and Annabel Leventon.

**HAYMARKET:** Theatre Royal, S.W.1. (1982) *Feb. 11. Hobson's Choice* by Harold Brighouse, with Penelope Keith, Anthony Quayle and Trevor Peacock. *April 1. A Coat of Varnish* by Ronald Millar, with Peter Barkworth, Anthony Quayle, Michael Denison and Dulcie Gray. *June 10. Captain Brassbound's Conversion* by G. B. Shaw, with Penelope Keith, John Turner and Michael Denison. *Aug. 5. Uncle Vanya* by Anton Chekhov, translated by John Murrell, with Donald Sinden, Frances de la Tour, Ronald Pickup, Sheila Gish, Bill Fraser and Harry Andrews.

**LYRIC:** Hammersmith, W.6. (1981) *Oct. 1. Roll on Four O'Clock* by Colin Welland, with Windsor Davies, Clive Swift and Nick Conway. *Oct. Into Europe* by Ron Hutchinson, with Philip McGough and Philip Jackson. *Nov. 26. The Soldier's Fortune* by Thomas Otway, with Hugh Paddick, James Aubrey, Peter Woodward, Dilys Watling and Brian Murphy. (1982) *Feb. 23. Noises Off* by Michael Frayn, with Paul Eddington, Nicky Henson, and Jan Waters. *June 1. Talley's Folly* by Lanford Wilson, with Hayley Mills and Jonathan Pryce. *July 20. Beowulf* with Julian Glover. *Aug. 10. She Stoops to Conquer* by Oliver Goldsmith, with Betty Marsden, Karen Archer, Nigel Terry, Hugh Fraser, Ron Cook and Tracey Ullman.

**LYRIC STUDIO:** Hammersmith, W.6. (1981) *Sept. 14. The Case of David Anderson QC* by John Hale, with Corin Redgrave. (1982)

Jan. 4. *The Ascent of Wilberforce III* by Chris Judge Smith and J. Maxwell Hutchinson, with Paul Dalton. Feb. 9. *Where there is Darkness* by Caryl Phillips, with Rudolph Walker, Dearbhla Molloy and Yvonne Gidden. May 24. *Berenice* by Racine, translated by John Cairncross, with Peter Eyre, Martyn Stanbridge and Sheila Gish.

LYRIC: Shaftesbury Ave., W.1. (1981) Oct. 15. *Arms and the Man* by G. B. Shaw, with Richard Briers, Peter Egan, Alice Krige, Richard Pearson and Pat Heywood. (1982) April 28. *Summit Conference* by Robert David MacDonald, with Glenda Jackson, Georgina Hale and Gary Oldman.

MAYFAIR: Stratton St., W.1. (1981) Sept. 15. *Three Men in a Boat* by Jerome K. Jerome, with Jeremy Nicholas. (1982) March 25. *Boogie*.

MERMAID: Blackfriars, E.C.4. (1981) Oct. 13. *Shakespeare's Rome* with Carmen du Sautoy, Morgan Sheppard and Timothy Dalton. (1982) Feb. 17. *The Portage to San Cristobal of A.H.* adapted by Christopher Hampton, with Alec McCowen. May 4. *Dear Liar* by Jerome Kilty, with Robert Hardy and Siân Phillips.

NATIONAL THEATRE: South Bank, S.E.1.  
COTTESLOE: (1981) Oct. 7. *Caritas* by Arnold Wesker, with Patti Love and Frederick Treves. Dec. 10. *True West* by Sam Shephard, with Bob Hoskins, Antony Sher, Patricia Hayes and Shane Rimmer. (1982) Jan. 27. *Summer* by Edward Bond, with Yvonne Bryceland and Anna Massey. April 22. *The Prince of Homburg* by Heinrich von Kleist, with Patrick Drury, Lindsay Duncan, and Robert Urquhart. July. *The Beggar's Opera* by John Gay, with Paul Jones, Belinda Sinclair and Imelda Staunton. LYTTTELTON: (1981) Sept. 22. *On the Razzle* by Tom Stoppard, with Ray Brooks, Felicity Kendal, Michael Kitchen and Dinsdale Landen. Dec. 30. *The Second Mrs. Tanqueray* by Pinero, with Felicity Kendal, Leigh Lawson, Ciaran Madden and Neil Stacy. (1982) May 18. *Uncle Vanya* by Chekhov, with Michael Bryant, Patti Love, Cheri Lunghi and Dinsdale Landen. OLIVIER: (1981) Oct. 22. *The Hypochondriac* by Molière, translated by Alan Drury, with Clive Arrindill, Michael Bryant, Anna Carteret, Michael Fenner, Basil Henson, Polly James and Daniel Massey. Nov. 28. *The Oresteia* by Aeschylus, adapted by Tony Harrison. March 9. *Guys and Dolls* by Frank Loesser, Jo Swerling and Abe Burrows, with Ian Charleson, Julie Covington, Bob Hoskins and Julia McKenzie. June 18. *Don Quixote* by Keith Dewhurst, with Paul Scofield and Tony Hayward. July 21. *Danton's Death* by Georg Büchner, adapted by Howard Brenton and

Jane Fry, with Brian Cox, John Normington and Frances Vine.

PALACE: Shaftesbury Ave., W.1. (1981) Nov. 3. *Roll on Four O'Clock* by Colin Welland (transferred from Lyric, Hammersmith). Nov. 21. *Her Royal Highness . . . ?* by Royce Ryton and Ray Cooney, with Marc Sinden, Joyce Cummings, Francis Lloyd, Gwen Nelson, Eva Lohman and Moror Kennedy.

PRINCE OF WALES: Coventry St., W.1. (1982) March 4. *Underneath the Arches* (Chichester Festival Theatre production).

QUEEN'S: Shaftesbury Ave., W.1. (1982) March 9. *Another Country* (Greenwich production).

REGENT'S PARK (OPEN AIR): W.1. (1982) June 7. Shakespeare's *The Taming of the Shrew*, with Kate O'Mara and Christopher Neame. June 21. Shakespeare's *A Midsummer Night's Dream*, with Kate O'Mara, Janet Spenser-Turner, Christopher Neame and Christopher Biggins. July 19. *The Admirable Bashville* and *The Dark Lady of the Sonnets* by G. B. Shaw, with Peter Woodward, Emily Richards, Helen Ryan and David Whitworth.

RIVERSIDE STUDIO: Hammersmith, W.6. (1982) June. *Artists and Admirers* by Alexander Ostrovsky, translated by Hanif Kureishi and David Leveaux, with David Belcher, Denis Holmes, Carmel McSharry and Michele Wade. July 30. *Macunaima* and *O Eternal Return* with Grupo de Teatro, Brazil.

ROUND HOUSE: Chalk Farm Rd., N.W.1. (1981) Oct. 2. *Mephisto* by Ariane Mnouchkine, translated by Barry Russell, with Ian McDiarmid and Clive Wood. (1982) Aug. 11. *The Cherry Orchard* by Chekhov, with Alison Fiske and Charles McKeown.

ROYAL COURT: Sloane Sq., S.W.1. (1981) Sept. 29. *Tibetan Inroads* by Stephen Lowe, with Kenneth Cranham and Sharon Duce. Nov. 5. *Borderline* by Hanif Kureishi, with David Beames, Nizwar Karanj and Rita Wolf. (1982) Feb. *Operation Bad Apple* by G. F. Newman, with Richard Wilson, Patrick Malahide and Nigel Terry. April 20. *Not Quite Jerusalem* by Paul Kember, with David Threlfall, Leslee Udwin and Kevin McNally. July 12. *Insignificance* by Terry Johnson, with Judy Davies and Ian McDiarmid.

SAVOY: Strand, W.C.2. (1982) March 31. *Noises Off* (transferred from Lyric, Hammersmith).

STRAND: Aldwych, W.C.2. (1982) Feb. 3. *Murder in Mind* by Terence Feely, with Nyree Dawn Porter, Roy Dotrice, Geoffrey

Davies, Basil Hoskins and Moira Redmond. *May 12. The Understanding* by Angela Huth, with Sylvestra Le Touzel, Joan Greenwood and Ralph Richardson.

THEATRE ROYAL: Drury Lane, W.C.2. (1982) *Feb. 4. An Evening's Intercourse* with Barry Humphries. *May 26. The Pirates of Penzance* by Gilbert and Sullivan, with Tim Curry, Pamela Stephenson, George Cole, Annie Ross, Sylvestre McCoy and Bonnie Langford.

THEATRE ROYAL: Stratford East, E.15. (1981) *Sept. Mrs. Tucker's Pageant* by Ken Hill, with Peggy Mount and Geoffrey Freshwater. *Nov. 11. Thick as Thieves* by Tony Marchant.

VAUDEVILLE: Strand, W.C.2. (1981) *Dec. 9. Cards on the Table* by Agatha Christie, with Gordon Jackson.

VICTORIA PALACE: S.W.1. (1982) *March 11. The Little Foxes* by Lillian Hellman, with Elizabeth Taylor. *July 21. Windy City* by Tony Macaulay and Dick Vosburgh, with Dennis Waterman, Anton Rodgers, Diane Langton, Victor Spinetti, Amanda Redman and Robert Longden.

WAREHOUSE (DONMAR THEATRE): Earlham St., W.C.2. (1981) *Good* by C. P. Taylor, with Alan Howard and Joe Melia. *Sept. 22. The Fool* by Edward Bond with Anton Lesser. *Oct. The Maid's Tragedy* by Beaumont and Fletcher, with John Carlisle and Sinead Cusack. *Nov. Shakespeare's Timon of Athens*, with Richard Pasco, Timothy Walker and John Carlisle. *Nov. Hansel and Gretel* by David Rudkin, with Brenda Bruce and Chris Hunter. (1982) *June 24. Aunt Mary* by Pam Gems, with Alfred Marks and Barry Jackson. *Aug. 10. Shakespeare's Hamlet* with Anton Lesser, Kathryn Pogson, Susan Engel and John Shrapnel.

WESTMINSTER; Palace St., S.W.1. (1982) *May 25. The Jeweller's Shop* by Karol Wojtyla, with Hannah Gordon, Gwen Watford, Paul Daneman, Christopher Blake, John Carson, Lalla Ward and Dominic Guard.

WHITEHALL: S.W.1. (1982) *June 30. Private Dick* by Richard Maher and Roger Michell, with Robert Powell, Lee Montague, Ronnie Letham and Elizabeth Richardson.

WYNDHAMS: Charing Cross Rd., W.C.2. (1981) *Nov. 4. All My Sons* by Arthur Miller, with Colin Blakely, Rosemary Harris, Garrick Hogan and Jill Baker. (1982) *Aug. 3. A Star is Torn* by Robyn Archer and Rodney Fisher.

YOUNG VIC: The Cut, S.E.1. (1981) *Nov. Shakespeare's The Winter's Tale*, with Joanna Dunham, Angharad Rees and Andrew Robertson. (1982) *Jan. 6. John Mortimer's Casebook* with Nigel Hawthorne and John Alderton. *Aug. 6. Shakespeare's Hamlet* with Edward Fox.

Among other productions outside London were the following:

STRATFORD MEMORIAL THEATRE: (Royal Shakespeare Company). (1981) *Sept. Titus Andronicus/Two Gentlemen of Verona* with Geoffrey Hutchings, Joseph Marcell, Patrick Stewart, Diana Berriman and Julia Swift. *Nov. 11. All's Well That Ends Well*, with Peggy Ashcroft, Cheryl Campbell, Robert Edison, Mike Gwilym, Stephen Moore and Harriet Walter. (1982) *Jan. 13. Henry IV, Part I*, with Bernard Lloyd, Gerard Murphy and Patrick Stewart. *March 31. Macbeth* with Bob Peck and Sara Kestelman. *April 20. Much Ado About Nothing*, with Sinead Cusack, Derek Jacobi. *June 28. King Lear* with Michael Gambon, Jenny Agutter, Sara Kestelman, Alice Krige, Antony Sher and David Waller. *Aug. 11. The Tempest* with Derek Jacobi, Alice Krige, Bob Peck, Michael Maloney and Mark Rylance.

OTHER PLACE: (1981) *Sept. The Witch of Edmonton* by Dekker, Ford and Rowley, with Miriam Karlin, Miles Anderson, Gerard Murphy, Harriet Walter and Juliet Stevenson. *Nov. 11. Money* by Edward Bulwer-Lytton, with Paul Shelley, Jane Carr, George Rainstrick, Juliet Stevenson and Miriam Karlin. (1982) *Jan. 13. Our Friends in the North* by Peter Flannery. *March. Arden of Faversham* with Jenny Agutter and Bruce Purchase. *June 9. Peer Gynt* by Henrik Ibsen, translated by David Rudkin, with Derek Jacobi, Sinead Cusack, Jeffery Dench, Derek Godfrey and Brenda Peters. *June 29. Lear* by Edward Bond, with Bob Peck, Jenny Agutter, Sara Kestelman and Alice Krige. *Aug. 5. Molière* by Mikhail Bulgakov, adapted by Dusty Hughes, with Antony Sher, Malcolm Storry, Derek Godfrey, David Bradley, Penelope Beaumont and Joanna Foster.

CHICHESTER FESTIVAL THEATRE, 21st Festival: (1982) *May 5. On the Rocks* by G. B. Shaw, with Keith Michell, Glynis Johns, Arthur English, Nigel Stock, Paul Hardwick and Cheryl Kennedy. *May 19. Valmouth* by Sandy Wilson, with Bertice Reading, Fenella Fielding and Doris Hare. *July 7. Cavell* by Keith Baxter, with Joan Plowright, Nigel Stock, Philip Madoc, Robert Percival and Paul Hardwick. *Aug. 11. Goodbye Mr. Chips* by James Hilton, book by Roland Starke, music and lyrics by Leslie Bricusse, with John Mills, Colette Gleeson and Nigel Stock.

MANCHESTER ROYAL EXCHANGE: (1981) Sept. 17. *Doctor Faustus* by Adrian Noble, with Ben Kingsley and James Maxwell. Oct. *Heartbreak House* by G. B. Shaw, with Eleanor Bron, Alfred Burke, Norman Eshley, Diane Fletcher and Lynsey Baxter. (1982) Jan. 5. *The Round Dance* by Arthur Schnitzler, with Geoffrey Bateman, Cheryl Prime, Gabrielle Drake, Bernice Stegers and Gary

Waldhorn. Feb. *The Beaux' Stratagem* by Farquhar, with Robert Lindsay and Sarah Badel. March 18. *Philoctetes* by Sophocles with Robert Lindsay and James Maxwell. July. *Andy Capp* by Reg Smythe, adapted by Trevor Peacock and Alan Price, with Tom Courtenay, Alan Price, Val McLane, Nicky Croydon and Michael Mueller.

## LITERATURE OF THE YEAR

Graham Greene's new novel, *Monsignor Quixote*, takes as its proscription the lines from Hamlet: "There is nothing either good or bad but thinking makes it so". The parallels with and allusions to Cervantes' masterpiece are evident, but not overstated, in this exquisite and beautifully written tale. The book concerns the travels of Father Quixote, a parish priest in El Toboso, Spain, whose unexpected elevation to the status of monsignor provokes his outraged bishop into making him take a rest. He decides to go on his travels with the recently deposed Communist mayor as companion. Their adventures and misadventures, their wise and tolerant discourses, their tilting at windmills, combine to make a moving and entertaining book that reveals no slackening in Graham Greene's ability, confirming his reputation as a novelist of the highest order.

## Chain Reaction

André Brink, professor of Afrikaans and Dutch literature at Rhodes University, has written a complex novel about slavery, racialism and human nature, which, through examining events of the last century, explores and exposes the current South African predicament. *A Chain of Voices*, his fifth novel, concerns the murder of an Afrikaaner farmer by his slave in 1825 in the Transvaal. The book opens with the "Act of Accusation", a factual, legal summary of the events, but this dry narrative is then fleshed out by a series of narrators, both black and white, whose different characters are brilliantly evoked; they form the "chain" of the title, inextricably linked, explaining the contradictions that are inherent in South Africa today.

## Gentle Bellow

Saul Bellow's first novel since *Humboldt's Gift* aroused a mixed critical response, the general consensus being that the Rumanian section was more convincing than that part which was set in Chicago. *The Dean's December* is the story of Albert Corde, professor of journalism and dean of students. He travels to Bucharest with his Rumanian wife, who wishes to tend her dying mother, and their struggle against the cold bureaucracy of a totalitarian state is set against the dean's own problems in Chicago, where he is attempting to have the death of one of his students investigated. Bellow's descriptive powers and his capacity for eloquent and intelligent prose are undiminished, but the plot on which he hangs this structure seems hardly substantial enough to support it, and is barely visible beneath the weight of ideas.

John Barth, professor of literature, and author of *The Sot-Weed Factor* and *Giles*

*Goat-Boy*, has often seemed too self-consciously aware of his art, and his novels have occasionally been read as extended exercises for classes in creative writing. His latest novel, *Sabbatical*, whilst witty and literate, again falls into the trap, and the plot, which begins promisingly, with a professor of American literature on sabbatical leave with her husband, a former C.I.A. agent, on a boat on Chesapeake Bay, runs out of wind. The author's scholarship, on such diverse topics as navigation and Vietnamese poetry, is impressive, but at times the plethora of footnotes threaten to overturn the book, subverting the story to their purpose, a self-indulgent display of pyrotechnical brilliance which conceals a lack of discipline or direction.

## Other Worlds

Science fiction, like crime fiction, has for long been struggling for intellectual respectability against the imposition of a label which is intended to diminish it as literature worthy of serious consideration. *Helliconia Spring* by Brian Aldiss is the first volume of a trilogy set on a planet which orbits its sun not once every 365 days, but every 2,592 years, in which its climate passes from extremes of cold to heat. This highly imaginative work succeeds in creating a convincing alternative world, backed up by much convincing scholarship and detail, and as with the best "science" fiction, has much to impart about life on Earth.

## Rogues' Gallery

The incorrigible Flashman, rescued from comparative oblivion in the pages of *Tom Brown's Schooldays*, has had a seventh volume devoted to his exploits by George MacDonald Fraser. *Flashman and the Redskins* follows on from *Flash for Freedom*, with that most decorated coward of the Victorian age, Sir Harry Flashman V.C., translated to the American West, where (inevitably) he survives Custer's Last Stand at Little Big Horn. Meticulously researched, cleverly constructed and very entertaining, the Flashman saga is a continuing joy. Flashman may owe his creation to Thomas Hughes, but liberated from Rugby School, his further adventures are an abiding tribute to the wit and ingenuity of Mr. MacDonald Fraser.

## In Brief

V. S. Pritchett's *Collected Stories* is the author's own selection from seven volumes covering some fifty years. An acknowledged master in what is generally regarded as one of the most difficult of literary forms, Sir Victor's stories are distilled by a laborious

process from the luxuriant excess of what would otherwise be novels; each one is rewritten four or five times, with one hundred pages eventually reduced to twenty. In his preface, he writes that he had always thought that the writer of short stories "is a mixture of reporter, aphoristic wit, moralist and poet—though not 'poetical'; he is something of a ballad-maker, and in the intricacy of his design is close to the writer of sonnets. He has to catch our attention at once, to get the opening line right. He has to be something of an architect."

*A Moving Target* is the second volume of essays collected by William Golding, following *The Hot Gates* published in 1965. The title is a reference to his avoidance of the critical small shot of the academic light industry that plagues him. He is not to be pinned down, however, preferring that his works speak for him. His prose is as always a pleasure to read, and the essays cover such subjects as sailing, travel pieces, Wiltshire and fragments of autobiography.

David Storey's latest novel is called *A Prodigal Child*, and it has echoes of his Booker Prize novel, *Saville*, with its portrayal of love and artistic awakening in the north of England. Lawrentian in concept, as if *Sons and Lovers* had been rewritten without that novel's excesses, but drawing on Lawrence's technique, Storey again reveals his mastery of dialogue, and his skill and sensitivity as a novelist. Ian McEwan has had critical and popular acclaim for his short stories, but his second novel *The Comfort of Strangers*, set in Venice, whilst capably conveying an atmosphere of brooding menace, was considered a curiously unsatisfying and insubstantial work. Robert McCrum's first novel, *In the Secret State*, was well received, and his second, *A Loss of Heart*, was a thoughtful and intelligent novel, more than a mere thriller, in which he examined the impact of terrorism on modern society. Stuart Evans, whose *The Caves of Alienation* was noticed some years ago as an imaginative and ambitious work, has shown further evidence of his rare talent in *Temporary Hearths*, a complex, brilliantly constructed and original novel to which a brief summary could not do justice. Max Frisch's *I'm Not Stiller*, first published in German in 1954, has been translated by Michael Bullock, and is an impressive study of an artist's neurosis.

John Updike's chronicles of the minutiae of American small-town domestic life have been much acclaimed, and his three novels about Harold "Rabbit" Angstrom, beginning with *Rabbit Run* in 1960, *Rabbit Redut* in 1971 and now *Rabbit is Rich*, have encapsulated the period as no other writer has managed. In the latest volume, his hero has now become a Toyota dealer in the city of Brewer, but has trouble with his son Nelson, a college drop-out. Although there are some

marvellous comic scenes, the books lack any intellectual depth, subsisting as entertainments, not art.

John Arden, a playwright best known for *Serjeant Musgrave's Dance*, written in 1960 and already established on school and university drama curricula, has published his first novel. *Silence Among the Weapons* is set in ancient Rome in the first century B.C. It portrays a harsh but vividly realised age, but the effects and dialogue are at times overly theatrical.

### Law and Life

Two of the best written and most enjoyable volumes of memoirs published during the year emanated from lawyers, one a Queen's Counsel and the other a solicitor. John Mortimer describes himself as a "barrister who writes or a writer who does barristering", and has achieved distinction in both fields. His play about his father, the blind barrister Clifford Mortimer who practised at the Probate, Divorce and Admiralty Court, *A Voyage Round My Father*, confirms his claim to be "the best playwright ever to have defended a murderer at the Central Criminal Court", and his marvellous creation, Rumpole of the Bailey, has increased his popular appeal. *Clinging to the Wreckage* is a brilliant, if selective, account of his varied life. Wonderfully comic in parts, wise and touching, it reveals a man with an unerring eye for life's absurdities, and a natural literary gift for relating them. It stands as a model for would-be autobiographers, which one would hardly expect to see emulated, had Roy Fuller's own memoirs not already set the standard.

In *Souvenirs*, Roy Fuller had described his early years, and he continues his recollections in *Vamp Till Ready: Further Memoirs*. If at times he appears disillusioned with his lot, bemoaning his fate as novelist *manqué*, he is nonetheless revealed as a memoirist of the highest order in this account of his years studying for the law, in the Navy, or moving in London literary circles and writing poetry. A distinguished solicitor and one-time Professor of Poetry at Oxford, but modest and unassuming, Roy Fuller's brilliantly observed memoirs stand alongside his poems as the work of a talented, natural writer.

### Law to Himself

Judges, ordinarily, do not write books, but it has been observed that Lord Denning, Master of the Rolls, was no ordinary judge. As he was prepared to ignore the nigh-sacred doctrine of precedent in his court, if it meant justice would be subordinated to legal niceties, so was he prepared to discuss his cases in print and to examine the shortcomings of the law. His *The Family Story* described the

background and upbringing that produced him and his equally distinguished brothers, and in *What Next in the Law*, Lord Denning gave his views on the current state of the law and his proposals for reform, with particular reference to juries, E.E.C. law, legal aid, a Bill of Rights, privacy and compensation for personal injury. It is perhaps ironic that certain, perhaps incautious, remarks in the book should have provoked rather more controversy than Lord Denning anticipated, thus belying his oft-repeated remark that he had "all the Christian virtues, except resignation". The book was withdrawn and amended. Lord Denning will nevertheless be long-remembered as one of the most original and innovative judicial minds of this century, and it is fitting that his works should reach an audience beyond the confines of the Inns of Court. His familiar, almost staccato style of writing, developed from years of distilling the essential points from the mass of legal evidence before him, can become irritating at times, veering towards self-parody, and Lord Denning has a tendency to overrate the intelligence and independence of the judiciary, but his latest book is a valuable addition to the debate on the law.

Also revealing about the way judicial minds work and how the law is laid down in the highest court is Alan Paterson's *The Law Lords*, the result of interviews conducted with fifteen Law Lords, and barristers who appeared before them. In *Public Prosecutor*, Sir Norman Skelhorn recounts, with inevitable discretion, his fourteen years in that office.

### Literary Lives

Anthony Powell has published his fourth and final volume of memoirs in his sequence *To Keep the Ball Rolling. The Strangers are All Gone* takes his story from 1952, when he moved from London to the country, to the present. Although he describes it as "a kind of album of odds and ends", in characteristically modest fashion, it is excellently written, with perceptive portraits of such figures as Malcolm Muggeridge. Powell reveals little of himself in his discreet observations, remaining an insubstantial figure like his narrator Nick Jenkins in *A Dance to the Music of Time*, but devotees of that great twelve-novel sequence will find the memoirs essential reading, with its portraits of the original inspirations for the characters in the novels.

Unlike Mortimer, Fuller and Powell, John Osborne's account of his early years in *A Better Class of Person: An Autobiography, 1929-1956* is a splenetic and sometimes distasteful volume. Osborne's flair for invective and publicity has tended to exceed his literary ability, and although he well evokes his earlier years, and theatrical life, in this volume he protests too much, and his writing

suffers. The book ends with the creation of *Look Back in Anger*, a title which encapsulates this autobiography and sums up a theme that he has consistently reworked throughout his career, to some effect, albeit not often a literary one.

Simon Raven's *Shadows on the Grass*, described as a cricketing autobiography, contains the candid and amusing revelations of this author's life, written with his usual narrative skill. Nobel laureate Patrick White's *Flaws in the Glass: A Self-Portrait* is a painfully intense exercise in self-realisation.

Peter Alexander's *Roy Campbell: A Critical Biography* examines the life and works of the South African poet, who achieved immediate success with his first volume, *The Flaming Terrapin*, but whose poems have not withstood the test of time. Campbell was a rather unpleasant character, prone to excessive drinking, and his espousal of Franco's cause in the Spanish Civil War went against the grain of many contemporary writers.

Joseph Connolly's *Jerome K. Jerome: A Critical Biography* is the third biography to be published of the author, who, to his chagrin, was and is still best known for *Three Men in a Boat*. Originally intended as a serious travel book about the River Thames, this slight, albeit charming tale endures in popularity, but whether it justifies the lavish treatment afforded it in the illustrated, annotated edition by Christopher Matthew and Benny Green is questionable, as it shows up the limitations of the original.

*John Buchan: A Memoir* by his second son William Buchan is an intimate personal study of the talented and versatile Lord Tweedsmuir, which complements Janet Adam Smith's fine biography. Martin Seymour-Smith has known personally the poet, novelist and scholar Robert Graves, grand old man of English letters, and his *Robert Graves: His Life and Works* is a lengthy, perceptive study.

### Just Dandy

The discovery in 1976 of a trunk belonging to Scrope Berdmore Davies, which had lain untouched in a bank vault since 1820, was the cause of some excitement, containing as it did letters from Byron, a manuscript of Canto III of *Childe Harold's Pilgrimage* and unknown Shelley sonnets. T. A. J. Burnett has now reconstructed the life and times of the remarkable Scrope in *The Rise and Fall of a Regency Dandy*, a fascinating account of the scholar, wit, drunkard and gambler, who fled his debtors and was forced to eke out the last thirty years of his life in penury and exile in a Belgian garret. Scrope would probably have appreciated the irony of a book devoted to his exploits, with his trunkful of ephemera deposited in the British Museum for posterity.

The centenary of P. G. Wodehouse's birth

in 1981 was marked by the publication of several volumes. Knighted shortly before his death in 1975 at the age of 93, Sir Pelham's reputation never recovered from the opprobrium heaped on him after his wartime German broadcasts. In *Wodehouse at War*, Ian Sproat demonstrates that Wodehouse was the innocent dupe of the Nazis, naïve but no traitor, and his book includes the full text of those broadcasts made in 1941, and a lengthy account by Wodehouse himself of what really happened. Also published in tribute to the master of English comic prose were *P. G. Wodehouse: A Centenary Celebration 1881-1981*, edited by James H. Heineman and Donald R. Benson, which contained twenty-five delightful essays, and Benny Green's *P. G. Wodehouse: A Literary Biography*.

Henry Williamson was also vilified for pro-Nazi statements and sympathies, but unlike Wodehouse, with some justification. He had been permanently affected by his experiences in the First World War, and saw Hitler as a peace-maker. In 1936 he dedicated *The Flux of Dream* to him, with the immortal words: "I salute the great man across the Rhine, whose life symbol is the happy child". Unlike Wodehouse, Williamson was never "rehabilitated", a fact he bitterly resented, but in Daniel Farson's *Henry: Appreciation of Henry Williamson*, although written with affection and tolerance for the subject's glaring faults, he emerges as a thoroughly unpleasant character, who used and abused family and friends unashamedly. His natural history books *Tarka the Otter* and *Salar the Salmon* will have enduring appeal, but his fifteen-volume autobiographical novelsequence, *A Chronicle of Ancient Sunlight*, written between 1951 and 1969 is now largely forgotten.

### Letters

*The Love Letters of William and Mary Wordsworth*, edited by Beth Darlington, consists of thirty-one letters exchanged by the poet and his wife. They were discovered in 1977 by a stamp dealer in Carlisle, who had bought them for £5. Wordsworth has been frequently maligned, by Coleridge who asserted that he was "by nature incapable of being in love", and as "solemn and unsexual" by Shelley. However, he is revealed as a man of passion in these delightful letters, written when separated from his wife in the summer of 1810 when visiting his patron at Coleorton and in Wales, and in London in the spring of 1812. Whether discussing the quarrel with Coleridge, Spencer Perceval's assassination at the House of Commons, or his absence from his wife, ended by the tragic death of his daughter, this fascinating correspondence shows a hitherto unseen side of Wordsworth's nature. Also published was *The Letters of William and Dorothy Wordsworth, Vol. VI: The Later Years: Part III, 1835-1839*, revised

and edited by Alan G. Hill, which contains over 600 previously unpublished letters.

Tennyson disliked writing letters, and some 2,000 of his survive, those to Hallam and many to his wife Emily Sellwood having been destroyed. Volume I of *The Letters of Alfred Lord Tennyson*, edited by Cecil Y. Lang and Edgar F. Shannon Jr. contains 250 letters written between the years 1821 and 1850. It opens with the twelve-year-old Alfred writing to an aunt about *Samson Agonistes*, and covers his time at Cambridge and the relationship with Hallam, revealing a great deal about his life, but little about the creative forces that drove him.

Disraeli left 10,000 letters, and was conscious of their value to posterity. *Benjamin Disraeli: Letters: Vol. I, 1815-34; Vol. II, 1835-37*, is excellently edited by J. A. W. Gunn, John Matthews, Donald M. Scharman and W. G. Wiebe and contain some 700 letters.

*The Letters of D. H. Lawrence: Vol. II, June 1913 to October 1916*, edited by George J. Zytaruk and James T. Boulton will please Lawrence enthusiasts. Covering the period after the publication of *Sons and Lovers*, when he wrote *The Rainbow* and *Women in Love*, the volume contains some 700 letters, 200 of which have not previously been published, his correspondents including E. M. Forster, Bertrand Russell, Ottoline Morrell and Katherine Mansfield. A more revealing picture of Lawrence can be glimpsed from a reading of *The Betrayal: A Memoir of D. H. Lawrence* by George Neville, his close childhood friend. Edited by Carl Baron, and now published some fifty years after it was written, it shows the author's father was a much-maligned man, bearing no relation to the figure portrayed in *Sons and Lovers*, and it destroys the image of his childhood which Lawrence so assiduously cultivated.

*The Letters of J. R. R. Tolkien*, edited by his biographer Humphrey Carpenter, assisted by Christopher Tolkien, includes letters written between 1914 and 1973, and will probably please the legion of admirers of the creator of *The Lord of the Rings*.

Volume Four of *The Lyttelton—Hart-Davis Letters*, edited by Rupert Hart-Davis, covers the year 1959. This delightful correspondence between George Lyttelton, retired Eton housemaster, and his former pupil was initiated in 1955, and the weekly exchange continued until the death of the former seven years later.

As Conan Doyle longed to escape from Sherlock Holmes, so Raymond Chandler, although he brought critical respectability to detective fiction, wanted to write something other than a Philip Marlowe story. *The Selected Letters of Raymond Chandler* have been edited by Frank MacShane, his biographer, and cover the years 1937 to 1959. Chandler was a reclusive, private man, and tended to compose his letters in the evening

when his invalid wife was in bed. They here reveal him as an intelligent, perceptive man, conscious of his craft, occasionally intolerant, with his best invective reserved for those who underrated his novels.

*Selected Letters of James Thurber*, edited by Helen Thurber and Edward Weeks, have not enhanced the celebrated humorist's literary reputation. He would probably not have condoned their publication some twenty years after his death, having himself attacked the mania for publishing every scrap left by an author, with his customary wit.

### Politics

Dr. Henry Kissinger has issued the second volume of his political memoirs. After *The White House Years*, published in 1979, *The Years of Upheaval, 1973-1977* covers such major events as the Watergate scandal and President Nixon's resignation, the Yom Kippur war and the policy of détente. Immensely long at 1,200 pages, and somewhat pedestrian, the thoughts of the Secretary of State to two American Presidents during a turbulent period will be essential reading for students of history and politics.

Nigel Fisher has been hampered in his *Harold Macmillan: A Biography* by his subject's reticence, in requesting that he omit certain personal aspects of his life. Macmillan has himself related his story *in extenso* in his six-volume autobiography, but it would seem that the definitive biography will not appear in his lifetime. The late Lord Butler, whose succession to the premiership in 1963 was blocked by Macmillan, issued his *The Art of Memory: Friends in Perspective*, which consisted of nine character portraits of such figures as Chips Channon, Lord Halifax and Iain MacLeod.

Susan Crosland's *Tony Crosland* is a remarkable account of her late husband's life and political career, his struggles in the Labour Party and his period in office. R. E. Foster's *Lord Randolph Churchill: A Political Life* is a fascinating corrective to Winston's 1906 two-volume filial tribute, and gives a totally different picture of this ambitious but minor statesman.

### Anthologies and Dictionaries

*The Dictionary of National Biography 1961-1970*, edited by E. T. Williams and C. S. Nichols, continues the high standards established by its predecessors. Founded in 1882, "to supply full, accurate and concise biographies of all noteworthy inhabitants of the British Islands and the Colonies", this essential reference work contains the biographies of 745 people who died between 1961 and 1970, a particularly significant period, with the deaths of such notables as Churchill, Attlee, Bertrand Russell, Evelyn Waugh and T. S.

Eliot. The biographies are always readable, if at times too discreet and uncontroversial, the longest entry being that of Churchill, running to some 17,000 words.

*A Supplement to the Oxford English Dictionary Vol. III, O-Scz*, edited by R. W. Burchfield continues the inexhaustible task of attempting to define and chronicle the English language, which expands at an alarming rate. Not only is the Dictionary remarkable for the new words included, but for the variety of meanings attributed to words both new and old. *Roget's Thesaurus of English Words and Phrases* has been revised and updated by Susan M. Lloyd to take account of modern usage. *The Oxford Book of American Literary Anecdotes*, edited by Donald Hall, mines a narrower seam than the British version, but included some marvellous anecdotes by and about Dorothy Parker, Henry James, Mark Twain, Walt Whitman and Ernest Hemingway. The book lacks, however, any firm editorial direction. Also published were Paul F. Boller's *Presidential Anecdotes*, *The Oxford Companion to Twentieth Century Art*, edited by Harold Osborne and *The New Oxford Book of Christian Verse*, edited by Donald Davie.

General Sir John Hackett has published a new edition of his best-selling *The Third World War*, which imagined a Russian attack on N.A.T.O. forces in Germany, followed by a limited nuclear war, with Birmingham and Minsk destroyed. In *The Third World War: the Untold Story*, the original scenario has been almost completely rewritten to take account of recent events, with a contribution from the Russian-point-of-view. Although following in the tradition of Chesney's *The Battle of Dorking* and Childers' *The Riddle of the Sands*, it is a moot point whether the writing of such a book, with real people and places used in the construction of a fictional scenario, is more likely to avert or provoke the event it describes.

Also published during the year were *The Selected Poems 1957-81* by Ted Hughes; C. H. Sisson's *Selected Poems: The Passages of Joy* by Thom Gunn; *The Occasions of Poetry: Essays in Criticism and Autobiography* by Thom Gunn; *The Young Rebecca: Writings of Rebecca West 1911-17*, selected and introduced by Jane Marcus; *Monumenta Britannica* by John Aubrey, edited by John Fowles and annotated by Rodney Legg; *Koestler: A Biography* by Iain Hamilton; *Early Auden* by Edward Mendelson; *Buckingham* by Roger Lockyer; *Mortimer Wheeler: Adventurer in Archaeology* by Jacquetta Hawkes; *Old Glory: An American Voyage* by Jonathan Raban; *The Return to Camelot: Chivalry and the English Gentleman* by Mark Girouard; *Conducted Tour* by Bernard Levin; *Graham Sutherland* by Roger Berthoud; *A Touch of the Memoirs* by Donald Sinden; and *Twice Shy* by Dick Francis.

## ARCHAEOLOGY IN 1981-82

## Archaeology and the Court of Appeal

The interesting case heard in the Chancery Division before Mr. Justice Dillon concerning 7,811 Roman coins found in Lincolnshire in 1975, finally came to the Court of Appeal and was heard before Lord Denning, Master of the Rolls, with Lords Justice Dunn and Oliver, on the 16th to the 18th November, 1981. Mr. Justice Dillon had rejected, on June 26, 1980, the claim by the Attorney-General of the Duchy of Lancaster that these Roman coins found in Quarry Field, Coleby, were treasure trove belonging to the Crown in the right of the Duchy of Lancaster. The basis of this judgement was that, because the coins contained so little silver, they could not be considered to be silver coins and therefore belonged to the landowners.

According to *The Weekly Law Reports*, March 5, 1982, the Appeal was on the grounds that "the judge erred in law in holding (1) that the prerogative rights of the Crown and the Duchy of Lancaster in treasure trove were confined to objects of gold or silver; (2) that the prerogative rights of the Crown and of the Duchy of Lancaster in treasure trove did not include coins other than coins in gold and silver; (3) that the test for deciding whether coins were in gold or in silver for the purposes of the law of treasure trove was a matter to be decided on the evidence by the courts or a coroner's jury; (4) that coins with a silver content of between 0.2 per cent and 5.85 per cent were not treasure trove notwithstanding that their silver content was intended; (5) that the intentional inclusion of silver in coins and the acceptance of those coins as silver were irrelevant to a finding of treasure trove; and (6) he misdirected himself in classifying the coins the subject matter of the issue as argentiferous bronze or argentiferous metal and therefore not treasure trove."

Lord Denning is reported to have reviewed the circumstances of the case, as well as the law on treasure trove from Bracton in the 1250's to more modern authorities, concluding; "After all this long review, I think we must say that Bracton and Blackstone were wrong; and that Sir Edward Coke was right. In these courts we must hold that in order to be treasure trove, the objects must be of gold or silver." The problem of the quantity of gold or silver, however, remains, because every coin is an alloy. To this Lord Denning said: "In my opinion the only test applicable is this: in order to be a gold or silver object as treasure trove, there must be a 'substantial' amount of gold in the object or a 'substantial' amount of silver. It will be for the coroner's jury to decide this question: what is 'substantial'? There is no case on treasure trove about it. But some help can be obtained, strangely enough, from a case on the Rent Acts. The question was whether or not a substantial portion of the rent was included for the furniture." Lord Denning agreed with Lord Simon's view expressed in this case in 1948 that "substantial" should mean "considerable", but that the judiciary should not go beyond its powers by setting a definite figure. In matters of treasure trove, Lord Denning is reported as saying, "I think our juries should deal with it in the same way as juries of the past. They should ask themselves: is there a substantial amount of gold or silver such that it could be properly described as a gold or silver object? It has to be a very considerable amount. It should, I think, be 50 per cent or more gold or silver before it could be described as a gold or silver object. Adopting this test, it is clear that these coins were not gold or silver. Almost all of them contained only minute amounts of silver. The highest was 18 per cent."

Lord Denning's fellow judges agreed in dismissing the Appeal.

In giving his judgement, Lord Denning referred to the desirability of Parliament amending the law on antiquities and noted that a Bill had already been introduced to clarify matters, but that it had failed to get through. However, after the Court of Appeal decision another Bill sponsored by the Council for British Archaeology, the Antiquities Bill, was introduced, and on April 5, 1982, Lord Abinger saw it through its third reading in the House of Lords. In the meantime the law must be applied as it stands, and in a letter to *Current Archaeology*, March 1982, Brian Philp, Director of the Kent Archaeological Rescue Unit, drew attention to several matters arising from a treasure trove inquest held at Dover on November 24, 1981 into the group of eleven 16th century coins which had been found during an archaeological rescue excavation, including the fact that although ten of the coins were 92 per cent fine silver, the other one had only 31 per cent fine silver, and therefore the former were, and the latter was not, declared to be treasure trove; an important group had been split up.

Still on the topic of archaeology and the law, it is worth noting that people who, while treasure hunting, deliberately use metal detectors to seek out items of value or interest on archaeological sites fell foul for the first time of the Ancient Monuments and Archaeological Areas Act 1979 under the section, coming into force in October, 1981, which gave greater protection to scheduled ancient monuments. The Press reported that on March 25, 1982, fines totalling £150 were imposed on two men at Bury St. Edmunds, Suffolk, after their conviction for using a metal detector on land protected under the Act; this is thought to be the first use of the new Act for this type of offence.

## 1882 and "The Way Forward"

The Council for British Archaeology, in its May 1982 *Newsletter*, was one of the few organisations that recalled that 1982 saw the centenary of the Ancient Monuments Protection Act, which introduced in 1882 the idea that there was a heritage that ought to be protected. The passing of the 1882 Act was a triumph for Sir John Lubbock (later Lord Avebury) who campaigned on this issue and was rewarded with success by Gladstone's Liberal Administration. It was Lubbock's son-in-law, Major-General Augustus Henry Lane Fox Pitt-Rivers, often regarded as the father of modern British stratigraphic archaeology, who was appointed to the new post, set up under the 1882 Act, of Inspector of Ancient Monuments.

Clearly it would have been fitting if the centenary of the 1882 Act could have been marked by the enactment of legislation designed to give greater protection to the archaeological and historic heritage, as is devoutly wished by many of the archaeological fraternity. However, although this was not to be, nevertheless 1982 did see a flurry of political activity from the direction of the Secretary of State for the Environment. The Minister, Michael Heseltine, first in a paper issued for consultation on the *Organisation of Ancient Monuments and Historic Buildings in England* and then in a second document entitled *The Way Forward*, published on June 16, 1982, taking account of observations made on the first, outlined proposals for the reorganisation of the administration of ancient monuments and historic buildings in England. This was to be done by the setting up of "a single powerful agency, staffed by

individuals able to make a career in the service of the heritage, and operating within a financial framework which liberates rather than confines their energies." Basically the executive responsibility for running ancient monuments and historic buildings would be transferred from the present Government Department staffed by civil servants to a new agency, although accountability to Parliament would remain and certain duties, including the responsibility for the security of the Royal Palaces, would continue to be discharged by the Secretary of State. It is declared that it is not intended that the proposals should lead to a reduction in financial provision, but should enable better use to be made of available resources. These proposals were by no means universally welcomed with much disquiet occasioned by the fact that the first document at least seemed to place too much emphasis on commercial exploitation and very little on the need for continuity in archaeological programmes. The Ancient Monuments Board for England in its 28th *Annual Report* for 1981 was highly critical of the proposals which are stated to be "The single most important matter to come before the Board this year". The Board was very much in favour of preserving and improving upon the existing arrangements, as the Report states: "While we agree that there is considerable room for improvement in the present system, we consider that the best way of achieving these improvements is by making changes within the present framework of the Department. There is an inescapable national responsibility for this work much of which is statutory and which in our opinion can only be carried effectively by Government. Delegation and division of responsibilities will only weaken the control and resolve which are needed to safeguard our priceless heritage for this and future generations." Draft legislation is awaited.

#### Ancient Monuments Board

The 28th *Annual Report* for 1981 of the Ancient Monuments Board for England, ordered to be printed by the House of Commons on July 21, 1982, deals with many matters of archaeological concern, not least the current proposals for the reordering of Department of the Environment involvement with Ancient Monuments and historic buildings. But perhaps the most pressing practical problem arises from the activities of another Government Ministry, that of Defence. The relevance to archaeology is simply that changes in the organisation of the Royal Dockyards mean that many important buildings, and indeed complete areas of great historical significance are under threat. The Board's Report states the matter bluntly: "The immense historic importance of the Royal Navy's shore establishments at its three main fleet bases of Chatham, Portsmouth and Devonport does not need to be stressed. Because they are such a significant part of this country's history the preservation of their historic buildings is considered to be a matter of national importance." It is Chatham that concerns the Board most and a public trust is proposed as an effective way to run, with public and private funds, this important site; it is noted that "The Government's decision to close down Chatham Dockyard by 1984, and possibly parts of Portsmouth, has now created a major heritage problem which the Government must take the initiative in solving. We consider Chatham to be the most important single element in all the dockyards. The historic enclave comprises an almost complete 18th and 19th century dockyard. As such it is unparalleled and could be regarded as a ready-made open-air museum demonstrating how the Navy worked during that period. The pending closure provides the opportunity to preserve this unique

group for the nation." The situation at Portsmouth and Devonport is also seen to be serious, although perhaps not quite on the same scale, but again a positive approach to the preservation of key buildings is thought to be essential.

A more traditional archaeological problem is that of damage to ancient monuments by ploughing and the Board reviewed it at first hand during its tour of Norfolk. While welcoming the seeking of greater co-operation with farmers, the use of the new legislation, as well as the deployment of field monument wardens, nevertheless "A single coherent strategy for dealing with the threat of ploughing is now needed, and we recommend that more resources should be committed to this." Perhaps the most important reason for the necessity of tackling this problem is that field monuments account for such a large proportion of all scheduled ancient monuments. Redundant churches pose a similarly urgent problem in both rural and urban areas and again the visit of the Board to Norfolk enabled the matter to be considered at first hand. Having noted the number of ecclesiastical bodies involved in the redundancy process, the Board in this Report makes an important statement about the contribution of churches to the English heritage: "Though not all churches can be said to be of outstanding quality it would be difficult to find a church without merit and apart from their intrinsic value they are a very important part of the English landscape. Every effort should be made by the various Church authorities to find suitable alternative uses, but if possible these should not entail any irreversible changes to the structure. Interiors should be left undisturbed so far as possible, or at least carefully recorded and sympathetically treated. An opportunity to excavate should be given where necessary. There should also be some provision in the redundancy procedures for churches to be properly looked after until a final decision is taken either to preserve or demolish. They should not merely be left to decay."

During the year under review the Board agreed to the deletion of six monuments from the list of those scheduled, while in 1981 some 126 others were scheduled by the Secretary of State for the Environment on the recommendation of the Board, and of these 13 were in Northumberland, 11 in Hampshire, and 6 in both Derbyshire and Suffolk. These 126 monuments are divided into the following categories: single or groups of burial mounds, megalithic monuments and ritual ceremonial sites, 22; camps and settlements, 20; Roman remains, 16; Saxon remains, 3; linear earthworks, 3; ecclesiastical buildings, 11; crosses, 5; castles and fortifications, 6; deserted villages, settlements and moated sites, 20; industrial monuments, 9; other secular sites, 10; bridges, 1.

## DISCOVERIES AND EXCAVATIONS

### Roman Britain

Most of the organised excavations and many of the casual finds relating to the study of Roman Britain are summarized in reports printed in *Britannia*, Volume XII for 1981. Quite a number of the excavations, especially in urban areas, painstakingly gather evidence over a period of years which is of great importance to the archaeologist, but which to the layman may not have the dramatic appeal of the chance discovery. While it is not difficult here to draw attention to the interesting finds, *Britannia* contains many examples of the real stuff of archaeology, the careful collection of evidence and its use to elucidate problems.

Of work on sites associated with Hadrian's Wall one may note for example the excavations at Keays

Lane, Scotch Street, in Carlisle where a straight V-shaped ditch, possibly military in origin and pre-Antonine in date, is the earliest feature so far found; it was followed by timber buildings, one of which being erected in the late 2nd or early 3rd century and being rebuilt in stone shortly afterwards; although further additions including a room with a channelled hypocaust were added, the house became disused in the early 4th century and was in part demolished; to the south an open area delineated by a metalled lane and a fence produced little except evidence for a tree and a skeleton of a dog, while to the north, beyond the second metalled lane, was other property including a possibly aisled timber building, yards and a well with the suggestion that occupation could have continued until the mid-4th century; finds included architectural and sculptural fragments, a lead statuette of Diana, numerous shoes and parts of wax-writing tablets. Further south, in West Yorkshire at Castleford, the main Roman north-south road was uncovered in Rectory Street, thought to lie immediately to the north of the still-unlocated fort; in Welbeck Street a large stone building of early 2nd century date was found up to six courses high, consisting of three wings around a small court-yard fronting the Roman road; *opus signinum* provided the floor surface of one room, while another, in which hazel nuts and grain had been stored, had had a timber floor and been burnt down; next to the first was another large stone building in the yard behind which were discovered a well and five inhumation burials, one having a necklace of yellow beads; although occupation seems to have come to an end in the 2nd century, it is thought that the second building was robbed in the fourth century or later.

By way of contrast attention may be drawn to an isolated object which was offered for sale by auction in 1981; this was an elaborate silver spoon from Helpston in Cambridgeshire, the handle of which being in the form of an earth god with the bowl decorated with an engraved boar inlaid with niello. Important work has been done in recent years in the Fens and, also in Cambridgeshire, two excavations have been carried out at Wimlington where the excavation of Stonea Camp demonstrated that the north-west inner rampart was of simple dump construction and that the U-shaped ditch in front was filled with peat turves, probably the upper layers of the rampart pushed down on purpose shortly after it had been finished. The finds suggest a second quarter of the 1st century A.D. date; the mound of Stonea Grange was found on investigation to have a raft of Barnack ragstone bedded in the natural clay on which had been constructed a masonry building some 16 metres square with an apse on the west side; it had been heated by a hypocaust, had had glazed windows as well as a tiled roof and had been decorated with painted wall-plaster; although there were traces of a timber predecessor, this building was probably Hadrianic or Antonine in date and in the latter period more rooms were added including a corridor and a hall; although occupation had probably ceased soon after 200, by the end of the century the site had been levelled for the erection of another stone building which was in use until the middle of the 4th century at least.

Building and construction remain important means by which archaeological discoveries are made and at Wroxton St. Mary in Oxfordshire, building work led to the discovery of two late Roman inhumation burials, of which one was an adult with a plain bronze bracelet on either wrist and a twisted wire bracelet on the left ankle; it was found that the head had been removed and put between the legs. Coming south to London, where redevelopment has occasioned an extensive programme of archaeological investigation, the excavations at 15-23 Southwark

Street, Southwark, may be noted where, in the western part of the settlement between the two main roads leading south from London Bridge, was uncovered part of an extensive stone building probably of late 2nd or 3rd century date; in one room was a mosaic floor and hypocaust, while in another a red tessellated pavement with a white border, which was later cut by a stone drain or flue and re-floored with *opus signinum*; in the 4th century stone robbing seems to have started and two burials were dug through the floor, one being of a girl aged about 12 who had been wrapped in a shroud and laid on crushed chalk in a wooden coffin; the grave-goods, which may have been ritually broken, included pins, bracelets and a cooking pot of early or mid-4th century date.

At Wells in Somerset, excavations continued on the western side of the Cathedral Close and a late Roman mausoleum was found beneath a sequence of Anglo-Saxon buildings which preceded the existing Cathedral; the burial chamber was shown to be a rectangular pit dug into the top soil and a six-post timber structure, probably a canopy, had been erected in it before the sides were lined with mortared stone and brick; the chamber lay within a mausoleum which in the 8th century became the eastern focus of a cemetery, although at an unknown date it was demolished and replaced by a small chapel; similarly the burial chamber was robbed to be reused as an ossuary. Turning to a different, but extensive, class of Roman building, one may mention the continued excavations at Bucknowle Farm villa in Dorset which have revealed a bath-suite east of the main range approached by the verandah fronting that building; so far a paved cold room with external drain and an adjoining cold plunge are known together with a larger plunge which was added later; it is reported that extensive plant remains were preserved by water logging including "some of the earliest examples of *cannabis sativa*".

Centres of Roman pottery production have always attracted attention and one that has been studied particularly in recent years is that of Alice Holt in Hampshire; a waster dump was investigated and it is reported that "The first structure, associated with calcite-tempered Iron Age sherds and Claudio-Neronian wares, was succeeded by a substantial rectangular timber building of which six rooms, including one for drying pottery, were excavated. Re-floored nine times, it was demolished c. 100 and replaced by a series of sub-rectangular buildings. One of these, dating to c. 120, had massive clay walls with rectangular charcoal-covered recesses used for drying. Waste was dumped over the site in the mid second century, but then another sub-rectangular building with clay walls was erected. At the end of the century a kiln of double-flue updraught type was built with a loading bay on the side nearest the drying-sheds. It underwent five reconstructions, each of which incorporated pottery of early-third century date. Activity had ceased by 270." In the same county at North Hayling on Hayling Island, continued excavations revealed parts of the north-west and south sides of the Iron Age temple enclosure; several hearths had votive offerings which included plated *denarii* of the 1st century B.C.; in addition, glass vessels were found among the offerings related to the Roman temple and a fragment of limestone with an inscription connecting it to the 9th Legion had been reused as packing in a Saxon post hole. Also in the same county at Winchester another 107 inhumation and 2 cremation burials were excavated in the cemetery east of the Roman town at Chester Road; it is reported that "In the early phases, dated c. 300-30, the graves were generally aligned north-south, but in the next phase there was a distinction between the southern part of the site where this

practice continued, and the northern where an east-west alignment predominated. This difference may reflect the formal division in the mid-fourth century by a V-shaped ditch 1.4 m. wide, later replaced by a fence. B.y.c. 350, east-west burial was normal throughout, but grave goods were rare to the south; about ten per cent of all graves were furnished (generally with a single pot) but a further 14 per cent were provided with boots or shoes."

In West Sussex, at the Roman palace of Fishbourne, the "Cupid on a Dolphin" mosaic in one of the rooms in the north wing was taken up for conservation and below it was found a mortar floor, below which was a layer of make-up covering a 1st century mosaic; the border of this mosaic represented a town wall with three courses of masonry with T-shaped crenellations, while each corner had a square tower depicted and in the centre of each side an arched gateway, double-portal on the north and single-portal on the west; there had been partial subsidence of the floor into a pit or well below, while pick-marks showed that *tesserae* on the east side had been taken up, possibly for re-use.

In Canterbury, Kent, the excavations of the Marlowe Car Park were completed showing that a possible Belgic timber building and curving ditch had been sealed by make-up deposited in about A.D. 70; in the first quarter of the 2nd century a house was constructed partly of stone and partly of timber, while a second stone house with heated rooms was built around 150; its hypocaust was taken away at the end of the century and internal timber partitions were built, but four main phases of occupation were recognised as possibly continuing until 350-75; a yard of the same date as the houses had a tiled plinth in its centre, possibly for a statue; occupation finished between the late 4th and the late 6th or 7th centuries when 13 sunken-floored structures were built. At 69a Stour Street and Adelaide Place in the same city, Belgic occupation debris and pits cut by three small mid-1st century kilns were overlaid by make-up also deposited in about 70 A.D.; it is reported that "Two narrow streets lying at right-angles were sealed by the south and west porticos of the large colonnaded enclosure, possibly a temple precinct, located on neighbouring sites. A small rectangular timber building with clay floors, consisting of a narrow external ambulatory and inner *cella*, may have been a shrine. Marble and a few architectural fragments were recovered. In a large pit cutting the final courtyard surface two adults, two children and a dog had been inhumed; of early fifth-century date, the grave contained jewellery typical of the latest Roman period and glass and amber beads of early Saxon (German) origin."

Perhaps one of the oddest discoveries reported during the year was that relating to a jar, similar to the ones made at Brockley Hill, Middlesex, in the first half of the 2nd century, which had been found somewhere between St. Albans and London; it contained cremated bones and on the outside of the jar had been scratched in Latin "the ashes of Satto"; what is unusual is that the jar in question was discovered sometime before 1685 because in that year it was acquired as part of the Tradescant Collection by the Ashmolean Museum in Oxford.

### The Medieval Period

Discoveries relating to the medieval period are reported in *Medieval Archaeology*, Volume XXV for 1981 and, although only a fraction may be noted here, attention may be drawn to the interesting excavation at Southworth Hall, Croft, Cheshire, where a Bronze Age barrow also disclosed a Church and extensive Christian cemetery around and over the mound; although few bones survived, several hundred grave

slots were noted as were three phases of use; the excavator, who identified the church by tracing the gaps in the interlocking graves where its walls had once stood, suggests on circumstantial evidence a pre-1066 date for both church and cemetery.

In Kent, at Ozengell, Ramsgate, excavations revealed another 23 graves dating from the early to mid-7th century; it is noted that almost half the graves, mainly containing female burials, had been robbed and "Precision of the robbing indicated that it occurred soon after burial." Of the male graves, most had weapons and there were two important groups; "in grave 105, a sword with decorated fittings, a shield, two spears, a knife and two squat jars; in grave 110, a seax, spear, two knives, buckles and a pair of pouch bottles." By way of contrast to the formal planned excavation was the accidental discovery by a houseowner at Caistor in Lincolnshire of an Anglo-Saxon inhumation; subsequent excavation demonstrated that "A shallow grave cut in chalk contained the crouched body of a male aged 23-28 years, lying on his right side, head to the south-west. Associated finds were two bronze annular brooches, an iron knife with associated iron ring, six glass, pottery and amber beads, with replaced textile on one brooch. The burial lay 550 m. from the Roman walled enclosure at Caistor. Earlier finds in the area indicate that it is part of an early Anglo-Saxon cemetery." In the same county at Horncastle, two skeletons were discovered during drainage work at no. 2 High Street; the police removed the first which was lying north-south with iron work on its ankles, while the second nearby lay east-west and was female. The grave goods proved to be a bronze annular brooch, two beads and a knife; it is concluded that "It is clear evidence for the presence of Anglo-Saxons within the Roman walled area by the 6th century, the burial lying directly outside the line of the east wall".

In Norfolk, at Norwich, a late Saxon single flue updraught pottery kiln was revealed during building work at 27 Bedford Street; Thetford-type cooking-pot sherds were abundant and these included wasters; it is reported that "Remnant magnetic dating of the clay lining of the flue gave a last firing date between 960 and 1060 A.D." In the same county at Spong Hill, North Elmham, a further season of excavation revealed a large part of the southern half of the Anglo-Saxon cemetery, where six hundred cremations were found, thus bringing the total for the whole cemetery to more than 2,200; it is noted that "Amongst them were some grouped burials including a cluster of twenty urns, apparently buried simultaneously, which should help provide a relative site chronology. Some pots belonged to types known on the Continent from the late 4th and early 5th centuries, notably a small carinated pedestal pot and several with finger-tip rosettes." Early brooches and remains of a rare blue glass vessel were also recovered, but there were no inhumations.

At West Heselton in North Yorkshire, an extensive rescue excavation has been conducted in advance of sand extraction and this included the investigation of a large Anglian inhumation cemetery; some seventy graves were examined and more than 80 per cent were furnished, four with spear heads and one associated with a shield boss; it is noticed that "one grave apparently placed at random, contained a 5-year-old male buried with the body curved round the decapitated head, with an iron bit below. In two cases with unusually well-preserved bone, the bodies were face down, apparently hastily buried and the legs of one were tied together. These have been interpreted as mid or late Saxon criminal burials, *cwealmstowa*." At the Coppergate site in York, where important excavations have been undertaken since 1976, further structures were examined; what

was particularly interesting was that "Damp conditions ensured excellent preservation of organic materials and a full programme of environmental and ecological investigations was maintained. Industries include spinning (whorls); weaving (loom weights; tablet for tablet weaving; perhaps part of a loom); bone and antler working (debris; trial- or motif-piece with Jelling-style ornament); metalworking (lead ore, crucibles for lead, bronze, silver and gold; stone and clay moulds); coin die-cutting and perhaps minting (trial strikes on lead for coin of Athelstan (20) and Eadwy (1); iron pile for a coin of the St. Peter's pence series c. 920); and fast wheel-thrown pottery with thick glassy incrustation, perhaps vessels used in glass-making by the batch process. International trade was indicated by finds of silk, including a complete cap, a Red Sea cowrie shell, a counterfeit dirham of Ismail ibn Ahmad of the Samarkand mint c. 903-7/8, a Hedeby penning soapstone, Telemark mica schist, Badorf ware and numerous non-local artefacts."

In the Orkneys, an excavation was carried out at Westness on Rousay revealing a ninth century Viking cemetery which was threatened by erosion; some 32 graves have been uncovered and a boat-grave was investigated to give details of boat construction as well as the method of deposition; five oval graves nearby contained weapons, jewellery and tools, while of the other graves examined it was found that the acid clay had destroyed the bones including those of children.

In Wales, at Capel Eithin, excavation revealed a substantial stone building with internal pit of Romano-Celtic date which came before a group of early Christian graves dating from about 400-700 A.D. of a kind known from West Britain, Ireland and North France; apparently on the edge of an extensive cemetery, some 30 empty inhumation graves, nearly half of them of children, have been investigated so far and found to be concentrated below the north-east edge of a large cairn and scattered in the north-east of the site.

### The post-Conquest Period

Turning to the post-Conquest period, the work carried out on the Poor Priests' Hospital in Stour Street, Canterbury, Kent may be mentioned; it is reported that "Excavation in the solar of the hospital indicated two major construction phases, of the late 12th/early 13th century and the late 14th century. The early levels consisted of a sequence of mortar and clay floors, separated by lenses of flood silt. These floors were probably associated with the first stone house, apparently that of Lambin Frese, the moneyer, built (as recorded in documents) by 1180. The floors were approximately 1 m. lower than the associated floors in the hall. This would suggest that the solar was, in part at least, a half-cellar with access via a door in the north-east corner of the hall. The early floors were sealed by dumped deposits and the infill sealed by a further sequence of clay floors, and at least two parallel dwarf walls. This intermediate construction phase indicates an infilling of the cellar and perhaps the reconstruction of the solar floor in the early 13th century, possibly when the building was converted into the hospital of St. Mary to shelter poor priests in c. 1220."

An interesting excavation of a monastic site in Wales was carried out at St. John's Priory in Carmarthen in Dyfed; this was an Augustinian house on the site of a pre-Conquest bishop house and the excavation revealed the remains of the east end or presbytery of the Priory Church and a cemetery to the east of it; much damage had been done to the site by a 18th century lead smelting works; a small lime kiln, the base of which had been cut by several

inhumations, was near to an earlier east end of the church and was dated by the radio carbon method to 1080 ± 60 A.D.; it is suggested that the kiln "may therefore have produced lime for the building of the first stone church following the establishment of an Augustinian house by Bishop Bernard of St. David's after a short-lived attempt by Henry I to establish a cell of the Benedictine Battle Abbey there c. 1110."

In Bristol, excavations in Redcliff Street, exposed a small part of the 13th century outer defensive wall as well as the back of an adjoining tower and a quay wall on the River Avon; the investigation of buildings, including a 14th century dyers' workshop, demonstrated a complex of water-cisterns, vat-bases, hearths and an extensive drainage system, together, evidence of 13th century horn working. In Scotland, at Leith, excavations revealed that the area south of Bernard Street was below the high-tide line until the second half of the 15th century, "when the land had been reclaimed by the deposition of large quantities of domestic refuse mixed with sand and soil. Alignments of stones survived as evidence of primitive structures associated with the deposition of this midden, which was dated on the basis of coin finds to the early 1470s. The evidence for this came in the form of a hoard of 358 coins, buried at the time of the deposition of the midden and including billon pennies of James III."

An interesting medieval industrial site was in Nantwich, Cheshire, where in Wood Street was found part of a medieval salt works using the open pan method of boiling off the brine; of two houses investigated, one represented the initial colonisation of the west bank of the River Weaver and the expansion of the industry in the 13th century; it is noted that "Lead fragments suggest that brine was boiled up in lead pans over open fires. The boiling areas were oval in plan and consisted of the rakeout formed by partially burnt clays and charcoal, an oval of burnt soil, and thirdly the central ashy residue from boiling off the brine. In both houses a clay-puddled channel was deliberately positioned adjacent to three of the salt boiling areas and a boat-shaped area of stakes was located midway down the west end. It seems possible that this end of the house was used as a drying room with the east sector being reserved for the kilns."

### Recent Centuries

For recent centuries, investigations and discoveries are recounted in *Post-Medieval Archaeology*, Volume 15, 1981. The Square Tower at Portsmouth in Hampshire has been the object of a detailed survey which has demonstrated that many of its Tudor features survive; it was built in 1494 as a combined gun-platform and domestic residence, serving that purpose until the late 16th century; used as a powder magazine until the early 18th century, the Square Tower was converted to a meat store by the Admiralty Victualling Board, while from the mid-19th century it was used for defence.

In Hertfordshire, excavations in Hitchin, have led to the discovery of a number of cobbled yards and timber-framed buildings fronting medieval Portmill Lane; most of the remains dated to the 17th and 18th centuries and included an 18th century well; it is noted that "three shallow circular clay-lined pits were associated with the preparation of cattle horn cores for an industrial process. Over one hundred copper alloy pins of various sizes, many of which were silvered, were found scattered over the yard surfaces, but their function is uncertain."

Excavations in Epsom, Surrey, disclosed the ground plan of two 17th century timber frame buildings on two sites north and south of the High Street; subsequently, many 17th century and later

cess-pits and wells were exposed, including one large cess-pit constructed of moulded stone from Nonsuch Palace, which was found to contain many early 18th century items thrown out from a public house, i.e. water logged cloth, leather and wooden objects, a dice-shaker and dice, wine bottles, glasses, drinking mugs and three hundred clay pipes. A post-medieval

industrial site of some interest was excavated at Kimmeridge in Dorset; it was the glass furnace built in 1618 by Sir William Clavell and demolished in 1623; it sat on a level platform overlooking Kimmeridge Bay and was fired with local oil-shale with the draught coming from a lengthy stone lined flue system.

## BRITISH ARCHITECTURE, 1981-82

## CIVIC CENTRE, CHESTER-LE-STREET

Architect:

Faulkner-Brown Hendy Watkinson Stonor

Chester-le-Street, a traditional mining community lying between Durham and Newcastle-upon-Tyne, might not be thought to be a very likely place for breaking new ground in civic architecture, but with the opening of the new Civic Centre in May, 1982 at a cost of just over £3 million, this is just what has happened. The council offices of Chester-le-Street had previously been dispersed in four buildings in the town, but these provided insufficient accommodation and were also becoming rather dilapidated. These conditions inevitably gave rise to a feeling of isolation from the community and general irritation at the resulting operational inefficiency. Yet while recognising the need for a new consolidated civic centre housing all the departments, the councillors were determined that this should not result in a traditional monumental town hall for the aggrandisement of the civic authorities. Instead they sought a building where all the citizens would feel welcome, and where the relationship of the authority to the local population would be expressed with an air of egalitarian efficiency rather than uncaring and smothering bureaucracy.

It is perhaps significant that in an age of technology the architects should have responded to this desire with an essay in "machine architecture". Yet for all its modernity of style, the building still retains some of the traditional and powerful symbols of the town hall. This sometimes deliberate, sometimes accidental synthesis of symbolic content with a technological twentieth century expression has given local government in Chester-le-Street a sense of identity firmly linked with contemporary attitudes to the role and workings of public authority.

The building is sited on the Newcastle Road slightly set back on an open sloping site that constitutes a sort of municipal campus, with the police station, magistrates court and a health centre alongside. The siting of the building skilfully exploits the local context, so while it becomes a definite landmark in the tradition of Victorian town halls and thus an object of civic attention and pride, it nevertheless complies with the clearly stated aim of rendering the organisation and internal workings of the town hall literally accessible to all, by straddling an existing public footpath and transforming it into a central mall which unites all the different functional zones of the building. The central mall, approached beneath the symbolic town hall clock and with its clear plastic barrel vault affording natural daylighting throughout its length, has some of the characteristics of a conservatory, and indeed will in due course be furnished with indoor planting. It is a light and airy space, with a roofscape dramatized by the presence of large white-painted air-handling ducts. It forms the spine of the building, and acts as a continuous reception area giving access to various council departments and enquiry desks.

At right-angles to this mall, forming a cruciform pattern that divides the complex into four office units linked by stepped bridges, is a public amenity zone, containing a restaurant, exhibition area, meeting rooms and interview rooms. These spaces are all open during the day, and may even be rented out for private functions in the evening and at weekends. These spaces too are treated with glazed roofs giving a flood of light by day, and the restaurant has a fully glazed end wall giving views outside the building. The ground floor is laid out with split levels at this point accommodating the gradual slope of the site, while offices are arranged on two levels either side of

the central zone overlooking the public areas on one side and the open expanse of burolandschaft offices on the other. In fact three types of office space have been incorporated, with burolandschaft or open-planned offices taking about 55 per cent of the space, cellular offices directly related to these and overlooking from a mezzanine level a further 10 per cent, and the remaining 35 per cent in fully enclosed cellular offices, which also incorporate the council suite and council chamber and other back-up services.

Externally the building form is that of a sleek wedge-shaped silver box, crowned by the transparent "greenhouse" roof of the barrel-vaulted central mall, and with a long sloping roof plane punctuated by a series of triangular ridges running up the roof on either side of the mall. These ridges are in fact triangular duct spaces, formed from GRP cladding, which sit astride pairs of lattice trusses. The structural scheme involves a braced structural steel frame laid out on a 7.2 metre grid, with precast concrete panels and plank floors. On the east side, the two-storey zone of cellular offices is enclosed within a steel portal frame that is encased in steel where exposed to view and this supports one end of the long pairs of trusses which span the public amenity zone and the large open spaces of the burolandschaft offices. The roof is formed from a proprietary sandwich construction system utilising a deep ribbed profile self-coloured steel decking, spanning between the pairs of trusses, which in turn supports two layers of insulation with vapour barriers within the depth of a series of spacer ladders that support the final outer layer of silver colour-coated steel.

The external wall cladding was developed specially in conjunction with a manufacturer of proprietary gasket glazing curtain walling, and is designed to be easily rearranged to permit different dispositions of solid and void as the internal planning requirements develop through time. This may be done by "unzipping" the gaskets which retain the panels, enabling rearrangement of the internal and external skins which have similarly detailed fixings to the double-headed glazing bars that form a modular grid of mullions. When not formed in glass, the outer skin is made from a natural coloured aluminium and polyethylene sandwich construction, and the inner skin is a self-finished asbestos cement panel. Insulation is placed between the two skins.

The building is completely air-conditioned, though only the public amenity zone can be circulated with chilled air, a necessary introduction in view of the likelihood of solar gain through the glazed roof. Far from being hidden from view, the services, and in particular the air-handling ductwork, have been handled in a deliberately dramatic and provocative manner. Having created a long light airy space for the central mall, the architects have then crammed the roofspace with a virtuoso display of sinuous white tubes, and where they have opened up the wall of the restaurant with a huge window to give uninterrupted views outside they have consciously rerouted the boiler flues and positioned the two shiny stainless steel flue pipes within a bright blue steel latticed structure flue immediately in front of the window.

It is possible that this deliberate machine-age imagery may awaken some echoes in the local populace of their industrial heritage, now something of the past. But this is a building that works on several levels of influence. The mall and amenity zones have definite roots in the conservatory-orangery tradition and express a strong feeling of the outdoors brought in, of a transitional space between inside and outside, that is heightened by the

lushness of planting and even such devices as the green as grass carpet, which in the meeting rooms actually becomes astroturf.

The building makes no attempt to blend in with its surroundings and no pretence at being inextricably linked with the historic development of the town. Indeed its character is more that of a festival marquee, offering a cool and pleasant sunlit environment for an efficient and personable bureaucracy. The forbidding corridors of power are not for this council. While the indoor spaces have proved very popular for social functions of many kinds, and are booked up for months in advance, it remains to be seen whether this building, with its anti-traditional factory ethic, will foster the development of more profound and intangible relationships with the community over the long term, and thus succeed in overcoming what must in the first instance be a significant culture shock for the community it is designed to serve.

#### MICROCHIP FACTORY AT NEWPORT, GWENT

Architect: Richard Rogers & Partners

As befits its late twentieth century function as a prime centre of Britain's microtechnology industry, this arresting new factory looks as if it might have come straight from the sets of some science fiction movie. Designed by Richard Rogers, architect of the Pompidou Centre in Paris and the new Lloyd's building currently under construction in the City of London, it is another stunning essay in what has come to be known as the "Hi-tech" style, embodying a celebration of the design potential of all the technological and industrial techniques now universally employed in the manufacturing and building industries.

Such is the speed at which the microchip industry is expanding and developing, this building has been put together over an extraordinarily short span of time. Inmos, the Government-backed microchip company, took possession of the building in February, 1982, just two years and two months after the architect was appointed, and total construction time on site was a mere 15 months. The initial programme had allowed seven months for the briefing period and the design of the building up to the point where work was required to start on site. Had it not been for a 25-week delay, during which time the site was moved from Bristol to Newport at the Government's insistence, in order to bring jobs to a needy development area, then the total period would have been even less.

Not surprisingly, the required speed of the whole operation had a critical influence on the design of the building and the relationship of structure to services. It was quickly established that speed of construction on site would be considerably improved by minimising as far as possible those trades requiring "wet" work, and designing the services around items of plant made up from a kit of parts that would be largely prefabricated off site. For these reasons too, the structure itself was organised on a modular basis with regularly repeating bays that, once started, would permit a continuous sequence of trades to follow along behind. Thus at any one time during the construction period, a wide range of different building activities could be carried on simultaneously. The building design also had to incorporate sufficient flexibility to permit changes in the brief to be accommodated throughout the design and construction period, and also to facilitate subsequent internal reorganisation and adaptation during the life of the building. For these reasons it became clear that internal structural elements should be eliminated or kept to a minimum, and the servicing

arrangements should be intensive enough to cope with future requirements.

The building reflects the concepts of change and flexibility, and the principles of light weight demountable prefabricated construction have been the inspiration behind the design. This involves a tubular steel structure which spans 39 metres on each side and is supported by a central pair of tall steel pylons, from which the two equal clear spans of the roof structure are suspended. From the tops of these pylons steel cables run down to the roof to provide additional support to the long roof spans to limit their deflection under loading. The general appearance has something of the feeling of a cross between the rigging of a ship and a suspension bridge. The double pylons form a central circulation spine approximately 7 metres wide giving access to the accommodation arranged either side. There are some nine of these paired towers enclosing eight bays of the building each 13.2 metres wide. The overall size of the building is therefore large in relation to its volume and covers some 80 x 100 metres. The north facing wing will be used for production facilities and the south wing for office, research facilities and back-up accommodation.

The central circulation spine formed by the steel towers acts as the primary distributor route for servicing ducts, pipes and cables and also accommodates individual "packages" of air-conditioned plant on platforms suspended above the general roof level. The services installation is particularly complex and concentrated, and in the end has accounted for nearly 50 per cent of the building cost budget. Apart from the enormous requirement for electrical power in the manufacturing process, the problem of dust, and how to control or eliminate it, constitutes one of the major areas of concern for the microchip industry. Stray particles of dust in the atmosphere can create havoc with the etching processes used to produce the chips, which are operating at the microscopic end of the scale, and a barrage of devices are brought into play to try and deal with the problem. Special filters and airlocks within the air-conditioning system in conjunction with special clothing, and equipment to pressurise the air are all involved in the attempt to keep the composition of the air in sensitive "clean" areas to a constant within a few parts per million. It is a difficult problem to control, with anything up to a thousand people being employed in the manufacture of the chips, working on a shift basis throughout the day and night.

Much of the massive ventilation ductwork that is used to control the internal environment is visible from the outside as it emerges through the roof structure and cladding at the point where it services the interior space, and then snakes across the roof and up into the container-like "packages", housing the air-conditioning plant and equipment at high level amongst the array of towers and criss-crossing tension cables, ties and braces. Whilst it was originally envisaged that these rooftop services would be treated in a range of bright colours, in the event these have been toned down to shades of silver and grey, and serve to contrast all the more with the steelwork of the structure which is painted bright blue throughout.

The external wall cladding has been designed as a modular system of mullions and infill wall panels, which can incorporate a wide variety of different materials and single or double glazing in opaque or transparent panels. Selected panels may incorporate windows, doors, or louvres. The principal colours of the solid wall panels are white and grey, contrasting with the dark grey solar control glass of the window panels and producing in certain areas an almost random chequerboard pattern of light and dark squares. The cool simplicity of the exterior cladding

provides the ideal foil for the colourful complexities of exposed steel structure and services.

Getting the project completed on time and at the budgeted cost has been an organisational triumph, particularly considering the complexity of the technology involved and the developing nature of the client's requirements, as well as the knowledge that one mistake along the line could jeopardise the functioning of the whole factory, such is the sensitivity of the manufacturing process. The extra costs involved in this degree of technical control have contributed to the final price for the completed building of £8 million. The machinery which Inmos will install for the production of the microchip will cost a further £20 million.

#### RESTORATION OF THE TEMPERATE HOUSE, KEW GARDENS, SURREY

Architect: Manning Clamp & Partners

Since its conception in 1859, the Temperate House at Kew, then the largest glasshouse in the world, has stood as one of the finest monuments in the great British tradition of glazed garden structures. But the ravages of time take their toll and by the early 1970s it had deteriorated to such a state that it was deemed to be a danger to the public and was therefore closed. It has since been the object of a remarkable and lengthy restoration exercise under the aegis of the Property Services Agency. Not only has it been given a new lease of life for the public to enjoy, but it has been returned to a state where it is closer to the original ideas of its designer, Decimus Burton, than it has ever been.

Decimus Burton was of course responsible for the stunning curvilinear Palm House which had been completed earlier, but when he came to prepare designs for the Temperate House for the then director, Sir William Hooker, the brief which was laid down implied a very different kind of solution. The Temperate House is in fact not one, but five distinct buildings linked together and disposed symmetrically about a central north-south axis. The central block is the largest, 64.7 metres by 41.9 metres and 19.2 metres high at the apex, and is linked by two octagonal pavilions to the north and south wings, which are themselves 34.3 metres by 19 metres and 11.4 metres high. Even by today's standards it is a considerable building, and when it was built, financial difficulties resulted in the construction being carried out in phases, starting in 1860-63 and not being completed until 1895-98. This delay, during which Decimus Burton had died, resulted in modifications to his original designs. The recent restoration is not the first time that the house has required extensive repair work, for in the mid 1930s extensive reglazing and repairs were carried out on the central block.

One of the most important features of the structure of the main block is the series of wrought iron arches that span the central space, springing from a gallery some 11 metres above floor level and supported on cast-iron columns linked together in pairs. Each of these arches has a moulded timber soffit that boosts the appearance of weight and strength but in fact performs no structural function at all. The use of a large amount of timber throughout the building, sometimes as a cost saving measure, as in the structural roof members of the south wing, as well as for decorative purposes, eventually led to water penetration and the onset of rusting of iron and steel members.

Burton had also designed an ingenious system of ventilation but this in turn leaked, causing ironwork in the roof to rust, and the system had eventually to be fixed shut. The high level section of the roof in the centre block was designed with sliding sash

ventilators, in groups of threes moving within grooves in the iron rafters, and operated by means of windlass and chain. However, this system soon proved defective and the ventilators seized up. Not only therefore was ventilation a problem, but lighting was far from adequate, and not only because the orientation of the building owed more to a proposed axial alignment with a station that was never built than to the requirements of the plants for natural light. The heating system had its faults too, and resulted in overheating of the octagons, whose basements housed the boilers, and deposition of soot on the glazed roofs. During the repairs of the 1930s, some of the glazing had been replaced by new hinged ventilators and wider panes of glass to let in more light, but the daylight intensity remained a problem. And so when the feasibility report was prepared in 1972 examining ways of extending the life of the building for a further 50 years, the main aims of the proposed renovation were to improve the level of day-lighting, improve the ventilation system, and also improve the system for the collection and storage of rainwater which was used for watering the plants.

The initial survey revealed a considerable amount of deterioration in the masonry and glazing as well as extensive corrosion of metalwork, particularly in the secondary members of the structural cast-iron frame. But detailed analysis of the main arch frames in the central block revealed that the major portion of the structural framework was sound and re-usable, and proposals were established for defective ironwork to be repaired. In order to improve day-lighting, the first proposal was to reglaze the roofs with patent glazing and remove the heavy iron sash guides of the original scheme as they had ceased operating and the sashes had been fixed shut. However, this proposal, while satisfying the technical and engineering requirements, did not solve the cultural problems implicit in the restoration of what was a listed building of architectural and historic interest under the protection of the Department of the Environment, and the design of the restoration was required to reflect the status and character of the original. It therefore became apparent that not only would the architects and engineers have to work very closely together to achieve a satisfactory synthesis of architectural and engineering requirements, but the views of other interested bodies would need to be heeded. One of the decisions taken following the advice of the D.O.E. Historic Buildings and Ancient Monuments Directorate was that the proposed new glazing should be designed to bring its finished appearance as close as possible to Decimus Burton's original scheme.

A design for the glazing had to be developed which both provided more light, requiring relatively slender supporting members, and also could adapt to the original spacing of Burton's design which had been displaced in the repairs of the 1930s. The possibility of using a glazing grid system over the entire roof disregarding the spacing of either Burton's design or the subsequent alterations was discarded as it was felt this would have been out of character with the building and did not satisfy the requirements for historical accuracy, or at least similarity, that were the architect's concern. In the event it was decided to retain the existing spacing of bars at about 406 millimetre centres (approx 16 inches), this being the spacing which Burton had originally envisaged in his earliest designs before the introduction of the sliding sash roof ventilators.

An extruded aluminium glazing bar was purpose-designed for the job, together with special neoprene sealing strips. The neoprene sealing strips are arranged in pairs, two to each glazing bar. The upper pair are light and flexible, providing double water-tight contact with the glass, while the lower pair are

of a heavy duty grade material to support the weight of the glass and the pressure of the upper seal. The cross-sectional area of the glazing bars has been considerably reduced from that of the original timber members, thus cutting down the obstruction of daylight from 20 per cent to 7 per cent. Also, with the aluminium being a self-finished material not requiring painting, maintenance problems have been greatly diminished. Anyone who has ever had to paint a small garden greenhouse will appreciate what this means on a roof that covers over 5,000 square metres. It is interesting to note that more than 11 miles of glazing bar and capping and 45 miles of neoprene gaskets have been used.

A completely new heating and ventilating system has been designed by the engineers. A new central boiler house some 200 metres away from the building now supplies hot water to a series of heat exchangers, in the basement of each octagon, and these in turn supply hot water to cast-iron radiators sited around the building as well as to ancillary heating surfaces such as the radiant panels at high level in the central block. A system of push button controls now operates a series of high level motor-driven ventilators and allows the natural ventilation in each of the halls to be closely controlled.

The water storage capacity of the building has also been improved, with six underground tanks now capable of holding 120,000 gallons of rainwater collected from the roof of the building. This will enable the Temperate House to be self-sufficient in water for the plants for up to 20 days.

It is to the credit of the client and consultant teams that having spent some £1,750,000 on the restoration, the casual visitor, admiring an exotic display of plants, might well not notice much difference. The glories of the Victorian cast-iron work are still there of course for everyone to admire, now resplendent in a fresh coat of white paint. (It was found by chipping away at layers of paint on the columns that the original scheme had been white).

Externally, many of the architectural embellishments had either disappeared through time or perhaps had never been there at all. Now this has been put right and for the first time in its long life the Temperate House has its full complement of decorative urns, and even the statue over the main entrance which was damaged has been literally re-armed after painstaking research by the architects to discover the details of the original.

In between the completion of the restoration work in late 1980 and its official opening by the Queen in May 1982, the public have once again been allowed in and are doubtless enjoying resuming their wanderings among the exotic occupants of this "Palace among glasshouses".

#### ST. JOHN OGLIVIE'S CHURCH, BOURTREEHILL, IRVINE, Ayrshire

Architects: Douglas Niven and Gerard Conolly  
Consultant Architect: Clunie Rowell

This new Roman Catholic Church, built for the Trustees of the Diocese of Galloway, lies in the new housing area of Bourtreehill on the north western outskirts of Irvine New Town, and forms part of a "village centre" along with a development of shops, a pub, and a Church of Scotland Church sited immediately next to it. The brief called for a Church which would seat a minimum of 300 worshippers, an associated hall for parish activities which could also double up as overflow congregation space on special occasions, and a presbytery to house the parish priest, curate, housekeeper and guests.

Because of its location within the "village centre" the Irvine Development Corporation stipulated the choice of external materials, these being a silver-grey

shot-blasted concrete block and blue-black asbestos cement slates, reflecting the nearby housing. Given this restricted palette of materials and a relatively simple brief, the architects have risen to the occasion splendidly and have produced a confident, easily understood yet subtly complex building of great distinction.

The plan form seems to be largely generated from the dominant roof shapes of the two major spaces of the church and hall, with the range of the presbytery to one side and the lower entrance and ancillary spaces linking the three elements along one side. However, the potentially rigid effect of these few simple forms is relieved by a number of subtle devices and the close attention paid to the detailing of materials and their junctions. The orientation of the central aisle in the church on to the diagonal effectively combines the axes of the entrance on the one side and the hall on the other, while the approach through the double doors into the church being on the diagonal, consequently gives a more interesting and apparently spacious view of the church, which would not be achieved with the traditional single axis arrangement. A small sanctuary space projects beyond the main octagonal space but is again offset to add interest and a feeling of spaciousness much greater than its relatively small floor area would suggest.

The top-lit pyramidal roof spanning the main church space is an impressive structure utilizing a mixture of prefabricated composite timber girders and simple timber joists exposed under a timber-boarded finish. Though as a structural concept it is relatively simple it nevertheless creates a wonderfully complex effect, through the criss-crossing of intermediate beams between the main girders and the full expression of all the structural elements such as the groups of steel fixing bolts, which is heightened by the play of daylight entering through glazed slots in the upper section of the roof and rows of carefully positioned spotlights. The structure of the adjacent hall roof is almost identical but carried out in a much simpler way with simple timber joists and composite beams replacing the complexity of the specially designed girders in the church. Thus the structural detailing immediately helps to signal the hall as "space no. 2" in a hierarchy of spaces in which the carefully modelled and split level entrance hall or narthex thus assumes third place with its own version of roofscape, this time a simple monopitch roof, with timber joists exposed and a continuous clerestory along one side.

However, it is perhaps the distinctive design of the stepped windows to the church that most readily provides a recognisable feeling of individuality to the building. At the same time the contrast between these and the simple sash windows of the presbytery range helps to identify the relative roles and importance of the different parts of the building when seen from outside. The windows that light the main body of the church spring from a long narrow clerestory light, running around the perimeter at eaves level, whose cill-line drops down dramatically in a series of unequal steps and then rises again to create irregular window shapes whose outline is picked out by a continuous red-painted timber frame. The windows have the appearance of screens and are divided up by a grid of mullions into small panes that, though clear at present, are intended at a later date to be replaced at random by areas of coloured or stained glass. This staggered cill concept reoccurs in a modified form in the design of the screens either side of the double doors into the church, thus linking the initial outside image with the internal detailing in an unobtrusive but convincing way.

Throughout the building this careful attention to the relationships between building elements and the

spaces which they enclose has imparted a strong feeling of visual integrity, complexity and richness, and the assured handling of the architect's primary means of expression, that is to say control of light and space, lifts this new church well above the ordinary. It is no surprise that both the Glasgow Institute of Architects and Irvine New Town Corporation have made this building the recipient of awards for the best new building in their region and as a further accolade it received the RIBA Architecture Award for Scotland in 1982.

### THEATRE ROYAL, PLYMOUTH

Architects: Peter Moro Partnership

Plymouth in Devon has seen much rebuilding since the last War, particularly in the central areas, and it was in the context of the new city centre that it was decided in 1974 to develop one of the large central sites, principally for commercial use but with the additional benefit of a new theatre. The early designs followed the confident and grandiose approach typical of many of the schemes produced by ambitious civic planners in the early 1970s, but like many did not reach complete fruition. Eventually, the commercial component of the development was abandoned and so the new theatre, which opened its doors for the first time to the public in May 1982, stands as a sole reminder of earlier and grander plans.

It is most probably for this reason that its external appearance is on a considerably larger scale than its immediate neighbours, and the very forceful octagonal massing of the new theatre, with the upward thrusting form of the flytower breaking through the general roofline, has a somewhat intimidating relationship with the smaller scale buildings around it, though the dual carriageway which it fronts and the large roundabout nearby contribute to an appropriate sense of spaciousness in which to approach the building.

Internally, the main feature is of course the auditorium. Here, much ingenuity has been used in reconciling the conflicting demands of the brief in relation to the most desirable size and seating capacity of the auditorium for activities which might range from large-scale productions put on by top touring companies, such as the Royal Ballet or the Royal Opera, to the smaller and less ambitious local repertory companies, for which a more intimate environment would be required. This apparent dilemma has been most ingeniously solved by the design of the auditorium ceiling which incorporates mobile sections which are suspended on cables and motor-operated. They can be thus lowered at the touch of a switch to completely seal off the upper circle seating area, and leave the stalls and dress circle areas as a smaller and more intimate auditorium. The moving sections of this ceiling are constructed as three lighting bridges, faced with timber panelling, and having a splayed plan form reflecting the layout of the seating and gallery frontage below. In this way the seating capacity can be increased from 708 in the combined stalls (308) and dress circle (400), to a total of 1,211 with the inclusion of the upper circle (503). This ability to modify the volume and shape of the auditorium is also of great use in that it enables the reverberation time and the general acoustic characteristics of the theatre to be modified considerably, to suit the different acoustic ambiances required for speech and music.

Not surprisingly, this apparently effortless device is backed up by considerable technical complexity. The mobile bridges contain much of the stage lighting equipment as well as mechanical ductwork and cabling, and those ducts which are connected to the moving parts are therefore of a flexible type.

The main entrance foyer at ground level wraps

around two sides of the basically octagonal plan form and continues into a third side to become the foyer for a small studio theatre which is tucked in at one side and partly projects from the line of the curtain walling on the upper floor levels, where there are housed mechanical plant rooms, space for various technical facilities and administrative offices. The motif of the octagonal shape reappears in various forms, such as the lighting feature in the piazza at the main entrance, the enclosure to the lift from the main foyer level, and even in the free-standing columns in the foyer. The plan form of the studio theatre and the free-standing eight-sided enclosure to the emergency escape stair are further evidence of the strong geometrical influences that have found expression throughout the building.

Built at a cost of some £9 million, this is not a cheap building, and it is to be hoped that the earlier uncertainties concerning the most likely eventual users, that in turn gave rise to the theatre's most unusual capacity for flexibility, will lead to a full and enthusiastic usage of the facilities for performances large and small. The provision of interesting and spacious foyers backed up by an exhibition room and the necessary range of bars and catering facilities will do much to commend this imposing new building to the theatre-going public.

### ENGINEERING RESEARCH CENTRE, SWINDON

Architect: Architects Design Partnership

Swindon can rightly be proud of its increasing collection of architectural showpieces, but this new Water Research Centre, sited not far from the M4 motorway must surely be the most eye-catching of them all. Large sloping expanses of dark solar control glass, tall exposed columns coloured brilliant red and ribbed facing panels in dazzling blue glass-reinforced-polyester contrive to make this an unmistakable and dramatic landmark in the generally undistinguished context of the Blagrove Industrial Estate.

The accommodation called for in the brief comprised office space for research engineers, an experimental test hall for engineering, other laboratories for dealing with electrical instruments and general materials, together with a range of communal facilities which include administration areas, a computer room, library, space for filing, a conference room, exhibition space and a reception area, and modest catering facilities. In addition, the client was looking for a building that was flexible in the ways it could be used and capable of future extension, and while there was to be no unnecessary ornamentation or "special features" it was hoped that the building would nevertheless express through its shape and structure the engineering functions for which it was designed. The Water Research Centre, as its name implies, carries out work in water distribution, pollution and engineering research, and one might expect therefore to find an appropriate "water engineering" theme expressed in the architecture.

Indeed the structural scheme originally involved external columns water-filled for fire protection, but this proposal was considered uneconomic because of the enormous cost of chemical additives needed to prevent rusting, and in the final solution the columns were provided with a reinforced concrete core. They are still separated from the main envelope of the building and deliberately expressed as discrete elements quite distinct in form and function from the interchangeable cladding panels, an arrangement which is intended to improve flexibility in use by eliminating, or at least reducing, the interference of columns with the internal planning of the laboratories. In the case of the double-storey height engineering hall, this enables an expansive and

totally unobstructed space to be provided, and permits a large overhead crane to travel the whole length of the hall unimpeded.

The plan of the building illustrates the clear differentiation in structure and appearance between the closed, solid and brilliantly coloured rectangular blocks of the engineering facilities, and the dark transparent glazing of the communal and circulation areas. The relationship can be seen as that of two "hard" elements separated by a "soft" spine. The arrangement is strongly axial, and the glazed "soft" spine continues on this axis past the end of the main blocks before opening out and spreading down to the ground to form a large tent-shaped structure. Curiously, given such a strong axial emphasis, both in the form and the planning, the main entrance is not where one might expect to find it, that is to say on the centreline of the axis and under the lofty apex of the glazed triangular end, but instead is tucked inconspicuously away to the side, where the glazing sweeps past on either side right down to the ground.

Given that there seems plenty of space around the site, it is curious that this, the most striking elevation, displaying five large red columns, with neatly chamfered tops following the angle of the sloping sides, boldly standing out in front of the dark but semi-transparent triangle of glazing which in turn reveals a glimpse of the brilliantly coloured but dissimilar forms of the laboratories behind, should not have been used to greater effect as an entrance approach. It would surely have made a more lasting impression on the visitor and would also have served to reveal the formal layout of the building at a glance before entering.

Once inside, however, the engineering character of the building comes strongly into view with brightly coloured ducts and a maze of pipework competing vigorously for attention with the exposed structural members and the continuous glazed roof which spans the link between the laboratory blocks above the first floor gallery. For all the potential drama of the tent-like glazed entrance space as envisaged from outside, the reception area is disappointingly tight and low-ceilinged; only when ascending the main staircase does the full dramatic potential of the space become apparent. While the first floor gallery rejoices in a wonderful play of light from above on many colours and forms, the ground floor concourse lacks the same visionary quality and seems overpowered rather than uplifted by the mass of ducting filling the ceiling space. It would appear that the decision, no doubt prompted by demands for space, to place cellular office accommodation in the first floor gallery, has had the effect of reducing the amount of visual interpenetration and daylighting from above down to the ground floor.

Nevertheless, the architects have managed to create a striking and adaptable building, which should be quite easily capable of expansion into the future phases which are envisaged along an extension of the central glazed axis which doubles as pedestrian concourse and services distribution spine. The final cost of the building was in the region of £1.66 million, but despite the highly articulated and unusual form it is claimed to have worked out at little more than the equivalent cost of the more conventional type of office/laboratory complex.

#### MIXED DEVELOPMENT AT 19/23 SHAFTESBURY AVENUE, LONDON

Architect: Powell, Moya and Partners.

This recently completed development of a bank, shops and offices at 19/23 Shaftesbury Avenue lies in the heart of London's theatreland only a stone's throw from Piccadilly Circus. At a time when it is

increasingly difficult to make bold and enterprising contributions to prominent city centre streetscapes, this project comes as a welcome reminder of what can be achieved in a truly modern context given sufficient care, effort and attention to detail.

The building lies on a corner site at the junction of Shaftesbury Avenue and Denman Street, opposite the Trocadero site now under construction on one side and the lower end of Great Windmill Street on the other. As the site forms part of a large block fronting the north side of Piccadilly Circus it has featured in most of the all-embracing development plans for the area that have come and gone over the years. With the demise of the last comprehensive development plan, the site was offered to bidders by the G.L.C., and subsequently purchased by National Westminster Bank, who instructed their architects, Powell, Moya & Partners to prepare a redevelopment scheme for a bank, offices and shops.

Work began on site in the autumn of 1979. One of the planning requirements imposed by the G.L.C. was for an arcade down the Shaftesbury Avenue frontage at ground floor level, so as to allow for the continuation of an arcade down the north side of Shaftesbury Avenue at some time in the future. The new building is laid out with shops at basement, ground and mezzanine levels, a banking hall for National Westminster Bank and ancillary offices on the first and second floors, and additional lettable office accommodation on the third and fourth floors.

In view of the architectural quality of the surrounding buildings, (its immediate neighbour on the Piccadilly side is a particularly florid example of High Victorian decoration) the architects wished to create a strongly modelled building which would reflect the character of these and contribute in a positive way to the fine street views obtained along the curve of Shaftesbury Avenue as it enters Piccadilly Circus. This was achieved by pulling forward from the main face of the building a series of prominent bay windows extending over the first and second storeys, and by exaggerating the structural framing and load-bearing elements in a dramatic contrast to the windows and infill panels. The modelling of the facades is further aided by the need to step the fourth floor accommodation back from the main elevation on both street frontages in order to permit the appropriate light angles, particularly to Denman Street. Projecting bays can also be seen at this upper level behind the main parapet line and serve to break up the skyline and emphasise the main structural divisions between the projecting bay windows.

The exposed structural frame of the building has a robust "pick" finish and is in a white concrete. Precast bush hammered concrete units are incorporated within the external structure and frame the window walls of bronze anodised aluminium insulated panels and single glazed windows. The projecting corners of the bay windows are given a curved profile and glazed for their full height.

The use of curved corners for the projecting windows leads naturally to the inclusion of a traditional device for the turning of the corner into the next street. The public house on the opposite corner of Denman Street demonstrates perfectly how the Victorians handled this junction of facades, using it also to emphasise the position of the main entrance. Here there is no entrance to indicate, with the deep arcade running through beneath it, but the architects have nevertheless cleverly exploited this focal point by siting a spiral staircase connecting the first, second and third floors within a projecting transparent cylinder of vertical glazed strips jointed with silicon and with dark horizontal transom supports. The intricate pattern of the spiralling treads and handrails, half-seen through the reflective faceted glazing, forms an effective counterpoint to

the massive but fastidiously detailed concrete frame, while the horizontal bronze lines of the transoms give more than a hint that this element acts very much as a hinge between the two main facades.

Internally, the planning is very much influenced by the awkward triangular shape of the site. With the principal office spaces understandably placed along the two main street frontages, the vertical circulation and servicing cores have been concentrated on the third and blank wall against the adjoining properties. The principal public access to the first floor banking hall is by two escalators from the pavement level entrance at one corner. One wall of this escalator lobby is completely faced with random rows of mirror strips, that sparkle invitingly under the lights like the entrance to some glamorous ballroom. On passing through this sea of reflections to the first floor, the traditional finishes of banking offices reassert themselves, with timber panelling in the public banking areas and managers' offices, and chestnut used for the joinery throughout the building. Other internal finishes include sprayed acoustic fibrous plaster, ceramic tiles and open-gridded metal eggcrate suspended ceilings. A second entrance to the bank premises and offices is located within a section of blank wall underneath the street arcade faced in large black ceramic tiles, and this gives access to the principal staircase and a pair of lifts. Within the double-storey height of the arcade, the glazed fronts of the mezzanine shops wander in and out and project as bay windows into the gaps between the linked pairs of columns, thus adding interest and additional modelling around the shop fronts, the point where in many commercial developments the level of design drops well below par.

The design of the building has been praised by the Royal Fine Art Commission, and there is no doubt that it sits comfortably amongst the neighbouring buildings, whose scale it respects and whose historical details are elegantly set off by the evident quality of workmanship and meticulous attention to detail that characterise this project. It is a welcome reminder to architects and planners alike that it is still perfectly possible to create a contemporary urban architecture capable of relating intelligently to neighbouring structures from different historical periods. This distinguished building will be of much benefit not only in the immediate environment of Piccadilly but also as an example relevant to the wider context of inner city buildings everywhere.

#### CROWNHILL CREMATORIUM, CROWNHILL, MILTON KEYNES

Architect: Roger Hobbs, John Corbey & Associates

The design of a new crematorium cannot be said to be one of the more common problems faced by the architect, but the rapidly expanding population of Milton Keynes and its neighbouring communities has resulted in just such a commission being recently completed to the design of architects, Roger Hobbs, John Corbey and Associates, at Crownhill on the western edge of Milton Keynes.

Built at a total cost of just under £0.9 million for the Milton Keynes Borough Council, on a site that was formerly open farmland, the crematorium, which was completed in February 1982, is also linked to a large new cemetery. This is planned to spread out in a series of semi-circular arcs, with extensive new landscaping and terracing of the steeper areas reinforcing the fan-like arrangement of paths and avenues centred on the crematorium building, which is near the middle of the site next to a small copse. The initial brief called for a crematorium complex, incorporating a single chapel and capable of handling

trative block and the necessary committal and crematory spaces. The final building has been designed to allow for further phased expansion with the addition of a second chapel and associated spaces.

The architects have responded with a carefully planned, restrained and sympathetic building designed to lead the groups of mourners through a series of inter-related spaces that reflect the progress of the committal ceremony, and helps preserve the privacy of consecutive groups of mourners. The one-way road access system brings the cortège to its arrival point under a porte-cochère flanked on one side by a landscaped entrance courtyard, and on the other by a waiting room, where mourners arriving early before the main party can sit and wait, linked to a small vestry. Upon arrival, the coffin is transferred to a bier which is then taken into the chapel and placed on the catafalque. A pair of large oak doors gives access from the porte-cochère via a lobby directly into the chapel space, at right angles to the main axis.

The chapel is a light and airy space and can seat up to 80 people, but is designed nevertheless to generate atmosphere in which a small group of people (as is usually the case), can feel at ease and to which they can relate. The roof structure constitutes the main visual element, being formed from substantial cranked laminated timber beams. These run horizontally at the sides, where they are supported on deep transverse brick piers, and then turn upwards to the apex of the roof, where a central lantern light runs the whole length of the chapel and permits shafts of light to penetrate into the main body of the seating area. Along both sides, concealed rooflights provide additional top lighting emphasising the rough textured rendered finish of the side walls and piers and providing daylight for the planting troughs located between the piers and edged with a ceramic tiled ledge that can be used for extra seating capacity should the chapel be crowded. The laminated timber beams support a tongued and grooved boarded finish, and the general atmosphere created is very much in the Scandinavian mould, with its concealed daylighting, timber for roof and pews, quarry tiled flooring and cool white walls.

The opening for the catafalque is treated very plainly, as a dark recessed rectangular opening enclosed with curtains. Unfortunately its shape does not sit comfortably under the triangulated space of the roof, and the presence of doors on either side, picked out in diagonal timber boarding further serves to diminish the apparent significance of the end wall, which one might expect to have been treated rather more deftly as the principal point of focus of the chapel.

After the service, and the committal of the coffin for cremation, the mourners move out through the front end of the chapel into a covered "condolence area", off which is an open-cloistered courtyard, the "wreath court", with a raised central landscaped area enclosed by a brick wall. This four sided cloister, open to the centre and with a glazed roof, has white rough-textured walls and projecting piers in the manner of the chapel, and is designed to act as a backdrop for the display of floral wreaths. There is a door leading from this cloister into a viewing room, this being a necessary provision to satisfy the ritual requirements of the Muslim faith for watching the act of cremation taking place.

Externally the form of the building is rather loose-jointed and can be clearly separated into its constituent parts, though the dominating feature is clearly the pitched roof and continuous lantern light profile over the Chapel and the large flue projecting through the ridge line, in the same greyish colour-coated aluminium faced chipboard cladding, which is clearly

visible from all parts of the site including the entrance drive and the "wreath court". The material for the external face of the walls is a warm reddish purple facing brick, but there seems little, either in the choice of materials or the massing of the building, to signify that this is indeed a crematorium and not another out-of-town factory. One has to look very closely to notice the circular stained glass window high in the end wall of the Chapel next to the public entrance. The Chapel of Remembrance is at present tucked into a small recess at the rear of the building, being not particularly accessible from the crematorium itself but nevertheless at the focal point of the lines of paths and landscaping radiating out through the cemetery gardens beyond.

In general architectural terms this building succeeds well enough, offering a range of sensitively modelled and neatly detailed spaces, using a restrained palette of materials and making the most of natural daylight and artificial lighting to present an atmosphere of quiet dignity and order. However,

there are contradictions within the building that are not comfortably explained away.

For example, why is such great play made of the central chimney? Although this chimney serves not only the cremators but also the central heating system, no smoke has ever, or is likely to be seen emitting from it, such a prospect being firmly eliminated by the inclusion of "sophisticated controls and afterburners built in to remove smoke before it reaches the chimney".

The design of the Chapel too seems to imply the lack of a positive conceptual approach in how to handle the despatch of the coffin, with the supposed centre of attention, the catafalque, deliberately played down in terms of its architectural treatment while other elements are dramatised, such as the roof shape and the deep toplift plant-filled bays down the sides, to offer considerable visual distractions.

However, it would be unfair to criticise the architects for failing to resolve problems with which society has not yet really come to grips.

### LABOUR STATISTICS

#### Industrial Stoppages (Thousands)

	Workers involved	Total working days lost						
		All industries and services	Mining and quarrying	Metals, engineering, shipbuilding and vehicles	Textiles, clothing and footwear	Construction	Transport and communication	All other industries and services

## THE QUEEN'S AWARDS FOR EXPORT AND TECHNOLOGY

The Queen's Award for Export Achievement and The Queen's Award for Technological Achievement were instituted by Royal Warrant in 1976, the two separate Awards taking the place of The Queen's Award to Industry which had been instituted in 1965. This was the major change made as a result of a number of recommendations by a committee chaired by the Duke of Edinburgh that reviewed all aspects of the Award scheme in 1975 after its second 5-year period of operation; all the recommendations were accepted by the Government. The reports of the 3 committees that have considered the scheme, in 1965, 1970, and 1975—under the chairmanship of the Duke of Edinburgh, Lord McFadzean and the Duke of Edinburgh respectively—are available on loan from The Queen's Awards Office.

The Awards are designed to recognize and encourage outstanding achievements in exporting goods or services from the United Kingdom and in advancing process or product technology. They differ from a personal Royal honour in that they are given to a unit as a whole—management and employees working as a team.

They may be applied for by any organization within the United Kingdom, the Channel Islands or the Isle of Man producing goods or services which meet the criteria for the Awards. Eligibility is not influenced in any way by the particular activities of the unit applying, its location, or size. Units or agencies of central and local government with industrial functions, as well as research associations, educational institutions and bodies of a similar character, are also eligible, provided that they can show they have contributed to industrial efficiency.

The criteria on which recommendations for the Awards are based are:

### 1. Export Achievement

A substantial and sustained increase in export earnings to a level which is outstanding for the products or services concerned and for the size of the applicant unit's operations. Account will be taken of any special market factors described in the application. Applicants for the Award will be expected to explain the basis of the achievement (e.g. improved marketing organization or new initiative to cater for export markets) and this will be taken into consideration. Export earnings considered will include receipts by the applicant unit in this country from the export of goods produced in this country, and the provision of services to non-residents. Account will be taken of the overseas expenses incurred other than marketing expenses. Income from profits (after overseas tax) remitted to this country from the applicant unit's direct investments in its overseas branches, subsidiaries or associates in the same general line of business will be taken into account, but not receipts from profits on other overseas investments or by interest on overseas loans or credits.

### 2. Technological Achievement

A significant advance, leading to increased efficiency, in the application of technology to a production or development process in British industry or the production for sale of goods which incorporate new and advanced technological qualities.

Each award is formally conferred by a Grant of Appointment and is symbolized by a representation of its emblem cast in stainless steel and encapsulated in a transparent acrylic block. Presentations are usually made on behalf of The Queen by Her Majesty's Lord Lieutenants at the principal place of business or production of the unit. A reception is given

annually by The Queen at Buckingham Palace for representatives of the winners of the Awards.

Awards are held for five years and holders are entitled to fly the appropriate Award flag and to display the emblem on the packaging of goods produced in this country, on the goods themselves, on the unit's stationery, in advertising and on certain articles used by employees: units may also display the emblem of any previous current Awards during the 5 years.

Awards are announced on April 21—the actual birthday of Her Majesty the Queen—and published formally in a special supplement to the London Gazette. All enquires about the scheme and requests for application forms should be made to: The Secretary, The Queen's Awards Office, Dean Bradley House, 52 Horseferry Road, London S.W.1. Telephone: 01-222 2277.

### Export Achievement Awards

In 1982, the Queen's Award was conferred on the following concerns for export achievement:

Aerocoldform Ltd., Birmingham; Aircraft and Instrument Demisting Ltd., London E.17; Aircraft Furnishing International Ltd., Walton-on-Thames, Surrey; Alvis Ltd., Coventry, West Midlands; Aston Electronic Developments Ltd., Camberley, Surrey; Aviation Traders (Engineering) Ltd., Stansted, Essex; BICC Power Cables Ltd., Wrexham, Clwyd; BIS Software Ltd., London S.E.1; The Ballantyne Sports-wear Co. Ltd., Innerleithen, Peeblesshire; Baxter Fell Northfleet Ltd., Gravesend, Kent; Beaufort Air-Sea Equipment Ltd., Birkenhead, Merseyside; Bibby Line Ltd., Liverpool; The Aircraft Group of British Aerospace PLC, Kingston-upon-Thames, Surrey; Butterworth Systems (U.K.) Ltd., Croydon, Surrey; The Germiston Works of Cape Boards and Panels Ltd., Glasgow; Claridge Mills Ltd., Selkirk; Coin Controls Ltd., Oldham, Greater Manchester; Comfort Hotels International Ltd., London W.2; The Magnetic Media Manufacturing Division of Control Data Ltd., Brynmawr, Gwent; Coopers (Metals) Ltd., Swindon, Wiltshire; Cummins Engine Company Ltd., Darlington, Co. Durham; The Equipment Division of Dasic International Ltd., Romsey, Hampshire; Dowty Meco Ltd., Worcester; Dreamland Electrical Appliances PLC, Southampton; The Marine Loading Arm Division of Emco Wheaton U.K. Ltd., Margate, Kent; Fabrikat Industries Ltd., Nottingham; Fairley Allday Marine Ltd., Hamble Hampshire; The Display Group of the Navigation Systems Department of Ferranti PLC, Edinburgh; Donald Fisher Ltd., Leith, Edinburgh; Flymo Ltd., Darlington, Co. Durham; Peter Fraenkel & Partners, London S.W.1; GEC Electrical Projects Ltd., Rugby, Warwickshire; GEC Turbine Generators Ltd., Rugby, Warwickshire; Haiste & Partners, Leeds; The Head Wrightson Machine Co. Ltd., Middlesbrough, Cleveland; The Henderson Busby Partnership, Ware, Hertfordshire; Holborn Law Tutors Ltd., London S.E.1; R. G. Holland & Co. Ltd., Sheffield; Hughes Tool Company Ltd., Castle-reagh, Belfast; Hulton Medical Ltd., Luton, Bedfordshire; The Incinerator Company Ltd., Huntingdon, Cambridgeshire; Instrumental Colour Systems Ltd., Newbury, Berkshire; James Marine Services Ltd., Newcastle-upon-Tyne; Johnson Matthey Chemicals Ltd., Royston, Hertfordshire; Johnson Pipes Ltd., Telford, Shropshire; Kodak Ltd., Hemel Hempstead, Hertfordshire; Landis Lund Ltd., Keighley, West Yorkshire; Lapointe Broach Co. Division of

Staveley Machine Tools Ltd., Watford, Hertfordshire; Life Science Research Ltd., Stock, Essex; Liquid Plastics Ltd., Preston, Lancashire; The Actuation Division of Lucas Aerospace Ltd., Wolverhampton, West Midlands; Mabey & Johnson Ltd., Twyford, Reading, Berkshire; Martin-Baker Aircraft Company Ltd., Uxbridge, Middlesex; Merz & McLellan, Newcastle-upon-Tyne; Metier Management Systems Ltd., London N.W.10; Michelin Tyre Company Ltd., Stoke-on-Trent; Micro Focus Ltd., London N.W.8; Micro-Image Technology Ltd., Riddings, Derbyshire; S. A. Monk Ltd., Sutton-in-Ashfield, Nottinghamshire; Morgan Grenfell & Company Ltd., London E.C.2; Morris Hanbury Jackson Le May Ltd., Paddock Wood, Kent; National Supply Company (U.K.) Ltd., Stockport, Cheshire; The Licensing Division of Netlon Ltd., Blackburn, Lancashire; T. P. O'Sullivan and Partners, London S.W.15; The Fragrance Division of PPF International Ltd., Ashford, Kent; A. H. Philpot & Sons (Milk Powders) Ltd., Rayleigh, Essex; Phosyn Chemicals Ltd., Pocklington, York; Pirelli General PLC, Southampton; Portals Holdings PLC, Whitechurch, Hampshire; Quest Automation Systems Ltd., Ferndown, Dorset; The RHP Precision Division of RHP Bearings Ltd., Newark, Nottinghamshire; The Avionics Division of Racal-Decca Navigator Ltd., New Malden, Surrey; Racal Security Ltd., Newbridge, Midlothian; Ransomes & Rapier Ltd., Ipswich, Suffolk; Redland Automation Ltd., Winchester, Hampshire; Roy Manufacturing Co. (Fashions) Ltd., London E.1; Ruston Gas Turbines Ltd., Lincoln; Shackleton Engineering Ltd., Stockport, Cheshire; Simon Food Engineers Ltd., Stockport, Cheshire; The United Kingdom Overseas Group of Smith Kline & French Laboratories Ltd., Welwyn Garden City, Hertfordshire; The Cheltenham Division of Smiths Industries Aerospace and Defence Systems Company, Cheltenham, Gloucestershire; Stewart Wales, Somerville Ltd., East Kilbride, Glasgow; TI Chesterfield Ltd., Chesterfield, Derbyshire; Tiger Tim Products Ltd., Mold, Clwyd; Richard Unwin International Ltd., London W.1; V.G. Instruments Ltd., East Grinstead, West Sussex; Video Arts Ltd., London W.1; Wallwin (Pumps) Ltd., Warwick; Watercraft Ltd., Gosport, Hampshire; Wearwell Ltd., London E.1; Young's Seafoods Ltd., London S.W.3.

#### Awards for Technological Achievement

In 1982, the following concerns received the Queen's Award for technological achievement:

The "Slimline" Division of ARC Concrete Limited, Chipping Sodbury, Bristol (*Slimline technology for producing higher quality concrete pipes*); City Technology Limited, London E.C.1 (*Oxygen Sensors*); Coles Cranes Limited, Sunderland (*Telescopic Boom design in mobile cranes*); L1 Division—Battlefield Sensors—Royal Signals & Radar Establishment, Ministry of Defence, Great Malvern, Hereford and Worcester (*Pyroelectric Detector (jointly with Plessey Optoelectronics and Microwave Limited)*); Edwards of Enfield Limited, Enfield (*New handling technology for the aluminium and non-ferrous metal industries*); The Scottish Group of Ferranti PLC, Edinburgh (*Combined map and electronic display (COMED) for aircraft*); Instron Limited, High Wycombe, Buckinghamshire (*INSTRON 8000 Series, materials testing system*); Laser-Scan Laboratories Limited, Cambridge (*Laser display digitizer (HRD-1/FASTRAK)*); The Actuation Division of Lucas Aerospace Limited, Wolverhampton (*Re-heat nozzle and thrust reverser actuation systems for gas turbine aero-engines*); May & Baker Limited, Dagenham, Essex (*FLAGYL—for control of post-operative infections*); The Mining Research and Development Establishment of the National Coal Board, Stanhope Bretby, Burton-on-Trent (*Natural Gamma radiation detector (jointly with Salford Electrical Instruments Limited)*); Neotronics Ltd., Bishop's Stortford, Hertfordshire (*Fuel efficiency monitor*); Osel Offshore Systems Engineering Limited, Great Yarmouth (*One man tethered submersibles*); Plant Breeding Institute, Trumpington, Cambridge (*Nematode-resistant maincrop potato variety Maris Piper*); Plessey Optoelectronics and Microwave Limited, Towcester, Northamptonshire (*Pyroelectric Detector (jointly with L1 Division—Battlefield Sensors—Royal Signals and Radar Establishment)*); Racal-Redac Limited, Tewkesbury, Gloucestershire (*Computer-aided design system for printed circuit boards*); The Derby Engineering Function of Rolls-Royce Limited, Derby (*Fuel efficiency of the RB211-524 turbofan engine*); Salford Electrical Instruments Limited, Eccles, Manchester (*Natural gamma radiation detector (jointly with the Mining Research and Development Establishment)*); TSL Thermal Syndicate PLC, Wallsend, Tyne & Wear (*Manufacture of translucent fused silica tubing*).

## CONFEDERATION OF BRITISH INDUSTRY

Centre Point, 103 New Oxford Street, London, W.C.1.

The Confederation of British Industry was founded in August 1965 and is an independent non-party political body financed entirely by industry and commerce. It exists primarily to ensure that the Government understands the intentions, needs and problems of British business. It is the recognized spokesman for the business viewpoint and is consulted as such by the Government.

The C.B.I. represents, directly and indirectly, more than 300,000 companies. All the nationalized industries are in membership and thereby able to work with the C.B.I. on problems that are the concern of all management.

The governing body of the C.B.I. is the 400-strong Council, which meets monthly in London under the chairmanship of the President. It is assisted by some 30 expert standing committees which advise on the main aspects of policy. There are 13 Regional Councils and offices covering the administrative regions of England, Scotland, Wales and Northern Ireland.

President, Sir Campbell Fraser.  
 Director-General, Sir Terence Beckett.  
 Secretary, D. E. Jackson.

## WEATHER IN THE UNITED KINGDOM, 1981-1982

(1981) **July**—Rainfall totals were mostly below average with less than half the normal amount falling in most places in the Midlands, the extreme southeast of England, parts of southern Wales and scattered places elsewhere. Less than 25 per cent of average was received in parts of Hereford and Worcester and at Kirkwall (Orkney) a total of 23.5 mm. (0.93 ins.) was one of the lowest totals on record there. Totals were above average in parts of Northern Ireland, southern Scotland, East Anglia and parts of south and northeast England. At Scarborough (North Yorkshire) more than twice the normal amount was received. Gales were reported on the northern hills on the 5th and 6th. On the 9th there were violent thunderstorms east of a line from Somerset to Durham with hail and heavy rain in places. 80 mm. (3.15 ins.) fell in 70 minutes at Derby and 58.2 mm. (2.29 ins.) fell in 50 minutes at London Weather Centre. There was severe flooding in places and in London King's Cross Station was closed for several hours. At Yeovilton (Somerset) a man was killed by lightning. Coastal fog was reported on the 9th and 10th in the east. Fog was particularly prevalent between the 11th and 21st in the southwest. On the 21st and 22nd, rain, heavy in places affected all areas except northern Scotland persisting in parts of eastern England until the 24th. On the 22nd gales were reported in the north and 102 mm. (4.02 ins.) of rain fell at Pen-y-Plas (Gwynedd). Thunderstorms were widespread over southeast England on the 22nd and 23rd. A small tornado caused damage near Farnborough (Hampshire) on the afternoon of the 23rd. Gales were reported along the northeast coast of England on the 23rd and 24th. Fog was again frequent in the southwest from the 25th to the 29th and also in western Scotland. Further heavy rain and thunderstorms affected the southern half of England on the 31st when 77.4 mm. (3.05 ins.) were recorded at Virginstow (Devon). Monthly mean temperatures were near normal everywhere, a little below normal in most areas but a little above near the northeast coast from the Humber to Orkney and near the south coast from Devon to West Sussex. On the 8th the temperature rose to 28° C. (82.4° F.) at some places in East Anglia, southeast England and Jersey. Monthly sunshine totals were below average in many areas but they were above average in much of northeast England and some central and southeastern areas of Scotland. The last six days were mostly sunny and the 29th (Royal Wedding Day) was mostly warm and sunny except in the far north of Scotland.

**August**—Rainfall totals were mostly below normal, this being a very dry month over much of England and Wales. Over most areas it was the driest August since 1976. Less than half the normal amount was received in the

Channel Islands, much of Scotland, much of Northern Ireland, Wales, central, southern and southwest England, northern and eastern England and places in the Midlands. Less than 10 per cent of normal fell in parts of central Scotland and southwest England. Other areas had above average rainfall with more than 150 per cent in parts of Greater Manchester, Cheshire and Northamptonshire. On the 5th and 6th there were violent thunderstorms in eastern Wales, most of England except the far north and west and the Channel Islands. On the 6th 132 mm. (5.2 ins.) fell at Tarporley (Cheshire) and in Greater Manchester 100.5 mm (3.96 ins.) at East Didsbury and 95.9 mm. (3.78 ins.) in 11 hours at Ringway Airport were the highest totals there since records began in 1877. At Norton Junction (Northamptonshire) 132.3 mm. (5.21 ins.) were received over the two days and at Crouch End (North London) 72 mm. (2.83 ins.) fell in one hour on the 6th. There was severe flooding in places and King's Cross Station (Central London) was closed by floods for the second time in a month. Landslides were reported in Greater Manchester and Somerset. Hill fog was widespread over central and eastern parts of England and Wales between the 6th and the 8th. It was particularly wet in northwest Scotland from the 10th to the 12th and on the 11th 93 mm. (3.66 ins.) fell at Broadfield (Isle of Skye). Gales were reported over exposed hills in western Scotland and northwest England on the 19th. Overnight fog was particularly widespread from the 27th to the 29th and failed to clear in some places before mid-morning. Monthly mean temperatures were near or above average everywhere. Except in some north and northwestern coastal areas it was very warm at times and temperatures reached at least 25° C. (77° F.) on a number of occasions. It was the warmest August over most parts of the United Kingdom since 1976. Sunshine totals were above normal in most areas with more than 125 per cent of average being recorded over much of central Scotland, Cornwall and other scattered areas. It was the sunniest August since 1976 in much of England, Wales and eastern Scotland. Only in the western half of Northern Ireland, the extreme west and north of Scotland, the Isle of Man and a few isolated places elsewhere was sunshine below average.

**September**—Rainfall totals were above average in all areas except the north of Shetland, more than twice the average being recorded in South Wales, parts of the Midlands and southern England and scattered areas elsewhere. Monthly totals at Stornoway (Western Isles) and Glasgow (Strathclyde) were the highest for September this century. Generally it was the wettest September over Scotland and Northern Ireland

since 1950 and over England and Wales since 1976. On the 4th rain was heavy over parts of Northern Ireland and western Scotland. On the 5th a small whirlwind caused damage to the roof of a house in Windsor (Berkshire). Rain was heavy in southern Wales on the 7th and 8th and in the far west of Scotland on the 9th. On the 10th and 11th rain, heavy in many areas, sometimes with thunder in the south, spread across all areas and the remainder of the month was very wet. Flooding occurred in southern Wales on the 10th. Coastal fog occurred frequently between the 3rd and the 18th and severe gales affected most southern and central districts on the 19th and quickly spread northeastwards on the 20th. During this period a gust of 67 knots (77.2 mph.) was recorded at Sumburgh (Shetland) and one of 65 knots (74.9 mph.) was recorded at Gwennap Head (Cornwall). The gales caused widespread flooding and damage and much distress with several people being killed including 4 at sea in separate boating accidents off Devon, Dyfed and Anglesey. A lady was killed by a falling tree in Dyfed and a man was blown off his cycle in Nottingham. Eleven men were rescued from a sinking freighter south of the Lizard (Cornwall). There were floods in Dorset on the 19th and on the 20th 111.6 mm. (4.39 ins.) of rain fell at Knockanrock (Highland Region) and on the 26th 100.2 mm. (3.95 ins.) fell at Auchnafree Lodge (Tayside Region). Floods occurred in many areas on the 20th and 26th. Monthly mean temperatures were above average almost everywhere and Edinburgh had its warmest September day since 1971 on the 10th when the temperature rose to 24.3° C. (75.7° F.). At Caistor (Lincolnshire) 27.2° C. (81.0° F.) was recorded on the same day. Frost occurred at night occasionally in hilly parts of Scotland and on the 14th the temperature fell to -3.3° C. (26.1° F.) at Lagganlia (Highland Region). Sunshine totals were above average in most areas but they were below average in the west of Northern Ireland, most of northern Scotland, the Isle of Man, western Wales and the south of England. In the far northwest of Scotland it was the fifth successive September with below average sunshine.

**October**—Rainfall totals were above average over much of the United Kingdom with more than twice the normal amount being recorded in the Channel Islands, parts of north and east Scotland, northwest and southwest England, East Sussex, Wales, the Isle of Man and Co. Londonderry. Lerwick (Shetland) with 247.8 mm. (9.76 ins.) had its wettest October since 1922 and Ringway (Greater Manchester) with 159.1 mm. (6.17 ins.) had its wettest October since 1942. Periods of rain occurred frequently and daily totals of more than 50 mm. (1.97 ins.) were numerous causing flooding in southern Scot-

land, northern counties of England, the Isle of Man and northwest Wales on the 1st, in Northern Ireland on the 2nd, in southeast England on the 3rd, in Wales from the 7th to the 9th and in Cumbria on the 8th. 130.9 mm. (5.17 ins.) fell near Ramsey (Isle of Man) on the 1st. 116.2 mm. (4.57 ins.) fell at Annalong Valley (Co. Down) on the 2nd and 103.5 mm. (4.08 ins.) fell at Pen-y-Plas (Gwynedd) on the 7th. Snow fell in the north of Scotland on the 2nd and the Perth to Braemar road was blocked at Devil's Elbow. A waterspout was seen off Beachy Head (East Sussex) on the 3rd. Overnight fog was widespread over the eastern half of England on the 6th and on the 7th a gust of 74 knots (85.2 mph.) was recorded at Sumburgh (Shetland) and 70 knots (80.6 mph.) was recorded at Aberporth (Dyfed) on the 9th. On the 9th many vehicles were damaged in gales and several passengers were injured on a ferry off the Isle of Wight. On the 14th and 16th there was more snow in northern Scotland and overnight fog was widespread in the south on the 16th. On the 18th a gust of 76 knots (87.5 mph.) was recorded at Edinburgh and on the 19th three tugs were blown onto the rocks in St. Brides Bay (Dyfed) in gales. On the 20th fallen trees blocked some roads and railways in the south of England and flooding occurred in southeast England. Monthly mean temperatures were below normal everywhere and were 3.5° C. (6.3° F.) below average in parts of Scotland and Northern Ireland. There were frequent night frosts in the north between the 10th and the 26th. At Kindrogan (Tayside Region) the temperature fell to -7.6° C. (18.32° F.) on the 14th and at Carnwath (Strathclyde Region) it fell to -7.8° C. (17.96° F.) on the 26th. Sunshine totals were below normal over much of Wales and southwest England, the southern half of central southern and southeast England, the Channel Islands and a few places in Northern Ireland and Scotland. Elsewhere sunshine totals were above average. Durham with a total of 146.1 hours had its sunniest October since 1893.

**November**—Rainfall totals were above average in most of Scotland, most northwest areas of England, parts of north Wales, the Isle of Man and parts of Northern Ireland. A total of 610 mm. (24.02 ins.) nearly 3 times the normal amount at Achnashellach (Highland Region) was the highest for any month since records began in 1923. At Stornoway (Western Isles) 227.9 mm. (8.97 ins.) was the highest November total since 1898. Elsewhere rainfall was below normal. Overnight fog was slow to clear in Merseyside on the 5th. On the 9th 121.8 mm. (4.79 ins.) of rain fell at Heaste (Isle of Skye) and there were wintry showers over northern Scotland from the 12th. Fog was persistent in Greater Manchester on the 16th and 105.4 mm. (4.15 ins.) of rain fell at Pen-y-Plas

(Gwynedd) on the 17th when the Llandudno to Blaenau Ffestiniog railway and several roads in the area were closed by floods. In Northern Ireland and northern England wintry showers occurred from the 18th. Winds were strong and the crew of 5 were lost when a trawler was wrecked off Land's End (Cornwall). A waterspout was seen from Spurn Point (Humberside) on the 20th and storm force winds caused considerable damage to buildings in Scotland. A gust of 89 knots (102.5 mph) was recorded at Greenock (Strathclyde Region). Wintry showers occurred down to the moors of southwest England from the 23rd and there were severe gales on the night of the 23rd/24th when 3 men were swept overboard from a trawler and drowned between Orkney and Shetland. A gust of 82 knots (94.4 mph) was recorded at Sumburgh (Shetland). Minor tornadoes, whirlwinds and squalls caused serious damage in many places from Anglesey across the Midlands to eastern England on the 23rd. Periods of snow occurred over northeast Scotland during the nights of the 25th/26th and 29th/30th and 19 cms. (7.48 ins.) lay in Dalwhinnie (Highland Region) on the 25th. Gales ripped the roof off a house on the Isle of Sheppey (Kent) on the 30th. Thunder was reported occasionally during the last two weeks mainly in Scotland and Northern Ireland but on the 27th and 28th there were some thunderstorms in central and southern England. Monthly mean temperatures were above normal everywhere except the far north of Scotland and temperatures reached 17° C. (62.6° F.) in several places. Frost occurred at times particularly in southern England between the 5th and the 13th and over Scotland during the last two weeks. Sunshine totals were below normal in most areas and the best of the sunshine occurred over southeast England and the Channel Islands between the 5th and the 9th and in the northeast from the 12th to the 20th.

**December**—Rainfall totals were mostly near or above average but they were well below average in parts of western Scotland. Totals ranged from nearly 2½ times the average near the Dorset/Devon border to only ¼ of the average in the south of the Highland Region of Scotland. There was snow in Shetland on the 5th and on the 7th there were snow and hail showers in the north of Scotland and rain spread across Northern Ireland, Wales and England. On the 8th rain and sleet over southern areas turned to snow in most places away from the coast and up to 15 cms. (5.91 ins.) lay in and around the Chilterns. There were further snow showers on the 9th particularly in Greater Manchester. There was freezing fog in the evening which became persistent in Northern Ireland, central Scotland and central and eastern England on the 10th. On the

11th there was heavy snowfall over much of the Midlands, East Anglia, central southern England and the London area where 26 cms. (10.24 ins.) of snow lay at Heathrow Airport halting air traffic for a time. Many roads were blocked and there were numerous accidents and stranded cars on the roads. During the 13th blizzards swept across southern and central areas and conditions were especially bad in the southwest with storm force winds. Rain later caused a rapid thaw and very severe flooding. On the 18th northern and eastern coastal areas had snow and hail showers and on the 20th severe gales with rain and snow spread to most areas. There was heavy snowfall and drifting in southern Scotland and northern England. Freezing fog became widespread and dense over the eastern half of England on the 24th and in the northeast on the 26th. On the 27th there was heavy rain and flooding in the southwest. Monthly mean temperatures were below normal everywhere and it was generally a very cold month. At Shrewsbury the temperature fell to -23° C. (-9.4° F.) early on the 12th, rose only to a maximum of -12° C. (10.4° F.) during the day and fell to -25° C. (-13.0° F.) at night. On the 13th temperatures were between -15° C. (5.0° F.) and -20° C. (-4.0° F.) widely over central England and East Anglia. By contrast, on the 3rd the temperature rose to 15° C. (59.0° F.) at Aberdeen Airport which was the highest temperature for the month anywhere in the United Kingdom. Sunshine totals were mostly near or above average except in northeast Scotland, southwest Wales and the Channel Islands.

**Year (1981)**—On the 1st and 2nd of January particularly heavy rain together with melting snow caused widespread floods in western Scotland with landslides in Argyll. Snow was widespread in Scotland mid-month with road, rail and air traffic all disrupted. Fog, dense and freezing was widespread over south England and Wales at the end of the month with air traffic halted at Heathrow. February started with fog and rain and on the 6th gales in Scotland produced a gust of 80 knots (92.1 mph). General rain continued until mid-month and on the 15th there was widespread severe frost and dense fog. The 21st to 23rd brought snow to most areas followed by severe frost. The month closed with rain. March was a very wet month with some places having more than 4 times the average. Over England and Wales it was the wettest March since 1947 and the second wettest since 1727. By the 11th there was serious flooding in Devon, Cornwall and south Wales. On the 21st 129 mm. (5.07 ins.) of rain fell in Snowdonia. It was the dullest March in London since 1929. April was very dry in Scotland and at Dyce it was the driest April since 1946. On the 14th very heavy rain

extended from West Sussex to Surrey, Hampshire and Berkshire. On the 25th very heavy snow fell in the Midlands, central southern England and the West Country leaving a trail of fallen power lines and stranded vehicles. There was further heavy snow on the 26th. These snowstorms are unprecedented this century over such a large area so late in the spring. In May a succession of rain belts or showers crossed the Kingdom and on the 4th (Bank Holiday) there was snow, hail and thunder. Rain and thunder continued and the 25th (Bank Holiday) was wet. Two people, one on Snowdon and one at Prestwick were killed by lightning and there was much local flooding. In June violent thunderstorms affected much of England and Wales on the 1st and damage and flooding was severe. The six months January to June were the duller such period in London since 1941 and May and June together were the duller since 1929. July was drier than average in most areas but on the 9th there were violent thunderstorms with hail and heavy rain. 80 mm. (3.15 ins.) fell in 70 minutes at Derby and 58.2 mm. (2.29 ins.) in 50 minutes at London. There was severe flooding and King's Cross Station was closed for several hours. A man was killed by lightning in Yeovilton. Thunderstorms were widespread on the 22nd and 23rd and a small tornado caused damage near Farnborough. The 29th (Royal Wedding Day) was warm and sunny except in the far north of Scotland. August was a very dry month over much of the United Kingdom but even so there were some violent thunderstorms and in Greater Manchester 100.5 mm. (3.96 ins.) in 24 hours at East Didsbury and 95.9 mm. (3.78 ins.) in 11 hours at Ringway were the highest August totals since 1877. There was severe flooding and on the 6th King's Cross Station was closed for the second time in a month. There were landslides in Greater Manchester and Somerset. September was another wet month. Totals of rain at Stornoway and Glasgow were the highest this century. Generally it was the wettest September in Scotland and Northern Ireland since 1950 and in England and Wales since 1976. On the 19th and 20th gales caused widespread damage and several people were killed at sea or by falling trees, etc. Floods occurred in many areas. October was another wet month. Rain was frequent with floods in southern Scotland, northern counties of England and northwest Wales on the 1st, in Northern Ireland on the 2nd, southeast England on the 3rd, Wales from the 7th to the 9th and in Cumbria on the 8th. Snow closed the Perth to Braemar road on the 2nd and on the 9th many vehicles were damaged and passengers injured on a ferry in gales off the Isle of Wight. On the 19th 3 tugs were blown on to the rocks in St. Brides Bay and on the 20th fallen trees blocked roads and railways in the

south and there were further floods in the southeast. November was a wet month in the northwest and Stornoway had its highest rainfall since 1898. On the 18th 5 men were killed when a trawler was wrecked off Land's End. On the 20th storms caused considerable damage in Scotland. In severe gales on the 23rd/24th 3 men were swept overboard and drowned from a trawler between Orkney and Shetland. There was serious damage from Anglesey across the Midlands to eastern England. Gales ripped the roof off a house on the Isle of Sheppey on the 30th. December was generally another wet month. Snow or sleet fell in most areas and by the 11th 26 cms. (10.2 ins.) of snow lay at Heathrow. Many roads were blocked for a time and there were many accidents and stranded cars on the roads. A thaw mid-month caused serious flooding in the southwest. There was further heavy snow and severe gales on the 20th. On the 27th there was heavy rain and flooding in the southwest. At Shrewsbury the temperature fell to  $-25^{\circ}\text{C}$ . ( $-13.0^{\circ}\text{F}$ .) on the night of the 12th.

(1982) **January**—Rainfall totals were above average in Scotland except for central and northeastern areas, Northern Ireland and northern counties of England. Elsewhere totals were mostly below average. On the 1st freezing fog was widespread but there was rain in the far north of Scotland and southeast England. On the 3rd there was heavy rain in the Borders region with snow and gales in Scotland. On the 4th there was heavy drifting snow in Scotland and prolonged rain over central areas. This rain together with a rapid thaw of the snow (lying since December) caused very serious flooding in northern England especially in and around York where the resulting damage and hardship was very severe. On the 7th heavy snow fell in northern Scotland especially in the Western Isles and Orkney. Blizzards swept most of the country on the 8th and on the 9th 30 to 40 cms. (12 to 15 ins.) of level snow had accumulated in the west and south Midlands and southern Wales with some very deep drifts. On this day only Lincolnshire and northeast Norfolk were without snow cover. From the 11th there were areas of persistent freezing fog in the mornings. Most of the snow had thawed by the 20th and a belt of rain crossed all areas on the 21st and 22nd followed by heavy showers with widespread hail and some thunder and snow. The rest of the month was changeable but there were gales in coastal areas on the 26th and northern areas had heavy showers and severe gales on the 28th. Monthly mean temperatures were mostly below normal except in some areas in south and southeast England and some remarkably low temperatures were recorded particularly during the second week of the month,  $-26.8^{\circ}\text{C}$ . ( $-16.24^{\circ}\text{F}$ .) at Gran-

town on Spey (Highland Region) on the 8th,  $-27.2^{\circ}\text{C}$ . ( $-16.96^{\circ}\text{F}$ .) at Braemar (Grampian Region) [equal to the lowest temperature ever recorded in the United Kingdom also at Braemar in February 1895] on the 10th,  $-26.1^{\circ}\text{C}$ . ( $-14.98^{\circ}\text{F}$ .) at Newport (Shropshire) [the lowest temperature ever recorded in England] on the 10th and  $-21^{\circ}\text{C}$ . ( $-5.8^{\circ}\text{F}$ .) at Elmdon (West Midlands) and Brize Norton (Oxfordshire) on the 14th. The highest temperature of the month  $13.7^{\circ}\text{C}$ . ( $56.84^{\circ}\text{F}$ .) occurred at Leuchars (Fife) on the 30th and at Littlehampton (West Sussex) on the 31st. Sunshine totals were mostly above normal except in the southwest of England, the south coast of England and the northern half of Scotland but most of the sunny spells occurred in the second half of the month.

**February**—Rainfall totals were mostly below average with places on the eastern coasts having less than  $\frac{1}{4}$  of the normal amount. Only in the western half of Scotland, Northern Ireland, southwest Wales and southwest England were totals above average. On the 5th rain spread slowly across the United Kingdom. On the 6th there were heavy showers in Scotland with gales in exposed places. The 7th was wet over most southern areas and there were some heavy wintry showers in Scotland and Northern Ireland. On the 8th there was a good deal of rain over northern areas where it was also very windy and on the 9th there was rain in Northern Ireland and southern Scotland which continued into the 10th. 35.7 mm. (1.41 ins.) of rain fell at Sloy (Highland Region) on the 8th. On the 11th rain again spread to all areas and in south and southeast England deposits of Sahara sand were widely reported. On the 12th there were severe gales and much rain in western areas. This rain spread to the southeast where it was a wet day on the 13th. Fog persisted all day in northern England on the 15th and around Edinburgh on the 16th. On the 17th there was a covering of snow in the south and a little snow fell in the north on the 18th especially in eastern Scotland. On the 21st strong winds with rain and some snow spread through western areas and on the 22nd fog was persistent around York. Widespread fog occurred on both the 23rd and 24th. Rain spread from the west across all areas from the 24th to the 26th. Rain and showers occurred widely on the 27th and 28th. Monthly mean temperatures were above average everywhere and most of the month was mild. The 9th was exceptionally mild over England and Wales with temperatures up to  $15^{\circ}\text{C}$ . ( $59^{\circ}\text{F}$ .) in places. Sunshine totals were mostly below average but they were above average in northern areas of Scotland and northwestern areas of Wales and in the Channel Islands and some extreme eastern coastal areas of England. 9.3 hours of sunshine were recorded

at Penzance (Cornwall) on the 14th and at Cromer (Norfolk) on the 22nd.

**March**—Rainfall totals were mostly well above average and were more than twice the normal amount in parts of western Scotland and north Lancashire. Only in the extreme southeast of England and the northeast coast were totals a little below average. On the 1st hail was widespread with thunder in many southern counties and snow in the north. Strong winds and rain spread from the west on the 2nd to all areas and winds increased to storm force at night and during the 3rd in many western and southern regions. There was considerable damage in southern Scotland where at St. Abbs Head (Borders) a gust of 95 knots (109 mph.) was recorded on the 3rd. 62.4 mm. (2.46 ins.) of rain fell at Sloy (Highland Region) on the 2nd. On the 4th there were heavy showers with hail and thunder in the south. It was a wet and windy day on the 6th. Fog was widespread over central and eastern England on the 9th and by late evening rain spread to all areas and winds reached gale force in parts of the south. On the 10th there were severe gales in places generally with widespread showers, hail and snow. The 11th and 12th were also wintry days and there was a gust of 80 knots (92.1 mph.) at St. Abbs Head (Borders) on the 12th. There was a rapid thaw in Scotland on the 13th but on the 14th there were some heavy showers in the north with general rain across Wales, northern England and into Scotland. Hail and snow continued in the north on the 15th and it was a wet day in much of England and Wales. Hail was reported from many places from the 16th to the 18th and there were also reports of thunder and snow. There was rain in central and southern areas on the 19th and there were some heavy hail showers in eastern and central England on the 20th. There was further rain on the 21st. On the 28th fog was extensive over most of England, Wales and Northern Ireland but it did not last long and the 29th brought rain, hail and snow with some thunder in the southeast. Monthly mean temperatures were mostly above average except in the northwest of Scotland and a few isolated areas elsewhere. The temperature reached  $20.2^{\circ}\text{C}$ . ( $68.36^{\circ}\text{F}$ .) at Aberdeen Airport on the 25th but fell to  $-5.5^{\circ}\text{C}$ . ( $22.1^{\circ}\text{F}$ .) at Gatwick Airport on the 8th. Sunshine totals were above normal everywhere except the far north of Scotland where they were near normal. There were some long sunny intervals almost everywhere and at Boulmer (Northumberland) 11.4 hours of sunshine were recorded on the 26th.

**April**—Rainfall totals were below average everywhere with less than  $\frac{1}{4}$  of the normal amount being received at several places in eastern areas of England and less than  $\frac{1}{2}$  the

normal amount in places all over the United Kingdom. The month started with rain on the 1st. On the 3rd southwestern areas had some rain which spread to northern England and Scotland. Rain affected the west, particularly Cornwall, and north on the 4th. On the 5th there was rain in the north and some thunderstorms in the south. The 6th started with rain and fog in many areas and there were heavy showers in the south, 39 mm. (1.54 ins.) of rain fell at Cilfynydd (Glamorgan) on the 6th. Rain continued on the 7th and fog was extensive in the north. On the 8th there were frequent hail and snow showers in the north and east. There were wintry showers in the north on the 9th and some snow in the northeast on the 10th. On Easter Sunday 11th there were snow and hail showers as far south as Norfolk and wintry showers continued in the northeast and east on the 12th. Fog was widespread in the south on the 15th. Showery weather spread across Scotland on the 22nd and there were heavy hail showers in the northwest on the night of the 22nd/23rd. The 26th brought drizzle to the southeast and there was a little rain in northern Scotland on the 27th. The 28th and 29th brought rain to most places and on the 30th there was snow in the north of Scotland where it was very windy. Monthly mean temperatures were mostly above average except in parts of East Anglia and southwestern Wales. Temperatures reached 13° C. (55.4° F.) locally and on the 3rd 16° C. (60.8° F.) was reached in Kent. On the 4th 19° C. (66.2° F.) was achieved at Jersey and by the 5th it was 21° C. (69.8° F.) at Heathrow. On the 27th 22.3° C. (72.1° F.) was recorded at Linton-on-Ouse (North Yorkshire). The lowest temperature recorded was -4° C. (24.8° F.) at various places as far apart as Eskdalemuir (Dumfries and Galloway) on the 12th to Beaufort Park (Berkshire) on the 13th. Sunshine totals were below average in the north of Scotland but above average elsewhere. The sunniest weather was generally during the last part of the month and at Plymouth (Devon) 13.6 hours of sunshine were recorded on the 28th. Several places had 13 hours or more this day and Lerwick (Shetland) had 13.3 hours on the 19th.

**May**—Rainfall totals were above average in parts of southeast England and East Anglia and the west and north of Scotland. In all other areas rainfall was below average. On the 1st there were snow showers in the north of Scotland. On the 2nd there was rain in the north with snow in Scotland, 51 mm. (2.01 ins.) fell at Eskdalemuir (Dumfries and Galloway). Hail and snow showers followed in the north and west and all areas had showers on the 3rd with widespread hail and snow in the north. Winds reached storm force in northern areas especially in the Borders region. A good deal of damage

occurred and a gust of 71 knots (82 mph.) was recorded at Newcastle (Tyne and Wear). On the 4th it was still showery with hail, snow and thunder in several places. Rain and snow were persistent in northern Scotland. On the 5th rain was again persistent in parts of the north and rain affected southern England later in the day. At St. Mawgan (Cornwall) snow was reported. 34 mm. (1.34 ins.) of rain fell at St. Abbs Head (Borders). There was heavy rain in the south on the night of the 5th/6th and rain and snow in the Borders area on the 6th. On the 7th it rained all day in the Channel Islands. Between the 8th and 10th there were only isolated showers. On the 11th there was patchy fog on eastern coasts and on the 12th some rain fell in the southwest. On the 13th and 14th there were isolated thunderstorms in northern and western areas. On the 15th there were some heavy thunderstorms in parts of the Midlands, north Wales and northwest England. Fog affected eastern and southwestern coasts. Fog was widespread on the 16th and there were some heavy thunderstorms in East Anglia. On the 17th thunderstorms affected the southeast and various areas on the 18th. Light rain spread across southern regions on the 19th and there was hail and thunder in northeast Scotland on the 20th. Most places had rain on the 21st and there was extensive fog on southwest and southern coasts. There were widespread heavy showers on the 23rd with extensive thunderstorms in the eastern half of the country in the afternoon. Heavy rain with thunderstorms affected central southern England, the East Midlands, southeast England and East Anglia on the 26th. There were thunderstorms in the south on the 31st and 6 people were injured by lightning near Gloucester. Monthly mean temperatures were mostly near or a little above normal and 27° C. (80.6° F.) was recorded at Watnall (Nottingham) on the 31st. Sunshine totals were generally above average except in a few southern and western coastal areas. At Prestwick (Strathclyde Region) 16 hours of sunshine were recorded on the 30th.

**June**—Rainfall totals were well above average except in the northern half of Scotland where they were well below average. Some places in Yorkshire had more than 3½ times the normal amount and more than twice the average was commonplace. On the 1st there were heavy thunderstorms in the north Midlands and northern England with flooding in the Leeds, Huddersfield and Dewsbury areas. Thunderstorms were widespread in England and Wales on the 2nd with flooding and lightning damage in northwest London, Berkshire and north to the East Midlands. There were more storms on the 3rd when 39 mm. (1.54 ins.) fell at Lyneham (Wiltshire). On the 4th in north London 92 mm. (3.62 ins.) of rain fell at Cheshunt

and 72 mm. (2.83 ins.) fell at Loughton. Flooding was severe both here and in Derbyshire/Leicestershire where 64 mm. (2.52 ins.) fell at Loughborough. On the 5th a further 35 mm. (1.38 ins.) fell at Cheshunt and storms became widespread except in the north and southwest. Storms were again widespread on the 6th and 39 mm. (1.54 ins.) of rain fell in 25 minutes at Stoke-by-Clare (Suffolk). On the 7th there were heavy thunderstorms in Surrey. On the 8th thunder showers affected the Midlands, the West Country and southern Wales and moved to central northern and northeast England by the 9th. On the 10th 54 mm. (2.13 ins.) of rain fell in 40 minutes at Jersey (Channel Islands) and there were widespread thundery outbreaks in the southwest and west and most other areas later. The rain reached southern and central Scotland on the 11th. Widespread thundery showers affected southern areas on the 12th. On the 13th no thunder was reported anywhere for the first day in the month. On the 15th rain becoming heavy

spread from the southwest. More thundery rain fell in the southwest on the 17th affecting most of England at night. There were more heavy thunderstorms on the 18th and parts of Bristol were deep in hail during the afternoon. The 21st and 22nd were very wet over many areas of England and Wales with around 100 mm. (3.94 ins.) of rain in parts of Humberside and North Yorkshire. Heavy showers affected the south on the 23rd and on the 24th there was general heavy rain with thunderstorms over much of central and southern areas on the 25th. Thunderstorms continued from the 26th to the 29th. Monthly mean temperatures were mostly above normal except in parts of the northeast and east. The highest temperature was 30.4° C. (86.72° F.) at Tummel Bridge (Tayside) on the 5th and the lowest -0.2° C. (31.64° F.) on the 14th also at Tummel Bridge. Sunshine totals were below average everywhere except the far northwest of Scotland and in the Salisbury Plain area. 15.8 hours were recorded at Stornoway (Western Isles) on the 16th.

---

### BUCHAN'S WEATHER PERIODS OR RECURRENCES OF WEATHER

Dr. Alexander Buchan, F.R.S., Secretary of the Scottish Meteorological Society, published in 1867 a paper in the *Journal of that Society* entitled "Interruptions in the regular rise and fall of temperature in the course of the year". Buchan gave six cold periods and three warm periods, based on his examination of the mean daily temperature as recorded at stations in Scotland covering long periods. The cold periods were February 7-14, April 11-14, May 9-14, June 29-July 4, August 6-11, November 6-13, and the warm periods July 12-15, August 12-15, and December 3-14. This early work aroused considerable interest later. It should be noted, however, that Buchan claimed no more than the existence of tendencies for short spells of relatively cold and warm weather to occur at certain times of the year.

In recent years these smaller fluctuations of weather super-imposed on the normal seasonal changes have been examined from the aspect of tendencies to stormy or anticyclonic spells over the British Isles and have been referred to as "singularities". Stormy periods are relatively warm in winter and cool in summer. The following tendencies have been given:—Jan. 5-17 stormy; Jan. 18-24 anticyclonic; Jan. 24-Feb. 1 stormy; Feb. 8-16 anticyclonic; Feb. 21-25 cold; Feb. 26-Mar. 9 stormy; Mar. 12-19 anticyclonic; Mar. 24-31 stormy; April 10-15 stormy; April 23-26 unsettled; June 1-21 summer monsoon; July 10-24 warm; Aug. 20-30 stormy; Sept. 1-17 anticyclonic; Sept. 17-24 stormy; Sept. 24-Oct. 4 anticyclonic; Oct. 5-12 stormy; Oct. 16-20 anticyclonic; Oct. 24-Nov. 13 stormy; Nov. 15-21 anticyclonic; Nov. 24-Dec. 14 stormy; Dec. 18-24 anticyclonic; Dec. 25-Jan. 1 stormy.

## TEMPERATURE AND RAINFALL RECORDS

WORLD: The maximum air temperature recorded is 57.8°C. (136°F.) at San Louis, Mexico on August 11, 1933; the minimum air temperature recorded is -88.3°C. (-127°F.) at Vostok, Antarctica on August 24, 1960. The greatest rainfall recorded in one day is 1870 mm. (73.62 ins.) at Cilaos, Isle de Réunion on March 16, 1952; the greatest rainfall in one calendar month is 9,300 mm. (366.14 ins.) at Cherrapunji, Assam in July 1861, the greatest annual total being 22,990 mm. (905.12 ins.) also at Cherrapunji in 1861.

UNITED KINGDOM: The maximum air temperature recorded is 38.1°C. (100.5°F.) at Tonbridge, Kent on July 22 1868; the minimum air temperature recorded is -27.2°C. (-17°F.) at Braemar (Grampian) on February 11, 1895 and 10th January 1982. The greatest rainfall recorded in one day is 280 mm. (11 ins.) at Martinstown, Dorset on July 18, 1955. The greatest annual total is 6,528 mm (257 ins.) at Sprinkling Tarn, Cumbria in 1954.

## WIND FORCE MEASURES

The *Beaufort Scale* of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of the numbers 0-17, each representing a certain strength or velocity of wind at 10 m. (33 ft.) above ground in the open.

Scale No.	Wind Force	M.p.h.	Knots	Scale No.	Wind Force	M.p.h.	Knots
0	Calm	1	1	9	Strong gale	47-54	41-47
1	Light air	1-3	1-3	10	Whole gale	55-63	48-55
2	Slight breeze	4-7	4-6	11	Storm	64-72	56-63
3	Gentle breeze	8-12	7-10	12	Hurricane	73-82	64-71
4	Moderate breeze	13-18	11-16	13	—	83-92	72-80
5	Fresh breeze	19-24	17-21	14	—	93-103	81-89
6	Strong breeze	25-31	22-27	15	—	104-114	90-99
7	High wind	32-38	28-33	16	—	115-125	100-108
8	Gale	39-46	34-40	17	—	126-136	109-118

TEMPERATURE, RAINFALL AND SUNSHINE  
IN THE UNITED KINGDOM

The following table gives mean air temperature (°C.), total monthly rainfall (mm.) and mean daily bright sunshine (hrs.) at a representative selection of climatological reporting stations in the United Kingdom during the year July 1981 to June 1982 and the calendar year 1981. The heights (m.) of the reporting stations above mean sea level are also given.

## SCIENCE, DISCOVERY AND THE ENVIRONMENT, ETC., 1981-82

**Taj Mahal.**—The Indian Government announced in March that a pollution-free zone was to be created around the Taj Mahal in Agra. All industries with pollution potential were to be banned within the immediate vicinity of the monument. The Petroleum Ministry was also directed to ensure that pollutants from the major oil refinery at Mathura were maintained at a safe level. A committee of senior officials of the Archaeological Department, with wide powers to enforce its decisions, is to monitor the measures to protect the monument and ensure that the pollution-free zone is implemented. There have been large-scale protests and demands for action by the public and Parliament for protective measures and two years ago an expert examination reported that a series of yellow blotches could be cancer of the marble and liable to spread to disfigure the whole monument.

**Source of galactic gamma rays identified.**—For a considerable number of years astronomers have been puzzled about the origins of bursts of gamma rays lasting a second or two. Gamma rays are very energetic x-rays and were first recorded from space by instruments on board satellites. It is necessary to have the instruments above the Earth's atmosphere because the rays are converted during their passage through the atmosphere into particles indistinguishable from cosmic rays.

Dr. Bradley E. Schaefer, of the Massachusetts Institute of Technology, has reported that he has identified one source of these rays and has put forward an explanation for their origin. He linked the burst of gamma rays recorded on November 9, 1978 with a star which had been recorded on a photographic plate taken on the night of November 17, 1928 in South Africa and stored since then in the archives at the Institute. This correlation was possible because the instruments on board the satellite provided a very accurate location of the rays.

The star in question appears on only one of five consecutive 45 minute photographs taken of that region of the sky in 1928 and so it is inferred that the flash of light which enabled the star to be recorded lasted for less than 45 minutes. It is thought that the gamma rays are generated as by-products of thermonuclear explosions occurring on or near to the surface of a star massive enough to compress the material forming the outer regions of the star to a very high density. The star is thought to be more massive than the Sun and the current ideas suggest that it has collapsed to form a neutron star, having a diameter about the size of the Isle of Wight.

**Two Soviet probes to Venus.**—Two descent modules from the planetary probes, *Venus 13* and *14*, launched from the Soviet Union on October 30 and November 4, 1981 respectively, landed successfully on the surface of the planet and transmitted information for just over two hours. The first landed on the plains to the east of the Phoebus area on March 1, whilst its sister probe arrived on the surface on March 5 some distance away.

During their hour long descent through the atmosphere, the chemical and isotopic content of the atmosphere and clouds were recorded. The structure of the clouds was also studied. The probes were also designed to record electrical discharges and to measure the intensity of the diffused solar radiation. On reaching the surface, a soil sampling device drilled the rocks and then subjected the samples obtained to x-ray and fluorescent analysis. At the same time the planet's seismic activity was recorded and the physical and mechanical properties of the ground were measured. At the site visited by *Venus 13*, the sheets of lava showed traces of chemical erosion. Panoramic pictures of the surrounding landscape were transmitted back to Earth. Some of these were photographed consecutively through red, blue and green filters, making it possible to build up coloured pictures of the planet's surface. The information released so far describes the surface as being a dark brown colour. It is also anything but friendly. The temperature and pressure for the *Venus 13* site were 457°C and 89 atmospheres and the corresponding figures for the second site were 465°C and 94 atmospheres.

During their journeys to the planet, the probes investigated the solar wind and radiation, and the interplanetary magnetic field. A joint Soviet-French programme investigated the location and characteristics of gamma ray sources. The main space vehicles are now in heliocentric orbits and are continuing to send back details of interplanetary space.

**Oldest Ice-age Man from Wales.**—Although Pontnewydd Cave had been excavated during the last century and many fossils and artefacts collected, it has been the centre of interest during the last few years for a team of scientists, resulting in some very unexpected finds. The cave is situated in the lower Elwy valley of north Wales, with an entrance off the Carboniferous Limestone about 50 metres above the level of the River Elwy. The cave seems to have been filled almost to the roof with various deposits. A study of these deposits may lead to a better understanding of the Quaternary geology of the area and also may provide data regarding the limits of

the penetration of the Irish Sea ice as well as those of the more local ice.

Of great interest has been the identification of a human tooth from a young adult living in the region some 200,000 years ago. It resembles those of the "Early Neanderthal" fossil from Yugoslavia. The tooth belonged to someone living in the area at the time of the commencement of the last major glaciation and as such is the oldest specimen known from Wales and, except for the Swanscombe fossil, from Britain.

The tooth differs from those of modern man in that the pulp cavity extends well into the roots, in a similar way to those found in Yugoslavia. The age determined by a uranium-thorium dating technique agrees with that found by thermoluminescence techniques, which involves the measuring of how long once heated materials have been exposed to cosmic rays.

The cave has revealed many other items of interest, including a lower jaw bone and a vertebra, which have been dated and found similar to that of other Pleistocene fauna. These Pleistocene mammals include lions, bears and rhinoceroses, as well as a large variety of smaller animals.

**Snowfalls on Mars.**—Since their arrival on the Martian surface in 1976, the two American spacecraft *Vikings 1* and *2* have been sending back details of the continually changing conditions existing on the surface. Of special interest to Dr. Stephen D. Wall and the staff at the Jet Propulsion Laboratory, California, has been the snow-like deposits that have occurred during the winter months. The deposits are not like those occurring on Earth, but consist of carbon dioxide snow as well as water snow. By linking information of the appearance of this snow with details of temperature and pressure, a fairly accurate picture of the existing conditions could be evaluated.

The investigations showed that on one occasion, the first snow fell some 30 Martian days after a severe dust storm, but about 50 days before the winter conditions were severe enough for carbon dioxide to freeze. The snow was patchy until the carbon dioxide freezing temperature was reached, when a thin layer of snow covered the whole surface in the vicinity of the camera. With the advent of spring, the snow stayed much longer than it would have done if the deposit was pure carbon dioxide. Colour and reflective analysis of the deposits suggest that the initial falls were Martian dust covered with water ice, but the later falls consisted of particles with an extra layer of carbon dioxide on the outside. With the coming of spring, the first to evaporate was this outer layer of carbon dioxide ice.

Observations from the *Viking* orbiters seem to indicate that a similar situation exists

with the polar deposits, which glisten as brilliant white areas when seen through telescopes from Earth. The difference in behaviour of the two poles during the local summer is thought to be due to the north polar cap consisting of water snow but the south cap still holding on to much of the carbon dioxide snow.

**Dinosaurs were not sluggish creatures.**—It is commonly believed that dinosaurs moved very slowly, this being due possibly to the idea that their very large size would prevent any rapid movement. In fact, observational evidence from various locations supported this view. Work carried out by Dr. James O. Farlow, of Michigan, on footprints in the Lower Cretaceous rocks in Texas has provided evidence that some dinosaurs were able to move at speeds of up to 40 km. per hour.

Earlier work in this field has suggested that mammals shift from walking to trotting or running when the ratio of the stride to hip height reaches the value of 2. Here a stride is taken as the distance between corresponding points on successive prints of the same foot. Using this criterion, there were at least five dinosaurs moving with a faster gait than walking, and a fair confidence that three of them were actually running. Using the accepted formula connecting stride, hip height and size of footprint, Dr. Farlow calculated that two had reached speeds of about 40 km. per hour.

The method of estimating speeds is however open to unavoidable uncertainties. The footprints under investigation could have come from an animal with smaller than average, or even excessively large feet, or they could have come from animals with longer than average legs. It is even possible that the type of motion used by these dinosaurs is no longer used by modern animals. Dr. Farlow showed that there was no direct relationship between speed and the size of the dinosaur. There was, however, sufficient evidence to show that the smaller and medium sized animals moved faster than the larger types.

**Control of the cattle tick.**—About 800 million cattle and a similar number of sheep are affected by ticks. Current methods of control involve the expensive process of dipping, a process which is threatening to become less effective because of a build-up of resistance to the chemicals being used. Recent work carried out by Australian scientists at the Commonwealth Scientific and Industrial Research Organisation has brought to light a possible far more efficient method of dealing with the ticks.

The way in which an animal is infected is relatively simple. The tick larvae ascend the plant and are transferred to the animal by contact. Since the larvae may wait for

possibly several weeks before the transfer and only when this is achieved will the larvae be transformed into an adult tick, the problem could be eradicated if the larvae could be killed before the transfer takes place. It has been known for some time that certain plants are hostile environment for the ticks but until recently the growing of these plants with the grass has produced very limited success. The new discovery that two varieties of leguminous plants imported from South America have a very drastic effect on the ticks has brought to light a possible solution to the problem.

The plants in question convert nitrogen from the atmosphere into chemicals useful as fertilizers for the grass. In doing so they produce a sticky secretion which traps the larvae. This secretion also emits a vapour which poisons the larvae within 24 hours. The actual chemical which does the damage has not yet been identified but success in this will provide a very powerful fumigant. Alternatively, the sowing of a mixture of the plant seeds with the grass will provide both a fertilizer and an efficient control of the ticks. The plant is said to grow very easily in tropical and sub-tropical regions.

**The problem of the Moon's age.**—Because of its size, the Moon is often grouped with the rest of the terrestrial planets to form a single group with the implication that they all had the same origin and are of the same age. But unlike any of the others in the group, the Moon consists mainly of rocks with little or no iron. Any satisfactory explanation for the origin of the Moon must explain this deficiency.

The presolar nebula was thought to be rich in iron and the problem is to explain how the Moon could be formed out of material deficient in iron or alternatively why the Moon could reject this material but none of the other planets could manage it. The remnant material, as recorded by meteorites also has an iron rich content.

A simple explanation suggests that the Moon broke away from the Earth after the iron had fallen to the centre during the molten phases. The idea of the Moon originally being part of the Earth is not new. Charles Darwin, over a century ago, suggested that the Pacific Ocean is the scar left by the separation. This new theory, centred on the idea of the separation taking place during the time when the Earth was molten presents problems because it is difficult to explain why it separated and if this can be explained, how it settled into an orbit which could evolve into that existing today.

The Australian and American astronomers putting forward the idea claim that the theory can be tested in so far that if it is true, the mantle rocks of both the Moon and the Earth should be identical. The sampling of

the lunar rocks is relatively simple because the lunar surface has remained chemically undisturbed for millions of years. Studies of the trace elements potassium and iridium should enable the composition of the original mantle to be evaluated. On the Earth, however, this is a problem because the surface rocks are in constant motion and the present day mantle does not necessarily have the same composition as it had 4,000 million years ago.

**Carbynes—a doubt about their existence.**—Since the initial report of the existence some 15 years ago of a new form of carbon, called carbyne, much research has been carried out resulting in the identification of at least two forms, alpha and beta, and possibly several others, as well as the isolation of a naturally occurring mineral chaoite. Structurally it was said to have a hexagonal form, the atoms of carbon being joined together by alternating single and triple bonds. Later various types of carbynes were found in the Allende meteorite, an important type of carbonaceous meteorite and quite recently it was considered that carbynes were a constituent of interstellar dust.

All this is now questionable because workers at the Arizona State University have shown that there is some doubt about the actual existence of this new form of carbon. Using a high resolution transmission electron microscope linked to an x-ray spectrometer, they examined meteorites in which carbyne was reported and found that it was graphite. They then turned their attention to the mineral chaoite. One of the forms of carbyne was shown to be graphite, whilst a second phase was identified as silicate clay. In addition, many of the refractions for chaoite were identical with those for quartz. With such strong evidence, the existence of the new mineral was discounted. Having discredited the existence of carbynes in meteorites and the mineral, the workers then concerned themselves with reported synthesis products and once again showed that the carbynes could be explained by the presence of very small quantities of sheet silicates and quartz. As a result of their work, the scientists claimed that the evidence available at present is insufficient to establish the existence of carbynes as new polymorphs of carbon.

**New evidence for the cause of the Black Death.**—Much work has been carried out by archaeologists over the last few years on the early history of London, but during the excavations information on the conditions existing during the Middle Ages has provided many surprises. A report in *New Scientist* describes how the examination of the remains of a rat found near the northern end of Blackfriars Bridge has provided a clue to how

the bubonic plague known as the Black Death, spread so rapidly through Europe in the 14th century.

The rat in question was found several years ago in a waterlogged duct where it had spent the last 600 years. It still retained much of its fur due to the fact that air had been excluded from the duct and thus prevented its decomposition. The rodent has recently been examined by scientists at the Natural History Museum and surprisingly they found in the fur a human flea, *pulex irritans*, not a type usually associated with rats.

It has usually been thought that the plague was spread by one of the various types of rat fleas. These transmit the micro-organisms from rat to rat and then to people. Rodent fleas will live on humans for only a few weeks. If however, human fleas can live on rats as well, this could account for the rapid spread of the disease.

**Dolphins use magnets to navigate.**—Each year progress is reported on the understanding of how animals travel successfully over huge distances and repeat these travels year after year. It has been found that the mineral magnetite is responsible in some birds and bees and that it is responsible for some bacteria having the ability to align themselves with the Earth's magnetic field whilst swimming. Recent work by American scientists has shown that the mineral could also be responsible for the ability of dolphins to find their way at sea. The discovery was due to work carried out on sections taken from the heads of several Pacific dolphins which had died after being stranded on the Californian coast.

Magnetized pieces of tissue were found in the same part of the head in each of the dolphins. In one of the heads an opaque disc-like particle was found to consist of magnetite. Under an electron microscope this disc was found to be covered with very fine fibres, arranged in such a way, the scientists believe, to form a sensory net. The magnetization was found to be soft and only needing a very low magnetic field to neutralize it. It is therefore thought that the magnetite does not work as a permanent magnet but in conjunction with the Earth's field. Two theories have been proposed. One suggests that the motion of the dolphin produces a torque which could be detected by the attached nerve fibres but alternatively it is possible that the flexible tissue containing the magnetite could be distorted by the Earth's field, these distortions being picked up by the nerve fibres.

This is the first case in which magnetite has been reported in mammals and evidence collected over the years seems to suggest that the secret of long distance travel lies with the mineral, but the American scientists stress that their results do not provide direct

evidence for this but it is certainly a pointer in that direction.

**Neutrinos—no evidence for oscillations.**—Since Enrico Fermi first postulated the existence of a neutrino, it has been generally accepted that it was massless and had no charge. During the last few years, doubt has been cast on whether it is actually massless. If it did have mass, it could explain why the number of neutrinos coming from the Sun is far less than would be expected by current nuclear theory. It might also explain the missing mass which seems to exert gravitational effects on some spiral galaxies and groups of galaxies.

Neutrinos exist in three forms—electron, mu and tau neutrinos—and if they could oscillate from one form to another and the neutrino detectors were tuned in to only one form, this might explain the discrepancy. Physicists at the University of California have reported evidence for this oscillation, a result supported by workers in the Soviet Union, who suggested in 1980 that neutrinos might have a small mass. Current theories indicate that it would be impossible for the neutrinos to oscillate unless they also had mass.

Recent work, however, carried out in the United States, Switzerland and Germany with more sensitive equipment has failed to find evidence of any oscillation. In one experiment, a detector sensitive only to electron neutrinos was set up 38 metres from a reactor core. Any difference between the number of events recorded and the number expected from calibration measurements made at the core would give a measure of the number of electrons that had oscillated and changed into another form. The results showed that there was no difference. The experiment is going to be repeated with a detector 48 metres away from the reactor core. This will provide a further test and at the same time, by eliminating calibration uncertainties, improve the accuracy of the results.

**The secret of Damascus steel.**—In the history of warfare, swords made of what is called Damascus steel were well known to be superior to all others because of their exceptional toughness and retention of a sharp cutting edge. It is reported that Alexander the Great used such a steel as long ago as 320 B.C., but its use from the 7th century to well after the Middle Ages has been well documented. The steel was actually made in India but Europeans first met the product in Damascus, hence its name. Cakes of the metal, called wootz, were then shipped to Europe for forging, but efforts to work the metal were unsuccessful due to the steel crumbling. The successful eastern products were characterized by their unique surface

markings which could not be reproduced elsewhere.

Over the years many attempts have been made to reproduce the steel but until recently all failed to materialize, it being realized quite early that the secret lay in the added carbon. Last year provided a breakthrough when American workers, researching in the field of ultra high carbon steels, found the secret for success. A report in *Science* explains that the trouble lay in the temperature at which the steel is forged. European forgers worked at a temperature of about 1300°C, a temperature at which low carbon steel is the most malleable. The wootz at this temperature is partially liquid, and when struck it tends to shatter. If the wootz is worked at 700-900°C the problem is overcome. The actual secret of the success of the original Damascus steel was the repeated working at the lower temperature, resulting in the break-up of the coarse particles. The final distribution of the iron carbide produced the characteristic surface markings of the steel. A full investigation of the production, quenching and tempering of the steel has now been completed.

#### First flares observed on a distant star.—

Flares on the surface of the Sun have been observed and been under careful scrutiny for a very long time but even today they are not fully understood. They are of tremendous importance because of their effects on the Earth, *viz.*, radio fadeouts, aurorae, magnetic storms, as well as the problem they pose to astronauts and equipment on board satellites. A recent report in *New Scientist* mentions that a flare has now been seen on the surface of a distant star at three different wavelengths—in the optical, radio and x-ray bands. It is hoped that such information will help in the study of the more familiar solar flares.

The star in question is the variable star YZ Canis Minoris, which lies about 20 light years away. The observations took place in October 1979 when astronomers from all over the world, including those from the United States, Britain and the Soviet Union, kept the star under constant observation for 72 hours, waiting for the flare to occur. In this concerted effort, seven of the largest optical telescopes, eight radio telescopes, including Jodrell Bank, and the very large dish at Arecibo, Puerto Rico, worked in unison. At x-ray wavelengths the Americans used the *Einstein Observatory* satellite, which has provided much of the information gleaned about the x-ray sky.

The star is a dwarf, being only about three times larger than the planet Jupiter and had previously been recognized as a flare star, the flares being far more powerful than those occurring on the Sun. The occurrence of a flare, however, cannot be predicted, but

preliminary observations seemed to indicate that a flare would take place in the near future. The explosion lasted for about one minute at optical wavelengths but the x-ray burst, caused by the rising hot plasma, lasted for eight minutes. The flare threw out streams of high energy particles and as these moved into the upper atmosphere they generated radio waves which were picked up on Earth later.

**Possible impact basin at Yucatan, Mexico.**—Theories have been put forward during recent years that the extinction of the dinosaurs is linked to a huge impact event. During the last year, evidence for further extinctions has come to light (*see* "Meteoritic impacts and extinctions"). One problem with these theories is that so far no evidence has been found for the existence of a crater large enough and of the right age. One explanation has suggested the impact took place in the ocean, but some recent work has provided evidence of the existence of a huge crater about 1 km. below the surface in Mexico's Yucatan Peninsula.

A survey, carried out by American and Mexican geologists, has revealed in buried marine deposits, a feature involving a circular magnetic anomaly some 60 km. in diameter with a second concentric feature about 180 km. across. This magnetic anomaly coincides with a similar gravity anomaly, which had been identified earlier. The gravity anomaly bears a strong resemblance to that occurring at the well-documented impact structure at Manicouagan, Quebec. The Mexican feature lies within rocks dating to late Cretaceous times and its size suggests the impact of a body about 10 km. in diameter.

Computer models have been developed to explain the various features and all suggest a meteoritic origin. A volcanic origin has been rejected on the grounds that there is no evidence of volcanism in the area. The obtaining of further samples to ascertain the age of the feature more positively is being carried out at the present time. Such features are of importance commercially as well as scientifically, because at a similar site elsewhere the impact crater has shown to be a reservoir of oil.

**Stars detected in a quasar.**—Although it has not yet been possible to explain quasars with a reasonable degree of confidence, recent work is providing more evidence that these elusive objects, or at least some of them, are in fact galaxies at immense distances. By using advanced detection and image processing techniques, it has been possible to make striking progress in unravelling the many problems associated with them. There have been several reports in which quasars have been found to be surrounded by fuzzy envel-

opes, in contrast to the earlier observations which described them as star-like.

The breakthrough came at the end of 1981, when astronomers using the 5-metre telescope (200-inch) at Mount Palomar showed that the halo around the famous quasar 3C 48 consisted of stars. Spectral studies in the 5,000 to 10,000 angstrom range of wavelengths revealed lines which were identical to those emitted by very hot stars, those in the A7 spectral classification. The identification of such hot blue stars in the envelope of the quasar suggests that there has been a burst of star formation recently, say within the last 1,000 million years. This is roughly only 20 per cent of the age of the Sun.

The investigators believe that these results indicate that 3C 48 is a spiral galaxy with an active nucleus and not an elliptical galaxy as had been previously thought. They think that this discovery is of fundamental importance in that it may provide a crucial link in relating quasars to active galactic nuclei and normal spiral galaxies (see "A Black Hole at the centre of our Galaxy").

#### Studies of the outer solar system.—

Although not quite as sensational as the fly-bys of the planets Jupiter and Saturn, the *Pioneer* and *Voyager* spacecraft are still sending back to Earth details of the interplanetary conditions beyond the orbit of Saturn.

*Pioneer 10*, launched in 1972, had as its primary target the planet Jupiter, but having successfully completed that mission, is now sending back data from previously unexplored regions. By July 1981, it was about 28 astronomical units distant and is receding at a rate of about 2.8 A.U. per year. What has surprised astronomers is the fact that it is still detecting the solar wind and magnetic field, with no indication of the wind slowing down. It is now thought that the heliosphere could reach out to 50 to 100 A.U.s. Another surprise is that the solar storms can trigger shock waves which can travel through the heliosphere for more than a year. These tend to shield the inner planets from the low energy cosmic rays. Near to solar maxima, even high energy particles are deflected. It is hoped that much will be learned of the interaction of the solar wind and the planet Uranus when *Voyager 2* reaches the planet in 1986.

The *Voyager* spacecraft have not survived the long journey as well as *Pioneer 10*. Scientists are having trouble with the computer memory systems aboard *Voyager 1* and are currently pruning the scientific programme to cope with these storage problems. The *Voyager* is receding at a rate of 3.5 A.U.s per year in a direction of the solar apex, where it is thought the heliopause may be only 37 A.U. distant. It should reach this point in 1989. The later *Voyager 2* presented problems during the fly-by of Saturn, the

trouble turning out to be associated with the lubrication of a 9000:1 gear train. A fall-off in the circuitry in one of the television cameras may limit the number of images of Uranus and Neptune during the fly-bys in 1986 and 1989 respectively.

**A Black Hole at the Centre of our Galaxy.**—Dr. R. H. Sanders, an astronomer at the University of Groningen in The Netherlands, has concluded from his study of the gas clouds which abound in our galaxy that at its centre there exists a black hole. He has been puzzled by the observations that have been made over the last few years on about ten molecular clouds, having masses of about a million times that of our Sun and lying within 500 light years of the centre of the galaxy. Their apparent random motions suggest that they do not take part in the normal galactic rotation exhibited by many stars and gas clouds. They have a relatively low angular momentum with respect to the centre. A second group of clouds seem to be expanding at the rate of about 150 km. per second away from the centre. This shell of gas has a mass some ten times larger than the other group. The presence of these massive clouds came to light from a study by radio astronomers who were mapping the distribution of the carbon dioxide radical.

Dr. Sanders believes that the expanding gas cloud was caused by radiation pressure created by a collision between a cloud and a black hole which he considers to exist at the centre. Such a black hole of mass about ten million suns is consistent with spectral studies. The motions of the low momentum clouds are such that contact with the black hole would occur roughly every ten million years and would last for about 100,000 years. The gas drawn from the cloud would form a disc around the hole and would become a strong source of radiation. This radiation would produce sufficient pressure to produce the observed expanding ring of gas.

If the above explanation is correct, there would be an intense burst of radiation every ten million years. This could explain the existence of Seyfert galaxies, a type of spiral galaxy with a very bright nucleus. The one per cent accretion time is consistent with the fact that only a few per cent of the spiral galaxies are of the Seyfert type.

**Stability of pipes carrying fluids.**—An unexpected problem could arise in the stability of the pipes carrying oil from the North Sea oil fields. It has been found that instabilities can occur in the structures if the speed of flow of the oil is high. A theoretical study carried out by Dr. J. M. T. Thompson of the Department of Civil Engineering at University College, London and confirmed by experiment, indicates that the whole concept of the transportation of liquids by pipeline must be

examined carefully and possible modifications made in the supporting structures. Otherwise there may be a large scale escape of oil with potentially disastrous results.

When the velocity of the flow in a pipe is small, the behaviour of the pipe is in accordance with commonsense in that a small external force will produce a small deflection and that, within limits, the deflection will increase with an increasing external force. If, however, the flow exceeds a critical speed, the converse takes place. A bent pipe will tend to be straightened by a small force and an increase in this external force produces a larger straightening force. This strange behaviour can be demonstrated by hanging freely a flexible hosepipe carrying water. An external force can be applied by attaching a string to the hose and applying the force horizontally. If the water flow exceeds the critical velocity, the straightening of the hose increases with an increasing force applied to the string. This behaviour is referred to as negative stiffness.

Negative stiffness is in itself quite stable but this stability is likely to be destroyed by the addition of an external constraint and the pipe is liable to flutter, like the end of an untethered water hose when the water flows too fast. The system also becomes unstable if the velocity of the flow is increased above another higher critical value.

**New ideas on the origin of the universe.**—Although observational evidence tends to support the theory that the universe began with a big bang, scientists have worried about this because it implies a breakdown of all physical laws. A new theory, put forward by Richard Gott, of Princeton University, removes these objections. He proposes that our own universe is only one of perhaps an infinite number that formed like bubbles in a very hot dense space called a de Sitter space. Each of these bubbles is referred to as open or infinite and will expand forever. The interior of any of these universes behaves in accordance with the general theory of relativity as in the standard big bang theory. Gott's model overcomes the objections of the singularity by allowing the initial bubble to form out of the surrounding de Sitter space.

This new theory helps in the understanding of the relationships between gravitation and particle physics and involves the ideas put forward by the Cambridge physicist Stephen Hawking, who proved that thermal radiation is emitted anywhere there is an event horizon, *i.e.* a region from which light cannot escape. Gott claims that one of the properties of a de Sitter space is that it is full of event horizons and Hawking radiation. The de Sitter space is derived from a solution of Einstein's field equations combined with a cosmological constant. It gives an infinite curved expanding universe with individual

particles separating at an exponentially increasing rate. Gott describes this constant as mathematically equivalent to filling a de Sitter space with a fluid of constant density but having a constant negative pressure, a kind of universal suction. Gott has joined all these ideas—the de Sitter space, the cosmological constant, the exponential expansion, the event horizons and the Hawking radiation—into a cyclic process. He also explains the transition from Hawking radiation into atomic sub-particles, with the subsequent formation of ordinary matter.

**A big hole in space.**—The further one looks in space the more galaxies one sees. These galaxies are not uniformly distributed throughout space but tend to be grouped into clusters and superclusters. Relatively small gaps in this distribution are well documented but a recent investigation carried out by a group of American astronomers has revealed a much larger hole, some five times larger than any other. The investigators took six very deep core samples of the sky, three in each hemisphere. They measured the red shift of all galaxies down to magnitude 17 in an area about one degree across. The three samples from the southern hemisphere showed nothing unexpected but those from the northern hemisphere, lying in the direction of the constellation Bootes, showed abnormal gaps in the distribution of the galaxies. In each, the gaps extended from about 360 million to 540 million light years, but in the regions nearer to and farther away, there was an enhancement in the number. Subsequent studies have been made to identify the extent of the hole.

At the moment it is uncertain whether this hole is really a region containing less matter or whether it is just that it contains fewer spiral galaxies. One of the leading authorities on the large scale structure of the universe, James Peebles of Princeton University, considers the hole as the obverse of such features as the Serpens-Virgo supercluster, the largest and unique in its type, but even this is only half the size reported for this hole. If further searches reveal more of these holes, our understanding of the structure of the universe will have to be revised. At the moment two theoretical models have been proposed, both of which emphasize the role of hydrodynamics, but unfortunately neither is built on a very firm basis.

**"Voyager 2" at Saturn.**—In August 1981, *Voyager 2* flew past the planet Saturn, following the successful *Voyager 1* fly-by in November the previous year. It was, however, not a repeat performance but one which augmented the data sent back by the earlier probe. During the journey, its primary radio receiver had failed and trouble was experienced with the back-up receiver. Just after closest

approach, the scanning platform seized up but later this was freed. In spite of these setbacks, most of the scientific goals were achieved.

Possibly the most important difference between the two spacecraft was a working photopolarimeter on *Voyager 2*. This instrument recorded the light of the star Delta Scorpii as it shone through the ringlets which formed the large ring structure normally seen round the planet. 2,700 metres of readout chart revealed that the number of ringlets was not measured in hundreds but in hundreds of thousands. No particle in the rings larger than 1 km. were recorded.

*Voyager 2* also obtained detailed pictures of the satellites Enceladus, Hyperion and Iapetus, thus complementing the data from Dione, Rhea and Tethys, obtained by the earlier probe. The fissures, canyons, corrugated terrain and a wide strip of surface clear of craters, all point to the idea that Enceladus is heated by a tidal pumping mechanism similar to that of Jupiter's satellite Io, on which active volcanoes were recorded. The contrasting hemispheres of Iapetus, one side as bright as snow and the other as dark as asphalt, received detailed study and it is now thought that the dark surface is due to carbonaceous chondritic material similar to that found on some meteorites.

*Voyager 1* data seemed to indicate that all the winds on Saturn flowed from east to west but this last probe showed that this was not so. Jet streams on Saturn showed no correlation with the visible bands on the surface, yet on Jupiter the correlation is quite strong.

The probe is now well on its way to Uranus and there is every hope that most of the instruments will still be working on its arrival in 1986.

**Evolution—the debate continues.**—The nature of evolutionary change has been a topic of much debate in recent years. Evolution itself is not challenged; it is the manner of this change which has caused the interest. One school of thought, as proposed by Darwin, advocates that evolution takes place by the gradual accumulation of small changes, whilst the opposing school says that evolution takes place in fits and starts with a rapid revolutionary change followed by a long period of stability.

The discovery of a more or less perfectly preserved series of fossils spanning a period of about 5 million years has been made in deposits located in the Turkana Basin of East Africa by Dr. P. G. Williamson of Harvard University's Museum of Comparative Zoology. The fossils consist of snails not dissimilar to those found at the present time. Dr. Williamson fitted them into 13 different evolutionary lines but found no evidence of a gradual and continuous change as advocated by Darwin. He found that there were long

periods in which conditions were static, possibly lasting several million years, but these periods of stability were interrupted by sudden changes in which new species would appear.

Dr. Williamson concludes from the evidence collected from this find that the appearance of a new species must be a qualitatively different phenomenon from the gradual change in a particular species. Although the overall picture seems to be a strong challenge to the Darwinian school, one must not overlook the fact that what appears as a sudden change from the fossil record may still in actual fact be a very long time compared with the lifespan of the animal concerned.

**Trapdoor Knapsack code broken.**—The usefulness of a coded message depends solely on the inability of a third party to crack the code. With the extensive use of computers many of the standard techniques used for coding have become redundant. In 1976, an idea put forward by an American engineer at Stanford University, Martin Hellman, and two of his students, Whitfield Diffie and Ralph Merkle, proposed a completely new technique in which a knowledge of how to encode a message would not reveal how to decode it. Anyone could use the coding key but only the intended recipient would be capable of decoding it. Shortly after, Merkle and Hellman came up with a specific example called the Merkle-Hellman scheme or Trapdoor Knapsack. Since then much progress has been made in this field.

However, during the spring of 1982, Adi Shamir, a mathematician at the Weizmann Institute, found a way of cracking the original code proposed by Merkle and Hellman. The code is based on a very hard mathematical problem, called the Knapsack problem, which involves the identification of a large group of numbers which when added together give particular sums. The solution is very time consuming, even on a computer. The particular case used by Merkle and Hellman involved a set of numbers called a superincreasing sequence in which each number in the sequence is greater than the sum of all numbers preceding it. The idea was for the person to scramble mathematically a superincreasing sequence into a sequence which did not appear to be superincreasing. Anyone wanting to send a message would use the sequence in the encoding. Only the recipient would know how to unscramble it.

Shamir's success depended on the fact that the original superincreasing sequence could not be completely disguised and by using integer programming techniques was able to crack the code. It has been recommended that the scrambling of the superincreasing sequence should be carried out more than once. Nevertheless, a successful start has been made in the cracking of these codes and

no doubt much progress will be made in the near future.

**The eruption of the volcano El Chichon.**—Much has been published about the eruption of St. Helens in the U.S.A. and the effect of the large quantity of ash that was thrown into the atmosphere when the volcano exploded. The effect it had on the weather will be dwarfed by that produced by the quantity of ash and gas ejected into the atmosphere by the eruption of El Chichon, a volcano in southern Mexico, which took place in March and April 1982. It is estimated that the eruption ejected ten times more debris than Mount St. Helens.

A spokesman at N.A.S.A. Ames Research Center in California says that the giant cloud of sulphur dioxide will disrupt the weather in the northern hemisphere for the next two years at least. It has already been responsible for the heavy rainfall in California, 15 cm. of snow in the Sierras and exceptionally low temperatures in the Mid-west and Atlantic States. The cloud is reported to have formed a belt encircling the Earth stretching from the equator to a latitude of about 30° blocking out about 5 per cent of the incident sunlight.

It is predicted that the cloud will have covered the whole of the northern hemisphere by the end of 1982 with a result that temperatures may be about 0.5° C lower. This could have the effect of bringing on frosts earlier than usual. The cloud will affect all the northern hemisphere but its effect locally could range from nil to dramatic.

Meteorologists and vulcanologists are studying this eruption in great detail because it has presented them with an excellent opportunity to test the many theories that have been formulated recently. The scale of the eruption has been compared with that of Mount Katmai in Alaska, which took place in 1912.

**Fast spinning core of the Sun.**—For a long time it has been known that the surface of the Sun rotates fairly slowly, in about 25 days. This slow rotational period has presented many problems relating to the origin of the Solar System. A team of scientists from Birmingham University, working on the manner in which the surface of the Sun vibrates, have recently deduced that the interior of the Sun is rotating much faster with periods as fast as three days at the core.

The astronomers made their observations from the observatory at Tiede on Tenerife for 28 consecutive days in the summer of 1980, using a specially designed spectrometer adjusted to the spectral line of neutral potassium at 769.9 nanometres. The purpose of the study was to look for small Doppler shifts as the Sun's surface vibrates up and down. It is known that the vibrations set up in a spinning body are affected by the rotational speed.

Observations have shown that the Sun oscillates at several frequencies but the easiest one to study is the five minute wobble. The interpretation of the results involved what is known as harmonic analysis. If the Sun were not rotating, the graph would show a series of equally spaced peaks, the amplitude of which would vary according to the vibrational harmonics present. However, with a rotating body one will still have equally spaced peaks but they will be displaced to a slightly higher frequency and a new set of harmonics will be generated. The team found that there were three sets of lines in the frequency spectrum and the two higher frequency sets were split into three and five components in line with theory.

The results produced an average value for the rotational period from the core to the surface. The problem now is to decide how this rotation is distributed with depth. The various models give periods ranging from about 12 days to only three.

**Formation of Asia.**—Work carried out by Chinese and Australian geologists has shown that Asia, unlike the other continents, has been formed by the collision of a group of large islands. Some 225 million years ago, when Africa, Europe and the Americas formed a large single land mass called Pangaea, there existed in the ocean surrounding Pangaea a group of large island land masses which drifted northwards, colliding with themselves and the Siberian land mass to form modern Asia. It is thought that originally Siberia collided with the Kazakhstan land mass and these then collided with Europe along the Urals in Permo-Triassic times. This was followed by the collision of the other blocks to the south and east of Siberia and then by India during the Cenezoic, forming the Himalayas.

The above movements have been derived from a study of the residual magnetic fields in the rocks, thereby indicating the direction of the Earth's magnetic field at the time of the formation of the rocks. This direction together with the angle of dip gives a three-dimensional picture of the Earth's field and thus provides sufficient evidence to show where the rock was at the time of its formation. This technique has been used extensively elsewhere in the study of continental drift.

The results of the study shows that Siberia has remained roughly in the same position as it is at the present time. South-east Asia and Japan were situated quite near to the equator in Permian times and were separated from the Asian continent. Palaeomagnetic measurements in the Permian rocks of the Sino-Korean and Yangtze provinces indicate that at the time of their formation they were within 10° of the equator. There is much speculation regarding the origin of these

islands, some suggesting that they formed a single continent called *Pacifica*, but there is no hard evidence for this at the present time.

**Critical period in ocean development.**—According to the work carried out by Dr. E. M. Cameron of the Geological Survey of Canada, there was an important change in the composition of the sulphates in the oceans round about 2,350 million years ago. He has collected together the results of earlier workers, added new information from his own studies of the Pre-Cambrian rocks in South Africa, and has shown that this change can be linked to atmospheric changes, in particular to the accumulation of free oxygen in the atmosphere.

The study is based on a careful analysis of sulphur isotopes in the ancient rocks. There are two important isotopes, of which sulphur-32 is the more common and is the one used by marine bacteria which live on the sulphates. The sulphides appearing in modern sedimentary rocks are largely produced by the biogenic reduction of sulphates and are consequently rich in sulphur-32. The other isotope, sulphur-34, is not involved to the same extent and so is plentiful in oceanic sulphate reservoirs and evaporites.

Dr. Cameron has pointed out that evidence of partitioning of the isotopes indicates the existence of sulphate using bacteria. His studies of the South African rocks suggest that such partitioning started about 2,350 million years ago. Rocks dated earlier than this show little partitioning. An interesting by-product of this study is that it has been possible to separate rocks containing bacterial sulphur from those containing sulphur produced by other processes.

This change is also linked to geological events which are thought to have taken place some 2,800 million years ago when before this it is believed that the creation and destruction of rocks took place at a rate some six times greater than that today. The slowing down of the rate allowed the sulphate concentration to build up to permit the partitioning of the isotopes.

**The receding Moon.**—With the advent of the highly accurate laser techniques, the distance of the Moon is known to quite a precise value and it is estimated that the Moon is receding from the Earth at a rate of about 3.8 cm. per year. This recession is due to the Earth losing angular momentum due to tidal friction. Because the total energy of the Earth-Moon system must be conserved, this tidal loss is compensated by the slow separation of the two bodies.

Records of ancient eclipses and the evidence gleaned from the rings on fossils have shown that this rate of recession has not been constant. Theoretically the rate of recession is linked with the magnitude of tidal friction.

In an Earth covered with a deep ocean, this would be small, but the emergence of the continents and hence shallow waters would have produced a large increase in the energy lost and hence the recession would speed up.

Dr. A. Binder, of Munster University, West Germany, has carried out a study of the way in which the Moon has moved away from the Earth, assuming that at the time of the Earth's formation, the Moon was only about a twentieth of the distance of its present day value. He believes that the bulge in the Moon's shape towards the Earth is frozen evidence of the Earth's gravitational pull at the time the Moon solidified, about 3,000 million years ago. The curve of the recession obtained by Dr. Binder shows a prominent change at a time some 2 to 2.5 million years ago, when there was an increase in the land mass from 12 to 53 per cent and the resulting increase in the area of shallow water and the emergence of primitive life on Earth.

It is obvious that more work will be carried out in this field because of its implications in the theories for the origins of life on our planet.

**Origin of the mud deposits in the Mediterranean Sea.**—The sapropel mud formations of the eastern Mediterranean Sea have puzzled oceanographers for a very long time. These muds are normally formed in oceans where the bottom waters have become stagnant and too salty to support ordinary forms of marine life. Until recently the commonly accepted explanation was that the Mediterranean was flooded by fresh water from the melting of the Eurasian glacial ice at the end of the last ice age, this water flushing into the Mediterranean through the Bosphorus, some 13,500 years ago. This fresh water lying above the salty layers produced the conditions usually associated with sapropel deposits.

However, work carried out by French oceanographers has shown that the deposits are much younger. Carbon-14, dating from the carbonate deposits above and below the layers of mud obtained from a core at a depth of 3 km. at a point to the south-west of Cyprus, has indicated an age lying between 8,000 and 11,760 years. Support for these ages comes from the analysis of the pollen found in the mud. The pollen also suggests that they originated in the temperate climate of the eastern Mediterranean desert. The French scientists suggest that a more reasonable explanation for these deposits is the torrential flooding of the Nile, caused by the very heavy rainfall that was experienced in Equatorial Africa in the post glacial period.

**Tsunami forecasting.**—The devastation produced by the arrival of a tsunami wave has warranted much research for some time now. Most of the techniques for detecting them do not allow the alerting network a long

enough advance warning to inform the coastal regions likely to be hit. The fact that only about 20 per cent of the earthquakes that occur on the oceanic floor produce tsunamis, generates a reluctance to take any warnings seriously. Although in the deep ocean, the waves have a very small amplitude, they travel at speeds of several hundreds of kilometres per hour and therefore have tremendous energy. On reaching the coastal shallow waters, they slow down and in doing so produce waves many metres high.

The results from experiments carried out by a group of workers under the direction of Dr. J. Filloux at the Scripps Institution of Oceanography in California, suggest that it may be possible to give a much longer warning of an actual tsunami. They have set up a series of detectors on the floor of the north-east Pacific, in which the weight of water above the detector is recorded twice a minute. These records have shown that on one occasion there was a sharp fluctuation which could be linked directly to the arrival of a seismic wave from an earthquake which had taken place just off the Mexican coast. Ninety minutes later, a slow oscillation was observed and this has been interpreted as coming from fluctuations in the sea level. This wave had an amplitude of about 1 cm., oscillating four times over a period of two hours. The timings all fit into the theory that this was a tsunami in its early stages.

If further experiments verify this explanation, the next stage will be to develop a rapid method of getting the data from the sea bed to an alerting station. At the moment, all the available techniques appear to be so expensive that it may not be economically possible.

**The large meteorite fall in China in 1976.**—Most of the meteorites recovered from the Earth's surface are fairly small so the arrival of what is thought to be the largest fall in recent times has created much interest in the scientific world. The results of studies have provided much evidence about the history of the object prior to Earth encounter.

The meteorite fell in the Jilin Province of China on March 8, 1976 and about 4 tons of material have been collected, including one lump weighing 2 tons. During the last two years, specimens have been made available to workers outside China. Studies of the radioactivity from the meteorite have been carried out by scientists at Japanese and American universities. Whilst in space the meteoroid was subjected to bombardment by cosmic rays, producing radioactivity in the outer layers of the object. Measurement of this radioactivity permits estimates of the time the object was subjected to this bombardment. Studies from different parts of the object have made it possible to determine whereabouts in the main mass the object came from. The study of the aluminium-26

isotope is especially useful in this type of investigation.

The results so far indicate that the original body was about 1½ metres in diameter and had been in that form for about 400,000 years. Prior to this it is thought that it was part of a larger body about 10 metres across and that it was situated about 1 metre from the surface of the larger body. It is also thought that this larger body had existed in that form for about 10 million years.

This type of investigation is very important in that it provides information about the conditions existing in the solar system in the past and may in the long run provide positive evidence for the manner of formation of the solar system and the Earth in particular.

**Largest molecule in space.**—Each year brings discoveries of new molecules that have been identified in either interstellar gas and dust and in the atmospheres of stars. These discoveries are of importance because such knowledge can throw light on the problems of the origins of really complex molecules and hence the origin of life on this planet and possibly elsewhere. Of particular interest are what are known as carbon stars. These are stars in which thermonuclear reactions have advanced to a stage that carbon is being produced on a large scale, some of which is being expelled from the star by radiation pressure.

Radio astronomers from the Herzberg Institute of Astrophysics in Ottawa have recently been studying a carbon-rich star, IRC+10°216, a star which is much cooler than our Sun and lying about 600 light years away. Interest has been centred on the spectral lines in the radio part of the spectrum coming from the atmosphere of the star. Three particular lines have been identified and correspond to a molecule containing 11 carbon atoms. The spectral lines are due to changes in the rotational energy of the molecule. The star has been known for some time to contain 17 types of molecules of which seven have carbon-carbon bonds and ten contain the -CN radical. A group of compounds known as cyanopolyynes, which contain a carbon chain and end with the -CN radical, have been identified for some time. Those involving a chain of seven carbon atoms are quite common in the star. The recent discovery, however, corresponds to a chain of 11 carbon atoms, the largest molecule ever identified from a non terrestrial source. Of added interest is the fact that this new molecule is about 70 per cent as abundant as the seven carbon molecule. This implies that the building of long chain molecules in stellar atmospheres is a fairly efficient process.

These molecules will be blown into space by radiation pressure and a high percentage will be broken down by ultra-violet light. Nevertheless we have possibly an important source

for the building up of chemical compounds in the interstellar material.

**Meteoritic impacts and extinctions.**—Much publicity was given to the discovery of an iridium layer at the Cretaceous-Tertiary boundary, about 65 million years ago, and thought to have been caused by a huge meteoritic impact. The event has been suggested as the cause for the sudden extinction of the dinosaurs, known to have occurred at about the same time. This theory has been questioned in some quarters but recently the discovery of a second layer containing enriched iridium, at the end of the Eocene epoch some 34 million years ago, has provided more evidence to support the theory.

A recent report in *Science* describes how R. Ganapathy at the J. T. Baker Chemical Co. of Phillipsburg, New Jersey, became interested in the problem when he became aware of the fact that deep sea cores involving the end of the Eocene taken from the Caribbean and both the Indian and Pacific Oceans all contained large quantities of microtektites. Modern theories indicate that tektites were formed by meteoritic impacts on the Earth, the heat generated at such times melting sand and rocks and scattering the fragments over large areas. The ages of these parts of the cores correspond to the time when five major species of radiolaria became extinct. Being aware of W. Alvarez's work on the Cretaceous-Tertiary boundary, Ganapathy examined the concentration of iridium in the core from the Venezuelan Basin and found a ten-fold increase in iridium at the peak concentration of the microtektites.

Independently, Alvarez and his team has also been studying the same period and obtained similar results from cores taken from the Caribbean sea-bed. The association of microtektites and the anomalous iridium concentrations strengthens the astronomical aspects of the case and the fact that such horizons have now been linked to two major extinction periods puts much weight to the ideas of the extinctions being linked to astronomical events.

**The star T-Tauri.**—T-Tauri is the name given to a class of very young stars that are still contracting to what is called the main sequence, a stage in the life of a star in which it will normally remain in a very stable condition for a long time, during which it derives its energy by converting hydrogen into helium. The Sun has been on the main sequence for about 5,000 million years. The star T-Tauri is characterized by irregular variations in brightness, intense surface activity involving huge losses of mass via stellar winds, and spectroscopically by the presence of intense emission lines. Unfortunately, recent work on T-Tauri itself has indicated there is something strange about

the star. Infra-red studies have shown that it is much brighter than theory indicates from studies of its light in the visible part of the spectrum. The suggestion that it could be encased in a thick cloud of dust is not supported by observational data. Another problem is the fact that it appears to be much more massive than it should be according to current theories on spectral analysis.

However, these difficulties seem to have been removed by the discovery that the star is actually a double star. One component, called T-Tauri S (South) has a spectrum in accordance with current theories, but the other T-Tauri N (North) is a cool star with a surface temperature of about 650° K and is probably a protostar still embedded in the cloud of gas and dust from which it formed. This new data has been obtained using speckle interferometry, a technique involving the taking of a large number of very short exposures to illuminate problems of atmospheric turbulence and then integrating the data using a computer.

The study of T-Tauri stars is important because current theories indicate that the equivalent phase during the Sun's life could have had a big bearing on the formation of the solar system.

**Discovery of 'extinct' bird.**—The yellow-fronted Gardener Bowerbird, a species thought to have become extinct almost one hundred years ago, was found living in a colony of more than a thousand in a New Guinea rain forest, the American National Geographic Society stated in November, 1981. Prof. Javed Diamond, of the University of California Medical School, discovered the bird in the largely unexplored Gauthier mountains while helping an Indonesian government ornithological survey. It was a "fat, chunky robin with an incredibly glorious golden orange crest" was his description of the bird.

**Jet-flight butterflies.**—Dr. Olga Bocharova-Messner, a Russian scientist, writing in *Soviet Weekly*, in July, stated that like bumblebees, butterflies should not be able to fly, by man-made laws of aerodynamics. Bumblebees were the wrong shape and butterflies kept their wings folded when they should be flapping.

No other insect and no bird dare keep its wings folded in flight for a third of the time, as a butterfly did; it would just plummet back to earth. The scientist took high-speed photographs slowing down the butterfly's wings a hundred times to show other scientists at the Soviet Severtsov Institute how the insect did it.

Dr. Bocharova-Messner wrote that when a butterfly's four wings were folded in flight, the front two formed an airlock and the second pair made a perfect oval tunnel. The

rear wings continued to press together, forcing air in the tunnel out through the rear nozzle to create a jet stream. The jet was directed slightly downwards to give the insect lift as well as driving it forward. When it flapped its wings it was just reverting to a more primitive method of flying, like a propeller plane, while preparing for its next burst of jet power.

**Loch Ness "Monster".**—The mysterious Loch Ness "monster" has been relegated to nothing other than an ancient pine log—and by a Scottish engineer! Mr. Robert P. Craig, writing in the August issue of *New Scientist*, states that the great depth of Loch Ness and the abundance of pine trees round its shores would account for continual sightings of the "monster".

The pressures caused by the depth of the lake, he explains, would have crushed the soft outer cells of a pine trunk lying on the lake-floor and it would have partly filled with gas. The gas from time to time would drive the log up to the surface where it would make a brief appearance covered with great lumps of resin. It would then sink again as the gas was expelled.

Mr. Craig recalled having been told by a local retired headmaster, that during the War he had found just such a pine log in a swamp on the shores of Loch Ness. It was about 30 feet long and four feet across and was covered with lumps of resin. Mr. Craig believes it is significant that very few "monster" sightings have been made at Lochs Lomond and Tay where there are very few pine trees. The species of pine is extremely old, dating back to the last Ice Age, and resin oozes from it in summer to protect the trunk against pests and disease.

**1918 airship found.**—It was reported in March that members of the Anglian Aeronautical Preservation Society had discovered by chance in an orchard at Banham near Norwich the remnants of the only Italian-built airship to serve with the R.A.F. The Royal Aeronautical Society identified side girders and the round-nose section as part of the airship, which was built near Rome in 1918, accepted by the R.A.F., and based near Diss, Norfolk. It was used to escort the captured German U-boat fleet into Harwich at the end of the First World War and participated in the Lord Mayor's Parade in London in 1919. It was subsequently scrapped and the remains bought by a Banham farmer in 1920.

**Plants in orbit.**—Dr. Joe R. Cowles, a Houston University biologist, announced in April that the preliminary findings of his experiment aboard the space shuttle, *Columbia*, which returned to Earth on March 30 with plants in two miniature gardens healthy and vigorous, showed it was possible to grow

plants in orbit, although it was not as simple as many people imagined. Dr. Cowles' findings also concluded that many of the plants which grew in space for eight days were distorted and confused by the lack of gravity. He experimented with pine, oats and Chinese kung beans and reported all three had problems adapting to weightlessness. The most confused seemed to be the kung bean which twisted and turned in several directions instead of growing toward the light. Roots of the plants were also confused and over 50 per cent of the specimens produced roots sprouting out of the soil. Plants which germinated in the dark grew in directions based on the orientation of the seeds and were seemingly completely confused by the weightlessness.

**South Sea declaration.**—A joint environmental declaration by twenty-two South Sea island nations against the dumping of nuclear waste in the Pacific was signed in Rarotonga, Cook Islands, in mid-March. It urged the Japanese, United States and other governments to abandon their studies on the storage and disposal of nuclear material in the region while the signatories further resolved to sign within twelve months, the London Dumping Convention, an agreement controlling the disposal of all kinds of waste, including nuclear, at sea. Through this vehicle the South Pacific commission nations aim eventually to be able to declare the Pacific a nuclear waste-free zone. The Rarotonga conference also decided to adopt strategic measures to ban nuclear testing in the Ocean.

**Architectural conservation.**—The year 1982 was marked by legislative advance—the implementation in April of the full provisions of the Ancient Monuments and Archaeological Areas Act of 1979, which introduces greater protection for scheduled Ancient Monuments and for sites of archaeological importance threatened by redevelopment, and the promise of further change. Mr. Heseltine, Secretary of State for the Environment, announced in June that he proposed to "hive off" most of the present historic buildings functions of his Department to a new, as yet unchristened, quasi-governmental commission. The Historic Buildings Council and the Ancient Monuments Board were to be abolished. Mr. Heseltine's hope was that private financial sources could be better tapped and that greater commercial acumen would be displayed. The Secretary of State also announced, in May, details of a scheme to complete the revision of the lists of historic buildings compiled by him under the Town and Country Planning Acts within three years. The programme, to be launched in the autumn, requires a manpower of about 80, chiefly employed at County Council level and paid for by the Department. During the

course of 1981, 6,877 buildings were listed. Once the resurvey is finished the present total of 280,000 is likely to be doubled. Ninety-three historic sites were scheduled in 1981 as Ancient Monuments bringing the total to 12,616. Two, including the Neo-Classical mansion at Belsay in Northumberland, were taken into Government guardianship.

In 1981, permission was given for the demolition of 147 listed buildings in England and Wales. Others succumbed too, including the three listed buildings burned down during the riots in Liverpool and the famous 17th century almshouses at Denton in Lincolnshire, which were demolished illegally.

The budget for grants given by the Department of the Environment on the recommendation of the Historic Buildings Council for England in 1981-82 was £14.5m. and that for 1982-83, 14.6m. The English Tourist Board has estimated that local authority expenditure on environmental enhancement and conservation was some £27.4m. in 1981-82. The E.T.A.'s "English Heritage Monitor" also records that there were, at the beginning of 1982, 55 Building Preservation Trusts, an increase of six on the year and 18 "Heritage Centres", museums for the interpretation of historic architecture, of which five have opened since the beginning of 1981.

The properties which opened to the public for the first time in 1982 included Monk's House, Rodwell, Sussex, the home of Virginia Woolf, London's Tower Bridge, Fawley Court, Oxon, and Baddesley Clinton, Warks.

**The "Mary Rose".**—Autumn 1982 was to mark the most crucial stage in a dramatic exercise in marine archaeology—the raising of the hull of the Tudor warship "Mary Rose". This great ship, constructed in Portsmouth from 1509, and described in 1513 by Sir Edward Howard as "the flower of all ships that ever sailed", had been refitted in 1536 when her tonnage was increased from 600 to 700 and her guns from 78 to 91. She capsized, with appalling loss of life, at Spithead in the Solent before the gaze of Henry VIII, in July 1545. She had sailed out with other ships to repel a large and hostile French fleet. The French claimed to have sunk her with cannonfire but the disaster is more reliably credited to bad seamanship and overloading.

Initial attempts at salvage carried out immediately after the sinking were unsuccessful. The wreck was relocated in 1836 by the two Deane brothers who were pioneer divers. Working on the site up till 1840, they recovered 4 bronze and 11 iron guns as well as 9 breech chambers, or fragmentary barrels. They made minute records of their finds but unfortunately made use of explosives. The site was rediscovered again in 1967 through the efforts of Mr. Alexander McKee and archaeological investigation was intensified following the establishment, early in 1979, of

the Mary Rose Trust, with the Prince of Wales as an active President. The Trust was able to safeguard the site under the 1973 "Protection of Wrecks" Act and launched a multi-million pound fund-raising scheme.

In three years, some 19,000 dives were made and many invaluable artefacts found, including the earliest piece of English domestic pewter hollowware, magnificent guns, one of the oldest ships' compasses known, and early syringes and other equipment from the barber-surgeon's cabin. Longbows were recovered, most of which had retained their original flexibility and still required a draw pull of 80/100 lbs. Even though much of the superstructure has been lost, the Trust took the decision to raise the hull and house it permanently in a new museum to be built at Eastney, Portsmouth.

**Reconstruction of the Trireme.**—The Trireme is regarded as one of the greatest fighting vessels ever invented and yet little is known about it. It was announced in August 1982 that a project had been commenced to reconstruct a Trireme to solve some of the historical problems which lack of physical survival have posed. The cost was to be £250,000. The men behind the plan are Mr. John Coates, former chief naval architect at the Ministry of Defence, Mr. Frank Welsh, a Director of Grindlays Bank, and Prof. John Morrison, former President of Wolfson College, Cambridge and a renowned classicist. The project has the support of the National Maritime Museums of Britain and of Greece. It is expected that the ship will be reconstructed in Greece and it is hoped that it will be ready to undergo sea trials in 1983.

The trireme, to judge from evidence from a vase, relief and a coin, seems to have been 115 ft. long, to have been built from pine and oak, and to have had three banks of oars (hence the name). It had a crew of 200, of which 170 were oarsmen, and was capable of averaging 8 knots over long distances. There was a distinctive bronze ram on the prow. Even less is known about the technicalities of construction although there is a tantalising reference in Plato's "The Republic" to a mystical version of the universe tied together with bonds "like the undergirdings of a trireme". The ship was decisive in the Battle of Salamis of 480 B.C. when Athens defeated the Persian invaders and its last recorded use was in a battle between Constantine and Licinius in 323 A.D., when the "Threes", as they were described by an historian of the 5th century, were defeated by the lighter opposing vessels.

**The Tyneside "Metro".**—In the summer of 1982, the central section of Britain's first new underground railway system for 80 years, the Tyneside "Metro", was opened. The first phase, operating between Newcastle

city centre and the coast, at Tynemouth, had been opened in August 1980. In November 1981, the Queen opened the system on the completion of the next phase, which included a bridge connection across the Tyne. It is hoped that the last section, running to North and South Shields, will be finished in 1983.

The system, which will cover well over 30 miles, will link two-thirds of Tyne and Wear and is based on existing railway lines connected with a new four-mile underground through central Newcastle and Gateshead. A key provision is the purpose-built inter-

changes with the bus system. The Metro is Britain's first Light Rapid Transit Railway, or LRT, carrying passengers on "Super-trams", a hybrid of train and tram. Most of the 41 stations, both those inherited from British Rail, or those purpose-built, are unmanned. The total cost of the completed system has been estimated at £280m. Central Government has given £161m. It was estimated late in 1981 that 11 per cent of private car users had already switched to the Metro and 167,000 per week used the Tynemouth line alone in 1981.

---

### THE TRANSGLOBE EXPEDITION

The three-year, 35,000-mile, circumnavigation of the earth, the first to be carried out via the North and South Poles, finally came to an end on August 29th, 1982 when the British Transglobe expedition ship, *Benjamin Bowring*, returned to Greenwich, whence it had sailed on September 2nd, 1979. It was welcomed by thousands lining the banks and the Prince of Wales, patron of the Expedition, took the ship's helm for a brief period during the journey up the Thames.

The explorers, Sir Ranulph Fiennes, Charles Burton and Oliver Sheppard (who had dropped out after the Antarctic for domestic reasons) had crossed the Sahara Desert, in October 1979, sailed to Cape Town and arrived in Antarctica on January 5th, 1980. They reached the South Pole, almost a year later, on December 17th. From New Zealand, in March 1981, and Australia, in April, they sailed to Los Angeles and thence to Vancouver. Following a boat trip down the Yukon River and after entering the North West Passage to attain Ellesmere Island, they reached the North Pole in April 1982. Extremes of weather were compounded by misfortune, most disastrously a fire, which destroyed several of the expedition vehicles and seemed at first sight to threaten its whole future.

On March 15th, 1982, a plane flew through difficult conditions to deliver emergency equipment and supplies to the explorers after Sir Ranulph's snowmobile had disappeared into a 20-ft ice crevasse. Burton held on to the sinking vehicle until his hands were frozen but long enough for Sir Ranulph to drag two crates of vital supplies onto the ice. By clinging on, Burton saved the expedition's radio gear but a lot of equipment was lost.

The two men spent the night sharing the same sleeping bag with just a tent flysheet and tarpaulin for cover. When the aircraft delivered a replacement snowmobile, the explorers started cutting ice blocks to build a bridge across the biggest crevice to get started again. They were then confronted with an unseasonal rise in temperatures and the ice cracked all around them. They were unable to use their snowmobiles for 36 hours. Subsequently they moved on to another floe after the giant floe on which they had been trapped collided with another. However, conditions eventually eased and on March 26th it was reported that the two men were back on course after two days of relatively smooth going.

By April 9th, the explorers had only 25 miles to go and then on April 11th they reached the Pole itself where they celebrated with a magnum of champagne and flew the Union flag. They were now faced with a 600-mile trek to the edge of the ice-cap to rendezvous with the expedition ship. By June 17th they had spent the past six weeks on an ice floe waiting for the pack ice to melt and were some 227 miles from the place where their ship was to pick them up for the last leg to Spitzbergen. The *Benjamin Bowring* made an attempt to reach them in mid-July but had to pull out because of ice closing around it, but on August 5th the explorers were aboard the vessel homeward bound, although unfavourable winds slowed the voyage and compacted ice around it.

The expedition, although primarily a test of human endeavour, had a scientific and commercial purpose as well and attracted sponsors in 18 different countries. It was able to test equipment in extremes of heat and cold and valuable export orders were won.

## EDUCATION IN THE UNITED KINGDOM

### ENGLAND AND WALES

#### Decline in numbers

The school population is still declining. There were 4.6 million pupils in primary schools in 1973 in England but that number is likely to fall to 3.3 million in 1985. The secondary school population is expected to decline from 3.9 million in 1979 to 2.8 million in 1991. The extent and rate of the decline, however, varies within and between local education authorities.

An *upturn* in the school population will not begin until the 1986-87 academic year for primary schools and the 1992-93 academic year for secondary schools.

#### Decline in expenditure

Public expenditure on education in England and on universities in Great Britain was £10,507 million in 1980-81 compared to £8,605 million in 1979-80. Of the £10,507 million 60 per cent was spent on schools, 18 per cent on universities and student support, 13 per cent on further education including teacher training, and 4 per cent on school meals and milk. Teachers' salaries made up just over half of local authority recurrent expenditure on education and related services.

The U.K. public expenditure on education was 5.5 per cent of the U.K. Gross National Product. The Government's plans provide for total expenditure on education in England, universities in Great Britain and science in the United Kingdom to fall in real terms (at November 1979 prices) from about £8.8 billion in 1979-80 to £8.26 billion in 1981-82 and £7.8 billion in 1983-84. Higher education is planned to contract; and current expenditure on primary and secondary schools to fall in real terms by 6.5 per cent between 1978-79 and 1983-84 compared to a projected fall in pupil numbers of 13 per cent.

#### Department of Education and Science

The Department of Education and Science (D.E.S.) is responsible for all aspects of education in England and for government policy towards universities in England, Scotland and Wales. Responsibility in Wales for nursery, primary and secondary education, and for all non-university institutions of higher and further education, the youth and community services, and adult education lies with the Secretary of State for Wales.

The Department's main concern is the formulation of national policies for education. It is responsible for the broad allocation of resources for education, for the rate and distribution of educational building and for the supply, training and superannuation of teachers. It is concerned with basic educational standards but does not exercise direct control over the content of education or over teaching methods. The Department does not run any schools or colleges or engage any teachers.

The D.E.S. is also responsible for government support for civil science.

It acts within a framework of estimates approved by Parliament. The money which the Department itself spends is a small part of the total public expenditure on education, the major part being expenditure by local authorities (*see below*) which accounts for more than 85 per cent of national educational expenditure and more than half of all local authority spending. This expenditure by local authorities is financed from rates and from the rate support grant payable from the national Exchequer.

The Department commissions research, related to policy interests of the D.E.S. and the L.E.A.s, from universities and other bodies such as the National

Foundation for Education Research, and supports work on the development of school curriculum and examinations through various bodies.

#### H.M. Inspectorate

Her Majesty's Inspectors inspect schools and other educational establishments apart from universities, report to the Secretary of State for Education and Science on the efficiency of the educational system (excluding universities) and offer independent professional advice based on their observation and judgement to the Secretary of State, the Department of Education and Science, the local education authorities, and teachers. In January 1981 there were 415 H.M.Is in England and 58 in Wales. Much of the work of H.M. Inspectorate relates to national surveys of primary and secondary education.

#### Local Education Authorities

The educational service is a national service locally administered. Among its main features are:—

(a) its administration is decentralized, the responsibility for providing state primary, secondary and further education (but not university education) to meet the needs of their areas being that of the local education authorities (L.E.A.'s).

These elected councils appoint education committees consisting of some of their own members (a majority of the committee) and other people with experience in education and knowledge of the local education situation. The L.E.A.'s maintain schools and colleges and build new ones, employ teachers and provide equipment. Most of the public money spent on education is disbursed by the local authorities. Education is the largest item of their expenditure. L.E.A.'s are financed by rate support grants from the Department of the Environment and from the rates; and employ more than one million people, half of them teachers, whose salaries account for about half of the national expenditure on education.

#### Voluntary Agencies

(b) Voluntary agencies play an important part in educational provision often in co-operation with the State. Some indication of its nature and extent is given below.

#### SCHOOLS AND PUPILS

Schooling is compulsory for all children between 5 and 16 years. Some provision is made for children under 5 and many pupils remain at school after the minimum leaving age. No fees are charged in any publicly maintained school.

There are four main categories of school: (a) those *maintained* by local education authorities, the authorities meeting their expenditure partly from local rates and partly from grants made by the Department of the Environment; (b) *direct grant* schools which have been assisted by grants from the Department of Education and Science (in 1975 the then Secretary of State announced the government's intention to withdraw financial support from these schools by stages from 1976 unless, by the end of 1975, they indicated an intention to seek entry to the maintained sector); (c) *recognized independent* schools, i.e. independent schools which had sought and obtained recognition as efficient after inspection by H.M. Inspectors of Schools (from 1978, "recognition as efficient" ceased); (d) *other independent* schools.

#### County and Voluntary Schools

Maintained schools are of two types: (i) *county schools* (19,000) which are built, maintained and staffed by local education authorities. Their man-

agers (primary schools) and governors (secondary schools) are appointed by the L.E.A.'s. (ii) *Voluntary schools* (8,200 and attended in 1981 by about 22 per cent of all pupils in maintained schools) which although built by voluntary bodies (mainly religious denominations) are maintained by an L.E.A. About two-thirds of the voluntary schools are Church of England schools and about 2,600 are Roman Catholic. Voluntary schools are of three kinds: controlled (3,500), aided (4,800), and special agreement. In *controlled* schools the L.E.A. nominates two-thirds of the managers or governors (the rest are nominated by the voluntary body), bears all costs and appoints the teachers.

In *aided* schools the managers or governors (two-thirds appointed by the voluntary interest and one-third by the L.E.A.) are responsible for repairs to the outside of the school building and for improvements and alterations to it though the Department of Education and Science may reimburse up to four-fifths of approved capital expenditure. The L.E.A. meets all running costs. The managers or governors control the appointment of teachers. *Special agreement* schools are those where the L.E.A. may, by special agreement, pay between one-half and three-quarters of the cost of building a new, or extending an existing, voluntary school, almost always a secondary school. Two-thirds of the governors are appointed by the voluntary body and the remainder by the L.E.A. Expenditure is normally apportioned between the authority and the voluntary body as for an aided school.

The *Education Act 1980* gave parents and teachers the right for the first time to be on school governing bodies; and gave parents the right to express a preference for a particular school for their children which local authorities are obliged to meet whenever possible. In addition L.E.A.s have to publish information about their schools and admission arrangements. The Act relaxed the statutory obligations on L.E.A.s to provide meals and milk for pupils at maintained schools. It gave them discretion to charge for what they decide to provide, but required them to provide refreshment free of charge for children from poor families and to provide free facilities for children bringing their own food. It amended the law on the education of children under five years so that L.E.A.s have a power, not a duty, to provide education for this age group.

### Direct Grant Schools

Direct grant grammar schools are being phased out. By 1981, 40 direct grant schools had entered the publicly maintained system, and 119 had become independent.

### Public Schools

By the term *public schools* is usually meant the independent schools in the membership of the Headmasters' Conference, the Governing Bodies Association or the Governing Bodies of Girls' Schools Association.

*Independent schools* charge fees and do not receive grants from public funds. *Preparatory schools* are mainly for boys from about 8 to 13 years who wish to enter public schools. All independent schools are open to inspection and must register with the Department of Education and Science which lays down certain minimum standards and can make schools remedy any unacceptable features of their building or instruction and exclude any unsuitable teacher or proprietor. At the end of 1981 there were in England 2,347 registered independent schools. The arrangements by which independent schools could be "recognized as efficient", i.e. could satisfy the D.E.S. that their standards were broadly compa-

rable with those of grant-aided schools, have been discontinued.

The Education Act 1980 empowered the Secretary of State to establish and operate a scheme for assisted places, under which some parents receive income-related help with the cost of tuition fees at selected independent schools. 5,000–6,000 *assisted places* are available each year at more than 200 independent schools in England and Wales for academically able children whose parents cannot afford the full tuition fees. Some assisted places are also available for pupils going straight into the sixth form. In September 1981 3,660 of the places for 11–13 year olds were taken up and 525 of the sixth-form places. Two-thirds of these assisted places went to pupils from families with below average household incomes. The cost of the scheme in the financial year 1981–82 was expected to be £3.2 million.

### The State System

*Nursery Education* is for children under 5 years who may attend a nursery school or a nursery class attached to a primary school. In January 1981 there were 428,000 children under 5 years of age attending maintained nursery and primary schools in England (about the same number as in 1979 and 1980); 44 per cent of them were attending part-time and 52 per cent were in nursery classes. The percentage of the population aged 3 or 4 years attending maintained nursery or primary schools has risen from 17 in 1970 to 40 in 1981.

*Primary Stage.*—This begins at 5 years and the transfer to secondary school is generally made at 11 years. In England and Wales, about half the primary schools take 5 to 11-year olds; about 30 per cent are schools for infants (up to 7 years only); and most of the rest take juniors only (7- to 11-year olds). Most primary schools take both boys and girls.

*First Schools.*—In some areas, first schools cater for ages from 5 to 8, 9 or 10; they are the first stage of a three-tier system.

*Middle Schools.*—Middle schools (which take children from first schools) cover varying age ranges between 8 and 14.

*Secondary Stage.*—Secondary schools are for children aged 11 to 16 and over. The largest have over 2,000 pupils but more than half the schools take between 300 and 600 pupils. In January, 1981, when there were in England 3,840,000 pupils in maintained secondary schools the main types were: (a) *comprehensive* schools (90 per cent of pupils), whose admission arrangements are without reference to ability or aptitude; (b) *secondary modern* schools (6 per cent) providing mainly a general education with a practical bias; (c) *grammar* schools (3 per cent) providing an academic course from 11 to 16–18 years; and (d) *technical* schools (1 per cent) providing an integrated academic and technical course.

*Tertiary Colleges* are being developed in some areas. They provide normal sixth form school courses as well as a range of courses for further education students over the age of 16.

*Special Education* is provided for children who require it because of physical or mental disability either in ordinary schools or special schools. In January 1981 there were 123,000 full-time and part-time pupils (of whom about 111,000 were in maintained schools) in special schools in England, including about 4,400 receiving education in hospital special schools. In addition, nearly 7,400 pupils attended independent schools catering mainly or wholly for the handicapped and about 16,500 handicapped pupils were attending designated special classes in county and voluntary schools.

In 1981 an Education Act set up a new framework for special education in England and Wales. It introduced a new concept of special educational

needs extending to all children with significant learning difficulties and not just to the small minority of children hitherto ascertained as "handicapped".

### Primary and Secondary Schools

In 1981 there were 30,195 maintained and non-maintained schools in England, 271 fewer than in 1980. The total number of full-time and part-time pupils in them fell by 213,000 over the year to 8,720,000 in 1981. The number of maintained secondary schools continued to fall; in 1981 the total of 4,654 was 26 less than in 1980. For the fourth successive year the number of primary schools has fallen; in 1981 the total of 21,018 was 224 below the total for 1980.

Of the 8,720,000 pupils at school in January 1981 all but 2 per cent were full-time. Of those in maintained schools, 48,000 were in nursery schools, 4,176,000 in primary schools, and 3,840,000 in secondary schools. In addition there were 527,000 in non-maintained schools and 128,000 in special schools (maintained and non-maintained).

The downward trend of primary school rolls continues with 185,000 fewer in 1981 than in 1980. Since 1974 the total number of pupils in primary schools has fallen by 734,000 to 4,176,000.

Boys and girls are taught together in almost all maintained primary schools. Over 88 per cent of pupils in maintained secondary schools in England and Wales attend mixed schools. At secondary level most recognized independent schools are for boys only or girls only.

*Staying on.* 310,000 pupils aged 16 and over stayed on at maintained secondary schools in England. This was 26 per cent of those aged 16 years and 16 per cent of those aged 17 years. The corresponding percentages in 1971 were 23 and 15. In 1981 the Government announced provision for additional expenditure of £60 million (which 82.5 per cent is for England) in 1982-83 to enable young people to continue their education after 16.

*Pupil-teacher ratios* continue to improve. The ratio within maintained primary schools improved slightly from 23.1 pupils per qualified teacher in 1979 to 22.6 in 1981. For maintained secondary schools the ratio remained the same at 16.6 over the year. These ratios are the best ever recorded.

*Class Sizes.*—The average size of taught classes continued to decrease between 1980 and 1981. The proportion of secondary school classes with more than 30 pupils fell from 10.2 per cent to 9.6 per cent; the equivalent figure for primary classes fell from 24.7 per cent to 23.5 per cent.

*School Meals.*—In October 1981, 3,515,000 or 49 per cent of pupils at maintained schools in England took the school dinner; 11.9 per cent of pupils got free dinners. This compares with 64.1 per cent taking meals in 1979.

*Examinations.*—Secondary school pupils (and others) can take the General Certificate of Education (G.C.E.) or the Certificate of Secondary Education (C.S.E.). The examinations for the G.C.E., which are at present conducted by eight examining bodies (most connected with universities) are set at two levels: Ordinary level ("O") and Advanced level ("A"). "A" level is usually taken after two years in the sixth form following "O" level, which is normally taken at 16 years (earlier only if the head teacher agrees). The G.C.E. is not a "grouped subject" examination and candidates at either level may take one or more subjects as they wish. At "A" level passes are awarded in five grades. "A" level candidates may take Special papers which are usually set on the same syllabus as the basic "A" level papers but contain more searching questions.

Under the grading system for "O" level, attainment in an "O" level subject is indicated by a grade A, B, C, D or E of which grade A is the highest and grade

E the lowest. Candidates awarded grade A, B or C have reached the standard of the former subject pass at "O" level. Grades D and E indicate lower levels of attainment.

Like the G.C.E. the Certificate of Secondary Education (C.S.E.) can be taken in one or more subjects. It is open to boys and girls in any school completing five years of secondary education, and is meant for pupils of about 16 years who are around the average in terms of ability for their age groups. Five grades are awarded. The C.S.E. can be examined in a number of ways, internal and external, and is at present controlled largely by serving teachers sitting on the 14 regional examining boards.

The Government has decided that the G.C.E. "O" level and the C.S.E. examination systems will be replaced by a single system. The standards of the present "O" level examinations will be safeguarded and the number of syllabuses reduced with alternative papers being offered at different levels of difficulty. Groups of examining boards will be responsible for producing syllabuses in line with national criteria and schools will still be able to choose examinations set by any of the groups. These changes will require cooperation between G.C.E. and C.S.E. boards and may result in some mergers.

In June 1981 the Secretary of State announced the composition of the four groups of G.C.E. and C.S.E. boards which will administer the single system of examinations in England at 16 plus. Each group contains at least one G.C.E. board and one C.S.E. board and is associated with the territory of its constituent C.S.E. boards. The date from which the changes will take place will take effect has not yet been made known.

The Government also proposes to introduce a new pre-vocational qualification, available at 17 plus in both schools and colleges and designed for young people without a clear vocational objective and not intending to proceed to higher education.

Co-ordinating the work of the G.C.E. and C.S.E. examining boards, and advising them, has been the *Schools Council for the Curriculum and Examinations* (160 Great Portland Street, W.1. *Chairman*, J. Tomlinson; *Secretary*, J. F. Mann) which was established in 1964 by the Secretary of State for Education and Science as an independent advisory body financially supported by the D.E.S. and the L.E.A.'s and representing all educational interests with teachers forming a majority of its members. The Council has been particularly concerned with promoting and encouraging curriculum study and development. It has carried out research and development work on curricula, teaching methods and examinations in primary and secondary schools. It has also been concerned *inter alia* with maintaining comparability of standards between boards and also between the two examinations (grade 1 in the C.S.E. is intended to indicate a standard such that a candidate achieving it might reasonably have been expected to obtain a pass at "O" level in the G.C.E., had he followed a course leading to that examination).

In April 1982 the Secretary of State announced the proposed setting up of an *Examinations Council* and a *School Curriculum Development Council* to take the place of the Schools Council. The Examinations Council, which would be funded by the Secretaries of State, would coordinate and supervise the conduct of examinations at 16 plus and 18 plus, advise the Secretaries of State on the validity of national criteria and on how the examination system can best serve national needs. The School Curriculum Development Council, to be financed jointly by local and central government, would inform itself of current developments, identify gaps, stimulate within a modest budget work to meet future needs, and promote the dissemination of curriculum innovation.

## TEACHERS

(see also p. 531)

Although it is the duty of each Local Education Authority to ensure that there is efficient education to meet the needs of the local population, what is taught in the schools is normally decided on their behalf by the head teachers of schools.

Teachers are appointed by local education authorities, school governing bodies or managers. Those in publicly maintained schools must be approved as "qualified" by the Department of Education and Science. To become a qualified teacher it is necessary to have successfully completed an initial course of teacher training. Teacher training has now been largely integrated with the rest of higher education with training places concentrated in polytechnics, institutes or colleges of higher education, and universities.

Entry requirements are high with a reduced number of training places available. On entry to a course of initial teacher training leading to qualified teacher status (whether at undergraduate or post-graduate level) students are expected to provide evidence of, *inter alia*, a level of competence in English and mathematics at least equivalent to passes at a minimum of Grade C at G.C.E. "O" level or Grade 1 in C.S.E.

For entry at undergraduate level candidates must also normally have five passes in the G.C.E. (two of which should be at "A" level) or four passes (three of which should be at "A" level).

With certain exceptions, the profession now has an all-graduate entry. Teachers in further education, however, are not required to have qualified teacher status but most have industrial, commercial or professional experience.

*New Intake.* In recent years there has been a sharp drop in the number of places for students admitted to teacher-training courses. This is due to the drop in pupil numbers at school (see above) and to restrictions on public spending. In 1981 provisional figures for entry in England (in both university and non-university sectors) to such courses were: one-year postgraduate courses: 11,150; three- and four-year courses: 6,950; one-year specialist non-graduate courses: 300. Initial teacher training will end at 14 institutions of higher education if a provisional allocation of training places for 1983-85, which was announced in August 1982, is confirmed. However, the Secretary of State for Education has said that, as the number of children in primary schools will begin to rise again in the mid-80s, the logic of the situation requires the number of newly trained primary teachers to be trebled and the number of new secondary teachers to be cut by about a third.

The 1982 intake to teacher training postgraduate certificate of education courses is being reduced by 20 per cent. The total number of teachers in first, full-time permanent appointments in England and Wales, in maintained nursery, primary and secondary schools, by the January following the completion of initial training were: 1978—19,114; 1979—15,355; 1980—10,987 i.e. numbers dropped by 43 per cent between 1978 and 1980. The percentage of newly trained teachers who had taken up full-time permanent employment by the following January in maintained schools dropped from 58 in 1978 to an estimated 54 in 1980.

*Shortage Subjects.* There are still shortages of certain specialist teachers—especially in mathematics, the physical sciences, business studies, craft, design and technology. There is a pilot scheme of National Scholarships for Priority Teachers which is intended to attract able graduates to take a postgraduate certificate in education in mathematics, physics or chemistry. In a two year period 60

scholarships are available in England each worth £500 tax free on top of the normal student grant plus the guarantee of a teaching job. There is also a training and retraining scheme for teachers of shortage subjects.

*Serving Teachers.* The high point in the size of the total teacher force in England was January 1979 when there were in post 440,800 teachers in maintained nursery, primary and secondary schools. By January 1981 the total teacher force had dropped by 9,000 to 429,100 as compared to twelve months earlier and by January 1982 by 9,400 to 419,700. There was a marked increase in early retirements.

Of the 429,100 in January 1981, 1,670 were in nursery schools, 188,480 in primary schools and 239,000 in secondary schools. In addition there were in January 1981 94,000 teachers in further education, 18,000 in special education, and 1,000 providing education otherwise than at school.

*Unemployment.* A D.E.S. survey of teachers who in 1980 completed initial training courses in non-university institutions in England and Wales showed that by the end of 1980 an estimated minimum of 70 per cent had obtained teaching posts or the firm promise of posts in the U.K.; 8 per cent had taken up non-teaching jobs; and 14 per cent remained unemployed. Most of the remaining 8 per cent had gone on to further study, had gone abroad, or had deferred entry to teaching for personal reasons.

*Salaries.* There are national salary scales for teachers in schools and other educational institutions maintained from public funds. There is a superannuation scheme administered by the Department of Education and Science.

## HIGHER EDUCATION

"Higher Education" consists of the education provided in universities and in "advanced" courses in polytechnics and certain other educational establishments.

Outside the universities higher education covers any course—full-time, sandwich or part-time—of a standard higher than G.C.E. "A" level. It thus includes research, degree-level courses, higher diploma and higher certificate courses, and courses leading to a wide variety of professional qualifications. In that sense higher education is offered in some 400 institutions outside the universities most of them maintained by L.E.A.s within the overall provision they make for further education. In England the non-university sector of higher education catered in October 1981 for some 200,000 full-time and sandwich-course students, 120,000 on part-time day courses and 42,000 on evening courses. Home initial entrants to full-time and sandwich courses in 1981 are estimated to have risen by 14 per cent while overseas student numbers dropped by 6 per cent.

The Government announced in December 1981 that a *National Advisory Body for Local Authority Higher Education* would be set up on an interim basis. Its function is to advise the Secretary of State on the academic provision to be made in institutions in selected fields and, in relation to those fields, on the appropriate use of his powers with regard to the appointment of the advanced further education pool and to the approval of advanced courses. The advisory body comprises a committee (chaired by a Parliamentary Under-Secretary of State) supported by a Board. Both the committee and the board met for the first time in February 1982.

## FURTHER EDUCATION

The term "Further Education" usually means all post-school education except "higher education" (see above).

Excluding cultural and leisure activities at adult education centres, 1,800,000 people attended further and higher education courses in major establishments of further education in 1980–81.

Local Education Authorities are responsible for providing full-time and part-time courses of post-secondary education (other than university education) in their areas.

*Regional Advisory Councils.* Responsibility for coordinating further education provision in different areas of England and Wales rests with 10 Regional Advisory Councils (see p. 532) set up by the local education authorities in each region. The councils bring together representatives of the L.E.A.s, colleges, universities, industry and commerce.

The 5,682 further education establishments in England and Wales may be grouped in the following main categories of which all, except the last, are grant-aided:—

1. *Polytechnics* (see also pp. 509–10)—Thirty major centres in which a wide range of full-time, sandwich and part-time courses are provided for students at all levels of higher education, and entirely or almost entirely for those of 18 years or more. They have governing bodies with a large measure of autonomy and are mainly teaching institutions though provision is made for certain research where it is essential to the proper fulfilment of teaching functions and the maintenance of close links with industry. In England in 1980–81 there were 122,000 full-time and sandwich students at polytechnics and 82,000 part-time day students.

2. *Other Major Establishments* (593).—Including all major establishments (maintained or assisted by L.E.A.s, direct grant from D.E.S. or voluntary), other than polytechnics, providing courses in teacher training, art, agricultural, commercial, technical and other subjects. In England there were 361,000 full-time or sandwich students and 1,235 part-time day students.

3. *Adult Education Centres* (4,926). Establishments maintained by local education authorities and offering a wide range of courses, many of them recreational, mainly for evening students, and often housed in premises used by day for other educational purposes. 1,636,000 students in England and Wales.

4. *Independent Establishments* (133) recognised as efficient by the Department of Education and Science.

In 1973 there was set up a *Technician Education Council* to develop a unified national system of courses for technicians in England, Wales and Northern Ireland (in 1980–81 more than 85,000 students registered for TEC programmes in 500 colleges); and in 1974 the *Business Education Council* which is concerned with the development of policies for a uniform national system of courses, in further and higher education, for people in business and commerce (in 1980–81 more than 56,000 students enrolled on BEC courses).

An important body with few, if any, parallels in other countries is the *Council for National Academic Awards* (C.N.A.A.) which awards degrees to students taking courses approved by it in non-university institutions. Following a recommendation of the Robbins Committee it was established by Royal Charter in 1964 as an autonomous body. More than 100 colleges in Britain conduct courses leading to its degrees: B.A., B.Ed., B.Sc., and the higher degrees of M.A. and M.Sc. (for post-graduate course work) and M.Phil. and Ph.D. (for research which may be undertaken jointly in industry and college). In 1980 the C.N.A.A. awarded 22,751 first degrees and 938 higher degrees throughout the United Kingdom.

The *Diploma of Higher Education* (Dip.H.E.) is a two-year diploma intended to serve as either a terminal qualification or as a stepping stone to a

degree or other further study; it has a normal entry requirement of two "A" levels. The Dip. H.E. is awarded by either the Council for National Academic Awards (see above) or by a university. Courses leading to it are offered by more than 70 polytechnics and colleges. The emphasis in most Dip. H.E. courses is on the humanities and social sciences but many colleges offer scientific options.

*Adult Education* (see p. 514–16).

*Trade Union Education.*—The Secretaries of State for Education and Science and Employment support financially approved expenditure on trade union education and training. In 1981–82 the joint grant was £1·92 million.

*The Youth Service.*—Provides for the spare-time activities of young people. The Local Education Authorities co-operate with voluntary bodies in their areas and may maintain their own youth clubs. There are various national voluntary youth organizations. There are some 3,000 full-time youth workers in Britain who are employed by local education authorities and voluntary youth organizations. In addition there are more than 300,000 part-time paid and unpaid workers. In England and Wales there is a basic two-year training for youth and community workers. A review of youth service provision is taking place in 1981–82.

*Training Services.* The main responsibility for carrying out industrial and commercial training lies with individual employers but the Manpower Services Commission (M.S.C.) with government support, has evolved a strategy to provide opportunities for individuals to acquire new skills and to improve the effectiveness of training generally. There were 23 *industrial training boards* which received Exchequer funds and were responsible for promoting training in their respective industries but in December 1981 the Government announced that only seven of these would be retained leaving about 70 per cent of the country's workforce outside the scope of these boards. The *Training Opportunities Scheme* (T.O.P.S.) complements the training given in industry and commerce by providing individuals over the age of 19 with a chance to acquire new skills. Training is carried out at the M.S.C. Training Services Division's own skillcentres and at many colleges and employers' establishments. Some 66,400 adults were trained under T.O.P.S. in 1980–81.

In 1981 a *New Initiative in Training* was announced by the Government with emphasis on three objectives: better arrangements for skilled training to agreed standards; improving the vocational education and training of all young people; and opening up more opportunities for adults to train.

A *Youth Training Scheme* is to cover by September 1983 all unemployed young people leaving school at the minimum age.

In June 1982 the M.S.C. announced that it would launch a major collaborative scheme—the *Open Tech Programme*—which will use the resources and expertise of existing agencies for education and training.

A *Further Education Information Service* is provided each summer by the local education authorities in cooperation with the polytechnics and other colleges offering full-time degree and higher national diploma courses, and the Department of Education and Science. Its purpose is to provide up-to-date information and advice about full-time degree, H.N.D. and Dip.H.E. courses in the colleges for those who find themselves, late in the summer, without a place on a course. A list of local advisory officers is available from the D.E.S.

## UNIVERSITIES

Universities are self-governing institutions, usually established by Royal Charter, which are

responsible for all academic matters including appointments and staffing, curriculum and student admissions.

There are 44 universities in the United Kingdom (see pp. 504–9). Of these, 33 are in England, eight in Scotland, two in Northern Ireland and one (a federal institution) in Wales.

In addition, there is the "Open University" which provides courses leading to degrees by a combination of television, radio, correspondence, tutorials, short residential courses and local audio-visual centres. The Open University offers undergraduate (no qualifications needed for entry), post-experience and post-graduate courses. It is grant-aided directly by the Department of Education and Science and does not come within the University Grants Committee system. More than 8,000 students graduated in 1980 from the Open University and in 1981 some 60,000 students were following undergraduate courses.

The independent University College at Buckingham provides a two-year course leading to a Licence and its tuition fees are £4,040 for 1983. It receives no capital or recurrent income from the government but since 1981 its students are eligible for mandatory awards from L.E.A.'s. Its academic year consists of 4 terms of 10 weeks each.

**Students.** In October 1981 there were (provisional figures) 298,000 full-time and sandwich course students enrolled at universities in Great Britain, excluding the Open University. Of these, 252,000 were undergraduates and 46,000 postgraduates. 15,000 of the undergraduates were from overseas and 15,000 of the postgraduates.

The number of new full-time/sandwich student entrants to universities in Great Britain in October 1981 was 110,000 of whom 81,000 were undergraduates and 29,000 were postgraduates; of these 6,000 and 9,000 were from overseas. Home undergraduate new entrants decreased by 3.7 per cent compared to the previous year and those from overseas by 3.5 per cent; home postgraduate entrants, however, were up by 1.1 per cent and those from overseas down by 2 per cent.

In 1980, 68,151 first degrees and 18,925 higher degrees were awarded by universities (other than the Open University) in Great Britain.

Students applying for admission to a first degree course at a university do so through the Universities Central Council on Admissions (U.C.C.A.) which was set up by the universities in 1961 on the initiative of the Committee of Vice-Chancellors and Principals. All universities participate fully in the U.C.C.A. scheme except certain Scottish universities. The Open University and the University College at Buckingham, however, conduct their own admissions direct. The U.C.C.A. office is in Cheltenham.

The requirements for entry to first degree courses vary somewhat from one university to another, but the universities publish co-operatively an annual Compendium which describes these requirements in detail.

Students who are normally resident in Britain, have certain minimum qualifications and have been admitted to a university in the United Kingdom are entitled to an award from public funds; the amount varies according to the financial circumstances of the students and their parents. Students with mandatory awards do not pay tuition fees; the parental contribution scale applies only to grants for maintenance.

As part of the Government's plan to restrain public expenditure, new entrants from overseas (other than from European Community countries) to higher and further education courses in Great Britain must pay tuition fees based on the full recurrent cost of the courses. In 1982–83 these were *not less than* £2,700 for arts courses, £3,600 for science courses and £6,600

for clinical medicine, dentistry and veterinary science.

**Academic staff.** In 1980–81 there were 44,092 full-time teaching and research staff at universities in the U.K. of whom 10.4 per cent were professors, 21.3 per cent were readers or senior lecturers and 53 per cent lecturers or assistant lecturers.

The University Grants Committee advises the Secretary of State for Education and Science on university matters. Most of its members are academics or businessmen. The U.G.C. acts as a buffer between the Government from which it receives a block grant of money and the universities to which it allocates this grant.

Although the universities have freedom in academic matters, the Government, through the U.G.C., determines the total size of the university student population, strongly influences its distribution between arts, science, medicine, etc., and determines the part which the university sector plays in the whole higher education system.

**Reshaping the university system.** Unprecedented cuts to the income and student numbers of universities in Great Britain were announced by the U.G.C. in July 1981 as another part of the Government's intention to cut public spending. Recurrent income will be cut, in real terms, by between 11 and 15 per cent between 1979–80 and 1983–84 and there will be a 5 per cent (12,250 students) reduction in numbers of home and other E.C. students, even though the demand for university education is still rising. A redundancy compensation scheme for academic staff has been set up.

## SCOTLAND

The educational system of Scotland has developed independently of that of England and has a number of distinctive features. The general supervision of the national system of education, except for the universities, is the responsibility of the Secretary of State for Scotland acting through the Scottish Education Department. The duty of providing education locally rests with the nine regional councils and three island councils. Educational facilities of various kinds are also provided by the governing bodies of grant-aided schools, "central institutions", colleges of education, and national voluntary organizations in the field of informal further education.

Schools in Scotland fall into three main categories, viz. *education authority schools* which are financed and managed by the regional and islands councils; *grant-aided schools*, conducted by voluntary managers who receive grants direct from the department; and *independent schools* which receive no direct grant, but which are subject to inspection and registration.

In 1980–81, there were 3,848 education authority and grant-aided schools and departments, of which 519 were nursery, 2,543 primary, 467 secondary and 319 special. There were also 90 registered independent schools. The total number of pupils in education authority and grant-aided schools and departments (including special) was 988,722 (504,994 boys, 483,728 girls) of which 32,644 (16,800 boys, 15,844 girls) received nursery education. There were a further 16,044 pupils in independent schools (9,343 boys, 6,701 girls).

Schooling normally starts at the age of 5, and the primary school course lasts for 7 years. Primary schools usually take both boys and girls. Pupils transfer from the primary course to secondary courses about the age of 12.

Over 99 per cent of pupils in education authority secondary schools attend schools with a comprehensive intake. Most of these schools provide a full range of courses appropriate to all levels of ability from first to sixth year.

The Scottish Certificate of Education Examination is conducted by the Scottish Examination Board. Pupils may attempt as many of a wide range of subjects as they are capable of, on either the Ordinary grade which corresponds to the Ordinary level of the General Certificate of Education, or on the Higher grade which is normally taken one year after Ordinary grade. The shorter length of course inevitably means that Higher grades are normally studied to a lesser depth than Advanced levels; on the other hand it is common for pupils to be presented for four or more Higher grades at a single diet of the examination. The Board grants a Certificate of Sixth Year Studies designed to give direction and purpose to sixth-year work by encouraging pupils who have completed their main subjects at Higher grade to study a maximum of three such subjects in depth. Pupils may also use the sixth year to gain improved or additional Higher grades or Ordinary grades.

*Further Education.*—Facilities for further education are provided by 14 Central Institutions (grant-aided colleges administered by independent Boards of Governors) and by 62 further education colleges managed by education authorities. The Central Institutions provide mainly advanced courses in science and technology, commerce, art, music, domestic science, and other subjects, leading to their own diplomas, to professional qualifications or to degrees validated by C.N.A.A. or universities.

The further education colleges normally provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects, but a few offer courses of degree level. Courses are offered in a wide variety of subjects but to make the most economic use of resources, provision of certain courses is made on a regional or even a national basis.

*Teachers.*—All teachers in public or grant-aided schools in Scotland are required to be registered with the General Teaching Council for Scotland (which is independent of the Scottish Education Department) and normally to hold a teaching qualification awarded by a Scottish College of Education. There are seven of these colleges, five of which provide both one and three year courses leading to a Teaching Qualification (Primary Education), and a one year course leading to a Teaching Qualification (Secondary Education). Of the remaining two colleges, one

is a residential college of physical education for women and the other provides only courses leading to a Teaching Qualification (Primary Education). All seven colleges, in conjunction with local universities or the Council for National Academic Awards, provide four year combined courses leading to the degree of B.Ed.

The basic scales of teachers' salaries are for primary and secondary levels, with additional payments for qualifications and for posts of special responsibility.

#### NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly comparable to that in Great Britain. Under the 1947 Act (and later amendments) primary education is provided for children up to about 11½ years of age when they are transferred to secondary school. The main types of secondary school are: secondary grammar and secondary (intermediate). Selection for secondary education is based on verbal reasoning tests at eleven-plus combined with teachers' assessments of performance in school subjects. Fees are charged at grammar school but qualified pupils there receive scholarships from their local education authority.

In January 1979 the total number of pupils enrolled in grant-aided schools was 370,048; there were 61 nursery schools with 3,260 pupils and 110 full-time teachers; 1,069 primary schools with 200,866 pupils and 8,405 full-time teachers; 261 secondary schools with 158,601 pupils and 10,114 full-time teachers; 26 special schools with 2,467 pupils and 283 full-time teachers.

In 1978-79, of students enrolled in grant-aided institutions of further education, 6,358 were taking advanced courses and 41,173 non-advanced, 15,000 were full-time, 13,941 were on day-release, including block release, and 18,590 were other part-time. The training of teachers is carried out in 3 colleges, the Ulster Polytechnic, one technical college, and in the department of education of the Queen's University of Belfast and the education centre of the New University of Ulster. In 1979 there were 2,649 full-time students training to be teachers (including 759 new entrants).

Public expenditure on education, libraries and related services in 1978-79 was £332 million.

---

#### DUKE OF EDINBURGH'S AWARD SCHEME

The Duke of Edinburgh's Award Scheme, which operates under a variety of titles in over forty countries around the world, provides an incentive and a challenge to young people to reach certain standards in leisure-time activities with the voluntary help of adults. Entrants must be between their 14th and 23rd birthdays, and can enter through their school, their firm, a youth organization, or on their own. Bronze, Silver and Gold Awards can be gained by those who qualify in the four sections of the Scheme: Service, Expeditions, Skills and Physical Recreation. The qualifying standards are expressed in terms of proficiency, perseverance or sustained effort, participants being assessed on the use they make of their personal abilities and aptitudes, and not in competition with others.

In 1981, there were 78,847 new entrants from the United Kingdom and 34,325 from overseas; a total of 49,866 Awards were gained world-wide. Since the Scheme began in 1956, over one and three quarter million young people have taken part.

Head Office: 5 Prince of Wales Terrace, W.8. Director: R. Heron.

## PRINCIPAL BOOK PUBLISHERS AND THEIR ADDRESSES

More than 9,000 firms, individuals and societies have published one or more books in recent years. The list which follows is a selective one comprising, in the main, those firms whose names are most familiar to the general public. An interleaved list containing some 2,500 names and addresses is available, price (1982 edition) £2.25 post free, from the publishers of "Whitaker".

- Abelard-Schumann, Furnival House, 14-18 High Holborn, W.C.1.
- Allan (Ian), Terminal House, Shepperton, Mdx.

## COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property and Copyright Dept., Department of Trade*, 25 Southampton Bldgs., W.C.2.

Subject to the provisions of the Copyright Act, 1966, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. *No registration nor other formalities are required in order to obtain the protection of the Act.* Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films (including video recordings) and television and sound broadcasts. Libraries entitled,

under a provision still in force of the Copyright Act, 1911, to receive free copies of books published in the United Kingdom are the British Library, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

*Voluntary Registration at Stationers' Hall.*—Compulsory registration at Stationers' Hall was terminated by the Copyright Act of 1911, but in 1924 the Stationers' Company established a *new Register* in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being £10 for a Book, or a Fine Art; certified copies £7 in either case. The fee for a search is £5.

## ANNUAL REFERENCE BOOKS

- Advertiser's Annual.—East Grinstead House, East Grinstead, W. Sussex. £26-00.
- Aeromodeller Annual.—14 St. James Rd., Watford. £3-25.

### THE PRESS COUNCIL

1 Salisbury Square, E.C.4.

[01-353 1248]

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. This constitution was materially amended in 1963 by the introduction of an independent chairman and up to 20 per cent lay membership. In 1973, the Council was increased to 30 (excluding the Chairman) of whom one-third were lay members. Following a recommendation of the third Royal Commission on the Press made in 1977, the size of the Council was increased in 1978 to 36 (excluding the Chairman) of which half are press members and half non-press members. The objects of the Council are (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to consider complaints about the conduct of the Press or the conduct of persons and organizations towards the Press; to deal with these complaints in whatever manner might seem practical and appropriate and record resultant action; (4) to keep under review developments likely

to restrict the supply of information of public interest and importance; (5) to report publicly on developments that may tend towards greater concentration or monopoly in the Press (including changes in ownership, control and growth of Press undertakings) and to publish statistical information relating thereto; (6) to make representations on appropriate occasions to the Government, organs of the United Nations and Press organizations abroad; and (7) to publish periodical reports recording the Council's work and to review, from time to time, developments in the Press and the factors affecting them.

The constitution of the Council provides for editorial and managerial nominees of The Newspaper Publishers Association Ltd. (3), The Newspaper Society (3), The Periodical Publishers Association Ltd. (2), The Scottish Daily Newspaper Society (1), Scottish Newspaper Proprietors' Association (1), The Guild of British Newspaper Editors (2), The National Union of Journalists (4), The Institute of Journalists (2) plus (18) lay members appointed by the Press Council Appointments Commission. In addition each constituent body nominates one official as a non-voting member.

Chairman, P. Neill, Q.C.

Director, K. Morgan, O.B.E.

## THE CIVIC TRUST

17 Carlton House Terrace, S.W.1.  
[01-930 0914]

Founded in 1957, the Trust is a recognized charity supported by voluntary contributions. It encourages the protection and improvement of the environment. It makes Awards for good development of all kinds. Among some particular concerns have been the initiation of co-operative street improvement schemes; the promotion of new techniques for transplanting semi-mature trees; industrial dereliction and urban wasteland; the problems of damage and disruption caused by heavy lorries. The Trust encourages the formation of local amenity societies and gives advice and support to nearly 1,200 such societies now on its register. It was closely associated

with the drafting of the Civic Amenities Act 1967, which created the concept of the Conservation Area, and of the Town and Country Amenities Act 1974. It administers the Architectural Heritage Fund, which provides loan capital to local buildings preservation trusts; and on behalf of the Department of the Environment, the work of the Heritage Education Group. Associate Trusts are linked with it in the North West, the North East, Scotland and Wales. From 1973 to 1981 it administered government grant-aid to conservation projects in non-outstanding conservation areas on behalf of the Historic Buildings Council.

## LOCAL ARCHÆOLOGICAL SOCIETIES

## England and Wales

*Anglesey*.—ANGLESEY ANTIQUARIAN SOCIETY. *Hon. Sec.*, D. O. Jones, 22 Lôn Ganol, Menai Bridge, Anglesey.

## TRADES UNION CONGRESS (T.U.C.)

Congress House, 23-28 Great Russell Street, W.C.1.

[01-636-4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the representatives of which meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliated fees are paid. Affiliated unions (in 1981-82) totalled 105 with an aggregate membership of 11,005,984.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with motions from affiliated societies on questions of policy and organization.

The Standing Committees of the General Council are serviced by a full time staff appointed by the General Secretary, who is himself elected by Congress and who remains in office until the age of 65, subject to decision of Congress or the General Council.

Through the General Council and its committees the trade union movement maintains systematic relations with the Government and Government Departments, with the Confederation of British Industry and with a large number of other bodies. It is represented on the National Economic Development Council, the Manpower Services Commission, the Health and Safety Commission, the Council of the Advisory Conciliation and Arbitration Service and a number of other bodies.

Among powers vested in the General Council by consent of the unions in Congress is the responsibility of intervening in disputes and differences between affiliated organizations; if possible this is done through informal conciliation meetings under T.U.C. auspices but where necessary a Disputes Committee is formed consisting of one member of the General Council and two senior officials of unions not involved in the dispute. This investigates the matter concerned and issues its findings.

Unions retain full control of their own affairs and the only sanctions which Congress can apply are suspension or exclusion from membership.

*Chairman* (1982-83), F. Chapple (*Electrical, Electronic Telecommunication and Plumbing Union*).  
*General Secretary*, Rt. Hon. L. Murray, O.B.E.

## TRADE UNIONS AFFILIATED TO T.U.C.

## SCOTTISH TRADES UNION CONGRESS

16 Woodlands Terrace, Glasgow

The Congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. In 1982 it consisted of 78 unions with a membership of 1,072,036 and 43 directly affiliated Trades Councils. The majority of the unions organize throughout Britain and affiliate on their membership in Scotland.

The Annual Congress in April elects a 22-member General Council on the basis of 12 industrial sections. Congress has been prominent in pressing for economic expansion and full employment in Scotland and the development of the social services, most of which are separately organized in Scotland.

*Chairman* (1982-83), A. Barr.  
*General Secretary*, J. Milne.

BANKING, INSURANCE AND FINANCE UNION (147,995).—*Sec.*, L. A. Mills, 17 Hillside, Wimbledon, S.W.19.

- SEAMEN, NATIONAL UNION OF (34,938).—*Gen. Sec.*, J. Slater, C.B.E., Maritime House, Old Town, Clapham, S.W.4.
- SHEET METAL WORKERS, COPPERSMITHS AND HEATING AND DOMESTIC ENGINEERS, NATIONAL UNION OF (62,601).—*Gen. Sec.*, L. G. Guy, 75-77 West Heath Road, N.W.3.
- SHOP, DISTRIBUTIVE AND ALLIED WORKERS, UNION OF (437,864).—*Sec.*, W. H. P. Whatley, "Oakley," 188 Wilmslow Road, Fallowfield, Manchester 14.
- SHUTTLEMAKERS, SOCIETY OF (92).—*Pres.*, E. V. Littlewood, 21 Buchan Towers, Manchester Road, Bradford.
- SPRING TRAPMAKERS' SOCIETY (90).—*Sec.*, J. Martin, Bellamy House, Wilkes Street, Willenhall, Staffs.
- TAILORS AND GARMENT WORKERS, NATIONAL UNION OF (81,761), 16 Charles Square, N.1.—*Gen. Sec.*, A. Smith.
- TEACHERS, NATIONAL UNION OF (224,090).—*Sec.*, F. Jarvis, Hamilton House, Mabledon Place, W.C.1.
- TEACHERS IN FURTHER AND HIGHER EDUCATION, NATIONAL ASSOCIATION OF (63,483).—*Gen. Sec.*, P. Dawson, Hamilton House, Mabledon Place, W.C.1.
- TEXTILE WORKERS AND KINDRED TRADES, AMALGAMATED SOCIETY OF (3,561).—*Gen. Sec.*, H. Lisle, O.B.E., Foxlowe, Market Place, Leek, Staffs.
- TEXTILE WORKERS' UNION, AMALGAMATED (23,060).—*Gen. Sec.*, J. Brown, Textile Union Centre, 5 Caton Street, Rochdale, Lancs.
- THEATRICAL, TELEVISION AND KINE EMPLOYEES, THE NATIONAL ASSOCIATION OF (19,000).—*Gen. Sec.*, J. L. Wilson, 155 Kennington Park Road, S.E.11.

TOBACCO MECHANICS ASSOCIATION (239).—*Sec.*, J. Middleton, 42 Tilmouth Avenue, Whitley Bay, Tyne and Wear.

TOBACCO WORKERS' UNION, THE (18,282).—*Sec.*, C. D. Grieve, 9 Station Parade, High Street, Wanstead, E.11.

TRANSPORT AND GENERAL WORKERS' UNION (1,695,818).—*Sec.*, A. M. Evans, Transport House, Smith Square, S.W.1.

TRANSPORT SALARIED STAFFS' ASSOCIATION (64,361).—*Gen. Sec.*, C. A. Lyons, Walkden House, 10 Melton Street, N.W.1.

TRANSPORT UNION, UNITED ROAD (26,400).—*Sec.*, J. Moore, 76 High Lane, Chorlton-cum-Hardy, Manchester 21.

UNIVERSITY TEACHERS, ASSOCIATION OF (33,994).—*Sec.*, L. J. Sapper, United House, 1 Pembridge Road, W.11.

WIRE DRAWERS AND KINDRED WORKERS, THE AMALGAMATED SOCIETY OF (7,037).—*Sec.*, L. Carr, Prospect House, Alma Street, Sheffield 3.

WOOL SHEAR WORKERS' TRADE UNION, SHEFFIELD (29).—*Sec.*, R. Cutler, 50 Bankfield Road, Malin Bridge, Sheffield 6.

WRITERS GUILD OF GREAT BRITAIN (1,897).—*Gen. Sec.*, W. J. Jeffrey, 430 Edgware Road, W.2.

### OTHER TRADE UNIONS

The following Trade Unions were not affiliated to the Trades Union Congress at the time of going to press.

MANAGEMENT AND PROFESSIONAL STAFFS, ASSOCIATION OF.—*Exec. Sec.*, Dr. M. Gillibrand, 175 Station Road, Swinton, Manchester.

PROFESSIONAL ENGINEERS, U.K. ASSOCIATION OF (5,500).—*Sec.*, J. D. Sampson, 32 High Street, Bookham, Leatherhead, Surrey.

PROFESSIONAL FOOTBALLERS' ASSOCIATION (2,160).—*Sec.*, G. Taylor, 124 Corn Exchange Buildings, Manchester 4.

RETAIL BOOK, STATIONERY AND ALLIED TRADES EMPLOYEES' ASSOCIATION, THE (9,771).—*Gen. Sec.*, D. A. Williamson, 7 Grape Street, Shaftesbury Avenue, W.C.2.

## WATER AUTHORITIES

The Water Act 1973, which provided for the reorganization of the water services in England and Wales, resulted in the disappearance of 29 river authorities, 157 water undertakings and 1,393 sewerage and sewage disposal authorities and the creation of ten autonomous multi-purpose water authorities (nine regional authorities in England and the Welsh Water Authority). The Act also created the National Water Council and the Water Space Amenity Commission.

The water authorities are responsible for water supply, water conservation, sewerage and sewage disposal, prevention of river pollution, fisheries, land drainage and the recreational use of their waters. Between them the authorities employ about 62,000 people, have an annual revenue expenditure of some £1,700 million and an investment budget of about £770 million a year.

The National Water Council is the national

consultative and advisory body for the water services and consists of a chairman appointed by the Secretary of State for the Environment, the chairmen of the water authorities and ten other members appointed by the Secretary of State and the Minister of Agriculture, Fisheries and Food.

The Council advises water authorities and the Government on national water policy and promotes and assists the efficient performance by water authorities of their functions.

To undertake this work the Council has divisions dealing with policy and technical development, manpower services, training and education, financial services, information and public relations and a secretariat, together with a fittings testing station at Staines.

†THE NATIONAL WATER COUNCIL, 1 Queen Anne's Gate, London, S.W.1.—*Dir.-Gen.*, P. F. Stott, C.B.E.

### Regional Water Authorities

THAMES WATER AUTHORITY, New River Head, Rosebery Avenue, London, E.C.1.—*Chief Executive*, H. Fish, O.B.E.

SOUTHERN WATER AUTHORITY, Guildborne House, Worthing, Sussex.—*Chief Executive*, B. R. Thorpe.

SEVERN TRENT WATER AUTHORITY, Abelson House, 2297 Coventry Road, Sheldon, Birmingham.—*Chief Executive*, D. A. D. Reeve.

WESSEX WATER AUTHORITY, Wessex House, Passage Street, Bristol.—*Chief Executive*, K. F. Roberts, C.B.E.

ANGLIAN WATER AUTHORITY, Diploma House, Grammar School Walk, Huntingdon.—*Chief Executive*, P. H. Bray.

SOUTH WEST WATER AUTHORITY, 3-5 Barnfield Road, Exeter.—*Chief Executive*, A. G. C. Williams.

NORTHUMBRIAN WATER AUTHORITY, Northumbria House, Regent Centre, Gosforth, Newcastle-upon-Tyne.—*Chief Executive*, W. F. Ridley.

NORTH WEST WATER AUTHORITY, Dawson House, Great Sankey, Warrington.—*Chief Executive*, J. B. Oldfield.

YORKSHIRE WATER AUTHORITY, West Riding House, 67 Albion Street, Leeds.—*Chief Executive*, J. Brooksbank.

WELSH WATER AUTHORITY, Cambrian Way, Brecon, Powys.—*Chief Executive*, Dr. H. H. Crann.

†At the time of going to press the Government announced that the National Water Council was to be abolished.

## INDUSTRIAL RESEARCH ASSOCIATIONS

The following are members of the C.D.R.A., The Federation of Technology Centres, Palace Chambers, Bridge Street, S.W.1.:-

- ASLIB, 3 Belgrave Square, S.W.1.—*Dir.*, Dr. D. A. Lewis.
- ATOMIC ENERGY AUTHORITY, U.K., Bldg. 329, A.E.R.E. Harwell, Oxon.—*Dir.*, *Industrial Research*, Dr. R. G. Sowden.
- BHRA FLUID ENGINEERING, Cranfield, Beds.—*Dir.*, G. F. W. Adler.
- BRICK DEVELOPMENT ASSOCIATION, Woodside House, Winkfield, Windsor, Berks.—*Dir.-Gen.*, Rear-Adm. A. J. Monk, C.B.E.
- BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, c/o Dept. of Textile Industries, The University, Leeds.—*Dir.*, D. I. Fothergill.
- BRITISH CARBONIZATION RESEARCH ASSOCIATION, Research Centre, Wingerworth, Chesterfield, Derbyshire.—*Dir.*, J. P. Graham.
- BRITISH CERAMIC RESEARCH ASSOCIATION, Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, Dr. D. W. F. James.
- BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Northumberland Road, Sheffield 10.—*Dir.*, Dr. E. A. Kellett.
- BRITISH INTERNAL COMBUSTION ENGINE RESEARCH INSTITUTE, 111-12 Buckingham Avenue, Slough, Bucks.—*Dir.*, A. G. Jaquiss.
- BRITISH LEATHER MANUFACTURERS' Research Association, King's Park Road, Moulton Road, Northampton.—*Dir.*, Dr. R. L. Sykes.
- BUILDING SERVICES RESEARCH AND INFORMATION ASSOCIATION, Old Bracknell Lane, Bracknell, Berks.—*Dir.*, P. A. Coles.
- CONSTRUCTION INDUSTRY RESEARCH AND INFORMATION ASSOCIATION, 6 Storey's Gate, S.W.1.—*Dir.*, L. S. Blake, ph.D.
- CRANFIELD UNIT FOR PRECISION ENGINEERING, Cranfield, Beds.—*Dir.* Prof. P. A. McKeown.
- CUTLERY AND ALLIED TRADES RESEARCH ASSOCIATION, Henry Street, Sheffield, 3.—*Dir.*, E. A. Oldfield.
- DROP FORGING RESEARCH ASSOCIATION, Shepherd Street, Sheffield 3.—*Dir.*, S. E. Rogers, ph.D.
- FABRIC CARE RESEARCH ASSOCIATION, Forest House Laboratories, Knaresborough Road, Harrogate.—*Dir.*, E. J. Davies.
- FIRE INSURERS' RESEARCH AND TESTING ORGANISATION, Melrose Avenue, Borehamwood, Herts.—*Dir.*, R. W. Pickard.
- FURNITURE INDUSTRY RESEARCH ASSOCIATION, Maxwell Road, Stevenage, Herts.—*Dir.*, D. M. Heughan.
- HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION (Hatra), Thorneywood, 7 Gregory Boulevard, Nottingham.—*Dir.*, G. K. Mecklenburgh.
- LAMBEG INDUSTRIAL RESEARCH ASSOCIATION (*Linen*), Research Institute, Lambeg, Lisburn, Co. Antrim, N. Ireland.—*Dir.*, H. A. C. Todd, o.B.E..
- MACHINE TOOL INDUSTRY RESEARCH ASSOCIATION, Hulley Road, Hursfield, Macclesfield, Cheshire.—*Dir.*, M. E. Hadlow.
- NATIONAL COMPUTING CENTRE, Oxford Road, Manchester 1.—*Dir.*, D. R. Fairbairn.
- PAINT RESEARCH ASSOCIATION, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—*Dir.*, G. de W. Anderson, ph.D.
- PAPER AND BOARD, PRINTING AND PACKAGING INDUSTRIES RESEARCH ASSOCIATION (*Pira*), Randalls Road, Leatherhead, Surrey.—*Dir.*, N. K. Bridge, ph.D.
- PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN.—*Dir.-Gen.*, Prof. W. B. Heginbotham, o.B.E..
- RUBBER AND PLASTICS RESEARCH ASSOCIATION OF GREAT BRITAIN, Shawbury, Shrewsbury, Shropshire.—*Dir.*, Dr. J. P. Berry.
- SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Road, Kettering, Northants.—*Dir.*, J. G. Butlin.
- SPRING RESEARCH AND MANUFACTURERS' ASSOCIATION, Henry Street, Sheffield 3.—*Dir.*, J. A. Bennett.
- STEEL CASTINGS RESEARCH AND TRADE ASSOCIATION, 5 East Bank Road, Sheffield 2.—*Dir.*, Dr. J. A. Reynolds.
- TIMBER RESEARCH AND DEVELOPMENT ASSOCIATION, Hughenden Valley, High Wycombe, Bucks.—*Dir.*, J. G. Sunley.
- WATER RESEARCH CENTRE, 45 Station Road, Henley-on-Thames, Oxon.—*Chief Exec.*, J. L. van der Post.
- WOOL INDUSTRIES RESEARCH ASSOCIATION (*Wira*), Headingley Lane, Leeds 6.—*Dir.*, B. E. King, ph.D.

The following are members of the Association of Independent Contract Research Organisations (A.I.C.R.O.):—

- ELECTRICAL RESEARCH ASSOCIATION, Cleeve Road, Leatherhead, Surrey.
- FULMER RESEARCH INSTITUTE (*The science and technology of materials*), Stoke Poges, Slough, Berks.
- HUNTINGDON RESEARCH CENTRE (*Biological safety of chemicals and systems*), Huntingdon, Cambs.
- INTERNATIONAL RESEARCH AND DEVELOPMENT (*Engineering, materials technology, applied physics and biotechnology*), Fossway, Newcastle-upon-Tyne.
- INVERESK RESEARCH INTERNATIONAL (*Biomedical safety*), Edinburgh.
- MOTOR INDUSTRY RESEARCH ASSOCIATION, Watling Street, Nuneaton, Warwick.

**RICARDO CONSULTING ENGINEERS** (*Combustion engine technology*), Bridge Works, Shoreham-by-Sea, Sussex.

**ROBERTSON RESEARCH INTERNATIONAL** (*Energy and natural resource exploration and development*), Ty'n-y-Coed, Llanrhos, Llandudno, Gwynedd.

#### AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (*see Index*):—

**Animal Breeding Research Organisation**, West Mains Road, Edinburgh 9.—*Dir.*, J. W. B. King, Ph.D., F.R.S.E.

**Food Research Institute**, Colney Lane, Norwich.—*Dir.*, R. F. Curtis, Ph.D., sc.D.

**Institute of Animal Physiology**, Babraham, Cambs.—*Dir.*, B. A. Cross, C.B.E., Ph.D., sc.D., F.R.S.

**Institute for Research on Animal Diseases**, Compton, Newbury, Berks.—*Dir.*, J. M. Payne, Ph.D.

**Letcombe Laboratory**, Letcombe Regis, Wantage, Oxon.—*Dir.*, J. V. Lake, Ph.D.

**Meat Research Institute**, Langford, nr. Bristol.—*Dir.*, Prof. A. J. Bailey, Ph.D. (also Weston Laboratory, Bridge Road, Weston-super-Mare).

**Poultry Research Centre**, King's Buildings, West Mains Road, Edinburgh 9.—*Dir.*, D. W. F. Shannon, Ph.D.

**Weed Research Organisation**, Begbroke Hill, Sandy Lane, Yarnton, Oxford.—*Dir.*, J. D. Fryer, C.B.E.

**Unit of Invertebrate Chemistry and Physiology**, University of Sussex, Falmer, Brighton.—*Dir.*, Prof. A. W. Johnson, sc.D., F.R.S.

**Unit of Invertebrate Chemistry and Physiology** (Subgroup), University of Cambridge, Zoology Dept., Downing Street, Cambridge.—*Associate Dir.*, J. E. Treherne, Ph.D., sc.D.

**Unit of Nitrogen Fixation**, University of Sussex, Brighton.—*Dir.*, Prof. J. Postgate, F.R.S.

**Unit of Statistics**, University of Edinburgh, 21 Buccleuch Place, Edinburgh 8.—*Hon. Dir.*, Prof. D. J. Finney, sc.D., F.R.S., F.R.S.E.

**Statistics Group, Dept. of Applied Biology**, Pembroke Street, Cambridge.—*Officer in Charge*, J. G. Rowell.

#### GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture and Fisheries for Scotland.

**Animal Virus Research Institute**, Pirbright, Surrey.—*Dir.*, R. F. Sellers, Ph.D.

**East Malling Research Station**, Maidstone, Kent.—*Dir.*, I. J. Graham-Bryce, D.Phil.

**Glasshouse Crops Research Institute**, Worthing Road, Rustington, Littlehampton, Sussex.—*Dir.*, D. Rudd-Jones, C.B.E., Ph.D.

**Grassland Research Institute**, Hurley, nr. Maidenhead, Berks.—*Dir.*, Prof. A. Lazenby, Ph.D.

**Hannah Research Institute**, Ayr.—*Dir.*, M. Peaker, Ph.D.

**Hill Farming Research Organisation**, Bush Estate, Penicuik, Midlothian.—*Dir.*, J. Eadie.

**Hop Research Centre**, Wye College, Ashford, Kent.—*Dir.*, R. A. Neve, Ph.D.

**Houghton Poultry Research Station**,\* Houghton, Huntingdon.—*Dir.*, P. M. Biggs, Ph.D., F.R.S.

**John Innes Institute**, Colney Lane, Norwich.—*Dir.*, Prof. H. W. Woolhouse, Ph.D., F.R.S.C.

**Long Ashton Research Station**, Bristol.—*Dir.*, Prof. J. M. Hirst, D.Sc., Ph.D., F.R.S.

**Macauley Institute for Soil Research**, Craigiebuckler, Aberdeen.—*Dir.*, Prof. T. West, Ph.D., D.Sc.

**Moredun Institute**, 408 Gilmerton Road, Edinburgh.—*Dir.*, W. B. Martin, Ph.D.

**National Institute of Agricultural Engineering**, Wrest Park, Silsoe, Bedford.—*Dir.*, R. L. Bell, Ph.D.

**Scottish Institute of Agricultural Engineering**, Scottish Station, Bush Estate, Penicuik, Midlothian.—*Dir.*, D. P. Blight, Ph.D.

**National Institute for Research in Dairying**, Shinfield, nr. Reading.—*Dir.*, J. W. G. Porter, Ph.D.

**National Vegetable Research Stn.** Wellesbourne, Warwick.—*Dir.*, Prof. J. K. A. Bleasdale, Ph.D.

**Plant Breeding Institute**, Maris Lane, Trumpington, Cambridge.—*Dir.*, P. R. Day, Ph.D.

**Rowett Research Institute**, Bucksburn, Aberdeen.—*Dir.*, Sir Kenneth Blaxter, D.Sc., F.R.S.

**Rothamsted Experimental Station**, Harpenden, Herts.—*Dir.*, Sir Leslie Fowden, Ph.D., F.R.S.

**Scottish Crop Research Institute**, Invergowrie, Dundee.—*Dir.*, C. E. Taylor, Ph.D., F.R.S.E.

**Welsh Plant Breeding Station**, Plas Gogerddan, nr. Aberystwyth.—*Dir.*, Prof. J. P. Cooper, Ph.D., D.Sc., F.R.S.

\*Financed jointly by the Agricultural Research Council and the Animal Health Trust.

## PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The 96 estates listed alphabetically below represent the principal charitable bequests published since the last edition of the Almanack. The list contains the usual preponderance of female benefactors—exactly double their male counterparts. The precise amount left to the charities cannot be ascertained, since legacies, legal expenses and other charges have to be deducted from the gross figures given.

By far the largest single charitable bequest was the residue of the £21 million estate of Henry Bankes, which was left to the National Trust. It included Corfe Castle, the stately home Kingston Lacy and one of the finest private art collections in Britain. The Trust were also bequeathed the Island of Welltrog, in the Menai Straits, under the Will of Dr. Ernest Benn, of Anglesey.

Among the many medical bequests was the £100,000 left to the Arthritis and Rheumatism Council by Dorothy Eden, the New Zealand-born authoress. The Council were also left the residue of the £200,000 estate of Lilian Pigott, of Oxford. The millionaire Robert Gardner, of Manchester, left the residue of his estate to the Manchester Area Health Authority, for cancer research.

The pianist and accompanist Ivor Newton left the residue of his £500,000 estate to the Musicians Benevolent Fund. Marjorie Deakin, of Haslemere, left part of the residue of her £250,000 estate to the London Orchestral Concert Board and the Royal Opera House, Covent Garden. The National Youth Orchestra received £7,200 under the Will of James Thompson, who left the residue of his £500,000 estate to provide scholarships at Radley College.

Herbert Blgrave, the Wiltshire racehorse owner, breeder and trainer, and Suzanne Beadle, of London, both left the residue of their estates (over £3 million and £1 million respectively) for charitable purposes to be decided by their Trustees. Half the residue of the £1 million estate of Jocelyn Albright was left similarly for old people's charities, with the National Trust receiving the other half. Winifred Enefer left all her £145,000 estate to Teignmouth Old People's Welfare Committee, and the League of Welldoers in Liverpool received over £150,000 from the Will of Aiden Dey, of Anglesey.

Canterbury Cathedral received the residue from two estates—those of Marjorie Spence, who lived in the Cathedral Precinct, and Stanley Slater, who lived near Margate. Each left over £100,000. The Church Commissioners received half the £157,000 estate of Daniel Mortimore, a retired shipwright of Southsea, Hants., for the renovation of cathedrals and maintaining choirs. Three churches each received large bequests. Arthur Winch, of Reading, left all his £180,000 estate to the nearby parish church at Earley. Newchurch Church in the Isle of Wight benefitted from the residue of Francis Fisk's £127,000 estate. An Australian Priscilla Foster left half her £106,000 English estate to St. Michael's Church, Northampton. Margaret Le Mee-Power, of London, left the bulk of her £461,000 estate to Archbishop Basil Hume, for underprivileged or handicapped children's charities of his selection.

Miss Jocelyn Beaumont Albright, of Finstall, Bromsgrove, Worcs. . . . . £1,039,969  
(Half the residue to the National Trust, and half for such charities for helping or housing old people as her Trustees think fit)

Mr. Henry Anderson, of St. Albans, Herts. £306,602  
(£10,000 each to the Cancer Research Campaign, Crusade of Rescue Society, Southwark Roman Catholic Diocese, and Southwark Catholic Children's Society, £5,000 each to St. Joseph's Hospice, London E.8., and the Church of St.

Alban and Stephen, St. Albans, £2,000 to St. Albans City Hospital, and the residue to Oxfam)

Mary Sollory Anderson, of Clifton, Bristol. £166,345  
(The residue equally between the National Trust, for the purchase of a farm or fell land in the Lake District, and the Historic Churches Preservation Trust)

Mr. Henry John Ralph Bankes, of Kingston Lacy, Dorset. . . . . £21,563,179  
(The residue to the National Trust)

Miss Constance Mary Baxter, of Grange over Sands, Cumbria. . . . . £185,012  
(Four fifths of the residue to the Yehudi Menuhin School of Music, and a fifth of the residue equally between the R.S.P.B., R.N.L.L., International League for the Protection of Horses, Guide Dogs for the Blind Association and Age Concern)

Mrs. Suzanne Beadle, of London S.W.1. . . £1,124,384  
(The residue for such charitable purposes as her Trustees decide)

Mrs. Doris Graham Bell, of Gosforth, Newcastle upon Tyne. . . . . £191,575  
(£1,000 to the Marie Curie Memorial Foundation, and the residue to the Abbeyfield Society, for their residents in the Newcastle upon Tyne district)

Mrs. Olive Mary Susanna Bell, of Llantwit Major, South Glamorgan. . . . . £184,269  
(£20,000 to Llanmaes Church, Llantwit Major, and the residue to the R.S.P.C.A., £10,000 to be spent on their work in South Glamorgan)

Dr. Ernest Christopher Benn, of Menai Bridge, Anglesey. . . . . £552,671  
(The island of Welltrog in the Menai Straits to the National Trust)

Mrs. Lilian Ivy Beatrice Berkin, of Wimborne, Dorset. . . . . £421,094  
(The residue to the Royal Agricultural Benevolent Institution)

Mr. Cyril Charles De Albuquerque Birch, of Surbiton, Surrey. . . . . £250,867  
(£5,000 to the British Dental Association Benevolent Fund, and the residue equally between the British Dental Association, Help the Aged, P.D.S.A., Blue Cross, Guy's Hospital Medical School and the Phyllis Tuckwell Memorial Hospice, Farnham)

Mr. Walter Bird, of Sutton Coldfield, West Midlands. . . . . £681,235  
(£100,000 to the Cancer Research Campaign)

Miss Edna Louise Black, of Teddington, Middlesex. . . . . £492,163  
(The residue to the Edna Black Charitable Trust)

Mr. Herbert Henry Gratwicke Blgrave, of Beckhampton, Wilts. . . . . £3,168,449  
(The residue for such charitable purposes as his Trustees select)

Mr. Ronald Scott Lawrance Bowker, of Winchester, Hants. . . . . £767,041  
(A third of the residue each to the Royal Masonic Hospital and Royal Masonic Benevolent Institution, and a sixth of the residue each to the Solicitors' Benevolent Association and the R.A.F. Benevolent Fund)

Mrs. Anne Mamie Bowser, of Birkdale, Merseyside. . . . . £777,151

(The residue equally between Age Concern and the Cancer Research Campaign)
- Dame Frances Amelia Yates, of Claygate, Surrey. . . . . £237,200  
(The residue to the Warburg Institute)

## LIFE ASSURANCE AND GENERAL INSURANCE

## BRITISH INSURANCE COMPANIES IN 1981

Excess capacity in world markets forced rates down and significantly worse overseas underwriting results were produced by Insurance Companies in 1981. Although the UK account performed comparatively well, severe weather conditions resulted in high claims both at home and abroad. Overseas losses were larger in terms of sterling because of exchange rate movements. For the same reason, growth in premium income and investment earnings was greater than it would otherwise have been.

The underwriting loss on worldwide general business was £612.6m (6.7% of premiums), compared with £338.8m (4.4% of premiums) in the previous year. Premium income (including reinsurance and three year account business) increased by 18.2% to £9,631m.

Income on general insurance invested assets rose by £304.0m to £1,435.0m, producing a net surplus of £822.4m against £792.2m in the previous year.

There was a 16.8% rise in general insurance invested assets, which stood at £15,837m at the end of the year.

benefited from a 24% decrease in the estimated cost of fire damage at £356.6m for 1981. This was due to reduced economic activity in most sectors and the absence of mammoth fires such as the two fires that in 1980 together caused damage of over £100m.

## United States

Competition in this important market remains fierce and there was an 8% underwriting loss on general business premiums of £1,797m. The growth in premium income of almost 40% in sterling terms was due to a considerable degree to movements in rates of exchange.

## Rest of the World

Total premiums, at £2,441 m increased by 16.7%. Results in major territories were unsatisfactory, as shown by the 15.2% underwriting loss, which compares with a 1980 loss of 8.6%.

## Overseas Earnings

Insurance companies derived 50% of general premium income (including marine, aviation and transport business) from their operations overseas, enabling a substantial contribution to be made to UK foreign currency earnings. Insurance activities, comprising companies, Lloyd's and brokers, produced invisible earnings of £860m in 1980, the latest published figure. For many years, the insurance industry has consistently been responsible for between 40% and 50% of the total of the invisible earnings of all financial institutions.

## Investments

Income from invested assets in respect of general business increased by 26.9% and by 15.7% for long-term business.

Invested assets relating to long-term insurance totalled £62,496m at market values at 31st December 1981 and £15,837m for general business.

NOTE: Insurance company figures refer to British Insurance Association members who transact some 95% of the worldwide business of the British insurance company market.

## RESULTS IN MAJOR TERRITORIES

## United Kingdom

Motor premium income increased by only 8.5%, reflecting competitive pressures. With benefits still coming through to earned premiums from previous years, the underwriting loss reduced to £9.2m (0.5% of premiums) from £59.0m (3.8% of premiums) in 1980. Claims frequency over the year remained at 1980 levels, but the average cost of a private motor claim rose by rather more than 10%, reflecting increases (ranging from 5% to 16%) in the cost of spare parts, garage rates and car prices and higher court awards for injuries.

Fire and accident business showed a loss of £39.7m (1.5% of premiums) against a loss of £7.8m (0.3% of premiums) in 1980. Household business was hit by weather claims and by a further 40% increase in the cost of domestic theft claims, which totalled £105.7m. The commercial fire account however

## LLOYD'S OF LONDON

Lloyd's of London is a society of private underwriters who provide an international market for almost any type of insurance. Ships, aircraft, oil rigs, cargo of all descriptions, motor cars, civil engineering projects, fire, personal accident and third party liability are a few random examples of the everyday risks placed at Lloyd's which bring some £3,000 million of premiums to underwriters each year. Some three-quarters of this business comes from outside Great Britain and makes a valuable contribution to the country's balance of payments.

Today, as it was three centuries ago, a policy is subscribed at Lloyd's by private individuals with unlimited liability. Now that Lloyd's members are numbered in their thousands, however, the method of underwriting is the same only in principle. The merchant of the past, signing policies in a coffee house as a sideline to his main business, has long since given way to the specialist underwriter who accepts risks at Lloyd's on behalf of members grouped in a syndicate. There are currently over 400 syndicates of varying sizes, some with over a thousand names and each managed by a full-time underwriting agent.

Lloyd's membership today is drawn from many

sources. Industry, commerce and the professions are strongly represented while many members are actively engaged at Lloyd's either on the broking or the underwriting side.

Underwriting membership of Lloyd's is open to men and women of any nationality provided that they meet the stringent financial requirements of the Society, or Corporation, of Lloyd's. Assets of between £50,000 and £300,000 have to be shown and a deposit lodged with the Corporation as security for underwriting liabilities. This deposit, which must be in the form of approved securities, is determined at 25% of the member's annual premium income.

Lloyd's syndicates have no direct contact with the public. All business is transacted through some 270 firms of insurance brokers accredited by the Corporation of Lloyd's.

Lloyd's also provides the most comprehensive shipping intelligence service available in the world. The enormous volume of shipping and other information received from Lloyd's Agents, shipowners, news agencies and other sources throughout the world, is collated and distributed to newspapers, radio and television services, as well as to the maritime and commercial communities in general.

This information is compiled, edited and published by a subsidiary company, Lloyd's of London Press Ltd., and sent all over the world. "Lloyd's List" is London's oldest daily newspaper and contains news of general commercial interest as well as shipping

information. "Lloyd's Shipping Index", also published daily, lists some 20,000 ocean-going vessels in alphabetical order and gives the latest known report of each.

## LIFE ASSURANCE IN 1981

New yearly premiums for life assurance and annuities increased in 1981 by 17% to £1,990 million and single premiums by 67% to £1,070 million. New sums assured rose by 14.4% to £57,900 million and new annuities by 3.7% to £1,690 million per annum. The following figures include all forms of life assurance and annuities, including linked life assurance and occupational pension and life assurance schemes in the United Kingdom.

	1981 £m	1980 £m
New yearly premiums	1,990	1,700
Single premiums and considerations for immediate and deferred annuities	1,070	639
Benefits secured by these premiums		
New sums assured	57,900	50,600
New annuities, deferred and immediate	1,690 p.a.	1,630 p.a.

## HOME SERVICE INSURANCE IN 1981

The following figures are based on returns from 19 "home service" insurance offices, which together transact over 99% of industrial (collected premium) life business. While they, unlike all other insurers, transact industrial life business, they also carry on a very substantial volume of ordinary life and general insurance, much of it in policyholders' homes.

	1981 £m	1980 £m
<i>Industrial Life Business</i>		
1. Premium Income	950.0	883.8
2. Investment Income (Gross)	556.9	504.9
3. Industrial Assurance Fund as at the end of the year (after transfers to and from investment reserves etc.)	5,152.8	4,605.2
4. New Business:		
(a) New Sums Assured	3,504.9	3,320.3
(b) New Premiums per annum	210.3	207.4
5. Payments to policyholders:		
(a) On death	143.1	134.6
(b) On maturity	264.1	228.1
(c) On surrender	209.5	149.2
<b>TOTAL</b>	<b>616.7</b>	<b>511.9</b>

POLICYHOLDERS PROTECTION BOARD  
Aldermay House, Queen Street, London E.C.4

The Policyholders Protection Act 1975 put into effect the scheme whereby private policyholders of companies in liquidation will normally be granted 90 per cent (100 per cent in the case of compulsory insurance) of the benefits promised under their policies. The scheme will be financed mainly by a compulsory levy on insurance companies limited to a maximum of 1 per cent of their annual net premium income. The Board consists of five members, of whom three are drawn from the management of insurance companies and at least one must be qualified to represent the interests of policyholders.

## THE LIFE ASSURANCE COMPANIES

The list on the following pages contains the names of all the more important British life offices, and of Commonwealth offices (marked C) which transact life business in this country.

*Class of business.* The second column shows whether the company is conducted on the mutual system whereby the whole of the divisible profit is allotted to participating policyholders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profits received (P). Life offices transacting other business are marked (O) in this column. In such cases the life funds are kept separately, and are not liable for the claims of other departments. The share capital is usually liable for the claims of all branches. Those having an industrial branch are indicated by letter (I).

*Figures.* These are taken from the latest annual accounts available at date of going to press and in the majority of cases refer to annual reports for the financial year ended December 31, 1981.

*Life funds.* The amounts of these funds, though of interest, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actually compared with assets.

*Premium income.* The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risk.

*Consideration for annuities.*—These are the amounts received to provide various types of annuities.

*Interest.*—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source bonus declaration. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

*Valuation.*—The valuation returns which are required to be made by the companies to the Department of Trade and Industry indicate liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used) and that interest will be earned at a certain rate. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case

of an office which has adopted a Bonus Reserve Valuation.

*Types of policy.*—Although there are scores of life offices in Britain each offering their own particular products under a wide variety of labels, there are really only four basic types of contract. These are:

1. "Term" assurance (sometimes called "temporary" assurance). With this type of policy the assurer, in return for a regular premium agrees to pay the sum assured if the person assured should die within the term of years stated by the policy.

Such policies take care of the temporary need for protection of the family while the children are growing up, and the family is therefore most vulnerable. The commonest and most popular forms are to cover the mortgage on the family home or to assume a regular tax-free income for the family over so many years should the breadwinner die. This is much the cheapest form of life assurance because the majority of policies invariably do not result in claims.

2. "Whole-life" assurance is one under which the assurer undertakes to keep the assurance in force provided the premiums are paid for the whole life of the assured. They will then pay the agreed sum

whenever death takes place. This costs a good deal more than term, naturally. All policies end in claims.

3. "Endowment" assurance. This contract really is one which uses a fund for saving to a particular target sum by a particular future date and at the same time secures payment of the sum assured should the saver die before that date arrives. In return for the continued payment of a regular premium over a fixed number of years, the assurer agrees to pay the sum assured at the end of that time, or earlier if the assured person should die. The bulk of an endowment assurance premium is savings; consequently the premium of such a contract is a lot higher than that for a whole life assurance.

4. "Annuities". Life assurance can be divided broadly speaking into death or survival benefits. Death benefits are paid to a policyholder's dependants if and when he dies. Survival benefits are paid to the policyholder himself either in the form of a cash sum when he reaches a certain age or in the form of a guaranteed annual income for life, which is known as an annuity. Pensions are annuities of a kind and a very large proportion of the pensions due to people are being and will be paid by funds run by life offices.

Number of transactions (including social security payments), millions ...	280	311

### THE LONDON CLEARING BANKS

#### Committee of London Clearing Bankers (1821), 10 Lombard Street, E.C.3

The Committee consists of the Chairmen of Barclays, Coutts, Lloyds, Midland, National Westminster, and Williams & Glyn's and meets regularly to discuss matters of common interest. It is the body through which the Bank of England communicates official policy to the banks and through which the banks may present their views to the Bank of England and the Treasury.

*Secretary-General*, L. W. Priestley.

#### Bankers' Automated Clearing Services, Ltd. 3 De Havilland Road, Edgware, Middlesex

Bankers' Automated Clearing Services is wholly owned by the five largest clearing banks. Its function is to accept transactions recorded on magnetic media, check, merge and sort them and distribute them to the 12 sponsoring banks. Nearly all standing orders are interchanged through BACS, as are direct debits originated by non-banking organizations for payments of rates, insurance premiums, hire purchase payments etc, and automated credit transfers. Credits are also received on magnetic media, mainly for payment of salaries and pensions.

A direct telecommunications service, linking users direct to BACS will be available in 1983.

*Managing Director*, D. J. Pyne.

#### Bankers' Clearing House 10 Lombard Street, E.C.3

The Clearing System came into being in London during the second half of the 18th century and the London Bankers' Clearing House has served as a pattern for the Clearing Houses that have been established since throughout the world.

Two Cheque Clearings are operated each business day. The Town Clearing enables cheques of £10,000 and over to be cleared the same day, provided that such cheques are paid into and drawn on one of the hundred Clearing Bank branches, designated as Town Clearing branches, situated within a half-mile radius of the Clearing House. The General Clearing handles cheques which cannot be passed through the Town Clearing. On an average day, 6,000,000 cheques with a total value of £21,800 million are exchanged and paid through these two clearings. Inter-branch clearings are dealt with separately by each Bank.

A Credit Clearing is also operated. The daily average for this clearing, including work passed through the Bankers' Automated Clearing Service, is 1,800,000 items with a total value of £612 million.

At the end of the day each bank works out the net balance resulting from its transactions in that day's Town Clearing, the previous day's General Clearing and Credit Clearing and B.A.C.S. output and such differences as need to be adjusted. This net balance is either credited to or deducted from the bank's own account at the Bank of England.

*Chief Inspector*, E. W. Stubbs.

*Deputy Inspector*, G. E. Springall.

#### British Bankers' Association 10 Lombard Street, E.C.3

The Association provides a means of communication and consultation for the banking industry in this country. Membership is open to institutions accepted as banks by the Bank of England—over 300. The Association is a member of the E.C. Banking Federation.

*Secretary-General*, M. C. Swift, M.C.

†Gifts of special money distributed by the Sovereign annually on Maundy Thursday to the number of aged poor persons corresponding to the Sovereign's own age.

Gold Coin.—Gold ceased to circulate during the First World War. An Order of April 27, 1966, made it illegal for U.K. residents to continue holding more than 4 gold coins minted after 1837, or to acquire such coins unless they had been licensed as genuine collectors by the Bank of England. This Order was revoked on April 1, 1971, by the Exchange Control (Gold Coins Exemption) Order, 1971, whereby residents of the United Kingdom, Channel Islands and the Isle of Man may freely buy and sell and hold gold coins.

The 1971 Order was revoked on April 15, 1975, by the Exchange Control (Gold Coins Exemption) Order, 1975. Under this Order Section 1 of the Exchange Control Act 1947 (which prohibits dealings in gold or foreign currency except with Treasury permission) was exempted for gold coins minted in or before 1837. The import of gold coins minted after 1837 was prohibited except by authorised dealers in gold with individual import licences from the Department of Trade, and dealing between other U.K. residents was restricted to coins already held in the U.K.

Under an amendment, dated December 16, 1977, the exemptions contained in the 1975 Order were extended to cover gold coins minted in or before 1937.

The 1975 controls over the import of and dealing in gold coins were abolished on June 13, 1979 under the Exchange Control (Gold Coins Exemption) Order 1979, and gold coins, with certain exceptions,\* may now be imported and exported without restriction.

On April 1, 1982 the Government introduced VAT (currently 15 per cent) on sales of all gold coin.

Silver.—Prior to 1920 our silver coins were struck from standard silver—an alloy of which 925 parts in 1,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. From January 1, 1947 all "silver" coins, except Maundy money, have been struck from cupro-nickel—an alloy of copper 75 parts and nickel 25 parts. Maundy coins since 1947 have been struck from standard silver.

Bronze, introduced in 1860 to replace copper, is an alloy of copper 97 parts, zinc 2½ parts and tin ½ part. These proportions are subject to slight variation.

The "Remedy" is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Mint.

\*Gold coins which are more than fifty years old and valued at a sum in excess of £8,000 cannot be exported without specific authorization from the Department of Trade.

Legal tender of coin.—Gold, dated 1838 onwards, if not below least current weight, is legal tender to any amount. Since Decimal Day (Feb. 15, 1971) cupro-nickel (silver) coins with values up to and including the 10p have been legal tender up to £5. The 50p coin has been legal tender up to £10 from the date of its introduction. Bronze coins are legal tender for amounts up to 20p. Farthings ceased to be legal tender on December 31, 1960, the halfpenny on August 1, 1969, the halfcrown on January 1, 1970, the threepence and penny on August 31, 1971, and the sixpence on June 30, 1980.

With the introduction of the 20p coin on June 9, 1982, the Royal Mint has dropped the 'new' in 'new pence' displayed on coins since 1971.

## BANK NOTES

Bank of England notes are currently issued in denominations of £1, £5, £10, £20 and £50 for the amount of the Fiduciary Note Issue, and are legal tender in England and Wales. Only £1 notes are legal tender in Scotland and Northern Ireland.

The old white notes for £10, £20, £50, £100, £500 and £1,000, which were issued until April 22, 1943, ceased to be legal tender in May 1945.

The old white £5 notes dated up to September 20, 1956, the £5 notes issued between 1957 and 1963, bearing a portrait of Britannia and the first series to bear a portrait of the Queen, issued between 1963 and 1971, ceased to be legal tender on March 14, 1961, June 27, 1967 and September 1, 1973 respectively. The series of £1 notes issued during the years 1928 to 1960 and the 10s. notes of the same type issued from 1928 to 1961—those without the royal portrait—ceased to be legal tender on May 29 and October 30, 1962 respectively. The £1 note first issued in March 1960 (bearing on the back a representation of Britannia) and the £10 note first issued in February 1964 (bearing a lion on the back) both bearing a portrait of the Queen on the front ceased to be legal tender on June 1, 1979. The 10s. note was replaced by the 50p coin in October 1969, and ceased to be legal tender on November 21, 1970. Bank notes which are no longer legal tender are payable when presented at the Head Office of the Bank of England in London.

The first of the current series of Bank notes was a £20 note issued on July 9, 1970. This was followed by the £5 note on November 11, 1971, £10 note on February 20, 1975, £1 note on February 9, 1978 and £50 note on March 20, 1981. The predominant identifying feature of each note is the portrayal on the back of a prominent figure from Britain's history namely, £1: Sir Isaac Newton; £5: The Duke of Wellington; £10: Florence Nightingale; £20: William Shakespeare; and £50: Sir Christopher Wren.

Note circulation is highest at the two peak spending periods of the year—around Christmas and during the summer holiday period. On December 22, 1981, a peak of £11,967 million was reached, 31% up on a year earlier.

The proportion of the total value of notes in circulation of £1 and £5 notes at end-February 1982 compared with the previous year, fell from 6.5% and 32.4% to 6.1% and 28.8% respectively; whereas £10 notes increased from 39.2% to 40% and £20 notes from 16.3% to 17%. The £50 note introduced in March 1981 accounted for 2.5%.

On February 26, 1982 the values of notes in circulation were; 10/-: £6,303,306; £1: £657,012,979; £5: £3,097,086,910; £10: £4,298,119,510; £20: £1,832,707,080; £50: £274,086,250.

Other Bank Notes.—Bank notes are issued by three Scottish banks. The Royal Bank of Scotland and the Bank of Scotland issue notes for £1, £5, £10, £20 and

£100. The Clydesdale Bank issues notes for £1, £5, £10, £20, £50, £100. Scottish notes are not legal tender, but in Scotland they enjoy a status equal to that of the Bank of England note.

Channel Islands and the Isle of Man.—The states of Jersey and Guernsey issue notes for £1, £5, £10 and £20. The Government of the Isle of Man issues notes for 50p, £1, £5, £10 and £20. These are legal tender only in their respective islands.

Although none of the series of notes specified above

is legal tender in the United Kingdom they are generally accepted by the banks irrespective of their place of issue. At one time the banks made a commission charge for handling Scottish and Irish notes but this was abolished some years ago.

The Channel Islands and the Isle of Man also issue their own coinage. The states of Jersey and Guernsey issue coins for ½p, 1p, 2p, 5p, 10p, 20p, 50p, £1 and £2. The Isle of Man issues coins for ½p, 1p, 2p, 5p, 10p, 20p, 50p, £1 and £5.

Denomination	Metal	Standard Weight (grams)	Standard Diameter (centimetres)
Halfpenny	bronze	1.78200	1.7145
Penny	bronze	3.56400	2.0320
2 pence	bronze	7.12800	2.5910
5 pence	cupro-nickel	5.65518	2.3595
10 pence	cupro-nickel	11.31036	2.8500
20 pence	cupro-nickel	5.0	2.14
25p Crown	silver	28.27590	3.8608
25p Crown	cupro-nickel	28.27590	3.8608
50 pence	cupro-nickel	13.5	3.0

*Note:* The Royal Mint has announced their intention to introduce a £1 coin in April 1983. The coin will be yellow in colour, copper, nickel and zinc in composition, 9.5 grams in weight and 2.25 centimetres in diameter.

## THE STOCK EXCHANGE IN THE UNITED KINGDOM AND IRELAND

Broker Members of the Stock Exchange buy and sell shares for members of the public. This is done for individual investors, for their advisers such as bank managers, solicitors and accountants, and for investing institutions like insurance companies, pension funds, unit trusts and merchant banks. For this the stockbroker is paid a fixed scale of commission based on the value of the securities purchased. In addition to this service, brokers advise their clients, according to their particular circumstances and needs, on how to invest their money to greatest advantage. In addition, they will undertake to review periodically the portfolios of their clients.

The Stock Exchange provides facilities for raising capital for industry. Any Broker will give advice on how a company can finance its growth by getting a listing. For companies already listed, other methods are possible—such as rights issues and debenture or loan stocks—for obtaining additional funds. Brokers' advice is also available to industrialists on matters such as mergers and acquisitions.

All listed British companies are incorporated under the Companies' Acts, which contain stringent regulations for their management and control. They are limited liability companies, which means that if you are a shareholder in such a company you cannot be called upon to pay any part of its debt or liabilities if it gets into difficulties, unless, in quite exceptional cases, you are a holder of partly-paid shares, in which event your liability is limited to the amount required to make the shares fully paid. The Stock Exchange serves investors, whether inexperienced or expert, big or small, and the authorities of the Stock Exchange insist on compliance with stringent regulations to ensure that the public are fully informed of the constitution and record of every company whose securities are admitted to the market.

In London the foundation stone of the building was laid in 1801, but the building was almost entirely reconstructed in 1854 from the designs of Thomas Allason. The Stock Exchange has now been rebuilt as a large tower block, 331 feet high with a new Trading Floor to the west of the block.

There are other Trading Floors in Liverpool, Birmingham, Glasgow, Belfast and Dublin.

The Stock Exchange provides a market for the purchase and sale of about 7,200 securities valued at over £455,994,600,000, and also securities listed on overseas Exchanges. At present, the Members of the Stock Exchange, consisting of Brokers (agents for clients) and Jobbers (dealers as principals in specific securities), number about 4,000.

### The Stock Exchange

*Chairman*, Sir Nicholas Goodison; *Deputy Chairmen*, P. B. Mitford-Slade; C. R. J. Eglington; *Chief Exec.*, J. R. Knight.

### Administrative Units

The Stock Exchange, London, E.C.2; Stock Exchange, Margaret Street, Birmingham; Stock Exchange, Norfolk Street, Manchester; Stock Exchange, 69 St. George's Place, Glasgow; Stock Exchange, 28 Anglesea Street, Dublin 2; Stock Exchange, Northern Bank House, 10 High Street, Belfast.

COUNCIL FOR THE SECURITIES INDUSTRY, 20th Floor, The Stock Exchange Building, E.C.2.—Sec. M. J. Fuggle.

## FRIENDLY SOCIETIES—GREAT BRITAIN

Act 1974

Friendly societies are mutual insurance societies in which the members subscribe for provident benefits, in particular sickness, death, endowment and old age benefits. Those friendly societies that are known as "collecting societies" because they collect members' premiums for life assurance by house-to-house visits of collectors or agents are subject to the provisions of the Industrial Assurance Acts as well as the Friendly Societies Act. The totals in ordinary type in the table below relate to registered friendly societies proper (including both centralized societies and the Orders with their branches); those in italics relate to collecting societies.

End of Year	No. of Societies on Register		Member-ship	Assurances or Policies	Total Funds	
					Thousands	£000
1980 .....	4,242	44	3,617	20,973	534,784	877,246
1938 .....	19,600	149	8,491	25,738	151,613	84,837
1913 .....	25,475	71	6,783	7,481	51,489	11,165

The first column headed "No. of Societies on Register" in the above table includes (for 1980) 424 societies without branches and 27 societies with branches ("Orders"), the remainder being the separately registered branches of the Orders.

Most friendly societies continue to provide the customary benefits in sickness and at death. During 1980 Friendly Societies without branches paid out £5.7 millions in sickness benefit and £25.4 millions in death benefit.

As compared with the previous year the number of societies without branches decreased in 1980 by 24 and the number of branches by 194. Total membership fell slightly to just over 3.6 millions.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

Long before the term "Friendly Society" came into use, the seeds of voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution to insure relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the oldest, operating in Scotland, being the "Incorporation of Carters in Leith" established as long ago as 1555.

The first Act for the encouragement and protection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration or sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The Friendly Societies Act 1974, which came into force in April, 1975, consolidated the nine Acts which comprised the Friendly Societies Acts 1896 to 1971 and a few other minor enactments relating to societies to which those Acts applied. The Act allows various specific classes other than "Friendly Societies" to be registered thereunder, but tax exemption (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

An indication of the variety of organizations registered under the Act and the principal statistics at the end of 1980 are given in the table below.

	Friendly Societies (a)	Collecting Societies	Benevolent Societies	Working Men's Clubs	Special Authorised Societies		Other
					Loan	Others

## INDUSTRIAL AND PROVIDENT SOCIETIES—GREAT BRITAIN

Acts 1965-1978

The familiar "Co-op" societies are amongst the wide variety which are registered under the Industrial and Provident Societies Act 1965. This consolidating Act, which like the Friendly and the Building Societies Act is administered by the Chief Registrar of Friendly Societies, provides for the registration of societies and lays down the broad framework within which they must operate. Internal relations of societies are governed by their registered rules.

Registration under the Act confers upon a society corporate status by its registered name with perpetual succession and a common seal, and limited liability. A society qualifies for registration if it is carrying on an industry, business or trade, and it satisfies the Registrar that either (a) it is a bona fide co-operative society or (b) in view of the fact that its business is being, or is intended to be, conducted for

the benefit of the community there are special reasons why it should be registered under the Act rather than as a company under the Companies Act.

Registration of a new class of society under the 1965 Act was introduced in Great Britain by the Credit Unions Act 1979 which also lays down supervision requirements. A similar framework of law for credit unions has existed in Northern Ireland since 1969.

During 1980 the number of registered societies increased by 272 to 9,664. The largest single group was the 3,808 housing societies, but the largest group in terms of turnover was that consisting of the retail, wholesale and productive societies which includes the "co-ops" with sales in 1980 of £3,447 million and the Co-operative Wholesale Society Limited with 1980 sales of £1,756 million. The principal statistics at the end of 1980 are given in the table below.

	Retail	Wholesale and Productive	Social and Recreational Clubs	General Service	Housing	Agricultural	Fishing	Total
Number of Societies	270	150	3,664	561	3,808	1,055	99	9,664
Number of Members	000's 9,753	000's 153	000's 2,531	000's 529	000's 156	000's 418	000's 8	000's 13,558
Funds of Members	£000's 517,324	£000's 290,952	£000's 82,996	£000's 1,225,036	£000's 1,680,249	£000's 130,624	£000's 2,386	£000's 3,930,336
Total Assets	£000's 1,128,068	£000's 599,768	£000's 133,653	£000's 1,509,349	£000's 3,905,728	£000's 304,929	£000's 6,614	£000's 7,589,274

## BUILDING SOCIETIES—GREAT BRITAIN

Act 1962

Building Societies are registered under the Building Societies Act 1962, which is administered by the Chief Registrar of Friendly Societies. The registered rules and annual returns and accounts which societies are required to submit to him are open to public inspection, with other relevant documents, at the Registry.

The number of building societies declined from 273 at the end of 1980 to 251 at the end of 1981. Nineteen societies merged with others during the year compared with eleven in 1980. Total assets of societies increased by nearly 15% in 1981 to stand at £61,809 million at the end of the year.

Interest rates began to fall during the first half of 1981 and by March the recommended mortgage rate had been reduced from 15% to 13%. However, interest rates moved upwards in the autumn and the mortgage rate was increased to 15% in October, where it remained until March 1982 when it was reduced to 13.5%. Subsequent interest rate movements led to a further reduction, to 12%, in August 1982. The banks increased mortgage lending activity during 1981, and in a weak mortgage market competition for lending developed with many societies abandoning differential mortgage rates whilst some began advertising for mortgage business and liberalising their lending policy.

The competition which building societies faced in the savings market in 1981 was predominantly from national savings rather than the clearing banks. Building societies maintained their share of the liquid savings market whilst national savings gained at the expense of the banks. Shares and deposits

increased by £7,059 million during the year, but over half the increase was explained by interest credited to accounts.

Under sections 48 and 51 of the Building Societies Act 1962 the Chief Registrar, with Treasury consent, exercises power of control over the activities of building societies. Under section 55 there is further power to control in relation to small societies.

On April 18, 1978 an order under section 48 was made in respect of the Grays Building Society after irregularities came to light. It soon became apparent that the deficiencies involved were of the order of £7 million. This was without question the most serious deficiency which has ever come to light in the affairs of any building society. The interests of investors were protected by a rescue operation involving a compensation fund to which other societies contributed and the eventual transfer of the Grays to the Woolwich Building Society. Inspectors appointed to investigate reported to the Registrar early in 1979 and the report was published by Her Majesty's Stationery Office. The lessons drawn from this affair have had a significant effect on the subsequent approach to inspection, control and auditing within societies and their general supervision.

A society meeting certain basic requirements as to assets and liabilities, liquid funds, reserves and other matters may be designated by the Chief Registrar under section 1 of the House Purchase and Housing Act 1959 for the purposes of trustee status. The requirements are set out in The Building Societies (Designation for Trustee Investment) Regulations

1972, (as amended). The shares and deposits of a society so designated become authorised investments for trustee subject to the provisions of the Trustee Investments Act 1971. Designated societies are identified in the list below by a letter "D" in the first column.

About 70 per cent of all building societies have an accounting year which ends on 31st December, the

remainder at various dates. Statistics in the tables below are taken from accounts made up to dates between 1st February and the following 31st January. References in the tables below to years or to the financial year should be understood accordingly. In a very few cases the latest information available at the time of compilation has been included in the list of societies.

## BUILDING SOCIETIES, GREAT BRITAIN, 1972-1981

## PERIODS OF GESTATION AND INCUBATION

The table shows approximate periods of gestation or incubation for some common animals and birds. In some cases the periods may vary and where doubt arises professional advice should be sought.

Species	Shortest Period. Days	Usual Period. Days	Longest Period. Days	Species	Shortest Period. Days	Usual Period. Days	Longest Period. Days
Human	240	273	313	Duck	28	28	32
Mare	305	336	340	Goose	28	30	32
Ass	365	—	374	Pigeon	17	18	19
Cow	273	280	294	Canary	12	14	14
Ewe	140	147-50	160	Guinea Pig	63	—	70
Goat	147	151	155	Mouse	18	—	19
Sow	109	112	125	Rat	21	—	24
Bitch	55	63	70	Elephant		21-22 months	
Cat	53	56	63			45 weeks	
Rabbit	30	32	35	Camel		56 weeks	
Hen	20	21	22	Zebra			
Turkey	25	28	28				

## LEGAL NOTES

## IMPORTANT

*The Purpose of these notes is to outline some of the more common parts of the law as they may affect the average person, and they are, of course, believed to be correct at the time of going to press. The law is constantly developing and changing, however, and it is dangerous for the layman to seek to be his own lawyer—he may not have access to completely up to date books and his case may, because of its special facts, come within an exception to the general rules set out herein.*

*It is always best to take expert advice, and if you have a Solicitor who has acted for you in the past you should take any legal problems you have to him. If you do not have a Solicitor a friend may be able to recommend one. Failing this your local Citizens' Advice Bureau (whose address can be obtained from the Telephone Directory or from any Post Office or Town Hall) has a list of Solicitors in your area who deal with that particular type of problem which you have. If you are not able to find a Solicitor in any of these ways you should ask for help in doing so from The Law Society, 113 Chancery Lane, London, W.C.2 or 41 Drumshugh Gardens, Edinburgh.*

*The Legal Aid and Legal Advice and Assistance schemes exist to make the help of the trained lawyer available to everyone whatever their means as of right. The best policy is if in doubt go to a Solicitor without delay—timely advice will set your mind at rest but sitting on your rights can mean that you lose them.*

*Remember also that it is not necessary for a dispute to have arisen before you go to a Solicitor—the Legal Advice and Assistance Scheme enables him to advise you on your rights say under a tenancy agreement, the estate of a deceased person or in connection with matrimonial and consumer matters, and to write letters or take other steps on your behalf. He can also act for you where there is no question of a dispute at all, e.g. in the making of a will.*

*Your entitlement to take advantage of the Scheme depends on your means (see below) but a Solicitor or Citizens' Advice Bureau will be able to tell you whether you are covered by it.*

## BRITISH CITIZENSHIP

*General.*—The British Nationality Act 1981 is expected to come into force early in 1983 and will replace the British Nationality Act 1948.

*Types of citizenship.*—The Act introduces three types of citizenship to be known as "British Citizenship", "Citizenship of the British Dependent Territories" and "British Overseas Citizenship".

*Acquisition of citizenship when new law comes into force.*—Almost all persons who are both citizens of the United Kingdom and Colonies and who have a right of abode in the United Kingdom will become British Citizens when the Act comes into force. Citizens of the United Kingdom and Colonies who do not have a right of abode in the United Kingdom will in many cases become Citizens of the British Dependent Territories. This, broadly speaking, will apply to citizens of the U.K. and Colonies by birth, naturalization, or registration in a dependent territory. The dependent territories include Hong Kong, Gibraltar, the Falkland Islands, St. Christopher and Nevis and St. Helena and Dependencies. Anyone who is a Citizen of the U.K. and Colonies and who does not acquire either British or British Dependent Territories Citizenship on commencement of the Act will become a British Overseas Citizen.

*Later acquisition of British Citizenship.*—British Citizenship will be acquired automatically by those born in the U.K. (including, for this purpose, the Channel Islands and the Isle of Man) who have a parent who is a British Citizen or a parent who is settled in the U.K. Certain other categories of children born in the U.K. will also acquire this type of citizenship i.e. foundlings, those whose parents subsequently settle in the U.K., those who live in the U.K. for 10 years from birth and those adopted in the U.K.

A person born outside the U.K. may acquire British Citizenship in the following ways:—

- (i) if one of his parents is a British Citizen otherwise than by descent (e.g. parent was born in the U.K.).
  - (ii) if one of his parents is a British Citizen serving the Crown overseas.
  - (iii) if the Secretary of State consents to his registration while he is a minor (there is a right to registration during the first twelve months after the Act comes into force for children of certain Citizens working abroad).
  - (iv) if he is a Citizen of the British Dependent Territories, a British Overseas Citizen, a British Subject or a British Protected Person (these last two are residual categories of people who have not acquired one of the 3 new types of citizenship) and has been lawfully resident in the U.K. for 5 years without any time restriction.
  - (v) if he is a British Dependent Territories Citizen who is a national of the U.K. for the purposes of the E.E.C. (i.e. a Gibraltarian).
  - (vi) if he is naturalized. Naturalization may be applied for only by adults and the Secretary of State has a discretion whether to permit it. The basic requirements are five years' residence, good character, sufficient knowledge of the English or Welsh language, and an intention to reside in the U.K. permanently. The requirements are somewhat less restrictive in the case of an applicant who is married to a British Citizen.
  - (vii) various rights to Citizenship given under the old law are preserved for a period of five years in respect of Commonwealth Citizens settled in the U.K. before 1973, wives of Citizens of the U.K. and Colonies, persons descended from U.K. Citizens and persons who have previously renounced citizenship.
- Acquisition of British Dependent Territories and British Overseas Citizenship after the Act.*—These citizenships are intended for persons connected with certain Commonwealth countries other than the U.K. In the case of Dependent Territories the rules are very similar to those for acquiring British Citizenship except that the connection is with the Dependent Territory rather than with the U.K. British Overseas Citizenship may be acquired by the minor children and wives of British Overseas Citizens in certain circumstances.
- Retention of nationality by persons born in or who are citizens of the Republic of Ireland.*—By the Ireland Act 1949, a person who was born before December 6th, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before January 1st, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on December 6th, 1922 or (ii) was on or after April 10th, 1935, and before January 1st, 1949, permanently resident there, or (iii) had before

January 1st, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act 1948, any citizen of Eire who immediately before January 1st, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds:

- (a) he has been in the service of the United Kingdom Government;
- (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory;
- (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions".

The British Nationality Act 1981 provides that persons who have made a claim may continue to be British subjects. Any citizen of Eire who was a British subject before January 1st, 1949, who has not yet made a claim may do so provided:

- (a) that he is or has been in Crown Service under the government of the United Kingdom; or
- (b) he has associations by way of descent, residence or otherwise with the United Kingdom or any dependent territory.

*Renunciation and Resumption.*—A person may cease to be a British Citizen by renouncing his citizenship (with the consent of the Secretary of State in wartime). The renunciation will be required to be registered with the Secretary of State and will be revoked if no new citizenship or nationality is acquired within six months. Once renounced citizenship may be reacquired if the renunciation was necessary to retain or acquire some other citizenship or nationality. Similar rules as to renunciation and reacquisition apply in the case of British Dependent Territories Citizens and of renunciation (but not reacquisition) in the case of British Overseas Citizenship.

*Status of Aliens.*—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act 1949 declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference to an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

## CONSUMER LAW

### 1. THE SUPPLY OF GOODS AND SERVICES

(a) The Sale of Goods Act 1979 provides protection to the purchaser of goods, by implying certain terms into every contract for the Sale of Goods. These implied terms are:

- (i) A condition that the seller will pass good title to the buyer (unless the seller agrees to transfer only such title as he or his principal has) and warranties that the goods will be free from undisclosed encumbrances, and that the buyer will enjoy quiet possession of the goods.
- (ii) Where there is a sale of goods by description, a condition that the goods will correspond with that description, and where the sale is by sample and description, a condition that the bulk of the goods shall correspond with both sample and description.
- (iii) Where the seller sells goods in the course of a business, a condition that the goods will

be of merchantable quality, unless before the contract is made, the buyer has examined the goods and ought to have noticed the defect, bearing in mind the purchaser's knowledge of the goods and the extent of the examination, or the seller has specifically drawn the attention of the buyer to the defect. Merchantable quality means fit for the purpose for which goods of the kind are commonly bought, taking into account any description applied to them, the price and other relevant circumstances.

- (iv) A condition that where the seller sells goods in the course of a business, the goods are reasonably fit for any purpose made known to the seller by the buyer, unless the buyer does not rely on the seller's skill and judgment, or it would be unreasonable for him to do so.
- (v) Where there is a sale of goods by sample, conditions that the bulk of the goods shall correspond with the sample in quality, that the buyer will have a reasonable opportunity of comparing the bulk with the sample, and that the goods are free from any defect rendering them unmerchantable, which would not be apparent from the sample.

For these purposes, the broad difference between a condition and a warranty is that the remedy for a breach of an implied condition may enable the buyer to reject the goods and recover damages if he has suffered loss whereas the remedy for a breach of warranty will only enable the buyer to recover damages.

It is possible for a seller to exclude some of the above terms from a contract, subject to restrictions imposed by the Unfair Contract Terms Act 1977 as given below. These restrictions give more protection . . . where the buyer "deals as consumer". In a contract of sale of goods, a buyer "deals as consumer" where there is . . . a sale by a seller in the course of a business, the goods are of a type ordinarily bought for private use or consumption, and are sold to a person who does not buy or hold himself out as buying them in the course of a business. A buyer in a sale by auction or competitive tender never "deals as consumer".

The 1977 Act prohibits the exclusion of the implied terms given in (ii) to (v) above, where the buyer "deals as consumer". In sales where the buyer does not "deal as consumer", terms purporting to exclude these implied terms, may be relied upon only to the extent that it would be reasonable to allow reliance. The Act provides guidelines for determining whether it would be reasonable to allow reliance. The implied terms in (i) above cannot be excluded whether the buyer "deals as consumer" or not.

As from January 4th, 1983, under the Supply of Goods and Services Act 1982, terms similar to those in the Sale of Goods Act relating to quiet possession, compliance with description, merchantable quality, fitness for purpose and correspondence with sample are implied into other types of contract under which ownership of goods passes (e.g. a contract for "work and materials" such as a supply of new parts during the servicing of a motor car) and also into contracts for the hire of goods. In the case of contracts under which ownership of goods is to pass, there is also an implied condition as to title.

The 1977 Act limits the exclusion of these implied terms in a similar manner to the implied terms in the Sale of Goods Act.

- (b) *Trading Stamps*.—The Supply of Goods "Implied Terms" 1973 Act provides protection for a person taking goods in exchange for trading stamps, and implies warranties as to title, freedom from encumbrances, quiet possession and merchantable quality, similar to those implied by the Sale of Goods Act.
- (c) The Trade Descriptions Act 1968 provides that it is a criminal offence for a trader or business-man to apply a false trade description to any goods, or to supply or offer to supply any goods to which a false trade description has been applied. A trade description includes a description as to quantity, size, method, place and date of manufacture, other history, composition, other physical characteristics, fitness for purpose, behaviour or accuracy, testing or approval. It is also an offence to give a false indication as to the price of goods. Prosecutions are brought by Inspectors of Weights and Measures.
- (d) The Fair Trading Act 1973 is also designed to protect the consumer. It provides for the appointment of a Director General of Fair Trading, whose duties include keeping under review commercial activities in the U.K. relating to the supply of goods or services to consumers, and to collect information to discover practices that may adversely affect the economic interests of the consumer. He may refer certain consumer trade practices to the Consumer Protection Advisory Committee, or, of his own initiative take proceedings against firms that are trading unfairly. He may also publish information and advice to consumers. Examples of practices which have been prohibited by virtue of references made under this Act, include the use of certain void exclusion clauses in contracts for the sale of goods and hire-purchase, and advertisements by traders appearing to sell as private persons.

The Supply of Goods and Services Act 1982 implies into a contract for the supply of services, terms that the supplier will use reasonable care and skill, carry out the service within a reasonable time (unless the time is agreed) and charge a reasonable charge (unless the charge is agreed).

At the time of preparation of these notes, these provisions were not in force and the date of their commencement was not available.

#### Scotland

The Sale of Goods Act, 1979, a consolidating Act, applies with some modification to Scotland. For example, it is not necessary in Scotland to distinguish between the words condition and warranty. The remedies of the buyer in both cases are the same, that is, he can either within a reasonable time reject the goods and treat the contract as repudiated, or retain the goods and treat the failure to perform such material part as a breach which may give rise to a claim for compensation or damages.

## 2. HIRE PURCHASE

### England and Wales

At present, protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act 1965, which applies to hire-purchase agreements under which the hire-purchase price, *i.e.*, the total sum payable by the hirer to complete the purchase of the goods, does not exceed £5,000. The Act also provides that where the hirer is a body corporate, the Act is not to apply at all.

Before any agreement is made, the owner of the

goods must state in writing to the hirer the cash price at which the goods can be purchased, and the agreement must be in writing signed by the hirer himself and by or on behalf of the owner and any guarantor. The agreement must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his rights to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*). If the agreement is complete as soon as the hirer signs it, and he signs it at trade premises, he must be given a copy there and then; in all other cases he must be given one copy when he signs and another within seven days of the completion of the agreement. There are also regulations dealing with such matters as the size of the print. In breach of any of these conditions the owner can neither recover the goods from the hirer nor enforce the agreement or any security given, although the Court can dispense with any of the conditions save that as to the signed agreement. The same results ensue (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 12½p for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he remains liable for any instalments already due, he will be under no further obligation *under the agreement*. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due he must pay the difference to the owner unless the court considers that a lesser sum is sufficient to compensate the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

An important new provision in the Act gives the hirer the right to cancel the agreement and recover all sums paid if he signed it at a place other than trade premises. This right (which was designed to cover the activities of door-step salesmen) must be exercised within 4 days of receiving the second statutory copy of the agreement.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

The Trade Descriptions Act, 1968, further protects the consumer by making it a criminal offence for traders falsely to describe or advertise the quantity or price of goods or services; prosecutions are brought by Inspectors of Weights and Measures. The Act provides no civil remedies but, if there is a conviction, a consumer may be able to recover compensation under the Powers of Criminal Courts Act 1973.

An important new provision is the Unfair Contract Terms Act 1977 which provides, *inter alia*, that clauses purporting to exclude the owner from liability for defects in the goods shall be void in the case of agreements, where the hirer "deals as consumer", and in other agreements are valid only if they satisfy the requirement of reasonableness.

*Consumer Credit Act 1974.* This Act has received the Royal Assent, but many of its provisions are not yet in force. It provides a new system for the protection of the consumer, of licensing and control of all matters relating to the provision of credit, or the supply of goods on hire or hire-purchase, administered by the Director-General of Fair Trading. The Act takes the place of previous Acts of Parliament relating to moneylenders, pawnbrokers and hire-purchase traders, and the protection provided by the Trade Description Act 1968 and Unfair Contract Terms Act 1977 will be retained. The Act extends to the United Kingdom. Certain provisions of the Act have been brought into force, which are summarised below. A licence is required to carry on a consumer credit or consumer hire business, or to deal in credit brokerage, debt adjusting, counselling or collecting, for which group licences are available. Any "fit person" may apply to the Director of Fair Trading for a licence which is normally renewable after 10 years. A licence is not necessary if such types of business are only transacted "occasionally" or if exempt agreements only are involved.

For the Act's provisions to apply, the agreement must be "regulated", i.e. be to individuals or partnerships only; must not be exempt, e.g. certain loans by local authorities or building societies; and the total credit must not exceed £5,000. The terms of a regulated agreement can be varied by the creditor, but only if the agreement gives him the right to do so, and the debtor receives notice in the prescribed form.

To be enforceable the agreement must be properly executed, and the specified information must be given during the antecedent negotiations for the contract. These are conducted by the creditor, credit broker or supplier (these being the creditor's agents) and begin when the parties first begin discussions.

Where there are arrangements or connections between the creditor and supplier the former is generally liable for any misrepresentation or breach of contract by the latter, and will thus be liable to indemnify the debtor.

Where the agreement requires the debtor to make grossly exorbitant payments or is contrary to the ordinary principles of fair dealing the Court can reopen it either at the debtor's request or during enforcement proceedings and (*inter alia*) alter the terms of the contract or set aside any obligations it imposes so as to do justice between the parties. Whether an agreement is such an extortionate credit bargain is decided by reference (*inter alia*) to interest rates prevailing at the date of agreement, the pressure for finance the debtor was under, etc.

If a credit reference agency was used to check the debtor's financial standing the creditor must give the agency's name to the debtor who is entitled to see the agency's file on him on payment of a fee of 25 pence.

#### Scotland

The Hire Purchase (Scotland) Act 1965 provides a Scots code corresponding to, but not identical with English law. The Supply of Goods (Implied Terms) Act 1973 also applies to Scotland.

The Sale of Goods Act, 1979, applies with some modification to Scotland. The Consumer Credit Act (see above) also extends to Scotland, and goes far in assimilating the Scots law on this topic with English law.

#### 3. RECEIPTS

The law on receipts in Scotland is governed by the Prescription and Limitations (Scotland) Act 1973, which for this purpose came into force on July 25,

1976. Now, receipts need only be kept for a period of five years and if a creditor does not make a relevant claim within that period no action can be raised.

#### CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now however, by the Crown Proceedings Act 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Exceptions to the Act include the immunity of the Crown and any member of the armed forces when on duty from liability in tort in respect of death of, or personal injury to, another member of the armed forces on duty (or even if not on duty, on any land, ship or vehicle being used for the purposes of the Armed Forces of the Crown), provided that the death or injury is certified as attributable to service for purposes of pension.

*Scotland.*—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of National Savings Bank deposits. Section 2 (1) of the Law Reform (Miscellaneous Provisions) (Scotland) Act 1966 removes the privilege whereby the wages of Crown servants, other than serving members of the armed forces, are exempt from arrestment in execution.

#### DEATHS

##### REGISTRATION, BURIAL AND CREMATION

##### REGISTRATION

(For Certificates, see under FAMILY LAW—CERTIFICATES)

*In England and Wales.*—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons: (1) A relative of the deceased present at the death, or in attendance during the last illness. If they fail (2) some other relative of the deceased. In default of any relatives (3) a person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail (4) an inmate of the house. A person (other than a relative) registering the death must be causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical

practitioner, a certificate of cause of death must be sent by the doctor to the Registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the Registrar. It is essential that a certificate for disposal should be obtained from the Registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of ten pounds. The registration of a death is free of charge. After twelve months no death can be registered without the Registrar General's consent.

Whenever the death of a child is registered, particulars of the name and occupation of the mother are to be entered in the register.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act 1926*, s. 1).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.*, s. 3).

"Still-born" child (*see under Births (Registration)*, pp. 1168).

*Death at Sea*.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

*Death Abroad*.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of *Scottish* domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, *see the Registration of Births*, etc. Act 1957.

*Deaths (Registration) in Scotland*.—The Registration of Births, Deaths and Marriages (Scotland) Act 1965 supersedes provisions in former Acts.

Personal notification within 8 days must be given to the registrar of (a) the registration district in which the death took place or (b) any registration district in which the deceased was ordinarily resident immediately before his death, and (c) when a body is found and the place of death is not known, either the registration district in which the body was found or any other registration district appropriate by virtue of the preceding paragraph. When a person dies (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the body is conveyed therein to any place in Scotland the death shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by one of the following: (a) any relative of the deceased; (b) any person present at the death; (c) the deceased's executor or other legal representative; (d) the occupier, at the time of the death, of the premises where the death took place; (e) if these fail, any other person having knowledge of the particulars to be registered. Failure to comply involves a penalty not exceeding £20.

The medical practitioner who attended the deceased during the last illness must sign a certificate of the cause of death within 7 days. If there is no

such medical practitioner, any medical practitioner who is able to do so, may sign the certificate. At the time of registering the death the registrar shall, without charge, give the informant a certificate of registration, and the person to whom the certificate is given must hand it to the undertaker previous to cremation. A body may, however, be interred before the death is registered, in which case the undertaker must deliver a certificate of burial to the Registrar within three days.

There is, available from the Department of Health and Social Security, a death grant. Provided the deceased had paid enough Class I contributions and, if male, was not born before July 5, 1883 and if female, was not born before July 5, 1888, then the grant will be paid to his or her personal representatives. It normally amounts to £30 and is meant to help to pay for the deceased's funeral.

#### BURIAL

The duty of burial is incumbent on the deceased person's executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, *see above*.

#### CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for instructions to be left in writing to that effect. However, in Scotland, even if the deceased wished his body to be cremated or anatomically dissected, relatives can still veto his or her wishes.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016), as amended by the Cremation Regulations 1965 (No. 1146).

#### INTESTACY

##### ENGLAND AND WALES

As regards deaths on or after March 15, 1977, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act,

1952, the Family Provision Act, 1966 and Orders made thereunder. The S.I. 1981/255 increased the benefits of a surviving spouse of an intestate. These notes deal with the present position, so that if the death occurred before March 1, 1981 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £40,000 with interest at 7 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £85,000 with interest at 7 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood or issue of such brothers and sisters. If the intestate leaves a spouse, but no issue, no parents and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £40,000 or £85,000, as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) children; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain eighteen or marry under that age, their shares going to the persons (if any) within the same group who do attain eighteen or marry. Moreover, in the same cases, succession is not *per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate, who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (hotchpot) any substantial advances received from the intestate during his lifetime before claiming any further share under the intestacy. Special hotchpot provisions apply to partial intestacy.

By the Family Law Reform Act, 1969, the position of an illegitimate child is equated with that of a legitimate child in respect of all deaths occurring on or after January 1, 1970. In respect of deaths after March 1976 the provisions of the Inheritance (Pro-

vision for Family and Dependents) Act 1975 may allow other persons to claim provision out of the estate. See *post* under "Wills".

For personal application for Letters of Administration—see p. 1165.

#### SCOTLAND

The Succession (Scotland) Act, 1964, provides that the whole estate of any person dying intestate shall devolve without distinction between heritable and moveable property. By that Act the surviving spouse of an intestate may, as a prior right (in addition to legal rights, see below), claim the matrimonial home to a maximum of £50,000, or a choice of one matrimonial home if more than one (or in certain circumstances the value thereof), with its furniture and furnishings not exceeding £10,000 in value, plus the sum of £15,000 if the deceased left issue or, if no issue, the sum of £25,000. These figures apply from 1st August 1981 and may be increased from time to time by order of the Secretary of State.

The Act has been modified by the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1968, which provided that an illegitimate child had exactly the same rights of succession in the estate of his parents as a legitimate child. However, the position still remains that an illegitimate child has no succession rights in the estate of a grandparent even though such would have fallen to his predeceasing parent.

Legal rights, referred to above, are:—

*Jus relictii* ( $\alpha$ ): the right of a surviving spouse to one half of the deceased's net moveable estate after satisfaction of prior rights if there are no surviving children, or to one third if there are any surviving children.

*Legitim*: right of surviving children to one-half of the net moveable estate of deceased parents if no surviving spouse, or one-third of the net moveable estate of deceased parents after satisfaction of prior rights where there is a surviving spouse.

There are no legal rights in heritage.

In general, the lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals, and so on in the ascending scale. The Crown is *ultimus haeres*. The right of representation, i.e., the right of the issue of a person, who would have succeeded if he had survived the intestate, is open to any line of succession where previously it was limited to apply only when there were next of kin or the issue of predeceasing next of kin. The surviving mother of an intestate now has equal rights of succession with the surviving father, where formerly these were restricted. The intestate's maternal relations, who prior to the Act had no rights of succession, are now on an equal footing with his paternal relations. Where the intestate is survived only by parents, and by brothers and sisters (collaterals) half of the estate is taken by the parents and the other half by the brothers and sisters, those of the whole blood being preferred to those of the half blood; where, however, succession opens to collaterals—which expression can include the brothers and sisters of an ancestor of the intestate—of the half blood, they shall rank equally amongst themselves, whether related to the intestate (or his ancestor) through their father or their mother.

#### WILLS

**IMPORTANT NOTE.**—The following notes and those on Intestacy must be read subject to the provisions of the Inheritance (Provision for Family and Dependents) Act 1975 which can affect the estate of anyone

dying domiciled in England and Wales after March 1976. Very broadly a spouse, former spouse who has not remarried, a child of the deceased himself or one treated by him as a child of his family, or any person maintained by him at his death may apply to the Court under the Act. If the Court thinks that the will or the law of intestacy or both do not make reasonable provision for the applicant it may order payment out of the net estate of maintenance or a lump sum. It may also order the transfer of property, vary certain trusts and the powers can affect property disposed of by the deceased in his lifetime intending to defeat the Act. It is up to the applicant to take the initiative, and the application must generally be made within six months of the grant of Probate or Letters of Administration.

In respect of earlier deaths, earlier Acts apply with a narrower class of applicants and less ample powers for the Court.

**REASONS FOR MAKING A WILL.**—Every person over the age of 18 should make a will. However small the estate the rules of Intestacy (see above) may not reflect a person's wishes as to his property; in any case a will can do more than just deal with property—it can in particular appoint executors, give directions as to the disposal of the body and appoint guardians to take care of children in the event of the parents' death. For the wealthier person an appropriately drawn will can operate to reduce the burden of Capital Transfer Tax.

*It is considered desirable for a will to be properly drawn up by a Solicitor, and the making of a will is one of the services which he can provide under the Legal Advice and Assistance Scheme (see above).*

In no circumstances should one person prepare a Will for another person where the former is to take any benefit under it—this can easily lead to a suggestion of undue influence which may cause the will to be held bad.

Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed (*see below*) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of *any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. *A will should be written in ink and very legibly, on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1983] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith  
Signature of  
Testator;

William Jones (*signed*) of Green Gables, South Street, Reading, tailor.

Henry Morgan (*signed*) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and/or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to — of — the sum of £— and to — of — the sum of £— and to — of — all my books (or as the case may require).

3. All the residue of my property real and personal I give to — of —.

**TERMS.**—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual real money. The expression "goods and chattels" should not be used. In giving *particular* property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

**RESIDUARY LEGATEES.**—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. *It should be remembered that a will operates on property owned at the time it is made or acquired after it has been made.*

**EXECUTION OF A WILL, AND WITNESSES.**—The testator should sign his name at the foot or end of the will, in the presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to

the testator, who appeared fully to understand the same."

Where there is any suspicion that the Testator is not, by reason of age or infirmity, fully in command of his faculties it is desirable to ask his Doctor to act as a witness (see Testamentary capacity below).

A *blind person* may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

**EXECUTORS.**—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one or two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

**LAPSED LEGACIES.**—If a legatee dies in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee predeceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

An important exception to the general rule of lapse stated above is contained in the Administration of Justice Bill before Parliament at the time of writing of these notes, where there is a gift to a child or remoter issue of the testator who dies before the testator leaving issue who survive the testator.

**TESTAMENTARY CAPACITY.**—A person under the age of 18 cannot make a will (except for soldiers, sailors and airmen and then only in exceptional circumstances).

So far as mental capacity is concerned the Testator must be able to understand and appreciate the nature and effect of making a will, the property of which he can dispose and the claims to which he ought to give effect. If a person is not mentally able to make a will provision exists (under the Mental Health Act, 1959 as amended) for the Court to do this for him.

**REVOCATION.**—A later will revokes an earlier will if it expressly says so, or is completely inconsistent with it. Otherwise the earlier one is only revoked insofar as it is inconsistent with the later one. A will may also be revoked by burning, tearing or otherwise *destroying* the will with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

However, under the Administration of Justice Bill, there is a new provision to the effect that if it appears, from a will that at the time it was made the

testator was expecting to be married to a particular person and that he intended that the will (or a disposition in the will) should not be revoked by the marriage to that person, the will will not be revoked by marriage to that person. The Bill also provides that where after a testator has made a will the testator's marriage is terminated by a decree of divorce or nullity, any gift to a spouse shall lapse and any appointment of the spouse as executor shall be omitted from the will unless the will shows a contrary intention.

#### PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made *in person* at the Personal Application Dept. of the Principal Registry of the Family Division, a district probate registry or sub-registry, or a probate office by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of all property and assets left by the deceased; and (4) a list of debts and funeral expenses.

Intending applicants, before attending at a registry or probate office, should write or telephone to the nearest probate registry or sub-registry for the necessary forms. Postal or telephone applications cannot be dealt with at the local probate offices, which are part-time only.

Certain property can be disposed of on death without a grant of probate or administration, or in pursuance of a nomination made by the deceased, provided the amount involved does not exceed £1,500. See the Administration of Estates (Small Payments) Act, 1965.

#### WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read. In the latter case, the original will proved in the District Registry, is kept there, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

**RECENT DEATHS.**—A newly introduced system enables a person to discover when a grant of Probate or Letters of Administration is made which may be invaluable to a creditor of the deceased or applicant under the Inheritance (Provision for Family and Dependents) Act 1975—see above. A "standing search" may be made by sending a request in the form set out below to the Record Keeper at the Principal Registry of the Family Division with a small fee. The searcher will receive particulars of any grant made in the previous 12 months or the following 6 months, including names and addresses of the executors or administrators and the Registry in which the grant was made.

#### FORM OF SEARCH

In the High Court of Justice  
Family Division

## The Principal Registry (Probate)

I/We apply for the entry of a standing search so that there shall be sent to me/us an office copy of every grant of representation in England & Wales in the estate of:—

Full name of deceased:  
Alternative or alias name  
Full address  
Exact date of death

Which either has issued not more than 12 months before the entry of this application or issues within 6 months hereafter  
Sgd.—(full address).

## SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose effectually of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictæ*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictæ* or *legitim* is increased to a one-half share of the estate. The remaining portion is known as the *dead's part*. A surviving husband and children have comparable rights (*jus relictæ* and *legitim*) in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All debts are payable out of the whole estate before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Formerly a minor could dispose only of movables but since the passing of the Succession (Scotland) Act, 1964 he has a like capacity to test on heritable property. A will must be in writing and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e. written and subscribed by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *attested*, i.e. signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. The Conveyancing and Feudal Reform (Scotland) Act, 1970 whilst altering generally the rules for the subscription of deeds, specifically (s. 44 (2)) makes no change in the rules applying to wills which must still be signed by the testator on every page. If the testator cannot write, or is blind, his will may be authenticated by a law agent, notary public or justice of the peace and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the Sheriffdom in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will. A will may be revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect. If a subsequent will is revoked, the earlier will is revived.

"Confirmation", the Scottish equivalent of Probate, is obtained in the Sheriff Court of the Sheriffdom in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative". An Executor nominate is one nominated by the deceased in his will or, where such person has predeceased the testator, by the residuary beneficiary. An Executor dative is one appointed by the Court in the case of intestacy or where the deceased had failed to name an executor in his will and there is no residuary beneficiary. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £10,000 gross, confirmation is obtained under a simplified procedure at reduced fees.

*Presumption of Survivorship*.—The Succession (Scotland) Act, 1964, referred to above provides, by s. 31, that where two persons die in circumstances indicating that they died simultaneously or if it is uncertain which was the survivor, the younger will be deemed to have survived the elder unless the elder person left testamentary provision in favour of the younger, whom failing in favour of a third person, the younger person having died intestate (partially or wholly); but if the persons so dying were husband and wife, neither shall be presumed to have survived the other.

## EMPLOYMENT

## WAGES AND HOLIDAYS

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to manual workers, and domestic servants are specifically excluded from their operation. Even in the case of payments to workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, e.g., by cheque, money order, postal order or into a banking account.

The Equal Pay Act 1970, which extends to Scotland, and which came into force on December 29, 1975, prevents discrimination, as regards terms and conditions of employment between men and women employed on like work in the same employment.

## PARTICULARS OF TERMS OF EMPLOYMENT

Under the Employment Protection (Consolidation) Act 1978, an employer must give each full-time employee within 13 weeks of the beginning of the employment a written statement containing the following particulars of the contract between them:

- (1) the date when the employment began with an indication whether previous work counts as continuous with this job;
- (2) The rate of remuneration (or how it is calculated);
- (3) the intervals at which wages are paid;
- (4) the hours of work;
- (5) the employee's entitlement to holidays (including public holidays) and holiday pay;
- (6) the title of the employee's job;

- (7) terms relating to sickness, injury and sick pay;
- (8) details of any pension scheme;
- (9) the length of notice which the employee should give and receive in order to terminate the contract.

In addition, the written particulars must specify any disciplinary rules; and also must identify the person to whom the employee can apply if he is dissatisfied with any disciplinary decision or to seek redress of any grievance and what further steps may ensue.

### TERMINATION OF EMPLOYMENT

An employee may be dismissed without notice if he is guilty of gross breach of contract, such as disobedience to a lawful order or dishonesty. He is then only entitled to wages accrued due at the date of dismissal.

In other cases, the employee is entitled to reasonable notice which, under the Employment Protection (Consolidation) Act 1978, must not be less than one week when he has been continuously employed for up to 2 years; then it is one week for each full year worked with a maximum of 12.

An employer who wrongfully dismisses an employee (i.e. with less than the length of notice to which he is entitled) is generally liable to pay wages for the period of proper notice.

An employee who has a fixed term contract has no claim against his employer for wrongful dismissal if his contract is not renewed when it expires. He may, however, have a claim for a redundancy payment or compensation for unfair dismissal. If he is wrongfully dismissed before his contract expires, he is generally entitled to remuneration payable over the full period of the contract.

An employee may be entitled to a redundancy payment or to compensation for unfair dismissal if he has been continuously employed for at least 2 years (redundancy) or 52 weeks (unfair dismissal) and the employment has been terminated by the employer (with or without proper notice) or he has a fixed term contract which expires without being renewed or the employment has been terminated by the employee by reason of the employer's breach of contract. However, these rights may be affected by the employee's misconduct.

Under the Employment Protection (Consolidation) Act 1978, an employee who satisfies the foregoing conditions and is dismissed by reason of redundancy may be entitled to a redundancy payment calculated by reference to his age, pay and length of service.

The Employment Protection (Consolidation) Act 1978 also enables an employee who is unfairly dismissed to complain to an Industrial Tribunal (generally within 3 months of dismissal). The onus will then be on the employer to prove that the dismissal was due to capability, conduct, redundancy, illegality or some other substantial reason justifying dismissal. The tribunal must then decide whether the employer acted reasonably in dismissing the employee. If the employer fails to prove that the dismissal was due to one or more of the above five reasons, or the tribunal decides that the employer did not act reasonably in dismissing the employee, the dismissal will be unfair, in which case the tribunal can

- (a) order re-engagement or reinstatement or
- (b) award compensation consisting of a basic and a compensatory award.

For an employee to bring himself within the unfair dismissal provisions, he must have been continuously

employed for a period not less than 52 weeks, or 2 years if the employer has not more than 20 employees.

All complaints of unfair dismissal are referred to a conciliation officer or the Department of Employment and a very high proportion of complaints are disposed of in this way.

### FAMILY LAW ADOPTION OF CHILDREN

In England and Wales this is now mainly governed by the Children Act 1975 and the Adoption Act 1976 though these are not yet fully in force. A court order is necessary to legalise the adoption, which, when completed, has the effect of making the adopted child the child of the adopter as if he or she had been born to the adopter in lawful wedlock, and the original rights and duties of the natural parents are thereby cut. The adopter has full rights as to custody, education etc. and the child is treated as his for the purpose of any devolution of property on an intestacy occurring or under any disposition made after the adoption order. The application may be made to the High Court (Family Division) or to a County Court or Magistrates' Court.

Orders may be made in favour of married couples, single, widowed or divorced persons, but not of one party to a marriage alone unless the other spouse cannot be found, is physically or mentally incapable of making an application, or they are separated in circumstances likely to be permanent. A person aged under 21 cannot adopt.

The child's parents or guardians must consent unconditionally to the making of the order unless the court dispenses with the consent, which it may do if the parent cannot be found or is incapable of giving his consent, is withholding his consent unreasonably, or has neglected or ill-treated the child.

Restrictions are placed on societies which may arrange adoptions.

An adopted person aged over 18 may apply to the Registrar General for information to enable him to obtain a full certificate of his birth, but before being supplied with the information he will be informed that counselling services are available to him.

An adopter and the adopted child are within the prohibited degrees for the purposes of marriage to one another.

All Adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates, (See below.)

*Scotland.*—The Adoption Act 1958 which is a consolidating Act is the main statute governing adoption in Scotland. Under the Adoption Act 1968 applications for adoption can be made by persons who are either habitually resident in Great Britain or who possess British nationality. Applications are made either to the Court of Session or the Sheriff Court within whose jurisdiction the child resides at the date of the application. The applicant must be either:—

- (a) Twenty-five years of age; or
- (b) Twenty-one years of age and a relative (as defined in the 1958 Act) of the infant; or
- (c) the mother or father of the infant.

It is possible for a man and wife to adopt an infant jointly. Normally the consent of the child's parents or guardian is required before an adoption order will

be made but this may be dispensed with in certain cases.

Reference is made to the Adoption of Children (Scotland) Acts 1930 to 1949 which still apply in part and to the Adoption Act 1960 relating to the revocation of adoption orders. Minor parts of the Adoption Act 1976 apply to Scotland as does the Children Act 1975.

The Succession (Scotland) Act 1964, gives the adopted child the same rights of succession as a child born to the adopter in wedlock but deprives him of any such rights in the estates of his natural parents. The law is consolidated in the Adoption (Scotland) Act 1978 which is not yet in force.

### BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail; 2. the occupier of the house in which the birth happened; 3. a person present at the birth; or, 4. the person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of twenty pounds. The registration of a birth is free. In England or Wales, the informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. Under the Public Health Act 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy. A stillbirth may only be registered within 3 months of the birth.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act 1953. When the Children Act 1975 takes effect special provisions will apply to the registration and re-registration of births of abandoned children, and the re-registration of births of illegitimate children showing the father's name; the mother must be party to the latter application and if the child is under 16 must show the father's formal admission or a court's finding of paternity.

*Birth at Sea:* The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

*Birth Abroad:* Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's Office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act 1957, applicable also to Scotland.

### SCOTLAND

The Registration of Births, Deaths and Marriages (Scotland) Act 1965, supersedes former Acts. Personal notification within 21 days of any birth, must be given to the registrar of (a) the registration district in which the birth took place, or (b) any registration district in which the mother of the child was ordinarily resident at the time of the birth and (c) in the case of a founding child, dead or alive, when the place of birth is not known, the registration district in which the child, or the body, was found, within two months from the date on which the child was found. When a child is born (in or out of Scotland) in a ship, aircraft or land vehicle during a journey and the child is conveyed therein to any place in Scotland, the birth shall, unless the Registrar General otherwise directs, be deemed to have occurred at that place.

The register must be signed in the presence of the registrar by the father or mother of the child, and if they fail, by one of the following: (a) any relative of either parent who has knowledge of the birth; (b) the occupier of the premises in which the child was, to the knowledge of that occupier, born; (c) any person present at the birth; (d) any person having charge of the child. Failure without reasonable cause involves a penalty not exceeding £20.

The name of the father of an illegitimate child may be entered in the register of births at the time of registration if jointly requested by the mother and father, and the latter's name may also be recorded at a later date on declaration by both parents. A free abbreviated certificate of birth will be issued to the informant at the time of registration. Provision is made for the re-registration of the birth of a person made legitimate by the subsequent marriage of the parents or whose birth entry is affected by any matter respecting status or paternity, or has been so made as to imply that he is a founding.

A still-birth must be registered and a certificate, signed by the doctor or certified midwife present at the birth or who has examined the body of the child, must be produced.

### CERTIFICATES OF BIRTHS, MARRIAGES, OR DEATHS

*England and Wales.*—Certificates of Births, Deaths, or Marriages can be obtained at the Office of Population Censuses and Surveys, St. Catherine's House, 10, Kingsway, W.C.2 or from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriage can also be obtained from the incumbent of the church in which the marriage took place; or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (*sec. post, under Marriage*).

It is considered desirable when a certificate is required to consult the nearest Register Office who, if told the exact or approximate date and place of registration, will be able to advise on the best way of obtaining it, and any fees payable, which vary according to the type of certificate required and other factors.

*English Registers.*—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the Office of Population Censuses and Surveys, St. Catherine's House, 10, Kingsway, W.C.2. *The Society of Genealogists*, 37 Harrington Gardens, S.W.7, possess many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part of about 4,000 Parish Registers.

*Scottish Registers of Births, Deaths and Marriages.*—Certificates of births, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained personally at the General Register Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of £4.60 for a full extract entry of birth, death, or marriage, and £2.40 for an abbreviated certificate of birth. An abbreviated certificate of registration of deaths is issued free of charge for National Insurance purposes in certain cases.

There are also available at the General Register Office old parish registers of the date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained on payment of the appropriate fee. A fee of £5.75 per day is payable for a general search of all the Scottish registers.

Registration of Presumed Deaths. (Prescription of Particulars) (Scotland) Regulations 1978 as read with Presumption of Death (Scotland) Act 1977 prescribe the particulars to be notified by the Clerk of Court to the Registrar General after a decree or variation order has been granted in an action of declarator of death of a missing person.

#### DIVORCE, SEPARATION AND ANCILLARY MATTERS

*Preliminary.*—Matrimonial Suits may be conveniently divided into two classes, viz. (1) those in which it is sought to annul the marriage because of some defect; and (2) those in which, the marriage being admitted, it is sought to end the marriage or the duties arising from it. By virtue of the Matrimonial Causes Act 1967, all matrimonial causes are now commenced in one of the divorce county courts designated by the Lord Chancellor or in the Divorce Registry in London. If the suit becomes defended, it must be transferred to the High Court.

(1) *Nullity of Marriage.*—This is now mainly governed as to England and Wales by the Matrimonial Causes Act 1973. A marriage is void *ab initio* if the parties were within the prohibited degrees of affinity, or were not male and female, or if it was bigamous or if one of the parties was under the age of consent, i.e. 16, or in the case of a polygamous marriage entered into outside England and Wales, that either party was at the time of the marriage domiciled in England and Wales. Where the *formalities* of the marriage were defective, the marriage is generally void if both parties knew of the defect (e.g., where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage.

A marriage is voidable (i.e. a decree of nullity may be obtained but until such time the marriage remains valid) on the following grounds—(a) incapacity of either party to consummate; (b) respondent's wilful refusal to consummate; (c) that either party did not validly consent to the marriage, whether in consequence of duress, mistake, unsoundness of mind or otherwise, (d) that either party at the time of marriage was a mentally disordered person; (e) that at the time of marriage the respondent was suffering from communicable venereal disease; (f) that at the time of the marriage the respondent was pregnant by another man. In cases (e) and (f) the petitioner must have been ignorant of the grounds at the date of the marriage and in (c), (d), (e) and (f) proceedings must

be instituted within 3 years of the marriage. In all cases the court shall not grant a decree where the petitioner has led the respondent to believe that he would not seek a decree and it would be unjust for it to be granted.

The 1973 Act provides that a decree of nullity in a voidable marriage only annuls the marriage from the date of the decree. The marriage remains valid until the decree, and any children of the marriage are legitimate. Children of a void marriage are illegitimate unless the father was domiciled in England and Wales at the child's birth (or father's death, if earlier) and at the time of conception (or marriage if later) both or either of the parents reasonably believed the marriage was valid.

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (b) above, even though there has been no normal intercourse, but it may in certain circumstances constitute unreasonable behaviour for the purpose of divorce (as to which see below). Further it has been allowed as a *defence* to a charge of desertion against the aggrieved party.

(2) *Judicial Separation and Divorce.*—The second class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation. It is not necessary to prove that the marriage has broken down irretrievably and the five facts listed (a) to (e) under divorce (below) are grounds for judicial separation.

*Divorce.*—The sole ground on which a divorce is obtained by either husband or wife is the irretrievable breakdown of the marriage. However, the court is precluded from holding that a marriage has irretrievably broken down unless it is satisfied of one or more of the following facts: (a) that the respondent has committed adultery since the marriage and the petitioner finds it intolerable to live with the respondent; (b) such behaviour by the respondent that the petitioner cannot reasonably be expected to continue co-habitation; (c) desertion by the respondent for 2 years immediately before the petition; (d) 5 years separation immediately before the petition (but only 2 years where the respondent consents to the decree). Matrimonial Causes Act 1973.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

*Provisions designed to encourage reconciliation.*—The 1973 Act requires the solicitor for the petitioner to certify whether he has or has not discussed the possibility of a reconciliation and whether or not he has given the petitioner the names and addresses of persons qualified to help effect a reconciliation.

A total period of less than six months during which the parties have resumed living together is to be disregarded in determining whether the prescribed period of desertion or separation has been continuous. Similar provision for effecting a reconciliation exists in relation to the other proofs of break-down, but a petitioner cannot claim that it is intolerable to live with the other party if they have lived together

for more than six months after discovery of the respondent's adultery.

*Obtaining the Decree Nisi.* Where the suit is defended, i.e. the respondent opposes the dissolution or the fact/ground on which the petitioner seeks it—the petition will be heard by a Judge in open court, the parties giving oral evidence. Where the suit is undefended, the evidence will normally take the form of a sworn written statement made by the petitioner which will be sent to the Court and read over by the Registrar. If he is satisfied that he or she has proved the contents of the petition, he will simply fix a date for a Judge to pronounce the decree nisi, it being unnecessary for either party to attend. Only if the Registrar is not satisfied as above will he order that the petition be heard formally by the Judge.

*Children.*—Subject to exceptions, the decree nisi cannot be made absolute unless a Judge by order declares that he is satisfied with the proposed arrangements for the welfare of any child of the family who is under 16 or under 18 and receiving education or vocational training. If the petition is heard in open court the Judge will normally do so at that time. Otherwise if there is no dispute as to the children between the parties and the proposed arrangements for residence, education etc. are specific, an appointment will be made for the Judge to interview one or both parents informally and if satisfied he will make an order to that effect. If not the Registrar may inform the parties that it is up to them to seek a hearing before the Judge to resolve the matters in dispute.

*Decree Absolute.*—Every decree of divorce or nullity is in the first instance a decree nisi, and the marriage subsists until the decree is made absolute, usually six weeks after decree nisi on the petitioner's application. After the decree absolute either party is free to remarry.

*Maintenance, etc.*—The court has wide powers to order either party to the marriage to make financial provision (e.g. periodical payments, a lump sum, the transfer of property) for the other party or any child of the family, having regard to the party's means, the recipient's needs and all the important aspects of the case. These so-called 'ancillary matters' often present more difficulty than the divorce itself especially affecting the home, and they are usually negotiated by the parties through their solicitors before the divorce goes through.

The court may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, *even though* no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the court may also deal with custody of and access to the children.

#### CUSTODY OF CHILDREN ETC.

The Court may make orders in respect of access to and the custody, maintenance and education of children in connection with a suit for divorce, nullity or judicial separation (above) or with an application to the Magistrates (below) whether the suit succeeds or not. In addition, if there is no other matrimonial suit involved a parent may apply for custody under the Guardianship of Minors Acts 1971, and any person may apply to the High Court for the child to be made a ward of court.

In all cases the welfare of the child is the first and paramount consideration. The categories of child who may be covered by any particular type of proceedings differ according to the nature of those proceedings and to the nature of the particular relief sought, but it should be borne in mind that in connection with divorce, nullity and judicial separ-

ation a child which has been *treated* by the spouses as a child of the family may be included as a 'child of the family' as well as the children of the spouses themselves. This also applies to most maintenance cases in the magistrate's court—see below.

When the Children Act 1975 comes into effect a new procedure called "Custodianship" will be introduced, basically allowing long term foster parents to apply for custody of the foster child.

Any dispute relating to the above matters should be placed in the hands of a Solicitor without delay (see Legal Aid, etc. below) and in particular it should be borne in mind that where there is financial need (because of, e.g. continuing education or disability) maintenance may be ordered for children even beyond the age of majority.

#### SEPARATION BY AGREEMENT

Husband and wife may enter into an agreement to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case, who will often advise obtaining a court order by consent to reduce the burden of tax.

#### MAGISTRATES' CUSTODY AND MAINTENANCE ORDERS

For many years the law relating to domestic proceedings in magistrates' courts was out of line with the divorce law which was reformed in 1969. The Domestic Proceedings and Magistrates' Courts Act 1978 took effect in early 1981 and now contains the relevant law.

A husband or wife can apply to a magistrates' court for a matrimonial order on the grounds that the other spouse (a) has failed to pay reasonable maintenance for the applicant or (b) has failed to make a proper contribution towards the reasonable maintenance of a child of the family or (c) has deserted the applicant or (d) has behaved in such a way that the applicant cannot reasonably be expected to live with the respondent. If the case is proved the court can order (a) periodical payments for the applicant (b) periodical payments for a child of the family (c) a lump sum (not exceeding £500) for the benefit of the applicant and for any child of the family. In deciding what orders (if any) to make the magistrates must consider a number of guidelines which are similar to those governing financial orders on divorce. There are also special provisions relating to consent orders and separation by agreement. The court also has powers to make orders relating to the legal custody of a child of the family and these orders together with orders for child maintenance can be made even though the court makes no order for spouse maintenance. Legal custody can only be granted to one person but the court may order that the other party shall retain certain parental rights and exercise them jointly with the person who is awarded legal custody. Other provisions of the Act relate to access by grandparents, interim orders, and variation, discharge and revival of orders. An order may be enforceable even though the parties are living together, but in some cases it will cease to have effect if they continue to do so for six months. The hearing of matrimonial disputes is separate from ordinary court business, and the public are not admitted.

#### DOMESTIC VIOLENCE

The Domestic Violence and Matrimonial Proceedings Act 1976 and the Domestic Proceedings and Magistrates' Courts Act 1978 (the former not being applicable to Scotland and the latter only to a limited extent) have made it easier for one spouse who has been subjected to violence by the other to obtain an

order to restrain further violence and if need be to have the other excluded from the home. Such orders can be obtained very quickly, and a person disobeying them is liable to be imprisoned for contempt of court. There are some differences of detail between the two Acts; in particular the 1976 Act also applies to unmarried couples.

#### SCOTLAND Divorce

Actions of divorce can only be raised in the Court of Session, which has jurisdiction to entertain such actions only if either of the parties to the marriage in question (a) is domiciled in Scotland on the date when the action is begun; or (b) was habitually resident in Scotland throughout the period of one year ending with that date.

The Scots Law of Divorce is now governed by the Divorce (Scotland) Act 1976, which for the purposes of divorce came into force on January 1, 1977. The sole ground of divorce is now irrevocable breakdown of the marriage. This can only be established in one of the following ways:

(a) The defending spouse has committed adultery since the date of the marriage. Here it is not necessary for the pursuing spouse to prove that the fact of adultery made it intolerable to live with the defending spouse.

(b) The defending spouse has behaved in such a way that the pursuing spouse cannot reasonably be expected to cohabit with him or her. It is immaterial whether or not the conduct founded upon is active or passive.

(c) The defending spouse has deserted the pursuing spouse for a continuous period of two years. There must be no question of the pursuing spouse having refused a genuine and reasonable offer to adhere. Nor is irrevocable breakdown established if cohabitation is resumed for a period of more than three months, after the two year period has expired.

(d) There has been no cohabitation at any time during a continuous period of two years immediately preceding the action between the parties to the action, and the defending spouse consents to the divorce being granted.

(e) There has been no cohabitation at any time during a continuous period of five years, as in (d) *supra*, except that on the expiry of the five year period, the consent of the defending spouse is not required.

The facts of desertion and separation are not interrupted by the parties cohabiting for a period or periods not exceeding six months. However such a period or periods of cohabitation would not be included in the calculation of the two-year or five-year periods.

**Encouragement of Reconciliation:** The burden of promoting a reconciliation between spouses in a divorce action in Scotland falls upon the Court by virtue of the 1976 Act. Where an action of divorce has been raised, it may be postponed by the Court to enable the parties to seek to effect a reconciliation, if the Court feels that there may be a reasonable prospect of such reconciliation. If the parties do cohabit during such postponement, no account shall be taken of such cohabitation if the action later proceeds.

**Maintenance, etc.:** The 1976 Act also provides that either party to a marriage can apply to the Court at any time prior to decree being granted for (a) an order for interim alimony for him or herself and/or for children of the marriage under 16 years of age of whom he/she has custody (b) an order for interim custody of all or some of the children of the marriage

under 16 years of age (c) an order for access to all or some of the children of the marriage under 16 years of age in the custody of the other party (d) an order for a capital sum or a variation of a marriage settlement. The Court in granting or refusing such an order, known as an *interim* award, takes into account the respective means of the parties, and also all the circumstances of the case.

**Nullity of Marriage.**—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

**Procedure.**—Appearance in Court at a Proof in an undefended Divorce Action has been rendered unnecessary since April, 1978. A full Proof is still necessary if the action is defended in any respect. In place of court appearance Affidavits (Statements sworn before a Notary Public) by the pursuer and any witnesses are lodged in the Court together with a Minute by Counsel craving Decree.

#### Separation

Under the Divorce (Scotland) Act 1976 *supra*, a decree of Judicial Separation can be obtained by proof of the same facts necessary to obtain decree of divorce—except that for the principle of irrevocable breakdown there is substituted that of grounds justifying separation. This type of action is competent in both the Court of Session and the Sheriff Court.

#### Custody of Children

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse, by reason of his or her behaviour, brought about the breakdown of the marriage does not of itself preclude him or her from being awarded custody. The Children Act 1975 (*supra*) also applies to Scotland.

#### ILLEGITIMACY AND LEGITIMACY ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of an illegitimate child, or by the Supplementary Benefits Commission where benefit has been paid for the requirements of the child, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum in their discretion. The woman is not bound to give evidence in every case but if she does so it must be corroborated in some material particular. The mother has the custody of her illegitimate children. *Prima facie* every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong evidence. However, under the Family Reform Act 1969, any presumption of law as to the legitimacy (or illegitimacy) of any person may in civil proceedings be rebutted by evidence showing that it is more probable than not that the person is illegitimate (or legitimate) and in any proceedings where paternity is in question, blood tests may be ordered. If however the husband and wife are separated under an Order of the Court, a child conceived by the wife during such separation is presumed not to be the husband's child.

**LEGITIMACY.**—The Legitimacy Act 1976 consolidates earlier legislation dating back to January 1, 1927. Where the parents of an illegitimate person marry, or have married, whether before or after that

date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar-General information for re-registration of the birth of a legitimate child.

*Declarations of Legitimacy.*—A person claiming that he, his parents, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

*Rights and Duties of Legitimated Persons.*—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

*Property Rights of Illegitimate Children.*—By the Family Law Reform Act 1969 the rights of an illegitimate child on an intestacy are now broadly equated with those of a legitimate child. Also, in any disposition made after December 31, 1969, any reference to "children" or other relatives shall, unless the contrary intention appears, be construed as including any person who is illegitimate or who is related through another person who is illegitimate.

#### SCOTLAND

*Illegitimate Children (Scotland) Act 1930.*—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding inlying expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen.

By Scots Law an illegitimate child is legitimated by and on the date of the subsequent marriage of its parents and there is no objection to there having been an impediment to the marriage of the parents at the time of the child's conception—see the Legitimation (Scotland) Act 1968, which came into operation on June 8, 1968, on which date thousands of existing illegitimate children were regarded as legitimated. By the Registration of Births, Deaths and Marriages (Scotland) Act 1965, a child so legitimated, who has already been registered as illegitimate, may be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

The Law Reform (Miscellaneous Provisions) (Scotland) Act 1968, gives an illegitimate child full rights of succession (including legitim) in the estate of both parents, while the father and mother share equally in the estate of their illegitimate child. Unless expressly excluded, a reference in a deed executed on or after November 25, 1968, to a relationship, e.g., "issue" or "children" is presumed to include illegitimate children.

#### MARRIAGE

##### A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. **MARRIAGE BY BANNS.**—The Marriage Act 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the banns are to be published, during evening service. Where the parties reside in different parishes, the banns must be published in both. Under the Act, banns may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of banns is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the banns become useless, and the parties must either obtain a licence (see below), or submit to the republication of banns.

2. **MARRIAGE BY LICENCE.**—Marriage licences are of two kinds:—

- (i) *A Common Licence*, dispensing with the necessity for banns, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 The Sanctuary, S.W.1), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishop's Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to six pounds. *No previous notice is required and the licence is available as soon as it is issued.* Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place

of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

- (ii) A *Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman may be invited to perform the service.

#### B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (*e.g.*, a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (*see above*—in this case the marriage can only be *without licence*).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (*without licence*)—if both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.
- (ii) Marriage by certificate (*with licence*)—one notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (*see below*) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

#### ISSUE OF CERTIFICATE:

- (i) *Without licence*.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With licence*.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

#### SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building*.—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized

person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

(ii) *In a Register Office.*—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar or a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Register Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.

(iii) *Other Cases.*—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

#### C.—MARRIAGE UNDER REGISTRAR GENERAL'S LICENCE

The main purpose of the Marriage (Registrar General's Licence) Act 1970, which came into force on January 1, 1971, is to enable non-Anglicans to be married in unregistered premises where one of the persons to be married is seriously ill, is not expected to recover and cannot be moved to registered premises. A fee of £15 is payable to the Registrar General for the licence, though he has power to remit this in whole or in part to avoid hardship.

#### MISCELLANEOUS NOTES

*Consanguinity and Affinity.*—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

*Minors.*—Persons under 18 years of age are generally required to obtain the consent of certain persons (see Marriage Act 1949, section 3 and 2nd Schedule as amended by the Family Law Reform Act 1969). Where both parents are living, both must consent, where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, e.g., the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act *prohibits* any marriage where either party is under 16 years of age.

#### D.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate *with* licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

#### MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties. The Marriage (Scotland) Act 1977, which came into force on January 1, 1978, states or restates the law in convenient form. References in this section are to that Act.

*Impediments to Marriage.* These are (a) Nonage, i.e., where either party is under the age of 16. (b) Forbidden degrees of relationship (Section 2). (c) Subsisting previous marriage. (d) Incapacity to understand the nature of the contract. (e) Both parties of the same sex. (f) Non-residence, i.e., if the requirements of prior residence of one or other of the parties in Scotland have not been complied with. The Act also states the grounds on which certain marriages may be declared void but this is amended by the Law Reform (Miscellaneous Provisions) (Scotland) Act 1980 which prevents a marriage being rendered void solely due to the failure to comply with certain formalities, provided the particulars of that marriage are entered in a register of marriages by or at the behest of an appropriate registrar.

Marriages may be regular or irregular, thus:—

#### REGULAR MARRIAGES

A regular marriage is one which is celebrated by a Minister of Religion or authorised Registrar or other celebrant specified in the Act. The parties must submit to the District Registrar a statutory notice of intention to marry. The Registrar will then enter the parties' names and particulars in the Marriage Notice Book which must also show the intended date of the marriage. He must then display the notice of intention to marry in a prominent public place until the intended date, and any person claiming an interest may lodge written objections thereto with the Registrar (Section 5). The Registrar, on being

satisfied that there are no legal impediments to the marriage, may then issue to either or both parties a Marriage Schedule, which should be produced to the celebrant of the marriage. After the ceremony the marriage must be registered with the Registrar General for inclusion in the Register of Births, Deaths and Marriages, within three days.

#### IRREGULAR MARRIAGES

Since the Marriage (Scotland) Act 1939 the only form of irregular marriage to be recognised by law—viz., marriage by habit and repute, remains competent under the 1977 Act. If the parties live together constantly as husband and wife and are held to be such by the general repute of the neighbourhood and among their friends and relations, then there may arise a presumption from which marriage can be inferred. Before such a marriage can be registered, however, a decree of declarator of marriage must be obtained from the Deputy Principal Clerk of the Court of Session. It is the duty of the Deputy Principal Clerk to register the decree as soon as it is granted.

#### JURY SERVICE

Every local or parliamentary elector between the ages of eighteen and sixty-five who has resided in the United Kingdom, Channel Islands or Isle of Man for at least five years since he attained the age of thirteen will be qualified to serve on a jury unless he is "ineligible" or "disqualified".

Ineligible persons include those who have at any time been judges, magistrates and certain senior court officials, those who within the previous ten years have been concerned with the law (such as barristers and solicitors and their clerks, court officers, coroners, police, prison and probation officers); priests of any religion and vowed members of religious communities; and certain sufferers from mental illness.

Disqualified persons are those who have at any time been sentenced by a Court in the United Kingdom, Channel Islands or Isle of Man, to a term of imprisonment exceeding five years, or who have in the previous ten years served any part of a sentence exceeding three months or been sentenced to Borstal.

Some others are excusable as of right. These include members and officers of the Houses of Parliament, full-time serving members of the forces (including Women's forces) and registered and practising members of the medical, dental, nursing, veterinary and pharmaceutical professions and any person who has served on a jury in the two years before he is summoned. In other cases the court may excuse a juror at its discretion (e.g., where the service would be a hardship to the juror).

If a person serves on a jury knowing himself to be disqualified or ineligible he is liable to be fined up to £400 or £100 respectively.

A juror is entitled to subsistence and travelling expenses, compensation for other expenses incurred in consequence of attendance for jury service, loss of earnings and loss of national insurance benefits, but certain maximum figures (which are revised from time to time) are laid down.

A verdict of a jury must normally be unanimous but after two hours consideration (or such longer period as the Court thinks reasonable), a majority verdict is acceptable if ten jurors agree to it (or nine if the size of the jury has been reduced to ten, e.g., by illness during the trial).

Jury trial is now very unusual in civil cases but a person charged with any but the least serious crimes

is entitled to be tried by a jury. The defendant may object to any juror if he can show that that juror ought not to be on the jury (e.g., because he is ineligible or is biased against him) and may object to three jurors without giving any reason.

#### JURY SERVICE IN SCOTLAND

It is the duty of the sheriff principal of each sheriffdom, in respect of each sheriff court district in his sheriffdom, to maintain a book, known as the "general jury book", containing the names and designations of persons within the district who are qualified and liable to serve as jurors. The book, which is compiled from information which every householder is required to provide, is kept open for the inspection by any person, upon payment of a nominal fee, at the sheriff clerk's office for the district. Part II of the Juries Act 1949 (amended by regulations following thereon and by the Law Reform (Miscellaneous Provisions) (Scotland) Act 1980) applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors and for loss of earnings.

The number of a jury in a civil cause in the Court of Session is twelve and in the Sheriff Court seven. In a criminal trial the number is fifteen.

#### QUALIFICATIONS

Under S.1 of the Law Reform (Miscellaneous Provisions) (Scotland) Act 1980, every man or woman between the ages of 18 and 65 who is for the time being registered as a parliamentary or local government elector and who has been ordinarily resident in the United Kingdom, the Channel Islands or the Isle of Man for any period of at least five years since attaining the age of 13 years, is qualified to serve on a jury.

Ineligible persons include those who at any time within the past ten years have been judges of the supreme courts, sheriffs and certain other senior court officials, those who at any time within the past five years have been concerned with the administration of justice (such as advocates and their clerks, solicitors, court staff, police officers, prison officers, sheriff officers, procurator fiscals, and members of parole boards and children's panels), and certain sufferers from mental illness.

The same rules for disqualified persons operate in Scotland as in England. Those excusable as of right are members and officers of the Houses of Parliament, full time serving members of H.M. naval, army and air forces, registered and practising members of the medical, dental, nursing, veterinary and pharmaceutical professions, ministers of religion and other persons in holy orders, and any person who has attended for jury service in the past five years.

If a person serves on a jury knowing himself to be disqualified or ineligible, he is liable to be fined up to £1,000 or £200 respectively. Jurors failing to attend without good cause are liable to a maximum fine of £200.

#### LANDLORD AND TENANT ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the position is complicated by numerous statutory provisions. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important provisions include:—

- (1) As to agricultural holdings—the Agricultural

Holdings Act 1948 and later statutes. Among other things, these Acts regulate the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

The Agriculture (Miscellaneous Provisions) Act 1976, contains provisions for succession on the death of a tenant of an agricultural holding. Subject to certain conditions and qualifications, a member of a deceased tenant's family (as defined in the Act) can within three months of the death apply to the Agricultural Land Tribunal for a direction entitling him to a tenancy of the holding.

(2) As to business premises—the Landlord and Tenant Acts 1927 and 1954, and the Law of Property Act 1969, Pt. I. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to dwelling houses. The complicated mass of legislation is now mainly embodied in the Rent Act 1977, which does not extend to Scotland or Northern Ireland. If the house is within the Act, a tenant has a personal right to reside there, and he may only be ousted on certain grounds.

A number of amendments to the 1977 Act have been made by the Housing Act 1980.

Tenancies with full Rent Act protection are known as regulated tenancies. The maximum rent recoverable under such a tenancy is the rent agreed between the landlord and tenant, unless a fair rent has been registered, in which case that is the maximum rent recoverable. Application for the registration of a fair rent may be made by either the landlord or tenant, to the Local Rent Officer, and appeal against his decision lies to the Rent Assessment Committee.

(4) As to dwelling houses with resident landlords. The Rent Act 1974 gave tenants of dwellings let furnished the same security of tenure as those of unfurnished dwellings unless the landlord lived in part of the house. In the latter case, and in the case of a tenancy of a dwelling granted by a resident landlord after August 13, 1974, the tenancy will usually be outside full Rent Act protection, but may fall within the restricted contract provisions of the Rent Act 1977. In this event, the landlord or the tenant may apply to the Rent Tribunal for a reasonable rent to be registered, and once registered, this is the maximum rent recoverable.

(5) The Protection from Eviction Act 1977 provides that if any person with intent to cause the residential occupier of any premises to give up the occupation thereof does any act calculated to interfere with the peace or comfort of the residential occupier or members of his household, he shall be guilty of an offence. A further provision prevents a landlord enforcing a right to possession against a tenant (who is not protected by any security of tenure legislation) without a court order, and there are special rules in such cases relating to agricultural tenancies.

(6) A notice to quit any dwellinghouse must be given at least four weeks before it is to take effect, and must be in writing and in the prescribed statutory form.

(7) Part I of the Landlord and Tenant Act 1954, applies to most tenancies of houses for over twenty-one years at a ground rent. Where it applies, the contractual tenancy is continued until brought to an end in the manner prescribed by the Act, and in

effect the landlord can only get possession on limited grounds.

Further, under the Leasehold Reform Act 1967, tenants of houses under leases for over twenty-one years at a rent less than two-thirds of the rateable value of the house are in most cases given a right to purchase the freehold or to take an extended lease for a term of fifty years, provided the tenant at the time when he seeks to exercise the right has been occupying the house as his residence for the last three years or for periods amounting to three years in the last ten years.

(8) Full Rent Act protection is available only if a house is let on a tenancy, so that if the occupier of a house has a mere licence to occupy, he does not have Rent Act protection. Further, even if he has a tenancy, he will not be Rent Act protected if the rent payable is less than two-thirds of the rateable value of the house. For these reasons, many occupants of houses owned by farmers and occupied by farm workers did not enjoy full security of tenure. The Rent (Agriculture) Act 1976 contains detailed provisions conferring security of tenure on certain agricultural workers housed by their employers and on their successors on death.

(9) Under the Housing Act, 1961 (which does not extend to Scotland), in a lease of a dwelling-house granted after October 24, 1961, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

(10) The Housing Act 1980 gives security of tenure to tenants of local authorities and certain other bodies. Further, and subject to certain conditions, such tenants may have the right to purchase their houses or to take a long lease of their flats.

## SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of the Leases Act 1449, a contract binding the landlord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act 1949 (amended by the Agriculture Act 1958), which is a consolidating Act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949 gives a measure of security to tenants of shops. This Act

enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the 1949 Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act extends to premises held by the Crown or Government Departments, either as landlord or tenant.

The Housing (Scotland) Act 1969 and the Rent (Scotland) Act 1971, as amended by the Rent Act 1974, define controlled tenancies and regulated tenancies, both furnished and unfurnished, and lay down the system by which a landlord or tenant may obtain from the Rent Officer registration of a fair rent. The Acts also give to the tenants either of furnished or unfurnished lets a substantial degree of security of tenure. There are, however, certain exceptions; thus, they do not apply to tenancies where the interest belongs to the Crown or to a Government Department or to a local authority, a development corporation of a new town or a Housing Corporation. There must be a true tenancy for the Acts to apply. They do not apply to licensees such as lodgers or persons allowed to occupy houses on a grace and favour basis or to service occupiers. The Acts define the circumstances under which a landlord may apply for increased rent as a consequence of having carried out improvements to his property and also lay down the system of phasing of such rent increases. On the death of a statutory successor to a tenancy the tenancy may pass for a second time to a member of the family or a relative who has been in residence in the house for a period of at least six months. The Acts also lay down the duties and functions of Rent Officers and Rent Assessment Committees with regard to unfurnished accommodation and of Rent Tribunals for furnished accommodation.

The Tenants Rights, Etc. (Scotland) Act 1980 contains a number of important provisions and deals mainly with the rights of public sector tenants to purchase the houses which they occupy. S. 46 converts all remaining controlled tenancies into regulated tenancies and s. 34 creates a particular type of protected tenancy known as a "short tenancy."

It also makes provisions in relation to housing rents and connected tenancies; the Act makes provision for a tenant's right to security of tenure and to a written lease. It also allows for amendment to the Housing Bill by introducing a landlord's right, in certain circumstances, to refuse to sell a house designed or adapted for occupation by the elderly to a tenant who would otherwise have the right to buy.

## LEGAL AID

### LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid Act 1974 (as amended) is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the service is contained in the Act itself and the Regulations made thereunder, administered by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, Lands Tribunal, Restrictive Practices Court, before the Commons Commissioners, and civil proceedings in Magistrates' Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would

gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation are excepted from the scheme, as are also relator actions and election petitions. It is generally not available for obtaining the decree in undefended divorce and judicial separation, although the Legal Advice and Assistance Scheme (*post*) will be, and Legal Aid is still available to deal with property, custody disputes etc., arising in the suit.

Where a person is concerned in proceedings only in a representative, fiduciary or official capacity, his personal resources are not to be taken into account in considering eligibility for legal aid. Apart from this, eligibility in civil proceedings depends upon an applicant's "disposable income" and "disposable capital". The figures change frequently; particulars can be obtained from a solicitor, the Law Society or a Citizens' Advice Bureau. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital part of the value of the house in which the applicant resides, of furniture and household possessions; allowances are made in respect of dependants. Except in cases where the spouses are living apart, or have a contrary interest, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the Department of Health and Social Security, and will be referred to a General Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid should apply for a certificate to the appropriate General Committee for the area in which s/he resides; if resident elsewhere application should be made to a General Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel from a panel. The costs of the assisted person's solicitor and counsel will be paid out of the legal aid fund. The court may order that the costs of a successful unassisted party shall be paid out of the legal aid fund.

In an urgent case, say of domestic violence, or to restrain the kidnapping abroad of a child, Legal Aid may be granted without the applicant's means being fully investigated beforehand. If on a full examination later he is found financially ineligible he is liable to pay all the costs incurred on his behalf.

### LEGAL ADVICE AND ASSISTANCE

The Scheme is governed by the Legal Aid Act 1974 (as amended).

Under this legal advice and assistance scheme a client may obtain such advice or assistance as is normally provided by a solicitor and if necessary the advice of a barrister may be obtained, but, with the exception of domestic proceedings in a magistrates' court (see below) the scheme does not extend to taking any step in any proceedings before any court or tribunal. Where legal aid is available for civil proceedings (see above) or in criminal cases (see below) the scheme covers work done in making application for such legal aid.

A person is eligible for advice or assistance under the scheme provided his disposable capital and his disposable income do not exceed limits in force from time to time or if he receives Supplementary Benefit or Family Income Supplement. For a married man or person with children or other dependants deductions will be made from gross income and capital and

allowances are made in respect of income tax, National Insurance contributions, etc. It is intended that the financial limits shall approximate to those applying for legal aid in civil proceedings (see above). Except when they are separated or have conflicting interests the means of husband and wife will be aggregated for the purpose of determining financial eligibility. As in the case of Legal Aid, depending on his means, a person may be called upon to pay a contribution towards the costs of work done for him. Particulars may again be obtained from a solicitor, the Law Society or a Citizens' Advice Bureau.

Solicitor's costs and expenses, which should not together exceed £40 (V.A.T. exclusive), or £75 in the case of divorce etc. (not applicable to Scotland, where the £40 limit still applies) without leave of the Area Legal Aid Committee, will be paid out of the client's contribution and any monies recovered in respect of costs or damages from another party and the balance will be paid by the Legal Aid Fund.

The Act also extends the scheme to cover the costs of a solicitor who is present within the precincts of a magistrates' court or county court and is requested by the court to advise or represent a person who is in need of help.

Since April 1980 the Scheme has been enlarged to cover the cost of representation in domestic proceedings in a magistrates' court. Subject to financial eligibility limits, application is made to the area or local committee for "approval of assistance by way of representation" which will replace legal aid for such proceedings. However the £40 costs limit referred to above will not apply. An applicant who is outside the financial limits but eligible for *legal aid* will still have to apply for a legal aid certificate as before.

#### LEGAL AID IN CRIMINAL CASES

The Legal Aid Act 1974 Part II provides for legal aid in criminal proceedings. A criminal court (e.g. magistrates' court, Crown Court) has power to order legal aid to be granted where it appears desirable to do so in the interests of justice. The court shall make an order in certain cases, e.g., where a person is committed for trial on a charge of murder. However, the court may not make an order unless it appears to the court that the person's means are such that he requires assistance in meeting the costs of the particular proceedings in question. Application should be made to the appropriate court where proceedings are to take place.

An applicant may be required to make a contribution towards the costs of the action. In order to ascertain the amount of this contribution he will have to produce written evidence of his means. Investigation of means may be referred to the D.H.S.S. who will report to the court. No contribution will be required from a person who has insufficient means.

Any practising barrister or solicitor may act for a legally aided person in criminal proceedings unless excluded by reason of misconduct. In general where legal aid is given it will normally include representation by both counsel and solicitor. However, in connection with magistrates' courts, representation will be by solicitor alone unless it is a serious offence.

Where any doubt arises about the grant of a legal aid order that doubt is to be resolved in favour of the applicant. The court also has power to amend or revoke a legal aid order. Legal aid may also be granted in connection with appellate proceedings, e.g., on appeal to the Criminal Division of the Court of Appeal under the Criminal Appeal Act 1968.

#### SCOTLAND CIVIL PROCEEDINGS

The Legal Aid (Scotland) Act 1967 and the Legal Advice and Assistance Act 1972 form the basis of a scheme to provide legal advice in most civil actions in the House of Lords on appeals from the Court of Session, in the Court of Session, the Lands Valuation Appeal Court, the Scottish Land Court, the Employment Appeal Tribunal, the Sheriff Court, the Restrictive Practices Court and Lands Tribunal for Scotland.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) The decision of the Supplementary Benefits Commission is final as to financial eligibility. A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. In a case where litigation is not immediately necessary, the client can seek advice under the Legal Advice and Assistance Act 1972 which is similar to the legal advice and assistance provisions of the Legal Aid Act 1974 (see above). In an instance where litigation is expected, application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor. He is required to prepare for the signature of the applicant a memorandum setting forth the grounds of the proposed action, and submit the same along with supporting documentation and relevant application forms to the Committee. Investigation into the applicant's financial means is carried out by the Supplementary Benefits Commission after the Committee has considered the memorandum and accompanying papers and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action. The Legal Aid (Scotland) Act 1967 provides for the payment (to a limited extent) out of the legal aid funds of expenses incurred by successful opponents of legally aided litigants.

#### LEGAL ADVICE

Legal advice, as distinct from legal aid in proceedings, is available to anyone in Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England—the Scottish scheme being administered under the Legal Advice and Assistance Act 1972.

#### CRIMINAL PROCEEDINGS

Legal Aid in criminal cases is administered under the Legal Aid (Scotland) (Criminal Proceedings) Scheme and Regulations, 1975.

Subject to the financial eligibility of the applicant and the merits of his case, Legal Aid is available for proceedings in the High Court of Justiciary, the Sheriff Court and the District Court, as well as for appeals from those courts. Separate lists of practitioners prepared to act on behalf of assisted persons are kept, as regards counsel, by the Faculty of Advocates, and, as regards solicitors, by the Supreme Court and Local Legal Aid Committees of the Law Society of Scotland. Generally, an applicant may nominate to act on his behalf any solicitor whose name appears on the lists. The Scheme also provides for a rota of Duty Solicitors to act for persons taken into custody on homicide charges and persons who are in custody awaiting the first hearing of their case before the Sheriff or District Court.

Applications for Legal Aid must normally be made on the prescribed form to the clerk of the court in question and an applicant is required to provide therein particulars of the merits of his case and his

financial circumstances. Where less than 7 days before his trial an accused lodges an application it shall be refused unless, on special cause shown, the court decides the application to be timeously made. In certain cases, i.e. where a person is in custody on a charge of serious crime, an oral application to the clerk of court will be sufficient. Applications are dealt with by the courts themselves and the results communicated to the relevant Committee of the Law Society. An award may be made subject to a contribution to the Legal Aid Fund. Where an applicant has a right to legal representation at the expense of a third party—e.g. a Trade Union—he will be refused Legal Aid, although a person with a high income may be awarded Legal Aid if the Court is satisfied that he would be unable without grave financial hardship to meet the costs of his defence.

A solicitor acting for an assisted person in a murder trial or appeal may instruct without the prior sanction of the Law Society both senior and junior counsel. In all other cases before the High Court only junior counsel may be instructed without prior sanction.

### TOWN AND COUNTRY PLANNING

The Town and Country Planning Act 1971 (consolidating earlier Acts) contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Under the Development Land Tax Act 1976 a charge to development land tax may arise where a person realises development value by a disposal of an interest in land in the U.K. on or after August 1, 1976.

*What is Development:—*

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

*Examples of what is not deemed Development:—*

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior, with the exception that since December 5, 1968, any expansion, or works begun for the expansion, of a building below ground level constitutes development.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

*Planning Permission.*—Application for such permission is not always necessary, as the Secretary of State may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1977 as amended in 1981, specifies a number of types of development for which no permission is usually required, e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 70 cubic metres or 15 per cent, whichever is greater, subject to a maximum of 115 cubic metres.

Appeal against refusal of permission lies to the Secretary of State and from his decision, in limited

circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

### SCOTLAND

The Town and Country Planning (Scotland) Act 1972 consolidates the statute law relating to town and country planning in Scotland.

The Act contains provisions for an appeal to the Secretary of State against the refusal of planning permission. The decision of the Secretary of State is final.

Sections 87 and 92 of the Local Government, Planning and Land Act 1980 contain important provisions on planning applications and, unlike certain parts of this Act, extend to Scotland.

### VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the most important of which are the Act of 1949 (as amended) and the Act of 1969. Those entitled to vote as electors at a parliamentary election in any constituency are all persons resident there on the qualifying date who, at that date, are British subjects or citizens of the Republic of Ireland of at least 18 years of age and not subject to any legal incapacity to vote. Also, no person can use his vote unless he is on the Register of electors kept for the constituency. In addition, a person who is of voting age on the date of the poll at a parliamentary or local government election is entitled to vote, whether or not he is of voting age on the qualifying date. Accordingly, a qualified person will be entitled to be registered in a register of parliamentary electors or a register of local government electors if he will attain voting age within twelve months from the date on which the register is required to be published.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names: the registration officer determines the claims and objections which must generally be lodged by December 16 in each year. The procedure is slightly different for Northern Ireland.

Voters at a parliamentary or local government election must generally vote in person at the allotted polling station, except for those entitled to vote by post or at any polling station, and those for whom proxies have been appointed. Certain people can apply to be treated as absent voters at a parliamentary election and thus able to vote by post—among these are registered service voters, those unable by reason of blindness or other physical incapacity to go in person to the polling station, and those unable to go in person from their qualifying address to the polling station without making a journey by air or sea.

Unless entitled to vote by post, a person registered as a service voter may vote by proxy at a parliamentary or local government election. A proxy may also be appointed by a registered elector who is unable to go in person to the polling station by reason of the general nature of his occupation and who is likely to be at sea or out of the United Kingdom on the date of the poll, provided he applies to be treated as an absent voter. The appointment of a person to vote as proxy at parliamentary elections has effect also for the purposes of local government elections.

## INCOME TAX 1982-83

## INTRODUCTION

Income tax is charged on the total income of individuals for a year of assessment commencing on April 6 and ending on the following April 5. The rates of tax and the calculation of liability will frequently differ as between one year of assessment and another. The following information is confined to the year of assessment 1982-83, ending on April 5, 1983.

Liability is determined by establishing the taxable income for a year of assessment. The income may be reduced by an individual's personal allowances and reliefs. The first slice of taxable income remaining is assessable to income tax at the basic rate of 30 per cent. The rates of tax progressively increase and eventually reach 60 per cent on the slice of income exceeding £31,500. The full rates of income tax chargeable are as follows:

On the first £12,800	30 per cent
On the next £2,300	40 per cent
On the next £4,000	45 per cent
On the next £6,200	50 per cent
On the next £6,200	55 per cent
On the remainder	60 per cent

Where investment income exceeds £6,250 an investment income surcharge of 15 per cent will be payable on the excess. In those cases where an individual's income is sufficiently substantial to attract the maximum rate of 60 per cent and also the investment income surcharge of 15 per cent aggregate liability arises on the top slice at 75 per cent.

The tables which follow show the income tax payable for 1982-83 by an individual on the amount of income specified, after deducting the personal allowance and age allowance. The taxpayer may, however, be entitled to further reliefs and allowances which reduce the tax payable below the amount shown in the tables.

Trustees administering settled property are also chargeable to income tax at the basic rate of 30 per cent. Where the trustees retain discretionary powers there will also be liability to the investment income surcharge at 15 per cent. Companies residing in the United Kingdom are not liable to income tax but suffer corporation tax on income, profits and gains.

The charge to income tax broadly arises on all taxable income accruing from sources in the United Kingdom. Individuals who are resident in this territory may also become liable on income arising overseas. An individual is resident in the United Kingdom if he or she normally resides here. Persons not normally residing in the United Kingdom may become resident if they visit this territory for periods which average three months or more throughout a period of years. The existence of a place of abode in the United Kingdom may produce residence if visits of any duration are made.

Income arising overseas will often incur liability to foreign taxation. If that income is also chargeable to United Kingdom income tax, excessive liability may well arise. The United Kingdom has concluded Double Taxation Agreements with many overseas territories which ensure that the same slice of income is not doubly assessed. In the absence of such an agreement, foreign tax suffered can usually be relieved when calculating liability to income tax.

The special rules for taxing income derived by a husband and wife are examined later.

## INCOME TAXABLE

Income tax is assessed and collected under several Schedules. Each Schedule determines the extent of liability and establishes the amount to be included in taxable income. In some instances the actual income arising in a year of assessment will be charged to income tax for that year. A different basis of assessment may arise for income taxable under Cases I to V of Schedule D. Frequently, income assessable under these Cases will be that arising in a previous year or period but there are special rules where a new source is acquired or an existing source discontinued. The contents of the various Schedules are shown below:

**Schedule A.**—Tax is charged on annual profits from the ownership or occupation of land in the United Kingdom. This will include rents, ground rents and other income arising from land. Expenditure incurred by the landlord on maintenance, repairs, insurance and management can be subtracted from the annual profits. This Schedule does not include profits from farming, market gardening or woodlands, nor does it extend to mineral rents and royalties. Premiums arising on the grant of a lease for a period not exceeding fifty years are assessed to income tax. However, the amount of the taxable premium may be reduced by 2 per cent for each year, after the first year, of the leasing period. Income from furnished lettings may be assessed under Schedule A, but it is possible to assess profits derived from letting furniture and providing services under Case VI of Schedule D.

**Schedule B.**—Assessment is confined to woodlands in the United Kingdom managed on a commercial basis and with a view to the realisation of profits. The assessment will be based on one-third of the annual value. The occupier of woodlands retains the option of being assessed under Case I of Schedule D on profits arising from management.

**Schedule C.**—This Schedule is confined to interest or dividends on Government or public authority funds and certain payments made out of the public revenues of overseas countries.

**Schedule D.**—This Schedule is divided into six Cases as follows:

*Cases I and II.*—Profits arising from trades, professions and vocations, including farming and market gardening. Where an individual carrying on a business is absent from the United Kingdom for not less than thirty qualifying days in a year of assessment the amount of profits chargeable to tax may be reduced. Capital expenditure incurred on assets used for business purposes will often produce an entitlement to capital allowances which reduce the profits chargeable. These profits may also be reduced following the submission of claims, notably to obtain stock relief.

*Case III.*—Interest on Government Stocks not taxed at source (e.g. War Loan and British Savings Bonds), bank deposit interest and discounts. Interest up to £70 on ordinary National Savings Bank deposits is exempt from income tax. The exemption applies to both husband and wife separately. Interest on National Savings Bank Special Investment Accounts is not exempt.

*Cases IV and V.*—Interest from overseas securities, rents, dividends and all other income. Assessment is based on the full amount arising, whether

## (1) SINGLE PERSONS (UNDER 65 YEARS OF AGE)

Income	Income All Earned		All Investment Income	
	Income Tax	Average Rate	Income Tax	Average Rate
£	£	per cent	£	per cent
2,000	130	6.5	130	6.5
2,500	280	11.2	280	11.2
3,000	430	14.3	430	14.3
3,500	580	16.6	580	16.6

6,000	1,330	22.2	1,330	22.2
7,000	1,630	23.3	1,743	24.9
8,000	1,930	24.1	2,193	27.4
9,000	2,230	24.8	2,643	29.3
10,000	2,530	25.3	3,093	30.9
15,000	4,094	27.3	5,406	36.0
20,000	6,261	31.3	8,323	41.6
25,000	8,727	34.9	11,540	46.2
50,000	23,231	46.5	29,793	59.6
100,000	53,231	53.2	67,293	67.3

remitted to the United Kingdom or retained overseas, but individuals who are either not domiciled in the United Kingdom or who are ordinarily resident overseas may apply the remittance basis. Overseas pensions are taxable but the amount arising may be reduced by 10 per cent for assessment purposes. Profits from trades, professions or vocations carried on overseas may be reduced by 25 per cent for assessment purposes.

*Case VI.*—Sundry profits and annual receipts not assessed under any other Case or Schedule. These may include insurance commissions, post-cessation receipts and numerous other receipts specifically charged under Case VI.

*Schedule E.*—All emoluments from an office or employment are assessable under this Schedule. There are three Cases as follows:

*Case I.*—This applies to all emoluments of an individual resident and ordinarily resident in the United Kingdom.

*Case II.*—Of application where the individual is not resident or ordinarily resident and extends to emoluments for duties undertaken in the United Kingdom.

*Case III.*—Applies to other emoluments remitted to the United Kingdom.

Special rules apply to emoluments received by non-domiciled employees employed by non-resident employers. In general, where the duties are performed in the United Kingdom such earnings will be assessable subject to a deduction of 50 per cent. The deduction is reduced to 25 per cent where the employee has been resident in the United Kingdom for at least nine out of the last ten years of assessment.

Although foreign earnings may be assessable under Case I where the employee is resident and ordinarily resident in the United Kingdom, a deduction of 100 per cent or 25 per cent may be available. The 100 per cent deduction can be obtained where duties are performed overseas for a continuous period reaching or exceeding 365 days. A limited deduction of 25 per cent applies where the employee is absent from the United Kingdom for 30 or more qualifying days in the year of assessment. An alternative deduction of 25 per cent will be granted where emoluments arise

from employment with a foreign employer and all the duties are performed outside the United Kingdom.

The emoluments assessable under Schedule E include all salaries, wages, director's fees and other money sums. In addition, there is a wide range of benefits which must also be added to taxable emoluments. These include the provision of living accommodation on advantageous terms and advantages arising from the use of vouchers. From April 6, 1983, payments received under a sick pay scheme will be taxable where, or to the extent that, these are attributable to contributions made by the employer, also from this date sickness benefit arising under the state scheme will be chargeable to tax.

Further taxable benefits accrue to directors and employees receiving emoluments of £8,500 or more in the year of assessment. These benefits include the reimbursement of expenses, the availability of motor cars for private motoring and any other benefits provided at the employer's expense. From April 6, 1983, where an employer finances the cost of petrol or other fuel used for private motoring this will create an additional benefit.

In arriving at the amount to be assessed under Schedule E all expenses incurred wholly, exclusively and necessarily in the performance of the duties may be deducted. This includes fees and subscriptions to certain professional bodies and learned societies.

Compensation for loss of office and other sums received on the termination of an office or employment are assessable to tax. However, the first £25,000 may be excluded and only the balance remains chargeable, subject to some reduction in the amount of tax payable.

*Schedule F.*—This Schedule is concerned with company dividends and distributions. A United Kingdom resident company paying a dividend or distribution must account to the Revenue for advance corporation tax on the amount paid. A shareholder residing in the United Kingdom receives the dividend or distribution, together with a tax credit equal to the amount of advance corporation tax. The dividend or distribution is regarded as having suffered income tax, equal to the tax credit, at the basic rate, and where the shareholder is not liable, or fully liable, at this rate a repayment can be

## (2) MARRIED COUPLE (UNDER 65 YEARS OF AGE)

Income	Income all Earned		All Investment Income	
	Income Tax	Average Rate	Income Tax	Average Rate
£	£	per cent	£	per cent
2,500	16	0.6	16	0.6
3,000	166	5.6	166	5.6
3,500	316	9.0	316	9.0
4,000	466	11.6	466	11.6

7,000	1,366	19.5	1,479	21.1
8,000	1,666	20.8	1,929	24.1
9,000	1,966	21.8	2,379	26.4
10,000	2,266	22.7	2,829	28.2
15,000	3,766	25.1	5,079	33.9
20,000	5,865	29.3	7,927	39.6
25,000	8,287	33.1	11,100	44.4
50,000	22,703	45.4	29,265	58.5
100,000	52,703	52.7	66,765	66.8

obtained. Individuals liable at rates in excess of the basic rate will incur further liability. From April 6, 1982 some payments made by an unquoted trading company to redeem or purchase its own shares will not be treated as distributions.

## INCOME NOT TAXABLE

This includes interest on National Savings Certificates, scholarship income, bounty payments to members of the armed services and annuities payable to the holders of certain awards. Building society interest received is not liable to income tax at the basic rate but may be chargeable where the individual's income is sufficiently large to incur liability at rates in excess of the basic rate.

## SOCIAL SECURITY BENEFITS

Many Social Security benefits are not liable to income tax. These include the maternity allowance, sickness benefit, child benefit, war widow's pension, death grant, mobility allowance (from April 6, 1982) and numerous others. Among the limited range of benefits which are taxable is the retirement pension, widow's allowance and widowed mother's allowance. From July 5, 1982, unemployment benefit and supplementary benefit paid to the unemployed become chargeable to income tax, with limited exceptions.

State sickness benefits payable after April 5, 1983 will be chargeable to tax.

## PAY AS YOU EARN

The Pay As You Earn system is not an independent form of taxation but has been designed to collect income tax by deduction from most emoluments. When paying emoluments to employees an employer is usually required to deduct income tax and account for that tax to the Inland Revenue. In many cases this deduction procedure will fully exhaust the individual's liability to income tax, unless there is other income.

## PERSONAL ALLOWANCES

The following personal allowances are available to individuals and may be subtracted when calculating income chargeable to income tax:

**Personal Allowance.**—A single person is entitled to a personal allowance of £1,565. This is increased to £2,445 for a married man whose wife is living with or maintained by him. For the year of marriage the increased allowance will only be available if marriage occurs before May 6. The increased allowance is reduced by one-twelfth of £880 for each complete month preceding the marriage date.

The increased married man's allowance may be withdrawn where a wife's earning election is made (see "Husband and Wife" below).

**Age Allowance.**—A single person who has attained the age of 65 years and is in receipt of income not exceeding £6,700 receives an age allowance of £2,070. This is increased to £3,295 where a married man, or his wife living with him, has reached 65. If the income exceeds £6,700 the allowance is reduced by two-thirds of the amount of the excess. This reduction continues until the age allowance is reduced to the amount of the personal allowance. Age allowance is in substitution for, and not in addition to, the personal allowance.

**Wife's Earned Income Allowance.**—An allowance equal to the wife's earned income, but limited to a maximum of £1,565, may be obtained. This allowance is not granted in the year of marriage or where a wife's earnings election is made (see "Husband and Wife" below).

**Additional Personal Allowance.**—An allowance of £880 is available to a single person who has a qualifying child resident with him or her in the year of assessment. The allowance can also be obtained by a married man whose wife is totally incapacitated by physical or mental infirmity throughout the year and a child is similarly resident.

A "qualifying child" for 1982-83 must be born during the year, be under the age of 16 years at the commencement of the year, or over the age of 16 years at the commencement of the year and either receiving full-time instruction at a university, college, school or other educational establishment or undergoing training for a trade, profession or vocation throughout a minimum period of two years. It is also necessary that the child is the claimant's own or, if not such a child, was either

## (3) SINGLE PERSONS (OVER 65 YEARS OF AGE)

Income	Income all earned		All Investment Income	
	Income Tax	Average Rate	Income Tax	Average Rate
£	£	per cent	£	per cent
2,500	129	5·2	129	5·2
3,000	279	9·3	279	9·3
3,500	429	12·3	429	12·3

9,000	2,230	24·8	2,643	29·3
10,000	2,530	25·3	3,093	30·9
15,000	4,094	27·3	5,406	36·0
20,000	6,261	31·3	8,323	41·6
25,000	8,727	34·9	11,540	46·0
50,000	23,231	46·5	29,793	59·6
100,000	53,231	53·2	67,293	67·3

born during 1982-83 or under the age of 18 years at the commencement of the year and maintained by the claimant at his or her own expense during the whole of the succeeding twelve month period.

**Housekeeper Allowance.**—An allowance of £100 is available to a widow or widower having a relative residing to act as a housekeeper. This allowance is also available where a housekeeper is employed for a similar purpose.

**Son's or Daughter's Services Allowance.**—A person who, by reason of his or his wife's old age or infirmity, has to retain the services of a son or daughter is entitled to an allowance of £55.

**Dependent Relative Allowance.**—The maximum deduction for each dependent relative is normally £100 but an increased allowance of £145 may be claimed where the claimant is a woman (other than a married woman living with her husband). The allowance is reduced by £1 for every £1 by which the relative's own taxable income exceeds the basic National Insurance Retirement Pension. The relative must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's mother who may be widowed, living apart from her husband or divorced. Additionally, the relative must be maintained by the claimant. If more than one person provides support to the dependent relative the allowance must be divided between them.

**Blind Person's Allowance.**—An allowance of £360 is available to a single person if at any time during the year ending on April 5, 1983, that person was registered as blind on a register maintained by a local authority. The allowance will also be available to a married man if either he or his wife living with him is similarly registered. An increased allowance of £720 will be available if both husband and wife are registered blind persons.

**Widow's Bereavement Allowance.**—For the year of assessment in which a husband dies his surviving widow may obtain a widow's bereavement allowance of £880. It is a necessary requirement that the parties were living together immediately before death. The special widow's bereavement allowance is available only for the year of death and cannot be obtained in subsequent years.

**Life Assurance Relief.**—Although relief may be obtained for premiums paid on life assurance and other policies, this is not given through the tax system. To qualify for relief premiums must be paid on an approved policy providing life assurance or deferred annuities. Relief is confined to policies made by the payer and covering his own life or that of his or her spouse. Only policyholders residing in the United Kingdom can usually obtain relief and payments must be made to a United Kingdom company or friendly society or to a United Kingdom branch of an overseas company.

When paying premiums under a qualifying policy the payer will deduct and retain income tax at the rate of 15 per cent. The ability to retain deductions made in this manner is not affected by the payer's liability to income tax on taxable income. No restriction to the deduction procedure arises if aggregate premiums paid during a year of assessment do not exceed £1,500. Should premiums exceed this amount, relief will be confined to £1,500 or one-sixth of total income, whichever is the greater. Where sums deducted exceed this maximum limit, the excess must be accounted for to the Inland Revenue.

There may be some variation in this deduction procedure for small premiums payable to door-to-door collectors as it would obviously be impractical to operate the deduction scheme. If such premiums do not exceed £4 per four week period no relief will be given by deduction but increased benefits arise under the qualifying policy. Should premiums paid exceed £4 per four week period, the policyholder may either forego the deduction and obtain increased benefits or obtain a deduction of 15 per cent, thereby leaving the benefits undisturbed.

## OTHER DEDUCTIONS

In addition to personal allowances, which may reduce taxable income, other eligible deductions may be available to an individual. These include payments of interest.

In some instances interest paid by a business proprietor may be relieved when calculating profits chargeable to income tax under Case I or Case II of Schedule D. Many private individuals cannot obtain relief in this manner and must satisfy stringent

## (4) MARRIED PERSONS (OVER 65 YEARS OF AGE)

Income	Income all Earned		All Investment Income	
	Income Tax	Average Rate	Income Tax	Average Rate
£	£	per cent	£	per cent
3,500	61	1.7	61	1.7
4,000	211	5.3	211	5.3
4,500	361	8.0	361	8.0
5,000	511	10.2	511	10.2
6,000	811	13.5	811	13.5
7,000	1,171	16.7	1,284	18.3
8,000	1,666	20.8	1,929	24.1
9,000	1,966	21.8	2,379	26.4
10,000	2,266	22.7	2,829	28.2
15,000	3,766	25.1	5,079	33.9
20,000	5,865	29.3	7,927	39.6
25,000	8,287	33.1	11,100	44.4
50,000	22,703	45.4	29,265	58.5
100,000	52,703	52.7	66,765	66.8

requirements before relief will be forthcoming. In general terms, before interest can qualify for relief it must be annual, as opposed to short, interest or paid to a bank, stockbroker or discount house. Relief will not be available to the extent that interest exceeds a reasonable commercial rate and no relief will be forthcoming for interest on an overdraft.

For 1982-83 relief will be available on the following payments:

- (i) Interest on a loan to purchase or improve an interest in land owned by the individual and used as his only or main residence or similarly used by a dependent relative or a former or separated spouse. If the loan exceeds £25,000 relief is restricted to interest on that amount.
- (ii) Interest on a loan to purchase or improve an interest in land which is let or available for letting at a commercial rent. This interest is only capable of being deducted from rental income.
- (iii) Interest on a loan made to acquire an interest in a close company or in a partnership.
- (iv) Interest on a loan to a member of a partnership to acquire machinery or plant for use in the partnership business.
- (v) Interest on a loan to an employed person to acquire machinery or plant for the purposes of his employment.
- (vi) Interest on a loan made for the purpose of contributing capital to an industrial co-operative.
- (vii) Interest on a loan made to purchase an annuity where the loan is secured on land.
- (viii) Interest on a loan to personal representatives for the payment of capital transfer tax.

A new system of obtaining relief for most payments of mortgage interest will be introduced on April 6, 1983. This applies to interest paid to a building society, bank, insurance company and certain other persons. When making payments of this nature the payer will deduct and retain income tax at the basic rate. This will provide the payer with full relief at the basic rate and no other relief will be necessary, unless the payer is liable at rates in excess of the basic rate.

Many individuals contribute to pension schemes. The amount of their contributions may be deducted when establishing emoluments assessable under Schedule E.

Self-employed individuals and those who are not in pensionable employment may pay premiums on retirement annuity policies. The amount of these premiums may usually be relieved in calculating taxable income but limitations are placed on the amount available for relief.

#### HUSBAND AND WIFE

It is a general rule that the income of a married woman living with her husband will be aggregated with his income for the purpose of charging income tax. Aggregation does not, however, apply for the year of assessment in which the parties marry. For that year the husband will receive the personal allowance appropriate to a married man, although the amount of this allowance may require some restriction if marriage takes place after May 5. The wife will be taxed for the year of marriage as if she were a single person and no wife's earned income allowance can be obtained.

For subsequent years of assessment the incomes of husband and wife will be aggregated and if the husband does not satisfy the total tax liability the Inland Revenue may require the wife to pay the tax appropriate to her income.

Husband and wife may, however, claim to be separately assessed. This claim does not affect the total amount of income tax payable but allocates the liability between the parties. A quite different election may be made for separate assessment of wife's earnings. The effect of such an election is that the husband will be assessed on his income and on the wife's investment income and will receive the personal allowance appropriate to a single man. The wife will be separately assessed on her earned income and receive allowances as a single person. The wife's earnings election may be of advantage where the saving in higher rates of tax on the wife's income is greater than the increased tax resulting from the loss of the married personal allowance.

## CAPITAL GAINS TAX

## INTRODUCTION

A person is chargeable to capital gains tax on chargeable gains which accrue to him or her during a year of assessment ending on April 5. Liability extends to persons who are either resident or ordinarily resident for the year but special rules apply where a person permanently leaves the United Kingdom or comes to this territory for the purpose of acquiring residence. Non-residents are not liable to capital gains tax unless, exceptionally, they carry on a business in the United Kingdom through a branch or agency.

Chargeable gains accruing to companies are assessable to corporation tax and not to capital gains tax.

Capital gains tax is chargeable on the total of chargeable gains which accrue to a person in a year of assessment, after subtracting allowable losses arising in the same year. Allowable losses brought forward from some earlier year may be offset against chargeable gains but in the case of individuals this must not reduce the net chargeable gains for 1982-83 below £5,000.

## RATE OF TAX

Where the net chargeable gains accruing to an individual during 1982-83 do not exceed £5,000 there will be no liability to capital gains tax. If the net gains exceed £5,000 the excess is chargeable at the flat rate of 30 per cent.

Capital gains tax for 1982-83 falls due for payment on or before December 1, 1983. If the return or other information recording chargeable gains is delayed, interest may become chargeable at the rate of 12 per cent per annum from December 1.

## HUSBAND AND WIFE

In the year of marriage chargeable gains accruing to husband and wife are separately assessed. Each party may independently obtain the £5,000 exemption and there is no aggregation. For subsequent years, however, chargeable gains arising to a married woman living with her husband are assessed and charged on the husband, unless an election for separate assessment is made. This election will not reduce the aggregate tax payable but merely apportion liability between the spouses on an equitable basis.

## DISPOSAL OF ASSETS

Before liability to capital gains tax can arise a disposal, or deemed disposal, of an asset must take place. This occurs not only where assets are sold or exchanged but applies on the making of a gift. There is also a disposal of assets where any capital sum is derived from assets, for example, where compensation is received for loss or damage to an asset.

The date on which a disposal must be treated as having taken place will determine the year of assessment in which the chargeable gain or allowable loss falls. In those cases where a disposal is made under an unconditional contract, the time of disposal will be that when the contract was entered into and not the subsequent date of conveyance or transfer. A disposal under a conditional contract or option is treated as taking place when the contract becomes unconditional or the option is exercised. Disposals by way of gift are undertaken when the gift becomes effective.

## VALUATION OF ASSETS

The amount actually received as consideration for the disposal of an asset will be the sum from which very limited outgoings must be deducted for the purpose of establishing the gain or loss. In some cases, however, the consideration passing will not accurately reflect the value of the asset and some other basis must be used. This applies, in particular, where an asset is transferred by way of gift or otherwise than by a bargain made at arm's length. Such transactions are deemed to take place for a consideration representing market value, which will determine both the disposal proceeds accruing to the transferor and the cost of acquisition to the transferee.

Market value represents the price which an asset might reasonably be expected to fetch on a sale in the open market. In the case of unquoted shares or securities it is to be assumed that the hypothetical purchaser in the open market would have available all the information which a prudent prospective purchaser of shares or securities might reasonably require if he were proposing to purchase them from a willing vendor by private treaty and at arm's length. This is an important consideration as the amount of information deemed to be available to a hypothetical purchaser may materially affect the price "reasonably" offered in an open market situation. The market value of unquoted shares or securities will usually be established following negotiations with the Shares Valuation Division of the Capital Taxes Office.

Special rules apply to determine the market value of shares quoted on the Stock Exchange.

## DEDUCTION FOR OUTGOINGS

Once the actual or notional disposal proceeds have been determined it only remains to subtract eligible outgoings for the purpose of computing the gain or loss. There is the general rule that any outgoings deducted, or which are available to be deducted, when calculating income tax liability must be ignored. Subject to this, deductions will usually be limited to—

- (a) the cost of the asset, together with incidental costs wholly and exclusively incurred in connection with the acquisition;
- (b) expenditure incurred wholly and exclusively on the asset in enhancing its value, being expenditure reflected in the state or nature of the asset at the time of the disposal, and any other expenditure wholly and exclusively incurred in establishing, preserving or defending title to, or a right over, the asset; and
- (c) the incidental costs of making the disposal.

Where the disposal concerns a leasehold interest having less than 50 years to run, any expenditure falling under (a) and (b) must be written off throughout the duration of the lease. This recognises that a lease is a wasting asset and at the termination of the leasing period will retain no value.

## INDEXATION ALLOWANCE

A special indexation allowance may be available where the disposal of an asset takes place after April 5, 1982. This allowance is based on increases in the retail prices index between March 1982, or twelve months after expenditure has been incurred (whichever is the later) and the month of disposal. The increase is applied to the items of expenditure in (a)

and (b) above, to determine the indexation allowance. The amount of this allowance is then subtracted from the gain arising on disposal. No indexation allowance is available when calculating losses, nor can the allowance convert a gain into a loss.

### EXEMPTIONS

There is a general exemption from liability to capital gains tax—

- (a) where the net gains of an individual for a year of assessment do not exceed £5,000; and
- (b) where the value of all gifts made by an individual in any year do not exceed £100.

The disposal of many assets will not give rise to chargeable gains or allowable losses and these include—

- (a) private motor cars;
- (b) certain Government securities retained for a minimum period of twelve months.
- (c) National Savings Certificates, Premium Bonds, Defence Bonds and National Development Bonds;
- (d) currency of any description acquired for personal expenditure outside the United Kingdom;
- (e) decorations awarded for valour;
- (f) betting wins and pools, lottery or games prizes;
- (g) compensation or damages for any wrong or injury suffered by an individual in his person or in his profession or vocation;
- (h) life assurance and deferred annuity contracts where the person making the disposal is the original beneficial owner;
- (i) dwelling-houses and land enjoyed with the residence which is an individual's only or main residence;
- (j) tangible movable property, the consideration for the disposal of which does not exceed £3,000;
- (k) certain tangible movable property which is a wasting asset having a life not exceeding 50 years;
- (l) assets transferred to charities and other bodies;
- (m) works of art, historic buildings and other assets;
- (n) assets used to provide maintenance funds for historic buildings;
- (o) assets transferred to trustees for the benefit of employees.

### DWELLING-HOUSES

Exemption will usually be available for any gain which accrues to an individual from the disposal of, or of an interest in, a dwelling-house or part of a dwelling-house which has been his only or main residence. The exemption extends to land which has been occupied and enjoyed with the residence as its garden or grounds. Some restriction may be necessary where the land exceeds one acre.

The gain will not be chargeable to capital gains tax if the dwelling-house, or part, has been the individual's only or main residence throughout the period of ownership, or throughout the entire period except for all or any part of the last two years. A

proportionate part of the gain will be exempt if the dwelling-house has been the individual's only or main residence for part only of the period of ownership.

Where part of the dwelling-house has been used exclusively for business purposes, part of the gain arising on disposal will not be exempt. It will be comparatively unusual for any part to be used exclusively for such a purpose, except perhaps in the case of doctors' or dentists' surgeries.

In those cases where part of a qualifying dwelling-house has been used to provide rented accommodation this may frequently be ignored when calculating exemption from capital gains tax, unless relatively substantial sums are involved.

Dwellings occupied by dependent relatives, separated or divorced former spouses, and also by beneficiaries under trusts, may also obtain the exemption.

### ROLL-OVER RELIEF

Persons carrying on business will often undertake the disposal of an asset and use the proceeds to finance the acquisition of a replacement asset. Where this situation arises a claim for roll-over relief may be made. The broad effect of such a claim is that all or part of the gain arising on the disposal of the old asset may be disregarded. The gain or part is then subtracted from the cost of acquiring the replacement asset. As this cost is reduced, any gain arising from the future disposal of the replacement asset will be correspondingly increased, unless of course a further roll-over situation then develops.

It remains a requirement that both the old and the replacement asset must be used for the purpose of the taxpayer's business. Relief will only be available if the acquisition of the replacement asset takes place within a period commencing twelve months before, and ending three years after, the disposal of the old asset, although the Board of Inland Revenue retain a discretion to extend this period where the circumstances were such that it was impossible for the taxpayer to acquire the replacement asset before the expiration of the normal time limit.

### GIFTS

Although the gift of an asset is deemed to be a disposal made for a consideration representing market value, a claim can frequently be made to avoid capital gains tax liability. This claim applies to the gift of all assets by one individual to a second individual, by an individual to trustees, by trustees to an individual, or between trustees, residing in the United Kingdom. The effect of the claim is similar to that arising following a claim for roll-over relief and the cost to the transferor will be reduced. Adjustments will be necessary where a transaction undertaken, otherwise than by way of bargain made at arm's length, involves some inadequate consideration.

A limited claim may also be made on the disposal of assets by an individual to some other person, perhaps a company. This claim is confined to the disposal of business assets, including shares in certain companies.

### RETIREMENT RELIEF

Relief is available to an individual who has attained the age of 60 years and disposes by way of sale or gift of the whole or part of a business. It does not necessarily follow that the disposal of isolated

assets will represent the disposal of the whole or part of a business. The main condition for granting this relief is that throughout a period of at least one year ending with the disposal the business has been owned either by the individual or by a trading company in which the individual retained a sufficient shareholding interest. The relief extends also to cases where an individual disposes by way of sale or gift of shares or securities of a company which was a trading company, the individual retained a sufficient shareholding interest, and he was engaged as a full-time working director for a period or at least one year before the time of disposal.

The maximum retirement relief is governed by the age of the individual at the time of disposal. The relief is nil on the sixtieth birthday and progressively increases to £50,000 at the age of 65. The amount of relief will then be governed by the period throughout which the various conditions have been satisfied, subject to a maximum of ten years. Where the disposal is of shares or securities of a company the available retirement relief may be limited if all assets retained by the company have not been used for business purposes.

#### ASSETS HELD ON APRIL 6, 1965

Capital gains tax is chargeable on gains which accrue from disposals undertaken after April 6, 1965. Special rules must therefore be applied to calculate gains and losses arising from the disposal of assets acquired on some earlier occasion.

This is often achieved by computing the overall gain and apportioning that gain equally throughout the period of ownership. Only that part of the gain attributable to the period commencing on April 6, 1965, and ending at the time of disposal will be chargeable to capital gains tax.

This time apportionment procedure may be withdrawn in certain circumstances. It cannot apply to

the disposal of quoted shares or securities, unit trust holdings or land retaining development value. Where time apportionment is otherwise available, an election can be made to treat the asset as having been acquired for a consideration representing market value on April 6, 1965. A comparison between this notional cost of acquisition and the eventual disposal proceeds will usually disclose the chargeable gain. Restrictions may have to be applied where the calculation produces a loss.

#### DEATH

No capital gains tax is chargeable on the value of assets retained at the time of death. However, the personal representatives administering the deceased's estate are deemed to acquire assets for a consideration representing market value on death. This ensures that any increase in value occurring before the date of death will not be chargeable to capital gains tax. If a legatee or other person acquires an asset under a will or intestacy no chargeable gain will accrue to the personal representatives, and the person taking the asset will be treated as having acquired it at the time of death for its then market value.

#### COMPANIES

Although companies are charged to corporation tax on any chargeable gains, those gains are calculated in a manner similar to that for individuals. The rate of corporation tax is, however, 52 per cent. In contrast, capital gains tax is charged at 30 per cent. To produce equality, chargeable gains of a company are reduced by 22/52nds for assessment purposes. This ensures that the remaining 30/52nds are chargeable at the rate of 52 per cent to produce an effective charge of 30 per cent. Companies cannot obtain the benefit of the annual £5,000 exemption available to individuals.

## CAPITAL TRANSFER TAX

### INTRODUCTION

Liability to capital transfer tax may arise on lifetime gifts and other dispositions and also on the value of assets retained at the time of death. The tax was introduced by the Finance Act 1975 but numerous changes have been made subsequently in the rates charged and in the calculation of liability.

An individual's domicile at the time of any gift or on death is an important matter. Domicile will generally be determined by applying normal rules but special considerations may be necessary where an individual was domiciled in the United Kingdom during 1974, or on a subsequent occasion, and eventually acquires a different domicile overseas. Where a person was domiciled in the United Kingdom at the time of a disposition, or on death, the location of assets is immaterial and full liability to capital transfer tax arises. Individuals domiciled outside the United Kingdom are, however, chargeable to capital transfer tax only on transactions affecting assets located in the United Kingdom.

The assets of husband and wife are not merged for capital transfer tax purposes. Each spouse is treated as a separate individual entitled to receive the benefit of his or her exemptions, reliefs and rates of tax. Where both husband and wife retain similar assets special "related property" provisions may require the merger of those assets for valuation purposes.

### LIFETIME DISPOSITIONS

Lifetime dispositions made after March 26, 1974, are vulnerable to capital transfer tax liability. Liability is measured by the "value transferred", which represents the difference between the value of an individual's estate immediately before and immediately following the transfer. It will sometimes be found that the value transferred considerably exceeds the value received by a donee or transferee. This may arise where an individual transfers part of a shareholding interest in an unquoted company. The fall in value reflected by the transfer may well substantially exceed the actual value of shares transferred.

Unless the donee satisfies any capital transfer tax becoming payable, the value transferred must be increased by the amount of that tax. This "grossing up" procedure may considerably increase liability to capital transfer tax.

A disposition is not a transfer of value if it can be shown that there was no intention to confer gratuitous benefit. This requires that the transaction was concluded on terms similar to those expected from persons dealing at arm's length.

### DEATH

Immediately before the time of death an individual is deemed to make a transfer of value. This transfer will comprise the value of assets forming part of the

deceased's estate after subtracting most liabilities. The "grossing up" procedure does not apply to the value of assets at the time of death.

#### SETTLED PROPERTY

Complex rules apply to establish capital transfer tax liability on settled property. Where a person is beneficially entitled to an interest in possession, that person will be deemed to "own" the property in which the interest subsists. It follows that, where the interest comes to an end during the beneficiary's lifetime and some other person becomes entitled to the property, the beneficiary is treated as having made a transfer of value. No liability will arise, however, where the property vests into the absolute ownership of the previous beneficiary. The death of a person entitled to an interest in possession will require the value of the underlying property to be added to the value of the deceased's estate.

In the case of other settled property where there is no interest in possession (e.g. discretionary trusts), liability to tax will arise on each ten-year anniversary. There will also be liability if property ceases to be held on discretionary trusts before the first ten-year anniversary date is reached or between anniversaries. The rate of tax suffered will be governed by several considerations including previous dispositions made by the settlor, transactions concluded by the trustees, and the period throughout which property has been held in trust. No liability arises for ten-year anniversaries falling before April 1, 1983, or exceptionally April 1, 1984. A reduced rate of capital transfer tax applies to distributions made out of a settlement created before March 27, 1974, if the distribution takes place before April 1, 1983.

Accumulation and maintenance settlements which require assets to be distributed not later than a beneficiary's twenty-fifth birthday may be exempt from any liability to capital transfer tax.

#### EXEMPT TRANSFERS

A wide range of exempt transfers are excluded from any liability to capital transfer tax. These apply to lifetime dispositions and, subject to restrictions, are of application to assets retained at the time of death. The exempt transfers are listed below:

**Transfers between Spouses.**—Transfers between husband and wife are usually exempt. However, if one spouse is domiciled in the United Kingdom and the other is not transfers will be exempt only to the extent that the total does not exceed £55,000. Unlike the requirement used for income tax and capital gains tax purposes, it is immaterial whether husband and wife are "living together".

**Annual Exemption.**—The first £3,000 of gifts and other dispositions made in a year ending on April 5 is exempt. If the exemption is not used, or not wholly used, in any year the balance may be carried forward to the following year only. A reduced figure of £2,000 applied for the year ending on April 5, 1981. This exemption has no application on death.

**Small Gifts.**—Outright gifts of £250 or less to any person in one year ending on April 5 are exempt. Before April 6, 1981, the first £250 of a larger gift was also exempt but this no longer applies. The exemption is not available on death.

**Normal Expenditure.**—A transfer made during lifetime and comprising normal expenditure is exempt. To obtain this exemption it must be shown that—

- (a) it was made as part of the normal expenditure of the transferor;
- (b) taking one year with another, it was made out of income; and
- (c) after allowing for all transfers of value forming part of normal expenditure, the transferor was left with sufficient income to maintain his or her usual standard of living.

**Gifts in consideration of marriage.**—These are exempt if they satisfy certain requirements. The amount allowed will be governed by the relationship between the donor and a party to the marriage. The allowable amounts comprise—

- (a) gifts by a parent—£5,000
- (b) gifts by a grandparent—£2,500
- (c) gifts by a party to the marriage—£2,500
- (d) gifts by other persons—£1,000

**Gifts to Charities.**—Gifts to charities are generally exempt from liability. However, gifts made on or within one year before the date of death are limited to £250,000.

**Gifts to Political Parties.**—Gifts to political parties which satisfy certain requirements are generally exempt. However, a limit of £100,000 is placed on gifts made on or within a period of one year before the date of death.

**Gifts for National Purposes.**—Gifts made to an extensive list of bodies are exempt from liability. These include—

- (a) The National Gallery;
- (b) The British Museum;
- (c) The National Trust for Places of Historic Interest or Natural Beauty;
- (d) The National Art Collections Fund;
- (e) The Nature Conservancy Council;
- (f) Any local authority;
- (g) Any university or university college in the United Kingdom.

A number of other gifts made for the public benefit are also exempt.

#### VALUATIONS

The valuation of assets is an important matter as this will establish the value transferred for lifetime dispositions and also the value of a person's estate at the time of death. The value of property will represent the price which might reasonably be expected from a sale in the open market. This price cannot be reduced on the ground that the whole property is placed on the market simultaneously and may therefore depress values.

In some cases it may be necessary to incorporate the value of "related property". This will include property comprised in the estate of the transferor's spouse, certain property previously transferred to charities and, for transactions taking place before March 10, 1981, certain property held on discretionary trusts. The purpose of the related property valuation rules is not to add the value of that property to the estate of the transferor. Related property must be merged to establish the aggregate value of the respective interests and this value is then apportioned, usually on a pro rata basis to the separate interests.

The value of shares and securities quoted on a stock exchange will be determined by extracting figures from the daily list of official prices.

Where quoted shares and securities are sold within a period of twelve months following the date of death a claim may be made to substitute the proceeds for the value on death. This claim will only be beneficial if the gross proceeds realized are lower than market value on death. A similar claim may be available for interests in land sold within a period of three years following death.

#### RELIEF FOR ASSETS

Special relief is made available for certain assets, notably woodlands, agricultural property and business property. The effect of this relief, which requires the submission of elections, is summarized below:

**Woodlands.**—Where woodlands pass on death the value will usually be included in the deceased's estate. However, an election may be made in respect of land in the United Kingdom on which trees or underwood are growing to delete the value of those assets. Relief is confined to the value of trees or underwood and does not extend to the land on which they are growing. Liability to tax will arise if and when the trees or underwood are sold on a future occasion.

**Agricultural property.**—Relief is available for the agricultural value of agricultural property. Such property must be occupied and used for agricultural purposes and relief is confined to the agricultural value. Where that value is increased by development potential no relief can be obtained on the excess value.

For transfers made or deaths occurring before March 10, 1981, relief was broadly confined to working farmers. The effect of this relief was to reduce the value transferred by 50 per cent.

Transfers made, or deaths occurring, on or after this date may obtain a deduction of 50 or 20 per cent. The higher deduction will be available if the transferor had vacant possession or could obtain that possession within a period of twelve months following the transfer. In other cases, notably including land let to tenants, the reduced deduction of 20 per cent will be available. The increased deduction of 50 per cent may also be obtained for certain agricultural property held on March 9, 1981.

It remains a requirement that the agricultural property was either occupied by the transferor for the purposes of agriculture throughout a two year period ending on the date of the transfer or was owned by him throughout a period of seven years ending on that date and occupied for agricultural purposes.

**Business Property.**—Where value transferred is attributable to relevant business property, that value may be reduced by a percentage. The reduction in value applies to—

- (a) property consisting of a business or an interest in a business;
- (b) shares or securities of a company which, either by themselves or together with other shares or securities owned by the transferor, gave the transferor control of the company immediately before the transfer. Control for this purpose may include that created by related property.
- (c) shares in a company which do not fall within (b) and are not quoted on a recognized stock exchange;

- (d) any land, building, machinery or plant which, immediately before the transfer, was used wholly or mainly for the purposes of a business carried on by a company of which the transferor had control; and
- (e) any land, building, machinery or plant which, immediately before the transfer, was used wholly or mainly for the purposes of a business carried on by a partnership of which the transferor was a partner.

For property falling within (a) or (b) the deduction is 50 per cent. A reduced deduction of 30 per cent, applies to property in (d) or (e) and only 20 per cent to property in (c).

It is a general requirement that the property must have been retained for a period of two years before the transfer or death and restrictions may be necessary if the property has not been used wholly for business purposes. The same slice of property cannot obtain the percentage business relief and the relief available for agricultural property.

#### RATES OF TAX

Once the amount of chargeable transfers has been established it will be necessary to determine the amount of capital transfer tax payable. Each chargeable transfer made during lifetime is added to earlier transfers to establish a cumulative total. On death the value of the estate must be added to lifetime transfers also to arrive at a cumulative total. However, this cumulative total will only include chargeable transfers made within a period of ten years before the current lifetime disposition or death. As capital transfer tax first applied to dispositions made on and after March 27, 1974, restrictions in the cumulative total will not be relevant until the initial ten year period expires on March 26, 1984.

The cumulative total which includes the current transfer or the value on death must be compared with a table to establish the rate or rates of capital transfer tax payable. There are two separate tables—

- (a) one applying to lifetime dispositions, other than those made within a period of three years before the date of death; and
- (b) one applying to the value of the estate at the time of death and also to lifetime dispositions made within the previous three year period.

The rates of capital transfer tax have been amended on several occasions. The first table reproduced below shows the rates of capital transfer tax for deaths occurring on or after March 9, 1982. It also

##### First Table

For values on death and transfers within 3 years before death

Deaths or transfers on or after March 9, 1982		
Portion of value		Rate of tax
£	£	%
0-	55,000	Nil
55,001-	75,000	30
75,001-	100,000	35
100,001-	130,000	40
130,001-	165,000	45
165,001-	200,000	50
200,001-	250,000	55
250,001-	650,000	60
650,001-	1,250,000	65
1,250,001-	2,500,000	70
2,500,001 and above		75

Second Table

For lifetime gifts (other than in 3 years before death)

Gifts on and after March 9, 1982		Rate of tax
Portion of value		
£	£	%
0-	55,000	Nil
55,001-	75,000	15
75,001-	100,000	17½
100,001-	130,000	20
130,001-	165,000	22½
165,001-	200,000	25
200,001-	250,000	30
250,001-	650,000	35
650,001-	1,250,000	40
1,250,001-	2,500,000	45
2,500,001	and above	50

## PAYMENT OF TAX

Capital transfer tax usually falls due for payment six months after the end of the month in which the chargeable transaction takes place. Where a transfer, other than that made on death, takes place after April 5 and before the following October 1, tax falls due on the following April 30, although there are some exceptions to this general rule.

Capital transfer tax attributable to the transfer of certain land, controlling shareholding interests, unquoted shares, businesses and interests in businesses, together with agricultural property, may usually be satisfied by instalments. No liability to interest arises where tax is paid on the due date. In other cases, delay in the payment of tax may involve liability to interest.

## PROGRESS OF THE NEW TOWNS (To March 31, 1982)

Town	New Industries	New Commercial Premises	Total Nos. Employed	New Houses & Flats	Net Capital Advances £	Population
Aycliffe .....	124	120	10,295	8,856	64,232,003	25,000

TOTAL .....	5,128	4,132	671,661	298,721	3,576,309,360	1,549,790

## OTHER TAXES AND STAMP DUTIES

The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed *abroad*, the period begins to run from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING IN ADDITION TO DUTY:—

Instruments presented after the proper time (subject to special provisions in some cases and subject to the commissioner's power to mitigate) a penalty equal to the duty . . . £10

AGREEMENT for Lease, *see* LEASES.

AGREEMENT FOR SALE OF PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale with certain exceptions, *e.g.* agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT under seal subject to exemptions APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed . . . . . 50p

ASSIGNMENT:

By way of sale—*see* Conveyance.

By way of gift—*see* Voluntary Disposition.

ASSURANCE—*see* Insurance Policies.

BEARER INSTRUMENT:

Inland bearer instrument, *i.e.* share warrant, stock certificate to bearer or any other instrument to bearer by which stock can be transferred, issued by a company or body formed or established in U.K. Duty of an amount equal to three times the transfer duty (usually £6% of the market value).

Overseas bearer instrument, *i.e.*, such an instrument issued in G.B. by a company formed out of the U.K. Duty equal to twice the transfer duty (usually 4% of the market value). Even if issued out of G.B. the instrument must be stamped before transfer in G.B. The issue or transfer of a bearer instrument relating to stock expressed in the currency of a territory outside the Scheduled territories is exempt from duty.

BILL OF SALE, Absolute, *see* CONVEYANCE ON SALE.

CAPITAL DUTY.—Where a *chargeable transaction* of a *capital company* takes place after July 31, 1973, duty of £1 is payable on every £100 or fraction of £100 of the actual value of the assets contributed by the members (as opposed to the previous duty of 50p per £100 of the nominal capital), provided the place of effective management of the company is in G.B. or its registered office is in G.B. but the place of its effective management is outside the E.E.C. (Finance Act 1973).

A statement containing prescribed particulars must be delivered to the Commissioners within one month of the transaction unless there is an obligation under the Companies Act 1948 (*e.g.*, on the formation of a limited liability company) or the Limited Partnerships Act 1907 (*e.g.*, on the registration of a limited partnership) to send a statement to the registrar of companies as a result of the transaction.

*Capital company* includes a company incorporated with limited liability under U.K. law, a limited partnership under the Limited Partnerships Act 1907, a company incorporated according to the law of any other member of the E.E.C. and any other corporation or body of persons whose members have the right freely to dispose of their shares and whose liability for debts is limited.

*Chargeable transactions* includes the formation of a capital company, an increase in its capital by the contribution of assets of any kind, the transfer to G.B. of its place of effective management from a country outside the E.E.C. if its registered office is in such a country, and the transfer to G.B. of its registered office from a country outside the E.E.C. if its place of effective management is in such a country.

CAPITAL TRANSFER TAX

A new tax on the transmission of wealth, made by way of gift during a person's lifetime and on death, was introduced by the Finance Act 1975. It applies retrospectively to March 27, 1974, unless the donor died before March 13, 1975 (when Estate Duty or modified Estate Duty will apply).

Tax is charged at progressive rates on the cumulative totals of chargeable gifts made during a person's lifetime, with a final cumulation of the value of a person's estate on his death. The rates of tax for lifetime transfers are those shown in Table 1. For transfers on death, or within 3 years of death, the rates applicable are those in Table 2.

In calculating the value transferred on lifetime gifts, the amount of tax paid by the donor on the gift must be taken into account. The value transferred on death is the value of the person's estate at his death.

Certain exemptions and reliefs are given, including:

(a) *For lifetime transfers only:*

(i) The first £3,000 of gifts made in each tax year (April 6 to the following April 5) are

Table 1

Value transferred		Rate of tax
Lower limit	Upper limit	Per cent
£	£	
0	55,000	<i>Nil</i>
55,000	75,000	15
75,000	100,000	17½
100,000	130,000	20
130,000	165,000	22½
165,000	200,000	25
200,000	250,000	30
250,000	650,000	35
650,000	1,250,000	40
1,250,000	2,500,000	45
2,500,000	—	50

Table 2

Value transferred		Rate of tax
Lower limit £	Upper limit £	Per cent
0	55,000	Nil
55,000	75,000	30
75,000	100,000	35
100,000	130,000	40
130,000	165,000	45
165,000	200,000	50
200,000	250,000	55
250,000	650,000	60
650,000	1,250,000	65
1,250,000	2,500,000	70
2,500,000	—	75

exempt. Only the balance over £3,000 is carryable. There is provision for the carry forward of this relief for one year only, in so far as it has not been used in the previous year.

- (ii) Gifts not exceeding £250 to any one donee in the tax year are exempt. This cannot be used to exempt the first £250 of a larger gift.
  - (iii) Gifts which are normal expenditure out of income are exempt, provided the donor is left with sufficient income to maintain his standard of living.
  - (iv) Gifts in consideration of marriage are exempt up to £5,000 if made by a parent; £2,500 if made by a grandparent or some other lineal ancestor, or by one party to another; and £1,000 in any other case.
  - (v) Gifts of certain types of property, including works of art, are exempt if made to a body not established or conducted for profit.
- (b) *For lifetime transfers and on death:*
- (i) Transfers between spouses are exempt to the extent that the gift increases the value of the donee spouse's estate.
  - (ii) Lifetime gifts to Charities and certain Political Parties are exempt without limit. If made on death or within one year of death, gifts to charities are exempt up to £250,000 only (political parties £100,000).
  - (iii) Gifts to listed heritage bodies including National Gallery, British Museum, and Government Departments, are exempt.
  - (iv) Agricultural relief:  
Provided certain conditions are satisfied, on a transfer of Agricultural land, the agricultural value is reduced by 50% if the transferor has occupied the land for the purposes of Agriculture for two years up to the time of the transfer, or by 20% if he has owned the land for the last seven years and it has been occupied by someone for the purposes of Agriculture throughout that period.
  - (v) There is also relief for business property in certain circumstances.

(c) *For transfers on death only:*

Conditional exemptions exist for works of art, timber and for death on active service. There is an exemption in respect of woodlands available on death.

Tax must be paid within 6 months of the end of the month in which the chargeable event occurs unless the event is a lifetime transfer, made between April 5 and October 1 in any year, when tax is due at the end of the next following April. In certain circumstances, tax may be payable by instalments.

Interest on unpaid tax runs from the date the tax is due.

CONTRACT, see AGREEMENT.

CONTRACT NOTE for the sale or purchase of any stock or marketable security; where the value of the stock or marketable security—		
Exceeds £100 and does not exceed £500	£500	10p
" " " " " " " " " " " "	£1,500	30p
" " " " " " " " " " " "	£1,500	60p

(Special adhesive stamps)

*Option Contract Notes* are chargeable with half the above rates only, unless the option is a double one.

*Contract Note following a duly stamped option contract note* chargeable with half the above rates only.

CONTRACT OR GRANT FOR PAYMENT OF A SUPERANNUATION ANNUITY: for every £10 or fractional part of £10	5p
--	----

CONVEYANCE OR TRANSFER ON SALE (in the case of a Voluntary Disposition, see below) of any property (except stock or marketable securities for which, see above), where the Conveyance or Transfer contains a certificate of value certifying that the transaction does not form part of a larger transaction or a series of transactions in respect of which the aggregate amount or value of the consideration exceeds £25,000.		nil
Exceeds £25,000 (for every £50 or fraction of £50)		25p
Exceeds £30,000 (for every £50 or fraction of £50)		50p
Exceeds £35,000 (for every £50 or fraction of £50)		75p
Exceeds £40,000 (for every £50 or fraction of £50)		£1

If the Conveyance or Transfer on Sale does not contain the appropriate statement duty at the full rate of £1 for every £50 or fraction of £50 will be payable whatever the amount of the consideration.

However, if the consideration does not exceed £300, and the instrument does not contain a certificate of value, there are graduated duties ranging from 10p to £6.

Conveyances to charities are exempt from duty under this head provided the instrument is stamped with a denoting stamp.

CONVEYANCE OR TRANSFER of any other kind	fixed duty	50p
--	------------	-----

Included under this head are Transfers for nominal consideration within any of the following categories:

- (a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.
- (b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor; (ii) from a mere nominee of the transferee; (iii) from one nominee to another nominee of the same beneficial owner.
- (c) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.
- (d) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (Note.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation)

are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

- (e) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.
- (f) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.
- (g) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.
- (h) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 50p should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is excepted from Section 74 of the Finance (1909-10) Act 1910." A certificate in other cases should be signed by a solicitor or other person (e.g., a bank acting as trustee or executor) having a full knowledge of the facts.

Registering Officers will in any case in which a Marketing Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 50p fixed duty is duly stamped.

**COVENANT**—For original creation and sale of any annuity, see **CONVEYANCE**.

Separate Deed of, made on occasion of sale, but not being an instrument chargeable with *ad valorem* duty as a Conveyance; same duty as a Conveyance on sale, but not to exceed ..... 50p

**DECLARATION OF TRUST**, not being a Will or Settlement ..... 50p

**DEED** of any kind not charged under some special head ..... 50p

**DEMISE**, see **LEASE**

**DUPLICATE OR COUNTERPART**  
Same duty as original, but not to exceed .. 50p

**GIFT** (see **VOLUNTARY DISPOSITION**).

**GUARANTEE**:  
If under seal ..... 50p

**HIRE-PURCHASE AGREEMENTS**:  
Under seal ..... 50p  
(Finance Act 1907, s. 7)

N.B.—If the agreement amounts to a "credit-sale" the position is the same.

**INSURANCE POLICIES:**

*Life*:—

- Exc. £50 and not exc. £1,000, for every £100 or part of £100 ..... 5p
- Exc. £1,000, for every £1,000 or any fractional part of £1,000 ..... 50p
- Made after 1 August 1966 for period not exceeding 2 years ..... 5p

**LEASES**:—Lease or tack for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £500, £1; of any lands, tenements, etc., in consideration of any rent, according to the following table:—

Annual rent not exceeding	*Term not exceeding			Term exceeding 100 years
	7 years	35 years	100 years	
£	£ p	£ p	£ p	£ p
5	Nil	0-10	0-60	1-20
10	Nil	0-20	1-20	2-40
15	Nil	0-30	1-80	3-60
20	Nil	0-40	2-40	4-80
25	Nil	0-50	3-00	6-00
50	Nil	1-00	6-00	12-00
75	Nil	1-50	9-00	18-00
100	Nil	2-00	12-00	24-00
150	Nil	3-00	18-00	36-00
200	Nil	4-00	24-00	48-00
250	Nil	5-00	30-00	60-00
300	Nil	6-00	36-00	72-00
350	Nil	7-00	42-00	84-00
400	Nil	8-00	48-00	96-00
450	Nil	9-00	54-00	108-00
500	Nil	10-00	60-00	120-00
Exceeding £500 for every £50 or fraction of £50	0-50	1-00	6-00	12-00

\*If the term is indefinite the same duty is payable as if the term did not exceed 7 years.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £40,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £300 a year.

Leases to charities are exempt from duty under this head provided the instrument is stamped with a denoting stamp.

**MORTGAGES** are exempt.

**POWER OF ATTORNEY**, etc., for receiving certain prize-money or wages ..... 5p

For the receipt of any money, or bill, or note, not exceeding £20, or of any periodical payments not exceeding £10 annually .. 25p

For the receipt of dividends or interest of any stock, if for one payment only ..... 5p

Ditto in any other case ..... 25p

Power of attorney of any other kind ..... 50p

**PROCURATION**, Deed, etc., of ..... 50p

**RECEIPTS FOR SALARIES**, Wages and Superannuation, and other like allowances are exempt.

**REVOCATION** of any **TRUST** or Property not being a Will ..... 50p

TRANSFER OF STOCK AND SHARES by way of gift or sale—for each £50 or part of £50 . . . . .	£1	Exceeds £25,000 but does not exceed £30,000 for every £50 and fraction of £50 . . . . .	25p
UNIT TRUST INSTRUMENT—Any trust instrument of a unit trust scheme—For every £100, and also for any fractional part of £100, of the amount or value of the property subject to the trusts created or recorded by the instrument . . . . .	25p	Exceeds £30,000 but does not exceed £35,000, for every £50 and fraction of £50 . . . . .	50p
		Exceeds £35,000 but does not exceed £40,000 for every £50 and fraction of £50 . . . . .	75p
		Exceeds £35,000, for every £50 and fraction of £50 . . . . .	£1
VOLUNTARY DISPOSITION <i>inter vivos</i> :— On any instrument being a voluntary disposition ( <i>inter vivos</i> ) of any property (except stock or marketable securities, see <i>ante</i> , under Conveyance of Transfer) where the value of the property conveyed or transferred does not exceed \$25,000 . . . . .	<i>nil</i>	The instrument must contain similar certificates of value as a Conveyance or Transfer on Sale with the substitution of the words "property conveyed or transferred" for the word "consideration."	
		If the value of the property does not exceed £300 the same graduated rates apply as under Conveyance of Transfer on Sale (except Stock or marketable securities).	

### THE COST OF LIVING

The first cost-of-living index to be calculated in Great Britain was the one which took July, 1914, as 100 and was based on the pattern of expenditure of working class families in 1904. Since 1947 the Index of Retail Prices has superseded the cost-of-living index, although the older term is still often popularly applied to it. This index is designed to reflect the month-by-month changes in the average level of retail prices of goods and services purchased by the "majority" of households in the United Kingdom, including practically all wage-earners and most small and medium salary-earners. For spending coming within the scope of the index, a representative list of items is selected and the prices actually charged for these items are collected at regular intervals. In working out the index figure, the price changes are "weighted"—that is, given different degrees of importance—in accordance with the pattern of consumption of the average family.

A more widely used guide when considering changes in the average level of prices of all consumer goods and services, particularly over a number of years, is the consumer price index, now renamed the consumers' expenditure deflator. This index, which has been calculated back to 1938, covers the expenditure of all consumers as defined for national income purposes, and compares the price of goods and services actually purchased in a given year with the prices of the same goods and services in a base year.

During 1973 the Central Statistical Office constructed an annual index of prices of consumer goods and services over the period 1914 to 1972. This index has been constructed by linking together the pre-war cost of living index for the period 1914–1938, the consumers' expenditure deflator for the period 1938 and 1946–62\* and the General Index of Retail Prices for the period 1962–1972.

In August 1979, the tax and price index (TPI) was introduced in order to provide a statistic which incorporates the effects of direct and indirect taxation, as well as prices, on taxpayers. The TPI is not directly concerned with the purchasing power of money, however, but with the purchasing power of pre-tax income. The General Index of Retail Prices thus retains its function of measuring the changes in the prices of goods and services purchased by households (from their post-tax income), and therefore as an indicator of the purchasing power of money.

In 1974 the General Index of Retail Prices was rebased taking January 1974 = 100. Using this index the following table has been constructed:

	General Index of Retail Prices (all items) 1974 = 100	Comparable Purchasing Power of £1 in 1981
Annual averages		
1914 . . . . .	11.1	26.57
1915 . . . . .	13.7	21.53
1920 . . . . .	27.7	10.64
1925 . . . . .	19.6	15.05
1930 . . . . .	17.6	16.67
1935 . . . . .	15.9	18.55
1940 . . . . .	24.4	12.09
1945 . . . . .	29.3	10.06
1950 . . . . .	35.6	8.28
1955 . . . . .	44.1	6.68
1960 . . . . .	49.6	5.94
1965 . . . . .	58.4	5.05
1968 . . . . .	65.2	4.52
1970 . . . . .	73.1	4.03
1971 . . . . .	80.0	3.68
1972 . . . . .	85.7	3.44
1973 . . . . .	93.6	3.15
1974 . . . . .	108.5	2.71
1975 . . . . .	134.8	2.18
1976 . . . . .	157.1	1.87
1977 . . . . .	182.0	1.62
1978 . . . . .	197.1	1.49
1979 . . . . .	223.5	1.31
1980 . . . . .	263.7	1.11
1981 . . . . .	295.0	1.00

By employing this table an annual purchasing power of the pound index may be derived by taking the inverse of the price index. So, for example, if the purchasing power of the pound is taken to be 100p in 1972, then its comparable purchasing power in 1981 would be:

$$100 \times \frac{85.7}{295.0} = 29p$$

It should be noted that these figures can only be approximate.

\* There are no official figures for 1939–45.

## NATIONAL INSURANCE AND RELATED CASH BENEFITS

The State insurance and assistance schemes in force from July 5, 1948, comprised schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory benefits, termed supplementary allowances and pensions, in place of national assistance and non-contributory old age pensions, and provided for the establishment of a new Ministry of Social Security (now the Department of Health and Social Security), with overall responsibility for the existing insurance schemes and family allowances scheme and the new scheme of supplementary benefits, in place of the Ministry of Pensions and National Insurance and the National Assistance Board, which were abolished.

The Conservative Government's Social Security Act, 1973, which was intended to be brought into force in April, 1975, provided for the replacement of the National Insurance scheme by a basic scheme of social security, offering a range of benefits, including flat-rate basic pensions, similar to those under the existing legislation; a separate reserve pension scheme providing, in addition to the basic pension, earnings-related pensions for those employees not in recognized pensionable employment; and the assimilation of the Industrial Injuries scheme to the basic scheme. It also laid down minimum conditions for recognition of occupational pension schemes so as to exempt the employers and employees concerned from liability to contribute to the reserve pension scheme.

The new Labour Government decided that the basic pension scheme provisions of the 1973 Act should come into force on April 6, 1975, as planned, but it decided not to bring into effect the provisions of that Act relating to the reserve pension scheme or the recognition tests for occupational pension schemes seeking exemption from the reserve pension scheme (except the provisions relating to the preservation of benefits under occupational schemes). Effect was given to the Government's decisions by an order made in June 1974 under the 1973 Act, and by the Social Security (Amendment) Act, 1974, passed in December, 1974.

Three measures—the Social Security Act, 1975 (now the principal Act); the Social Security (Consequential Provisions) Act, 1975; and the Industrial Injuries and Diseases (Old Cases) Act, 1975—were enacted on March 20, 1975, for the purpose of consolidating the law relating to social security in Great Britain, and corresponding measures were passed for Northern Ireland.

The Labour Government published in September, 1974, in a White Paper, "Better Pensions fully protected against inflation", its proposals for a new State pensions scheme. The Social Security Pensions Act, 1975, based upon these proposals came into force on April 6, 1978. Retirement, widows' and invalidity pensions under the new scheme started in April, 1979 (see p. 1200).

The Pensioners' Payments and Social Security Act, 1979, provided for a £10 bonus for pensioners in 1979 and also for the payment of bonuses in succeeding years at levels then to be determined.

### SOCIAL SECURITY SCHEME, 1975

From April 6, 1975, the National Insurance scheme 1948-1975 was replaced by a new scheme of social security benefits and contributions, which now operates under the Social Security Acts, 1975 to 1980, and orders and regulations made thereunder. Like the former scheme, the new scheme is financed on a

pay-as-you-go basis mainly by contributions but in part out of Exchequer funds (rates of benefit and of contributions being reviewed normally annually in accordance with statutory criteria), but the new scheme contributions, to a greater extent than national insurance contributions, are earnings-related. The graduated pension scheme 1961-1975 has been wound up (existing rights being preserved); otherwise the new scheme provides a pattern of pension and other benefits similar to that of the old scheme, but supplemented from April, 1979, by additional pensions related to employees' earnings provided for by the Social Security Pensions Act, 1975, as amended (see p. 1200). The Industrial Injuries scheme continues with only minor changes, but steps have been taken to assimilate the industrial injuries legislation to the general scheme: thus the separate industrial injuries contribution and the Treasury supplement thereto under the Industrial Injuries Acts have been abolished, and the Industrial Injuries Fund has been merged with the National Insurance Fund.

### CONTRIBUTIONS AND CONTRIBUTION CONDITIONS

The funds required for paying benefits payable under the Social Security Acts out of the National Insurance Fund and not out of other public money; for the making of payments towards the cost of the National Health Service and into the Redundancy and Maternity Pay Funds; and for paying benefit under the Industrial Injuries and Diseases (Old Cases) Act, 1975, are provided by means of contributions payable by earners, employers and others (such as non-employed persons paying voluntary contributions), together with the Treasury supplement.

Contributions are of four classes:

Class 1, earnings-related:

- (a) primary Class 1 contributions from employed earners; and
- (b) secondary Class 1 contributions from employers and other persons paying earnings;

Class 2, flat-rate, payable weekly by self-employed earners;

Class 3, flat-rate, payable by earners and others voluntarily with a view to providing entitlement to benefit, or making up entitlement; and

Class 4, payable by self-employed persons in respect of the profits or gains of a trade, profession or vocation, or in respect of equivalent earnings.

Particulars of the contribution rates and earnings limits for contribution liability for the tax year which started on April 6, 1982, are given on pp. 1202-1203.

Regulations state the cases in which earners may be exempted from liability to pay contributions, and the conditions upon which contributions are credited to persons who are exempted.

The Secretary of State for Social Services is empowered by the Social Security Acts to alter certain rates of contributions by order approved by both Houses of Parliament, and is required by the same enactments to make annual reviews of the general level of earnings in order to determine whether such an order should be made. The Government Actuary has pointed out that with a system of mainly earnings-related contributions the income of the National Insurance Fund will rise automatically with increases in the general level of earnings and will broadly be sufficient to meet the cost of corresponding increases in the level of benefits, provided the earnings limits for contribution liability and the

flat-rate (Classes 2 and 3) contributions are adjusted regularly. Following the decision in the summer of 1979 to make further increases in benefits in November, 1979, provision was made by orders and regulations in December, 1979, for new rates of contribution and earnings limits for the various classes of contributors to apply from the beginning of the 1981-82 tax year (see pp. 1202-3).

From April 6, 1978, the yearly Treasury supplement to the National Insurance Fund is equal to 18 per cent of all contributions (ignoring the contribution reductions in respect of the contracted-out) after deducting the National Health Service allocation and the allocation to the Redundancy, etc., Funds (see p. 1199).

## BENEFITS

The benefits payable under the Social Security Acts are as follows:

- (1) **Contributory Benefits:**
  - Unemployment benefit.
  - Sickness benefit.
  - Invalidity pension and allowance.
  - Maternity benefit, comprising maternity grant and maternity allowance.
  - Widow's benefit, comprising widow's allowance, widowed mother's allowance and widow's pension.
  - Child's special allowance.
  - Retirement pensions of the following categories:
    - Category A.
    - Category B.
    - Death grant.
- (2) **Non-contributory Benefits:**
  - Guardian's allowance (see p. 1202).
  - Attendance allowance (see p. 1201).
  - Non-contributory invalidity pension (see p. 1201).
  - Mobility Allowance (see p. 1201).
  - Invalid care allowance (see p. 1201).
  - Retirement pensions of the following categories.
    - Category C (see p. 1201).
    - Category D (see p. 1201).
- (3) **Benefits for Industrial Injuries and Diseases.**

Cash benefits provided under other enactments (supplementary benefits, child benefit, and family income supplement) are dealt with on pp. 1200-1202. Leaflets relating to the various benefits are obtainable from local Social Security offices.

The Social Security Acts empower the Secretary of State to increase certain rates of benefit by order approved by both Houses of Parliament, and require him to increase certain rates by such an order if an annual review shows that they have not retained their value in relation to the general level of prices obtaining in Great Britain.

An order providing for increases in benefit rates took effect from November 12, 1979. Further increases in benefits were authorized by Social Security Benefits Up-rating Orders, 1980, 1981 and 1982. The new rates from the last mentioned order apply from November 22, 1982.

Entitlement to the contributory benefits provided by the Social Security Acts (except in invalidity benefit) depends on contribution conditions being satisfied either by the claimant or by some other person (depending on the kind of benefit). The class or classes of contribution which for this purpose are relevant to each benefit are as follows:

### Short-term benefits

Unemployment benefit	Class 1
Sickness benefit	Class 1 or 2
Maternity grant	Class 1, 2 or 3
Maternity allowance	Class 1 or 2
Widow's allowance	Class 1, 2 or 3

### Other benefits

Widowed mother's allowance	} Class 1, 2 or 3
Widow's pension	
Child's special allowance	
Category A retirement pension	
Category B retirement pension	
Death grant	

With the change from a system of flat-rate national insurance and industrial injuries contributions and graduated pension contributions to a system of wholly earnings-related contributions for employed earners the contribution conditions for entitlement to benefit could no longer be based on the number of weekly contributions paid in a contribution year or throughout a working life. The Social Security Act, 1975, introduced a new system of contribution conditions related to yearly levels of earnings on which contributions have been paid. The contribution conditions for different benefits are set out in sections 13 to 33 of and Schedule 3 to the Act, and in summary form in leaflets on the benefits available at local Social Security offices. There are two contribution conditions for most of the benefits. The first condition must be satisfied to qualify for benefit at all; the second condition generally determines whether benefit is paid at the standard rate or at a reduced rate. Under the arrangements made for the transition from the old scheme to the new one, provision was made for such matters as treating old-style flat-rate contributions as new-style earnings-related contributions and vice versa, and the use of modified contribution tests for short-term benefits for an initial period following the start of the new scheme.

There is one system of adjudication on all claims for benefit under the Social Security Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Chief Commissioner and Commissioners.

The rates of benefit stated below are, unless otherwise indicated, the standard rates having effect from dates in the week beginning November 22, 1982.

### Unemployment Benefit

The standard weekly rates of flat-rate benefit payable to primary Class 1 contributors are as follows:

	£
Man or woman	25.00
Increase of benefit for each child, in addition to child benefit	0.30
Increase of benefit for wife or other adult dependant where payable	15.45

**Duration of Benefit.**—Benefit is payable in a period of interruption of employment for up to 312 days (a year, excluding Sundays). Spells of unemployment and sickness not separated by more than 18 weeks (13 weeks prior to September 14, 1980) count as one period of interruption of employment.

**Requalification for Benefit.**—A person who has exhausted benefit requalifies when he has again worked as an employed earner for at least 16 hours a week for 13 weeks. These weeks need not be consecutive nor fall within the same year.

**Disqualifications.**—There are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through

his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment or training.

### Sickness Benefit

*Standard Rates of flat-rate Benefit payable to primary Class 1 and to Class 2 contributors while incapable of work through illness or disablement.*—Same as for unemployment benefit.

*Duration of Benefit.*—Sickness benefit is payable for 28 weeks of sickness and is then replaced by invalidity benefit (see below).

*Disqualifications.*—Regulations provide for disqualifying a person for receiving sickness or invalidity benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or observe prescribed rules of behaviour.

Under the provisions of the Social Security and Housing Benefits Act 1982, from April 1983 the first 8 weeks of sick pay in any tax year will be paid by employers. Employers will be compensated for these payments through deductions in their National Insurance contributions. For employees who earn above the lower earnings limit for National Insurance contributions, this Statutory Sick Pay will replace Sickness Benefit, although Sickness Benefit will still be available to those not entitled to statutory sick pay.

### Invalidity Benefit

Normally, after 28 weeks of sickness, sickness benefit is replaced by an *invalidity pension* of £31.45 (increased by £18.85 for a wife or other adult dependant). In addition an *invalidity allowance* is payable if incapacity for work begins more than five years before pension age. The allowance varies in amount from £2.20 to £6.90 a week, according to the age on falling sick, and if still in payment at pension age will continue at a higher rate as an addition to retirement pension. The increases of benefit for children of an invalidity pensioner are at the higher rate, viz., £7.95 for each child, in addition to child benefit. Since April, 1979, employees' invalidity pensions have been earnings-related under the new State pension scheme (see p. 1200). As to the age addition if the pensioner or dependant is 80 or over, and non-contributory invalidity pensions, see p. 1201.

### Maternity Benefits

*Maternity Grant.*—A cash grant of £25 for each confinement. Extra grants are payable, in certain circumstances, if more than one child is born. The contribution conditions for the grant have been abolished for confinements on or after July 4, 1982. Instead the grant is payable to all mothers who can satisfy a simple "presence in Great Britain" test.

*Maternity Allowance.*—A woman who has been employed or self-employed and paying contributions at the full rate receives in addition a maternity allowance of £25.00 a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants.

### Widow's Benefits

Only the late husband's contributions of any class count for widow's benefit in any of its three forms.

*Widow's Allowance.*—A woman who at her husband's death is under 60 (or over 60, if he had not retired), receives (during the first 26 weeks of widowhood) a cash allowance usually of £45.95 a

week with increases of £7.95 for each child, in addition to child benefit.

*Widowed Mother's Allowance.*—When the 26 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of £32.85 a week with increases of £7.95 for each child, in addition to child benefit. A widowed mother's personal allowance, usually £32.85 a week, is payable to widows who, when their widow's or widowed mother's allowance ends, have living with them a son or daughter under 19, who has left school.

*Widow's Pension.*—A widow receives this pension usually of £32.85 a week when widow's allowance ends, if she was over 50 at the time of her husband's death; or when her widowed mother's allowance or widowed mother's personal allowance ends, if she is then over 50 (40 if widowed before February 4, 1957).

Flat-rate widow's pensions on a graduated scale were introduced in April 1971 for women who are widowed between the ages of 40 and 50, or who cease to be entitled to a widowed mother's allowance between those ages.

Widow's benefit of any form ceases upon re-marriage.

Since April, 1979, widow's pension and widowed mother's allowance have been related to employees' earnings under the new State pension scheme (see p. 1200).

### Child's Special Allowance

A woman whose marriage has been dissolved or annulled and who has not re-married is paid a special allowance on the ex-husband's death based on his contribution record. The normal condition is that she has a child living with her to whose maintenance he was contributing, or had been liable to contribute, at least 25p a week in cash or its equivalent. The allowance is £7.95 a week for each child, in addition to child benefit.

### Retirement Pension (Categories A and B)

A *Category A pension* is payable for life to men or women on their own contributions if (a) they are over pension age (65 for a man and 60 for a woman), and (b) they have retired from regular employment. Men aged 70 or over and women aged 65 or over are not required to satisfy condition (b).

The standard flat-rate pension, when the contribution conditions are fully satisfied, is £32.85, plus £19.70 for a dependent wife who is not herself qualified for a pension, plus £7.95 for each child, in addition to child benefit. (As to the age addition payable at 80, see p. 1201.)

Where a person does not retire at 65 (60 for a woman) or later cancels retirement, and does not draw a Category A pension, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for a woman), in respect of weeks when pension is foregone during the five years after reaching minimum pension age. For periods of deferred retirement after April 5, 1975, the rate of pension (without any increases except invalidity allowance), when it is finally awarded, will normally be increased by one-eighth of one per cent (from April 5, 1979, one-seventh of one per cent) for each week of deferment except those weeks in which other benefits (such as sickness or unemployment benefit) were drawn. A married man can also earn extra pension for his wife.

A *Category B pension* is normally payable for life to a woman on her husband's contributions when he has retired, or is over 70, and has qualified for his own Category A pension, and she has reached 60 and retired from regular work or has reached 65. It is also payable on widowhood after 60 whether or not

the late husband had retired and qualified for his own pension. The weekly pension is payable at the lower rate of £19.70 while the husband is alive, and at the higher rate of £32.85 on widowhood after 60. Where a woman is widowed before she reaches 60, a Category B pension is paid to her on reaching 60 at the same weekly rate as her widow's pension if she retires. If a woman qualifies for a pension of each category she receives whichever pension is the larger. For periods of deferred retirement after April 5, 1975, a Category B pension will normally be increased by one-sixteenth of one per cent (from April 5, 1979, one-seventh of one per cent) of the husband's pension rate (apart from any increase other than invalidity allowance) for each week while both husband and wife defer retirement. If the husband dies after April 5, 1975, the extra pension which he earned for his wife up to April 6, 1979, by not drawing his pension after she reached 60 will be doubled. She will also receive half of any extra pension he earned for any period before she reached 60. (As to the age addition payable at 80, see p. 1201.)

Since April, 1979, retirement pension has been related to employees' earnings under the new State pension scheme (see p. 1200).

A man aged 65 to 70, or a woman aged 60 to 65, who has qualified for pension will have it reduced if he or she earns more than a certain amount. From the week beginning November 22, 1982, the weekly earnings limit for retirement pensioners was increased by £5 to £57. A man's pension is not affected by his wife's earnings unless he is drawing an increase of his pension for her. The earnings limit for a dependent wife is £45.

Unemployment, sickness or invalidity benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular work and who would have been entitled to a retirement pension if they had retired at pension age. These rates of benefit for people over pension age are shown in leaflet N.I. 196. A retirement pension will be increased by the amount of any invalidity allowance the pensioner was getting within the period of 13 weeks before reaching minimum pension age. As to attendance allowance and invalid care allowance, see p. 1201. Persons who do not qualify for a Category A or B pension may qualify for a Category C or D pension (see p. 1201), or for a supplementary pension (see p. 1201).

#### Graduated Pension

The graduated pension scheme under which national insurance contributions and retirement pensions were graduated within specified limits, according to earnings, was discontinued in April, 1975, under the Social Security Act, 1975. Any graduated pension which an employed person over 18 and under 70 (65 for a woman) had earned by paying graduated contributions between April 6, 1961, when the scheme started and April 5, 1975, will be paid when the contributor retires, or at 70 (65 for a woman), in addition to any retirement pension for which he or she qualifies.

Graduated pension is at the rate of 4.28p a week for each "unit" of graduated contributions paid by the employee (half a unit or more counts as a whole unit). A unit of contributions is £7.50 for men, and £9.00 for women, of graduated contributions paid.

A wife can get a graduated pension in return for her own graduated contributions, but not for her husband's. A widow gets a graduated addition to her retirement pension equal to half of any graduated additions earned by her late husband, plus any additions earned by her own graduated contributions. If a person defers retirement beyond 65 (60 for a woman), half the graduated pension he or she has forgone by deferring retirement for any period before

April 6, 1979, will be treated as extra graduated contributions paid, and will count towards further graduated pension on retirement or at 70 (65 for a woman). From April 6, 1979, graduated pension will normally be increased by one-seventh of one per cent for each week of deferred retirement.

#### Death Grant

A death grant is payable on the death of a qualifying contributor or of his wife, child or widow or, if the contributor is a woman, of her husband, child or widower, and also in respect of the deaths of certain handicapped persons on the insurance of close relatives. The normal grant is for an adult £30, a child aged 6-17 £22.50, a child aged 3-5 £15, a child under 3 £9. For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £15. No grant is payable for deaths of persons already over pension age on July 5, 1948.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

The Death Grant is under review at present. The Government issued a Consultative Document in March 1982 setting out a number of alternative proposals.

#### INDUSTRIAL INJURIES BENEFITS

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injuries caused and prescribed diseases and injuries developed on or after July 5, 1948, now operates under the Social Security Acts, 1975 to 1980, and regulations and orders made under the Acts. The Social Security Benefits Up-rating Order, 1982, provided for increases in the rates of benefit with effect from dates in the week beginning November 22, 1982. Rates of benefit are now reviewed annually.

Supplementary allowances payable in certain circumstances in cases arising before the Industrial Injuries scheme started are governed by the Industrial Injuries and Diseases (Old Cases) Act, 1975, as amended and regulations made under the Act. Statutory schemes have also been made providing for the payment of allowances supplementing workmen's compensation in certain circumstances, and for the payment of benefits in certain cases where neither workmen's compensation nor Industrial Injuries benefits are payable.

The scope of "employed earners" and their employments to which the industrial injuries scheme applies is defined in the Social Security Act, 1975, as amended and regulations made under the Act.

Separate industrial injuries contributions were discontinued in April, 1975. The Industrial Injuries Fund was at the same time merged in the National Insurance Fund, and the separate Treasury Supplement to the Industrial Injuries Fund came to an end. From April 1983 Industrial Injury Benefit will be discontinued, and there will be changes in the period for qualifying for Industrial Disablement Benefit.

#### BENEFITS

*Injury Benefit* is payable for not more than the first 26 weeks of incapacity commencing with the date of the accident or onset of the prescribed disease, but

not usually for the first three days. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of £27.75 (days being paid for at one-sixth of the weekly rate): with increases normally of £15.45 for a wife or other adult dependant, and normally 30p for each child, in addition to child benefit. Other juveniles receive lower rates.

*Disablement Benefit* is payable if at or after the end of the injury benefit period the employed earner suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal. In cases of disablement of less than 20 per cent, except in pneumoconiosis or byssinosis cases, benefit normally takes the form of a *gratuity* paid according to a prescribed scale, but not exceeding £3,560. Where the degree of disablement is 20 per cent or more, or if it is due to pneumoconiosis or byssinosis, the benefit is a weekly *pension* payable either for a limited period or for life, according to the following scale:

Degree of disablement	Weekly rate £
100 per cent	53.60
90 " "	48.24
80 " "	42.88
70 " "	37.52
60 " "	32.16
50 " "	26.80
40 " "	21.44
30 " "	16.08
20 " "	10.72

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive lower rates.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance or if his disablement is exceptionally severe. If the beneficiary is entitled to an unemployability supplement there are increases of £7.95 for each child in addition to child benefit, and, subject to the earnings rule, £18.85 for an adult dependant. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw sickness or invalidity benefit as appropriate, in addition to disablement pension, during spells of incapacity for work.

*Death Benefit*, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of £45.95 a week for the first 26 weeks *plus* any earnings-related addition she would have received if she had been entitled to national insurance widow's allowance (see p. 1197), and thereafter a pension of £33.40 or less a week according to circumstances, *plus* £7.95 for each child, in addition to child benefit.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of claimants for injury or disablement benefit, that of submitting to medical examination and treatment.

*Industrial Diseases, etc.*—The scheme extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an employed earner's employment and developed on or after July 5, 1948.

*Determination of Questions and Claims.*—Provision is made for the determination of certain questions by the Secretary of State for Social Services, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the Commissioners, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g. whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Secretary of State, or a local appeal tribunal consisting of a chairman appointed by the Secretary of State and equal numbers of members representing employers and employed earners, or, on appeal, by the Commissioners.

## FINANCE

On April 1, 1975, the National Insurance (Reserve) Fund and the Industrial Injuries Fund were wound up and their liabilities and assets transferred to the National Insurance Fund. The National Insurance Fund receives all social security contributions (less only the National Health Service and Redundancy Fund and Maternity Pay Fund allocations and the National Insurance Surcharge for taxation purposes) together with the Consolidated Fund supplement; and it bears the cost of all contributory benefits provided by the Social Security Acts and the cost of administration.

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1980, were as follows:

	Receipts	£'000		£'000
Balance, April 1, 1979	.....	4,090,473		
Contributions under the Social Security Acts	.....	10,412,596

### THE NEW STATE PENSION SCHEME

The Social Security Pensions Act, 1975, which came into force in April, 1978, embodied proposals for the future coordinated development of State and occupational pensions. Since April 6, 1979, flat-rate retirement and other State pensions have been augmented for employed earners by additional pensions related to earnings, but it will be twenty years before these additional pensions become payable at the full rate.

The aims of the Act will be, by providing better pensions, to reduce reliance upon means-tested supplementary benefit in old age, in widowhood and in chronic ill-health; to ensure that occupational pension schemes which are contracted out of part of the State scheme fulfil the conditions of a good scheme; that pensions are adequately protected against inflation; and that in both the State and occupational schemes men and women are treated equally.

Under the new State scheme retirement, invalidity and widow's pensions for employees are related to the earnings on which national insurance contributions have been paid. The lower earnings limit for Class 1 contribution liability is broadly the current level of the basic component of the personal retirement pension—in April 1981 terms £27 a week. Employees with earnings at or above this base level in any week pay contributions on all their earnings up to a limit of about seven times the base level—in April 1981 terms £200 a week. The standard rate of contribution set by the Act and applying for the tax year commencing April 6, 1981 (not including the National Insurance Surcharge) is 17.95 per cent (which includes 1.25 per cent for the National Health Service and 0.2 per cent for the Redundancy and Maternity Pay Funds), employees paying 7.75 per cent and employers 10.2 per cent. The rates and earnings limits are subject to annual review. Employees who are contracted out pay the full rate of contribution on earnings up to the lower limit, but on higher earnings up to the upper limit the rate set by the Act and applying for the tax year commencing April 6, 1981, is 10.95 per cent (5.25 per cent for employees and 5.7 per cent for employers), the rate to be reviewed at intervals of not more than five years. The Treasury supplement is 18 per cent of all contributions (calculated so as to include those that would have been received if there had been no contracting out) after deducting the allocations to the National Health Service and the Redundancy and Maternity Pay Funds. Self-employed persons pay contributions towards the basic pension. The non-employed and employees with earnings below the lower limit may contribute voluntarily for basic pension. Women who marry for the first time no longer have a right to elect not to pay the full contribution rate. No primary Class 1 contributions or Class 2 or Class 4 contributions are payable by persons who work beyond pension age (65 for men, 60 for women), but the employer's liability for secondary Class 1 contributions continues if earnings are at or above the lower earnings limit. *See also pp. 1202-3.*

The new system of State pensions for retirement, widowhood and invalidity provides for employees of either sex with a complete insurance record a category A retirement pension in two parts, a basic and an additional component. The basic pension corresponds to the old personal flat-rate national insurance pension (from November 22, 1982, £32.85), *see pp. 1197-98.* The additional component is 14 per cent of average earnings between the lower weekly earnings limit for contribution liability (£29.50 from April, 1982) and the upper earnings limit (£220 from

April, 1982) for each year of such earnings under the scheme, and will thus build up to 25 per cent in twenty years. When the number of years exceeds twenty, pensions will be based on contributors' twenty best years of earnings between age 16 and pension age (65 for men, 60 for women). Actual earnings are to be revalued in terms of the earnings level current in the last complete tax year before pension age (or death or incapacity). Both components of pensions in payment will be updated annually in line with the movement of prices. Graduated retirement pensions in payment and rights to such pensions earned by people who are still working will be brought into the annual review of benefits.

Widows will get the whole or part of additional pensions earned by their husbands with their widowed mother's allowances or widow's pensions; and can add to the retirement pensions earned by their own contributions any additional pensions earned by their husbands up to the maximum payable on one person's contributions. Men whose wives die when they are both over pension age can add together their own and their wives' pension rights in the same way as widows. Among the steps taken to give women equal treatment in benefit provision the State scheme permits years of home responsibilities to count towards satisfying the contribution conditions for retirement pension, widowed mother's allowance and widow's pension, and the "half-test" by which a married woman who married before age 55 could not qualify for a Category A retirement pension unless she had contributed on earnings at the basic level in at least half the years between marriage and pension age has been abolished in certain cases. The range of short-term social security benefits and industrial injury benefits under the Social Security Act, 1975, continues with only minor changes; these include the repeal of the provision which previously imposed a lower rate of sickness and unemployment benefit on married women.

Members of occupational pension schemes which meet the standards laid down by the Pensions Act can be contracted out of a part of the State retirement and widow's benefits. A contracted-out scheme will be required to provide a minimum level of pension calculated on a basis similar to that for the additional component of retirement pension under the State scheme, with a widow's pension at half this rate. The benefits payable from the State scheme will be correspondingly reduced. The State scheme will help in meeting the cost of giving pensions under contracted-out schemes the same protection against inflation as if they had not been contracted out. The Act contains provisions designed to give women the same rights as men to belong to an occupational pension scheme. The Occupational Pension Board, an independent statutory body established under the Social Security Act, 1973, is responsible for deciding whether an occupational scheme should be accepted as a contracted-out scheme, and for ensuring that a contracted-out scheme has adequate financial resources. The Secretary of State for Social Services has made regulations for employers to inform employees and their organisations and to have consultations before deciding whether or not to contract out. Leaflets relating to the new pensions and for the guidance of employers with occupational pension schemes are obtainable from local Social Security offices.

### SUPPLEMENTARY BENEFITS

The Ministry of Social Security Act, 1966, introduced a scheme of non-contributory benefits termed supplementary allowances and pensions in place of

national assistance and of non-contributory old age pensions. Until November 1980 a Supplementary Benefits Commission within the Department of Health and Social Security was responsible under the Supplementary Benefits Act, 1976, as amended, and Regulations made thereunder by the Secretary of State for Social Services, for operating the scheme.

Changes in the supplementary benefits scheme under the Social Security Act, 1980, which came into effect on November 24, 1980, abolished the Supplementary Benefits Commission and made a new Social Security Advisory Committee responsible for advising the Secretary of State on the supplementary benefits scheme as well as the national insurance, child benefit and family income supplement schemes. With the aim of simplifying the supplementary benefits scheme and reducing its reliance on discretionary payments, the Act enabled the Secretary of State to lay down the detailed rules governing entitlement to supplementary benefit in regulations.

Regulations made in July and August 1980 dealt *inter alia* with requirements, resources and single payments to meet exceptional need. Leaflets explaining in detail how the new scheme works and the changes it introduced in the calculation of income and capital resources and of each category of requirements (normal requirements, additional requirements and housing requirements) are available from social security offices. Claimants will be sent a written notice showing how their benefit has been worked out, as is done for family income supplement. Individual awards of benefit are determined by local supplementary benefit officers; a claimant who is dissatisfied with the decision on his claim has a right of appeal to an independent appeal tribunal and, on matters of law, to a Commissioner.

The supplementary pension may be claimed by persons of pension age (65 for men, 60 for women) and the supplementary allowance normally by persons aged 16 or over but under pension age, who are not in full-time work. Benefit can be paid on top of retirement pension or other benefits or of earnings from part-time work. The benefit payable is the amount, assessed under the provisions of the Act and regulations made thereunder, by which the claimant's resources fall short of his requirements. The ordinary weekly scale rates of supplementary benefit (exclusive of rent) from November 22, 1982, have been as follows:

	£
Married couple .....	41.70
Single householder .....	25.70
Other persons:	
Aged 18 or over .....	20.55
Aged 16-17 .....	15.80
Aged 11-15 .....	13.15
Aged under 11 .....	8.75

The long-term scale rates which apply, with certain exceptions, to supplementary pensioners, and also to those below pension age, other than the unemployed who are required to register for work, after they have been in receipt of an allowance continuously for one year, are as follows:

	£
Married couple .....	52.30
Single householder .....	32.70
Other persons:	
Aged 18 or over .....	26.15
Aged under 18 .....	20.05

There is an addition of £1.25 to the standard scale rates for blind people. Claimants and dependants aged 80 or over qualify for an addition of 25p. to long-term rates. As to attendance allowance, see below.

#### OLD PERSONS' PENSIONS

The Social Security Act, 1975, as amended, provides, subject to a residence test, a non-contributory retirement pension of £19.70 a week (£11.80 for a wife or other adult dependant) for persons who were over pensionable age on July 5, 1948, and for women whose husbands are so entitled if they are over pension age and have retired from regular work, with increases for adult and child dependants (Category C pension); and for others when they reach 80 if they are not already getting a retirement pension of any category or if they are getting that pension at less than these rates (Category D pension). An age addition of 25p per week is payable if persons entitled to retirement pension or their dependants are aged 80 or over.

#### ATTENDANCE ALLOWANCE

The Act of 1975 as amended provides for the payment out of Exchequer funds of a tax-free and non-means-tested attendance allowance to the severely disabled, as determined by the Attendance Allowance Board. The full rate of £26.25 a week is paid to those in need of a great deal of attention or supervision both by day and by night. The allowance is paid at the lower rate of £17.50 a week to those whose need for attention or supervision arises either by day or by night. The allowance is treated as an additional requirement under the supplementary benefits scheme.

#### NON-CONTRIBUTORY INVALIDITY PENSION

The Social Security Act, 1975, provides for a non-contributory invalidity pension for persons of working age who have been continuously incapable of work for a period of at least 28 weeks but who do not qualify for a contributory invalidity pension. Married women qualify if they are also unable to perform normal household duties. The benefit is normally payable at the rate of £19.70 a week, with additions for dependants. The cost is met from the Consolidated Fund.

#### INVALID CARE ALLOWANCE

The Social Security Act, 1975, also provides for a non-contributory invalid care allowance for persons of working age, other than married women supported by their husbands, who are not gainfully employed because they are regularly and substantially engaged in caring for a severely disabled person who is receiving attendance allowance. The benefit is payable at the rate of £19.70 a week, with additions for dependants. The cost is met from the Consolidated Fund.

#### MOBILITY ALLOWANCE

The Social Security Pensions Act, 1975, as amended, made provision for a new non-contributory cash benefit under the principal Act which, subject to certain conditions, is payable to persons who are suffering from such physical disablement that they are unable to walk or virtually unable to do so, and their handicap is likely to last for at least a year. It can be claimed by persons over the age of 5 and under 65 and may be retained to age 75. The weekly rate of the allowance was initially £5.00, but provision has been made for the rate to be reviewed in each tax year, and in November, 1982, the rate was raised to £18.30. The cost is met from the Consolidated Fund. The allowance is tax free.

### GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, the person who has the child in his family receives a guardian's allowance of £7.95 a week, in addition to child benefit. The allowance is a non-contributory benefit under the Social Security Act, 1975, and, on certain conditions, is payable on the death of only one parent.

### CHILD BENEFIT

From April 5, 1977, when the permanent provisions of the Child Benefit Act came into operation, family allowances and child interim benefit were replaced by child benefit payable for all children in a family within the age limits, including the first or only child. The rates at the outset were £1.00 for the first or only child (£1.50 in the case of certain one-parent families) and £1.50 for each child after the first. Consequential adjustments were made in dependency benefit for first or only children under the Social Security Act, 1975. The rates were increased in April and November 1978, in April and November 1979, in November 1980, 1981 and 1982. From November 22, 1982, the standard rate was raised to £5.85, and the rate for the first child in one-parent families to £9.50.

### FAMILY INCOME SUPPLEMENT

A benefit met out of Exchequer funds is payable under the Family Income Supplements Act, 1970, as amended and regulations made thereunder, to families, including one parent families, with at least one dependent child under 16 (or over 16 if still at school), whose total family income is below the "prescribed amount" if the head of the family (in the case of a couple, the husband, or, from the appointed date, the husband or wife) is employed or self-employed, and normally so engaged, in remunerative full-time work (i.e., 30 or more hours per week, 24 in the case of single parents). The "prescribed amount" is £82.50 if there is one child in the family and rises by £9.00 for each additional child. "Total income" includes the gross earnings of the claimant and his wife, but excludes child benefit or children's income, except for children's maintenance. The supplement is one-half of the amount by which the family's total income falls below the "prescribed amount", subject, since November 22, 1982, to a maximum payment of £21.00 for families with one child, rising by £2.00 for each additional child; odd amounts are rounded up to the next 10p above, and the minimum amount payable is 20p a week. Usually the supplement is awarded for 52 weeks and is not affected if the claimant's circumstances change during that time. Claim forms can be obtained at a Social Security Office or a Post Office. Claims are decided by a supplement officer but there is an appeal to an independent Appeal Tribunal.

### NATIONAL INSURANCE CONTRIBUTIONS

From April 6, 1975, when the National Insurance and Industrial Injuries schemes were replaced by a new scheme of social security benefits and contributions under the Social Security Act, 1975, combined weekly flat-rate Class 1 contributions ceased to be payable, and the graduated pension scheme was wound up (existing rights being preserved). Under the new scheme employees and their employers both pay wholly earnings-related contributions, based on a percentage of the employee's earnings (Class 1). Self-employed persons continue to pay flat-rate Class 2 contributions, but may also be liable to pay a contribution (Class 4) based on their profits or gains within certain limits. Class 3 contributions are voluntary, and may be paid to help qualify for certain

benefits, including retirement pension. The contribution rates and earnings limits for contribution liability stated below apply for the tax year starting on April 6, 1982.

*Class 1 contributions.*—Primary Class 1 contributions are payable by employed earners and office-holders over age 16 with gross earnings at or above the lower earnings limit of £29.50 a week. For those with gross earnings at or above this level, contributions are payable on all earnings up to an upper limit of £220 a week. "Gross earnings" include overtime pay, commission, bonus, etc., without deduction of any superannuation contributions. The standard rate of primary contribution is 8.75 per cent of reckonable earnings (National Insurance Fund 7.65 per cent; National Health Service 0.75 per cent, Employment Protection Allocation 0.35 per cent). Married women and widows who before May 11, 1977, elected not to pay contributions at the full rate pay (while they still retain that right) a reduced rate of 3.2 per cent over the same earnings range: this covers industrial injuries benefits and a contribution of 0.75 per cent to the National Health Service. No primary contributions are payable by persons over pension age even when retirement is deferred. *Secondary Class 1 contributions* are payable by employers of employed earners, and by the appropriate authorities in the case of office-holders, except in the case of persons earning less than the lower earnings limit of £29.50 a week. The rate (excluding the National Insurance Surcharge for taxation purposes) is 10.2 per cent (National Insurance Fund 9.40 per cent; National Health Service 0.6 per cent; Redundancy etc. Funds 0.2 per cent) over the same earnings range as primary contributions (regardless of the employed earner's contribution rate). Where the employee is contracted out (see pp. 1200) the full rate of contribution is payable on earnings up to the lower limit, but on higher earnings up to the upper limit the rate is 6.25 per cent for employees and 5.7 per cent for employers. Primary contributions are deducted from earnings by the employer, and are paid, together with the employer's contributions, to the Inland Revenue along with income tax collected under the PAYE system, so dispensing with contribution cards for employed earners.

*Class 2 contributions.*—These contributions are payable by self-employed earners over age 16 at a flat rate of £3.75 a week for both sexes. Those with earnings below £1,600 a year can apply for exception from liability to pay Class 2 contributions for the tax year 1982-83. Married women and widows can no longer choose not to pay Class 2 contributions when self-employed if they paid the contribution after May 10, 1977. No Class 2 contributions are payable by an earner after he attains pensionable age. There are special rules for those who are concurrently employed and self-employed. Class 2 contributions may be paid by direct debit through a bank or National Giro account or by stamping a contribution card. People who while self-employed are exempted from liability to pay contributions on the grounds of small earnings may pay either Class 2 or Class 3 contributions voluntarily. Self-employed earners (whether or not they pay Class 2 contributions) may also be liable to pay Class 4 contributions based on profits or gains within certain limits.

*Class 3 contributions.*—These are voluntary flat-rate contributions payable by persons over school-leaving age who would otherwise be unable to qualify for retirement pension and certain other benefits because they have an insufficient record of Class 1 or Class 2 contributions. The rate is £3.65 a week. Payment may be made by stamping a contribution

card or by direct debit through a bank or Giro account. Married women and widows who on or before May 11, 1977, elected not to pay Class 1 (full rate) or Class 2 contributions cannot pay Class 3 contributions.

**Class 4 contributions.**—These contributions are payable by self-employed earners, whether or not they pay Class 2 contributions, on annual profits or gains from a trade, profession or vocation chargeable to income tax under Schedule D. The rate of contribution is 6.00 per cent (including a contribution of 0.95 per cent to the National Health Service) of such profits or gains falling between £3,450 and £11,000 a year. The maximum Class 4 contribution, payable on profits or gains of £11,000 or more, is

£453.00. The contribution is based on profits or gains subject to certain allowances and relief, which differ in some respects from those for income tax. Class 4 contributions are generally assessed and collected by the Inland Revenue along with Schedule D income tax. Self-employed persons under 16, or who at the beginning of a tax year are over pension age even where retirement is deferred, are not liable to pay Class 4 contributions. There are special rules for people who have more than one job, or who pay Class 1 contributions on earnings which are chargeable to income tax under Schedule D.

Leaflets relating to each class of contribution, and an employer's guide to national insurance contributions, are obtainable from local Social Security offices.

### VEHICLE LICENCES

From October 1, 1974, registration and first licensing of vehicles has been done through local offices (known as Local Vehicle Licensing Offices) of the Department of Transport's Driver and Vehicle Licensing Centre in Swansea. The records of existing vehicles are held at Swansea. Local facilities for relicensing are available as follows:—

- (i) with a licence reminder (form V11) in person at any Post Office which deals with vehicle licensing or post it to the Head Postmaster at one of the Head Post Offices listed on the back of the V11.
- (ii) with a vehicle licence application (form V10) either in person at any "licensing" Post Office if you have the Registration Document or post it to the Head Postmaster at one of the Head Post Offices listed on the back of the V10. If you do not have the Registration Document only, apply to a Local Vehicle Licensing Office, not to D.V.L.C.

Details of the present duties chargeable on motor vehicles are available at Post Offices and Local Vehicle Licensing Offices. The Vehicles (Excise) Act, 1971 provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty as if it were in use.

Rates of duty for motor car and motor cycle licences are shown below. For Hackney Carriages the rates of duty are: Hackney Carriage with seating capacity not exceeding 20 persons, £40.00; additional for each person above 20 (excluding the driver) for which the vehicle has seating capacity, 80p.

Type of Vehicle	Exceeding	Not Exceeding	12 Months
MOTOR CARS			£
Electric and those first registered before January 1, 1947 and not more than 7 hp .....	—	7 hp	57.00
Other than the above .....	—	—	80.00
MOTOR CYCLES			
With or without sidecar .....	—	150 c.c.	8.00
With or without sidecar .....	150 c.c.	250 c.c.	16.00
With or without sidecar .....	250 c.c.	—	32.00
THREE WHEELERS			
Other than pedestrian-controlled .....	—	150 c.c.	8.00
Other than pedestrian-controlled .....	150 c.c.	—	32.00
PEDESTRIAN-CONTROLLED VEHICLES (Other than mowing machines)			
Three wheeled .....	—	150 c.c.	8.00
With more than 3 wheels or more than 150 c.c. ...	150 c.c.	—	16.00

#### Driving Licences—Fees

	On or after 1.10.82		On or after 1.10.82
FULL LICENCE		(iii) Issued after 1.1.76 not being an Exchange licence and no additional entitlement claimed	Free
First full licence .....	£10.00*	PROVISIONAL LICENCE	
Renewal of full licence if last full licence was:		First provisional licence .....	£10.00*
(i) Issued before 1.1.76 .....	£10.00*	Renewal of provisional licence .....	£10.00*
(ii) Issued after 1.1.76 and additional entitlement claimed ..	£3.00	DUPLICATE LICENCE .....	£3.00
		EXCHANGE LICENCE .....	£3.00

\* Once you have paid £10 for either a provisional or a full licence all renewals are free except where additional entitlement is required.

## POSTAL AND TELECOMMUNICATIONS INFORMATION

## GENERAL POSTAL REGULATIONS

**Export Restrictions.**—Under Department of Trade and Industry regulations the exportation of some goods by post is prohibited except under Department of Trade licence. Enquiries in the matter should be addressed to the Export Data Branch, Export Services and Promotions Division, Department of Trade and Industry, Export House, 50 Ludgate Hill, London, EC4.

**Prohibited Articles.**—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement.

**Certificate of Posting.**—Issued free on request at the time of posting.

**Recorded Delivery (inland, not to Irish Republic).** Charge: 18p.—This service provides for a record of posting and delivery and is available for inland letters. Advice of delivery, a further 22p at time of posting, 45p after time of posting. No compensation is payable in respect of money or jewellery sent by this service.

**Unpaid Packets, inland** are charged *double postage* on delivery; **UNDERPAID PACKETS, inland** *double the deficiency*.

**Undelivered Postal Packets.**—Undelivered postal packets are returned to the sender without charge provided the return address is indicated either on the outside of the envelope or inside. If the sender's address is not available, items not containing property are destroyed; however, if the packet contains something of intrinsic value, it is retained for up to three months pending reclaim before being disposed of. Perishable items within this category are dealt with as requisite. Exceptionally, items in the minimum weight step on which a rebate of postage has been allowed are destroyed unopened unless there is a return address shown on the outside of the cover. In addition, undeliverable second class mail in the minimum weight step, which, upon opening, is found to consist only of newspapers, magazines or commercial advertising material is also destroyed. *British packets undelivered abroad:* instructions for disposal are required if parcel is undeliverable and must be given at the time of posting. A parcel which cannot be delivered will be returned to sender at his expense.

**International Reply Coupons,** for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum surface mail letter rate from the country concerned to the U.K.

**Poste Restante** (solely for the convenience of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper person. Redirection from a Poste Restante is not undertaken for more than 1 month unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

**Redirection.**—(1) By agent of addressee; *Packets other than parcels, business reply and Freepost items*

may be reposted free not later than the day after delivery (not counting Sundays and public holidays) if unopened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be redirected free of charge within the same time limits, only if the original and the substituted address are both within the same local parcel delivery area (or within the London Postal Area). *Registered packets*, which must be taken to a Post Office, are *re-registered* free only up to day after delivery. (2) By the Post Office: Requests for redirection of *letters*, etc., should be on printed forms, obtainable from any post office, and must be signed by the person to whom the letters are to be addressed. The fees for redirection are as follows:—redirection for a period not exceeding 1 month, commencing before the first anniversary of redirection £2-00; redirection for a period not exceeding 3 months, commencing before the first anniversary of redirection £5-00; redirection for a period not exceeding 1 year, commencing before the first anniversary of redirection £7-50; redirection for a period not exceeding 1 year, commencing on or after the first anniversary of redirection £12-00; redirection for a period not exceeding 1 year, where redirection has already been in operation for 12 months or more, £35-00. A fee is payable for each different surname on the application form. Additional postage is generally due on redirected parcels (see above). Separate forms must be filled in for the forwarding of *telegrams*.

**Registration, Inland (First Class letters only).**—All packets intended for registration *must be handed to an officer of the Post Office, and a certificate of posting obtained*. The packets must be made up in a reasonably strong cover appropriate to their contents. Packets and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, etc. Minimum fee: £1, exclusive of first class postage. Advice of delivery, a further 22p at time of posting, 45p after time of posting. Compulsory registration is applied to (a) any letter packet apparently meant for registration and wrongly posted (minimum fee less any prepaid excess postage); (b) letter packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, etc., in each case £18 or more in value. Ask at the post office for full details.

**Compensation, Inland.**—The ordinary mail services are not designed as compensation services, however, compensation up to a maximum limit of £16-50 may be paid where it can be shown that a letter or parcel was damaged or lost in the post. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters (including items sent to the Irish Republic and the Channel Islands):* The fees for registration are: £1 covering compensation up to £500; £1-10, £1,500 (maximum). (No legal right to compensation exists in respect of registered letters sent to and from Irish Republic or the Channel Islands.) Compensation Fee (C.F.) parcels, fees: 25p up to £50 compensation; 35p up to £100; 50p up to £200; 65p up to £300. *Recorded delivery packets:* maximum compensation £18 provided no contents inadmissible. Fee 18p.

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter* post in one of the special envelopes sold officially. Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care". No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic, whether registered or not.

**Registration, Overseas** (except for parcels and printed paper items posted in bulk), is in force to all countries with the exception of British Indian Ocean Territory or Republic of Maldives. No compensation is payable for the loss of or damage to valuable articles or other items sent in an unregistered letter. Fee £1. If claimed within a year compensation is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions. Compensation is also payable for the partial or complete loss of or damage to the contents of registered items in the service with certain countries (see Post Office Guide for list).

**Insurance, Overseas**, may be effected on packets to many countries at the following rates:—£1.00 for up to £100 cover; 20p for each additional £100 up to £2.80 for £1,000. For *H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses* (e.g., British Forces Post Office followed by a number) only parcels are insurable, up to £100. Fee £1. Packets containing valuable papers, (banknotes, etc.), documents (press, etc.) and, in some cases, valuable articles such as jewellery, can be insured as letters, or as parcels if the country of destination does not accept dutiable goods in the letter post.

The Post Office Guide should be consulted for details of the conditions of Insurance.

**Compensation** up to a maximum of £12.00 for parcels up to 5 kg. in weight and £15.00 for parcels up to 10 kg. in weight, may be given for loss or damage in the U.K. to *uninsured* parcels to or from most overseas countries, if certificate of posting is produced.

*No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.*

**Cash on Delivery Service, Inland** (not to or from Irish Republic, nor to H.M. Ships).—A sum (Trade Charge) up to £300 can, under certain conditions, be collected from addresses and remitted to sender of a parcel or registered letter packet posted at a Money Order Office. Fee (extra to normal postage and registration charges): 65p.

**Cash on Delivery, Overseas**.—Applicable to parcels only, but not all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. A fee, starting at £2.00 per parcel, must be prepaid in addition to the postage for outward parcels. For inward parcels the delivery fee is 50p. The Trade Charge (amount to be collected) may not exceed £1,000, but to most non-European countries the limit is lower. Addressee has also to pay on delivery, besides Customs, if any, a further fee (50p in U.K.) not prepayable. If Trade Charge cannot be collected, special rules for undeliverable C.O.D. parcels apply.

**Expresspost**.—A fast collection and delivery service for urgent packages which operates in London and many other cities and towns throughout the country. Prices are very competitive and can be as low as £1.90, depending on distance. There are also

several same-day intercity links. For further details contact your local Head Post Office or ring FREE-PHONE 2333.

**Datapost**.—A guaranteed service for the overnight delivery of important documents and packages. Items may be posted at a nominated post office as and when required, or contractual arrangements can be made for regular pre-scheduled consignments. There are also equally reliable and secure Datapost links with a number of overseas countries. For further details contact your local Head Post Office.

**Swiftair**.—Express delivery of air mail letters and packets anywhere in the world. Items normally arrive at least one day in advance of normal air mail. Items should be handed in at a post office counter. Cost: normal postage plus £1.50.

**Intelpost**.—A public facsimile transmission service linking many towns and cities in the U.K. and also with international connections. Documents up to A4 size can be transmitted and received within minutes and the service can be used with hand delivery and collection services. Cost: from £3.

**Royal Mail Special Delivery**.—Offers special messenger treatment where necessary to ensure next day delivery of first class letters and packets. Special fee of £1.50 refunded if next working day delivery is not achieved.

**Airway Letters**.—On certain internal air routes operated by the British Airways (European Division), First Class letters may be handed in at certain Airport offices for conveyance by the next available direct air service to be transferred to the post at the distant airport or town terminal or to be called for at the airport or town terminal. Fee (besides postage) £2.20 plus VAT, maximum weight 500 g. This service is not available to the Irish Republic, Isle of Man or to any country overseas. Full information can be obtained from any office of British Airways (European Division).

**International Express Service**.—This service from the office of delivery by special messenger is available to or from certain countries. In some countries the service is restricted to certain towns. 80p is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P.O. Guide.)

**Business Reply and Freepost** (Inland, excluding Irish Republic).—These services enable a person or firm to receive replies to advertisements, letters from clients, etc. without prepayment of postage, the addressee paying the postage together with a handling charge of 1p per item delivered. A licence costing £20 p.a. must be obtained to use either service and these are available from Head Postmasters who will also provide any further information required.

**Postage Forward Parcel Service**.—This service enables a person or firm to receive parcels from clients without prepayment of postage, the addressee pays a fee of 8p on each parcel in addition to postage. A special label is used for this service. A licence costing £22 p.a., to use the service must first be obtained from the local Head Postmaster.

**Articles for the Blind** (Inland, including Irish Republic).—Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Postage free.

**Blind Literature, Overseas** (in other respects treated as Printed Papers).—Papers, periodicals and books, if printed in special type (also plates for

embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind (Cécogrammes)", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts and free by air mail up to 2 kg.

**Small Packets Post (OVERSEAS).**—For the transmission of goods (including trade samples) in the same mails as Printed Papers up to 1 kg. Registration is allowed; not insurance. Available to all countries, but to some countries there is a limit of 500 g. A customs declaration is required.

**Newspaper Post (INLAND).**—For newspapers "registered at the P.O."

Copies of registered newspapers may be posted by the publishers or their agents in wrappers open at both ends, in unsealed envelopes approved by the Post Office for the purpose or without covers and tied with string which can be removed without cutting. Wrappers and envelopes must be prominently marked **NEWSPAPER POST** in the top left-hand corner and be easily removable for the purpose of examination. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undeliverable and a reference to a page.

Newspapers posted by the public or supplements to registered newspapers despatched apart from their ordinary publications are transmitted under the conditions governing the First or Second Class Letter Services.

#### STAMPS, ENVELOPES, POSTCARDS, &c.

**POSTAGE STAMPS** are sold in values of ½p, 1p, 2p, 2½p, 3p, 4p, 5p, 10p, 11½p, 12½p, 14p, 15p, 15½p, 16½p, 18p, 19½p, 20p, 22p, 25p, 26p, 29p, 50p, 75p, £1, £2, and £5.

Books containing 3 at 12½p, 4 at 3p, 1 at ½p: 50p are only available at vending machines. Books are sold containing 10 at 12½p (£1-25); 6 at 15½p and 4 at 12½p (£1-43) and 10 at 15½p (£1-55). Rolls of 12½p and 15½p stamps are sold; mixed value rolls are only available on special order from post offices.

**REGISTERED LETTER ENVELOPES** printed with a £1-15½ stamp (£1 for registration and 15½p for postage) are in three sizes G, 156 mm × 95 mm, £1-11 each; H, 203 mm × 120 mm, £1-13 each; K, 292 mm × 152 mm, £1-20 each.

**FORCES AIR LETTER FORMS** issued against purchase of 12½p stamp.

**ENVELOPES** printed with 12½p stamp: Size 1 (162 mm × 114 mm) 17½p each; Size 2 (220 mm × 110 mm) 18½p each. With 15½p stamp; size 1 (162 mm × 114 mm) 20½p each; Size 2 (220 mm × 110 mm) 21½p each.

**AIR LETTER FORMS** printed with 24p stamp, 24p each.

Printed postage stamps cut out of envelopes, postcards, lettercards, air letter forms or newspaper-wrappers may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated or defaced in any way.

#### INLAND TELEGRAPH PAYMENT SERVICE

Inland Telegraph Payment Orders are issued at most Post Offices from which telegrams are despatched and paid at most post offices. The charge is £3-00; private message 15p per word. (The private message may be sent as a Greetings Telegram; 50p concession not available).

National Savings Bank withdrawal by postal application for payment by telegram the charge is £3-00; by telegram to D.N.S. and to the specified Post Office, £6-00. A certified copy is £1-00 per 50 chargeable words. Adtel (Request by addressee for name and address of sender) is £3-00.

#### INTERNATIONAL ORDINARY PAYMENT SERVICE

The charge is £2-50 (maximum value £50); validity varies between one and twelve months. Advice of Payment: fee 7p (to certain countries). Payment may be stopped: fee 7p.

#### INTERNATIONAL RAPID PAYMENT SERVICE

The charge is £2-50 (maximum value £50) plus Rapid fee of £3-00 to Europe or £3-50 for countries outside Europe.

Remitters wishing to send monies abroad to countries outside the Schedule Territories must state the purpose of the remittance on Application Declaration Form G5212 obtainable at any post office. This is a requirement by the Bank of England under the Exchange Control Regulations.

#### POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and/or paid in many countries overseas. These countries are listed in the Post Office Guide which may be seen at any post office transacting postal order business. Transmission of postal orders to any other country is prohibited except to members of H.M. Forces. British postal orders are paid and issued in the Channel Islands and the Isle of Man and paid in the Irish Republic. They are printed, with a counterfoil, for denominations of 25p and then every multiple of 5p up to and including £1, then in £1 steps to £10. Adhesive unmarked British Postage Stamps not exceeding two in number, if affixed in the space provided, may increase the value of an order by not more than 4½p. Fees: on each order of 25p to £1—20p, £2 to £10—26p. The name of the payee must be inserted. If not presented within six months of the last day of the month of issue orders must be sent to the local Head Postmaster or, in London, to the District Postmaster, to ascertain whether the order may still be paid.

#### TELEMESSAGE

The inland telegram service was replaced on Oct. 1, 1982 by the teletext service. Teletexts can be sent by telephone or telex to anywhere in the UK for 'hard copy' delivery the next working day, including Saturdays. A Teletext costs £3 for the first 50 words and £2 for each subsequent block of 50 words — the name and address are free. A Senders Copy costs 75p extra. A wide selection of colourful cards is available for special occasions and these are free before noon, Monday to Friday, but cost 50p at other times (prices subject to VAT).

Teletexts are available by dialling 100 (190 in London) and asking for the Teletext Service. Telex dialling codes are shown in the telex directory. The telephone and telex calls are free.

#### INTERNATIONAL TELEGRAMS

*Ordinary telegrams* are available to all countries. Rate £1-50 per telegram plus 25p per word for

destinations in Europe including the Mediterranean Basin Area, North America, Belize, and the Caribbean; 32p per word for destinations in other Continental Systems. No minimum charge.

*Letter Telegrams (LT\*)* are £2.00 per telegram plus half the word charge for Ordinary telegrams. Minimum charge is as for 22 words.

*Commonwealth Social Telegrams (GLT\*)* are £2.00 per telegram plus half the per word charge for Ordinary telegrams. No minimum charge.

*Urgent\* Telegrams* are £4.00 per telegram plus double the per word charge for Ordinary telegrams. No minimum charge.

*Telegraphic Notification of Delivery (PC\*)* £2.00 plus cost of 7 words to the destination country.

*LX\* (Deluxe)* is 50p extra.

*Certified Copy* is £1.00 per 50 chargeable words.

\* Service indicators eg GLT, must be written before the address and are counted and charged as one word.

### RADIOTELEGRAMS

The charge for radiotelegrams is 36p per word (standard rate). Radiotelegrams at the standard rate should be addressed Portishead Radio unless the sender nominates another coast station. The address should contain (1) the name or rank of the addressee, (2) the name of the ship and (3) the name of the coast station in the British Isles if the sender knows that the ship is within range of that station.

The charge for messages to H.M. Ships is 24p a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine"), (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio".

In addition to the per word charges quoted a fixed charge of £2.00p per radiotelegram applies.

Radiotelegrams may also be sent to R.A.F. vessels. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words "R.A.F. Vessel" before the name of the ship.

### RADIOTELEPHONE SERVICE

Radiotelephone services are available between telephone subscribers (but not from coin-box telephones or call offices unless the caller is a holder of a British Telecom telephone credit card) in Great Britain, Northern Ireland, the Channel Islands and the Isle of Man and suitably equipped ships. The service is generally available at all hours of the day and night, but the periods of communication with a particular ship vary with the ship's position and are dependent on radio conditions.

Calls are normally made through the coast stations, listed below, and callers should ask the local exchange telephone operator for SHIPS' TELEPHONE SERVICE adding, if known, the telephone number and name of the coast station through which the call should be made. If the name of the coast station is not known, the caller will be connected to Portishead Radio. When connected to the coast station operator, the caller should ask for SHIPS' RADIO TELEPHONE CALL giving the name of the ship and the name (or designation) of the person required.

Anglesey Radio	0407 83 0541
Bacton Radio (restricted short range VHF services)	05213 3447

Thames Radio (restricted short range VHF services)	0843 20592
Whitby Radio (restricted short range VHF services)	0632 531318
Wick Radio	0955 2271
Jersey Radio	Jersey 41121

Charges vary according to the position of the ship. The rates are (for minimum of 3 minutes):—

Short range (within 50 miles of VHF station) £1.35 for 3 minutes. 45p for each additional minute.

Medium range (within 250 miles of U.K.). £2.43 for 3 minutes. 81p for each additional minute.

Long range (dependent on position of ship). £5.67 for 3 minutes. £1.89 respectively for each additional minute.

The service is available, for calls to and from H.M. Ships, subject to the approval of the Duty Commander M.O.D. Navy, through whom all calls to H.M. Ships should be booked. The charges are the same as those for merchant ships but as H.M. Ships do not normally keep watch for private radiotelephone calls from the shore, no attempt should be made to book a call to one of H.M. Ships unless prior arrangements have been made with the person concerned on the ship. The caller must be able to give the name of the coast station through which the call is to be made, or the approximate position of the ship at the time the call is required.

The holder of a British Telecom telephone credit card issued in Great Britain, Northern Ireland, the

Channel Islands or the Isle of Man may use it to make radio-telephone calls to ships at sea from any telephone in this country (including coin-box telephones and call offices) and have the charges debited to his own account.

### INLAND TELEPHONES

The quarterly rental for an exclusive business exchange line is £21.00 and £13.50 for any other exclusive exchange line. For shared service, in which two subscribers share one line but have practically the same facilities as those provided by individual lines, each customer pays £4 per annum less than for exclusive line service. A condition of telephone service is that all new and removing residential customers since January, 1948, are liable to share their lines if called upon to do so. Subscriber trunk dialling (STD) facilities are provided to most destinations at all exchanges. Local and dialled trunk calls from these exchanges are charged in 4-3p units when made from ordinary lines, in 5p units when dialled from pay on answer coin-box lines and 8p minimum charge from Press-Button payphones with 2p incremental units. All charges are subject to Value Added Tax (VAT). VAT on call charges from ordinary lines is charged as a percentage of the total on quarterly bills and VAT on calls from pay on answer coin-box lines is included in the unit fee. The length of time per unit depends on the distance of the call and time of day, from eight minutes for a local call to twelve seconds for distances over 56 kilometres.

Operator connected trunk calls from ordinary lines have a three minute minimum charge (and thereafter by the minute) which varies with distance and time of day, but those from coinbox lines are charged in 3 minute periods at the coinbox tariff. For calls that have to be passed through the operator because the caller cannot dial or because a dialled call had failed, the charge is equivalent to the dialled rate, subject normally to the three minute minimum. Generally higher charges apply to other operator connected calls including special services calls and those to the Irish Republic and the Channel Isles. All trunk calls are cheaper if made after 6 p.m. or at weekends. Personal calls (to specified person) 36p extra from ordinary lines and 45p from coinbox lines, if the person cannot be found nothing further is charged. For fuller information see Preface to Telephone Directory, Dialling Instruction Booklet (where appropriate) and Post Office Guide.

### TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is from £820 per annum (depending upon the equipment required). The minimum call charge for International calls via the operator is three minutes. For subscriber-dialled calls to Inter-Continental countries, the minimum call charge is one minute, and subscriber-dialled calls to the Continent are charged in 2½p units (see International Services Guide for rates). Automatic equipment allowing messages to be sent at the maximum speed of 400 characters (60-70 words) per minute can be rented in addition. Descriptive leaflet available from all telephone Area Offices: for local address see Telephone Directory.

### DATA COMMUNICATIONS SERVICES

Data communications services consist of a range of modems for transmission of data at rates ranging from 200 to 72,000 binary digits per second (bit/s) together with a suitable circuit. Also available are a number of additional facilities such as automatic

calling and answering, Dataplex and Midnight Line services. The customer's Terminal equipment is provided by a specialist supplier, who must have obtained permission to connect his equipment to the telephone network.

Data Transmission services may be described briefly as follows:

*Datel 200*—for duplex data transmission over 2-wire circuits, using either a private circuit or an exchange line on the public switched telephone network (PSTN), at rates up to 300 bit/s.

*Datel 600*—for half duplex asynchronous transmission at rates up to 1200 bit/s using a single exchange line or 2-wire private circuit.

*Datel 1200 Duplex*—provides for duplex data transmission at 1200 bit/s over a single exchange line or 2-wire private circuits. The modem will handle both synchronous and asynchronous inputs, and offers a comprehensive range of diagnostic and test facilities.

*Datel 2412*—enables data to be transmitted synchronously in half duplex mode at 2400 bit/s, using either a single exchange line or 2-wire private circuit.

*Datel 4800*—service offers synchronous data transmission at 4800 bit/s, with fall-back to 2400 bit/s. The modem provides duplex operation on 4-wire private circuits, and half duplex using a single exchange line which may be the main or standby mode of operation.

*Datel 4832*—for transmission of synchronous data at 4800 or 3200 bit/s over a 4-wire private circuit in a point-to-point or multipoint configuration. Operating mode is duplex, and 2 exchange lines may be used for back-up to the private circuit.

*Datel 9600*—permits transmission of duplex or half duplex synchronous data at a rate of 9600 bit/s. Two modems are available; the single port model offers alternative bit rates of 9600, 7200 and 4800, and is suitable for use with 4-wire point-to-point and multipoint circuits, or 2 exchange lines. The multi-port version enables up to 4 channels in various speed combinations to operate over the 9600 circuit, and is for use with 4-wire point-to-point private circuits or 2 exchange lines. Both models offer comprehensive inbuilt test facilities.

*Datel 64K*—for data transmission at 48K, 56K, 60K, 64K and 72K bit/s over specially engineered wideband circuits.

*Data Control Equipment*—enables terminals to automatically originate and/or answer calls over the telephone network.

*Dataplex*—allows the data from a number of low speed terminals to be sent over a single high speed link, resulting in reduced line costs.

*Midnight Line Service*—provides for unlimited directly-dialled inland telephone calls between midnight and 6 a.m. for a fixed annual rental.

*P.S.S.*—the new public data service introduced by British Telecom specially for the exchange of data between computers and terminals throughout the U.K. and now has links to the international packet switching services.

### INTERNATIONAL DATA TRANSMISSION SERVICES

#### (i) DATEL SERVICES

In the international service, the term *Datel* has been adopted to refer only to data transmission using the public telephone system.

#### *Datel 200*

This service provides full duplex (simultaneous both way) serial asynchronous transmission of digital data over the public telephone network or private

circuits at speeds up to 200 bit/s. 300 bit/s operation may also be possible but is not assured. Service is available to most of Western Europe, Bahrain, Barbados, Bermuda, Canada, Singapore, South Africa, United Arab Emirates and U.S.A.

#### *Datel 600*

This service provides half duplex (one direction at a time) over the public telephone network asynchronous transmission of digital data at speeds up to 600 bit/s. On some connections it may be possible to operate at up to 1200 bit/s. Service is available to most of Western Europe, Australia, Bahrain, Barbados, Bermuda, Canada, Cyprus, Hong Kong, New Zealand, Singapore, South Africa, United Arab Emirates and U.S.A.

#### *Datel 1200 duplex*

This service provides full duplex serial transmission of digital data over the public telephone network at a speed of 1200 bit/s. The service is available to The Federal Republic of Germany and Switzerland.

#### *Datel 2400*

This service provides half duplex serial synchronous transmission of digital data over the public telephone network at 1200 or 2400 bit/s. A transmission rate of 1200 bit/s should be possible on all international calls and 2400 bit/s will be possible on the majority of calls. The service is available to most of Western Europe, Bahrain, Cyprus, Hong Kong, New Zealand, Singapore, South Africa, United Arab Emirates and U.S.A.

#### *Note*

Datel calls to Australia, Bahrain, Barbados, Bermuda, Canada and Singapore must be set up by the international telephone operator.

#### (ii) PRIVATE CIRCUITS

International private circuits are available for data transmission and are provided in accordance with the Recommendations of the International Telephone & Telegraph Consultative Committee (CCITT). Using suitable modems, higher transmission rates than those offered by the Datel services are usually obtainable over voice bandwidth circuits.

In addition, high speed data transmission, e.g. 72K Bit/s may be achieved over wide-band leases (telephone circuits grouped together to give 48KHz bandwidth). A reduced tariff for 1200-9600 bit/s service and a 56K bit/s service is available to some countries.

#### (iii) INTERNATIONAL PACKET SWITCHING

Packet switching is the switching and transmission of data in discrete quantities called packets, each packet or block of data carrying its own routing and control information. Packet switching technology permits intercommunication between different terminal types and transmission rates and is sufficiently flexible to support a diversity of data communications applications on dedicated data networks providing high reliability and low error rates.

Two packet switched services are available:

(a) International Packet Switching Service (IPSS) provides service to and from Canada, Fed. Rep. of Germany, Japan, Spain, Sweden, Switzerland and U.S.A. Service from Australia, Barbados, Bermuda, Hong Kong, Irish Rep., Israel is available but outgoing calls cannot be made to these countries at present. IPSS is accessed via the National Packet Switching Service (PSS).

More countries will be added as soon as the necessary arrangements can be completed.

(b) Euronet—provides service to and from Belgium, Denmark, Eire, France, French Antilles, West Germany, Italy, Luxembourg, Netherlands, Portugal and Switzerland.

#### PRESTEL

Prestel, the British Telecom viewdata service opened a full public service in London in Sept. 1979 which is available at local call rates to over 60 per cent of U.K. telephone subscribers in 1981, and also to users in seven countries overseas. It combines a modified television set with the public telephone network and computers to provide a new and revolutionary communications system.

Developed by the Post Office's Research Department, Prestel viewdata provides for the first time a cheap and easy-to-use system of obtaining information, and sending a wide range of messages.

Access to computers is through an ordinary telephone line linked to a modified television set. Information is selected by using a small push-button unit similar in size and layout to a pocket calculator. Information is displayed on the television screen—in up to seven colours—in words, figures or simple diagrams. No other equipment is needed. Commercial development of the system is a joint undertaking by the British Telecom, 50 set and terminal suppliers and more than 550 organizations that supply the information and other transactional services.

#### INTERNATIONAL TELEPHONES

The charges are the same for calls originating in any part of Great Britain, Northern Ireland and the Isle of Man. All U.K. customers have had access to International Direct Dialling from this country since 28 July, 1982 and can now dial direct to numbers on most exchanges in over 120 countries worldwide. The number of places abroad to which calls may be dialled direct is also increasing. Callers should consult their dialling codes booklets or International Telephone Guide for information on how to make calls.

Directly dialled calls are charged in units of time costing 4-3p. Cheap rates apply from 8 p.m. to 8 a.m. nightly, and at any time on Saturdays and Sundays. Where access to IDD is not yet available callers should call the International Exchange, specifying the country required.

BRITISH TELECOM FINANCIAL RESULTS

The telecommunications income for the year 1981-82 totalled £5,708.1m, of which £5,530.1m was derived from main services and £117.6m from other sources (compared to main services, £4,440.3m and other sources, £113.9m, totalling £4,554.2m in the year 1980-81).

Total expenditure, including interest and depreciation as well as all operating and maintenance costs, was £4,701.6m for 1981-82, an increase on the 1980-81 total of £4,373.5m. This resulted in a profit for the year 1981-82 of £457.8m, compared with a profit of £180.7m for 1980-81.

## THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology and Medicine; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Royal Swedish Academy of Sciences: (a) Physics—(b) Chemistry; the Royal Caroline Institute, Stockholm—(c) Physiology and Medicine; the Swedish Academy—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of five members and three deputy members. The Swedish Government appoints a chairman and a deputy chairman, the remaining members being appointed by the awarding authorities.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentina; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia; (ff) Yugoslavia; (gg) Greece; (hh) Israel; (ii) Guatemala; (kk) Egypt; (ll) Pakistan; (mm) West Indies; (nn) Bulgaria. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901–1974, see earlier editions of WHITAKER'S ALMANACK.

In 1969 a Nobel Prize for Economic Sciences was instituted, to be awarded by the Royal Swedish Academy of Sciences. Prize-winners have been: 1969, J. Tintergen (h) and R. Frisch (i); 1970, P. A. Samuelson (b); 1971, S. Kuznets (b); 1972, Sir John Hicks (a) and K. J. Arrow (b); 1973, W. Leontief (b); 1974, F. von Hayek (a) and G. Myrdal (d); 1975, Prof. L. V. Kantorovich (f) and Prof. T. C. Koopmans (b); 1976, Prof. M. Friedman (b); 1977, Prof. J. E. Meade (a) and Prof. B. Ohlin (d); 1978, Prof. H. A. Simon (b); 1979, Prof. T. W. Shultz (b) and Prof. Sir Arthur Lewis (mm); 1980, Prof. L. Klein (b); 1981, Prof. J. Tobin (b).

## HALLMARKS ON GOLD, SILVER AND PLATINUM WARES

London (Goldsmiths' Hall) Date Letters

From 1498

	Black letter, small . . . .	1498-9 to 1517-8		Roman letter, small	1739-40 to 1755-6
	Lombardic . . . . .	1518-9 ,, 1537-8		Old English, capitals . .	1756-7 to 1775-6
	Roman and other capitals . . . . .	1538-9 ,, 1557-8		Roman letter, small . . .	1776-7 ,, 1795-6
	Black letter, small . . . .	1558-9 ,, 1577-8		Roman letter, capitals .	1796-7 ,, 1815-6
	Roman letter, capitals .	1578-9 ,, 1597-8		Roman letter, small . . .	1816-7 ,, 1835-6
	Lombardic, external cusps . . . . .	1598-9 ,, 1617-8		Old English, capitals . .	1836-7 ,, 1855-6
	Italic letter, small . . . .	1618-9 ,, 1637-8		Old English, small . . . .	1856-7 ,, 1875-6
	Court hand . . . . .	1638-9 ,, 1657-8		Roman letter, capitals [A to M square shield N to Z as shown] . . . .	1876-7 ,, 1895-6
	Black letter, capitals . .	1658-9 ,, 1677-8		Roman letter, small . . .	1896-7 ,, 1915-6
	Black letter, small . . . .	1678-9 ,, 1696-7		Black letter, small . . . .	1916-7 ,, 1935-6
	Court hand . . . . .	1697 ,, 1715-6		Roman letter, capitals .	1936-7 ,, 1955-6
	Roman letter, capitals	1716-7 ,, 1735-6		Italic letter, small . . . .	1956-7 ,, 1974
	Roman letter, small . . .	1736-7 ,, 1738-9		Italic letter, capitals . .	1975 ,, ...

Hallmarks are the symbols stamped on gold, silver, or platinum articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold, silver, or platinum articles are required by law to be hallmarked before they are offered for sale. Hallmarking was instituted in 1300 under a statute of Edward I.

Normally a complete modern hallmark consists of four symbols—the maker's mark or sponsor's mark, assay office mark, standard mark and date letter.

Additional marks have been authorized from time to time.

**Maker's Mark.**—Instituted in 1363, the maker's mark was originally a device such as a bird or *fleur-de-lys* and now consists invariably of the initials of the Christian and surnames of the maker or sponsor, or of the firm.

**Assay Office Mark.**—The existing assay offices and their distinguishing marks are:—

LONDON (Goldsmiths' Hall).

A leopard's head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697 to 1974 a lion's head erased was used on silver of the lighter (Britannia) standard.

BIRMINGHAM ..... An anchor  
 SHEFFIELD ..... A rose  
 EDINBURGH ..... A castle

Offices formerly existed in other towns, e.g. Chester, Glasgow, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

**Standard Mark.**—Instituted in 1544. The current legal standards and their marks are as follows:—

**SILVER.**—Sterling silver (92.5 per cent. silver) is marked by English assay offices with a *lion passant* and by the Edinburgh Assay Office with a *lion rampant*. A full-length figure of *Britannia* was impressed on silver of a higher standard (95.84 per cent. silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

**GOLD.**—Since 1975 gold articles are marked with a crown followed by the millesimal figure for the standard, i.e. 916 for 22 carat, 750 for 18 carat, 585 for 14 carat and 375 for 9 carat.

**Date Letter.**—Instituted in 1478. The date letter denotes the year in which an article was assayed and hallmarked. Each alphabetical cycle has a distinctive style of lettering or shape of shield. The date letters

were different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. Specimen shields and letters used by the London Office on silver articles in each period from 1498 to date are shown on the previous page. The same letters are shown on gold articles but the surrounding shield may differ.

OTHER MARKS

**Duty Mark.**—In 1784 an additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty in 1890.

**Commemorative Marks.**—There are three other marks to commemorate special events, the Silver Jubilee of King George V and Queen Mary in 1935, the Coronation of Queen Elizabeth II in 1953 and her Silver Jubilee in 1977.

**Foreign Wares.**—Since 1842 foreign wares imported into Great Britain have been required to be hallmarked before sale. The marks consist of the importer's mark, a special assay office mark (see below), the figures denoting fineness and the annual date letter. The current assay office marks for foreign wares are as follows:—

LONDON.—The sign of the Constellation Leo.  
 BIRMINGHAM.—Equilateral triangle.  
 SHEFFIELD.—The sign of the Constellation Libra.  
 EDINBURGH.—St. Andrew's Cross.

CLOSE SEASONS AND TIMES

**Wild Birds.**—The *Protection of Wild Birds Act, 1954*, lays down a close season for wild birds (other than Game Birds) from February 1 to August 31 inclusive, each year. Exceptions to these dates are made for—

*Capercaillie* and (except Scotland) *Woodcock*, Feb. 1—Sept. 30.

*Snipe*, Feb. 1—Aug. 11.

*Wild Duck* and *Wild Goose* (in or over water areas), Feb. 21—Aug. 31.

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, wigeon) and certain wild geese (bean, Canada, pink-footed and white-fronted).

Certain wild birds may be killed or taken at any time by authorized persons—cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, starling, stock-dove and wood pigeon; and, in Scotland only, goosander, red-breasted merganser and rock-dove. The sale of Wild Birds' Eggs is prohibited, except that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. 1—April 14 inclusive.

**Game Birds.**—In each case the dates are inclusive:—

*Black Game*—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

\**Grouse*—Dec. 11 to Aug. 11.

\**Partridge*—Feb. 2 to Aug. 31.

\**Pheasant*—Feb. 2 to Sept. 30.

\**Parmigan*—(Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in *England* and *Wales*) to kill the game marked \* on a Sunday or Christmas Day.

**Hunting and Ground Game.**—There is no statutory close-time for fox-hunting or rabbit-shooting, nor for hares; but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The First of November is the recognized date for the opening of the *fox-hunting* season, which continues till the following April. *Otter-hunting* lasts from mid-April to mid-September.

*Deer.*—The table below shows the statutory close seasons for deer (all dates inclusive).

Species	Sex	England and Wales		Scotland
RED	Stags	May 1—July 31	Oct. 21—Jun. 30	Feb. 16—Oct. 20
	Hinds	Mar. 1—Oct. 31

	Hinds	Mar. 1—Oct. 31		

## WEIGHTS AND MEASURES

The Weights and Measures Act of 1963 enacts the legal measures for Great Britain, basing them upon "United Kingdom primary standards" in the custody of the Standards Department of the Dept. of Trade. The primary standards are the yard, pound, metre and kilogramme. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1963 defines the GALLON as the space occupied by 10 pounds weight of distilled water of density 0.998 859 gramme per millilitre weighed in air of density 0.001 217 gramme per millilitre against weights of density 8.136 grammes per millilitre. The METRE and the LITRE have the meanings assigned by order of the Dept. of Trade to reproduce in English the international definition of these measures in force at the time of making of the orders.

New definitions for an *international yard* and *pound* were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States:

*international yard* = 0.914 4 metre.

*international pound* = 0.453 592 37 kilogramme.

The following list shows the definitions of measures set out in the Weights and Measures Act, 1963 and some useful conversions.

## Measurement of Length

*Imperial Units*

Mile = 1,760 yards.

Furlong = 220 yards.

Chain = 22 yards.

YARD = 0.914 4 metre.

Foot =  $\frac{1}{3}$  yard.

Inch =  $\frac{1}{36}$  yard.

1 mil = 1/1000 inch.

12 inches (*in.*) = 1 foot (*ft.*).

3 feet = 1 yard (*yd.*).

6 feet = 1 fathom.

22 yards = 1 chain = 100 links.

10 chains = 1 furlong.

8 furlongs = 1 mile = 1,760 yards.

*Metric Units*

Kilometre = 1,000 metres.

METRE (see above) = 1.094 yards.

Decimetre = 1/10 metre.

Centimetre = 1/100 metre.

Millimetre = 1/1000 metre.

10 millimetres (*mm.*) = 1 centimetre (*cm.*) = 0.393 701 inch.

10 centimetres = 1 decimetre (*dm.*) = 3.937 011 inches.

10 decimetres = 1 METRE (*m.*) = 1.093 614 yards.

10 metres = 1 dekametre (*dam.*) = 10.936 143 yards.

10 dekametres = 1 hectometre (*hm.*) = 109.361 43 yards.

10 hectometres = 1 kilometre (*km.*) = 0.621 371 mile.

A kilometre is approximately *five-eighths* of a mile, so that 8 kilometres may be regarded as 5 miles.

## Measurement of Area

*Imperial Units*

Square mile = 640 acres.

Acre = 4,840 square yards.

Rood = 1,210 square yards.

SQUARE YARD = a superficial area equal to that of a square each side of which measures one yard.

Square foot =  $\frac{1}{9}$  square yard.

Square inch =  $\frac{1}{144}$  square foot.

*Metric Units*

Hectare = 100 ares.

Dekare = 10 ares.

Are = 100 square metres.

SQUARE METRE = a superficial area equal to that of a square each side of which measures one metre.

Square decimetre =  $\frac{1}{100}$  square metre.

Square centimetre =  $\frac{1}{100}$  square decimetre.

Square millimetre =  $\frac{1}{100}$  square centimetre.

144 sq. inches = 1 sq. foot.

9 sq. feet = 1 sq. yard.

4 roods = 1 acre.

10 square chains = 1 acre = 4,840 sq. yards.

640 acres = 1 square mile.

1 sq. centimetre = 0.155 sq. inch.

1 sq. METRE = 10.763 9 sq. feet = 1.195 99 sq. yds.

1 are (*a.*) = 0.098 8 rood.

1 hectare (10,000 sq. metres) (*ha.*) = 2.471 05 acres.

1 sq. kilometre = 0.386 102 sq. mile.

## Measurement of Volume

*Imperial Units*

CUBIC YARD = a volume equal to that of a cube each edge of which measures one yard.

Cubic foot =  $\frac{1}{27}$  cubic yard.

Cubic inch =  $\frac{1}{1728}$  cubic foot.

1,728 cubic inches = 1 cubic foot.

27 cubic feet = 1 cubic yard.

*Metric Units*

CUBIC METRE = a volume equal to that of a cube each edge of which measures one metre.

Cubic decimetre =  $\frac{1}{1000}$  cubic metre.

Cubic centimetre =  $\frac{1}{1000}$  cubic decimetre.

1 cubic metre (*cbm.* or *m<sup>3</sup>.*) = 35.314 7 cu. ft. = 1.307 95 cu. yds.

(1 stere (= 1 cu. metre) is used as a unit of measurement of timber.)

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

## Measurement of Capacity

*Imperial Units*

GALLON (see above).

Quart =  $\frac{1}{4}$  gallon.

Pint =  $\frac{1}{2}$  quart.

Gill =  $\frac{1}{4}$  pint.

Fluid ounce =  $\frac{1}{20}$  pint.

4 gills = 1 pint.

2 pints = 1 quart.

4 quarts = 1 GALLON.

1 gallon = 160 fluid ounces.

= 277.274 cubic inches.

Bushel = 8 gallons.

Peck = 2 gallons.

2 gallons = 1 peck.

4 pecks = 1 bushel.

8 bushels = 1 quarter.

A chaldron is 36 bushels =  $4\frac{1}{2}$  quarters.

1 hectolitre = 2.749 69 bushels.

1 hectolitre per hectare = 1.11 bushels per acre.

1 quintal = 3.674 3 bushels.

1 quintal per hectare = 1.49 bushels per acre.

Fluid drachm =  $\frac{1}{4}$  fluid ounce.  
Minim =  $\frac{1}{160}$  fluid drachm.

See Apothecaries' Weight (*below*).

**Metric Units**

Hectolitre = 100 litres.

LITRE = The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under a pressure of one standard atmosphere (14.696 lb. per sq. inch).

Decilitre =  $\frac{1}{10}$  litre.

Centilitre =  $\frac{1}{100}$  litre.

Millilitre =  $\frac{1}{1000}$  litre.

1 centilitre (*cl.*) = 0.070 4 gill.  
1 LITRE (1/1,000 cubic metre) (*lit.*) = 1.759 8 pints = 0.88 Imp. quart = 80.22 Imp. gallon = 61.025 5 cu. inch = 0.035 315 7 cu. ft.  
1 hectolitre (*hl.*) = 21.997 5 Imp. gallons = 26.417 1 U.S. gallons = 2.749 Imp. bushels = 2.837 7 U.S. bushels.

**Measurement of Mass or Weight**

**Imperial Units**

Ton = 2,240 pounds.

Hundredweight = 112 pounds.

Cental = 100 pounds.

Quarter = 28 pounds.

Stone = 14 pounds.

POUND = 0.453 592 37 kilogram.

Ounce =  $\frac{1}{16}$  pound.

Dram =  $\frac{1}{16}$  ounce.

Grain =  $\frac{1}{7,000}$  pound.

7,000 grains (*gr.*) = 1 pound (*lb.*).

16 drams (*dr.*) = 1 ounce (*oz.*).

16 ounces = 1 POUND (*lb.*).

14 pounds = 1 stone.

28 pounds = 1 quarter (of a *cwt.*).

4 quarters (112 *lb.*) = 1 hundredweight (*cwt.*).

20 hundredweight (2,240 *lb.*) = 1 ton.

Ounce Troy = 480 grains  
Pennyweight = 24 grains

20 pennyweights (*dwt.*) = 1 Troy ounce.

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. A Troy POUND (= 5,760 grains) is legalized in the United States.

Ounce apothecaries' = 480 grains. | See Apothecaries' Weight (*below*)  
Drachm =  $\frac{1}{3}$  ounce apothecaries'.  
Scruple =  $\frac{1}{3}$  drachm.

**Metric Units**

Metric ton = 1,000 kilograms.

Quintal = 100 kilograms.

1 milligram (*mg.*) = 0.015 432 grains.

1 centigram (*cg.*) = 0.154 32 grains.

1 decigram (*dg.*) = 1.543 2 grains.

1 gramme (*gm.*) = 15.432 4 grains.

1 dekagram (*dag.*) = 5.643 8 drams.

1 hectogram (*hg.*) = 3.527 4 oz.

1 KILOGRAM (*kg.*) = 32.150 7 oz. Troy = 35.273 4 oz. Avoirdupois = 2.204 62 lb. Avoirdupois.

1 myriagram = 22.046 2 lb. Avoirdupois.

1 quintal (*q.*) = 100 kg. = 220.5 lb. Avoirdupois = 1.968 4 cwt.

1 tonne (*t.*) = 0.984 207 U.K. or long ton = 1.102 31 U.S. or short ton

**Measurement of Electricity**

Units of measurement of electricity, the AMPERE (unit of electrical current), the OHM (unit of electrical resistance), the VOLT (unit of difference of electrical potential) and the WATT (unit of electrical power) have the meanings assigned to them respectively by order of the Dept. of Trade, to reproduce in English the international definitions in force at the date of the making of the order.

Kilowatt = 1,000 watts.

Megawatt = 1,000,000 watts.

**Apothecaries' Weight**

*Measures of Weight.*

20 grains = 1 scruple (ʒi).

3 scruples = 1 drachm (ʒi).

8 drachms = 1 ounce.

*Measures of Capacity.*

60 minims (*min.*) = 1 fluid drachm.

8 fluid drachms = 1 fluid ounce.

5 fluid ounces = 1 gill.

4 gills = 1 pint.

8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to TWO Avoirdupois drams.

**Angular or Circular Measure**

60 seconds (") = 1 minute (').

60 minutes = 1 degree (°).

90 degrees = 1 right angle or quadrant.

Diameter of circle  $\times$  3.141 6 = circumference.

Diameter squared  $\times$  .7854 = area of circle.

Diameter squared  $\times$  3.141 6 = surface of sphere.

Diameter cubed  $\times$  .523 = solidity of sphere.

One degree of circumference  $\times$  57.3 = radius.\*

Diameter of cylinder  $\times$  3.141 6; product by length or height, gives the surface.

Diameter squared  $\times$  .7854; product by length or height, gives solid content.

\* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

**Water Measures**

Cubic inch . . . . . = 252.458 grains.

Gallon (277.274 cu. in.) . . . = 10 lb. (distilled).

Cubic foot . . . . . = 62.321 lb.

35.943 cubic ft. (224 gals.) . . = 1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

**THERMOMETER COMPARISONS**

*Comparison between Scales of Fahrenheit, Réaumur and Centigrade*

CONVERSION  
 Let F = Fahr.  
 " C = Cent.  
 " R = Réaumur.  

$$*F = \frac{9C}{5} + 32$$

$$R = \frac{4(F-32)}{9}$$

$$F = \frac{9R}{4} + 32$$

$$F = C + R + 32$$

NOTE.—The normal temperature of the human body is 98.4° F., or 37° (36.9°) C., or 29.5° R. Freezing point = 32° F. = 0° C. = 0° R.; Boiling point = 212° F. = 100° C. = 80° R.  
 "Absolute" Temperature is Temperature reckoned from "Absolute Zero," which is at 273° C. below 0° F., and 218.4° below 0° R. and is denoted by the letter "K."  
 \* Below 32° F. subtract 32.

An *Inch of Rain* on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100,992 tons.

*Cisterns*: A cistern 4 feet by 2½ and 3 deep will hold brimful 186,963 gallons, weighing 16 cwt. 2 qrs. 21.6 lbs. in addition to its own weight.

Million, Billion, etc.

*Value in the United Kingdom*

Million	..... thousand × thousand (10 <sup>6</sup> )
Billion	..... million × million (10 <sup>12</sup> )
Trillion	..... million × billion (10 <sup>18</sup> )
Quadrillion	..... million × trillion (10 <sup>24</sup> )

*Value in U.S.A.*

Million	..... thousand × thousand (10 <sup>6</sup> )
Billion	..... thousand × million (10 <sup>9</sup> )
Trillion	..... million × million (10 <sup>12</sup> )
Quadrillion	..... million × billion U.S. (10 <sup>15</sup> )

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

**PAPER AND BOOK MEASURES**

*Writing Paper*

480 sheets = 1 ream  
 24 sheets = 1 quire  
 20 quires = 1 ream

*Printing Paper*

516 sheets = 1 ream  
 2 reams = 1 bundle  
 5 bundles = 1 bale

Description of the A series is by capital A followed by a figure. The basic size has the description A0 and the higher the figure following the letter, the greater is the number of sub-divisions and therefore the smaller the sheet. Half A0 is A1 and half A1 is A2. Where larger dimensions are required the A is preceded by a figure. Thus 2A means twice the size A0; 4A is four times the size of A0.

It is an essential feature of these series that the dimensions are of the trimmed or finished size.

'A' Series of Trimmed Sizes

Designation	SIZE	
	mm	inches
A0	841 × 1189	33.11 × 46.81
A1	594 × 841	23.39 × 33.11
A2	420 × 594	16.54 × 23.39
A3	297 × 420	11.69 × 16.54
A4	210 × 297	8.27 × 11.69
A5	148 × 210	5.83 × 8.27
A6	105 × 148	4.13 × 5.83
A7	74 × 105	2.91 × 4.13
A8	52 × 74	2.05 × 2.91
A9	37 × 52	1.46 × 2.05
A10	26 × 37	1.02 × 1.46

Subsidiary Series.—A series of B sizes has been devised for use in exceptional circumstances when sizes intermediate between any two adjacent sizes of the A series are needed.

'B' Series of Trimmed Sizes

Designation	SIZE	
	mm	inches
B0	1000 × 1414	39.37 × 55.67
B1	707 × 1000	27.83 × 39.37
B2	500 × 707	19.68 × 27.83
B3	353 × 500	13.90 × 19.68
B4	250 × 353	9.84 × 13.90
B5	176 × 250	6.93 × 9.84
B6	125 × 176	4.92 × 6.93
B7	88 × 125	3.46 × 4.92
B8	62 × 88	2.44 × 3.46
B9	44 × 62	1.73 × 2.44
B10	31 × 44	1.22 × 1.73

NOTE.—Folio means a sheet folded in half, quarto folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

INTERNATIONAL PAPER SIZES

Simplification of the large number of stock paper sizes in use in the United Kingdom has been proceeding since publication of British Standard 730 in 1937. Recommendations made by the International Organization for Standardization were accepted by the United Kingdom in 1959 and it is considered that general adoption of the international or A size will bring great economies to users of paper.

The basis of the international series of paper sizes is a rectangle having an area of one square metre, the sides of which are in the proportion of 1 : √2. In other words, taking one side as X and the other as Y, the basic size provides the equation—X: Y = 1: √2; and X × Y = 1. It may be noted that the proportions 1: √2 have a geometrical relationship, the side and diagonal of any square being in this proportion. As the basic size is one square metre in area, this means that X = 841 millimetres and Y = 1,189 millimetres. The effect of this arrangement is that if the short side is doubled or the longer side is halved, i.e., if the area of the sheet is doubled or halved, the shorter side and the longer side of the new sheet are still in the same proportion 1: √2. This feature is particularly useful where photographic enlargement or reduction is used, as the proportions remain the same.

In addition there is a series of C sizes which is used much less. A is for magazines and books, B for posters, wall charts and other large items, C for envelopes particularly where it is necessary for an envelope (in C series) to fit into another envelope. The size recommended for business correspondence is A4.

Long Sizes.—Long sizes are obtainable by dividing any appropriate sizes from the two series above into three, four or eight equal parts parallel with the shorter side in such a manner that the proportions mentioned in paragraph 2 (above) are not maintained, the ratio between the longer and the shorter sides being greater than . 2:1. In practice long sizes should be produced from the A series only.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. *Examples*:—1 centimetre=0.394 inch and 1 inch=2.540 centimetres. 1 metre=1.094 yards and 1 yard=0.914 metre. 1 kilometre=0.621 mile and 1 mile=1.609 kilometres.

SYMBOLS FOR CORRECTING PROOFS

Supplied by WILLIAM CLOWES LTD, Beccles, Suffolk, Printers of "WHITAKER"

Letter(s) or word(s) requiring alteration should be struck through IN INK in the text and the substitution should be written in the nearest margin followed by / (the symbol used to denote that the marginal mark is concluded). Insertions should be indicated by / or ^ at the conclusion of the marginal mark and at the desired place in the text.

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Delete (take out)	 or 	/ or — Vertical stroke to delete one or two letters; horizontal line to delete more	Take letter(s) or word(s) from beginning of one line to end of preceding line	 OR 	
Delete and close up	 OR 	 Strike out letter(s) not required and add "close up" mark above and below	Begin a new paragraph		 before first word of new paragraph
Close up: delete space between letters		 linking letters or words	No new para. here or run on previous matter with later matter		 between paras. or other matter
Use ligature (fi, fl, ffi, etc.) or diphthong (æ, œ)		 enclosing ligature or diphthong required	Spell out in full the abbreviation, contraction, or figure		Encircle, words, etc., or figures concerned
Insert space between letters or words		 enclosing letters to be altered	Insert omitted portion of copy		 Attach the relevant copy to the proof, indicating omitted portion
Leave as printed (i.e. a cancellation of previous marking)		 under letter(s) or word(s) crossed out but to be retained	Inserted or substituted letter(s), figure(s), or sign(s) under which this is placed to be superscript (i.e. high alignment) <sup>1</sup>		 for insertions For substitutions encircle letter(s), figure(s), or sign(s) to be altered
Invert type (of letter(s) upside down)		Encircle letter(s) to be altered	Inserted or substituted letter(s), figure(s), or sign(s) over which this is placed to be subscript (low alignment) <sup>2</sup>	(see footnote)	(see footnote)
"Battered" letter(s) to be replaced by similar but undamaged characters		Encircle letter(s) or word(s) to be replaced and write the correct letter(s) in the margin	Change to lower case		 for insertions For substitutions encircle letter(s), figure(s), etc., to be altered
Push down space or "high" letter(s) or word(s)		Encircle space, letter(s), or word(s) affected	Replace "wrong fount" by letter(s) of correct fount		Encircle letter(s) to be altered
Transpose	 OR 	 between letters or words, numbered when necessary	Change to capital letters		Encircle letter(s) or word(s) to be altered
Take letter(s) or word(s) from end of one line to beginning of next line	 OR 		Change to small capitals		 under letter(s) or word(s) to be altered
					 under letter(s) or word(s) to be altered

 indicates a superior (superscript) figure four

 indicates an inferior (subscript) figure two

Alteration required	Mark in margin	Mark in text	Alteration required	Mark in margin	Mark in text
Use capital letters for initial letter(s) (as desired) and small capitals for rest of word(s)	<i>caps</i> & <i>s.c.</i>	≡ under initial letter(s) and ≡ under the remainder of the word(s)	Move lines to the left		at right side of group of lines to be moved (indicating approx. position)
Change to bold type	<i>bold</i>	Draw wavy line under letter(s) or word(s) to be altered	Move portion of matter so that it is positioned as indicated		at limits of required position
Change to roman type	<i>rom.</i>	Encircle letter(s) or word(s) to be altered	Raise lines	<i>raise</i>	over lines to be raised
Change to italic type	<i>italic</i>	— Draw this straight line under letter(s) or word(s) to be altered	Lower lines	<i>lower</i>	under lines to be lowered
Letter(s) or word(s) to be underlined	<i>underline</i>	under letter(s), word(s), etc., to be underlined	Correct the vertical alignment		
Equalize space between words	<i>eq. #</i>	between words	Straighten lines	==	== through lines to be straightened
Reduce space	<i>less #</i>	between words	Insert parentheses (round-shaped brackets)	<i>(/)</i> or <i>( )</i>	
Space to be inserted between lines or paragraphs	<i># &gt;</i>	Amount of space should be indicated	Insert [square] brackets	<i>[/]</i> or <i>[ ]</i>	
To be placed in centre of line, etc.	<i>centre</i>	Position to be indicated by	Insert hyphen	<i>-/</i>	
Indent one en (approx. space occupied by n of type in use)	<i>en</i>	indicating approximate position	Insert en (= half-em) rule (see above)	<i>en-/</i>	
Indent one em (approx. space occupied by M of type in use)	<i>em</i>	Ditto	Insert one-em rule (see above)	<i>em-/</i>	
Indent two ems (approx. space occupied by MM of type in use)	<i>em</i>	Ditto	Insert two-em rule (see above)	<i>2em-/</i>	
Move to the left		Ditto	Insert apostrophe	<i>'</i>	
Move to the right		Ditto	Insert single quotation marks	<i>‘ ’</i>	
Move lines to the right		at left side of group of lines to be moved (indicating approx. position)	Insert double quotation marks	<i>“ ”</i>	
			Insert ellipsis	<i>.../</i>	
			Insert leader (visual guide to alignment in contents pages, etc.)		(three, two, or one dot)
			Insert shilling stroke (oblique)	<i>①</i>
