THE PRESBYTERIAN CHURCH OF WALES

THE PRESBYTERIAN OR CALVINISTIC METHODIST CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a large section of the Welsh-speaking population. Its form of government is Presbyterian, and it is a constituent of the World Alliance of Reformed Churches.

In 1989 the body numbered—chapels and other buildings, 1,050; ministers in pastoral charge, 146; elders, 4,554; communicants, 65,237; Sunday scholars, 20,949.

The Association in the East which includes nine of the English Presbyteries was formed in 1947.

Moderator of General Assembly (1989–90), R. M. Edwards, Oswestry.

Moderators of Associations (1989–90) *South Wales*,

Dr. B. F. Roberts, Aberystwyth; *North Wales*, R. A. Roberts, Port Dinorwic; *East Wales*, Rev. J. E. Wynne Davies, Aberystwyth.

General Secretary, Rev. D. H. Owen, 53 Richmond Road, Cardiff CF2 3UP

THE CHURCH OF SCOTLAND

Church Office, 121 George Street, Edinburgh EH2 4YN

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both representative ministers and elders, in equal numbers from each of the Presbyteries. It is presided over by a Moderator chosen annually by the Assembly. The Sovereign, if not present in person, is represented by a Lord High Commissioner, who is appointed each year by the Crown. The country, for Church purposes, is divided into 12 Synods and 46 Presbyteries, and there are about 1,400 ministers and licentiates engaged in ministerial and other work. The figures at Dec. 31, 1987, were:—

Congregations, 1,727; total membership 838,659. There are 130 ministers and other personnel working with partner Churches and in expatriate charges in 26 countries.

Lord High Commissioner (1989–90), Capt. Sir Iain Tennant, K.T.

Moderator of the General Assembly (1989), Dr. W. G. G. McDonald.

Principal Clerk, Rev. J. L. Weatherhead.

Deputy Clerk, Rev. A. G. McGillivray.

Procurator, G. Penrose, Q.C.

Law Agent and Solicitor of the Church, R. A. Paterson.

Parliamentary Agent, I. McCulloch (London).

General Treasurer, W. G. P. Colledge.

THE PRESBYTERIAN CHURCH IN IRELAND

The largest of the Presbyterian churches in Ireland consists of 22 presbyteries, 413 ministers, 564 congregations, with 131,471 communicants, 123,283 families and 6,100 Sunday-school teachers. During the 12 months ended Dec. 31, 1987, there was contributed by congregational effort £4,214,060 plus IR£281,432 for religious, charitable, and missionary purposes. The total income for the period raised by congregations for all purposes was £19,567,540 plus IR£1,541,665.—*General Sec.*, Very Rev. Dr. T. J. Simpson, Church House, Belfast BT1 6DW.

UNITED REFORMED CHURCH

THE UNITED REFORMED CHURCH was formed by the union of the Congregational Church in England and Wales and the Presbyterian Church of England on October 5, 1972. The Re-formed Association of Churches of Christ were joined to the U.R.C. on September 26, 1981. It is divided into 12 Provinces, each with a Provincial Moderator, and 70 Districts. There are 126,000 members and 1,000 serving ministers of whom 190 are auxiliary and give voluntary service. It shares an international mission through the Council for World Mission and is a member of the British and World Council of Churches. Its ministers are trained at five recognized colleges.

General Sec., Rev. B. G. Thorogood, 86 Tavistock Place, WC1H 9RT

The Congregational Federation

The majority of those members of the Congregational Church who did not join the United Reformed Church comprise the Congregational Federation. This has about 9,800 members, 113 ministers and 286 churches.

Gen. Sec., G. A. Adams, The Congregational Centre, 4 Castle Gate, Nottingham NG1 7AS.

THE METHODIST CHURCH

THE METHODIST CHURCH was founded in 1739 by the two brothers Wesley and rapidly spread throughout the British Isles and to America before 1770. The Methodist Church in Great Britain was united in 1932 by the fusion of the Wesleyan Methodist Church (the original section), the Primitive Methodist Church (1810) and the United Methodist Church (a 1907 fusion of the Methodist New Connexion (1797), the Bible Christian Methodist Church (1815) and the United Methodist Free Churches (1828 and 1849)).

The World Methodist Council, founded 1881, reorganized 1951, associates Methodism throughout the world in 90 countries.

The Methodist Church in Great Britain is governed primarily by the Conference, secondarily by the

District Synods (held in the autumn and the spring), consisting of all the ministers and of selected laypeople in each district, over which a chairman, who is a minister, is appointed by the Conference; and thirdly by the circuit meeting of the ministers and lay officers of each circuit. The authority of both Synods and Circuit Meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.

President of the Conference (July 1989–90), Rev. Dr. J. J. Vincent.

Vice-President of the Conference (July 1989–90), J. B. Hindmarsh.

Secretary of the Conference, Rev. B. E. Beck, 1 Central Buildings, Westminster, SW1H 9NH.

President Designate (1990–91), Rev. Dr. D. English.

Vice-President Designate (1990-91), Mrs. R. Wass.

Statistics.—In 1988 in association with the Conference in Great Britain there were 3,399 Ministers, 13,378 Local Preachers, 450,406 Members in 7,389 churches. (Statistics are published triennially.)

Methodist Church in Ireland

The Methodist Church in Ireland has 195 Ministers, 295 Lay Preachers, 20,094 Adult and 12,292 Junior Members.

President, (1989-90), Rev. George R. Morrison.

Secretary, Rev. C. G. Eyre, 3 Upper Malone Road, Belfast BT9 6TD.

Independent Methodists

Independent Methodists.—This body is Congregational in its organization, with an unpaid Ministry. Its first Conference was held in 1805. In 1988 there were in Great Britain 131 Ministers, 3,870 Members, 107 Churches and 3,315 Sunday scholars. *Gen. Sec.*, Rev. J. M. Day, The Old Police House, Croxton, Stafford ST21 6PE.

Wesleyan Reform Union

This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland and Northern counties. In 1988 there were in Great Britain 23 Ministers, 145 Lay Preachers, 3,026 Members, 130 Churches and 1,829 Sunday School scholars. *President*, M. T. Beasley, 2 Holsworthy Close, Hinckley Road, Nuneaton, Warks. CV11 6LS. *General Secretary*, Rev. D. A. Morris, Wesleyan Reform Church House, 123 Queen Street, Sheffield 1.

The Baptist Union

The Baptists have over 35,000,000 members in all countries. In Britain they are for the most part grouped in Associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1812. Current statistics show that there are 2,111 churches and 167,466 members. There also exist separate Baptist Unions of Scotland (166 churches and 14,600 members); Wales (586 churches and 29,593 members); Ireland (92 churches and 8,550

OTHER RELIGIOUS DENOMINATIONS

The General Assembly of Unitarian and Free Christian Churches has about 95 ministers, 230 chapels and other places of worship in Great Britain and Ireland. *Gen. Sec.*, Dr. R. W. Smith, Essex Hall, 1-6 Essex Street, Strand, WC2R 3HY.

The Salvation Army, first known as the Christian Mission, was founded by William Booth in the East End of London in 1865. In 1878 it took its present name and adopted a quasi-military method of government. Since then it has become established in 90 countries of the world. The world leader, known as the General, is elected by a High Council, consisting of all active Commissioners and Territorial Commanders who have held the rank of Colonel for at least two years. In 1988 there were in Great Britain, 929 Corps (Churches), 135 Social Services Centres and 1,575 Officers engaged in evangelistic and social work. The latest world statistics (1988) are 14,397 Corps, 4,975 Social Services Centres (including institutions and schools) and 25,056 Officers. *General*, Eva Burrows. *International Headquarters*:—101 Queen Victoria Street, EC4P 4EP.

members). *President of the Baptist Union of Great Britain*, (1989-90), Rev. Dr. John Biggs. *Secretary*, Rev. B. Green, Office, Baptist House, 129 Broadway, Didcot, Oxon. OX11 8RT.

LUTHERAN CHURCH

The Lutheran Church is one of the largest Protestant churches, with over 70 million members worldwide, although there are only about 27,000 adherents in Great Britain. The government and organization of the Lutheran Church varies from country to country, some having an episcopal and some a more congregational form.

Very few British people are Lutherans and services in Great Britain are held in many languages to serve members of different nationalities. English-language congregations in Great Britain are members either of the Lutheran Church in Great Britain—United Synod or of the Evangelical Lutheran Church of England. The United Synod and most of the "national churches" are members of the Lutheran Council of Great Britain and through the Council are related to the Lutheran World Federation.

Russian Orthodox Church Outside Russia. His Grace Bishop Constantine, Dormition Cathedral, Emperor's Gate, SW7. *Mission Administrator*, Hegumen Seraphim, 14 St. Dunstan's Road, NW6.

The Poles, Ukrainians, Latvians, Byelorussians and Romanians also have congregations in this country.

THE RELIGIOUS SOCIETY OF FRIENDS (QUAKERS)

The Religious Society of Friends (Quakers), founded in the 17th century, has no separated ministry. There are in Great Britain 462 places of worship and 18,010 members (world membership 213,800). *Central Offices (Great Britain)*, Friends House, Euston Road, NW1 2Bd; (*Ireland*), Swanbrook House, Morehampton Road, Dublin 4.

The First Church of Christ, Scientist, in Boston Massachusetts, U.S.A. (*District Manager*, Committees on Publication for Great Britain and Ireland, 108 Palace Gardens Terrace, W8), has about 230 branch churches and societies in Great Britain and Ireland.

The Free Church of England (otherwise called The Reformed Episcopal Church) has 29 churches and 1,657 adherents in England. *Gen. Sec.*, Rt. Rev. A. Ward, 28 Sedgebrook, Liden, Swindon, Wilts. SN3 6EY.

The Seventh Day Adventists (*Hdqrs.*, Stanborough Park, Watford, Herts. WD2 6JP), have more than 235 organized churches and companies and more than 17,000 members in the British Isles. *Executive Sec.*, D. W. McFarlane.

THE ROMAN CATHOLIC CHURCH

HIS HOLINESS POPE JOHN PAUL II (Karol Wojtyla), born in Wadowice, Poland, May 18, 1920; ordained priest November 1, 1946; appointed *Archbishop of Krakow* January 13, 1964, created *Cardinal* at a Consistory on June 26, 1967. Formally assumed Pontificate October 16, 1978.

THE SACRED COLLEGE OF CARDINALS, when complete, consisted of six Cardinal Bishops, fifty Cardinal Priests and fourteen Cardinal Deacons. This number was fixed by Pope Sixtus V in 1586. The number was increased by Pope John XXIII, who created 52 new Cardinals, and by Pope Paul VI, who created 141 new Cardinals; Pope John Paul II has created 86 new Cardinals (15 on June 30, 1979, 18 on Feb. 2, 1983, 28 on May 25, 1985, 25 on June 28, 1988). In Aug. 1988 there were 158 Cardinals. The Cardinals are advisers and assistants of the Sovereign Pontiff and form the supreme council or Senate of the Church. On the death of the Pope they elect his successor. The assembly of the Cardinals at the Vatican for the election of a new Pope is known as the Conclave in which, in complete seclusion, the Cardinals elect by secret ballot; a two-thirds majority is necessary before the vote can be accepted as final. When a Cardinal receives the necessary votes the Dean of the Sacred College formally asks him if he will accept election and the name by which he wishes to be known. On his acceptance of the office the Conclave is dissolved and the First Cardinal Deacon announces the election to the assembled crowd in St. Peter's Square. On the first Sunday or Holyday following the election the new Pope assumes the pontificate at High Mass in St. Peter's Square. A new pontificate is dated from the assumption of the pontificate.

FORMS OF ADDRESS: *Cardinal*, "His Eminence Cardinal . . ." (if an Archbishop, "His Eminence the Cardinal Archbishop of . . ."); *Archbishop*, "The Most Rev. Archbishop of . . ."; *Bishop*, "The Rt. Rev. Bishop of . . ."

THE CURIA

The Curia or governing body of the Roman Catholic Church is made up of various administrative departments headed by the Secretariat of State and the Sacred Council for the Public Affairs of the Church. Below these are congregations, secretariats and tribunals assisted by commissions and offices. All are headed by Cardinals who have as their British equivalent the Ministers or Secretaries of State heading the various government departments.

The Vatican State has, as with any nation, its own diplomatic service although its representatives are officially acknowledged in different ways throughout the countries of the world. Where the representation is only to the local church and not to the government of that country then the man appointed is an Apostolic Delegate. However, where the representative is recognized as having diplomatic status by a particular government then he is known as either a nuncio, pro nuncio or inter nuncio. Nuncios are Papal Ambassadors who are given precedence over all other ambassadors by their appointed country and are the doyens of the diplomatic corps. In countries where precedence is not recognized, in Britain, the papal representative is known as pro nuncio.

THE BISHOPS' CONFERENCES

The Roman Catholic church in England and Wales is governed by:

1. **The Bishops' Conference** which consists of the local ordinaries (the Diocesan Bishops) of any rite; coadjutor bishops and auxiliaries; and titular bishops with special tasks. They are headed by the President, Cardinal Basil Hume, and Vice President, Archbishop Worlock, Archbishop of Liverpool.

2. **The Bishops' Standing Committee** made up of the Metropolitans (Archbishops) and department heads. It has general responsibility for continuity and policy between the Plenary Sessions of the Conference and for the preparation of the agenda and implementation of Conference decisions. This committee is serviced by the General Secretariat.

There are six departments, each with an episcopal chairman, which look after the life of the church within England and Wales. The departments and their heads are as follows:

- (a) Department for Christian Life and Worship: Archbishop Bowen (*Southwark*).
- (b) Department for Mission and Unity: Bishop Clark (*East Anglia*).
- (c) Department for Christian Doctrine and Formation: Bishop Konstant (*Leeds*).

- (d) Department for Social Responsibility: Bishop Harris (*Middlesbrough*).
- (e) Department for Christian Citizenship: Bishop McCartie (*Auxiliary in Birmingham*).
- (f) Department for International Affairs: Bishop O'Brien (*Hertfordshire*).

As well as the above, the Conference has agencies and consultative bodies affiliated to it and all are serviced by the General Secretariat headed by General Secretary namely:

England & Wales—Mgr. Vincent Nichols, 39 Eccles-ton Square, SW1V 1PD.

Scotland—Right Rev. Maurice Taylor, Bishop of Galloway, Candida Casa, Corsehill Road, Ayr, Scotland, KA7 2ET.

Ireland—(Executive Secretary) Rev. Gerard Clifford, Iona, 67 Newry Road, Dundalk, Co. Louth.

EDUCATION IN THE UNITED KINGDOM

(For addresses of national education departments, see *Government and Public Offices*. For other addresses, see *Education Directory*.)

The Government's stated aims in education are to raise standards of achievement at all levels of ability; to increase parental choice; to secure the best possible return from the resources invested in the education service; and to widen access to further and higher education while linking them more closely to the needs of the economy. To achieve these objectives three major pieces of educational legislation have been introduced over the past three years, with similar measures proposed for Northern Ireland. Legislation is at present before Parliament for Scotland.

Recent legislation

The first of the recent measures was the Education Act 1986 which legislated for changes in the management of schools and the terms of employment of teachers.

The Education (No. 2) Act 1986 extended the legislation requiring appraisal and in-service training for teachers. It also made changes in the management and accountability of schools, introducing new arrangements for the composition of governing bodies which increase the influence of parents.

The Education Reform Act 1988 received the Royal Assent in July 1988. It provided for: the introduction of a national curriculum supported by attainment targets and systems of assessment; local education authorities to delegate control for their budgets to all secondary schools and larger primary schools; all secondary schools and the larger primary schools to have the choice to opt out of local authority control; and the establishment of City Technology Colleges and City Colleges for the Technology of the Arts.

These provisions apply to schools in England and Wales and similar measures are to be implemented for Northern Ireland. These will include: a curriculum common to all schools with six broad areas of study incorporating certain compulsory subjects; formal assessment of pupils; the provision for schools to become grant-maintained to apply to integrated schools only; the introduction of measures to facilitate the growth of integrated schools (see also p. 439); schools (initially secondary schools) and further education colleges to have control over their own budgets; changes to the composition of further education college boards to reflect the community served by the college.

In Scotland, the School Boards (Scotland) Act 1988 increased parental involvement in school management by instituting school boards with parent representation for state schools in Scotland. The Self-Governing Schools etc. (Scotland) Bill (expected to be enacted in October 1989) will create two new types of schools: self-governing schools, which will withdraw from local authority control although they will remain in the public sector; and Technology Academies, which will be set up in partnership with industry in deprived urban areas.

National administration of education

In the United Kingdom responsibility for education is largely decentralized. The Secretary of State for Education and Science has overall responsibility for all aspects of education in England, and for government policy and support for universities throughout Britain in consultation with the Secretaries of State for Wales and Scotland. Responsibility in Wales for nursery, primary and secondary education, and for all non-university institutions of higher and further education, the youth and community services, and adult education lies with the Secretary of State for Wales. The general supervision of the national

system of education in Scotland, except for the universities, is the responsibility of the Secretary of State for Scotland acting through the Scottish Education Department. All aspects of education in Northern Ireland, schools, further education and universities, are the responsibility of the Secretary of State for Northern Ireland.

The main concerns of the education departments (the Department of Education and Science, the Welsh Office, the Scottish Education Department, and the Department of Education for Northern Ireland) are the formulation of national policies for education, and the maintenance of consistency in educational standards. They are responsible for the broad allocation of resources for education, for the rate and distribution of educational building and for the supply, training and superannuation of teachers. Hitherto, none of the education departments have run any schools or colleges directly, nor employed any teachers. However, under the provisions of the Education Reform Act 1988, the Department of Education and Science in England and Wales is to play a new role in funding individual schools which have opted out of local education authority control and applied for direct funding from the Secretary of State. In addition, the Department of Education and Science, in association with sponsors from industry, will fund the new City Technology Colleges and City Colleges for the Technology of the Arts.

Similar provisions are being introduced for Scotland under the Self-Governing Schools etc. (Scotland) Bill. This will allow schools to opt out of education authority control and be directly funded by central government. It will also provide for the institution of Technology Academies on a similar basis to City Technology Colleges in England and Wales.

Schools in Northern Ireland will be able to apply for grant-maintained status from the Department of Education for Northern Ireland only if they intend to provide integrated education.

Her Majesty's Inspectorate

Her Majesty's Inspectors (H.M.I.s) inspect state and independent schools and all other educational establishments apart from universities. H.M.I.s assess standards and trends and advise the Secretaries of State on the performance of the system in the United Kingdom. They identify and make more widely known good practice and promising developments, and draw attention to weaknesses needing consideration. They provide advice and help to those with responsibilities for, or in, the institutions through day-to-day contacts, contributions to training, and their publications. Inspection visits are the main way in which the H.M.I.s perform their functions. There were, in 1989-90, 481 H.M.I.s in England, 55 in Wales, 111 in Scotland, and 61 in Northern Ireland.

Expenditure

The Department of Education and Science (D.E.S.), the Welsh Office, the Scottish Office and the Northern Ireland Office act within a framework of estimates approved by Parliament.

In real terms expenditure on education by the Departments was as follows (£ million):

	1988-89 estimated outturn	1989-90 planned
D.E.S.	17,693	18,733
Welsh Office	939	984

S.E.D.	2,311	2,354
D.E.N.I.	823	903
In the United Kingdom in 1986-87, central government expenditure on education was apportioned — follows (£million):		
Schools.....	465.1	
Further and Higher education	1,953.3	
Other education and related expenditure ..	220.3	

Most of this expenditure is incurred by local authorities which make their own expenditure decisions according to their local situations and needs and which are also responsible for funding most further education courses. The bulk of direct expenditure by central government is by the D.E.S., which supports the universities in England, Wales and Scotland through the Universities Funding Council (U.F.C.). From April 1, 1989 the D.E.S. has also supported advanced courses in polytechnics and colleges of higher education in England through the Polytechnics and Colleges Funding Council (P.C.F.C.).

In Scotland, as in England and Wales, the bulk of expenditure on education is at a local level by the regional and islands councils. The main elements of central government expenditure are grant-aided special schools, student awards, and the capital and recurrent grants to central institutions and colleges of education.

The Department of Education for Northern Ireland finances higher education, teacher education, teacher salaries and superannuation, student awards and voluntary grammar schools. Remaining expenditure is by education and library boards at local level.

Local administration of education

The education service at present is a national service in which the provision of school education and post-school further education is locally administered and its administration is still largely decentralized.

England and Wales.—In England and Wales the education service is administered by local education authorities (L.E.A.s), which carry the day-to-day responsibility for providing state primary, secondary and some further education (but no longer advanced courses in the polytechnics and colleges of higher education) to meet the needs of their areas.

Each local education authority is required by statute to appoint an education committee, or committees, authorized to exercise on its behalf any of the authority's functions with respect to education except the power to borrow money or to raise a rate. Members of the council make up a majority of these committees, but a number of people with experience in education and knowledge of the local education situation are also included.

The L.E.A.s own and maintain schools and colleges, build new ones and provide equipment. Most of the public money spent on education is disbursed by the local authorities. L.E.A.s are financed largely from the rates and by rate support grants from the Department of the Environment in England and the Welsh Office in Wales.

The powers of local education authorities as regards the control of their schools have been modified in recent years. The Education (No. 2) Act 1986 legislated for equal numbers of parents and local authority representatives as governors in most maintained schools. This modification was continued by the Education Reform Act 1988, which delegated control of their budgets directly to secondary and larger primary schools. It also provided for schools with over 300 pupils to opt out of local authority control and to be funded directly by central government.

Scotland.—The duty of providing education locally in Scotland rests with the nine regional and three island councils. They are responsible for the construction of buildings, the employment of teachers and other staff, and the provision of equipment and materials. Their responsibility for the curricula taught in schools is delegated at the moment to individual headteachers, but discussions are taking place on the standardization of curricula to allow for new assessment procedures.

The powers of local authorities in educational institutions under their control are being reduced in Scotland as in England and Wales. Under the School Boards (Scotland) Act 1988, education authorities are required to establish school boards consisting of parents and teachers as well as co-opted members, responsible among other things for the appointment of staff. The Self-Governing Schools etc. (Scotland) Bill provides for schools to withdraw from local authority control and become self-governing; for the institution of Technology Academies directly funded by central government; and for the composition of further education college councils on which at least half the members are employers, and for the delegation of substantial functions to these new councils.

Northern Ireland.—Education is administered locally in Northern Ireland by five education and library boards. All grant-aided schools include elected parents and teachers on their boards of governors. Provision is being made for schools wishing to provide integrated education to apply for grant-maintained status and thus opt out of education authority control. It is also proposed, in line with England and Wales, to delegate the powers and responsibilities for their financial affairs to the boards of governors of schools (initially secondary schools) and colleges of further education.

SCHOOLS AND PUPILS

Schooling is compulsory in the United Kingdom for all children between 5 and 16 years. Some provision is made for children under 5 and many pupils remain at school after the minimum leaving age. No fees are charged in any publicly maintained school in England, Wales and Scotland. In Northern Ireland, however, fees are paid by pupils in preparatory departments of grammar schools, and a small number of pupils is admitted at present to grammar schools on a fee-paying basis. The latter is a consequence of the existence of a fixed quota for pupils transferring to grammar school, but as this is to be abolished by 1990, fees will no longer be appropriate.

In England, Wales and Scotland, parents have a right to express a preference for a particular school and have a right to appeal if dissatisfied. Parental choice has been increased by the introduction of a policy known as more open enrolment whereby schools are required to admit children up to the limit of their capacity if there is a demand for places.

Legislation to similar effect is also projected for Northern Ireland. However, schools may in exceptional cases seek permission from the Department of Education for Northern Ireland to enrol fewer pupils than their capacity where they consider the admission of certain pupils would not be in the pupils' best educational interests, considering the academic emphasis of the school.

Schools are now required to make available information about themselves and their examination results. Corporal punishment is no longer legal in publicly maintained schools in the United Kingdom.

Fall and rise in numbers

In primary education, and increasingly in secondary education, pupil numbers in the United Kingdom have declined. In primary schools pupil numbers peaked at around 5·6 million in the early 1970s and reached their lowest figure of 3·9 million in 1987. However, numbers are expected to increase gradually year by year until by 1998 they reach about 4·7 million. In secondary schools pupil numbers rose from 3·5 million in 1971 to 4·6 million in 1981. They are projected to decrease to 3·4 million in 1991, before rising to 3·6 million in 1998.

England and Wales

There are two main categories of school in England and Wales: those maintained by local education authorities (25,458), which charge no fees; and independent schools (2,340), which charge fees (see p. 440). To these categories may be added two more as a result of the Education Reform Act 1988, consisting of institutions funded directly by the Secretary of State. These comprise primary and secondary schools with over 300 pupils which, although still providing free education, have applied to opt out of local education authority control in favour of grant-maintained status; and City Technology Colleges (see below).

Maintained schools.—These are of two types: (i) county schools (17,592 in 1988) which are owned by L.E.A.s and wholly funded by them. They are non-denominational and provide primary and secondary education; (ii) voluntary schools (7,866 in 1988) which also provide primary and secondary education. Although the buildings are in many cases provided by the voluntary bodies (mainly religious denominations) they are financially maintained by an L.E.A.

All publicly maintained schools have a governing body usually made up of an equal number of parent representatives and governors appointed by the L.E.A., the headteacher (unless he or she chooses otherwise), and serving teachers. Parental involvement in the running of their children's schools has increased considerably in recent years, and parents have also been given the power to decide by ballot whether their child's school should opt out of local authority control. The responsibilities of governors under the Education (No. 2) Act 1986 were extended to cover the overall policies of schools and their academic aims and objectives. The governors also now control matters of school discipline and the appointment and dismissal of staff. The Education Reform Act 1988 delegated control of the administration of the major part of school budgets, including staffing costs, from L.E.A.s directly to the larger primary and secondary schools.

Voluntary schools are of three kinds: controlled (3,246), aided (4,528) and special agreement (85). In controlled schools the L.E.A. bears all costs. In aided schools the building is usually provided by the voluntary body. The managers or governors are responsible for repairs to the outside of the school building and for improvements and alterations to it, though the Department of Education and Science may reimburse part of approved capital expenditure. The L.E.A. pays for internal maintenance and other running costs. Special agreement schools are those where the L.E.A. may, by special agreement, pay between one-half and three-quarters of the cost of building a new, or extending an existing, voluntary school, almost always a secondary school. There are no special agreement schools in Wales. In voluntary schools the majority of the managers or governors are appointed by the voluntary body and at least one by the L.E.A. The managers or governors control the appointment of teachers. Expenditure is normally

apportioned between the authority and the voluntary body.

City Technology Colleges (C.T.C.s) and City Colleges for the Technology of the Arts (C.C.T.A.s).—These schools are state-aided but independent of L.E.A.s. Their aim is to widen the choice of secondary education in disadvantaged urban areas and to teach a broad curriculum with an emphasis on science, technology, business understanding and arts technologies. Capital costs will be shared by government and sponsors from industry and commerce, and running costs will be covered by a per capita grant from the D.E.S. in line with comparable costs in an L.E.A. maintained school. The first city technology college opened in September 1988 in Solihull. By September 1990 there will be five: Nottingham and Teesside (opening September 1989), Middlesbrough, Bradford and Gateshead. The first C.C.T.A. will open in Croydon in 1990.

Scotland

Schools in Scotland fall into three main categories: (a) education authority schools (3,773) (known as public schools) which are financed and managed by the regional and islands councils; (b) grant aided schools (19), conducted by voluntary managers who receive grants direct from the Scottish Education Department; and (c) independent schools (153), which receive no direct grant and charge fees, but are subject to inspection and registration. An additional category would arise under the provisions of the Self Governing Schools etc. (Scotland) Bill, of schools opting to be managed entirely by a board of management consisting of the headmaster, parent and staff representatives and co-opted members. The change of status would require a ballot of parents and the publication of proposals by the board, and the achievement of self-government would be subject to a final decision by the Secretary of State. These schools would remain in the public sector and would be funded by direct government grant set to match the resources the school would have received under education authority management.

Under the School Boards (Scotland) Act 1988, education authorities are required to establish school boards to participate in the administration and management of schools. These boards consist of elected parents and staff members as well as co-opted members.

Technology Academies.—The Self-Governing Schools etc. (Scotland) Bill provides for setting up technology academies in areas of urban deprivation. These secondary schools are intended to be so placed as to draw on a wide catchment, and will offer a broad curriculum with an emphasis on science and technology. They are to be founded and managed in partnership with industrial sponsors, with central government meeting the running costs by grant-aid thereafter.

Northern Ireland

There are three main categories of grant-aided school in Northern Ireland: (a) controlled schools (701), which are controlled by the education and library boards with all costs paid from public funds; (b) voluntary schools (592), mainly under Roman Catholic management, which receive grants towards capital costs and running costs in whole or in part; and (c) voluntary grammar schools (59), which may be under Roman Catholic or non-denominational management and receive grants from the Department of Education for Northern Ireland. All grant-aided schools include elected parents and teachers on their boards of governors. There also are 12 independent schools in Northern Ireland.

An attempt is being made to encourage the integrated education of Protestant and Roman Catholic pupils in Northern Ireland by the introduction of legislation which may include provision for the setting up of an independent body assisted by public funds to help achieve this end. At present integrated education is provided by a small number of schools supported in part by charitable trusts. Provision is to be made for other schools to opt for grant-maintained integrated status (G.M.I.S.), with financial help available in their early stages and priority given to capital projects to provide additional pupil places at such schools.

THE STATE SYSTEM

Nursery education.—Nursery education is for children from 2 to 5 years and is not compulsory. In the United Kingdom it takes place in nursery schools or nursery classes in primary schools. In January 1987, 680,700 pupils under 5 years of age were receiving education in maintained nursery and primary schools, an increase of 10,000 on the previous year. Of the total, 97,100 were in nursery schools, 537,400 in nursery classes in primary schools, and 37,000 in non-maintained nursery schools. Expressed ■■ percentage of the population aged 3 and 4 years, the 680,700 represented 47·6 per cent, compared to 46·7 per cent in the previous year.

Many children also attend pre-school playgroups organized by parents and voluntary bodies such ■■ the Pre-School Playgroups Association.

Primary education.—Primary education begins at 5 years and is almost always co-educational. In England, Wales and Northern Ireland the transfer to secondary school is generally made at 11 years. In Scotland, the primary school course lasts for seven years and pupils transfer to secondary courses at about the age of 12.

Primary schools consist mainly of *infants' schools* for children aged 5 to 7, *junior schools* for those aged 7 to 11, and combined *junior and infant schools* for both age groups. In addition, *first schools* in some parts of England cater for ages 5 to 8, 9 or 10. (They are the first stage of a three-tier system: first, middle and secondary). Many primary schools provide nursery classes for children under 5 (see above).

The number of primary schools in the United Kingdom in 1987 was 24,609, which was 147 less than in 1986, with 4,567,000 full- and part-time pupils, of which 731,000 were under five. Between 1987 and 1994 primary school pupil numbers are projected to rise by 8·5 per cent.

Pupil teacher ratios in maintained primary schools in the United Kingdom are:

	1986	1987
England	22·1	22·0
Wales	22·1	22·0
Scotland	20·4	20·3
N. Ireland	23·4	23·5
U.K.	22·0	21·9

The average size of classes "as taught" has risen slightly from 25·5 in 1981 to 25·8 in 1987.

Middle schools.—Middle schools (which take children from first schools), mostly in England, cover varying age ranges between 8 and 14 and usually lead on to comprehensive upper schools.

Secondary education.—Secondary schools are for children aged 11 to 16 and for those who choose to stay on to 18. At 16, many students prefer to move on to tertiary or sixth form colleges (see p. 444). Most secondary schools in England, Wales and Scotland are co-educational. The largest secondary schools

have over 2,000 pupils but only 24·4 per cent of the schools take over 1,000 pupils.

In England and Wales the main types of secondary schools are: (a) *comprehensive schools* (85·8 per cent of pupils in England, 98·5 in Wales), whose admission arrangements are without reference to ability or aptitude; (b) *middle deemed secondary schools* for children aged variously between 8-14 years who then move on to senior comprehensive schools at 12, 13 or 14 (6·5 per cent of pupils in England, 0·1 per cent in Wales); (c) *secondary modern schools* (4·1 per cent of pupils in England, 0·6 per cent in Wales) providing ■ general education with ■ practical bias; (d) *secondary grammar schools* (3·1 per cent of pupils in England, 0·5 per cent in Wales) with selective intake providing an academic course from 11 to 16-18 years; and (e) *technical schools* (0·5 per cent) in England only providing ■ integrated academic and technical education.

In January 1987 there were in England and Wales 3,450,000 pupils in maintained secondary schools, including 62 per cent (England) and 63 per cent (Wales) who were 16 or over. After falling by 12 per cent between 1987 and 1991, numbers are projected to rise until 1998 by 8·7 per cent.

Pupil-teacher ratios have improved steadily from 16·6 in 1980-81 to 15·4 in 1988 in England and Wales. A steady annual decrease in class sizes in England resumed after ■ rise in 1985 (to 21·4); from to 20·9 in 1984 to 20·7 in 1988. In Wales the average class size in 1988 was 19·1.

In Scotland over 99 per cent of pupils in education authority secondary schools attend schools with a comprehensive intake. Most of these schools provide a full range of courses appropriate to all levels of ability from first to sixth year. In 1986-87 there were 327,700 pupils in education authority schools, of whom 54 per cent were 16 or over. Numbers are not expected to increase much between 1990 and 1995. Pupil-teacher ratios have improved from 14·4 in 1980-81 to 13·0 in 1988. The average class size in 1987 was 18·8.

In Northern Ireland entry at 11-12 years of age to a secondary (intermediate) school or grammar school is selective in most areas. However, the present transfer procedure is to be abolished. In future the type of secondary school to which a pupil transfers will normally be a matter of choice by parents, after consultation with primary teachers, and based on the information contained in the pupil's record of achievement. Grammar schools provide an academic type of secondary education with A-levels at the end of the seventh year, while secondary (intermediate) schools follow a curriculum suited to aptitudes and abilities leading to GCSE examinations.

In 1986-87 there were 109,000 pupils in public sector secondary schools, of whom 90,000 (88·5 per cent) attended secondary intermediate and 12,000 (11·5 per cent) attended grammar schools. Of these 63 per cent were 16 or over. Pupil-teacher ratios in Northern Ireland have improved from 15·2 in 1982 to 14·5 in 1988.

Special education.—Special education is provided for children with special educational needs, usually because they have ■ disability which either prevents or hinders them from making use of educational facilities of a kind generally provided for children of their age in schools within the area of the local authority concerned. Maintained special schools are run by education authorities which pay all the costs of maintenance. Non-maintained special schools are run by voluntary bodies; they may receive some grant from central government for capital expenditure and for equipment, but their current expenditure is met primarily from the fees charged to the education authorities for pupils placed in the schools. Some independent schools provide education

wholly or mainly for children with special educational needs. The national curriculum also applies to children with a statement of special needs, but there is provision for them to be exempt from it, or for it to be modified to suit the individual child's capabilities.

In January 1987 in the United Kingdom there was a total of 120,400 full-time pupils in special schools (of whom 3,200 were in hospital schools). Of this total, 104,200 were in England, 4,000 in Wales, 9,800 in Scotland and 2,500 in Northern Ireland. Numbers have gone down since 1975–76 — education authorities in England, Wales and Northern Ireland must now ensure that children with special needs are educated as far as possible in ordinary schools with support teaching.

In Scotland, school placing is a matter of agreement between education authorities and parents. Parents have the right to say which school they want their child to attend, and a right of appeal where their wishes are not being met. Whenever possible, children with special needs are integrated into ordinary schools. However, for those who require a different environment or specialized facilities, there are special schools, both grant-aided and independent, and special classes within ordinary schools. The Self-Governing Schools etc. (Scotland) Bill will oblige education authorities to respond to reasonable requests for independent special schools, and provides for them to send children with special needs to schools outside Scotland if appropriate provision is not available within the country.

Alternative provision

There is no legal obligation on parents in the United Kingdom to educate their children at school provided that the local education authority is satisfied that the child is receiving full-time education suited to its age, abilities and aptitudes. The education authority need not be informed that a child is being educated at home unless the child is already registered at a state school. In this case the parents must arrange for the child's name to be removed from the school's register (by writing to the headteacher) before education at home can begin. Failure to deregister a child would leave the parents liable to prosecution for condoning non-attendance.

In most cases an initial visit is made by an education adviser or education welfare officer, and sometimes subsequent inspections are made, but practice varies according to the individual education authority. There is no requirement for parents educating their children at home to be in possession of a teaching qualification.

Further advice on educating children other than at school can be obtained from Education Otherwise.

INDEPENDENT SCHOOLS

Independent schools receive no grants from public funds. They charge fees, and are owned and managed under special trusts, with profits being used for the benefit of the schools concerned. There is a wide variety of provision, from kindergartens to large day and boarding schools, and from experimental schools to traditional institutions. A number of independent schools have been instituted recently by religious and ethnic minorities.

All independent schools in the United Kingdom are open to inspection by H.M. Inspectors (see above) and must register with the appropriate government education department. The education departments lay down certain minimum standards and can make schools remedy any unacceptable features of their building or instruction and exclude any unsuitable teacher or proprietor. Most independent schools

offer a similar range of courses to state schools and enter pupils for the same public examinations.

The term public schools is often applied to those independent schools in membership of the Headmasters' Conference, the Governing Bodies Association or the Governing Bodies of Girls' Schools Association. Most public schools are single-sex (about half of them for girls) but there are some mixed schools and an increasing number of boys' schools admit girls to their sixth forms.

Preparatory schools are so called because they prepare children for the Common Entrance Examination to senior independent schools. Most cater for boys from about 7 to 13 years, but some are for girls and an increasing number are co-educational. The Common Entrance Examination is set by the Common Entrance Examination Board, but marked by the independent school to which the pupil intends to go. It is taken at 13 by boys, and from 11 to 13 by girls.

In 1988 there were in England 2,273 independent schools with 522,949 full-time pupils and a pupil-teacher ratio of 11·3.

In Wales in 1987–88 there were 67 independent schools, with 11,788 pupils and a pupil-teacher ratio of 10·3.

In Scotland in 1987–88 there were 153 registered independent schools with 35,200 pupils. Most independent schools in Scotland follow the English examination system, i.e. GCSE followed by A-levels, although some take the Scottish Education Certificate at Ordinary/Standard grade followed by Highers.

There are 12 independent schools in Northern Ireland with 901 pupils and a pupil-teacher ratio of 14·0.

Assisted Places Scheme

The Assisted Places Scheme enables children to attend independent secondary schools which their parents could not otherwise afford. The scheme provides help with tuition fees and other expenses, except boarding costs, on a sliding scale depending on the family's income. The take-up rate for places available at age 11 to 13 at the 286 participating schools in England and Wales is over 90 per cent, and the proportion of pupils receiving full fee remission is 40 per cent. Some 34,000 places were offered in England and Wales in the academic year 1988–89. The 40 participating schools in Scotland admitted 2,670 pupils on the scheme, which, unlike that in England and Wales, is cash-limited. The proportion of pupils receiving full fee remission is 49 per cent.

The scheme is administered and funded in England by the Department of Education and Science, in Wales by the Welsh Office, and in Scotland by the Scottish Education Department.

The scheme does not operate in Northern Ireland as the independent sector admits non-fee paying pupils. There is, however, a similar scheme known as the Talented Children's Scheme to help pupils gifted in music and dance.

Further information can be obtained from the Independent Schools Information Service.

THE CURRICULUM

England and Wales

Headteachers in England and Wales are responsible for determining the curriculum in their schools with due reference to their local education authority and their school governors. The Education Reform Act 1988 legislated for the progressive introduction from autumn 1989 of a national curriculum in primary and secondary schools. During the period of compulsory

schooling for children aged 5 to 16 the curriculum will include mathematics, English and science ■ core subjects; and history, geography, technology, music, art, physical education and (for pupils in secondary schools) ■ modern foreign language as foundation subjects. For the core and foundation subjects there will be attainment targets and assessment procedures at the ages of 7, 11, 14 and 16, when the GCSE will be the main form of assessment. It is intended that pupils with special educational needs should have access to as much of the national curriculum as possible. Religious education is required to be available in schools, with the curriculum devised locally, but parents will have the right to remove their children if they wish.

In Wales the Welsh language is used as the main or secondary medium of instruction in many schools. Following the introduction of the national curriculum it will constitute a core subject in Welsh-speaking schools and ■ foundation subject in the others.

In England the National Curriculum Council, funded by the Department of Education and Science, is responsible for the promotion and support of curriculum development in addition to advising the Secretary of State on the national curriculum. In Wales this function is performed by the Curriculum Council for Wales, funded by the Welsh Office.

Scotland

The content and management of the curriculum in Scotland is the responsibility of education authorities and individual headteachers. Advice and guidance is provided by the Scottish Education Department and the Scottish Consultative Council on the Curriculum. Scotland effectively has a national curriculum for 14–16 year-olds, who are required to study English, mathematics and ■ science subject plus five other subjects. These form the core area, supplemented by other activities forming the elective area. There is ■ recommended percentage of class time to be devoted to each area over the two years. Provision is made for teaching in Gaelic in Gaelic-speaking areas.

The Scottish Consultative Council on the Curriculum, which is responsible for development and advisory work on the curriculum in Scotland, has been asked to undertake ■ major review of the balance of the primary curriculum, and to produce new guidelines for each of the subject areas for the age group 5–14. There will be new guidelines on assessment across the whole curriculum, and standardized tests will be introduced in English and mathematics for 9 and 12 year-olds. For 16–18 year-olds, there is available a modular system of vocational courses in addition to academic courses.

Northern Ireland

Major programmes of curricular review and development are in progress in primary and secondary schools. A curriculum common to all schools is to be introduced, with six broad areas of study within which certain subjects will be compulsory; religious education will also be a compulsory part of the curriculum. All secondary school pupils will be obliged to study ■ European language, and the Irish language will be available ■ an additional modern language (broadly equivalent to the position of Welsh in schools in Wales) alongside the six areas of study. Arrangements for the assessment of pupils, broadly in line with those in England and Wales, are proposed at the ages of 8, 11, 14 and 16.

The Northern Ireland Curriculum Council advises the Government on all matters concerning the curriculum for grant-aided schools in Northern Ireland.

Records of achievement

Records of achievement are documents which set down the range of pupils' achievements and activities both inside and outside the classroom, including those not tested by examination. They are intended to inform potential employers and others about achievement, and it is proposed that by the mid-1990s all secondary school pupils in England and Wales should be provided with records of achievement on leaving school at 16+. There is a similar commitment for Northern Ireland.

Technical and Vocational Initiative

The Technical and Vocational Initiative (TVEI) operates across the curriculum within a framework of general education. It is intended to make the secondary curriculum more relevant to adult life and work. Following pilot projects, it is now ■ national scheme with newly established criteria which complement and are compatible with the requirements of the new national curriculum in England and Wales. Participation is voluntary, and is open to all maintained schools and colleges providing for young people of all abilities aged 14–18. TVEI is not an examination or a qualification.

THE EXAMINATION SYSTEM

England, Wales and Northern Ireland

Until the end of 1987 secondary school pupils at the end of compulsory schooling around the ■ of 16, and others, took the General Certificate of Education (G.C.E.) Ordinary-level or the Certificate of Secondary Education (C.S.E.). From 1988 these were replaced by a single system of examinations, the General Certificate of Secondary Education (GCSE), which is usually taken after five years of secondary education. The first examinations took place in summer 1988.

The GCSE differs from its predecessors in that there are: syllabuses based on national criteria covering course objectives, content and assessment methods; differentiated assessment (i.e. different papers or questions for different ranges of ability); and grade-related criteria (i.e. grades awarded on absolute rather than relative performance).

The GCSE certificates are awarded on a seven point scale, A to G. Grades A to C are the equivalent of the corresponding O-level grades A to C, or C.S.E. grade 1. Grades D, E, F and G record achievement at least ■ high as that represented by C.S.E. grades 2 to 5. There is no restriction on entry to any examination. All GCSE syllabuses, assessments and grading procedures are monitored by the School Examinations and Assessment Council (see below) to ensure that they conform to the national criteria.

Of school leavers in the United Kingdom who left school without A-levels or SCE H-grades in 1986–87, 37 per cent had achieved one or more graded G.C.E. O-level, C.S.E. or SCE O-grade results, compared to 24 per cent in 1980–81.

Certificate of Extended Education.—The Certificate of Extended Education (C.E.E.) comprises ■ number of single-subject examinations set and awarded by ■ number of GCSE examining boards and taken a year after GCSE. Apart from English and mathematics, subjects are non-traditional and include social, environmental, technological, business and health studies.

Advanced levels and Advanced Supplementary levels.—Advanced (A-level) examinations, taken by those who choose to continue their education two years after GCSE, continue as before although changes have been made to the grading system.

A-level courses last two years, and have traditionally provided the foundation for entry to higher education. A-levels are marked on ■ seven point scale, from A to E, N (narrow failure) and U (unclassified), which latter grade will not be certified.

As an alternative and a complement to A-level examinations, Advanced Supplementary level (AS-level) examinations were introduced in September 1987, with the first examinations taking place in summer 1989. AS-levels are for full-time A-level students but also open to other students. An AS-level syllabus covers not less than half the amount of ground covered by the corresponding A-level syllabus and, where possible, is related to it. An AS-level course lasts two years and requires not less than half the teaching time of the corresponding A-level course, and two AS-levels are equivalent to one A-level. AS-level courses are intended to supplement and broaden A-level studies, and examinations are held at the same time as A-levels. AS-level passes are graded A to E, with grade standards related to the A-level grades.

A mixture of A-level courses in the subjects to be specialized in and AS-levels will form the standard for admission to higher education.

In the United Kingdom in 1986-87, 23 per cent of all 17 year olds (22 per cent of boys, 24 per cent of girls) achieved one or more A-level or SCE H-grade result, compared to 20 per cent in 1980-81. This figure includes those continuing their education in maintained further education establishments including tertiary colleges, as well ■ school leavers.

Of school leavers alone (442,000), 18·2 per cent achieved at least one A-level or SCE H-grade (18·0 per cent of boys, 18·5 per cent of girls). Of those in Great Britain obtaining two or more A-levels, or three or more SCE H-grades, 26 per cent studied sciences (36 per cent of boys, 16 per cent of girls), 39 per cent studied arts/social studies (30 per cent of boys, 39 per cent of girls), and 35 per cent (35 per cent of boys, 35 per cent of girls) studied science and arts/social studies.

S-levels.—Most examining boards allow the option of an additional paper of greater difficulty to be taken by A-level candidates to obtain what is known as a Special-level or Scholarship-level qualification. S-level papers are available in most of the traditional academic subjects and are marked on a three point scale, grade A or 1, grade B or 2, and unclassified.

Co-ordination and advisory body.—The School Examinations and Assessment Council (SEAC) has been set up to advise the Government on all school examinations and assessment matters in England and Wales. It is also responsible for the development of the assessment system for the national curriculum. The Council is funded wholly by the Department of Education and Science.

The Certificate of Pre-Vocational Education.—The Certificate of Pre-Vocational Education (CPVE) is a one-year full-time (or two years part-time) course available at schools and colleges in England, Wales and Northern Ireland. It is intended for ■ wide ability range at 16+, including pupils who might not go on to A-levels but would like to continue their education on completion of their secondary schooling. The qualification is offered by the Business and Technician Training Council and the City and Guilds of London Institute operating together as the Joint Board for Pre-Vocational Education.

There are no formal examinations but credits for work achieved during CPVE can be built up towards further study. Within guidelines laid down by the Board, schools and colleges design their own courses, which stress activity-based learning, basic numeracy and work experience. The CPVE is mainly for those who want to find out what aptitudes they may have

and to prepare themselves for work, but who are not yet committed to a particular occupation.

Scotland

The system of public examinations in Scotland is different from that in the rest of the United Kingdom. At the end of the fourth year of secondary education (equivalent to the fifth year in the rest of the United Kingdom), at about the age of 16, pupils take either the Ordinary grade of the Scottish Certificate of Education Examination (corresponding to the old G.C.E. Ordinary level) or the Standard grade. The Ordinary grade is gradually being replaced by the new Standard grade courses and examinations, which have been designed to suit every level of ability, with assessment against nationally determined standards of performance.

For most courses there are three separate examination papers at the end of the two-year Standard grade course. They are set at Credit (leading to awards at grade 1 or 2), General (leading to awards at grade 3 or 4) and Foundation (leading to awards at grade 5 or 6) levels. Grade 7 is available to those who, although they have completed the course, have shown no significant level of attainment. Normally pupils will take examinations covering two pairs of grades, either grades 1-4 or grades 3-6.

Pupils may attempt as many of a wide range of subjects as they are capable of, on either the Ordinary/Standard grades, or on the Higher grade which is normally taken one year after Ordinary/Standard grades, at the age of 17 or thereabouts. The shorter length of course means that Higher grades are normally studied to a lesser depth than Advanced levels; on the other hand it is common for pupils to be presented for four or more Higher grades at a single diet of the examination.

The Certificate of Sixth Year Studies (CSYS) is designed to give direction and purpose to sixth-year work by encouraging pupils who have completed their main subjects at Higher grade to study ■ maximum of three of these subjects in depth. Pupils may also use the sixth year to gain improved or additional Higher grades or Ordinary/Standard grades.

The Scottish Certificate of Education Examination and the Certificate of Sixth Year Studies are conducted by the Scottish Examination Board.

National Certificate.—The National Certificate was introduced in 1984-85 as an alternative to Highers and CSYS. It is awarded to pupils over the age of 16 who have successfully completed ■ programme of vocational courses based on modular study units. It replaces the profusion of courses and certificates available in non-advanced further education, and the assessment system is based on national criteria. The modules are now being introduced in schools for pupils aged 14-16, and other short courses are being devised for use in schools. The National Certificate is validated by the Scottish Vocational Education Council (see also p. 444).

The International Baccalaureate

The International Baccalaureate is an internationally recognized two-year pre-university course and examination designed to facilitate the mobility of students and to promote international understanding. Candidates must offer one subject from each of six subject groups, at least three at higher level and the remainder at subsidiary level. Single subjects can be offered, for which a certificate is received. There are 17 schools and colleges in the United Kingdom which offer the International Baccalaureate diploma. Further information can be obtained from International Baccalaureate London.

TEACHERS England and Wales

Teachers are appointed by local education authorities, school governing bodies, or school managers. Those in publicly maintained schools must be approved as "qualified" by the Department of Education and Science. To become a qualified teacher it is necessary to have successfully completed a course of initial teacher training. Teacher training is largely integrated with the rest of higher education, with training places concentrated in universities, polytechnics and institutes or colleges of education.

With certain exceptions the profession now has an all-graduate entry. Teachers in further education are not required to have qualified teacher status, though roughly half have a teaching qualification and most have industrial, commercial or professional experience.

A licensed teacher scheme has been introduced to attract into the teaching profession mature entrants without formal teaching qualifications but with relevant training and experience. All licensees will be required to have the equivalent of two years higher education in the United Kingdom in addition to the equivalent of grade C in GCSE maths and English. Local education authorities will be involved in devising a suitable training programme for any licensed teachers they may appoint to their schools; for grant-maintained schools and City Technology Colleges this will be a matter for the school itself.

Scotland

All teachers in maintained schools must be registered with the General Teaching Council for Scotland. They are registered provisionally for a two-year probationary period which can be extended if necessary. Only graduates are accepted as entrants to the teaching profession in Scotland.

Northern Ireland

Teacher training in Northern Ireland is provided by the two universities and two colleges of education. The colleges are concerned with teacher education mainly for the primary school sector. They also provide B.Ed. courses for intending secondary school teachers of religious education, commercial studies, and craft, design and technology. With these exceptions, the training of teachers for secondary schools is provided in the education departments of the universities.

Accreditation of training courses

The Council for the Accreditation of Teacher Education (CATE) has been reviewing all initial teacher training courses in England, Wales and Northern Ireland to ensure that they meet stringent conditions. In Scotland all training courses in

colleges of education must be approved by the Scottish Education Department and a validating body.

Newly-trained teachers

Of teachers who in 1986 had successfully completed initial training courses in the United Kingdom, 8,600 had completed a postgraduate course and 7,000 a course for non-graduates.

In the year to January 1987, 11,467 teachers took up first full-time appointments, either permanently or for at least one term's duration, in maintained nursery, primary and secondary schools in England and Wales. In Scotland and Northern Ireland, figures for 1989 were 642 and 505 respectively.

Shortage subjects.—In recent years there have been shortages of teachers in a number of secondary subjects, particularly mathematics, the physical sciences, chemistry, and craft, design and technology. There is a tax-free bursary scheme worth £1,300 a year for trainee teachers in these four shortage areas for one- or two-year courses.

Serving teachers

In 1986-87 there were 620,000 teachers (full-time and full-time equivalent) in public sector schools and establishments of further education in the United Kingdom. Of these, 502,000 were in maintained schools and 117,000 in further education. There were 203,000 full-time teachers in public sector primary schools, 260,000 in public sector secondary schools and 19,000 in special schools.

In-service training of teachers.—A new scheme, known as INSET, was launched in 1987 for the in-service training of teachers and others employed in the education service. In 1988-89 local education authorities were planning to devote £280 million to the scheme.

Salaries

All qualified teachers in England, Wales and Northern Ireland other than heads and deputy heads, are paid on an 11 point scale ranging from £8,394 to £14,696. Entry points vary depending on qualification and according to the discretion of the appointing authority. In addition, incentive allowances are payable on a range of five rates. Headteachers' salaries range from £17,369 to £34,183, depending on the size of the school; deputy headteachers' salaries range from £16,555 to £24,932. There is a statutory superannuation scheme in maintained schools.

Teachers in Scotland are paid (1989 figures) on a ten point scale from £9,033 to £15,012. As in the rest of the United Kingdom, the entry point depends on type of qualification, and additional allowances are payable under certain circumstances. Headteachers are paid on a scale from £16,935 to £31,047 and depute headteachers from £17,781 to £23,706 depending on the size of school roll.

FURTHER EDUCATION

England and Wales

Responsibility for co-ordinating further education provision rests with ten Regional Advisory Councils set up by the local education authorities (L.E.A.s) in each region. There are nine for England, and the Welsh Joint Committee acts as the council for Wales. The councils operate in accordance with terms of

The term further education is sometimes loosely used for all post-compulsory education. However, the Education Reform Act 1988 defines it as all provision outside schools to people aged over 16 of an education up to and including A-level and its equivalent. All education authorities have a duty to secure provision for adequate facilities for further education in their area.

reference agreed between the participating L.E.A.s, which meet staffing and other expenses. Members include representatives from L.E.A.s, polytechnics and universities, further education institutions, employers and employees in industry and commerce. H.M. Inspectors attend as assessors.

In England and Wales further education courses are taught at a variety of institutions. These range from polytechnics and colleges of further and higher education (most of which also offer higher education courses) to tertiary colleges and sixth form colleges, which concentrate on the provision of normal sixth form school courses as well as a range of vocational courses. A number of institutions specific to a particular form of training, e.g. the Royal College of Music, are also involved. All such courses are funded by local education authorities, with the exception of further education courses in polytechnics and colleges of higher education up to the end of the academic year 1989-90 (see also p. 447).

Every institution maintained by a local education authority and providing full-time further education under a further education scheme is required to appoint a board of governors. At least half the governors must represent employment interests or be people who are independent of local authority or college interests. Local authorities must delegate to these bodies extensive powers over the management of college budgets and the appointment of staff.

The position of teaching staff in further education establishments is similar to that in schools with respect to qualifications and regular appraisal of teachers' performance.

Much of the post-school provision outside the higher education sector is broadly vocational in purpose. It extends from lower level technical and commercial courses through advanced courses for those aiming at higher level posts in industry, commerce and administration, to professional courses. Facilities for GCSE courses, C.E.E. (Certificate of Extended Education), CPVE (Certificate of Pre-Vocational Education), AS-levels and A-level courses are also provided (see pp. 441-2). These courses are designated *non-advanced* further education, and can form the foundation for progress to advanced courses or courses of higher education (see below).

The main courses and examinations in the vocational field are offered by the following bodies, but there are also many others:

Business and Technician Education Council (BTEC) provides awards across a wide range of subject areas and three main qualifications, two at non-advanced and one at advanced level. Of the non-advanced courses, the BTEC First Certificate can be taken over one year part-time and the BTEC First Diploma over one year full-time or two years part-time. Neither requires any formal academic qualifications for entry. The BTEC National Certificate is taken over two years part-time and the BTEC National Diploma over two years full-time or over three years part-time or as a sandwich course. Both require certain academic qualifications for entry.

City and Guilds of London Institute (C.&G.) provides a variety of technical and vocational courses mostly lasting one or two years. Most C.&G. courses are part-time for students already in employment, but some full-time courses are available.

The City and Guilds of London Institute and the Business and Technician Education Council, operating together—the Joint Board for Pre-Vocational Education, are responsible for administering the Certificate of Pre-Vocational Education (see p. 442).

RSA (Royal Society of Arts) Examinations Board schemes cover the whole range of business and administrative occupations, plus language schemes and teacher qualifications. Many of the courses are

offered at levels 1 to 3 along the lines drawn up by the NCVQ (see below). There are no set entry requirements and a policy of credit accumulation, so candidates can take a single certificate or complete qualifications.

There are 516 further education establishments in England and Wales with 2,632 adult education centres. In 1987-88 there were 375,686 full-time and sandwich students and 718,962 part-time students on non-advanced vocational courses of further education.

Scotland

Education authorities in Scotland provide further education comprising non-advanced courses up to S.C.E. Highers grade, G.C.E. A-level and SCOTVEC vocational courses. Courses are taught mainly at colleges of further education, including technical colleges, and in some schools.

Legislation is currently going through Parliament which will ensure that at least half the members of further education college councils are employers; require education authorities to delegate substantial functions to the new councils; allow colleges to earn income from commercial activities and to be incorporated as companies with the agreement of the education authority and the Secretary of State.

The Scottish Vocational Education Council (SCOTVEC) provides national qualifications, known as the National Certificate, across a similar range of occupational sectors to the Business and Technician Education Council in England and Wales. The system is completely comprehensive and covers the whole range of non-advanced further education provision in Scotland. Students may study for the National Certificate on a full-time, part-time, or day- or block-release basis. The system is based on modules and National Certificate modules and modular programmes can be taken in further education colleges, central institutions or in secondary schools from the age of 16 onwards.

In 1986-87 there were 51,978 full-time and sandwich students, 132,992 part-time students on non-advanced vocational courses of further education in the 50 further education colleges, 12 central institutions and five colleges of education.

Northern Ireland

Education and library boards are obliged to prepare and submit for approval to the Department of Education for Northern Ireland, schemes setting out the principles to be applied by the boards in planning the further education provision to be made by colleges under their management.

Although the colleges of further education are maintained by the education and library boards, proposals along the lines of those in England and Wales are to be implemented for the delegation of financial powers and responsibilities to the boards of governors of the colleges. The composition of the boards themselves is to be changed to include 50 per cent membership from the professions, local business or industry, or other fields of employment relevant to the activities of the college.

On reaching school-leaving age, pupils may attend colleges of further education to pursue the same type of vocational courses as are provided in colleges in England and Wales, administered by the same examining bodies.

Northern Ireland has 26 institutions of further education with 231 out-centres. In 1986-87 there were 15,178 full-time students and 35,794 part-time students on non-advanced vocational courses of further education.

Applications for further education courses are generally made directly to the colleges concerned.

Information on further education courses in the United Kingdom and addresses of colleges can be found in the *Directory of Further Education* published annually by the Careers Research and Advisory Council.

National Council for Vocational Qualifications

The National Council for Vocational Qualifications (NCVQ) was set up by the Government in October 1986 to achieve a coherent national framework for vocational qualifications. The Council will not award qualifications but will work with and through the established examining and awarding bodies to reform the existing vocational qualifications system and introduce simplified arrangements. The new system

should be fully operational in England, Wales and Northern Ireland by 1991. It does not apply to Scotland, where a reformed framework already exists under the SCOTVEC National Certificate (see below).

The name and style *National Vocational Qualification* will be accorded to qualifications accredited by NCVQ and awarded by bodies it has approved. The N.V.Q. framework is currently based on four levels incorporating qualifications up to and including the Higher National standard.

A *National Record of Vocational Achievement* has been introduced which allows small elements of competence acquired at different times and in different ways to be recorded in a standard form and to be built up into a full N.V.Q.

Further information can be obtained from the National Council for Vocational Qualifications.

HIGHER EDUCATION

The term higher education is used to describe education above A-level and Higher grade or their equivalent, which is provided in universities and on advanced courses in polytechnics and colleges of higher education.

The Education Reform Act 1988 legislated for important changes in the structure, national planning and funding of higher education (see below).

Students

In 1987-88, there were 578,000 full-time and sandwich students in higher education in the United Kingdom, of whom 58,000 were from overseas. The number of part-time students, including the Open University, in the United Kingdom was 329,000. The proportion of 18 and 19 year-olds entering full-time higher education in Great Britain rose from 13·2 per cent in 1983-84 to 14·6 per cent in 1987-88. The number of mature entrants to full-time higher education is up by 20 per cent on 1981-82. The number of full-time students on science courses in 1986-87 was 139,700, of which 47,600 were female, compared to 143,700 (49,600 female) in 1985-86.

Academic staff

Each university appoints its own academic staff on its own conditions, though there is a common salary structure and, except for Oxford and Cambridge, a common career structure. Most academic staff in British universities, usually well over 90 per cent, have tenure, i.e. after completing a probationary period they are confirmed in post until retirement age. However, the University Commissioners have been formally appointed under the Education Reform Act 1988 to secure changes in university statutes providing for dismissal for good cause and for redundancy.

The Education Reform Act 1988 has taken polytechnics and higher education colleges in England and Wales out of local education authority control, turning them into employers on their own account. The Polytechnics and Colleges Employers Forum has been set up to look after salary structures, which are being re-negotiated.

Teaching staff in higher education require no formal teaching qualification, but teacher trainers are required to spend a certain amount of time in schools to ensure that they have sufficient recent practical experience.

In 1987-88 there were 47,674 full-time and part-time academic staff in universities in the United Kingdom and 96,231 in public sector further and higher education.

The 1989-90 salary scales for non-clinical academic staff in universities were: lecturer grade A £9,816-£15,372; lecturer grade B £16,014-£20,469; senior lecturer £21,489-£26,253; professor £24,783 (minimum). The salaries of clinical academic staff are kept broadly comparable to those of doctors and dentists in the National Health Service.

UNIVERSITIES

Universities are self-governing institutions, usually established by Royal Charter, which are responsible for their own academic appointments, curricula and student admissions. The universities have freedom in academic matters but the Government, through the University Funding Council (see below), determines the total size of the university student population, its distribution between arts, science, medicine, etc., and the part which the university sector plays in the whole higher education system.

Overall responsibility for universities throughout Great Britain rests with the Secretary of State for Education and Science, who consults with the Secretaries of State for Scotland and Wales as necessary. Universities in Northern Ireland are the responsibility of the Secretary of State for Northern Ireland.

Advice to the Government on university matters is provided by the Universities Funding Council (U.F.C.), established under the Education Reform Act 1988 to replace the University Grants Committee. The U.F.C. acts as a buffer between the Government, from which it receives a block grant of money, and the universities, to which it allocates its grant. Its brief is to secure more effective use of public funds allocated to higher education.

There are 46 universities in the United Kingdom. Of these, 35 are in England, one (a federal institution) in Wales, eight in Scotland and two in Northern Ireland. In 1987-88 there was a total of 320,920 full-time students at universities in the United Kingdom (38,000 of these from overseas) and 46,062 part-time students. Women form 43 per cent of the full-time total and 60 per cent of the part-time total.

The non-residential Open University provides courses leading to degrees nationally. Teaching is through a combination of television and radio programmes, correspondence, tutorials, short residential courses and local audio-visual centres. No qualifications are needed for entry. The Open University offers undergraduate, post-experience and postgraduate courses. The University also has a programme of higher degrees: B.Phil., M.Phil. and Ph.D. through research, and M.A. and M.Sc. through taught courses. It is planned to introduce a Master

of Business Administration (M.B.A.) degree course in 1989.

The Open University is grant-aided directly by the Department of Education and Science and does not come under the Universities Funding Council. For Open University purposes Northern Ireland is administered as a separate section of the United Kingdom and the cost is met by the Department of Education for Northern Ireland.

In 1987, 68,037 undergraduates were registered at the Open University, of whom 31,238 were women and 36,999 were men. Estimated cost (1989) of a B.A. general degree was over £1,280 and of a B.A. Hons. degree, £1,540. Applications should be made direct to The Open University, PO Box 71, Milton Keynes MK7 6AG.

The independent University of Buckingham provides a two-year course leading to a bachelor's degree and its tuition fees were £6,500 for 1989. It receives no capital or recurrent income from the Government but its students are eligible for mandatory awards from local education authorities. Its academic year consists of four terms of ten weeks each.

Courses

All universities award their own degrees and sometimes act as awarding and validating bodies for neighbouring colleges of higher education, though this function is increasingly being taken on by the Council for National Academic Awards (see below). With the exception of certain Scottish universities where Master is sometimes used for a first degree in arts subjects, undergraduate courses lead to the title of Bachelor—Bachelor of Arts (B.A.) and Bachelor of Science (B.Sc.) being the most common—and for a higher degree Master of Arts (M.A.), Master of Science (M.Sc.) (usually taught courses) and the research degrees of Master of Philosophy (M.Phil.) and Doctor of Philosophy (Ph.D. or, at a few universities, D.Phil.).

Most undergraduate programmes at British universities run for three years, except in Scotland and at the University of Keele where they may take four years. Professional courses in subjects such as medicine, dentistry and veterinary science take longer. Details of courses on offer and of entry requirements to first degree courses can be found in the annual handbook produced co-operatively by the universities, *University Entrance: The Official Guide*, published by the Association of Commonwealth Universities (for address, see p. 453).

Postgraduate programmes vary in length. Taught courses which lead to certificates, diplomas or master degrees usually take one year full-time or two years part-time. Research degrees take from two to three years full-time and much longer if completed on a part-time basis. Details of taught courses and research degree opportunities can be found in *Graduate Studies* published annually by the Careers Research and Advisory Council.

Post-experience short courses are forming an increasing part of university provision, reflecting the need to update professional and technical training. Most of these courses finance themselves.

Admission

Constraints are imposed by the Government on the number of home students which a university is able to admit, but the individual university decides which students to accept and which to reject. Students applying for admission to a first degree course at most universities do not apply direct but through a clearing-house, the Universities' Central Council on Admissions (UCCA). All universities in the United

Kingdom participate in the UCCA scheme except the Open University which conducts its own admissions direct. The *UCCA handbook* is issued free for use in completing UCCA application forms, and is available from the Universities' Central Council on Admissions (for address, see p. 453).

For admission as a postgraduate student, universities normally require a good first degree in a subject related to the proposed course of study or research, but each candidate is considered on his or her merits. Application is normally to the institution direct.

Finance

Universities are being expected to look to a much wider range of funding sources than before, and to generate additional revenue in collaboration with industry.

In 1987-88 the total recurrent income of universities in the United Kingdom was £2,807 million. Exchequer grants have dropped from 75 per cent of total income in 1976-77 to 55.3 per cent in 1987-88. Income in 1987-88 from contracts with industry, commerce and public corporations rose by 15 per cent compared with the previous year. The exchequer grant of £1,553 million was, in real terms, seven per cent lower than in 1983-84. The total non-recurrent exchequer grant for 1987-88 was £121 million.

NON-UNIVERSITY SECTOR

England and Wales

Polytechnics, colleges of higher education, and other major establishments provide both advanced and non-advanced courses (see Further Education above) in England and Wales. Advanced courses comprise courses for the further training of teachers, and other courses which last full-time for at least four weeks or, if part-time, involve more than 60 hours of instruction. They include first degree and postgraduate courses (including research), courses for Diploma of Higher Education, Higher National Diploma and Higher National Certificate courses, courses in preparation for professional examinations and other courses of above G.C.E. A-level or Ordinary National Certificate standard. Facilities are available for full-time and part-time study, and day release, sandwich or block release courses are more commonly available than in universities. Advanced courses are offered in some 400 institutions outside the universities.

The Diploma of Higher Education (Dip.H.E.) is a two-year diploma usually intended to serve as a stepping-stone to a degree course or other further study. It has a normal entry requirement of two A-levels. The Dip.H.E. is usually awarded by the Council for National Academic Awards (see below).

The BTEC Higher National Certificate (H.N.C.) is awarded after two years part-time study. The BTEC Higher National Diploma (H.N.D.) is awarded after two years full-time, or three years sandwich or part-time study. Entry is with either a BTEC National Certificate or Diploma; or at least one G.C.E. A-level pass plus appropriate supporting GCSEs/G.C.E. O-levels or C.S.E. grade 1 passes; or BTEC Certificates of Achievement at appropriate levels and in relevant subjects; and/or appropriate on- or off-the-job training.

The Council for National Academic Awards (CNAAs) was established by Royal Charter in 1964 as a self-governing body. It awards degrees to students taking courses approved by it in non-university institutions. More than 130 colleges in Britain conduct courses leading to its degrees: B.A., B.Ed., B.Sc., and higher degrees including M.A. and M.Sc.

(for postgraduate course work) and M.Phil. and Ph.D. (for research which may be undertaken jointly in industry and an academic institution). Some colleges of higher education have retained their traditional links with a university which validates and awards their degrees.

Until April 1989 all public sector higher education establishments were under local education authority control, except for institutions for teacher training and a few others which were grant-maintained directly from central government. However, the Education Reform Act 1988 legislated for the polytechnics and 55 higher education colleges in England to be removed from local education authority control and incorporated as independent institutions, each run by a Higher Education Corporation (H.E.C.). The H.E.C.s are responsible for providing higher education and carrying out research in these institutions. H.E.C.s are controlled by boards of governors appointed by the Secretary of State. At least half the members of each board must be drawn from industry, business, commerce and the professions.

The H.E.C.s are funded by the Polytechnics and Colleges Funding Council (PCFC), which succeeds the National Advisory Body for Public Sector Higher Education and takes over its functions of allocating funds between individual institutions for the provision of higher education (including further education courses for the transitional year 1988-89 only). The PCFC also advises the Secretary of State for Education on matters relevant to its sector. The independent higher education institutions are, like the universities, expected to supplement their income by undertaking consultancy work and exploiting commercial possibilities.

In November 1987, there was a total of 261,867 students enrolled at polytechnics: 248,006 (42 per cent of them women) were on advanced courses, and of this number, 170,870 (44 per cent of them women) were full-time or sandwich course students.

There are 486 major establishments of higher education (maintained, assisted by L.E.A.s, in receipt of direct grant from the D.E.S., or voluntary) in addition to the polytechnics. In England and Wales in 1987 they catered for 226,804 students on advanced courses including 97,148 on full-time or sandwich courses.

Admissions

Information on advanced courses in polytechnics can be found in the *Polytechnic Courses Handbook* available from the Committee of Directors of Polytechnics (for address, see p. 453).

The entry requirements to degree courses in this sector are much the same as those for universities, i.e. two or three GCSEs at grades A to C, or equivalent, and two or three A-levels. Polytechnics and colleges are, however, often more flexible than universities in accepting alternative entry qualifications, particularly technician-level awards.

The Polytechnics Central Admissions System (PCAS) acts as a clearing-house for all full-time and sandwich first degree, H.N.D. and Dip.H.E. courses at participating polytechnics and colleges, except for art and design (see below) and initial teacher training courses (see p. 472). Applicants can obtain a copy of the *Guide for Applicants* and the PCAS application form either from their school or college or from PCAS.

For CNAA first degree and postgraduate courses in art and design and BTEC H.N.D. courses in design and associated studies, applications should be made through the Art and Design Admissions Registry.

For polytechnic courses other than the above, applications are made to the institution direct, using the Polytechnic Standard Application Form, availa-

ble in schools or colleges or from the Committee of Directors of Polytechnics. Applications for courses at colleges of higher education outside the clearing-houseschemes are also made direct to the institutions.

Scotland

Advanced full-time courses outside the universities in Scotland are provided by the sixteen central institutions, five colleges of education and 50 education authority colleges. These are funded by central government mainly through the Scottish Education Department. Each is managed by an independent governing body which includes representatives of industrial, commercial, professional and educational interests. Most of the courses at the central institutions have a vocational orientation and are of the sandwich type. They are intended to complement provision in the universities. Most of the degrees are validated by the CNAA, though some degree courses such as agriculture, fine art and planning are run in collaboration with nearby universities which validate and award the degrees.

In 1986-87, 63,019 students were enrolled on advanced courses of higher education (35 per cent of them women): 32,978 at central institutions, 914 at colleges of education, and 27,127 at education authority colleges. Of the total number, 30,657 were on full-time or sandwich courses (46 per cent of them women).

Applications to the central institutions are made direct to the college concerned, with the exception of those courses offered by certain agricultural and art central institutions which are run in conjunction with universities. Application for these courses is made through UCCA. Further information can be obtained from the institutions themselves or from the Central Institutions Office.

Northern Ireland

In Northern Ireland advanced courses are provided by 26 institutions of further education and by the University of Ulster. As well as offering first and postgraduate degrees, the University runs courses leading to the BTEC Higher National Diploma and professional qualifications. Applications to undertake courses other than degree courses are made to the institutions direct.

In 1986-87, 2,357 students were enrolled on advanced courses of higher education in the institutions of further education (71 per cent of them women). There were 521 students on full-time or sandwich courses, including 373 women.

FEES

The tuition fees for students with mandatory awards (see p. 448) are paid by the grant-awarding body. Students from member states of the European Community pay fees at home student rates. Since 1980-81 students from outside the E.C. have paid fees that are meant to cover the cost of their education, but financial help is available under a number of schemes. Information about these schemes is available from British Council offices worldwide.

The recommended minimum fees at universities for students from non-E.C. countries in 1989-90 is £4,300 for arts students, £5,700 for science students and £10,500 for students following clinical courses in medicine, dentistry and veterinary science. These compare with home undergraduate fees of £607 for all courses.

The fees for home students and E.C. nationals on advanced courses at polytechnics and higher education colleges are £609 for all full-time courses in

1989–90 while the recommended minimum for non-E.C. overseas students is £4,017 for all courses.

GRANTS FOR STUDENTS

Students in the United Kingdom who plan to take a full-time or sandwich course of further study after leaving school may be eligible for a grant. A parental contribution is deductible on a sliding scale dependent on income. For married students this may be deducted from their spouse's income instead. However, parental contribution is not deducted from the grant to students over 25 years of age who have been self-supporting for at least three years. Tuition fees are paid in full for all students in receipt of a grant regardless of parental income.

Grants are paid by education authorities in England, Wales and Northern Ireland, and by the Scottish Education Department in Scotland. Applications are made to the authority in the area in which the student normally lives. Applications should not, however, be made earlier than the January preceding the start of the course.

Types of grant

Grants are of two kinds: mandatory and discretionary. *Mandatory* grants are those which awarding authorities must pay to students who are attending designated courses (see below) and who can satisfy certain other conditions. Such a grant is awarded normally to enable the student to attend only one designated course and there is no general entitlement to an award for any particular number of years. *Discretionary* grants are those for which each awarding authority has discretion to decide its own policy.

Designated courses are those full-time or sandwich courses leading to: a university or CNAA degree; the Diploma of Higher Education (Dip.H.E.); the Higher National Diploma (H.N.D.) of the Business and Technician Education Council; initial teacher-training courses including those for the postgraduate certificate of education and the art teachers' certificate or diploma; a university certificate or diploma course lasting at least three years; other qualifications which are specifically designated as being comparable to first degree courses; and the SCOTVEC Higher National Diploma.

Eligibility.—To be eligible for a mandatory grant, students admitted to a designated course must usually have been ordinarily resident in the United Kingdom for the three years immediately preceding the academic year in which the course begins; have not previously attended a course of advanced further education of more than two years' duration; and apply for the grant before the end of the first term of the course. (The local education authority should be consulted for advice about eligibility.)

Students taking designated courses who do not satisfy the residency condition may be eligible for a mandatory grant if they come from other member states of the E.C. and can establish migrant worker status, or their parents are migrant workers; or if they, or their spouse and children, are asylees or refugees.

Value.—A means-tested maintenance grant, usually paid once a term, covers periods of attendance during term as well as the Christmas and Easter vacations, but not the summer vacation. It is subject to deduction on account of the student's own income and her/his parents' or spouse's income. The basic grant rates (1989–90) are: £2,650 if living in a hall of residence or lodgings and studying within the London area; £2,155 as above but outside the London area; £1,710 if living at the parental home. Tuition fees in full are usually paid direct to the university or college by the education authority. Additional allowances are available if, for example, the course requires a period of study abroad.

Cost.—Education authority and Scottish Education Department expenditure on student maintenance in 1986–87 was £649·2 million.

Postgraduate awards

Unlike funding for undergraduates, which is mandatory for most degree and equivalent level courses, grants for postgraduate study are usually discretionary. Grants are also often dependent on the class of first degree, especially for research degrees.

A number of schemes of postgraduate bursaries or studentships for residents in England and Wales are funded by the Department of Education and Science, the five Government research councils, the Ministry of Agriculture, Fisheries and Food, and the British Academy which awards grants for study in the humanities.

In Scotland postgraduate funding is provided by the Department of Agriculture and Fisheries for Scotland, the Scottish Education Department, and the research councils in England and Wales.

Awards in Northern Ireland are made by the Department of Education for Northern Ireland, the Department of Agriculture for Northern Ireland, and the Medical Research Council.

In 1986–87 in the United Kingdom 22,800 awards were made.

Value.—The national rates for twelve-month studentships in 1989–90 were: £3,970 in college or lodgings in London; £3,125 in college or lodgings outside London; £2,270 for those living with parents or spouse's parents. The rates for 30-week bursaries for 1989–90 were: £2,585 in college or lodgings in London; £2,090 in college or lodgings outside London; £1,575 if living with parents or spouse's parents.

ADULT AND CONTINUING EDUCATION

The term adult education covers a broad spectrum of educational activities ranging from non-vocational courses of general interest, through the acquiring of special vocational skills needed in industry or commerce, to study for a degree at the Open University.

Providers

Courses specifically for adults are funded and/or provided by many bodies. They include, in the statutory sector: local education authorities in England and Wales; the regional and islands education authorities in Scotland and the Scottish Educa-

tion Department; education and library boards in Northern Ireland; the Open University; the extra-mural departments of other universities and Birkbeck College of the University of London; residential colleges; the Open College; the B.B.C., I.B.A. and local radio stations. There are, in addition, a number of voluntary bodies.

The local education authorities in England and Wales operate through 'area' adult education centres (2,632 in 1987), institutes or colleges, and the adult studies departments of colleges of further education. The regional and islands education authorities in Scotland fund adult education including that provided by the universities and the Workers' Educa-

tional Association at vocational further education colleges (50 in 1988). In addition, the Scottish Education Department provides grants to a number of voluntary organizations. The education and library boards in Northern Ireland are responsible for the 26 further education colleges and a number of community schools.

More than 30 universities have extra-mural, adult education or continuing education departments which serve their local areas or regions, and Birkbeck College in the University of London caters solely for part-time students. The Open University, in partnership with the B.B.C., provides distance teaching leading to ordinary or honours first degrees, and also offers post-experience and higher degree courses (see p. 445-6). The Open College uses radio and television to provide open learning courses in all areas of vocational and technical competence, leading to nationally recognized qualifications or credits towards them.

Of the voluntary bodies, the biggest is the **Workers' Educational Association** (W.E.A.) which operates throughout the United Kingdom and comprises about 900 branches, organized into 20 districts, and nearly 1,500 affiliated educational and workers' organizations. It aims to stimulate and to satisfy the demands of workers for education, and to further the advancement of education generally, reaching about 180,000 adult students annually. The Department of Education and Science (D.E.S.), Scottish Education Department, Department of Education for Northern Ireland and local education authorities make grants towards expenses.

The **National Institute of Adult Continuing Education (England and Wales)** (NIACE) provides information and advice to organizations and individuals on all aspects of adult continuing education. It conducts enquiries into problems, organizes conferences and issues publications. The institute manages a number of agencies and special units, including the Adult Literacy and Basic Skills Unit, which receive funding from the D.E.S. and the Welsh Office. The Welsh committee, NIACE Cymru, receives financial support from the Welsh Office Education Department, and advises government, voluntary bodies and education providers on adult continuing education and training matters in Wales.

The **Scottish Institute of Adult and Continuing Education** (SIACE) advises on policy, conducts research, provides information, arranges conferences and produces publications. Its membership comprises all the major funders and providers of adult and continuing education in Scotland. SIACE publishes the *Scottish Handbook of Adult and Continuing Education*.

The **Northern Ireland Council for Continuing Education** has an advisory role. Its membership includes representatives of most organizations involved in the field, together with appointees of the Northern Ireland Minister responsible for education.

The **Universities Council for Adult and Continuing Education** consists of one or two representatives from each university in the United Kingdom.

It was established in 1947 for the interchange of ideas and the formulation of common policies on extra-mural education.

Among government initiatives run jointly by the D.E.S. and the Welsh Office are: the **Programme for the Adult Unemployed** (REPLAN), a major part of which is managed by NIACE; and the **Professional, Industrial and Commercial Updating Programme** (PICKUP) which, with contributions from the Training Agency, encourages the provision of short, flexible updating courses for adults in employment.

Courses

Although lengths vary, most courses are part-time. Long-term residential colleges, which are grant-aided by the D.E.S., the Welsh Office or the Scottish Office, provide full-time courses lasting one or two years.

Some colleges and centres offer short-term residential courses, lasting from a day or two to a few weeks, in a wide range of subjects. Local education authorities directly sponsor many of the colleges while others are sponsored by universities or voluntary organizations. A booklet listing courses, *Residential Short Courses*, is published by NIACE.

Grants

Although full-time courses at degree level attract mandatory awards regardless of the age of the student, for courses below that level all students over the age of 19 must pay a fee. However, discretionary grants may be available. Adult education bursaries for students at the long-term residential colleges of adult education are the responsibility of the colleges themselves. The awards are administered for the colleges by the Awards Officer of the Residential Colleges Committee for students resident in England; by the Welsh Office Education Department for those resident in Wales; by the Scottish Education Department for those resident in Scotland; and by the Department of Education for Northern Ireland for students resident there. The bursaries are paid in accordance with the rates and conditions set from time to time by the D.E.S. *Adult Education Bursaries* can be obtained from the Awards Officer, Adult Education Bursaries, c/o Ruskin College (for address, see p. 462).

Numbers

There are no comprehensive statistics covering all aspects of adult education. However, it is known that enrolments on evening courses of non-advanced education in further education establishments in the United Kingdom numbered 2,377,000 in 1986-87 (70 per cent women). This number included 1,663,000 students at adult education centres in England and Wales. In 1986-87, 299,269 students attended courses of liberal adult education provided by university extra-mural departments including joint courses with the W.E.A. in the United Kingdom.

COLLEGES

It is not possible to name here all the colleges offering courses of higher or further education. The

list of English colleges that follows is confined to those in the PCFC sector; there are many more colleges in England providing higher education courses, some with PCFC funding. The list of colleges in Wales, Scotland and Northern Ireland includes institutions providing at least one full-time course leading to a first degree granted by a university or by the Council for National Academic Awards (C.N.A.A.). It does not include colleges forming part of a polytechnic or a university, nor does it include Scottish central institutions.

TEACHING

To become a qualified teacher it is necessary to have successfully completed a course of initial teacher training.

Non-graduates usually qualify by way of a three- or four-year course leading to a Bachelor of Education (B.Ed.) honours degree, but some universities offer first degree courses (B.A., B.Sc.) taken concurrently with a certificate of education. Graduates take one-year postgraduate certificate of education (PGCE).

Details of courses in England and Wales are contained in the *Handbook of Degree and Advanced Courses* published annually by the National Association of Teachers in Further and Higher Education.

Applications for B.Ed. courses in England and Wales for intending teachers are made through the Central Register and Clearing House Ltd., 3 Crawford Place, W1H 2BN, from which application forms can be obtained. For PGCE courses in England and Wales, applications are handled by the Graduate Teacher Training Registry at the same address.

Details of courses in Scotland can be obtained from the Scottish Education Department. Details of courses in Northern Ireland can be obtained from the Department of Education for Northern Ireland. Applications for teacher training courses in Scotland and Northern Ireland are made to the institutions direct.

Special arrangements exist for those wishing to teach craft design and technology.

1. The workforce is the workforce in employment plus the claimant unemployed.

2. From April 1983 the figures of unemployment reflect the effects of the provisions in the Budget for some men aged 60 and over who no longer have to sign on at an unemployment office.

3. The workforce in employment comprises employees in employment, the self-employed, HM Forces and work-related government training programmes.

4. Estimates of the self-employed are based on the 1981 census and the results of the Labour Force Surveys.

5. Includes participants in the Youth Training Scheme except those who have contracts of employment, and participants in the Job Training Scheme. Additionally, for the UK this includes some participants on Northern Ireland Schemes: Youth Training Programme (excluding second year trainees in further education colleges); Job Training Programme; and Attachment Training Scheme participants and other management trainee participants training with an employer.

BRITISH RAILWAYS

The British Railways Board was set up by the Transport Act, 1962, and assumed its responsibilities on January 1, 1963. (For members, see Government and Public Offices.)

The railway business is broken down into six distinct business sectors each with its own Director. The sectors focus on three passenger businesses of InterCity; Network SouthEast; and Provincial; together with the Railfreight and Parcels businesses. The sixth sector has been established to deal with international traffic through the Channel Tunnel. In addition for the purposes of management and operation the railways are divided into Regions. They cover the following areas:

London Midland Region—bounded by a line joining Carlisle, Oldham, Nottingham, Bedford, London, Banbury, Kidderminster, Aberystwyth.

Western Region—west of a line joining Yeovil, Westbury, Reading, London and the southern border of the L.M. Region.

Southern Region—south of a line joining Dorchester, Salisbury, London and the Thames.

Eastern Region—east of a line joining London, Peterborough, Sheffield, Bradford and Carlisle, but excluding Anglia Region.

Anglia Region—east of a line joining London with Hertford East, Meldreth and Whittlesea.

Scottish Region—north of a line joining Carlisle and Berwick.

Financial Results.—The Profit and Loss Account for 1988–89 showed a surplus of £107 million, £18·2 million after interest, compared with a surplus of £47·3 million after interest in 1987–88. The railway working surplus was £110·5 million compared with a surplus of £108·7 million for the previous year.

Highway Authorities

The powers and responsibilities of highway authorities in England and Wales are set out in the Highways Acts 1980; for Scotland there is separate legislation.

Responsibility for trunk road motorways and other trunk roads in Great Britain rests in England with the Secretary of State for Transport, in Scotland with the Secretary of State for Scotland, and in Wales with the Secretary of State for Wales. The costs of construction, improvement and maintenance are paid by central government. The highway authority for non-trunk roads in England and Wales is, in general, the county council in whose area the roads lie, and in Scotland the regional or islands council. In Northern Ireland the Northern Ireland Department of the Environment is responsible for public roads and their maintenance and construction.

Expenditure

Transport Supplementary Grant (T.S.G.) is a block grant and was introduced in England and Wales on April 1, 1975, to replace a variety of specific grants paid towards local transport expenditure.

In England grant was paid towards capital and current spending on transport by county councils and the G.L.C. from 1975–76 to 1984–85. From April 1, 1985, T.S.G. has only been paid towards capital spending on highways and the regulation of traffic, current expenditure having been subsumed by Rate Support Grant. With the abolition of the G.L.C. and the Metropolitan County Councils on April 1, 1986, grant has become payable to London Boroughs, the Common Council of the City of London and Metropolitan District Councils. In Wales, grant was also paid to the Welsh County Councils towards current and capital expenditure on transport. Since April 1982, T.S.G. became payable on capital expenditure only; current expenditure having been subsumed into the Rate Support Grant. From April 1, 1985 eligibility of new transport schemes for T.S.G. has been confined to those costing over £5 million.

Grant rates are determined by the respective Secretaries of State; at present grant is paid at 50 per cent of expenditure accepted for grant in England and Wales.

For the financial year 1988–89 local authorities in England received £191 million in T.S.G. Total expenditure on building and maintaining motorways and trunk roads in 1988–89 was £1,000 million in England, of which new construction of national roads accounted for over £700 million.

In the financial year 1989–90, local authorities in Wales will receive £19.7 million in T.S.G. Total expenditure on roads in 1987–88 was £331 million in Wales, of which £134 million was spent on trunk roads and £197 million on local authority roads, including public lighting and road safety.

Total expenditure on roads during the financial year 1986–87 was £403 million in Scotland.

*There were in addition 48 miles of local authority motorway in England and 15 miles in Scotland.

Motorways

The network in England and Wales is based on five main routes—London–Yorkshire (M1), London–South Wales (M4), Birmingham–Bristol–Exeter (M5), Birmingham–Carlisle (M6) and Lancashire–N. Humberside (M62).

Other important motorways in use include: Medway Towns (M2); London–Basingstoke (M3); London–Cambridge (M11); Rotherham–Goole (M18); London–Folkestone (M20); London orbital route (M25); London–Oxford (M40); North Cheshire (M56); and South Humberside (M180).

Motorways in use in Scotland include: Edinburgh–Glasgow–Greenock (M8); Edinburgh–Stirling (M9); Maryville–Mollisburn (M73); Millbank–Maryville (M74); Stirling–Haggs (M80); Friarton Bridge–Perth (M85); Inverkeithing–Perth (M90), and (M80)–Kinardine Bridge (M876).

Driving Tests

The number of driving tests conducted in Great Britain in 1988 was 22,072,966, of which 51.75 per cent resulted in a pass. In addition 85,269 H.G.V./P.S.V. tests were undertaken, of which 55 per cent. were successful. In 1988 3,206 Part I motorcycle tests were conducted by Departmental examiners (47 per cent. successful) and 42,768 by Approved Training Bodies (96 per cent. successful).

VEHICLE LICENCES, ETC.

Since October 1, 1974, registration and first licensing of vehicles has been done through local offices (known as Vehicle Registration Offices) of the Department of Transport's Driver and Vehicle Licensing Centre in Swansea. The records of existing vehicles are held at Swansea. Local facilities for relicensing are available as follows:—

- (i) with a licence reminder (form V11) in person at any Post Office which deals with vehicle licensing or post it to the Post Office, shown on the form.
 - (ii) with a vehicle licence renewal (form V10). You may normally apply in person at any licensing Post Office. You will need to take your vehicle registration document with you: if this is not available you must complete form V62 which is held at Post Offices. Postal applications can be made to the Post Offices shown on form V100, available at any Post Office. This form also provides guidance on registering and licensing vehicles.

Details of the present duties chargeable on motor vehicles are available at Post Offices and Vehicle Registration Offices. The Vehicles (Excise) Act, 1971 provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty as if it were in use.

Driving Licences—Fees

On or after 1.11.88

FULL LICENCE	OR after 1.1.
First full licence	£17.00*
Changing a provisional to a full licence after passing a driving test	free
Renewal of full licence if last full licence was issued after 30-9-82....	free
New licence after a period of disqualification	£5.00

Driving Test-Fees

For cars	£18-00
For motor cycles, part I	£17-94*
part II	£24-00

*When conducted by the Department of Transport. Appointed motor cycle training organizations, who conduct the majority of part I tests within the framework of their own training courses, are free to set their own fee.

Driving tests for invalid carriages are free.

PROVISIONAL LICENCE

First provisional licence £17.00*
 First renewal of provisional licence
 issued before 1.10.82 £17.00

M-o-T Testing

Cars, motor cycles, motor caravans, light goods and dual-purpose vehicles more than 3 years old must be covered by an effective vehicle test certificate (often called the M.O.T. certificate). Copies of the legislation governing M.O.T. testing can be obtained from any bookshop which stocks H.M.S.O. publications. The legislation comprises The Road Traffic Act 1972 (Sections 44 and 45), The Motor Vehicles (Test) Regulations 1981, The Motor Vehicles (Extension) Order 1981, and The Motor Vehicles (Production of Test Certificate) Regulations 1989.

* Once you have paid the life fee for either a provisional or a full licence all renewals are free except where additional entitlement is required.

WATER

ENGLAND AND WALES

In England the Secretary of State for the Environment is responsible for policy relating to water supply. This includes the conservation and distribution of water resources, the provision of sewerage and sewage disposal services, the quality of rivers and other inland waters, and the use of inland waters for navigation and recreation. Responsibility for policy relating to land drainage, flood protection, sea defences, and the protection and development of fisheries lies with the Minister of Agriculture, Fisheries and Food. In Wales, all aspects of policy relating to water are the responsibility of the Secretary of State for Wales.

Regional Water Authorities

At present (August 1989) nine regional water authorities in England and the Welsh Water Authority in Wales are responsible for water supply and the development of water resources, sewerage and sewage disposal, pollution control, freshwater fisheries, flood protection, water recreation, and environmental conservation. Under the Water Act 1989, which received Royal Assent on July 6, 1989, the regional water authorities are to be privatized towards the end of 1989 (*see below*).

Of the 99 per cent of the population of England and Wales who are connected to a public water supply, at present 75 per cent are supplied by the regional water authorities. The remaining 25 per cent are supplied by 29 statutory water companies which act as independent water supply agents to the regional authorities. The statutory water companies bear no responsibility for sewage disposal or land drainage. The status of the statutory companies will also change under the provisions of the Water Act 1989.

The regional water authorities (at Aug. 1989) are: ANGLIAN WATER AUTHORITY, Ambury House, Huntingdon, Cambs. PE18 6NZ.

NORTHUMBRIAN WATER AUTHORITY, Northumbria House, Regent Centre, Gosforth, Newcastle upon Tyne NE3 3PX.

NORTH WEST WATER AUTHORITY, Dawson House, Liverpool Road, Great Sankey, Warrington WA5 3LW.

SEVERN TRENT WATER AUTHORITY, Abelson House, 2297 Coventry Road, Sheldon, Birmingham B26 3PS.

SOUTHERN WATER AUTHORITY, Guildborne House, Chatsworth Road, Worthing, W. Sussex BN11 1LD.

SOUTH WEST WATER AUTHORITY, Peninsula House, Rydon Lane, Exeter EX2 7HR.

THAMES WATER AUTHORITY, Nugent House, 71 Vassert Road, Reading RG1 8DE.

WESSEX WATER AUTHORITY, Wessex House, Passage Street, Bristol BS2 0JQ.

YORKSHIRE WATER AUTHORITY, West Riding House, 67 Albion Street, Leeds LS1 5AA.

WELSH WATER AUTHORITY, Cambrian Way, Brecon, Powys LD3 7HP.

The Water Act

The Water Act 1989 will create a privatized water industry under public regulation. The water industry's infrastructure and services will be provided by the private sector, while independent statutory bodies will set standards and regulate in the public interest.

The Water Act provides for the setting up of the

National Rivers Authority (N.R.A.) and the appointment of a regulatory official, the Director General of Water Services (*see below*). It provides for the functions, property rights and liabilities of the water authorities to be transferred to their successor companies and the N.R.A. and ensures the appointment of water and sewerage services suppliers for all areas of England and Wales at all times after the transfer date (the date on which water authorities' functions, etc. are divided between their successor companies and the N.R.A.). Flotation of the regional water authorities is planned for late November 1989.

The Water Act provides for the statutory water companies to become water suppliers on the same basis as the privatized water authorities, and with the same relationship to the Director General of Water Services and the National Rivers Authority. Subject to Parliament's approval, the statutory water companies will be able to convert to public limited company status.

Regulatory Bodies

A Director General of Water Services has been appointed by the Secretaries of State for the Environment and for Wales. Independent of Ministers and directly accountable to Parliament, his main duties are to ensure that the water companies comply with the terms of their appointments (or licences) and to protect the interests of the consumer. The Office of Water Services, similar to the Office of Telecommunications and the Office of Gas Supply, has been set up to support his activities.

An independent national body, the National Rivers Authority (N.R.A.) was established under the Water Act 1989 to take over the regulatory and river management functions of the regional water authorities. Its responsibilities include monitoring the quality of inland, coastal and underground waters and controlling pollution, and the management of water resources, land drainage, flood protection and fisheries.

Methods of charging

In England and Wales, householders at present pay for domestic water supply and sewage disposal services through charges based on the rateable value of their property (domestic rates). Industrial and most commercial users are charged according to consumption, which is recorded by meter.

The replacement of domestic rates by the community charge in April 1990 necessitates new methods of charging the private consumer for water and sewage services. The Water Act 1989 gives the water companies until the end of the century to decide on and introduce a suitable method of charging. Two options under consideration by the water industry are a flat-rate licence fee and metering. Large-scale trials of domestic metering are currently taking place.

SCOTLAND

Overall responsibility for national water policy in Scotland rests with the Secretary of State for Scotland. Fisheries and certain aspects of land drainage are the responsibility of the Department of Agriculture and Fisheries for Scotland. The supply of water and the development of water resources are

administered by separate authorities from those responsible for the control of water pollution.

Water supply and sewerage are local authority responsibilities and are among the functions of the nine Regional Councils and the three Islands Councils.

Seven river purification boards have the specific duty of restoring and maintaining the quality of water in Scotland's rivers, lochs and coastal waters, except in the three Islands Councils' regions. The Islands Councils of Orkney, Shetland and the Western Isles are responsible for the prevention of pollution within their own areas.

The Water (Scotland) Act 1967 brought into being a bulk water supply authority, the Central Scotland Water Development Board. The main statutory function of the board is to develop new sources of water supply for the purpose of providing water in bulk to water authorities whose limits of supply are within the board's area. Its area covers the limits of supply as water authorities of Central, Fife, Lothian, Strathclyde and Tayside Regional Councils.

The community charge, which was introduced in Scotland in April 1989, includes a community water charge set by each Regional and Islands Council.

CENTRAL SCOTLAND WATER DEVELOPMENT BOARD,

Balmore, Torrance, Glasgow G64 4AJ.—*Director,*
W. G. Mitchell

NORTHERN IRELAND

In Northern Ireland ministerial responsibility for water services lies with the Secretary of State for Northern Ireland. The Department of the Environment for Northern Ireland, operating through the Water Service, is responsible for policy and co-ordination with regard to supply and distribution of water, and provision and maintenance of sewerage services.

The Water Service is divided into four regions, the Eastern, Northern, Western and Southern Divisions. These are based in Belfast, Ballymena, Londonderry and Craigavon respectively.

On all major policy issues the Department of the Environment for Northern Ireland seeks the views of the Northern Ireland Water Council, a body appointed to advise the Department on the exercise of its water and sewerage functions. The Council includes representatives of agriculture, angling, industry, commerce, tourism, trade unions and local government.

Usually householders do not pay directly for water and sewerage services: the costs of these services are allowed for in the Northern Ireland regional rate. Water consumed by industry, commerce and agriculture in excess of 100 cubic metres (22,000 gallons) per half year is charged through meters.

ROYAL OBSERVATORIES

Royal Greenwich Observatory
Herstmonceux, East Sussex, BN27 1RP
[0323 833171]

The Royal Observatory was founded at Greenwich by Charles II in 1675. Because of smog and light pollution, the Observatory was moved to Herstmonceux in East Sussex after the Second World War. The traditional work in positional astronomy remains an important activity of the Observatory. It participates in the reduction of data from the European Space Agency's astrometric satellite, HIPPARCOS. The Observatory collaborates with Danish and Spanish astronomers to operate the Carlsberg Automatic Meridian Circle on the island of La Palma in the Canary Islands. The rate of rotation of the Earth and other geophysical parameters are monitored by the satellite laser ranging telescope at Herstmonceux. Various almanacs and other astronomical data are prepared by H.M. Nautical Almanac Office, which is part of the Royal Greenwich Observatory. However, as an establishment of the Science and Engineering Research Council, the main task of the Observatory now is the provision of facilities for research in optical astronomy for astronomers in the universities. In particular, this involves the running of the Isaac Newton group of telescopes with its associated instrumentation at the Roque de los Muchachos Observatory on La Palma. This group comprises the 4.2 m. William Herschel telescope, the 2.5 m. Isaac Newton telescope and the 1.0 m Jacobus Kapteyn telescope. The running of these is shared with the Netherlands, and, in the case of the Jacobus Kapteyn telescope, with the Republic of Ireland also.

At the U.K. headquarters, there are facilities for the processing of astronomical data obtained from the telescopes on La Palma and elsewhere; these include a node of the STARLINK computing network. The U.K. headquarters of the Royal Greenwich Observatory is moving from Herstmonceux to Cambridge during 1990.

Dir., Prof. A. Boksenberg, F.R.S.

Royal Observatory
Blackford Hill, Edinburgh EH9 3HJ
[031-668 8100]

The Observatory was founded by the Astronomical Institution in 1818 and its Royal Charter dates from 1822. It is now responsible for some major national astronomical facilities funded by the Science and Engineering Research Council, including a 15.0 m. millimetre-wave telescope and a 3.8 m. infra-red telescope in Hawaii and COSMOS, a fast automatic plate measuring machine, in Edinburgh. The Observatory is also part of the U.K. Starlink network for astronomical image and data processing. The Observatory specializes in the development of advanced technologies and the application of these to studies of the properties of matter in extreme environments in space.

LOCAL GOVERNMENT

ENGLAND AND WALES

The London Government Act, 1963, and the Local Government Acts of 1972 and 1985 have brought about the present system of local government in England and Wales. The system is based on two tiers of local authorities, county and district councils, in the non-metropolitan areas; and a single tier, of metropolitan district and London borough councils, in the six metropolitan areas of England and in London respectively.

Structures and Areas in England

England outside Greater London is divided into counties. Each county is divided into districts. Six *metropolitan counties* cover the main conurbations outside Greater London: Tyne and Wear, West Midlands, Merseyside, Greater Manchester, West Yorkshire and South Yorkshire. They are divided into 36 *metropolitan districts*, most of which have a population of over 200,000. There are 39 *non-metropolitan counties*; each of these is divided into *non-metropolitan districts*, of which there are 296. These districts have populations broadly in the range of 60,000 to 100,000: some however, have larger populations, because of the need to avoid dividing large towns, and some in mainly rural areas have smaller populations. Greater London is divided into 32 *London boroughs*, with populations between 134,000 and 390,000, and the *City*, with a daytime population of 340,000 but only 5,400 by night.

There are also about 10,000 parishes, in 219 of the non-metropolitan and 18 of the metropolitan districts.

A permanent Local Government Boundary Commission keeps the areas and electoral arrangements under review, and makes proposals to the Secretary of State for changes found necessary.

Constitution and Elections

For districts, non-metropolitan counties, London boroughs, the City, and for about 8,000 parishes, there are elected councils, consisting of directly elected councillors. Broadly, county councils range from 60–100 members; metropolitan district councils 50–80 members; non-metropolitan district councils 30–60 members. The councillors elect annually one of their number as chairman.

The general pattern in England is that councillors serve 4 years and there are no elections of district and parish councillors in county elections years. In metropolitan districts one-third of the councillors for each ward are elected each year except in the year of county elections. Non-metropolitan districts can choose whether to have elections by thirds or whole council elections. In the former case, one-third of the council, as nearly as may be, is elected in each year of metropolitan district elections. If whole council elections are chosen, these are held in the year midway between county elections. The London boroughs have whole council elections, in the year immediately following the county council election years. Local elections are normally held on the first Thursday in May.

Generally speaking, all British subjects or citizens of the Republic of Ireland of 18 years or over, resident on the qualifying date in the area for which the election is being held, are entitled to vote at local government elections. A register of electors is prepared and published annually by local electoral registration officers.

A returning officer has the overall responsibility for an election. Voting takes place at polling stations,

arranged by the local authority and under the supervision of a presiding officer specially appointed for the purpose. Candidates, who are subject to various statutory qualifications and disqualifications designed to secure that they are suitable persons to hold office, must be nominated by electors for the electoral area concerned.

Internal Organization

Local authorities increasingly are organized along party political lines and over 80 per cent are now controlled by groups of councillors having allegiance to one of the main political parties. However, the council as a whole is the final decision-making body within any authority. Councils are free to a great extent to make their own internal organizational arrangements. Normally, questions of major policy are settled by the full council, while the administration of the various services is the responsibility of committees of members. Day to day decisions are delegated to the council's officers, who act within the policies laid down by the members.

Functions

Local authorities are empowered or required by various Acts of Parliament to carry out functions in their areas. The legislation concerned comprises public general Acts and "local" Acts which local authorities have promoted as private bills. In non-metropolitan areas, functions are divided between the districts and counties, those requiring the larger area or population for their efficient performance going to the county. The metropolitan district councils, with the larger population in their areas, already had wider functions than non-metropolitan councils, and following abolition of the metropolitan county councils have now been given most of their functions also. A few functions continue to be exercised over the larger area by joint bodies, made up of councillors from each district.

The allocation of functions is as follows:

county councils: education; strategic planning; traffic, transport and highways; police; fire service; consumer protection; refuse disposal; smallholdings; social services; libraries.

non-metropolitan district councils: local planning; housing; highways (maintenance of certain urban roads and off-street car parks); building regulations; environmental health; refuse collection; cemeteries and crematoria.

metropolitan district and London borough councils: their functions are all those listed above, except that fire, civil defence (and in some cases, refuse disposal) in all areas and police and passenger transport in the metropolitan counties only are exercised by joint bodies. Education in inner London is the responsibility of a special authority.

Functions exercised *concurrently* by county and district councils and London boroughs: recreation (parks, playing fields, swimming pools); museums; encouragement of the arts, tourism and industry.

The sewerage and sewage disposal functions of local authorities have been transferred to nine water authorities in England and the Welsh Water Authority. Water authorities, however, are expected to make agreements whereby the new district councils discharge sewerage functions on an agency basis. Apart from these functions, the water authorities are responsible for water supply and conservation; river pollution control and river management; fisheries; land drainage; and use of water space for recreation and amenity purposes.

The personal health functions of local authorities were transferred in 1977 to area health authorities, whose areas were the same ■ non-metropolitan and Welsh counties and metropolitan districts. From April 1982 this two-tier structure was replaced by about 199 District Health Authorities. They work in close collaboration with local education, social services and environmental health authorities.

Residuary Bodies

Residuary bodies were set up in 1985 to deal with the business of the Greater London and Metropolitan County Councils which had not already devolved onto other bodies at the time of the Councils' abolition in 1986. Addresses and details of principal officers are given on page 579 (page 598 for Greater London).

Parishes

Parishes with 200 or more electors must generally have parish councils, and about three-quarters of the parishes have councils. A parish council comprises at least five members, the number being fixed by the district council. Elections are held every four years, in the year in which the local district councillor is elected. All parishes have parish meetings, comprising the electors of the parish. Where there is no council, the meeting must be held at least twice ■ year.

Parish council functions include: allotments; encouragement of arts and crafts; community halls, recreational facilities (e.g. open spaces, swimming pools), cemeteries and crematoria; and many minor functions. They must also be given an opportunity to comment on planning applications. They may, like county and district councils, spend limited sums for the general benefit of the parish. They precept on the district councils for their rate funds.

Civic Dignities

District councils may petition for ■ Royal Charter granting borough status to the district. In boroughs the chairman of the council is the mayor. The status "City" and the right to call the mayor "Lord Mayor" may also be granted by letters patent. Parish councils may call themselves "town councils", in which case their chairman is the "town mayor".

Charter trustees were established for those former boroughs which were too large to have parish councils when local government was reorganised in 1974 and they became part of districts without city or borough status. The charter trustees are the district councillors representing the area of the former borough and they elect a mayor, continue civic tradition, and look after the charters, insignia and civic plate of the former borough.

Local Commissioners for England and Wales

Commissioners for Local Administration in England and in Wales (see page 338) have been appointed with the duty of investigating complaints of maladministration in aspects of local government; they report to the local council concerned.

Wales

Since 1974 Wales, including the former Monmouthshire, has been divided into eight counties; Gwynedd; Clwyd; Powys; Dyfed; West, Mid and South Glamorgan; and Gwent. There are 37 districts in Wales, many of those in the less populated parts reflecting the areas of former Welsh counties.

The arrangements for Welsh counties and districts

are generally similar to those for English non-metropolitan counties and districts. There are some differences in functions: Welsh district councils have refuse disposal as well ■ refuse collection functions and they may provide on-street as well as off-street car parks with the consent of the county council. A few districts have also been designated as library authorities.

In Wales parishes have been replaced by communities. Unlike England, where many areas are not in any parish, communities have been established for the whole of Wales; approximately 1,000 communities in all. Community meetings may be convened as and when desired. Community councils exist in about 770 communities and further councils may be established at the request of a community meeting. Community councils have broadly the same range of powers as English parish councils. Community councillors are elected *en bloc* on the same basis as parish councillors in England, i.e. at the same time as ■ district council election and for ■ term of four years.

Local Government Finance

Local government is financed from various sources. (1) *Community charges*.—These will replace domestic rates from April 1, 1990 under the provisions of the Local Government Finance Act 1988. They are raised by the charging authorities (district councils and, in London, borough councils and the City Corporation). Liability to pay a community charge arises from an entry in the community charges register which is compiled by the community charges registration officer of each charging authority. Sums required by county and parish councils and joint boards for police, fire and transport will be included by the charging authority when calculating its community charge. There are three types of charge: the personal community charge, payable by people aged 18 or over (unless exempt); the collective community charge paid in respect of certain designated buildings whose occupants move frequently and are difficult to register, and who will therefore pay their community charge contributions to the landlord; and the standard community charge which is payable in respect of domestic property which is not occupied.

The Community Charges Benefits (General) Regulations 1989 makes provision for community charge rebates. These will be administered by charging authorities. Eligibility for a rebate depends chiefly on the net income of the charge-payer.

(2) *Non-domestic (business) rates*.—Collected from April 1, 1990 by charging authorities, i.e. by district councils, the Council of the Isles of Scilly and in London by the borough councils and the Common Council of the City of London. The Local Government Finance Act 1988 provides for liability for rates to be assessed on the basis of ■ poundage (multiplier) tax on the rateable value of property (hereditaments). The multiplier is to be set by central Government and rates collected by the charging authority for the area where a property is located. Rate income collected by charging authorities is paid into ■ central national non-domestic rating (N.N.D.R.) pool and redistributed to individual authorities on the basis of adult resident population. For the years 1990–91 to 1994–95 actual payment of rates in certain cases will be subjected to transitional arrangements, to phase in the larger increases and reductions in rates resulting from the combined effects of the 1990 revaluation and the introduction of a uniform national business rate (U.B.R.).

Rateable values for the rating lists come into force on April 1, 1990. They are derived from the rental value of property as at April 1, 1988 and determined

on certain statutory assumptions by valuation officers of the Board of Inland Revenue. New property is added to the list, and significant changes to existing property necessitate amendments to the rateable value, on the same basis. Rating lists remain in force until the next general revaluation, which is scheduled for April 1, 1995.

Certain types of property are exempt from rates, e.g. agricultural land and buildings, and places of public religious worship. Charities and other non-profit-making organizations may receive full or partial relief. Specified classes of empty property are liable to pay rates at 50 per cent.

(3) *Government grants.*—In addition to specific grants in support of revenue expenditure on particular services, central Government has paid rate support grant to local authorities. This grant consists of two elements: block grant and domestic rate relief grant. The block grant is paid to enable all local authorities to provide comparable standards of service whilst levying the same rate poundage. The domestic rate relief grant is payable to all rating authorities to reimburse them for the cost of giving the domestic rate relief prescribed for the year.

The 1989–90 rate support grant settlement provided for a total of £9,588 million in rate support grant to be paid to local authorities. Unlike previous years, when an authority's entitlement was determined by its actual spending during the year, this amount will be paid out in full.

On April 1, 1990 the Government is introducing a new local government finance system. Local authorities will continue to receive specific grants in support of particular services. Those authorities responsible for setting and collecting the community charge (charging authorities) will also receive revenue support grant. Grant entitlement will depend on the costs authorities providing services in the area would have to meet to provide standard level of service. Payments of revenue support grant will be such that if all local authorities in a charging authority's area were to budget to spend at a level sufficient to provide the standard level of service, then the community charge paid by each individual in that area would equal a national standard amount (the community charge for standard spending).

Expenditure 1988–89

Forecasts of local authority relevant expenditure for 1988–89 in England adopted by the Government for rate support grant purposes were as follows. The amounts given are at 1988–89 cash prices.

Service	£m
Education	13,420
School meals and milk	450
Libraries, museums and art galleries	480
Personal social services and port health	3,035
Police	3,350
Fire	717
Other Home Office services	443
Local transport	1,950
Local environmental services	3,015
Agricultural services	137
Consumer protection and trading standards	76
Employment	103
Non-Housing Revenue Account housing	175
Housing benefits	187
Unallocated current expenditure	—
<i>Total current expenditure</i>	27,538

Rate fund revenue account contributions to capital outlay:	
Unallocated contributions to special funds, etc.	— 483
Other	387
Loan charges (including leasing)	2,757
Rate fund revenue account contributions to Housing Revenue Account ..	279
Interest receipts	— 632
<i>Total relevant expenditure</i>	29,846

The aggregate amount of Exchequer grants for 1988–89 was determined at £13,775 million. Of this, the specific grants and the transport and National Parks supplementary grants were estimated at £3,556 million, giving a total for rate support grants of £10,209 million, of which £9,482 million was in respect of the block grant and £727 million the domestic rate relief grant.

Rates and Rateable Values.—The total rateable value for England on April 1, 1987 was £7,729·5 million (figure for 1988 not yet available) and an estimate of the amount to be raised in rates, gross of rebates, in 1988–89 is £18,464 million.

Average Rates.—The estimated average rates levied in England in 1987–88 were: Inner London Boroughs, *domestic* rate 176·7p, *non-domestic* rate 181·9p; Outer London, 190·7p and 214·3p; Metropolitan Districts, 268·5p and 289·7p. The average rates levied in England were estimated at 228·9p (*domestic*) and 239·5p (*non-domestic*). In Wales the estimated average rates levied were, *domestic* rate 238·8p, *non-domestic* rate 257·6p.

SCOTLAND

Since 1975, mainland Scotland has been divided for local government purposes into nine regions within which there are 53 districts. Regional and district councils have separate responsibility for specific functions. In the three islands areas, Orkney, Shetland and the Western Isles, there are single tier Islands Councils responsible for most local authority functions.

Local Government Electors.—In 1989 the Register shows 3,932,897 electors in Scotland. Elections are next due to take place in 1990 for regional and island councils, and in 1992 for district councils.

Functions

Regional Councils are responsible for education; social work; strategic planning; the provision of infrastructure such as roads, water and sewerage; consumer protection; flood prevention; coast protection; and valuation and rating. They also have responsibility for the police and fire services; civil defence; and electoral registration, and in relation to public transport and registration of births, deaths and marriages.

District Councils deal with more local matters such as housing; leisure and recreation, including tourism, parks, libraries, museums and galleries; development control and building control; environmental health, including cleansing, refuse collection and disposal, food hygiene, inspection of shops, offices and factories, clean air, markets and slaughterhouses, burial and cremation; licensing, including liquor, cinemas and theatres, taxis, street traders, betting and gaming, and charitable collections; allotments; public conveniences; and the administration of district courts.

Community Councils.—Unlike the parish councils of England or community councils of Wales, Scottish community councils are not local authorities. Their purpose as defined in statute is to ascertain and express the views of the communities which they

represent, and to take in the interests of their communities such action appears to be expedient or practicable. Schemes drawn up by district and islands councils provide for a possible total of 1,342 community councils, of which about 1,130 are in existence.

Rates

In 1987-88, the latest year for which final figures were available, total of £2,133,647,795 was received from the general rates of local government in Scotland and £64,200,000 from domestic water rates. The rateable value on which rates were leviable was £3,219,546,252 on the general rates and £1,341,300,000 on the domestic water rates. The average general rate levied was 75·0p and the domestic water rate levied was 4·84p.

Provisional figures for 1988-89 show total receipts from general rates of £2,277,543,819 and £65,400,000 from domestic water rates. The average rate per £ levied for 1988-89 was 78·66p (general) and 4·94p (domestic water rate).

Domestic rates were abolished with effect from April 1, 1989 and were replaced by community charges. The average personal community charge payable in Scotland for 1989-90 is £280·20 and the average community water charge is £20·40.

Non-domestic rates remain and are set by the local authorities subject to a ceiling on the annual increase in poundage equal to the annual rate of inflation.

Local Commissioner

The Commissioner for Local Administration in Scotland is responsible for investigating complaints from members of the public against local authorities (see page 338).

NORTHERN IRELAND

For the purpose of local government Northern Ireland has a system of 26 single-tier district councils. There are 566 members of the councils, elected for periods of four years at a time on the principle of proportional representation.

The district councils all have the same three main roles. These are:

- (a) an executive role in which the councils are responsible for a wide range of local services including the provision of recreational, social, community, and cultural facilities; environmental health; consumer protection; the enforcement of building regulations; the promotion of tourist development schemes; gas supply; street cleansing; refuse collection and disposal; litter prevention; and miscellaneous licensing and registration provisions, including dog control;
- (b) a representative role in which they nominate representatives to sit as members of the various statutory bodies responsible for the administration of regional services such as education and libraries, health and personal social services, drainage, fire and electricity; and
- (c) a consultative role in which they act as the media through which the views of local people are expressed on the operation in their area of other regional services, notably planning, roads, and conservation (including water supply and sewerage services) provided by those departments of central government which have an obligation, either statutorily or otherwise, to consult the district councils about proposals affecting their areas.

THE KINGDOM OF ENGLAND

Position and Extent.—The Kingdom of England lies between 55° 46' and 49° 57' 30" N. latitude (from a few miles north of the mouth of the Tweed to the Lizard), and between 1° 46' E. and 5° 43' W. (from Lowestoft to Land's End). England is bounded on the north by the Cheviot Hills; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the West by the Atlantic Ocean, Wales and the Irish Sea. It has a total area of 50,363 sq. miles (land 50,070; inland water 293).

Population.—The population (1981 Census) was 46,362,836 (males 22,520,723; females 23,842,113). The average density of the population in 1981 was 915 per square mile. The population, mid-1987 estimate, was 47,407,000.

Relief.—There is a marked division between the upland and lowland areas of England. In the extreme north the Cheviot Hills (highest point, *The Cheviot*, 2,674 ft.) form a natural boundary with the Kingdom of Scotland. Running south from the Cheviots, though divided from them by the Tyne Gap, is the Pennine range (highest point, *Cross Fell*, 2,930 ft.), the main orographical feature of the country. The Pennines culminate in the Peak District of Derbyshire (*Kinder Scout*, 2,088 ft.). West of the Pennines are the Cumbrian mountains, which include *Scafell Pike* (3,210 ft.), the highest peak in England, and to the east are the Yorkshire Moors, their highest point being *Urra Moor* (1,490 ft.).

In the west, the foothills of the Welsh mountains extend into the bordering English counties of Shropshire (the *Wrekin*, 1,334 ft.; *Long Mynd*, 1,694 ft.) and Hereford and Worcester (the Malvern Hills—*Worcestershire Beacon*, 1,394 ft.). Extensive areas of high land and moorland are also to be found in the southwestern peninsula formed by Somerset, Devon and Cornwall: principally Exmoor (*Dunkery Beacon*, 1,704 ft.), Dartmoor (*High Willhays*, 2,038 ft.) and Bodmin Moor (*Brown Willy*, 1,377 ft.). Ranges of low, undulating hills run across the south of the country, including the Cotswolds in the Midlands and southwest, the Chilterns to the north of Greater London, and the North (Kent) and South (Sussex) Downs of the south-east coastal areas.

The lowlands of England lie in the Vale of York, East Anglia and the area around the Wash, the lowest lying being the Cambridgeshire Fens in the valleys of the Great Ouse and the River Nene, which are below sea-level in places; since the 17th century extensive drainage has brought much of the Fens under cultivation. The North Sea coast between the Thames and the Humber, low-lying and formed of sand and shingle for the most part, is subject to erosion and defences against further incursion have been built along many stretches.

Hydrography.—The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the east the Bristol Avon, and on the west the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13 miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16½ miles), which admits vessels

of 350 tons to Gloucester. The *Severn Tunnel*, begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, is 4 miles 628 yards in length (of which 2½ miles are under the river). The Severn road bridge between Haysgate, Gwent, and Almondsbury, Glos., with a centre span of 3,240 ft. was opened in 1966.

The longest river wholly in England is the *Thames*, with a total length of 215 miles from its source in the Cotswold hills to the Nore, and is navigable by ocean-going ships to London Bridge. The Thames is tidal to Teddington (69 miles from its mouth) and forms county boundaries almost throughout its course; on its banks are situated London, Windsor Castle, the home of the Sovereign, Eton College, the first of the public schools, and Oxford, the oldest university in the kingdom.

Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles), which rises in Northamptonshire, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian mountains. The English Lakes, noteworthy for their picturesque scenery and poetic associations, lie in Cumbria, the largest being *Windermere* (10 miles long), *Ullswater* and *Derwentwater*.

Islands.—The *Isle of Wight* is separated from Hampshire by the Solent; total area 147 sq. miles, population about 124,600. The climate is mild and healthy, making the island a popular holiday resort. Capital, Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay, Seaview and Brimbridge.

Lundy (= Puffin Island) 11 miles N.W. off Hartland Point, Devon, is about 2 miles long and about half a mile broad (average), with a total area of about 1,116 acres, and a population of about 20; it became the property of the National Trust in 1969 and is now principally a bird sanctuary.

(See also The Isles of Scilly, p. 624.)

Climate.—England has a generally mild and temperate climate. Because of the prevailing south-westerly winds, the weather day to day is variable, being affected mainly by depressions moving eastwards across the Atlantic Ocean. This maritime influence means that the west of the country tends to experience wetter but also milder weather than the east. Rainfall also increases with altitude, the mountainous areas of the north and west having more rain than the lowlands of the south and east. Rain is fairly well-distributed throughout the year in all areas but, on average, the driest months are March to June, and the wettest September to January.

The mean annual temperature reduced to sea-level varies from 11°C in the south-west to 9°C near Berwick-on-Tweed. In winter, temperatures tend to be higher in the south and west than in the east, while the warmest in summer are the south and inland areas. Latitude for latitude the mean annual temperature is lower in the east; the decrease of mean temperature with height is about 0·6°C per 100 metres.

EARLY INHABITANTS

Prehistoric Man.—Archaeological evidence suggests that England has been inhabited since at least the Palaeolithic period, though the extent of the various Palaeolithic cultures was dependent upon the degree of glaciation. The succeeding Neolithic and Bronze Age cultures have left abundant remains throughout the country, the best-known of these being the henges and stone circles of Stonehenge (10 miles north of Salisbury, Wilts.) and Avebury (Wilts.), both of which are believed to have been of religious significance. In the latter part of the Bronze Age the Goidels, a people of Celtic race, and in the Iron Age other Celtic races of Brythons and Belgae, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—The Roman conquest of Gaul (57–50 B.C.) brought Britain into close contact with Roman civilization, but although Julius Caesar raided the south of Britain in 55 B.C., and 54 B.C., conquest was not undertaken until nearly 100 years later. In A.D. 43 the Emperor Claudius dispatched Aulus Plautius, with a well-equipped force of 40,000, and himself followed with reinforcements in the same year. Success was delayed by the resistance of Caratacus (Caractacus), the British leader from A.D. 48–51, who was finally captured and sent to Rome, and by a great revolt in A.D. 61 led by Boudicca (Boadicea), Queen of the Iceni; but the south of Britain was secured by A.D. 70, and Wales and the area north to the Tyne by about A.D. 80.

In A.D. 122, the Emperor Hadrian visited Britain and built a continuous rampart, since known as Hadrian's Wall, from Wallsend to Bowness (Tyne to Solway). The work was entrusted by the Emperor Hadrian to Aulus Platorius Nepos, legate of Britain from 122 to 126, and it was intended to form the northern frontier of the Roman Empire.

The Romans administered Britain as a Province under a Governor, with a well-defined system of local government, each Roman municipality ruling itself and surrounding territory, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, and Wroxeter, Caerleon, Chester, Lincoln and York were at various times the sites of legionary fortresses. Well-preserved Roman towns have been uncovered at (or near) Silchester (*Calleva Atrebatum*), 10 miles south of Reading, Wroxeter (*Viroconium Cornoviorum*), near Shrewsbury, and St. Albans (*Verulamium*) in Hertfordshire.

Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Lincoln through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (later known as Watling Street) ran through Verulamium to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties.

In the 4th century Britain was subject to raids along the east coast by Saxon pirates, which led to the establishment of a system of coast defence from the Wash to Southampton Water, with forts at Brancaster, Burgh Castle (Yarmouth), Walton (Felixstowe), Bradwell, Reculver, Richborough, Dover, Lympne, Pevensey and Porchester (Portsmouth). The Irish (Scoti) and Picts in the north were

also becoming more aggressive; from about A.D. 350 incursions became more frequent and more formidable. As the Roman Empire came under attack increasingly towards the end of the 4th century many troops were removed from Britain for service in other parts of the Empire. The island was eventually cut off from Rome by the Teutonic conquest of Gaul, and with the withdrawal of the last Roman garrison early in the 5th century, the Romano-British were left to themselves.

According to legend, the British King Vortigern called in the Saxons to defend him against the Picts, the Saxon chieftains being Hengist and Horsa, who landed at Ebbsfleet, Kent, and established themselves in the Isle of Thanet; but the events during the one and a half centuries between the final break with Rome and the re-establishment of Christianity are unclear. However, it would appear that in the course of this period the raids turned into large-scale settlement by invaders traditionally known as Angles (England north of the Wash and East Anglia), Saxons (Essex and southern England) and Jutes (Kent and the Weald), which pushed the Romano-British into the mountainous areas of the north and west, Celtic culture outside Wales and Cornwall surviving only in topographical names. Various kingdoms were established at this time which attempted to claim overlordship of the whole country, hegemony finally being achieved by Wessex (capital, Winchester) in the 9th century. This century also saw the beginning of raids by the Vikings (Danes), which were resisted by Alfred the Great (871–899), the greatest of the Wessex kings, who fixed a limit to the advance of Danish settlement by the Treaty of Wedmore (878), giving them the area north and east of Watling Street, on condition they adopt Christianity.

In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist a second wave of invaders. England paid tribute (*Danegeld*) for many years, and was invaded in 1013 by the Danes and ruled by Danish Kings from 1016 until 1042, when Edward the Confessor was recalled from exile in Normandy. In 1066 Harold Godwinson (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England. After defeating (at Stamford Bridge, Yorkshire, Sept. 25) an invading army under Harald Hadrada, King of Norway (aided by the outlawed Earl Tostig of Northumbria, Harold's brother), Harold was himself defeated at the Battle of Hastings on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy, a cousin of Edward the Confessor.

Christianity reached the Roman province of Britain from Gaul in the 3rd century (or possibly earlier); Alban, traditionally Britain's first martyr, was put to death as a Christian during the persecution of Diocletian (June 22, 303), at his native town Verulamium; and the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attended the Council of Arles in 314. However, the Anglo-Saxon invasions submerged the Christian religion in England until the 6th century when conversion was undertaken in the north from 563 by Celtic missionaries from Ireland led by St. Columba, and in the south by a mission sent from Rome in 597 which was led by St. Augustine, who became the first archbishop of Canterbury. England appears to have been converted again by the end of the 7th century and followed, after the Council of Whitby in 663, the practices of the Roman Church, which brought the country into the mainstream of European thought and culture.

THE PRINCIPAL ENGLISH CITIES

BIRMINGHAM

BIRMINGHAM (West Midlands) is Britain's second city and the largest metropolitan district in the country. It is a focal point in national communications networks with a rapidly expanding International Airport.

The generally accepted derivation of "Birmingham" is the *ham* or dwelling-place of the *ing* or the family of *Beorna*, presumed to have been a Saxon. During the Industrial Revolution the town grew into a major manufacturing centre. In 1889 Birmingham was granted City status.

Despite the decline in manufacturing, Birmingham is still a major hardware trade and motor component industry centre. Recent development includes the National Exhibition Centre and the Aston Science Park. An Urban Development Agency has been set up.

The principal buildings are the Town Hall, built in 1832-34; the Council House (1879); Victoria Law Courts (1891); the University (1909); the 13th century

Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church) (1711) and the Roman Catholic Cathedral of St. Chad (1839-41).

BRADFORD

BRADFORD (West Yorkshire), 192 miles N.N.W. of London, is the administrative centre of the Metropolitan District of Bradford. The District covers an area of 91,444 acres and lies on the southern edge of the Yorkshire Dales National Park, including within its boundaries the village of Haworth, home of the Brontë sisters, and Ilkley Moor.

Originally a Saxon township, Bradford received a market charter in 1251 but developed only slowly until the industrialization of the textile industry brought rapid growth during the 19th century. The prosperity of that period is reflected in much of the city's architecture, particularly the public buildings—City Hall (1873), Wool Exchange (1867), St George's Hall (Concert Hall, 1853), Cartwright Hall

(Art Gallery, 1904) and Technical College (1882). Other chief buildings are the Cathedral (15th century) and Bolling Hall (14th century).

Textiles still play an important part in the city's economy but industry is now more broadly based, including engineering and micro-electronics. The city has a strong banking, insurance and building society sector, and a growing tourism industry.

BRISTOL

BRISTOL (Avon) is the largest non-metropolitan district in population in the country, and lies 119 miles W. of London. The present municipal area is 10,954 hectares.

Bristol's commercial port systems comprise the largest municipally owned port in the country. The Avonmouth dock complex, Royal Portbury Dock and Portishead Dock handle import and export cargoes. Principal imports include cocoa, timber, metals, animal feeding stuffs, oil products, chemicals, vehicles and molasses. The Royal Portbury Dock, opened by H.M. the Queen in Aug. 1977, is capable of accommodating up to six vessels of 70,000 d.w.t.

The chief buildings include the 12th century Cathedral (with later additions), with Norman chapter house and gateway, the 14th century Church of St. Mary Redcliffe, Wesley's Chapel, Broadmead, the Merchant Venturers' Almshouses, the Council House (1956), Guildhall, Exchange (erected from the designs of John Wood in 1743), Cabot Tower, the University and Clifton College. The Roman Catholic Cathedral at Clifton was opened in 1973.

The Clifton Suspension Bridge, with a span of 702 feet over the Avon, was projected by Brunel in 1836 but was not completed until 1864. Brunel's SS *Great Britain*, the first ocean going propeller driven ship, is now being restored in the City Docks from where she was launched in 1843. The docks themselves have been extensively restored and redeveloped.

Bristol was a Royal Borough before the Norman Conquest. The earliest form of the name is *Brigstow*. In 1373 it received from Edward III a charter granting it county status.

CAMBRIDGE

CAMBRIDGE, a settlement far older than its ancient University, lies on the Cam or Granta, 51 miles north of London. It has an area of 10,060 acres.

The city is a county town and regional headquarters. Its industries include electronics, flour milling, cement making and the manufacture of scientific instruments. Among its open spaces are Jesus Green, Sheep's Green, Coe Fen, Parker's Piece, Christ's Pieces, the University Botanic Garden, and the Backs, or lawns and gardens through which the Cam winds behind the principal line of college buildings. East of the Cam, King's Parade, upon which stand Great St. Mary's Church, Gibbs' Senate House and King's College Chapel with Wilkins' screen, joins Trumpington Street to form one of the most beautiful thoroughfares in Europe.

University and college buildings provide the outstanding features of Cambridge architecture but several churches (especially St. Benet's, the oldest building in the City, and St. Sepulchre's, the Round Church) also are notable. The modern Guildhall (1939) stands on a site of which at least part has held municipal buildings since 1224.

CANTERBURY

CANTERBURY, the Metropolitan City of the Anglican Communion, has a history going back to prehistoric times. It was the Roman *Durovernum*

Cantiacorum and the Saxon Cant-wara-byrig (stronghold of the men of Kent). Here in 597 St. Augustine began the conversion of the English to Christianity, when Ethelbert, King of Kent, was baptized.

Of the Benedictine St. Augustine's Abbey, burial place of the Jutish Kings of Kent (whose capital Canterbury was) only extensive ruins remain. St. Martin's Church, on the eastern outskirts of the City, is stated by Bede to have been the place of worship of Queen Bertha, the Christian wife of King Ethelbert, before the advent of St. Augustine.

In 1170 the rivalry of Church and State culminated in the murder in Canterbury Cathedral, by Henry II's knights, of Archbishop Thomas Becket, whose shrine became a great centre of pilgrimage described by Chaucer in his *Canterbury Tales*. After the Reformation pilgrimages ceased, but the prosperity of the City was strengthened by an influx of Huguenot refugees, who introduced weaving. The Elizabethan poet and playwright Christopher Marlowe was born and reared in Canterbury, and there are literary associations also with Defoe, Dickens, Joseph Conrad and Somerset Maugham.

The Cathedral, with architecture ranging from the 11th to 15th centuries, is world famous. Modern pilgrims are attracted particularly to the Martyrdom, The Black Prince's Tomb, the Warriors' Chapel and the many examples of medieval stained glass.

The medieval City Walls are built on Roman foundations and the 14th century West Gate is one of the finest buildings of its kind in the country.

The 1,000 seat Marlowe Theatre is the base for the Canterbury International Festival of the Arts each autumn.

CARLISLE

CARLISLE is situated at the confluence of the River Eden and River Caldew, 309 miles north west of London and a few miles from the Scottish border. It has an area of 254,955 acres, and was granted a charter in 1158.

The city stands at the western end of Hadrian's Wall and dates from the original Roman settlement of *Luguvallium*. Granted to Scotland in the 10th century, Carlisle is not included in the Domesday Book. William Rufus reclaimed the area in 1092 and the Castle and city walls were built to guard Carlisle and the western border; the Citadel is a Tudor addition to protect the south of the city. Until the Union of the Crowns in 1603, Carlisle changed hands several times and was frequently besieged. During the Civil War the city remained Royalist; in 1745 it supported the Young Pretender.

The Cathedral, originally a 12th century Augustinian priory, was enlarged in the 13th and 14th centuries after the diocese was created in 1133. To the south is a restored Tithe Barn and nearby the 18th century church of St. Cuthbert, the third to stand on a site dating from the 7th century.

Carlisle is the major shopping, commercial and agricultural centre for the area, and industries include the manufacture of metal goods, biscuits and textiles. However, the largest employer is the services sector, notably in retailing and transport. The city has an important communications position at the centre of a network of major roads, as an important stage on the main west coast rail services and with its own airport at Crosby.

CHESTER

CHESTER is situated on the River Dee, 189 miles north west of London. The city administers an area of 173 square miles and was granted Borough and City status in 1974.

Chester's recorded history dates from the 1st century when the Romans founded the fortress of *Deva*. The city's name is derived from the Latin *castra* (a camp or encampment). During the Middle Ages, Chester was the principal port of north west England but declined with the silting of the Dee estuary and competition from Liverpool. The city was also an important military centre, notably during Edward I's Welsh campaigns and the Elizabethan Irish campaigns. During the Civil War, Chester supported the King and was besieged from 1643–46. Chester's first charter was granted c. 1175 and the city was incorporated in 1506. The office of Sheriff is the earliest created in the country (c. 1120's), and the Mayor also enjoys the title "Admiral of the Dee".

The city's architectural features include the city walls (an almost complete two mile circuit), the unique Rows (covered galleries above the street level shops), the Victorian Gothic Town Hall (1869), the Castle (rebuilt 1788 and 1822) and numerous half-timbered buildings. The Cathedral was a Benedictine abbey until the Dissolution. Remaining monastic buildings include the chapter house, refectory and cloisters and there is a modern free-standing bell tower. The Norman church of St. John the Baptist was ■ Cathedral church in the early Middle Ages.

Chester is primarily a regional service centre and has considerable tourist appeal. In 1984 the city was awarded Development Area status which has attracted a range of nationally known companies to expand or locate in Chester.

COVENTRY

COVENTRY (West Midlands) is 92 miles N.W. of London, and an important industrial centre, producing cars, machine tools, agricultural machinery, man-made fibres, composite materials and telecommunications equipment.

The city owes its beginning to Leofric, Earl of Mercia and his wife Godiva who, in 1043, founded a Benedictine monastery. The guildhall of St. Mary dates from the 14th century, three of the city's churches date from the 14th and 15th centuries and 16th century almshouses may still be seen. Coventry's first cathedral was destroyed at the Reformation, its second in the 1940 blitz (its walls and spire remain) and the new cathedral designed by Sir Basil Spence, consecrated in 1962, now draws innumerable visitors.

Coventry is the home of the University of Warwick and its Science Park, the rapidly-expanding Westwood Business Park and the Museum of British Road Transport.

DERBY

DERBY stands on the banks of the River Derwent, 127 miles N.N.W. of London, and covers an area of 30 square miles. The name Derby dates back to 880 when the Danes settled in the locality and changed the original Saxon name of "Northworthy" to "Deoraby".

Derby has ■ wide range of industries: its products include aero engines, lawn mowers, pipework, specialized mechanical engineering equipment, textiles, chemicals, plastics and the Royal Crown Derby porcelain. The city is an established railway centre, the site of British Rail's Technical Centre with its research laboratories.

Buildings of interest include St Peter's Church and the Old Abbey Building (14th century), the Cathedral (1525), St Mary's Roman Catholic Church (1839) and the Industrial Museum, formerly the Old Silk Mill (1721). The traditional city centre is complemented by the new Eagle Centre and "out-of-centre" retail developments. In addition to the Derby

Playhouse, the Assembly Rooms are ■ multi-purpose venue.

The first charter granting ■ Mayor and Aldermen was that of Charles I in 1637. Previous charters date back to 1154. It was granted City status in 1977.

DURHAM

The city of DURHAM is ■ district in the county of Durham and covers an area of 73 square miles. The city is a major tourist attraction in the county because of its prominent Norman Cathedral and Castle set high on a wooded peninsula overlooking the River Wear. The Cathedral was founded as a shrine for the body of St. Cuthbert in 995. The present building dates from 1093 and among its many treasures is the tomb of the Venerable Bede (673–735). Durham's Prince Bishops had unique powers up to 1836, being lay rulers as well as religious leaders. As ■ palatine Durham could have its own army, nobility, coinage and courts. The Castle was the main seat of the Prince Bishops for nearly 800 years; it is now used as a college by the University.

The University, founded on the initiative of Bishop William Van Mildert, is England's third oldest. Its students live in 14 colleges spread across the city.

Among other buildings of interest is the Guildhall in the Market Place which dates originally from the 14th century. Much work has been carried out to conserve this area, forming part of the city's major contribution to the Council of Europe's Urban Renaissance Campaign. Annual events include Durham's Regatta in June (claimed to be the oldest rowing event in Britain) and the Annual Gala (formerly Durham Miners' Gala) in July.

In the past 20 years the economy of Durham has undergone a significant change with the replacement of mining as the dominant feature by "white collar" employment. Although still a predominantly rural area, the industrial and commercial sector is growing and a wide range of manufacturing and service industries are based on industrial estates on and around the City area.

EXETER

EXETER lies on the River Exe 170 miles S.W. of London and 10 miles from the sea. It covers an area of 11,661 acres and was granted a Royal Charter by Henry II.

The Romans founded *Isca Dumnoniorum* in the 1st century A.D., and in the 3rd century a stone wall (most of which remains) was built, providing protection against Saxon, and then Danish invasions. After the Conquest, the city led resistance to William in the west, until reduced by siege. The Normans built the motte and bailey castle of Rougemont, the gatehouse and one tower of which remain, although the rest was pulled down in 1784. The first bridge across the Exe was built in the 13th century. The city's role as a port declined due to the silting of the river, but was somewhat restored by the construction in the 1560's of the first ship canal in England. Exeter was the Royalist headquarters in the West during the Civil War.

The diocese of Exeter was established by Edward the Confessor in 1050, although a church existed on the Cathedral site in the early 10th century. A new cathedral was built in the 12th century but the present building was begun c. 1275 in the Gothic style, although incorporating the Norman towers, and completed about ■ century later with the West Front. The Guildhall dates from the 12th century and there are many other medieval buildings in the city, as well as architecture in the Georgian and Regency styles (Custom House, The Quay). Damage

suffered by bombing in 1942 led to the redevelopment of the city centre.

Exeter's prosperity from medieval times was based on trade in wool and woollen cloth (commemorated by Tuckers Hall), which remained at its height until the late 18th century when export trade was hit by the French Wars. Subsequently Exeter has developed an administrative and commercial centre, notably in the distributive trades, light manufacturing industries and tourism.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") lies in the mostly rural County of Humberside, at the junction of the River Hull with the Humber, 22 miles from the North Sea and 205 miles N. of London. The municipal area is 17,535 acres.

Hull is one of the great seaports of the United Kingdom. It has docks covering a water area of 172 acres, equipped to handle cargoes by unit-load techniques, and is a departure point for car ferry services to continental Europe. There is a great variety of industry and service industries, as well as increasing tourism and conference business.

The city, restored after very heavy air raid damage during World War II, has good office and administrative buildings, its municipal centre being the Guildhall, its educational centre the University of Hull and its religious centre the Parish Church of the Holy Trinity. The old Town area is being renovated and includes a new marina and a new shopping complex, to be opened in October 1990. Just west of the city is the Humber Bridge, the world's longest single span suspension bridge, which was officially opened by H.M. The Queen in July 1981.

Kingston upon Hull was so named by Edward I. City status was accorded in 1897 and the office of Mayor raised to the dignity of Lord Mayor in 1914.

LEEDS

LEEDS (West Yorkshire), a Metropolitan District from April 1, 1974, is a junction for road, rail, canal and air services and an important commercial centre, situated in the lower Aire Valley, 195 miles by road N.W. of London. The metropolitan area is 138,915 acres.

The main manufacturing industries are mechanical engineering, printing, publishing and clothing. However, 65 per cent of employment is in services, notably professional and scientific, particularly education and medicine, distributive trades, finance and banking.

The principal buildings are the Civic Hall (1933), the Town Hall (1858), the Municipal Buildings and Art Gallery (1884) with the Henry Moore Gallery (1982), the Corn Exchange (1863) and the University. The Parish Church (St. Peter's) was rebuilt in 1841; the 17th century St. John's Church has a fine interior with a famous English renaissance screen; the last remaining 18th century church is Holy Trinity, Boar Lane (1727). Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Lacy in 1152, is one of the most complete examples of Cistercian houses now remaining. Temple Newsam, birthplace of Lord Darnley, was acquired by the Council in 1922. The present house was largely re-built by Sir Arthur Ingram in about 1620. Adel Churh, about 5 miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I in 1626. The earliest forms of the name are *Loidis* or *Leedes*, the origins of which are obscure.

LEICESTER

LEICESTER is situated geographically in the centre of England, 100 miles N. of London. The City dates

back to pre-Roman times and was one of the five Danish *Burhs*. In 1589 Queen Elizabeth I granted a Charter to the City and the ancient title was confirmed by Letters Patent in 1919. Under local government reorganization Leicester's area remained unchanged at 18,141 acres, and it retains its designation as a City.

The principal industries of the city are hosiery, and knitwear, footwear manufacturing and engineering. The growth of Leicester as a hosiery centre increased rapidly from the introduction there of the first stocking frame in 1670 and today it has some of the largest hosiery factories in the world, with much of the output being exported.

The principal buildings in the city are the Town Hall, the New Walk Centre, the University, Leicester Polytechnic, De Montfort Hall, one of the finest concert halls in the provinces seating over 2,750 persons, and the Granby Halls, a major indoor sports facility. The ancient Churches of St. Martin (now Leicester Cathedral), St. Nicholas, St. Margaret, All Saints, St. Mary de Castro, and buildings such as the Guildhall, the 14th century Newarke Gate, the Castle and the Jewry Wall Roman site still exist. The Haymarket Theatre, an integral part of a large shopping and car-parking complex, was opened in 1973.

LINCOLN

Situated 143 miles N. of London and 40 miles inland on the River Witham, LINCOLN derives its name from a contraction of *Lindum Colonia*, the settlement founded in A.D. 48 by the Romans to command the crossing of Ermine Street and Fosse Way. Sections of the 3rd century Roman city wall can be seen, including an extant gateway (Newport Arch), and excavations have discovered traces of a sewerage system unique in Britain. The Romans also drained the surrounding fenland and created a canal system, laying the foundations of Lincoln's agricultural prosperity, and also of the city's importance in the medieval wool trade as a port and Staple town. As one of the Five Boroughs of the Danelaw, Lincoln was an important trading centre in the 9th and 10th centuries and medieval prosperity from the wool trade lasted until the 14th century, enabling local merchants to build parish churches (of which three survive), and attracting in the 12th century a Jewish community (Jew's House and Court, Aaron's House). However, the removal of the Staple to Boston in 1369 heralded a decline from which the city only recovered fully in the 19th century when improved fen drainage made Lincoln agriculturally important, and improved canal and rail links led to industrial development, mainly in the manufacture of machinery, components and engineering products.

The Castle was built shortly after the Conquest and is unusual in having two mounds; on one motte stands a Keep (Lucy's Tower) added in the 12th century. The Cathedral was begun c.1073 when the first Norman bishop moved the see of Lindsey to Lincoln, but was mostly destroyed by fire and earthquake in the 12th century. Rebuilding was begun by St. Hugh and completed over a century later. The Wren library contains manuscripts including one of the four surviving originals of the Magna Charta. Other notable architectural features of the city are the 12th century High Bridge, the oldest in Britain still to carry buildings, and the Guildhall situated above the 15–16th century Stonebow gateway.

LIVERPOOL

LIVERPOOL (Merseyside) on the right bank of the river Mersey, 3 miles from the Irish Sea and 210 miles

N.W. of London, is the U.K.'s fourth most important port and the foremost for the Atlantic trade. The municipal area of 27,864 acres includes 2,840 acres in the bed of the river Mersey. Tunnels link Liverpool with Birkenhead and Wallasey.

There are 2,100 acres of dockland on both sides of the river and the Gladstone and Royal Seaforth Docks can accommodate the largest vessels afloat. Annual tonnage of cargo handled is approximately 10,500,000 tonnes. The main imports are crude oil, grain, ores, edible oils, timber, containers and break bulk cargo. Liverpool Free Port, Britain's largest, was opened in 1984.

Liverpool was created a free borough in 1207 and a city in 1880. From the early eighteenth century it expanded rapidly with the growth of industrialization and Atlantic trade. Surviving buildings from this date include the Bluecoat Chambers (1717, formerly the Bluecoat School), the Town Hall (1754, rebuilt to the original design, 1795), and buildings in Rodney Street, Canning Street and the suburbs. Notable from the 19th and 20th centuries are the Anglican Cathedral, built from the designs of Sir Giles Gilbert Scott (the foundation stone was laid in 1904, and the building was only completed in 1980), the Catholic Metropolitan Cathedral (designed by Sir Frederick Gibberd, consecrated 1967) and St. George's Hall, (1838–54), regarded as one of the finest modern examples of classical architecture. The recently refurbished Albert Dock (designed by Jesse Hartley) contains the Merseyside Maritime Museum and Tate Gallery, Liverpool. In 1852 an Act was obtained for establishing a public library, museum and art gallery: as a result Liverpool had one of the first public libraries in the country. The Brown, Picton and Hornby libraries now form one of the country's major libraries. The Victoria Building of Liverpool University, the Royal Liver, Cunard and Mersey Docks & Harbour Company buildings at the Pier Head, the Municipal Buildings and the Philharmonic Hall are other examples of the City's fine buildings.

Britain's first International Garden Festival was held in Liverpool in 1984.

MANCHESTER

MANCHESTER (the *Mamucium* of the Romans, who occupied it in A.D. 78) is 189 miles N.W. of London and covers about 43 square miles.

Manchester is a commercial and industrial centre with a population engaged in engineering, chemical, clothing, food processing and textile industries. Banking and insurance are among the prime commercial activities. The city is connected with the sea by the Manchester Ship Canal, opened in 1894, 35½ miles long, and accommodating ships up to 15,000 tons. Manchester Airport handles more than 5 million passengers yearly.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A., together with a large extension of 1938; the Royal Exchange (1869, enlarged 1921) the Central Library (1934); Heaton Hall; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University precinct; the 15th century Cathedral (formerly the parish church) and the Free Trade Hall. Manchester is the home of the Hallé Orchestra, the Royal Northern College of Music, the Royal Exchange Theatre and seven public art galleries.

The town received its first charter of incorporation in 1838 and was created a city in 1853. The title of city was retained under local government reorganization.

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Tyne and Wear) ■ Metropolitan District on the north bank of the River Tyne, is 8 miles from the North Sea, 272 miles N. of London and has an area of 27,640 acres. A Cathedral and University City, it is the administrative, commercial and cultural centre for north-east England and the principal port. It is an important manufacturing centre with a wide variety of industries.

The principal buildings include the Castle Keep (12th century), Black Gate (13th century), Blackfriars (13th century), West Walls (13th century), St. Nicholas's Cathedral (15th century, fine lantern tower), St. Andrew's Church (12th–14th century), St. John's (14th–15th century), All Saints (1786 by Stephenson), St. Mary's Roman Catholic Cathedral (1844), Trinity House (17th century), Sandhill (16th century houses), Guildhall (Georgian), Grey Street (1834–39), Central Station (1846–50), Laing Art Gallery (1904), University of Newcastle Physics Building (1962) and Medical Building (1985), Civic Centre (1963), Central Library (1969) and Eldon Square Shopping Development (1976). Open spaces include the Town Moor (927 acres) and Jesmond Dene. Eight bridges span the Tyne at Newcastle.

The City derives its name from the "new castle" (1080) erected as ■ defence against the Scots. In 1400 it was made ■ County, and in 1882 a City.

NORWICH

NORWICH (Norfolk) is an ancient City 110 miles N.E. of London. It grew from an early Anglo-Saxon settlement near the confluence of the Rivers Yare and Wensum, and now serves as provincial capital for the predominantly agricultural region of East Anglia. The name is thought to relate to the most northerly of a group of Anglo-Saxon villages or "wics". The present City has an area of 9,655 acres. The City's first known Charter was granted in 1158 by Henry II.

Norwich serves its surrounding area as a market town and commercial centre, banking and insurance being prominent among the City's businesses. From the 14th century until the Industrial Revolution, Norwich was the regional centre of the woollen industry, but now the biggest single industry is financial services and principal trades are engineering, printing, shoemaking, double glazing, and the production of chemicals, clothing, confectionery and other foodstuffs. Norwich is accessible to seagoing vessels by means of the River Yare, entered at Great Yarmouth, 20 miles to the east.

Among many historic buildings are the Cathedral (completed in the 12th century and surmounted by ■ 15th century spire 315 feet in height), the Keep of the Norman Castle (now a museum and art gallery), the 15th century flint-walled Guildhall (now ■ tourist information centre), some thirty medieval parish churches, St. Andrew's and Blackfriars' Halls, the Tudor houses preserved in Elm Hill and the Georgian Assembly House. The University of East Anglia has been established in Norwich on ■ spacious site at Earlham on the City's western boundary and received its first students in 1963.

NOTTINGHAM

NOTTINGHAM (Nottinghamshire) stands on the River Trent, 124 miles N.N.W. of London in one of the most valuable coalfields of the country connected by canal with the Atlantic and the North Sea. The municipal area is 18,364 acres.

The principal industries are hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing and the manufacture of tobacco,

chemicals, furniture, typewriters and mechanical products.

The chief buildings are the 17th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), Wollaton Hall (1580-88) owned by the City Council and now a Natural History Museum, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842-44), the Council House (1929), the Guildhall and Court House (1888), Shire Hall, Albert Hall, the University, Trent Polytechnic, Newstead Abbey, home of Lord Byron, the Theatre Royal (1865), the Playhouse (1963) and the Royal Concert Hall (1982).

Snotingham or Notingham, "the village or home of the sons of Snot" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobauc*, "Cave Homes". The City possesses a Charter of Henry II, and was created a City in 1897. Under local government reorganization, the style of City was reaccorded from April, 1974.

OXFORD

OXFORD is a University City, an important industrial centre, and a market town, with an area of 8,785 acres. Industry played a minor part in Oxford until the motor industry was established in 1912.

It is for its architecture that Oxford is of most interest to the visitor, its oldest specimens being the reputed Saxon tower of St. Michael's church, the remains of the Norman castle and city walls and the Norman church at Iffley. It is chiefly famous however for its Gothic buildings, such as the Divinity Schools, the Old Library at Merton College, William of Wykeham's New College, Magdalen College and Christ Church and many other college buildings. Later centuries are represented by the Laudian quadrangle at St. John's College, the Renaissance Sheldonian Theatre by Wren, Trinity College Chapel, and All Saints Church; Hawksmoor's mock-Gothic at All Souls College, and the 18th century Queen's College. In addition to individual buildings, High Street and Radcliffe Square, just off it, both form architectural compositions of great beauty. Most of the Colleges have gardens, those of Magdalen, New College, St. John's (designed by "Capability" Brown) and Worcester being the largest.

PLYMOUTH

PLYMOUTH is situated on the borders of Devon and Cornwall at the confluence of the Rivers Tamar and Plym, 210 miles from London, with an area of 19,572 acres. The city has a long maritime history; it was the home port of Sir Francis Drake and the starting point for his circumnavigation of the world, as well as the last port of call for the *Mayflower* when the Pilgrim Fathers sailed for the New World in 1620. Today Plymouth is host to many international yacht races. The Barbican harbour area has many Elizabethan buildings, and on Plymouth Hoe stands the first lighthouse to be built on the Eddystone Rocks, some miles offshore.

Following extensive war damage, the city centre, comprising a large shopping centre, municipal offices, law courts and public buildings, has been re-built. The main employment is provided at the Naval Base, though many new industrial firms and service industries have become established in the post-war period and the city is a growing tourism centre. In 1982 the Theatre Royal was opened. In conjunction with the Cornwall County Council, the Tamar Bridge was constructed linking the City by road with Cornwall.

PORTRUSH

PORTRUSH occupies Portsea Island, Hampshire, with boundaries extending to the mainland. It has an area of 15½ sq. miles and is 70 miles S.W. of London.

Portsmouth is a centre of industry and commerce, including many high technology and manufacturing industries. It is the U.K. headquarters of a major computer company and two insurance companies. H.M. Naval Base still has a substantial work force, although this has decreased in recent years. The commercial port and Continental Ferry Port is owned and run by the City Council, and carries passengers and vehicles to France.

A major port since the 16th century, Portsmouth is also a thriving seaside resort catering for thousands of visitors and day-trippers annually. Among many historic attractions are Lord Nelson's flagship, H.M.S. *Victory*, the Tudor warship *Mary Rose*, Britain's first "ironclad", H.M.S. *Warrior*, the D-Day Museum, Charles Dickens' birthplace at 393 Old Commercial Road, the Royal Naval and Royal Marine museums, Southsea Castle (built by Henry VIII), the Round Tower and Point Battery, which for hundreds of years have guarded the entrance to Portsmouth Harbour, Fort Widley on Portsdown Hill and the Sealife Centre.

ST. ALBANS

Twenty-five miles N.W. of London and situated on the River Ver, ST. ALBANS' origins stem from the major Roman town of *Verulamium*. Named after the first Christian martyr in Britain, who was executed here, St. Albans has developed around the Norman Abbey and Cathedral Church (consecrated 1115), the second longest in Britain, built partly of materials from the old Roman city. The museums house Iron Age and Roman artefacts and the Roman Theatre, unique in Britain, has a stage as opposed to an amphitheatre. Archaeological excavations in the city centre continue also to reveal evidence of pre-Roman, Saxon and medieval occupation.

The town's significance grew to the extent that it was a signatory and venue for the drafting of the Magna Charta. It was also the scene of major riots during the Peasants' Revolt; the French King John was imprisoned there after the Battle of Poitiers, and heavy fighting took place during the Wars of the Roses; but it is a Roman town that it is best recognized.

Previously controlled by the Abbot, the town achieved a Royal Charter in 1553 and City status in 1877. The street market, first established in 1553, is still an important feature of the city, and are many hotels and inns which survive from the days when St. Albans was an important coach stop. Tourist attractions include historic churches and houses, and a 15th century clock tower.

The advent of the railway saw the gradual expansion of the city, and the area now contains a wide range of firms, with special emphasis on microtechnology and electronics, particularly in the medical field. In addition, it is the home of the Royal National Rose Society, and of Rothamsted Park, the agricultural research centre.

In 1974 the City and District of St. Albans was formed, taking in the town of Harpenden and many villages, and it now covers an area of 63 square miles.

SHEFFIELD

SHEFFIELD (South Yorkshire), the centre of the special steel and cutlery trades, is situated 159 miles N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the River Don.

Sheffield has an area of 91,000 acres (nearly 150

square miles), including 4,619 acres of publicly owned parks and woodland. Though its cutlery, silverware and plate have long been famous, Sheffield has other and now more important industries—special and alloy steels, engineering and tool-making. Research in glass, metallurgy, radiotherapy and other fields is carried on.

The parish church of St. Peter and St. Paul, founded in the 12th century, became the Cathedral Church of the Diocese of Sheffield in 1914. The Roman Catholic Cathedral Church of St. Marie (founded 1847) was created Cathedral for the new diocese of Hallam in 1980. Parts of the present building date from c. 1435. The principal buildings are the Town Hall (1897, 1923 and 1977), the Cutlers' Hall (1832), the University (1905 and recent extensions, including 19-storey Arts Tower), City Hall (1932), Graves Art Gallery (1934), Castle Market Building (1959), the retail market (1973), Mappin Art Gallery and the Crucible Theatre.

Sheffield was created a city in 1893 and on April 1, 1974 became a Metropolitan District Council incorporating Stocksbridge and most of the Wortley Rural area, and retained city status.

Master Cutler (1988-89) of the Company of Cutlers in Hallamshire, G. A. Jowitt.

SOUTHAMPTON

SOUTHAMPTON is the leading British deep sea port on the Channel and is situated on one of the finest natural harbours in the world. The first Charter was granted by Henry II and Southampton was created a county of itself in 1447. In February, 1964, Her Majesty The Queen granted city status by Royal Charter. The city has an area of 12,071 acres excluding tidal waters.

There have been Roman and Saxon settlements on the site of the city, which has been an important port since the time of the Conquest due to its natural deep-water harbour. The oldest church is St. Michael's (1070) which has a black tournaï marble font and an unusually tall spire built in the 18th century as a landmark for navigators of Southampton Water. Other buildings and monuments within the city walls are the Tudor House, God's House Tower, Bargate Museum, the Tudor Merchants Hall, the Weighhouse, West Gate, King John's House, Long House, Wool House, the ruins of Holy Rood Church, St. Julien's Church and the Mayflower Memorial. The medieval town walls, built for artillery, are among the most complete in Europe. Public open spaces total over 1,000 acres in extent and comprise 9 per cent of the city's area. The Common covers an area of 328 acres in the central district of the city and is mostly natural parkland.

STOKE-ON-TRENT

STOKE-ON-TRENT (Staffordshire), familiarly known as The Potteries, stands on the River Trent 157 miles N. of London. The present municipal area is 22,916 acres (36 square miles) and the city is the main centre of employment for the population of North Staffordshire. It is the largest clayware producer in the world (china, earthenware, sanitary goods, refractories, bricks and tiles) and has a considerable coal mining output drawn from one of the richest coalfields in Western Europe. The city has steelworks, foundries, chemical works, engineering plants, rubber works, paper mills, and a very wide range of manufactures. Extensive reconstruction has been carried on in recent years.

The City was formed by the federation in 1910 of the separate municipal authorities of Tunstall, Burslem, Hanley, Stoke-upon-Trent, Fenton, and Longton, all of which are now combined in the present City of Stoke-on-Trent.

WINCHESTER

WINCHESTER, the ancient capital of England, is situated on the River Itchen 65 miles S.W. of London and 12 miles N. of Southampton. Since local government reorganization in 1974, the style of City has been accorded to the whole of the new district of Winchester, which embraces an area of 162,921 acres of mid-Hampshire.

Winchester is rich in architecture of all types but the Cathedral takes pride of place. The longest Gothic cathedral in the world, it was built in 1079-93 and exhibits examples of Norman, Early English and Perpendicular styles. Winchester College, founded in 1382, is one of the most famous public schools, the original building (of 1393) remaining unaltered. St. Cross Hospital, another great medieval foundation, lies 1 mile south of the city. The Almshouses were founded in 1136 by Bishop Henry de Blois, and Cardinal Henry Beaufort added a new Alms House of "Noble Poverty" in 1446. The Chapel and dwellings are of great architectural interest, and visitors may still receive the "Wayfarer's Dole" of bread and ale.

Recent excavations have done much to clarify the origins and development of Winchester. Part of the forum and several of the streets of the Roman town have been discovered; and excavations in the Cathedral Close have uncovered the entire site of the Anglo-Saxon cathedral (known as the Old Minster) and parts of the New Minster, built by Alfred's son Edward the Elder, and the burial place of the Alfredian dynasty. The original burial place of St. Swithun, before his remains were translated to a site in the present cathedral, was also uncovered.

Excavations in other parts of the City have thrown much light on Norman Winchester, notably on the site of the Royal Castle, adjacent to which the new Law Courts have been built, and in the grounds of Wolvesey Castle, where the great house built by Bishops Giffard and Henry of Blois in the 12th century has been uncovered.

YORK

The City of YORK is a District in the County of North Yorkshire, and is an archiepiscopal seat.

The recorded history of York dates from A.D. 71, when the Roman Ninth Legion established a base under Petilius Cerialis which later became the fortress of *Eburacum*. In Anglo-Saxon times the city was the royal and ecclesiastical centre of Northumbria, and was captured by a Viking army in A.D. 866, after which it became the capital of the Viking kingdom of Jorvik. By the 14th century the city had become a great mercantile centre, chiefly owing to its control of the wool trade, and was used as the chief base against the Scots. Under the Tudors its fortunes declined, though Henry VIII made it the headquarters of the Council of the North. Recent excavations on many sites, including Coppergate, has greatly expanded knowledge of Roman, Viking and medieval urban life.

With its development as a railway centre in the 19th century the commercial life of York expanded. The principal industries are the manufacture of chocolate, railway coaches, scientific instruments, and sugar.

The City is rich in examples of architecture of all periods. The earliest church was built in A.D. 627 and in the 12th to the 15th centuries, the present Minster was built in a succession of styles. Other examples within the city are the medieval city walls and gateways, churches and guildhalls. Domestic architecture includes the Georgian mansions of The Mount, Micklegate and Bootham. Its museums include the Castle Museum, the National Railway Museum and the Jorvik Viking Centre.

THE CORPORATION OF LONDON

The City of London is the historic centre at the heart of London known as "the square mile" around which the vast metropolis has grown over the centuries. The City's residential population is 5,300 (1981 Census). The civic government is carried on by the Corporation of London through the Court of Common Council, a body consisting of the Lord Mayor, 24 other Aldermen and 132 Common Councilmen. The legal title of the Corporation is "the Mayor and Commonalty and Citizens of the City of London."

The City is the financial and business centre of London and includes the head offices of the principal banks, insurance companies and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall and the 15th century Guildhall, to the massive splendour of St. Paul's Cathedral and the architectural beauty of Wren's spires.

The City of London was described by Tacitus in 62 A.D. as "a busy emporium for trade and traders". Under the Romans it became an important administration centre and hub of the road system. Little is known of London in Saxon times when it formed part of the kingdom of the East Saxons. In 886 Alfred recovered London from the Danes and reconstituted it a burgh under his son-in-law. In 1066 the citizens submitted to William the Conqueror who in 1067 granted them a charter, which is still preserved, establishing them in the rights and privileges they had hitherto enjoyed.

The *Mayoralty* was established on the recognition of the corporate unity of the citizens by Prince John in 1191, the first Mayor being Henry Fitz Ailwyn who filled the office for 21 years and was succeeded by Fitz Alan (1212-14). A new charter was granted by King John in 1215, directing the Mayor to be chosen annually, which has ever since been done, though in early times the — individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, 1397, 1398, 1406, 1419); and many modern cases have occurred. The earliest instance of the phrase "Lord Mayor" in English is in 1414. It was used more generally in the latter part of the 15th century and became invariable from 1535 onwards. At Michaelmas the Liverymen in Common Hall choose two Aldermen who have served the office of Sheriff for presentation to the Court of Aldermen, and one is chosen to be Lord Mayor for the ensuing mayoral year.

Lord Mayor's Day.—The Lord Mayor of London was previously elected on the feast of St Simon and St Jude (Oct. 28), and from the time of Edward I, at least, was presented to the King or to the Barons of the Exchequer on the following day, except that day be ■ Sunday. The day of election was altered to Oct. 16 in 1346, and after some further changes was fixed for Michaelmas Day in 1546, but the ceremonies of admittance and swearing-in of the Lord Mayor continued to take place on Oct. 28 and 29 respectively until 1751. In 1752, at the reform of the Calendar (see

page 114), the Lord Mayor was continued in office until Nov. 8, the "New Style" equivalent of Oct. 28. The Lord Mayor is now presented to the Lord Chief Justice at the Royal Courts of Justice on the second Saturday in November to make the final declaration of office, having been sworn in at Guildhall on the preceding day. The procession to the Royal Courts of Justice is popularly known — the *Lord Mayor's Show*.

Aldermen are mentioned in the 11th century and their office is of Saxon origin. They were elected annually between 1377 and 1394, when an Act of Parliament of Richard II directed them to be chosen for life. The *Common Council*, elected annually on the first Friday in December, was, at an early date, substituted for a popular assembly called the *Folk-mote*. At first only two representatives were sent from each ward, but the number has since been greatly increased.

Sheriffs were Saxon officers: their predecessors were the *wic-reeves* and *portreeves* of London and Middlesex. At first they were officers of the Crown, and were named by the Barons of the Exchequer; but Henry I (in 1132) gave the citizens permission to choose their own Sheriffs, and the annual election of Sheriffs became fully operative under King John's charter of 1199. The citizens lost this privilege, as far as the election of Sheriff of Middlesex was concerned, by the Local Government Act, 1888; but the Liverymen continue, as heretofore, to choose two Sheriffs of the City of London, who are appointed on Midsummer Day, and take office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The office of Chamberlain is an ancient one, the first contemporary record of which is 1237. The Town Clerk (or Common Clerk) is mentioned in 1274 and the Common Serjeant in 1291.

Activities.—The work is assigned to a number of committees which present reports to the Court of Common Council. These Committees are:—City Lands and Bridge House Estates, Policy and Resources, Coal, Corn and Rates Finance, Planning and Communications, Central Markets, Billingsgate and Leadenhall Markets, Spitalfields Market, Police, Port and City of London Health and Social Services, Library (Library, Records, Art Gallery), Boards of Governors of Schools, Music (Guildhall School of Music and Drama), Establishment, Housing, Gresham (City side), Hampstead Heath Management, Epping Forest and Open Spaces, West Ham Park, Privileges, Barbican Residential and Barbican Centre (Barbican Arts and Conference Centre).

The Honourable the *Irish Society*, which manages the Corporation's Estates in Ulster, consists of a Governor and 5 other Aldermen, the Recorder, and 19 Common Councilmen, of whom one is elected Deputy Governor.

The *City's Estate*, in the possession of which the Corporation of London differs from other municipalities, is managed by the City Lands and Bridge House Estates Committee, the Chairmanship of which carries with it the title of "Chief Commoner."

The Right Honourable the Lord Mayor 1988-1989*

Sir Christopher Collett, G.B.E., born 1931; Alderman of Broad Street, 1979; Sheriff of London, 1985; Lord Mayor, 1988.

Secretary, Rear-Admiral A. J. Cooke, C.B.

Recorder, Sir James Miskin, Q.C., 1975; Chamberlain, Bernard Peter Harty, 1983; Town Clerk, Geoffrey William Rowley, C.B.E., 1982; Common Serjeant, Thomas Herbert Pigott, Q.C., 1984.

* The Lord Mayor for 1989-90 was elected on Michaelmas Day (See "Occurrences During Printing").

GREATER LONDON SERVICES

The abolition of the Greater London Council on April 1, 1986, led to the bulk of its work being passed to the London Boroughs, Government Departments and Government-appointed bodies, and to joint boards and committees.

The London Residuary Body (L.R.B.) was established by the Local Government Act, 1985, which abolished the G.L.C. Its brief was to wind up the affairs of the G.L.C. within a maximum life of five years. Its tasks have fallen mainly in three areas:

(i) to clear up functions of the G.L.C. which have not been transferred to other successor bodies. These include debt management, the preparation of the final accounts of the G.L.C., and payment of compensation to former G.L.C. staff made redundant. These responsibilities have now been completely discharged.

(ii) to dispose of former G.L.C. properties, other than those passing to other successor bodies.

(iii) to manage former G.L.C. services until new homes have been found for them.

Properties.—One of the L.R.B.'s major duties is the sale of ex-G.L.C. buildings and properties, the proceeds being distributed among the London Boroughs. Management of mortgages granted by the G.L.C. was transferred to the London Borough of Richmond upon Thames.

Most of the L.R.B.'s work on selling former G.L.C. property and finding homes for former G.L.C. responsibilities has been completed with a year to spare of its five-year life span.

Recreation, Parks, etc.—The arts facilities on the South Bank have been transferred to the South Bank Board and the Arts Council. Responsibility for historic buildings, parks, open spaces, etc. has passed to Borough Councils or bodies such as English Heritage.

Land Drainage and Flood Prevention.—This is now the responsibility of the Borough Councils and the Thames Water Authority.

Extension of L.R.B.'s Life.—With the announcement by the Government of its intention to abolish the Inner London Education Authority, the London Residuary Body has been given the task of dealing with residual ILEA affairs as it dealt with the G.L.C. This will prolong the life of the L.R.B. for three years beyond ILEA's abolition, until March 31, 1993.

Finance.—The boroughs and successor bodies finance the L.R.B. In Feb. 1989 the budget was £135,000,000; the reduction from the previous year's £199,000,000 reflects the transfer of services to the boroughs and other bodies as the L.R.B. winds down its former G.L.C. work. More than £500 million has been distributed amongst the boroughs.

LONDON RESIDUARY BODY, St. Vincent House, 30 Orange Street, WC2H 7HH. (01-633 5000).

Chairman, Sir Godfrey Taylor.
Director of Administration, J. Howes.
Director of Finance, P. Scales.

Education

The local education authority for an area corresponding with the area of the twelve inner London boroughs and the City of London is the Inner London Education Authority which took over responsibility for the education service from the G.L.C. on April 1, 1986. The first elections of the 58 members took place on May 8, 1986. The 20 outer London Borough Councils remain the education authorities for their Boroughs.

The total number of pupils on the rolls of the Authority's nursery, primary and secondary schools (including special schools for handicapped children) was 270,062. There are 946 schools, staffed by the equivalent of 18,647 full-time teachers. Vocational instruction, cultural studies and recreational activities for persons over compulsory school age are arranged at the various establishments for further education. Part-time classes are offered at 20 adult education and literary institutes, and 78 youth centres, including 2 drama centres.

The ILEA is to be abolished in April 1990, when responsibility for education in the inner London boroughs will pass to the Borough and City Councils (see *Education Directory*).

ILEA, County Hall, SE1 7PB (01-633 5000).

Transport

The G.L.C.'s responsibility, through the London Transport Executive, for transport services in London was transferred in June 1984 to the London Regional Transport board (see p. 338), which is responsible to the Secretary of State for Transport. Former G.L.C. responsibilities, including the maintenance of the Thames bridges, ferries and tunnels, have been passed to the Borough Councils and to the Department of Transport. Other services which have been transferred include traffic control (to the Secretary of State for Transport) and work on the North-South route.

Solid waste disposal

Responsibility for the disposal of London's household, commercial and civic amenity refuse lies with 16 Waste Disposal Authorities.

There are four statutory bodies—*West London Waste Authority* (Brent, Ealing, Harrow, Hillingdon, Hounslow, Richmond upon Thames), *North London Waste Authority* (Barnet, Camden, Enfield, Hackney, Haringey, Islington, Waltham Forest), *East London Waste Authority* (Barking and Dagenham, Havering, Newham, Redbridge) and *Western Riverside Waste Authority* (Hammersmith and Fulham, Kensington and Chelsea, Lambeth, Wandsworth).

Twelve boroughs are Waste Disposal Authorities in their own right and eleven of them have come together in voluntary groupings—*Central London Group* (City of London, City of Westminster, Tower Hamlets), *South London Group* (Bromley, Croydon, Kingston upon Thames, Merton, Sutton) and *South East London Group* (Greenwich, Lewisham, Southwark). The twelfth, Bexley, liaises with Kent County Council.

The London Waste Regulation Authority regulates and controls waste management activities in both the public and private sectors.

LONDON WASTE REGULATION AUTHORITY, County Hall, SE1 7PB (01-633 4149).

Fire Services

The authority for London's fire service is the London Fire and Civil Defence Authority (L.F.C.D.A.). The Fire Brigade is organized into five Area Commands, which coincide with Borough boundaries. The L.F.C.D.A.'s responsibilities also include petroleum licensing.

LONDON FIRE AND CIVIL DEFENCE AUTHORITY, London Fire Brigade Headquarters, 8 Albert Embankment, SE1 7SD (01-582 3811).

LONDON AND ITS ENVIRONS

(For National Art Galleries and Museums in London, see Index.)

Adelphi, Strand, WC2.—Adelphi Terrace and district commemorate the four Adam brothers, James, John, Robert and William, who laid out the district (formerly Durham House) at the close of the 18th century, though few 18th century buildings now remain. Four of the streets were formerly called after the brothers but are now Adam Street, John Adam Street, Robert Street and Durham House Street. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens), the commemorative streets being Charles Street, Villiers Street, Duke Street, Buckingham Street.

Alexandra Palace and Park, Wood Green, N22 4AY.—Set in 200 acres of parkland. The Victorian Palace was severely damaged by fire in 1980 but has been restored and developed and reopened in January 1988. Alexandra Palace provides modern facilities for exhibitions, sports, conferences and leisure activities. The Palace is a charitable trust administered by the London Borough of Haringey.

Baltic Exchange, St. Mary Axe, EC3.—The world market for the chartering of cargo ships. The present Exchange was built in 1903 and the new wing opened by H.M. The Queen on Nov. 21, 1956.

Bank of England, Threadneedle Street, EC2. (Not open to the public)—The Bank of England, founded in 1694, has always been closely connected with the Government. The present building, completed in 1940 to the designs of Sir Herbert Baker, incorporates features reminiscent of the earlier architects, Sampson (1734), Sir Robert Taylor (1765) and Sir John Soane (1788).

Bank of England Museum (entrance in Bartholomew Lane).—The Museum charts the Bank's history since the granting of the Royal Charter in 1694. Open Mon.-Sat. and public holidays 10-6, Sun. 2-6. Admission free.

Banqueting House, Whitehall, SW1P 3EB.—The only important building left of the great Palace of Whitehall. The previous banqueting house was burnt down in 1619, and replaced by the present structure designed by Inigo Jones. In 1635 it was enriched with Rubens' ceiling paintings. Charles I was executed on a scaffold set up just in front of the present entrance. Open Tues.-Sat. 10-5, Sun. 2-5. Closed Mon. Admission (1989) £1.60, concessions £1.20.

Barbican Centre, Silk Street, EC2Y 8DS.—Owned, funded and managed by the Corporation of London, the Barbican Centre was opened on March 3, 1982 by H.M. The Queen, and is the largest complex of its kind in Western Europe. It houses the 1,166 seat Barbican Theatre, now the London base of the Royal Shakespeare Company, along with a smaller 200 seat studio theatre (The Pit), and the 2,026 seat Barbican Hall, the home of the London Symphony Orchestra. There are also three cinemas, an art gallery, a sculpture court, a large lending library, facilities for trade exhibitions and conferences, and bars and restaurants.

Blackheath, SE10.—272 acres of parkland. Morden College, founded in 1695 as a home for "decayed Turkey merchants", is near the S.E. corner. The building was designed by Wren and its Chapel doors have carvings attributed to Grinling Gibbons. Concerts and poetry recitals are held at Rangers House, a villa built c. 1700 which houses the Suffolk collection of English portraits from Larkin to Lely, and the Dolmetsch Collection of musical instruments. Open daily 10-5 (Nov.-Jan. 10-4). Closed Good Friday, Dec. 24, 25. Admission free.

Bridges.—The bridges over the Thames (from East to West) are: *Tower Bridge* (built by the Corporation of London and opened in 1894), with its bascules, operated now by new electrically-run machinery, walkway, opened to the public in 1982, and museum, opened in 1983; *London Bridge* (opened after rebuilding in 1831 by Rennie; the new London Bridge was completed in 1973 and opened by H.M. The Queen on March 16, 1973); *Southwark Bridge* (opened in 1819, also by Rennie; rebuilt by the Corporation of London, 1922); *Blackfriars Bridge* (opened in 1769, rebuilt, 1869, and widened by the Corporation of London in 1909); *Waterloo Bridge* (Rennie), opened in 1817, commanding a fine view of western London, rebuilt by L.C.C. and reopened 1944; *Hungerford Bridge*, 1863 (railway bridge with a footbridge); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet; rebuilt and re-opened in 1862; width, 84 ft.) with Thomas Thornycroft's *Boadicea* at the north-eastern end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall and St. Thomas' Hospital; *Lambeth Bridge* (built 1862, rebuilt 1932) leading from Lambeth Palace to Millbank; *Vauxhall Bridge* (built in 1811-16, rebuilt in 1906), leading to Kennington Oval; *Chelsea Bridge*, leading from Chelsea Hospital to Battersea Park (reconstructed and widened, 1937) and *Albert Bridge* (1873); *Battersea Bridge* (opened in 1890); *Wandsworth Bridge* (opened in 1873; rebuilt and re-opened in 1940); *Putney Bridge* (built 1729, rebuilt 1884, widened in 1933), where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammersmith Bridge* (rebuilt 1887); *Barnes Bridge* (for pedestrians only, 1933); *Chiswick Bridge* (opened in 1933); *King Edward VII Bridge*, Kew (rebuilt in 1902, opened 1903), leading to the Royal Botanic Gardens, Kew; *Twickenham Lock Bridge*; *Twickenham Bridge* (opened 1933); *Richmond Bridge* (opened in 1777); *Kingston Bridge* (built 1828 and widened 1914) and *Hampton Court Bridge* (rebuilt, 1933).

Buckingham Palace, SW1A 1AA. (Not open to the public).—Purchased by King George III in 1762 from the heir of the Duke of Buckingham, the Palace has been the London home of the Sovereign since Queen Victoria's accession in 1837. It was altered by Nash for King George IV, and refronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

The Queen's Gallery, containing a changing selection of the finest pictures and works of art from all parts of the royal collection, was opened to the public on July 25, 1962. Open Tues.-Sat. and Bank Holidays 10.30-5, Sun. 2-5. Admission charges are payable, entering from Buckingham Palace Road.

The Royal Mews is open to visitors on Wed. and Thurs. throughout the year (except in Ascot Week), 2-4. Admission charges, the net proceeds of which are devoted to charities, are payable at the entrance.

Canada House, Trafalgar Square, SW1.—Designed by Sir Robert Smirke and built in 1824-7, it underwent major alterations to incorporate the former Royal College of Physicians building, also by Smirke, between 1964-67. Certain interior features of the original building, now housing the Canadian High Commission, are preserved, including the spacious, richly furnished room now occupied by the High Commissioner.

Canary Wharf Tower, N1.—The largest remaining part of a 16th century house originally built by the Priors of St. Bartholomew, and since 1952 used as the headquarters of a non-professional theatre company.

Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen nearby.

Catholic Central Library, St. Francis Friary, 47 Francis Street, SW1P 1QR.—Founded as a private library in 1914, it was taken over in 1959 by the Franciscan Friars of the Atonement. It is an up-to-date lending and research library of over 55,000 volumes and 150 periodicals, for the general reader, student and ecumenist. Books are sent by post when required. Open Mon.-Fri. 10-5, Sat. 10-1.30.

Cemeteries.—In *Kensal Green Cemetery*, North Kensington, W10 (70 acres), are tombs of Thackeray, Trollope, Sydney Smith, Wilkie Collins, Tom Hood, George Cruikshank, John Leech, Leigh Hunt, I. K. Brunel and Charles Kemble (actor). In *Highgate Cemetery*, N6, are the tombs of George Eliot, Herbert Spencer, Faraday and Marx. In *Abney Park Cemetery*, Stoke Newington, N16, the tomb of General Booth, founder of the Salvation Army, and memorials to many Nonconformist Divines are to be found. In the *South Metropolitan Cemetery*, Norwood, SE27, are the tombs of Sir Henry Bessemer, Sir Hiram Maxim, Mrs. Beeton, Sir Henry Tate and Joseph Whitaker, F.S.A. (*Whitaker's Almanack*). In the churchyard of the former *Marylebone Chapel* are buried Charles Wesley and his son Samuel Wesley (musician). The chapel itself was demolished in 1949.

Crematoria.—*Iford* (City of London); *Norwood*; *Hendon*; *Streatham Park*; *Finchley* (St. Marylebone) and *Golders Green* (12 acres), near Hampstead Heath, with "Garden of Rest" and memorials to famous men and women.

Cenotaph, Whitehall, SW1.—(Literally "empty tomb".) Monument erected "To the Glorious Dead", as a memorial to all ranks of the Sea, Land and Air Forces who gave their lives in the service of the Empire during the First World War. Designed by Sir Edwin Lutyens. Erected as a temporary memorial in 1919 and replaced by a permanent structure in 1920. Unveiled by King George V on Armistice Day, 1920. An additional inscription was added after the 1939-45 War to commemorate those who gave their lives in that conflict.

Charterhouse, Sutton's Hospital, Charterhouse Square, EC1M 6AN.—A Carthusian monastery from 1371-1537, when it came into the possession of Sir Edward (later first Lord) North, who sold it in 1565 to the fourth Duke of Norfolk. After Norfolk's execution in 1572 following the Ridolfi Plot (hatched at Charterhouse), it was eventually granted by Queen Elizabeth I in 1587 to Norfolk's second son, Thomas Howard, later Earl of Suffolk. In 1611 he sold it to Thomas Sutton, who endowed it as a Hospital for aged men "of gentle birth" and a school for poor scholars (removed to Godalming in 1872). The buildings are partly 15th but mainly 16th and 17th century. Parts of the building were damaged by enemy action in 1941 but have been largely restored and now accommodate some 30 pensioners. Roger Williams, founder and governor of Rhode Island, was a scholar on the foundation. Among other famous pupils were John Wesley, Lord Baden-Powell, the poets and writers Crashaw, Lovelace and Thackeray, and more recently Lord Beveridge. Visitors are shown round on Wednesdays at 2.15 (April-July). Admission £1.50.

Master, E. E. Harrison, F.S.A.

Registrar and Clerk to the Governors, Lt.-Col. I. Macdonald.

Chelsea Physic Garden, 66 Royal Hospital Road, SW3 4HS.—A garden of general botanical research, maintaining a wide range of rare and unusual plants. The garden was established in 1673 by the Society of

Apothecaries. Open on Wed. and Sun. p.m. during summer months. All enquiries to the Curator at above address.

City Business Library (Corporation of London), 106 Fenchurch Street, EC3M 5JB. Open Mon.-Fri. 9.30-5.00.

College of Arms or Heralds' College, Queen Victoria Street, EC4V 4BT.—Her Majesty's Officers of Arms (Kings, Heralds and Pursuivants of Arms) were first incorporated by Richard III, and granted Derby House on the site of the present College building by Philip and Mary. The building now in use dates from 1671-88. The powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to State ceremonial are largely exercised through the College, which is also the official repository of English pedigrees and all Arms granted to subjects of the Queen (except in Scotland and (since 1988) Canada). Enquiry may be made to the Officer on duty in the Public Office, Mon.-Fri. 10-4.

The *Heralds Museum* at the Tower of London (admission charge included in the Tower's own charge) aims to explain what heraldry is about and traces its development over the centuries to its application and use in modern times. Open April-Sept.

Commonwealth Institute, Kensington High Street, W8 6NQ.—A cultural and educational centre opened on Nov. 6, 1962, by Her Majesty The Queen, replacing the former Imperial Institute opened in 1893 in S. Kensington. A distinctive feature of the building is its paraboloid copper-sheathed roof. The Institute contains, in 60,000 square feet arranged in three floors of circular galleries, a visual representation of the history, geography and ways of life of the Commonwealth countries and dependencies, well as educational resource, information and conference centres, and a restaurant and craft/bookshop.

Open Mon.-Sat. 10-5, Sun. 2-5. Admission free. Closed Christmas Eve, Christmas Day, Boxing Day, New Year's Day, Good Friday and May Day.

County Hall, Westminster Bridge, SE1.—Formerly the headquarters of the Greater London Council, built on the Pedlar's Acre, Bishop's Acre, Four Acres and Float Mead, Lambeth, from the designs of Ralph Knott, with a river façade of 750 ft. The main building was completed in 1933. The North and South blocks were occupied in 1939 but not finally completed until 1963.

Courtauld Institute Galleries, University of London, Woburn Square, WC1.—The galleries of the University of London contain the Lee collection and the Gambier-Parry collections (14th century to 18th century old masters); the important Courtauld collection of Impressionist and Post-Impressionist paintings; the Roger Fry collection and the Witt and Spooner collections (old master drawings and English water-colours). A major new bequest, the Princes Gate collection of old master paintings and drawings, was opened to the public in July 1981. The Galleries will be moving to Somerset House in January 1990. Open weekdays 10-5, Sun. 2-5. Admission £1.50, concessions 50p.

Custom House, Lower Thames Street, EC3.—Built 1813-17, with a wide quay on the Thames. The Long Room is about 190 ft. long.

Design Museum, Butlers Wharf, SE1 2YD.—Comprising a study collection, temporary exhibitions, a review of new products, a library and a lecture theatre, the Museum attempts to increase the understanding of design by explaining how mass-produced consumer objects work and why they look as they do.

Open Tues.-Sun. and Bank Hols. 11.30-6.30. Admission £2, concessions £1.

Downing Street.—Number 10 Downing Street, SW1, is the official town residence of the Prime Minister, No. 11 of the Chancellor of the Exchequer and No. 12 is the office of the Government Whips. The street was named after Sir George Downing, Bt., soldier and diplomatist, who was M.P. for Morpeth from 1660 to 1684.

Chequers, a Tudor mansion in the Chilterns, about three miles from Princes Risborough, was presented together with a maintenance endowment by Lord and Lady Lee of Fareham in 1917 to serve, from Jan. 1, 1921, as a country residence for the Prime Minister of the day, the Chequers estate of 700 acres being added to the gift by Lord Lee in 1921. The mansion contains a famous collection of Cromwellian portraits and relics.

Dulwich, SE21.—Contains *Dulwich College* (founded by Edward Alleyn in 1619) and the *Dulwich Picture Gallery*, built by Sir John Soane to house the collection bequeathed by the artist Sir Francis Bourgeois. The gallery was damaged in the Second World War but rebuilt with the aid of a grant from the Pilgrim Trust and reopened in 1953. *Dulwich Village* retains many of the rural characteristics of the pre-suburban period.

Eltham, SE9.—Contains remains of 13th-15th century *Eltham Palace*, the birthplace of John of Eltham (1316), son of Edward II. The hall, built by Edward IV, has a hammer-beam roof of chestnut. In the churchyard of St. John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship (Doggett's Coat and Badge).

Ely Place, Holborn Circus, EC1.—Previously the site of the London house of the Bishop of Ely, Ely Place is a private street (built in 1773) whose affairs are administered by Commissioners under a special Act of Parliament. The 14th century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk.

Fulham Palace, Bishop's Avenue, Fulham, SW6.—The courtyard is 16th century, the remainder 18th and 19th century. Former residence of the Bishop of London.

Geffrye Museum, Kingsland Road, E2 8EA.—The Museum is housed in a building erected originally as almshouses in 1713. The exhibits are displayed in a series of period rooms dating from 1600 to 1939, showing the development of decorative art and design. A display of woodworking tools focuses on furniture-making, and the museum has an interesting picture collection. Events and temporary exhibitions are held. Special arrangements exist for children visiting the Museum in school parties (which must be booked in advance) and in their leisure time. Open on Tues.-Sat. 10-5, Sun. 2-5. Closed on Christmas Eve, Christmas Day, Boxing Day and New Year's Day and on Mondays except Bank Holidays. Admission free.
Director, D. Rodgers.

George Inn, Borough High Street, SE1.—Near London Bridge Station. Given to the National Trust in 1937. Last galleried inn in London, built in 1677. Open during licensed hours.

Greenwich, SE10.—*Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II, largely from designs by John Webb, and by Queen Anne and William III, from designs by Wren. It stands on the site of an ancient royal palace, and of the more recent *Palace of Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke

of Gloucester (1391-1447), son of Henry IV. Henry VIII, Queen Mary I and Queen Elizabeth I were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI died there. In the principal quadrangle is a marble statue of George II by Rysbraeck. (For *National Maritime Museum*, see Index.) *Painted Hall* and *Chapel* closed until further notice. Visitors are also admitted to Sunday Service in the Chapel at 11 a.m., summer and winter, except during College vacations. *Greenwich Park* (1664 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II, from the designs of Le Nôtre. *The Queen's House*, begun in 1616, was designed for Anne of Denmark by Inigo Jones (closed for repairs until mid-1990). On hill in Greenwich Park is the former Royal Observatory (founded 1675). Part of its buildings at Greenwich have been taken over by the Maritime Museum and named *Flamsteed House*, after John Flamsteed (1646-1719), first Astronomer Royal. Astronomical and navigational equipment is exhibited, and the time ball and zero meridian of longitude can also be seen. The Parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1728, and restored after severe damage during the Second World War. General Wolfe and Thomas Tallis are buried in the church. Henry VIII was christened in the former church. *Charlton House* was built in the early 17th century (1607-1612) for Adam Newton, tutor to Prince Henry, brother to Charles I. It is largely in the Jacobean style of architecture. *Cutty Sark*, the last of the famous tea clippers, which has been preserved as a memorial to ships and men of a past era is fully restored and re-rigged, with a museum of sail on board. Open weekdays 11-5 (summer 11-6), Sundays and Boxing Day 2.30-5. The yacht *Gipsy Moth IV* in which Sir Francis Chichester sailed single-handed round the world, 1966-67, is preserved alongside the *Cutty Sark*.

Guildhall, Gresham Street, City, EC2.—Scene of civic government for the City for more than a thousand years. Built c. 1440; façade built 1788-9; damaged in the Great Fire, 1666, and by incendiary bombs, 1940. The main hall and crypt (the most extensive medieval crypt in London) have been restored. Events in Guildhall include the annual election of Lord Mayor, election of Sheriffs, receptions in honour of Sovereigns and Heads of State, and the meetings of the Court of Common Council (see "Corporation of London"). Open weekdays and Sun. (May to Sept.) 10-5. Admission free.

Keeper of the Guildhall, J. H. Lucioni.

The Guildhall (reference) Library and the Library and Museum of the Clockmakers' Company are housed in new premises. Library open Mon.-Sat. 9.30-5, Museum open Mon.-Fri. 9.30-4.45. Admission free (entrance in Aldermanbury). The Library contains Plans of London, 1570; Deed of Sale with Shakespeare's signature; first, second and fourth folios of Shakespeare's plays etc. (See also City Business Library.)

Hampton Court Palace, East Molesey, Surrey.—Sixteenth-century palace built by Cardinal Wolsey, with additions by Sir Christopher Wren for William and Mary. Beautiful gardens with maze and grape vine (planted in 1769). State Apartments and collection of pictures. Tennis Court, built by King Henry VIII in 1530. Collection of Mantegna paintings. Gardens open daily until dusk, Maze and Palace open mid March-mid Oct. daily 9.30-6, mid Oct.-March 9.30-4.30. Admission charge for Maze and Palace. Gardens free.

Holland Park, W8.—55 acres including open air theatre and concerts, floodlit gardens, King George VI Memorial Youth Hostel and a restaurant.

Honourable Artillery Company's Headquarters, City Road, EC1Y 2BQ.—The H.A.C. received its charter of incorporation from Henry VIII in 1537, and has occupied its present ground since 1641. The Armoury House dates from 1735. The present castellated barracks date from 1860. Four of its members who emigrated in the 17th century, founded in 1638 the Ancient and Honorable Artillery Company of Massachusetts. The H.A.C. is the senior regiment of the Territorial Army Volunteer Reserves, and maintains a Headquarters, four squadrons, a gun troop, and two companies of the Home Service Force.

Chief Exec., Capt. G. C. Lloyd, C.B.E., R.N.

Horniman Museum and Library, London Road, Forest Hill, SE23 3PQ.—The Museum was presented in 1901 to the London County Council by the founder, Mr. F. J. Horniman, M.P. With the adjoining Gardens, it is now an independent charitable trust. The Museum has three main departments: ethnography, musical instruments and natural history. In the ethnography department the large collections include exhibits illustrating man's progress in the arts and crafts from prehistoric times. The natural history department includes an aquarium. Reference library (except Mondays). Education Service (adults and schoolchildren). Free concerts and lectures (autumn and spring). Special exhibitions. Open Mon.-Sat. 10.30-6, Sun. 2-6. Admission free.

Director, D. M. Boston, O.B.E.

Horse Guards, Whitehall, SW1.—Archway and offices built about 1753. The mounting of the guard (Life Guards, or the Blues and Royals) at 11 a.m. (10 a.m. on Sundays) and the dismounted inspection at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into *Horse Guard's Parade* (230,000 sq. ft.), where the Colour is "trooped" on the Queen's Official Birthday.

The Houses of Parliament, Westminster, SW1.—An ordinance issued in the reign of Richard II stated that "Parliament shall be holden or kepid where soever it pleaseeth the King" and at the present day the Sovereign summons Parliament to meet and prescribes the time and place of meeting. The royal palace of Westminster, originally built by Edward the Confessor (Westminster Hall (*q.v.*) being added by William Rufus), was the normal place of Parliament from about 1340. St. Stephen's Chapel was used from about 1550 for the meetings of the House of Commons, which had previously been held in the Chapter House or Refectory of Westminster Abbey. The House of Lords met in an apartment of the royal palace.

The fire of 1834 destroyed much of the palace and the present Houses of Parliament were erected on the site from the designs of Sir Charles Barry and Augustus Welby Pugin between 1840 and 1867. The Chamber of the House of Commons was destroyed by enemy action in 1941 and a new Chamber designed by Sir Giles Gilbert Scott was used for the first time on Oct. 26, 1950.

The *Victoria Tower* of the House of Lords is about 330 ft. high, and when Parliament is sitting the Union Flag flies by day from its flagstaff. The *Clock Tower* of the House of Commons is about 320 ft. high and contains "Big Ben", the hour bell said to be named after Sir Benjamin Hall, First Commissioner of Works when the original bell was cast in 1856. This bell, which weighed 16 tons 11 cwt., was found to be cracked in 1857. The present bell (13½ tons) is a recasting of the original and was first brought into use in July 1859. The dials of the clock are 23 ft. in diameter, the hands being 9 ft. and 14 ft. long (including balance piece). A light is displayed from the Clock Tower at night when Parliament is sitting.

For security reasons tours of the Houses of

Parliament are available only to those who have made advance arrangements through a Member or Peer.

Admission to the Strangers' Gallery of the House of Lords is arranged by a Peer or by queue via St. Stephen's Entrance. Admission to the Strangers' Gallery of the House of Commons is by Members' order (Members' orders should be sought several weeks in advance), or by queue via St. Stephen's Entrance. Queues are usually shorter after 6 p.m., Mon.-Thurs. Overseas visitors may obtain cards of introduction from their Embassy or High Commission.

Inns of Court.—The *Inner and Middle Temple*, S. of Fleet Street, EC4, and N. of Victoria Embankment, to which the gardens extend, have occupied (since the early 14th century) the site of the buildings of the Order of Knights Templars. *Inner Temple Hall* (rebuilt in 1955 after bomb damage) is open Mon.-Fri. 10.30-11.30 and 3-4 on application to Treasurer's Office during law sittings. *Middle Temple Hall* (1562-70) is open when not in use, Mon.-Fri. 10-12 and 3-4, Sat. when staff are available. Closed on Public Holidays. In Middle Temple Gardens (not open to the public) Shakespeare (Henry VI, Part I) places the incident which led to the "Wars of the Roses" (1455-85).

Temple Church, EC4, was restored in 1958 after severe damage by bombing. The nave formed one of five remaining round churches in England (the others being at Cambridge, Northampton, Little Maplestead (Essex) and Ludlow Castle). Open weekdays 9.30-4. Services: 8.30 and 11.15 a.m. except in August and September. *Master of the Temple*, Rev. Canon J. Robinson.

Lincoln's Inn, from Chancery Lane to Lincoln's Inn Fields, WC2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. Records show the Society as being in existence in 1422. The Hall and Library Buildings are of 1845, although the Library is first mentioned in 1474, the old Hall early 16th century and the Chapel was rebuilt c. 1619-23. Halls open by appointment, Chapel and Gardens, Mon.-Fri. 12-2.30. Tours, weekdays mid March-mid Sept. 9.30-11.30, £2. Chapel services Sun. 11.30 a.m. during Law Terms. *Lincoln's Inn Fields* (7 acres). The Square, laid out by Inigo Jones, contains many fine old houses with handsome interiors.

Gray's Inn, Holborn/Gray's Inn Road, W.C.1. Early 14th century. Hall (1556-60). Chapel (largely rebuilt in 1698). Services 11.15 a.m. (during Law Dining Terms only.) Holy Communion 1st Sunday in every month except Aug.-Sept. Public welcome. Library (30,000 vols., mss. and printed books) may be viewed by appointment. Gardens open to the public May-Sept. 12-2.30. The Inn, although badly damaged during the last war, has been completely restored to its former beauty with gracious red brick buildings overlooking grass covered squares and gardens. Strong Elizabethan associations.

No other "Inns" are active, but what remains of *Staple Inn* is worth visiting as a relic of Elizabethan London; though heavy damage was done by a flying-bomb, it retains a picturesque gabled front on Holborn (opposite Gray's Inn Road). *Clement's Inn* (near St. Clement Danes' Church), *Clifford's Inn*, Fleet Street, and *Thavies Inn*, Holborn Circus, are all rebuilt. *Sergeant's Inn*, Fleet Street (damaged by bombing) and another (demolished 1910) of the same name in Chancery Lane, were composed of Sergeants-at-Law, the last of whom died in 1922.

Jewish Museum, Woburn House, Tavistock Square, WC1H 0EP.—Opened in 1932, the Museum contains a rich collection of ceremonial art, portraits and antiquities, illustrating Jewish life, history and

religion. Open Tues.-Thurs. and Sun. (and Fri. in summer) 10-4, Fri. in winter 10-12.45. Closed on Public and Jewish Holidays. Group visits by arrangement with Secretary.

Kensington Palace, W8 4PX.—The original house was bought by William III in 1689 and enlarged by Christopher Wren. The birthplace of Queen Victoria in 1819. The State Apartments contain pictures and furniture from the royal collections. A suite of rooms devoted to the memory of Queen Victoria is also shown. The *Court Dress Collection* is also open, and includes three restored rooms: the Red Saloon, the Teck Saloon and the room where Queen Victoria is said to have been born. Both open weekdays 9-5, Sun. 1-5. Admission £3, concessions £2; £1-50.

Kenwood, NW3 7JR.—Nearly 200 acres forming the northern part of Hampstead Heath. Open air symphony concerts each summer. The Iveagh Bequest, in an Adam villa, includes valuable paintings and furniture. Recitals and poetry readings in the Orangery. House open daily, except Good Friday and Dec. 24, 25. Times vary seasonally. Admission free.

Kew, Surrey.—A favourite home of the early Hanoverian monarchs. Kew House, the residence of Frederick, Prince of Wales, and later of his son, George III, was pulled down in 1803, but the earlier Dutch House, now known as Kew Palace, survives. It was built in 1631 and acquired by George III as an annexe to Kew House in 1781. The famous Kew Gardens (see Index) were originally laid out as a private garden for Kew House for George III's mother in 1759 and were much enlarged in the 19th century, notably by the inclusion of the grounds of the former Richmond Lodge.

Kneller Hall, Twickenham, TW2 7DU.—Royal Military School of Music. A band of up to 120 instrumentalists gives concerts in the grounds on Wednesdays throughout the summer, commencing at 8 p.m. Admission charge. Season tickets and party bookings available.

Lambeth Palace, SE1.—The official residence of the Archbishop of Canterbury, on the south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Chaplain.

Livery Companies' Halls.—The Principal Companies (see Index) have magnificent halls but admission to view them has generally to be arranged beforehand. The following are among the finest or more interesting. *Goldsmiths' Hall*, Foster Lane. The present hall was completed in 1835, and contains some magnificent rooms. Exhibitions of plate have been shown here periodically in recent years. *Fishmongers' Hall*, London Bridge (built 1831-3), now admirably restored after severe bomb damage, also contains fine rooms. *Apothecaries' Hall*, Black Friars Lane, was rebuilt in 1670, after the Great Fire, and has library, hall and kitchen which are good examples of this period, together with a pleasant courtyard. *Vintners' Hall*, Upper Thames Street, was also rebuilt after the Great Fire, and its hall has very fine late 17th century panelling. The Watermen and Lightermen's Company is not, strictly speaking, a Livery Company, but its *Hall*, in St. Mary-at-Hill, is a good example of a smaller 18th century building, with pilastered facade. It was completed in 1780. *Stationers' Hall*, in Stationers' Hall Court, behind Ludgate Hill, another post-fire Hall, standing in its own court, has a particularly finely carved screen; its facade dates from 1800. *Barbers' Hall*, Monkwell Street, with a Hall attributed to Inigo Jones, was completely destroyed by bombing, but has now been rebuilt. The new hall was built some 30 ft. from the old site to

enable one of the bastions and part of the wall of the Roman fort to remain exposed to view.

Lloyd's, Lime Street, EC3M 7HA.—Society of private underwriters which evolved during the 18th century from Lloyds Coffee House. Housed in the Royal Exchange for 150 years and in Leadenhall Street and Lime Street from 1928-1986. The present building was opened for business in May 1986, and houses the Lutine Bell. Underwriting is on four floors with a total area of 114,000 sq. ft. A visitors' gallery is open daily and incorporates an exhibition showing the history and operation of the insurance market at Lloyds.

London Planetarium, Marylebone Road, NW1 5LR.—Open daily (except Christmas Day), star shows 11-4.30. Admission charge.

London Transport Museum, Covent Garden, WC2E 7BB.—Housed in the former Flower Market, the Museum contains a collection of buses, trams, trolley-buses, trains, working displays and London Transport paraphernalia. There is a research library and lecture theatre. Open daily 10-6 (except Dec. 24, 25, 26). Admission £2-60, concessions £1-10.

Lord's Cricket Ground, St. John's Wood Road, NW8 8QN.—The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England (founded 1787), Lord's is the scene of some of the principal matches of the season and Middlesex County headquarters. Real tennis court and squash courts in building behind members' pavilion.

The Cricket Memorial Gallery, a museum of cricket, open on match days 10.30-5. Admission £1, concessions 50p. In winter and on non-match days admission is by prior arrangement with the Curator.

Madame Tussaud's Exhibition, Marylebone Road NW1 5LR.—Open daily (except Christmas Day) 10-5.30. Admission charge.

Mansion House, City, EC4.—(Built 1739-53, reconstructed 1930-31.) The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

Markets.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield (built 1866) (now moved) the largest meat market in the world and site of St. Bartholomew's Fair from 9th to 19th century; *Leadenhall Market* (meat and poultry), built 1881, part recently demolished; *Billingsgate* (fish), Thames Street, built 1875, part recently demolished, a market site for over 1,000 years (moved to the Isle of Dogs in Jan. 1982); *Spitalfields*, E1 (vegetables, fruit, etc.), enlarged 1928, and opened by Queen Mary; *London Fruit Exchange*, Brushfield Street, built by Corporation of London 1928-29, faces Spitalfields Market; *Covent Garden* (vegetables, fruit, flowers, etc.), (now moved to Nine Elms) established under a charter of Charles II, in 1661; *Borough Market*, SE1 (vegetables, fruit, flowers, etc.).

Marlborough House, Pall Mall, SW1A 2AF.—Built by Wren for the first Duke of Marlborough and completed in 1711, the house finally reverted to the Crown in 1835. Prince Leopold lived there until 1831, and Queen Adelaide from 1837 until her death in 1849. In 1863 it became the London house of the Prince of Wales and was the London home of Queen Mary until her death in 1953. The Queen's Chapel, Marlborough Gate, begun in 1623 from the designs of Inigo Jones for the Infanta Maria of Spain, and completed for Queen Henrietta Maria, is open to the public for services on Sundays at 8.30 a.m. and 11.15 a.m. between

Easter Day and end July (*see also* St. James's Palace for winter services in The Chapel Royal). In 1959 Marlborough House was given by the Queen as ■ centre for Commonwealth Government conferences and it was opened ■ such in March, 1962.

London Monument (commonly called "The Monument"), Monument Street, EC3.—Built from designs of Wren, 1671-77, to commemorate the Great Fire of London, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 120 ft. high (the moulded cylinder above the balcony supporting ■ flaming vase of gilt bronze is 42 ft. in addition), and is based on a square plinth 40 ft. high, with fine carvings on W. face (making a total height of 202 ft.). Splendid views of London from gallery at top of column (311 steps). Open April-Sept., Mon.-Fri. 9-6, Sat. and Sun. 2-6. Oct.-March, Mon.-Sat. 9-4. Closed Christmas Day, Boxing Day and Good Friday. Admission charge.

Percival David Foundation of Chinese Art, 53 Gordon Square, WC1H 0PD.—Set up in 1950, the Foundation contains the collection of Chinese ceramics formed by Sir Percival David and his important library of books on Chinese art. To these was added a gift from the Hon. Mountstuart Elphinstone of part of his collection of Chinese monochrome porcelains. The Foundation is administered on behalf of the University of London by the School of Oriental and African Studies. Galleries, Mon.-Fri. 10.30-5. Closed weekends and Bank Holidays. Library available to ticket holders only; applications in writing to the Curator, Miss R. Scott.

Port of London.—The Port of London covers the tidal portion of the River Thames from Teddington to the seaward limit (Tongue light vessel), a distance of 150 km. The governing body is the Port of London Authority (P.L.A.), whose Head Office is at Europe House, World Trade Centre, E1 9AA. The enclosed dock at Tilbury is wholly-owned by the P.L.A. and is 40 km. below London Bridge. The docks have a comprehensive range of modern cargo-handling facilities and perform every type of cargo-handling operation. Tilbury is principally used by vessels to and from Australia, North and South America, India, Middle and Far East, Scandinavia, U.S.S.R. and continental Europe.

Privately owned cargo-handling facilities along the River Thames are an important part of the Port of London, handling some 40 million tonnes of cargo ■ year, 60 per cent. of which is crude oil and refined products. The combination of P.L.A. and privately-owned facilities makes the Port of London the U.K.'s largest non-oil port.

Passenger vessels and cruise liners can be handled at moorings at Greenwich, near Tower Bridge and at Tilbury Passenger Landing Stage. The latter provides accommodation for liners at all states of the tide.

Prince Henry's Room, 17 Fleet Street, EC4.—Early 17th century timber-framed house containing fine room on first floor with panelling and moulded plaster ceiling. Includes an exhibition on Samuel Pepys and the London in which he lived. Open Mon.-Fri. 1.45-5, Sat. 1.45-4.30. Closed Christmas Day, Good Friday and Bank Holidays. Admission free. Available for morning or evening lettings on application to The Town Clerk, Guildhall, EC2.

Richmond, Surrey.—Contains the red brick gateway of *Richmond Palace* (Henry VII, 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the former home of Queen Mary's mother (the Duke of Windsor was born there, June 23, 1894), and now the home of the Royal Ballet School. The *Star and Garter* Home for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,469 acres) contains herds of fallow and red deer.

Roman London.—Although visible remains from this period are few, excavations carried out in the City on sites due for redevelopment often reveal Roman features. Sections of the City Wall are the most striking remains to be seen of Roman *Londinium*, although even these are largely medieval due to the Roman wall being rebuilt during the medieval period. Sections may be seen near the White Tower in the Tower of London; at Tower Hill; at Coopers' Row; at All Hallows, London Wall, its vestry being built on the remains of a semi-circular Roman bastion; at St. Alphege, London Wall, showing ■

striking succession of building repairs from Roman until the late medieval period, and at St. Giles, Cripplegate. Excavations in the Cripplegate area have revealed that a Roman fort was built there c. A.D.100-120. It was later incorporated into the city wall when this was built c. A.D.200.

The administrative centre of the Roman city was the great forum and basilica, more than 165 metres square, sections of which have been encountered during excavations in the area of Leadenhall, Gracechurch Street and Lombard Street. Excavations during the past few years have revealed Roman activity along the river. Traces of a massive riverside wall, built in the late Roman period, have been found and a succession of Roman timber quays have been excavated along Lower and Upper Thames Street helping to prove that Roman London was a thriving commercial centre.

Other major buildings found are the *Provincial Governor's Palace* in Cannon Street; remains of a bath-building, preserved in Lower Thames Street; and the *Temple of Mithras* in Walbrook. The fine sculptures from this temple are displayed in the Museum of London (see Index) where many other relics from the Roman City may be seen. There is also an Ordnance Survey map of Roman London.

Royal Albert Hall, Kensington Gore, SW7 2AP.—The elliptical hall, one of the largest in the world, was completed in 1871, and since 1941 has been the venue each summer for the Promenade Concerts founded in 1895 by Sir Henry Wood. Also used for public meetings, concerts, sports and other entertainments. Guided tours are available in the summer months.

Chief Exec., P. Deuchar.

Royal Exchange, EC3V 3LS.—Founded by Sir Thomas Gresham, 1566, opened as "The Bourse" and proclaimed "The Royal Exchange" by Queen Elizabeth I, 1571, rebuilt 1667-69 and 1842-44. The building is occupied by the Guardian Royal Exchange Assurance Group and by the London International Financial Futures Exchange. It is administered by the Gresham Committee.

Royal Opera House, Covent Garden, WC2E 7DD.—Home of The Royal Ballet (1931), The Royal Opera (1946) and Sadler's Wells Royal Ballet (1946) companies, the Royal Opera House is the third theatre to be built on the site, opening May 15, 1858: the first was opened Dec. 7, 1732. The season of the resident companies runs mid Sept.-Aug.

General Director, J. Isaacs.

Runnymede.—A meadow of about 100 acres, on the south bank of the Thames (part of the Crown Lands), between Windsor and Staines. From June 15 to 23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June

15, and were subsequently embodied in a charter, since known as *Magna Charta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Charta Island* (claimed as the actual site of the sealing), presented to the National Trust in 1930.

There is a memorial at *Cooper's Hill*, near Runnymede, to members of the Commonwealth air forces who lost their lives in the Second World War while serving from bases in the United Kingdom and north-western Europe and have no known grave. In May, 1965, a memorial was unveiled to President John F. Kennedy of the United States on ground nearby.

St. James's Palace, in Pall Mall, S.W.1.—(Closed to the public.) Built by Henry VIII; the Gatehouse and Presence Chamber remain, later alterations were made by Wren and Kent. The Chapel Royal is open for services on Sundays at 8.30 a.m. and 11.15 a.m. between beginning October and Good Friday (see also Marlborough House for summer services in The Queen's Chapel). Representatives of Foreign Powers are still accredited "to the Court of St. James's". *Clarence House* (1825) in the palace precinct is the home of H.M. The Queen Mother.

St. John's Gate, Clerkenwell, EC1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the entrance of the Priory of that Order, of which the gate house (early 16th century) and crypt of Church (12th century) alone survive. They may be inspected on application to the Curator.

St. Paul's Cathedral, EC4M 8AD.—Built 1675-1710, cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in the south-west tower weighs 17 tons. Organ by Father Smith (enlarged by Willis and rebuilt by Mander) in a case carved by Grinling Gibbons (who also carved the choir stalls). The choir and high altar were restored in 1958 after war damage and the North Transept in 1962. The American War Memorial Chapel was consecrated in November, 1958. The chapel of the Most Excellent Order of the British Empire in the Crypt of the Cathedral was dedicated in 1960. Nave and transepts free. The following parts open weekdays 10-4.15 (Sat. 11-4.15). Admission: Ambulatory, 60p; Crypt, Treasury and historical display, 80p; whispering gallery, stone gallery, £1 (Children reduced price).—Services: Sundays, 8, 10.30, 11.30 and 3.15. Weekdays, 7.30, 8, 12.30 and 5.

Sir John Soane's Museum, 13 Lincoln's Inn Fields, WC2A 3BP.—The house and galleries, built 1812-24, are the work of the founder, Sir John Soane (1753-1837) and contain his collections, arranged as he left them, in pursuance of an Act procured by him in 1833. Exhibits include the Sarcophagus of Seti 1 (c. 1290 B.C.), Classical vases and marbles, Hogarth's *Rake's Progress* and *Election* series, paintings by Canaletto, Reynolds, Turner, Lawrence, etc. Soane's library of 8,000 vols. and collection of 40,000 architectural drawings are available for study by appointment. Open Tues.-Sat. 10-5. Closed Bank Holidays. Tours must be booked in advance.

Curator, P. Thornton, F.S.A.

Assistant Curator, Mrs M. Richardson.

Somerset House, Strand, WC2, and Victoria Embankment, WC2.—The beautiful river facade (600 ft. long) was built in 1776-86 from the designs of Sir William Chambers; the eastern extension, which houses part of King's College, was built by Smirke in 1829. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until 1692.

South Bank, SE1.—The arts complex on the south bank of the River Thames includes the South Bank Centre, owned and managed by the South Bank Board, and consisting of the 2,903-seat *Royal Festival Hall* (opened in 1951 for the Festival of Britain), a major venue for concert and ballet seasons, with the adjacent 1,056-seat *Queen Elizabeth Hall* and 368-seat *Purcell Room*, accommodating smaller-scale performances.

The *National Film Theatre* (opened 1958), administered by the British Film Institute, has two auditoria showing films, television and video of outstanding historical, artistic or technical merit. The London Film Festival is held here every November.

The *National Theatre* opened in 1976 and stages classical, modern, new and neglected plays in its three auditoria: the 1,160-seat Olivier theatre (open stage), the 890-seat Lyttleton theatre (proscenium stage) and the experimental Cottesloe theatre (adaptable stage) which holds up to 400.

The *Museum of the Moving Image* charts the history of the moving image in cinema and television from the earliest devices through to disc technology. Open Tues.-Sat. 10-8, Sun. and Bank Holidays 10-6 (Oct.-May), 10-8 (June-Sept.). Admission £3.50, concessions £2.50.

Southwark Cathedral, SE1 9DA.—Mainly 13th century, but the nave is largely rebuilt. The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows in the north aisle: Shakespeare's effigy backed by a view of Southwark and the Globe Theatre in the south aisle; the altar screen (erected 1520) has been restored; the tomb of Bishop Andrews (died 1626) is near the screen. The Early English Lady Chapel (behind the choir), restored 1930, was the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner) and is still used as a Consistory Court. John Harvard, after whom Harvard University is named, was baptized here in 1607, and the Chapel by the North Choir Aisle is his memorial chapel. Open 7.30-6, admission free.—Services: Sundays, 11, 3. Weekdays, 12.30, 12.45, 5.30 (sung on Tuesdays and Fridays), Saturdays, 12 noon.

Stock Exchange, EC2.—The market floor of the new Stock Exchange building in London opened for trading in June, 1973. Since "Big Bang" in 1986, the floor has been used solely by the London Traded Options Market. A tower, 331 feet high, and the new Market replace the complex of buildings started in 1801 on the same site. The new building is the headquarters of The Stock Exchange, following the amalgamation of all the Stock Exchanges in Great Britain and Ireland on March 25, 1973.

The Visitors Gallery is open Mon.-Fri., 9.30-5. Admission free and without ticket. Film show, advance bookings are advisable via the Public Information Unit (01-588 2355).

Thames Embankments.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Sir Joseph William Bazalgette for the Metropolitan Board of Works, 1864-70 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Albert Embankment, on the S. side (from Westminster Bridge to Vauxhall), 1866-69; the Chelsea Embankment, 1871-74. The total cost exceeded £2,000,000. Bazalgette (1819-91) also inaugurated the London main drainage system, 1858-65. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames water-side improvements ("Flumini vincula posuit").

County Hall includes an embankment on the Surrey side.

Thames Flood Barrier.—Officially opened in May 1984, though first used in Feb. 1983, the Barrier consists of ten rising sector gates which span 570 yards from bank to bank of the Thames at Woolwich Reach. When not in use the gates lie horizontally, allowing shipping to navigate the river normally; when the Barrier is closed, the gates turn through 90 degrees to stand vertically more than 50 feet above the river bed. The Barrier took eight years to complete and can be raised within about 30 minutes.

Thames Tunnels.—The *Rotherhithe Tunnel*, constructed by the L.C.C. and opened in 1908, connects Commercial Road, E14, with Lower Road, Rotherhithe; the total length is 1 mile 332 yards, of which 474 yards are under the river. The cost of the tunnel and its approaches was £1,506,914. The first *Blackwall Tunnel* (pedestrians and vehicles) was constructed by the L.C.C. and opened in 1897, connecting East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The cost of the tunnel with its approaches was about £1,323,663. A second tunnel (for southbound vehicles only) was opened in August, 1967, at a cost of about £9,750,000 and the old tunnel was improved at a cost of about £1,350,000 and made one-way northbound. Both tunnels are for vehicles only. The relative lengths of the tunnels measured from East India Dock Road to the Gate House on the south side are 6,215 ft. (old tunnel) and 6,152 feet. *Greenwich Tunnel* (pedestrians only), constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (pedestrians only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E16, to High Street, Woolwich, SE18. The length of the subway is 552 yards, and its cost was about £86,000. The *Thames Tunnel* (1,300 feet) was opened in 1843 to connect Wapping with Rotherhithe. In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for pedestrians was opened in 1870, and has long been closed.

Tower Bridge Walkway and Museum, SE1 2UP.—Owned by the Bridge House Trust of the City of London and open daily April-Oct. 10-6.30, Nov.-March 10-4.45. Admission £2.50, concessions £1. Attractions include exhibitions, videos, the observation platform and walkway, engine rooms, working models and souvenir gift shop.

Tower Hill, EC1 and EC3.—was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

Tower of London, EC3.—Admission to ■ general view of the Tower, the White Tower (Armouries), the History, Oriental, Ordnance and 18th-19th century Galleries, and the Wall Walk Phases I and II.

The White Tower is the oldest and central building in Her Majesty's Royal Palace and Fortress of the Tower of London. It was built at the order of William I and constructed by Gundulph, Bishop of Rochester, in the years 1078-98. The Inner Wall, with thirteen towers, was constructed by Henry III in the 12th century. The Moat was extended and completed by Richard I and the Wharf first mentioned in 1228. The Outer Wall was completed in the reign of Edward I and now incorporates six towers and two bastions. The last Monarch to reside in the Tower of London was James I. The Crown Jewels came to the Tower in the reign of Henry III. All coinage used in Great

Britain was minted in the Outer Ward of the Tower of London until 1810 when the Royal Mint was formed. The Tower of London has had a military garrison since 1078. The Chapel Royal of St. John the Evangelist, within the White Tower (1080-1088) is the oldest Norman church in London. The chapel of St. Peter ad Vincula was built in the early 16th century.

Open weekdays March-Oct., 9.30-5, Nov.-Feb., 9.30-4; Sundays, March-Oct., 2-5. Tower closed Christmas Eve, Christmas Day, Boxing Day, New Year's Day and Good Friday. On Sundays throughout the year (except August) the public is admitted to Holy Communion, 9.15 a.m. and Morning Service, 11 a.m. Admission £4.80 (£3.50 when Jewel House closed for cleaning in Feb.); various concessions.

Constable, Field Marshal Sir Roland Gibbs, G.C.B., C.B.E., D.S.O., M.C.

Lieutenant, Lt.-Gen. Sir Derek Boorman, K.C.B.

Resident Governor and Keeper of the Jewel House, Maj.-Gen. C. Tyler, C.B.

Master of the Armouries, G. Wilson.

Chaplain at the Chapel Royal of St. Peter ad Vincula, Rev. N. A. Hood.

Waltham Abbey (or **Waltham Holy Cross**), Essex EN9 1UQ.—The Abbey ruins, Harold's Bridge (14th century), the Nave of the former cruciform Abbey Church c. 1120 and the traditional burial place of King Harold II (1066), and a Guild Chapel of Edward II, with crypt below, which houses a visitors centre with permanent exhibition. New evidence of four former churches on the site, and the shape of the east end of Harold's church, have been revealed in recent excavations. Lee Valley Regional Park Authority has a country centre in the Abbey grounds. At Waltham Cross, one mile from the Abbey, is one of the crosses (partly restored) erected by Edward I to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood near the spot now occupied by the statue of Charles I at Whitehall.)

Wellington Museum, Apsley House, 149 Piccadilly, at Hyde Park Corner, W1.—Known as "No. 1 London", Apsley House was designed by Robert Adam for Lord Bathurst and built 1771-78. It was bought in 1817 by the Duke of Wellington, who in 1828-29 employed Benjamin Wyatt to enlarge it, face it with Bath stone and add the Corinthian portico. The museum contains many fine paintings, sculptures, services of porcelain and silver plate and personal relics of the 1st Duke of Wellington (1769-1852). The House was given to the Nation by the 7th Duke and was first opened to the public in 1952, under the administration of the Victoria and Albert Museum. Open daily 11-5. Closed Mon., Christmas Eve, Christmas Day, Boxing Day and New Year's Day. Admission £2, concessions £1.

Westminster Abbey, SW1.—Built 1050-1745. Chapel of Henry VII, Chapter House and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings and queens (Henry III, Edward I, Edward III, Henry V, Mary Queen of Scots, Elizabeth I), and many other monuments and objects of interest, including the grave of "The Unknown Warrior" and Poets' Corner. The Coronation Chair encloses the "Stone of Scone", which was removed from Scotland by Edward I in 1296. Open on weekdays 9-6 (9-7.45 Wed.). Admission to the Royal Chapels, Poets' Corner, Quire and Statesmen's Aisle £2, concessions £1.50p. Last admission Mon.-Fri. 4 p.m., Sat. 5 p.m. Wed. 6-8 p.m. free. Nave open on Sundays between services.—Services: Sundays, 8, 10, 11.15, 3, 6.30 (generally preceded by an organ recital). Monday-

Friday, 7.30, 8, 12.30 (Wednesdays, Lunch-hour Service), 5. Saturdays, 8, 9.20, 3.

Westminster Cathedral, Ashley Place, SW1P 1QW.—Built 1895-1903 from the designs of J. F. Bentley. The campanile is 283 feet high. Cathedral open 6.45 a.m.-8 p.m.—Masses: Sundays, 7, 8, 9, 10.30 (sung), 12, 5.30 and 7; Solemn Vespers and Benediction 3.30. Monday-Friday, 7, 8, 8.30, 9, 10.30, 12.30, 1.05 and 5.30 (sung). Holy days of obligation, Low Masses 7, 8, 8.30, 9, 10.30, 12.30, 1.05, 5.30 (sung) and 7.

Westminster Hall, SW1A 0AA.—The only part of the old Palace of Westminster to survive the fire of 1834, Westminster Hall is adjacent to and incorporated in the Houses of Parliament. Westminster Hall was built by William Rufus from 1097-99 and altered by Richard II, 1394-99. It is about 240 ft. long, 68 ft. wide and 92 ft. high; the hammerbeam roof of carved oak dates from 1396-98. The Hall was the scene of the trial of Charles I. Westminster Hall is included on the route followed by those who have arranged a visit to the Houses of Parliament with their M.P.

Whitechapel Art Gallery, Whitechapel High Street, E1 7QX.—Opened in 1901; administered by a charitable trust. There is no permanent collection; temporary exhibitions, mainly of modern art, are presented, and community and educational projects are run. Open Tues.-Sun. 11-5; Wed. 11-8.

Wimbledon Lawn Tennis Museum, SW19 5AE.—Exhibits include fashion, trophies, replicas and memorabilia representing the history of lawn tennis. A theatre shows films of great matches. Open Tues.-Sat. 11-5, Sun. 2-5. Admission £1.50, concessions 75p.

Windsor Castle (begun by William the Conqueror, A.D. 1066-87).—The Castle Precincts are open daily. Admission free. The State Apartments of Windsor Castle are open on a regular basis throughout the year. Admission £2, concessions £1. *Queen Mary's Doll's House*, the *Exhibition of Master Drawings* and the *Exhibition of The Queen's Presents and Royal Carriages* can be seen on the same days as the State Apartments; admission £1, concessions 50p. When the State Apartments are closed, the other exhibitions remain open to the public. The *Albert Memorial Chapel* is open throughout the year (closed on Sundays). Admission free. A fee is charged to visit *St. George's Chapel*.

The **Royal Mausoleum**, Frogmore Gardens, Home Park, is open annually on two days in early May in conjunction with the opening of Frogmore Gardens in aid of the National Garden Scheme. Also open on the Wednesday nearest to May 24 (Queen Victoria's birthday). Admission free.

Zoological Gardens, Regent's Park, NW1.—(Opened in 1828). Open daily (except Christmas Day) March-Oct. 9-6 or dusk (Bank Holidays and associated Suns. Easter-Aug. and Suns. July 12-Sept. 13, 9-7). Oct.-March opens 10. Admission £4.30, various concessions. Aquarium and Children's Zoo free.

THE PRINCIPALITY OF WALES

Position and extent.—Wales (Cymru) occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 8,018 sq. miles (land 7,968; inland water 50); it is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Shropshire, Hereford and Worcester, and Gloucester, and on the W. by St. George's Channel. Across the Menai Straits is the Welsh island of Anglesey or Ynys Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826 and by the tubular railway bridge (1,100 ft. long) built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for ferry services to Dublin (70 miles).

Population.—The population at the Census of 1981 was 2,791,851 (males 1,352,639; females 1,439,212). The average density of population in 1981 was 343 per square mile. The population, mid 1987 estimate, was 2,836,000.

Relief.—Wales is a country of extensive tracts of high plateau and shorter stretches of mountain ranges deeply dissected by river valleys. Lower-lying ground is largely confined to the coastal belt and the lower parts of the valleys. The highest mountains are those of Snowdonia in the north-west (*Snowdon*, 3,559 ft.), Berwyn (*Aran Fawddwy*, 2,971 ft.), Cader Idris (*Pen y Gadaid*, 2,928 ft.), Dyfed (*Plynlimon*, 2,467 ft.), and the Black Mountain, Brecon Beacons and Black Forest ranges in the south-east (*Carmarthen* *Van*, 2,630 ft., *Pen y Fan*, 2,906 ft., *Waun Fach*, 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Plynlimon to the English border. The *Wye* (130 miles) also rises in the slopes of Plynlimon. The *Usk* (56 miles) flows into the Bristol Channel, through Gwent. The *Dee* (70 miles) rises in Bala Lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the *Dee* is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee". The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (*Llyn Tegid*) in Gwynedd, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, and Birmingham is supplied from a chain of reservoirs in the Elan and Clærwen valleys.

The Welsh Language.—According to the 1981 Census results, the percentage of persons of three years and over able to speak Welsh were:

Clwyd	18.7	Powys	20.2
Dyfed	46.8	S. Glamorgan	5.8
Gwent	2.5	W. Glamorgan	16.4
Gwynedd	61.2		
Mid Glamorgan	8.4	Wales	18.9

The 1981 figure represents a slight decline from 20.8 per cent in 1971 (1961, 26 per cent; 1951, 28.9 per cent).

Flag.—A red dragon on a green and white field (per fess argent and vert a dragon passant gules). The flag was augmented in 1953 by a royal badge on a shield encircled with a riband bearing the words

Ddraig Goch Ddyry Cychwyn and imperially crowned. Only the unaugmented flag is flown on Government offices in Wales and, where appropriate, in London. Both flags continue to be used elsewhere.

EARLY HISTORY

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* and *Belgae* followed in the ensuing Iron Age. The *Roman* conquest of South Britain and Wales was for some time successfully opposed by *Caratacus* (*Caractacus* or *Caradog*), chieftain of the Catuvellauni and son of *Cunobelinus* (*Cymbeline*). South east Wales was subjugated and the legionary fortress at Caerleon-on-Usk established by about A.D. 75-77: the conquest of Wales was completed by Agricola about A.D. 78. Communications were opened up by the construction of military roads from Chester to Caerleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Camarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celts into the mountain fastness of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh (= foreign). The West Saxons' victory of Deorham (577) isolated Wales from Cornwall and the battle of Chester (613) cut off communication with Strathclyde and northern Britain. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the 9th century Rhodri Mawr (844-78) united the country and successfully resisted further incursions of the Saxons by land and raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Deheubarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell. Cadell's son Hywel Dda ruled a large part of Wales and codified its laws but the provinces were not united again until the rule of Llewelyn ap Seisyllt (husband of the heiress of Gwynedd) from 1018 to 1023.

The Norman Conquest.—After the Norman conquest of England, William I created Palatine counties along the Welsh frontier, and the Norman barons began to make encroachments into Welsh territory. The Welsh princes recovered many of their losses, however, during the civil wars of Stephen's reign and in the early 13th century Owen Gruffydd, prince of Gwynedd was the dominant figure in Wales. Under Llywelyn ap Iorwerth (1194-1240) the Welsh united in powerful resistance to English incursions and Llywelyn's privileges and *de facto* independence were recognized in Magna Carta. His grandson, Llywelyn ap Gruffydd, was the last native prince: he was killed in 1282 during hostilities between the Welsh and English, allowing Edward I of England to establish his authority over the country. On Feb. 7, 1301, Edward of Caernarvon, son of Edward I, was created *Prince of Wales*, a title which has subsequently been borne by the eldest son of the sovereign.

Strong Welsh national feeling continued, expressed in the early 15th century in the rising led by Owain Glyndŵr, but the situation was altered by the accession to the English throne in 1485 of Henry VII of the Welsh House of Tudor. Wales was politically assimilated to England under the Act of Union of 1535, which extended English laws to the Principality

and gave it parliamentary representation for the first time.

Eisteddfod.—The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by

Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

PRINCIPAL WELSH CITIES

CARDIFF

CARDIFF (South Glamorgan), at the mouth of the rivers Taff, Rhymney and Ely, is the capital City of Wales and one of Britain's major administrative, commercial and office centres. It has many industries, including steel works, cigars and a flourishing port with a substantial and varied trade. There are many fine buildings in the civic centre started early this century which includes the City Hall, the National Museum of Wales, University Buildings, Law Courts, Welsh Office, County Hall, Police Headquarters and the Temple of Peace and Health. Also in the city are Llandaff Cathedral, the Welsh National Folk Museum at St. Fagans, Cardiff Castle, the New Theatre, the Sherman Theatre and the Cardiff College of Music and Drama. New buildings include St. David's Hall, a 2,000-seat concert and conference hall, and the Welsh National Ice Rink.

SWANSEA

SWANSEA (in Welsh, Abertawe) is a City and a seaport of West Glamorgan with its own municipal airport. The beautiful Gower Peninsula was brought within the City boundary under local government reform on April 1, 1974. The trade of the port includes coal, patent fuel, ores, and the import and export of oil. The municipal area is 60,511 acres.

The principal buildings are the Norman Castle (rebuilt in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton and the Guildhall, containing the Brangwyn panels. New buildings include the Industrial and Maritime Museum, the new Maritime Quarter and Marina and the leisure centre. Swansea was chartered by the Earl of Warwick, c. 1158-1184, and further charters were granted by King John, Henry III, Edward II, Edward III and James II, 2 from Cromwell and 1 from the Marcher Lord William de Breos.

THE KINGDOM OF SCOTLAND

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° 51' 30" and 54° 38' N. latitude and between 1° 45' 32" and 6° 14' W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The customary measurement of the island of Great Britain is from the site of John o' Groats house, near Duncansby Head, Caithness to Land's End, Cornwall, a total distance of 603 miles in a straight line and (approximately) 900 by road. The total area of the Kingdom is 30,414 square miles (land 29,761; inland water 653).

Population.—The population (1981 Census) was 5,130,735 (males 2,466,437; females 2,664,298). The average density of the population in 1981 was 168 persons per square mile. The population, mid 1987 estimate, was 5,112,000.

Relief.—There are three natural orographic divisions of Scotland. The Southern Uplands have their highest points in Merrick (2,766 ft.), Rhinns of Kells (2,669 ft.), and Cairnsmuir of Carsphairn (2,614 feet), in the west; and the Tweedsmuir Hills in the east (Hartfell 2,651 ft., Dollar Law 2,682 ft., Broad Law 2,756 ft.). The Central Lowlands, formed by the valleys of the Clyde, Forth and Tay, divide the Southern Uplands from the Northern Highlands, which extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the Great Glen. The Grampian Mountains, which entirely cover the southern Highland area, include in the west Ben Nevis (4,046 ft.), the highest point in the British Isles, and in the east the Cairngorm Mountains (Cairn Gorm 4,084 ft., Braeriach 4,248 ft., Ben Macdui 4,296 ft.). The north-western Highland area contains in the mountains of Wester and Eastern Ross Carn Eige (3,880 ft.) and Sgurr na Lapaich (3,775 ft.).

Created, like the Central Lowlands, by a major geological fault, the Great Glen (60 miles long) runs between Inverness and Fort William, and contains Loch Ness, Loch Oich and Loch Lochy. These are linked to each other and to the north-east and south-west coasts of Scotland by the Caledonian Canal, providing a navigable passage between the Moray Firth and the Inner Hebrides.

Hydrography.—The western coast of Scotland is fragmented by peninsulas and islands, and indented by fjords (sea-lochs), the longest of which is Loch Fyne (42 miles long) in Argyll. Although the east coast tends to be less fractured and lower, there are several great drowned inlets (firths), e.g. Firth of Forth, Firth of Tay, Moray Firth, as well as the Firth of Clyde in the west.

The lochs are the principal hydrographic feature of the Kingdom. The largest in the Kingdom and in Great Britain is Loch Lomond (27 square miles), in the Grampian valleys; the longest and deepest is Loch Ness (24 miles long and 800 feet deep), in the Great Glen; and Lochs Shin (20 miles) and Maree in the northern Highlands.

The longest river in Scotland is the Tay (117 miles), noted for its salmon. It flows into the North Sea, with Dundee on the estuary, which is spanned by the Tay Bridge (10,289 ft.) opened in 1887 and the Tay Road Bridge (7,365 ft.) opened in 1966. Other noted salmon rivers are the Dee (90 miles) which flows into the North Sea at Aberdeen, and the Spey (110 miles), the swiftest flowing river in the British Isles, which

flows into Moray Firth. The Tweed, which gave its name to the woollen cloth produced along its banks, marks in the lower stretches of its 96-mile course the border between Scotland and England.

The most important river commercially is the Clyde (106 miles), formed by the junction of the Dara and Porttroll water, which flows through the city of Glasgow to the Firth of Clyde. During its course it passes over the picturesque Falls of Clyde, Bonnington Linn (30 ft.), Corra Linn (84 ft.), Dundaff Linn (10 ft.) and Stonebyres Linn (80 ft.), above and below Lanark. The Forth (66 miles), upon which stands Edinburgh, the capital, is spanned by the Forth (Railway) Bridge (1890), which is 5,330 feet long, and the Forth (Road) Bridge (1964), which has a total length of 6,156 ft. (over water) and a single span of 3,000 ft.

The highest waterfall in Scotland, and the British Isles, is Eas a' Chual Aluinn with a total height of 658 ft., which falls from Glas Bheinn in Sutherland. The Falls of Glomach, on a head-stream of the Elchaig in Wester Ross, have a drop of 370 ft.

Gaelic Language.—According to the 1981 Census, 82,620 people, mainly in the Highlands and western coastal regions, were able to speak, read or write the Scottish form of Gaelic.

THE SCOTTISH ISLANDS

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III, in 1468, the Danish claims to suzerainty being relinquished in 1590 when James VI married Anne of Denmark.

Orkney.—The Orkney Islands (total area 375½ square miles) lie about six miles north of the mainland, separated from it by the Pentland Firth. Of the 90 islands and islets (holms and skerries) in the group, about one-third are inhabited. The total population at the 1981 Census was 19,040; the 1981 populations of the islands shown here include those of smaller islands forming part of the same civil parish.

Mainland	14,299	Shapinsay	345

Papa Westray	94	Walls and Flotta	761
Rousay and Egilsay	264	Westray	741
Sanday and North Ronaldsay	652		

The islands are rich in Pictish and Scandinavian remains, the most notable being the Stone Age village of Skara Brae, the burial chamber of Maeshowe, the many brochs (Pictish towers) and St. Magnus Cathedral. Scapa Flow, between the Mainland and Hoy, was the war station of the British Grand Fleet from 1914-19 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Most of the islands are low-lying and fertile, and farming (principally beef cattle) is the main industry. Flotta, to the south of Scapa Flow, is now the site of the oil terminal for the Piper, Claymore and Tartan fields in the North Sea.

Capital.—Kirkwall (population 6,881) on Mainland.

Shetland.—The Shetland Islands (total area, 551 square miles; population (1981 Census) 27,271) lie about 50 miles north of the Orkneys, with Fair Isle about half way between the two groups. Out Stack,

off Muckle Flugga, one mile north of Unst, is the most northern part of the British Isles ($60^{\circ} 51' 30''$ N. lat.). There are over 100 islands, of which 16 are inhabited.

East and West Burra, and Trondra	930	Papa Stour	29
Fair Isle	69	Whalsay	1,026
Fetlar	102	Yell	1,168
Foula	39		

Shetland's many archaeological sites include Jarlshof, Mousa and Clickimin, and its long connection with Scandinavia has resulted in a strong Norse influence on its place names and dialect.

Industries include fishing, knitwear and farming. In addition to the fishing fleet there are fish processing factories, while the traditional handknitting of Fair Isle and Unst is supplemented now with machine knitted garments. Farming is mainly crofting, with sheep being raised on the moorland and hills of the islands. Latterly the islands have become an important centre of the North Sea oil industry, with pipelines from the Brent and Ninian fields running to the terminal at Sullom Voe, the largest of its kind in Europe. Lerwick is the main centre for supply services for offshore oil exploration and development.

Capital.—Lerwick (population 7,901) on Mainland.

The Hebrides.—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorense*, a name that survives in the Anglican bishopric of Sodor and Man.

There are over 500 islands and islets, of which about 100 are inhabited, though mountainous terrain and extensive peat bogs mean that only a fraction of the total area is under cultivation. Stone, Bronze and Iron Age settlement has left many remains, including those at Callanish on Lewis, and Norse colonization has influenced language, customs and place-names. Occupations include farming (mostly crofting and stock-raising), fishing and the manufacture of tweeds and other woollens. Tourism is also an important factor in the economy.

The Inner Hebrides lie off the west coast of Scotland and relatively close to the mainland. The largest and best-known is *Skye* (area 643 sq. miles; pop. 8,139; chief town, Portree), which contains the Cuillin Hills (*Sgurr Alasdair* 3,257 feet), the Red Hills (*Beinn na Caillich* 2,403 feet) as well as *Bla Bheinn* (3,046 feet) and *The Storr* (2,358 feet). Skye is also famous as the refuge of the Young Pretender in 1746. Other islands in the Highland Region include *Raasay* (pop. 182) *Rum*, *Eigg* and *Muck*. Islands in the Strathclyde Region include *Arran* (pop. 4,726) containing *Goat Fell* (2,868 feet); *Coll* and *Tiree* (pop. 933); *Colonsay* and *Oronsay* (pop. 137); *Islay* (area 235 sq. miles; pop. 3,997); *Jura* (area 160 sq. miles; pop. 239) with a range of hills culminating in the Paps of Jura (*Beinn-an-Oir*, 2,576 feet, and *Beinn Chaolais*, 2,477 feet); *Mull* (area 367 sq. miles; pop. 2,605; chief town Tobermory) containing *Ben More* (3,171 feet).

The Outer Hebrides, separated from the mainland by the Minch, now form the Western Isles Islands Council area (area 1,119 sq. miles; pop. (1981 Census) 31,842). The main islands are *Lewis* with *Harris* (area 770 sq. miles, pop. 23,390), whose chief town, Stornoway (pop. 13,409), is the administrative headquarters; *North Uist* (pop. 1,454); *South Uist* (pop. 2,223); *Benbecula* (pop. 1,988) and *Barra* (pop. 1,232). Other inhabited islands include *Bernera* (292), *Berneray*

(134), *Eriskay* (219), *Grimsay* (206), *Scalpay* (461) and *Vatersay* (108).

EARLY HISTORY

Prehistoric Man.—The Picts, believed to be of non-Aryan origin, seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. Remains are most frequent in Caithness and Sutherland and the Orkney Islands. Celts arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands, the civilization and speech of the people were definitely Celtic at the time of the Roman invasion of Britain.

The Roman Invasion.—In A.D. 79–80 Julius Agricola extended the Roman conquests in Britain by advancing into Caledonia and building a line of fortifications across the isthmus between the Forth and Clyde, but after a victory at *Mons Graupius* he was recalled. Hadrian's Wall, mostly complete by A.D. 130, marked the frontier until about A.D. 143 when the frontier moved north to the Forth-Clyde isthmus and was secured by the Antonine Wall. From about A.D. 155 the Antonine Wall was damaged by frequent attacks and by the close of the second century the northern limit of Roman Britain had receded to Hadrian's Wall.

The Scots.—After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots (the Gaelic tribe then dominant in Ireland), the Brythonic Waelisc (Welsh) of Strathclyde (south-west Scotland and Cumberland), and the Anglo-Saxons of Lothian. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I (943–954) Strathclyde was brought into subjection, the English lowland kingdom (Lothian) being conquered by Malcolm II (1005–1034). From the late 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being William Wallace, who defeated the English at Stirling Bridge (1297) and Robert Bruce, who won the victory of Bannockburn (1314). James IV and many of his nobles fell at the disastrous battle of Flodden (1513).

The Jacobite Revolts.—In 1603 James VI of Scotland succeeded Elizabeth I on the throne of England (his mother, Mary Queen of Scots, was the great-granddaughter of Henry VII), his successors reigning as Sovereigns of Great Britain, although political union of the two countries did not occur until 1707. After the abdication (by flight) in 1688 of James VII and II, the crown devolved upon William III (grandson of Charles I) and Mary (daughter of James VII and II). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII and II, but died after a military success at Killiecrankie. After the death of Anne (second daughter of James VII and II) the throne devolved upon George I (great-grandson of James VI and I). In 1715, armed risings on behalf of James Stuart (the Old Pretender) led to the indecisive battle of Sheriffmuir, but the Jacobite movement died down until 1745, when Charles Stuart (the Young Pretender) defeated the Royalist troops at Prestonpans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII and III" (the title claimed for his father by Charles Stuart) fell back on the defensive, and the movement was finally crushed at Culloden (April 16, 1746).

PRINCIPAL SCOTTISH CITIES

ABERDEEN

ABERDEEN, 130 miles north-east of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. Scotland's third largest city, Aberdeen is the second largest Scottish fishing port and the main European centre for offshore oil exploration. It is also an ancient university town and distinguished research centre. Other industries include engineering, shipbuilding, food processing, textiles, paper manufacturing and chemicals. Places of interest: King's College, St. Machar's Cathedral, Brig o' Balgownie, Duthie Park and Winter Gardens, the Kirk of St. Nicholas, Mercat Cross, Marischal College and Anthropological Museum, Provost Skene's House, Art Gallery, James Dun's House (children's museum) and Provost Ross's House (maritime museum).

DUNDEE

DUNDEE, a Royal Burgh, is situated on the north bank of the Tay estuary. The city's port and dock installations are important to the offshore oil industry and the airport also provides servicing facilities. Principal industries include textiles, computers and other electronic industries, lasers, printing, tyre manufacture, food processing, carpets, engineering and clothing manufacture. Six sites have Enterprise Zone status, including the Technology Park, airport and port. The unique City Churches—three churches under one roof, together with the 15th century St. Mary's Tower—are the most prominent architectural feature. R.R.S. *Discovery*, the ship which took Captain Scott to the Antarctic and which was built in Dundee in 1901, is now berthed in Victoria Dock.

EDINBURGH

EDINBURGH, the capital of and seat of government in Scotland, has a municipal area of 100.6 sq. miles. The city is built on a group of hills and contains in Princes Street one of the most beautiful thoroughfares in the world. The principal buildings are the Castle, which includes St. Margaret's Chapel, the oldest building in Edinburgh, and near it, the Scottish National War Memorial; the Palace of Holyroodhouse; Parliament House, the present seat of the judiciary; two universities (Edinburgh and Heriot-Watt); St. Giles' Cathedral (restored 1879-83); St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott); the General Register House (Robert Adam); the National and the Signet Libraries; the National Gallery; the Royal Scottish Academy; and the National Portrait Gallery.

GLASGOW

GLASGOW, a Royal Burgh, is the principal commercial and industrial centre in Scotland. The city occupies the north and south banks of the Clyde, formerly one of the chief commercial estuaries in the world. The principal industries include engineering, aero and marine engines, chemicals, printing, etc. The city has also developed recently as a tourism and conference centre. The chief buildings are the 13th century Gothic Cathedral, the University (Sir Gilbert Scott), the City Chambers, Pollok House, the School of Art (Mackintosh), Kelvingrove Art Galleries, the Burrell Collection museum and the Mitchell Library. The city is home of the Scottish National Orchestra, Scottish Opera, Scottish Ballet, etc.

NORTHERN IRELAND

(For geographical and historical notes on Ireland, see Index)

The usually resident population of Northern Ireland, as revised, at the 1981 Census was 1,556,039 (males, 761,882; females, 794,157) compared with a total population of 1,536,065 at the Census of 1971. (N.B. This revised figure takes account of the population effect of non-enumerated households, estimated at 74,000 persons.) In 1981 the number of persons in the various religious denominations (expressed as percentages of the total usually resident population) were: Roman Catholic, 28·0; Presbyterian, 22·9; Church of Ireland, 19·0; Methodist, 4·0; others 7·6; not stated, 18·5. Northern Ireland has a total area of 5,452 sq. miles (land, 5,206 sq. miles; inland water and tideways, 246 sq. miles) with a density of population of 282 persons per sq. mile in 1981. The population, mid 1987 estimate, was 1,575,200.

CONSTITUTION AND GOVERNMENT

A separate parliament and executive Government was established for Northern Ireland in 1921 by the Government of Ireland Act. The Northern Ireland Constitution Act, 1973, abolished the post of Governor and Parliament of Northern Ireland and provided for the transfer of certain legislative functions to the Northern Ireland Assembly and Executive. Devolved Government came into operation with effect from January 1, 1974 but when the Executive collapsed the Northern Ireland Assembly was prorogued on May 29, 1974. The Northern Ireland Act, 1974, which became law in July 1974, made provision for temporary arrangements for the government of Northern Ireland by the Secretary of State for Northern Ireland and also provided for the holding of elections and a Constitutional Convention. Direct Rule continues in being under the terms of the Northern Ireland Act 1974.

Attempts have been made by successive governments to find a way of restoring devolved government to Northern Ireland. The most recent attempt failed when the Northern Ireland Assembly (elected on October 20, 1982) was dissolved on June 23, 1986.

FLAG.—The national flag is that of the United Kingdom.

FINANCE

Taxation in Northern Ireland is largely imposed and collected by the United Kingdom Government. After deducting the cost of collections and of Northern Ireland's contributions to the European Economic Community the balance, known as the Attributed Share of Taxation, is paid over to the Northern Ireland Consolidated Fund. Northern Ireland's revenue is insufficient to meet its expenditure and is supplemented by a grant in aid.

PRODUCTION

Industries.—The products of the engineering, shipbuilding and aircraft industries, which employed 29,000 persons, were valued at £823 million. The textile industries, employing about 10,000 persons, produced products valued at approximately £236

million. The food and drink industry, employing about 20,000 persons, produced goods valued at £2,446 million.

Minerals.—1,304 persons were employed in mining and quarrying operations in Northern Ireland in 1988 and the minerals raised (17,343,584 tonnes) were valued at £29,135,108.

COMMUNICATIONS

Seaports.—The total tonnage handled by N. Irish ports in 1987 was 13·7m. Regular ferry, freight and container services operate to ports in Great Britain and Europe from Belfast, Larne, Londonderry and Warrenpoint.

Road and Rail Transport.—The Northern Ireland Transport Holding Company is largely responsible for the supervision of the subsidiary companies, Ulsterbus and Citybus (which operate the public road passenger services) and Northern Ireland Railways. Road freight services are also provided by a large number of hauliers operating competitively under licence.

Air Transport.—Belfast International Airport is run by Northern Ireland Airports Ltd., a subsidiary of the Northern Ireland Transport Holding Company and provides scheduled and chartered services on domestic and international routes.

Scheduled services also operate from Belfast Harbour Airport to eleven British destinations and from Eglinton, Co. Londonderry, to Blackpool, Glasgow and Dublin.

BELFAST

BELFAST, the administrative centre of Northern Ireland, is situated at the mouth of the River Lagan at its entrance to Belfast Lough. The city grew, owing to its easy access by sea to Scottish coal and iron, to be a great industrial centre.

The principal buildings are of a relatively recent date and include the Parliament Buildings at Stormont, the City Hall, the Law Courts, the Public Library and the Museum and Art Gallery.

Belfast received its first charter of incorporation in 1613 and was created a city in 1888; the title of Lord Mayor was conferred in 1892.

LONDONDERRY

LONDONDERRY, situated on the River Foyle, was reputedly founded in 546 by St. Columba. Londonderry (formerly *Derry*) has important associations with the City of London. The Irish Society, under its royal charter of 1613, fortified the city and was for long closely associated with its administration.

The city is famous for the great siege of 1688-89, when for 105 days the town held out against the forces of James II until relieved by sea. The city walls are still intact and form a circuit of almost a mile around the old city. Interesting buildings are the Protestant Cathedral of St. Columb's (1633) and the Guildhall reconstructed in 1912 and containing a number of beautiful stained glass windows, many of which were presented by the livery companies of London.

THE ISLE OF MAN

(ELLAN VANNIN)

An island in the Irish Sea, in lat. $54^{\circ} 3' - 54^{\circ} 25' N.$ and long. $4^{\circ} 18' - 4^{\circ} 47' W.$, nearly equidistant from England, Scotland, and Ireland. Although the early inhabitants were of Celtic origin, the Isle of Man was part of the Norwegian Kingdom of the Hebrides until 1266, when this was ceded to Scotland. Subsequently granted to the Stanleys (Earls of Derby) in the 15th century and later to the Dukes of Atholl, it was brought under the direct administration of the Crown in 1765. The island forms the bishopric of Sodor and Man.

The total land area is 141,263 acres (221 sq. miles). The report on the 1986 Census showed a resident population of 64,282 (males, 30,782; females, 33,500). In 1988 births numbered 781 and deaths 993. The main language in use is English. There are no remaining native speakers of Manx Gaelic but around 200 people are able to speak the language.

CAPITAL, Douglas. Population (1986), 20,368; Castletown (3,019) is the ancient capital; the other towns are Peel (3,660), and Ramsey (5,778).

FLAG.—Three legs in white and gold armed conjoined on a red ground.

TYNWALD DAY.—July 5.

GOVERNMENT

The Isle of Man is a self-governing Crown dependency, having its own legal and administrative systems. The Lieutenant-Governor is the Queen's personal representative in the Island. The legislature, called the Tynwald, has two branches—the Legislative Council and the House of Keys. The Council consists of the Bishop of Sodor and Man, the Attorney-General and 8 members chosen by the House of Keys, one of whom is appointed President of the Council. The House of Keys, one of the most ancient legislative assemblies in the world, consists of 24 members, elected by the adult male and female population.

ECONOMY

Most of the income generated in the Island is earned in the services sector with financial and business services being considerably larger than the traditional industry of tourism. Manufacturing industry is also a major generator of income whilst the Island's other traditional industries of agriculture and fishing now play a minor role in the economy.

Under the terms of the Island's special relationship with the European Community the Island has free access to E.C. markets.

A twenty-acre Freeport has been developed adjacent to the main airport at Ronaldsway.

The Island's unemployment rate is approximately 2 per cent and price inflation is around 7 per cent per annum.

FINANCE

The Island's Budget for 1989–90 provided for gross expenditure of £230,005,590. The principal sources of

Government revenue are taxes on income and expenditure. Income tax is payable at a rate of 15 per cent. on the first £8,000 of taxable income of resident individuals and 20 per cent. on the balance. The rate of income tax is 20 per cent. on the whole taxable incomes of non-residents and companies. By agreement with the United Kingdom Government, the Island keeps most of its rates of indirect taxation (Value Added Tax and duties) the same as those in the United Kingdom, but this agreement may be terminated by either party. A reciprocal agreement on National Insurance benefits and pensions exists between the Governments of the Isle of Man and the United Kingdom. Taxes are also charged on property (rates), but these are comparatively low.

The major Government expenditure items are health, social security and education, which account for 53 per cent. of the Government budget. The Island makes a voluntary annual contribution to the United Kingdom for defence and other external services.

Although the Island has a special relationship with the European Community it neither contributes money to nor receives funds from the E.C. Budget.

THE CHANNEL ISLANDS

The Channel Islands, situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to the Crown, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035) Little Sark (239), Herm (320), Jethou (44) and Lihou (38)—a total of 48,083 acres, or 75 square miles. In 1986 the population of Jersey was 80,212; and of Guernsey, 54,380; Alderney, 2,000 and Sark, 604.

GOVERNMENT

The islands are Crown dependencies with their own legislative assemblies (the States in Jersey, Guernsey and Alderney, and the Court of Chief Pleas in Sark), and systems of local administration and of law, and their own courts. Acts passed by the States require the sanction of The Queen-in-Council. The British Government is responsible for defence and international relations.

In both Bailiwicks the Lieutenant-Governor and Commander-in-Chief, who is appointed by the Crown, is the personal representative of the Queen and the channel of communication between the Crown (via the Privy Council) and the insular government. The Bailiffs of Jersey and Guernsey, also appointed by the Crown, are President of the States and of the Royal Courts of their respective islands. The government of each Bailiwick is conducted by committees appointed by the States. Justice is administered by the

Royal Courts of Jersey and Guernsey, each consisting of the Bailiff and 12 elected Jurats.

Each Bailiwick constitutes a deanery under the jurisdiction of the Bishop of Winchester (see Index).

ECONOMY

A mild climate and good soil have led to the development of intensive systems of agriculture and horticulture, which form a significant part of the economy of the Channel Islands. Equally important are invisible earnings, principally from the tourist trade and from banking and finance, the low rate of income tax (20p in the £ in Jersey and Guernsey; no tax of any kind in Sark) and the absence of super-tax and death duties making the Channel Islands a popular tax-haven. Principal exports are agricultural produce and flowers; imports are chiefly machinery, manufactured goods, food, fuel and chemicals. Trade with the U.K. is regarded as internal trade.

British currency is legal tender in the Channel Islands but each Bailiwick issues its own coins, and some notes, of the same values as those of the U.K. They also issue their own postage stamps; U.K. stamps are not valid.

LANGUAGE

The official languages are English and French, but French is gradually being supplanted by English, which is the language in daily use. In country districts of Jersey and Guernsey and throughout Sark a Norman-French *patois* is also in use, though to a declining extent.

THE ISLES OF SCILLY

There are about 140 islands and skerries in the Scillies group (total area, 6 square miles) situated 28 miles south-west of Land's End, of which only five are inhabited; St. Mary's, St. Agnes, Bryher, Tresco and St. Martin's. The population is 1,978. The entire group has been designated an Area of Outstanding Natural Beauty, and given National Nature Reserve status by the Nature Conservancy Council because of its unique flora and fauna. Tourism and the winter/spring flower trade for the home market form the basis of the economy of the Isles. The island group is a recognised rural development area.

The islands are administered by the Council of the Isles of Scilly, a 21-member non-political body, which combines the powers and duties of a County Council and a District Council under the Local Government

Act 1972 and the Isles of Scilly Orders 1978. Legislation is specifically applied to the Isles of Scilly by Special Order. The Council is responsible for education, fire services, highways, planning and social services, and Cornwall County Council provides other services on an agency basis: the police service is administered by the Devon and Cornwall Police Authority, of which the Council is a member. The Isles are part of the St. Ives electoral division.

PATRON SAINTS

ST. GEORGE

Patron Saint of England

St. George is believed to have been born in Cappadocia, of Christian parents, in the latter part of the 3rd century and to have served with distinction ■ ■ soldier under the Emperor Diocletian, including ■ visit to England ■ military mission. When the persecution of Christians was ordered, St. George sought a personal interview to remonstrate with the Emperor and after a profession of faith resigned his military commission. Arrest and torture followed and he was martyred at Nicomedia on April 23, 303, ■ day ordered to be kept in remembrance as a national festival by the Council of Oxford in 1222, although it was not until the reign of Edward III that he was made patron saint of England.

St. George's connection with a dragon seems to date from the close of the 6th century and to be due to the transfer of his remains from Nicomedia to Lydda, close to the scene of the legendary exploit of Perseus in rescuing Andromeda and slaying the sea monster, credit for which became attached to the Christian martyr.

ST. DAVID

Patron Saint of Wales

St. David is believed to have been born near the beginning and to have died towards the end of the 6th century. St. David was an eloquent preacher, who founded the monastery at Menevia, now St.

David's. He became the patron of Wales, but there is no record of any papal canonization before 1181. His annual festival is observed on March 1.

ST. ANDREW

Patron Saint of Scotland

St. Andrew, one of the Christian Apostles and brother of Simon Peter, was born at Bethsaida on the Sea of Galilee and lived at Capernaum. He preached the Gospel in Asia Minor and in Scythia along the shores of the Black Sea and became the patron saint of Russia. It is believed that he suffered crucifixion at Patras in Achaea, on a *crux decussata* (now known as St. Andrew's Cross) and that his relics were removed from Patras to Constantinople and thence to St. Andrews, probably in the 8th century, since which time he has been the patron saint of Scotland. The festival of St. Andrew is held on November 30.

ST. PATRICK

Patron Saint of Ireland

St. Patrick was born, probably in England, about 389 and was carried off to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. He was ordained deacon at Auxerre and having been consecrated Bishop in 432 was despatched to Wicklow to reorganize the Christian communities in Ireland. He founded the see of Armagh and introduced Latin into Ireland ■ the language of the Church. He died c. 461 and his festival is celebrated on March 17.

THE CINQUE PORTS

As their name implies the Cinque Ports were originally five in number, Hastings, New Romney, Hythe, Dover and Sandwich. They were in existence before the Norman Conquest and were the Anglo-Saxon successors to the Roman system of coast defence organized from the Wash to Spithead to resist Saxon onslaughts. William the Conqueror reconstituted them and granted peculiar jurisdiction, most of which was abolished in 1855. Only jurisdiction in Admiralty still survives.

At some time after the Conquest the "antient towns" of Winchelsea and Rye were added with equal privileges. The other members of the Confederation, known as Limbs, are Lydd, Faversham, Folkestone, Deal, Tenterden, Margate and Ramsgate.

The Barons of the Cinque Ports have the ancient privilege of attending the Coronation Ceremony and are allotted special places in Westminster Abbey.

Area and Population.—The total area of the independent Commonwealth is estimated at over 19,500,000 sq. miles (50,504,000 sq. km.) (U.N. estimate 1985), over one third of the world total. The total population of the Commonwealth is estimated to be about one quarter of the world total. In 1985 this amounted to over 1,200,000,000 (U.N. estimate). Details of the areas and populations of the Member States and dependencies appear in the following pages.

History and Government.—The status and relationship of member nations was first defined by the Inter-Imperial Relations Committee of the 1926 Imperial Conference, under the chairmanship of Lord Balfour, in what came to be known as the "Balfour Declaration": "They are autonomous communities . . . equal in status, in no way subordinate one to another in any aspect of their domestic or external affairs, though united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations." This formula was given legal substance by the Statute of Westminster, 1931.

The concept of a group of countries owing allegiance to a single Crown changed in 1949 when India decided to become a republic, and her continued membership of the Commonwealth was agreed by the other members on the basis of her "acceptance of the King as the symbol of the free association of its independent member nations and as such the Head of the Commonwealth". Member nations agreed at the time of the accession of Queen Elizabeth II to recognize Her Majesty as the new Head of the Commonwealth. The position is not vested in the British Crown.

Most members of the Commonwealth are parliamentary democracies.

Queen Elizabeth II is Head of State of 17 member countries of the Commonwealth: Antigua and Barbuda, Australia, the Bahamas, Barbados, Belize, Britain, Canada, Grenada, Jamaica, Mauritius, New Zealand, Papua New Guinea, St. Christopher and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Solomon Islands and Tuvalu. In each of these countries (except Britain) The Queen is personally

represented by a Governor-General, who holds in all essential respects the same position in relation to the administration of public affairs in the realm as is held by Her Majesty in Britain (with the exception of certain constitutional functions which are performed by The Queen personally). The Governor-General is appointed by The Queen on the advice of the Government of the country concerned.

Twenty-five member countries are republics: Bangladesh, Botswana, Cyprus, Dominica, The Gambia, Ghana, Guyana, India, Kenya, Kiribati, Malawi, The Maldives, Malta, Nauru, Nigeria, Seychelles, Sierra Leone, Singapore, Sri Lanka, Tanzania, Trinidad & Tobago, Uganda, Vanuatu, Zambia and Zimbabwe. In Malaysia, the Head of State is elected from among the nine hereditary Malay rulers and holds office for five years. Brunei, Lesotho, Tonga, and Swaziland have their own monarchs. Western Samoa has a Head of State whose functions are analogous to those of a constitutional monarch.

Membership of the Commonwealth is subject only to the approval of existing members. Two countries, Nauru and Tuvalu, are special members, with the right to participate in all functional Commonwealth meetings and activities, but not to attend Meetings of Commonwealth Heads of Government.

Consultation.—Commonwealth Heads of Government meet every two years to discuss international developments and to consider co-operation among members. These meetings, the successors to the pre-war Imperial Conferences, have grown in importance as they are the only regular forum of leaders from both developed and developing countries, constituting a broad sample of the world community. Decisions are reached by consensus, and the views of the meeting are set out in a communiqué.

In addition, there are annual meetings of Finance Ministers, and frequent meetings of Ministers and officials in the fields of trade, education, health, law, science, agriculture, labour and employment, and youth affairs.

Defence.—The Commonwealth is not ■ military alliance and members make their own defence arrangements in the light of their particular requirements. Some are parties to multi-lateral treaties, for example A.N.Z.U.S. and N.A.T.O. Various members of the Commonwealth co-operate with each other in combined exercises, joint research organizations and exchanges of personnel and training facilities.

Law.—English common law forms the basis of the legal system in many Commonwealth countries, although in most cases it has been radically adapted by statute to suit the individual needs and aspirations of a country, and there are countries where other systems have been adopted—for example, the law of Quebec Province and of Mauritius is founded on that of France, and Roman Dutch law forms the basis in Sri Lanka and Lesotho. Of the non-realms in the Commonwealth, Brunei, Dominica, The Gambia, Kiribati, Singapore, and Trinidad and Tobago retain the right of appeal to the Judicial Committee of the Privy Council in the United Kingdom, which also hears appeals from a number of realms (Antigua and Barbuda, the Bahamas, Barbados, Belize, Jamaica, Mauritius, New Zealand, St. Christopher and Nevis, St. Lucia, St. Vincent and the Grenadines, Tuvalu) and the dependent territories.

Citizenship and Nationality.—Each member of the Commonwealth defines the citizenship and nationality of its own people and determines the status

of other Commonwealth nationals within its own boundaries. Members of the Commonwealth differentiate, to a greater or lesser degree, as regards the grant of privileges, between citizens of the Commonwealth and aliens. The Republic of Ireland, which in 1949 ceased to be a member of the Commonwealth, is not regarded by the other Commonwealth nations as a foreign country nor her citizens as foreigners.

Finance and Development.—Complete financial autonomy is enjoyed by all members of the Commonwealth. In some countries, customs tariffs are lower for merchandise of Commonwealth origin than for imports from foreign countries. Developing countries, including those in the Commonwealth, obtain preference for exports of industrial goods and some agricultural exports from the developed countries under the Generalised Scheme of Preferences (G.S.P.). Many smaller Commonwealth countries are also party to the Lomé Convention which accords preferential access to the European Community. Many former Commonwealth preferences have been replaced by these arrangements.

British aid for the development needs of the Commonwealth countries and dependent territories are dealt with under the provisions of the Overseas Aid Act 1966, administered by the Overseas Development Administration. This Act succeeds the former Colonial Development and Welfare Acts. Those countries which are party to the Lomé Convention also receive aid under that Convention from the European Community.

Commonwealth Secretariat. Marlborough House, Pall Mall, SW1Y 5HX [01-839 3411].—This was established by decision of Commonwealth Heads of Government in 1965, and is the main agency for multi-lateral communication between Commonwealth Governments on issues relating to the Commonwealth as a whole. It promotes consultation and disseminates information on matters of common concern, organizes meetings and conferences, coordinates Commonwealth activities and provides technical assistance for economic and social development through the Commonwealth Fund for Technical Cooperation. *Secretary General*, Shridath S. Ramphal, Kt., C.M.G., Q.C.

Dependent Territories and Associated States.—Britain, Australia and New Zealand have a number of dependent territories. New Zealand also has two associated states: Cook Islands (since 1965) and Niue (since 1974).

PHYSIOGRAPHY

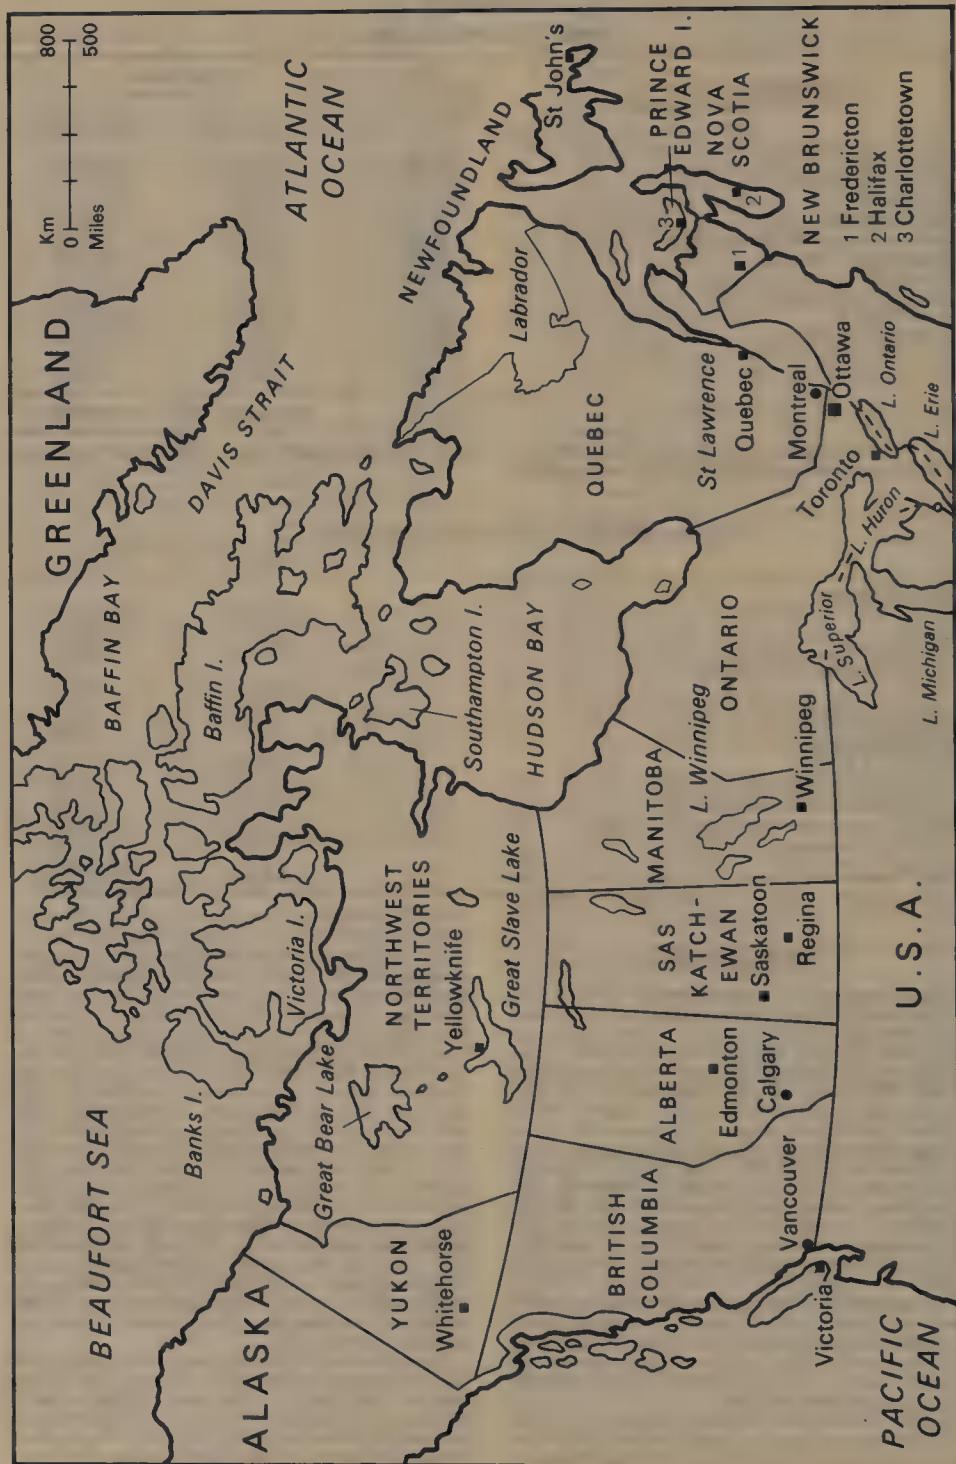

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec was captured by the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866.

Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41'.

Relief.—The relief of Canada is dominated by the mountain ranges running north and south on the west side of the Continent, by the pre-Cambrian

shield on the east, with, in between, the northern extension of the North American Plain. From the physiographic point of view Canada has six main divisions. These are: (1) Appalachian-Acadian Region, (2) the Canadian Shield, (3) the St. Lawrence-Great Lakes Lowland, (4) the Interior Plains, (5) the Cordilleran Region and (6) the Arctic Archipelago. The first region occupies all that part of Canada lying southeast of the St. Lawrence. In general, the relief is an alternation of highlands and lowlands and is hilly rather than mountainous. The great Canadian Shield comprises more than half the area. The interior as a whole is an undulating, low plateau (general level 1,000 to 1,500 feet), with the more rugged relief lying along the border between Northern Quebec and Labrador. Throughout the whole area water or muskeg-filled depressions separate irregular hills and ridges, 150 to 200 feet in elevation. Newfoundland, an outlying portion of the shield, consists of glaciated, low rolling terrain broken here and there by mountains.

The flat relief of the St. Lawrence-Great Lakes lowland varies from 500 feet in the east to 1,700 feet south of Georgian Bay. The most striking relief is provided by the eastward facing scarp of the Niagara escarpment (elevation 250 to 300 feet). The interior plains, comprising the Pacific Provinces, slope east-

ward and northward a few feet per mile. The descent from west to east is made from 5,000 feet to less than 1,000 feet in three distinct levels, with each new level being marked by an eastward facing contein or scarp. Five fairly well-developed topographic divisions mark out the Cordilleran region of western Canada. These are: (1) coastal ranges, largely above 5,000 feet with deep fjords and glaciated valleys, (2) the interior plateau, around 3,500 feet and comparatively level, (3) the Selkirk ranges, largely above 5,000 feet, (4) the Rocky Mountains with their chain of 10,000 to 12,000 feet peaks, and (5) the Peace River or Tramontane region with its rolling diversified country.

The Arctic Archipelago, with its plateau-like character has an elevation between 500 and 1,000 feet, though in Baffin Land and Ellesmere Island the mountain ranges rise to 8,500 and 9,500 feet. Two tremendous waterway systems, the St. Lawrence and the Mackenzie, providing thousands of miles of water highway, occupy a broad area of lowland with their dominant axis following the edge of the shield.

Climate.—The climate of the eastern and central portions presents greater extremes than in corresponding latitudes in Europe, but in the southwestern portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months.

GOVERNMENT

The Constitution of Canada had its source in the British North America Act of 1867 which formed a Dominion, under the name of Canada, of the four provinces: Ontario, Quebec, New Brunswick and Nova Scotia; to this Federation the other Provinces have subsequently been admitted. Under this Act Canada came into being on July 1, 1867 (Dominion Day), and under the Statute of Westminster, which received the royal assent on Dec. 11, 1931, Canada and the Provinces were exempted (in common with other self-governing Dominions of the Commonwealth of Nations) from the operation of the Colonial Laws Validity Act, the Statute of Westminster having removed all limitations with regard to the legislative autonomy of the Dominions, except that the British North America Act could be amended in important respects only by Acts of the British Parliament.

Provinces admitted since 1867 are: Manitoba (1870), British Columbia (1871), Prince Edward Island (1873), Alberta and Saskatchewan (1905) and Newfoundland (1949).

Agreement was reached in Nov. 1981 between the Federal and Provincial Governments (except Quebec) to patriate the Constitution so that it was amendable only in Canada. The inclusion in the Constitution of a Charter of Rights was also agreed. At the request of the Canadian Parliament, legislation was passed at Westminster and the Constitution formally patriated on 17th April 1982.

The Executive power is vested in a Governor-General appointed by the Sovereign on the advice of the Canadian Ministry, and aided by a Privy Council.

THE LEGISLATURE

Parliament consists of ■ Senate and a House of Commons. The *Senate* consists of 104 members, nominated by the Governor General (age limit 75). They are distributed between the various provinces thus: 24 each for Ontario and Quebec, 10 each for Nova Scotia and New Brunswick, 6 each for Newfoundland, British Columbia, Manitoba, Alberta, and Saskatchewan and 4 for Prince Edward Island, 1 for Northwest Territories and 1 for Yukon; each Senator must be at least thirty years old, a resident in the province for which he is appointed, a natural-born or naturalized subject of the Queen, and the owner of ■ property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day.

The *House of Commons* has 295 members and is elected every five years at longest. Representation by provinces is at present as follows: Newfoundland 7, Prince Edward Island 4, Nova Scotia 11, New Brunswick 10, Quebec 75, Ontario 99, Manitoba 14, Saskatchewan 14, Alberta 26, British Columbia 32, Yukon 1, Northwest Territories 2.

In every case—including the Prime Minister's—a sessional indemnity of C\$58,300 per annum is paid to members of the House of Commons. In addition, Ministers and members of the House of Commons receive an expense allowance. Certain Members of Parliament for large northern constituencies have larger expense allowances.

THE SENATE

The state of the parties in the Senate as at January

29, 1989, was Liberals 56, Progressive Conservatives 36, Independent 5, Vacant 7.

Speaker of the Senate, Hon. Guy Chapbonneau, Q.C.

THE HOUSE OF COMMONS

The state of parties in the House of Commons as at May 1, 1989, was Progressive Conservatives 167, Liberals 83, New Democratic Party 43, Reform Party 1, Independent 1.

Speaker of the House of Commons, Hon. John A. Fraser C\$122,200
Deputy Speaker, Marcel Danis C\$101,000
Clerk of the House of Commons, Robert Marleau.

THE JUDICATURE

The Judicature is administered by judges following the Civil Law in Quebec Province and Common Law in other Provinces. Each Province has its Court of Appeal. All Superior, County and District Court Judges are appointed by the Governor General, the others by the Lieutenant Governors of the Provinces.

The highest federal court is the Supreme Court of Canada, composed of ■ Chief Justice and eight puisne judges, which exercises general appellate jurisdiction throughout Canada in civil and criminal cases, and which usually holds three sessions each year. There is one other federally constituted Court, the Federal Court of Canada, which has jurisdiction on appeals from its Trial Division, from Federal Tribunals and reviews of decisions and references by Federal Boards and Commissions. The Trial Division has jurisdiction in claims by or against the Crown, its officers or servants or Federal bodies. It also deals with inter-Provincial and Federal-Provincial disputes.

NATIONAL DEFENCE

The Minister of National Defence has the control and management of the Canadian Armed Forces and all matters relating to National Defence establishments and works for the defence of Canada.

The Canadian Forces are organized on a functional basis to reflect the major commitments assigned by the government and are formed into National Defence Headquarters and five major Commands reporting to the Chief of the Defence Staff. The roles of the five Commands are: *Mobile Command*—Provision of ground forces for the protection of Canadian territory, combat forces in Canada for support of overseas commitments, and forces for support of United Nations or other peace-keeping operations. *Maritime Command*—Provision of sea forces for the defence of Canada, anti-submarine defence in support of NATO. Maritime Command also has operational control of Maritime aircraft. *Air Command*—Provision of operationally ready air forces to national, continental and international commitments. *Canadian Forces Communications Command*—Manages, operates and maintains strategic communications for the Canadian Forces. *Canadian Forces Europe*—Canadian Forces allocated to support NATO in Europe consisting of land and air elements.

National Defence expenditure for the fiscal year 1988-89 was estimated at C\$11,200 million. Canadian Armed Forces strength at May 1989, 87,600 authorized force.

EDUCATION

Education is under the control of the Provincial Governments, the cost of the publicly controlled schools being met by local taxation, aided by provincial grants. In 1988-89 there were 16,017 publicly controlled elementary and secondary schools with 4,996,160 pupils. Of these, 1,380 were private schools with 234,100 pupils; 400 federal schools with 47,500 pupils and 21 special schools for the blind and deaf with 2,560 pupils.

In 1988-89 there were 68 degree-granting universities with a full-time enrolment of 497,450, as well as 321,400 students in 198 other post-secondary, non-university institutions.

PRODUCTION

Agriculture.—About 7 per cent of the total land area of Canada is classified as farm land and approximately half of this is under cultivation, the remainder being woodland or suitable only for grazing purposes. More than three-quarters of the land now cultivated is found in the prairie region of Western Canada. Farm cash receipts from the sale of farm products in 1988 were C\$21,640,226,000. Livestock and animal products contributed C\$10,632,304,000; field crops C\$8,874,319,000.

TRADE

Merchandise imports into Canada in 1988 were valued at C\$131,554,027,000 and merchandise exports (including re-exports) at C\$134,075,121,000. The main exports in 1987 were motor vehicles and parts, newsprint paper, wheat, crude petroleum, lumber, natural gas, woodpulp, petroleum and coal products, and television and telecommunication equipment. Trade with the U.S.A. accounts for 69.5 per cent of total trade in merchandise, although efforts are being made to develop alternative markets. Value of trade with Canada's largest trading partners in 1988 was as follows (C\$'000):

Country	Imports	Domestic Exports
United States	86,509,012	98,218,792

FEDERAL CAPITAL

OTTAWA, the federal capital, 111 miles west of Montreal and 247 miles north-east of Toronto, is the city on the south bank of the Ottawa river. The city was chosen as the capital of the Province of Canada in 1857 and was later selected as the site of the Dominion capital. Ottawa contains the Parliamentary Buildings, the Public Archives, Royal Mint,

several national museums, the National Art Gallery and the Dominion Observatory.

Manufacturing is also carried on, medical advancement, high technology (communications, defence), printing and publishing being of greatest importance. Ottawa is connected with Lake Ontario by the Rideau Canal. The City population was 300,763 at the Census of 1986; and Metropolitan Ottawa 819,263.

YUKON TERRITORY

The area of the Territory is 186,660 sq. miles (483,450 sq. km.), with a population (1988) of 25,300. Minerals and tourism are the chief industries, followed closely by transport, communications and other utilities industry.

Commissioner. J. K. McKinnon.

The Yukon Act, 1970, as amended, provides for the administration of the Territory by a Commissioner acting under instructions from time to time given by the Governor-in-Council or the Minister of Indian Affairs and Northern Development. Legislative powers, analogous to those of a provincial government, are exercised by a Legislative Assembly of 16 members elected from electoral districts in the Territory. The Executive Council of the Assembly consists of the government leader as chairman and four elected members.

EXECUTIVE COUNCIL

Government Leader, Minister of the Executive Council Office, Health and Human Resources, Minister responsible for the Yukon Development Corporation, Hon. Tony Penikett.

House Leader, Minister of Education, Finance, Economic Development, Mines and Small Business, Hon. Piers McDonald.

Justice, Minister responsible for the Public Service Commission, the Workers' Compensation Board, the Women's Directorate, Hon. Margaret Joe, Renewable Resources, Tourism, and the Yukon Liquor Corporation, Hon. Art Webster.

Seat of Government, Whitehorse. Pop. 15,199 (1986).

NORTHWEST TERRITORIES

The area of the Northwest Territories is 1,322,900 sq. miles (3,426,320 sq. km.), with a population (1988 estimate) of 51,800. The chief industry is mining, with a total value of \$492,000,000 in 1985. Lead, zinc, gold, silver, oil exploration and natural gas contributed about 32 per cent. of the total activities in the Northwest Territories.

The Northwest Territories are subdivided into the districts of Mackenzie, Keewatin and Franklin.

Commissioner. J. H. Parker.

The Northwest Territories Act, 1979, as amended, provides for a Legislative Assembly of 24 elected members, of which the Executive Council under the chairmanship of the government leader is the senior decision-making body of the government in the Territory.

EXECUTIVE COUNCIL

Government Leader, Minister responsible for the Executive, for the N.W.T. Science Institute, the Devolution Office and Minister of Intergovernmental Affairs, Hon. Dennis Patterson.

ECONOMY

Production and Industry.—Manufacturing activity is based largely on the processing of the output of the logging, mineral, fishing and agriculture industries. The principal manufacturing centres are Vancouver, New Westminster, Victoria, North Vancouver, Kelowna and Prince George. Forestry and forest-based industries form the most important economic activity, accounting for approximately 40 per cent of total production. British Columbia is the leading province of Canada in the quantity and value of its timber and sawmill products. Mining, the second most important non-service economic activity, is based on copper, zinc, lead, iron concentrates, molybdenum, coal, natural gas, crude petroleum, asbestos, gold and silver. Molybdenum production is approximately 99 per cent of the Canadian total.

The production levels for important industries were estimated for 1987 as follows:—

Lumber	37,455,600 cu. metres.
Paper	2,752,600 tonnes
Pulp	6,850,300 tonnes
Coal	21,964,200 tonnes
Natural Gas	9,281,300,000 cu. metres

Mineral production for 1987 was valued at C\$3,402 million.

The most important agricultural products are livestock, eggs and poultry, fruits and dairy products. Salmon accounts for approximately 60 per cent of the value of fisheries. Other species include halibut, herring, sole, cod, flounder, perch, tuna and shellfish. In 1987 farm cash receipts were valued at C\$1,056.3 million.

The economy is dependent upon markets outside the province for the disposal of most of the products of her industry. An estimated 55-60 per cent of production is exported to foreign markets. Manufacturing shipments in 1987 were valued at C\$23,008.5 million.

Transport.—The Province has deep water harbours which are well serviced by railways and modern highways. Vancouver is the base for regular scheduled air routes to other parts of Canada, the United States, Europe, Mexico, South America, Hawaii, Fiji, Australia, Japan, Hong Kong and the Middle East.

CAPITAL.—Victoria, Metropolitan population (1988) 266,385. Vancouver metropolitan population (1988) 1,452,358, is the western terminus of the Canadian Pacific Railway and the Canadian National Railways (the C.N.R. also has ■ terminus at Prince Rupert) and the southern terminus of the British Columbia Railway, and possesses one of the finest natural harbours in the world, servicing ■ variety of vessels, including large bulk cargo carriers. Other principal cities are Prince George, Kamloops, Kelowna and Nanaimo.

MANITOBA

Area and Population.—Manitoba, originally the Red River settlement, is the central province of Canada. The Province has a considerable area of prairie land but is also ■ land of wide diversity combining 400 miles of sea-coast, large lakes and rivers covering an area of 30,225 sq. miles and pre-cambrian rock which covers about three-fifths of the

Province. The total area is 250,745 sq. miles (649,426 sq. km.), with a population (1987 estimate) of 1,082,800.

Government.—The Government is administered by a Lieutenant Governor, assisted by an Executive Council of Ministers, who are members of the Legislative Assembly of 57 members. Each member of the Legislative Assembly received an annual sessional indemnity totalling C\$37,521 for the year ending July 1, 1987.

The Progressive Conservatives formed a minority government after a General Election held on April 26, 1988. The standing in the House at July 7, 1989 was: Progressive Conservatives 24, Liberal 21, New Democratic Party 12.

ECONOMY

Finance.—The projected revenue for the province in the fiscal year 1989–90 is C\$4,679 million while expenditures are forecast at C\$4,766 million.

Agriculture.—The total land area in Manitoba is 135,342,565 acres, of which 19,126,517 acres are in occupied farms. The gross value of agriculture production in 1986 was estimated at C\$2,200 million.

Manufactures.—Manufacturing enterprises employed about 57,000 persons on average in 1986. The chief manufacturing centres are Winnipeg, Brandon, Selkirk and Portage la Prairie. The largest manufacturing industry is the food and beverage industry, followed by the machinery and metal fabricating industries.

CAPITAL.—Winnipeg, population 595,000. Other cities are Brandon (38,708), Thompson (14,701), Portage la Prairie (13,198) and Flin Flon (7,243).

NEW BRUNSWICK

Area and Population.—New Brunswick is situated between 45°–48° N. lat. and 63° 47'–69° W. long. and

comprises an area of 28,355 sq. miles (73,439 sq. km.), with a population (June 1986 Census) of 710,422. It was first colonized by British subjects in 1761, and in 1783 by inhabitants of New England, who had been dispossessed of their property in consequence of their loyalty to the British Crown. New Brunswick entered Confederation in 1867.

Government.—Government is administered by a Lieutenant Governor, an Executive Council, and a Legislative Assembly of 58 members elected by the people. The present Legislative Assembly of the Province was elected on Oct. 13, 1987 and has 58 members, all of whom are from the Liberal Party.

ECONOMY

Finance.—The estimated revenue for the year ending March 31, 1988, was C\$3,024,858,732 and ordinary expenditure, \$3,131,700,768.

Manufactures.—New Brunswick's largest manufacturing group, in terms of shipments, is the paper and allied industries, followed by the food and wood industries. Together these industries accounted in 1988 for 61·8 per cent of the total value of manufacturing shipments of C\$4,602·6 million. Saint John has a major ice-free port and is the principal manufacturing centre of the Province.

Agriculture.—Total land area 27,633 sq. miles; farms numbered 3,554 and averaged 284 acres each in 1986. Dairy products and potatoes are the leading agricultural products. Both industries together accounted for 44·7 per cent of total farm cash receipts in 1988. Farm cash receipts in 1988 totalled C\$251,593,000.

Fisheries.—Fishing is an important industry, employing about 7,900 fishermen. The chief commercial fish are lobsters, herring, tuna, crab and cod. Landings reached 134,207 tonnes valued at C\$108,655,000 in 1988.

Minerals.—Extensive zinc, lead and copper deposits are now being mined in the north-eastern part of the Province with New Brunswick being the third largest producer of zinc in Canada. A lead smelter, fertilizer plant and port facilities have been constructed at Belledune. Canada's only primary antimony producer is located at Lake George. There is exploration and development near Sussex and Salt Springs, where potash production continues to escalate. A potash terminal has been built at the port of St. John. Coal is mined at Grand Lake and exploration for other deposits is being undertaken. Total mineral production was valued at C\$831,055,000 in 1988.

Tourism is of increasing value to the economy.

CAPITAL.—Fredericton: population (1986), 65,768. Other cities are Saint John (121,265); Moncton (102,084); Bathurst (34,895); Edmundston (22,614); Campbellton (17,418).

NEWFOUNDLAND AND LABRADOR

Area and Population.—The Island of Newfoundland is situated between 46° 37'–51° 37' N. latitude and 52° 44'–59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American continent by the Straits of Belle Isle on the N.W. and by Cabot Strait on the S.W. The island is about 317 miles long and 316 miles broad and is triangular in shape. It comprises an area of 43,008 sq. miles (111,890 sq. km.), with a population (1986 Census) (inclusive of Labrador) of 568,349.

Labrador forms the most easterly part of the North American continent, and extends from Point St. Charles, at the northeast entrance to the Straits of Belle Isle, on the south, to Cape Chidley, at the eastern entrance to Hudson's Straits on the north. It has an area of 113,641 sq. miles (294,328 sq. km.), with a population (1986 Census) of 28,741. Labrador is noted for its cod fisheries and also possesses valuable salmon, herring, trout and seal fisheries.

Government.—On March 31, 1949 Newfoundland became the 10th Province of the Dominion of Canada. The Government is administered by a Lieutenant Governor, aided by an Executive Council and a Legislative Assembly of 52 members elected for a term of five years. A General Election was held on April 20, 1989. The standings in the current House of Assembly are: Liberals, 32; Progressive Conservatives, 20.

ECONOMY

Finance.—The estimated gross capital and current account revenues for 1989–90 were C\$2,894,581,000 and the gross current and capital account expenditures C\$3,148,019,200.

Production and Industry.—The main primary industries are fishing, forestry and mining. In 1984 shipments of fish products were valued at C\$450 million. In 1988 newsprint shipments from the three pulp and paper mills were valued at C\$517 million, mining plus structural materials shipments were estimated at C\$888.5 million (1988 provisional figs.), of which C\$726.6 million was from the two iron ore mines in Labrador. Manufacturing shipments with the exclusion of fish and paper products totalled approximately C\$750 million in 1988. The hydroelectric plant on the Churchill river is the largest underground plant in the world, with a capacity of 5,225,000 kw.

Petroleum and Natural Gas.—Over 137 wells have been drilled off Newfoundland since 1965. Discovery of oil was made in 1979 on the Grand Banks. Oil production is expected to begin in the 1990's, with peak production of 110,000 barrels of oil a day. In 1988 (provisional figs.) offshore exploration expenditure was approximately C\$175 million.

Transport.—The Province is connected to mainland Canada by a ferry service from North Sydney, Nova Scotia to Port aux Basques and Argentina. An official agreement on June 20, 1988 signified the end of the railway in Newfoundland. Transport between various points on the island is by highway but the south coast and Labrador still rely on the coastal boat service.

CAPITAL.—St. John's (population 1986 Census, Greater St. John's 161,901) is North America's oldest city, and thus of historical interest and is the seat of the provincial legislature, the site of most provincial and federal government offices and the principal port for the island of Newfoundland. Newfoundland's second city of Corner Brook (population 1986 Census, 22,719) is situated on the west coast, its principal industry being its pulp and paper mill.

NOVA SCOTIA

Area and Population.—Nova Scotia is a peninsula between 43° 25'–47° N. lat. and 59° 40'–66° 25' W. long., and is connected to New Brunswick by a low fertile isthmus about 17.5 miles wide. It comprises an area of 21,425 sq. miles (55,490 sq. km.), including 1,023 sq. miles of lakes and rivers and 6,479 miles of shoreline. No place is more than 35 miles from the Atlantic Ocean. Population (April 1989 estimate) 885,700.

Government.—The Government consists of a Lieutenant Governor and a 52-member elected Legislative Assembly, from which the Executive Council is selected. The state of the parties in June 1989 was Conservatives 28, Liberals 21, New Democratic Party 2 and Independent 1.

The Lieutenant Governor represents the Queen and is appointed by the Governor-in-Council.

ECONOMY

Finance.—The revenue for the fiscal year ending March 31, 1988, was C\$3,164,459 and expenditure was C\$3,283,606. The net direct debt was C\$3,755,603.

Manufacturing.—Manufacturing constitutes the most important goods producing sector of the economy. Shipments were worth C\$4,356 million in 1988 with a total added value estimated to be about C\$1,800 million. Manufacturing plants provide employment for 46,000 or 11 per cent of the labour force. Capital expenditure in the manufacturing sector has increased from C\$599.4 million in 1988 to C\$528.9 million in 1989.

Utilities.—Electric power in Nova Scotia is supplied by the Nova Scotia Power Corporation, a Crown corporation. The Corporation's generating stations, which are predominantly coal fired have a nameplate capacity of 1,964,305 kilowatts. The Corporation's generating system is made up of seven thermal plants, three gas turbines, 33 hydro stations scattered throughout the Province and one tidal power station.

Petroleum Activity.—By mid-1988 ■ total of 125 wells had been completed off-shore since drilling began in 1967, the drilling being done by five major operations. There was one well drilled onshore in 1988-89.

Mining.—The total value of mineral production in 1988 (preliminary) was estimated at C\$504,560,000. Dollar value of production for specific minerals was:—

Coal	C\$213,449,000
Sand and gravel	36,000,000
Salt	51,585,000
Limestone	1,640,900

Agriculture.—Farm cash receipts were about C\$307 million in 1988. About 3 per cent of the total area, or 390,000 acres, is classified as farm land. Dairy, horticulture, cattle, hogs, fur and poultry products form the largest sectors.

Fishing.—A total of 519,600 tonnes of fish and shellfish was harvested in 1988 for a landed value of C\$437,650,000.

Forest Products.—The gross value of shipments in the manufacturing sector was C\$840,436,000 in 1988. Forest lands total 10,800,000 acres or 84 per cent of the land area. About 71 per cent of forest land is privately owned. Forest based industries employed an average of 10,200.

Tourism.—Between May 15 and October 31, 1988, over 1.2 million visitors spent about C\$276 million in the Province.

CAPITAL.—■ Halifax, including the neighbouring city of Dartmouth, has a population of 178,820. In addition to ■ container-handling terminal in South Halifax a new terminal at the north end of Halifax Harbour was opened in 1981. A 90-acre autoport has been built at Port Halifax to handle both the export and import of motor vehicles. A shipyard, with dry-dock, can build and repair the largest ocean-going liners. The harbour, ice-free the year round, is the main Atlantic winter port of Canada. Other cities and towns include ■ Sydney (27,754), ■ Glace Bay (20,467), Amherst (9,671) and New Glasgow (10,022).

Cape Breton Island

This has been part of Nova Scotia since 1819. It is the centre of the steel manufacturing and coal mining industries, and is also noted for its lakes and coastal scenery, making it ■ tourist attraction in Canada.

ONTARIO

Area and Population.—The Province of Ontario contains a total area of 412,578 sq. miles (1,068,572 sq. km.), with a population (1986 Census) of 9,113,515.

PHYSICAL FEATURES

Australia, including Tasmania, comprises a land area of 7,682,300 square kilometres lying between latitudes 10°41'S (Cape York) and 43°39'S (South East Cape, Tasmania) and longitudes 113°09'E (Steep Point) and 153°39'E (Cape Byron). The latitudinal distance between Cape York and South East Cape is about 3,680 kilometres and the longitudinal distance between Steep Point and Cape Byron is about 4,000 kilometres. (The latitudinal distance between Cape York and the most southerly point on the mainland South Point, Wilson's Promontory, is about 3,180 kilometres.)

Australia has three major landforms: the western plateau, the interior lowlands and the eastern uplands. The western half of the continent consists mainly of a great plateau of altitude 300–600 metres. The interior lowland includes the channel country of southwest Queensland (drainage to Lake Eyre) and the Murray-Darling river system to the south. The eastern uplands consist of a broad belt of varied width extending from north Queensland to Tasmania and composed largely of tablelands, ranges and ridges with only limited mountain areas above 1,000 metres. The highest point is Mt. Kosciusko (2,228 m.) and the lowest, Lake Eyre (−15 m.).

Australia's large area and latitudinal range have resulted in climatic conditions ranging from the alpine to the tropical. Two thirds of the continent is arid or semi-arid although good rainfalls (over

800 mm annually) occur in the northern monsoonal belt under the influence of the Australian Asian Monsoon and along the eastern and southern highland regions under the influence of the great atmospheric depressions of the Southern Ocean. The effectiveness of the rainfall is greatly reduced by marked alternations of wet and dry seasons, unreliability from year to year, high temperatures and high potential evaporation.

Fifty per cent of the area of Australia has a medium rainfall of less than 300 mm per year and 80 per cent has less than 600 mm. Extreme minimum temperatures are not as low as those recorded in other continents because of the absence of extensive mountain masses and because of the expanse of ocean to the south. However, extreme maxima are comparatively high, reaching 50 C. over the inland, mainly due to the great east-west extent of the continent in the vicinity of the Tropic of Capricorn.

Only one third of the Australian land mass drains directly to the ocean, mainly on the coastal side of the Main Divide and inland with the Murray-Darling system. With the exception of the Murray-Darling system, most rivers draining to the ocean are comparatively short and account for the majority of the country's average annual discharge.

GOVERNMENT

The Commonwealth of Australia was constituted by an Act of the Imperial Parliament dated July 9,

1900, and was inaugurated Jan. 1, 1901. The Government is that of a Federal Commonwealth within the British Commonwealth of Nations, the executive power being vested in the Sovereign (through the Governor General), assisted by a Federal Ministry of Ministers of State. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. The right of a State to legislate on any matter is not abrogated except in connection with matters exclusively under Federal control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

CURRENCY.—Australian dollar (\$A) of 100 cents.

FLAG.—The British Blue Ensign, consisting of a blue flag, with the Union Flag occupying the upper quarter next the staff, differenced by a large white star (representing the six States of Australia and the Territories of the Commonwealth) in the centre of the lower quarter next the staff and pointing direct to the centre of the St. George's Cross in the Union Flag and five white stars, representing the Southern Cross, in the fly.

NATIONAL ANTHEM.—Advance Australia Fair.

THE LEGISLATURE

Parliament consists of the Queen, the Senate and the House of Representatives. The Constitution provides that the number of members of the House of Representatives shall be, as nearly as practicable, twice the number of Senators. Members of the Senate are elected for six years by universal suffrage, half the members retiring every third year. Each of the six States returns an equal number of 10 Senators, and the Australian Capital Territory and the Northern Territory two each. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of five members for each State. There are now 148 members in the House of Representatives, including one member for the Northern Territory and two for the Australian Capital Territory. Members of both Houses received \$A46,065 per annum, plus allowances, with air and rail travel at Government expense while on parliamentary business.

President of the Senate, Senator Hon. K. Sibraa.

Speaker, House of Representatives, Hon. Joan Child.

DEFENCE

A single Department of Defence was created in 1973, following the abolition of the Departments of the Navy, Army and Air, though the separate identities of the three services have been retained. The defence research and development elements of the former Department of Supply, along with other research groups on the three services, were incorporated in 1978 into the Defence, Science and Technology Organization. The Chief of Defence Force Staff is responsible for command of the Defence Force through the three Service Chiefs of Staff and is also the principal military adviser to the Minister.

The Secretary to the Department of Defence is responsible to the Minister for Defence for advice on policy, resources and organization.

Total defence expenditure was \$A 7,578,169,000 in 1986-87.

BANKING

In June 1987 the trading banks had total liabilities of \$A114,871 million including total deposits of \$A57,367 million; and total assets of \$A126,844 million, including \$A10,870 million of Commonwealth Government securities.

PRODUCTION AND INDUSTRY

In 1985, 63·6 per cent of the Australian land area consisted of agricultural establishments, with the remainder being urban areas, State forests, mining leases and unoccupied land. Crop-growing areas constituted up to 4·32 per cent of the total agricultural establishments, emphasizing the relative importance of the livestock industries in Australia (sheep in the warm, temperate, semi-arid lands and beef cattle in the tropics).

The wide range of climatic and soil conditions over the agricultural regions of Australia has resulted in a diversity of crops being grown throughout the country. Generally, cereal crops (excluding rice and sorghum) are grown in all States over wide areas, while other crops are confined to specific locations in a few States. However, scanty or erratic rainfall, limited potential for irrigation and unsuitable soils or topography have restricted intensive agriculture.

Mines and Minerals.—Significant mineral resources comprise bauxite, coal, copper, crude petroleum, gems, gold, ilmenite, iron ore, lead, limestone, manganese, nickel, rutile, salt, silver, tin, tungsten, uranium, zinc and zircon. Recently, geological exploration has significantly increased the mineral resources of the nation.

Australia now has fourteen oilfields in production: Alton, Bennett, Conloli, Kincora, Moonie and Trindad in Queensland; Barracouta, Cobia, Halibut, Kingfish, Mackerel and Tuna in Victoria in the offshore Gippsland Basin and Dongara and Barrow Island in Western Australia.

In 1983-84, value added by the mining industry was \$A8,825.4 million. Mine production of black coal was 116,346,000 tonnes, crude oil (incl. condensate) was 26,826 megalitres and natural gas 12,098 gigalitres. Production of principal metals was:—

Iron ore	76,478,000 tonnes
Copper	249,282
Lead-Zinc concentrate	37,932
Gold	33,881 kg.

Manufactures.—In 1983-84 there were in Australia 27,470 industrial establishments, employing 1,009,376 persons; wages paid amounted to \$A17,461m; purchases, transfers in and selected expenses \$A54,666m; value added by manufacture \$A34,229m; and turnover \$A88,632m.

Trade Unions.—On June 30, 1985, there were 323 reporting trade unions in Australia with a total membership of 3,154,200.

Railways. —There are six government owned railways systems, operated by the State Rail Authority of N.S.W., Victorian Railways, Queensland Government Railways, Western Australian Government Railways, the State Transport Authority of Southern Australia, and the Australian National Railways Commission. The A.N.R.C. incorporates the former Commonwealth Railways system, and the Tasmanian and non-metropolitan South Australian railways (urban rail services in Southern Australia remain the responsibility of the State Transport Authority). In 1985-86 there were 38,760 route-kilometres open. Gross earnings 1985-86 were:	\$A million
New South Wales	1,082.4
Victoria	335.0
Queensland	966.0
South Australia*	14.6
Western Australia	262.0
A.N.R.C.	283.3

* Includes urban rail operations only.

In 1985–86 there were 377,520,000 rail passenger journeys on government railways and 171,841,000 tonnes of goods and livestock carried.

Shipping.—Total arrivals and departures (one arrival and one departure per voyage, irrespective of the number of ports visited) of vessels engaged in overseas trade at the various Australian ports in 1986–87 were: arrivals 6,707 (300,348,000 deadweight tonnes); departures 6,507 (296,952,000 deadweight tonnes).

Posts and Telegraphs.—In the year ended June 30, 1984, there were 4,790 post offices dealing with a total of 3,083,060 postal articles. Internal telegrams despatched numbered 3,668,907. At June 30, 1984, there were 53,600 telephones per 100 population.

Broadcasting and Television.—On June 30, 1984, the Australian Broadcasting Corporation operated 144 stations. Privately owned commercial broadcasting stations totalled 137. On June 30, 1984, 276 national and 152 commercial television and translator stations were in operation.

Motor Vehicles.—At June 30, 1987, there were 9,022,700 motor vehicles registered in Australia and 351,600 motor cycles.

Civil Aviation.—Figures for domestic and overseas services in 1985–86 are as follows:

	Domestic	Overseas
Paying passengers	12,057,000	2,671,000
Freight (tonnes)	150,369	91,961

FEDERAL CAPITAL

CANBERRA is the capital of Australia. It is situated in the Australian Capital Territory which has an area of 939 sq. miles (2,395 sq. km.) and was acquired from New South Wales in 1911. Canberra, which is the seat of the federal government, had a population (estimated) at June 30, 1986, of 281,000. Apart from Parliament House, the city also contains other national institutions, such as the Australian War Memorial, National Library, Royal Australian Mint and the Australian National University. Most Government departments have their headquarters in Canberra. An artificial lake is a central feature of this planned city, based on Walter Burley Griffin's design.

THE NORTHERN TERRITORY

The Northern Territory has a total area of 519,770 sq. miles (1,346,200 sq. km.), and lies between 129°–138° east longitude and 11°–26° south latitude. The estimated population in the Northern Territory at June 1987 was 158,400, of which about a quarter are Aboriginals.

The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia.

The Northern Territory (Self-Government) Act 1978 established the Northern Territory as a body politic as from 1 July 1978, with Ministers having control over and responsibility for Territory finances and the administration of the functions of government as specified by the Federal Government by regulations made pursuant to the Act. Proposed laws passed by the Legislative Assembly in relation to a transferred function require the assent of the Administrator. Proposed laws in all other cases may be assented to by the Administrator or reserved by the Administrator for the Governor General's pleasure. The Governor General may disallow any laws assented to by the Administrator within six months of the Administrator's assent.

The Northern Territory has federal representation

electing one member to the House of Representatives and two members to the Senate.

Seat of Administration.—Darwin.

Administrator. His Honour the Honourable J. H. Muirhead, Q.C.

THE MINISTRY

Chief Minister and Treasurer. Hon. Marshall Perron.
Deputy Chief Minister, Minister for Mines and Energy, Industries and Development. Hon. Barry Coulter.

Attorney General, Lands and Housing, Conservation. Hon. Daryl Manzie.
Health and Community Services. Hon. Don Dale.

Education and Assisting on Constitutional Development. Hon. Tom Harris.
Transport and Works. Hon. Fred Finch.

Labour, Administrative Services and Local Government. Hon. Terry McCarthy.
Tourism, Assisting on Central Australian Affairs. Hon. Eric Poole.

Primary Industry and Fisheries. Hon. Mike Reed.

Various Aboriginal Land Trusts hold title to land previously called Reserves, totalling about one-fifth of the Northern Territory.

The Aboriginal Land Rights (N.T.) Act of 1976 provides for the investigation and determination of Aboriginal traditional claims to vacant Crown land or land already owned by or on behalf of Aboriginals. Successful land claims to date have increased Aboriginal ownership to 34 per cent of the Northern Territory whilst a further 13 per cent is the subject of claims.

A number of major Aboriginal communities previously administered by Church Mission Societies and the Federal Government are now controlled by the Aboriginal people themselves, through local Aboriginal Councils. A recent phenomenon is the voluntary movement of some Aboriginals to their traditional homeland areas where they feel that their culture will be better preserved.

ECONOMY

Northern Territory's economy is based on the exploitation of its natural resources of minerals, land, fisheries and tourist attractions. Following the introduction of a number of government measures designed to expand and diversify primary production, the Territory's agricultural and horticultural industries are also beginning to contribute an increasing amount to Territory rural output.

The beef cattle industry continues to be the major user of pastoral lands and cattle production in the financial year to 1988 was valued at \$A109 million.

The buffalo population, estimated at 100,000 head, is confined to the Darwin and Gulf districts. Live buffalos and buffalo meat products are an important export, currently valued at \$A9·9 million.

The Territory's six main crops are sorghum, maize, mung beans, soybeans, peanuts and rice. A total of 8,955 hectares was harvested in 1987–88 and was valued at \$A1,789,600.

In 1988, 1,400 hectares were used for horticulture in the Territory, yielding crops valued at \$A13·2 million. Crops include a wide range of temperate and tropical fruit and vegetables.

The annual gross value of production of the Northern Territory's fishing industry was approximately \$A33·5 million in 1988. The industry is based on barramundi and prawn fisheries. Other resources, such as mud crab, shark, mackerel and offshore reef fish are becoming increasingly important. A mooring basin for protection of the fleet from cyclonic conditions has been constructed.

Mining has played a major part in the development of the Northern Territory and in the calendar year 1988 the industry produced minerals with a value of \$A1,199 million. The Territory is a leading uranium producer, extracting 3,713,287 kg of uranium oxide in 1988 with a value of \$A254 million. In 1988 1.97 million tonnes of manganese was sold, with a total value of about \$A126 million. Gold production for 1988 was valued at \$A195 million.

Tourism is of importance to the Territory's economy. It is a major growth industry and generates over \$A300 million annually.

COMMUNICATIONS

The Northern Territory has three main ports—Darwin, managed by the Darwin Port Authority; and the private mining ports of Gove, operated by Nabalco Pty. Ltd., and Groote Eylandt, operated by Groote Eylandt Mining Co. Pty. Ltd.

The new standard gauge rail link between Southern Australia and Alice Springs was officially opened in October, 1980. The link between Alice Springs and Darwin is provided by a fully co-ordinated rail-road service.

The main population centres are linked by the Stuart Highway, which connects Alice Springs to Darwin via Tennant Creek and Katherine. Of special interest to the Northern Territory is the operation of "road trains". These are basically massive trucks hauling two or three trailers, having a net capacity of about 100 tonnes and measuring up to 45 metres in length.

Darwin is a port of call for international air services between Australia and Asia, and New Zealand. Within Australia, there are flights from Darwin to all Australian capital cities by two major domestic carriers, Australian Airlines and Ansett Airlines of Australia. Internally, the main Territory centres of Katherine, Tennant Creek, Alice Springs, Ayers Rock, Nhulunbuy and Groote Eylandt are linked by Ansett N.T. All the major centres can take jet passenger traffic.

AUSTRALIAN EXTERNAL TERRITORIES

ASHMORE AND CARTIER ISLANDS

Ashmore Islands (known as Middle, East and West Islands) and Cartier Island are situated in the Indian Ocean some 850 km. and 790 km. west of Darwin respectively. The islands lie at the outer edge of the continental shelf. They are small and low and are composed of coral and sand. Vegetation consists mainly of grass. Turtles are plentiful at certain times of the year and beche-de-mer is abundant. The islands are uninhabited.

Great Britain took formal possession of the Ashmores in 1878 and Cartier was annexed in 1909. By Imperial Order in Council of July 23, 1931, the islands were placed under the authority of the Commonwealth of Australia, and were accepted in 1933 under the name of the Territory of Ashmore and Cartier Islands. The territory was annexed to the Northern Territory of Australia. With the granting of self-government to the Northern Territory on July 1, 1978, responsibility for the administration of Ashmore and Cartier Islands became a direct responsibility of the Commonwealth Government. In 1983 Ashmore Reef was declared a national nature reserve.

In accordance with an agreement between the governments of Indonesia and Australia, Indonesian fishermen who have traditionally plied the area may engage in limited fishing activity within the territory but are prohibited from taking any products from the nature reserve. They can land to collect water at certain locations.

THE AUSTRALIAN ANTARCTIC TERRITORY

The Australian Antarctic Territory was established by an Order in Council, dated February 7, 1933, which placed under the government of the Commonwealth of Australia all the islands and territories, other than Adélie Land, which are situated south of the latitude 60° S. and lying between 160° E. longitude and 45° E. longitude. The Order came into force on August 24, 1936, after the passage of the Australian Antarctic Territory Acceptance Act, 1933. The boundaries of Terre Adélie were definitely fixed by a French Decree of April 1, 1938, as the islands and territories south of 60° S. latitude lying between 136° E. longitude and 142° E. longitude. The Australian Antarctic Territory Act 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable, in force in the Australian Antarctic Territory. The territory is administered by the Antarctic Division of the Department of Science, which, since its inception in 1947, has organized yearly expeditions to Antarctica, known as Australian National Antarctic Research Expeditions (ANARE).

On February 13, 1954, ANARE opened Mawson Station in Mac-Robertson Land at latitude 67° 36' S. and longitude 62° 53' E. Scientific research conducted at Mawson includes upper atmosphere physics, cosmic ray physics, meteorology, earth sciences, biology and medical science. Mawson is also a centre for coastal and inland exploration.

Davis Station was opened on the coast of Princess Elizabeth Land on January 13, 1957, at latitude 68° 35' S. and longitude 77° 58' E. Scientific programmes carried out at Davis include meteorology, biology, upper atmosphere physics, with field investigations in biology.

In February, 1959, the Australian Government accepted from the U.S. Government custody of Wilkes Station on the Budd Coast, Wilkes Land. The station was closed in February 1969, and activities were transferred to the nearby Casey Station at 66° 17' S., 110° 32' E. Scientific programmes carried out there include geophysics, meteorology with field programmes in glaciology, geology, etc.

Each of the stations on continental Antarctica are being replaced by new station buildings of advanced design, in a building programme which is expected to be completed in 1998.

Since 1948 ANARE has operated a station on Macquarie Island, a dependency of Tasmania, situated at 54° 30' S. and 158° 57' E., about 900 miles north of the Antarctic Continent.

Summer stations have been established in the Bungar Hills, 200 miles west of Casey, at Cape Denison in Commonwealth Bay, in the Larsemann Hills and on Heard Island.

CHRISTMAS ISLAND

Until the end of 1957 a part of the then Colony of Singapore, Christmas Island was administered as a separate colony until October 1, 1958, when it became an Australian territory. It is situated in the Indian Ocean about 224 miles S. of Java Head. Area 52 sq. miles. Population (estimated, June 30, 1988) is 1,100, consisting of former employees of the Phosphate Mining Corporation, and present employees of the Christmas Island Services Corporation, the Administration, and their families. There is no indigenous population.

The island is densely wooded and had extensive deposits of phosphates, the extraction of which has traditionally been the major economic activity. An Australian Government company, the Phosphate Mining Corporation of Christmas Island, which carried out the mining operation ceased operating on Dec. 31, 1987. Extensive deposits of low grade

phosphate ore still remain but alternative economic development is being encouraged. The principal current development is a hotel complex.

The Administrator is responsible to the Australian Minister for Arts, Sport, the Environment, Tourism and Territories in Canberra. The second local elections were held in Oct. 1986 and nine members were elected to the Christmas Island Assembly. The Assembly is responsible for directing the operations of the Christmas Islands Services Corporation, which was established in 1984 to provide municipal functions and services.

Administrator, Hon. A. D. Taylor, O.B.E.

Cocos (Keeling) Islands

The Cocos (Keeling) Islands were declared a British possession in 1857. All land in the islands was granted to George Clunies-Ross and his heirs by Queen Victoria in 1886. In 1955 the islands, which had been governed through the British colonies of Ceylon (from 1878), the Straits Settlements (1886) and Singapore (1903), were accepted as a Territory of Australia.

In 1978 the Australian Government purchased all Clunies-Ross land and property interests except for the family home and grounds. In 1979 ownership of the kampong area of Home Island was transferred to the Cocos (Keeling) Islands Council, the local government body established in 1979. Title to most of the remaining land purchased from Clunies-Ross in 1978 was transferred to the Council in 1984.

The Cocos (Keeling) Islands Act, 1955, provides the legal framework for the present political and administrative arrangements in the Territory. On April 6, 1984, the Cocos community, in a U.N. supervised Act of Self-Determination, chose to integrate with Australia. The Government's major commitment was that living standards would reach comparable mainland levels by 1994. The Commonwealth Grants Commission monitors the progress.

The islands are two separate atolls (North Keeling Island and, 24 km. to the south, the main atoll) comprising some 27 small coral islands with a total area of about 14 sq. km., situated in the Indian Ocean in latitude 12° 5' South and longitude 96° 53' East. The main islands of the southern atoll are West Island (the largest, about 9 km. from north to south) on which are the administrative centre, the aerodrome, and the Australian-based employees of government departments; Home Island, where the Cocos Malay community and the Clunies-Ross family live; Direction Island, Horsburgh and South Island.

The territory has no viable economic base at present. In 1986-87 the copra industry suffered severe losses and in 1987 ceased production. Tourism is being developed as a likely successor to the copra industry.

The climate is equable and pleasant, being usually under the influence of the south-east trade winds for about three-quarters of the year. A weekly air charter service operates between Perth, the Cocos (Keeling) Islands and Christmas Island. Population (June 30, 1988), 686. The islands are administered by the Australian Government through the Department of the Arts, Sport, the Environment, Tourism and Territories in Canberra. All proposed Ordinances, Regulations and By-laws for the islands must be submitted to the Islands Council (est. 1979) for its consideration.

Acting Administrator, Ms. D. Lawrie.

Coral Sea Islands Territory

The Coral Sea Islands Territory lies east of Queensland between the Great Barrier Reef and longitude 156° 06' E., and between latitudes 12° and 24° S. It comprises scattered islands, often little more

than sandbanks, spread over a sea area of 780,000 sq. km. The islands are formed mainly of coral and sand. Some have grass or scrub cover but most are extremely small, with no permanent fresh water.

There is a manned meteorological station in the Willis Group but the remaining islands are uninhabited. Large populations of sea birds nest and breed in the area, and two national nature reserves were designated in the Territory in 1982.

The Australian Government bases its claim to the islands on numerous acts of sovereignty since early this century and enacted the Coral Sea Islands Act 1969 which declares the islands a territory of the Commonwealth of Australia. The Department of the Arts, Sport, the Environment, Tourism and Territories, Canberra, is responsible for the administration of the territory.

Heard Island and McDonald Islands

The Heard and McDonald islands, about 4,100 km. south-west of Fremantle, comprise all the islands and rocks lying between 52° 30' and 53° 30' S. latitude and 72° and 74° 30' E. longitude. Sovereignty over the islands was transferred by the U.K. to the Commonwealth of Australia in 1947. The Heard Island and McDonald Islands Act 1953 provides for the government of the islands as one territory. Under this Act the law operating there is that of the Australian Capital Territory. The islands are administered by the Department of the Arts, Sport, the Environment, Tourism and Territories. Under the Environment Protection and Management Ordinance 1987, a permit system regulates entry to the territory and a range of activities there.

Norfolk Island

Norfolk Island is situated in the South Pacific Ocean at latitude 29° 02' S. and longitude 167° 57' E., being about 1,042 miles from Sydney and 400 miles north of New Zealand. It is about five miles in length by three in breadth, with an area of 8,528 acres. The climate is mild and sub-tropical. Resident population at the 1986 Census was 1,977.

The island, discovered by Capt. Cook in 1770, served as a penal colony from 1788 to 1814 and 1825 to 1855. In 1856, 194 descendants of the *Bounty* mutineers accepted an invitation to leave Pitcairn and settle on Norfolk Island, which led to Norfolk Island becoming a separate settlement under the jurisdiction of the Governor of N.S.W. In 1897 Norfolk Island became a dependency of N.S.W., and in 1914, pursuant to the Norfolk Island Act 1913, a territory of Australia. From that date, Norfolk Island has been regarded as an integral part of Australia.

In 1979 Norfolk Island gained a substantial degree of self-government, enabling the island to run its affairs to the greatest practical extent. Wide powers are exercised by a nine-member Legislative Assembly. The Act preserves the Commonwealth's responsibility for Norfolk Island as a territory under its authority, with the Minister for the Arts, Sport, the Environment, Tourism and Territories as the responsible Minister. In 1985, responsibility for a range of matters was transferred, and the transference of more is proceeding.

The island is a popular tourist resort, and a large proportion of the population depends on tourism and its ancillaries for employment. In 1987-88 there were 28,192 tourist arrivals on the Island. Regular air services operate from mainland Australia and New Zealand.

Seat of Government and Administration Offices.—Kingston.

Administrator, H. B. McDonald.

STATES OF THE COMMONWEALTH OF AUSTRALIA

NEW SOUTH WALES

The State of New South Wales is situated entirely between the 28th and 38th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 sq. miles (801,427 sq. km.) (exclusive of 939 sq. miles of Australian Capital Territory which lies within its borders).

POPULATION.—Preliminary estimated resident population at Dec. 31, 1988 was 5,738,600.

Births, deaths and marriages of usually resident population were:

	1987	1988p
Births.....	85,650	84,139
Deaths.....	42,146	43,954
Marriages.....	38,380	38,741

p preliminary.

Annual rate per 1,000 of estimated resident population in 1988 (preliminary):—Births, 14.8; Deaths, 7.8; Marriages, 7.2. Deaths under 1 year per 1,000 live births, 9.0.

Religions

The members of the Roman Catholic Church in New South Wales, according to the Census of 1986, numbered 1,529,176, Anglican Church 1,519,806, Uniting (including Methodist) 327,360, Presbyterian 227,663, Orthodox 165,659, Baptist 67,187, Lutheran 31,890, other Christian 288,865, Muslim 57,551, Hebrew 28,236 and other religions 57,079. The religion of 1,101,409 persons was either not stated in the census schedules or was stated as "none".

PHYSIOGRAPHY

Natural features divide the State into four main zones extending from north to south, viz., the Coastal Districts; the Tablelands, which form the Great Dividing Range between the coastal districts and the plains; the Western Slopes of the Dividing Range; and the Western Plains. The highest points are Mount Kosciusko, 7,314 ft., and Townsend, 7,251 ft. The western portion of the State is watered by the rivers of the Murray-Darling system. The Darling, the major part of whose 1,712 miles is in N.S.W., and the Murrumbidgee, 981 miles, are both tributaries of the Murray, part of which forms the boundary between the States of New South Wales and Victoria.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is generally mild and mostly free from extremes of heat and cold. At Sydney the average mean shade temperature is 18°C with a range of 11°C between the hottest and coldest months. Rainfall varies widely over the State diminishing from an annual average of about 2,000 mm. in parts of the north coast to about 200 mm. in the far north west.

GOVERNMENT

New South Wales was first colonized as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 Responsible Government was granted, the present Constitution being founded on the Constitution Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

GOVERNOR

Governor of New South Wales, His Excellency Rear-Adm. D. J. Martin, A.O., assumed office Jan. 20, 1989.

Lt. Governor, The Hon. Sir Laurence Whistler Street,
K.C.M.G.

Banking, etc.—There were (March 1988) 29 trading banks with deposits of \$A24,920 million. Savings bank depositors' balances amounted to \$A18,571 million, representing \$A3,313 per head of the population.

EDUCATION

Education.—Education is compulsory between the ages of 6 and 15 years. It is non-sectarian and free at all government schools. The enrolment in July 1987 in 2,210 government schools was 755,084. In addition there were 852 non-government schools, with an enrolment of 275,940 students. The six universities had an enrolment of 69,726 students at April 30, 1987. In addition, there were 57,478 students enrolled in advanced education courses (predominantly in colleges of advanced education) in 1987. Students enrolled in technical and further education colleges in 1986 numbered 402,572. State Government recurrent expenditure on education was \$A3,620 million in the year ended June 30, 1986.

PRODUCTION AND INDUSTRY

Local value of production in 1986-87 was (\$A million):—

Agricultural commodities	\$A4,280.8
Crops	1,718.9
Livestock products	1,406.9
Slaughterings	1,154.9
Value added (\$A million)	
Mining and Quarrying (1985-86)	\$A2,155.0
Manufacturing (1984-85)	\$A14,036.6

<i>Crops.—Production in 1986-87 was (tonnes):</i>	
Wheat-grain	4,855,244
Wheat-hay	55,456
Barley	613,646
Oats	635,185
Rice	589,074
Cotton	499,356
Oilseed	156,452
Potatoes	121,573
Sugar-cane, crushed	1,276,084

611,733 kg. of dried leaf tobacco and 79,478,200 kg. of bananas were obtained; almost every kind of fruit and vegetable is grown.

Livestock and Livestock Products.—A large area is suitable for sheep-raising, the principal breed of sheep being the merino, which was introduced in 1797. At March 31, 1987, there were 4,868,047 cattle, 52,191,792 sheep and lambs, and 829,833 pigs. In 1986-87, 229,711,693 kg. of wool (in the grease) were produced, 829 tonnes of butter, 13,411 tonnes of cheese, and 26,062 tonnes of bacon and ham.

Mining Industry.—The principal minerals are coal, lead, zinc, gold, rutile, copper and zircon. The total value of minerals extracted in 1986-87 was \$A3,436,916,000, of which the value of output of the coal mining industry was \$A2,611,741,000 and of the silver-lead-zinc industry, \$A329,732,000 and the con-

struction materials industry, including stone, gravel and sand, was \$A304,845,000. The average number of persons employed in the mining industry during 1986-87 was 26,695. In 1986-87, 88,057,000 tonnes of coal were produced.

Manufacturing Industry.—At June 30, 1985, there were 10,238 manufacturing establishments (employing four or more persons). The average number of persons employed during 1984-85 was 364,847. Products include iron and steel, pipes, boilers, steel wire and wire netting, copper wire, copper and brass cables and tin-plate. Production of raw steel in 1986-87 was 5,080,000 tonnes.

OVERSEAS TRADE

	1987
Imports f.o.b.	\$16,131,220,000
Exports f.o.b.	8,360,569,000

The chief exports in 1986-87 were coal and coke, wool, wheat, meat, non-ferrous metal and iron and steel. Chief imports were, office machines and data processing equipment, electrical machinery, road vehicles and general industrial machinery.

TRANSPORT AND COMMUNICATIONS

Shipping.—2,751 vessels entered the major ports of N.S.W. from overseas during the year ended June 30, 1987, the deadweight tonnage being 97,767,734. The shipping entries at Sydney were 1,185 vessels of 27,901,296 deadweight tonnage.

Roads and Bridges.—Expenditures by the State Government and the local authorities on road systems and regulation in 1986-87 was \$A1,616.8 million.

Motor Vehicles.—At Dec. 31, 1987, there were 3,035,926 registered motor vehicles (cars, 1,910,986).

Railways.—The railways of New South Wales are controlled by the State Government. At June 30, 1987, the route kilometres of the State railways open for traffic was 9,909, revenue in the year 1986-87 being \$A1,840.6 million.

Aviation.—Sydney is the principal overseas terminal in Australia. Overseas and local traffic at Sydney airport in 1987 were: passengers 9,889,680; freight 200,513 tonnes; aircraft, 110,477 (provisional figs.).

Postal and Telecommunication Services.—The postal and telecommunication services are administered by the Commonwealth Government.

Radio and Television.—At June 30, 1987, there were 33 Australian Broadcasting Corporation radio stations and 44 commercial radio stations operating under licence in N.S.W. There were also 30 licensed non-profit radio stations providing special interest services not catered for by the A.B.C. and commercial services. At June 30, 1987, there were 27 television stations (14 A.B.C., 13 commercial) in operation in the state.

TOWNS

Sydney, the State capital and the largest city in Australia, stands on the shores of Port Jackson. Sydney Harbour extends inland for 21 km.: the total area of water is about 55 sq. km.

The preliminary estimated resident population at June 30, 1987 of the Sydney Statistical Division was 3,525,850. The Newcastle and Wollongong Statistical subdivisions contain populations of 418,960 and 233,650 respectively.

The populations of principal municipalities located outside the boundaries of these statistical areas are: Albury 39,610, Dubbo 31,290, Greater Taree 36,960, Hastings 42,220, Lismore 38,130, Orange 32,520, Shoalhaven 59,470, Tamworth 33,830, Wagga Wagga 50,930.

LORD HOWE ISLAND

Lord Howe Island, which is part of New South Wales, is situated 702 kilometres north-east of Sydney. Lat. 31° 33' 4" S., Long. 159° 4' 26" E. Area 6.37 sq. miles (16.5 sq. km.). Pop. June 30, 1987, 290. The island is of volcanic origin with Mount Gower reaching an altitude of 866 m. The affairs of the Island are administered by the Lord Howe Island Board.

QUEENSLAND

This State, situated in lat. 10° 40'-29° S. and long. 138°-153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 666,798 sq. miles (1,727,000 sq. km.).

POPULATION.—At June 30, 1988, the estimated resident population numbered 2,743,765.

Births, Deaths and Marriages were:

	1986	1987
Births.....	40,371	39,365
Deaths.....	17,861	18,861
Marriages	18,030	18,265

Annual rate per 1,000 of mean population in 1987: Births, 14.7; Deaths, 7.0; Marriages 6.8. Deaths under 1 year, 9.3 per 1,000 live births.

Religions

At the Census of 1986, there were 640,867 Anglican, 628,906 Catholics, 255,287 Uniting Church, 120,239 Presbyterians, 56,910 Lutherans, 30,089 Baptists, and 211,316 other Christians.

PHYSIOGRAPHY

The Great Dividing Range on the eastern coast of the continent produces similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Selwyn and Kirby Ranges divide the land into a northern and southern watershed.

GOVERNMENT

Queensland was constituted a separate colony with responsible government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 18 members.

Government Whip, A. A. Fitzgerald.

Leader of the Opposition, W. K. Goss.

THE JUDICATURE

There are ■ Supreme Court; District Courts; Children's Courts; an Industrial Court; ■ Land Court and a Medical Assessment Tribunal; ■ Local Government Court; the Industrial Conciliation and Arbitration Commission; Inferior Courts at all the principal towns, presided over by Stipendiary Magistrates; a Small Claims Tribunal; Small Debts Court; a Licensing Court and ■ Mining Warden's Court.

Chief Justice, Supreme Court, Hon. J. M. Macrossan.

Senior Puisne Judge, Hon. J. L. Kelly.

EDUCATION

Education is compulsory between the ages of 6 and 15 years and is provided free in Government schools. At July 1988 the State administered 1,078 primary, 69 primary/secondary, and 168 secondary schools with 237,309 primary students, and 143,011 secondary students.

Post-secondary education involves technical and further education (TAFE), advanced education, and university education. During 1987, 112,580 students were enrolled in TAFE courses, excluding 66,874 enrolled in adult education courses. At April 30, 1988, there were 18,106 full-time, 8,236 part-time, and 8,634 external students enrolled in advanced education courses. The three universities had enrolments of 18,287 full-time students, 8,236 part-time, and 2,085 external students at April 30, 1988.

PRODUCTION AND INDUSTRY

Agriculture and Livestock.—The provisional gross value of agricultural commodity production in 1987-88 was \$A3,935,009,000 (including crops \$A1,824,024,000, livestock disposals \$A1,405,716,000, livestock products \$A705,270,000).

The most important crops in 1987-88* were (tonnes):

Sugar cane 24,311,000

Wheat 738,000

Barley 269,000

Pineapples 145,100

Bananas 68,900

The livestock on March 31, 1988* included 8,795,000 cattle, 328,000 being dairy cattle, 14,306,000 sheep and 589,000 pigs.

* provisional figures.

Forestry.—Total Australian grown timber processed in 1987-88 amounted to 1,338,600 cubic metres (gross volume measure).

Minerals.—There are rich deposits of both metallic

and non-metallic minerals. Coal is mined extensively in Central Queensland and on a lesser scale in the Ipswich district.

Mineral Production Value (at mine), 1987-88

	\$A'000
Bauxite	186,244
Coal	2,144,962
Copper concentrate	409,250
Crude oil, natural gas, etc.	269,965
Gold (various forms)	400,556
Lead concentrate	212,979
Mineral sands	89,118
Nickel ore	12,149
Tin concentrate	3,193
Zinc concentrate (incl. middlings)	102,752
Other	275,375
Total	4,106,543

Manufacturing.—In 1986-87 there were 4,090 establishments with four or more workers, employing 117,935 persons, and producing goods and services worth \$A14,848 million. The value added was \$A5,053 million. Much of the production was the processing of primary products, e.g. foodstuffs, timber and minerals. Included in other factory production were the products from engineering, transport equipment, basic and fabricated metal, chemical and fertilizer works, cement, paper and textile mills and oil refineries.

FINANCE

Government finance (Consolidated Revenue Fund) (\$A'000) was:—

	1987	1988
Revenue	5,649,027	6,308,439
Expenditure	5,648,701	6,270,304
Gross Debt	2,477,500	2,444,925

Banking.—Advances made by Trading Banks (including the Commonwealth Trading Bank of Australia) at June 30, 1988, totalled \$A7,642,464,000. The deposits at the same date amounted to \$A8,672,061,000. Depositors' balances in Queensland savings banks at June 30, 1988, \$A8,637,225,000, averaged \$A3,149 for each inhabitant. There were 4,753,123 operative accounts.

OVERSEAS TRADE

	1986-87	1987-88
Imports	\$A2,503,854,410	\$A2,844,500,000
Exports	7,928,405,572	8,189,900,000

The chief overseas exports are coal, non-ferrous metals, meat, sugar, wool, and cereal grains.

COMMUNICATIONS

Road and Rail.—The State is served by 10,089 kilometres of railways. During 1987-88, 46,228,000 passengers and 74,893,000 tonnes of goods and livestock were carried. At June 30, 1988, there were 152,952 kilometres of formed roads in the State, and 1,616,200 motor vehicles were on the register.

Aviation.—Regular services operate between Brisbane, the main Queensland coastal and inland towns and the southern capitals. Brisbane, Townsville and Cairns are also ports of call on several international services.

Radio and Television.—On June 30, 1987, 11 national and 29 commercial sound broadcasting stations were operating in Queensland. There were seven public broadcasting stations.

CAPITAL.—ΨBrisbane, is situated on the Brisbane River, which is navigable by large vessels to the city, over 23 kilometres from Moreton Bay. The estimated resident population of the Brisbane Statistical Division at June 30, 1988 was 1,240,286. This area includes

the cities of Brisbane (739,794), Ipswich (74,987), Logan (134,031) and Redcliffe (47,177).

Other cities with population over 30,000 at June 30, 1988, are: ΨTownsville, 82,475; Gold Coast, 128,456; Toowoomba, 79,934; ΨRockhampton, 58,410; ΨCairns, 41,191; ΨCaloundra, 40,776; ΨThuringowa, 34,384; ΨBundaberg, 32,614.

SOUTH AUSTRALIA

The State of South Australia is situated between 26° and 38° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles (984,376 sq. km.).

POPULATION.—At June 30, 1988, the resident population was estimated to be 1,407,984.

Births, deaths and marriages were:

	1987	1988
Births	19,235	19,231
Deaths	10,531	10,716
Marriages	9,695	10,128

Religions

Religion is free and receives no State aid. At the Census, 1986, the persons belonging to the principal religious denominations were as follows: Catholic, 267,137; Anglican, 242,722; Uniting Church, 176,980; Lutheran, 64,851; Orthodox, 37,149; Baptist, 21,415; Presbyterian, 18,566; Church of Christ, 16,629; and Pentecostal, 14,997.

PHYSIOGRAPHY

The most important physical features of South Australia are broad plains, divided longitudinally by four great secondary features, which form barriers to east-west movement, and which have thus largely determined the direction of roads and railways, the sites of towns and villages and the manner of distribution of the population. These four barriers are Spencer Gulf, Gulf St. Vincent, the Mt. Lofty-Flinders Ranges and the River Murray.

The north-western portion of the State is mostly desert, while north of latitude 32° S. the country is unpromising by comparison with the fertile land which surrounds the hill country of the east. The Murray, which flows for some 400 miles through the south-eastern corner, is the only river of importance.

The lack of rivers and fresh-water lakes in the settled areas has necessitated the building of a number of reservoirs, which are supplemented by pipelines from the River Murray.

Climate.—The mean annual temperature at Adelaide is 17.1°C, the winter temperature (June-August) averaging 11.9°C, and the summer (Nov.-Mar.) 22.3°C. During the summer months the maximum temperature at times exceeds 40°C, but is associated with a relatively low humidity. The average annual rainfall at Adelaide is 21 inches.

GOVERNMENT

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 13 Ministers.

GOVERNOR

Governor of South Australia, His Excellency Lt. Gen. Sir Donald B. Dunstan, K.B.E., C.B. (1982).
Lt. Governor, The Hon. Sir Condor Laucke, K.C.M.G. (1982).

THE MINISTRY

Premier and Treasurer, Hon. John Bannon.
 Deputy Premier, Minister of Health, Community Welfare, the Aged, Hon. Donald Hopgood.
 Attorney General, Minister of Community Affairs, and Corporate Affairs, Hon. Christopher Sumner.
 State Development and Technology, Agriculture, Fisheries and Ethnic Affairs, Hon. Lynn Arnold.

 Local Government and the Arts, Hon. J. Levy.

AGENT-GENERAL IN LONDON

Agent-General, G. Walls, South Australia House, 50 Strand, WC2.

THE LEGISLATURE

Parliament consists of a *Legislative Council* of 22 members elected for 8 years, one-half retiring every 4 years; and a *House of Assembly* of 47 members, elected for a maximum duration of 4 years. Election is by ballot, with universal adult suffrage for both the Legislative Council and the House of Assembly.

The representation in the House of Assembly is 27 Labor, 16 Liberals, 1 National Party and 3 Independent.

President of the Legislative Council, Hon. Anne Levy \$A75,498
Speaker of the House of Assembly, Hon. J. P. Trainer \$A75,498

THE JUDICATURE

Law and Justice.—The Supreme Court is presided over by the Chief Justice and 13 Puisne Judges.

EDUCATION

Education at the primary and secondary level is available at Government schools controlled by the Education Department and at non-government schools, most of which are denominational. In 1988 there were 715 Government schools with 184,766 students, and 178 independent schools with 55,245 students. Tertiary education is available through universities, colleges of advanced education, and technical and further education.

The two universities had, in 1987, a total enrolment of 11,706 full-time students.

FINANCE

Revenue and expenditure of the Consolidated Revenue Account and debt of South Australia (year ended June 30) was:

	1987	1988
Revenue	3,788,253,000	4,867,400,000
Expenditure	3,778,336,000	4,833,100,000

Banking.—There are eleven trading banks in Adelaide, including the Commonwealth Trading Bank and the State Bank of South Australia, having total average deposits of \$A4,521,140,000 in June 1988. The nine savings banks had deposits of \$A3,807,801,000 at June 30, 1988.

PRODUCTION AND INDUSTRY

The gross value of primary production in 1987-88 was:—

Crops	\$A963,763,000
Livestock products	690,570,000
Slaughtering	395,508,000
Fisheries	107,542,000

Agriculture.—Wheat harvest 1986-87, 2,255,000 tonnes; barley, 1,592,000 tonnes. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and a quantity of this fruit is dried. In 1987-88, 210,359,000 litres of wine and 5,115 tonnes of sultanas, currants and raisins were produced. Considerable quantities of fruits (fresh and dried), wine and brandy, are annually sent to overseas countries, and to other Australian States. Some areas of the State, particularly near Adelaide, are also very suitable for growing all kinds of root crops and vegetables.

Livestock (March 31, 1989).—There were 17,339,800 sheep, 949,268 cattle, 421,247 pigs. Wool production (1987-88), 112,361,000 kg.

Minerals.—Iron, pyrite, gypsum, salt, coal, limestone, clay, oil and gas, etc., are found. The total mineral output was valued at \$A949,698,000 in 1987-88, including oil and gas valued at \$A686,319,000.

OVERSEAS TRADE

	1986-87	1987-88
Imports	1,501,827,000	1,804,614,000
Exports	2,047,147,000	2,263,360,000

The principal exports are wool, wheat, barley, meat, lead and lead alloys, silver, zinc, iron and steel, petroleum products, rock lobster and prawns.

TRANSPORT AND COMMUNICATIONS

The State Transport Authority operated (in 1988) 127 km. of railway and 1,031 km. of tram and bus routes in the metropolitan area. Australian National operated 6,345 km. of railway in country areas. There are 95,979 km. of roads.

There are a number of excellent harbours, of which Port Adelaide is the most important. The number of vessels (exceeding 200 net tonnage) entering South Australia from overseas during 1986-87 was 828 with 1,889,509 import tonnes and leaving with 6,381,640 export tonnes.

Civil Aviation.—There are 36 Government and licensed airports; the largest of these, Adelaide airport, recorded 1,976,613 passenger movements during 1987-88.

Motor Vehicles.—The registration on June 30, 1988, totalled 846,400.

Radio and Television (June 1989)—Broadcasting stations 43; Television stations 50 (including translator and satellite fed stations).

CAPITAL.—Adelaide, the chief city and capital, estimated resident population on June 30, 1988, 1,023,517 inclusive of suburbs. Other centres (with 1988 populations) are: Whyalla (27,317); Mt. Gambier (22,013); Port Pirie (15,182); Port Augusta (16,006); and Port Lincoln (12,909).

TASMANIA

Tasmania is an island state of Australia situated in the Southern ocean off the south-eastern extremity of the mainland. It is separated from the Australian mainland by Bass Strait and incorporates King Island and the Furneaux group of islands which are in the Strait. It lies between 40° 38'-43° 39' S. lat. and 144° 36'-148° 23' E. long., and contains an area of 26,383 sq. miles (68,331 sq. km.).

POPULATION.—The estimated resident population at December 31, 1988 was 449,300.

Births, deaths and marriages were:

	1987	1988
Births	6,790	6,748
Deaths	3,637	3,527
Marriages	3,141	3,034

Vital Statistics.—The birth rate in 1988 was 15·05, death rate 7·8, marriage rate 6·7 per 1,000. Infant mortality (1988) 8·7 per 1,000 births.

Religions

In 1986 there were 154,748 members of the Anglican Church of Australia, 80,479 Catholics, 36,724 Uniting Church of Australia, 12,084 Presbyterians and 8,092 Baptists.

PHYSIOGRAPHY

The surface of the country is generally hilly and wooded, with mountains from 1,500 to 5,300 ft. in height, and expanses of level, open plains. There are numerous rivers, the South Esk, Gordon, Derwent and Huon being the largest. At Hobart the mean maximum temperature ranges from about 12°C in winter to 21°C in summer, the mean minimum from 5°C to 11°C. The western side of the island is very wet, the eastern side being much drier.

GOVERNMENT

The island was first settled by a British party from New South Wales in 1803, becoming a separate colony in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 responsible government was established. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), but is exercised by Cabinet Ministers responsible to the Legislature, of which they are members.

GOVERNOR

Governor of Tasmania, Gen. Sir Phillip Bennett, K.B.E.

THE MINISTRY

Premier, Treasurer, Minister for State Development and Small Business, Status of Women, Science and Technology, Antarctic Affairs, Hon. Robin Gray.

Deputy Premier, Forests, Mines, Energy, Multicultural Affairs, Hon. Raymond Groom.

Attorney General, Minister for Lands, Parks and Wildlife, Sport and Recreation, Deregulation, Hon. John Bennett.

Education and the Arts, Employment and Training, Hon. Richard Beswick.

Main Roads, Primary Industry, Local Government, Water Resources, Racing, Hon. Ian Braid.

Police, Sea Fisheries, Licensing, Road Safety, Gaming, Hon. R. Cornish.

Tourism, Public Administration, Transport, Industrial Relations, Labour and Industry, Hon. Nicholas Evers.

Health, Community Welfare and the Elderly, Hon. Francis Groom.

Construction, Administrative Services, Environment, Inland Fisheries, Hon. Peter Hodgman.

Housing, Consumer Affairs, Youth Affairs, Hon. F. Madill.

THE LEGISLATURE

Parliament consists of two Houses, a *Legislative Council* of 19 members, elected for six years (3 retiring annually, in rotation, except in every sixth year, when four retire) and a *House of Assembly* of 35 members, elected by proportional representation for four years in five 7-member constituencies, the

electors for both Houses being all Tasmanians of 18 years and over who have resided continuously in the State for at least 6 months. Elections for the Assembly are held every four years.

The election of May 13, 1989 resulted in a minority Liberal Government being sworn in on June 1, 1989. The state of the parties in the Legislative Council following the election was Independent 18, Labor 1. The state of parties in the House of Assembly in June 1989 was: Liberals 17, Labor 13, Independent 5.

President of the Legislative Council, Hon. A. J. Broadby.

Speaker of the House of Assembly, Hon. R. Cornish.

THE JUDICATURE

The Supreme Court of Tasmania, with civil, criminal ecclesiastical, admiralty and matrimonial jurisdiction, was established by Royal Charter on October 13, 1823.

Local Courts are held before Commissioners who are legal practitioners. Courts of General Sessions, constituted by a chairman who is a Justice of the Peace and at least one other Justice, are established in the municipalities and Courts of Petty Sessions are constituted by Magistrates sitting alone, or by two or more justices. A single justice may hear and determine certain matters.

Chief Justice, Supreme Court, Hon. Sir Guy Green, K.B.E.

EDUCATION

Government schools are of three main types: primary, secondary and secondary colleges. On July 1, 1988, there were 65,404 students enrolled in 257 government schools. There were also 65 independent schools with an enrolment of 17,795. The University of Tasmania at Hobart, established 1890, had 3,712 full-time students and 1,665 part-time (including external) students in 1988. The Tasmanian State Institute of Technology, offering degree and diploma courses, was established in 1972. Enrolments in 1988 were 1,798 full-time students and 1,305 part-time (including external) students.

FINANCE

Revenue and expenditure of the Consolidated Revenue Fund and debt of Tasmania at current rates of exchange (June 30) was:

	1987-88
Revenue	\$A1,201,397,069
Expenditure	1,375,666,945
Debt	1,394,893,769

Banking.—The weekly average of depositors' balances at trading banks in December 1988 was \$A749,000,000; the savings bank balances were \$A1,761,000,000.

PRODUCTION AND INDUSTRY

Gross value of agricultural production in 1987-88 was \$A541m. Total value added in manufacturing in 1986-87 was \$A1,250·3m.; value added in mining was \$A177m. in 1986-87.

Agriculture and Livestock.—The principal crops are apples, potatoes, green peas, oil poppies, hops, barley, beans and onions.

The livestock included (March 31, 1988) 542,200 cattle, 4,746,400 sheep and 47,600 pigs. The shorn wool production (1987-88) was 23,519 tonnes.

Electrical Energy.—Tasmania, the smallest Australian state, ranks fourth as a producer of electrical energy—most of it derived from water power, with a total installed generator capacity of 2,171,400 kW. By reason of its low-cost electrical energy, Tasmania has large plants producing ferro-manganese and newsprint. A large aluminium plant is situated at Bell Bay and Tasmania is the source of the bulk of

Australian requirements of zinc and fine papers. The Hydro-Electric Commission has completed a network of 26 stations including a dual machine oil fired station at Bell Bay. Work is continuing on three hydro-electric developments in the remote western region of the State, which will increase the installed generator capacity to 2,54 million kW.

Forestry.—The quantity of timber (excluding firewood) of various species cut in 1987–88 was 4,784,500 cubic metres, including 3,892,000 cubic metres for woodchip and wood-pulp.

Minerals.—The chief ores mined are those containing copper, tin, iron, silver, zinc and lead.

Manufactures.—The chief manufactures for export are: refined metals, preserved fruit and vegetables, butter, cheese, textiles, paper, confectionery, wood chips and sawn timber. In 1986–87, 631 manufacturing establishments employed 24,600 persons, including working proprietors. Salaries and wages paid totalled \$A531m.

OVERSEAS TRADE

	1986–87	1987–88
Imports	\$A289,525,000	\$A282,415,000
Exports	1,099,808,000	1,221,955,000

The principal overseas exports are ores and concentrates, refined metals, woodchips, greasy wool, meat, abalone, fresh fruit, cheese and hides and skins.

COMMUNICATIONS

Road and Rail.—Tasmania is served by a 1,067 mm. gauge Federal Government railway system of 856 route km. An additional 134 route km of the same gauge is privately operated. Regular passenger services no longer operate. At June 30, 1987 there were 22,715 kilometres of road normally open to traffic. Of this total 8,905 kilometres were sealed. Motor vehicles on the register at June 30, 1988 were: cars and station wagons, 209,400; commercial vehicles, 62,700 and motor cycles, 6,000.

Aviation.—Regular services operate between Tasmania and the other Australian States. During 1987–88 1,132,934 passengers were carried on these services. The main cities and towns in the State are served by regular internal services.

CAPITAL—Hobart, founded 1804. Population (June 30, 1988), 179,910. Other towns (with population at June 30, 1988) are Launceston (63,250), Devonport (25,290), Burnie-Somerset (21,060), Ulverstone (14,450).

VICTORIA

The State of Victoria comprises the south-east corner of Australia, at the part where its mainland territory projects farthest into the southern latitudes; it lies between 34°–39° S. latitude and 141°–150° E. longitude. Its extreme length from east to west is about 493 miles, its greatest breadth is about 290 miles, and its extent of coast-line is about 1,043 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,876 sq. miles (227,597 sq. km.).

Population.—The estimated resident population at June 30, 1987 was 4,208,900.

Births, deaths and marriages were:

	1986	1987
Births	60,387	61,507
Deaths	30,062	31,549
Marriages	29,390	29,682

Annual rate per 1,000 of estimated resident population in 1987: Births, 14.65; Deaths, 7.50; Marriages, 7.1. Deaths under 1 year per 1,000 live births, 8.1.

Religions

At the Census in 1986, members of the Catholic Church numbered 1,104,044, Anglican, 715,414, Unitarian (union of Presbyterian, Congregationalist and Methodist) 280,282, Presbyterian 138,000, Orthodox 177,565, and Baptist 39,784. The number of persons who did not state their religion was 589,132.

PHYSIOGRAHY

The Australian Alps and the Great Dividing Range pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The length of the Murray River, which forms part of the northern boundary of Victoria, is about 1,196 miles along the Victorian bank. Melbourne, the capital city, stands upon the Yarra River, which rises in the southern slopes of the Dividing Range.

Climate.—The climate of Victoria is characterized by warm to hot summers and rather cold winters. The highest temperature ever recorded in the State is 50.8°C, the lowest being –12.8°C. Normally, rain falls at most places throughout the year, with a maximum in winter or spring. In Melbourne, the mean annual temperature is 14.8°C.

GOVERNMENT

Victoria was originally known as the Port Phillip District of New South Wales and was created a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of Ministers.

The Legislative Assembly (elected October 2, 1988) consists of Australian Labor Party (ALP) 46, Liberal Party 33, and National Party 9.

Governor of Victoria, His Excellency Rev. Dr. John Davis McCaughey, assumed office Feb. 18, 1986.

Lt. Governor, The Hon. Sir John McIntosh Young, K.C.M.G. (1974).

THE MINISTRY (as at June 30, 1989)

Premier, Hon. John Cain.

Deputy Premier, Minister for Education, Hon. Joan Kirner.

Arts, Post-Secondary Education, Major Projects, Hon. E. Walker.

Industry, Technology and Resources, Hon. D. White.

EDUCATION

Primary education is compulsory, secular and free between the ages of 6 and 15. At July 1, 1987, there were 1,585 Government Primary Schools, 22 Primary-Secondary Schools and 399 Secondary Schools attended by 293,948 primary students and 238,824 secondary students. In addition there are technical and further education institutions and Colleges of Advanced Education.

At July 1, 1987, 253,086 pupils attended 729 non-Government schools, 502 of which were Roman Catholic.

There are four State-aided Universities.

FINANCE

Revenue and expenditure from the Consolidated Fund, and the debt of Victoria were:—

Debt	5,720,919,563	5,944,900,000

Banking, etc.—State Savings Bank deposits at June 30, 1987, amounted to \$A9,197,400,000; in addition, deposits in the Commonwealth Savings Bank (in the State of Victoria) amounted to \$A2,882,100,000, and in other savings banks \$A7,610,600,000.

PRODUCTION AND INDUSTRY

The gross value of primary production (excluding mining and quarrying) in 1986-87 was \$A4,020,600,000, crops \$A1,494,600,000, livestock \$A2,526,100,000. The local value of production of primary industries, excluding mining, was \$A3,628,200,000. Wool, wheat, flour, butter, livestock, fruits, milk and cream, meats, poultry and eggs are staple products.

Livestock.—There were on establishments with agricultural activity on March 31, 1987, 28,102,000 sheep, 3,583,000 cattle, and 431,832 pigs. The quantity of wool produced in 1986-87 was valued at \$A726,200,000.

Minerals.—Minerals raised include oil and natural gas, brown coal, limestone, clays and stone for construction material. Production of brown coal in 1986-87 amounted to 39,124,000 tonnes.

Crude Oil and Natural Gas.—In 1965 natural gas was first discovered in commercial quantities in the offshore waters of the Gippsland Basin in eastern Victoria and in 1966-67, three more valuable oilfields were located in the same general area. These fields are still the largest yet found in Australia. Following the development of the four fields, commercial gas and crude oil came on stream in October, 1969.

Production from the Victorian fields during 1987 was 151,571,000 barrels.

Secondary Industry.—At June 30, 1987 there were 9,108 manufacturing establishments in which 247,897 males and 108,641 females were employed. Value added in the course of manufacture by all manufacturing establishments with four or more persons employed was \$A15,596 million.

OVERSEAS TRADE

The export trade (excluding inter-state trade) consists largely of agricultural and mining products, machinery and transport equipment. The principal overseas imports of the State are apparel and textiles, electrical and other machines and machinery, motor vehicles and tractors, metals and metal manufactures, iron and steel, chemicals, petroleum and petroleum products, artificial resins and plastic materials.

	1985-86	1986-87
Imports	\$A12,408,800,000	\$A13,743,000,000
Exports	6,819,300,000	7,398,000,000

TRANSPORT

Motor Vehicle Registration.—The number of vehicles on the register at June 30, 1987, was: cars and stationwagons, 2,010,200; utilities and panel vans, 200,200; trucks and buses, 234,500, and motor cycles, 84,500.

CAPITAL.—Melbourne, had a resident population at June 30, 1987, estimated at 2,964,800. Other urban centres are Geelong, 149,310; Ballarat, 79,770; Bendigo, 66,840; Shepparton-Mooroopna, 39,100; Warrnambool, 23,800; Wodonga, 23,620.

WESTERN AUSTRALIA

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 113° 9' E. long. and from 13° 44' to 35° 8' S. lat. Its extreme length is 1,480 miles, and 1,000 miles from east to west; total area 975,920 sq. miles (2,527,621 sq. km.).

POPULATION.—At June 1988, the estimated resident population was 1,544,806.

Births, deaths and marriages were:

PHYSIOGRAPHY

Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount McHarry (4,097 ft.) in the northwest division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a seaward slope to the Indian Ocean, into which flow many streams, notably the Preston, Collie, Murray, Murchison, Gascoyne, Ashburton, Fortescue and De Grey. In the north the Fitzroy flows from the King Leopold ranges into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the State may be described as an immense tableland, with

an average elevation of 1,000 to 1,500 ft. above sea-level. The climate is one of the most temperate in the world. Of the total area two-thirds is suitable for pastoral purposes.

GOVERNMENT

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon the Constitution Act, 1889, the Constitution Acts Amendment Act, 1899, and amending Acts. The Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

The Legislative Assembly (elected February 4, 1989) is composed of Australian Labor Party 31, Liberal Party 20, National Party of Australia 6.

EDUCATION

In 1988 there were 741 government and 243 non-government primary and secondary school campuses with 210,068 and 65,330 full time students respectively. The total recurrent and capital outlay expended on education (by State authorities) during the year ended June 30, 1988, was \$A1,225,100,000, including grants for higher education totalling \$A233,328,000. The principal higher education institutions are the University of Western Australia (10,063 enrolments in 1988), Murdoch University (5,196 enrolments in 1988), Curtin University (14,208 enrolments in 1988) and the Western Australian College of Advanced Education (12,719 enrolments in 1988).

PRODUCTION AND INDUSTRY

The gross value of agricultural production in 1987-88 was: crops \$A1,203,189,000; livestock slaughtering, etc., \$A440,067,000; livestock products \$A1,347,976,000. Gross value of fisheries in 1986-87 was \$A172,356,000.

Crops and Livestock.—The production of wheat for grain in 1987-88 was 3,882,000 tonnes. On March 31, 1988, the livestock included 1,705,000 cattle, 33,951,000 sheep, and 307,000 pigs. Wool production in 1987-88 was 188,527 tonnes in the grease.

Manufacturing Industries.—There were 4,063 manufacturing establishments operating in the State at June 30, 1987. The total number of persons employed (including working proprietors) by these establishments at the end of June, 1987 was 72,305.

Forestry.—The forests contain some of the finest hardwoods in the world. The total quantity of sawn timber produced during 1986-87 was 316,658 cubic metres.

Minerals.—The State has large deposits of a wide range of minerals, many of which are being mined or are under development for production. The ex-mine value of all minerals produced during 1986-87 was \$A5,009,886,500.

Communications.—On June 30, 1988, there were 5,553 km. of State government railway open for general and passenger traffic; and 731 km. (Kalgoorlie-W.A. border) of the Australian National Railway. In the year ended June 30, 1988, 2,614 vessels entered Western Australian ports direct from, and 2,567 were cleared direct to, overseas. The number of registered motor vehicles at June 30, 1988, was 935,761.

PHYSIOGRAPHY

New Zealand consists of a number of islands of varying size in the South Pacific Ocean, and has also administrative responsibility for the Ross Dependency in Antarctica. The two larger and most important islands, the North and South Islands of New Zealand, are separated by only a relatively narrow strait. The remaining islands are very much smaller and, in general, are widely dispersed over a considerable expanse of ocean. The boundaries, inclusive of the most outlying islands and dependencies, range from 33° to 53° South latitude, and from 162° East longitude to 173° West longitude.

Geographical Features.—The two principal islands have a total length of 1,040 miles, and a combined

area of 102,344 sq. miles, (265,069 sq. km.). A large proportion of the surface is mountainous in character. The principal range is the Southern Alps, extending over the entire length of the South Island and having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several volcanoes, two of which are active, others being dormant or extinct. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 14 wide), the Franz Josef and the Fox are the best known. The North Island is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for navigation. The more important include the Waikato (270 miles in length), Wanganui (180), and Clutha (210). Lakes (Taupo, 234 sq. miles in area; Wakatipu, 113; and Te Anau, 133) are abundant, many of them of great beauty.

In addition to North, South, Stewart and Chatham Islands:—

The Three Kings (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S. lat. and 172° 8' E. long. Auckland Islands, about 290 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. Antipodes Group, 40° 41' 15" S. lat. and 178° 43' E. long. Bounty Islands, 47° 4' 43" S. lat., 170° 0' 30" E. long. Snares Islands and Solander. All these islands are uninhabited.

The Kermadec Group (population normally 9 or 10) between 29° 10' to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Raoul or Sunday, Macaulay, Curtis Islands, L'Esperance, and some islets. All the inhabitants are government employees at a meteorological station. Campbell Island (used as a weather station).

Climate.—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 15° C. in the North to about 9° C. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is from approximately 13 to over 250 inches.

GOVERNMENT

The discoverers and first colonists of New Zealand were Polynesian people, ancestors of the Maori of today. Whether there was a single colonization, several, or many, is not known but the 9th century is generally considered to be the date of the first settlement. By the 13th or 14th century early exploration was over and there were well established Maori settlements.

The first European to discover New Zealand was Dutch navigator, Abel Tasman, who sighted the coast on December 13, 1642 but did not land. It was the British explorer James Cook who circumnavigated New Zealand and landed in 1769. Traders, whalers and sealers made up the majority of Europeans in New Zealand from the end of the 18th century until the late 1830s, when the proportion of permanent European settlers became significant.

Largely ■ a result of increased British emigration, the country was annexed by the British Government in 1840. The British Lieutenant Governor, William Hobson, R.N., proclaimed sovereignty over the North Island by virtue of the Treaty of Waitangi, signed by him and many Maori chiefs, and over the South Island and Stewart Island by right of discovery.

On May 3, 1841, New Zealand was, by letters patent, created ■ separate colony distinct from New South Wales. Organized colonization on a large scale commenced in 1840 with the New Zealand company's settlement at Wellington. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Constitution Act of 1852, and other Imperial statutes such ■ the Bill of Rights. A 1986 Constitution Act brought ■ number of statutory constitutional provisions. The Statute of Westminster was formally adopted by New Zealand in 1947. The executive authority is entrusted to a Governor General appointed by the Crown and aided by an Executive Council, within a Legislature consisting of one chamber, the House of Representatives.

POLICE

On March 31, 1988 the strength of the New Zealand Police Force was 5,114 of all ranks, equivalent to 1 for every 654 of the population. Total police expenditure for the year 1987-88 was NZ\$379,000,000.

DEFENCE

A unified Ministry of Defence which retained the three single services was set up in 1964. The Minister of Defence is responsible for national defence, and, with the other members of the Defence Council, commands and administers the three services:

The Royal New Zealand Navy consisted of 2,610 officers and ratings ■ at March 31, 1988, as well as the Volunteer Reserve in four divisions. The strength is four frigates, one survey ship, one research vessel and one tanker, as well as patrol and inshore survey craft.

The New Zealand Army consists of the Regular Force, the Territorial Force and the Army Reserve. The strength of the Regular Force at March 31, 1988 was 6,061, and of the Territorial Force and Army Reserve, 7,351. The Army is structured to provide a Regular Force battalion group which is available for rapid deployment on military operations or civil assistance tasks, ■ well as a framework of integrated Regular Force/Territorial Force Units as a basis for expansion when required.

The Royal New Zealand Air Force had ■ Regular Force strength of 4,192 at March 31, 1988, with 1,075 in the Territorial and Reserve Forces. Operational units include fighter ground attack, maritime, medium and short-range transport, and helicopter squadrons, and flying training units.

THE TERRITORIES OF NEW ZEALAND

TOKELAU (OR UNION ISLANDS)

A group of atolls (Fakaofa, Nukunonu and Atafu) (population 1,690 at Oct. 10, 1986), proclaimed part of New Zealand as from Jan. 1, 1948.

THE ROSS DEPENDENCY

The Ross Dependency, placed under the jurisdiction of New Zealand by Order in Council dated July 30, 1923, and defined as all the islands and territories between 160° E. and 150° W. longitude which are situated south of the 60° S. parallel. The Ross Dependency includes Edward VII Land and portions of Victoria Land. Since 1957 a number of research stations have been established in the Dependency.

ASSOCIATED STATES

COOK ISLANDS

Included in the boundaries of New Zealand since June, 1901, the group consists of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, Manuae, Takutea, Palmerston, Penrhyn or Tongareva, Manihiki, Rakahanga, Suvarrow, Pukapuka or Danger and Nassau. The total population of the group was 17,185 at December 1, 1986. The chief industries of the Cook Islands are tourism, financial services and the production of fruit juice, clothing, copra, bananas, citrus fruit and pulp, and

pearl shell. The trade is chiefly with New Zealand, Australia, Japan, the U.K. and the U.S.A. The New Zealand Government continues to give financial aid to the Cook Islands.

The Queen's representative in the islands is Sir Tangaroa Tangaroa, K.B.E. There is also a representative of the New Zealand government. Since Aug. 4, 1965, the Islands have enjoyed complete internal self-government, executive power being in the hands of a Cabinet consisting of the Premier and five other ministers. The new Constitution Act was passed by the New Zealand Parliament in November 1964, but did not come into force until it had been endorsed by the 22-member Legislative Assembly of the Cook Islands, elected in April 1965.

The New Zealand citizenship of the Cook Islanders is embodied in the Constitution, and assurances have been given that the changed status of the Islands will in no way affect the consideration of subsidies or the right of free entry into New Zealand for exports from the group.

H.M. Representative, Sir Tangaroa Tangaroa, K.B.E.
New Zealand Representative, A. Simcock.

NIUE

The population of Niue was estimated at 2,155 at March 31, 1989.

A New Zealand Representative is stationed at Niue, which since October 1974 has been self-governing in free association with New Zealand, which is responsible for external affairs and defence, and continues to give financial aid. Executive power is in the hands of a Premier and a Cabinet of three drawn from the Assembly of 20 members.

New Zealand Representative, M. J. Taylor.

ANTIGUA AND BARBUDA (State of Antigua and Barbuda)

AREA, POPULATION, ETC.—Antigua and Barbuda comprises the islands of Antigua (108 sq. miles (279 sq. km.), Barbuda (62 sq. miles (160 sq. km.)) 25 miles north of Antigua, and Redonda (1 square mile; 1.2 sq. km.) 25 miles south-west of Antigua. Antigua is part of the Leeward Islands in the Eastern Caribbean and lies 17° 3' N. and 61° 48' W. It is distinguished from the rest of the Leeward group by its absence of high hills and forest, and a drier climate than most of the W. Indies. Barbuda, formerly a possession of the Codrington family, is very flat with a large lagoon and well wooded in the north east. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. Antigua has a population of 80,000, (1985 U.N. estimate); Barbuda, 1,500, and Redonda is uninhabited.

CAPITAL.—St. John's. Population, 30,000. The town of Barbuda is Codrington.

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

FLAG.—Inverted triangle (centred on a red field) divided horizontally into three bands of black over blue over white; rising sun device in gold on black band.

NATIONAL ANTHEM.—"Fair Antigua and Barbuda".

NATIONAL DAY.—November 1 (Independence Day).

GOVERNMENT

Antigua became internally self-governing in 1967 and fully independent on Nov. 1, 1981, as a constitutional monarchy with H.M. The Queen as Head of State, represented by the Governor General. There is a Senate of 17 appointed members and a House of Representatives elected every 5 years. The Attorney-General may be appointed.

The Antigua Labour party led by Mr. Vere Bird won the general election of March 9, 1989 and a fourth successive term of office.

High Commissioner, Her Excellency Dr. Patricia Rodgers (1988).

ECONOMY

Tourism is the economic mainstay of The Bahamas, employing about two-thirds of the labour force. It provides about two-thirds of Government revenue and about half the country's foreign exchange earnings. The second main industry is international banking and trust business. The Bahamas' absence of any direct taxation and internal stability enabling the country to become one of the world's leading financial centres.

Agricultural production is mainly of fresh vegetables, fruit, meat and eggs for the domestic market, and crawfish, mostly for export. There are large reserves of aragonite, and reserves of limestone and salt, all of which are being commercially exploited. Freeport is the country's leading industrial centre, with a chemicals and pharmaceutical plant, an oil trans-shipment and storage terminal, and port and bunkering facilities. There are also a brewery and a rum distillery on New Providence.

EDUCATION

Education is compulsory between the ages of 5 and 14. More than 60,000 students are enrolled in Ministry of Education and Independent schools in New Providence and the Family Islands.

COMMUNICATIONS

The main ports are Nassau (New Providence), Freeport (Grand Bahama), Mathew Town (Inagua). International air services are operated from Abaco, Bimini, Eleuthera, Exuma, Grand Bahama and New Providence. About 50 smaller airports and landing strips facilitate services between the islands, the services being provided by Bahamasair, the national carrier. There are roads on the larger islands, and roads are under construction on the smaller islands. There are no railways. Wireless and telephone services are in operation to all parts of the world.

BANGLADESH

(*Ghana Praja Tantri Bangladesh*)

AREA, POPULATION, CLIMATE, ETC.—The People's Republic of Bangladesh consists of the territory which was formerly East Pakistan (the old province of East Bengal and the Sylhet district of Assam), covering an area of 55,598 sq. miles (143,998 sq. km.)

in the region of the Gangetic delta, and has a population (1989 estimate) of 110 million.

The country is crossed by a network of navigable rivers, including the eastern arms of the Ganges, the Jamuna (Brahmaputra) and the Meghna, flowing into the Bay of Bengal. The climate is tropical and monsoon; hot and extremely humid during the summer, and mild and dry during the short winter. The rainfall is heavy, varying from 50 inches to 135 inches in different districts and the bulk of it falls during monsoon season from June to September.

CAPITAL.—Dhaka. Population (1989 estimate), 5,000,000.

CURRENCY.—Taka (Tk) of 100 poisha.

FLAG.—Red circle on a bottle-green ground.

NATIONAL ANTHEM.—Amar Sonar Bangla.

NATIONAL DAY.—March 26 (Independence Day).

GOVERNMENT

Prior to becoming East Pakistan, the territory had been part of British India. It acceded to Pakistan in October, 1947, which became ■ Republic on March 23, 1956.

By a proclamation of March 26, 1971, Bangladesh purported to secede from the central government, and a government-in-exile was set up in April in Calcutta. The short war between India and Pakistan, in both the East and the West, and India's overwhelming defeat of the Pakistani Army in the East, brought about a *de facto* secession of the East wing. The Indo-Pakistani war was concluded on December 16, 1971, and Mr. Zulfiqar Ali Bhutto became President of Pakistan on December 20. Sheikh Mujib was sworn in as Prime Minister of Bangladesh on January 12, 1972. Pakistan and Bangladesh accorded one another mutual recognition in Feb. 1974 and established diplomatic relations in Jan. 1976.

From 1975 a non-political administration ran the country under martial law. A Presidential election was held on June 3, 1978, and President Zia was elected by ■ considerable majority. Martial law was subsequently lifted. Zia was assassinated in May 1981 in an unsuccessful coup, but the military, led by Lt.-Gen. Ershad, took over in March 1982 and martial law was again imposed. Following elections in May 1986 a civilian Cabinet was appointed. Presidential elections were held on Oct. 15, 1986 and Ershad gained a substantial majority. Martial law was subsequently lifted on Nov. 10 and the 1972 Constitution fully restored.

Parliament was dissolved by President Ershad on December 6, 1987 amid growing political turmoil. Parliamentary elections were held on March 3, 1988 and were boycotted by the country's main political parties. In the new Parliament which convened on April 25, the Jatiya Party of Ershad had a two-thirds majority. In July 1989, Parliament passed a constitutional amendment withdrawing the provision of life presidency from President Ershad and limiting him to one further term of five years.

[01-584 0081-4/589 4842-4]

High Commissioner, His Excellency Maj.-Gen. K. M. Saifiullah (1987).

RELIGION

The faith of over 90 per cent of the population is Islam. Islam has been constitutionally declared the state religion of Bangladesh.

LANGUAGE

The state language is Bengali. Use of Bengali is compulsory in all government departments. English, however, is understood and is used widely as an unofficial second language.

EDUCATION

Primary education is free but not universal. Most primary schools are under government management. The majority of secondary schools and colleges are privately managed, but many receive government grants. There are six universities. In 1981 literacy was estimated at 23.8 per cent of the whole of Bangladesh; 31 per cent of the male population and 16 per cent of the female population.

TRANSPORT AND COMMUNICATIONS

Principal seaports are Chittagong and Mongla. The Bangladesh Shipping Corporation has been set up by the Government to operate the Bangladesh merchant fleet. The principal airports are Dhaka, (Zia International) and Chittagong. The international airline, Bangladesh Biman, serves Europe, the Middle East, South and South-East Asia, and an internal network.

There are about 6,880 miles of roads in Bangladesh; 4,724 miles are metalled. There are 2,798 miles of railway track.

Radio Bangladesh is the main national broadcasting service. A television service was introduced in 1965 and colour transmissions began in 1981.

ECONOMY

Bangladesh is a principal producer of raw jute. Other agricultural products are rice, tea, oil seeds, pulses, and sugar cane. The chief industries are jute, cotton, tea, leather, pharmaceuticals, fertilizer, sugar, prawn fishing, natural gas and garment manufacture. Remittances sent home by Bangladeshi workers abroad have been of considerable support to the economy in recent years.

Aid

Bangladesh is a major recipient of bilateral and multilateral development aid. The total annual development plan for 1988–89 is budgeted at U.S. \$1,423 million, of which U.S. \$1,146 million will be financed from external sources as follows:

BARBADOS

AREA, POPULATION, ETC.—Barbados, the most easterly of the Caribbean islands, is situated in latitude 13° 14' N. and longitude 59° 37' W. The island has a total area of 166 sq. miles, (430 sq. km.), the land rising in a series of tablelands marked by terraces to the highest point, Mt. Hillaby (1,116 ft.). It is nearly 21 miles long by 14 miles broad. The climate is equable with annual average temperature 26·6°C. (79·8°F.) and rainfall varying from a yearly average of 75 inches in the high central district to 50 inches in some of the low-lying coastal areas.

POPULATION.—The population of Barbados (1985 U.N. estimate) was 253,000. There are eleven administrative areas (parishes); St. Michael; Christ Church; St. Andrews; St. George; St. James; St. John; St. Joseph; St. Lucy; St. Peter; St. Philip, and St. Thomas.

CAPITAL.—Bridgetown (population, estimated April, 1980, 7,466) in the parish of St. Michael. There are three other towns, Oistins in Christ Church, Holetown in St. James and Speightstown in St. Peter.

CURRENCY.—Barbados dollar (BD\$) of 100 cents.

FLAG.—Three vertical stripes, dark blue, gold and dark blue, with trident devices on gold stripe.

NATIONAL ANTHEM.—In Plenty and in Time of Need.

NATIONAL DAY.—November 30 (Independence Day).

GOVERNMENT

The first inhabitants of Barbados were Arawak Indians but the island was uninhabited when first settled by the British in 1627. It was a Crown Colony from 1652 until it became an independent state within the Commonwealth on November 30, 1966. The

Legislature consists of the Governor General, a Senate and a House of Assembly. The Senate comprises 21 Senators appointed by the Governor General, of whom 12 are appointed on the advice of the Prime Minister, 2 on the advice of the Leader of the Opposition and 7 by the Governor General at his discretion to represent religious, economic or social interests in the Island or such other interests as the Governor General considers ought to be represented. The House of Assembly comprises 27 members elected every five years by adult suffrage. The last General Election took place on May 28, 1986 and, as a result, seats in the House of Assembly were distributed as follows: Democratic Labour Party 24, Barbados Labour Party 3.

Governor General, Sir Hugh Springer, G.C.M.G., G.C.V.O., C.B.E. (1984).

Cabinet

(as at May 31, 1989)

Prime Minister, Minister of Economic Affairs and Finance, Rt. Hon. L. Erskine Sandiford.

Speaker, House of Assembly, Hon. Lawson Weekes.

BARBADOS HIGH COMMISSION

1 Great Russell Street, WC1B 3NH

[01-631 4975]

High Commissioner, new appointment awaited.

JUDICATURE

There is a Supreme Court of Judicature consisting of a High Court and a Court of Appeal. In certain cases a further appeal lies to the Judicial Committee of H.M. Privy Council. The Chief Justice and Puisne Judges are appointed by the Governor-General on the recommendation of the Prime Minister and after consultation with the Leader of the Opposition.

Chief Justice, The Hon. Sir Denys Ambrose Williams, K.B.

EDUCATION

Primary and secondary education is free in Government schools. There are 105 primary schools, 21 Government secondary schools and 15 approved Government secondary schools.

COMMUNICATIONS

Barbados has some 965 miles of roads, of which about 917 miles are asphalted. The Grantley Adams International airport is situated at Seawell, 12 miles from Bridgetown, and frequent scheduled services connect Barbados with the major world air routes. Bridgetown, the only port of entry, has a deep-water harbour with berths for 8 ships, but oil is pumped ashore at Spring Gardens and at an Esso installation on the West Coast. Barbados has a colour television service, three radio broadcasting services, and a wired broadcasting service.

BELIZE

AREA, POPULATION, ETC.—Belize lies on the east coast of Central America, bounded on the north and north-west by Mexico, and on the west and south by Guatemala. The total area (including offshore islands) is about 8,867 sq. miles (22,965 sq. km.), with a length and breadth of 174 miles and 68 miles respectively. The climate is sub-tropical, with a mean annual temperature of 20°C, but is tempered by sea breezes. There are two dry seasons, the main one from March to May and the other (the Maugre season) from August to September. The country is occasionally affected by hurricanes.

The coastal areas are mostly flat and swampy but the country rises gradually towards the interior. The northern and western districts are hilly, and in the south the Maya Mountains and the Cockscombs form the backbone of the country, reaching a height of 3,800 feet at Victoria Peak.

The population is 166,000 (1985 U.N. estimate), of which the main racial groups are Creole, Mestizo (Maya-Spanish) and Carib, plus a number of East Indian and Spanish descent. The races are now heavily inter-mixed. The majority of the population is Christian, about 60 per cent Catholic and most of the remainder Protestant.

The early history of Belize is little known, although the numerous ruins in the area indicate that it was heavily populated by the Maya Indians. The first

British settlement was established in 1638 but was subject to repeated attacks by the Spanish, who claimed sovereignty over the area, until the decline of Spanish power in the Americas in the 19th century. In 1862 the area was recognized by Britain as a colony and called British Honduras. On June 1, 1973 the colony was officially renamed Belize, and was granted independence on September 21, 1981. The long-standing territorial dispute with Guatemala, which had delayed independence earlier, remains unresolved despite efforts to reach a settlement.

CAPITAL.—Belmopan (estimated population, 1980, 2,936). The largest city and the former capital is Belize City (population, 1980 census, 39,771). Other towns are Corozal (6,899), San Ignacio (5,616), Dangriga (6,661), Orange Walk (8,439), Punta Gorda (2,396).

CURRENCY.—Belize dollar (BZ\$) of 100 cents. The Belize dollar is tied to the U.S. dollar—BZ\$2 = U.S.\$1.

FLAG.—Blue ground with red band along top and bottom edges, and in centre a white disc containing the coat of arms surrounded by a green garland.

NATIONAL ANTHEM.—Land of the Gods.

NATIONAL DAY.—September 21 (Independence Day).

GOVERNMENT

The Queen is Head of State, represented in Belize by a Governor General, who is a citizen of the country, appointed in consultation with the Prime Minister of Belize. There is a National Assembly, comprising a House of Representatives (28 members elected for 5 years) and a Senate (8 members appointed by the Governor General). Executive power is vested in the Cabinet, which is responsible to the National Assembly.

Governor General, Her Excellency Dame Minita Elmira Gordon, G.C.M.G., G.C.V.O.

ECONOMY

About 42 per cent of the population is engaged in agriculture. Corn (maize), rice, red kidney beans, root crops and fruit are the main food crops, although main agricultural exports are sugar, bananas and citrus products. The country is more or less self-sufficient in fresh beef, pork and poultry, but pro-

cessed meat and dairy products are imported. About 25 per cent of timber production (mostly mahogany) is exported, and there is a large U.S. market for lobster, conch and scale fish. Tourism is also a valuable source of income.

EDUCATION

Education is compulsory from 5 to 14 years of age. In 1985 primary education was provided by 225 schools, most of which are government aided. Enrolment totalled 38,512. Secondary education is provided by 29 secondary and post-secondary institutions with an enrolment of 7,441. Plans are underway for Ferris State College of Michigan, U.S.A., to establish an affiliate university in Belize. The Government also offers scholarships for students to go abroad. There is an extra-mural faculty of the University of the West Indies, with a resident tutor.

COMMUNICATIONS

There is a Government-operated radio service but no official television service in the country. An automatic telephone service operated by Belize Telecommunications Ltd. covers the whole country.

The principal airport is at Belize City and various airlines operate international flights to U.S. and other Central American states. The main port is also Belize City, where construction of deep water quays was recently completed. There are 1,865 miles of road, including four main highways, but there is no railway system.

BOTSWANA

(The Republic of Botswana)

AREA, POPULATION, ETC.—Botswana (formerly the British Protectorate of Bechuanaland) lies between latitudes 18° and 26° S. and longitudes 20° and 28° W. and is bounded by the Cape and Transvaal Provinces of South Africa on the south and east, by Zimbabwe, the Zambezi and Chobe (Linyanti) Rivers on the north and north-east and by South West Africa on the west. Botswana has a total area of 224,607 sq. miles (581,730 sq. km.). The climate of the country is generally sub-tropical, but varies considerably with latitude and altitude. A plateau at a height of about 4,000 feet divides Botswana into two main topographical regions. To the east of the plateau streams flow into the Marico, Notwani and Limpopo Rivers; to the west lies a flat region comprising the Kgalagadi

Desert, the Okavango Swamps and the Northern State Lands area. Large areas of the country support only herds of game. Elephant numbers have been estimated at 15-30,000.

POPULATION.—Botswana has an estimated population (1988) of 1,200,000. The eight principal Botswana tribes are Bakgatla, Bakwena, Bangwaketse, Bamalete, Bamangwato, Barolong, Batawana and Batlokwa. The principal languages in use in Botswana are Setswana and English.

CAPITAL.—Gaborone, estimated population 110,000. Other centres are Francistown (52,000), Lobatsi (25,000), and Selebi-Phikwe (46,000).

CURRENCY.—Pula (P) of 100 thebe. P1 = US\$0.5166 (Dec. 1988).

FLAG.—Horizontal bands of blue, white, blue, with a black stripe on the white band.

NATIONAL ANTHEM.—Fatshe La Rona.

NATIONAL DAY.—September 30.

GOVERNMENT

On September 30, 1966, Bechuanaland became a Republic within the Commonwealth under the name Botswana. The President of Botswana is Head of State and appoints as Vice President a member of the National Assembly who is his principal assistant and leader of Government business in the National Assembly. The Assembly consists of the President, 34 members elected on a basis of universal adult suffrage, 4 specially elected members, the Attorney-General (non-voting) and the Speaker. There is also a House of Chiefs.

President, His Excellency Dr. Q. K. J. Masire.

BOTSWANA HIGH COMMISSION

6 Stratford Place, WIN 9AE

[01-499 0031]

High Commissioner, Her Excellency Mrs. Margaret Nasha (1989).

ECONOMY

Botswana is predominantly a pastoral country. The national herd is normally around 3 million cattle and 1 million sheep and goats but drought conditions during the past 6 years have reduced the number of cattle to around 2.5 million.

Cattle rearing accounts for about 85 per cent of agricultural output and livestock products, particularly beef, are a major source of foreign exchange earnings. The Government has a number of programmes to improve land use and cattle and crop

production, and schemes to provide financial assistance for farmers.

Mineral extraction and processing is now the major source of income for the country following the opening of large mines for diamonds and copper-nickel. Botswana is one of the largest producers of diamonds in the world. Large deposits of coal have been discovered and are being mined on a small scale. Much of the country has yet to be fully prospected. Manufacturing industry is growing and will continue to do so as communications improve but it is still a small sector of the economy.

EDUCATION

There are over 500 primary schools (enrolment 230,890), 70 community junior secondary schools (enrolment 22,000) and 23 government and government-aided senior secondary schools (enrolment 7,000). The government embarked on a massive expansion of secondary education in January 1984 aimed at providing universal access to junior secondary education; over 50 more schools are being opened by 1990. There are 5 teacher training establishments (total enrolment 1,540) including one for secondary teachers (enrolment 340), one Polytechnic with 770 students and the University of Botswana with 1,850 undergraduates. Further expansion of the technical education system is planned via a network of vocational training centres.

COMMUNICATIONS

The railway from Cape Town to Zimbabwe passes through eastern Botswana. The main roads in the country are the north-south road, which closely follows the railway, and the road running east-west that links Francistown and Maun. A new road from Nata to Kazungula provides a direct link to Zambia from Botswana. Air services are provided on a scheduled basis between the main towns, linking with services from South Africa, Swaziland, Zambia, Zimbabwe, Malawi, Kenya, Mozambique, Tanzania and the United Kingdom.

CYPRUS

(Kypriaki Dimokratia/Kibris Cumhuriyeti)

AREA, CLIMATE AND POPULATION.—Cyprus with an area of 3,572 sq. miles (9,251 sq. km.) is the third largest island in the Mediterranean Sea. Its greatest length is 140 miles and greatest breadth 60 miles, situated at latitude 35°N. and longitude 33° 30'E. It is about 40 miles distant from the nearest point of Asia Minor, 60 miles from Syria and 240 miles from Port Said.

Cyprus has a Mediterranean climate with a hot dry summer and a variable warm winter, while the intermediate seasons are short and transitional.

In 1988 the population (estimate) was 691,700. There are two major communities, Greek Cypriots (80·1 per cent) and Turkish Cypriots (18·6 per cent); and minorities of Armenians, Maronites and others.

CAPITAL.—Nicosia, near the centre of the island, with a population of 166,900 (in the Government controlled area); the other principal towns are ΨLimassol, ΨFamagusta, ΨLarnaca, Paphos and Kyrinia.

CURRENCY.—Cyprus pound (C£) of 100 cents.

FLAG.—Gold map of Cyprus on a white ground, surmounting crossed olive branches (green).

NATIONAL ANTHEM.—Ode to Freedom.

NATIONAL DAY.—October 1 (Independence Day).

GOVERNMENT

Cyprus passed under British administration from 1878. Cyprus was formally annexed to Great Britain on Nov. 5, 1914, on the outbreak of war with Turkey. From 1925 to 1960 it was a Crown Colony administered by a Governor, assisted by an Executive Council and also for a time by a partly-elected Legislative Council. Following the launching in April 1955 of an armed campaign by EOKA in support of union with Greece, a state of emergency was declared in November, 1955, which lasted for four years. After a meeting at Zürich between the Prime Ministers of Greece and Turkey, a conference was held in London and an agreement was signed on February 19, 1959, between the United Kingdom, Greece, Turkey and the Greek and Turkish Cypriots which provided that Cyprus would be an independent Republic.

Under the Cyprus Act, 1960, the island became an independent sovereign republic on August 16, 1960. The constitution provided for a Greek Cypriot President and a Turkish Cypriot Vice-President elected for a five-year term by the Greek and Turkish communities respectively. The House of Representatives, elected for five years by universal suffrage of each community separately, was to consist of 35 Greek and 15 Turkish members. The 1960 Constitution proved unworkable in practice and led to intercommunal troubles. The U.N. Peace Keeping Force in Cyprus (UNFICYP) was set up in March 1964; its mandate was last renewed on June 10, 1989.

On July 15, 1974, mainland Greek officers of the Greek Cypriot National Guard launched a coup d'état against President Makarios and installed a former EOKA member, Nikos Sampson, in his place. Turkey reserved to itself the right to maintain constitutional order and the independence and territorial integrity of the island, invaded Northern Cyprus and occupied over a third of the island. In Feb. 1975 a "Turkish Federated State of Cyprus" under Mr. Rauf Denktash was declared in this area, its constitution being approved by referendum in July 1975. In Nov. 1983 a "Declaration of Statehood" was issued which purported to establish the "Turkish Republic of Northern Cyprus". The declaration was condemned by the U.N. Security Council and only Turkey has recognized the new "state". In May 1985 a referendum in the north of Cyprus approved a constitution for the

"Turkish Republic of Northern Cyprus": in June 1985 Mr. Denktash was elected President of the "state" and a General Election was held.

Since 1974 attempts to reach a settlement have focused on intercommunal talks under the auspices of the U.N. The latest talks began in August 1988.

A general election was held for the Greek House of Representatives on Dec. 8, 1985, resulting in the parties gaining the following number of seats: Democratic Rally (Right Wing) 19; Democratic Party (Centre) 16; AKEL (Communist) 15; EDEK (Socialist) 6.

ECONOMY

Although agriculture still occupies a prime position in the Cyprus economy it is unlikely to expand further. Main products are citrus fruits, grapes and vine products, potatoes and other vegetables. Manufacturing, construction, distribution and other service industries are other major employers. Tourism is the main growth industry with over 1 million long-stay tourists producing £380 million (estimate) in foreign exchange earnings in 1988. Some 4,700 foreign firms and individuals have registered as offshore companies in Cyprus, which supports Cyprus' claim to be a centre for Middle East trade.

Britain continues to be the country's most important trading partner, taking some 21·6 per cent of its exports in 1988 and supplying 13·9 per cent of its imports. Cyprus is seeking to diversify its export markets and until recently sold almost half its exports to the Middle East. However, these traditional markets are now drying up, and Cyprus is looking more towards Europe. A Customs Union between Cyprus and the E.C. came into force on Jan. 1, 1988.

There is a large visible trade deficit (£2535·9 million in 1988), which is offset by invisible earnings, particularly from tourism (£380 million in 1988). The current account overall showed a surplus of C£6 million in 1988.

DOMINICA

(The Commonwealth of Dominica)

AREA, POPULATION, ETC.—Dominica, the loftiest of the Lesser Antilles, lies in the Windward Group, between 15° 20' and 15° 45' N. lat. and 61° 13' and 61° 30' W. long., 95 miles S. of Antigua. It is about 29 miles long and 15 broad comprising an area of 290 sq. miles (751 sq. km.). The island is of volcanic origin and very mountainous, and the soil is very fertile. The temperature varies, according to the altitude, from 13°–29°C. The climate is healthy, and during the winter months is very pleasant. The population is 76,000 (1985 U.N. estimate).

CAPITAL—Roseau, on the south-west coast, population, 8,346. The other principal town is Portsmouth, population, 2,220.

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

FLAG.—Green ground with a cross overall of yellow, white and black stripes, and in the centre a red disc charged with a Sisserou parrot in natural colours within a ring of 11 green stars.

NATIONAL DAY.—November 3 (Independence Day).

NATIONAL ANTHEM.—Dominica Day Song.

GOVERNMENT

The island was discovered by Columbus in 1493, when it was a stronghold of the Caribs, who remained virtually the sole inhabitants until the French established settlements in the 18th century. It was captured by the British in 1759 but passed back and forth between France and Britain until 1805, after which British possession was not challenged. From 1871–1939 Dominica was part of the Leeward Islands Colony, then from 1940 the island was a unit of the Windward Islands group. Internal self-government from 1967 was followed on Nov. 3, 1978 by independence as a republic with the name The Commonwealth of Dominica. Executive authority is vested in the President, who is elected by the House of Assembly for not more than two terms of five years. Parliament consists of the President and the House of Assembly (representatives elected by universal adult suffrage) and nine Senators, who may be appointed by the President or elected. Parliament has a life of five years.

THE GAMBIA

(The Republic of the Gambia)

AREA, POPULATION, ETC.—The Gambia takes its name from the Gambia River, which it straddles for over 200 miles inland from the west coast of Africa. It is a narrow strip, surrounded by the Republic of Senegal, except at the coast, lying between 13° 10'–13° 45' N. and 13° 90'–16° 50' W. The area is 4,361 sq. miles (11,295 sq. km.), of which one fifth is the river. Except during the rainy season from June to October, when it sometimes becomes uncomfortably humid, Banjul's climate is very pleasant. Rainfall is 32–40 inches a year.

The population comprises mainly Wolof, Mandinka and Fula peoples who originally migrated there from the north and east. Population (1983 Census) was 695,886.

The Gambia River basin was part of the region

dominated in the 10th–16th centuries by the strong Songhai and Mali kingdoms centred on the upper Niger. The first recorded Europeans to reach the Gambia River were the Portuguese in 1447. In 1588 Queen Elizabeth I gave the first charter to English merchants to trade along the river. Merchants from France, Courland (now part of Latvia) and the Netherlands also established trading posts there. The English presence was strongly challenged by the French, who were dominant further north up the coast, but in 1783 the Treaty of Versailles acknowledged English rights. In 1816, after the Napoleonic Wars, and in order to enforce abolition of the slave trade, the British stationed a garrison on a low sandy island called Banjul at the river mouth. Renamed Bathurst, this became the capital of a small British-administered colony, initially under the Governor of Sierra Leone. Negotiations with France continued sporadically until 1889 when it was agreed that the British rights along the upper river should extend 10 km on either bank. British administration was extended from the Colony to this Protectorate. The Gambia became independent within the Commonwealth on February 18, 1965, and a Republic on April 24, 1970.

The Gambia's relationship with Senegal has always been an important factor in political and economic policy. Moves towards a closer association were accelerated after an abortive coup in The Gambia in July 1981 was put down with the help of Senegalese troops. In February 1982 the Senegambia Confederation was formally constituted based on certain joint institutions and integration of policies, but each country remains sovereign and independent.

CAPITAL.—Banjul. Population (1983 Census) of island of Banjul was 44,536; and of adjacent Kombo St. Mary district 102,858. Total population of Banjul/Kombo St. Mary, 147,394.

CURRENCY.—Dalasi (D) of 100 butut.

FLAG.—Horizontal stripes of red, blue and green, separated by narrow white stripes.

NATIONAL ANTHEM.—For The Gambia, Our Homeland.

NATIONAL DAY.—February 18 (Independence Day).

GOVERNMENT

The constitution is democratic and Parliamentary, with an executive President elected for five years. The House of Representatives has 35 elected members, 5 elected Chiefs Representatives and up to 8 nominated members plus the Attorney General (ex-officio). The Vice President and other Ministers are appointed by the President. Parliament must be dissolved after five years. The last general elections were held in March 1987. The present state of the parties for elected members is PPP (People's Progressive Party) 31; NCP (National Convention Party) 5.

COMMUNICATIONS

There is an international airport at Yundum, 17 miles from Banjul, with scheduled services flying to other West African states and to the U.K. Banjul is the main port. Internal communication is by road and river. There is no railway system. There are two broadcasting stations and a U.H.F. telephone service linking Banjul with the principal towns in the provinces. There is no television service.

EDUCATION

There are 24 secondary schools (eight high and 16 technical) with a total enrolment of 15,635 students. Two High Schools provide 'A' level education. Gambia College provides post-secondary courses in education, agriculture, public health and nursing. There are seven vocational training institutions with a total enrolment of 1,400. Higher education and advanced training courses are taken outside The Gambia, currently by over 200 students.

PRODUCTION

Eighty-five per cent of the population depend for their livelihood on agriculture (40 per cent of G.D.P.). The chief product, groundnuts, is also the most important export item, forming over 90 per cent of all domestic exports. Other crops are rice, millet, sorghum, maize and cotton. Fishing and livestock industries are being developed. Thirty per cent of the country's basic food requirements are imported. There are no significant deposits of minerals. Manufactures are limited to groundnut processing, minor metal fabrications, paints, furniture, soap and bottling. Tourism is developing quickly, with 98,248 visitors in 1987-88. The entrepot trade through The Gambia, re-exporting imported goods to neighbouring countries, is an important element in the national economy.

FINANCE

GHANA
(The Republic of Ghana)

AREA AND POPULATION.—Ghana (formerly known as the Gold Coast) is situated on the Gulf of Guinea, between 3° 07' W. long. and 1° 14' E. long. (about 334 miles), and extends 441 miles north from Cape Three Points (4° 45' N.) to 11° 11' N. It is bounded on the north by Burkina, on the west by the Côte d'Ivoire, on the east by Togo, and on the south by the Atlantic Ocean. Although a tropical country, Ghana is cooler than many countries within similar latitudes.

Ghana has a total area of 92,099 sq. miles (238,537 sq. km.). The population at the Census of 1984 was 12,205,574. A 1985 U.N. estimate gave a figure of 13,588,000. Almost all Ghanaians are Sudanese Negroes, although Hamitic strains are common in Northern Ghana. The official language is English. The principal indigenous language group is Akan, of which Twi and Fanti are the most commonly used. Ga, Ewe and languages of the Mole-Dagbani group are common in certain regions.

CAPITAL.—Accra. Population of the Greater Accra Region (including Tema) was (1984 Census) 1,420,066. Other towns are Kumasi, Tamale, Sekondi-Takoradi, Cape Coast, Sunyani, Ho, Koforidua, Tarkwa and Winneba.

CURRENCY.—Cedi of 100 pesewas.

FLAG.—Equal horizontal bands of red over yellow over green; five-point black star on gold stripe.

NATIONAL ANTHEM.—Hail the Name of Ghana.

NATIONAL DAY.—March 6 (Independence Day).

GOVERNMENT

There is no recorded history of the Gold Coast region before the coming of Europeans in the fifteenth century. The constituent parts of the State came under British administration at various times, the original Gold Coast Colony (the coastal and Southern areas) being first constituted in 1874; Ashanti in 1901; and the Northern Territories Protectorate in 1901. The territory of Trans-Volta-Togoland, part of the former German colony of Togo, was mandated to Britain by the League of Nations after the First World War, and remained under British administration as a United Nations Trusteeship after the Second World War. After a plebiscite in May, 1956, under the auspices of the United Nations, the territory was integrated with the Gold Coast Colony.

The former Gold Coast Colony and associated territories became the independent state of Ghana and a member of the British Commonwealth on March 6, 1957 and adopted a Republican constitution on July 1, 1960. A coup in June 1979 led to the formation of an Armed Forces Revolutionary Council chaired by Flt.-Lt. Jerry Rawlings. Civilian rule was restored in Sept. 1979 but overthrown on Dec. 31, 1981, when another coup brought back into power Flt.-Lt. Rawlings.

PRODUCTION, ETC.

Agriculture.—Agriculture forms the basis of Ghana's economy, employing 70 per cent of the working population. Crops of the Forest Zone include cocoa, which is the largest single source of revenue, rice and a variety of other foodstuff crops grown on mixed-crop farms. Fruits such as avocado pears, oranges and pineapples are grown. Cassava is the most important crop of the Coastal Savannas Zone, of the lower Volta area. Production of pulses such as groundnuts is widespread. Near the Togo border oil palms, yams, maize, cassava, fruit and vegetables are produced. Livestock is raised in the uncultivated areas. The Northern Savanna Zone is Ghana's principal cattle rearing area and other livestock production there is important for home consumption. Corn and millet crops are produced in the far north and maize, yams, rice and groundnut crops in more southerly parts of the Zone.

Attempts are being made to diversify agricultural production, with cash crops being extensively cultivated for export and to provide raw materials for local industry.

Fisheries.—Fishing is important in coastal areas and in the Volta itself. However production cannot meet demand and there are considerable imports of fish products. About 80 per cent of home supply is obtained from fisheries, but production from the Volta Lake and other inland fisheries is increasing.

Mineral Production.—The area within a 60 mile radius of Dunkwa produces 90 per cent of Ghana's mineral exports. Manganese production from Nsuta ranks among the world's highest and gold, industrial diamonds and bauxite are also produced. Some 30,000 persons are employed by the mining companies.

Manufactures.—Examples of the small-scale traditional industries are tailoring, goldsmithing and

carpentry. Priority has been given in recent years to the establishment of a number of "Pioneer Industries" including timber products, vehicle and refrigerator assembly, cigarettes, boatbuilding, food processing, cotton textiles, clothing, footwear, printing and other light industries. A modern industrial complex is growing in the Accra-Tema area.

Volta River Project.—Since 1966 the Volta Dam at Akosombo has generated hydro-electric power for the processing of bauxite and fed a power transmission network for the Accra-Kumasi-Takoradi area. Electricity is now also sent to Togo and Benin.

COMMUNICATIONS

Accra Airport is an international airport and Ghana Airways Corporation is the national airline. There are also internal airports at Takoradi, Kumasi and Tamale.

There are 20,000 miles of motorable roads, of which 2,335 miles are bitumenized. There are 600 miles of railway, linking Accra and the principal ports of Takoradi and Tema with their hinterlands, and with each other.

Takoradi Harbour consists of seven quay berths—one is leased specially for manganese exports. Tema Harbour has 10 berths for larger ocean going vessels and the largest dry dock on the West African coast. An oil berth has also been built to serve the Ghaip refinery which has been constructed at Tema.

GRENADA (The State of Grenada)

AREA, POPULATION.—Grenada is situated between the parallels of 12° 13'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 80 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and about 120 miles S.W. of Barbados. The island is about 21 miles in length and 12 miles in breadth, with an area of 133 sq. miles (344 sq. km.). Also included in the territory of Grenada are some of the Grenadines islets, the largest of which is Carriacou, 13 square miles in area. The population was estimated at 112,000 (1985 U.N. estimate). The country is mountainous and very picturesque, and the climate is healthy.

CAPITAL.—St. George's (population 7,500) lies on the southwest coast, and possesses a good harbour.

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

FLAG.—Rectangle formed of yellow triangles top and bottom, and green triangles at side, with yellow five-pointed star on red circle in centre, and a nutmeg in green triangle nearest the fly; all on a red ground with three yellow five-pointed stars at top and bottom.

NATIONAL DAY.—February 7 (Independence Day).

GOVERNMENT

Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1783. It became an Associated State in 1967 and an independent nation on Feb. 7, 1974.

The government of Sir Eric Gairy was overthrown on March 13, 1979 by the New Jewel Movement and a People's Revolutionary Government was set up. Disagreements within the P.R.G. led, in Oct. 1983, to violence and the death of the Prime Minister, whose government was replaced by a Revolutionary Military Council. These events prompted the intervention of Caribbean and U.S. forces. The Governor General installed an advisory council in Nov. 1983 to act as an interim government until a General Election was held, on Dec. 3, 1984. The New National Party (NNP) won 14 of the 15 seats in the House of Representatives and, following the dissolution of the advisory council, its leader, Mr. Herbert Blaize, was sworn in as Prime Minister. A phased withdrawal of U.S. forces was completed in June 1985.

Defections from the NNP reduced their number of seats in Parliament to 9 by April 1987. The defectors formed their own political party, the National Democratic Congress. The next General Election must take place by March 28, 1990.

Governor General. Sir Paul Scoon, G.C.M.G., G.C.V.O., O.B.E. (1978).

Cabinet (as at June 30, 1989)

High Commissioner, His Excellency Oswald M. Gibbs, C.M.G. (1984).

ECONOMY

The economy is principally agrarian, with cocoa, nutmegs and bananas the major crops. Fruit and vegetables are grown and a little livestock raised for domestic consumption. The fishing industry is being developed. Manufacturing is mostly confined to processing agricultural products.

Tourism has prospered since the opening in 1984 of the Point Salines International Airport. British Airways began regular weekly flights in April 1987. A hotel expansion programme is planned. The

number of cruise ships visiting Grenada in 1988 was 234.

Total value of imports in 1988 was EC\$248·6 million. Principal domestic exports for 1988 were cocoa (EC\$8·75m), nutmeg (EC\$31·3m), mace (EC\$7·3m) and fruit (EC\$3·8m).

GUYANA

(The Co-operative Republic of Guyana)

AREA, POPULATION, ETC.—Guyana, the former colony of British Guiana, which includes the Counties of Demerara, Essequibo and Berbice, is situated on the north-east coast of South America, bordering on Venezuela, Brazil and Suriname. It has ■ total area of 83,000 sq. miles (214,969 sq. km.). While the 1985 U.N. estimate puts the population at 790,000, 750,000 is generally considered to be ■ more representative figure. There are three distinct areas. (1) A narrow alluvial coastal belt 10 to 40 miles deep, the eastern part of which is intensively cultivated and contains some 90 per cent of the population. Much of this is below the level of the sea and is drained and irrigated by an intricate system of canals constructed by the Dutch. (2) A mountainous area of dense rain forest behind the coastline, still partly unexplored, which reaches its highest point at Mount Roraima (9,000 ft.) on the junction of the Guyana-Brazil-Venezuela borders. (3) The open savanna country of the Rupununi in the south-west where cattle ranching is practised and oil deposits have been discovered.

The entire country is intersected by numerous large rivers, though these are of limited navigational use because of rapids and waterfalls, the most notable of which are the Kaieteur Fall on the Potaro River with ■ sheer drop of 741 ft., the Horse Shoe Falls on the Essequibo and the Marina Fall on the Ipobe River.

Climate.—The two dry seasons normally last from mid February to end April, and from mid August to end November. In the Aug.-Oct. period it is hot. The mean temperature is 27°C., the usual extremes being 21°C and 32°C. In the interior the mean temperature is higher—28°C., its extremes ranging from 19°C to 40°C. The yearly rainfall is subject to marked variation, its mean on the coast lands averaging about 90 inches with an average of 58 inches on the savannas.

CAPITAL.—Georgetown. Estimated population, including environs, 185,000. Other towns are: Linden (population 29,000); New Amsterdam (population 23,000); Corriverton (population 17,000).

CURRENCY.—Guyana dollar (G\$) of 100 cents.

FLAG.—Red triangle with black border, pointing from hoist to fly, on ■ yellow triangle with white border, all on a green field.

NATIONAL ANTHEM.—"Dear Land of Guyana".

NATIONAL DAYS.—May 26 (Independence Day); February 23 (Republic Day).

GOVERNMENT

Guyana became independent on May 26, 1966, with a Governor General appointed by the Queen. It

became a Co-operative Republic on Feb. 23, 1970. Under the Independence Constitution the Prime Minister and Cabinet were responsible to a National Assembly elected by secret ballot every 5 years. The last election under this Constitution was in 1973 and the term of that Assembly was later extended to October 1980.

A new Constitution was passed into law in February 1980 and promulgated in October 1980. It provides for an Executive President, a National Assembly of 65 members, and also for a National Congress of Local Democratic Organs responsible for local government. The Supreme Congress of the People consists of all members of these two assemblies.

The electoral system is ■ Proportional Representation or "single list" system, each voter casting his vote for a party list of candidates. The voting age is 18.

Executive President, H. Desmond Hoyte, took office Aug. 1985, sworn in Dec. 12, 1985 for five-year term.

Cabinet (as at June 30, 1989)

Executive President (with responsibility for Home Affairs, Co-operatives, Regional Development), H. D. Hoyte.

First Vice President and Prime Minister, Hamilton Green.

Vice President (Culture and Social Development) and Deputy P.M., Mrs. Viola Burnham.

Attorney-General and Minister for Legal Affairs, Keith Massiah.

Deputy P.M. (Public Utilities), Robert H. O. Corbin.

Deputy P.M. (Planning and Development), William H. Parris.

SENIOR MINISTERS

Foreign Affairs, Rashleigh Jackson.

Finance, Carl Greenidge.

Planning and Development, Seeram Prashad.

Trade and Tourism, Winston Murray.

GUYANA HIGH COMMISSION
3 Palace Court, Bayswater Road, W2 4LP
[01-229 7684]

High Commissioner, His Excellency Mr. Cecil Stanley Pilgrim (1986).

JUDICATURE

The Supreme Court of Judicature consists of a Court of Appeal and ■ High Court. There are also Courts of Summary Jurisdiction. The Court of Appeal consists of the Chancellor as President, the Chief Justice and such number of Justices of Appeal ■ may be prescribed by Parliament.

The High Court consists of the Chief Justice, as President, and nine Puisne Judges. It is a court with unlimited jurisdiction in civil matters and exercises exclusive jurisdiction in probate, divorce and admiralty, and certain other matters.

Chancellor, K. M. George.

Chief Justice, R. Harper.

PRODUCTION, ETC.

The economy is based almost entirely on the main export items of sugar, rice, bauxite and alumina. Diamonds and gold are also mined, timber and rum are produced and there is some cattle ranching. The fishing industry is being expanded. Industry is fairly small-scale.

COMMUNICATIONS

Georgetown and New Amsterdam are the principal

ports, though bauxite ships also sail to Linden, on the R. Demerara, and Everton, on the R. Berbice. There are no public railways and the few roads are confined mainly to the coastal areas. Air transport is the easiest form of communication between the coast and the interior. There is ■ state-owned radio broadcasting station which operates two channels; there is ■ fledgling television service.

EDUCATION

The Government assumed total control of the education system in September 1976 and made education free from nursery to university level. The Government trains teachers for primary and secondary schools at its own institutions. In 1982 there were 368 nursery schools with 29,958 pupils, 423 primary schools with 130,003 pupils, and 414 secondary schools with 73,762 students.

Approximately 1,800 students were enrolled at the University of Guyana in degree programmes and certificate and diploma courses in 1986.

There are several technical and vocational institutions, as well as some 30 adult education schools (with an enrolment of 13,500). There are also ■ number of technical and vocational institutions not under the aegis of the Ministry of Education.

INDIA (The Republic of India)

AREA AND POPULATION.—The Republic of India has an area of 1,269,346 sq. miles (3,287,590 sq. km.), composed of three well-defined regions: the mountain range of the Himalayas; the Indo-Gangetic plain; and the Southern Peninsula. The main mountain ranges are the Himalayas in the north (over 29,000 feet) and the Western and Eastern Ghats (over 8,000 feet). Major rivers include the Ganges, Indus, Krishna, Godavari and Mahanadi.

There are four seasons: the cold season (Dec.—March); the hot season (April—May); the rainy season (June—Sept.); and the season of the retreating S.W. monsoon (Oct.—Nov.). Temperatures vary over the whole country, between averages of about 10° C and 33° C, reaching over 33° C in some parts during the hot season. There are similar variations in rainfall, from only a few inches a year falling in the western Thar Desert to over 400 inches in Meghalaya.

India is the second most populous country in the world. The population at the 1981 Census was 685,184,692, of which slightly more than 20 per cent was urban. A 1985 U.N. estimate gave ■ figure of 750,900,000. The majority of the population are Hindu (82 per cent), the rest being Muslim (11 per cent), Christian (2·5 per cent), Sikh (1·8 per cent), Buddhist (0·7 per cent) and Jain (0·5 per cent). The official languages are Hindi in the Devanagari script and English, though 14 regional languages also are recognized for adoption as official State languages.

HISTORY.—The Indus civilization was fully developed by c. 2,500 B.C. but collapsed c. 1,750 B.C., subsequently being replaced by an Aryan civilization

spread from the west. The first Arab invasions of the north west began in the seventh century and Muslim, Hindu and Buddhist states developed until the establishment of the Mogul dynasty in 1526. The British East India Company established settlements throughout the 17th century; clashes with the French and native princes led to the British government taking control of the company in 1784. The separate dominions of India and Pakistan became independent within the Commonwealth in 1947 and India became ■ Republic in 1950.

CAPITAL.—Delhi (population in 1981 was 6,220,000). Populations of other principal cities (1981 figures) were ■ Calcutta, 9,166,000; ■ Bombay (Mumbai), 8,202,000; ■ Madras, 4,277,000; Bangalore, 2,914,000; Hyderabad, 2,566,000; Ahmedabad, 2,124,000; Kanpur, 1,685,000; Pune, 1,685,000; Lucknow, 1,007,000.

CURRENCY.—Indian rupee (Rs) of 100 paisa.

FLAG.—The National Flag is a horizontal tricolour with bands of deep saffron, white and dark green in equal proportions. In the centre of the white band appears ■ Asoka wheel in navy blue.

NATIONAL ANTHEM.—Jana-gana-mana.

NATIONAL DAY.—January 26 (Republic Day).

STATES AND TERRITORIES OF THE UNION

There are 25 States and seven Union Territories. Each State is governed by a Governor appointed by the President who holds office for five years, and ■ Council of Ministers. All States have a Legislative Assembly, and some have also ■ Legislative Council, elected directly by adult suffrage for a maximum period of five years. The judges of the High Court of ■ State are appointed by the President.

The Union Territories are administered, except where otherwise provided by Parliament, by the President acting through an Administrator or Lieutenant Governor, or other authority appointed by him.

GOVERNMENT

The Constitution of India came into force in 1950. Executive power is vested in the President, who is elected for ■ five year term by an electoral college consisting of the elected members of the Union and State Legislatures. He appoints the Prime Minister and, on the latter's advice, the Ministers, and can dismiss them. The Council of Ministers is collectively responsible to the *Lok Sabha* (Lower House). The Vice President is ex-officio chairman of the *Rajya Sabha* (Upper House).

Legislative power rests with the President, the *Rajya Sabha* (which has up to 250 members) and the *Lok Sabha* (which has up to 544 members). Twelve members of the *Rajya Sabha* are nominated by the President, the rest are indirectly elected representatives of the State and Union Territories. They hold office for six years. The 525 members of the *Lok Sabha* representing the States are directly elected by universal adult franchise, and 17 representatives of the Union Territories are chosen, for ■ maximum term of five years. Subject to the provisions of the Constitution, the Union Parliament can make laws for the whole of India and the State legislatures for their respective units.

The Supreme Court consists of the Chief Justice and not more than 17 other judges, appointed by the President. It is the highest court in respect of all constitutional matters and the final Court of Appeal.

President of the Republic of India, Ramaswami Venkataraman, elected July 16, 1987.
Vice-President, Shankar Dayal Sharma.

DEFENCE

The supreme command of the armed forces is vested in the President. Administrative and operational control resides in the Army, Navy and Air Headquarters under the supervision of the Ministry of Defence.

The Army has five Commands, Southern, Eastern, Northern, Western and Central.

The Indian Navy consists of two aircraft-carriers, ■ number of frigate squadrons, including some of the latest type of anti-submarine and anti-aircraft frigates, ■ squadron of anti-submarine patrol vessels, minesweeping squadrons, conventional type submarines and a submarine depot ship. A Naval aviation wing and a hydrographic office have also been set up. India has started building her own naval craft.

The Indian Air Force is organized in seven major formations, the Western, Eastern, Central, Southern and South Western Air Commands, and the Training and Maintenance Commands. Aircraft in use include SU-7, Hunter, Gnat, MiG 21 and MiG 23, Canberra bomber, Jaguar and Mirage-2000, helicopter and training planes.

PRODUCTION

Agriculture

Agriculture is the chief industry, supporting about 70 per cent of the population, and providing nearly 40 per cent of the Gross Domestic Product. The area under cultivation has been increased by irrigation schemes, but most holdings are less than five acres. Production has grown by three per cent each year since 1951, remaining slightly ahead of the two per cent increase necessary to keep pace with the rising population. Food crops occupy three-quarters of the total cropped area and production of food grains amounted to 143 million tonnes in 1986-87 but declined to 138 million tonnes in 1987-88 owing to severe drought. In 1988-89 foodgrains production is expected to reach about 169 million tonnes following good rains. The main food crops are rice, cereals (principally wheat) and pulses. The major cash crops include sugar cane, jute, cotton and tea. Other products include oil seeds, spices, groundnuts, tobacco, rubber and coffee. Livestock is raised, principally for dairy purposes or for the hides: cattle (181 million), goats (71 million), sheep (41 million) and pigs (9.9 million).

Industry

India's major industries are based on the exploitation and processing of her mineral resources, principally coal, oil and iron. The coal industry, nationalized in the early 1970s, reached an output in 1988-89 of 195 million tonnes. Production of crude oil, from the main fields in Assam and from offshore drilling was about 32.2 million tonnes in 1988-89. Steel production is mainly in the hands of the public sector, with five public and one private sector integrated steel plants producing 12.4 million tonnes of ingot steel in 1986-87. The engineering industry, heavy and light, is also primarily in the hands of the public sector. The manufacture of chemicals, fertilizers, petrochemicals, motor vehicles and commercial vehicles has been expanded.

Other principal manufactures are those derived from agricultural products, textiles, jute goods, sugar, leather, which along with tea, fish, and iron ore and concentrates, are India's major exports.

FINANCE

The budget estimates for 1989-90, placed current expenditure (on revenue account) at Rs.596,420 million. Current revenue (excluding States' shares) was estimated at Rs.518,950 million.

JAMAICA

AREA, POPULATION, ETC.—Jamaica is situated in the Caribbean Sea south of the eastern extremity of Cuba and lies between latitudes 17° 43' and 18° 32' North, and longitude 76° 11' and 78° 21' West. Jamaica is 4,244 sq. miles (10,991 sq. km.) in area and is divided into three counties (Surrey, Middlesex and Cornwall) and 14 parishes. The greatest length from east to west (Morant Point to Negril Point) is 146 miles and the extreme breadth 51 miles.

The topography consists mainly of coastal plains, divided by the Blue Mountain Range in the east, and the hills and limestone plateaux which occupy the central and western areas of the interior. The central chain of high peaks of the Blue Mountains is over 6,000 feet above sea level, and the Blue Mountain Peak, the highest of these, reaches an elevation of 7,402 feet.

At Dec. 31, 1987 Jamaica's population was estimated to be 2,355,100. The island was discovered by Columbus on May 4, 1494, and occupied by the Spanish from 1509 until 1655 when a British expedition, sent out by Oliver Cromwell, under Admiral Penn and General Venables, attacked the island, which capitulated after a token resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

CAPITAL.—The seat of government is £Kingston, the largest town and seaport (estimated population of the Corporate area of Kingston and St. Andrew in 1982, 696,300). Other towns are £Montego Bay, Spanish Town, Mandeville and May Pen.

CURRENCY.—Jamaican dollar (J\$) of 100 cents.

FLAG.—Gold diagonal cross forming triangles of green at top and bottom, triangles of black at hoist and in fly.

NATIONAL DAY.—First Monday in August (Independence Day).

GOVERNMENT

Jamaica became an independent state within the Commonwealth on Aug. 6, 1962. The Legislature consists of ■ Senate of 21 nominated members and a House of Representatives consisting of 60 members elected by universal adult suffrage. The Senate has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives. The Constitution provides for ■ Leader of the Opposition.

At the General Election of February 9, 1989, the People's National Party won 45 seats and the Jamaica Labour Party won 15.

COMMUNICATIONS

There are several excellent harbours, Kingston being the principal port. The island has 2,944 miles of main roads and over 7,000 miles of subsidiary roads. There are about 204 miles of railway. Telegraph stations and post offices are established in every town and in very many villages.

There are two international airports capable of handling the largest civil jet aircraft, the Norman Manley International Airport on the south coast serving Kingston, and Sangster Airport on the north coast serving the major tourist areas. In addition there are licensed aerodromes at Port Antonio, Ocho Rios, Mandeville and Negril. There are 16 privately owned, seven public and two military airstrips.

Air Jamaica, the national airline, operates international services; Trans-Jamaica Airlines operates scheduled internal services.

PRODUCTION

Agriculture.—Most of the staple products of tropical climates are grown; sugar, bananas, pimento, coffee and citrus fruit. Some of the sugar is used to produce rum and molasses. Main products exported in 1987 were sugar (US\$74·1 million), bananas (US\$19·1 million), citrus fruit and citrus products (US\$6·1 million).

Industry.—Jamaica is the fourth largest producer of bauxite in the world; output for 1985 was 5,975,000 tonnes of which 1,513,000 tonnes were processed into alumina before being exported. In 1987 exports of bauxite and alumina were valued at US\$336·5 million. Cement is manufactured locally, the output being 232,800 long tons in 1985.

In the last decade, manufacturing has grown from the processing of ■ few agricultural products into the production of a whole range of commodities such as textiles, clothing, footwear, and construction materials. Jamaica is a popular tourist resort, attracting visitors mainly from the U.S.A. In 1985 the total number of visitor arrivals was 846,716, and expenditure was estimated at US\$406·8 million.

KENYA HIGH COMMISSION
45 Portland Place, W1N 4AS
[01-636 2371]

High Commissioner, Her Excellency Dr. Sally Jemng-Etich Kosgei (1987).

PRODUCTION

Agriculture provides about 52 per cent of total export earnings (excluding processed oil products). The great variation in altitude and ecology provide conditions under which a wide range of crops can be grown. These include wheat, barley, pyrethrum,

coffee, tea, sisal, coconuts, cashew nuts, cotton, maize and a wide variety of tropical and temperate fruits and vegetables. The total area of well-farmed land on which concentrated mixed farming can be practised is small and the remainder is arid or semi-arid country but population pressure and the need to increase agricultural production for export has led to attempts to develop such areas.

Prospecting and mining are carried on in some parts of the country, the principal minerals produced being soda ash, salt and limestone.

Hydro-electric power has been developed, particularly on the Upper Tana River. Kenya is now almost self-sufficient in electric power generation but the connection with Owen Falls in Uganda is still in being.

There has been considerable industrial development over the last 15 years and Kenya has a wide variety of industries processing agricultural produce and manufacturing an increasing range of products from local and imported raw materials. New industries have recently come into being such as steel, textile mills, dehydrated vegetable processing and motor tyre manufacture as well as many smaller schemes which have added to the country's already considerable consumer goods. There is an oil refinery in Mombasa supplying both Kenya and Uganda, and a fuel pipeline now connects Mombasa and Nairobi.

COMMUNICATIONS

The Kenya Railways Corporation has 1,300 miles of railway open to traffic. There are also 31,000 miles of road, of which 2,700 are bitumen surfaced. Trans-border links with Tanzania were re-opened in 1985 with rail services for freight and steamer services for passengers and freight.

The principal port is Mombasa, operated by the Kenya Ports Authority.

International air services operate from airports at Nairobi and Mombasa.

TRADE

Principal exports are coffee and tea, which account for 33 per cent of total export earnings. Also exported are fruit, vegetables, and crude animal and vegetable material. Petroleum products account for about 37 per cent of imports; other imports are manufactured goods, particularly machinery, transport equipment, metals, pharmaceuticals and chemicals.

KIRIBATI (Ribaberikin Kiribati)

AREA, POPULATION, ETC.—Kiribati, the former Gilbert Islands, became an independent Republic in 1979. Kiribati comprises 36 islands—the Gilberts Group (17) including Banaba, formerly Ocean Island; the Phoenix Islands (8); and the Line Islands (11)—situated in the South West Central Pacific around

the point at which the International Date Line cuts the Equator. The total land area of 281 sq. miles (728 sq. km.), is spread over some 2 million square miles of ocean. Few of the atolls are more than half a mile in width or more than 12 feet high. The vegetation consists mainly of coconut palms, breadfruit trees and pandanus. The population (1985 Census) was approx. 63,800. The population is predominantly Christian.

CAPITAL—Tarawa (Population estimated at 24,400).

CURRENCY.—Kiribati uses the Australian dollar (\$A) of 100 cents.

FLAG.—Red, with blue and white wavy lines in base, and in the centre ■ gold rising sun and a flying frigate bird.

NATIONAL ANTHEM.—Teirake Kain Kiribati (Stand Kiribati).

NATIONAL DAY.—July 12 (Independence Day).

GOVERNMENT

The President is Head of State as well as Head of Government and is elected nationally. There is an elected House of Assembly (36 members); executive authority is vested in the Cabinet.

ECONOMY

Most people still practise ■ semi-subsistence economy, the main staples of their diet being coconuts and fish.

Estimated recurrent revenue for 1987 is \$A17,756,000. United Kingdom budgetary assistance ceased in 1985. The principal imports are foodstuffs, consumer goods, machinery and transport equipment. The principal exports are copra, which earned \$A1,173,000, and fish, income from which was around \$A823,000 in 1987. Total value of exports in 1987 was \$A2,869,000.

COMMUNICATIONS

Air communication exists between most of the islands, and is operated by Air Tungaru, a statutory corporation. Air Marshall Islands operate ■ weekly service between Majuro/Tarawa/Funafuti and Nandi. Inter-island shipping is operated by a statutory corporation, the Shipping Corporation of Kiribati.

SOCIAL WELFARE

The Government maintains a teacher training college and a secondary school. Four junior second-

ary schools are maintained by missions. Throughout the Republic there are about a hundred primary schools. The total enrolment of children of school age is about 14,000. The Marine Training School at Tarawa trains seamen for service with overseas shipping lines. There is a general hospital at Tarawa. The other inhabited islands have dispensaries.

NATIONAL ANTHEM.—Pina ea Sechaba.

NATIONAL DAY.—October 4 (Independence Day).

GOVERNMENT

Lesotho became a constitutional monarchy within the Commonwealth on October 4, 1966. The independence constitution was suspended in January 1970, when the country was governed by ■ Council of Ministers, until the establishment of a nominated National Assembly in April 1974. The Government was overthrown in Jan. 1986; all legislative and executive authority is now vested in the King acting on advice from ■ Military Council and with the assistance of a Council of Ministers.

The country is divided into ten administrative districts. In each district there is a District Co-ordinator who co-ordinates all Government activity in the area, working in co-operation with hereditary chiefs.

Head of State, H.M. King Moshoeshoe II.

LESOTHO HIGH COMMISSION
10 Collingham Road, SW5 0NR
[01-373 8581]

High Commissioner, new appointment awaited.

EDUCATION

Most schools are mission-controlled, the Government providing grants for salaries and buildings. There are over 1,000 primary and over 100 secondary schools; few areas lack a school and there is a high literacy rate of about 70 per cent. Increasing emphasis is being laid on agricultural and vocational education. The National University of Lesotho at Roma was established in 1975.

COMMUNICATIONS

A tarred road of 110 miles links Maseru to several of the main lowland towns, and this is being extended in the south of the country. The mountainous areas are linked by 1,300 miles of gravelled and earth roads and tracks. Roads link border towns in South Africa with the main towns in Lesotho. Maseru is connected by rail with the main Bloemfontein-Natal line of the South African Railways. Scheduled international air services are operated daily between Maseru and Johannesburg and other scheduled international flights are to Manzini and Maputo. There are around 30 airstrips. Internal scheduled services are operated by the Lesotho Airways Corporation.

The telephone network is fully automated in all urban centres. Radio telephone communication is used extensively in the remote rural areas.

PRODUCTION

The economy of Lesotho is based on agriculture and animal husbandry, and the adverse balance of trade (mainly consumer and capital goods) is offset by the earnings of the large numbers of the population

who work in South Africa. Apart from some diamonds, Lesotho has few natural resources and only small-scale industrial development. The Lesotho National Development Corporation was set up to promote the development of industry, mining, trade and tourism. Work has commenced on the Highlands Water Scheme designed to provide water for the Vaal industrial zone in South Africa and hydro-electricity for Lesotho. Drilling is being carried out for oil. A National Park has been established at Sehlabathebe in the Maluti mountains. A number of light manufacturing and processing industries have recently been established.

FINANCE AND TRADE

The main sources of revenue are customs and excise duty. Estimates of expenditure and revenue (1986) are recurrent revenue M241.2 million; recurrent expenditure M265.3 million; capital revenue M144 million; capital expenditure M198 million.

High Commissioner, His Excellency Mr. Bernard B. Mtawali (1987).

EDUCATION

Primary education is the responsibility of local authorities in both urban and rural areas, although policy, curricula and inspection are the responsibility of the Ministry of Education and Culture. The Ministry is also responsible for secondary schools, technical education and primary teacher training. Religious bodies, with Government assistance, still play an important part in these fields. The University of Malawi was opened in 1965 and has four constituent colleges.

COMMUNICATIONS

A single-track railway runs from Mchinji on the Zambian border, through Lilongwe and Salima on Lake Malawi (itself served by two passenger and a number of cargo boats) through Blantyre to the southern frontier into Mozambique, and connecting with the Mozambique port of Beira. There are 12,215 km. of roads in Malawi of which about 21·8 per cent are bituminized.

There is an international airport 26 km. from Lilongwe, which handles regional and inter-continental flights.

MALAYSIA (Persekutuan Tanah Malaysia)

AREA, POPULATION, ETC.—Malaysia, comprising the 11 states of peninsular Malaya plus Sabah and Sarawak, forms a crescent well over 1,000 miles long between latitudes 1° and 7° N. and longitudes 100° and 119° E. It occupies two distinct regions—the Malay peninsula which extends from the isthmus of Kra to the Singapore Strait and the north-west coastal area of the island of Borneo. Each is separated from the other by 400 miles of the South China Sea. The total area of Malaysia, including the Federal Territories of Kuala Lumpur and Labuan, is approx. 127,317 sq. miles, (329,749 sq. km.), containing a population of 16,921,300 (1988 Census). The principal racial groups are the Malays, the Chinese and those of Indian and Sri Lankan origin, as well as the indigenous races of Sarawak and Sabah. Bahasa Malaysia (Malay) is the sole official language, but English, various dialects of Chinese, and Tamil are also widely spoken. There are a few indigenous languages widely spoken in Sabah and Sarawak.

RELIGION.—Islam is the official religion of Malaysia, each Ruler being the head of religion in his State, though the Heads of State of Sabah and Sarawak are not heads of the Muslim religion in their States. The Yang di-Pertuan Agung is the head of religion in Malacca and Penang. The Constitution guarantees religious freedom.

CLIMATE.—The year is commonly divided into the Southwest and Northwest monsoon seasons. Rainfall averages about 100 inches throughout the year, though the annual fall varies from place to place. The average daily temperature throughout Malaysia varies from 21° C. to 32° C., though in higher areas temperatures are lower and vary widely.

CAPITAL.—Kuala Lumpur was proclaimed Federal Territory on February 1, 1974. Its population is (1985) 1,103,200.

CURRENCY.—Malaysian dollar (ringgit) (M\$) of 100 sen.

FLAG.—Equal horizontal stripes of red (7) and white (7); 14 point yellow star and crescent in blue canton.

NATIONAL ANTHEM.—Negara-Ku.

NATIONAL DAY.—August 31 (*Hari Kebangsaan*).

FEDERAL TERRITORIES

The two Federal Territories and their population at the 1988 Census are:

Kuala Lumpur	1,182,700
Labuan	

GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, ■■■ result of an agreement between H.M. the Queen and the Rulers of the Malay States. On Sept. 16, 1963, the Federation was enlarged by the accession of the states of Singapore, Sabah (formerly British North Borneo) and Sarawak, and the name of Malaysia was adopted from that date. On Aug. 9, 1965, Singapore seceded from the Federation.

The Constitution was designed to ensure the existence of ■ strong Federal Government and also a measure of autonomy for the State Governments. It provides for a constitutional Supreme Head of the Federation (H.M. the Yang di-Pertuan Agung) to be elected for a term of five years by the Rulers from among their number, and for a Deputy Supreme Head (H.R.H. Timbalan Yang di-Pertuan Agung) to be similarly elected. The Malay Rulers are either chosen or succeed to their position in accordance with the custom of the particular state. In other states of Malaysia choice of the Head of State is at the discretion of the Yang di-Pertuan Agung after consultation with the Chief Minister of the State.

The Federal Parliament consists of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) consists of 68 members, under ■ President (Yang di-Pertua Dewan Negara), 26 elected by the Legislative Assemblies of the States (2 from each) and 42 appointed by the Yang di-Pertuan Agung. The House of Representatives (*Dewan Rakyat*), consists of 177 members (Peninsular Malaysia, 134; Sarawak, 24; and Sabah, 20). Members are elected on the principle of universal adult suffrage with ■ common electoral roll.

The Constitution provides that each State shall have its own Constitution not inconsistent with the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the Chief Minister and ■ single chamber Legislative Assembly. The State Secretary, the State Legal Adviser and the State Financial Officer sit in the Executive Council ■ ex officio members. The Legislative Assemblies are fully elected on the same basis as the Federal Parliament.

[01-235 8033]

High Commissioner, His Excellency Dato Mon Bin Jamaluddin (1988).

JUDICATURE

The Judicial System consists of ■ Supreme Court and two High Courts, one in Peninsular Malaysia and one for Sabah and Sarawak (sitting alternately in Kota Kinabalu and Kuching).

The Supreme Court comprises a President, the two Chief Justices of the High Courts and other judges. It possesses appellate, original and advisory jurisdiction.

Each of the High Courts consists of a Chief Justice and not less than 4 other judges. The Federal Constitution allows for a maximum of twelve such judges for Malaya and eight for Borneo. In Peninsular Malaysia the Subordinate Courts consist of the Sessions Courts and the Magistrates' Courts. In Sabah/Sarawak the Magistrates' Courts constitute the Subordinate Courts.

DEFENCE

The Malaysian Armed Forces consist of the Army, Navy and Air Force, together with volunteer forces for each arm. The defence of the country is largely borne by the army in its role of providing defence against external threat and counter-insurgency operations and also to assist the police in the performance of public order duties. The Royal Malaysian Navy (RMN) has the responsibility of defending the 3,000 miles of the country's coastline and maintaining constant patrol of 500 miles of the high seas that separate Sabah and Sarawak from the mainland. The Royal Malaysian Air Force (RMAF) is capable of providing close strategic and tactical support to the army and police in the defence and internal security of the country.

PRODUCTION AND TRADE

The agricultural sector continues to be the mainstay of the Malaysian economy. However, diversification of crops and rapid growth in the manufacturing sector has made Malaysia less vulnerable to fluctuations in the price of its primary crop, natural rubber.

Malaysia is the largest exporter of natural rubber, tin, palm oil and tropical hardwoods. Other major export commodities are manufactured and processed products, petroleum, oil, and other minerals, palm kernel oil, tea and pepper.

Exports of major commodities were (percentage of total exports):

	1987	1988
Primary commodities	31.9	34.0
Petroleum	15.2	17.8
Manufactured goods	44.2	44.9

Another commodity which is produced throughout Malaysia is rice, the staple food, and efforts are being made to achieve self-sufficiency.

Imports consist mainly of machinery and transport equipment, manufactured goods, foods, mineral fuels, chemicals and inedible crude materials for her growing population and to accelerate the pace of her economic growth and development.

THE MALDIVES
(Divehi Jumhuriya)

AREA, POPULATION, ETC.—The Maldives are a chain of coral atolls, some 400 miles to the south-west of Sri Lanka, stretching from just south of the equator for about 600 miles to the north. There are about 20 coral atolls comprising over 1,200 islands, 202 of which are inhabited. Total area of the islands is 115 sq. miles (298 sq. km.). No point in the entire chain of islands is more than 8 feet above sea-level. The population of the islands (1988) is 200,000. The people are Sunni Muslims and the Maldivian language is akin to Elu or old Sinhalese.

CAPITAL.—*ψ Malé* (population, 1985, 46,334). There is an international airport at Malé.

CURRENCY.—Rufiyaa of 100 laaris.

FLAG.—Green field bearing a white crescent, with wide red border.

NATIONAL ANTHEM.—Qawmee Salaam.

NATIONAL DAY.—July 26.

GOVERNMENT

Until 1952 the islands were a Sultanate under the protection of the British Crown. Internal self-government was achieved in 1948 and full independence in 1965. In 1982 the Republic of the Maldives became a special member of the Commonwealth, and ■ full member in 1985.

The Maldives form a Republic which is elective. There is a Parliament (the *Citizens' Majlis*) with representatives elected from all the atolls. The life of the Majlis is 5 years. The Government consists of a Cabinet, which is responsible to the Majlis.

President, His Excellency Maumoon Abdul Gayoom, elected 1978, 1983, re-elected September 1989 (also Minister of Defence and National Security).

MALTA
(Repubblika Ta'Malta)

AREA, POPULATION, ETC.—Malta lies in the Mediterranean Sea, 58 miles from Sicily and about 180 miles from the African coast, about 17 miles in length and 9 in breadth, and having an area of 94·9 square miles. Malta includes also the adjoining islands of Gozo (area 25·9 sq. miles), Comino and minor islets. The estimated population at 1987 was 345,636.

Maltese and English are the official languages of administration and Maltese is ordinarily the official language in all the courts of law and the language of general use in the islands.

Malta was in turn held by the Phoenicians, Greeks, Carthaginians, Romans and Arabs. In 1090 it was conquered by Count Roger of Normandy. In 1530 it was handed over to the Knights of St. John, who made it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withheld by Grandmaster La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and the island was subsequently blockaded by the British fleet. The Maltese people freely requested the protection of the British Crown in 1802 on condition that their rights and privileges would be preserved and respected. The islands were finally annexed to the British Crown by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged. The island was awarded the George Cross in 1942.

CAPITAL.—Valletta. Population (Census 1985), 9,239. Valletta Grand Harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call and ship repairing centre for vessels, being half-way between Gibraltar and Port Said.

CURRENCY.—Maltese lira (LM) of 100 cents and 1,000 mils.

FLAG.—Two equal vertical stripes, white at the hoists and red at the fly. A representation of the George Cross is carried edged in red in the top corner of the white stripe.

NATIONAL ANTHEM.—Lil Din I-Art Helwa.

NATIONAL DAY.—March 31.

GOVERNMENT

On Sept. 21, 1964, under the Malta Independence Order, 1964, Malta became an independent state within the Commonwealth; on December 13, 1974, Malta became a republic within the Commonwealth.

Elections are held every five years by a system of proportional representation. Seats are obtained by the highest number of votes in the respective districts. The party with the highest number of votes forms the government, with extra members being co-opted if necessary.

President.—Dr. Vincent Tabone.

MALTA HIGH COMMISSION
 16 Kensington Square, W8 5HH
 [01-938 1712]

High Commissioner, His Excellency John A. Manduca (1987).

EDUCATION

In June 1987 there were 92 Government Primary Schools with 26,324 pupils and 43 Secondary Schools and new Lyceums, with a total of 14,478 pupils.

The Government also runs 24 Technical/Trade Schools (with an enrolment of 6,610 students). Schools of Art, Music, Secretarial Studies, Catering, Nursing and Dramatic Art are sponsored by the Government. Tertiary education is available at the University of Malta, which had 1,449 students in 1987.

A number of private schools offer more or less the same facilities that exist in Government schools. All state education is free.

The Maltese are mainly Roman Catholic. The Maltese language is of Semitic origin and held by some to be derived from the Carthaginian and Phoenician tongues.

AGRICULTURE

Agriculture plays a significant role in the economy. There are 2,920 full time farmers and about 12,400 part time farmers. The yearly crop production is about 104,270 tonnes consisting mainly of tomatoes, potatoes, onions, cabbages and cauliflowers, and some 6,576 tonnes of fruit. Grape is the largest fruit crop. Flowers and cuttings are produced for export markets.

INDUSTRY

The island's leading industry is the state-owned Malta Drydocks, employing about 5,000 people. The main port of Grand Harbour handled traffic (excluding mineral oils) of 1,837,522 tonnes in 1987.

At the end of 1988 manufacturing firms employed some 28,271 people. The wide range of produce includes food processing, textiles and clothing, plastics and chemical products, electronic equipment and components. The gross output of the manufacturing industry in 1987 was LM351·3 million, of which LM188·3 million were export sales.

Tourism has assumed primary importance, with over 574,189 tourists visiting the island in 1987, and Marsamxett Harbour is being further developed by the extension of a yacht centre. Gross income from this industry stood at LM113 million.

MAURITIUS

AREA, POPULATION, ETC.—Mauritius is an island group lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and 19° 58'–20° 33' S. lat., and comprising with its dependencies an area of 790 square miles (2,045 sq. km.). The population (Dec. 1988 estimate) was 1,036,000 made up of Asiatic races (Hindus 52·6 per cent, Muslims 16·5 per cent), and persons of European (mainly French extraction), mixed and African descent (28·3 per cent).

English is the official language but French may be used in the Legislative Assembly and lower law courts. However, Creole is the mostly commonly used language.

CLIMATE.—Mauritius enjoys a sub-tropical maritime climate, with a wide range of rainfall and temperature resulting from the mountainous nature of the island. Humidity is rather high throughout the year and rainfall is sufficient to maintain a green cover of vegetation, except for a brief period in the driest districts.

CAPITAL.—Port Louis, population (1985), 138,272; other centres are Beau Bassin-Rose Hill (93,059); Curepipe (64,072); Vacoas-Phoenix (55,330) and Quatre Bornes (65,405).

CURRENCY.—Mauritius rupee of 100 cents.

FLAG.—Red, blue, yellow and green horizontal stripes.

NATIONAL ANTHEM.—Glory to the Motherland.

NATIONAL DAY.—March 12.

GOVERNMENT

Mauritius was discovered in 1511 by the Portuguese; the Dutch visited it in 1598, and named it Mauritius, after Prince Maurice of Nassau. From 1638 to 1710 it was held as a small Dutch colony and in 1715 the French took possession but did not settle it until 1721. Mauritius was taken by a British Force in 1810. A British garrison remained on the island until June 1960. The French language and French law were preserved under British rule.

A Crown Colony for 158 years, Mauritius became an independent state within the Commonwealth on

March 12, 1968. The Constitution defined by Order in Council in 1964 was slightly altered in 1966 on the recommendation of the Banwell Commission, the effect being to increase the membership of the Legislative Assembly to 70, 62 elected by block voting in multi-member constituencies (including 2 members for Rodrigues) and 8 specially-elected members. Of the latter, 4 seats go to the "best loser" of whichever communities in the island are under-represented in the Assembly after the General Election and the four remaining seats are allocated on the basis of both party and community. The Constitution provides for the appointment of a Governor General who acts on the advice of the Council of Ministers, collectively responsible to the Legislative Assembly.

In the August 1987 General Election, the Mouvement Socialiste Militant (MSM), allied with the Labour Party (MLP), the Parti Mauricien Social Democrat and the Organisation du Peuple Rodriguais (OPR), defeated the Mouvement Mauricien Militant and formed the Government, with a majority of 22 seats. The Parti Mauricien Social Democrat left the alliance in August 1988.

MAURITIUS HIGH COMMISSION
32-33 Elvaston Place, SW7 5NW
[01-581 0294]

High Commissioner, His Excellency Dr. Boodhun Teelock (1989).

EDUCATION

Primary education is free and in 1987 was provided for 137,935 children at 273 primary schools. Although education is not compulsory it is estimated that about 90 per cent of children of primary age attend school. At post-primary level there are a total of 69,825 students attending secondary schools: fees and teachers' salaries in the private secondary schools are paid by government. There are ■ number of Training Facilities offering training in engineering and mechanical trades, nursing, building, seamanship, hotel and catering etc. The College of Education trains primary school teachers. The Institute of Education is responsible for training secondary school teachers and for curriculum development. The University of Mauritius consists of Schools of Agriculture, of Administration and of Industrial Technology. Estimated expenditure on education in 1987-88 was Rs.791,700,000.

COMMUNICATIONS

Port Louis, on the N.W. coast, handles the bulk of the island's external trade. A bulk sugar terminal capable of handling the total crop began operating in 1980. The international airport is located at Plaisance in the southeast of the island about 5 miles from Mahébourg. There are 6 daily newspapers and 5 weeklies, mostly in French, and 2 Chinese daily papers and one weekly paper. The Mauritius Broadcasting Corporation has ■ monopoly of radio broadcasting in the country: television was introduced in 1965. There is a satellite communications ground station near Port Louis.

PRODUCTION

In 1988 the manufacturing sector employed 105,784, while the sugar industry employed 39,698.

About 55 per cent of the total sugar crop is produced on a plantation scale, while smaller owners (cultivating less than 10 acres) cultivate about 24 per cent of the land under cane. Tea and tobacco are also grown commercially but on ■ smaller scale than sugar.

Sugar	691,134	634,224
Tea (manufactured)	7,147	6,857
Tobacco (leaves)	912	970

In 1988 production of molasses, mainly for export, was 180,000 tonnes. Other products include alcohol, rum, denatured spirits, perfumed spirits and vinegar.

The bulk of the island's requirements in manufactured products still has to be imported. However, the Mauritius Export Processing Zone (M.E.P.Z.) scheme, introduced in 1971, has attracted investment from overseas and the number of export-orientated enterprises has risen from ten in 1971 to 591 at the end of 1988, employing 89,100 people. The biggest firms ■ in clothing manufacture, particularly woolen knitwear, but the range of goods produced includes toys, plastic products, leather goods, diamond cutting and polishing, watches, television sets and telephones.

Tourism is a major source of income for Mauritius, with ■ estimated 240,000 tourists in 1988. Earnings from tourism in 1987 are estimated to be Rs2,374 million (£95 million), compared with Rs1,175 million (£57 million) in 1986. The neighbouring French island of Réunion is the most important source of tourists, followed closely by mainland France.

FINANCE

The main sources of Government revenue are private and company income tax, customs and excise duties, mainly on imports, but also on sugar exports.

High Commissioner, His Excellency Michael Edward Howell, C.M.G., O.B.E.

RODRIGUES AND DEPENDENCIES OF MAURITIUS

Rodrigues, formerly ■ dependency but now part of Mauritius, is about 350 miles east of Mauritius. Area, 40 square miles. Population (1987) 36,537. Cattle, salt fish, sheep, goats, pigs and onions are the principal exports. The island is administered by an Island Commissioner.

Island Commissioner, Claude Wong So.

The islands of Agalega and St. Brandon are dependencies of Mauritius. Other small islands, formerly Mauritian dependencies, have since 1965 constituted the British Indian Ocean Territory (see p. 709).

REPUBLIC OF NAURU

The Republic of Nauru is an island of 8.2 sq. miles (21 sq. km.) in size, situated in 166° 55' E. longitude and 0° 32' S. of the Equator. It has a population (Census May 1983) of 8,042 (Nauruans 4,964; other Pacific Islanders 2,134; Asians 682; Caucasians 262). About 43 per cent of Nauruans are adherents of the Nauruan Protestant Church and there is a Roman Catholic Mission on the island. The main languages are English and Nauruan.

CURRENCY.—Nauru uses the Australian dollar of 100 cents ■ legal tender.

FLAG.—Twelve-point star (representing the 12 original Nauruan tribes) below a gold bar (representing the Equator), all on a blue ground.

NATIONAL DAY.—January 31 (Independence Day).

GOVERNMENT

From 1888 until the First World War Nauru was administered by Germany, in 1920 becoming ■ British mandated territory under the League of Nations administered by Australia. A Trusteeship superceding the Mandate was approved in 1947 by the U.N. and Nauru continued to be administered by Australia until it became an Independent State on February 1, 1968. It was announced in November, 1968, that a limited form of membership of the Commonwealth had been devised for Nauru at the request of its Government.

Parliament has eighteen members including the Cabinet and Speaker. Voting is compulsory for all Nauruans over 20 years of age, except in certain

specified instances. Elections are held every three years. The Cabinet is chosen by the President and comprises not fewer than five nor more than six members including the President.

President and Minister for External Affairs, Internal Affairs, Island Development and Industry, Civil Aviation Authority and the Public Service, His Excellency Hon. Hammer DeRoburt, G.C.M.G., O.B.E.

Cabinet (as at May 31, 1989)

Works and Community Services and Minister Assisting the President, Hon. R. B. Detudamo.

Finance, Hon. K. Clodumar.

Health and Education, Hon. R. Kun.

Justice, Hon. B. Dowiyogo.

The government fell in August 1989; elections are planned for December.

JUDICIARY

A Supreme Court of Nauru is presided over by the Chief Justice. The District Court, which is subordinate to the Supreme Court, is presided over by a Resident Magistrate. Both the Supreme Court and the District Court are Courts of Record. The Supreme Court exercises both original and appellate jurisdiction.

EDUCATION AND WELFARE

Nauru has a hospital service and other medical and dental services. There is also a maternity and child welfare service. Education is available in 9 primary and 2 secondary schools on the island with a total enrolment of about 1,600 pupils receiving primary education and 500 secondary education.

PRODUCTION, ETC.

The only fertile areas are the narrow coastal belt and local requirements of fruit and vegetables are mostly met by imports. The economy is heavily dependent on the extraction of phosphate, of which the island has one of the world's richest deposits. About 1.5 million tonnes of phosphate are mined each year, providing employment for over 1,000 people. The industry has been run since 1970 by the Nauru Phosphate Corporation. Considerable investments have been made abroad with the royalties on phosphate exports to provide for a time when production declines.

The Nauru Pacific Line owns six ships: the Government-owned Air Nauru normally operates air services throughout the Pacific region and to Australia, New Zealand, Japan, Singapore and the Philippines. Scheduled services have ceased since December 1988.

NIGERIA (Federal Republic of Nigeria)

AREA, POPULATION, ETC.—The Republic of Nigeria is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west by the Republic of Benin, on the north by Niger and on the east by Cameroon. It has an area of 356,669 sq. miles (923,768 sq. km.), with a population presently estimated at around 100,000,000. The population is almost entirely African. The main ethnic groups are

Hausa/Fulani, Yoruba and Ibo, and the principal languages are English, Hausa, Yoruba and Ibo. Over half the population are Muslim, these being concentrated in the north and west. In the southern areas in particular there are many Christians.

A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is a zone 50–100 miles wide of tropical rain forest and oil-palms. North of this the country rises and the vegetation changes to open woodland and savanna. In the extreme north the country is semi-desert. There are few mountains, but in Northern Nigeria the central plateau rises to an average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. The rainy season is from about April to October; rainfall varies from under 25 inches a year in the extreme north to 172 inches on the coast line. During the dry season the *harmattan* wind blows from the desert; it is cool and laden with fine particles of dust.

CAPITAL.—*ΨLagos*, estimated population, 3,000,000. Other important towns are Ibadan, Kaduna, Kano, Benin City, Enugu and *ΨPort Harcourt*. Movement of Federal Ministries to a new capital at Abuja has begun.

CURRENCY.—*Naira (N) of 100 kobo.*

FLAG.—Three equal vertical bands, green, white and green.

NATIONAL ANTHEM.—*Arise, O Compatriots.*

NATIONAL DAY.—October 1 (Republic Day).

GOVERNMENT

The Federation of Nigeria attained independence as a member of the Commonwealth on Oct. 1, 1960 and became a republic in 1963. On Jan. 15, 1966 the military took power, suspended the Constitution and dissolved the legislature. In 1979 civil rule was restored under a new constitution similar to that of the United States after elections at National and State level. After similar elections in 1983 the new administration was removed by the military on Dec. 31, this regime itself being overthrown in Aug. 1985. A 28-member Armed Forces Ruling Council was sworn in on Aug. 30. It is the country's most senior decision-making body. The Council of Ministers is the third most senior body after the A.F.R.C. and the National Council of States, which comprises the 21 State Governors.

Originally regional in structure the Federation was divided into 12 states in 1967. It was divided again into 19 states in 1976, and a further two states were created in 1987.

On May 3, 1989 Gen. Babangida promulgated the new draft constitution paving the way for a return to civilian rule by 1992. He also announced that a ban on political parties was to be lifted, leading to the formation of a large number of parties.

Head of State, Commander-in-Chief of the Armed Forces, Chairman of the Armed Forces Ruling Council, Maj.-Gen. Ibrahim Babangida.

NIGERIA HIGH COMMISSION
Nigeria House, 9 Northumberland Avenue,
WC2N 5BX
[01-839 1244]

High Commissioner, His Excellency Mr. George Dove-Edwin (1986).

EDUCATION

A programme was introduced in September 1976 intended to achieve universal primary education. Numbers of pupils in 1982-83 were: 15·4 million in primary schools, 3·5 million in secondary schools, 53,766 in polytechnics and 88,636 in universities. There are 24 universities.

COMMUNICATIONS

The Nigerian railway system, which is controlled by the Nigerian Railway Corporation, is the most extensive in West Africa. There are 2,178 route miles of lines. The principal international airlines operating from Lagos, Kano and Port Harcourt bring Nigeria within about six hours of the Western European capitals. There are also services to other parts of Africa and to the United States. A network of internal air services connects the main centres. The principal seaports are served by a number of shipping lines, including the Nigerian National Line. A nationwide television and radio network is being developed, with each State eventually having its own television and radio station. There is a network of meteorological reporting stations.

PRODUCTION AND INDUSTRY

Nigeria was a predominantly agricultural country until the early 1970s with agriculture contributing over 60 per cent of export revenue and 45 per cent of G.N.P. Tin and calumite mining on the Jos plateau, textiles and coal mining were also important. The

major exports were ground nuts, palm products, tin, cocoa, rubber and timber. Recently oil has provided over 90 per cent of exports revenue and agricultural exports have greatly declined. Though agriculture still employs half the labour force it contributes only 20 per cent of G.N.P., exceeded by trading and oil. The construction sector is twice as large as the manufacturing sector and industries dependent on imported raw materials such as vehicle assembly have faltered recently. Three oil refineries are in operation at Port Harcourt, Warri and Kaduna. A steel plant has been opened near Warri and a larger one is being completed at Ajaojukuta. Other projects include natural gas liquification, petro-chemicals, fertilizers and several power stations plus the Abuja Federal Capital. Several large irrigation schemes have been completed and more are planned.

TRADE

Oil revenues have been falling since 1981 and are now restricted by an OPEC production quota and lower prices to half their peak level. In March 1982 imports curbs and payments restrictions were introduced but exchange reserves fell and debts increased. Austerity measures were introduced, and continue, while the present Government attempts to stimulate greater self-reliance in the economy by encouraging non-oil exports and the use of local rather than imported raw materials.

PAPUA NEW GUINEA

AREA, POPULATION, ETC.—Papua New Guinea extends from the equator to Cape Baganawa in the Louisiade Archipelago at 11° S. latitude and from the border with Irian Jaya to 160° E. longitude. The total area of Papua New Guinea is 178,260 sq. miles, (461,691 sq. km.), of which approximately 152,420 sq. miles form the mainland, on the island of New Guinea. The country has many island groups, principally the Bismarck Archipelago, a portion of the Solomon Islands, the Trobriands, the D'Entrecasteaux Islands and the Louisiade Archipelago. The main islands of the Bismarck Archipelago are New Britain, New Ireland and Manus. Bougainville is the largest of the Solomon Islands within Papua New Guinea.

Papua New Guinea lies within the tropics and has a typically monsoonal climate. Temperature and humidity are uniformly high throughout the year. The average rainfall is about 80 inches per year but there are wide variations—from 47 inches at Port Moresby to over 200 inches in mountainous western areas.

The estimated population in 1987 was 3,500,000. The inhabitants of the country comprise a great

diversity of physical types and a large number of linguistic groups.

CAPITAL.—Port Moresby. Estimated population (1985), 139,300. Other major towns are Lae, Rabaul, Madang, Wewak, Goroka and Mount Hagen.

CURRENCY.—Kina (K) of 100 toea.

FLAG.—A rectangle divided diagonally from the top of the hoist to the bottom of the fly, the upper segment scarlet and containing a soaring yellow bird of paradise. The lower segment is black charged with five white five-pointed stars representing the Southern Cross.

NATIONAL ANTHEM.—Arise All You Sons.

NATIONAL DAY.—September 16 (Independence Day).

GOVERNMENT

New Guinea was sighted by Portuguese and Spanish navigators in the early sixteenth century, but remained largely isolated from the rest of the world. In 1884, a British Protectorate was proclaimed over the southern coast of New Guinea (Papua) and the adjacent islands. British New Guinea, ■ the Protectorate was called, was annexed outright in 1888. In 1906 the Territory of British New Guinea was placed under the authority of the Commonwealth of Australia. Also in 1884 Germany had formally taken possession of certain northern areas, which later came to be known as the Trust Territory of New Guinea. In 1914 the German areas were occupied by Australian troops and remained under military administration until 1921, when the League of Nations conferred on Australia a mandate for their government.

New Guinea was administered under the Mandate and Papua under the Papua Act until the invasion by the Japanese in 1942 when the civil administration was suspended until the surrender of the Japanese in 1945.

The first House of Assembly for the whole country met in 1964 and included an elected majority and ten nominated official members. After 1970 there was a gradual assumption of powers by the Papua New Guinea Government, culminating in formal self-government in December 1973. Final reserve powers held by Australia over defence and foreign relations were relinquished to Papua New Guinea in March 1975, and Papua New Guinea achieved full independence on September 16, 1975.

Elections are held every five years. The Parliament comprises 109 elected Members, 20 from Regional electorates, the remainder from Open electorates. There are 19 provinces, which have their own provincial governments with certain legislative and administrative powers.

COMMUNICATIONS

Road communications are very limited, the most important road being that linking Lae with the populous highlands.

Air Niugini (the national airline) and Qantas operate regular air services between Port Moresby and Australia. Air Niugini also operates services to Manila (Philippines), Honiara (Solomon Islands), Jayapura (Indonesia), Honolulu and Singapore. Internal air services are operated by Air Niugini, Douglas Airways, and Talair.

Several shipping companies operate cargo services between Papua New Guinea and Australia, Europe, the Far East and U.S.A. There are very limited cargo and passenger services between Papua New Guinea main ports, outports, plantations and missions.

Papua New Guinea is linked by international cable to Australia, Guam, Hong Kong, Kota Kinabalu, the Far East and U.S.A. Telecommunications are widely available.

ECONOMY

Until the 1970s the Papua New Guinea economy was based almost entirely on agriculture. At the beginning of the 20th century copra plantations formed the basis of the cash economy. Further crops which have been introduced over the years are cocoa, tea, coffee, palm oil, rubber, groundnuts, spices and timber. A variety of commercial agricultural developments now co-exist with the traditional informal rural economy. Government expenditure is still reliant on Australian budgetary support, to the extent of just under 30 per cent in 1983.

In 1972, Bougainville Copper Pty Ltd (BCL) began mining in the North Solomons Province, producing copper, silver and gold. However, the Bougainville Copper Mine closed indefinitely in May 1989. There are extensive mineral deposits throughout Papua New Guinea, including nickel, chromite, bauxite and possibly commercial deposits of oil and gas. The most important new development is the exploitation of large copper and gold deposits on the Ok Tedi, in the Western Province.

In 1984 the Papua New Guinea economy was influenced by good prices for agricultural commodities, offset by low prices for copper and gold. New developments to promote export crops and increase employment, typically involving foreign investment, are planned for the future.

Industry includes processing of primary products, and brewing, bottling and packaging, paint, plywood,

and metal manufacturing and the construction industries.

Although the formal economy is still dominated by non-Papua New Guineans, the participation of Papua New Guineans is increasing.

ST. CHRISTOPHER AND NEVIS (The Federation of St. Christopher and Nevis)

The State of St. Christopher and Nevis is located at the northern end of the Eastern Caribbean. It comprises the islands of St. Christopher (St. Kitts) (65 sq. miles: 168 sq. km.; population about 35,700) and Nevis (36 sq. miles: 93.2 sq. km.; population about 9,400).

St. Christopher, lat. 17° 18' N. and long. 62° 48' W. was the first island in the British West Indies to be colonized (1623). The central area of the island is forest-clad and mountainous, rising to the 3,792 ft. Mount Liamuiga.

Nevis, lat. 17° 10' N. and long. 62° 35' W. is separated from the southern tip of St. Christopher by a strait two miles wide and is dominated by the central Nevis Peak, 3,232 ft. Chief town of Nevis is ♀Charlestown (pop. 1,200), which is a port of entry.

CAPITAL—♀Basseterre (estimated population, 15,000).

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

FLAG.—Three diagonal bands, green, black and red; each colour separated by a stripe of yellow. Two white stars on the black band.

NATIONAL ANTHEM.—Our Land of Beauty.

NATIONAL DAY.—September 19 (Independence Day).

GOVERNMENT

The Territory of St. Christopher and Nevis became ■ State in Association with Britain on Feb. 27, 1967. The State of St. Christopher and Nevis became an independent nation on Sept. 19, 1983, with a new constitution under which Great Britain relinquished its responsibility for defence and external affairs. Under the new Constitution, H.M. The Queen is Head of State, represented in the islands by the Governor General. There is a central Cabinet Government with ■ Ministerial system, the Head of which is the Prime Minister of St. Christopher and Nevis, and ■ National Assembly located on St. Christopher. On Nevis there is a Nevis Island Administration, the Head being styled Premier of Nevis, and a Nevis Island Assembly.

Governor General, His Excellency Sir Clement Athelston Arrindell, G.C.M.G., G.C.V.O., Q.C. (1983).

St. Lucia, the second largest of the Windward group, situated in 13° 54' N. lat. and 60° 50' W. long., at ■ distance of about 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 sq. miles (616 sq. km.), with an estimated population (1986) of 138,000. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being Mt. Gimie (3,145 feet) and for the most part it is covered with forest and tropical vegetation.

CAPITAL.—♀Castries (estimated population 1988, 55,000) is recognized as being one of the finest ports in the West Indies on account of its reputation as ■ safe anchorage in the hurricane season.

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

FLAG.—Blue, bearing in centre a device of yellow over black over white triangles having a common base.

NATIONAL ANTHEM.—"Sons and Daughters of Saint Lucia."

NATIONAL DAY.—February 22 (Independence Day).

GOVERNMENT

St. Lucia became independent within the Commonwealth on Feb. 22, 1979. The Head of State is H.M. The Queen, represented in the island by a St. Lucian Governor General, and there is a bicameral legislature. The Senate has 11 members, ■ appointed by the ruling party, 3 by the Opposition and 2 by the Governor General. The House of Assembly, which has a life of five years, has 17 elected Members and ■ Speaker, who may be elected from outside the House.

ST. VINCENT
AND THE GRENADINES

The territory of the State of St. Vincent includes certain of the Grenadines, a chain of small islands stretching 40 miles across the Caribbean Sea between Grenada and St. Vincent, some of the larger of which

are Bequia, Canouan, Mayreau, Mustique, Union Island, Petit St. Vincent and Prune Island. The whole territory extends 150 sq. miles (388 sq. km.).

The main island, St. Vincent, is situated between 13° 6' and 14° 35' N. latitude and 61° 6' and 61° 20' W. longitude, approximately 21 miles south west of St. Lucia and 100 miles west of Barbados. The island is 18 miles long and 11 miles wide at its extremities comprising an area of 133 sq. miles (344 sq. km.), and ■ population (1985 U.N. estimate) of 104,000. St. Vincent was discovered by Christopher Columbus in 1498. It was granted by Charles I to the Earl of Carlisle in 1627 and after subsequent grants and ■ series of occupations alternately by the French and English, it was finally restored to Britain in 1783.

CAPITAL.—Kingstown, population approximately 33,694.

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

FLAG.—Three vertical bands, of blue, yellow and green, with three green diamonds in the shape of ■ "V" mounted on the yellow band.

NATIONAL ANTHEM.—St. Vincent, Land So Beautiful.

NATIONAL DAY.—October 27 (Independence Day).

GOVERNMENT

St. Vincent and the Grenadines achieved full independence within the Commonwealth on Oct. 27, 1979.

St. Vincent has a constitution under which there is ■ Governor General who is Her Majesty's Representative. Except where otherwise provided, the Governor General is required to act in accordance with the advice of the Prime Minister.

The House of Assembly consists of 15 elected members and 6 Senators appointed by the Government (4) and the Opposition (2). It is presided over by a Speaker elected by the House from within or without it. All 15 seats were won by the governing New Democratic Party at the election held on May 16, 1989.

SEYCHELLES (The Republic of Seychelles)

The Republic of Seychelles, in the Indian Ocean, consists of 115 islands with a total land area of 108 sq. miles (280 sq. km.), spread over 400,000 square miles of ocean. There is a relatively compact granitic group, 32 islands in all, with high hills and mountains (highest point about 2,990 ft.), of which Mahé is the largest and most populated (90 per cent of the population live on Mahé) and the outlying coralline group, for the most part, only a little above sea-level. Although only 4° S. of the Equator, the climate is pleasant though tropical. The population was estimated (mid 1988) to be 66,745.

CAPITAL.—Victoria (population, 1982, 24,733), on the N.E. side of Mahé.

CURRENCY.—Seychelles rupee (Rs) of 100 cents.

FLAG.—Red over green, divided by wavy white band.

NATIONAL ANTHEM.—Fyer Seselwa (Proud Seychellois).

NATIONAL DAY.—June 5.

GOVERNMENT

Proclaimed as French territory in 1756, the Mahé group began to be settled as a dependency of Mauritius from 1770, was captured by a British ship in 1794, changed hands several times between 1803 and 1814, when it was finally assigned to Great Britain. By Letters Patent of September, 1903, these islands, together with the coralline group, were formed into a separate Colony. On June 29, 1976, the islands became an independent republic within the Commonwealth. A coup d'état took place on June 5, 1977.

A new constitution making Seychelles a one-party state came into force in June 1979. The executive power lies with the President, who is elected by universal suffrage for a five year term. Legislative power lies with the President and the People's Assembly which has 23 elected members and two nominated by the President.

President, France Albert René, assumed office June 5, 1977; elected June 26, 1979; re-elected June 18, 1984, and June 12, 1989.

SIERRA LEONE (The Republic of Sierra Leone)

AREA, POPULATION, ETC.—Sierra Leone, with a total land area of 27,699 sq. miles (71,740 sq. km.), is on the west coast of Africa, between Guinea and Liberia. A Census of December 1985 put the population at 3,700,000. The origins of the country date back to the late 18th century when a project was begun to settle destitute Africans from England on Freetown peninsula. In 1808 the settlement was declared a Crown Colony and became the main base in West Africa for enforcing the 1807 Act outlawing the slave trade. The Colony was also used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships, also settled there. Their descendants, known as Creoles, still live on Freetown peninsula. The southern half of Sierra Leone is inhabited by peoples whose languages fall into the Mende group; the northern half by the Temne, and

smaller groups such as the Limba, Loko, Koranko and Susu.

CAPITAL.—Freetown (population at 1985 Census, 470,000).

CURRENCY.—Leone (Le) of 100 cents.

FLAG.—Three horizontal stripes of leaf green, white and cobalt blue.

NATIONAL ANTHEM.—"High We Exalt Thee, Realm of the Free."

NATIONAL DAY.—April 27 (Independence Day).

GOVERNMENT

Sierra Leone became a fully independent state within the Commonwealth on April 27, 1961. On April 19, 1971 ■ Republican Constitution was adopted and Dr. Siaka Stevens became the first Executive President. In June 1978 Sierra Leone became ■ one-Party State, following approval by Parliament and ■ Referendum. The first General Election under the one party system was held on May 1, 1982. The Parliament now comprises 85 elected members and 12 Paramount Chiefs, plus nine nominated members, two of whom are the Army Commander and the Inspector General of Police.

COMMUNICATIONS

Since the phasing out of the railway system in 1974

the road network has been developed considerably and there are now 5,000 miles of roads in the country, over 2,000 miles being surfaced. A bridge has been constructed over the Mano River linking Sierra Leone and Liberia.

The Freetown international airport is situated at Lungi, across the Sierra Leone River from Freetown. The main port is Freetown, which has one of the largest natural harbours in the world, and where there is ■ deep water quay providing about six berths for medium sized ships. There are smaller ports at Pepel, Bonthe and Niti.

Radio and television are operated by the Department of Broadcasting of the Sierra Leone Government. There are two shortwave transmitting and receiving stations in Freetown. Broadcasts are made in several of the more important indigenous languages in addition to English. There is also a weekly broadcast in French.

EDUCATION

In 1988 there were 2,294 primary schools in Sierra Leone and 205 secondary schools. Technical education is provided in the two Government Technical Institutes, situated in Freetown and Kenema, in two Trade Centres and in the technical training establishments of the mining companies. Teacher training is carried out at the university, six colleges in the Provinces and in the Milton Margai Training College near Freetown. The University of Sierra Leone (1967), consists of Fourah Bay College (1827), the Institute of Public Administration and Management (1980), the College of Medicine and Allied Health Sciences (1988) and Njala University College (1964).

PRODUCTION AND TRADE

On the Freetown peninsula, farming is largely confined to the production of cassava and garden crops, such ■ maize and vegetables, for local consumption. In the hinterland, the principal agricultural product is rice, which is the staple food of the country, and cash crops such as cocoa, coffee, palm kernels, and ginger.

The economy depends largely on mineral exports; mainly diamonds, gold, bauxite and rutile. Iron ore production ceased in March 1985. Diamond exports provided Le447m in 1986. Total imports for 1988 were Le5,215m and exports were Le3,317·1m.

NATIONAL ANTHEM.—*Majulah Singapura.*

NATIONAL DAY.—August 9.

GOVERNMENT

Singapore, where Sir Stamford Raffles had first established a trading post under the East India Company in 1819, was incorporated with Penang and Malacca to form the Straits Settlements in 1826. The Straits Settlements became a Crown Colony in 1867. Singapore fell into Japanese hands in 1942 and civil government was not restored until 1946, when it became a separate colony. Internal self-government and the title "State of Singapore" were introduced in 1959. Singapore became a state of Malaysia when the Federation was enlarged in September, 1963, but left Malaysia and became an independent sovereign state within the Commonwealth on August 9, 1965. Singapore adopted a Republican constitution from that date, the Yang di-Pertuan Negara being re-styled President. There is a Cabinet collectively responsible to a fully-elected Parliament of 81 members.

After the General Election of Sept. 3, 1988 the People's Action Party (PAP) had 80 seats in Parliament. The other seat was taken by the Singapore Democratic Party (SDP).

COMMUNICATIONS

Singapore is one of the largest and busiest seaports in the world, with deep water wharves and ship repairing facilities. Ships also anchor in the roads,

unloading into lighters. In 1988, 90,600,000 freight tonnes of seaborne cargo was discharged and 64,100,000 freight tonnes loaded. More than 500 shipping lines use the port, with 35,966 ship arrivals in 1988. The international airport is at Changi, in the east of the island. There are 25-75 km. of metric gauge railway connected to the Malaysian rail system by the causeway across the Straits of Johore, and 2,760 kilometres of roads. There are both wireless and wired broadcasting services carrying commercial advertising. There are three television channels. The Singapore Broadcasting Authority Corporation was established in February 1980.

ECONOMY

Historically Singapore's economy was largely based on the sale and distribution of raw materials from surrounding countries and on entrepot trade in finished products. In the last decade, however, new manufacturing industries have been introduced, including ship building and repairing, iron and steel, textiles, footwear, wood products, micro-electronics, scientific instruments, detergents, confectionery, pharmaceuticals, petroleum products, etc. Singapore has also become a financial centre with 137 commercial banks and 63 merchant banks established in the Republic, and an oil-refining centre.

Projects now being undertaken include the improvement of public utilities (electricity and gas supply, sewage system); the natural gas pipeline from the Straits of Johore to Senoko power station; the Jurong port expansion project; the new container terminal at Pulai Brani; submarine telephone cable system; building projects; computerization in schools and government departments; and the near completion of the Mass Rapid Transit Rail system and the second passenger terminal at Changi Airport.

SOLOMON ISLANDS

Forming a scattered archipelago of mountainous islands and low-lying coral atolls, the Solomon Islands stretches about 900 miles in a south-easterly direction from Bougainville, in Papua New Guinea, to the Santa Cruz islands. The archipelago covers an area of about 249,000 square nautical miles while the land area is 10,938 sq. miles (28,446 sq. km.). Solomon Islands lies between the east longitudes 155° 30' and 170° 30' and between south latitudes 5° 10' and 12° 45'. The six biggest islands are: Choiseul, New Georgia, Santa Isabel, Guadalcanal, Malaita and Makira. They are characterized by precipitous, thickly-forested

mountain ranges intersected by deep, narrow valleys, and vary between 90 to 120 miles in length and between 20 to 30 miles in width.

Distribution of population at the Census of 1986 was: Melanesian 268,536; Polynesian 10,661; Micronesian 3,929; European 1,107; Chinese 379; Others 564. Total 285,176.

CAPITAL.—*Honiara* (population (1986), 30,499).

CURRENCY.—Solomon Islands dollar (SI\$) of 100 cents.

FLAG.—Blue over green divided by a diagonal yellow band, with five white stars in the top left quarter.

NATIONAL ANTHEM.—God Bless our Solomon Islands.

NATIONAL DAY.—July 7 (Independence Day).

GOVERNMENT

The origin of the present Melanesian inhabitants is uncertain. European discovery of the islands began in the mid-16th century and continued intermittently for about 300 years, when the inauguration of sugar plantations in Queensland and Fiji (which created a need for labour) and the arrival of missionaries and traders led to increased European interest in the region. Great Britain declared a Protectorate in 1893 over the Southern Solomons, adding the Santa Cruz group in 1898 and 1899. The islands of the Shortland groups were transferred by treaty from Germany to Great Britain in 1900.

The Solomon Islands achieved internal self-government in 1976, and became independent in July 1978. The Solomon Islands is a constitutional monarchy, H.M. The Queen being represented locally by the Governor General. Legislative power is vested in a unicameral National Parliament of 38 members, elected for a four-year term. The executive authority is exercised by the Cabinet.

Governor General, (new appointment awaited).

JUDICIARY

The High Court of Solomon Islands, constituted by the Solomon Islands Independence Order, consists of a Chief Justice and not fewer than two nor more than three Puisne Judges. The Court of Appeal Act was enacted on May 8, 1978.

COMMUNICATIONS

Solomon Islands Airways Ltd. serves 28 airstrips throughout the country, four of which are designated international airports. It also has combined services with Quantas making two flights each way weekly

between Honiara and Brisbane and one each way between Honiara and Nadi. Air Niugini has a weekly combined service with Solomon Islands Airways.

There are about 52 miles of secondary and minor roads in the urban areas of Honiara, Auki and Gizo. About 18 miles of road in and around Honiara and one mile in Auki and Gizo are bitumen sealed, the remainder being coral or gravel surfaced. In the rural areas there are some 800 miles of road, including those in private plantations, forestry areas and roads built and maintained by councils. All main islands have transreceivers to maintain communications with Honiara and there is a telephone link between Honiara and Auki, Gizo and Tulagi.

Telekom, a company jointly owned by Cable and Wireless Limited and Solomon Islands Government operates the international telephone circuits from a ground station in Honiara via the Intelsat Pacific Ocean communication satellite.

SRI LANKA

(Sri Lanka Prajatantrika Samajawadi Janarajaya)

AREA, POPULATION, ETC.—Sri Lanka (formerly Ceylon) is an island in the Indian Ocean, off the southern tip of the peninsula of India and separated from it by a narrow strip of shallow water, the Palk Strait. Situated between 5° 55'–9° 50' N. latitude and 79° 42'–81° 52' E. longitude, it has an area of 25,332 sq. miles (65,610 sq. km.), including 33 square miles of inland water. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles, no point in Sri Lanka being more than 80 miles from the sea.

The population at the 1981 census was 14,800,001. (A 1985 U.N. estimate gave a figure of 15,837,000.) Of these 74 per cent were Sinhalese, 12.6 per cent Sri Lankan Tamils, 5.6 per cent Indian Tamils, 7.1 per cent Sri Lankan Moors and 0.7 per cent Burghers, Malays and others. The religion of the great majority of inhabitants is Buddhism, introduced from India, according to ancient Sinhalese chronicles, in 247 B.C. After Buddhism (69.3 per cent), Hinduism has the largest following (15.5 per cent); 7.6 per cent of the population are Muslims and 7.5 per cent Christians. The national languages are Sinhalese, Tamil and English.

Forests, jungle and scrub cover the greater part of the island, often being intermingled. In areas over 2,000 feet above sea level grasslands (*patanas* or *talawas*) are found. One of the highest peaks in the central massif is Adam's Peak (7,360 ft), a place of pilgrimage for Buddhists, Hindus and Muslims.

The climate of Sri Lanka is warm throughout the

year, with a high relative humidity. In the hills the climate is more temperate. Temperatures average 27° C. in the lowlands, and 16° C. at elevations over 6,000 ft. Day humidity is over 70 per cent and night humidity over 85 per cent. Rainfall is generally heavy, with marked regional variations. The two main monsoon seasons are mid-May to September (south-west) and November to March (north-east).

CAPITAL.— ψ Colombo, population (1981) 585,776. 1984 estimate 643,000. Other principal towns are ψ Jaffna (118,215), Kandy (101,281), ψ Galle (77,183), ψ Negombo (51,376) and ψ Trincomalee (44,913).

CURRENCY.—Sri Lankan rupee of 100 cents.

FLAG.—On a dark red field, within a golden border, a golden lion passant holding ■ sword in its right paw, and a representation of a bo-leaf, issuing from each corner; and to its right, two vertical stripes of saffron and green also placed within a golden border, to represent the minorities of the country.

NATIONAL ANTHEM.—*Namo Namo Matha* (We all stand together).

NATIONAL DAY.—February 4 (Independence Commemoration Day).

GOVERNMENT

Early in the sixteenth century the Portuguese landed in Ceylon and founded settlements, eventually conquering much of the country. Portuguese rule in Ceylon lasted 150 years, but in 1565, following a twenty-year period of decline, Portuguese rule gave way to that of the Dutch East India Company which was to exploit Ceylon with varying fortunes until 1796.

The Maritime Provinces of Ceylon were ceded by the Dutch to the British on February 16, 1798, becoming a British Crown Colony in 1802 under the terms of the Treaty of Amiens. With the annexation of the Kingdom of Kandy in 1815, all Ceylon came under British rule.

On February 4, 1948, Ceylon became ■ self-governing state and ■ member of the British Commonwealth of Nations. A republican Constitution was adopted on May 22, 1972, providing for ■ unicameral legislature, the National State Assembly, which has a six year term, and the country was renamed the Republic of Sri Lanka (meaning 'Resplendent Island'). On Sept. 5, 1978 ■ new Constitution introduced the title the Democratic Socialist Republic of Sri Lanka and a system of proportional representation. Legislative power is exercised by Parliament, the executive power being exercised by the President. A referendum in Dec. 1982 extended the life of the 1977 Parliament by six years from Aug. 1983.

A Bill providing for the holding of the Provincial Council elections was passed on Jan. 22, 1988. President Jayewardene issued a proclamation on Sept. 8, 1988, merging the Northern and Eastern Provinces, ■ envisaged under the Indo-Sri Lanka Agreement. The Eelam People's Revolutionary Liberation Front (E.P.R.L.F.) gained ■ clear majority in the Northern-Eastern Provincial Council, while the ruling United National Party (UNP) gained an absolute majority in elections to the seven other newly formed Provincial Councils.

In the General Election of February 15, 1989 the United National Party gained a decisive victory. The results were as follows: United National Party 125 seats, Sri Lanka Freedom Party 67, Independent Tamils 14, Tamil United Liberation Front 10, Sri Lanka Muslim Congress 3, United Socialist Alliance 3, Mahajana Eksath Peramuna 3. President, His Excellency Ranasinghe Premadasa elected Dec. 20, 1988, sworn in Jan. 2, 1989 (also Minister of Defence, Policy Planning and Implementation, and Buddha Sasana).

SWAZILAND (Umbuso we Swatini)

AREA, POPULATION, ETC.—Surrounded by South Africa on its northern, western and southern borders and by Mozambique to the east, this small land-locked country is geographically and climatically divided into three principal areas. The broken mountainous Highveld along the western border with an average altitude of 4,000 feet is densely forested mainly with conifers and eucalyptus; the Middleveld, averaging about 2,000 feet, is a mixed farming area including cotton and pineapples; and the Lowveld in the east, which was mainly scrubland until the introduction of large sugar cane plantations west of the Lubombo mountain range and the Mozambique border. Four rivers, the Komati, Usutu, Mbuluzi and Ngwavuma, flow from west to east. The total area of Swaziland is 6,704 sq. miles (17,363 sq. km.), and the population is estimated at some 731,000.

CAPITAL.—Mbabane (population, estimated 30,000), the headquarters of the Government, is situated at an average altitude of 3,800 ft. Other main townships are: Manzini (population, estimated, 30,000), Big Bend, Mhlambanyati, Mhlume, Nhlangano, Pigg's Peak and Simunye.

CURRENCY.—Lilangeni (E) of 100 cents. South African currency is also in circulation. Swaziland is a member of the Common Monetary Area and its unit of currency *Emalangeni* (singular *Lilangeni*) has a par value with the South African Rand.

FLAG.—Five horizontal bands, crimson, bearing shield and spears device, bordered by narrow yellow bands; blue bands at top and foot.

NATIONAL ANTHEM.—Elwatini.

NATIONAL DAY.—September 6 (Independence Day).

GOVERNMENT

The Kingdom of Swaziland came into being on April 25, 1967, under a new internal self-government constitution and became an independent kingdom, headed by H.M. Sobhuza II, in membership of the Commonwealth on September 6, 1968.

A new electoral law was introduced in 1978, under which each of the 40 traditional Tinkhundla elect two members to the electoral college who elect 40 members to the House of Assembly. The King nominates 10 members to the House of Assembly, making 50 in all, who then elect 10 members (not of their own number) to the Senate. To these are added 10 senators nominated by the King, bringing the full membership of the Senate to 20. Under the Establishment of the Parliament of Swaziland Order, 1978, the Head of State, advised by the Swazi National Council, continues to reserve a large measure of executive, legislative and judicial authority.

Head of State, H.M. King Mswati III, inaugurated April 25, 1986.

High Commissioner, His Excellency Mboni N. Dlamini (1988).

EDUCATION

In 1982, there were 125,303 pupils enrolled at 470 primary schools and 26,576 at 86 secondary schools. The University of Swaziland was founded in 1976.

COMMUNICATIONS

Swaziland's railway is about 150 miles long and runs from Ngwenya in the west to the Mozambique border near Goba in the east, and thence to the Mozambique port of Maputo. A southern link from Phuzumoya in central Swaziland joins up with the South African railway network to Richards Bay. A rail link from Mpaka in central Swaziland to the north-west border opened in 1986 and provides a link to Komatipoort.

Most passenger and goods traffic is carried by privately-owned motor transport services. There are daily scheduled air services by Royal Swazi National Airways to Johannesburg and scheduled routes to Durban, Harare, Lusaka, Gaborone, Nairobi and Dar es Salaam. International telecommunications and television services are provided through a satellite earth station opened in 1983. There is also a national telephone network through a series of microwave links.

FINANCE

Government revenue for 1987-88 is estimated at £284,783,000, of which £134,928,000 (or 47·4 per cent) is anticipated revenue from the South African Common Customs Union with South Africa, Botswana and Lesotho. A local sales tax introduced from Sept. 1984 is expected to yield £38,412,000 in 1987-88. Total Government-financed recurrent and capital expenditure in 1987-88 is estimated at £295,857,000.

TANZANIA (Jamhuri ya Mwungano wa Tanzania)

AREA, POPULATION, ETC.—Tanganyika, the mainland part of the United Republic of Tanzania (Tanganyika and Zanzibar), occupies the east-central portion of the African continent, between 1°-11° 45' S. lat. and 29° 20'-40° 38' E. long. It is bounded on the N. by Kenya and Uganda; on the S.W. by Lake Malawi, Malawi and Zambia; on the S. by Mozambique; on the W. it is bounded by Rwanda, Burundi and Zaire; on the E. the boundary is the Indian Ocean. Tanzania has an area of 364,900 sq. miles (945,087 sq. km.). The greater part of the country is occupied by the Central African plateau from which rise, among others, Mt. Kilimanjaro (19,340 ft.), the highest point on the continent of Africa, and Mt. Meru (14,974 ft.). The Serengeti National Park, which covers an area of 6,000 sq. miles in the Arusha, Mwanza and Mara Regions, is famous for its variety and number of species of game.

The African population consists mostly of tribes of mixed Bantu race. The total population of Tanzania at the Census held in August, 1978 was 17,551,925; ■ 1985 estimate put the figure at 21,733,000. Africans form a very large majority, while Europeans, Asians, and other non-Africans form ■ small minority. Swahili is the national and official language. The use of English is widespread both for educational and government purposes.

Zanzibar.—Formerly ruled by the Sultan of Zanzibar, and a British Protectorate until Dec. 10, 1963. Zanzibar consists of the islands of Zanzibar, Pemba and Latham.

CAPITAL.—Dar ■ Salaam (population 1,096,000 1985 estimate). Other towns (1978 population) are Tanga (103,409); Mwanza (110,611); Arusha (55,281); Moshi (52,223); Morogoro (61,890); Dodoma (45,703); Tabora (67,392) and M'twara (48,510). Zanzibar (population, 110,669) is the chief town and seaport of the island.

CURRENCY.—Tanzanian shilling of 100 cents.

FLAG.—Green (above) and blue; divided by diagonal black stripe bordered by gold, running from bottom (next staff) to top (in fly).

NATIONAL ANTHEM.—Mungu Ibariki Afrika (God Bless Africa).

NATIONAL DAY.—April 26 (Union Day).

GOVERNMENT

Tanganyika became an independent state and ■ member of the British Commonwealth on December 9, 1961, and ■ Republic, within the Commonwealth, on December 9, 1962, with an executive President, elected by universal suffrage ■ the Head of State and Head of the Government. On Dec. 10, 1963, Zanzibar became an independent state within the Commonwealth and on April 26, 1964, Tanganyika united with Zanzibar to form the United Republic of Tanzania.

Tanzania became ■ one-party state on July 10, 1965 but with the Tanganyika African National Union (TANU) and the Afro-Shirazi Party (ASP) remaining the ruling parties in Tanganyika and Zanzibar respectively. On Feb. 5, 1977 these two parties merged to form the Chama Cha Mapinduzi (CCM) (Revolutionary Party).

A new constitution was introduced on April 26, 1977 and revised in Oct. 1984. There is ■ President and two Vice-Presidents, one the President of Zanzibar and the other the Prime Minister. The President may only serve two five year terms and if he comes from Zanzibar the Prime Minister will be the First Vice-President and must come from Tanganyika. If the President comes from Tanganyika the President of Zanzibar will be the First Vice President. In ■

Presidential election ■ single Presidential candidate nominated by the CCM has to obtain an affirmative majority of the votes cast, failing which a fresh candidate must be nominated. The National Assembly contains 243 members, of whom 118 are elected from mainland constituencies and 50 from Zanzibar, 25 are ex-officio, 15 nominated and 35 indirectly elected. The Speaker may either be elected from among the members or be an additional member. Constituency members are elected by popular vote at ■ general election held at a maximum of five-yearly intervals in which the CCM nominates two candidates to contest each seat.

A new constitution was also approved in 1984 for Zanzibar providing for an elected President and House of Representatives. Although Zanzibar has its own government and Chief Minister, Tanganyika is governed by the government of the Union. Overall policy is decided by the CCM whose chairman, Julius Nyerere, was re-elected in 1987 by the Party National Conference for a 5 year term.

President of the United Republic, H.E. Hon. Ali Hassan Mwinyi, b. 1925; elected Oct. 27, 1985; sworn in Nov. 5, 1985.

First Vice-President of the United Republic and Prime Minister, Hon. Joseph Sinde Warioba.

Second Vice-President of the United Republic and President of Zanzibar, H.E. Idris Abdul Wakil.

TANZANIA HIGH COMMISSION 43 Hertford Street, W1Y 7TF

[01-499 8961]

High Commissioner, (new appointment awaited).

EDUCATION

Education, almost entirely under state control, is characterised by official insistence that education must serve the aims of overall Government policy and planning. All Tanzanian secondary schools are expected to include practical subjects in the basic course. All who receive secondary (or equivalent) education are called up for ■ period of National Service. The school system is administered in Swahili but the Government is making efforts to improve English standards for the purposes of secondary and higher education. For higher education Tanzanian

students go to the University of Dar es Salaam, Sokoine University of Agriculture in Morogoro, other East African universities, or to universities and colleges outside East Africa, including Britain.

COMMUNICATIONS

The main port is Dar es Salaam, and there are other ports on the coast at Tanga, Mtwara, Zanzibar, Mkoani and Wete, in addition to Mwanza, Musoma and Bukoba on Lake Victoria and Kigoma on Lake Tanganyika. Coastal shipping services connect the mainland to Zanzibar, and lake services are operated on Lake Tanganyika and Lake Malawi with neighbouring countries.

The principal international airports are Dar es Salaam and Kilimanjaro. Other airports include Zanzibar, Arusha, Mwanza and Tanga.

There are two railway systems; one connecting Dar es Salaam to Zambia; and the second having two main lines running from Dar es Salaam, one to northern Tanzania and Kenya and the other to Lake Tanganyika and Victoria.

PRODUCTION AND TRADE

The economy is based mainly on the production and export of primary produce and the growing of foodstuffs for local consumption. The islands of Zanzibar and Pemba produce a large part of the world's supply of cloves and clove oil; and coconuts, coconut oil and copra are also produced. The mainland's chief export crops are coffee, cotton, sisal, tea, tobacco, cashew nuts and diamonds. The most important minerals are diamonds. Hides and skins are another valuable export. Industry is at present largely concerned with the processing of raw material for either export or local consumption. There are also secondary manufacturing industries, including factories for the manufacture of leather and rubber footwear, knitwear, razor blades, cigarettes and textiles, and a wheat flour mill.

High Commissioner, His Excellency S. M. Tuita (1989).

ECONOMY

The economy is primarily agricultural; the main crops are coconuts, bananas, vanilla, yams, taro, cassava, groundnuts and other fruits. Fish is an important staple food though recent shortfalls have led to canned fish being imported. Industry is based on the processing of agricultural produce, and the manufacture of foodstuffs, clothing and sports equipment. The principal exports are copra, other coconut products, tropical root crops and bananas.

TRINIDAD AND TOBAGO (The Republic of Trinidad and Tobago)

AREA, POPULATION, ETC.—*Trinidad*, the most southerly of the West Indian islands, lies close to the north coast of S. America, the nearest point being Venezuela, 7 miles distant. The island is situated between 10° 2'–11° 12' N. lat. and 60° 30'–61° 56' W. long., and is about 50 miles in length by 37 miles in width, with an area of 1,864 sq. miles (4,827 sq. km.). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range, lies diagonally across its middle portion; otherwise the island is mostly flat. The climate is tropical with temperatures averaging 82° F. (27.8° C) by day and 74° F. (23.3° C) by night, and rainfall averaging 82 inches a year. There is a well-marked dry season from January to May, and a wet season from June to December broken by a short dry season (the Petite Careme) in September and October. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802).

Tobago lies between 11° 9' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., 19 miles northeast of Trinidad. The island is 32 miles long at its widest point, and 11 wide, and has an area of 116 sq. miles (300 sq. km.). It is a popular tourist resort. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1888.

In 1985 the population of Trinidad and Tobago was estimated at 1,185,000.

Other Islands.—Corozal Point and Icacos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria. West of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important.

CAPITAL.—*Port of Spain* (population approximately 59,649 in 1985) is the administrative centre of the islands. About 33 miles south of the capital is San Fernando (population approximately 34,300 in 1985), a town of growing importance which is emerging as the industrial centre of Trinidad, and which is in close proximity to a number of large industrial plants. The main town of Tobago is *Scarborough*.

CURRENCY.—Trinidad and Tobago dollar (TT\$) of 100 cents.

FLAG.—Black diagonal stripe bordered with white stripes, running from top by staff, all on a red field.

NATIONAL DAYS.—August 31 (Independence Day); September 24 (Republic Day).

GOVERNMENT

The Territory of Trinidad and Tobago became an independent state and a member of the British Commonwealth on August 31, 1962, and a Republic in 1976. The President is elected for 5 years by all members of the Senate and the House of Representatives. The House of Representatives has 36 members, elected by universal adult suffrage, and the Senate has 31, of whom 16 are appointed on the advice of the Prime Minister, 6 on the advice of the Leader of the Opposition and 9 at the discretion of the President. Legislation was passed in Sept. 1980 which afforded Tobago a degree of self-administration through the 12-member Tobago House of Assembly.

President, His Excellency Noor Mohammed Hassanali.

EDUCATION

The education system provides for free education at all state-owned and government-assisted denominational schools and certain faculties at the University of the West Indies. In addition there are various private teaching establishments. Attendance is compulsory for children aged 6–12 years, after which attendance at free secondary schools is determined by success in the common entrance examination at 11 years. There are three technical institutes, two teachers' training colleges, and one of the three branches of the University of the West Indies is located in Trinidad, at the St. Augustine campus. A medical teaching complex was built at Mt. Hope, and operates in collaboration with the University of the West Indies.

COMMUNICATIONS

There are some 6,436 km. of all-weather roads in Trinidad and Tobago. The only general cargo port is Port of Spain but there are specialized port facilities elsewhere for landing crude oil, loading refinery products and sugar, and for storing and transmitting bauxite and cement. Regular shipping services call here and many inter-island craft use the port. Another, rapidly growing, port is at Port Lisas where new industries powered by local natural gas are located.

International scheduled airlines, including the national airline, Trinidad and Tobago Airways (BWIA) Corporation, use Piarco International Airport outside Port of Spain. The airline also flies between Piarco and Crown Point Airport in Tobago.

Two commercial broadcasting stations and one commercial television station operate in Trinidad and Tobago. The internal telephone system and the external telephone and telegraph connections are operated by state-owned companies.

PRODUCTION

Trinidad and Tobago's main source of revenue is from oil. Production of domestic crude in 1985 was

10.2 million cu. metres. The two major oil refineries increased production in 1985 to an average throughput of 12,538 cu. metres per day, and refined both local and imported crude. Trinidad has large reserves of natural gas, estimated at 18,000,000 million cu. feet, and in 1985 production was 7,413 million cu. metres. An integrated steel plant, an anhydrous ammonia plant and a methanol plant have been constructed at Point Lisas.

Fertilizers, tyres, clothing, soap, furniture and foodstuffs are manufactured locally while motor vehicles, radios, TV sets, and electro-domestic equipment are assembled from parts, mainly from Japan.

TUVALU

Tuvalu, formerly the Ellice Islands, formed part of the Gilbert and Ellice Islands Colony until October 1, 1975, when separate constitutions came into force. Separation from the Gilbert Islands was implemented on January 1, 1976.

Tuvalu comprises nine coral atolls situated in the South West Pacific around the point at which the International Date Line cuts the Equator. The total land area is only about 10 sq. miles. Few of the atolls are more than 12 ft above sea level or more than half a mile in width. The vegetation consists mainly of coconut palms. The resident population in 1985 was 8,229, but it is estimated that about 1,500 Tuvaluan work overseas, mostly in Nauru, or as seamen. The people are almost entirely Polynesian. The principal languages are Tuvaluan and English. The entire population is Christian and is predominantly Protestant.

CAPITAL.—Funafuti. Estimated population 2,856. The capital has a grassstrip airfield from which a service operates regularly to Fiji and Kiribati, and is also the only port.

CURRENCY.—Tuvalu uses the Australian dollar (\$A) of 100 cents as legal tender.

FLAG.—Blue ground with Union Flag in top left quarter and nine five-pointed gold stars in the fly.

NATIONAL ANTHEM.—Tuvalu Mo Te Atua (Tuvalu for the Almighty).

NATIONAL DAY.—October 1 (Independence Day).

GOVERNMENT

On October 1, 1978, Tuvalu became fully independ-

ent ■ a sovereign state within the Commonwealth. The Constitution provides for a Prime Minister and four other Ministers who must be members of the 12-member elected Parliament. The Prime Minister presides at meetings of the Cabinet, which consists of the five Ministers, and is attended by the Attorney General. Local Government services are provided by elected Island Councils.

Governor General, His Excellency Sir Tupua Leupena, G.C.M.G., M.B.E., sworn in March 1, 1986.

Cabinet (as at May 31, 1989)

*Prime Minister, Rt. Hon. Dr. Tomasi Puapua.
Minister for Finance and Economic Development,
Hon. Kitiseni Lopati, M.B.E.
Commerce and Natural Resources, Hon. Lale Seluka.
Works and Communications, Hon. Metia Tealofi.
Health and Education, Hon. Bikeni Paeniu.
Secretary to Government (acting), Semu Taafaki.
Attorney-General, David Ballantyne.*

EDUCATION AND WELFARE

There are eight primary schools in Tuvalu and a church secondary school run jointly with the Government. The total of enrolled children of school age in 1985 was 1,300. A Maritime Training School started in 1979 now caters for 60 boys per annum.

There is a 30-bed hospital at Funafuti. All islands are served by a dispensary and a primary school.

ECONOMY

Most people still practise a subsistence economy, the main staples of their diet being coconuts and fish. The main imports are foodstuffs, consumer goods and building materials. The only export is copra (333 tons in 1985), but philatelic sales provide ■ major source of revenue and handicrafts sales are increasing. The unit of currency is the Australian dollar. In addition there are Tuvalu dollar and cent coins in circulation.

UGANDA (Republic of Uganda)

AREA, POPULATION, ETC.—Situated in Eastern Africa, Uganda is flanked by Zaire, the Sudan, Kenya and on the south by Tanzania and Rwanda. Large parts of Lakes Victoria, Edward and Albert (Mobuto) are within its boundaries, as are Lakes Kyoga, Kwania, George and Bisina (formerly Salisbury) and the course of the River Nile from its outlet from Lake Victoria to the Sudan frontier post at Nimule. Uganda has an area of 91,259 sq. miles (236,036 sq. km.) (water and swamp 16,400 sq. miles) and population (1989 estimate) of 16,398,000. The official language of Uganda is English. The main local vernaculars are of Bantu, Nilotic and Hamitic origins. Ki-Swahili is generally understood in trading centres.

Despite its tropical location, the climate is tempered

by its situation some 3,000 ft. above sea level, and well over that altitude in the highlands of the Western and Eastern Regions. In South Uganda, temperatures seldom rise above 85° F. (29° C.) or fall below 60° F. (15° C.). The rainfall averages about 50 inches ■ year. Uganda has three National Parks and a fourth (Lake Mburo) has been designated.

CAPITAL.—Kampala (population of Greater Kampala, 631,000). Other principal towns are Jinja (45,000), Mbale (28,000) and Masaka (29,000).

CURRENCY.—Uganda shilling of 100 cents.

FLAG.—Six horizontal stripes of black, yellow and red (repeated) with a crested crane emblem on a white orb in the centre.

NATIONAL ANTHEM.—“Oh Uganda”.

NATIONAL DAY.—October 9 (Independence Day).

GOVERNMENT

Uganda became an independent state and ■ member of the Commonwealth on October 9, 1962, after some 70 years of British rule. A Republic was instituted on September 8, 1967, under an executive President, assisted by ■ Cabinet of Ministers.

Early in 1971 an army coup took place and Maj.-Gen. Idi Amin, the Army Commander, proclaimed himself Head of State. In 1979, following risings and military intervention by Tanzania, President Amin was overthrown. Following elections in 1980, Dr. Milton Obote became President. A military coup on July 27, 1985 ousted Dr. Obote and installed ■ military council which attempted to negotiate ■ power-sharing agreement with the National Resistance Movement led by Yoweri Museveni. However, the National Resistance Army captured Kampala in late Jan. 1986, securing control of the rest of the country in the following few months. Yoweri Museveni was sworn in as President on Jan. 29, 1986; subsequently the Prime Minister and ■ 24-member National Resistance Council were appointed, and ■ government was formed.

President, H. E. Yoweri Museveni, sworn in Jan. 29, 1986.

UGANDA HIGH COMMISSION

Uganda House, 58-59 Trafalgar Square, WC2N 5DX
[01-839 5783]

High Commissioner, His Excellency William S. K. Matovu (1988).

EDUCATION

Education is ■ joint undertaking by the Government, local authorities and, to some extent, voluntary agencies. In 1981 Uganda had 4,276 primary schools with an enrolment of 1,421,615 children. Secondary schools numbered 199 with 78,727 students enrolled; and 4,979 students in various technical training institutions.

The National University is Makerere University, Kampala, founded as a trade school in 1921 and becoming an independent university in 1970.

COMMUNICATIONS

There is an international airport at Entebbe, with direct flights to destinations in Africa and Europe. There are 8 other airfields in Uganda. Having no sea coast, Uganda is heavily dependent upon rail and road links to Mombasa for her trade. There are 2,226 kilometres of bituminized and 25,310 kilometres of gravel roads. Roads are poor but many are being rebitumenized. A railway network joins the capital to the western, eastern and northern centres.

TRADE, ETC.

The principal export earner is coffee (over 90 per cent of all exports), which earned \$397 million in 1986. Attempts are being made to increase production of cotton and tea for export. Hydro-electricity is produced from the Owen Falls power station which generated 539 kW in 1987, 217 kW of which was exported to Kenya. The principal food crops are plantains, bananas, cassava, sweet potatoes, potatoes and sorghum.

VANUATU (Ripablik Blang Vanuatu)

AREA, POPULATION, ETC.—Vanuatu, the former Anglo-French Condominium of the New Hebrides, is situated in the South Pacific Ocean, between 13° and 21° S. and 166° and 170° E. It includes 13 large and some 70 small islands, of coral and volcanic origin, including the Banks and Torres Islands in the North, and has a total land area of 4,706 sq. miles.

(12,190 sq. km.). The principal islands are Vanua Lava, Espiritu Santo, Maewo, Pentecost, Aoba, Malekula, Ambrym, Epi, Efate, Erromango, Tanna and Aneityum. Most islands are mountainous and there are active volcanoes on several. The climate is oceanic tropical, moderated by the south-east trade winds which blow between May and October. At other times winds are variable and cyclones may occur. Temperatures range between 17° C. and 28° C., with annual rainfall averaging 90 in. to the south and 155 in. to the north.

A 1986 estimate showed a population of 140,154. A national census took place in May 1989. No results have thus far been published. About 95 per cent of the population are Melanesian, the rest being made up largely of Micronesians, Polynesians and Europeans. The national language is Bislama, but English and French are also official languages.

SEAT OF ADMINISTRATION—ΨVila, Efate, population (1986), 14,184. The only other town is Luganville (population, 1986, 5,621), on Espiritu Santo.

CURRENCY.—Vatu of 100 centimes.

FLAG.—Red over green with a black triangle in the hoist, the three parts being divided by fimbriations of black and yellow, and in the centre of the black triangle ■ boar's tusk overlaid by two crossed fern leaves.

NATIONAL ANTHEM.—"Nasinal Sing sing long Vanuatu."

NATIONAL DAY.—July 30 (Independence Day).

GOVERNMENT

The Condominium of the New Hebrides became an independent republic within the Commonwealth under the name of Vanuatu on July 30, 1980.

President, His Excellency Frederick Karlomuana Timakata, elected 1989.

Council of Ministers (as at May 31, 1989)

Prime Minister and Minister of Planning, Hon. Father Walter Lini, C.B.E.
Education, Hon. S. J. Regenvanu.

Trade, Commerce, Industry, Co-operatives and Energy, Hon. H. Qualao.
Transport, Public Works and Tourism, Hon. E. Natapei.
Chief Justice, Hon. Mr. Justice F. G. Cooke.
Attorney-General, S. Hakwa.

ECONOMY

Most of the population is employed on plantations or in subsistence agriculture. Subsistence crops include yams, taro, manioc, sweet potato and breadfruit; principal cash crops are copra, cocoa and coffee. Large numbers of cattle are kept on the plantations and beef is the second largest export after copra.

Principal exports are copra, meat (frozen, tinned and chilled), timber and cocoa.

Tourism is an important revenue earner, and the absence of direct taxation has led to growth in the finance and associated industries.

WESTERN SAMOA

(Malotuto'atasi o Samoa i Sisifo)

Western Samoa lies in the south Pacific Ocean between latitudes 13° and 15° S. and longitudes 171° and 173° W. It consists of the islands of Savai'i (662 sq. miles) and of Upolu, which, with seven other islands (Apolima, Manono, Fanuatapu, Namua, Nutele, Nuulua and Nuusafee) has an area of 435 sq. miles (1,714 sq. km.). All the islands are mountainous. Upolu, the most fertile, contains the harbours of ΨApia and ΨSaluafata, and Savai'i the harbour of ΨAsau. The population at the 1981 census was 158,130, the largest numbers being on Upolu (114,980) and Savai'i (43,150); a 1985 U.N. estimate put the figure at 163,000. The Samoans are a Polynesian people, though the population also includes other Pacific Islanders, Euro-Samoa, Chinese and Europeans. The main languages spoken are Samoan and English. The islanders are Christians of different denominations.

CAPITAL.—ΨApia, on Upolu (population (1981 census) 33,100). Robert Louis Stevenson died and was buried at Apia in 1894.

CURRENCY.—Tala (WS\$) of 100 sene.

FLAG.—Five white stars (depicting the Southern Cross) on a quarter royal blue at top next staff, and three quarters red.

NATIONAL ANTHEM.—The Banner of Freedom.

NATIONAL DAY.—January 1 (Independence Day).

GOVERNMENT

Formerly administered by New Zealand (latterly with internal self-government), Western Samoa became, on January 1, 1962, the first fully-independent Polynesian State. The State was treated ■■■ member country of the Commonwealth until its formal admission on August 28, 1970.

The 1962 Constitution provides for ■ Head of State to be elected by the Legislative Assembly for ■ five year term. However, it was decided that initially two of the four Paramount chiefs should jointly hold the office of Head of State for life. When one of the chiefs died in April 1963, Malietoa Tanumafili II became the holder of the office of Head of State for life. The Head of State's functions are analogous to those of ■ constitutional monarch. Executive government is carried out by a Cabinet of Ministers.

Head of State, H. H. Malietoa Tanumafili II, G.C.M.G., C.B.E. (April 15, 1963).

Deputy Head of State, Hon. Mataafa Faasauamaleau Puela.

Cabinet (as at April 30, 1989)

Prime Minister and Minister of Foreign Affairs, Hon. Tofigau Eti Alesana.
Finance, Hon. Tuilaepa Sailele.
Agriculture, Hon. Pule Lameko.

Education, Hon. Patu Afaease.

Health, Hon. Polataivao Fosi.
Post Office, Transport and Civil Aviation, Hon. Jack Netzler.
Public Works, Hon. Leiataua Vaiao.

ECONOMY

Agriculture is the basis of Western Samoa's economy, the principal cash crops (and exports) being coconuts (copra), cocoa and bananas. Other agricultural exports include coffee, timber, tropical fruits and seeds. Efforts are being made to develop fishing on a commercial scale. Manufacturing is very small in scope and concerned largely with processing agricultural products, but is being encouraged by the Government. Tourism is increasing rapidly.

ZAMBIA (Republic of Zambia)

AREA, POPULATION, ETC.—The Republic of Zambia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. It has an area of 290,586 sq. miles (752,614 sq. km.) within boundaries 3,515 miles in length and a population (U.N. estimate, 1985) of 6,666,000, including about 50,000 non-Africans.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers, and the Luano valley, elevations vary from 3,000 to 5,000 feet above sea level, but in the north-east the plateau rises to occasional altitudes of over 6,000 feet.

Although Zambia lies within the tropics, and fairly centrally in the African land mass, its elevation relieves it from extremely high temperatures and humidity.

CAPITAL.—Lusaka, situated in the Central Province. Population (estimated, 1980), 641,000. Other centres are Livingstone, Kabwe, Chipata, Mazabuka, Mbala, Kasama, Solwezi, Mongu, Mansa, Ndola, Luanshya, Mufulira, Chingola, Chililabombwe, Kalulushi and Kitwe, the last six towns being the main centres on the Copperbelt.

CURRENCY.—Kwacha (K) of 100 ngwee.

FLAG.—Green with three small vertical stripes, red, black and orange (next fly); eagle device on green above stripes.

NATIONAL ANTHEM.—Stand and Sing of Zambia, Proud and Free.

NATIONAL DAY.—October 24 (Independence Day).

GOVERNMENT

At the dissolution of the Federation of Rhodesia and Nyasaland, on December 31, 1963, Northern Rhodesia (as Zambia was then known) achieved internal self-government under a new constitution. Zambia became an independent republic within the Commonwealth on October 24, 1964—75 years after coming under British rule and nine months after achieving internal self-government.

In July 1973, a new Constitution was introduced, making the United National Independence Party (U.N.I.P.) the only party.

President, Dr. Kenneth David Kaunda, assumed office Oct. 24, 1964; re-elected, Dec. 1973, Dec. 1978, Oct. 1983 and Oct. 1988.

PRODUCTION

Principal products are maize, sugar, groundnuts, cotton, livestock, vegetables and tobacco.

Mineral production was valued at K8,390,765,000 in 1987, of which copper production (of 483,100 tonnes) accounted for K6,870,386,000.

FINANCE AND TRADE

Gross Domestic Product (current prices) was K18,079.8m in 1987. G.D.P. per capita (current prices) was K2,486.9.

ZIMBABWE (Republic of Zimbabwe)

AREA, POPULATION, ETC.—Zimbabwe, the former Southern Rhodesia (named after Cecil Rhodes) comprising eight provinces (Manicaland, Masvingo, Matabeleland North, Matabeleland South, Midlands, Mashonaland West, Central and East), lies south of the Zambezi river. The political neighbours are Zambia and Mozambique on the N., South Africa and Botswana on the S. and W., and Mozambique on the E. It has a total area of 150,804 sq. miles (390,580 sq. km.), and a population (estimated 1989) of 9,000,000.

CAPITAL.—Harare (formerly Salisbury) situated on the Mashonaland plateau, population (August 1982) 658,364. Bulawayo—the largest town in Matabeleland, population (August 1982) 495,317. Other centres are, Chitungwiza, Mutare, Gweru, Kadoma, Kwe Kwe, Masvingo and Hwange.

CURRENCY.—Zimbabwe dollar (Z\$) of 100 cents.

FLAG.—Seven horizontal stripes (green, gold, red, black, red, gold, green) with white triangle at the hoist containing the Zimbabwe bird superimposed on red five-point star.

NATIONAL ANTHEM.—Ishe Komborerei Africa.

NATIONAL DAY.—April 18 (Independence Day).

GOVERNMENT

Southern Rhodesia was granted responsible government in 1923. An illegal declaration of independence on November 11, 1965 was finally terminated on December 12, 1979. Following elections in February 1980 the country obtained independence on April 18, 1980 as the Republic of Zimbabwe, a member of the British Commonwealth. The Parliament consists of ■ House of Assembly of 100 members and ■ Senate of 40 Senators and has a maximum life of five years. A Constitutional Amendment Bill designed to replace the 20 reserved white seats with nominated members from any race, was approved in Sept. 1987.

On Oct. 30, 1987 a Constitutional Amendment Bill was passed providing for the creation of an executive presidency. On Dec. 30, 1987 Mr. Robert Mugabe was elected by M.P.s and Senators as the first President. The Bill provides for a President to be popularly elected every six years. The President has the power to appoint ■ Cabinet and to veto parliamentary bills.

A merger agreement between the ZANU (PF) and ZAPU parties was signed on Dec. 22, 1987 which will lead to the eventual creation of a one-party state. The new party is known as ZANU-PF.

Executive President, Hon. Robert Gabriel Mugabe, elected Dec. 30, 1987.

Cabinet (as at May 31, 1989)

President, Robert Mugabe.

Vice President, Simon Muzenda.

ZIMBABWE HIGH COMMISSION

Zimbabwe House, 429 Strand, WC2R 0SA

[01-836 7755]

High Commissioner, His Excellency Dr. Herbert M. Murerwa (1984).

EDUCATION

Since independence, a policy of free primary education and accelerated expansion at secondary level has resulted in rapidly expanding enrolment. In 1986 there were 2,260,367 primary school and 545,841 secondary school pupils in both Government and Government aid schools. Over 80 per cent of schools are government aided schools. The University of Zimbabwe was founded in 1955.

ECONOMY

The country is endowed with minerals, water, forests, wildlife and other resources. The agricultural sector is well developed with both commercial and communal farmers. Tobacco remains the most important crop in terms of export and maize the most important for domestic consumption. Other crops include wheat, cotton, and sugar. Good quality beef is exported to the E.C. Production can be severely affected by drought.

The manufacturing sector has a high degree of inter-dependency and many industries depend on the agricultural sector for their raw materials. Industry is dependent on vital imports e.g. fuel oil, steel products and chemicals, ■ well ■ heavy machinery and items of transport. The mining sector, although contributing a relatively small portion to G.D.P. (7.6 per cent in 1984) is important to the economy as ■ foreign exchange earner (26 per cent of total in 1984). Almost all mineral production is exported. Gold is the most important mineral, others are asbestos,

silver, nickel, copper, chrome ore, tin, iron ore and cobalt. There is a successful ferro-chrome industry and a substantial steel works which has been heavily subsidized by Government.

A high domestic budget deficit combining with a high external debt service ratio has put the economy into decline. The 1986-87 drought made this worse.

ANGUILLA

Anguilla is a flat coralline island, about 16 miles in length, 3½ miles in breadth at its widest point and its area is about 35 sq. miles (91 sq. km.). It lies approximately 18° N. latitude and 63° W longitude, to the north of the Leeward Islands group.

The island is covered with low scrub and fringed with some of the finest white coral-sand beaches in the Caribbean. The climate is pleasant and healthy with temperatures in the range of 24-30° C. throughout the year. The population (U.N. 1985 estimate) is about 7,000.

CAPITAL.—The Valley (population 500).

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

GOVERNMENT

Anguilla has been a British colony since 1650. For most of its history it has been linked administratively with St. Christopher, but three months after the Associated State of Saint Christopher (St. Kitts)-Nevis-Anguilla came into being in 1967 the Anguillans repudiated government from St. Kitts. A Commissioner was installed in 1969 and in 1976 Anguilla was given a new status and separate constitution. Final separation from St. Kitts and Nevis was effected on Dec. 19, 1980 and Anguilla reverted to a British Dependency. A new Constitution was introduced in 1982, providing for a Governor, an Executive Council comprising four elected Ministers and two ex-officio members (Attorney General and Permanent Secretary, Finance), and an 11-member legislative House of Assembly presided over by a Speaker.

Governor, His Excellency B. G. J. Carty (1989).

Executive Council

Chief Minister and Minister of Home Affairs, Tourism and Community Development, Hon. Emile Gumbs.
Lands, Agriculture and Fisheries, Health and Prisons, Hon. Eric Reid.
Communications, Public Utilities and Works, Hon. Kenneth Harrigan.
Finance, Education, Economic Development, Osbourne Fleming.
Permanent Secretary (Finance), Hon. Franklin Connor, O.B.E.
Attorney-General, Hon. Alan Hoole.

ECONOMY

Low rainfall limits agricultural output and export earnings are mainly from sales of lobsters. Tourism has developed rapidly in recent years and accounts for most of the islands economic activity. In 1988 there were 28,000 tourists and a further 42,000 day visitors.

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (about 20 only of which are inhabited) situated in the west of the Atlantic Ocean, in 32° 18' N. lat. and 64° 46' W. long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1515, but no settlement was made until 1609, when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

The total area is approximately 20.59 sq. miles (53 sq. km.), which includes 2.3 sq. miles leased to the U.S.A. The civil population was 56,000 in 1985 (U.N. estimate).

CAPITAL.—Hamilton (population, 1984, 1,669).

CURRENCY.—Bermuda dollar of 100 cents.

GOVERNMENT

Internal self-government was introduced on June 8, 1968. There is a Senate of 11 members and an elected House of Assembly of 40 members. The Governor retains responsibility for external affairs, defence, internal security and the police, although

administrative matters for the Police Service have been delegated to the Minister of Home Affairs.

At the General Election of Feb. 9, 1989 the United Bermuda Party gained 23 seats, the Progressive Labour Party 15, National Liberal Party 1, and Independent Environmentalist 1.

Governor and Commander-in-Chief, His Excellency Sir Desmond Langley, K.C.V.O., M.B.E. (1988).
Deputy Governor, B. Carty, O.B.E.

Cabinet
(as at Jan. 31, 1989)

Premier, Hon. J. W. Swan.

Deputy Premier and Minister of Finance, Dr. Hon. C. James.

Tourism, Hon. J. Irving Pearman.

Education, Hon. G. D. E. Simons.

Works and Housing, Hon. Q. L. Edness.

Health and Social Services, Hon. A. F. Cartwright DeCouto.

Transport, Hon. S. Stallard.

Environment, Hon. T. H. Davis.

Labour and Home Affairs, Hon. Sir John Sharpe.

Community and Cultural Affairs, Hon. R. Barritt.

Youth, Sport and Recreation, Hon. M. A. Burgess.

Legislative Affairs, with responsibility for Telecommunications, Sen. Hon. C. T. M. Collis.

President of the Senate, Hon. A. S. Jackson, M.B.E.

Speaker of the House of Assembly, Hon. F. J. Barritt, C.B.E.

Chief Justice, Hon. Sir James R. Astwood.

Puisne Judges, Hon. L. Austin Ward, Q.C.; Hon. M. Ward; Hon. D. Hull.

ECONOMY

Locally manufactured concentrates and pharmaceuticals are now the colony's leading exports. Little food is produced except vegetables and fish, other foodstuffs being imported.

The island's economic structure is based on tourism, the major industry, and international company business, attracted by the low level of taxation and sophisticated telecommunications system. In 1987 a total of 613,628 visitors arrived by air and cruise ship. Cruise ships dock at Hamilton, Somerset and St. George's.

Free elementary education was introduced in 1949. Free secondary education was introduced in 1965 for those children in the aided and maintained schools who were below the upper limit of the statutory school age of 16 (from 1969 onwards).

There are 5 radio and one television station, one daily and 2 weekly newspapers and overseas telephone and telegraph services are maintained.

THE BRITISH ANTARCTIC TERRITORY

The British Antarctic Territory was designated in 1962 and consists of the areas south of 60°S. latitude which were previously included in the Falkland

Islands Dependencies. The territory lies between longitudes 20° and 80°W., south of latitude 60°S. and includes the South Orkney Islands, the South Shetland Islands, the mountainous Antarctic Peninsula (highest point Mount Jackson, 13,620ft, in Palmer Land) and all adjacent islands, and the land mass extending to the South Pole. The territory has no indigenous inhabitants and the British population consists of the scientists and technicians who man the British Antarctic Survey stations. The number averages about 60 to 70 in winter, but increases considerably in the summer months with the arrival of field workers; Argentina, Brazil, Chile, China, Poland, U.S.A., U.S.S.R. and Uruguay also have scientific stations in the territory.

The first two British Antarctic Survey stations were established in the South Shetland Islands in 1944, and by 1956 the number of stations had risen to twelve. Due to the completion of field work in some areas and increased mobility, the number has now been reduced to five. These are Signy (Signy Island, S. Orkney Islands), Faraday (Argentine Islands, Graham Coast), Rothera (Adelaide Island), Halley (Caird Coast) and, in summer only, Fossil Bluff (George VI Sound). Fifteen other stations have been established but are at present unoccupied.

The territory is administered by a High Commissioner, resident in the Falkland Islands.

High Commissioner, His Excellency William Hugh Fullerton, C.M.G. (1988).

(See also index for the Antarctic)

THE BRITISH INDIAN OCEAN TERRITORY

The British Indian Ocean Territory was established by an Order in Council in 1965 and included islands formerly administered from Mauritius and the Seychelles. After the independence of both, the territory was redefined in 1976 as comprising only the islands of the Chagos Archipelago.

The Chagos Archipelago consists of six main groups of islands situated on the Great Chagos Bank and covering some 21,000 sq. miles (54,389 sq. km.). The largest and most southerly of the Chagos Islands is Diego Garcia, a sand cay with a land area of about 17 square miles approximately 1,100 miles east of Mahé, used as a joint naval support facility by Britain and U.S.A.

The other main island groups of the archipelago, Peros Banhos (29 islands with a total land area of 4 sq. miles) and Salomon (11 islands with a total land area of 2 sq. miles) are uninhabited. The islands have a typical tropical maritime climate, with average temperatures between 25° C and 29° C in Diego Garcia, and rainfall in the whole archipelago of 90-100 inches a year.

Commissioner and Administrator, R. Edis.

THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number 46, of which 11 are inhabited, and have a total area of about 59 sq. miles, (153 sq. km.). The principal are Tortola, the largest (situated in 18° 27' N. lat. and 64° 40' W. long., area, 21 sq. miles), Virgin Gorda (84 sq. miles), Anegada (15 sq. miles) and Jost Van Dyke (3½ sq. miles). The 1980 Census showed a total population of 10,985 (Tortola (9,119); Virgin Gorda (1,443); Anegada (169); Jost

Van Dyke (136); and other islands (82). A 1985 U.N. estimate gave a figure of 13,000. Apart from Anegada, which is a flat coral island, the British Virgin Islands are hilly, being an extension of the Puerto Rico and the U.S. Virgin Islands archipelago. The highest point is Sage Mountain on Tortola which rises to a height of 1,780 feet. Tourism is the main industry, but there is some cattle raising and fishing. Other products are vegetables, fruit, charcoal and rum.

The islands lie within the Trade Winds belt and possess a pleasant and healthy sub-tropical climate. The average temperature varies from 22°–28° C. in winter and 26°–31° C. in summer. The summer heat is tempered by sea breezes and the temperature usually falls by about 6° C. at night. Average rainfall is 53 inches.

CAPITAL.—Road Town, on the south-east of Tortola. Population, 2,479.

CURRENCY.—The U.S. dollar (US\$) of 100 cents is legal tender in the British Virgin Islands.

GOVERNMENT

Under the 1977 Constitution, the Governor, appointed by the Crown, remains responsible for defence and internal security, external affairs and the civil service but in other matters acts in accordance with the advice of the Executive Council. The Executive Council consists of the Governor as Chairman, one ex officio member (the Attorney-General), the Chief Minister and three other ministers. The Legislative Council consists of a Speaker chosen from outside the Council, one ex officio member (the Attorney-General), and nine elected members returned from nine one-member electoral districts.

Governor, His Excellency (John) Mark (Ambrose) Herdman, L.V.O. (1986).

Deputy Governor, E. Georges, O.B.E.

Financial Secretary, R. Mathavious.

The Executive Council

Chairman, The Governor.

Chief Minister and Minister of Finance, Hon. H. Lavity Stoutt.

Natural Resources and Labour, Hon. Ralph O'Neal.

Communications and Works, Hon. Oliver Cills.

Health, Education and Welfare, Hon. Louis Waiters, M.B.E.

Attorney-General, Hon. Karl S. Atterbury.

Puisne Judge (resident), Hon. Miss Sylvia Bertrand.

COMMUNICATIONS

The principal airport is on Beef Island, linked by bridge to Tortola, and an extended runway of 3,600 ft enables larger aircraft to call. There is a second airfield on Virgin Gorda and a third on Anegada. There are direct shipping services to the United Kingdom and the United States and fast passenger services connect the main islands by ferry.

THE CAYMAN ISLANDS

The Cayman Islands, between 79° 44' and 81° 26' W. and 19° 15' and 19° 46' N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 sq. miles (259 sq. km.). Population (1988 estimate), 24,900.

CAPITAL.—George Town, in Grand Cayman, population (1988) 11,000.

CURRENCY.—Cayman Islands dollar (CI\$) of 100 cents.

GOVERNMENT

The constitution provides for a Governor, Legislative Assembly and an Executive Council, and effectively allows a large measure of self-government. Unless there are exceptional reasons, the Governor must take the advice of the Executive Council, which comprises three official members and four others elected from the 12 elected members of the Assembly. The Governor retains control over the police, civil service, defence and external affairs. He presides over the Assembly, in which the three official members also sit, though there is provision for the appointment of a Speaker if the members request it. The normal life of the Assembly is four years, with a general election next due in November 1992.

ECONOMY

Based on a complete absence of direct taxation, the Cayman Islands have been successfully promoted over the past 25 years as an offshore financial centre. At the end of 1988 there were 527 banks and trust companies and 391 insurance companies licensed, and over 18,250 companies registered. Promotion of tourism, with an emphasis on scuba diving, has also been successful, and there were 218,709 visitors by air and 315,585 cruise ship callers in 1988. The two industries support a heavy imbalance in trade resulting from the need to import most of what is consumed and used on the Islands. Import duty and fees from financial centre operations have provided revenue enabling the government to undertake

heavy investment in education, health and other social programmes.

FALKLAND ISLANDS

The Falkland Islands, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'–53° S. lat. and 57° 40'–62° W. long. They consist of East Falkland (area 2,610 sq. miles; 6,759 sq. km.), West Falkland (2,090 sq. miles; 5,413 sq. km.) and upwards of 100 small islands in the aggregate. Mount Usborne (E. Falkland), the loftiest peak, rises 2,312 feet above the level of the sea.

The climate is cool. At Stanley the mean monthly temperature varies between 9° C. in January and 2° C. in July. The islands are chiefly moorland.

The Falklands were sighted first by Davis in 1592, and by Hawkins in 1584: the first known landing was by Strong in 1690. A settlement was made by France in 1764; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to part at least of the group in 1771. After Argentina declared independence from Spain, the Argentine government in 1820 proclaimed its sovereignty over the Falklands and a settlement was founded in 1826. The settlement was destroyed by the Americans in 1831. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. Argentina continued to claim sovereignty over the islands (known to them as las Islas Malvinas), and in pursuance of this claim invaded the islands on April 2, 1982 and also occupied South Georgia. A Task Force despatched from Great Britain recaptured South Georgia on April 25, and after landing at San Carlos Bay on May 21, recaptured the islands from the Argentines, who surrendered on June 14, 1982. A British naval and military presence remains in the area.

The population was 1,916 at Dec. 31, 1986 and is almost totally British.

CHIEF TOWN.—Stanley, population 1,231 (1986). Stanley is distant from England about 8,103 miles.

CURRENCY.—Falkland pound of 100 pence.

GOVERNMENT

Under the 1985 Constitution, the Governor is advised by an Executive Council consisting of three elected members of the Legislative Council and two ex-officio members, the Chief Executive and the Financial Secretary. The Legislative Council consists of eight elected members and the same two ex-officio members.

Governor, His Excellency William Hugh Fullerton, C.M.G. (1988).

ECONOMY

The economy was formerly based solely on agriculture, principally sheep-farming with a little dairy farming for domestic requirements and crops for winter fodder. Since the establishment of an interim conservation and management zone around the islands and the consequent introduction on Feb. 1, 1987 of a licensing regime for vessels fishing within the zone the economy has diversified and income from the associated fishing activities is now the largest source of revenue. Chief imports are provisions, alcoholic beverages, timber, clothing and hardware.

GIBRALTAR

Gibraltar is a rocky promontory, 2½ miles in length, three-quarters of a mile in breadth and 1,396 ft. high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. In a total area of 24 sq. miles (6 sq. km.), the population at the census of Nov. 1981 was 28,719. At the end of 1988, it stood at 30,077.

Gibraltar is a naval base of strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege, 1779–83, when General Eliott, afterwards Lord Heathfield, held it for three years and seven months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side.

CURRENCY.—Gibraltar pound of 100 pence.

GOVERNMENT

The Constitution of Gibraltar, approved in 1969, made formal provision for certain domestic matters to devolve on Ministers appointed from among elected members of the House of Assembly then set up to replace the former Legislative Council. The House of Assembly consists of an independent Speaker, 15 elected members, the Attorney-General and the Financial and Development Secretary.

ECONOMY

Gibraltar enjoys the advantages of an extensive shipping trade and is a popular shopping centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on consumer items. The free port tradition of Gibraltar is still reflected in the low rates of import duty. The gradual change from a fortress city to a holiday centre has led to a flourishing tourist trade.

A total of 2,762 merchant ships (44,112,541 gross registered tons aggregate) entered the port during 1988. Of these 2,068 were deep-sea ships (43,922,873 gross registered tons aggregate). In addition 5,014 yachts (152,678 gross registered tons) called at the port. There are 26.75 miles of roads.

EDUCATION

Education is compulsory and free for children between the ages of 4 and 15 whose parents are ordinarily resident in Gibraltar. Scholarships are available for higher education in Britain. The total enrolment in Government schools was 4,459 in Dec. 1988.

HONG KONG

Hong Kong, consisting of a number of islands and of a portion of the mainland (Kowloon and the New Territories), on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52'-114° 30' E. long. The total area of the territory (including recent reclamation) is 413 sq. miles (1,071 sq. km.) with a population which at the end of 1988 was 5,700,000.

The island of Hong Kong is about 11 miles long and from two to five miles broad, with a total area of 29 sq. miles; at the eastern entrance to the harbour it is separated from the mainland by a narrow strait. The island was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, consisting of a peninsula in the southern part of the Guangdong province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

Climate.—Hong Kong enjoys unusually varied

weather for a tropical area. The mean monthly temperature ranges from 15° C. to 29° C., though summer temperatures can exceed 33° C. and winter temperatures drop below 10° C. The average annual rainfall is 2,225 mm., of which nearly 80 per cent falls between May and September. Tropical cyclones passing at various distances from Hong Kong occur between July and September, causing high winds and heavy rain.

CAPITAL.—Victoria, situated on the island of Hong Kong, is about 81 miles S.E. of Canton and 40 miles E. of the Portuguese province of Macao at the other side of the Pearl River. It lies along the northern shore of the island and faces the mainland; the harbour (23 sq. miles water area) lies between the city and the mainland.

CURRENCY.—Hong Kong dollar (HK\$) of 100 cents.

GOVERNMENT

Hong Kong is administered by the Hong Kong Government, at the head of which is the Governor, and its administration has developed from the basic pattern applied to all British-governed territories overseas. Under the terms of the Joint Declaration of the British and Chinese Governments, which entered into force on May 27, 1985, Hong Kong will become with effect from July 1, 1997, a Special Administrative Region of the People's Republic of China. However, the social and economic systems in the S.A.R. will remain unchanged for 50 years.

The Governor governs aided by an Executive Council, consisting of four ex-officio and ten appointed members, and a Legislative Council, which consists of three ex-officio and seven official members, 20 appointed members, 12 elected by the Electoral College and 14 by the functional constituencies.

There is also an Urban Council which provides services relating to public health and sanitation, culture and recreation in the urban area. A Regional Council was also set up in 1986 to provide similar services in the New Territories. Both Councils are financially autonomous.

Governor, His Excellency Sir David Wilson, K.C.M.G. (1987).

Chief Secretary, Hon. Sir David Ford, K.B.E., L.V.O. *Commander, British Forces*, Maj.-Gen. Hon. G. D. Johnson, O.B.E., M.C.

COMMUNICATIONS

Hong Kong, one of the world's finest natural harbours, possesses excellent wharves. The Kwai Chung container terminal has eight berths which can accommodate eight "third-generation" container ships simultaneously. An ocean terminal pier with an overall length of 381 m. can accommodate large liners and cargo vessels. Vessels up to 550 metres length and 16.5 metres draught can be berthed. Mooring buoys in the harbour are available to vessels of up to 12 metres draught. Excellent dockyard facilities are available and include five floating drydocks, the largest of which has a lifting capacity of over 40,000 tonnes. In 1988 some 17,089 ocean-going vessels and 94,931 river-trade vessels called at Hong Kong and loaded and discharged more than 81 million tonnes of cargo.

Hong Kong International Airport, Kai Tak, situated to the east of the Kowloon peninsula, is an important link on the main air routes of the Far East. It is regularly used by over 37 international airlines, providing some 1,400 frequent scheduled passenger and cargo services each week between Hong Kong and the United Kingdom, the People's Republic of China, North and South America, Europe, East and South Africa, the Middle East, Australia, the South Pacific region, and Asian countries. In addition, several other airlines operate about 230 non-scheduled services ■ week.

During 1988, over 87,000 aircraft on international flights arrived and departed, carrying 15.3 million passengers and 694,000 tonnes of freight.

EDUCATION

In Sept. 1988 there were 2,115 day schools with 1,228,786 pupils. Free education for children up to the age of 15 was made compulsory in 1979. Post-secondary education is provided by two universities, two polytechnics, the Hong Kong Baptist College and two approved post-secondary colleges. The Hong Kong Polytechnic and City Polytechnic of Hong Kong have about 8,208 and 3,376 full-time students respectively. There are also eight technical institutes and four teacher-training colleges.

TRADE AND INDUSTRY

The manufacturing sector is the mainstay of Hong Kong's economy, contributing about 22 per cent to the G.D.P. and accounting for about 35 per cent of total employment. Up to 90 per cent of Hong Kong's manufacturing output is eventually exported.

Hong Kong's manufacturing industries produce mainly light consumer goods. In the past ten years or so, industries like electronics, plastics, electrical products, and watches and clocks have grown significantly—they accounted for 39 per cent of Hong Kong's total domestic exports in 1988. The corresponding share of textiles and clothing, Hong Kong's traditional leading industries, was 38 per cent in 1988.

Diversification in terms of products and markets continues to be the main feature of recent industrial development, ■ are industrial partnerships with overseas companies. The economy of Hong Kong is based on export rather than the domestic market. In 1988, the total value of visible trade (including domestic exports, re-exports and imports) amounted to 233 per cent of the G.D.P. Hong Kong's visible

trade account attained in 1988 a surplus of HK\$5,729 million. Taking visible and invisible trade together, there was a combined surplus of HK\$24,542 million, compared with HK\$23,703 million in 1987. In 1988, Hong Kong's principal customers for its domestic products, in order of value of trade, were U.S.A., China, the Federal Republic of Germany, the United Kingdom, Japan, Canada and Singapore. China was its principal supplier.

MONTSENNAT

Situated in 16° 45' N. lat. and 61° 15' W. long., 27 miles S.W. of Antigua, the island is about 11 miles long and seven wide, with an area of 38 sq. miles (98 sq. km.), and a population (1988), of 11,900. Discovered by Columbus in 1493, it was settled by Irishmen in 1632, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. Fertile and green, it is volcanic with several hot springs. About two-thirds of the island is mountainous, the rest capable of cultivation.

CHIEF TOWN.—Plymouth. Population 3,000.

CURRENCY.—East Caribbean dollar (EC\$) of 100 cents.

GOVERNMENT

A Ministerial system was introduced in Montserrat in 1960. The Executive Council is presided over by the Governor and is composed of four elected members (the Chief and three other Ministers) and two ex-officio members (the Attorney-General and the Financial Secretary). The four Ministers are appointed from the members of the political party holding the majority in the Legislative Council. The Legislative Council consists of the Speaker, two ex-officio members (the Attorney General and the Financial Secretary), two nominated unofficial members and seven elected members.

Governor, His Excellency Christopher John Turner, O.B.E. (1987).

Executive Council
(as at May 31, 1989)

President, The Governor.

Chief Minister and Minister of Finance, Hon. J. A. Osborne.

Communications and Works, Hon. J. B. Chalmers. Education, Health and Community Services, Hon. V. K. Jeffers.

Agriculture, Trade, Lands and Housing, Hon. N. Tuitt.

Attorney-General, Hon. O. Adams. Financial Secretary, J. E. Ryan.

Speaker of the Legislative Council, Hon. H. A. Fergus, O.B.E.

ECONOMY

The economy is dominated by tourism, related construction activities and offshore business services. The chief export in 1987 was electronic components assembled on the island, but attempts are being made to expand sea island cotton, agricul-

ture, data processing and some other island-based exports. The island has also established a computer centre to reinforce its position as a regional information technology, telecommunications and media communications base.

PITCAIRN ISLANDS

Pitcairn, a small volcanic island, 1·9 sq. miles (5 sq. km.), in area, is the chief of a group of islands situated about midway between New Zealand and Panama in the South Pacific Ocean at longitude 130° 06' W. and latitude 25° 04' S.

The island rises in cliffs to a height of 1,100 feet and access from the sea is possible only at Bounty Bay, a small rocky cove, and then only by surf boats. Mean monthly temperatures vary between 66° F. (19°C) in August and 75° F. (24°C) in February and the average annual rainfall is 80 inches. With an equable climate, the island is very fertile and produces both tropical and sub-tropical trees and crops.

The small community, numbering 52 (1988), are descendants of the Bounty mutineers and their Tahitian companions who did not wish to remain on Norfolk Island when the entire community was transferred there in 1856, and returned to Pitcairn three years later.

Pitcairn became a British Settlement under the British Settlement Act, 1887, and was administered by the Governor of Fiji from 1952 until 1970, when the administration was transferred to the British High Commission in New Zealand and the British High Commissioner was appointed Governor. The local Government Ordinance of 1964 provides for a Council of ten members of whom four are elected.

Governor of Pitcairn, Henderson, Ducie and Oeno Islands, His Excellency R. A. C. Byatt, c.m.g. (British High Commissioner to New Zealand).

Island Magistrate and Chairman of Island Council, B. Young.

Education Officer and Government Adviser, L. Buckley.

The islanders live by subsistence gardening and fishing, and their limited monetary needs are satisfied by the manufacture of wood carvings and other handicrafts which are sold to passing ships and to a few overseas customers. Other than small fees charged for gun and driving licences there are no taxes and Government revenue is derived almost solely from the sale of postage stamps. Communication with the outside world is maintained by cargo vessels travelling between New Zealand and Panama which call at irregular intervals; and by means of telephone telegraphic links with New Zealand.

The New Zealand Education Department provides assistance in recruiting a teacher for the sole-charge school. Education is compulsory between the ages of five and fifteen. Secondary education in New Zealand is encouraged by the Administration which provides scholarships and bursaries for the purpose. Medical care is provided by a registered nurse when a doctor is not present. Since 1887 the islanders have all been adherents of the Seventh Day Adventist Church.

The other three islands of the group (Henderson

lying 105 miles E.N.E. of Pitcairn, Oeno lying 75 miles N.W. and Ducie lying 293 miles E.) are all uninhabited. Henderson Island is occasionally visited by the Pitcairn Islanders to obtain supplies of "miro" wood which is used for their carvings. Oeno is visited for excursions of about a week's duration every two years or so.

ST. HELENA

Probably the best known of all the solitary islands in the world, St. Helena is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 702 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America, 1,694 from Cape Town (transit 5 days), in 15° 55' S. lat. and 5° 42' W. longitude. It is 10½ miles long, 6½ broad, and encloses an area of 47 sq. miles (122 sq. km.), with a population of 5,564 (end 1987).

St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, Juan da Nova Castella, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. Since the collapse of the New Zealand flax industry in 1965, there have been no significant exports. St. James's Bay, on the north-west of the Island, possesses a good anchorage. There is as yet no airport or airstrip.

CAPITAL.—Ψ Jamestown. Population (1987), 1,330.

CURRENCY.—St. Helena pound (£) of 100 pence.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of a Legislative Council, consisting of the Governor, two ex-officio members (Chief Secretary and Financial Secretary) and twelve elected members. Five committees of the Legislative Council are responsible for general oversight of the activities of Government Departments and have in addition a wide range of statutory and administrative functions. The Governor is also assisted by an Executive Council of the two ex-officio members and the Chairmen of the Council committees.

Governor, His Excellency Robert F. Stimson (1988). Chief Secretary, (vacant).

Financial Secretary, M. Rosling.

Senior Medical Officer, Dr. R. Grant.

Dir. of Agriculture and Natural Resources, V. Hart.

Chief Education Officer, B. George.

Dir. of Works, A. Rennie.

Social Services Officer, I. Ellick.

ASCENSION

The small island of Ascension lies in the South Atlantic ($7^{\circ} 56' S.$, $14^{\circ} 22' W.$) some 700 miles northwest of the island of St. Helena. It is a rocky peak of purely volcanic origin, the highest point (Green Mountain) some 2,817 ft. is covered with lush vegetation. Ascension Island Services operate a farm of some 10 acres on the mountain, producing vegetables and livestock. The island is famous for turtles, which land on the beaches from January to May to lay their eggs. It is also a breeding area for the sooty tern, or wideawake, large numbers of which settle on the south-western coastal section every eighth month to hatch their eggs. Other wild life on the island includes feral donkeys and cats, rabbits and francolin partridge. All wildlife except rabbits and cats is protected by law. The ocean surrounding the island abounds with shark, barracuda, tuna, bonito and many other fish.

Ascension is said to have been discovered by Juan da Nova Castella, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. It was uninhabited until the arrival of Napoleon in St. Helena in 1815 when a small British naval garrison was stationed on the island. It remained under the supervision of the Board of Admiralty until 1922, when it was made a dependency of St. Helena by Royal Letters Patent.

The British Foreign Secretary appoints the Administrator who is responsible to the Governor resident in St. Helena. There is a small Police Force and Post Office. The British organizations through Ascension Island Services (AIS) provide and operate various common services for the island (school, hospital, public works etc.).

Ascension Island is a main relay point of the coaxial submarine cable system laid between South Africa, Portugal and the United Kingdom, which is operated by the South Atlantic Cable Company. Cable & Wireless PLC operates the international telephone and cable services and maintains an internal telephone service. The B.B.C. opened its Atlantic relay station broadcasting to Africa and South America in 1967.

The resident population in March 1989 totalled 1,081, of whom 704 were from St. Helena, 177 from the U.K., 187 from the U.S.A. and 13 from the Republic of South Africa. The residents consist of the employees and families of the British organizations, of the contractors of the U.S. Air Force and N.A.S.A. (Computer Sciences Raytheon and Bendix Field Engineering Corporation) and of the St. Helena Government. (N.A.S.A./Bendix were due to leave on Sept. 30, 1989).

British forces returned to the island in April 1982 in support of operations in the Falkland Islands. At present there are about 160 R.A.F. personnel on the island supporting the air link to the Falklands.

Capital.—Georgetown.

Administrator, J. J. Beale.

TRISTAN DA CUNHA

Tristan da Cunha is the chief of a group of islands of volcanic origin lying in lat. $37^{\circ} 6' S.$ and long. $12^{\circ} 2' W.$, discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 40 sq. miles (104 sq. km.).

Population (1988) 311. The main island, with a peak rising to 6,760 ft., is about 1,500 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817, William Glass, a corporal of artillery (*died* 1853), remaining at his own request, with his wife and two children. This party, with five others, formed a settlement. In 1827 five women from St. Helena, and afterwards others from Cape Colony, joined the party.

The islands form a dependency of St. Helena, being administered by the Foreign and Commonwealth Office through a resident Administrator, with headquarters at the settlement of Edinburgh. Under a new constitution introduced in 1969, he is advised by an elected Island Council of 8 members of whom one must be a woman, and three appointed members, with universal suffrage at 18. The population numbered 294 persons in 1986, plus five expatriate Government officers and their families, and a resident chaplain.

In October, 1961, a volcano, believed to have been extinct for thousands of years, erupted and the danger of further volcanic activity led to the evacuation of inhabitants to the United Kingdom. An advance party returned to Tristan da Cunha in the spring of 1963, and subsequently the main body of the islanders returned to the island.

A boat harbour was completed in 1967. The first freezing factory was re-established in 1966. There are no taxes on Tristan, income being derived from royalties paid by the fishing company and from the sale of stamps and handicrafts. The Camogli Hospital was opened early in 1971 and a new school in 1975.

Capital.—Edinburgh.

Administrator, R. Perry.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937, but has been abandoned.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{2}$ mile wide, and rises in two peaks, 960 and 1,105 ft. above sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in $40^{\circ} 20' S.$ and $9^{\circ} 44' W.$, lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

SOUTH GEORGIA AND THE SOUTH SANDWICH ISLANDS

South Georgia is an island 800 miles east-south-east of the Falkland group, with an area of 1,450 sq. miles. The population comprises an army unit at King Edward Point, and staff of the British Antarctic Survey at Bird Island, in the north-west of S. Georgia.

The South Sandwich Islands lie some 470 miles S.E. of South Georgia. The group is a chain of uninhab-

bited, actively volcanic islands about 150 miles long, with a wholly Antarctic climate.

The present constitution came into effect on Oct. 3, 1985. It provides for a Commissioner who, for the time being, shall be the officer administering the Government of the Falkland Islands.

Commissioner for South Georgia and the South Sandwich Islands, William Hugh Fullerton, C.M.G. (1988).

TURKS AND CAICOS ISLANDS

The Turks and Caicos Islands are situated between 21° and 22° N. latitude and 71° and 72° W. longitude, about 100 miles north of the Dominican Republic and 50 miles south-east of the Bahamas of which they are geographically an extension. There are over 30 islands of which eight are inhabited covering an estimated area of 166 sq. miles (430 sq. km.). The principal is Grand Turk. The population in 1988 was estimated to be 14,000 (Grand Turk 3,146).

The Islands lie in the Trade Wind but with an excellent climate. The average temperature varies from 24°–27° C. in the winter and 29°–32° C. in the summer and humidity is generally low. Average rainfall is 21 inches per annum.

GOVERNMENT

A new Constitution was introduced in 1988, providing for an enlarged Executive Council and Legislative Council. The Executive Council is presided over by the Governor and comprises the Chief Minister and four elected Ministers, together with the Chief Secretary, the Attorney General and the Financial Secretary ex-officio.

At the General Election of March 3, 1988, the People's Democratic Movement won 11 seats and the

People's National Party 2 seats in the Legislative Council.

Governor, His Excellency Michael John Bradley, Q.C. (1987).

Executive Council (as at May 31, 1989)

President, The Governor.

Chief Secretary, Hon. A. N. Hoole.

Attorney-General, Hon. I. S. Lamb.

Financial Secretary, Hon. A. Robinson, M.B.E.

Members, Hon. O. O. Skippings (*Chief Minister*); Hon. L. N. A. Handfield; Hon. W. L. Swann; Hon. S. I. Harvey; Hon. D. H. Taylor.

The principal airports are on the islands of Grand Turk, Providenciales and South Caicos. There are direct shipping services to the U.S.A. (Miami). There is an air service between Miami, Providenciales and Grand Turk, and between South Caicos and the Bahamas. An internal air service provides a twice daily service between the principal islands. A comprehensive telephone and telex service is provided by Cable and Wireless (W.I.) Ltd.

The most important industries are fishing, tourism and offshore finance.

Afghanistan lies to the N. and W. of Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles (647,497 sq. km.), and the population 18,136,000 (1985 U.N. estimate), although it is estimated that over four million have become refugees in Pakistan and over one million in Iran since the Soviet invasion. The population is very mixed. The most numerous race is the Pashtoons who predominate in the South and West, the Tadjiks, ■ Persian-speaking people mainly cultivators and small traders, Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and Nuristanis, who live near the Chitral border. All are Sunni Muslims, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Iran, on the S. by Pakistan, on the N. by the U.S.S.R., and on the E. by Pakistan and China.

Mountains, chief among which are the Hindu Kush, cover three-quarters of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Government.—The constitutional monarchy, introduced by the 1964 Constitution, was overthrown by a coup on July 17, 1973. The country was ruled by Presidential decree until February 1977 when a constitution was approved by ■ Loya Jirgah (Grand Assembly). Mohammad Daoud was elected President of the Republic but was overthrown on April 27, 1978, by the Armed Forces and power handed to the People's Democratic Party of Afghanistan (PDPA). In December 1979 Soviet troops invaded Afghanistan and installed Babrak Karmal as Secretary General of the PDPA, President of the Revolutionary Council and Head of State. Karmal was replaced as Secretary General of the PDPA by Najibullah in May 1986. A peace agreement in April 1988 led to the withdrawal of Soviet troops which was completed by February 1989. A new Constitution, approved in Nov. 1987, provides for ■ President, ■ Council of Ministers, ■ National Assembly and ■ Senate.

President Najibullah declared a State of Emergency on Feb. 19, 1989. The Supreme Council for the Defence of the Homeland was established to take control of the country's affairs during the State of Emergency.

Seghbullah Mujaddedi was elected President of an interim government-in-exile on Feb. 23, 1989.

Afghanistan is divided into 30 provinces each under a centrally appointed governor.

Judiciary.—The Constitution introduced in 1965 provided for the creation of ■ legal code, and for a new structure of courts, consisting of a lower court in each woleswali (sub province), and ■ court of appeal in each province, with ■ Supreme Court in Kabul. The complete separation of executive and judiciary in this constitution was abolished by Presidential Decree in July, 1973. In late 1976 and early 1977 new Penal and Civil Codes were published. The new Constitution leaves the judicial system largely untouched.

Defence.—The Army, which numbered about 80,000 before the Soviet invasion, has been greatly depleted by desertions. Men between the ages of 18 and 40 are liable to four years' military service. A military

academy and military colleges are located in Kabul; some regular officers ■■■ trained in the U.S.S.R. A small Air Force is maintained. All military and air force equipment is now of Russian pattern.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and dal. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakuli, and transport animals are bred. Silk, woollen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome, barite, uranium, and talc are found.

Main roads run from Kabul to Kandahar, Herat, Maimana via Mazari-Sharif and Faizabad via Khanabad. The road from Kabul to the North was shortened by the completion in 1964 of the Salang pass. Roads cross the border with Pakistan at Chaman and via the Khyber Pass, and there are roads from Herat to the Russian and Iranian borders. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

In 1982 the Afghan and Soviet shores of the River Oxus were linked by ■ road and rail bridge which joins the Afghan port of Hairatan and the Soviet port of Termez. A network of internal air services operates between the main towns.

Language and Literature.—The principal languages of the country are Dari (a form of Persian) and Pushtu, although a number of minority languages are also spoken in various provinces. All schoolchildren learn both Persian and Pushtu. Education is free and nominally compulsory, elementary schools having been established in most centres; there are secondary schools in large urban areas and two universities, one in Kabul (established 1932) and one in Jalalabad (established early 1970's).

Trade.—Exports are mainly Persian lambskins (Karakul), dried fruits, nuts, cotton, raw wool, carpets, spice and natural gas, while the imports are chiefly oil, cotton yarn and piece goods, tea, sugar, machinery and transport equipment.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 11,099 sq. miles (28,748 sq. km.), with a population (1988 estimate) of 3,410,000.

Albania was under Turkish suzerainty from 1468 until 1912, when independence was declared. After a period of unrest, ■ republic was declared in 1925, and in 1928 a monarchy. The King went into exile in 1939 when the country was occupied by the Italians. Albania was liberated in Nov. 1944. Elections in Dec. 1945 resulted in a Communist-controlled Assembly: the King was deposed in absentia and a republic declared in Jan. 1946. United Kingdom diplomatic relations with Albania ceased due to the invasion in 1939 and although U.K. recognized the provisional government of Enver Hoxha in 1945, relations were broken off in 1946 after ■ mine sunk a British warship in Albanian waters. They have so far not been restored.

Much of the country is mountainous and nearly a half is covered by forest. There are fertile areas along the Adriatic coast and the Koritzë Basin and there have been land reclamation and irrigation programmes. The main crops are wheat, maize, sugar-beet, potatoes and fruit.

All industry is nationalized. The principal industries are agricultural product processing, textiles, oil products and cement. Output is small at present but the chemical and engineering industries are being built up and the country's considerable mineral resources are being increasingly exploited.

Exports include crude oil, minerals (bitumen, chrome, nickel, copper), tobacco, fruit and vegetables.

ALGERIAN EMBASSY
54 Holland Park, W11 3RS
[01-221 7800]*Ambassador Extraordinary and Plenipotentiary, His Excellency Hadj Benabdellah Azzout (1988).*

Algeria lies between 8° 45' W. to 12° E. longitude 27° 6' N. to a southern limit about 19° N. Area, 919,595 sq. miles (U.N. estimate). The population (1987 Census) totals 22,971,558.

Government.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. The Southern Territories of the Sahara, formerly a separate colony, became an integral part of Algeria on the attainment of independence. An armed rebellion led by the Muslim *Front de Libération Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. French control of Algeria came to an end when President de Gaulle declared Algeria independent on July 3, 1962; by October 1963, all agricultural land held by foreigners had been expropriated and by 1965 more than 80 per cent of the French population had left Algeria.

Ben Bella was elected President of the Republic in Sept., 1963, but was deposed and a Council of the Revolution presided over by Col. Boumedienne assumed power on June 19, 1965. A new constitution

was established by referendum on Nov. 19, 1976, and on Dec. 10, 1976 President Boumedienne was elected for a six-year term of office. Elections for a national popular assembly were held in Feb. 1977. Following President Boumedienne's death in December 1978, M. Chadli Bendjedid was elected President in February 1979. A new Constitution was agreed by referendum in Feb. 1989 which moves Algeria away from a one-party socialist system to a more pluralist political system.

Development in Algeria is regulated by a series of national development plans. The 1970-73 Plan placed emphasis on industrial development, and the 1974-77 Plan on infrastructure development and social services. The 1980-84 Plan concentrated on housing, water supply and agriculture. The 1985-89 Plan continues with these objectives and also includes food and processing industries. Agrarian reform started in 1987. The 4,000 state farms have been broken up into 23,000 units. Following riots in October 1988, economic reform was speeded up and now endorses the industrial and financial sectors. The aim is to decentralize planning and devolve management. The private sector is also receiving official encouragement.

Algeria's main industry is the hydrocarbons industry. Oil and natural gas are pumped from the Sahara to terminals on the coast before being exported; the gas is first liquefied at liquefaction plants at Skikda and Arzew, although pipelines serve Libya and Italy direct.

Other major industries being developed include a steel industry, motor vehicles, building materials, paper making, chemical products and metal manufactures. Most major industrial enterprises are still under State control.

Imports from U.K.	£73,115,000	£86,615,000
Exports to U.K.	172,927,000	159,748,000

Algeria's main exports are crude oil and liquefied natural gas. Principal imports from the United Kingdom are capital plant, equipment for industrial use and foodstuffs.

Algeria has rapidly expanding network of roads and railways. Considerable sums are also being spent on the development of the State airline, the national shipping company and telecommunications.

A small, neutral principality (formed by a treaty in 1278), situated on the southern slopes of the Pyrenees between Spain and France, with an approximate area of 175 sq. miles (453 sq. km.), and population of about 40,000, less than one fifth of whom are native Andorrans. It is surrounded by mountains of 6,500 to 10,000 feet. Andorra is divided into seven Parishes, each of which has four Councillors elected by vote to the Valleys of Andorra Council of twenty-eight. The Council appoints the head of the executive government, who designates the members of his government. Constitutionally, the sovereignty of Andorra is vested in two "Co-Princes", the President of the French Republic and the Spanish Bishop of Urgel. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. They are represented by Permanent Delegates of whom one is the French Prefect of the Pyrenees Orientales Department at Perpignan and the other is the Spanish Vicar-General of the Diocese of Urgel. They are in turn represented in Andorra la Vella by two resident "Viguers" known as the Viguier Français and the Viguier Episcopal, who have ■ joint responsibility for law and order and overall administration policy, together with judicial powers as members of the Supreme Court.

The language of the country is Catalan, but French and Spanish (Castilian) are also spoken. Spanish pesetas and French francs are the accepted currency and the Budget is expressed in pesetas. The estimated national revenue (1988) was US\$754 million, with ■ per capita income of \$15,403. The climate is cold for six months, but mild in spring and summer. Potatoes are produced in the highlands and tobacco in the valleys. The mountain slopes have been developed for skiing, and it is estimated that 10,000,000 tourists visit the Valleys during the year. The economy is largely based on tourism, commerce, tobacco, construction and forestry; a third of the country is classified as forest in which pine, fir, oak, birch and box-tree predominate. Andorra is negotiating a commercial agreement with the European Commu-

nity which will regulate future trade with and through neighbouring countries.

A good road into the Valleys from Spain is open all year round, and that from France is closed only occasionally in winter. An airport at Seo d'Urgell just outside Andorra provides very limited air connections. There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

EMBASSY OF THE PEOPLE'S REPUBLIC OF ANGOLA 87 Jermyn Street, SW1. [01-839 5743]

Ambassador Extraordinary and Plenipotentiary, His Excellency Luis Antonio Neto Kiambata (1989).

Angola, which has an area of 481,354 sq. miles (1,246,700 sq. km.), lies on the western coast of Africa; its population in 1985 was estimated at 8,754,000.

After a Portuguese presence of at least four centuries, and an anti-colonial war since 1961, Angola became independent on Nov. 11, 1975 in the midst of civil war. Soviet-Cuban military assistance to the Popular Movement for the Liberation of Angola (M.P.L.A.) enabled it to defeat its rivals early in 1976. However, the M.P.L.A. government remains under pressure from the U.N.I.T.A. guerrilla movement (led by Dr. Jonas Savimbi) which now controls up to one-third of the country and operates freely in another third. On Aug. 8, 1988 it was announced that ■ ceasefire between South African, Cuban and Angolan forces had taken place pending talks on withdrawal

from Angola. The ceasefire agreement was signed, and came into effect, on Aug. 22. In Dec. 1988 an agreement providing for the withdrawal of the 50,000 Cuban troops by July 1991, was signed in Cuba.

The M.P.L.A., a Marxist-Leninist party, is the sole legal party. The Constitution provides for a President, who appoints a Council of Ministers to assist him, and a National People's Assembly.

Angola has valuable oil and diamond deposits and exports of these two commodities account for over 90 per cent of total exports.

Principal agricultural crops are cassava, maize, bananas, coffee, palm oil and kernels, cotton and sisal. Coffee, sisal, maize and palm oil are exported: exports also include mahogany and other hardwoods from the tropical rain forests in the north of the country.

EMBASSY IN LONDON

The Embassy closed after the Argentine invasion of the Falkland Islands. Argentine interests in Great Britain are currently handled by the Brazilian Embassy.

Argentina occupies the greater portion of the southern part of the South American Continent, and extends from Bolivia to Cape Horn, ■ total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries: on the east are the great plains.

The Republic consists of 22 provinces, one territory

(Tierra del Fuego) and one federal district (Buenos Aires), comprising in all an area of 1,068,302 sq. miles (2,766,889 sq. km.), with ■ population of 30,564,000 (1985, U.N. estimate).

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later re-founded by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán.

In 1946 Juan Domingo Perón became President until overthrown in 1955. There followed eighteen years of political and economic instability, and eventually in 1973, Perón was recalled from exile. Elected President he died within a year and was succeeded by his widow, Vice President María Estela Martínez de Perón. However, warring factions in the Peronist movement and increasing terrorist activity eventually led to a coup by the armed forces on March 24, 1976. A Junta, consisting of the three commanders of the Armed Forces, was established with one of their number as President. Following the Falkland Islands defeat in 1982 the President, Gen. Galtieri, resigned and the Army appointed Gen. Bignone as President. The Navy and Air Force withdrew from the Junta but this was reconstituted shortly afterwards. Elections for a civilian government to replace the military one were held on October 30, 1983 and the Radical Party's candidate, Raúl Alfonsín, was elected President. Presidential elections in May 1989 were won by the Peronist candidate Carlos Menem.

Agriculture.—Of a total land area of approximately 700 million acres, farms occupy about 425 million. About 60 per cent. of the farmland is pasture, 10 per cent. annual crops, 5 per cent. permanent crops and the remaining 25 per cent. forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar, fruit and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, and pastoral and agricultural products provide about 85 per cent. of Argentina's exports.

Mineral Production.—Oil is found in various parts of the Republic and the production of oil is of first importance to her industries and, to some extent, to her economic and financial development. Total petroleum output for 1986 was 450,000 b.p.d. There is a refinery in San Lorenzo (Santa Fé province). Natural gas is also produced in a number of provinces.

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold, silver and tin. Coal production in 1984 was 500,000 tonnes; this is produced at the Rio Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural resources, especially copper for which the Government and private companies are carrying out exploration.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years progress has been made by the textile, plastic and machine tool industries and engineering, especially in the production of motor vehicles and steel manufactures.

Communications.—There are 25,386 miles of railways, which are State property. Plans are in hand for complete re-organization of the railways in order

to improve their operating efficiency and reduce a very large financial deficit. The combined national and provincial road network totals approximately 137,000 miles of which 23,180 miles are surfaced. There are air services between Argentina and all the neighbouring republics, Europe, Asia, Canada, the U.S.A. and South Africa. Total tonnage entering Argentine ports in 1979 was 13,879,391.

Defence.—The Army consists of four corps organized into 12 brigades, including mountain, jungle, airborne and armoured troops. It numbers about 47,000, consisting of 20,000 officers and N.C.O.s and 27,000 conscripts who serve for between 6 months and 1 year.

The Navy consists of 1 aircraft carrier, 6 destroyers, 6 corvettes, 4 submarines, 6 minesweepers and ancillary craft. Strength is about 27,000, consisting of 19,500 officers and N.C.O.s and 7,500 conscripts.

The Air Force consists of 9 brigades and a training force, with a strength of 12,000, consisting of 6,900 officers and N.C.O.s and 5,100 conscripts.

Education.—Education is compulsory for the 7 grades of primary school (6 to 13). Secondary schools (14 to 17+) are available in and around Buenos Aires and in most of the important towns in the interior of the country. Most secondary schools are administered by the Central Ministry of Education in Buenos Aires, while primary schools are administered by the Central Ministry or by Provincial Ministries of Education. Private schools, of which there are many, are also loosely controlled by the Central Ministry. Teacher training now takes place at post school level, courses lasting from 2 to 5 years. Many new universities have been created in recent years. The total is now over 50 with 24 national, 25 private and a small number of provincial universities.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little

indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century. About 450 daily newspapers are published in Argentina, including 7 major ones in the city of Buenos Aires. The English language newspaper is the *Buenos Aires Herald* (daily). There are several other foreign language newspapers.

AUSTRIAN EMBASSY

18 Belgrave Mews West, SW1X 8HU

[01-235 3731]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Walter F. Magrutsch (1987).

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by the Federal Republic of Germany and on the west by Switzerland and Liechtenstein. Its area is 32,374 sq. miles (83,849, sq. km.), and its population is 7,557,000 (1987, estimate).

Government.—The Republic of Austria comprises nine provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1918 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the *Deutsches Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Republic of Austria was reconstituted within the frontiers of 1937 and a freely-elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938.

There is a national assembly of 183 Deputies. After the elections of Nov. 1986, the Socialists formed a coalition with the People's Party.

The state of the parties in the Nationalrat (Lower House) in Nov. 1986, was:

Socialist Party (Social Democrat)	80
People's Party (Conservative)	77
Freedom Party (Liberal)	18
Green Party	8

In the Bundesrat (Upper House) in March 1988 the People's Party held 32 seats, the Socialist Party 30 and the Liberal Party 1 seat.

Religion and Education.—The predominant religion is Roman Catholic. Education is free and compulsory between the ages of 6 and 15 and there are good facilities for secondary, technical and professional education. There are 12 state-maintained Universities and six colleges of art.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free.

Communications.—Internal communications in Austria are partly restricted because of the mountainous nature of the country, although there has been an extensive programme to increase the number of motorways, many of which are tunnelled through the mountains. There were, in 1985, 37,501 km. of roads, including a network of *autobahn* between major cities which also links up with the West German and Italian networks. The railways in Austria are state-owned and in 1985 had 5,766 km. of track, over half of which is electrified. Of the 425 km. of waterways, 355 km. are navigable and there is considerable trade through the Danube ports by both local and foreign shipping. There are six commercial airports catering for 4,872,922 passengers in 1985.

Tourism.—In 1986, 15,092,200 tourists visited Austria. Foreign exchange receipts from tourism were 101,555 million Schilling—a major contribution to the balance of payments.

PRODUCTION AND INDUSTRY

The origin of Gross Domestic Product in 1986 was as follows (in per cent.):

Agriculture and forestry	4.7
Mining and material goods production	30.8

Energy and water supply	3.2
Construction	6.3
Commerce, hotels, restaurants	16.4
Transport and communications	6.4
Asset management	12.6
Other services and producers	16.7
Import duties and other items	2.9

The value of G.D.P. in 1986 (at current prices) was Schilling 1,441,100 million: G.D.P. per capita (at current prices) was Schilling 190,627.

Agriculture.—The arable land produces wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth, about 40.7 per cent. of the total land area consisting of forest areas. Coniferous species predominate (75 per cent. of afforested area).

Energy.—Energy production in 1986 was:

Crude oil	
—production	1,116,000 tonnes
—imports	6,188,000
(from Libya	2,113,202 "
(from Algeria	888,647 "
Natural gas	
—production	1,112 m. cu. metres
—imports	4,055 m. cu. metres
(from U.S.S.R.	3,956 m. cu. metres
Electric power	
—output	44,652 m. kWh.
—imports	5,962 m. kWh.
—exports	7,426 m. kWh.

A 700 mw nuclear power station had already been constructed when in November 1978 the Austrian people decided by a very small margin in a national referendum not to allow the introduction of nuclear power stations in Austria.

Mining.—Production was (tonnes):—

	1985	1986
Lignite	3,081,071	2,968,978
Iron/manganese ore	3,270,000	3,120,000

Lead/zinc ore	643,255	400,246
Crystal salt	437,584	485,513
Graphite	30,764	36,167

In addition 2,306,706 cu. metres of brine was produced in 1985 and 2,335,067 cu. metres in 1986.

Industry.—Heavy industry production in 1986 included pig iron 3,348,600 tonnes, raw steel 4,291,895 tonnes and rolled steel 3,461,545 tonnes. In addition, petroleum, non-ferrous metals and chemicals are processed in quantity and construction materials, industrial machinery, vehicles, paper and textiles are produced.

EMBASSY OF THE STATE OF BAHRAIN

98 Gloucester Road, SW7 4AU

[01-370 5132]

Ambassador Extraordinary and Plenipotentiary, His Excellency Salman Abdul Wahab Al Sabbagh (1984).

Area and Population.—Bahrain consists of ■ group of low-lying islands situated about half-way down the Gulf, some 20 miles off the east coast of Arabia. The largest of these, Bahrain island itself, is about 30 miles long and 10 miles wide at its broadest. The capital, Manama, is situated on the north shore of this island. The next largest, Muharraq, with the town and Bahrain International Airport, is connected to Manama by ■ causeway 1½ miles long.

The population (1987 estimate) is 457,600, of whom 154,800 are foreign. About 35 per cent. of the Bahrainis are Sunni Muslims, the remaining 65 per cent. being Shias; the ruling family and many of the most prominent merchants are Sunnis.

Climate.—The climate is humid all the year round, with rainfall of about 3 in. concentrated in the mild winter months, December to March; in summer, May to October, temperatures can exceed 110°F. (44°C).

Government.—Bahrain has been a fully independent state since 1971. Government takes the form of a constitutional monarchy, in which traditional consultative procedures continue to play an important role.

Economy.—The largest sources of revenue are oil production and refining. The Bahrain field, discovered in 1932, is wholly owned by the Bahrain National Oil Co. Production in 1988 stood at about 42,000 b.p.d. The Sitra refinery derives about 70 per cent. of its crude oil by submarine pipeline from Saudi Arabia. Bahrain also has ■ half share with Saudi Arabia in the profits of the offshore Abu Sa'afa field. A reservoir of unassociated gas has recently been developed on Bahrain island.

Heavy industry is currently limited to the Aluminium Bahrain (ALBA) smelter, producing 170,000 tonnes p.a.; the Gulf Petrochemical Industries Co. (GPIC) producing 375,000 tonnes p.a. of ammonia and 395,000 tonnes p.a. of methanol in 1988, the Gulf Aluminium Rolling Mill (GARMCO), and the Arab Shipbuilding and Repair Yard (ASRY), operating dry dock facilities up to 500,000 tons.

There are a number of small to medium sized industrial units.

The state has developed as a financial centre. Apart from commercial banks, led by the National Bank of Bahrain, the Standard Chartered Bank, the British Bank of the Middle East and the Bank of Bahrain and Kuwait, many international banks have been licensed as "offshore banking units"; there are also money brokers and merchant banks.

Trade with U.K.

	1987	1988
Imports from U.K.	£125,189,000	£138,150,000
Exports to U.K.	60,687,000	75,786,000

Communications.—Bahrain International airport is the main air traffic centre of the Gulf; it is the headquarters of Gulf Air, and a stopping point on routes between Europe and Australia and the Far East for other airlines. A causeway linking Bahrain to Saudi Arabia was opened in Nov. 1986.

A world-wide telephone and telex service, by satellite and cable, is operated by Bahrain Telecommunications Company.

CAPITAL.—Manama; population (1981 Census), 121,986.

CURRENCY.—Bahrain dinar (BD) of 1,000 fils.

FLAG.—Red, with vertical serrated white bar next to staff.

Ambassador Extraordinary and Plenipotentiary, His Excellency Jean-Paul van Bellinghen (1984).

Minister Plenipotentiary, L. Willems.

Minister Counsellor, R. Vandemeulebroucke (Economic).

Military, Naval and Air Attaché, Capt. G. H. A. Busard.

A Kingdom of Western Europe, with ■ total area of 11,781 sq. miles (30,513 sq. km.), and ■ population, (1986) of 9,858,895 (Greater Brussels, 976,536; Flanders, 5,676,194; Wallonia, 3,206,165, of whom 66,445 are German-speaking). The majority of Belgians are Roman Catholics. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by the Federal Republic of Germany and Luxembourg, and on the W. by the North Sea.

Belgium has a frontier of 898 miles, and ■ seaboard of 41 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The polders near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Signal de Botrange, rises to ■ height of 2,276 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse.

Government.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its

independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the Treaty of London (April 19, 1839), the famous 'Scrap of Paper,' signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 4, 1914, the Germans invaded Belgium, in violation of the terms of the treaty. The kingdom was again invaded by Germany on May 10, 1940. The whole kingdom eventually fell and was occupied by Nazi troops until liberated by the Allies in September 1944.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Deputies. The parliamentary term is four years.

The last general election was held on December 13, 1987. The results were as follows (seats):

Chamber of Deputies: CVP, 43; PS, 40; SP, 32; PVV (Flemish Freedom and Progress Party), 25; PRL (Liberal Reform Party (Francophone)), 23; PSC, 18; VU, 16; Agalev (Flemish Environmental Party), 6; Ecolo (Francophone Ecology Party), 3; FDF (Francophone Democratic Front), 3; Vlaams Blok (Flemish Nationalist Party), 2.

Senate: (as at Dec. 1987), CVP, 22; PS, 20; SP, 17; PRL, 12; PVV, 11; PSC, 9; VU, 8; Ecologists, 5; FDF, 1; Vlaams Blok, 1. Besides these directly elected representatives the Senate also includes 51 members who are elected by the Provincial Councils and 26 who are co-opted in the proportions of the directly elected seats. H.R.H. Prince Albert is a "sénateur de droit".

Regional Governments.—The 1980 regionalization law made provision for the establishment of three Regional Community Parliaments (Assemblies) with executive councils which were set up in November 1981 and became effective in January 1982. The executives are autonomous from the central government, and their members are elected by the members of the Assemblies to whom they are responsible. They prepare Bills within the limits of their regional/community competences, and once these Bills have been passed by the regional assembly and published in the *Moniteur Belge*, they have the force of law.

The Flemish Community Assembly (186 members) and Executive (a President and 11 Regional Ministers) covers the provinces of Antwerp, East and West Flanders, Limbourg and the Flemish *arrondissements* (Halle, Vilvoorde, Leuven) in the province of Brabant, and is also responsible for the Flemish population of Brussels. The Walloon Regional Assembly (104 members) and Executive (a President and 6 Regional Ministers) covers the provinces of Hainaut, Liège, Luxembourg and Namur, and the *arrondissement* of Nivelles in the province of Brabant. The French Community Assembly (132 members) and Executive (a President and 3 Community Ministers) has no fixed territory but is responsible for the francophone population of Brussels and, in concert with the Walloon Regional Assembly, deals with certain Walloon regional affairs. The German-speaking community (about 66,000) also has an Assembly, which gained autonomy in 1984. It is based in Eupen.

Since June 1989 there has been a 75-member Brussels Regional Council with 5-member Executive: 2 Flemings, 2 Francophones and 1 President.

An Arbitration Court was set up in 1984 to resolve conflicts between laws made by the various legislative bodies.

Language and Literature.—Belgium is divided between those who speak Dutch (the Flemings) and those who speak French (the Walloons). Dutch is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half

of Brabant, and French in the provinces of Hainault, Namur, Luxembourg, Liège and the southern half of Brabant. Dutch is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. Brussels is officially bilingual. There is a small German-speaking area (Eupen and Malmedy) along the German border, east of Liège.

The literature of France and the Netherlands is supplemented by an indigenous Belgian literary activity, in both French and Dutch. Maurice Maeterlinck (1862–1949) was awarded the Nobel Prize for Literature in 1911. Emile Verhaeren (1855–1916) was a poet of international standing. Of contemporary Belgian writers, perhaps the most celebrated was Georges Simenon (1903–89). There are 39 daily newspapers in Belgium (23 in French, 15 in Dutch and 1 in German).

Education.—The nursery schools provide free education for the 2½ to 6 age group. There are over 8,000 primary schools (6 to 12 years) of which approximately 5,000 are administered by the State, province or commune and the remainder are free institutions (predominantly Roman Catholic). There are more than 1,100 secondary schools offering a general academic education slightly over half of which are free institutions (predominantly Roman Catholic but subsidized by the State) and the remainder official institutions. The official school leaving age is 18.

Production.—Belgium is a manufacturing country. With no natural resources except coal, annual production of which was approximately 6 million tonnes in 1986, industry is based largely on the processing for re-export of imported raw materials. Gross National Product per capita in 1986 was B.Fr. 439,992. Principal industries are steel and metal products, chemicals and petrochemicals, textiles, glass, and foodstuffs.

Communications.—In 1983, there were 3,920 kilometres of normal gauge railways operated by the Belgian National Railways, of which 1,763 kilometres were electrified. The Belgian National Light Railways (SNCV) also operated 27,671 kilometres of regular bus routes. In 1984 there were 2,930,000 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands) which permits the passage to Ghent of ships up to 60,000 tons; the Canal of *Willebroek-Rupel-Brussels* (20 miles, by which ships drawing 18 ft reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6½ miles). The *Albert Canal* (79 miles), links Liège with Antwerp; it was completed in 1939 and accommodates barges up

to 1,350 tons. The modernization of the port of Antwerp is well advanced. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheldt from Antwerp to Ghent and the Brussels-Charleroi Canal are being widened or deepened to take barges up to 1,350 tons. Most of the maritime trade of Belgium is carried in foreign shipping.

In 1986 there were 14,260 km. of trunk roads of which about 1,550 km. are motorways.

The Belgian National Airline Sabena operates regular services between Brussels and London, and many continental centres, as well as overseas services to Northern and Central America, Africa, Middle East, Far East, etc. Many foreign airlines call at Brussels.

CAPITAL.—Brussels, has a population (1986) of 976,536. Other towns are Antwerp, the chief port (918,963); Ghent (484,295); Liège (592,732); Charleroi (430,767); Bruges (258,917); Ostend (134,215); Malines (293,050).

A republic situated in West Africa, between 2° and 3° W. and 6° and 12° N., Benin (formerly known as Dahomey) has a short coastline of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by Burkina and Niger and on the east by Nigeria. It has an area of 43,484 sq. miles (122,622 sq. km.), and a population of 4,444,000 (1988 estimate). Although poor in resources, Benin is one of the most heavily populated areas in West Africa, with a high standard of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of inter-communicating lagoons, a clay belt and a sandy plateau in the north.

Government.—The first treaty with France was signed by one of the kings of Abomey in 1851 but the country was not placed under French administration until 1892. Benin became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. In October, 1963, a popular revolution led to the fall of the government and the Army held power until a civilian government was formed. The government's life was very short, however, and in the subsequent 8–9 years successive governments were overthrown by the military after only a short term in office until a coup d'état of October 26, 1972 brought to power a Military Revolutionary Government, headed by Lt.-Col. Kerekou. Although now a one-party state, a general election was held in Nov. 1979, and a new Constitution and National Assembly were established.

Benin is a member of the Conseil de l'Entente, the Organisation Commune Africaine et Malgache (OCAM), the Organization of African Unity (O.A.U.) and the Economic Community of West African States (ECOWAS). The official language is French.

Trade.—The principal exports are cotton, palm products, ground nuts, shea-nuts, and coffee. Small deposits of gold, iron and chrome have been found; oil production started in 1983.

Bhutan is a small Himalayan Kingdom situated between Tibet (to the north) and India (to the west, south and east). The total area is about 18,147 sq. miles (47,000 sq. km.), with a mountainous northern region which is infertile and sparsely populated, a central zone of upland valleys where most of the population and cultivated land is found, and in the south the densely forested foothills of the Himalayas, which are mainly inhabited by Nepalese settlers and indigenous tribespeople.

The population of Bhutan is estimated at 1,417,000 (1985, U.N. estimate), about three-quarters of whom are Buddhists. The remainder (mostly the Nepali Bhutanese) are Hindu. The official language, for administrative and religious purposes, is Dzongkha, a variant of Tibetan, which functions as a lingua franca amongst a variety of languages and dialects. It is government policy to make the study of Dzongkha compulsory in schools, although English is the medium of instruction and has become widely used within the administration.

In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains independence, issues its own passports, has its own diplomatic representatives and is a member of the U.N. and other international and regional organizations. It also receives from the Government of India an annual payment of Rs.500,000 as compensation for portions of its territory annexed by the British Government in India in 1864.

Government.—Bhutan has a 150-member National Assembly which meets twice a year. The ten-member Royal Advisory Council, nominated by the King and the National Assembly, acts as a consultative body when the National Assembly is not in session. The King is also assisted by a Council of Ministers.

Economy.—The sixth 5-year Plan (1987–92) has a projected expenditure of Nu 9,485m. Economic emphasis is on the infrastructure, especially roads and telecommunications. The economy is based on agriculture and animal husbandry, which engage over 90 per cent of the workforce in what is largely a self-sufficient rural society. The principal food crops are rice, wheat, maize and barley. Vegetables and fruit are also produced. Bhutan is the world's largest producer of cardamom, which forms its principal export to countries other than India. Mineral resources include dolomite and small amounts of coal, which are exported to India. A modest industrial base is being developed. A distillery and cement, chemicals and food processing plants are in production: a forestry industries complex is being expanded. Tourism and postage stamps are increasingly important sources of foreign exchange. Over 90 per cent of foreign trade is with India. Principal exports are

agricultural products, timber, cement and coal; main imports are textiles, cereals and consumer goods. Bhutan's airline, Druk Air, flies between Paro and Calcutta.

Trade with U.K.

First Secretary, Srta. Marta Bosacoma Bonel.

The land-locked Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W. It has an area estimated at 424,165 sq. miles (1,098,581 sq. km.), with a population (1985 U.N. estimate) of 6,429,000. The Republic derives its name from its liberator, Simon Bolívar (1783–1830).

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenez, Beni, Mamore and Madre de Dios.

Language and Literature.—The official language of the country is Spanish, but many of the Indian inhabitants (about two-thirds of the population) speak Quechua or Aymará, the two linguistic groups being more or less equal in numbers.

The Roman Catholic religion was disestablished in 1961 but relations between it and the State are good. Elementary education is compulsory and free and

there are secondary schools in urban centres. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are six other universities, the largest being the University of San Andres at La Paz. There are nine principal daily newspapers in Bolivia.

Production.—Mining, natural gas, petroleum and agriculture are the principal industries. The ancient silver mines of Potosí are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is one of the largest in the world, and together with other minerals (copper, antimony, lead, zinc, asbestos, wolfram, bismuth salt and sulphur), provides over half of Bolivia's exports.

In 1982 Bolivia produced 1·4 million cubic metres of oil, sufficient for internal consumption. Gas (currently providing about a quarter of Bolivia's export income) is piped to Argentina and there are plans to build a pipeline to São Paulo, Brazil. Bolivia's agricultural produce consists chiefly of rice, barley, oats, wheat, sugar-cane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, Brazil nuts etc.

Transport and Communications.—There are 2,200 miles of railways in operation including the lines from Corumbá to Santa Cruz (312 miles). There are about 10,950 miles of telegraphs, and microwave telephone communications between La Paz, Santa Cruz, Cochabamba, Oruro and Sucre. Most other towns of any size have radio/telephone communication with the main cities. There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days). Communication with Peru is by road from La Paz via Copacabana and thence to the railhead at Puno.

Commercial aviation in Bolivia is conducted by the national airline, Lloyd Aereo Boliviano and Transporte Aereo Militar between the major towns, and Lloyd Aereo Boliviano and a number of foreign airlines provide international flights to the U.S.A., South and Central America and Europe.

Bolivia is without a coastline, having been deprived of the ports of Tocopilla, Cobija, Mejillones and Antofagasta by the "Pacific War" of 1879–1884.

FINANCE

The economy has deteriorated since 1977, with disappointing petroleum reserves, a large external debt, and the collapse of world tin prices (Oct. 1985). Tin prices began to increase once more from April 1989. The peso was replaced in Jan. 1987 with the Boliviano of 1,000,000 old pesos in an effort to stem inflation. The inflation rate at the end of 1988 was about 20 per cent. Total exports (c.i.f.) in 1985 were U.S. \$672·5 million.

Trade with U.K.

	1987	1988
Imports from U.K.	£3,658,000	£6,029,000
Exports to U.K.	14,799,000	13,224,000

Mineral exports represent about 94 per cent of these totals. A large part of Bolivia's minerals were shipped to U.K. for smelting and re-export, but Bolivia is now developing her own smelters and will in future be exporting metals. The chief imports are wheat and flour, iron and steel products, machinery, vehicles and textiles.

CAPITAL.—La Paz (Population, 1,000,000). Other large centres are Cochabamba (250,000), Oruro (180,000), Santa Cruz (380,000), Potosí (90,000), Sucre, the legal capital and seat of the judiciary (80,000) and Tarija (45,000).

CURRENCY.—Boliviano (\$b) of 100 centavos.

FLAG.—Three horizontal bands; red, yellow, green.

NATIONAL ANTHEM.—"Bolivianos, El Hado Propicio" (Oh Bolivia, our long-felt desires).

NATIONAL DAY.—August 6 (Independence Day).

Ambassador Extraordinary and Plenipotentiary, His Excellency Senhor Celso de Souza e Silva (1986).

There are also a Brazilian Consulate-General in London and honorary consular offices at Cardiff and Glasgow.

Area and Population.—Brazil, discovered in 1500 by Portuguese navigator Pedro Alvares Cabral, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W. The Republic comprises

an area of 3,286,488 sq. miles (8,511,965 sq. km.), with a population (1985 U.N. estimate) of 135,564,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central states of Mato Grosso are principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar*, the *Serra da Mantiqueira* and the *Serra do Espinhaco* along the east coast. The River Amazon with a total length of some 4,000 miles has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingú* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaia* flow northwards from Mato Grosso and Goiás to the Gulf of Pará. The *Parnaíba* flows from Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and flows to the eastern coast. The *Paraguai*, rising in the south-west of Mato Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay.

Government.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822

became an independent empire under Dom Pedro, son of the refugee King Joao VI of Portugal. On Nov. 15, 1889, Dom Pedro II, second of the line, was dethroned and a republic was proclaimed.

The Federative Republic of Brazil is made up of the Federal District, 23 States and 3 Territories (the most under-developed frontier regions). By the end of 1989 there will be elections to a new state called Tocantins. The two territories of Amapá and Roraima are due to become states in 1990, and the territory of Fernando de Noronha is already a part of Pernambuco state.

The constitution of January 1967 draws on the same conceptual basis as that of the United States, and envisages an equal distribution of power between the executive, the legislature and the judiciary. Under the existing constitutional provisions the President, who heads the executive, is indirectly elected for a five-year term.

The Congress consists of a Senate (3 Senators per State elected for an 8-year term) and a Chamber of Deputies which is re-elected every 4 years. (The number of Deputies per State depends upon the State's population). Each State has a Governor, and a Legislative Assembly with a 4-year term.

The new Brazilian Constitution was promulgated after its approval by the Constituent Assembly on Oct. 5, 1988.

Production.—There are large and valuable mineral

deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is being exploited to an increasing extent. The iron ore deposits of Minas Gerais are exceeded by those of the Amazon region, principally in the Carajás areas where deposits are estimated at 35,000 million tonnes. Mining operations began in Feb. 1985.

Electric power production in 1987 was 202,287 Gwh. In the same year, the total output of steel was 22,227 million tonnes. Production of oil was 566,000 b.p.d. Of these 487,000 b.p.d. were produced from offshore fields.

Agriculture production was (tonnes):

	1986	1987
Black Beans	2,221,000	2,019,000
Cassava	25,542,000	23,399,000
Cocoa	459,000	337,000
Coffee	2,007,000	4,220,000
Cotton	2,314,000	1,672,000
Maize	20,510,000	26,787,000
Peanuts	216,000	196,000
Potatoes	1,834,000	2,343,000
Rice	10,399,000	10,422,000
Soya	13,335,000	16,814,000
Tobacco	386,000	398,000
Wheat	5,433,000	5,889,000

Defence.—The peace-time strength of the Army is 192,000. The Navy consists of 1 aircraft carrier, 7 submarines, 10 destroyers, 6 frigates, 9 patrol vessels, 5 river patrol ships, 1 river monitor, 1 river transport, 6 coastal mine sweepers, 7 survey ships, and 29 other vessels. The strength of the Navy is 49,000. The Air Force, with a strength of 45,000, has 680 aircraft, of which 151 are fast-jet.

Education.—Primary education is compulsory and is the responsibility of State governments and municipalities. At this level approximately 10 per cent attend private schools. Secondary education is largely the responsibility of State and municipal governments, although a small number of very old foundations (the Pedro II Schools) remain under direct federal control. Over 50 per cent. of all pupils at this level attend private schools. Higher education is available in Federal, State, municipal and private universities and faculties.

Language and Literature.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers.

Communications.—In 1983 there were 1,552,463 km. of highways. The route-length of railways in 1980 was 35,100 km. Internal air services are highly developed. There are 21,944 miles of navigable inland waterways. During 1982, 9,574 vessels entered Rio de Janeiro and Santos, the two leading ports.

Ambassador Extraordinary and Plenipotentiary, His Excellency Dimitar Zhulev (1987).

The Republic of Bulgaria is bounded on the north by Romania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is 42,823 sq. miles (110,912 sq. km.), with a population at the Dec. 1985 Census of 8,948,388. The largest religion of the Bulgarians is the Bulgarian Orthodox Church.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Romania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the Treaty of Neuilly, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28, 1944. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

On Sept. 9, 1944 a coup d'état gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. On Sept. 8, 1946, a referendum was held, which led to the abolition of the monarchy and the setting up of a Republic. On Oct. 27, 1946, a general election to a Grand National Assembly (with power to make ■

constitution) was held; the Opposition won 101 seats out of 465. The opposition Agrarian Party was suppressed in 1947, but its remnant was later revived as the Agrarian Union which now constitutionally shares power with the Communist Party.

A new Constitution was adopted in 1971 according to which the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage for a maximum term of 5 years and consisting of 400 deputies representing constituencies of equal size. This Constitution also established the Council of State, being the supreme permanent body of the National Assembly with both legislative and executive functions.

Production.—Until 1939 Bulgaria was a predominantly agricultural country, but has since pursued an elaborate programme of industrialization. About 90 per cent of the country's agriculture has been turned over to co-operatives, and a smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The livestock includes cattle, sheep, goats, pigs, horses, asses, mules and water buffaloes.

There is now a substantial engineering industry which accounts for about two-thirds of Bulgaria's exports; and considerable production of ferrous and non-ferrous metals. In 1985 production of electricity was 41,621 million kilowatt-hours, of steel 2,926,000 tons and of coal 32,450,000 tons (of which about one-quarter was soft coal).

There are mineral deposits of varying importance. Bulgaria's heavy industry includes the Kremikovtsi Steel Plant near Sofia and the Lenin steel mill at Pernik, the chemical complex at Devnia, the petrochemical plant at Bourgas and various other chemical and metallurgical works situated around the country. The Soviet-designed nuclear power station at Kozlodui has four reactors, each with a capability of producing 800 million kilowatt/hours.

Defence.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but the peacetime strength of the ground forces is at present estimated to be 100,000.

Education.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, providing kindergartens and educational establishments for primary and secondary education including vocational, technical and other specialized schools for secondary age pupils. There are three Universities (at Sofia, Plovdiv and Veliko Turnovo) and 21 higher educational establishments.

Language and Literature.—Bulgarian is a South ern Slavonic tongue, closely allied to Serbo-Croat and Russian with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic. In 1983 there were 8 daily newspapers in Sofia.

Finance.—Planned budget revenue for 1989 is 24,287.8 million leva, expenditure 24,286.3 million leva.

TRADE

The principal imports are industrial and agricultural machinery, industrial raw materials, machine tools, chemicals, dyestuffs, pharmaceuticals, rubber, paper. The principal exports are non-ferrous metals, electric trucks and motors, pumps, ships, accumulators and machine tools, cereals, tobacco, fruit, vegetables, oil seeds, fats, textiles, eggs, chemicals and oils including attar of roses. In 1986, 79.2 per cent of Bulgaria's foreign trade was within the C.M.E.A., including 59.2 per cent with the Soviet Union.

Burkina (formerly Upper Volta) is an inland savanna state in West Africa, situated between 9° and 15°N. and 2°E. and 5°W. with an area of 105,869 sq. miles (274,200 sq. km.), and a population of 8,846,929

(1985 estimate). It has common boundaries with Mali on the west, Niger and Benin on the east and Togo, Ghana and the Côte d'Ivoire on the south. The largest tribe is the Mossi whose king, the Moro Naba, still yields a certain moral influence.

Burkina was annexed by France in 1896 and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. The official language is French.

The 1960 constitution provided for a presidential form of government with a single chamber National Assembly, but in January, 1966, the Army assumed power. A new constitution allowing for a partial return to civilian rule but with the Army still in effective control was adopted in 1970, but in 1974 this was suspended. Full legislative and presidential elections were held again in 1978. In a military coup in Nov. 1980, Col. Zerbo assumed power. He was overthrown in Nov. 1982 by Maj. Ouedraogo, who was himself overthrown in Aug. 1983 by radical Army officers led by Capt. Sankara. On Oct. 15, 1987 Capt. Sankara was overthrown and killed in a military coup led by Capt. Blaise Compaoré. The present government is a broad-based coalition (the Popular Front). The future form of the Burkina Faso Government will be considered by a National Congress of the Popular Front in late 1989. New constitutional arrangements are likely to be drawn up in 1990.

Trade.—The 1988 Budget totalled Franc CFA 90,300 million.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea-nuts and cotton. Small deposits of gold, manganese, copper, bauxite and graphite have been found. Trade in 1985 was valued at imports, CFA 95,158 m., exports, CFA 23,065 m.

EMBASSY OF THE UNION OF BURMA
19A Charles St., Berkeley Square, W1X 8ER
[01-629 6966]

Ambassador Extraordinary and Plenipotentiary, His Excellency U Tin Hlaing (1989).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 9' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west and a frontier with Bangladesh along the Naaf River (defined in 1964) and India to the north-west (defined in 1967). In the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and has since been demarcated; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. The total area of the Union is 261,218 sq. miles (676,552 sq. km.), with a population of 37,153,000 (1985 U.N. estimate).

Physical Features.—Burma falls into four natural divisions. Arakan (with the Chin Hills region), the Irrawaddy basin, Tenasserim, including the Salween basin and extending southwards to the Burma-Thailand peninsula, and the elevated plateau on the east. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razi (19,296 ft.) in the northern Kachin hills. Mt. Popa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lemro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Thai groups. The three important non-indigenous elements are Indians, Chinese and those from the former East Pakistan. Burmese is the official language, but minority languages include Shan, Karen, Chin, Kayah and the various Kachin dialects. English is spoken in educated circles. Buddhism is the religion of 85 per cent of the people, with 5 per cent Animists, 4 per cent Muslims, 4 per cent Hindus and less than 3 per cent Christians.

Government.—Burma became an independent republic outside the British Commonwealth on January 4, 1948, and remained a parliamentary democracy for 14 years. On March 2, 1962 the army took power, and suspended the parliamentary Constitution. A Revolutionary Council of senior officers under General Ne Win took measures to create a Socialist State.

In January 1974 a new Constitution was adopted under which the highest authority was the People's Assembly (476 representatives) with a Council of State (29 members) and the senior executive body being the Council of Ministers.

After months of popular demonstrations and rioting and a series of Presidents throughout the summer of 1988, Gen. Saw Maung, leader of Burma's armed forces, assumed power in September 1988. The People's Assembly, the Council of State and the Council of Ministers were abolished and replaced by the State Law and Order Restoration Council

(SLORC) headed by Gen. Saw Maung as Prime Minister.

A People's Assembly Election Law was published in March 1989 committing the State Law and Order Restoration Council to hold multi-party elections. These elections have been promised by May 1990.

Political Divisions.—Burma is comprised of seven States (Chin, Kachin, Karen, Kayah, Mon, Rakhine, Shan) and seven Divisions (Irrawaddy, Magwe, Mandalay, Pegu, Rangoon, Sagaing, Tenasserim).

Education.—The literacy rate is high compared to other Asian countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade.

Most Burmese children attend primary school, and about four million are currently enrolled; in middle and high schools, 11 million. There are two universities, at Rangoon and Mandalay, and in 1986-87 the numbers graduating were 9,981. A number of autonomous institutes of university standard award their own degrees. Under the two universities are three affiliated Degree Colleges and the Workers' College, Rangoon. There are also 14 two-year colleges affiliated to the universities, spread throughout the country.

There are three Teachers' Training Institutes for middle and primary schools, and 13 Teachers' Training Schools for primary only. Seven Government Technical Institutes offer post-secondary technical training courses and 14 Technical High Schools train semi-skilled tradesmen. Six Agricultural Institutes offer training courses in agriculture and veterinary science; nine Agricultural High Schools train semi-skilled agriculturists. There are 34 Vocational Schools for weaving, handicrafts, etc.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1988-89 were: Revenue, K31,083,000,000; Expenditure, K30,042,000,000.

Production, Industry and Commerce.—Three-quarters of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat, grain, tea, sugarcane, Virginia and Burmese tobacco, jute and rubber. Rice has traditionally been the mainstay of Burma's economy and the quantity of rice and by-products available for export was 900,000 tons in 1986-87. The principal export after rice is teak, of which 190,000 cubic tons was exported in 1986-87.

Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum products are the most important. Oil is now being produced from oilfields in Myanaung, Prome and Shwepyithar and at Chauk, Yenangyaung, Mann, and Letpando. Production of crude oil in 1986-87 totalled 10,103,000 U.S. barrels. There is a refinery at the main oilfield, Chauk, another at Syriem near Rangoon and a third is being built at Mann. There has been a slight decline in Burma's oil production in recent years and the country is no longer self-sufficient. Onshore exploration continues. There has also been some offshore oil exploration on a small scale. Major reserves of natural gas have been discovered in the Martaban Gulf, which Burma is hoping to develop.

All industrial activity of any size is in the public sector. Under development plans, projects completed or under construction with overseas financial and technical assistance include the production of cement, bricks and tiles, sheet glass, steel sections, jute bags and twine, cotton yarns, cotton and cotton mixture cloth, pharmaceuticals, sugar, paper, plywood, urea fertilizers, soda ash, tractors and tyres;

also a hydro-electric scheme and various irrigation works. Japan continues to be the major individual donor of soft loans and grant aid in the industrial and agricultural sectors. West Germany has also been an important contributor of soft loans.

Loans amounting to US\$450 million have been extended by the World Bank. As a member of the Colombo Plan since 1952 Burma continues to receive technical assistance from a number of countries and international agencies. Faced with a serious foreign exchange shortage, Burma has applied for Least Developed Country status (LLDC) at the U.N.

Trade with U.K.

	1987	1988
Imports from U.K.	£24,715,000	£11,685,000
Exports to U.K.	3,826,000	4,427,000

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways network covers 2,764 route miles, extending to Myitkyina, on the Upper Irrawaddy. There were 2,452 miles of Union highways and 11,767 miles of other main roads in 1982-83. The airport at Mingaladon, about 13 miles north of Rangoon, only handles limited international air traffic.

CAPITAL.—The chief city of Lower Burma, and the seat of the government of the Union is Yangon (Rangoon), on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Shwe Dagon pagoda, much venerated by Burmese Buddhists. Population (1983): Rangoon District, 3,973,872; city population, 2,458,712.

Mandalay is the chief city of Upper Burma, population (1983): Mandalay district, 4,580,923; city, 532,985; Moulmein of 219,991 and Bassein of 144,092. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings.

CURRENCY.—Kyat (K) of 100 pyas.

FLAG.—The Union flag is red, with a canton of dark blue, inside which are a cogwheel and two rice ears surrounded by 14 white stars.

NATIONAL DAY.—January 4.

Formerly a Belgian trusteeship under the United Nations, Burundi was proclaimed an independent State on July 1, 1962. Situated on the east side of Lake Tanganyika, the State has an area of 10,747 sq. miles (27,834 sq. km.) and a population (1985 U.N. estimate) of 4,718,000. The majority of the population are of the Bahutu ethnic group, but power rests in the hands of the minority Batutsi ethnic group.

Burundi became independent as a constitutional monarchy but this was overthrown on November 28, 1966 and the country became a republic. On Nov. 1, 1976, the government of President Micombero was overthrown and a Supreme Revolutionary Council led by Col. Jean-Baptiste Bagaza took power. In 1980 the S.R.C. was replaced by a political bureau and central committee as part of a process of political normalization, which continued with elections to the National Assembly, a 65-member legislature. On Sept. 3, 1987 the government of President Bagaza was overthrown by a Military Committee of National Redemption led by Major Pierre Buyoya.

The chief crop is coffee, representing about 80 per cent of Burundi's export earnings. Cotton is the second most important crop. Mineral, tea, hide and skin exports are also important.

EMBASSY OF THE REPUBLIC OF CAMEROON
84 Holland Park, W11 3SB
[01-727 0771]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Gibering Bol-Alima (1987).

The Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west, Chad and the Central African Republic to the east and Congo and Gabon and Equatorial Guinea to the south. It has an area of 183,569 sq. miles, (475,442 sq. km.) and a population of 10,927,000 (1987 estimate).

The whole territory was administered by Germany from 1884 to 1916. From 1916 to 1959, the former East Cameroon was administered by France as a League of Nations (later U.N.) trusteeship. On Jan. 1, 1960 it became independent — the Republic of Cameroon. The Republic was joined on October 1, 1961, by the former British administered trust territory of the Southern Cameroons, after a plebiscite held under United Nations auspices. Cameroon became a Federal Republic with separate East and West Cameroon state governments. Subsequently, after a plebiscite held in May, 1972, Cameroon became a United Republic.

Cameroon is the only country in Africa where French and English are both official languages enjoying equal status, and the government's declared long-term objective is to achieve complete 'bilnguism' and 'biculturalism'.

The main economic emphasis is on agricultural development, both through encouraging small-scale peasant agriculture, and through the development of large-scale agro-industrial complexes, with the aim of making the country agriculturally self-sufficient and a major food exporter.

Principal products are cocoa, coffee, bananas, cotton, timber, ground-nuts, aluminium, rubber and palm products. There is an aluminium smelting plant at Edéa with an annual capacity of 50,000 tons. Oil is now also one of Cameroon's principal products with an estimated production of 9.2m. tonnes during 1984-5.

The Cape Verde Islands, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antão, São Vicente, Santa Luzia, São Nicolau, Boa Vista and Sal) and Leeward (Maio, São Tiago, Fogo and Brava) with a total area of 1,557 sq. miles (4,033 sq. km.). The population (1985 U.N. estimate) was 326,000, the majority of whom are Roman Catholic.

The Islands, colonized in c. 1460, achieved independence from Portugal on July 5, 1975, under the nationalist party of Guinea Bissau and Cape Verde. A federation of the islands with Guinea Bissau was planned (till 1879 Guinea-Bissau and the Islands were

a single administrative unit) but this was dropped following the 1980 coup in Guinea Bissau.

The Republic is a one-party (the P.A.I.C.V.) state with a President elected by the National Assembly. He has a mandate of 5 years, as do Assembly deputies, who are elected by universal adult suffrage.

The islands have had little rain since 1969, and agriculture is mostly confined to irrigated inland valleys, the chief products being bananas and coffee (for export), maize, sugarcane and nuts. Fish and shellfish are important exports. Salt is obtained on Sal, Boa Vista and Maio; volcanic rock is also mined for export. The main ports are Praia and Mindelo, and there is an international airport on Sal.

The Republic lies just north of the Equator between the Cameroon Republic, the Republic of Chad, the southern part of Sudan and Zaire. The Republic has an area of 240,535 sq. miles (622,984 sq. km.), and a population (1985 U.N. estimate) of 2,608,000.

On December 1, 1958, the French colony of Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17,

1960. The first President of the Central African Republic, M. David Dacko, held office from 1960 until Jan. 1, 1966, when he was replaced by the then Col. Bokassa after a coup d'état. On Dec. 4, 1976, President Bokassa proclaimed himself Emperor and a new constitution (Parliamentary Monarchy) was introduced, the country being known as the Central African Empire. On Sept. 20, 1979, Emperor Bokassa was deposed by M. David Dacko in a bloodless coup and the country reverted to a Republic. President Dacko surrendered power on September 1 1981 to army commander Gen. André Kolingba in a bloodless coup. On Sept. 21, 1985 President Kolingba dissolved the Military Committee for National Recovery (C.M.R.N.) and appointed a civilian-dominated cabinet. Moves towards democratization have been made and on Nov. 21, 1986, a referendum was held whereby voters approved a new Constitution and the establishment of a one-party state. Legislative elections are to be held in the near future.

Economy.—A programme of economic reconstruction is under way, concentrating on agricultural production and private investment. Cotton, diamonds, coffee and timber are the major exports.

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by Libya on the north, by the Sudan on the east and by the Central African Republic on the south. It has an area of 495,755 sq. miles (1,284,000 sq. km.) and ■ population (1985 U.N. estimate) of 5,018,000.

Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960. On April 14, 1962, a new Constitution was adopted involving a presidential-type regime. This was suspended on April 13, 1975 when President Tombalbaye was killed in a military coup. The country was run by a Supreme Military Council, under General Felix Malloum until his overthrow in February 1979. A Transitional Government of National Unity, headed by Goukouni Oueddei, was replaced in June 1982 by the government of Hissène Habré. A ceasefire between Chad and Libya was agreed in Sept. 1987. In May 1988, Libya formally recognized the government of Habré and offered to help in the reconstruction of northern Chad. The war was formally ended on Oct. 3, 1988.

About 90 per cent of the workforce is occupied in agriculture, fishing and forestry. There is an oilfield in Kanem and salt is mined around Lake Chad, but the most important activities are cotton growing (mostly in the south) and animal husbandry (in central areas). Raw cotton and meat are the main exports.

EMBASSY OF CHILE
12 Devonshire Street, W1N 2FS
[01-580 6392/4]

Ambassador Extraordinary and Plenipotentiary, His Excellency Juan Carlos Délano (1987).

A state of South America lying between the Andes and the shores of the South Pacific, Chile extends coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 59' S. and long. 66° 30' and 75° 48' W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain ■ greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form ■ boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected ■ statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of ■ boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid. The total area of the Republic is 292,258 sq. miles, (756,945 sq. km.), with ■ population (1985 U.N. estimate) of 12,074,000.

Among the island possessions of Chile are the *Juan Fernandez group* (3 islands) about 360 miles distant from Valparaiso. One of these islands is the reputed scene of Alexander Selkirk's (*Robinson Crusoe*) shipwreck. *Easter Island* (27° 8' S. and 109° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles, (116.5 sq. km.).

Chile is divided into 12 regions and the Metropolitan Area. The disputed boundary with Argentina in the Beagle Channel was settled by ■ treaty ratified in May 1985.

The Chilean population has four main sources: (a) indigenous Araucanian Indians, Fuegians, and Changos; (b) Spanish settlers and their descendants; (c) mixed Spanish Indians; and (d) European immigrants. Only the few remaining indigenous Indians and some originally Bolivian Indians in the north are racially separate. Following extensive intermarriage there is no effective distinction among the remainder.

Government.—Chile was discovered by Spanish adventurers in the 16th century and remained under Spanish rule until 1810, when ■ revolutionary war, culminating in the Battle of Maipú (April 5, 1818), achieved the independence of the nation.

At a general election held on Sept. 4, 1970, the Marxist candidate Dr. Allende was elected President by a narrow margin. After severe industrial unrest and widespread violent incidents, Allende was overthrown on September 11, 1973, in a coup carried out by leaders of the Armed Forces and National Police.

After a national plebiscite, the Constitution of 1925

was replaced early in 1981 and Gen. Pinochet was sworn in ■ President, to serve until 1989. Gen. Pinochet was defeated in ■ plebiscite of Oct. 5, 1988 regarding his term of office being extended for a further eight years. He resisted calls for his resignation. Another plebiscite on July 30, 1989 was held on changes to the 1980 Constitution. Presidential and Congressional elections have been scheduled for Dec. 14, 1989.

Production.—Cereals, legumes, sugar beet, vegetables, fruit, tobacco, hemp and vines are grown extensively (especially in the central zone) and livestock accounts for nearly 40 per cent of agricultural production. Sheep farming predominates in the extreme south. There are large timber tracts in the central and southern zones of Chile, some types of which are exported, along with wood derivatives such as cellulose and pulp. Industrial-scale fishing, which exceeds 5·5 million tonnes p.a., makes Chile the third largest nation in terms of catch. The principal end product is fish meal.

The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Chile also produces iodine, manganese ore, coal, mercury, molybdenum, zinc, lead and a small quantity of gold. Uranium is also said to have been discovered in small quantities. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural resources in the world. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Oil was struck in Magallanes (Tierra del Fuego) in December, 1945, and oil and natural gas are produced in the Magallanes area from on- and off-shore wells. This domestic production, despite declining, covers approximately 50 per cent of total oil requirement, and imported crude oil is refined at Concon and San Vicente in the central part of the country. There is a steel plant at Huachipato, near Concepción.

Production figures for 1987 were:

Copper (tonnes)	1,398,263
Potassium and sodium nitrate (tonnes)	795,268
Coal (tonnes)	1,515,604
Steel ingots (tonnes)	744,468
Crude oil (cu. metres)	1,736,500
Natural gas (cu. metres)	4,352,600,000

Industry is based on the processing of mineral, forestry, fish and agricultural products, and the manufacture of consumer goods.

Communications.—Chilean ships have ■ virtual monopoly in the coastwide trade, though, with the improvement of the roads, an increasing share of internal transportation is moving by road and rail. The Chilean mercantile marine numbers 57 vessels (of over 100 tons gross) with ■ total deadweight tonnage of 1,125,200 (1987).

There are 6,575 miles of railway track. A metre-gauge line (the *Longitudinal*) runs from La Calera, just north of Santiago, to Iquique; however, road transport has caused ■ reduction in rail traffic along this route. The wide gauge railway runs from Valparaíso through La Calera, 60 miles inland, and after passing through Santiago ends at Puerto Montt.

With the completion of section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentina) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaíso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft. However services have now been suspended due to financial difficulties.

Chile is served by about 20 international airlines. The domestic traffic is carried by the state-owned Linea Aerea Nacional and the privately-owned LADECO, which also operate internationally, and smaller regional carriers.

Chile's road system is about 65,000 kilometres in length, but only an estimated 7,000 kilometres are first-class paved highways.

Defence.—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is mostly voluntary, but there are some conscripts. The Navy consists of 1 cruiser, 10 destroyers, frigates and escorts, 6 patrol vessels and FPBs and 4 submarines. There is ■ support force of transports, tankers, 1 submarine depot ship and ancillary small craft. The strength of the Navy is 28,000 (3,000 conscripts) including ■ men of the Marine Force. The Army's total strength is 53,000, which includes 3,000 officers and 30,000 conscripts (2 years). In addition there is ■ police force of Carabineros of 28,000 officers and men. The Air Force total strength is 15,000 with a strength of 120 aircraft.

Education.—Elementary education is free, and has been compulsory since 1920. There are 8 Universities (3 in Santiago, 2 in Valparaíso, 1 in Antofagasta, 1 in Concepción and 1 in Valdivia). The religion is Roman Catholic.

Language and Literature.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose, and in 1971 to the poet Pablo Neruda. There are over 100 newspapers and a large number of periodicals.

FINANCE

	1986	1987

AREA AND POPULATION.—The area of China is 3,705,408 sq. miles, (9,596,961 sq. km.). A nationwide census (the third) was held in July 1982, which recorded a total population of 1,008,175,288. According to the P.R.C. State Statistical Bureau, the population at the beginning of 1989 was 1,160,000,000. China is anxious to control the growth of the population and has introduced stringent policies intended to result in a population of 1,200 million by the year 2000. About 6 per cent of the population belong to around 55 ethnic minorities. Among the largest are the Zhuang of Guangxi, the Uygurs of Xinjiang, the Tibetans and the Mongols.

Government.—On October 10, 1911, the party of reform forced the Imperial dynasty to a 'voluntary' abdication, and a Republic was proclaimed at Wuchang.

On September 30, 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C.) met in Peking and appointed the National People's Government Council under the Chairmanship of Mao Zedong (Mao Tse-tung). On October 1, Mao proclaimed the inauguration of the Chinese People's Republic.

The regime was recognized by all the Communist bloc countries in quick succession, and soon after by the Asian countries of the Commonwealth, the United Kingdom and by a number of other countries. Others, led by the United States, continued to recognize the Chiang Kai-shek regime on Taiwan as the rightful Government of China. In 1971 the People's Republic won acceptance into the United Nations on the expulsion of Taiwan. Since then many more countries have accorded recognition.

A new Constitution was adopted in December 1982, under which the National People's Congress is the highest organ of state power. It is elected for a term of five years and is supposed to hold one session a year. It is empowered to amend the Constitution, make laws, select the President and Vice-President and other leading officials of the state, approve the national economic plan, the state budget and the final state accounts, and to decide on questions of war and peace. The State Council is the highest organ of the state administration. It is composed of the Premier, the Vice Premiers, the State Councillors, heads of Ministries and Commissions, the Auditor General and the Secretary General. Command over the armed forces is vested in the Central Military Commission, of which Deng Xiaoping is the Chairman.

Deputies to congresses at the primary level are 'directly elected' by the voters through a secret ballot after democratic consultation. This is now being extended to county level. These Congresses elect the Deputies to the Congress at the next higher level. Deputies to the National People's Congress are elected by the People's Congresses of the provinces, autonomous regions and municipalities directly under the Central Government, and by the armed forces.

Local government is conducted through People's Governments at provincial, municipal and county levels. Autonomous regions, prefectures and counties exist for national minorities and are described as self-governing. The system prevailing is that found elsewhere, i.e. People's Congresses and People's Governments. Beijing, Shanghai and Tianjin continue to come directly under the central government.

Following the deaths of Mao Zedong and Zhou En-lai in 1976 the disgraced Vice-Premier Deng Xiaoping was recalled. At the 11th Party Congress in 1977 Deng was elected Vice-Chairman and has since become the dominant force within the Party by eliminating leftist influence, rehabilitating fallen

leaders and adjusting Maoist policies to permit economic liberalization. Deng's policies were reaffirmed at the 12th Congress in 1982. The Congress also elected a new Party leadership dominated by Deng and his supporters. The post of Chairman of the Party was abolished. The Party leader now holds the post of General Secretary. The 13th Party Congress in 1987 reaffirmed open-door policies. Most of the old revolutionary generation were removed, in elections, from the top posts.

Student-led pro-democracy demonstrations throughout April and May ended on June 3-4, 1989 when the People's Liberation Army took control of Beijing, killing thousands of protesters (see also Events of the Year).

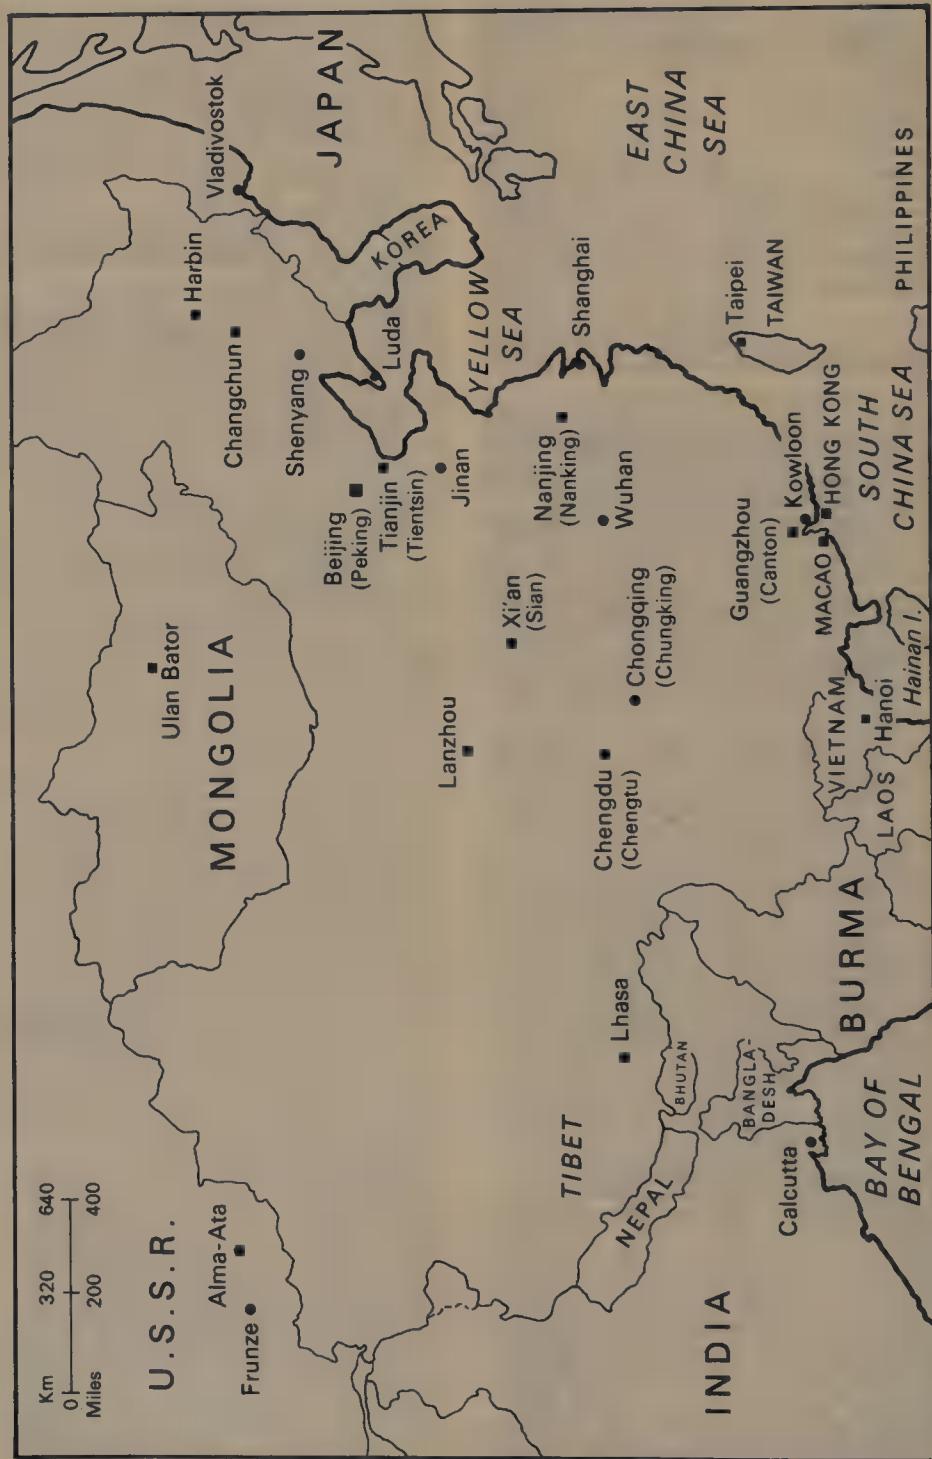

Armed Forces.—All three military arms in China are parts of the People's Liberation Army (P.L.A.). The size of this body has not been formally given, but it is estimated that China has approximately 3·5 million men under arms, with a further 12 million (or perhaps many more) reserves who take part in militia activities. In June 1985 a planned reduction of over 1 million in the course of a year was officially announced. In 1955 compulsory military service was introduced for all men between the ages of 18 and 40. This service was on a selective basis. The present length of service for those conscripted is three years in the Army, four years in the Air Force and five years in the Navy. With effect from June 1, 1965, the rank structure was abolished, together with all marks of distinction of branch of service. Both are expected to be reinstated.

Religion.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. There are also Chinese Muslims (officially estimated at about 12 million) and Christians (unofficially estimated at about 50 million). Religious freedoms, severely curtailed during the Cultural Revolution, are reviving slightly under more liberal policies.

Education.—The Cultural Revolution caused considerable disruption to the educational system and since 1976 attempts have been made to raise academic standards. Primary education now lasts five years, and has a claimed enrolment of 146,000,000 pupils. Secondary education lasts five years (three years in Junior Middle School and two years in Senior Middle School). There were 47,000,000 Middle School pupils in 1986. The proportion of illiterates and semi-literates in 1982 was 23·5 per cent, but efforts are being made to expand secondary education, particularly in the rural areas. Particular attention is being paid to higher education where there are over 1,000 universities, colleges and institutes with an enrolment of 1,700,000 students. In May 1985 the Central Committee of the Party announced the abolition of free higher education except for teacher training, and the aim of providing all children with junior secondary education within 10 years.

Language and Literature.—The Chinese language has many dialects, notably Cantonese, Hakka, Amoy, Foochow, Changsha, Nanchang, Wu (Shanghai) and the northern dialect. The Common Speech or Putonghua (often referred to as Mandarin) which is being taught throughout the country is based on the northern dialect. The Communists have promoted it as the national language and made intensive efforts to propagate it throughout the country. Since the most important aspect of this policy is the use of the spoken language in writing, the old literary style and ideographic form of writing has fallen into disuse.

In 1956, after some 4 years of study, the Government decided to introduce 230 simplified characters with a view to making reading and writing easier. The list was enlarged and there are now over 2,000 simplified

characters in use. In Jan. 1956, all Chinese newspapers and most books began to appear with the characters printed horizontally from left to right, instead of vertically reading from right to left, as previously.

In Feb. 1958 The National People's Congress adopted a system of Romanization, known as pinyin, using 25 of the letters of the Latin alphabet (not v). This has been used within the country largely for assisting schoolchildren and others to learn the pronunciation of characters in *Putonghua*, and is now used for Chinese names in foreign-language publications.

Chinese literature is one of the richest in the world. Paper has been employed for writing and printing for nearly 2,000 years. The Confucian classics which formed the basis of the traditional Chinese culture date from the Warring States period (4th–3rd centuries B.C.) as do the earliest texts of the rival tradition, Taoism. Histories, philosophical and scientific works, poetry, literary and art criticism, novels and romances survive from most periods. Many have been translated into English. In the past all this considerable literature was available only to a very small class of *literati*, but with the spread of literacy in the 20th century, a process which has received enormous impetus since the Communists took over in 1950, the old traditional literature has been largely superseded by modern works of a popular kind and by the classics of Marxism and modern developments from them.

The most important among the newspapers and magazines are the People's Daily and the twice-monthly Red Flag, the communist party organs.

Production and Industry.—China is essentially an agricultural and pastoral country: peasants constitute about 80 per cent of the population. People's communes gave way to townships as the basic level of State administration in rural districts under the 1982 Constitution.

New agricultural policies, designed to give greater incentives to the rural population, have meant that the responsibility for agricultural production has been devolved down to individual households, whereas previously work was generally assigned on a collective basis.

Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities. The mineral wealth of the country is very great. Coal of excellent quality is produced. Iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundant. Oil is produced in several northern provinces, particularly in Heilongjiang and Shandong, and off-shore deposits are being sought in co-operation with Western and Japanese companies.

The Chinese State Statistical Bureau issues production figures annually. The following are of note for 1987:

Grain (tons)	402,410,000
Pork, beef, mutton (tons)	19,210,000
Tea (tons)	497,000
Cotton (tons)	4,190,000
Timber (cu. metres)	68,430,000
Crude oil (tons)	134,000,000
Steel (tons)	56,020,000
Electric power (KWh)	496 billion
Machine tools	146,000
Motor vehicles	472,000

The State Statistical Bureau valued the national income for 1987 at Yuan 915.3 billion, an increase of 9.3 per cent over 1986. The Gross National Product in 1987 was Yuan 1,092 billion, ■ 9.3 per cent. increase over 1986. The total value of agricultural output rose by 4.7 per cent. over the 1986 figure to Yuan 444.7 billion. The total value of industrial output rose by 16.5 per cent. to Yuan 1,378 billion.

In 1982 China set itself the aim of quadrupling the 1980 gross agricultural and industrial output value by the year 2000. The focus of its reform programme was switched to industry in 1984. Wide-ranging reforms have been introduced to make the industrial sector more efficient by narrowing the scope of central planning and broadening enterprise decision-making, material incentives and the role of the market.

Foreign trade and external economic relations have expanded quickly since the open-door policy, adopted in the late 1970's. The principal articles of export are animals and animal products; oil; textiles; ores, metals, tea and manufactured goods. The principal imports are motor vehicles; machinery; chemical fertilizer plants; aircraft; books, paper and paper-making materials; chemicals; metals and ores; and dyes.

Communications.—Of the total area of China over half consists of tableland and mountainous areas where communications and travel are generally difficult. The country has more than 52,000 kilometres of railway trunk and branch lines and some 926,746 kilometres of highway. In addition, internal civil aviation has been developed, with routes now totalling more than 340,000 kilometres. As a result the communications network now covers most of the country.

In the past where roads did not exist the principal means of communication east to west was provided by the rivers, the most important of which are the Yangtze (Changjiang) (3,400 miles long), the Yellow River (Huanghe) (2,600 miles long) and the West River (Xiehe) (1,650 miles). These, together with the network of canals connecting them are still much used, but their overall importance is less than it was. Coastal port facilities are being improved and the merchant fleet expanded. In the past 10 years great progress has been made in developing postal services and telecommunications. It is now claimed that 95 per cent of all rural communes are on the telephone and that postal routes reach practically every production brigade headquarters.

TIBET

Tibet is a plateau seldom lower than 10,000 feet, which forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The area is estimated at 463,000 square miles with a population of 2,120,000 in 1988.

From 1911 to 1950, Tibet was virtually an independent country though its status was never officially so recognized. In October 1950, Chinese Communist forces invaded Eastern Tibet. On May 23, 1951, an agreement was reached whereby the Chinese army was allowed entry into Tibet. A Communist military and administrative headquarters was set up. In 1954 the Government of India recognized that Tibet was an integral part of China, in return for the right to maintain trade and consular representation there.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On March 28, 1959, the Chinese Premier issued an order dissolving the Tibetan Government. In its place the 16-member Preparatory Committee for the Tibetan Autonomous Region, originally set up in 1955 with the Dalai Lama as Chairman, was to administer Tibet under the State Council. The Preparatory Committee was to have the Panchen Lama as Acting Chairman and also to include 4 Chinese Officials. Elections were held to choose local People's Congresses in Tibet, thus indicating that the government organization there no longer differed significantly from that of any ordinary province in China.

In December, 1964, the Dalai Lama was declared to be a traitor, and both he and the Panchen Lama were dismissed. The position of Acting Chairman of the Preparatory Committee was assumed by Ngapoi Ngawang Jigmi, who had long been the most prominent secular figure in Tibet. This move marked the end of the period of co-operation by the Chinese Government with the traditional religious authorities, and the eclipse of the latter. The Preparatory Committee completed its work with the setting up of Tibet as an Autonomous Region of China on Sept. 9, 1965. The Panchen Lama was rehabilitated as an official of the C.P.P.C.C., but died in 1989. The

Chinese have invited the Dalai Lama to return from exile.

TAIWAN (REPUBLIC OF CHINA)

(Ta Chung-Hwa Min-Kwo)

President, Lee Teng-hui, elected, Jan. 13, 1988.

Vice-President, (vacant).

Premier, Lee Huan (May 29, 1989).

An island of some 13,800 sq. miles, (35,742 sq. km.), in the China Sea, Taiwan, formerly Formosa, lies 90 miles east of the Chinese mainland in latitude 21° 45' N.-25° 38' N. The population (19,460,000 in 1986), is almost entirely Chinese in origin and includes about 2,000,000 mainlanders who came to the island with Chiang Kai-shek in 1947-49. The territories administered by the Chinese Nationalists include the Pescadores Islands (50 sq. miles), some 35 miles west of Taiwan, as well as Quemoy (68 sq. miles) and Matsu (11 sq. miles) which are only a few miles from the mainland. Settled for centuries by the Chinese, the island was administered by Japan from 1895 to 1945. General Chiang Kai-shek withdrew to Taiwan in 1949, towards the end of the war against the Communist regime, accompanied by 500,000 Nationalist troops, after which the territory continued under his presidency until his death on April 5, 1975. A mutual defence treaty between the United States and Taiwan Governments was signed in 1954 but this was terminated when the United States recognized the People's Republic of China on January 1, 1979. Martial law was lifted in July 1987, after 38 years. Chiang Kai-shek's son Chiang Ching-kuo died in Jan. 1988 and was succeeded by Vice President Lee Teng-hui, a native Taiwanese.

The eastern part of the main island is mountainous and forest covered. Mt. Morrison (Yu Shan) (13,035 ft.) and Mt. Sylvia (Tz'uakoshan) (12,972 ft.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, sweet potatoes, tea, bananas, pineapples and tobacco. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports Keelung and Kaohsiung are situated in the northern and southern sections of the island.

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Fernando Cepeda (1988).

The Republic of Colombia lies in the extreme northwest of South America, having a coastline on both the Caribbean Sea and Pacific Ocean. It is situated between 4° 13' S. to 12° 30' N. lat. and 68° to 79° W. long., with an area of 439,737 sq. miles (1,138,914 sq. km.), and a population (census 1985) of 26,525,670.

The country is divided into a narrow coastal strip in the west and extensive plains in the east by the Cordillera de los Andes. The Eastern Cordillera consists of a series of vast tablelands. This temperate region is the most densely peopled portion of the Republic. The principal rivers are the Magdalena, Guaviare, Cauca, Atrato, Caquetá, Putumayo and Patia.

Government.—The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811–1824. In 1819 Simón Bolívar (1783–1831) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829–1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1866 the present title was adopted. In 1903 Panama seceded from Colombia, and became a separate Republic.

During the early nineteen-fifties Colombia suffered a period of virtual civil war between the supporters of the traditional political parties, the Conservatives and the Liberals. From 1957–1974 the country was governed under the 'National Front' agreement with the presidency alternating between the two parties every four years and ministerial posts being shared equally by the parties. The alternation of the presidency was ended in 1974 and parity in appointments in 1978. Thereafter, the constitution lays down that Government portfolios and administrative appointments shall be divided among the two majority parties in Congress in an adequate and equitable manner. However, after a General Election in 1986, the Liberal Party won a large majority. The Liberals are now known as the majority and the Conservatives, the Opposition.

Defence.—The Army peace effective strength is 60,000; war effective, approx. 400,000. The Navy, with 9,000 personnel including approximately 5,000 marines, has four corvettes, one destroyer, one

frigate, one sail training ship, two submarines and a number of patrol boats. The Air Force, with 6,000 personnel, is equipped with Mirage fighters, 837B's, C47's and a number of support helicopters.

Production.—Much of Colombia's natural resources in coal, natural gas and hydro-electricity remain largely unexploited. Development of coal is being given priority but no new hydro projects are likely to be started for the next 4–5 years. Annual coal production is increasing from the recent peak of 5·5 million tonnes now that the Cerrejón Norte coalfield is being fully worked. This is essentially for export. Proven coal reserves stand at 16,000 million tonnes. Estimated natural gas reserves are 3,788,000 million cu. ft., with daily use at 381,772 million B.t.u. Proven crude oil reserves stand at 1,300 million barrels. Colombia is again a net exporter of oil. In 1987 exports averaged 152,000 b.p.d. and are expected to rise to 282,000 b.p.d. by 1989.

The hydrocarbon sector accounts for over half of the mining output with precious metals (gold, platinum and silver) and iron ore accounting for the remainder. Iron ore production in 1982 was 450,000 tons. Other mineral deposits include nickel (a processing plant started operating in 1982), bauxite, copper, gypsum, limestone, phosphates, sulphur and uranium. Colombia is also the world's largest producer of emeralds and has deposits of other precious and semi-precious stones.

Because of the range of climate, a wide variety of crops can be grown, and the country is close to self-sufficiency in food. The principal agriculture products are coffee (Colombia is second only to Brazil in the world's largest coffee producer) and other major cash crops are sugar, bananas, cut flowers and cotton. Cattle are raised in large numbers, and meat and cured skins and hides are also exported.

Industry.—The Government has encouraged diversification to reduce dependence on coffee as the major export and this has led to the growth of new export-orientated industries, particularly textiles, paper products and leather goods. Stimulus to the economy has been provided by large loans from the World Bank and IADB for project development, particularly in the power sector (in which hydroelectric projects have predominated) and for telecommunications.

Communications.—The massive ranges of the Andes make surface transport difficult therefore air transport is used extensively. There are daily passenger and cargo air services between Bogotá and all the principal towns, as well as daily services to the U.S.A., frequent services to other countries in South America, and to Europe. The 'Atlantic Railway' links the departmental lines running down to the river, and completes the connection between Bogotá and Santa Marta. Although the railways generally are in a poor state there are about 2,600 miles of rail in use at present. The total road network (1985) consists of 105,201 km. of roads of all types, of which 21,800 km. are classified main trunk and transversal roads.

Large appropriations have been made for modernization of the country's telecommunication system. There are 485 radio stations (1983) and two national television channels with several regional ones.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and estimates (1980) put the literacy rate at 77·6 per cent of those over 10 years of age. In addition to the National University with headquarters at Bogotá there are 26 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

Roman Catholicism is the established religion.

TRADE

Colombia's principal export is still coffee although other products, principally bananas, cut flowers, clothing and textiles, ferro-nickel and coal are important exports.

The Comoro archipelago includes the islands of Great Comoro, Anjouan, Mayotte and Moheli and certain islets in the Indian Ocean with an area of 838 sq. miles (2,171 sq. km.) and a population (1985 U.N. estimate) of 444,000, most of whom are Muslim. The islanders voted for independence from France in December 1974 and three islands became independent on July 6, 1975. (The island of Mayotte was against independence and has remained under French administration.) On October 1, 1978 the three islands voted in a referendum to adopt a new Constitution which provides for a President, directly elected for a six year term. The Council of Government, consisting of a Prime Minister and up to nine other Ministers, is appointed by the President. There is a 39-member Federal Assembly elected for 5 years. Each island is administered by a Governor, assisted by up to four Commissioners whom he appoints, and has an elected Legislative Council.

The most important products are vanilla, copra, cloves and essential oils, which are the principal exports; cacao, sisal and coffee are also cultivated. Great Comoro is well forested and produces some timber.

The Republic lies on the Equator between Gabon on the west and Zaire on the east, the River Congo

and its tributary the Ubangui forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. Area of the Republic of Congo is 132,047 sq. miles (342,000 sq. km.), with a population of 1,740,000 (1985 U.N. estimate). Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

In 1968, conduct of affairs was assumed by a National Council of Army officers. The Parti Congolais du Travail (*PCT*) was created by the Congress of December 29–31, 1969 and the People's Republic of the Congo was established. Under the present Constitution, approved by referendum in 1979, executive power is vested in the President, who is elected by the Congress of the P.C.T. (the only legal party). The Council of Ministers is appointed and led by the President.

Congo has its own oil deposits, producing about 6 million tonnes annually. It also produces lead, zinc and gold. The principal agricultural products are timber, cassava, sugar cane and yams. Imports are mainly of machinery.

Ambassador Extraordinary and Plenipotentiary, His Excellency Miguel T. Yamuni (1989).

The Republic of Costa Rica in Central America extends across the isthmus between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., has an area of 19,575 sq. miles (50,700 sq. km.), and a population (1988 estimate) of 2,816,558. The population is basically of European stock, in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean. The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country obtained its independence, although from 1824 to 1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

ECONOMY.—Agriculture is the chief industry and the principal products are coffee, bananas, sugar and cattle (for meat), all of which are important exports. Other crops are cocoa, rice, maize, potatoes and hemp. Industrial activity is principally in the manufacturing sector and manufactured goods are the largest category of exports. The main goods are foodstuffs, textiles and clothing, plastic goods, pharmaceuticals, fertilizers and electrical equipment.

COMMUNICATIONS.—The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Caldera on the Pacific coast, currently under construction with Japanese aid. In 1982, 1,236 ships entered Costa Rican ports handling imports and exports of approximately 2,666,386,811 tons of goods. The railway system is nationalized. About 500 miles of railroad are open. LACSA is the national airline, operating flights throughout Central and South America, the Caribbean and U.S.A., besides internal flights to local airports by SANSA.

LANGUAGE, etc.—Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America.

The Côte d'Ivoire is situated on the Gulf of Guinea between 5° and 10° N. and 3° and 8° W. and is flanked on the west by Guinea and Liberia, on the north by Mali and Burkina and on the east by Ghana. It has an area of 124,503 sq. miles (322,463 sq. km.)—tropical rain forest in the southern half and savanna in the northern—and a population of 10,056,000 (1985 estimate) divided into a large number of ethnic and tribal groups.

Although French contact was made in the first half of the 19th century, the Côte d'Ivoire became a colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France,

covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The official language is French.

The Côte d'Ivoire has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 175 members was elected in 1985. The defence of the Constitution which was promulgated on Nov. 3, 1960, is vested in ■ Supreme Court.

EMBASSY OF THE REPUBLIC OF CUBA

[01-240 2488]

Ambassador Extraordinary and Plenipotentiary, new appointment awaited.

Cuba, the largest island in the Caribbean, lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 42,804 sq. miles (110,861 sq. km.). The country is divided into 14 provinces. The estimated total population in 1987 was 10,356,400.

The island of Cuba was visited by Christopher Columbus during his first voyage, on Oct. 27, 1492, and was then believed to be part of the western mainland of India. Early in the 16th century the island was conquered by the Spanish, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in open warfare. In 1898 the government of the United States intervened and on April 20, 1898, demanded the evacuation of Cuba by the Spanish forces. A short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. Cuba was under U.S. military rule from Jan. 1, 1899 until May 20, 1902, when an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. In October, 1965, the Communist Party of Cuba was formed to succeed the United Party of the Socialist Revolution. It is the only authorized political party.

The new Socialist Constitution came into force on February 24, 1976 and indirect elections to the National Assembly of People's Power were subsequently held.

Production.—The Government has carried out programmes of land and urban reform and of nationalization; by March, 1968, virtually all industrial and commercial enterprises were nationalized. About 85 per cent of the cultivated land is in state farms or State-controlled co-operatives. Private smallholders, who own the remainder, have to sell all their produce to the state.

Although efforts are being made to diversify the economy, sugar is still its mainstay and principal source of foreign exchange. In 1986–87 the harvest was 7·2 million tons. Cuba's other main exports are oil, nickel, seafood, citrus fruits, tobacco and rum.

Despite increased trade with Western Europe and Japan, the Communist countries, particularly the Soviet Union, form Cuba's main trading partners, covering about 86 per cent of imports and exports. In addition, the U.S.S.R. offers substantial aid through a system of subsidies which has recently been estimated to amount to \$4,500 million.

There are 12,700 kms. of railway track, of which 5,000 kms. are in public service. In 1986 there were 13,247 kms. of road. At present scheduled international air services run to North, Central and South American countries and Europe.

Language and Literature.—Spanish is the language of the island. English, formerly widely understood, is now spoken less. Education is compulsory and free. In 1964 illiteracy was officially declared to be completely eliminated. The press and broadcasting and television are under the control of the Government.

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Empire, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day). It has ■ area of 49,370 sq. miles (127,869 sq. km.). The population of Czechoslovakia (1985 U.N. estimate) was 15,500,000.

Government.—The Communist Party came to power in Czechoslovakia in February, 1948, and Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948 and the official title of the State was accordingly changed to The Czechoslovak Socialist Republic.

In January, 1968, pressures for reform of the system led to the proposal of new legislation, which envisaged the democratization of the country's political life, greater guarantees of fundamental liberties and the establishment of a federal system.

The implications for the internal development of the other communist regimes in Eastern Europe and the Soviet Union, as well ■ for the system of alliances among these countries, alarmed the Soviet Union. On the night of August 20, Czechoslovakia was invaded by Soviet, Polish, East German, Hungarian and Bulgarian troops, the capital and all major towns being occupied. The Czechoslovak leadership was

forced to modify its policies and to legalize the presence of Soviet troops on Czechoslovak territory. With the exception of the Federal system of government, the reforms of 1968 were abandoned when Gustáv Husák became leader of the Communist party in April 1969.

Czechoslovakia now consists of the Czech Socialist Republic and the Slovak Socialist Republic, each of which has its own government responsible to its legislative body—the National Council. Areas such as the constitution, defence, foreign affairs, state material reserves and currency are the responsibility of the Federal Administration. The Federal Government is responsible to the Federal Assembly, which is composed of two Chambers, the Chamber of the People, whose deputies are elected throughout the Federation, and the Chamber of the Nations, consisting of an equal number of Czech and Slovak Deputies. The federal system was not extended to the organization of the Communist Party.

The Economic System.—Under the present political system industry is state-owned, and nearly all agricultural land is cultivated by state or co-operative farms. Economic planning is centralized, and state economic plans have the force of law. In Jan. 1987 a programme of 'reconstruction' was announced, aimed at increasing the efficiency of the economy by a measure of decentralization and relaxation of controls.

Czechoslovakia is not rich in minerals, although significant quantities of coal, brown coal and lignite are mined. Principal agricultural products are sugar-beet, potatoes and cereal crops; the timber industry is also very important. The country has long been highly industrialized, and machinery, industrial consumer goods and raw materials are major exports. The 8th Five Year Plan (1986–90) aims to raise national income by 18–19 per cent over the five years.

Language and Literature.—Czech and Slovak are the official languages, each having its own literature. The Reformation gave a wide-spread impulse to Czech literature, the writings of Jan Hus (martyred in 1415 as a religious and social reformer) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the 17th century when Jan Amos Komensky or Comenius (1592–1670) was expelled from the country. Under Austrian rule and with the persistent pursuit of Germanization, there was a period of stagnation until the national revival in the first half of the 19th century. Authors of international reputation include Jaroslav Hašek (1883–1923), Jaroslav Seifert (1901–1986, Nobel Prize for Literature, 1985), Václav Havel (b. 1936) and Milan Kundera (b. 1929). Many of the best Czechoslovak authors are either in exile or in disfavour at home.

Education.—Education is compulsory and free for all children from the ages of 6 to 16. The number of pupils in basic nine-year schools is 1,992,000 (1983). There are 175,198 students in the secondary grammar schools and the number given for technical schools of all kinds is 290,038. There are five universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno, Olomouc and Košice. In addition there are a considerable number of other institutions of university standing, technical colleges, agricultural colleges, etc.

Area and Population.—A Kingdom of Northern Europe, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic, the Faroes and Greenland. Denmark is situated between 54° 34'

and $57^{\circ} 45' N.$ lat., $8^{\circ} 5' - 15^{\circ} E.$ 12' long., with an area of 16,629 sq. miles (43,069 sq. km.), and a population estimated (1987) of 5,124,794.

Government.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Faroes and 2 for Greenland. The voting age is 18.

The new coalition government of Mr. Poul Schlüter was formed in June 1988 after the General Election on May 10.

Education is free and compulsory. Special schools are numerous, commercial, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1479), Aarhus (1933), Odense (1966), Roskilde (1972) and Aalborg (1974). A further University at Esbjerg is planned.

Language and Literature.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Søren Kierkegaard (1813–1855) and Karen Blixen (1885–1962). Some 48 newspapers are published in Denmark; 2 daily papers are published in Copenhagen.

Production and Industry.—Of the labour force, in 1988, 1·8 per cent was engaged in agriculture, fishing, forestry, etc.; 27·5 per cent in manufacturing, building and construction; 15·4 per cent in commerce, 0·2 per cent in liberal professions and 53·2 per cent in administration, transport and the financial services. The chief agricultural products are pigs, cattle, dairy products, poultry and eggs, seeds, cereals and sugar beet; manufactures are mostly based on imported raw materials but there are also considerable imports of finished goods.

Communications.—Mercantile marine (ships above 100 gross tonnage) at beginning of 1988, totalled 618 ships. In 1985 there was 2,471 km. of state-owned railway and 494 km of privately-owned railway systems.

Outlying Parts of the Kingdom

THE FARÖES, or Sheep Islands (540 sq. miles; 1,399 sq. km.; pop. (1985) 46,000), capital, Thorshavn, are governed by a *Lagting* of 26 members, a *Landsstyre* of 4 members which deals with special Faroes affairs, and send 2 representatives to the *Folketing* at Copenhagen. On Sept. 14, 1946, the *Lagting*, with the consent of the Danish Government, for its own guidance held a plebiscite on the Faroes. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At the subsequent general election for the *Lagting* a great majority voted in favour of remaining part of the Kingdom of Denmark with a certain measure of home rule and in 1948 the Faroes received this. The Faroes are not part of the E.C.

Prime Minister. Atli Dam.

GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population (1985) 52,940) is divided into 3 provinces (West, North and East). Greenland (capital, Nuuk (Godthåb)) has a *Landsraad* of 17 members and sends 2 representatives to the *Folketing* at Copenhagen. Greenland attained a status of internal autonomy on May 1, 1979. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department. Follow-

ing ■ plebiscite Greenland negotiated its withdrawal from the E.C., but without discontinuing relations with Denmark, and left on Feb. 1, 1985. Mineral and oil prospecting revealed deposits of lead, zinc, iron ore, oil, gas and uranium. Commercial exploitation of these resources has already begun. The United States of America has acquired certain rights to maintain air bases in Greenland.

Formerly known as French Somaliland and then the French Territory of the Afars and the Issas, the country became independent on June 27, 1977. Djibouti is situated on the north-east coast of Africa (i.e. the Horn of Africa) and has an area of 8,494 sq. miles (22,000 sq. km.). It has an estimated population (1985) of 430,000. The climate is harsh and much of the country is semi-arid desert. The French continue to maintain army, navy and air force bases. Djibouti has an excellent port, international airport and a railway line runs to Addis Ababa.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America. The western part of the island forms the Republic of Haiti. The island lies between Cuba on the west and Puerto Rico on the east and the Republic covers an area of 18,816 sq. miles (48,734 sq. km.), with a population (1984 Census) of 6,418,000. The climate is tropical in the lowlands and semi-tropical to temperate in the higher altitudes.

Spanish is the language of the Republic.

Government.—Santo Domingo was discovered by Christopher Columbus in December, 1492, and remained a Spanish Colony until 1821. In 1822 it was subjugated by the neighbouring Haitians who remained in control until 1844 when the Dominican Republic was proclaimed. The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. From 1930 until May 30, 1961 (when he was assassinated) Generalissimo Rafael Trujillo ruled the country.

President Juan Bosch held office from Dec. 1962 to Sept. 1963, when he was deposed by a military junta. A revolt in favour of ex-President Bosch in April, 1965, developed into civil war lasting until September the same year when a provisional President was elected. On June 1, 1966, Dr. Joaquin Balaguer was elected President and in Nov. 1966 a new Constitution was introduced.

Executive power is vested in the President, who is elected by direct vote and serves for four years. The President forms his cabinet without reference to the Congress.

Legislative power is exercised by the Congress, which has a term of four years concurrent with the Presidency. The Upper Chamber is the Senate of 27 senators, one for each province and one for Santo Domingo. The lower is the Chamber of Deputies which has 120 members, one for each 50,000 inhabitants in each province, with the provision that no province has less than two members. Judicial power is exercised by the Supreme Court of Justice.

Communications.—According to local classification there are 2,932 miles of first class and 1,392 miles of second class and inter-communal roads in the Republic. There is a direct road from Santo Domingo to Port-au-Prince, the capital of Haiti, but that part of it in the border area has fallen into disuse. The frontier has been closed since Sept., 1967, except for that section crossed by the main road linking the two

capitals. A telephone system connects practically all the principal towns of the republic and there is a telegraph service with all parts of the world. There are more than 90 commercial broadcasting stations and six television stations.

The Republic is served by two national and six foreign airlines, and an international airport 18 miles to the east of the capital is in operation. Another has been built near Puerto Plata on the north coast.

Economy.—Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, ferro-nickel, gold, silver, cattle, sisal products, honey and chocolate. There is a growing number of light industries producing beer, tinned foodstuffs, glass products, textiles, soap, cigarettes, construction materials, plastic articles, shoes, papers, paint, rum, matches, peanut oil and other products.

EMBASSY OF ECUADOR
Flat 3b, 3 Hans Crescent, SW1X 0LS
[01-584 1367/2648]

Ambassador Extraordinary and Plenipotentiary, His Excellency Jose Antonio Correa (1989).

Area and Population.—Ecuador is an equatorial state of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 20' and 81° W. long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 109,484 sq. miles (283,561 sq. km.).

The Republic of Ecuador is divided into 20 provinces. It has a population (1985 U.N. estimate) of approximately 9,378,000, mostly descendants of the Spanish, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peaks in Ecuador being Chimborazo (20,408 ft.) and Ilinza (17,405 ft.) in the Western Cordillera; and Cotopaxi (19,612 ft.) and Cayambe (19,160 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests.

Government.—The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

After seven years of military rule, Ecuador returned to democracy in 1979. The present constitution, introduced in 1978, provides for an elected President and Vice-President who serve for a four year term. (Neither may stand for re-election.) There is a Chamber of Representatives with 71 members elected every four years, 12 of whom are elected on a national basis and the rest by the provinces. The Chamber meets for two months every year (Aug.-Oct.) but can be convoked at any time for extraordinary sessions. Four Legislative Commissions meet through the year.

Voting is compulsory for all literate and (since 1980) voluntary for all illiterate citizens over the age of 18. Sixteen political parties took part in the 1988 elections.

Agriculture and Industry.—Agriculture is the most important sector of the economy, supporting nearly 50 per cent of the population (particularly the poorest) and contributing 14·5 per cent of the Gross Domestic Product and 19·5 per cent of exports. The main products for export are fish (mainly shrimps, tuna and sardines), which had become the largest agricultural export by early 1982; bananas, which provide a third of agricultural exports; cocoa and coffee. Other important crops are sugar, corn, soya, rice, cotton, African palm (for oil), vegetables, fruit and timber, the temperate crops being produced mostly in the highlands.

The economy was transformed by the discovery in 1972 of major oil fields in the Oriente area, and oil accounted for two thirds of 1981 export earnings. The economy grew rapidly in the 1970s but is now faced with reduced growth, due mainly to the fall in the price of oil. The oil deposits in the Oriente are estimated at between 10,000 and 15,000 million barrels, and further exploration and development is taking place. The oil is evacuated by a trans-Andean pipeline to the port of Balao (near Esmeraldas).

Communications.—There are 23,256 km. of permanent roads and 5,044 km. of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. Ten commercial airlines operate international flights, linking Ecuador with major foreign cities and there are internal services between all important towns.

Defence.—The standing Army has a strength of about 38,000. There is an Air Force of some 120 aircraft of various kinds and 4,800 personnel. The Navy is 4,500 strong.

Language, etc.—Spanish is the principal language of the country but Quechua is also ■ recognized language and is spoken by the majority of the Indian population. As a result of an intensive national education programme more than 75 per cent of the population are now literate. Elementary education is free and compulsory. There are 9 Universities, at Quito (2), Guayaquil (3), Cuenca, Machala, Loja and Portoviejo. Polytechnic Schools at Quito and Guayaquil and 8 technical colleges in other provincial capitals. 2 daily newspapers are published at Quito and 4 at Guayaquil.

Finance.—The estimated government budget in 1986 was: revenue 186,824 million sucres; expenditure 216,466 million sucres.

TRADE

Import licences are required for all merchandise and these are issued by the Central Bank of Ecuador.

The GALÁPAGOS (Giant Tortoise) ISLANDS forming the province of the Archipelago de Colón, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1982) of 6,119. The capital is San Cristóbal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the Antarctic Humboldt Current. The province consists for the most part of National Park Territory, where unique marine birds, iguanas, and the giant tortoises are conserved. There is some local subsistence

farming; the main industry, apart from tourism, ■ tuna and lobster fishing.

EGYPTIAN EMBASSY 26 South Street, W1Y 8EL [01-499 2401]

Ambassador Extraordinary and Plenipotentiary, His Excellency Mohamed I. Shaker (1988).

AREA AND POPULATION.—The total area of Egypt is 386,662 sq. miles (1,001,449 sq. km.), only three per cent of which is cultivated land, with ■ population now officially estimated (1987) at 52,000,000.

There are three distinct elements in the native population. The largest, or 'Egyptian' element, is ■ Hamito-Semitic race, known in the rural districts as Fellahin (*fellâh*—ploughman, or tiller of the soil). A

second element is the *Bedouin*, or nomadic Arabs of the Western and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayūm. The third element is the *Nubian* of the Nile Valley between Aswān and Wadi-Halfa of mixed Arab and Negro blood. Over 90 per cent of the population are Muslims of the Sunni denomination, and most of the rest Coptic Christians.

The territory of Egypt comprises (1) Egypt Proper, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Western Desert, and (c) the Arabian or Eastern Desert; (2) The Peninsula of Sinai, forming part of the continent of Asia; and (3) a number of islands in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatia and Zeberged (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollūm to the latitude of Siwa and thence due S. along the 25th meridian. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of 'Aqaba.

Physical Features.—The country is mainly flat but there are mountainous areas in the south-west, along the Red Sea coast and in the south of the Sinai peninsula, rising in some places to peaks of over 6,000 ft. The highest mountain in Egypt is Mt. Catherine (8,668 ft.). Most of the land is desert but the Nile valley and delta are covered by silt 20–30 feet deep, and areas of desert are increasingly being reclaimed by irrigation and fertilization.

The Nile has a total length of 4,145 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river formerly had a regular yearly rise and fall of about 13 feet at Cairo, but since the completion of the Aswan High Dam in 1965, there has been no flood downstream of the dam and the water level remains almost constant throughout the year. The area of fertile land, a 5–15 mile wide strip in the Nile valley and some 6,000 square miles of the Nile delta, has been increased by the opening of the Aswan Dam. This has allowed the reclamation of about 1,300,000 acres, and a further

700,000 acres have been converted from basin to perennial irrigation. Westward from the Nile Valley stretches the Western desert, containing some depressions, whose springs irrigate small areas known as Oases, of which the principal, from S.E. to N.W., are known as Kharga, Dakhla, Farafra, Baharia and Siwa.

In the Eastern Desert between the Nile and the mountains along the Red Sea coast, are plateaue of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs.

History.—The unification of the Kingdoms of Lower and Upper Egypt under the Pharaohs in c. 3,100 B.C. marked the establishment of the Egyptian state, with Memphis as its capital. Egypt was ruled for nearly 2,800 years by a succession of Pharaonic dynasties (31 in all), which built the pyramids at Gizeh. The oldest of these is that of Zoser, built c. 2,700 B.C., and the highest the Great Pyramid of Cheops, at 451 feet; nearby is the Sphinx, 189 feet long. A period of Hellenic rule began in 332 B.C., after the conquest of Egypt by Alexander the Great, followed by a period of rule by Rome (30 B.C. to A.D. 324) and then by the Byzantine Empire. In A.D. 640 Egypt was subjugated by Arab Muslim invaders, becoming a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire under which it remained until early in the 19th century.

A British Protectorate over Egypt declared on Dec. 18, 1914, lasted until Feb. 28, 1922, when Sultan Ahmed Fuad was proclaimed King of Egypt. In July, 1952, following a military coup d'état, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and Egypt became a Republic.

In 1956, as a result of Egypt's trade agreements with Communist countries, Britain and U.S.A. withdrew offers of financial aid and in retaliation Pres. Nasser seized the assets of the Suez Canal Company. An Egyptian invasion of the Canal Zone while repulsing an Israeli attack provoked military action by Britain and France in support of their Suez Canal Company interests. A ceasefire and Anglo-French withdrawal were negotiated by the U.N.

The Israeli invasion of 1956 overran the Sinai peninsula but six months later Israel withdrew and a U.N. peace-keeping force was established in the area. However, mounting tension culminated in a second invasion of Sinai (the Six Day War of June 1967) and occupation of the peninsula by Israel. Egypt's attempt to recapture the territory (the Yom Kippur War of October 1973) was unsuccessful but Sinai was returned to Egypt in April 1982, under the treaty of 1979 which resulted from the Camp David talks between Pres. Sadat and Mr. Begin and formally terminated a 31-year old state of war between the two countries. Pres. Hosni Mubarak came to power on Oct. 13, 1981 after the assassination of Pres. Sadat by Muslim fundamentalists.

Government.—The Constitution of 1971 provides for an executive President who appoints Ministers to the Cabinet. The President determines policy which the Cabinet implements and Ministers are responsible to him. The Legislature consists of the People's Assembly (458 members, 448 of whom are elected, the remaining 10 nominated by the President); the Shura Council, or Consultative Assembly (258 members) has an advisory role. The Constitution guarantees also the independence of the Judiciary. Religious courts were abolished in 1956 and their functions transferred to the national court system. Freedom of the press is guaranteed under the Constitution.

Agriculture.—Despite increasing industrializa-

tion, agriculture remains the most important economic activity, employing over 45 per cent of the labour force and contributing to 17 per cent of the country's exports. Agricultural output has been increased ■ result of land reclamation programmes and the introduction of more efficient methods, e.g. the change from basin to perennial irrigation which yields 2-3 crops per year instead of one, the pivotal sprinkling irrigation system which uses water more efficiently, and the increasing mechanization and use of fertilizers. Egypt is still a net importer of foodstuffs, especially grain, and a food security programme has been set up with the aim of achieving self-sufficiency through the use of more advanced technology. Estimates suggest that an additional 3 million acres of land could be reclaimed by the end of the century.

The main cash crop is cotton, of which Egypt is one of the world's main producers. Production in 1986 was 403,000 tons. Other important summer crops are (1986 figures) maize 2,908,000 tons, rice 2,445,000 tons, and sugar cane 9,684,000 tons. Important winter crops are wheat 1,929,000 tons, and beans 382,000 tons. Citrus fruit and other fruits and vegetables are also grown.

Energy.—With its considerable reserves of petroleum and natural gas in Sinai, the Nile Delta and the Western Desert, and the hydro-electric power produced by the Aswan and High Dams, Egypt is self-sufficient in energy. Electricity has been provided to almost all of the country and there are plans to extend the natural gas network to all major cities.

Industry.—The production of petroleum provides Egypt with its major export (60-65 per cent. of total exports), and supports ■ growing refining industry. Steel production is another important heavy industry. The major manufacturing industries are in food processing, motor cars and electrical goods, chemical products and yarns and textiles.

Communications.—The road and rail networks link the Nile Valley and Delta with the main development areas to east and west of the river.

The Suez Canal was re-opened in 1975 and ■ two-stage development project begun to widen and deepen the canal to allow the passage of larger shipping and to permit two-way traffic. Port Said and Suez have been reconstructed and the port of Alexandria is being improved.

CAPITAL.—Cairo (population, estimated in 1986 at 14,000,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century and containing in its walls the Mosque of Mohamed Ali built in the 19th century.

■ Alexandria (estimated population in 1986 of 500,000), founded 332 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with ■ lantern burning resinous wood, was one of the Seven Wonders of the World. Other towns are: Ismailia (400,000); ■ Port Said (285,000); Mansura (120,000); Asyût (300,000); Fayyûm (180,000); Tanta (150,000); Mahalla el Kubra (130,000); ■ Suez (100,000).

Equatorial Guinea (formerly Spanish Guinea) consists of the island of Biogo (formerly Macias Nguema), in the Bight of Biafra about 20 miles from the west coast of Africa, Pagalu Island (formerly Annobon) in the Gulf of Guinea, the Corisco Islands (Corisco, Elobey Grande and Elobey Chico) and Rio Muni, ■ mainland area between Cameroon and Gabon. It has a total area of 10,830 sq. miles (28,051

sq. km.), and ■ population (1985 U.N. estimate) of 392,000.

Government.—Formerly colonies of Spain, the territories now forming the Republic of Equatorial Guinea were constituted ■ two provinces of Metropolitan Spain, in 1960, became autonomous in 1964 and fully independent in 1968. Serious disorders in Rio Muni early in 1969 caused many of the Spanish community to leave. Following Nigerian allegations of continuing mistreatment, most of the Nigerian labour force, on whom cocoa production largely depended, were repatriated in late 1975 and early 1976.

In Aug. 1979, President Macias was deposed by a revolutionary military council headed by his nephew Col. T. Obiang Nguema. The first parliamentary elections since 1968 were held on Aug. 28, 1983, under a new constitution approved by ■ referendum in Aug. 1982. Forty-one representatives were elected to the National Assembly for ■ five-year term.

Economy.—The chief products are cocoa, coffee and wood (which is exported almost entirely from Rio Muni). Production has declined and except for cocoa, there is little commercial agriculture and the economy is now heavily dependent on outside aid, principally from Spain. Equatorial Guinea entered the 'Franc zone' in 1985.

EMBASSY OF THE PEOPLE'S DEMOCRATIC REPUBLIC OF ETHIOPIA

17 Prince's Gate, SW7 1PZ
[01-589 7212]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ato Tefera Haile-Selassie (1985).

Position and Extent.—Ethiopia is in North-Eastern Africa, bounded on the north-west by the Sudan; on the south by Kenya; on the east by Djibouti and the Republic of Somalia; and on the north-east by the Red Sea. The area is 471,778 sq. miles (1,221,900 sq. km.), with a population (1985) of 43,350,000. About one-third are of the dominant race of Semitic origin (Amharas and Tigreans) and the remainder mainly Gallas (about 40 per cent of the population), Somalis and Afar.

Ethiopia has a large central plateau (average height, 6,000–7,000 ft.) which rises to nearly 15,000 ft. at Ras Dashan in the north. The plateau drops to the Nile basin in the west and the Red Sea in the east. To the north (Eritrea) and east (Ogaden) the land is mostly desert. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other

tributaries of the Nile also rise in the Ethiopian highlands.

Those of Semitic origin (Amharas and Tigreans), and many of the Gallas, are Christians of the Ethiopian Orthodox Church, which was formerly led by the head of the Coptic Church, the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous and the new Patriarch, Abuna Markarius, was enthroned in Sept. 1988. The Afar people, who inhabit lowland Eritrea, Wollo, Hararghe and Bale provinces, and the Somalis, in the south-east, are Muslim. The Falashas, to be found principally in Gondar and Tigre provinces, practise Judaism. Between autumn 1984 and February 1985 ■ secret airlift ("Operation Moses") took 7,000 of the estimated 25,000 Falashas to Israel, via Sudan.

History.—The basic Hamitic culture was heavily influenced by Semitic immigration from Arabia in the centuries about the time of Christ. Christianity was introduced in the 4th century. The empire expanded sporadically, attaining ■ zenith in the 6th century under the Axum rulers, but subsequently checked by Islamic expansion from the east. Modern Ethiopia dates from 1855 when Theodore succeeded in establishing supremacy over the various tribes. The last Emperor was Haile Selassie who reigned from 1930, though in exile from 1936–1941 during the Italian occupation. After considerable military and civil unrest the armed forces assumed power in Sept. 1972 and deposed the Emperor. A Worker's Party on the Soviet model was formed in Sept. 1984, with Mengistu ■ General-Secretary.

The civilian government of the People's Democratic Republic of Ethiopia was established in Sept. 1987 with Lt.-Col. Mengistu being elected the first President. A new constitution was established and provides for the *Shengo* (National Assembly) of 835 seats. The *Shengo* votes on the membership of the 24-member State Council.

Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when it was federated with Ethiopia. It was incorporated ■ province of Ethiopia in 1962. An armed campaign for independence started in 1962 and has intensified since the early 1970's.

Due to the lack of spring rains both the harvests of 1983 and 1984 failed. A famine relief programme launched in October 1984 drew world-wide attention to the problem, and airlifts of food began almost immediately. In two of the worst hit areas, the provinces of Tigre and Eritrea, the situation was exacerbated by the difficulty of supplying food and other aid to areas experiencing guerrilla activity.

In July 1977, Somalia, claiming the Ogaden region of Ethiopia in support of Western Somalia Liberation Front guerrillas, invaded the region. Ethiopia, with Soviet arms, and the aid of Cuban troops, was able to defeat the Somalis. In April 1988 both governments agreed to re-establish diplomatic relations and to withdraw troops from their common border.

The Tigrean province, which lies south of Eritrea, seeks to establish greater autonomy: the activities of the Tigrean People's Liberation Front have escalated since the early 1980s, and the T.P.L.F. claims to control and administer large areas of the province.

Production and Industry.—The principal pursuit is agriculture, which accounts for approximately 40 per cent of G.D.P., 85 per cent of exports and 80 per cent of total employment. Land was nationalized in 1975 and tenants given rights of use to the land they had tilled: large private holdings became state farms. The major food crops are teff, maize, barley, sorghum, wheat, pulses and oil seeds. Coffee, the principal export crop generates over 50 per cent of the country's export earnings.

Manufacturing industry accounts for less than 9

per cent of G.D.P. and is heavily dependent on agriculture. Ethiopia's known, but as yet largely unexploited, natural resources include gold, platinum, copper and potash. Traces of oil and natural gas have been found.

Communications.—With the aid of loans from the IBRD, China and the African Development Bank, ■ network of roads has been built in rural areas and link the major cities with each other, and with the Sudanese and Kenyan borders and the Red Sea coast. Transport links have suffered during the secessionist wars and under the heavy burden of famine relief traffic. The two roads to the north are usable only under heavy military escort in Tigre and Eritrea. There is a railway link from Addis Ababa to Djibouti although this is vulnerable to guerrilla activity. The narrow gauge line in Eritrea has been closed by conflict. Ethiopian Airlines maintains regular services from Addis Ababa to many provincial towns. External services are operated throughout Africa and to Europe.

Defence.—Under the Ministry of Defence the armed forces comprise the Army, the Air Force and the Navy. The Army strength totals 250,000–300,000 personnel (including a People's Militia) divided into 28 divisions.

The Air Force comprises a transport squadron, a reconnaissance squadron, five fighter squadrons, a training squadron, and two helicopter squadrons. There are 150 fighter planes, all of Russian manufacture. The Air Force headquarters is situated at Debre Zeit.

The Navy has ■ headquarters in Addis Ababa with ■ main base at Massawa and ■ smaller one at Assab. National Military Service was established on May 4, 1983 and came into effect in May 1984.

Education.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools, and cadet-schools for the Army, Navy, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. The National University (founded 1961) co-ordinates the institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.). It is intended to develop the provincial colleges to university level and status. Amharic is the official language of instruction, with English as the first foreign language and main language of instruction from secondary level upwards. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound.

EMBASSY OF FIJI

34 Hyde Park Gate, SW7 5BN
[01-584 3661/2]

Ambassador Extraordinary and Plenipotentiary, His Excellency Brig.-Gen. Ratu Epeli Nailatikau, L.V.O., O.B.E. (1988).

Area, Population, etc.—Fiji is made up of about 332 islands and over 500 islets (including numerous atolls and reefs) in the South Pacific Ocean, about 1,100 miles north of New Zealand. About 100 islands are permanently inhabited. The gross area of the group,

which extends 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. is 7,055 sq. miles (18,274 sq. km.). The International Date Line has been diverted to the east of the island group. The largest islands are Viti Levu and Vanua Levu. The main groups of islands are Lomaiviti, Lau and Yasawas. Most of the larger islands are mountainous with sharp peaks and crags, but also have conspicuous areas of flat land and many of the rivers have built extensive deltas. The climate is tropical, without extremes of heat and temperatures rarely exceed 32°C. and seldom fall below 15°C.

The population (Census 1986) was 715,373 comprising 48·6 per cent. Indians, 46·2 per cent. Fijians, and 5·2 per cent. other races.

Government.—Fiji was a British colony from 1874 until October 10, 1970, when it became an independent state and a member of the Commonwealth.

A coalition of the left under Dr. Timoci Bavadra defeated the Alliance Party of Ratu Sir Kamisese Mara in a General Election on April 12, 1987. The new Government, drawing its support mainly from the Indian population, was overthrown in a military coup on May 14 by Lt.-Col. Sitiveni Rabuka. In the wake of the constitutional crisis an Advisory Council of 19 members was set up by the Governor General ■■■ interim government to consider constitutional reform.

A second coup occurred on Sept. 25, 1987. On Oct. 7 Rabuka declared Fiji to be a republic; the Governor General resigned on Oct. 15 and Fiji's Commonwealth membership lapsed. An Executive Council of Ministers, with Rabuka as its head, assumed control until Dec. 5 when Ratu Sir Penaia Ganilau was appointed President. The President called upon Ratu Sir Kamisese Mara to form another interim administration to work for a resolution to the political crisis.

FINANCE

Public Income	F\$342,000,000	F\$358,000,000
Public Expenditure	416,000,000	399,000,000

Economy.—The economy is primarily agrarian, with about 600,000 acres under cultivation. The principal cash crop is sugar cane, which is the main export, followed by coconuts, ginger and copra. A variety of other fruit, vegetables and root crops are also grown, and self-sufficiency in rice is ■ major aim. Forestry, fishing and beef production are being encouraged in order to diversify the economy. The processing of agricultural, marine and timber products are the main industries, along with gold mining. A policy of tax concessions for export-oriented manufacturing has encouraged expansion of the garment industry.

Tourism is also a major factor in the economy, second only to sugar as ■ money-earner.

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 137,851 sq. miles (337,032 sq. km.), of which 65 per cent is forest, 8 per cent cultivated, 9 per cent lakes and 18 per cent waste and other land. The population (December, 1985) was 4,954,000, of whom 90.3 per cent are Lutheran, 1.1 per cent Greek Orthodox and 8.4 per cent others.

The Aland Archipelago (Ahvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (December, 1985) of 23,600 (95.2 per cent Swedish-

speaking). The islands have ■ semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) composed of 200 members, elected by universal suffrage. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for ■ period of 6 years.

The present government came into office on April 30, 1987. The four parties in the coalition are the National Coalition Party (conservative), the Social Democratic Party, the Swedish People's Party of Finland, and the Finnish Rural Party.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the Army is limited to a force not exceeding 34,400. The Navy is limited to ■ total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain ■ cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8–11 months. Total strength of trained and equipped reserves is over 700,000, 16,500 of whom have served in the U.N. peacekeeping force.

Education.—Primary education (co-educational comprehensive school) is compulsory for children from 7 to 16 years, and free of charge. In the autumn of 1986, there were 678,463 in comprehensive schools (388,465 at basic stage and 289,998 at upper stage), and 113,117 in vocational institutions of senior level. There are 21 universities or other schools of academic level, and enrolment was (1985) 92,230.

Language and Literature.—There are two official languages in Finland. 93.5 per cent of the population speak Finnish as their first language, 6.3 Swedish (1979). The remaining 0.2 per cent speak other languages (mainly Lapps who number about 2,500 and live in the Far North). Both Finnish and Swedish are used for administration and education; newspapers, books, plays and films appear in both languages. There is a vigorous modern literature. F. E. Sillanpää, who died in 1964, was awarded the Nobel prize for

Literature in 1939. Best known among the living authors are Väinö Linna, Veijo Meri and Paavo Haavikko. There are 99 daily newspapers in Finland which appear on 4 or more days per week (12 Swedish).

Production and Industry.—Finland is a highly industrialized country producing a wide range of capital and consumer goods. Timber and the products of the forest-based industries remain the backbone of the economy, accounting for 40 per cent of her export earnings, but the importance of the metal-working, shipbuilding and engineering industries has been growing. This sector in 1986 accounted for 30 per cent of Finland's exports. The textile industry is well developed and Finland's glass, ceramics and furniture industries enjoy international reputations. Other important industries are rubber, plastics, chemicals and pharmaceuticals, footwear, foodstuffs and electronic equipment.

Communications.—There are 9,000 kilometres of railroad, a railway connection with Sweden and U.S.S.R., passenger boat connection with Sweden, Federal Republic of Germany, Poland and U.S.S.R. Vessels on the London to Leningrad route call at Helsinki. There are also passenger/cargo services between Britain and Helsinki, Kotka and other Finnish ports. External civil air services are maintained by most European airlines. The merchant fleet at the end of Dec. 1986 totalled 1,900,000 tons gross.

In presidential elections held on April 24 and May 8, 1988 François Mitterrand was re-elected. M. Michel Rocard was appointed Prime Minister, after the resignation of M. Jacques Chirac, and appointed a socialist-dominated cabinet. However, the socialists did not have a majority in the National Assembly, the Assembly was dissolved and elections followed in June. A hung parliament resulted, but with the support of the Communist Party the socialist Laurent Fabius was elected President of the National Assembly. Michel Rocard formed his second cabinet on June 28.

Archaeology, etc.—There are dolmens and menhirs in Brittany, prehistoric remains and cave drawings in Dordogne and Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Caesar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgae from

Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, etc., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and the seventeenth and eighteenth century chateaux survived the French Revolution.

Language and Literature.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, North and West Africa, and the Province of Quebec, Canada. The work of the French Academy, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The Queen's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on twelve occasions, including R. F. A. Sully-Prudhomme (1901), Anatole France (1921), André Gide (1947), François Mauriac (1952), Albert Camus (1957), Jean Paul Sartre (1964) and Claude Simon (1985).

GOVERNMENT

Parliament consists of the National Assembly of 577 deputies (555 for Metropolitan France and 22 for the overseas departments and territories) and the Senate composed of 319 Senators (296 for Metropolitan France; 13 for the overseas departments and territories and 10 for French dependencies). The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly.

The Prime Minister is appointed by the President, ■ is the Cabinet on the Prime Minister's recommendation. They are responsible to Parliament, but as the executive is constitutionally separate from the legislature Ministers may not sit in Parliament.

A Constitutional Council is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers.

DEFENCE

The personnel of the Defence Forces in 1985 totalled 464,000. National nuclear forces include medium-range ballistic missiles, submarine-launched ballistic missiles and *Mirage IV* medium bombers. The Army has a variety of new French-made equipment in service, including medium tanks, field and anti-aircraft SP guns, trucks and radio equipment. Defence Budget for 1988, 174,276 million francs.

EDUCATION

The educational system is highly centralized and is administered by the Ministry of National Education. Local Administration comprises 25 Territorial Academies, with inspecting staff for all grades, and Departmental Councils presided over by the *Préfet*, and charged especially with primary education.

Primary and secondary education are compulsory, free and secular, the school age being from ■ to 16. Schools may be single-sex or co-educational. Primary education is given in nursery schools, primary schools and *collèges d'enseignement général* (4-year secondary modern course); secondary education in *collèges d'enseignement technique*, *collèges d'enseignement secondaire* and *lycées* (7-year course leading to one of the five *baccalaureats*). Special schools are numerous.

There are many *Grandes Ecoles* in France which award diplomas in many subjects not taught at university, especially applied science and engineering. Most of them are State institutions but have a

competitive system of entry, unlike the universities. There are universities in twenty-four towns in France, two or three in some major provincial towns and thirteen in Paris and the immediate surrounding district.

In 1986-87 enrolment in primary schools was 4,335,000; in secondary schools 5,388,000, and in post-secondary education 1,234,800 (of which university students accounted for 903,500).

COMMUNICATIONS

Roads.—The length of roads in use at the end of 1986 was 34,293 km. of which 6,300 km. were motorways.

Railways.—The system of railroads in France is very extensive. The length of lines open for traffic at the end of 1986 was 34,640 km., of which 11,584 km. were electrified.

Shipping.—The French mercantile marine consisted in Jan. 1988, of 261 ships of over 100 tons gross, of which 27 were passenger vessels (172,000 tons gross), 62 tankers (2,394,000 tons gross) and 172 cargo vessels (1,823,000 tons gross). The principal rivers of France are the Seine, Loire, Garonne, and Rhône.

ECONOMY

Budget.—Government expenditure (ordinary and capital) by function, as provided for in the 1987 general Budget, was:

	F million
Agriculture	35,723
Co-operation	6,830
Culture	8,844
Defence	165,176

PRODUCTION

Agriculture.—Approximately 31,444,000 hectares of land is used for agricultural purposes, 14,618,000 hectares is forested. Production in 1987 included wheat, 27,414,700 tonnes; sugar-beet, 25,739,160 tonnes; maize, 12,040,300 tonnes; barley, 10,489,020 tonnes; and potatoes 6,719,970 tonnes.

The vine is extensively cultivated, regions famous for their wines including Bordeaux, Burgundy and Champagne. Production of wine in 1985 was 15,918,121 hectolitres. Cognac, liqueurs and cider are also important products.

Energy.—France produces its own oil, the greater part coming from fields in the Landes area, but is a net importer of crude oil, for processing by its important oil-refining industry. Natural gas is produced in the foothills of the Pyrenees. Electricity production was 359,900 GWh in 1987, of which 19·9 per cent was hydro-electric, 69·9 per cent nuclear, and 10·2 per cent thermal power.

Industry.—France's heavy industries include oil-refining and the production of iron and steel, and aluminium. In 1987 production of steel was 16,500,000 tonnes, cement 23,600,000 tonnes and paper products 5,700,000 tonnes. Other important industries produce

chemicals, tyres, aluminium, textiles, and processed food. Engineering products include motor vehicles, and television and radio sets.

TRADE

The principal imports are raw materials for the heavy and manufacturing industries (e.g. oil, minerals, chemicals), machinery and precision instruments, agricultural products and vehicles. Raw materials, semi-manufactured and manufactured goods are also France's principal exports. Other member countries of the E.C. are France's main trading partners.

OVERSEAS DEPARTMENTS

Legislation passed in Dec. 1982 by the French Parliament granted greater powers of self-government to four of the five overseas departments—French Guiana, Guadeloupe, Martinique and Réunion. These former colonies had enjoyed departmental status since 1947 and the status of regions of France since 1974. Elections to their new directly-elected Assemblies were held in each department in Feb. 1983 and the Assemblies will operate in parallel with the

existing, indirectly constituted Regional Councils. The French government is represented by ■ Commissioners.

French Guiana.—Situated on the north-eastern coast of South America, French Guiana is flanked by Suriname on the west and by Brazil on the south and east. Area, 34,749 sq. miles (90,000 sq. km.). Population (1986 estimate), 86,000. Capital, Ψ Cayenne (38,135). Under the administration of French Guiana is ■ group of islands (St. Joseph, Ile Royal and Ile du Diable), known ■ Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894 to 1899. Commissioner, J. Dewatre.

Guadeloupe.—A number of islands in the Leeward Islands group of the West Indies, consisting of the two main islands of Guadeloupe (or Basse-Terre) and Grande-Terre, with the adjacent islands of Marie-Galante, La Désirade and Iles des Saintes, and the islands of St. Martin and St. Barthélemy over 150 miles to the north-west. Area, 687 sq. miles (1,779 sq. km.). Population (1986 estimate), 334,000. Capital Ψ Basse Terre (15,778) in Guadeloupe. Other towns are Ψ Pointe à Pitre (23,889) on Grande-Terre and Ψ Grand Bourg (6,611) in Marie Galante. Commissioner, Y. Bonnet.

Martinique.—An island situated in the Windward Islands group of the West Indies, between Dominica in the north and St. Lucia in the south. Area, 425 sq. miles (1,102 sq. km.). Population (1986), 331,000. Capital Ψ Fort de France (100,576). Other towns are Ψ Trinité (11,214) and Ψ Marin (6,104). Commissioner, E. Lacroix.

Réunion.—Réunion, which became a French possession in 1638, lies in the Indian Ocean, about 569 miles east of Madagascar and 110 miles S.W. of Mauritius. Area, 969 sq. miles (2,510 sq. km.). Population (1986 estimate), 555,000. Capital, St. Denis (109,072). Commissioner, J. Anciaux.

Also lying in the Indian Ocean adjacent to Madagascar are the smaller, uninhabited islands of Bassas da India, Europa, Iles Glorieuses, Juan de Nova and Tromelin, which are administered from Réunion.

TERRITORIAL COLLECTIVITÉS

Mayotte.—Area, 144 sq. miles (372 sq. km.). Population (1985 estimate), 67,000. Capital, Mamoudzou (12,000). Part of the Comoros Islands group, Mayotte remained ■ French dependency when the other 3 islands became independent ■ the Comoros Republic in 1976. Since 1976 the island has been ■ collectivité territoriale, an intermediate status between Overseas Department and Overseas Territory. Commissioner, A. Khider.

St. Pierre and Miquelon.—Area, 93 sq. miles (242 sq. km.). Population (1987), 6,500. Two small groups of Islands off the coast of Newfoundland. Became ■ collectivité territoriale in June 1985. Commissioner, J.-R. Garnier.

OVERSEAS TERRITORIES

French Polynesia.—Five archipelagos in the south Pacific, comprising the Society Islands (Windward Islands group includes Tahiti, Moorea, Maka-tea, Mehetia, Tetiaoro, Tubai Manu, etc: Leeward Islands group includes Huahine, Raiatea, Tahaa, Bora-Bora, Maupiti, etc.), the Tuamotu Islands (Rangiroa, Hao, Tureia, etc.), the Gambier Islands (Mangareva, etc.), the Tubuai Islands (Rimatara, Rurutu, Tubuai, Raivavae, Rapa, etc.) and the Marquesas Islands (Nuku-Hiva, Hiva-Oa, Fatu-Hiva, Tahuata, Ua Huka, etc.). Area, 1,544 sq. miles (4,000 sq. km.). Population (1985 estimate) 172,000. Capital, Ψ Papeete (22,967) in Tahiti. Economy based on tourism and

exports of copra, coffee, vanilla, citrus fruits and cultured pearls.

High Commissioner, J. Montpezat.

New Caledonia.—A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isles of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc.), the Bélep Archipelago, the Chesterfield Islands, the Huon Islands and Walpole. New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement. A referendum in 1987 on the question of independence for New Caledonia — boycotted by the indigenous Kanaks, and New Caledonia therefore voted to remain French. However, a new independence referendum has been promised for 1998. Area, 7,358 sq. miles (19,058 sq. km.). Population (1985 U.N. estimate), 153,000. Capital Noumea (60,112). It is one of the world's largest producers of nickel.

High Commissioner, B. Grasset.

Southern and Antarctic Territories.—Created in 1955 from the former Réunion dependencies, the territory comprises the islands of New Amsterdam (25 sq. miles) and St. Paul (2·7 sq. miles), the Kerguelen Islands (2,700 sq. miles) and Crozet Islands (116 sq. miles) archipelagos and Adélie Land (116,800 sq. miles) in the Antarctic continent. The only population are members of staff of the scientific stations.

Wallis and Futuna Islands.—Two groups of islands (the Wallis Archipelago and the îles du Hôro) in the central Pacific, N.E. of Fiji. Area, 106 sq. miles (274 sq. km.). Population (estimate 1985) 13,100. Capital, Mata-Utu on Urea, the main island of the Wallis group.

THE FRENCH COMMUNITY

The Constitution of the fifth French Republic promulgated on Oct. 6, 1958, envisaged the establishment of a French Community of States closely linked with common institutions. A number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally members of the French Community. The Community Institutions in fact never operated as envisaged. Nevertheless, with the exception of Guinea, which opted out of the Community in the 1958 referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements.

FRANCOPHONE COUNTRIES

In the following countries French is either the official or national language or the language of instruction; where there is another national language the name of it is shown after the name of the country:—Algeria (*Arabic*); Belgium (*Flemish*); Benin; Burkina; Burundi (*Kirundi*); Cameroon (*English*); parts of Canada (in Quebec, parts of Ontario and New Brunswick) (*English*); Central African Republic (*Sangho*); Chad; Congo; Côte d'Ivoire; France; Gabon; Guinea; Haiti (*Creole*); Kampuchea (*Khmer*); Laos (*Laotian*); Lebanon (*Arabic*); Luxembourg (*German and Letzeburgesch*); Madagascar (*Malagasy*); Mali; Morocco (*Arabic*); Mauritania (*Arabic*); Niger; Rwanda (*Kinyarwanda*); Senegal; Switzerland (1,000,000 French speaking); Togo; Tunisia (*Arabic*); Vietnam (*Vietnamese*); Zaire. French is also spoken in the Overseas Departments (see above).

EMBASSY OF THE REPUBLIC OF GABON

48 Kensington Court, W8 5DB

[01-937 5285/6]

Ambassador Extraordinary and Plenipotentiary, His Excellency Charles Mamadou Diop (1986).

Gabon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by Equatorial Guinea and Cameroon and on the east and south by the People's Republic of Congo. It has an area of 103,347 sq. miles (267,667 sq. km.) and a population (1985 U.N. estimate) of 1,151,000. Gabon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960.

The Constitution provides for an Executive President directly elected for a seven-year term, who appoints the Council of Ministers. There is a unicameral National Assembly comprising 84 members directly elected for a five-year term and nine members nominated by the President. The sole legal party is the *Parti démocratique gabonais*.

Gabon's economy remains heavily dependent on oil, and, to a much lesser extent, other mineral resources, including manganese and uranium. Gabon has considerable timber reserves (particularly Okoumé) although production in this industry has stagnated in recent years.

The economy, which experienced considerable growth in real terms from the mid-1970s onwards, has since 1986 been adversely affected by the fall in oil prices. As a result government spending is expected to remain at a reduced level until 1989.

Gabon is a full member of OPEC.

GERMANY

* Deutsches Reich (German Realm)

The term “deutsch” (German) probably began to be used in the 8th century and initially described the language spoken in the eastern part of the Frankish realm which reached its apogee in Charlemagne's reign, subsequently being divided into an eastern and western realm whose political and linguistic borders coincided. Then the term was transferred from the language to its speakers, and ultimately to the region they lived in. The first German realm was the Holy Roman Empire, established in A.D. 962 when Otto I of Saxony was crowned Emperor. The Empire endured until 1806, but from an early the 12th century the achievement of a national state was prevented by territorial fragmentation into small principalities and dukedoms, the gradually increasing autonomy of their rulers weakening the central power.

The Holy Roman Empire was replaced by a loose association of the individual sovereign states known as the German Confederation, which survived until 1866 when it was dissolved and replaced by the Prussian-dominated North German Federation. Prussia, directed by its Prime Minister (later Chancellor) Otto von Bismarck, had translated its earlier economic predominance amongst the German states into political hegemony by the annexation of the duchies of Schleswig and Holstein from Denmark in 1864 and a decisive defeat of Austria in 1866 (the Seven Weeks' War) which ended Austrian influence over German politics. After the Franco-Prussian War of 1870–71 resulted in the defeat of France and the cession of Alsace and Lorraine, the south German principalities united with the northern federation to form a second German Empire, the King of Prussia being proclaimed Emperor at Versailles on Jan. 18, 1871.

Germany's defeat in the 1914–18 War led to the abdication of the Emperor and the princes, and the country became a Republic. The 1919 Treaty of Versailles returned Alsace and Lorraine to France, large areas in the east of the country were lost to the newly created state of Poland, and all German colonies placed under the administration of other countries. The world economic crisis of 1929 led to

the collapse of the Weimar Republic and the subsequent rise to power of the National Socialist movement of Adolf Hitler, who became Chancellor in 1933.

THE WAR OF 1939–1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, which had (March 31) given a pledge to support Poland against aggression.

Hitler committed suicide on April 30, 1945. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

THE POST WAR PERIOD.—After the surrender the Allied Powers exercised supreme authority in Germany on lines laid down in the Potsdam agreement (August 1945) between the U.K., U.S.A. and U.S.S.R. Power was exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was governed jointly by the four occupying powers. The agreement also provided for the total disarmament and demilitarization of Germany, the destruction of the National Socialist German Workers' Party, the decentralization of the economy and the construction of a democratic constitution. No central German government was permitted but central German administration was established in the fields of finance, industry, foreign trade, transport and communications as support organs for the Control Council. The Potsdam agreement was to have been confirmed or revised by a peace treaty but no treaty has been drawn up. Some provisions of the Potsdam agreement were carried out but differences in interpretation among the Allies made it impossible to implement in full and the system of quadripartite control broke down when the Russians withdrew from the Control Council in March 1948.

Ambassador Extraordinary and Plenipotentiary, His Excellency Baron Hermann von Richthofen (1988). Minister Plenipotentiary, Helmut Wegner. Minister-Counsellor, Dr. Klaus-Peter Klaiber, c.m.g. First Counsellors, B. Weber (Head of Press Dept.); Dr. O. Roever (Head of Economic Dept.); E.-O. Bitzegeio (Defence Research); D. Greineder (Scientific Affairs); Dr. R. Peters (Agriculture).

NOTE.—Except where otherwise indicated statistical data on the Federal Republic of Germany include Berlin (West).

Area and Population.—The area of the Federal Republic is approximately 95,976 sq. miles (248,577 sq. km.). Total population of the Federal Republic at April 1987 was 61,149,000. Distribution of the population among the *Länder* at end 1987 was:

Baden-Württemberg	9,327,000
Bavaria	11,026,000
Berlin (West)	1,879,000
Bremen	654,000
Hamburg	1,571,000
Hesse	5,544,000
Lower Saxony	7,196,000
North Rhine Westphalia	16,677,000
Rhineland Palatinate	3,611,000
Saarland	1,042,000
Schleswig-Holstein	2,613,000

Vital Statistics.—There were 10.8 live births per 1,000 inhabitants in the Federal Republic in 1988.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones was later joined by the French zone and in 1948–49 Parliamentary Council, elected by the parliaments of the *Länder* in the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 23, 1949. When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western

Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties concerned. The High Commissioners then became Ambassadors.

The Basic Law provides for a President, elected for a five-year term, a Lower House (*Bundestag*), with a four-year term of office, elected by direct universal suffrage, and an Upper House (*Bundesrat*) composed of 45 delegates of the *Länder*, without a fixed term of office.

The results of the elections held for the lower House (*Bundestag*) on Jan. 25, 1987, were as follows:

Party	Numbers
Social Democrats	186
Christian Democratic Union	174
Christian Social Union	49
Free Democrats	46
The Greens	42

with an additional 22 representatives of Berlin elected by the House of Representatives of Berlin (CDU 11; SPD 7; FDP 2; Alternative Liste 2).

The Prime Ministers of the *Länder* governments in July 1989, were:

Ministers-President

Baden-Württemberg.—Lothar Späth.
Bavaria.—Max Streibl.
Berlin.—Walter Momper (*Governing Mayor*).
Bremen.—Klaus Wedemeier (*Mayor*).
Hamburg.—Henning Voscherau (*First Mayor*).
Hesse.—Dr. Walter Wallmann.
Lower Saxony.—Dr. Ernst Albrecht.
North Rhine-Westphalia.—Johannes Rau.
Rhineland-Palatinate.—Ludwig Wagner.
Saarland.—Oskar Lafontaine.
Schleswig-Holstein.—Björn Engholm.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Federal courts provided for in the Basic Law and the courts of the *Länder*.

The death sentence has been abolished.

ECONOMY

Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food-producing areas of Eastern Germany and some of the principal centres of light industry, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Community. The Gross National Product at current prices in 1988 was estimated at DM 2,121,500 million, an increase of 5 per cent in nominal terms over 1987. In real terms GNP grew by 3·4 per cent, after a 1·8 per cent growth in 1987. Forecasts for real growth in 1989 range from 2·5 to 3 per cent.

Agriculture.—In 1987 total area of farmland was 11,956,000 hectares, of which 7,269,700 hectares were arable land. Forest areas cover 7,360,000 hectares.

Crop yields were (tonnes):

	1986	1987
Rye	1,768,300	1,599,000
Wheat	10,406,200	9,931,600
Maslin	49,400	45,700
Barley	9,377,100	8,571,300
Oats	2,276,000	2,008,000
Potatoes	7,390,300	6,836,100
Sugar beet	20,260,000	19,049,000
Colza and rape	968,900	1,264,600
Fruit	3,478,527	2,043,897

Milk production in 1987 was 24,436,000 tonnes. Total value of fisheries was 159,616 tonnes, valued at DM 229,508,000.

Industrial Production.—The Federal Republic has a predominantly industrial economy. Principal industries are coal mining, iron and steel production, machine construction, the electrical industry, the manufacture of steel and metal products, chemicals and textiles, and the processing of foodstuffs. The index of industrial net production adjusted for irregularities of the calendar (1985 = 100) is as follows:

	1987	1988
Mining	91·6	87·4
Manufacturing industry	102·6	106·8
(i) Basic materials	99·3	105·6
(ii) Capital goods	104·8	108·4

Imports from U.K.	£9,404,257,000	£9,521,851,000
Exports to U.K.	15,783,904,000	17,667,097,000

Communications.—At the end of 1986 the state-owned railways of the Federal Republic (*Deutsche Bundesbahn*) measured 27,500 kilometres of which 11,426 kilometres were electrified, and the privately owned railways 2,918 kilometres, ■ total of 30,418 kilometres. Railway rolling stock included, in 1986, 2,620 electric locomotives, 4,295 diesel locomotives and 253,200 goods wagons; in 1986 the railways handled 316·8 million tonnes of goods. Classified roads measured 173,478 kilometres in 1987, of which motorways were 8,437 kilometres. The total number of motor vehicles registered at the beginning of 1989 was 30 million. Ocean-going shipping under the German flag in Dec., 1986, amounted to 5,290,000 tons gross. Inland waterways handled 229,494,000 tonnes of goods in 1986.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect of all children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain ■ decent standard of living.

Education.—School attendance is compulsory for all children and juveniles between the ages of 6 and 18 and comprises 9 years full-time compulsory education at primary and main schools (*Grund und Hauptschulen*) and 3 years of compulsory vocational education on ■ part-time basis. In autumn, 1986, there were in the Federal Republic 21,119 primary and main schools (*Grund und Hauptschulen*) with 3,722,748 pupils. Secondary modern schools (*Real-schulen*) numbered 2,609 with 975,485 pupils. There were 2,808 other general secondary schools (*Gymnasien* including *Gesamtschulen*) with 1,893,866 pupils.

There were also 2,824 special schools (*Sonderschulen*) for retarded, physically and mentally handicapped and socially maladjusted children in the Federal Republic with 261,461 pupils.

The secondary school leaving examination (*Abitur*) entitles the holder to ■ place of study at a university or another institution of higher education.

Children below the age of 18 who are not attending a general secondary or a full-time vocational school are obliged to take a three-year course (part-time) at ■ vocational school. In November, 1986, there were 2,830 full and part-time vocational schools (*Berufsschulen*) with 1,972,139 pupils and 298 vocational extension schools (*Berufsaufbauschulen*) with 8,132 pupils, 2,316 full-time vocational schools (*Berufsfachschulen*) with 318,640 pupils, 969 schools for secondary technical studies (*Fachoberschulen/Fachgymnasien*) with 196,206 students.

Results for the winter term 1987–88 show a total of 1,410,789 students at institutions of higher education, of whom 953,839 were attending universities. The largest universities are in Munich, Berlin, Hamburg, Bonn and Cologne.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation

to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded ■ having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646–1716) to Kant (1724–1804), Fichte (1762–1814), Schelling (1775–1854) and Hegel (1770–1831); the drama from Goethe (1749–1832) and Schiller (1759–1805) to Gerhart Hauptmann (1862–1946); and in poetry, Heine (1797–1856). German authors have received the Nobel Prize for Literature on seven occasions—Theodor Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), Thomas Mann (1929), N. Sachs (1966) and Heinrich Böll (1972). In 1985 there were 382 daily papers.

Religion.—In 1970 there were 29,696,571 Protestants in the Republic, 27,060,826 Roman Catholics, 31,684 Jews and 3,861,518 others.

CAPITAL.—Bonn, in North Rhine Westphalia, 15 miles distant from Cologne. Population 291,400 (end Dec. 1986).

The population of the principal cities and towns in the Federal Republic at end Dec. 1986, was:

Berlin (West)	1,879,200	Dortmund	568,200
Hamburg	1,571,300	Stuttgart	565,500
Munich	1,274,700	Düsseldorf	560,600

*Area and Population.—The German Democratic Republic comprises the five former German *Länder* of Brandenburg, Mecklenburg, Saxony, Saxony-Anhalt and Thuringia (an area of 41,768 sq. miles; 108,178 sq. km.). The seat of Government is the Soviet sector of Berlin (eastern part of Berlin) (156 sq. miles). The population of the Republic, including East Berlin (end of 1987) was 16,661,423. In 1952 the former *Länder* were replaced by fourteen *Bezirke* (regions): Potsdam, Cottbus and Frankfurt (formerly Brandenburg); Rostock, Schwerin and Neubrandenburg (formerly Mecklenburg); Karl-Marx-Stadt, Dresden and Leipzig (formerly Saxony); Halle and Magdeburg (formerly Saxony-Anhalt); Erfurt, Gera and Suhl (formerly Thuringia).*

*Government.—The present Constitution, which defines the G.D.R. as a Socialist state, came into force on April 9, 1968 after endorsement by a referendum. It replaced the first Constitution of October 7, 1949. The supreme organ of State power is the *Volkssammer*, which has power to elect and dismiss the Council of State, the Council of Ministers, the Chairman of the National Defence Council, the Supreme Court and the Procurator-General. The Council of State retains the presidential powers which it has exercised since the abolition of the office of President on September 12, 1960, together with responsibility for the organization of defence with the help of the National Defence Council. The Council of Ministers is responsible to the *Volkssammer* for the conduct of State policy. The present *Volkssammer* is that elected in April 1986.*

As with other communist countries, effective power lies with the ruling Marxist-Leninist Party, in this case the Socialist Unity Party of Germany (SED). The other parties and mass organizations are members of the SED-controlled National Front.

ECONOMY

The G.D.R. economy, including the control of industry and foreign trade, is centrally planned and administered. The State Planning Commission, which is subordinate to the Council of Ministers, is responsible for drawing up the 5- and 1-Year Plans. The 5-Year Plans determine the future development and structure of the economy; the 1-Year Plans have to achieve these aims. The implementation of these plans is the responsibility of the State Production Enterprises under the supervision of the economic and industrial Ministries. The economy is very closely integrated with those of other member countries of C.M.E.A. and particularly with the U.S.S.R.

The Budget forecast for 1989 is: revenue, M275,214.8 million; expenditure, M275,059.4 million.

Agriculture.—Land is cultivated mostly on state or collective farms, though some is cultivated independently. Crop yields in 1987 were: potatoes 12,228,000 tonnes; sugar-beet 7,683,000 tonnes; corn (green and silage) 16,329,000 tonnes; grain 11,224,000 tonnes, and oilseeds 378,000 tonnes.

Industry.—Almost all industry is nationally or cooperatively owned with less than 2 per cent. of the working population engaged in private enterprise. G.D.R. is the leading world producer of lignite, production in 1987 was 309,000,000 tonnes, and the iron and steel industry is also important. Other highly developed industries include basic chemicals and petro-chemicals, machine tools and industrial plant, ship-building and transport equipment, electronic and engineering equipment, precision tools and optical instruments.

A maritime State in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian and Mediterranean seas, and on the E. by Turkey, with an estimated area of 50,944 sq. miles (131,944 sq. km.). Population (1987 estimate) is given as 10,002,000.

The main areas of Greece are: **Macedonia** (which includes Mt. Athos and the island of Thasos), **Thrace** (including the island of Samothrace), **Epirus, Thessaly, Continental Greece** (which includes the island of Euboea and the Sporades or 'scattered islands' of which the largest is Skyros), the **Peloponnese** (or **Morea**), the **Dodecanese** or **Southern Sporades** (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the **Cyclades** (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the **Ionian Islands** (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cero), the **Aegean Islands** (Chios, Lesbos, Limnos

and Samos). In Crete there was for over 1,500 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Knossos afford evidence of astonishing comfort and luxury. Greek civilization emerged about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194–1184 B.C.).

Language and Literature.—The spoken language of modern Greece is descended by a process of natural development from the Common Greek of Alexander's empire. *Katharevousa*, a conservative literary dialect evolved by Adamantios Korais (Diamantios Coray), who lived and died in Paris (1748–1833) and used for official and technical matters, is to be phased out over the next few years. Novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854–1929). The poets Solomos, Palamas, Cavafis, Sikelianos, Seferis and Elytis have won a European reputation.

Religion.—Over 97 per cent of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Ecumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Ecumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Ecumenical Patriarch.

Government.—A military coup on April 21, 1967, suspended parliamentary government and, following an unsuccessful royal counter-coup on December 13, 1967, King Constantine went into voluntary exile in Rome. On June 1, 1973 the monarchy was abolished and a republic established under the Presidency of George Papadopoulos.

The overthrow of Archbishop Makarios, President of Cyprus, on July 15, 1974, by a military coup led by Greek officers of the Cypriot National Guard caused an international crisis, in the wake of which the heads of the Greek armed forces decided, on July 23, to relinquish power. Konstantinos Karamanlis, Prime Minister between 1955 and 1963, returned from his self-imposed exile in Paris to form a provisional Government, and the first elections for ten years were held on November 17, 1974.

The constitutional position of the King, who was still in exile, remained unsettled until December 8, when by a referendum, the Greek people rejected 'crowned democracy' by 69·2 per cent to 30·8 per cent and Greece became a republic. A new constitution came into force on June 11, 1975.

A general election, under a new system of proportional representation, was held on June 18, 1989 and the results were as follows: New Democracy Party, 145 seats; Pasok (Socialists), 125 seats; Left Coalition, 28 seats; Diana (Democratic Renewal), 1 seat; Others 1.

The Left Coalition and New Democracy agreed to form an interim coalition government with Tzannis Tzannetakis as Prime Minister. A fresh general election was announced for Oct. 1989.

Defence.—The strength of the Army is 130,000 backed up by some 50,000 in the National Guard. The Navy consists of 19,500 men and is equipped with a fleet of destroyers, submarines, patrol boats and amphibious warfare vessels, mostly of U.S., French, Dutch and German origin. The Air Force consists of 25,000 men and is equipped with aircraft disposed in 14 combat squadrons supported by the necessary

transport, training, helicopter and reconnaissance squadrons. National service is 2 years on average.

Communications.—The 2,650 kilometres of Greek railways are State-owned with the exception of the Athens–Piraeus Electric Railway. Greek roads total somewhat over 35,500 kilometres, of which about 25 per cent are classified as national highways and just under 30,000 km. are classified as provincial roads. The road connection with Albania was reopened in 1985.

On Dec. 31, 1986, the Greek Merchantile fleet numbered 2,138 ships with a total tonnage of 24,792,516 tons gross. On the same day Greek-owned ships registered under foreign flags numbered 276 with a total tonnage of 5,176,347 tons gross. (N.B. These figures exclude Greek-owned vessels under 100 tons gross.) Athens has direct airline links with Australasia, North America, most countries in Europe, Africa and the Middle East.

Education is free and compulsory from the age of 6 to 15 and is maintained by State grants. There are six Universities, Athens, Salonika, Patras, Thrace, Ioannina and Crete. There are several other institutes of higher learning, mostly in Athens.

Production.—Though there has in recent years been a substantial measure of industrialization, agriculture still employs about a quarter of the working population. The most important agricultural products are tobacco, wheat, cotton, sugar and rice. The most important of the fruit trees are the olive, peach, vine, orange, lemon, fig, almond and currant-vine, and now exports of Greek fresh fruit and vegetables have established themselves as an important contributor to the economy and have considerable growth potential. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are nickel, bauxite, iron ore, iron pyrites, manganese magnesite, chrome, lead, zinc and emery, and prospecting for petroleum is being carried on. Oil refineries are in operation near Athens and at Salonika, where there is also a petro-chemical plant. The chief industries are textiles (cotton, woollen and synthetics), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. In recent years new factories have been opened for the production of aluminium, nickel, iron and steel products, tyres, chemicals fertilizers and sugar (from locally-grown beet). Food processing and ancillary industries have also grown up throughout the country. The development of the country's electric power resources, irrigation and land reclamation schemes and the exploitation of Greece's lignite resources for fuel and industrial purposes are also being carried out. Tourism has developed rapidly, but is now slowing down.

EMBASSY OF GUATEMALA

13 Fawcett Street, SW10 9HN

[01-351 3042]

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Erwin Blandon (1987).

Guatemala, in Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long. from 88° 12' 49" to 92° 13' 43", and has an area of 42,042 sq. miles (108,889 sq. km.), and a population (1985 U.N. estimate) of 7,963,000.

The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above sea level; earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital averages 57 in. per annum. The chief seaports are San José de Guatemala and Champerico on the Pacific and Santo Tomás de Castilla and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, but 40 per cent of the population speak ■ Indian language. Since the establishment of the University in the capital, education has received ■ marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in Spanish.

Government.—The constitutionally elected president, Gen. Miguel Ydígoras Fuentes, was overthrown on March 31, 1963, by the Army, which handed executive and legislative powers to the Minister of Defence, Col. Enrique Peralta Azurdia. Important changes were included in ■ new constitution promulgated on Sept. 15, 1965, and elections for a new Congress and for President and Vice-President took place on March 6, 1966. The constitution was suspended 'for as long as the situation demands' following a military coup in March 1982. An amnesty for guerrillas was unsuccessful and the Army was fully occupied dealing with the proliferating subversive groups throughout the country.

Elections for a Constituent Assembly were held on July 1, 1984, as promised by Gen. Mejía Victores when he overthrew Gen. Ríos Montt in 1983. The Assembly drew up a new Constitution, promulgated in June 1985, and a new electoral law, paving the way for Presidential, Governmental and Municipal elections which took place on Nov. 3 and Dec. 8, 1985. The elections were won by the Christian Democratic party and Vincio Cerezo Arévalo was elected President.

Finance.—The Central Government revenue in 1988 was Quetzales 2,500 million, and expenditure Quetzales 3,000 million.

Formerly part of French West Africa, Guinea has coastline on the Atlantic Ocean between Guinea-Bissau and Sierra Leone and in the interior is adjacent to Senegal, Mali, Côte d'Ivoire, Liberia and Sierra Leone. Area, 94,926 sq. miles (245,857 sq. km.). The population (1985 U.N. estimate) was 6,075,000, mostly the Fullah, Malinké and Soussou tribes.

Government.—Guinea was separated from Senegal in 1891 and administered by France ■■■ separate colony until 1958. In a referendum held in Sept. 1958, Guinea rejected the new French Constitution and on Oct. 2, 1958, became an independent republic governed by ■ Constituent Assembly. M. Sékou Touré, Prime Minister in the Territorial Assembly, assumed office ■ head of the new Government.

Under a provisional constitution, adopted on Nov. 12, 1958, powers of government are exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic in January, 1961. Pres. Sékou Touré died in March 1984; ■ few days later there ■■■ a military coup. Guinea is now ruled by ■ military government, which is directed by a Military Committee for National Recovery

(C.M.R.N.). The country's foreign policy is one of non-alignment.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency. Guinea is in receipt of economic aid and technical assistance from a number of countries, including the United States, Canada, Federal Republic of Germany, Yugoslavia, the Soviet Union and China.

Production, etc.—The principal products of Guinea are bauxite, alumina, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. At Sangaredi in the mountainous hinterland, where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite are mined. Deposits of iron ore, gold, diamonds and uranium have also been discovered. Principal imports are cotton goods, manufactured goods, tobacco, petroleum products, sugar, rice, flour and salt; exports, bauxite, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples.

Guinea-Bissau, formerly Portuguese Guinea, lies in Western Africa, between Senegal and Guinea; it has an area of 13,948 sq. miles (36,125 sq. km.), and had a population (1985 U.N. estimate) of 890,000. The main ethnic groups are the Balante, Malinké, Fulani, Mandjako and Pepel.

Guinea-Bissau achieved independence on Sept. 10, 1974. Sr. Luis Cabral was ousted in a coup led by Maj. (now Gen.) Vieira in November, 1980. Following the coup the Assembly was suspended, and a Revolutionary Council was established. Under a new constitution adopted in April 1984 the Revolutionary Council became a 15-member Council of State, and a parliament was set up. An attempted coup to overthrow President Vieira was defeated in November 1985.

Economy.—The country produces rice, coconuts, ground-nuts and palm oil products. Cattle are raised, and there are bauxite deposits in the south.

The London Embassy of the Republic of Haiti closed on March 30, 1987.

The Republic of Haiti occupies the western third of the island of Hispaniola, which, after Cuba, is the largest island in the West Indies.

The area of the Republic, including off-shore islands, is 10,714 sq. miles (27,750 sq. km.) (of which about three-quarters is mountainous), with a population (1985 U.N. estimate) of 6,585,000, 85 per cent of whom live in rural areas. The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood.

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March–Oct.) and the winter (Nov.–Feb.). Humidity is high, especially in the autumn.

Language.—Following the new constitution of March 1987 both French and Creole are regarded as the official languages of Haiti. French is the language of the government and the press, but it is only spoken by the educated minority. The usual language of the people is Creole.

Haiti was a French colony under the name of Saint-Domingue from 1697. The slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L’Ouverture, who was born a slave and made himself Governor General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former negroslave, who, on January 1, 1804, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

Dr. Duvalier was installed as President in 1957 and held the position until his death in 1971. He was succeeded as President for life on the same day by his son, Jean Claude Duvalier, whom he had nominated his successor. President Duvalier fled to France on Feb. 7, 1986 in the face of sustained popular unrest, and a council headed by Gen. Henri Namphy assumed

power. In March 1987, by popular referendum, a new Constitution was agreed and Presidential elections scheduled for Nov. 29. These elections were aborted following violence in the capital. The elections held on Jan. 17, 1988, were boycotted by a number of leading candidates but Leslie Manigat eventually won after a very low turnout. President Manigat was inaugurated on Feb. 7, 1988, but he and his government were ousted on June 19 by Gen. Henri Namphy. Manigat was deported to the Dominican Republic and Namphy set up a military government until he in turn was replaced in a coup by Lt.-Gen. Prosper Avril on Sept. 18, 1988.

Production.—In recent years measures for agricultural rehabilitation have been taken with the aim of gradual restoration of productivity, which had declined after the ending of the colonial plantation system. The main project is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley.

Coffee accounts for about 32 per cent of total exports, worth approximately U.S.\$55 million in 1986. Cocoa is the second largest export earner at U.S.\$4.5 million. Corn, 110,000 tonnes (1985), sorghum, 108,000 tonnes (1985), and rice are also grown. Increased production of tropical fruits and vegetables is being encouraged.

Industry.—Export assembly industries account for about 30 per cent of the total manufacturing industry in Haiti, employing an estimated 40,000 people. Items such as leather goods, textiles, electronic components and sports equipment are manufactured, using imported raw materials, for re-export, primarily to the U.S.A. Principal imports are raw materials for the export assembly sector, foodstuffs, machinery, vehicles, mineral oils and textiles.

Communications.—The main roads are asphalted and secondary roads are fair. Internal air services are maintained between the capital and the principal provincial towns. International air-services connect Port-au-Prince with the U.S.A. and other Caribbean and South American cities. The principal towns and villages are connected by telephone and/or telegraph. The telephone company is state owned (51 per cent) and the service both in Port-au-Prince and Interurban has been greatly improved. External telegraph, telephone and postal services are normal. There are several commercial radio stations and two television stations at Port-au-Prince.

Regular passenger liner services to New York have ceased, but cruise ships call occasionally. Freight sailings are frequent for the U.S.A., Canada, Europe, Latin America (except Cuba) and the main Caribbean ports.

Education.—Education is free but estimates of illiteracy are high as 85 per cent.

Trade.—Value of imports 1984 U.S.\$ 474.1 million; exports 1984 U.S.\$ 219.4 million.

Ambassador Extraordinary and Plenipotentiary, His Excellency Sr. Max Velásquez-Díaz (1984).

Honduras, in Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' W. with a seaboard of about 375 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 63 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains a total area of approximately 43,277 sq. miles (112,088 sq. km.) and is very mountainous, being traversed by the Cordilleras, with peaks rising to 1,500 and 2,400 metres above sea level. Most of the soil is poor and acidic, except for the coastal plains of the north and some areas of the interior. Rainfall is seasonal, May to October being wet and November to April dry. Three-quarters of the territory is covered by pine forests which contribute to much of the country's wealth in natural resources. The population (1985 U.N. estimate) of 4,372,000 is of mixed Spanish and Indian blood. There is a negro (West Indian) element in Northern Honduras who are known as Garifunas.

The language of the country is Spanish, although English is the first language of many in the islands and on the North coast. Primary and secondary education is free, primary education being compulsory, and the Government have launched a campaign to eradicate illiteracy.

Government.—Originally discovered and settled by

the Spanish at the beginning of the sixteenth century Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed. Under military government from 1972–81, the present Liberal government was elected in Nov. 1985 and took office in Jan. 1986.

The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, is now the home of thousands of Miskito Indian refugees from Nicaragua.

Production.—Agriculture is mainly confined to the large and fertile valleys on the wide Caribbean plain, and the extensive valleys found in the Comayagua and Olancho regions of the interior. Reaching inland from the Caribbean towards the eastern border with Nicaragua a vast tropical forest area called the Mosquitia provides valuable reserves of timber. Lead, zinc and silver are mined on a small scale.

The chief exports are coffee, bananas and timber, the most important woods being pine, mahogany and cedar. Cattle raising and the exporting of frozen meat is an important industry, and exports of shrimps and lobsters are increasing. Other products are tobacco, beans, maize, rice, cotton, palm oil, sugar cane, cement and tropical fruits. There are large tracts of uncultivated land.

Communications.—There are about 1,004 km. of railway in operation, chiefly to serve the banana plantations and the Caribbean ports. There are 17,947 km. of roads, of which 2,173 are paved, excluding some 250 kms of new major highways recently inaugurated. Improvements are being made and new roads built. There are 33 smaller airstrips and three international airports, Tegucigalpa, San Pedro Sula and La Ceiba.

The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe. Puerto Castilla is being developed ■ a deep-water container port, and San Lorenzo is also experiencing rapid growth.

Area and Population.—The area of Hungary is 35,919 sq. miles (93,030 sq. km.) with a population (1985) of 10,658,000.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939–45 War on the side of Germany in 1941. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

After the liberation, a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties carried out major land reform and mines, heavy industry, banks and schools were nationalized. By 1949 the Communists had succeeded in gaining a monopoly of power. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been 'socialized'. The Party formulates policy and the function of the Government is mainly executive.

The period from July 1956 to the outbreak of the national revolution on Oct. 23 was marked by growing ferment in intellectual circles and increased discord within the Party. The withdrawal of Soviet troops from the country and free elections were among the demands put forward. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 an all-party coalition government under Imre Nagy was formed. This government was

overthrown and the revolution suppressed — the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of ■ new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár was announced.

Economy.—Since 1968 the Hungarian economy has been run according to ■ system which allows more decentralized decision-making than in some other Eastern European countries, although central control in vital areas such as the allocation of fuels and raw materials has remained. Industrialization has made considerable progress in the last decade and now produces ■ per cent of national income. Industry is mainly based on imported raw materials but Hungary has her own coal (mostly brown), bauxite, considerable deposits of natural gas (some not yet under full exploitation), some iron ore and oil. Output figures in 1985 (1,000 tons), coal, 24,042; bauxite, 2,815; rolled steel 2,860; crude oil, 2,000; cement, 3,678. Natural gas production totalled 7,441 million cubic metres.

Agriculture still occupies an important place in the Hungarian economy. Ten and ■ half per cent. of the entire land area is owned by State farms and a further 69·8 per cent is within co-operative farms. Production in 1987 was (tons):

Wheat	5,674,000
Rye	185,000
Barley	781,000
Maize	6,987,000
Oats	95,000
Sugar beet	4,224,000

In 1983, national income grew by only 0·5 per cent. Consumption and, particularly, investment continued to be squeezed by the adjustment measures necessitated by Hungary's hard currency debts. Retail prices rose by just under ■ per cent, whilst real incomes stagnated.

Religion and Education.—About two-thirds of the population are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—kindergartens 3–6, general schools 6–14 (compulsory), vocational schools (15–18), secondary schools (15–18), universities and adult training schools (over 18).

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugrian languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800–1855), Sándor Petőfi (1823–1849), János Arany (1817–1882), Imre Madach (1823–1864), Kálmán Mikszáth (1847–1910), Endre Ady (1877–1918), Attila József (1905–1937), Mihály Babits (1883–1941) and Dezső Kosztolányi (1885–1936).

Finance.—The budget estimates for the year 1986 were: Revenue, Forints 681,000 million; Expenditure, Forints 706,000 million.

EMBASSY OF ICELAND
1 Eaton Terrace, SW1W 8EY
[01-730 5131]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ólafur Egilsson (1986). Minister Counsellor, T. Karlsson.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 39,768 sq. miles (103,000 sq. km.). The population was 247,024 on Dec. 1, 1987.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

Government.—The parliamentary (*Althing*) elections in April 1987 gave the Independence Party 18 seats, Progressives 13, Social Democratic Party 10, People's Alliance 8, Citizens' Party 7, Women's Alliance 6 and Independent 1. The coalition government resigned on Sept. 18, 1988 and on Sept. 28 Steingrímur Hermannsson formed a new government.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland today differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the mid-11th to the late 13th century and from the early 19th century to the present.

Production.—Iceland has considerable resources of hydro-electric and geothermal energy. It is estimated that exploited water power (4,000 Gigawatt hours/a) represents only about 9 per cent of that economically exploitable, whereas only 5 per cent of the estimated 80,000 Gigawatt hours/a of available geothermal power has so far been harnessed. Energy-intensive heavy industry includes an aluminium smelter, a nitrogen fertilizer factory, a diatomite plant and a ferro-silicene plant.

The principal exports are frozen fish fillets, salt fish, stock fish, fresh fish on ice, frozen scampi, fishmeal and oil, skins and aluminium; the imports consist of almost all the necessities of life, the chief items being petroleum products, transport equipment, textiles, foodstuffs, animal feeds, timber, and alumina.

At January 1, 1988, the mercantile marine consisted of 639 vessels of under 100 gross tons and 398 ships of 100 gross tons and over; a total of 1,037 vessels (187,829 gross tons), of which 899 (117,452 gross tons) are decked fishing vessels. There are regular shipping services between Reykjavík and Felixstowe, Humber ports and the Continent.

A regular air service is maintained between Glasgow and London and Reykjavík. There are also air services from the island to Scandinavia, U.S.A., Germany, France and Luxembourg.

Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres and key highways are metalled; the rest being of gravel, sand and lava dust. The climate and terrain make first-class surfaces for highways out of the question. There are no railways.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of *Java*, *Madura*, and *Sumatra*, the *Riouw-Lingga Archipelago* (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the province of Riau), the islands of *Bangka* and *Billiton*, part of the island of *Borneo* (Kalimantan), *Sulawesi* (formerly Celebes) *Island*, the *Moluucca Islands* (Ternate, Tidore, Halmahera, Buru, Seram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), the island of *Bali* and the islands of *Lombok*, *Sumbawa*, *Sumba*, *Flores*, *Timor* and others comprising the provinces of East and West *Nusa Tenggara* and the western half of the island of New Guinea (*Irian Jaya*), with a total area of 735,358 sq. miles (1,904,569 sq. km.), and a population (1985) of about 165,030,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War 1939-45, during which the Archipelago was occupied by the Japanese, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands of all the former

Dutch East Indies except W. New Guinea took place on December 27, 1949.

Western New Guinea became part of Indonesia in 1963 under the name West Irian (now Irian Jaya), this interpretation being confirmed in an "Act of Free Choice" in July, 1969, of which the United Nations took note in November 1969. Following a unilateral declaration of independence by the Fretilin, Indonesia took over the former Portuguese colony of East Timor, which in July 1976 was declared the 27th province of Indonesia.

Following a three-week period of unrest and violent student demonstrations the Minister of the Army, General Suharto, took over effective political power in March, 1966.

General Suharto made Acting President with full powers, on March 11, 1967, and on March 28, 1968, appointed full President for a period of five years.

In the general election of April 1987, Golkar obtained 299 seats, the Muslim United Development Party 61 seats and the Indonesian Democratic Party 40 seats. President Suharto subsequently re-elected in March 1988.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg, pepper and cloves are produced, mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estates. Rubber, tea, coffee and tobacco are also produced by both in large quantities. Rice is a traditional staple food for the people of Indonesia and the islands of Java, Sulawesi and Sumatra are important producers. Production has risen rapidly in recent years to 25 million tons and the country is now self sufficient.

Oil and LNG are the most important assets, the export of which in 1985–86 earned about U.S. \$11,000 million (about 80 per cent. of Indonesia's exports), but more recent developments have underscored the vulnerability of the economy to depressed international markets and weak oil prices. Timber is the second largest foreign exchange earner after oil. Strenuous efforts have been made to develop non-oil exports.

Indonesia is rich in minerals, particularly tin, of which the country is the world's third biggest producer; petroleum, coal, nickel and bauxite are the other principal products; there are also considerable deposits of gold, silver, manganese phosphates and sulphur. Aid to Indonesia is channelled through the Inter-Governmental Group on Indonesia (IGGI). Indonesia received about US\$4 billion in 1988.

Indonesia's Fourth Development Programme started in 1984 and its main objectives are the elimination of poverty, agricultural and urban problems, and the continued growth of installed power generation.

Finance.—The drop in oil prices led in March 1983 to the rupiah being devalued by 27 per cent., and a rescheduling of major projects was undertaken. More recently an increase in foreign reserves has meant that several of these projects could be re-instated.

Trade with U.K.

	1987	1988
Imports from U.K.	£236,027,000	£208,275,000
Exports to U.K.	144,819,000	233,807,000

Principal exports to the United Kingdom are rubber, timber, non-ferrous metals, tea, coffee, spices, and crude oil for refinement. Imports from the United Kingdom are mainly of machinery, transport equipment and electrical equipment.

Transport.—In Java a main line connects Jakarta with Surabaya in the East of Java and there are several branches. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago are maintained by the State-run shipping companies Djakarta-Lloyd (ocean-going) and Pelni (coastal and inter-island) and other small concerns. Transport by small craft on the rivers of the larger islands plays an important part in trade. Air services in Indonesia are operated by Garuda Indonesian Airways and other local airlines, and Jakarta is served by various international services. There are approximately 50,000 miles of roads.

DIPLOMATIC REPRESENTATION

Following the breaking off of diplomatic relations with Iran on March 7, 1989, an Iranian Interests section has been set up at the Embassy of Pakistan.

Area and Population.—Iran has ■■■ area of 636,296 sq. miles (1,648,000 sq. km.), with ■■■ population of over 52 million. It is mostly an arid table-land, encircled, except in the east, by mountains, the highest in the north rising to 18,934 ft. The central and eastern portion is ■■■ vast salt desert.

The Iranians are mostly Shi'ah Muslims but among them are Zoroastrians, Bahais, Sunni Muslims and Armenian and Assyrian Christians. Emigration has much reduced the once substantial Jewish community.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kásim Mansúr, of Firdausi (A.D. 939–1020), Omar Khayyám, the astronomer-poet (died A.D. 1122),

Muslihu'd-Din, known ■ Sa'di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389).

Government.—Iran was ruled from the end of the 18th century by Shahs of the Qajar Dynasty. A nationalist movement became active ■ Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted ■ Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Iranian Treaty of 1921, a vigorous Prime Minister, Reza Khan re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah was deposed in his absence by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi. On September 16, 1941, Reza Shah abdicated in favour of the Crown Prince, who ascended the throne under the title of Mohammed Reza Shah Pahlavi.

Following widespread and persistent opposition to his regime, the Shah departed from Iran in January, 1979. Ayatollah Khomeini, the main spiritual leader of the Shi'ah Muslims, returned to Iran from exile on February 1. Following ■ national referendum, Iran was declared an Islamic Republic by Ayatollah Khomeini on April 1, 1979. A new constitution, providing for ■ President, Prime Minister and Consultative Assembly, and also for overall leadership by Khomeini, was approved by referendum in December 1979. The government's severe measures suppressed violent opposition. In June 1989 Khomeini died and President Khamenei (whose term of office expires in Oct. 1989) was appointed Leader of the Islamic Republic.

Iran was at war with Iraq following the Iraqi invasion of Iran in Sept. 1980. Both sides carried out attacks on neutral shipping in the Gulf and in 1987 several foreign navies entered the Gulf to escort neutral merchant shipping. International efforts to end the fighting focused on United Nations Security Council Resolution 598 of July 1987, and ■ ceasefire came into effect on Aug. 20, 1988. A U.N. Observer Peace Keeping Force was sent to the Gulf to monitor the ceasefire whilst peace talks continued.

Defence.—The Army has a strength of about 150,000 men, in 4 armoured divisions, 4 infantry divisions and one airborne division. The Air Force has a strength of about 35,000, with some 70 combat aircraft. The Navy has ■ strength of about 20,000 and consists of 3 destroyers, 3 frigates, 4 corvettes, 5 minesweepers, and patrol boats, support ships, landing craft and hovercraft. The Islamic Revolutionary Guards Corps numbers about 500,000 men. Total armed forces personnel including paramilitary forces number over one million.

Education.—Since 1943 primary education has been compulsory and free, but there is large scale absenteeism, particularly outside the towns. There are 22 universities in Iran (8 in Tehran, 14 in the provinces). The educational system has been reformed following the revolution.

Finance.—The budget for the Iranian year beginning March 21, 1988, was revenue Rials. 9,800,290 million; expenditure Rials. 9,800,290 million.

Agriculture.—While petroleum is the principal product and by far the greatest export, Iran is otherwise largely ■ agricultural and pastoral country. After the 1979 revolution the Government announced its intention of giving greater emphasis to the development of agriculture with a view to reducing Iran's dependence on food imports, but it has so far had only limited success. Some redistribution of land has taken place, but agreement has not been reached on basic land reform.

Wheat is the principal crop; other important crops are barley, rice, cotton, sugar beet, fruit, nuts and

vegetables. Wool is also a major product. There are extensive forests in the north and west, the conservation of which is a continuing problem.

Industry.—Under the Shah, great emphasis was given to the development of industry. Apart from oil, the principal industrial products are carpets, textiles, sugar, cement and other construction materials, ginned cotton, vegetable oil and other food products, leather and shoes, metal manufactures, pharmaceuticals, motor vehicles, fertilizers and plastics. Industrial output was severely curtailed by the 1979 revolution, ■ a result of which many industrialists left the country. In July 1979 the Government nationalized a wide range of major industrial concerns, having nationalized the banks and the insurance companies the previous month. Foreign trade is controlled by the State, although formal legislation to this effect has yet to be passed and the private sector plays an increasingly important role.

Energy.—The oilfields, which lie in South Western Iran, were nationalized in 1951. From 1957 until the 1979 revolution ■ consortium of eight oil companies (one British, one French, one Dutch, and five U.S.) ■ responsible for the production, refining and sale of oil. In July 1979 the National Iranian Oil Company assumed full control of the oil industry. In addition to that extracted from the onshore wells, oil is also produced from ■ number of off-shore oilfields. Oil production by June 1979 had reached an average of 3·5 million b.p.d., but is now approximately 2·2 million b.p.d., of which some 1·5 million b.p.d. is exported. Iran is ■ member of O.P.E.C.

Communications.—Tehran is at the centre of ■ network of highways linking the capital with other major towns, the ports and the frontiers with Turkey, U.S.S.R., Afghanistan and Pakistan, and with the Caspian Sea. The Trans-Iranian Railway runs from Bandar Turcoman, on the Caspian Sea, via Tehran to Bandar Khomeini, on the Persian Gulf. Other lines link Tehran with Tabriz and with Mashad. There are also railways from Tabriz to Julfa and from Zahedan to Quetta, and a branch line from Ahwaz to Khorramshahr. An extension from Qom to Yazd via Kashan is now in operation, as is one from Bandar Turcoman to Gorgan. An extension from Yazd to Kerman is partially complete. The Iranian rail system is linked to the Turkish system via Van. There is an international airport at Tehran (Mehrabad), and airports at all the major provincial centres. The

national airline, Iranair, is government-owned and operates international and domestic routes.

TRADE

Imports to Iran declined dramatically at the beginning of 1979 ■■■ result of the economic disruption caused by the revolution. Iran's aggressive oil sales policy during 1982 enabled foreign exchange reserves to recover from the 1981 low level and made possible increased imports. However, the drop in world oil prices in 1986 again affected Iran's foreign exchange earnings, and her level of imports declined.

Imports into Iran consist mainly of industrial and agricultural machinery, motor vehicles and motor vehicle components for assembly, iron and steel (including manufactures), electrical machinery and goods, meat, various other foods, and certain textile fabrics and yarns. The principal exports, apart from oil, are cotton, carpets, dried fruit, nuts, hides and skins, mineral ores, wool, gums, caviare, cumin seed and spices. Federal Republic of Germany, Japan and the U.K. are Iran's leading suppliers.

BRITISH DIPLOMATIC REPRESENTATION

Diplomatic relations were broken off by Iran in March 1989, and British interests are handled by the Swedish Embassy.

IRAQ

(Al-Jumhouriya al-'Iraqia)

REVOLUTIONARY COMMAND COUNCIL

Chairman, President of the Republic, and Supreme Commander of the Armed Forces, Saddam Hussain, assumed office July 16, 1979.

Members. Izzat Ibrahim (RCC Vice-Chairman); Taha Muhiddin Ma'aruf (Vice-President of the Republic); Taha Yasin Ramadhan (First Deputy Prime Minister); Dr. Sa'doun Hammadi (Deputy Prime Minister); Tariq 'Aziz (Deputy Prime Minister and Foreign Minister); Sa'doun Shakir; Hassan Ali. **Secretary General,** Khalid Abdul Mun'im Rasheed (acting).

In addition to those members of the R.C.C. holding departmental portfolios listed above, there are 17 other Ministers and one Minister of State.

EMBASSY OF THE REPUBLIC OF IRAQ

21 Queen's Gate, SW7 5JG
[01-584 7141/6]

Ambassador Extraordinary and Plenipotentiary, new appointment awaited.

Area, etc.—Traversed by the Rivers Euphrates and

Tigris, Iraq extends from Turkey on N. and N.E. to the Gulf on the S. and S.E. and from Iran on E. to Syria and Arabian Desert on W., the approximate position being between 37° to 48° E. long., and 37° to 30° N. lat. (see MAP, p. 784). The area of Iraq is 167,925 sq. miles (434,924 sq. km.), of which 37 per cent. is desert land. About 35 to 40 per cent. of the remainder is potentially cultivable either by rainfall or by irrigation.

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in eastern Erzurum, and flows westwards to ■ junction with the Kara Su, or Frat Su (276 miles); the other arm rises in the north-west of Erzurum in the Dumlu Dag. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Population.—At the Census of October 1987 Iraq had a total population of 16,278,316.

Language.—The language is mainly Arabic and English is widely used in commerce, science and the arts.

Antiquities.—In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C. Excavations in 1948 at Tel Abu Shahraein, south of 'Ur of the Chaldees,' confirm Eridu's claim to be the most ancient city of the Sumerian world. Hillah, the ancient city on the left bank of the Shatt el Hillah, ■ branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the 'house of the lofty-head' or 'gate of the god' (Tower of Babel). Mosul Governorate covers a great part of the ancient kingdom of Assyria, the ruins of Ninevah, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul. Qurna, at the junction of the Tigris and Euphrates, is traditionally supposed to be the site of the *Garden of Eden*.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal was elected King of Iraq. The country was ■ monarchy until July, 1958, when King Faisal II was assassinated. From 1958 Iraq has been under Presidential rule. The ruling Party is the Arab Ba'ath Socialist Party, which came to power on July 17, 1968.

Iraq has been engaged in hostilities with Iran since September 1980, originally over control of the Shatt-al-Arab waterway. In July 1982 Iranian forces moved across the border into Iraq, and since that time ■ series of inconclusive battles have been fought along the borders. Both sides carried out attacks on neutral shipping and in the summer of 1987 foreign navies entered the Gulf to escort neutral merchant shipping.

International efforts to end the fighting focused on United Nations Security Council Resolution 598 of July 1987, and ■ ceasefire came into effect on Aug. 20, 1988. A U.N. Observer Peace-Keeper Force was sent to the Gulf to monitor the ceasefire whilst peace talks continued.

Communications and Trade.—New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. Facilities at the port of Basra have been improved but the port has not been used since the outbreak of hostilities with Iran in Sept. 1980. Continuous dredging of the Shatt-al-Arab has also been suspended by hostilities and the channel has seriously silted. The port of Um Qasr near the Kuwaiti border has been developed for freight and sulphur handling and a container terminal is ready

for operation but not in use due to the port's proximity to the war zone. Road routes from Turkey and the Mediterranean are well used, and carry through traffic to Kuwait and the south. The border between Syria and Iraq was closed in late 1977, reopened in November, 1978 and closed again in April 1982.

There is an international airport at Baghdad. Iraqi Airways provide flights between Baghdad and London, and other international airlines operate to Europe. Iraqi Republican Railways provide regular passenger and goods services between Basra, Baghdad and Mosul, and links up through Syria and Turkey with the Mediterranean and the Bosphorus, though no through traffic has used the line since the Syrian government cut the rail link in April 1982. There is also a metre gauge line connecting Baghdad with Khanqaq, Kirkuk and Arbil.

Agriculture and Industry.—Apart from the valuable revenues to be derived from oil, agricultural development makes a valuable contribution to the wealth of the country and two harvests can usually be gathered in the year. Production fluctuates from year to year according to rainfall. The Government's concern with agricultural development is shown in the large financial allocations made to the sector. Salinity and soil erosion, caused by a high water table, inadequate irrigation and drainage and traditional farming methods, are the major problems now being addressed by development planners.

Increasing industrialization is taking place. Since 1987 the Government has been encouraging increased private and mixed sector involvement in the economy. Priority is being given to petro-chemicals, food industries, construction industries and engineering. Existing industries include cement, building materials, steel fabrications, food processing and the manufacture of consumer goods, as well as the development of mineral resources.

Iraq's major industry is oil production. It was nationalized on June 1, 1972 and accounts for approximately 98 per cent. of the total government revenue and 45 per cent. of the Gross National Product. Production was some 3·5 million barrels per day in 1979 but the effects of war damage on the Basra terminals and the closure of the trans-Syria pipeline reduced production until new pipelines were built via Turkey and Saudi Arabia. Total revenues from oil are estimated at \$11,000–14,000 million in 1988, although they are difficult to calculate due to fluctuations in price.

IRELAND

Position and Extent.—Ireland lies in the Atlantic Ocean, to the W. of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The area of the island is 32,588 sq. miles (84,402 sq. km.), and its geographical position between 51° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. Coast of Achill Island (Co. Mayo) are the highest cliffs in the British Isles, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coastline. The principal mountains, with their highest points, are the *Sperren Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtree Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain; the Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir, Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen, Boderg, Forbes, Ree* and *Derg*, and the Erne Chain of *Gowna, Oughter, Lower Erne*, and *Erne*; *Melvin, Gill, Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *lakes of Killarney*.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axehead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow,

in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age Celtic race of *Goidels* appears to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the southeast, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of Ierne was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Arddi* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland — the remnants of a bridge built in the time of Finn McCoul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished ■ Findgaill (White Strangers) and the Danes ■ Dubgall (Black Strangers), names which survive in "Fingall," "MacDougal" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laiginstir, Mumans-tir and Kunnak-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (880), at which the Hy Neill king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under the king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connacht, with varying fortunes. In 1152 Dermot MacMurrough (Diarmit MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Raudhri O'Connor (the high king of Ireland), and visited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though, under Henry VII, Sir Edward Poynings, ■ Lord Deputy, had passed at the *Parliament of Drogheda* (1494) the act later known as *Poynings' Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland ■■■

slave about sixteen years later escaping to Gaul at the age of 22. In 432 he was consecrated Bishop of Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

IRISH EMBASSY
17 Grosvenor Place, SW1X 7HR
[01-235 2171]

Ambassador Extraordinary and Plenipotentiary, His Excellency Andrew O'Rourke (1987).

Area and Population.—The Republic has ■ land area of 27,136 sq. miles (70,283 sq. km.), divided into the four Provinces of *Leinster* (Carlow, Dublin, Kildare, Kilkenny, Laoighis, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); *Munster* (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); *Connacht* (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of *Ulster* (Cavan, Donegal and Monaghan).

The estimated population of the Republic in 1987 was 3,543,000. Figures also showed 58,864 births, 18,149 marriages and 31,219 deaths in the year 1987 (provisional).

GOVERNMENT

The Constitution.—The constitution, approved by plebiscite on July 1, 1937, came into operation on December 29, 1937. The Constitution declares the national territory to be the whole island of Ireland, its islands and the territorial seas. Pending the reintegration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application ■ those of the Irish Free State, which did not include the six counties of Northern Ireland.

The Irish language, being the national language, is

the first official language. The English language is recognized ■■ second official language.

The President (*Uachtáran na hÉireann*) is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for ■ second term. The President summons and dissolves Dáil Éireann on the advice of the Taoiseach (Head of the Government). He signs and promulgates laws. The supreme command of the Defence forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The National Parliament (*Oireachtas*) consists of the President and two Houses: a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*).

Dáil Éireann is composed of 166 members elected by adult suffrage on ■ basis of proportional representation by means of the single transferable vote. All citizens, and such other persons in the state as may be determined by law, who have reached the age of 18 years and are not disqualified by law have the right to vote. Each Dáil may continue for ■ period not exceeding five years from the date of election.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the Taoiseach and 49 are elected; six by institutions of higher education, and 43 from panels of candidates, established on ■ vocational basis.

Members of Dáil Éireann are paid an allowance of IR£23,177 per annum (and members of Seanad Éireann IR£12,946). They are allowed travelling facilities between Dublin and their constituencies and are, subject to certain restrictions, granted free telephone and postal facilities from Leinster House and allowances for overnight stays in Dublin.

The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts ■■ collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The Taoiseach is appointed by the President on the nomination of Dáil Éireann. The other members of the government are appointed by the President on the nomination of the Taoiseach with the previous approval of Dáil Éireann. The Taoiseach appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the Taoiseach in the event of the death, permanent incapacitation, or temporary absence of the Taoiseach. The Taoiseach, the Tánaiste and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

The result of the general election on June 15, 1989 was as follows: *Fianna Fáil*, 77; *Fine Gael*, 55; *Labour*, 15; *Workers' Party*, 7; *Progressive Democrats*, 6; *Independent*, 6. Total membership including the Ceann Comhairle (Chairman), 166.

JUDICIAL SYSTEM

The judicial system comprises Courts of First Instance and ■ Court of Final Appeal called the Supreme Court (*Cúirt Uachtarach*). The Courts of First Instance include a High Court (*Ard-Chúirt*) and Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to consider the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, with such exceptions and subject to such regulations ■ may be prescribed by law.

EMBASSY OF ISRAEL

2 Palace Green, Kensington, W8 4QB

[01-937 8050]

Ambassador Extraordinary and Plenipotentiary, His Excellency Yoav Biran (1988).

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. $29^{\circ} 30'-33^{\circ} 15'$ N. and longitude $34^{\circ} 15'-35^{\circ} 40'$ E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South West.

The area is estimated at 8,019 sq. miles (20,770 sq. km.). The population was estimated at the end of 1987 at 4,404,000. During the upheavals of 1948-49 a large number of Arabs left the country as refugees and settled in neighbouring countries.

Hebrew and Arabic are the official languages of Israel. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judea and Samaria, rising in places to heights of nearly 4,000 ft.; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the southwestern extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 696 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Kishon. The largest lake is the *Dead Sea* (shared between Israel and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51·5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 ft. above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are among the principal historic sites in Israel: *Jerusalem*: the Church of the Holy Sepulchre: the Al Aqsa Mosque and Dome of the Rock, standing on the remains of the Temple Mount of Herod the Great, of which the Western (wailing) Wall is a fragment; the Church of the Dormition and the Coenaculum on Mount Zion; *Ein Karem*: Church of the Visitation, Church of St. John the Baptist. *Galilee*: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ. *Mount Tabor*: Church of the Transfiguration. *Nazareth*: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and medieval days, such as Ascalon, Caesarea, Atlit, Massada, Megiddo and Hazor. Other antiquities in the West Bank of Jordan and the Golan Heights at present occupied by Israel can now be visited from Israel. In accordance with the terms of the peace treaty signed between Egypt and Israel on March 26, 1979, Israel withdrew in April 1982 to the pre-1967 boundary, returning the Sinai area to Egyptian sovereignty.

Government.—There is a Cabinet and a single-chamber Parliament (*Knesset*) of 120 members. A general election is held at least once every four years. The last General Election was held in Nov. 1988.

Immigration.—The Declaration of Independence of May 14, 1948, laid down that 'the State of Israel

will be open to the immigration of Jews from all countries of their dispersion.' The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. From the establishment of the State until April 1978, about 1·7 million immigrants had entered Israel from over 100 different countries.

Education.—Elementary education for all children from 5 to 15 years is free, though secondary education is not compulsory. The law also provides for working youth, age 15–18 who for some reason have not completed their primary education, to be exempted from work in order to do so.

In 1985–86 enrolment in all educational establishments was 1,383,838: kindergartens 277,200; elementary education, 622,056; secondary education, 348,262; post-secondary, 98,420.

Finance.—Government expenditure in 1986 was 25,399,234,000 new Shekels at market prices. GNP at market prices ■ 40,354,965,000 new Shekels.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lod, Nahariya, Beersheba, Dimona, Ashdod and intermediate stations. In 1986 the total railway network amounted to 528 km. There were 12,823 km. of paved road and in 1986 819,102 licensed vehicles.

Shipping.—Israel's merchant marine had reached

■ total of 2,805,000 tons deadweight by December, 1985.

The chief ports are Haifa, ■ modern harbour, with ■ depth of 30 ft. alongside the main quay; the harbour on the Red Sea at Eilat, inaugurated in September 1965, has ■ capacity of 10,000 tons a day; Acre has ■ anchorage for small vessels; the deep-water port at Ashdod, 20 miles south of Tel Aviv, which started operations at the end of 1965, handled 8,006,000 tons of cargo in 1986. In the same year Israel's three main ports handled 17,048,000 tons of cargo.

Civil Aviation.—In 1986, 3,098,000 passengers passed through Ben Gurion airport, of which 230,146 arrived by charter flight.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that ■ large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to subtropical crops such ■ sorghum, millet and mangoes. The famous 'Jaffa' orange is produced in large quantities mostly in the coastal plain for export: high-profit export crops such as strawberries and cut flowers are increasingly important. The citrus yield during the 1985–86 season was 1,308,700 tons. Specialized glasshouse crops for export, such ■ flowers, tomatoes and strawberries, are becoming increasingly popular and exports of flowers in 1985 earned US\$75,454,000. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture

of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted. Beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing production (mostly from fish farms) was 14,958 tons in 1985–86. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production. The area under cultivation ■ 4,370,000 dunams, of which 2,370,000 is under irrigation. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—In value polished diamonds account for about one quarter of Israel's total exports. Amongst the most important of her exporting industries are textiles, foodstuffs, chemicals (mainly fertilizers and pharmaceuticals). Her metal-working and science-based industries are highly sophisticated and technologically advanced. These include the aircraft and military industries. Other important manufacturing industries include plastics, rubber, cement, glass, paper and oil refining.

TRADE

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

Italy is a Republic in the south of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 other small islands. Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area is about 116,304 sq. miles (301,225 sq. km.).

The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains: of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland, Austria and

Yugoslavia. Mont Blanc (15,771 ft.), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are Monte Rosa (15,217 ft.), Matterhorn (14,780 ft.) and several peaks from 12,000 to 14,000 ft.

The chief rivers are the Po (405 miles), which flows through Piedmont, Lombardy and the Veneto, and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The Rubicon, a small stream flowing into the Adriatic near Rimini, formed the boundary between Italy and Cisalpine Gaul: 'crossing the Rubicon' (as Caesar did in 49 B.C., thus 'invading' Italy in arms) is used to indicate definite committal to some course of action.

Population.—In Feb. 1986 Italy's population was 57,193,708.

Government.—Italian unity was accomplished under the House of Savoy, after a struggle from 1848 to 1870, in which Mazzini (1805–72), Garibaldi (1807–82) and Cavour (1810–61) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known ■ *Il Duce* (The Leader) was continuously in office ■ Prime Minister from Oct. 30, 1922, until July 25, 1943, when the Fascist regime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome, a decree was signed on June 5, 1944, by King Victor Emmanuel III under which Prince Umberto, the King's son, became 'Lieutenant General of the Realm.' The King remained head of the House of Savoy and retained the title King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election ■■■ held on June 2, 1946, together with a referendum on the future of the monarchy. The result showed a majority in favour of replacing the monarchy with a Republic. The Royal Family left the country on June 13, and on June 28, 1946, ■ Provisional President was elected.

Constitution.—The constitution of the Republic of Italy, approved by the Constituent Assembly on December 22, 1947, provides for the election of the President by an electoral college which consists of the two Houses of Parliament (the Chamber of

Deputies and the Senate) sitting in joint session together with three delegates from each region (one in the case of the Valle d'Aosta). The President, who must be over 50 years of age, holds office for 7 years. He has numerous carefully defined powers, the main one of which is the right to dissolve one or both Houses of Parliament, after consultation with the Speakers.

Defence.—The Armed Forces are largely manned by conscripts, who serve for 12 months. The Army has approx. 295,000 men, of whom 40,000 are regular officers and N.C.O.s. In addition, the elite paramilitary *Carabinieri* force, which is part of the Army, has over 96,000 men, most of whom are regulars. The Army, which has three Corps concentrated in the North, is equipped with Leopard 1 and M60 tanks and M113 armoured personnel carriers. There is also ■ parachute brigade, 5 alpine brigades, ■ missile brigade, and ■ Light Aviation Arm with over 300 helicopters. The Navy consists of one helicopter carrier, 3 cruisers, 4 destroyers, 9 submarines, 24 frigates and corvettes and 24 mine warfare ships. Manpower strength is approx. 45,000. The Air Force has 70,000 men and 347 combat aircraft. It is largely ■ tactical air force, equipped with Tornado, F104 and G91 aircraft, but also has transport, anti-submarine and helicopter search and rescue units. There is a large Reserve Force of ex-conscripts under the age of 35.

REGIONS OF ITALY

Rome and Central Italy.—Rome was founded, according to legend, by Romulus in the year now known as 753 B.C. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the Kingdom was established in 1871. The capital is concerned mainly with tourism and government, but its importance ■ ■ business centre is steadily increasing, and it is reportedly the third largest industrial centre in the country.

Lombardy and Milan.—In the Lombardy region are to be found some 15·7 per cent of Italy's commercial and banking services and some 21·9 per cent of her manufacturing industry. The whole range of Italian industry is represented, most important being the steel, machine tool and motor car factories.

Turin and Piedmont.—Turin between 1861 and 1865 was Italy's first capital ■ the home of the Piedmontese Royal Family. Now it is the headquarters of Europe's largest manufacturer of motor cars, produces 75 per cent of Italy's motor vehicles and over 80 per cent of its roller bearings. Turin is also Italy's second largest steel producing city. Piedmont is the centre of the Italian textile industry based mainly on Biella.

Genoa and the Ligurian Riviera.—Genoa has been one of Europe's major ports since the Middle Ages, and handles one-third of Italy's foreign trade. About 80 per cent of the goods handled are imports.

Venice and the North-East.—Venice is primarily ■ tourist attraction of unique beauty. It was founded in the middle of the 5th century by refugees from the mainland fleeing attacks, and by the 16th century it was one of the strongest and richest states of Europe, dominating Eastern Mediterranean trade. It lost its independence in 1797 when Napoleon handed it over to Austria. Industry (paper and stationery, mechanical equipment, consumer goods, electrical appliances, woollens) is now developing in the Venice area, particularly on the autostrada linking Venice with her historical and now developing rivals, Verona, Vicenza, Padua and in the areas around Treviso and Pordenone. Near Trieste, is the modern Monfalcone shipyard.

Tuscany, Emilia and Romagna.—Florence, the capital of Tuscany, was one of the greatest cities in

Europe from the 11th to the 16th centuries, and the cradle of the Renaissance. Under the Medici family in the 15th century flourished many of the greatest names in Italian art, including Filippo Lippi, Botticelli, Donatello and Brunelleschi and in the 16th century great Florentine artists like Michelangelo and Leonardo da Vinci. These regions were the agricultural centre of Italy but the post-war period has ■ the development of large industrial centres at Bologna, Florence, Modena, Pistoia and Ravenna. Most of the new firms are small or medium-sized. The footwear industry is based in Florence, textiles in Prato, reproduction furniture at Cascina and Poggibonsi, ceramics at Sassuolo, and glass and pottery at Empoli and Montelupo. Bologna is an important centre for the food industry.

Naples and the Toe of Italy.—Naples, formerly the capital and administrative centre of the Kingdom of Naples and Sicily, remains the dominant city in the area, but it is beset with great problems of unemployment and the need for modernization. Around it, however, helped by Government incentives, industry is slowly developing, northwards to Caserta, southwards to Salerno and eastwards to Benevento.

Puglia.—Bari has always been ■ commercial centre and now industrial development is also taking place in the areas of Taranto, Brindisi and Foggia. At Taranto there ■ a highly-mechanized steel-works and ■ modern oil refinery. The Bari industrial zone has factories producing electronic and pneumatic valves, specialized vehicle bodies and tyres, etc. The main industry of Brindisi is a petro-chemical plant. At Foggia there is a textile factory.

Sicily.—The main source of income is agriculture, particularly citrus fruits, almonds and tomatoes, but this faces severe competition. Oil in small quantities has been found off the southern shore of the island and drilling continues, while onshore there are growing oil-refining, natural gas and petrochemical industries. Small and medium sized industries, benefiting from the Government's incentives, are developing, and tourism is bringing an increasing amount of revenue to the island.

Sardinia.—Sardinia is an autonomous region, with its capital at Cagliari. Six main industrial development areas have been officially designated. The major industries are aluminium production (there is ■ smelting plant at Porto Vesme), petrochemicals, lead and zinc mining; and the tourist industry is flourishing.

THE ECONOMY

Italian gross domestic product in 1986 was £894,362,000 million. The economy has recovered from the setbacks of the early seventies, reversing the balance of payments and halving inflation, but this was accompanied by stagnation and increasing unemployment. The rate of inflation for 1985-86 was 5·9 per cent.

Industry.—The general index of industrial production (1980 = 100) stood at +2·7 per cent in 1985-86. The State-owned sector of Italian industry is important, dominated by the holding companies IRI (mechanical, steel, airlines), ENI (petro-chemicals) and ENEL (electricity).

Mineral Production.—Italy is generally poor in mineral resources but since the war deposits of natural methane gas and small deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Other minerals produced in significant quantities include iron ores and pyrites, mercury (over one-quarter of the world production), lead, zinc and aluminium. Marble is ■ traditional product of the Massa Carrara district.

Agriculture.—Agriculture accounted for 5·2 per cent of gross domestic product in 1984. The agricultural labour force was 2,242,000 in 1986.

Tourist Traffic.—In 1986 an estimated 18 million foreign tourists visited Italy, and in 1986 foreigners spent an estimated L14,691,000 million. The net balance on tourism was about L10,579,000 million.

Communications.—The main railway system is State-run by the *Ferrovie dello Stato*. A network of motorways (*autostrade*) covers the country, built and operated mainly by the IRI State-holding company and ANAS the State highway authority. The autostrada network covered 5,176 km. in 1974. *Alitalia*, the principal international and domestic airline, is also State-controlled by the IRI group. Other smaller companies, including ATI (an *Alitalia* subsidiary) and Air Mediterranea operate on domestic routes. The Italian mercantile marine totalled 7,587,117 tons in December, 1985.

FOREIGN TRADE

The balance of trade in 1987 showed a deficit of 11,138 billion lira, compared with 3,722 billion lira in 1986.

The main markets for Italian exports in 1987 were the O.E.C.D. countries, which accounted for almost 80 per cent of the total, and the E.C. markets with 56 per cent of the total. Imports came principally from the Federal Republic of Germany, France and the U.S.A.

Trade with U.K.

	1987	1988
Imports from U.K. . .	£4,145,659,000	£4,057,046,000
Exports to U.K. . . .	5,216,751,000	3,878,530,000

Language and Literature.—Italian is a Romance language derived from Latin. It is spoken in its purest form in Tuscany, but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of Western Europe) is one of the richest in Europe, particularly in its golden age (Dante, 1265–1321; Petrarch, 1304–1374; Boccaccio, 1313–1375) and in the renaissance (Ariosto, 1474–1533; Machiavelli, 1469–1527; Tasso, 1544–1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785–1873), Carducci (1835–1907) and Gabriele d'Annunzio (1864–1938). The Nobel Prize for Literature has been awarded to Italian authors on five occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934), Salvatore Quasimodo (1959) and Eugenio Montale (1975). In 1985, there were 48 daily newspapers published in Italy, of which 6 were published in Rome and 7 in Milan.

Education.—Education is free and compulsory between the ages of 6 and 14; this comprises five years at primary school and three in the 'middle school', of which there are about 8,000. Pupils who obtain the middle school certificate may seek admission to any 'senior secondary school', which may be a lyceum with a classical or scientific or artistic bias, or an institute directed at technology (of which there are eight different types), trade or industry (including vocational schools), or teacher-training. Courses at the lyceums and technical institutes usually last for five years and success in the final examination qualifies for admission to university. There are 35 State and 14 private universities, some of ancient foundation; those at Bologna, Modena, Parma and Padua were started in the 12th century. University education is not free, but entrants with higher qualifications are charged reduced fees according to a sliding scale. In general, schools, lyceums and universities are financed by local taxation and central government grants.

ISLANDS.—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 9,601. The *Pelagian Islands* (Lampedusa, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,811. The Tuscan Archipelago (including Elba), area 293 sq. km., pop. 31,861; Pontine Archipelago (including Ponza, area 10 sq. km., pop. 2,515); Flegrean Islands (including Ischia, area 60 sq. km., pop. 51,883); Capri; Eolian Islands (including Lipari, area 116 sq. km., pop. 18,636); Tremiti Islands (area 3 sq. km., pop. 426).

CAPITAL.—Rome. Population of the commune (1986) 2,821,420.

1986 estimates of the population of the communes of the principal cities and towns are Milan, 1,511,193; Naples, 1,204,959; Turin, 1,034,007; Genoa, 733,990; Bologna, 436,570; Florence, 429,865; Sicily, Palermo, 719,960; Sardinia, Cagliari, 223,021.

CURRENCY.—Lira of 100 centesimi.

FLAG.—Vertical stripes of green, white and red.

NATIONAL ANTHEM.—"Inno di Mameli".

NATIONAL DAY.—June 2.

Area and Population.—Japan consists of 4 large islands: Honshū (or Mainland), 230,448 sq. km. (88,839 sq. m.), Shikoku, 18,757 sq. km. (7,231 sq. m.), Kyūshū, 42,079 sq. km. (16,170 sq. m.), Hokkaidō, 78,508 sq. km. (30,265 sq. m.), and many small islands situated in the North Pacific Ocean between longitude 128° 6' East and 145° 49' East and between latitude 26° 59' and 45° 31' N., with a total area of 145,834 sq. miles (377,708

sq. km.), and a population (1988) of 121,870,000. In 1987 the birth rate was 11·1 per 1,000, and the death rate 6·2 per 1,000.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very mountainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,370 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical in the south to cool temperate in the north. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the First Emperor of Japan, ascended the throne on Feb. 11, 660 b.c. Under the Meiji constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house.

After the unconditional surrender to the Allied Nations (Aug. 14, 1945), Japan was occupied by Allied

forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

A new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

The conservatives have governed Japan almost without interruption since World War II. Since 1955, when it was formed, the Liberal Democratic Party has maintained an absolute majority in the House of Representatives. In June 1987 the strength of the Parties was: Liberal Democratic Party, 303; Japan Socialist Party, 87; Komeito, 57; Democratic Socialist, 29; Japan Communist Party, 27; Independents, 5. (Four vacant seats).

The House of Councillors whose powers are subordinate to the House of Representatives, re-elects half of its members every three years. In June, 1987, the strength of the Parties was: Liberal Democratic Party, 142; Japan Socialist Party, 42; Komeito, 24; Japan Communist Party, 16; Democratic Socialist Party, 12; Shimsei Club, 4; Niim Club, 4; Salarymen Party, 3; Independents, 4. (Two vacant seats).

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. The forest land includes *Cryptomeria japonica*, *Pinus massoniana*, *Zeikowaskeaki*, and *Paulownia imperialis*, in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. Tobacco, tea, potato, rice, wheat and other cereals are all cultivated: rice is the staple food of the people, about 10,627,000 tonnes being produced in 1987. Fruit is abundant, including the mandarin, persimmon, loquat and peach; European fruits such as apples, strawberries, pears, grapes and figs are also produced. There is a small-scale beef industry and pigs and chickens are widely reared.

Minerals.—The country has mineral resources, including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including motor vehicles, electronics, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in 1987 (average) was 60,840,000, of which around 2·8 per cent (1,730,000) are permanently unemployed. Of the total labour force, over 15 per cent are over 65 and this rate is increasing. Industrial, manufacturing and services workers numbered 53,430,000 and agricultural, forestry and fisheries workers 5,090,000 in 1985.

Communications.—There were 1,120,051 km. of road and 44,297 km. of rail road (steam and electric) in 1984. Also new Shinkansen (bullet train) tracks are currently being expanded. Japan National Railways was privatized on April 1, 1987 and is known as Japan Railways (JR). There are six regional companies and one goods company. The merchant fleet (oceangoing ships over 100 tons gross) totalled an aggregate of 64,16m. tons in 1985. The opening in 1988 of the Seikan rail tunnel and the Seto Ohashi

rail bridge means that the four major islands are now linked for the first time.

Armed Forces.—After the unconditional surrender of August, 1945, the Imperial Army and Navy were disarmed and disbanded.

Although the Constitution of Japan prohibits the maintenance of armed forces, internal security forces came into being in 1950, and 1952. In July, 1954, the mission of the forces was extended to include the defence of Japan against direct and indirect aggression.

The defence budget allocated for the fiscal year 1986-87 amounted to Yen 3,343,549 million, equivalent to 6·18 per cent of the General Account budget. The authorized uniformed strength was: Ground Self-Defence Force (GSDF) 180,000 (Reserve 43,000); Maritime Self-Defence Force (MSDF) 43,897 (Reserve 600); Air Self-Defence Force (ASDF) 46,204. Actual strengths of all three services are slightly below their authorized figure.

The GSDF is organized into five regional Armies, totalling thirteen Divisions, one of which is an Armoured Division. Major equipment includes tanks, APC's, towed and SP guns and rocket launchers, Hawk AA missiles, and 425 aircraft. Equipment is now largely manufactured in Japan.

The MSDF has 164 warships and auxiliaries including four DDH, four TARTAR-equipped GMDs, 42 destroyers, 14 submarines and 99 others, 205 fixed-wing aircraft and 97 helicopters.

The ASDF has 820 aircraft including 375 trainers, 43 transports and 75 support aircraft (including helicopters). There are 6 groups of Nike SAM missiles and one training unit of Patriot.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. About 1 per cent of Japanese are Christians. The Roman Catholic Church has 2 archbishops and 16 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 11 Japanese bishops (1987) and is an autonomous branch of the Anglican communion. There is also a United Protestant Church.

Education.—Under the Education Law of 1987, education at elementary (6 year course) and lower secondary (3 year course) schools is free, compulsory and co-educational. The (3 year) upper secondary schools are attended by 94 per cent of the age group. They have courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. 33 per cent of the population aged between 18 and 21 were enrolled in higher education in 1984. There are 2 or 3 year junior colleges and 4 year universities. Some of the 4 year universities have graduate schools. In 1987 there were 1,003 universities and junior colleges, the vast majority of which are privately maintained. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaido (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when Chinese characters came into use. Japanese who have received school education (99·8 per cent of the population) can read and write the Chinese characters in current (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is taught in all middle and high schools and universities. There are 125 daily newspapers in Japan.

and expenditure on the general account was Yen 60,414,200 million.

PRODUCTION AND TRADE

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal imports in 1988 consisted of mineral oils (20·5 per cent), raw materials (8·7 per cent) e.g. metal ores and scrap, 4·5 per cent, timber, 3·8 per cent, foodstuffs (15·5 per cent) (e.g. wheat and sugar), machinery (14·2 per cent), chemicals (7·9 per cent) and textiles (5·7 per cent).

Principal exports consist of steel (5·8 per cent), ships (1·5 per cent), motor vehicles (18·4 per cent), electric machinery and appliances (18·4 per cent), non-electric machinery (21·2 per cent), chemicals (4·5 per cent) and textile goods (2·6 per cent).

Ambassador Extraordinary and Plenipotentiary, His Excellency Dr. Albert Butros.

Counsellor, Dr. Issa Dabbah.

Defence Attaché, Col. I. Al-Khatib.

Service Office: 16 Upper Phillimore Gardens, W8. (01-937-9611).

Area and Population.—The Hashemite Kingdom of the Jordan, which covers 37,738 sq. miles (97,740 sq. km.), is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. Since the hostilities of June, 1967, that part of the country lying to the west of the Jordan River has been under Israeli occupation. The majority of the population are Sunni Muslims and Islam is the religion of the State, freedom of belief is, however, guaranteed by the Constitution. Total population on the East Bank of the Jordan was estimated (1988) to be 2,910,000.

History.—After the defeat of Turkey in the First World War the Amirate of Transjordan was established in the area east of the River Jordan as a state under British mandate. The mandate was terminated after the Second World War and the Amirate, still ruled by its founder, the Amir Abdullah, became the Hashemite Kingdom of Jordan. Following the 1948 war between Israel and the Arab States, that part of Palestine remaining in Arab hands (but excluding Gaza) was incorporated into the Hashemite Kingdom.

King Abdullah was assassinated in 1951; his son Talal ruled briefly but abdicated in favour of the present King, Hussein, in 1952.

All of Jordan west of the River has been under Israeli occupation since 1967. In 1988 Jordan severed its legal and administrative ties with the occupied West Bank, but did not formally renounce sovereignty over the area. As a result of the wars of 1948 and 1967 there are about 991,000 refugees and displaced persons living in East Jordan, about 200,000 of whom live in refugee and displaced persons camps established by the U.N. Relief and Works Agency (UNRWA). In addition there are some 300,000 entirely self-supporting Palestinian members of the East Jordanian community.

Government.—The present constitution of the Kingdom came into force in 1952. It provides for a senate of 30 members (all appointed by the King) and an elected House of Representatives. Until 1988, the House of Representatives had 60 members representing both the East and West Banks. Legislation passed in 1989 stipulated that in future elections, seats would be contested on the East Bank only. The first parliamentary elections since 1967 have been called for Nov. 1989.

The King appoints the members of the Council of Ministers. Crown Prince Hassan normally acts as Regent when King Hussein is away from Jordan.

Production and Industry.—The main agricultural areas are the Jordan Valley, the hills overlooking the valley and the flatter country to the south of Amman and around Madaba and Irbid, though several large farms, which depend for irrigation on water pumped from deep aquifers, have been established in the Southern desert area. The rest of the country is desert and semi-desert. The principal crops are wheat, barley, vegetables, olives and fruit (mainly grapes and citrus fruits). Agricultural production has increased considerably in recent years due to improvements in production and irrigation techniques, and exports to Europe and elsewhere are increasing.

Important industrial products are raw phosphates (1988: 5.6 million tons) and potash (1988: 1.3 million tons), most of which is exported. The Trans-Arabian oil pipeline (Tapline) runs through North Jordan on its way from the eastern province of Saudi Arabia to the Lebanese port of Sidon. A branch pipeline, together with oil trucked by road from Iraq, feeds a refinery at Zerqa (production 1988: 2.3 million tons) which meets most of Jordan's requirements for refined petroleum products. Sufficient reserves of natural gas have been discovered in the north-east to produce electricity for the national grid (generators were commissioned in May 1989). Despite extensive efforts no significant reserves of oil have been found.

Tourism has steadily developed. International-class hotels cater for businessmen and tourists in Amman and Aqaba. A spa hotel has been opened by hot springs close to the Dead Sea and a hotel complex is planned at the Dead Sea.

Communications.—The trunk road system is good. Amman is linked to Aqaba, Damascus, Baghdad and Jeddah by roads which are of considerable importance in the overland trade of the Middle East. The former Hejaz Railway enters Jordan from Syria east of Ramtha and runs through Zerqa and Amman to Ma'an with a spur to the top of the Ras al-Naqb escarpment. It is little used, mainly for freight between Amman and Damascus. The Aqaba railway carries phosphate rock from the mines of al Hasa and al Abiad to Aqaba. A total of 2,583 vessels called at Aqaba in 1988, and 20,096,200 tons of cargo were handled. The Royal Jordanian Airline operates from Amman to Aqaba and has an extensive network of routes to the Middle East, Europe, North America and the Far East.

KAMPUCHEA

COALITION GOVERNMENT OF DEMOCRATIC KAMPUCHEA

President, Prince Norodom Sihanouk (resigned July 1988) and again in Aug. 1989 after previously resuming the Presidency in Feb. 1989. Vice-President responsible for Foreign Affairs, Khieu Samphan. Prime Minister, Son Sann.

PEOPLE'S REPUBLIC OF KAMPUCHEA ('State of Cambodia')

Head of State, Heng Samrin. Chairman of Council of Ministers and Foreign Minister, Hun Sen.

Area and Population.—Situated between Thailand and the south of Vietnam and extending from the border with Laos on the north to the Gulf of Thailand, Kampuchea covers an area of 69,898 sq. miles, (181,035 sq. km.). It has a population (1985 U.N. estimate) of 7,284,000. The climate is tropical monsoon with rainy season from May to October.

Fifty per cent of the total land area is forest or jungle. Around the Tonlé Sap lake in the centre of the country and along the Mekong river, which traverses the country, there is ample fertile land for the support of the population in times of peace.

History.—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Full independence was proclaimed on November 9, 1953, and the process was completed when, in

January, 1955, the Kingdom of Cambodia became financially and economically independent not only of France but also of Laos and Vietnam. For the next fifteen years the political life of the country was dominated by Prince Norodom Sihanouk, first as King, then ■ Head of Government after he had abdicated in favour of his father and finally (following his father's death in 1960) ■ Head of State.

On March 18, 1970, during his absence from the country, Prince Sihanouk was deposed ■ Head of State by a vote of the National Assembly. A Republic was declared on October 9, 1970, and the name of the country changed to the Khmer Republic.

In April 1970 widespread fighting developed between communist insurgents and government forces which gradually developed into a general civil war. In April 1975 Phnom Penh fell to the North Vietnamese-backed Khmer Rouge. Prince Sihanouk returned to Cambodia on September 9, ■ nominal Head of State. However, a new Constitution was promulgated in Jan. 1976 and elections to a People's Representative Assembly were held in March. Prince Sihanouk resigned as Head of State in April, and Khiem Samphan was elected President of the State Presidency. A Government led by Pol Pot, the leader of the Khmer Rouge (Communist) party, was appointed and the state was renamed Democratic Kampuchea. During the years of Khmer Rouge rule thousands of Cambodians died or fled into exile. Relations between the Khmer Rouge regime and their Vietnamese backers deteriorated sharply, and on Dec. 25, 1978 Vietnamese troops invaded Cambodia in support of an uprising. The Cambodian capital, Phnom Penh, fell on Jan. 7, 1979. The following day the Cambodian National United Front for National Salvation established ■ People's Revolutionary Council, recognized by Vietnam, U.S.S.R. and by other, chiefly Soviet-aligned, countries. The state was renamed The People's Republic of Kampuchea. The Government, backed by an occupation army of Vietnamese troops, more or less controls Kampuchea, but is challenged by the guerrilla forces of the Coalition Government of Democratic Kampuchea, which was formed in June 1982 by the Khmer Rouge and non-communist groups. Vietnam has reduced its troop strength and has promised to withdraw completely by Sept. 26, 1989. Talks between the rival groups have produced some elements of compromise. As part of the rapprochement the regime in Phnom Penh has renamed the country The State of Cambodia, and has taken some measures to liberalize its constitution. The C.G.D.K. occupies Kampuchea's seat at the U.N.

Economy.—Kampuchea has ■ economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber used to be the main exports though production was brought to a standstill by the hostilities. Following the Khmer Rouge victory, the populations of Phnom Penh and other towns were forcibly evacuated to the country to work on the land, and re-establish the plantations producing such crops as cotton, rubber and bananas. Following the Vietnamese invasion of 1978 the towns were repopulated and commerce revived; currency was reintroduced. Factories, in particular textile mills, iron smelting works and cement works were put back in production.

Trade with U.K.

	1987	1988
Imports from U.K.	£435,000	£322,000
Exports to U.K.	268,000	55,000

Communications.—The country had over 5,000

kilometres of roads, of which nearly half were hard-surfaced and passable in the rainy season, although now in a state of disrepair. There are two railways, one from Phnom Penh to the Thai border; the other from Phnom Penh to Kampot and Kompong Som, but operations and repairs are hindered by the continuing fighting. Phnom Penh is on ■ river capable of receiving ships of up to 2,500 tons all the year round. The deep water port at Kompong Som on the Gulf of Thailand can receive ships up to 10,000 tons. The port is linked to Phnom Penh by ■ modern highway.

Religion and Education.—The state religion was Buddhism of the 'Little Vehicle'. The constitution guaranteed religious freedom, but in practice Buddhism was suppressed by the Khmer Rouge. There has been some revival recently and Buddhism has been re-established as the state religion. There were also small Muslim and Christian communities, but many members of them died or fled the country during Khmer Rouge rule. The national language is Khmer. In the years preceding the civil war considerable efforts were devoted to the development of education and new schools, colleges and technical institutes had been established. Until April 1975 there was a Buddhist University in Phnom Penh, and several residential teachers' training colleges were in operation. However, most of the country's educated elite died under the Khmer Rouge regime, which closed all institutions of higher education. The University was re-opened in 1988.

CAPITAL.—Phnom Penh, pop. 500,000 (1983 estimate).

CURRENCY.—Riel of 100 sen.

FLAG.—(C.G.D.K.) Red, with ■ yellow three-towered temple in the middle. ('State of Cambodia') Red upper half and blue lower half with ■ yellow five-towered temple in the middle.

NATIONAL DAY.—(C.G.D.K.) April 17; ('State of Cambodia') January 7.

KOREA

Korea is situated between 124° 11' and 130° 57' E. long., and between 33° 7' and 43° 1' N. lat. It has an area of 84,565 sq. miles (219,022 sq. km.), with an estimated population of approx. 62 million, of whom about 42 million live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Cheju.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained ■ integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R., the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for ■ National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31.

The Assembly passed ■ constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end.

Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang; ■ Supreme People's Soviet was elected in September 1948, and a Soviet-style Constitution adopted.

The Korean War.—The country remained effectively divided into two along the line of 38th parallel until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. An emergency meeting of the U.N. Security Council adopted ■ Resolution calling for an immediate cease-fire and the withdrawal of North Korean forces. This was ignored and the communist advance continued. In response to Security Council recommendations that United Nations members should furnish assistance to repel the attack, 16 nations, including the U.S.A. and the U.K., came to the aid of the Republic of Korea. However, the communist advance could not be contained until eventually ■ front was established around Pusan. Later, following a successful U.S. marine landing at Inchon, the communist forces were driven beyond the 38th parallel and U.S. forces reached as far north ■ the Yalu River. At this point the Chinese 'volunteers' joined the campaign and although the U.N. forces were initially driven back beyond Seoul they regrouped and threw the communist forces back to approximately the old dividing line. The fighting was ended by an Armistice Agreement signed by the U.N. Commander-in-Chief and the Commander of the North Korean army and the Chinese People's 'volunteers' on July 27, 1953. By this Agreement (which was not signed by the representatives of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea in 1954, but failed to agree on measures for re-unifying the country. Talks between North and South Korea on the reunification of the country have taken place intermittently.

Language and Literature.—Despite the great cultural influence of the Chinese, Koreans have developed and preserved their own cultural heritage. The Korean language is of the Ural-Altaic Group. Its script, Hangul, was invented in the 15th century; prior to this Chinese characters alone were used. Also invented around this time was the first metal movable printing type. The first works translated into Hangul were Buddhist, Confucian and other classics and it was only in the late 19th century that the European influence first began to be felt.

*Ambassador Extraordinary and Plenipotentiary, His Excellency Jay Hee Oh (1987).
Minister, Keun Bae Choi.*

The Republic of Korea has been officially recognized by the Governments of the United States, France, United Kingdom, and most other countries but, until recently, not by any Communist bloc country. On Feb. 1, 1989 Hungary established diplomatic relations with the Republic of Korea.

President Syngman Rhee was overthrown by ■ popular rising in 1960. After a year of unstable government ■ new regime was set up on May 16, 1961 by ■ army officers' coup led by Major General Park Chung Hee. On March 22, 1962 he took over as acting President. He was elected President in December 1963 and again in 1967, 1971, 1972 and 1978, but was assassinated on October 26, 1979. The country was placed under partial martial law. The then Prime Minister Choi Kyu Hah was elected President that December but resigned in August 1980 to be succeeded by Gen. Chun Doo Hwan. The constitution was revised and new elections held. President Chun was re-elected and his Democratic Justice Party gained ■ majority in the National Assembly after elections in March 1981. Following extensive political unrest a new constitution was agreed in October 1987. Roh Tae Woo became President in Feb. 1988. In elections to the new 299-seat National Assembly the largest number of seats (125) were won by the Democratic Justice Party but it failed to achieve an overall majority.

Constitution.—The President, who is Head of State, Chief of the Executive and Commander-in-Chief of the Armed Forces, is directly elected for ■ single term of five years. He appoints the Prime Minister with the consent of the National Assembly, and members of the State Council on the recommendation of the Prime Minister. The President is also empowered to take wide-ranging measures in an emergency, including the declaration of martial law, but must obtain the agreement of the National Assembly. The National Assembly is directly elected for ■ four-year term.

Armed Forces.—The Republic of Korea has an army of about 542,000, ■ small navy mostly for coastal patrol and protection duties, an air force with over 500 combat aircraft and a marine corps which is incorporated in the navy. About five per cent of the nation's G.N.P. is currently spent on defence.

Education and Religion.—Primary education is compulsory for six years from the age of seven. Secondary and higher education is extensive. The national illiteracy rate is among the lowest in Asia. There is freedom of religion. Buddhism has the most followers (13 million) followed by Protestantism (8

million) and Confucianism (4·7 million). Catholics number 2·2 million.

Agriculture and Fisheries.—The soil is fertile but the arable land is limited by the mountainous nature of the country. Staple agricultural products ■ rice, barley and other cereals, beans, tobacco and hemp. Fruit growing and sericulture are also practised. Ginseng, a medicinal root much used by both the Chinese and Koreans, forms a useful source of revenue. The Korean fishing industry is a major contributor to both food supply and exports.

Minerals.—The Republic of Korea is deficient in mineral resources, except for deposits of coal on the East Coast and tungsten. There are some prospects of discovering oil in the sea between Korea and Japan.

Finance.—The budget for 1988 totals about U.S.\$24,330 million.

Trade and Industry.—Since the beginning of 1962 a series of successful five-year plans resulted in real economic growth averaging around 10 per cent a year. The 6th economic development plan (1987–91) envisages a growth rate of 7·5 per cent. Annual per capita G.N.P. is U.S.\$4,000.

Since the 1960s the Republic of Korea has industrialized rapidly on the basis of greatly expanded exports. Important exports include cars, electrical and electronic equipment, footwear, ships, railway rolling stock and iron and steel products.

Exports to U.K.	936,038,000	1,135,107,000

Communications and Transport.—In 1980 there were 15,599 km. of paved road. Seoul has ■ subway system and there are national railway and airline systems. Korean Air operates regular flights to Europe, the United States, the Middle East and South East Asia. Pusan and Inchon are the major ports with Pusan serving the industrial areas of the south-east. Inchon, 28 miles from Seoul, serves the capital, but development and operation at Inchon are hampered by a tidal variation of 9–10 metres.

CAPITAL.—Seoul, population (Nov. 1987), 9,991,089. Other main centres are ♀ Pusan (3,654,097), Taegu (2,165,954) and ♀ Inchon (1,526,435).

CURRENCY.—Won of 100 jeon.

FLAG.—White, with red over blue device in centre, three black parallel bars, some broken, in each quarter.

The area of North Korea is 46,540 sq. miles (120,538 sq. km.), with ■ population of about 20,385,000 (1985 U.N. estimate). North Korea is rich in minerals and industry has been developed, but the economy has stagnated in recent years because of poor planning and a shortage of foreign exchange. The armed forces are believed to number about 840,000 men.

Government.—The Constitution of the Democratic People's Republic of Korea provides for ■ Supreme People's Assembly, presently consisting of 615 deputies, which is elected every four years by universal suffrage. The Assembly elects ■ President, and the Central People's Committee. In turn, the Central People's Committee directs the Administrative Council which implements the policy formulated by the Committee. The Administrative Council (37 members), formally the government of N. Korea, includes the Prime Minister and various ministers. In practice, however, the country is ruled by the Communist Party which elects a Central Committee; this in turn appoints a Politburo. The Senior Ministers of the Administrative Council are all members of the Communist Central Committee and the majority are also members of the Politburo.

EMBASSY OF THE STATE OF KUWAIT

45–46 Queen's Gate, SW7.

[01-589 4533]

Ambassador Extraordinary and Plenipotentiary, His Excellency Ghazi M. A. Al-Rayes (1980).

Area and Population.—Kuwait extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of 6,880 sq. miles (17,818 sq. km.). Kuwait has a dry, desert climate with a summer season extending from April to September. The mean temperature varies between 29–45° C. in summer, and 8–18° C. in winter. Humidity rarely exceeds 60 per cent except in July and August. The population is 1,695,128 (census 1985), of which about 42 per cent are Kuwaiti citizens, the remainder being large numbers of other Arab peoples, Iranians, Indians and Pakistanis. The total European and American population is about 12,500. The gross population growth rate is 6·4 per cent, a growth rate of 3·5 per cent for Kuwaiti citizens.

The official language is Arabic, and English is widely spoken as a second language. Islam is the official religion, though religious freedom is constitutionally guaranteed.

Government.—Although Kuwait had been independent for some years, the 'exclusive agreement' of 1899 between the Sheikh of Kuwait and the British Government was formally abrogated by an exchange of letters dated June 19, 1961. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait, but on Oct. 4, 1963, Iraq recognized Kuwait's independence although the Kuwait-Iraqi border has not yet been determined formally. Under the Constitution legislative power is vested in the Amir and the 50-member National Assembly, and executive power in the Amir and the Cabinet. The sixth National Assembly was dissolved on July 3, 1986.

Education, etc..—As a result of the very considerable oil revenues, the Kuwait Government embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. Kuwait University was opened in 1966, and in 1987–

88 had 15,602 students. In 1987–88 there were over 489,000 pupils at government and private schools.

Public Utilities.—Kuwait has a domestic water supply from water distillation plants which operate on natural gas from the oil fields. These plants can produce over 118,000,000 gallons of fresh water daily. Total water storage capacity, in reservoirs and water towers, amounts to over 1,201 million gallons. A natural source of fresh water, discovered at Raudhatain in the north of the State, has been developed to produce up to 3,000,000 gallons per day for at least 20 years and a pipeline has been built to carry the water to Kuwait town.

Electricity is produced by six power stations in Kuwait. Production in 1987 was 18,092 million kWh.

Communications.—Ships of British, Dutch, Kuwaiti and other lines make regular calls at Kuwait. Several international and Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. There is a network of dual-carriageway roads and more are under construction. Telecommunications and postal services are conducted by the Kuwait Government, which has built an earth satellite station.

Finance.—Revenue for the financial year 1987–88 was KD2,915 m. and expenditure was KD4,566 m. Oil revenues constitute 91·8 per cent. of total revenue. There are a large number of investment banks in some of which the Government holds equity. The banking system is controlled by the Central Bank of Kuwait.

Production.—The G.D.P. of Kuwait in 1987 was estimated at KD5,444·5 million.

Despite the desert terrain, 8·4 per cent of land is under cultivation, fruit and vegetables being the main crops. Shrimp fishing is becoming important.

The Government of Kuwait began to participate in the ownership of the British-and-American-owned Kuwait Oil Company in 1974 and an agreement was signed in November 1975 which brought 100 per cent government ownership. After a reorganization of the national oil industry in 1980, all the business was taken over by the Kuwait Petroleum Corporation.

The centre of Kuwait oil production is at Burgan, south of Kuwait City. Oil is also lifted in the Kuwait/Saudi Arabia Partitioned Zone (Wafra) south of the State. Oil is exported through a specially constructed port at Mina al Ahmadi. Production of crude oil in 1987 was approximately 1·2 million barrels per day. About 3,000 people are employed, including Kuwaitis, British, Americans, Indians, Pakistanis and citizens of other Arab countries.

Trade.—Oil exports constitute about 88 per cent of Kuwait's total exports. Non-oil exports include chemical fertilizers, ammonia and other chemicals, metal pipes, shrimps and building materials; re-exports accounted for 73 per cent of non-oil exports in 1982. Major trading partners are Asian countries, followed by E.C. countries and Arab states.

Position and Extent.—The People's Democratic Republic of Laos is in the northerly part of Indo-China, lying between China and Vietnam, on the north and east, and Burma (Myanmar) and Thailand on the west. Laos has a common boundary with Kampuchea to the south. The area of the country is 91,429 sq. miles (231,800 sq. km.), with a population (1985 U.N. estimate) of 4,117,000.

History.—The Kingdom of Lane Xang, the Land of a Million Elephants, was founded in the 14th century, but broke up at the beginning of the 15th century into the separate kingdoms of Luang Prabang and

Vientiane and the Principality of Champassac, which together came under French protection in 1893. In 1945 the Japanese executed a coup and suppressed the French administration. Under ■ Constitution of 1947 Laos became a constitutional monarchy under King Sisavang Vong of the House of Luang Prabang, and an independent sovereign state in 1949. The next twenty-five years in Laos were marked by power struggles and civil war.

After the fall of Saigon in April 1975, internal resistance to the *Pathet Lao* (communists) crumbled; Communist troops occupied the whole country and, though still paying lip-service to the 1973 ceasefire agreement and maintaining a façade of coalition, the *Pathet Lao* took over the government and began to implement an authoritarian regime with policies of austerity and economic self-sufficiency. On December 2, 1975, following the abdication of the King, Laos was declared a People's Democratic Republic and the *Pathet Lao* assumed full charge of the country.

Economy.—There is no significant industrial base in Laos, an estimated 85 per cent of the work force being engaged in agriculture, largely concerned with rice cultivation. Rice production in 1984 amounted to 1.3 million tonnes, thus rendering the country theoretically self-sufficient in this staple food.

In 1984, exports amounted to US\$36.2 m. and imports to US\$98.4 m. Hydro-electric power was 88.3 per cent of exports, timber 8.5 per cent, and coffee 1.2 per cent. Clearing agreements have been signed with certain socialist countries and the trade gap is largely financed by foreign aid, of which some 60 per cent is provided by socialist countries.

Laos' economic performance so far has been poor and shows no signs of early recovery, the free market rate for the dollar is much higher than the official rate and prices of consumer items continue to increase.

Currency.—In January 1980 a 'new' Kip replaced the former currency. In July 1983 the non-commercial rate of exchange was rectified by the State Bank.

Area and Population.—Lebanon forms a strip about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Israel frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, from which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Muslims and Druses. The total area of Lebanon is 4,015 sq. miles, (10,400 sq. km.), population (1985 U.N. estimate), 2,668,000.

Government.—Lebanon became an independent state on Sept. 1, 1920, administered under French Mandate until Nov. 22, 1943. Powers were transferred to the Lebanese Government from Jan. 1, 1944, and French troops were withdrawn in 1946.

In April 1975, serious fighting broke out in Beirut between members of the predominantly Christian Phalangist Party and mainly Muslim militias later supported by Palestinian guerrillas based in Lebanon. The fighting continued and increased throughout 1975 and 1976. In the autumn of 1976 the Arab Deterrent Forces composed mainly of Syrian troops, imposed an effective ceasefire. In March 1978, Israeli forces invaded but withdrew some months later, handing over their positions, except for a belt in the south, to the U.N. Interim Force in Lebanon (UNIFIL). Major bouts of fighting took place in October 1978 and April/May 1981, interspersed with regular clashes on a smaller scale. In the summer of 1982 Israeli forces again invaded the country, penetrating as far as Beirut. Following negotiations, Palestine Liberation Organization guerrillas left Beirut for various Arab countries.

The north-east of the country is currently occupied by Syrian and Palestinian forces. Although the bulk of Israeli troops withdrew from southern Lebanon in 1985, a buffer zone controlled by Israeli-backed Christian militias has been established along the Israeli-Lebanon border.

Reconciliation talks in Geneva and Lausanne, Switzerland, in March 1984, failed to produce any lasting agreement. Attempts to impose a Syrian-brokered accord in December 1985 failed when the main Christian militia overthrew the leadership which had signed it.

In Sept. 1988 President Gemayel appointed a Christian-led military government. A rival Muslim government led by Dr. Selim Hoss was at the same time set up in West Beirut. In March 1989 Gen. Aoun announced a 'War of Liberation' against the Syrians.

Production.—Fruits are the most important products and include citrus fruit, apples, grapes, bananas and olives. There is some light industry, mostly for the production of consumer goods, but most factories have been adversely affected by the instability of the past fourteen years. There is little remaining of the famous cedars of Lebanon.

Communications.—A railway runs from Beirut to Damascus, connecting at Rayak with a branch line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A railway also runs up the coast from Nakwia to Tripoli. The railways are not functioning as a result of the civil war. There is an international airport at Beirut, served by the national carrier MEA and a few others from East Europe. Operations can be disrupted by fighting in the city.

Archaeology, etc.—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of first to third century Roman temples and Jubail (Biblos), one of the oldest continuously inhabited towns in the world, and ancient Tyre.

Language and Literature.—Arabic is the official language, and French and English are also widely used.

Education.—There are six universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University, the Beirut University College, the Kaskik Saint Esprit University and the Arab University which are recent foundations in the early stages of development. There are several institutions for vocational training, some of which have been rendered inoperative by the civil war, and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

Finance.—No reliable statistics have been published for some time. The country is known to have a deficit, and the Lebanese pound has lost much of its value against foreign currencies.

Trade.—Principal imports are gold and precious metals, machinery and electrical equipment, textiles and yarns, vegetable products, iron and steel goods, and motor vehicles. There has been a gradual decline in the overall amount of imports, as a result of continued instability.

Principal exports include gold and precious metals, fruits and vegetables, textiles, building materials, furniture, plastic goods, foodstuffs, tobacco and wine.

At one time there was a considerable transit trade through Beirut into the Arab hinterland. Lebanon is the terminal for two oil pipe lines, one formerly belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans Arabian Pipeline Company, at Sidon. These lines have not functioned for some years, for political/security considerations.

EMBASSY OF THE REPUBLIC OF LIBERIA
2 Pembroke Place, W2 4XB
[01-221 1036]

Ambassador Extraordinary and Plenipotentiary, His Excellency Willie A. Givens (1985).

An independent republic of West Africa, occupying that part of the coast between Sierra Leone and the Côte d'Ivoire, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 sq. miles (111,369 sq. km.), and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822 as a colony for freed American slaves, and has been recognized since 1847 as an independent State. The population at the Census of 1974 was 1,481,524; a 1988 estimate put the figure at 2,300,000.

William V. S. Tubman, President of Liberia since 1944, died in 1971 and was succeeded by Dr. Tolbert. The Constitution was suspended following a military coup on April 12, 1980 led by M/Sgt. Samuel K. Doe, who then became Head of State. Executive power is now vested in the Head of State assisted by an appointed Cabinet. A new Constitution was endorsed by a referendum on July 3, 1984 and on July 22 the People's Redemptive Council was dissolved and replaced by an interim National Assembly, comprising the Council and 35 civilian members, which will oversee the country's return to civilian rule. Presidential and legislative elections were held in Oct. 1985; and on Jan. 6, 1986 the Interim Assembly was dissolved and replaced by a Legislative Assembly.

The Army of Liberia consists of one division of 2 brigades of militia, three regular infantry battalions, one engineer battalion and a small coastguard.

The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports. International and African airlines call at Robertsfield, 35 miles from Monrovia. Spriggs Payne airfield, on the outskirts of Monrovia, is used for internal flights.

Liberia is receiving assistance from a number of countries, including the United Kingdom, and from the E.C. and various international agencies. This aid is mainly directed towards the implementation of Liberia's National Socio-Economic Development Plan.

LIBYAN DIPLOMATIC MISSION IN LONDON

Following the break of diplomatic relations with Libya in April 1984, the Royal Embassy of Saudi Arabia has handled Libyan interests in Britain.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three former provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of 679,362 sq. miles (1,759,540 sq. km) and a population (1989 estimate) of 3,500,000. The people of Libya are principally Arab with some Berbers in the West and aboriginal tribes in the Fezzan. Islam is the official religion of Libya, but other religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The southern part of the country lies within the Sahara Desert. There are no rivers, and, as rainfall is irregular good harvests are rare. The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Tolmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. An Italian expedition found in the S.W. of the Fezzan a series of rock-paintings more than 5,000 years old.

Production and Industry.—Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Jaghbub, Ghadames, Jofra, Sebha, Murzug, Brak, Ghat, Jalo and the Kufra group in the South-East. The main industry is oil and gas production. There are pipelines from Zelten to the terminal at Mersa Brega, from Dahra to Ras-es-Sider, from Amal to Ras Lanuf and from the Intisar field to Zuettina. Since 1984 average production of crude oil has been about 1 million barrels per day. A major petrochemical complex is under construction at Ras Lanuf where a refinery and ethylene plant began operations in early 1985. The construction of an iron and steel plant at Misurata is under way, though its completion has been slower than expected. Economic

constraints have delayed some projects, particularly since Libya decided in 1983 to go ahead with a major irrigation scheme, the 'Great Man-Made River'.

Exports from Libya are dominated by crude oil, but some wool, cattle, sheep and horses, olive oil, and hides and skins are also exported. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials and consumer goods. In recent years the private sector has been virtually eliminated and Libya is now a state trading country with imports controlled by state monopolies. In early 1988, however, reforms were proposed which will allow a small private sector to be re-established.

Communications in Libya are good. Besides the coastal road running from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, which serves the main population centres, main roads now link the provincial centres, and the oil-producing areas of the south with the coastal towns. There are airports at Tripoli and Benghazi (Benina), Tobruk, Mersa Brega, Sebha, Ghadames and Kufra regularly used by commercial airlines, and military airfields near Tobruk, near Tripoli and at Al Watiya, south of Zuara.

Government.—Libya was occupied by Italy in 1911–12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy—*Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the U.N. General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations. The monarchy was overthrown by a revolution on Sept. 1, 1969, and the country was declared a republic. It was ruled by the Revolutionary Command Council (RCC) under the leadership of Colonel Muammar Gadafi.

In March 1977 a new form of direct democracy, the 'Jamahiriya' (state of the masses) was promulgated and the official name of the country was changed to Socialist People's Libyan Arab Jamahiriya. At local level authority is now vested in about 1,500 Basic and 14 Municipal People's Congresses which appoint Popular Committees to execute policy. Officials of these Congresses and Committees, together with representatives from unions and other organizations, form the General People's Congress, which normally meets for about a week early each year. This is the highest policy-making body in the country. The General People's Congress appoints its own General Secretariat and the General People's Committee, whose members head the 13 government departments which execute policy at national level. The Secretary of the General People's Committee has functions similar to those of a Prime Minister.

Since a reorganization in March 1979 neither Col. Gadafi nor his former RCC colleagues have held formal posts in the administration. Gadafi continues to hold the ceremonial title 'Leader of the Revolution'.

Libya has technical assistance agreements with a number of countries, and also employs large numbers of foreign labourers and experts.

Ambassador Extraordinary and Plenipotentiary, His Excellency Edouard Molitor (1989).

Luxembourg is a Grand Duchy in Western Europe, bounded by the Federal Republic of Germany, Belgium, and France. The area is 998 sq. miles (2,586 sq. km.), the population (Dec. 1984) 365,900, nearly all Roman Catholics. The country is well wooded, with many deer and wild boar. The language is Letzeburgesch but French is the official language; most speak German and many English.

Established as an independent State under the sovereignty of the King of the Netherlands a Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815–66, and was included in the German 'Zollverein'. In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, Germany renounced her former agreements with Luxembourg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium. The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxembourg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties, and also a member of the European Communities. Luxembourg is a mem-

ber of the Belgium—Netherlands—Luxembourg Customs Union (Benelux, 1960).

The Court of the European Communities has its seat in Luxembourg, as does the Secretariat of the European Parliament, the European Investment Bank, the European Audit Court and the European Monetary Co-operation Fund.

There is a Chamber of 64 Deputies, elected by universal suffrage for 5 years. Legislation is submitted to the Council of State.

The Grand Duchy was rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity over 5,700,000 tons. Government revenue for 1987 was estimated at L.F. 79,600 million, expenditure L.F. 79,700 million. The Luxembourg franc has at present the same value ■ the Belgian franc.

There are 170 miles of railway.

Madagascar lies 240 miles off the east coast of Africa and is the fourth largest island in the world. It has ■ area of 226,669 sq. miles (587,041 sq. km.), and a population (1988 estimate) of 11,000,000. The people are of mixed Polynesian, Arab and Negro origin. The languages spoken are Malagasy and French. There are sizeable French, Chinese and Indian communities.

Government.—It became a French protectorate in 1895, and a French colony in 1896 when the former queen was exiled. Republican status was adopted on October 14, 1958, and independence was proclaimed on June 26, 1960.

The post-independence civilian government was replaced by a military government in Jan. 1975 and the following month martial law was declared. A Supreme Council of the Revolution of 18 members under Capitaine de Frégate (now Admiral) Didier Ratsiraka was established on June 15, 1975.

In December 1975 ■ new constitution was approved in ■ referendum, which vested executive power in the President. He appoints a Council of Ministers to assist him, with the guidance of the Revolutionary Supreme Council. There is ■ 137-member National People's Assembly elected for a 5-year term by universal suffrage.

Revised agreements with France, signed on June 4, 1973, provided for the withdrawal of the French forces stationed in the country after independence. The French naval base at Diégo Suarez (now called Antsiranana) was turned into ■ civilian ship repair yard. Madagascar also withdrew from the Franc Zone and announced ■ claim to the islands of Juan de Nova, Glorieuses, Isle de l'Europe, Bassa da India and Tromelin which had remained integral parts of the French Republic after independence.

The island's economy is still largely based on agriculture, which accounts for three-quarters of its exports. Development plans have placed emphasis on increasing agricultural and livestock production, the improvement of communications, the exploitation of mineral deposits and the creation of small industries.

The Republic of Mali, an inland state in north-west Africa, has an area of 478,791 sq. miles (1,240,000 sq. km.), and a population (1985 U.N. estimate) of 8,206,000. The principal rivers are the Niger and the Senegal.

Formerly the French colony of Soudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Senegal. The title of the Republic of Mali was adopted on Sept. 22, 1960.

Government.—The regime of Modibo Keita was overthrown on Nov. 19, 1968, by a group of Army officers who formed a National Liberation Committee and appointed ■ Prime Minister. Moussa Traore assumed the functions of Head of State. A new civil constitution came into being in 1979. The new government formed on May 4, 1978 contained ■ majority of civilians. On June 19, 1979, elections were held for an 82-member National Assembly. Presidential elections held on the same day confirmed Traore as President.

Economy.—Mali's principal exports are ground-nuts (raw and processed), cotton fibres, meat and dried fish. The Republic rejoined the CFA Franc Zone on June 1, 1984 when measures were taken to convert the Franc Malien at the rate of 2FM : 1 Franc CFA.

Mauritania lies on the north-west coast of Africa immediately to the north of Senegal. It is bounded on the east by the Republic of Mali. To the north it is bounded by Morocco and the Western Sahara. Mauritania and Morocco took possession of that territory in February 1976 when Spain formally relinquished all right to it and in April 1976 agreed on ■ new frontier dividing the territory between them. In August 1979, Mauritania relinquished all claim to the southern sector of the Western Sahara after ■ three-year war against the Polisario front guerrilla army. Area 397,955 sq. miles (1,030,700 sq. km.). The population was estimated at 1,888,000 in 1985. The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic. It became fully independent on Nov. 28, 1960. In 1972 Mauritania broke with the franc zone and established its own unit of currency, the Ouguiya, equal in value to 5 francs CFA.

Mauritania's main source of potential wealth lies in rich deposits of iron ore around Zouerate, in the north of the country. Exports began in 1963, via ■ railway laid for the purpose from the mine to the port of Nouadhibou. The deposits are being exploited under the aegis of the *Société Nationale Industrielle Minière* following the nationalization in 1974 of the internationally based company MIFERMA. There are copper deposits at Akjoujt which are being exploited by SÖMIMA, ■ company nationalized on Feb. 25, 1975; the mine was closed in 1978, but reopened in 1981.

Ambassador Extraordinary and Plenipotentiary, His Excellency Bernardo Sepulveda (1989).

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 14° 33' to 32° 43' N. lat. and 86° 46' to 117° 08' W. long., and comprising one of the most varied zones in the world. It contains 31 states and the federal district of Mexico, making in all 32 political divisions, covering an area of 761,605 sq. miles (1,972,547 sq. km.). At the 1980 Mexican General Census, the total population was 67,383,000, but ■ 1985 U.N. estimate gives a figure of 78,524,000.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing isthmus of Tehuantepec, their course being parallel to the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the peninsula of Lower California, with a mountainous surface,

separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl (El Pico de Orizaba) on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 ft.), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 ft.), and the summit of the plateau with its peaks is known ■ *Tierra Fria*, or cold region (above 6,000 ft.). The only considerable rivers are the *Río Grande del Norte* which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Río Grande de Santiago*, the *Río Balsas* and *Río Papaloapan*. The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flowered in the periods from A.D. 500 to 1100 and A.D. 1300 to 1500 and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archaeological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in Yucatán and Chiapas (Maya); Teotihuacón, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacáno); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Veracruz (Totonic); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spanish and only very few Aztec monuments remain.

A few years after the Conquest, the Spanish built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when ■ precarious independence was proclaimed. Friction with the United States in Texas led to the war of 1845–48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency led to invasion by French forces which installed Archduke Maximilian of Austria as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez,

restored the republic. Juárez's death was followed by the dictatorship of Porfirio Diaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists of ■ Senate of 64 members, elected for six years, and of ■ Chamber of Deputies, at present numbering 400, elected for three years. Presidents, who wield full executive powers, are elected for six years; they cannot be re-elected.

There are nine political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the governing party. The Mexican Communists allied with several like-minded smaller parties to form the Mexican United Socialist Party (P.S.U.M.) in 1982.

Communications.—Veracruz, Tampico and Coatzacoalcos are the chief ports of the Atlantic, and Guaymas, Mazatlán, Puerto Lázaro Cárdenas, Acapulco, Salina Cruz and Puerto Madero on the Pacific. Work is proceeding on the reorganization and re-equipment of the whole system; help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. The railways were completely nationalized in 1970.

Mexico City may be reached by at least three highways (with 14 entry points) from the United States, and work is complete on roads southward from Mexico City to Yucatán as well as on two principal highways to the Guatemalan border (with three entry points).

International telegraph services to the United States frontier are provided by the government-owned Mexican Telegraph Company and then through the United States to Canada and Europe.

Teléfonos de México, a state-controlled company, controls about 98 per cent of all telephone services. Satélite Latinoamericano, S.A. (SATELAT) is a joint government/private sector venture disseminating television programmes to Latin America through Intelsat IV satellite facilities leased by the Mexican Government.

There is a good national and international network of air services. There are 1,113 airports and landing fields in Mexico, of which eighteen are equipped to handle long-distance flights. There are 166 airline companies, including two of the major national airlines—*Mexicana de Aviación* and *Aeroméxico*. Passenger traffic is growing by about 14 per cent yearly, while cargo is increasing by ■ similar percentage.

Production.—The principal agricultural crops are maize, beans, rice, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, chick-peas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguey, or Mexican cactus, yields several fermented drinks, mezcal and tequila (distilled) and pulque (undistilled). Another species of the ■■■■■ plant supplies sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony and chicle trees. Agriculture employs an estimated 30 per cent of the working population.

The principal industries are mining and petroleum, but over the last twenty years there has been very considerable expansion of both light and heavy industries. Exports of manufactured goods now average about 20 per cent of total exports. The steel industry expanded steadily until recently and current production is around 6.5 m. tons. The mineral wealth is great, and principal minerals are gold, silver, copper, lead, zinc, quicksilver, iron and

sulphur. Substantial reserves of uranium have been found. In the non-metals sector, Mexico continues to produce 25 per cent of the world's supply of fluorspar.

The total proven petroleum reserves were 72 billion barrels in 1983. Crude oil production is currently about 2,600,000 barrels. Daily production of natural gas is approximately 3 billion cubic feet. Oil reserves have increased substantially due to important discoveries in the Gulf of Campeche. A new refinery at Tula, State of Hidalgo, is the nation's largest; and new refineries in Monterrey, State of Nuevo Leon, and Salina Cruz, State of Oaxaca, are under construction.

Textile production is led by the artificial fibres sector, which comprised 66 per cent of the industry's output in 1983.

Defence.—Supreme command is vested in the President, exercised through the Ministries of Defence (for Army and Air Force) and Marine.

The country is divided into 36 zones in which the regular army (106,000) and part-time conscripts (250,000) are trained. The Army in 1985 had three HQ Brigades, five Artillery Regiments, 26 mechanized and one Horse Cavalry Regiments. Transport, Engineering and Signals Regiments, and 78 Infantry Militias. In addition, there is a Rural Defence Militia of ■■■■■ 12,000 men.

The Navy has ■ strength of about 38,500 officers and men including the Naval Air Force and Marines. It is equipped with three destroyers, five frigates, six OPVs, 19 corvettes, 17 minesweepers, 31 coastal craft patrol, 12 inshore and river patrol boats, 13 transports and tugs, and one sail training ship. Many vessels are non-operational. The Marine Infantry has 10 battalions (4,300 officers and men). The Naval Air Force consists of four squadrons and 49 aircraft.

The Air Force has an approximate strength of 5,500 officers and ■■■■■ 298 aircraft, including tactical/training aircraft, reconnaissance aircraft/helicopters and transport aircraft. There is ■ Parachute Brigade consisting of three Parachute battalions (approx. 2,000 men).

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 95 per cent of the population. In addition to Spanish, there are five basic groups of Indian languages spoken in Mexico. The 1970 Census showed that of the 3,111,415 inhabitants speaking an Indian language, 25.7 per cent spoke Náhuatl; 14.6 per cent Maya; 9.1 per cent Zapotec; 7.1 per cent Otomi; 7.5 per cent Mixtec and ■ per cent one or other of the 59 dialects derived from these basic languages.

Education.—Education is divided into primary, secondary, preparatory and university. Primary education is free, secular and nominally compulsory.

CONSULATE-GENERAL IN LONDON
4 Audley Square, W1Y 5DR
[01-629 0734]

Consul-General, I. B. Ivanovic.

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, Fontvieille and Monte Carlo, the location of the famous casino. The Principality comprises a narrow strip of country about 2 miles long (area approx. 195 hectares), with approximately 27,063 inhabitants (1989) and a yearly average of over 250,000 visitors.

The principality, ruled by the Grimaldi family since the late 13th century, was abolished during the French Revolution and re-established in 1815 under the protection of the Kingdom of Sardinia. In 1861 Monaco came under French protection. The 1962 Constitution, which can be modified only with the approval of the National Council, maintains the traditional hereditary monarchy and guarantees freedom of association, trade union freedom and the right to strike. Legislative power is held jointly by the Prince and a uni-cameral, 18 member National Council elected by universal suffrage. Executive power is exercised by the Prince and a four-member Council of Government, headed by a Minister of State. The judicial code is based on that of France.

The whole available ground is built over, so that there is no cultivation, though there are some notable public and private gardens. Monaco has a small

harbour (30 ft. alongside quay) and the import duties are the same as in France.

CAPITAL.—Monaco-ville (1,234).

CURRENCY.—Monaco uses the French franc of 100 centimes ■ legal tender.

FLAG.—Two equal horizontal stripes, red over white.

NATIONAL ANTHEM.—Hymne Monegasque.

NATIONAL DAY.—November 19.

H.M. Consul-General, T. E. J. Mound, c.v.o., O.B.E. (resident at Marseilles).

Area and Population.—The Mongolian People's Republic is ■ large and sparsely populated country to the north of China. Its area is 604,250 sq. miles (1,565,000 sq. km.). Its population (July 1988) is about 2,000,000. However, this total constitutes only part of the Mongolians of Asia, ■ number of whom are to be found in China and in the neighbouring regions of the Soviet Union (especially the Mongolian Buryat Autonomous Region). This country, which is almost nowhere below 1,000 metres above ■ level, forms part of the Central Asiatic Plateau and rises towards the west in the high mountains of the Mongolian Altai and Khanggai Ranges. The Khentai Mountain Range, situated to the north-east of the capital Ulan Bator, is less high. The Gobi region covers much of the southern half of the country. It contains some sand deserts, but between these less hospitable areas there is semi-desert which provides pasture for great numbers of sheep, goats, camels and horses (the latter is still the characteristic means of transport for the rural population) and some cattle. In the steppe areas to the north pastoral is better and livestock more abundant. Even further north, in the better watered provinces, grain, fodder and vegetable crops are increasingly grown. There are several long rivers and many lakes, but good water is scarce since much of the lake water is salty. The climate is harsh, with a short mild summer giving way to ■ long winter when temperatures can drop as low as minus 50° C.

History.—Mongolia, under Genghis Khan the conqueror of China and much of Asia, was for many years a buffer state between Tsarist Russia and China, although it was under general Chinese suzerainty. The outbreak of the Chinese Revolution in 1911 led to a declaration of autonomy under

Chinese suzerainty which was confirmed by the Sino-Russian Treaty of Kiakhta (1915), but cancelled by a unilateral Chinese declaration in 1919. Later the country became a battleground of the Russian Civil War, and Soviet and Mongolian troops occupied Ulan Bator in 1921: this was followed by another declaration of independence. However, in 1924 the Soviet Union in a Treaty with China again recognized the latter's sovereignty over Mongolia; but this was never properly exercised because of China's preoccupation with internal affairs, and later by the war with Japan. The Mongolian People's Republic was formally established in 1924. Under the Yalta Agreement, Chiang Kai-shek agreed to a plebiscite, held in 1945, in which the Mongolians declared their desire for independence and this was formally recognized by Nationalist China. The country entered the United Nations in 1961. The heroes of Mongolian history during the earlier part of the century were Sukhebator, who died in 1923, and the Communist Choibalsan (died 1952), who did much to turn the country into the Communist state it is today, and carried out a systematic destruction of the power of the Lamas and the old princely houses which had previously been the dominant force in both the economy and the government.

Production, etc.—The total of Mongolia's livestock was 23 million in 1988. Traditionally the Mongolian is a herdsman, tending his flock of sheep, goats and horses, cows and camels and leading a totally nomadic life. With the coming of the Communist regime (under the Mongolian People's Revolutionary Party) and especially since 1952, great efforts have been made to settle the population, but a large proportion still live nomadically or semi-nomadically in the traditional *ger* (circular tent). The pastoral population was collectivized at the end of the 1950s into huge *negdel*s (co-operatives) and State farms which have hastened the process of settlement, but within these the herdsmen and their families still move with their *gers* from pasture to pasture as the seasons change. The country, and three city districts (Ulan Bator, Darkhan and Erdenet), is today divided into 18 *aimaks* (provinces) and beneath these into 258 *sumons* (districts), and these form the basis of the State organization of the country, parallel with which runs the apparatus of the Revolutionary Party.

Membership of the Communist bloc has brought Mongolia considerable quantities of aid from other Socialist countries, especially Czech, Polish and East German aid to supplement the massive assistance from the Soviet Union. Soviet and Bloc aid is hastening the process of industrialization; for although the economy remains predominantly based on the herds of animals, and the principal exports of the country are still animal by-products (especially wool, hides and furs) and cattle, factories serving the needs of the country have been started up and the coal and electricity industries are being developed to provide an industrial base. A joint Mongolian/Soviet enterprise for copper and molybdenum mining was opened in 1978, at Erdenet in northern Mongolia. It is now in full production and processes 16 million tonnes of ore annually. A major geological survey is being carried out by the CMEA countries, in order to prepare for the extraction of the considerable mineral deposits known to exist in Mongolia. Coal production in 1980 was 4.5 million tons and was expected to rise to 6.8 million tons by 1985.

Ulan Bator, which contains over a quarter of the country's population, is the main seat of industry. The second largest industrial centre is at Darkhan (pop. 80,000), north of the capital, near the Soviet frontier. Its industries include lime, cement and building materials, a flour mill and a power station. Choibalsan, in the east, is also being developed

industrially. Agriculture, formerly little practised, is now being extended. Average cereal production for 1976-80 was 347,000 tons, but by 1983 had risen to 800,000 tonnes. Communication is still difficult in the country as there are very few tarmac roads. The trans-Mongolian railway, following the line of the old north-south trade route, was opened in 1955 and links Mongolia with both China and Russia. Mongolia's fundamental difficulty is its very small population and labour force.

Foreign trade is dominated by the Soviet Union, with the eastern European countries taking most of what is left. Trade with western countries and Japan is developing slowly although the pace has increased recently as Mongolia embarks on its own version of perestroika.

Ambassador Extraordinary and Plenipotentiary, His Excellency Abdeslam Zenined, G.C.V.O. (1987).

Area and Population.—Morocco is situated in the north-western corner of the African continent between latitude 27° 40'–36° N. and longitude 1°–13° W. with an area estimated at 172,414 sq. miles (446,550 sq. km.), and a population (1989 estimate) of approx. 27,000,000. It is traversed in the north by the Rif mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate. The north-westerly point of Morocco is the peninsula of Tangier which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the Pillars of Hercules, the western gateway of the Mediterranean.

Western Sahara.—Formerly the Spanish Sahara, the territory was split between Morocco and Mauritania in 1976 after Spain withdrew in Dec. 1975. In 1979 Mauritania renounced its claim to its share of the territory, which was added by Morocco to its area. Morocco's annexation has been opposed by Polisario guerrillas, who want the territory to become an independent state. On August 30, 1988, Morocco and the Polisario Front accepted ■ U.N. peace plan. Under the plan ■ ceasefire will come into effect, and a referendum to determine the future of the area will be held.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coast (where a high degree of humidity is, however, prevalent), the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 27° C. and 7° C.

Government.—Morocco became an independent sovereign state in 1956, following joint declarations made with France on March 2, 1956, and with Spain on April 7, 1956. The Sultan of Morocco, Sidi Mohammad ben Youssef, adopted the title of King Mohammad V.

Following serious disturbances in Casablanca in March, 1965, attempts were made by King Hassan, in consultation with all political parties, to form a government of national union. These efforts were unsuccessful and on June 7, 1965, the King proclaimed a 'state of exception' and suspended Parliament. Assuming himself the office of Prime Minister, he announced the formation of a new government and indicated that constitutional changes were to follow. A revised constitution was approved by a national referendum on July 24, 1970 and brought into effect soon after. It was superseded by another constitution, also approved by a national referendum, on March 1, 1972. This provides that not only political parties, but trade unions, chambers of commerce and professional bodies will participate in the organization of

the State and representation of the people; specifies that the King is the supreme representative of the people; makes changes in the composition of the Regency Council and the Sovereign's rights and establishes a unicameral legislature. The Chamber has 306 members, 204 elected by direct universal suffrage (including 5 representing overseas workers) and 102 members elected by electoral colleges representing local government, industry, agriculture and working class groups. There were elections in Sept.–Oct. 1984 and the new Parliament began its 6 year term on Oct. 12. A new government was named in April 1985 which included members of three political parties, though over half the portfolios went to non-political appointees.

Defence.—The Moroccan army, formed in 1956, is about 200,000 strong. A Moroccan air force was formed in 1959 and a navy in 1960. Their strengths are about 13,500 and 8,000 respectively. The armed forces possess quantities of French, Spanish and American equipment, including aircraft, as well ■ little Soviet-supplied hardware.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The Five Year Plan (1981–85) for economic development placed particular emphasis on social improvement. Other priority sectors were industrial development, fisheries, agriculture and tourism. The next development plan (1987 onwards) is similar to the last. The world recession and high energy prices, coupled with a fall in the price of phosphates and poor harvests due to low rainfall have created problems for the economy since the end of the 1970s. However, rains in the winter of 1985–6 ended the long drought and the 1986 harvest was good. The 1988 harvest was excellent and the 1989 one is expected to be good also. Similarly the fall in oil prices, the value of the dollar and interest rates have helped.

Agriculture employs more than 40 per cent of the working population and accounts for about 36 per cent of Morocco's exports. The main agricultural exports are fruit and vegetables. Cork and wood-pulp are the most important commercial forest products. Esparto grass is also produced. There is ■ fishing industry and substantial quantities of canned fish, mainly sardines and fishmeal, are exported. Manufacturing industries are centred in Casablanca, Fez, Tangier and Safi.

Morocco's mineral exports are phosphates, fluorite, barite, manganese, iron ore, lead, zinc, cobalt, copper and antimony. Morocco possesses nearly three-quarters of the world's estimated reserves of phosphates. There are oil refineries at Mohammedia and Sidi Kacem handling about four million tonnes of crude oil per year, but no significant quantities of hydrocarbons have been found.

Tourism is of increasing importance to the Moroccan economy with development concentrated in Agadir and Marrakesh.

Morocco's main import requirements are petroleum products, motor vehicles, building materials, agricultural and other machinery, chemical products, sugar, green tea and other foodstuffs.

The trade of Morocco is chiefly with France, U.S.A., the Federal Republic of Germany, Italy, the United Kingdom, Spain, Canada, Iraq, Benelux and Kuwait.

Communications.—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez to Oujda, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due south from Oujda skirts the Morocco-Algeria frontier and reaches Bouarfa. Moroccan railroads cover 1,250 miles and traction is electric or diesel. An extensive network of well-surfaced roads covers all the main towns in the kingdom.

British Airways and Royal-Air-Maroc operate services between Casablanca and London. There are air services between Tangier, Agadir (seasonal), Marrakesh and London, and also between Tangier and Gibraltar connecting with London. Royal-Air-Maroc operates internal services. There are also regular services by many airlines in many parts of the world.

Language.—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken mainly in the towns. The national daily press consists of 6 Arabic and 5 French newspapers.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Muslim world. There is a secular university at Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants. American schools operate in Rabat and Casablanca.

CAPITAL.—Ψ Rabat (population 1,123,000, including Salé). Regional capitals, with municipal population figures as at 1989, are: Ψ Casablanca (2,904,000); Marrakesh (1,425,000); Fez (933,000); Oujda (895,000); Meknes (1,425,000); Ψ Agadir (700,000). [01-491 8146]

Ambassador Extraordinary and Plenipotentiary, His Excellency Armando Alexandre Panguene (1988).

Area and Population.—The People's Republic of Mozambique lies on the east coast of Africa, and is bounded by Swaziland in the south, South Africa in the south and west, Zimbabwe in the west, Zambia and Malawi in the north-west and Tanzania in the north. It has an area of 309,495 sq. miles (801,590 sq. km.), with a population estimated at 14,000,000 (1986). The official language is Portuguese.

Government.—Mozambique, discovered by Vasco de Gama in 1498, and colonized by Portugal, achieved complete independence from Portugal on June 25, 1975. The date had been agreed in September 1974 by Portugal and *Frelimo* (*Frente de Libertação de Moçambique*), the Marxist liberation movement.

Constitution.—The country is governed by a Council of Ministers and by the Permanent Political Committee of the *Frelimo* Party; membership of these two bodies virtually overlaps. No other political parties are permitted. The principal legislative body, the People's Assembly, consists of 216 members nominated by *Frelimo*.

The basis of the economy is subsistence agriculture, but there is an industrial sector based mainly in Beira and Maputo. After giving priority to the development of collective farms and state enterprises in all sectors, the government is now encouraging the private sector and foreign investment, particularly in agriculture and consumer goods production. Main exports are sugar, cashew nuts, copra, cotton, tea and sisal. There are substantial coal deposits in Tete province. Mozambique has a range of aid and co-operation agreements with a number of countries in Eastern Europe and in the West. An agreement of non-aggression and good neighbourliness with South Africa was signed on March 16, 1984 (the Nkomati Accord).

Area and Population.—Nepal lies between India and the Tibet Autonomous Region of China on the slopes of the Himalayas, and includes Mount Everest (29,028 ft.). It has a total area of 54,342 sq. miles (140,747 sq. km.), and a population estimated (1988) at about 18 million. The country comprises three distinct horizontal formations. In the south, joining the Indian plains, is the Terai, a fair proportion of which was covered with jungle. It has recently been more widely cultivated but wild life is preserved in parts. The region represents 23 per cent of the total land area and nearly 44 per cent of the population live there. The central belt of the country is hilly, but with many fertile valleys, leading up to the snowline at about 14,000 feet. The hills account for 42 per cent of the area of the country and about 48 per cent of the population. The remainder of the country, the Himalayan Region, consists of high mountains which are sparsely inhabited. The country is drained by three great river systems rising within and beyond the Himalayan mountain ranges and eventually flowing into the Ganges in India.

The inhabitants are of mixed stock, with Mongolian characteristics prevailing in the North and Indian in the south. The official religion is Hinduism: 89·5 per cent of the population are Hindus and 6 per cent are Buddhist. Gautama Buddha was born in Nepal.

History and Government.—The country was originally divided into numerous hill clans and petty principalities, but Nepal emerged as a nation in the middle of the 18th century when its component parts were unified by the warrior Raja of Gorkha, Prithvi Narayan Shah, who founded the present Nepalese dynasty. In 1846 power was seized by Jung Bahadur Rana after a massacre of nobles, and he was the first of a line of hereditary Ranas Prime Ministers who ruled Nepal for 104 years. During this time the role of the Monarchs was mainly ceremonial.

In 1950-51 a revolutionary movement achieved its aim of breaking the hereditary power of the Ranas and restoring the Monarchy to its former position. After 10 years, during which various parties and individuals tried their hand at government, the late King Mahendra proscribed all political parties and assumed direct powers on December 16, 1960, with the object of leading a united country to democracy. In 1962 he introduced a new Constitution embodying a tiered, partyless system of panchayat (council) democracy, under which there were elected councils at village level which in turn elect members to district council and thence to zonal councils; a referendum in May 1980 decided in favour of retaining the panchayat system, with some reforms; namely, election to the Rastrriaya Panchayat (National Parliament) by universal adult franchise (over 21 years old); selection of the Prime Minister by the Rastrriaya Panchayat and responsibility of his government to that body. The King retains certain reserve powers. The Rastrriaya Panchayat has 112 members elected from the 75 districts of Nepal. The King appoints 28 other members, making a total of 140. The last election was in May 1986.

Economy.—Nepal exports carpets, jute, handicrafts, garments, hides and skins, medicinal herbs, cardamom, pulses etc., and imports textiles, machinery and parts, transport equipment, medicine, construction materials etc. Tourism is the single largest commercial earner of foreign exchange (U.S.\$55·9 million in 1986-87).

The budget for the fiscal year 1988-89 is estimated at NRs. 19,520·2 million, of which NRs. 6,152,139 million is allocated to regular and NRs. 13,368,061 million to development expenditures. Revenue is estimated at NRs. 9,300 million, foreign aid and grants NRs. 8,890·2 million, and domestic borrowing NRs. 1,330 million.

Trade with U.K.

Imports from U.K.	£8,707,000	£4,968,000
Exports to U.K.	8,331,000	9,384,000

A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget. There are three commercial banks with branches throughout Nepal and three further banks, based only in Kathmandu, established since 1984 with approximately 49 per cent foreign bank participation.

Communications.—Kathmandu is connected with India by a road, the mountain section of which was built by India under the Colombo Plan, and to Tibet by a road to Kodari on the border which was built by the Chinese and opened on May 26, 1967. The Indian-aided Sunauli-Pokhara road (128 miles) was inaugurated in April 1972, and a road between Pokhara and Kathmandu, constructed by the Chinese, was opened in 1973. A link road between Mugling and Naryanghat, completed by the Chinese in 1981, has further improved communications between Kathmandu and the Terai. The East-West Highway (Mahendra Raj Marg) running along the entire length of the country is complete except for the Kohalpur-Mahahali

section. The total length of roads in Nepal in 1987-88 was 6,525 km. British assistance has included major road projects, agriculture, education and forestry.

Telecommunication services, both domestic and international, are available from the Central Telegraph Office or hotels. There are international subscriber dialling facilities from Nepal to 35 countries. Nepal Television was introduced in Aug. 1984.

Royal Nepal Airlines operates an extensive network of domestic flights, and there are international flights to India, Pakistan, Bangladesh, Burma, Singapore, Thailand, West Germany, and the Middle East.

CAPITAL.—Kathmandu, population (1981) 235,000. Other towns of importance are Biratnagar (94,000), Lalitpur (81,000) and Bhaktapur (50,500) and Pokhara (48,500).

CURRENCY.—Nepalese rupee of 100 paisa.

FLAG.—Double pennant of crimson with blue border on peaks; white moon with rays in centre of top peak; white quarter sun, recumbent in centre of bottom peak.

NATIONAL ANTHEM.—May Glory Crown Our Illustrious Sovereign.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. $50^{\circ} 46' - 53^{\circ} 34' N.$ and long. $3^{\circ} 22' - 7^{\circ} 14' E.$, consisting of 12 provinces (Eastern and Southern Flevoland being amalgamated to form the twelfth province) and containing a total area of 15,770 sq. miles (40,844 sq. km). The population (1988 estimate) is 14,669,000. The live birth rate in Jan., 1984 was 12·1 per 1,000 of the population, and the death-rate was 8·3.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, Yssel and Scheldt.

Language and Literature.—Dutch is a West Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used in the Netherlands Antilles. Afrikaans, one of the two South African languages, has Dutch in its origin, but differs from it in grammar and pronunciation. There are six national papers, four of which are morning papers, and there are many regional daily papers.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I, ■

Prince of Orange-Nassau, a descendant of the house which had taken a leading part in the destiny of the nation since the 16th century. The States-General consists of the *Eerste Kamer* (First Chamber) of 75 members, elected for 4 years by the Provincial Council; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by voters of 18 years and upwards. Members of the *Tweede Kamer* are paid.

Production.—The chief agricultural products are potatoes, wheat, rye, barley, sugar beet, cattle, pigs, milk and milk products, cheese, butter, poultry, eggs, beans, peas, vegetables, fruit, flower bulbs, plants and cut flowers and there is an important fishing industry. Among the principal industries are engineering, both mechanical and electrical, electronics, nuclear energy, petro-chemicals and plastics, road vehicles, aircraft and defence equipment, shipbuilding repair, steel, textiles of all types, electrical appliances, metal ware, furniture, paper, cigars, sugar, liqueurs, beer, clothing etc.

In 1985 the production of crude oil was 3,729 million kg and refined oil products 61,000 million kg; steel (1984) 5,739 million kg, and natural gas 80,721 million cubic metres.

Defence.—The armed forces are almost entirely committed to NATO. All ground and air units are assigned to the NATO Central Region, and naval forces to the Atlantic and Channel commands. Total armed forces number 106,183, which includes 48,720 conscripts and 1,495 women. In addition there are over 176,000 reservists. There is compulsory military service of 14–17 months.

Education.—Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. The principal Universities are at Leiden, Utrecht, Groningen, Amsterdam (2), Nijmegen (R.C.) and Rotterdam, and there are technical Universities at Delft (polytechnic); Eindhoven (polytechnic), Enschede (polytechnic) and Wageningen (agriculture). Illiteracy is practically non-existent.

Communications.—The total extent of navigable rivers including canals, was 4,845 km. at Jan. 1, 1985, and of metallised roads 97,189 km. In 1985 the total length of the railway system amounted to 2,867 km., of which 1,810 km. were electrified. The mercantile marine in January 1985 consisted of 550 ships of total 3,461,000 gross registered tons. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in 1985 was 370,640 km.

TRADE

The Dutch are traditionally a trading nation. Entrepot trade, banking and shipping are of particular importance to the economy. The geographical position of the Netherlands, at the mouths of the Rhine, Meuse and Scheldt, brings a large volume of transit trade to and from the interior of Europe to Dutch ports.

Principal trading partners are the Federal Republic of Germany and Belgium/Luxembourg. U.K. supplied 10 per cent of Netherlands imports in 1985 and took 9·5 per cent of Netherlands exports.

Excluding the building industry, the index of industrial production in the Netherlands (1980 = 100) was 101 in 1984 and the index of industrial production per worker (1980 = 100) was 122 in 1984.

OVERSEAS TERRITORIES

Aruba covers an area of 75 sq. miles (193 sq. km.) with a population (1988 estimate) of 62,500. The island of Aruba was from 1828 part of the Dutch West Indies and from 1845 part of the Netherlands Antilles. On Jan. 1, 1986 it became a separate territory within the Kingdom of the Netherlands. The 1983 Constitutional Conference agreed that Aruba's separate status would last for ten years from 1986, after which the island would become fully independent.

The economy of Aruba is based largely on tourism. In 1986 there were over 180,000 tourists.

Netherlands Antilles comprise certain islands in the West Indies (Curaçao, Bonaire, part of St. Martin, St. Eustatius, and Saba). The islands cover an area of 308 sq. miles (800 sq. km.) with a population (1986 estimate) of 188,000. The Netherlands Antilles (which have a federal parliament) are largely self-governing under the terms of the Realm Statute which took effect on December 29, 1954.

The economy of the Netherlands Antilles is based on small manufacturing industries. The soil is too poor to permit large-scale agriculture and most products for consumption, and industrial raw materials must be imported.

EMBASSY OF NICARAGUA ■ Gloucester Road, SW7 4PP [01-584 4365]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Francisco d'Escoto (1981).

Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between 10° 45'-15° N. lat. and 83° 40'-87° 38' W. long., containing an area of 50,193 sq. miles (130,000 sq. km.). It has a population (1987 U.N. estimate) of 3,500,000, of whom about three-quarters are of mixed blood. Another 15 per cent are white, mostly of pure Spanish descent and the remaining 10 per cent are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic coast and were formerly under British protection.

Government.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1518 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. In 1927, Augusto Cesar Sandino began a guerrilla war against the occupation of Nicaragua by U.S. Marines, which continued until they were expelled in 1933. Sandino was assassinated by Anastasio Somoza, Director of the National Guard, and in 1936 Somoza assumed the Presidency. He was succeeded in power by his sons Luis and Anastasio Somoza, until 1979 when the family and the National Guard were overthrown by guerrillas of the Sandinista National Liberation Front. A Junta of National Reconstruction subsequently took power.

Elections for President, Vice-President and ■

National Assembly were held on Nov. 4, 1984, and on Jan. 10, 1985 they replaced the Junta and the Council of State. Distribution of seats in the National Assembly was: Sandinista National Liberation Front 61; Democratic Conservative Party 14; Independent Liberal Party 9; People's Christian Social Party 6; Communist Party 2; Socialist Party 2; Marxist-Leninist Popular Action Movement 2.

On Jan. 9, 1987, President Ortega signed the new constitution but almost immediately re-introduced the state of emergency. Presidential and parliamentary elections are to take place in 1990.

Agriculture and Industry.—The country is mainly agricultural. The major crops are cotton, coffee (30 per cent of total export earnings), sugar cane, tobacco, ■ and bananas. Beans, rice, ■ and ipecauana, livestock and timber production are also important. However, fishing, forestry, grain and cattle production have been hit by the civil war in the main growing areas. Nicaragua possesses deposits of gold and silver.

Communications.—There are 252 miles of railway, all on the Pacific side and approximately 5,500 miles of telegraph. There are 51 radio stations and two television stations in Managua. An automatic telephone system has been installed in the capital and extended to all major cities. A ground station for satellite communication was inaugurated in 1973. Transport except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the inter-oceanic highway runs from the Corinto on the Pacific coast via Managua to Rama, where there is a natural waterway to Bluefields on the Atlantic. The country's main airport is at Managua. The chief port is Corinto on the Pacific.

Language and Literature.—The official language of the country is Spanish and the majority profess Catholicism, although the English language and the Moravian Church are widespread on the Atlantic coast. There are three daily newspapers published at Managua, apart from the official Gazette (*La Gaceta*). A national literacy campaign in 1980 has reduced illiteracy to 12 per cent. There are universities at León and Managua.

Trade with U.K.

	1987	1988
Imports from U.K.	£7,883,000	£8,856,000
Exports to U.K.	717,000	725,000

Considerable quantities of foodstuffs are imported as well as cotton goods, jute, iron and steel, machinery and petroleum products. The chief exports are cotton, coffee, beef, gold, sugar, cottonseed and bananas.

CAPITAL.—Managua, population 615,000. The centre was almost totally destroyed in the earthquake of December 1972. León, 158,577; Granada, 72,640; Masaya, 78,308; Chinandega, 144,291.

CURRENCY.—Córdoba (C\$) of 100 centavos.

FLAG.—Horizontal stripes of blue, white and blue, with the Nicaraguan coat of arms in the centre of the white stripe.

NATIONAL DAY.—September 15.

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad, Nigeria, Benin, Mali and Burkina.

It has an area of about 489,191 sq. miles (1,267,000 sq. km.), with a population (estimate, 1985) of 6,317,550. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savanna or desert. The main ethnic groups are the Hausa (54 per cent) in the south, the Songhai and Djerma in the south-west, the Fulani, the Beriberi-Manga, and the nomadic Tuareg in the north. The official language is French.
